Administration**

Project Number
**McClancy HS
LGA 841-099**

Airport Name
LaGuardia Airport

Project Description
Soundproofing (Window replacement & AC)

Contractor's Name
Nagan Conair JV

1. Rough Estimate of Percent Completion to Date of Construction Phases
(Include items such as clearing, grading, drainage, base, surface, lighting, etc.)
92%

2. Work Completed or in Progress this period
Little or no work completed since last report dated 10/18/07

3. Brief Weather Summary This Period Including Approximate Rainfall and Periods of Below Freezing Temperature
(On earthwork jobs include soil conditions)
Precipitation on 6 days throughout the last 13 days, Temperatures range from lowest 43 degrees to highest 81 degrees (F).

4. Summary of Laboratory and Field Testing This Period *(Note failing tests and any retests. Summarize out-of-tolerance material. Identify material subject to pay reduction.)*
None

5. Describe Anticipated Work by Contractor for Next Period
NONE- See item 6

6. Problem Areas/Other Comments *(Revisions to plans and specifications approved or denied, delays, difficulties, etc. and actions taken.)*
**This report covers 13 day period from 10/19/07 to 10/31/07.
No work has been performed other than minor adjustments to the BMS and checking on a reported minor pipe leak in the mechanical room**

Period Ending
10/18/07

Project Number
**McClancy HS
LGA 841-099**

Airport Name
LaGuardia Airport

Project Description Soundproofing (Window replacement & AC)	Contractor's Name Nagan Conair JV
---	---

1. Rough Estimate of Percent Completion to Date of Construction Phases
(Include items such as clearing, grading, drainage, base, surface, lighting, etc.)
92%

2. Work Completed or in Progress this period
Paving of Parking lot
Gas booster controls wiring
Minor architectural work, patching, painting, replacing damaged ceiling tiles
Completed 90% of louver installation in period between 8/24 and 9/24.

3. Brief Weather Summary This Period Including Approximate Rainfall and Periods of Below Freezing Temperature
(On earthwork jobs include soil conditions)
Precipitation on 7 days throughout the last 30 days, Temperatures rage from lowest 48 degrees to highest 89 degrees (F).

4. Summary of Laboratory and Field Testing This Period (Note failing tests and any retests. Summarize out-of-tolerance material. Identify material subject to pay reduction.)
None

5. Describe Anticipated Work by Contractor for Next Period
Complete granite sills
complete louver installation
complete field restoration, repair poor paving
chiller fence

6. Problem Areas/Other Comments (Revisions to plans and specifications approved or denied, delays, difficulties, etc. and actions taken.)
This report covers a two month period, since no report was submitted in September.
With the exception of louver installation, work performed is minor and has progressed slowly, very little man power.
A meeting was held with the PA RE to resolve outstanding change orders and credits. An agreement was reached on most items, JCA will package and submit to PA RE for review and approval.

CONSTRUCTION PROGRESS AND INSPECTION REPORT
AIRPORT GRANT PROGRAM

Period Ending
04/30/07

Project Number
McClancy HS
LGA 841-099

Airport Name
LaGuardia Airport

Project Description
Soundproofing (Window replacement & AC) Contractor's Name
Nagan Conair JV

1. Rough Estimate of Percent Completion to Date of Construction Phases
(Include items such as clearing, grading, drainage, base, surface, lighting, etc.)
85%

2. Work Completed or In Progress this period
Power wiring and connections for fans
Trane Controls for Unit Ventilators and fans
Ductwork insulation
Minor electrical work
Minor Mechanical Pipe Work
Mechanical Piping insulation
Repair of poor workmanship on interior brick masonry
Some interior brickwork.

3. Brief Weather Summary This Period Including Approximate Rainfall and Periods of Below Freezing Temperature
(On earthwork jobs include soil conditions)
Precipitation on 11 days throughout the month, Temperatures range from lowest 32 degrees to highest 85 degrees (F).

4. Summary of Laboratory and Field Testing This Period (Note failing tests and any retests. Summarize out-of-tolerance material. Identify material subject to pay reduction.)
None

5. Describe Anticipated Work by Contractor for Next Period
Continue Trane controls adjusting, balancing and wiring
Replace ductwork on the main roof (failed to perform last period)
install firestopping at duct and pipe penetrations (failed to perform last Period)

6. Problem Areas/Other Comments (Revisions to plans and specifications approved or denied, delays, difficulties, etc. and actions taken.)
notice of possible default sent to contractor for failure to provide acceptable work, failure to protect school property from damage, failure to accept 5% mark-up on change orders as required by the contract, and failure to satisfactorily rectify NCR's.
On 5/30/07 meeting, the contractor verbally agreed to the 5% markup on CO's. Issues of NCR's and quality of work remain open.

None

5. Describe Anticipated Work by Contractor for Next Period
Trane controls adjusting and balancing

6. Problem Areas/Other Comments (Revisions to plans and specifications approved or denied, delays, difficulties, etc. and actions taken.)
Subcontractors' forces have walked off the job due to financial disputes with GC. GC claim they have paid their subcontractors all payments received from the school and claim they long time it takes to complete the payment application process has caused them to run out of funds.
Their payment app #7 (+/- \$366,000) for the month of September 2006 has has been delayed due to necessary corrections to the paperwork requested by PA and additional delays to payment #7 were caused by a rejection of two line items. These two line items are being rejected for nonconformance. Application #7 will be processed and put through to PA this week.
G.C.'s payment application #8 (+/- \$300,000) for October & November 2006 was rejected by JCA because it did not match the quantities verified by PA/JCA at the pencil copy stage.
G.C. submitted pencil copy for payment #9 for December 2006 on 1/22/07

PROJECT FIELD REPORT # 003

Project(s): SoundProofing of Monsignor McClancy Memorial High School, 71-06 31st Avenue, East Elmhurst, New York 11370.

Date: August 18, 2009

Weather: Sunny, Hot & Humid 80/ 95

Start Time: 11:00am

Finish Time: 12:30pm

Location: Various location throughout building

During the Field Visit John Ciardullo Associates P.C. (JCA) observed the following:

1. JCA noticed during the site visit that the Electrician has not been in site recently. JCA has requested several items listed below from the GC. During the job progress meeting held on 8/12/09 the GC stated that his electrician would return to the site to continue his work on Monday 8/17/09
2. The fire stopping work at the UV's has unchanged since 7/30/09.
3. All UV covers were off throughout the building.
4. JCA inspected the stage area to create a scope of work and sketch

Safety: n/a

By: Vincent Gulotta (John Ciardullo Associates - 212-245-0010)

Recommendations: None

Requests:

During the Field Visit John Ciardullo Associates P.C. (JCA) requested several proposals, schedules submittals ect. items from Kenstar Construction (GC). The list of requested items is as follows:

1. **Stage Area:** JCA will provide a sketch for corrective work in the stage area JCA request the following items to be included from the GC's proposal:
 - GC to provide a schedule for completion.
 - GC to provide a complete cost breakdown.
2. **Roof Proposal:** JCA requested a proposal from the GC to perform the corrective work on the boiler room roof. JCA requested the following items to be included in the proposal:
 - GC to provide a complete scope of work.
 - GC to provide a schedule for completion.
 - GC to provide a complete cost breakdown

3. **Fire Stopping:** JCA notice during the site visit that there is no fire stopping work being preformed. This is holding up the HVAC work. JCA has requested the following items from the GC:
 - GC to provide a fire stopping detail to be review and approved by JCA.
 - GC to provide a Hilti's Certifications to be review and approved by JCA.
 - GC to provide a schedule for completion.

4. **Electrician:** JCA requested the following items regarding the Electrician:
 - GC to provide an explanation as to why the Electrician has not returned to the site to continue his work and provides a date when the electrician will return top work.
 - GC to provide a schedule for completion of the Electricians UV work.
 - GC to provide a schedule for inspections.
 - GC to provide an explanation as to how the Electrician is going to make up for the work he lost.
 - GC to Provide a punch list for the Electrical work.

5. **Shop drawings:** The GC was to submit shop drawings for the Hood Exhaust Duct Work. JCA has requested the following items from the GC:
 - GC to confirm if it Firestopping is required
 - GC to review the S.D.'s
 - As per the NYC building code it is required to Butt Weld the 20"x20" doors.
 - Please refer to the attached sketch for the revised location for the installation of exterior duct insulation.

PROJECT FIELD REPORT # 005

Project(s): SoundProofing of Monsignor McClancy Memorial High School, 71-06 31st Avenue, East Elmhurst, New York 11370.

Date: September 15, 2009

Weather: Sunny, 71/ 80

Start Time: 3:00pm

Finish Time: 5:00pm

Location: Various soffits throughout building

Attendees Richard Piacentini (JCA) Vincent Gulotta (JCA)

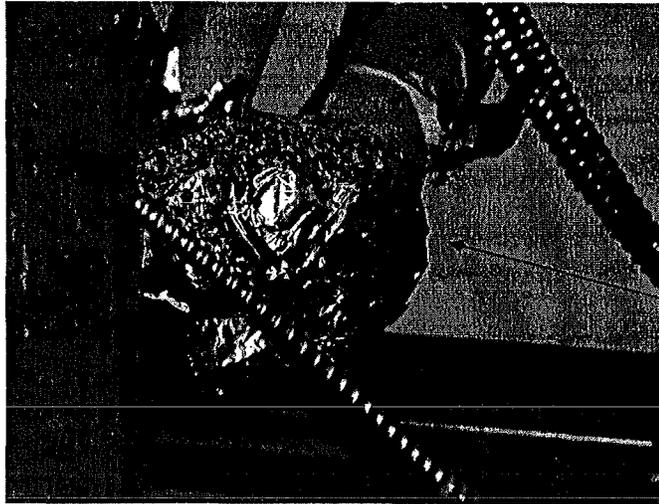

Summary: Kenstar has started to close the soffits in the class room on the second floor. JCA and the PA walked the school to inspect the pipe insulation. During the routine check JCA observed the following:

Findings:

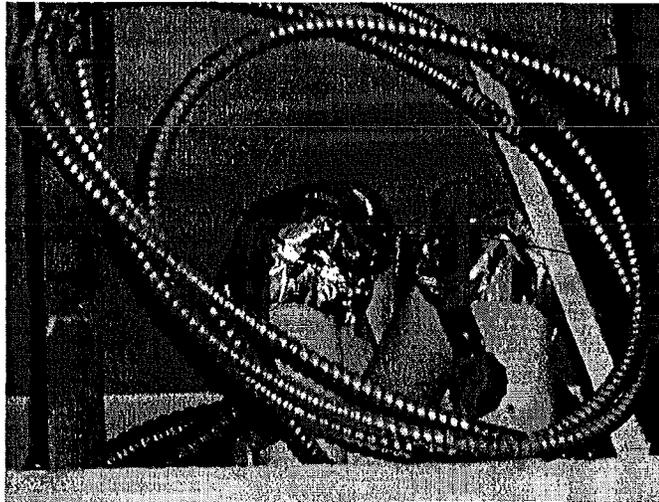

- There are many areas that the foil wrap that is installed on the elbows is not installed properly and is hanging off.
- There are deep cuts in the insulation that were made when the sheet rock was removed.
- There are areas that the insulation either was not installed or has fallen off.
- There are areas that the pipe penetrates through the soffit and the contractor stuffed foil wrap in the penetration.
- There are joints in the insulation that are not properly sealed

JCA Response:

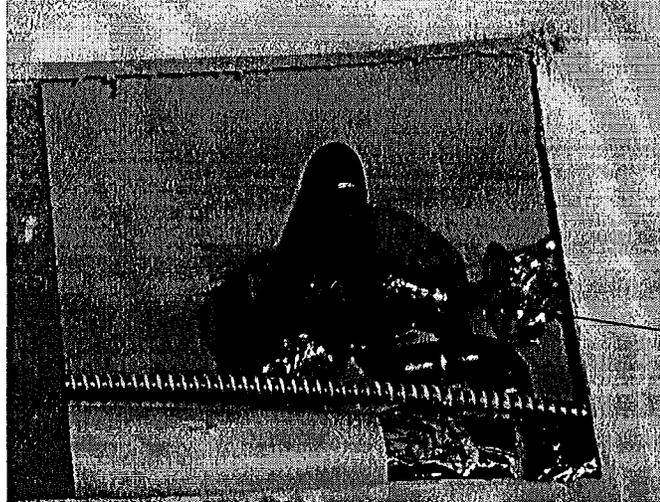

- The insulation must be continuous as not to allow any condensation from the pipe to escape. The pipe insulation that was observed in the soffits was not continuous in most places. As listed above there were many defects found in the pipe insulation. JCA is in agreement with the PA that the pipe insulation is not properly sealed and must be repaired prior to closing any soffits. UAP/ Kenstar shall perform the following corrective work:
 1. Inspect all elbows and rewrap the area as necessary.
 2. Inspect all insulated pipes and Patch all or replace the insulation in the areas that are cut.
 3. Inspect all insulated pipes and install the insulation in the areas that were missed or have fallen off.
 4. Properly seal around pipes that penetrate through the soffit.
 5. Inspect all insulated pipes and properly seal joints.
- AS discussed during the field visit Kenstar is not to spackle any of the soffit opening until the following actions have occurred:
 1. UAP inspects all insulated pipe and repairs all deficiencies.
 2. Kenstar submits a QA/QC report certifying that the pipe insulation is installed continuously and meets all code and spec requirement.
 3. JCA and PA perform another random inspection of the soffits.

re: Monsignor McClancy Memorial High School - Soundproofing

comments: Shop drawings as received from Nagan-Conair by JCA

Enclosed please find the following:

Copies	Spec #	Description	Status
4		Balancing Report	L&J: Open JCA: Resubmit

Enclosed for your review is the air balancing report for McClancy HS.

Please note we are requiring the contractor resubmit the report.

The HVAC system in the Multipurpose Room(Gym) (AC-1 & AC-2) is unacceptably loud. Air noise at the three high return air registers is above acceptable levels.

According to the contractor's report the system is balanced within the design requirements. However based on the noise levels observed in the field, some return air registers sound much louder than others. This has been discussed with the contractor, but they claim it is a design issue.

We have also observed excessive noise from exhaust air registers in rooms 302, 305, and 307. Additionally air registers were never installed in rooms 222, 300, 302, and others, and are not noted in the report.

We believe that the contractor should be required to perform air flow/volume tests in the presence of a L&J engineer to confirm their reported reading are actual. Please Advise.

The performance of this air balancing would have been very conspicuous and somewhat disruptive, specially since it took place during the school year on or about 5/17/07 according to the date on the report. However the owner does not recall the contractor performing air balancing, nor do we have any notice from the contractor that air balancing would be performed on those dates.

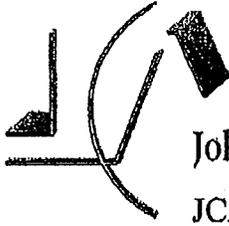

We have attached our comments. Please provide any additional comments L&J may have.

Thank you.

Nelson Parra

Fax 718-786-3813**

INSTRUMENTATION

1. TSI Balometer 8370 (Measures C.F.M. directly)
Application: Supply and Return Outlets Readings
2. Alnor Balometer AV -18 (Measures C.F.M. directly)
Application: Supply and Return Outlet Readings
3. Alnor Balometer 6000P
Application: Supply and Return Outlets Readings
4. Mannix Thermo Digital Anemometer DCFM8901
Application: Low Velocity Testing
5. TSI Digital Air Velocity Meter 475-1AV #8340
Application: Velocity Testing
6. Dwyer Incline Manometer and Pitot Tube
Application: Suction and Discharge Static Pressures and Duct
Total Air Pressure Readings
7. Dwyer Digital Manometer and Pitot Tube
Application: Suction and Discharge Static Pressure Readings
8. Amprobe RS-3
Application: Amperage and Voltage Readings on Fan Motors
9. Digital Photo Tachometer
Application: RPM Readings
10. SW Tachometer
Application: Measure Fan RPM
11. Bell & Gossett flow Meter
Application: Water Flow GPM
12. Panametrics PT 878 Ultrasonic Flow Meter
13. McGill Air Flow Duct Leakage test rig
14. Shortridge Air Data Multimeter Adm-870

The following Contract excerpts are relate to the unacceptable work discovered to be in place at McClancy High School.

The Architect and Owner have made every attempt to allow the contractor to perform the contract work. Payment requisitions were reviewed on site by the Architect and PA based upon statements, assertions and certifications by the contractor that the work on the requisitions conformed in every way with the contract document requirements.

Payment walk through reviews do not include exhaustive testing or inspections. In all cases the contractor asserted that all defects noted were superficial and that all work would be made good before project completion as required by the contract.

A full list of required certified inspections is provided for the contract on Contract Drawing T1.02. These notes and Spec Section 01400 require the contractor to hire and pay for licensed Architects or PE's to certify conformance with NYC Building code and inspect all work in place.

CONTROLLED INSPECTIONS:

CONTROLLED INSPECTIONS REQUIRED IN ACCORDANCE WITH SECTION 27-132 AND THE APPLICABLE SECTIONS OF THE BUILDING CODE ARE LISTED IN THE FOLLOWING TABLES:

THE CONTRACTOR SHALL INCLUDE IN THE BO PROPOSAL THE COST OF PROVIDING A REGISTERED ARCHITECT OR LICENSED ENGINEER IN THE STATE OF NEW YORK TO PROVIDE THE FOLLOWING CONTROLLED INSPECTION REQUIRED FOR THIS PROJECT. ALL MATERIAL TESTING SHALL ALSO BE PROVIDED AS REQUIRED WITH ALL RESULTS CERTIFIED AS NYC'S COMPLIANT AND BEARING SEAL OF A N.Y. LICENSED ENGINEER WHO SHALL BE PRESENT ON SITE WHEN THE SPECIFIC WORK COMMENCES.

THE CONTRACTOR'S ENGINEER/MATERIALS TESTING LABORATORY SHALL BE RESPONSIBLE FOR THE FOLLOWING CONTROLLED INSPECTIONS:

FIRESTOPPING	27-345 (b)
EMERGENCY LIGHTING (24/78, 16/84)	27-381, 382, 542
HIGH STRENGTH BOLT TENSIONING	27-586 TABLE 10-2
ALL CONCRETE	27-603
CONCRETE MATERIALS	27-586 TABLE 10-1
ADDITIONAL TESTS	27-607 (a)(2)
FORMS AND REINFORCEMENT	27-607 (a)(3)
CONCRETE DESIGN MIX	27-608
CONCRETE TEST CYLINDERS	27-607 (a)(1)
FOUNDATION BORINGS	27-720
SUBGRADE FOR FGS, PIERS & WALLS	27-723
CONTROLLED FILL	27-679 (a) (1)
PLUMB	27-721
ENGINEER/INSTALLER VENTILATION CERT	27-729
REFRIGERATION SYSTEM	27-781

THE CONTRACTOR SHALL ALSO BE RESPONSIBLE FOR THE FOLLOWING CONTROLLED INSPECTIONS, WHICH ARE RELATED TO METHODS AND MEANS OF CONSTRUCTION AND NOT RETURNED ABOVE:

STRUCTURAL STABILITY	R & REG. 6/11/83
UNDERPINNING	27-724
SHORING	27-1010

REQUIRED INSPECTIONS AND TESTS OF MATERIALS DESIGNATED FOR "CONTROLLED INSPECTION" BY THE CONTRACTOR SHALL BE MADE UNDER THE DIRECT SUPERVISION OF A LICENSED ARCHITECT OR ENGINEER RETAINED BY OR ON THE BEHALF OF THE CONTRACTOR WHO SHALL BE ACCEPTABLE TO THE ARCHITECT OR ENGINEER WHO SUPERVISED THE PREPARATION OF THE PLANS.

THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE FOLLOWING INSPECTIONS AND TESTS TO BE PERFORMED IN THE PRESENCE OF THE FIRE DEPARTMENT INSPECTOR:

FIRE ALARM TEST	27-977

SECTION 01400
QUALITY CONTROL

1.01 SERVICES AND ITEMS INCLUDED

- A. Controlled inspections shall be performed by a Professional Engineer or Registered Architect (licensed in the State of NY) retained by the Contractor on behalf of the MAMHS. All costs related to the controlled inspections shall be the responsibility of the Contractor. All forms required for this purpose by the NYC Building Department or other agency shall be prepared and filed by the Engineer or Architect retained by the Contractor.

1.02 CONTROLLED INSPECTIONS

- A. Material and service equipment designated for "Controlled Inspection" under the provisions of the New York City Building Code shall be inspected, tested and witnessed by or under the supervision of a licensed Engineer or a licensed Architect.
- B. The Engineer or Architect employed for "Controlled Inspections" shall file all initial amendments or Statements of Responsibility Form TR-1, properly executed, before work commences and all final amendments immediately upon completion of work with the Building Department. A copy of each approved amendment or Form TR-1 must be on file with the New York City Building Department before work commences and copies of final amendments or TR-1 Forms must be on file before final acceptance of the Work.
- C. Contractor shall notify in writing the Engineer or Architect responsible for controlled inspections at least 48 hours before the specific work item commences.
- D. Inspections and tests performed under controlled inspection shall in no way relieve the Contractor of the responsibility to construct the project in accordance with the Drawings and Specifications.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1.03 MANUFACTURERS' FIELD OBSERVATIONS AND TESTS

- A. Provide observations and tests as specified in the respective technical Sections.

1.04 MOCK-UPS AND FIELD SAMPLES

- A. Provide mock-ups and field samples as specified in the respective technical Sections.

1.05 ACCEPTANCE TESTS

- A. Governmental Agencies - All equipments and appliances furnished and installations made under the Contract shall conform to the requirements of the Specifications, and shall in any event be not less than that necessary to comply with the minimum requirement of all governmental agencies having jurisdiction.
- B. Notice of Tests - Whenever the Specifications or any governmental agency having jurisdiction requires the acceptance test, Contractor shall give written notice 48 hours in advance to all parties concerned of the time when these tests will be conducted.
- C. Utilities and Instruments - Contractor shall furnish energy, fuel, oil, water, air, smoke, light and electrical instruments as required for all testing.
- D. Contractor shall furnish labor and material necessary to conduct the acceptance tests at no additional cost to the MMHS.
- E. Certificate - The final acceptance by the MMHS shall be contingent upon the Contractor delivering to the MMHS Representative all necessary certificates evidencing compliance in every respect with the requirements of the agencies having jurisdiction.

END OF SECTION

It is noted for the record that the contractor has not submitted the Registered Architect or Professional Engineer for controlled Inspection's credentials to this office or the owner's for review.

We have not been advised us in advance of the contractor's performance of any required testing or inspections. The contractor has indicated that all inspections have been performed and will be provided upon request. Recent inspection reports we have received for air and water balancing are suspect and may require re-testing in our presence for confirmation of the testing lab's integrity.

We have received Controlled Inspection Affidavits TRI's for the Refrigeration and Ventilation certifications and Equipment use permits for the chillers. Submissions of all other listed certified inspection reports will be required before the project can be closed out and final payments made.

It is not unusual for some reports to be submitted as part of the close out package so that if we do not have all Certified inspections on file at this time, they may still be provided in the close out package.

The following pages are sections of the Specification that require full compliance with the contract documents regardless of amounts previously certified.

January 10, 2005

Monsignor McClaney Memorial High School

CHAPTER II

ADJUSTMENTS AND PAYMENTS

28

4. WITHHOLDING OF PAYMENTS.

If (1) the Contractor fails to perform any of his obligations under this contract or any other agreement between the Owner and the Contractor (including his obligation to the Owner to pay any claim lawfully made against him by any materialman, subcontractor or workman or other person which arises out of or in connection with the performance of this Contract or any other agreement with the Owner, or (2) any claim (just or unjust) which arises out of or in connection with this Contract or any other agreement between the Owner and the Contractor is made against the Owner or (3) any subcontractor under this Contract or any other agreement between the Owner and the Contractor fails to pay any claims lawfully made against him by any materialman, subcontractor, workman or other third person which arises out of or in connection with this Contract or any other agreement between the Owner and the Contractor or if in the opinion of the Director any of the aforesaid contingencies is likely to arise, then the Owner shall have the right, in its discretion, to withhold out of any payment (final or otherwise and even though such payment has already been certified as due) such sums as the Director may deem ample to protect it against delay or loss or to assure the payment of just claims of third persons, and to apply such sums in such manner as the Director may deem proper to secure such protection or satisfy such claims. All sums so applied shall be deducted from the Contractor's compensation. Omission by the Owner to withhold out of any payment, final or otherwise, a sum for any of the above contingencies, even though such contingency has occurred at the time of such payment, shall not be deemed to indicate that the Owner does not intend to exercise its right to such contingency. Neither the above provisions for the rights of the Owner to withhold and apply monies nor any exercise or attempted exercise of, or omission to exercise, such rights by the Owner shall create any obligation of any kind to such materialman, subcontractors, workmen or other third persons.

Until actual payment to the Contractor, his right to any amount to be paid under this Contract (even though such amount has already been certified as due) shall be subordinate to the Rights of the Owner under this numbered clause.

If, however, the payment of any amount due to the Contractor shall be improperly delayed by the fault of the Owner, the Owner shall pay the Contractor interest thereon at the rate of 2% per annum for the period of delay, it being agreed that such interest shall be in lieu of and in liquidation of any damages to the Contractor because of such delay.

31

B. CERTIFICATES OF PARTIAL COMPLETION.

The rendition of a Certificate of Partial Completion shall not be construed to constitute an extension of the Contractor's time to complete the portion of the permanent construction to which it relates in the event that he has failed to complete the same in accordance with the terms of this Contract. Moreover, the acceptance of a Certificate of Partial Completion by the Owner shall not operate to release the Contractor or his sureties from any obligations under or upon this Contract or the Performance and Payment Bond.

January 10, 2005

Monsignor McClancy Memorial High School

CHAPTER V

WARRANTIES MADE AND LIABILITY ASSUMED
BY THE CONTRACTOR

January 10, 2005

Monsignor McClancy Memorial High School

2. RISKS ASSUMED BY THE CONTRACTOR.

The Contractor assumes the following distinct and several risks, whether they arise from acts or omissions (whether negligent or not) of the Contractor, the Owner, or of third persons, or from any other cause, and whether such risks are within or beyond the control of the Contractor, excepting only risks which arise solely from affirmative acts done by the Owner subsequent to the opening of Proposals on this Contract with actual and wilful intent to cause the loss, damage and injuries described in subparagraphs (a) through (c) below:

- (a) The risk of loss or damage to the permanent construction prior to the rendition of the Certificate of Final Completion (other than loss or damage to the portions of the permanent construction with respect to which Certificates of Partial Completion have been issued), and the Contractor shall forthwith repair, replace and make good any such loss or damage to the permanent construction without cost to the Owner;
- (b) The risk of claims, fines or penalties, just or unjust, made by third persons or assessed by courts or governmental agencies or entities against the Contractor or the Owner on account of injuries (including wrongful death), loss, damage or liability of any kind whatsoever arising or alleged to arise out of or in connection with the performance of the Work (whether or not actually caused by or resulting from the performance of the Work)

January 10, 2005

Monsignor McClancy Memorial High School

CHAPTER VIII

SPECIAL PROVISIONS

- (c) The risk of loss or damage to any property of the Contractor, and of any claims made against the Contractor or the Owner for loss or damage to any property of subcontractors, materialmen, workmen and others performing the Work, occurring at any time prior to completion of removal of such property from the construction site or Owner premises or the vicinity thereof.

The Contractor shall indemnify the Owner against all claims described in sub-paragraphs (b) and (c) above and for all expense incurred by it in the defense, settlement or satisfaction thereof, including expenses of attorneys, except where indemnity would be precluded by New York State Laws, or any other applicable law. Unless a claim is one which the Contractor is not required to indemnify the Owner against as described in the first sentence of this paragraph, such defense shall be at the Contractor's cost.

The provisions of this numbered clause shall also be for the benefit of the MMMHS's, officers, agents, employees and consultants of the Owner so that they shall have all the rights that they would have under this numbered clause if they were named at each place above at which the Owner is named, including a direct right of action against the Contractor to enforce the foregoing indemnity, except, however, that the Owner may at any time in its sole discretion and without liability on its part cancel the benefit conferred on any of them by this numbered clause, whether or not the occasion for invoking such benefit has already arisen at the time of such cancellation.

Neither the issuance of a Certificate of Completion nor the making of Final Payment shall release the Contractor from his obligations under this numbered clause. Moreover, neither the enumeration in this numbered clause nor the enumeration elsewhere in this Contract of particular risks assumed by the Contractor or of particular claims for which he is responsible shall be deemed (a) to limit the effect of the provisions of this numbered clause or of any other clause of this Contract relating to such risks or claims, (b) to imply that he assumes or is responsible for risks or claims only of the type enumerated in this clause or in any other clause of this Contract, or (c) to limit the risks which he would assume or the claims for which he would be responsible in the absence of such enumerations.

January 10, 2005

Monsignor McClancy Memorial High School

4. NO ESTOPPEL OR WAIVER.

The Owner shall not be precluded or estopped by an acceptance, certificate or payment, final or otherwise, issued or made under this Contract or otherwise issued or made by it, the Architect, or any officer, agent or employee of the Owner, from showing at any time the true amount and character of Work performed, or from showing that any such acceptance, certificate or payment is incorrect or was improperly issued or made; and the Owner shall not be precluded or estopped not withstanding any such acceptance, certificate or payment, from recovering from the Contractor any damages which it may sustain by reason of any failure on its part to comply strictly with this Contract, and any monies which may be paid to him or for his account in excess of those to which he is lawfully entitled.

Neither the acceptance of the Work or any part thereof, nor any payment therefor, nor any order or certificate issued under this Contract or otherwise issued by the Owner, the Architect, or any officer, agent, or employee of the Owner nor any permission or direction to continue with the performance of the Work, nor any performance by the Owner of any of the Contractor's duties or obligations, nor any aid lent to the Contractor by the Owner in his performance of such duties or obligations, nor any other thing done or omitted to be done by the Owner in his performance of such duties or obligations, nor any other thing done or omitted to be done by the MMMHS, its officers, agents, or employees shall be deemed to be a waiver of any provision of this Contract or of any rights or remedies to which the Owner may be entitled because of any breach thereof, excepting only a resolution of its Officer's, providing expressly for such waiver. No cancellation, rescission or annulment hereof, in whole or as to any part of the Work, because of any breach hereof, shall be deemed a waiver of any damages to which the Owner may be entitled because of such breach. Moreover, no waiver by the Owner of any breach of this Contract shall be deemed to be a waiver of any other or any subsequent breach.

44

12. INSPECTIONS AND REJECTIONS.

All work and all construction, processes of manufacture and methods of construction involved in or related to the performance of the Work shall be at all times and places subject to the inspection of the MMMHS Representative, acting personally or through his Inspectors, and the execution in these Specifications of particular portions of such Work, construction, processes of manufacture or methods of construction which will or may be inspected by the MMMHS Representative or such Inspectors shall not be deemed to imply that only such Work, construction, processes of manufacture or methods of construction will or may be so inspected. The MMMHS Representative shall be the judge of the quality and suitability of the Work, construction, processes of manufacture or methods of construction for the purposes for which they are used or to be used. Should they fail to meet his approval they shall be forthwith reconstructed, made good, replaced or corrected, as the case may be, by the Contractor at his own expense. Rejected material shall be removed immediately from the site. The fact that the Inspectors have approved the materials and workmanship shall not relieve the Contractor from his obligation to supply other material and workmanship when so ordered by the MMMHS Representative.

The Contractor, at his own expense, shall furnish such facilities and give such assistance for inspection as the MMMHS Representative may direct. In the case of materials required by the Specifications to be inspected in the factory or plant, and in the case of any other items which the MMMHS Representative may designate, the Contractor shall secure for the MMMHS Representative and his Inspectors free access to all parts of such factories or plants and shall furnish to the MMMHS Representative three copies of purchase orders, two copies of mill shipping statements, and four copies of shipping statements. Moreover, in the case of such materials to be factory or plant inspected, the Contractor shall give at least ten days notice to the MMMHS Representative of his intention to commence the manufacture or preparation of such materials.

Other than the materials and equipment specifically required to be inspected at the manufacturer's factory or plant, all materials will be inspected at the construction site and any portions thereof which are rejected by the MMMHS Representative shall be immediately removed from the construction site by the Contractor and shall be replaced with new materials by the Contractor at his own expense.

Should materials or equipment be delivered to the construction site without having been placed on the aforementioned list and approved, it shall be immediately removed from the construction site by the Contractor at his own expense.

14. NO RELEASE OF CONTRACTOR.

Any provision of this Contract for testing, inspection or approval, and any actual testing, inspection or approval, of any materials, workmanship, plant, equipment, drawings, program, methods of procedure, or of any other thing done or furnished or proposed by the Contractor to be done or furnished in connection with the Contract is for the benefit of the Owner not the Contractor. Any approval of such things shall be construed merely to mean that at that time the MMMHS Representative knows of no good reason for objecting thereto. No such provision for testing or inspection, no omission of testing or inspection, and no approval shall release the Contractor from his full responsibility for the accurate and complete performance of the Contract in accordance with the Contract Drawings and Specifications or from any duty.

SECTION 01400
QUALITY CONTROL

1.01 SERVICES AND ITEMS INCLUDED

- A. Controlled inspections shall be performed by a Professional Engineer or Registered Architect (Licensed in the State of NY) retained by the Contractor on behalf of the MMCHS. All costs related to the controlled inspections shall be the responsibility of the Contractor. All forms required for this purpose by the NYC Building Department or other agency shall be prepared and filed by the Engineer or Architect retained by the Contractor.

1.02 CONTROLLED INSPECTIONS

- A. Material and service equipment designated for "Controlled Inspection" under the provisions of the New York City Building Code shall be inspected, tested and witnessed by or under the supervision of a Licensed Engineer or a Licensed Architect.
- B. The Engineer or Architect employed for "Controlled Inspections" shall file all initial amendments or Statements of Responsibility Form TR-1, properly executed, before work commences and all final amendments immediately upon completion of work with the Building Department. A copy of each approved amendment or Form TR-1 must be on file with the New York City Building Department before work commences and copies of final amendments or TR-1 Forms must be on file before final acceptance of the Work.
- C. Contractor shall notify in writing the Engineer or Architect responsible for controlled inspections at least 48 hours before the specific work item commences.
- D. Inspections and tests performed under controlled inspection shall in no way relieve the Contractor of the responsibility to construct the project in accordance with the Drawings and Specifications.

January 10, 2005

Monsignor McClancy Memorial High School

4. NO ESTOPPEL OR WAIVER.

The Owner shall not be precluded or estopped by an acceptance, certificate or payment, final or otherwise, issued or made under this Contract or otherwise issued or made by it, the Architect, or any officer, agent or employee of the Owner, from showing at any time the true amount and character of Work performed, or from showing that any such acceptance, certificate or payment is incorrect or was improperly issued or made; and the Owner shall not be precluded or estopped notwithstanding any such acceptance, certificate or payment, from recovering from the Contractor any damages which it may sustain by reason of any failure on its part to comply strictly with this Contract, and any monies which may be paid to him or for his account in excess of those to which he is lawfully entitled.

Neither the acceptance of the Work or any part thereof, nor any payment therefor, nor any order or certificate issued under this Contract or otherwise issued by the Owner, the Architect, or any officer, agent, or employee of the Owner nor any permission or direction to continue with the performance of the Work, nor any performance by the Owner of any of the Contractor's duties or obligations, nor any aid lent to the Contractor by the Owner in his performance of such duties or obligations, nor any other thing done or omitted to be done by the Owner in his performance of such duties or obligations, nor any other thing done or omitted to be done by the MMMHS, its officers, agents, or employees shall be deemed to be a waiver of any provision of this Contract or of any rights or remedies to which the Owner may be entitled because of any breach thereof, excepting only a resolution of its Officers, providing expressly for such waiver. No cancellation, rescission or annulment hereof, in whole or as to any part of the Work, because of any breach hereof, shall be deemed a waiver of any damages to which the Owner may be entitled because of such breach. Moreover, no waiver by the Owner of any breach of this Contract shall be deemed to be a waiver of any other or any subsequent breach.

44

12. INSPECTIONS AND REJECTIONS.

All work and all construction, processes of manufacture and methods of construction involved in or related to the performance of the Work shall be at all times and places subject to the inspection of the MMMHS Representative, acting personally or through his Inspectors, and the enumeration in these Specifications of particular portions of such Work, construction, processes of manufacture or methods of construction which will or may be inspected by the MMMHS Representative or such Inspectors shall not be deemed to imply that only such Work, construction, processes of manufacture or methods of construction will or may be so inspected. The MMMHS Representative shall be the judge of the quality and suitability of the Work, construction, processes of manufacture or methods of construction for the purposes for which they are used or to be used. Should they fail to meet his approval they shall be forthwith reconstructed, made good, replaced or corrected, as the case may be, by the Contractor at his own expense. Rejected material shall be removed immediately from the site. The fact that the Inspectors have approved the materials and workmanship shall not relieve the Contractor from his obligation to supply other material and workmanship when so ordered by the MMMHS Representative.

The Contractor, at his own expense, shall furnish such facilities and give such assistance for inspection as the MMMHS Representative may direct. In the case of materials required by the Specifications to be inspected in the factory or plant, and in the case of any other items which the MMMHS Representative may designate, the Contractor shall secure for the MMMHS Representative and his Inspectors free access to all parts of such factories or plants and shall furnish to the MMMHS Representative three copies of purchase orders, two copies of mill shipping statements, and four copies of shipping statements. Moreover, in the case of such materials to be factory or plant inspected, the Contractor shall give at least ten days notice to the MMMHS Representative of his intention to commence the manufacture or preparation of such materials.

Other than the materials and equipment specifically required to be inspected at the manufacturer's factory or plant, all materials will be inspected at the construction site and any portions thereof which are rejected by the MMMHS Representative shall be immediately removed from the construction site by the Contractor and shall be replaced with new materials by the Contractor at his own expense.

Should materials or equipment be delivered to the construction site without having been placed on the aforementioned list and approved, it shall be immediately removed from the construction site by the Contractor at his own expense.

14. NO RELEASE OF CONTRACTOR.

Any provision of this Contract for testing, inspection or approval, and any actual testing, inspection or approval, of any materials, workmanship, plant, equipment, drawings, program, methods of procedure, or of any other thing done or furnished or proposed by the Contractor to be done or furnished in connection with the Contract is for the benefit of the Owner not the Contractor. Any approval of such things shall be construed merely to mean that at that time the MMMHS Representative knows of no good reason for objecting thereto. No such provision for testing or inspection, no omission of testing or inspection, and no approval shall release the Contractor from his full responsibility for the accurate and complete performance of the Contract in accordance with the Contract Drawings and Specifications or from any duty.

53

Monsignor McClanney Memorial High School
obligation or liability imposed upon him by the Contract or from responsibility for injuries to persons or damage to property.

that are ugly. There are some instances where the lack of coordination is effecting the school operations: i.e. The lab Rooms.

18. Roofing tar on the exterior walls at the locker room roof and MER room.
19. Pipe supports on the Mall roof do not conform with the detail on M2.13: A7.04
20. Railing at the ramp is damaged by the backhoe; catch basin at the mall needs to be cleaned of all dirt and debris; reset ramp/ stairs and railings.
21. Existing chain link fence is damaged.
22. MER room- close up of existing openings was not insulated. (a7.02)
23. No acoustical caulking in the Mall and MPR has been performed yet.
24. Damage to the existing parking lot throughout.
25. Life Safety and Fire Alarm system has been ignored at Classroom Unit #1
26. Sleeves for the Chiller pad are unacceptable. Sleeves are full of frozen water that may crack the foundation slab.
27. Numerous new ceiling tiles are damaged by the trades and need to be replaced throughout the school corridors.
28. New roof curbs have interfered with the existing roof water run off to drains. Water now ponds on the roof compromising the lifetime of the roof.
29. Overall dissatisfaction of subcontractors to the coordination and execution of contract work.
30. Unightly conditions left behind in the classrooms due to incomplete work. Over and beyond the normal.
31. Soffit construction does not conform to SK-7.
32. Continuous flashing at the exterior penetrations are missing throughout.

Work to be Performed During Normal Working Hours
January 2007

1. MER Railing: Shop Drawings/Install
2. Chiller Fence: Shop Drawings/Install
3. Complete EF #5,#6
4. Stairs and Awnings at Egress Stairs: Shop Drawings/Install L1.04
5. Kitchen Exhaust
6. Insulation of all pipes in the crawl space (90% complete)
7. MER Room: Ejector pumps, pit cover, and leader lines
8. Electrical: Wire AC-1, AC-2, EF-3,4,5, GX-3
9. Install all starters
10. Roof top electrical work, gas connections, condensate piping
11. Electrical stairs: Shop Drawings/Install

from: Nelson Parra

cc: Msgr Edward Wetterer, Robert Dadona, Nick Russo, Zaheer Jaffery, Greenwich Insurance Co.

re: St. Michael's School Soundproofing- Window Replacement

Mr. Webber,

In a meeting held on June 13, 2007 JWA agreed to provide water tests to determine the source of the water leaks in the new windows installed by JWA. It has been almost 8 weeks since water tests were completed at St. Michael's School.

To date we have not received the test reports and there has been no response from JWA to any correspondence regarding the water tests.

Following completion of the water tests JWA never returned to the site to remove scaffolding and debris left by the testing company or to repair the plaster and panning that was removed around the windows for the tests.

JWA's failure to provide test results, failure restore tested windows, remove their scaffolding and debris from the site and their failure to respond to correspondence have delayed completion of the contract.

Based on this we find Jim Weber & Associates in breach of their contract with St. Michael's School under Chapter III Subsection 4 entitled "Cancellation for Delay" and Chapter 6 Subsection 1 entitled "Rights And Remedies Of The Owner".

By notice hereof the Bonding Company, in accordance with the terms of the Performance Bond #45031727 issued by Greenwich Insurance Company, shall be charged with the completion of the work, as required by their bond. A meeting with the owner and the bonding company will be scheduled, date to be determined.

FIELD REVIEW OF EXISTING TERMINAL UNITS (UNIT VENTILATORS AND FAN COIL UNITS)**Single Unit Ventilator Application (Faculty Room)**

1. Installation of the Unit

- a. The unit is mounted against an exterior wall and on top of a masonry pedestal. Outdoor air spills into the right (when facing the unit) panel piping pocket of the unit. The outdoor air comes from behind the unit. The back of the unit has a perimeter dust/dirt gasket to seal the unit to the building's masonry wall. The dust/dirt gasket is shallow (about 3/8 of an inch thick) and the right side of the unit is not sitting flush against the wall, leaving about a 1/2 inch gap between the right rear lower gasket of the unit and the masonry wall. The unconditioned outdoor air spills across the floor from within the right side panel piping pocket.
- b. At the bottom rear of the unit is its outdoor air intake connection. The outdoor air is drawn from a wall penetration that is located above the units' outdoor air intake. A sheet metal duct connects the elevated outdoor air wall penetration to the units' lower outdoor air intake. Outdoor air is not being confined to the outdoor air intake ductwork but is dispersing through the space between the back of the unit and the masonry wall. This unconditioned air is leaking into the conditioned space.

2. Operation of the Unit

- a. There were disconnected wires inside the left (when facing the unit) panel piping pocket of the unit. The ends of most of the wires were crudely taped with electricians tape; one wire end was bare.
- b. The actuator for the heating valve was loose. The stem position indicator was not attached and could be moved freely by hand.
- c. The unit was not functional. The disconnect switch was in its energized position. When switching the service switch to the off position and re-switching to the on position, the fan did not activate.
- d. The heating valve was closed and no heat was being provided to the coil.
- e. The indoor return air damper was closed but the damper edge was not fully seated and unconditioned outdoor air was leaking into the conditioned space. For the outdoor air to be able to reach the indoor return air damper would mean that the outdoor air was also not sealing.

Single Fan Coil Unit Application (Finance Room)

1. Installation of the Unit

- a. The unit is mounted against an exterior wall and on top of a masonry pedestal. Outdoor air was passing through the unit, from the back of the unit through the unit casing and out the front panel perimeter joints, but not through the heating coil. When looking inside the unit, light can be seen passing through the top of the wall penetration and the upper portion of the outdoor grill can be clearly seen.
- b. At the bottom rear of the unit is its outdoor air intake connection. The outdoor air is drawn from a wall penetration that is located above the units' outdoor air intake. A sheet metal duct connects the elevated outdoor air wall penetration to the units' lower outdoor air intake. Outdoor air is not being confined to the outdoor air intake ductwork but is also passing through the cabinet enclosure of the unit. This unconditioned outdoor air is flowing through the unit and into the conditioned space.

2. Operation of the Unit

- a. The unit was not functional. The disconnect switch was in its energized position. By moving this service switch from the on position to its off position and back to its on position, a relay could be heard to respond to the position of the service switch.
- b. However, the heating valve was open and heat was being provided to the coil, but the fan did not function.
- c. The indoor return air damper was closed but the damper blade had a twist in it that allowed the left (as facing the unit) side of the blade to remain partially open (3/16 of an inch) while the right side of the blade was seated firmly. A significant amount of unconditioned outdoor air was leaking past the indoor return air damper blade and into the conditioned space. For the outdoor air to be able to reach the indoor return air damper would mean that the outdoor air damper also was not sealing.

Dual Unit Ventilator Application (Classroom 201)

1. Installation of the Unit
 - a. Each unit is located against the exterior wall, and mounted on top of masonry pedestals. No unconditioned outdoor air spills through either unit's cabinet casing. Each masonry outdoor air wall penetrations is sealed air tight.
 - b. At the bottom rear of each unit there is an outdoor air intake connection. The outdoor air is drawn from wall penetrations that are located above the top of each unit. Sheet metal ducts connect each elevated outdoor air wall penetration to their respective unit's lower outdoor air intake. The outdoor air is confined to the outdoor air intake ductwork.
2. Operation of the Units
 - a. Both units were working and the room was being heated. However, the unit on the right (as facing the units) was providing heated discharge air but the second unit on the left was not providing heated discharge air. These two units may not be communicating with each other. They should be working as a master unit and a slave unit so as to function in unison.
 - b. The unit doing the heating was shut down by way of the service switch. Unconditioned outdoor air was felt to enter the room from the return air damper opening. The outdoor air damper was not sealing properly. When the unit's service switch was placed into the on position, the fan reactivated in less than 1 minute.
 - c. The return air sensor of each unit was insulated with a foam type of insulation.

EXISTING WATER/GLYCOL SYSTEM SERVING THE FORCED AIR HEATING PORTION OF THE BUILDING**1. Shell and Tube Heat Exchangers**

The heating plant's hot water is pumped through two heat shell and tube exchangers that are utilized to heat a water/glycol mixture that is pumped throughout the building.

2. Water/Glycol Pumps

Two pumps (operating and stand-by) are provided to circulate the water/glycol mixture through the heat exchangers and throughout the building. The pump serving the building at the time of the field trip was producing a high pitch squeal that would indicate a lead up to a bearing failure.

3. Water/Glycol System Water Temperature Control

The water/glycol mixture temperature is to be regulated inversely proportional to the outdoor air.

4. Room Temperature Control

Each room fan coil unit and unit ventilator is equipped with a two-way control valve that regulates the flow of water through its respective unit's heating coil to maintain space temperature. A return air sensor and a supply air sensor are located in each unit ventilator and may be utilized to provide information to a zone sensor. Outdoor air is regulated as required for economizer, and occupancy ventilation. It appears that the zone sensor within the unit is utilized for room temperature control.

5. Central Computer Console

A central located computer is utilized to control and monitor the equipment. When reviewing the equipment settings, it was noted that some of the unit ventilators and fan coil units were not communicating with the computer and no input or status data was being displayed.

It was also noted that the water/glycol system send out temperatures far exceed the setpoint data for that portion of the system. The system was not calibrated to the outdoor air temperature. The send out temperature was too high for the outdoor air temperature of that day.

RESULTS AND RECOMMENDATIONS

Outdoor Air Intakes

1. Results
 - a. The gap between outdoor air ductwork (unit ventilators and fan coil units) and the masonry wall penetration for outdoor air intake is not sealed. Part of the unconditioned air that is entering the building is through the gap between the outdoor air intake ductwork and the masonry wall opening.
 - b. Sealing of the gap between the outdoor air ductwork and outdoor air wall penetration is indicated on Drawing M-2.09, Section "C-C", and Note 29 on Drawing M0.01.
2. Recommendation
 - a. Each outdoor air intake grill on the face of the building should be removed and the gap between the outdoor air intake ductwork located in the masonry outdoor air opening must be sealed air tight. The sealing material must be impervious to water so that mold does not grow in the sealing material.

Outdoor Air and Return Air Dampers

1. Results
 - a. Outdoor air and return air dampers of the unit ventilators and fan coil units must be set up properly so that the dampers close air tight to the air pressure differential caused by the wind.
 - b. The indoor air damper should not be closed when the fan is in failure. Also the outdoor air damper should not be open when the fan is in failure. This inappropriate positioning has been demonstrated on the failed units located in Faculty and in Finance. These two units are suffering from blow through of the outside air.
 - c. The Shop drawing comment for this item reads "ALL OUTSIDE AIR DAMPER WITH SPRING RETURN, NORMALLY CLOSED TYPE." and the specifications 15950 (2.03 D) call for same.
 - d. There are no hardware commissioning data sheets.
2. Recommendation:
 - a. All of the units must be Hardware Commissioned as specified in Section 15950 3.16 A. to I.

Unit Heating Control Valves

1. Results
 - a. When a unit's fan fails, the heating valve should go to its full open position. This was not the case in the Faculty Room. The heating control valve was closed.
2. Recommendation
 - a. All of the units must be Hardware Commissioned as specified in Section 15950 3.16 A. to I.

Room Air Temperature Sensing

1. Results
 - a. A zone sensor (or RA Sensor as specified 15950 - 3.08 B. 1.) is not actually sensing the room occupancy space temperature which should be sensed at about 5 feet above the floor.
2. Recommendation
 - a. Trane has a wireless room thermostat that can provide a space temperature that is more in tune with what is actually happening in the room. A wireless wall mounted room thermostats should be provided to eliminate false readings that may drive the heating valve to its full open position and overheat the room or cause erratic temperature swings.

Water/Glycol Chemical Treatment Report

1. Results
 - a. The water/glycol solution test results have not been submitted.
2. Recommendation
 - a. A water testing firm should verify the water/glycol mixture that is circulating in this portion of the piping system. The test analysis will indicate if the solution meets the specifications and if it is stable and appropriate for the system. Water analysis report with recommend treatment to the solution should be provided as specified in Section 15815.

Water Balancing

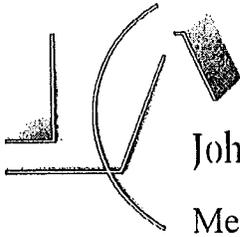

1. Results
 - a. It was noted that the field reviewed units had their balancing valves set to full open.
2. Recommendation
 - a. The water flow through each unit must be balanced to the unit's specifications or the relation between valve position and coil capacity performance will not correlate which can cause wide temperature swings in the discharge air temperature and in the room temperature.
 - b. Provide the water balancing reports as specified in Section 15900.

Central Computer Console and Control System

1. Results
 - a. It is apparent that the lack of communication between some of the unit ventilators and fan coil units with the computer console plus the lack of correlation between the sensors and the actual temperatures, that not only has hardware commissioning not been provided as specified but also that the software commissioning has not been provided as specified.
2. Recommendation
 - a. All software temperature sensing must be calibrated; all valve positioning, damper positioning, and all operations between the software and its respective hardware must be commissioned.
 - b. The software commissioning must be performed as specified. Provide the software data sheets as specified in 15950 3.16 A to I.

System Performance Demonstration and Final Acceptance:

1. Results
 - a. This system has not been demonstrated to perform as specified. The owner is entitled to select a portion of the system to be demonstrated to function flawlessly. If that portion does not function as specified, it must be repaired and made to function as intended. Upon which the owner may select another portion of the system to be demonstrated to function and it too must be made to function.
1. Recommendation
 - a. Provide the System Performance Demonstration for the owner as specified in 15950 3.16 D. & E.

Central Terminal Building
Resident Engineer's Office**

re: McClancy H.S. Soundproofing

Mr Uygan,

At the meeting of 8/13/07 NCJV stated that their roofing subcontractor would be on site on 8/14/07 to inspect the roof of the main school building with JCA and the school's roofer to determine the source of leaks in and around areas of work performed by NCJV.

NCJV did not attend the site walkthrough on 8/14/07. JCA did inspect the roof of the main school building and many deficiencies were documented in the work performed by NCJV.

Over several months NCJV has been alerted to these leaks and has failed to correct them. As of 8/29/07 NCJV has not taken any action to correct these deficiencies.

Classes begin on Tuesday 9/4/07, at which time the roof work must be free of leaks.

Based on the above MMMHS finds NCJV in breach of the following contract terms: Chapter VIII Subchapter 12, Drawing A2.10, Specifications Section 01340.

NCJV is hereby notified that per Chapter VI of the Contract Documents, the Owner is exercising their right to take over and complete any portion of the contract work as agent for and at the expense of the Contractor.

The work being performed by the school as described above and in the enclosed proposal is a minimum required to correct defective work performed by NCJV and stop the leaks before the start of classes. It does not relieve NCJV from their responsibility to provide other work required by the contract documents. NCJV remains responsible for proper installation of duct weatherproofing, pitch pockets, duct curb counter flashing and any other work required by the contract documents.

Enclosed for your records please find a copies of photo documentation of the above and a copy of the MMMHS roofer's proposal to correct the defective work.

Nelson Parra

Re: 72-02 31st Avenue / Queens, NY
McClancy High School
Main Roof

Dear Mr. Parra:

As per Mr. Nick Melito's (McClancy) request for an inspection of the above-mentioned property, we are able to suggest the following recommendations as well as provide the necessary labor and materials to properly perform the following work in the highest craftsmanship-like manner.

1. Observations

The following observations were made by Junior (Geiger Construction)

- a. *The roof membrane was loose around the south A/C unit.*
- b. *There were openings around the base flashing of the curb supporting the A/C Unit and ducts.*
- c. *Screws penetration on galvanized cap on top of curb.*

2. Recommendations

The following recommendations are made based on the above-mentioned observations.

- a. Prepare and install approx. 400 sf of single ply modify bitumen roof membrane where necessary.

Cost: \$ 2,375.00

- b. Install new modify bitumen membrane base flashing around sixteen (16) curbs & four (4) duct penetrations.
Install new galvanized extension cap flashing to terminate base flashing.

Cost: \$ 9,850.00

- c. Check and caulk all openings and penetrations on galvanized cap.

Cost: \$ 1,200.00

August 23, 2007

LaGuardia Airport

Project Description
Soundproofing (Window replacement & AC) Contractor's Name
Nagan Conair JV

1. Rough Estimate of Percent Completion to Date of Construction Phases
(Include items such as clearing, grading, drainage, base, surface, lighting, etc.)
85%

2. Work Completed or in Progress this period
Repair of brick work at UV louver openings in progress
Installation of equipment for new electrical service and started transferring circuits to new electrical service panel
Duct Insulation @ stage area & kitchen exhaust
MER parapet coping stones
Began installation of acoustic panels in the MPR

3. Brief Weather Summary This Period Including Approximate Rainfall and Periods of Below Freezing Temperature
(On earthwork jobs include soil conditions)
Precipitation on 7 days throughout the month, Temperatures range from lowest 57 degrees to highest 92 degrees (F).

4. Summary of Laboratory and Field Testing This Period (Note failing tests and any retests. Summarize out-of-tolerance material. Identify material subject to pay reduction.)
Contractor submitted report for metal deck inspection @ MER on 7/10/2006

5. Describe Anticipated Work by Contractor for Next Period
Transfer electrical service to new panel
Install gas booster pump controls
Continue repair of UV louver openings

6. Problem Areas/Other Comments (Revisions to plans and specifications approved or denied, delays, difficulties, etc. and actions taken.)
Work performed is minor and has progressed slowly. Contractor still has not provided louver shop drawings.
Contractor still refuses to accept credits owed for work not performed or eliminated from the contract. Several outstanding NCR's remains unanswered and unresolved.

**BID AND
CONTRACT AGREEMENT**

Asbestos Removal in Connection With the Soundproofing of Monsignor McClancy Memorial High School.

Description: Aircraft Noise Abatement Project

Pursuant to and in compliance with the invitation for bids dated January 10, 2005 and the Contract Documents relating hereto, the undersigned hereby submits a binding offer to furnish all plant, labor, materials, supplies, equipment and all other facilities things, matters, and work necessary, proper or incidental to all work required by and in strict accordance with the applicable provisions of the referenced solicitation documents which include, but are not limited to, the plans, specification and all of the addenda thereto issued by the MMMHS and sent to the undersigned by U.S. mail, electronic transmission or other appropriate means or delivered to the Bidder prior to the date of opening the bids, whether received by the undersigned or not; for the total sum indicated on page 3 of this document in the "Base Bid Amount" blocks.

Notice of Award will be mailed, telegraphed or delivered to the successful bidder at its address listed on page three (3):

The Contractor shall commence Work under this Contract at a date to be specified in a Notice to Proceed letter issued by the MMMHS and shall complete Work on the Project, on or before 740 Consecutive Calendar Days, as indicated in Section 00900 - Milestone Schedule of the Specification, from the date in the above referenced Notice to Proceed letter.

Liquidated damages in the amount of five hundred dollars (\$500.00) per day shall be assessed against the Contractor for every calendar day exceeding the calendar days allowed in Section 00900 - Milestone Schedule or times as extended in accordance with the clause entitled "Extensions of Time" of the Specification.

Non-Collusive Bidding Certification:

By submission of this bid, each bidder and each person signing on behalf of any bidder certifies, and in the case of a joint bid each party thereto certifies on behalf of its own organization, under penalty of perjury, that to the best of his/her knowledge and belief:

- A. The prices in the bid have been arrived at independently without collusion, consultation, communication or agreement, for the purpose of restricting competition, as to any matter relating to such prices with any other bidder or with any competitor;
- B. Unless otherwise required by law, the prices which have been quoted in the bid have not been knowingly disclosed by the bidder prior to opening, directly or indirectly, to any other bidder to any competitor; and
- C. No attempt has been made or will be made by the bidder to induce any other person, partnership or corporation to submit or not to submit a bid for the purpose of restricting competition.

Representations of the Bidder:

The Bidder represents and certifies that:

- A. The Bidder is financially solvent and competent to perform the Work;
- B. That the Bidder is familiar with all Federal, State, or other laws, ordinances, orders, rules and regulations, which may in any way affect the Work;

January 10, 2005

Asbestos Removal - Monsignor McClancy Memorial High School

- C. That the Bidder has carefully examined the Contract documents and the Site of the Work and is satisfied as to the nature and location of the Work, the character quality and quantity of surface and subsurface materials likely to be encountered, the character or type of equipment and other facilities needed for the performance of the Work, the general and local conditions, and all other materials or items which may affect the Work;
- D. That the Bidder is an independent contractor and not an employee of the MMMHS. Unless the Contract specifically provides otherwise, the conduct and control of the Work shall be entirely the Bidder's responsibility at all times; and
- E. That Fair and Ethical Business Practices will be strictly adhered to during the life of this contract. During the term of this Contract, neither the Bidder nor any director, partner, principal, officer or employee shall:
1. File with a government office or employee, a written instrument which intentionally contains a false statement or false information;
 2. Intentionally falsify business records;
 3. Give, or offer to give, money or any other benefit to a labor official with intent to influence that labor official with respect to any of his or her acts, duties or decisions as a public servant; and
 4. Give, or offer to give, money or any other benefit to a public servant with intent to influence that public servant with respect to any of his or her acts, duties or decisions as a public servant; and
 5. Knowingly participate in the criminal activities of any organized crime group, syndicate or "family", nor shall any person employed by or associated with any such organized crime "family", syndicate or group participate through criminal means in any of the business affairs of the Bidder.
- F. If it becomes known that any director, partner, officer, employee of the Bidder, or any shareholder owning 5% or more of the Bidder's stock:
1. is subject of investigation involving any violation of criminal law or other federal, state or local law or regulation by any governmental agency: or
 2. is arrested, indicted or named as an unindicted coconspirator in any indictment or other accusatory instrument; or
 3. is convicted of any felony under state or federal law and/or any misdemeanor involving a business related crime.
- the bidder shall immediately notify the MMMHS of any such event.**
- G. That any Subcontract executed pursuant to this Contract will include the representations above as part of the Subcontract Agreement.

WESTCHESTER FIRE INSURANCE COMPANY

1074342

Know all men by these presents: That WESTCHESTER FIRE INSURANCE COMPANY, a corporation of the State of New York, having its principal office in the City of Atlanta, Georgia, pursuant to the following Resolution, adopted by the Board of Directors of the said Company on November 8, 1999, to wit:

"RESOLVED, that the following Rules shall govern the execution for the Company of bonds, undertakings, recognizances, contracts and other writings in the nature thereof:

- (1) That the President, any Senior Vice President, any Vice President, and Assistant Vice President, or any Attorney-in-Fact, may execute for and on behalf of the Company any and all bonds, undertakings, recognizances, contracts and other writings in the nature thereof, the same to be attested when necessary by the Corporate Secretary, or any Assistant Corporate Secretary, and the seal of the Company affixed thereto; and that the President, any Senior Vice President, any Vice President or any Assistant Vice President may appoint and authorize any other Officer (elected or appointed) of the Company, as Attorneys-In-Fact to so execute or attest to the execution of all such writings on behalf of the Company and to affix the seal of the Company thereto.
- (2) Any such writing executed in accordance with these Rules shall be as binding upon this Company in any case as though signed by the President and attested to by the Corporate Secretary.
- (3) The signature of the President, or a Senior Vice President, or a Vice President, or an Assistant Vice President and the seal of the Company may be affixed by facsimile on any power of attorney granted pursuant to this Resolution, and the signature of a certifying Officer and the seal of the Company may be affixed by facsimile to any certificate of any such power, and any such power or certificate bearing such facsimile signature and seal shall be valid and binding on the Company.
- (4) Such other Officers of the Company, and Attorneys-In-Fact shall have authority to certify or verify copies of this Resolution, the By-Laws of the Company, and any affidavit or record of the Company necessary to the discharge of their duties.
- (5) The passage of this Resolution does not revoke any earlier authority granted by Resolutions of the Board of Directors."

Does hereby nominate, constitute and appoint PAUL DEMASSI, DAVID R. AFANADOR, SUSAN P. HAMMEL and JENNIFER L. JOHNSTON all of the City of Hauppauge, State of New York, each individually if there be more than one named, its true and lawful attorney-in-fact, to make, execute, seal and deliver on its behalf, and as its act and deed any and all bonds, undertakings, recognizances, contracts and other writings in the nature thereof in penalties not exceeding Three Million Dollars (\$3,000,000) and the execution of such writings in pursuance of these presents shall be as binding upon said Company, as fully and amply as if they had been duly executed and acknowledged by the regularly elected officers of the Company at its principal office.

IN WITNESS WHEREOF, the said Stephen M. Haney, Vice-President, has hereunto subscribed his name and affixed the corporate seal of the said WESTCHESTER FIRE INSURANCE COMPANY this 30th day of August 2004.

WESTCHESTER FIRE INSURANCE COMPANY

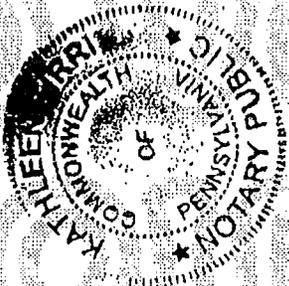

Stephen M. Haney

Stephen M. Haney, Vice-President

COMMONWEALTH OF PENNSYLVANIA

TERRORISM INSURANCE COVERAGE**

Named Insured JBH Environmental, Inc.			Endorsement Number
Policy Symbol	Policy Number KO 71 61 57 8	Policy Period TO	Effective Date of Endorsement
Issued By (Name of Insurance Company) Westchester Fire Insurance Company			

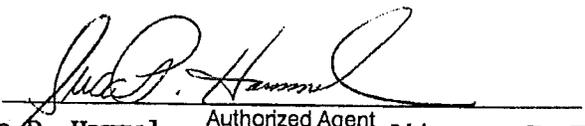

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

You should be aware that under the Terrorism Risk Insurance Act of 2002 ("The Act") effective November 26, 2002, any losses caused by certified acts of terrorism under your existing coverage may be partially reimbursed by the United States under a formula established by federal law (applicability is subject to the terms and conditions of each individual policy). The Act was specifically designed to address the ability of businesses and individuals to obtain property and casualty insurance for terrorism and to protect consumers by addressing market disruptions and ensure the continued availability of terrorism coverage.

Under the terms of The Act, you may now have the right to purchase insurance coverage for losses arising out of acts of terrorism, as defined in Section 102(1) of the Act: The term "act of terrorism" means any act that is certified by the Secretary of the Treasury, in concurrence with the Secretary of State, and the Attorney General of the United States-to be an act of terrorism; to be a violent act or an act that is dangerous to human life, property; or infrastructure; to have resulted in damage within the United States, or outside the United States in the case of an air carrier or vessel or the premises of a United States mission; and to have been committed by an individual or individuals acting on behalf of any foreign person or foreign interest, as part of an effort to coerce the civilian population of the United States or to influence the policy or affect the conduct of the United States Government by coercion.

Responsibility for Compensation under The Act is shared between insurance companies covered by The Act and the United States. Under the formula set forth in The Act, the United States pays 90% of covered terrorism losses exceeding the statutorily established deductible, which is paid by the insurance company providing the coverage.

We are providing you with the terrorism coverage required by The Act. We have not established a separate price for this coverage; however the portion of your annual premium that is reasonably attributable to such coverage is: \$0.00.

INDEPENDENT ACCOUNTANTS' REVIEW REPORT

To the Stockholders
JBH Environmental, Inc.
194 Atlantic Avenue
Garden City Park, New York 11040

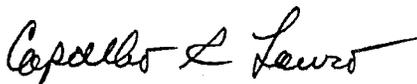

We have reviewed the accompanying balance sheets of JBH Environmental, Inc. as of December 31, 2004 and 2003 and the related statements of income and retained earnings, and cash flows for the years then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of JBH Environmental, Inc.

A review consists principally of inquiries of Company personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with generally accepted accounting principles.

Our reviews were made for the purpose of expressing limited assurance that there are no material modifications that should be made to the financial statements in order for them to be in conformity with generally accepted accounting principles. The supplementary information is presented only for additional analysis purposes. Such information has been subjected to the inquiry and analytical procedures applied in the reviews of the basic financial statements, and we are not aware of any material modifications that should be made thereto.

JBH ENVIRONMENTAL, INC.
NOTES TO FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2004 AND 2003

(1) Nature of operations:

JBH Environmental, Inc. (the Company) is an asbestos and lead removal contractor. The Company's services include the removal of asbestos material and the subsequent installation of new insulation. The Company's contracted work is primarily performed in the lower New York State region.

(2) Summary of significant accounting policies:

(A) Revenue and cost recognition:

Revenue is recognized on the "percentage of completion" method for reporting revenue on contracts not yet completed, measured by the percentage of total costs incurred to date to estimated total costs for each contract. This method is utilized because management considers the cost-to-cost method the best method available to measure progress on these contracts.

Contract costs include all direct material and labor costs and those other direct and indirect costs related to contract performance including, but not limited to, indirect labor, subcontract costs and supplies. General and administrative costs are charged to expense as incurred.

The Company has contracts that may extend over more than one year, therefore, revisions in cost and profit estimates during the course of the work are reflected in the accounting period in which the facts, which require the revisions, become known.

Provisions for estimated losses on uncompleted contracts are made in the period in which such losses are determined. No provisions are made for unbilled receivables on disputed claims for work done in addition to contract terms.

Revenues recognized in excess of amounts billed are recorded as a current asset under the caption "Costs and estimated earnings in excess of billings on uncompleted contracts." Billings in excess of revenues recognized are recorded as a current liability under the caption "Billings in excess of costs and estimated earnings on uncompleted contracts."

In accordance with construction industry practice, the Company reports in current assets and liabilities those amounts relating to construction contracts realizable and payable over a period in excess of one year.

JBH ENVIRONMENTAL, INC.
NOTES TO FINANCIAL STATEMENTS
(CONTINUED)
YEARS ENDED DECEMBER 31, 2004 AND 2003

(2) Summary of significant accounting policies - continued:

(B) Use of estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(C) Property and equipment:

Property and equipment are stated at cost. Depreciation is computed over the estimated useful lives of the assets using the straight-line method. Maintenance and repairs are charged to operations in the period incurred.

(D) Income taxes:

For income tax purposes, the Company reports earnings using the accrual method. Under this method, under and over billings on uncompleted contracts and retainages are not recognized (See Note 2(A) for financial reporting method). Deferred income taxes, if any, are provided for the timing differences resulting from the different methods used to report income for tax and financial reporting purposes.

(3) Stockholder loans:

At December 31, 2004 and 2003 the Company was indebted to the stockholders in the amounts of \$ - 0 - and \$48,034 respectively. The loans are unsecured and non-interest bearing.

(4) Notes payable - bank:

The Company has a line of credit with a bank that permits borrowings up to \$150,000. Interest is charged at the bank's prime rate plus 1%. The line is secured by company assets and renews every July. Any borrowings under this facility are personally guaranteed by the stockholders of the company. The amount outstanding at December 31, 2004 and 2003 was \$ - 0 - and \$133,000 respectively.

JBH ENVIRONMENTAL, INC.
NOTES TO FINANCIAL STATEMENTS
(CONTINUED)
YEARS ENDED DECEMBER 31, 2004 AND 2003

(5) Income taxes:

Effective January 1, 2004 the Company has changed its method of accounting for income tax purposes from the cash basis to the accrual basis. The effect of this change is to recognize total deferred income for tax purposes of \$437,788 over a four year period commencing in year 2004.

(6) Contracts in progress:

Information with respect to contracts in progress as of December 31, 2004 is as follows:

Expenditures on uncompleted contracts	\$ 233,431
Gross profit thereon	<u>79,205</u> 312,636
Less billings applicable thereto	<u>299,243</u>
	<u>\$ 13,393</u>

Included in the accompanying balance sheet under the following caption:

Costs and estimated earnings in excess of billings on uncompleted contracts	\$ <u>13,393</u>
	<u>\$ 13,393</u>

(7) Concentration risk:

(A) Credit risk:

Financial instruments, which potentially expose the Company to a concentration of credit risk, consist of trade accounts and retainage receivable (if any). Trade accounts and retainage receivables (if any) are due from customers located in the New York metropolitan area. The Company does not require collateral in most cases, but may file statutory liens against the construction projects if a default in payment occurs.

(B) Customers:

The company obtains its contract work primarily through a competitive bid process. This may result in the Company earning a substantial portion of its revenue from relatively few customers in any given year.

JBH ENVIRONMENTAL, INC.
NOTES TO FINANCIAL STATEMENTS
(CONTINUED)
YEARS ENDED DECEMBER 31, 2004 AND 2003

(8) Commitments and contingencies:

(A) Operating leases:

The Company has an operating lease for office and storage space. Rent expense for the years ended December 31, 2004 and 2003 was \$51,474 and \$58,064, respectively. In addition, the Company leases automobiles for business use. The related expense is included in general and administrative expenses.

The aggregate minimum lease payments at December 31, 2004 are as follows:

<u>Year ending December 31,</u>	<u>Amount</u>
2005	\$ 75,660
2006	71,329
2007	67,623
2008	<u>51,650</u>
	<u>\$ 266,262</u>

(B) Performance bonds:

The Company is contingently liable to a surety under a general indemnity agreement. The Company agrees to indemnify the surety for any payments made on contracts of suretyship, guaranty or indemnity. The Company believes that all contingent liabilities will be satisfied by their performance on the specific bonded contracts involved.

(C) Multiemployer pension plans:

The Company made contributions during both 2004 and 2003 to multiemployer pension plans that cover its union employees. These plans provide benefits based on union members' earnings and period of coverage under the respective plans. However, in the event of plan terminations or Company withdrawal from the plans, the Company may be liable for a portion of the plans' unfunded vested benefits, the amounts of which, if any, has not been determined.

JBH ENVIRONMENTAL, INC.
NOTES TO FINANCIAL STATEMENTS
(CONCLUDED)
YEARS ENDED DECEMBER 31, 2004 AND 2003

(9) Backlog:

Backlog represents the amount of revenue the Company expects to realize from work to be performed on uncompleted contracts in progress at December 31, 2004 and from contractual agreements on which work has not commenced. Backlog consists of the following:

Estimated revenue to be recognized from:	
Contracts in progress	\$ 106,957
Contracts on which work has not commenced	<u>299,099</u>
Total	<u>\$ 406,056</u>

Ms. Yvette Feyjoo
JBH Environmental Inc.
1804 Plaza Avenue, Suite 1
New Hyde Park, NY 11040

Dear Ms. Feyjoo:

On behalf of New York State, the Department of Economic Development, Division of Minority and Women's Business Development (D/MWBD) has completed its review of your application for State certification as a Minority and Woman-owned Business Enterprise and has determined that your firm meets eligibility requirements pursuant to Executive Law, Article 15-A.

We are pleased to inform you that the firm of JBH Environmental Inc., has been granted status as a Minority and Woman-owned Business Enterprise.

Your business will be listed in the State's Directory of Certified Businesses with the following list of principal products or services:

Asbestos Removal (29) & Lead Abatement (240)

Certification status is not intended to imply that the State of New York guarantees your company's capability to perform on contracts, nor does it imply that your company is guaranteed any State business.

Be advised that your certification remains in effect until such time as you are contacted by this Office for recertification. Please remember that any changes in your company that affect ownership, managerial, and/or operational control must be reported to this Office within 30 days of such changes; including changes of company name, business address, telephone numbers, principal products/services, and bonding capacity. At such time as it is necessary for your company to be recertified, you will be notified by this Office.

Empire State Development Corporation
633 Third Avenue New York, New York 10017-6754 Tel 212 803 3223 Fax 212 803 3223

If your certification status is questioned by any public or private entity, please direct the inquiry to this office for clarification.

Thank you for your cooperation. On behalf of the State of New York, I wish you luck in your business endeavors, particularly in those involving State agencies.

Sincerely,

COMPANY OVERVIEW

INTRODUCTION

JBH Environmental is a specialty contractor providing remedial services to government and private industry. Its primary objective is to apply the heavy construction needed to start and complete any project. In addition, JBH provides the environmental acumen needed to evaluate financial and operating risk, provide our own designs and plans, health and safety supervision.

CAPABILITIES

JBH provides turn-key operations from the earliest phases of project engineering and planning to total completion. The following sections outline many of the services offered by JBH.

DISPOSAL

JBH contracts transportation with hazardous waste carriers who are fully insured in the areas of general and automobile liability as well as pollution liability insurance. We insist on protection not less than that required by existing state, federal, and local environmental regulations.

FINANCIAL BONDING AND INSURANCE INFORMATION

JBH and its affiliates are provided with bonding by FRONTIER BONDING. We are able to provide performance bonds for hazardous waste projects as well as traditional construction work.

JBH personnel have extensive experience in all aspects of remedial service. These personnel are familiar with the problems associated with bonding hazardous wastes project development from the earliest planning components through project implementation and post-closure care.

CONTRACTOR'S LIABILITY COVERAGE

JBH provides general liability insurance with limits of \$2,000,000 per occurrence and a \$2,000,000 annual aggregate with a \$4,000,000 umbrella policy.

Higher limits can be obtained on a "site specific" basis. General and pollution liability coverage are provided by a leading US insurer licensed in all states best rated A+15 specializing in pollution liability coverage. Project specific Insurance certificates will be provided for client review prior to commencement of work.

CORPORATE HEALTH AND SAFETY PROGRAM

JBH's Corporate Health and Safety Plan addresses personnel protection and medical monitoring. It provides a framework for activities necessary to develop and monitor site specific health and safety plans. JBH is dedicated to the protection of its personnel within environmental projects and to limiting client liability.

This has prompted JBH to develop an internal protocol for review of all projects by a certified industrial hygienist and a medical doctor experienced in occupational health issues. This review, coupled with project screening provides a high level of protection against the liabilities associated with health and safety issues. The following sections outline the key components of the plan.

MEDICAL MONITORING PROGRAM

All employees involved with hazardous waste or other contaminated sites participate in a medical monitoring program which includes a pre-employment physical, annual and termination examinations. Additional examinations may be required by the corporate health and safety consultant and/or the corporate medical consultant. These medical examinations provide employee protection and act as reference for worker's compensation claims. Furthermore, such monitoring supports preventative medical care. All occupational relevant information is retained by the medical consultant and released to employees upon request.

EMPLOYEE EXPOSURE PROGRAM

JBH implements Employee monitoring of exposure to site contaminants. This information is used to verify protection levels and supplements medical exams. Exposure monitoring is carried out in accordance with accepted industrial hygiene practice using NIOSH standardized methods, or a suitable equivalent. All samples are analyzed by a laboratory accredited by the American Industrial Hygiene Association. The corporate health and safety consultant provides written notification to all employees monitored under this program.

RESPIRATORY PROTECTION PROGRAM

Selection of respiratory protection is the responsibility of the site safety officer in cooperation with the corporate health and safety consultant. Site specific requirements for respiratory protection are provided in compliance with OSHA standards and are defined in the site health and safety plans.

TRAINING

All employees engaged in contaminated site activities receive training in compliance with 29 CFR 1910.120. This training includes 40 hours basic courses and OSHA supervisor training and refresher courses in addition to supervised on-the-job training and site-specific training. Each employee receives a written certification of their attendance at training courses a copy of which is provided to the client prior to commencement of site activities. Site training sessions and safety meeting are also documented for record keeping purposes.

ACCIDENT INVESTIGATION AND REPORTING

All accidents involving personal injuries, company owned equipment, property damage, or vehicle accidents are reported to the JBH office within 24 hours and to the site safety officer and client safety officer immediately.

GENERAL WORK RULES AND CONDITIONS OF EMPLOYMENT

Specific work rules are employed for the prevention of accidents. Conditions of employment include requirements for medical, drug, and exposure monitoring and adherence to all applicable safety rules and requirements.

OSHA RECORD KEEPING

The OSHA prescribed record keeping requirements for hazardous waste projects apply to training, medical, and exposure monitoring and for occupational illnesses and injuries. Corporate record keeping procedures include all aspects of these requirements.

SUBCONTRACTOR HEALTH AND SAFETY

JBH's subcontractors are required to comply with all applicable health and safety regulations, as well as any site-specific plans. All subcontractors are required to submit documentation of compliance with the medical monitoring and training requirements of 29 CFR 1910.120 if necessary.

OSHA INSPECTIONS

The corporate procedures for OSHA inspections have been defined. The general guidelines for inspections are to provide full cooperation and complete documentation for the inspection.

CONFINED SPACE ENTRY PROGRAM

The confined entry program includes procedures and training requirements for work in confined spaces. This program is extremely important and rigidly enforced.

OSHA HAZARD COMMUNICATION PROGRAM

Hazardous waste is specifically excluded from the OSHA hazard communications requirements. However, these requirements do apply to any chemicals purchased for use by JBH employees. As such, this program addresses the training and information, which must be provided to help employees safely handle hazardous materials.

STANDARDIZED PROCEDURES

JBH has developed a series of standardized operating procedures (SOPs) and quality assurance/quality control (QA/QC) procedures. These improve safety and productivity while assuring consistency within various tasks. This consistency helps minimize liability resulting from negligence and demonstrates the effectiveness of remedial methods to regulatory agencies. The principal elements are described in the following sections.

STANDARD OPERATING PROCEDURES

The SOPs which JBH implements include activities specific to various field operations as identified below:

- Field documentation
- Field investigative procedures
- Equipment decontamination
- On-site screening
- Reporting of analytical information

These procedures are supplemented on a site-specific basis, as needed, with procedures amenable to standardization.

QUALITY ASSURANCE/QUALITY CONTROL

Environmental remediation projects require unique sampling and laboratory support. This support is often expensive and crucial to project commitment and direction.

For this reason, JBH operates its own field service laboratories which are capable of performing virtually all analytical procedures required in support of environmental remediation.

REGULATORY AFFAIRS

Remedial activities often require interface with regulatory agencies, citizen groups, and elected officials. The statutory framework affecting a particular project is often restrictive and cumbersome. To facilitate remedial operations, permit acquisition, and regulatory compliance, JBH maintains third party legal counsel. Additionally, qualified environmental counsel can help provide liability recognition and avoidance.

JBH's counsel is available to work with client operating and legal staffs during the planning and implementation phases of projects. This may be particularly helpful during the development of liability assessments.

United States Environmental Protection Agency

This is to certify that:

JBH Environmental

194 Atlantic Avenue
Garden City Park, NY 11040

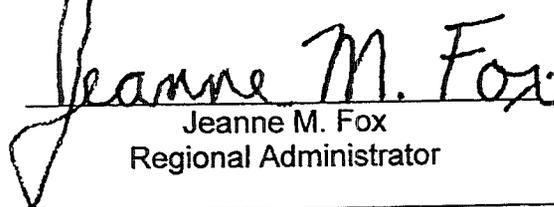

has fulfilled the requirements of the Toxic Substances Control Act (TSCA) Section 402(a)(1), and has received certification as a firm, pursuant to 40 CFR Part 745.226 to conduct lead-based paint activities:

Floral Park, NY 11001

Dear Jim:

Just a note of thanks for a job well done. Over the past four years that The Boys' Club of New York and JBH Environmental have been doing business together, your company has demonstrated a demeanor of professionalism and personalized service in performing any and all Abatement Projects that we have had. The asbestos removal of the Flushing Clubhouse roof is a case in point.

Your turnaround time in any emergencies that we have encountered has given you a reputation for reliable service which we have to appreciate and admire.

We are very pleased with JBH and will continue to use your company for any future projects we may have.

Thank you.

Sincerely,

Don Cangelosi
Assistant Executive Director

Dear Jim,

I would like to take this opportunity to thank JBH Environmental for the years of excellence and dedicated work that they have delivered to the Senid Plumbing & Heating Corp.

Over the years Senid Plumbing has had nothing but dependable and pleasant experiences with JBH. While working with you on projects we have always had excellent and prompt service with all of our projects. The service you have provided us with has always been professional and dependable.

It is with great pleasure that Senid Plumbing thanks you for your service. We look forward to working on future projects together. It has always been an advantage to know you are a part of our team.

Sincerely,

January 10, 2005

Monsignor McClancy Memorial High School
REQUEST FOR BID PROPOSALS

MONSIGNOR McCLANCY MEMORIAL HIGH SCHOOL
71-06 31ST AVENUE
EAST ELMHURST, NY 11370

Public notice is hereby given that sealed Bid Proposals for the Soundproofing Construction work as prescribed by the Plans and Specifications Bid Documents for the Soundproofing of Monsignor McClancy Memorial High School, East Elmhurst, New York will be received at the Monsignor McClancy Memorial High School 71-06 31st Avenue East Elmhurst, New York 11370, in the General Office before 10:30 AM on *February 17, 2005* when Bidding will be closed and the packages publicly opened and read aloud. No late Bid Proposals will be accepted and incomplete or non-compliant Bid Proposals will be rejected.

Bids shall be for General Construction - All Trades on the basis of a Stipulated Lump Sum Contract.

Complete sets of Bid Documents, prepared by the Architect, John Ciardullo Associates, 221 West 57 Street, New York, N.Y. 10019, 212/ 245-0010 will be available to General Contractors at the Architect's office on or after *January 10, 2005* upon receipt of a non-refundable payment of \$100.00 per set. Only cash or certified checks payable to the order of John Ciardullo Associates will be accepted. When purchasing Bid Documents, all General Contractors must be prepared to provide the following information: Complete company name, mailing and street address, telephone numbers, facsimile number and responsible contact person.

Complete sets or parts of sets of Bid Documents will not be issued to Subcontractors, material suppliers, or manufacturers. They are requested to arrange for copies with their respective General Contract Bidders. A list of Bidders will be made available through the Architect's office upon request.

All Bids must be submitted in accordance with the INFORMATION TO BIDDERS section of the Specification. The Bid Proposal, with all other required information must be submitted in a sealed opaque inner envelope marked "GENERAL CONSTRUCTION - ALL TRADES, SOUNDPROOFING OF MONSIGNOR McCLANCY MEMORIAL HIGH SCHOOL - A.I.P. PROJECT NO. NY-LGA 80-02 and NY-LGA 98-03" A larger outer envelope containing the Bid Proposal shall be addressed to Monsignor McClancy Memorial High School, 71-06 31st Avenue East Elmhurst, New York 11370 with the Contractor's return address and project name indicated on the outer envelope.

The Bidder must submit with his Bid Proposal a notarized affidavit including the firm's legal status, a list-itemizing projects that are currently under contract, contract amounts and the name and telephone numbers of project contacts on the attached Current Contract Form and that there have been no material adverse changes in his qualification information or the total amount of uncompleted work on contracts at this time.

Bidders are alerted to the Information for Bidders Section 11 - F.A.A. Requirements, 14.3% DBE Participation Goal.

Bidders are required to comply with the requirements of P.L. 1975, C 127-Affirmative Action Regulation and Executive Order #11246 for Federal Equal Employment Opportunity.

The successful Bidder shall be required to pay at least the US Department of Labor Davis Bacon Prevailing Wage Rates or The City of NY Office of the Comptroller Prevailing Wage Schedule Rates whichever is greater. (See appendix 3 & 4).

January 10, 2005

Monsignor McClancy Memorial High School

According to Public Law, Chapter 15, Title 40 and Chapters 32 and 33, Title 52, the Contractor shall agree that in the performance of construction, only domestic materials and manufacturers will be used when available.

Bidders are alerted that "Approval of Subcontractors" is required for all subcontract work, and a window manufacturer's certification of compliance form shall be submitted with bid in the bid envelope. The work under this solicitation requires General Construction, VAC. and Electrical work. Therefore Subcontractor Approval Application forms and Request for Subcontractor Approval forms are required for each of the above referenced trades or portions of trades. If the bidder intends to perform any of the above work with its own forces, it must complete the subject forms using its company name and related information.

Each Bid Proposal must be accompanied by a certified check, or Bid Bond in the amount of 10% of the Bid amount. Additionally each Bidder shall include as part of his Bid Proposal the cost of a Performance and Labor and Material Payment Bond in the amount of 100% of the Contract Price. The Bid must also be accompanied by a certificate from a Surety Company authorized to do business in the State of New York, certifying that said Surety Company will be providing the Bidder with a Performance Bond and Labor and Material Payment Bond which shall remain in force to cover the three year guarantee period after the completion of construction.

A Pre-Bid Conference will be held at 11:00 AM on *January 19, 2005* in the Second Floor Office of Monsignor McClancy Memorial High School to review the existing conditions. This invitation is extended to Bidders only and their associated subcontractors. Participation is strongly advised. Bidders are to confirm their attendance by facsimile to the Architect's office. All questions regarding this Request for Bid Proposals must be submitted in writing and transmitted by facsimile to the Architect no later than 4:00 PM *January 28, 2005*

The Owner reserves the right to reject any and all bids or to waive any immaterial defects or informality in any bid should it be deemed to the best interest or discretion of the Owner to do so.

Any inquiries or questions relating to this Request for Bid Proposals should be directed, in writing, to Mr. Richard Piacentini and faxed to John Ciardullo Associates, 221 West 57 Street - 9th Floor, New York, N.Y. 10019, telephone 212/245-0010, facsimile 212/245-0020.

January 10, 2005

**Monsignor McClancy Memorial High School
INFORMATION FOR BIDDERS**

1. FORM AND SUBMISSION OF BIDS

The Monsignor McClancy Memorial High School, hereinafter called the "Owner", invites Proposals in the annexed form. Proposals will be received until the time and date indicated on the attached Addendum in the General Office, at the Monsignor McClancy Memorial High School, East Elmhurst, New York. Each proposal must be sealed in an envelope which shall conspicuously endorsed with the Bidder name and the Title of this Contract on the front.

The proposal must be submitted upon the blank forms bound herewith and must give all information required. The proposal must be signed and the acknowledgment taken on the appropriate form following the Proposal.

Submission of the completed forms and required supplemental documents shall signify complete agreement and acceptance of the terms and conditions contained, described or required in the complete set of bid documents including both contract specification books, contract drawings and addenda by the bidder.

No effort is made to emphasize any particular provision of the Contract, but bidders must familiarize themselves with every provision and its effect.

The Owner, in accordance with Title VI of the Civil Rights Act of 1964, 78 Stat. 252, 42 U.S.C. 2000d to 2000d-4 and Title 49, Code of Federal Regulations, Department of Transportation, Subtitle A, Office of the Secretary, Part 21, Non discrimination in Federally-Assisted programs of the Department of Transportation issued pursuant to such Act, hereby notifies all bidders that it will affirmatively insure that any contract entered into pursuant to this advertisement, minority business enterprise will be afforded full opportunity to submit bids in response to this invitation and will not be discriminated against on the grounds of sex, race, color, or national origin in consideration for an award.

In addition, this Contract is subject to the requirements of Part 23 of Title 49 of the Code of Federal Regulations, Participation by Minority Business Enterprise in Department of Transportation programs, Part 60-4 of Title 41 of the Code of Federal Regulations, (Department of Labor) Construction Contractors, Affirmative Action Requirements.

Bids shall not contain any recapitulation of the work to be done. No oral, telegraphic or telephonic bids or modifications shall be considered.

Bids that are illegible or that contain omissions, alterations, additions or items not called for in the bidding documents may be rejected as not responsive. Any bid which modifies, limits, or restricts all or any part of such bid, other than as expressly provided for in the Contract Documents, may be rejected as not responsive.

The Owner may reject any bid not made, prepared and submitted in accordance with the provisions of the Contract Documents. The Owner also reserves the right to reject any and all bids or to waive any immaterial defects or informality in any bid should it be deemed in his best interest to do so.

Any bid may be withdrawn prior to the scheduled time for the opening of bids or authorized postponement thereof and any bid received after such time and date shall not be considered.

No Bidder may withdraw a bid for sixty (90) days after the actual date of the opening thereof.

January 10, 2005

Monsignor McClancy Memorial High School

2. PAPERS ACCOMPANYING PROPOSALS

Each Proposal must be accompanied by the following papers, which, unless otherwise indicated, should be enclosed with the Proposal:

(1) Bid and Contract Agreement (with Acknowledgment)

The Form of Contract bound herewith, including the bidder's prices inserted in the clause thereof entitled "Contract Sum". The amount must be given both in figures and in writing, and in the case of discrepancy, the writing shall control. The Contractor shall complete the correct acknowledgment form for the entity or individual submitting the proposal.

If the bidder be a corporation: (a) a statement of the name and residence of its president or chief executive officer, which may be on the last page of the agreement.

If the bidder be a partnership, a statement of the name and residence of a partner, which may be on the last page of the agreement.

If the bidder be an individual, a statement of his residence, which may be on the last page of the agreement.

(1a) Window Manufacturer's Certification of Compliance with window Specifications.

(2) Bid Bond and Surety Co. Certification

Either the Bid Bond bound herewith, duly executed by the bidder as a principal and by one or more surety companies duly authorized to carry on the business of surety ship in the state of New York, whose names appears on the current list of the Treasury Department of the United States as acceptable as sureties upon federal contracts; or in lieu of a Bid Bond:

A certified check payable to the order of the Owner, in the amount of 10 % of the Base Bid Amount appearing in the Bid and Contract Agreement, which check shall be separately delivered, prior to the time of bid opening, to the Monsignor McClancy Memorial High School, 71-06 31ST Avenue, East Elmhurst, New York 11370; Attention Brother Robert Connolly . The bidder will be given proper receipt for his check.

Bid bond shall stipulate and certify that the Surety will issue upon award of contract, a performance and material payment bond in the full amount of the contract price as stipulated therein.

(3) Bidder's Net Worth

A balance sheet showing the net worth of the bidder as of a date not earlier than forty-five days prior to the opening of the Proposals; or in lieu thereof, a balance sheet showing the net worth of the bidder not earlier than the end of a preceding fiscal year, together with a statement in writing, signed by a duly authorized representative of the bidder, that the present financial condition of the bidder is at least as good as that shown on the balance of the sheet submitted and that the net worth of the bidder is in excess of 10% of the current cumulative project value. The balance sheet or statement shall also note the name and address of the bidder's chief bank with the name of the representative handling the account.

*(4) Contractor's Qualifications

Bidders current Contracts shall be certified and itemized noting contract date, contract amount, anticipated project completion date, project contact individual and the individual's telephone number. Provide all information and certifications indicated on the form provided.

a. Submit evidence that the bidder has acted as the General Contractor for a minimum of 7 years. The documentation shall include a list of projects on the attached form indicating Project Cost, Location, Architect of Record, Owner, Owner's contact person, phone number and Date of Substantial Completion on the attached Data Sheet.

b. Submit evidence that the bidder has successfully completed at least 5 projects of comparable size

January 10, 2005

Monsignor McClancy Memorial High School

and scope within the last 5 years. The documentation shall include a list of projects on the attached form indicating Project Cost, Location, Architect of Record, Owner, Owner's contact person, phone number and Date of Substantial Completion.

- c. The Bidder shall certify that there has been no unsatisfactory evaluation filed on any of the work performed by the bidder on any past or present projects by any client or agency.
- * (5) Addenda
One copy of each addendum, if any, issued during the bidding period shall be initialed and attached to the proposal, but any Proposal submitted without such addendum installed and attached will nevertheless be construed as though such addendum had been initialed and attached.
- (6) Request for subcontractor approval form.
On the form provided, indicate all proposed subcontractors to be used on all phases of the work
- (7) Subcontractor approval applications.
On the form provided, submit data for each proposed subcontractors to be used on any phase of the work.
- * (8) Progress Schedule
The bidder's progress schedule and analysis of the bid filled in on the form furnished herewith. The Contractor will be required to furnish a more detailed progress schedule and analysis of the bid at a later date in accordance with the requirements of the Clause entitled Progress Schedule and Analysis of Bid".
- * (9) Certificate of Non-Segregated Facilities
A Certification of Non-Segregated Facilities filled in on the form provided herein.
- * (10) Asbestos
- * (11) DBE participation form
Asbestos acknowledgment form provided, and attached hereto, shall be submitted by Contractor and all subcontractors performing Work of any type whatsoever, prior to commencement of that Work.

* Items noted with an asterisk (*) shall be submitted within 72 hours of a request for this information by the owner.

3. QUALIFICATION INFORMATION

Contractor and Subcontractors shall and will certify that they are Reputable Contractors in good standing and provide tradesmen licensed offer the services required by and contracted for under this Contract. The Owner may make any investigation as the Owner may deem necessary to determine the responsibility of any Bidder or to determine the ability of any Bidder to perform the Work. The Bidder s shall furnish to the Owner all information and data required by the Owner, including complete financial data, within the time and in the form and manner required by the Owner. The Owner reserves the right to reject any bid if the information required by the Owner is not submitted as required or if the information submitted by or the investigation of any bidder fails to satisfy the Owner that the Bidder is responsible, or is able or qualified to carry out the obligations of the Contract or to complete the work as contemplated. The owner shall be the sole judge of the Qualifications of the contractor to perform the work in a manner consistent with contract requirements. Unqualified bids will be judged defective.

4. SUBCONTRACTOR INFORMATION REQUIREMENTS

- A. These provisions are in addition to the provisions of the General Conditions under which the Owner reserves the rights of approval and acceptance of the use of any subcontractors that the contractor proposes to use on the project.
- B. Each Bidder shall within 72 Hrs. of a request by owner a separately sealed envelope containing , completed Subcontractor Approval Application forms (form attached) for the proposed plumbing, VAC. and electrical

January 10, 2005

Monsignor McClancy Memorial High School

subcontractors. In the same envelope which contains the Subcontractor Approval Application, the Bidder shall submit a completed Request for Subcontractor Approval Form (form attached) indicating the names of the above-proposed subcontractors and the estimated value of the work to be performed.

5. ACCEPTANCE OR REJECTION OF PROPOSAL

Within sixty (60) days after the opening of the proposals, the Owner will accept one of the Proposals, if it accepts any. The acceptance of a Proposal will be only by mailing to or delivering at the office designated in the Proposal, a notice in writing specifically indicating acceptance signed by an authorized representative on behalf of the Owner. No other act of the Owner, its agents, or employees shall constitute acceptance of a Proposal. Such notice will state whether or not the Owner elects to require the bidder to furnish a Performance and Payment Bond. Rejection of a proposal will be by only either (a) a notice specifically stating that the Proposal is rejected, signed by an authorized representative on behalf of the Owner and mailed to or delivered at the office designated in the Proposal or (b) omission of the Owner to accept a Proposal within 60 days after the opening of Proposals; and no other act of the Owner, its agents or employees shall constitute rejection of a Proposal, including any counter offer or other act of the Owner its agents or employees.

In the selection of the successful bid, the owner shall select the combined Base Bid and Item 1 Bid most advantageous to the owner.

The Owner reserves the unqualified right, in its sole and absolute discretion, to reject any bid proposal and/or to waive minor defects in any Proposal.

In the event that a successful bidder defaults upon the Contract by failing to furnish a satisfactory Performance and Payment Bond, or failing to adequately demonstrate through submitted documentation or subsequent investigation, adequate Qualifications of the bidder's capacity or experience to perform the work of the contract and the Owner terminates the Contract, the Owner reserves the option to subject the Proposal of the each of the next lowest bids in turn to the same tests and accept the next lowest bid within sixty (60) days after the opening of Proposals, in which case such acceptance shall have the same effect as to such other bidder as though he were the original lowest bidder.

6. RETURN OF CERTIFIED CHECKS

Within ten (10) days after the opening of the Proposals, the Owner will return all certified checks deposited by the bidders, except those deposited by three bidders to be selected by the Owner, which will be returned within three (3) days after the satisfactory Performance and Payment Bond is furnished to the Owner; or if all Proposals are rejected, not later than three (3) days after such rejection. The return of a bidder's check shall not however, be deemed to be a rejection of his Proposal.

7. INSPECTION OF SITE AND CONTRACT DOCUMENTS

Prospective bidders shall examine the contract documents carefully, before bidding. A pre-bid walk-through is scheduled for the date included in the cover letter attached at Monsignor McClancy Memorial High School, 71-06 31st Avenue East Elmhurst, New York 11370 The bidder shall, at the time of bid opening, be presumed to have read and to be familiar with all the Contract Documents and to have inspected the site and be familiar with field conditions.

For site visits other than the pre-bid walk-through each bidder or his authorized representative must make proper arrangements with the Architect before inspecting the construction site. (Richard Piacentini of John Ciardullo Associates, 221 West 57 Street - 9th Floor, New York, N.Y. 10019, telephone 212/245-0010, facsimile 212/245-0020.

8. QUESTIONS BY BIDDERS

Prospective Bidders shall examine the Contract Documents carefully and, before bidding, shall make a

January 10, 2005

Monsignor McClancy Memorial High School

written request to the MMMHS's Representative for clarification of any ambiguity, or correction of any inconsistency or error therein. Every request for such clarification must be received at least ten (10) days prior to the date fixed for the opening of the bid. Such clarifications or corrections as well as any additional Contract Provisions as the Owner shall decide to include shall be issued in writing by the Owner or the Owner's representative as an addendum, which shall be sent by certified or registered mail or by telegraph or delivered to each prospective Bidder recorded as having received a copy of the Contract Documents from the Architect's office, and shall be available at the places where the Contract Documents are available for inspection by prospective bidders. Upon such mailing or delivery and making available for inspection, such addendum shall become a part of the Contract Documents and shall be binding on all bidders whether or not the Bidder receives or acknowledges the actual notice of such addendum. The requirements contained in all the contract documents shall apply to all addenda.

Questions may be addressed to Mr. Richard Piacentini of John Ciardullo Associates, (212) 245-0010). Neither he nor any employee of the Architect or owner is authorized to give interpretations of any portion of the Contract. Accordingly, nothing contained herein and no representation, statement or promise, oral or in writing, of the Owner, its representatives, agents or employees shall impair or limit the effect of the warranties and guarantees of the bidder. The provisions of this clause shall apply to questions addressed by prospective bidders both before and after their receipt of Contract Documents.

9. NON-COLLUSIVE BIDDING CERTIFICATION

By bidding on this Contract, each bidder and each person signing on behalf of any bidder certifies, and in case of a joint bid each party thereto certifies as to its own organization that: (a) the prices in his bid have been arrived at independently without collusion, consultation, communication or agreement, for the purpose of restricting completion, as to any matter relating to such prices with any other bidder or with any competitor; (b) the prices quoted in his bid have not been and will not be knowingly disclosed, directly or indirectly by the bidder prior to the official opening of such bid to any other bidder or to any competitor; (c) no attempt has been made and none will be made by the bidder to induce any other person, partnership or corporation to submit or not to submit a bid for the purpose of restricting competition.

The foregoing certification, if made by a corporate bidder, shall be deemed to have been authorized by the Board of Directors of the bidder, and such authorization shall be deemed to include the signing and submission of the certificate as to non-collusion and Code of Ethics as the act and deed of the corporation.

In any case where the bidder cannot make the foregoing certification, the bidder shall so state and shall furnish with the bid a signed statement which sets forth in detail the reasons therefor.

10. CERTIFICATION OF NO INDICTMENT, CONVICTION, SUSPENSION, DEBARMENT OR TERMINATION

By bidding on this Contract, each bidder and each person signing on behalf of any bidder certifies, and in the case of a joint bid each party thereto certifies as to its own organization, that the bidder has not (a) been indicted or convicted in any jurisdiction; (b) been suspended, debarred or otherwise disqualified from entering into contracts with any governmental agency; and (c) had a contract terminated by any governmental agency for breach of contract or for any cause related directly or indirectly to an indictment or conviction.

In any case where the bidder cannot make the foregoing certification, the bidder shall so state and shall furnish with the signed bid a signed statement which sets forth in detail the reasons therefore.

11. F.A.A. REQUIREMENTS

The contractor shall include the terms and conditions of this section in every subcontract entered for performance of contract work on this project. The Attachments titled "FAA REQUIREMENTS" and "49 CFR PART 23" apply to all contract and subcontract work on this project and are furnished in their entirety for the purpose of inclusion in all subcontracts.

A. D.B.E. PROGRAM

This Contract is subject to the United States Department of Transportation regulations on Disadvantaged Business Enterprise ("DBE'S") contained in Part 23 of Title 49 of the Code of Federal Regulations. The following goal for D.B.E. participation has been set for this Contract:

Fourteen point three percent (14.3%) of the value of the Contract for firms owned and controlled

January 10, 2005

Monsignor McClancy Memorial High School

by socially and economically disadvantaged individuals.¹

By bidding on this Contract, the bidder assures that it will meet the foregoing goal. If the bidder determines that he cannot make this assurance, he may nevertheless submit a bid but in such event he shall submit with the bid a separate writing which contains a statement of the percentage of DBE participation he anticipates.

In order to facilitate identifying DBE's the Port Authority of New York and New Jersey has a list of certified firms which is available on request.

Within Three (3) working days of the opening of bids, the bidder shall submit to the Owner the names and addresses of DBE firms, a description of the work each is to perform, and the dollar value of each proposed DBE subcontract. The bidder shall also submit the completed form labeled "Schedule A" and "Schedule B" (if appropriate) for any firm he proposes as a DBE.

If a bidder proposes to use the services of a subcontractor who has not been previously certified, then it must submit the name of the proposed DBE and the other information required by the Office, to the Port Authority's Office of Business and Job Opportunity for certification.

In the event that the bidder for this solicitation qualifies as a DBE, the contract goal shall be deemed to have been met.

A bidder who fails to meet the DBE goal for this Contract and fails to demonstrate to the Board that the Bidder has made good faith efforts to meet same shall not be eligible to be awarded the Contract. The following are illustrative of good faith efforts:

- (i) Attendance at a pre-bid meeting, if any, scheduled to inform DBE's of subcontracting opportunities under a solicitation;
- (ii) Advertisement in a general circulation media, trade association publications and minority focused media for at least 20 days before bids or proposals are due. If 20 days are not available, publication for a shorter reasonable time is acceptable;
- (iii) Written notification to DBE's that their interest in the Contract is solicited;
- (iv) Efforts made to select portions of the work proposed to be performed by DBE's in order to increase the likelihood of achieving the stated goal;
- (v) Efforts to negotiate with DBE's for specific sub-bids including at a minimum;
 - (a) The names, addresses and telephone numbers of DBE's that were contacted;
 - (b) A description of the information provided to DBE's regarding the plans and specifications for the portions of the work to be performed; and
 - (c) A statement of why additional agreements with DBE's were not reached;
- (vi) Concerning each DBE, the bidder contacted but rejected as unqualified, and the reason for the rejection;
- (vii) Efforts made to assist the DBE's contacted that needed assistance in obtaining bonding or insurance required by the bidder or Owner.

B. STANDARD EEO SPECIFICATION

¹ Individuals who are rebuttably presumed to be socially and economically disadvantaged include women, Blacks, Hispanics, Native Americans, Asian-Pacific Americans, and Asian-Indian Americans. A bidder may meet the DBE goal by using any combination of disadvantaged businesses.

January 10, 2005

Monsignor McClancy Memorial High School

The following constitutes Standard Federal Equal Opportunity Construction Contract Specifications (Executive Order 11246, as amended). These specifications should be included in all AIP assisted construction contracts or subcontracts (including the Solicitations for Bids) in excess of \$10,000.00 in geographical areas designated by the Director.

Standard Federal Equal Opportunity Construction Contract Specifications (Executive Order 11246, as amended).

- A. As used in these specifications:
- (1) "Covered Area" means the geographical area described in the solicitation from which this contract resulted;
 - (2) "Director" means Director, office of Federal Contract Compliance Programs (OFCCP), U.S. Department of Labor, or any person to whom the Director delegates authority;
 - (3) "Employer identification number" means the Federal Social Security Number used on the Employers's Quarterly Federal Tax Return, U.S. Treasury Department Form 941;
 - (4) "Minority" includes:
 - (a) Black (all persons having origins in any of the Black African racial groups not of Hispanic Origin);
 - (b) Hispanic (all persons of Mexican, Puerto Rican, Cuban, Central or South America, or other Spanish culture regardless of race);
 - (c) Asian or Pacific Islander (all persons having origins in any of the original peoples of the Far East, Southeast, Asia, the Indian Subcontinent, or the Pacific Islands); and
 - (d) American Indian or Alaskan native (all persons having origins in any of the original peoples of North America and maintaining identifiable tribal affiliations through membership and participation of community identification.
- B. Whenever the contractor, or any subcontractor at any tier, subcontracts a portion of the work involving any construction trade, it shall physically include in each subcontract in excess of \$10,000 the provisions of these specifications and the notice which contains the applicable goals for minority and the female participation which is set forth in the solicitations from which this contract resulted.
- C. If the contractor is participating (pursuant to 41 CFR 60-4.5) in the Hometown Plan approved by the U.S. Department of Labor in the covered area either individually or through association, in its affirmative action obligations on all work in the plan area (including goals and timetables) shall be in accordance with the plan for those trades which have unions participating in the plan. Contractors must be able to demonstrate their participation in the compliance with the provisions of any such Hometown Plan. Each contractor or subcontractor participating in an approved plan is individually required to comply with its obligations under the EEO clause and to make a good faith effort to achieve each goal under the plan in each trade in which it has employees. The overall good faith performance by other contractors or subcontractors toward a goal in an approved plan does not excuse any covered contractor's or subcontractor's failure to take good faith efforts to achieve the plan goals and timetables.
- D. the Contractor shall implement the specific affirmative action standards provided in paragraphs G (1) through (16) to these specifications. The goal set forth in the solicitation from which this contract resulted are expressed as percentages of the total hours of employment and training of minority and female utilizations that the contractor should reasonably be able to achieve in each construction trade in which it has employees in the covered area. The Contractor is expected to make substantially uniform progress towards its goals in each craft during the period specified.
- E. Neither the provisions of any collective bargaining agreement nor the failure by a union with whom the contractor has a collective bargaining agreement to refer either minorities or women shall excuse the contractor's obligations under these specifications, Executive

January 10, 2005

Monsignor McClancy Memorial High School

Order 11246, as amended, or the regulations promulgated pursuant thereto.

- F. In order for the non-working training hours of apprentices and trainees to be counted in meeting the goals, such apprentices and trainees must be employed by the contractor must have made a commitment to employ the apprentices and trainees at the completion of their training, subject to the availability of employment opportunities. Trainees must be trained pursuant to training programs approved by the U.S. Department of Labor.
- G. The Contractor shall take specific affirmative actions to ensure EEO. The evaluation of the contractor's compliance with these specifications shall be based upon its effort to achieve maximum results from its actions. The contractor shall document these efforts fully and shall implement affirmative action steps at least as extensive as the following:
- (1) Ensure and maintain a working environment free of harassment, intimidation and coercion at all sites, and in all facilities at which the contractor's employees are assigned to work. The Contractor, where possible, will assign two or more *women to each construction project. The contractor shall specifically ensure that all foremen, superintendents, and other on site supervisory personnel are aware of and carry out the contractor's obligation to maintain such a working environment, with specific attention to minority or female individuals working at such sites or in such facilities.*
 - (2) Establish and maintain a current list of minority and female recruitment sources, provide written notification to minority and female recruitment sources and to community organizations when the contractor or its unions have employment opportunities available, and maintain a record of the organization's responses.
 - (3) *Maintain a current file of the names, addresses, and telephone numbers of each minority and female off the street applicant and minority or female referral from a union, a recruitment source, or community organization and of what action was taken with respect to each such individual. If such individual was sent to the union hiring hall for referral and was not referred back to the contractor by the union, or, if referred, not employed by the contractor, this shall be documented in the file with the reason, therefore, along with whatever additional actions the contractor may have taken.*
 - (4) Provide immediate written notification to the Director when the union or unions with which the contractor has a collective bargaining agreement has not referred to the contractor a minority person or woman sent by the contractor, or when the contractor has other information that the union referral process has impeded the contractor's efforts to meet its obligations.
 - (5) Develop on-the-job training opportunities and/or participate in training programs for the area which expressly include minorities and women, including upgrading programs and apprenticeship and trainee programs relevant to the contractor's employment needs, especially those programs funded or approved by the Department of Labor. The Contractor shall provide notice of these programs to the sources compiled under G(2) above.
 - (6) *Disseminate the contractor's EEO policy by providing notice of the policy to unions and training programs and requesting their cooperation in assisting the contractor in meeting its EEO obligations; by including it in any policy manual and collective bargaining agreement; by publicizing it in the company newspaper, annual report, etc.; by specific review of the policy with all management personnel and with all minority and female employees at least once a year; and by posting the company EEO policy on bulletin boards accessible to all employees at each location where construction work is performed.*
 - (7) Review, at least annually, the companies EEO policy and affirmative action obligations under these specifications with all employees having any responsibility for hiring, assignment lay-off, termination, or other employment decisions including specific review of these items with on-site supervisory personnel such as superintendents, general foreman, etc, prior to the initiation of construction work at any job sites. A written record shall be made and maintained identifying the time and place of these meetings, persons attending, subject matter discussed, and disposition of the subject matter.
 - (8) Disseminate the contractor's EEO policy externally by including it in any

January 10, 2005

Monsignor McClancy Memorial High School

advertising in the news media, specifically including minority and female news media, and providing written notification to and the contractor's EEO policy with other contractors and subcontractors with whom the contractor does or anticipates doing business.

- (9) Direct its recruitment efforts, both oral and written, to minority, female, and community organizations, schools with minority and female students; and to minority and female recruitment and training organizations serving the contractor's recruitment area and employment needs. No later than one month prior to the date for the acceptance of applications for apprenticeship or other training by any recruitment source, the contractor shall send written notification to organizations, such as the above, describing the openings, screening procedures, and tests to be used in the selection process.
- (10) Encourage present minority and female employees to recruit other minority persons and women and, where reasonable, provide after school, summer, and vacation employment to minority and female youth both on site and in other areas of the contractor's workforce.
- (11) Validate all tests and other selection requirements where there is an obligation to do so under 41 CFR Part 60-3.
- (12) Conduct, at least annually, an inventory and evaluation, at least of all minority and female personnel, for promotional opportunities and encourage these employees to seek or to prepare for, through appropriate training, etc, such opportunities.
- (13) Ensure the seniority practices, job classifications, work assignments, and other personnel practices do not have a discriminatory effect by continually monitoring all personnel and employment related activities to ensure that the EEO policy and the contractors obligations under these specifications are being carried out.
- (14) Ensure that all facilities and company activities are nonsegregated except that separate or single-user access toilet and necessary changing facilities shall be provided to assure privacy between the sexes.
- (15) Document and maintain a record of all solicitations of offers for subcontracts from minority and female construction contractors and suppliers, including circulation of solicitations to minority and female contractor associations and other business associations.
- (16) Conduct a review, at least annually, of all supervisor's adherence to and performance under the contractor's EEO policies and affirmative action obligations.

- H. Contractors are encouraged to participate in voluntary associations which assist in fulfilling one or more of their affirmative action obligations under G(1) through G(16). The efforts of a contractor association, joint contractor-union, contractor-community, or other similar groups of which the contractor is a member and participant, may be asserted as fulfilling any one or more of its obligations under G(1) through G(16) of these specifications provided that the contractor actively participates in the group, makes every effort to assure that the group has a positive impact on the employment of minorities and women in the industry, ensures that the concrete benefits of the program are reflected in the contractor's minority and female work force participation, makes a good faith effort to meet its individual goals and timetables, and can provide access to documentation which demonstrates the effectiveness of actions taken on behalf of the contractor. The obligation to comply, however is the contractor's and failure of such a group to fulfill an obligation shall not be a defense for the contractor's non-compliance.
- I. A single goal for minorities and a separate goal for women have been established. The contractor, however, is required to provide EEO and to make affirmative action for all minority groups, both male and female, and all women, both minority and non-minority. Consequently, the contractor may be in violation of the Executive Order if a particular group is employed in a substantially disparate manner (for example, even though the contractor has achieved its goals for women generally, the contractor may be in violation of the Executive Order if a specific minority group of women is under utilized).
- J. The contractor shall not use the goals and timetables or affirmative action standards to discriminate

January 10, 2005

Monsignor McClancy Memorial High School

against any person because of race, color, religion, sex or national origin.

- K. The contractor shall not enter into any subcontract with any person or firm debarred from government contracts pursuant to Executive Order 11246, as amended.
- L. The contractor shall carry out such sanctions and penalties for violation of these specifications and of the Equal Opportunity Clause, including suspension, termination and cancellation of existing subcontracts as may be imposed or ordered pursuant to Executive Order 11246, as amended, and its implementing regulations, by the OFCCP. Any contractor who fails to carry out such sanctions and penalties shall be in violation of these specifications and Executive Order 11246, as amended.
- M. The contractor shall designate a responsible official to monitor all employment related activity to ensure that the company EEO policy is being carried out, to submit reports relating to the provisions hereof as may be required by the Government, and to keep records. Records shall at least include for each employee, the name, address, telephone number, construction grade, union affiliation if any, employee identification number when assigned, social security number, race, sex status (e.g., mechanic, apprentice, trainee, helper, or laborer), dates of changes in status (e.g. worked per week in the indicated trade), rate of pay, and locations the work was performed. Records shall be maintained in an easily understandable and retrievable form; however, to the degree that the existing records satisfy this requirement, contractors shall not be required to maintain separate records.
- N. Nothing herein provided shall be construed as a limitation upon the application of other laws which establish different standards of compliance or upon the application of requirements for the hiring of local or other area residents (e.g., those under the Public Works Employment Act of 1977 and the Community Development Block Grant Program).

REQUIRED NOTICE FOR CONTRACTS FOR 50 OR MORE EMPLOYEES AND A CONTRACT OF \$50,000 OR MORE

The prime contractor and each of his subcontractors who have 50 or more employees and a contract of \$50,000 or more shall, within 120 days from contract commencement, be required to develop and maintain a written affirmative action compliance program for each of its establishments.

In addition, the following will be required:

- A. Compliance Reports. Within 30 days after award of this contract, the contractor shall file a compliance report (Standard Form (SF) 100) with the Joint Reporting Committee if:
 - (1) The contractor has not submitted a complete compliance report within 12 months preceding the date of award, and
 - (2) The contractor is within definition of "employer" in paragraph 2e (3) of the instructions included in SF 100.
- B. The contractor shall require the subcontractor on any first tier subcontracts, irrespective of dollar amount, to file SF 100 within 30 days after award of the subcontract if the above two conditions apply. SF 100 is normally furnished contractors annually, based upon a mailing list currently maintained by the Joint Reporting Committee. In the event a contractor has not received the form, he may obtain it by writing to the following address:

Joint Reporting Committee
1800 G Street
Washington, D.C. 20506
- C. The contractor shall after commencement of contract work submit the Monthly Manpower Utilization Report (SF 257) to the OFCCP regional office, on or before the fifth working day of each month, reporting the activity of the previous month. If no work was accomplished, the form should be submitted stating that fact. A form is to be submitted for the last month of activity stating that the work has been completed.

SPECIAL PROVISIONS, NOTICES AND CERTIFICATIONS CONCERNING NONSEGREGATED FACILITIES

SPECIAL PROVISIONS RELATING TO AIP ASSISTED CONSTRUCTION PROJECTS IN EXCESS OF \$10,000

The sponsor hereby agrees that it will incorporate or cause to be incorporated into any contract for construction work, or modification thereof, as defined in the regulations of the Secretary of Labor at 41 CFR Chapter 60, which is paid for in whole or part with funds obtained from the Federal Government or borrowed on the credit of the Federal

January 10, 2005

Monsignor McClancy Memorial High School

Government pursuant to a grant contract, loan insurance, or guarantee, or undertaken pursuant to any Federal program involving such grant, contract, loan insurance, or guarantee the following equal opportunity clause.

During the performance of this contract, the contractor agrees as follows:

- A. The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. The contractor will take affirmative action to ensure that applicants are employed, and the employees are treated during employment without regard to their race, color, sex or national origin. Such action shall include, but not be limited to the following: Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising, layoff or termination, rate of pay or other forms of compensations; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices (to be provided) setting forth the provisions of this non-discrimination clause.
- B. The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.
- C. The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice (to be provided) advising the said labor union or worker's representatives of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.
- D. The contractor will comply with all provisions of Executive Order 11246, as amended, of 24 September 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.
- E. The contractor will furnish all information and reports required by Executive Order 11246, as amended, of 24 September 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the Secretary of Labor for purposes of investigation to ascertain compliance with such rule, regulations, and orders.
- F. In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further government contracts in accordance with procedures authorized in Executive Order 11246, as amended, of 24 September 1965, and such other sanctions may be imposed as remedies invoked as provided in Executive Order 11246, as amended, of 24 September 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.
- G. The Contractor will include the portion of the sentence immediately preceding paragraph A and the provisions of paragraphs A through G in every subcontract or purchase order unless exempted by rules, regulations or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246, as amended, of 24 September 1965, so that such provisions will be binding upon each subcontractor or vendor. the contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance. Provided, however that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

CERTIFICATION OF BIDDER REGARDING EQUAL EMPLOYMENT OPPORTUNITY (FOR CONSTRUCTION CONTRACTS EXCEEDING \$10,000).

BIDDERS NAME

ADDRESS

INTERNAL REVENUE SERVICE EMPLOYER IDENTIFICATION NUMBER
NONSEGREGATED FACILITIES

NOTICE TO PROSPECTIVE FEDERALLY-ASSISTED CONSTRUCTION CONTRACTORS:

- a. A certification of Nonsegregated Facilities must be submitted prior to the award of a Federally-assisted construction contract exceeding \$10,000 which is not exempt from the provisions of the equal opportunity clause.

January 10, 2005

Monsignor McClancy Memorial High School

- b. Contractors receiving Federally-assisted construction contract awards exceeding \$10,000 which are not exempt from the provisions of the equal opportunity clause will be required to provide for the forwarding of the notice to prospective subcontractors for supplies and construction contracts where the subcontracts exceed \$10,000 and are not exempt from the provisions of the equal opportunity clause. NOTE: The penalty for making false statements in offers is prescribed in 18 U.S.C. 1001.

CERTIFICATION OF NONSEGREGATED FACILITIES

The Federally-assisted construction contractor certifies that he does not maintain or provide for his employees any segregated facilities at any of his establishments, and that he does not permit his employees to perform their services at any location, under his control, where segregated facilities are maintained. The Federally-assisted construction contractor certifies further that he will not maintain or provide for his employees any segregated facilities at any of his establishments, and that he will not allow his employees to perform their services at any location, under his control, where segregated facilities are maintained. The Federally-assisted construction contractor agrees that a breach of his certification is a violation of the equal opportunity clause in his contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, restrooms, and washrooms, restaurants and other eating areas, time clocks, locker rooms and any other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, sex, or national origin, because of habit, local custom, or any other reason. The Federally assisted construction contractor agrees that (except where he has obtained identical certifications from proposed subcontractors for specific time periods) he will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding \$10,000 which are not exempt from the provisions of the equal opportunity clause, and that he will retain such certifications in his files.

NOTICE TO PROSPECTIVE CONTRACTORS OF REQUIREMENT FOR CERTIFICATION FOR NON SEGREGATED FACILITIES

A Certification of Nonsegregated Facilities must be submitted prior to the award of a contract or subcontract exceeding \$10,000 which is not exempt from the provisions of the equal opportunity clause.

Certification - The information above is true and complete to the best of my knowledge and belief.

Date

NOTE: The penalty for making false statements in offers is prescribed in 18 U.S.C. 1001.

NOTICE TO PROSPECTIVE SUBCONTRACTORS OF REQUIREMENTS FOR CERTIFICATION ON NONSEGREGATED FACILITIES

- a. A Certification of Nonsegregated Facilities must be submitted prior to the award of a contract or subcontract exceeding \$10,000 which is not exempt from the provisions of the equal opportunity clause.
- b. Contractors receiving Federally-assisted construction contract awards exceeding \$10,000 which are not exempt from the provisions of the equal opportunity clause will be required to provide for the forwarding of the notice to prospective subcontractors for supplies and construction contracts where the subcontracts exceed \$10,000 and are not exempt from the provisions of the equal opportunity clause. NOTE: The penalty for making false statements in offers is prescribed in 18 U.S.C. 1001.

C. A.I.P. REQUIREMENTS

REQUIRED LANGUAGE IN AIP CONSTRUCTION CONTRACTS, WAGE, LABOR, EEO AND SAFETY REQUIREMENTS

SECTION A. LABOR, EQUAL, EMPLOYMENT OPPORTUNITY AND SAFETY REQUIREMENTS FOR ALL CONSTRUCTION CONTRACTS AND SUBCONTRACTS

January 10, 2005

Monsignor McClancy Memorial High School

- A-1 **AIP PROJECT** - The work in this contract is included in AIP Project No. NY-LGA 80-02 and NY-LGA 98-03, which is being undertaken and accomplished by The Port Authority of New York and New Jersey and the United States, under the Airport and Airway Improvement Act of 1982 (AAIA)(P.L. 97-248, 49 U.S.C. 2201 et seq.) and Part 152 of the Federal Aviation Regulations (FAR) 14 CFR part 152, pursuant to which the United States has agreed to pay a certain percentage of the costs of the projects that are determined to be allowable project costs under that Act. The United States is not a party to this contract and no reference in this contract to the FAA or any representative thereof, or to any rights granted to the FAA or any representative thereof, or the United States, by the contract, makes the United States a party to this contract.
- A-2 **CONSENT TO ASSIGNMENT** - The Contractor shall obtain prior written consent of the and the Monsignor McClancy Memorial High School to any proposed assignment of any interest in or part of this contract.
- A-3 **VETERAN'S PREFERENCE** - In the employment of labor (except in executive, administrative, and supervisory positions), preference shall be given to veterans of the Vietnam era and disabled veterans. However, this preference shall apply only where the individuals are available and qualified to perform the work to which the employment relates.
- A-4 **FAA INSPECTION AND REVIEW** - The contractor shall allow any authorized representative of the FAA to inspect and review any work or materials used in the performance of this contract.
- A-5 **HEALTH AND SAFETY REQUIREMENTS** - It is a condition of this Contract, and shall be made a condition of each subcontract entered into pursuant to this Contract, that the Contractor and any subcontractor shall not require any laborer or mechanic employed in the performance of the Contract to work in surroundings or under working conditions which are unsanitary, hazardous, or dangerous to his health or safety, as determined under Construction Safety and Health Standards Title 29 CFR Part 1926 and other occupational and health standards (29 CFR Part 1910) promulgated by the United States Secretary of Labor, in accordance with Section 107 of the Contract Work Hours and Safety Standards Act (CWHSSA).
- A-6 **CONTRACT TERMINATION** - A breach of paragraph A-4 may be grounds for termination of the contract.

SECTION B. SECRETARY OF LABOR REQUIREMENTS

B-1 MINIMUM WAGES

1. All laborers and mechanics employed or working upon the site of the work will be paid unconditionally and not less often than once a week, and without subsequent deduction or rebate of any account (except such payroll deductions as are permitted by the Secretary of Labor under the Copeland Act (29 CFR Part 3), the full amount of wages and bona fide fringe benefits (or cash equivalents therefore) due at time of payment computed at rates not less than those contained in the wage determination of the Secretary of Labor which is attached hereto and made a part hereof, regardless of any contractual relationship which may be alleged to exist between the contractor and such laborers and mechanics. Contributions made or costs reasonably anticipated for bona fide fringe benefits under section 1 (b) (2) of the Davis-Bacon Act on behalf of laborers or mechanics are considered wages paid to laborers and mechanics, subject to the provisions of subparagraph a. (4) below; also, regular contributions made or costs incurred for more than a weekly period (but not less often than quarterly) under plans, funds, or programs which cover the particular weekly period. Such laborers and mechanics shall be paid the appropriate wage rate and fringe benefits on the wage determination for the classification of work actually performed, without regard to skill, except as provided in 29 CFR Part 5.5 (a)(4). Laborers or mechanics performing work in more than one classification may be compensated at the rate specified for each classification for the time actually worked therein: Provided, that the employer's payroll records accurately set forth the time spent in each classification in which work is performed. The wage determination (including any additional classification and wage rates conformed under a. (2) of the section) and the Davis-Bacon poster (WH-1321) shall be posted at all times by the contractor and its subcontractors at the site of the work in a prominent and accessible place where it can easily be seen by the workers.
2. (a) The contracting officer shall require that any class of laborers or mechanics which is not listed in the wage determination and which is to be employed under the contract shall be classified in conformance with the wage determination. The contracting officer shall approve an additional classification and wage rate and fringe benefits therefore only when the following criteria have been met:

January 10, 2005

Monsignor McClancy Memorial High School

- 1 The work to be performed by the classification requested is not performed by a classification in the wage determination; and
- 2 The classification is utilized in the area by the construction industry; and
- 3 The proposed wage rate, including any bona fide fringe benefits, bears a reasonable relationship to the wage rates contained in the wage determination.

(b) If the contractor and the laborers or mechanics to be employed in the classification (if known), or their representatives, and the contracting officer agree on the classification and wage rate (including the amount designated for fringe benefits where appropriate), a report of the action taken shall be sent by the contracting officer to the Administrator of the Wage and Hour Division, Employment Standards Administration, US Department of Labor, Washington, DC 20210. The Administrator or an authorized representative, will approve, modify, or disapprove every additional classification action which 30 days of receipt and so advise the contracting officer or will notify the contracting officer within the 30-day period that additional time is necessary.

(c) In the event the contractor, the laborers or mechanics to be employed in the classification or their representatives and the contracting officer do not agree on the proposed classification and wage rate (including the amount designated for fringe benefits where appropriate), the contracting officer shall refer the questions, including the view of all interested parties and the recommendation of the contracting officer, to the Administrator for determination. The Administrator or an authorized representative, will issue a determination within 30 days of receipt and so advise the contracting officer or will notify the contracting officer within the 30 day period that additional time is necessary.

(d) The wage rate (including fringe benefits where appropriate) determined pursuant to subparagraphs (2)(b) or (c) of this paragraph, shall be paid to all workers performing work in the classification under the this contract from the first day on which is performed in the classification.

3. Whenever the minimum wage rate prescribed in the contract for a class of laborers or mechanics includes a fringe benefit which is not expressed as an hourly wage rate, the contractor shall either pay the benefit as stated in the wage determination or shall pay another bona fide fringe benefit or an hourly cash equivalent thereof.
4. If the contractor does not make payments to a trustee or other third person, the contractor may consider as part of the wages of any laborer or mechanic the amount of any costs reasonably anticipated in providing bona fide fringe benefits under a plan or program, provided, that the Secretary of Labor has found, upon the written request of the contractor, that the applicable standards of the Davis-Bacon Act have been met. The Secretary of Labor may require the contractor to set aside in a separate account assets for the meeting of obligations under the plan or program.

B-2 **WITHHOLDING** - The Federal Aviation Administration shall upon its own action or upon written request of any authorized representative of Department of Labor withhold or cause to be withheld from the contractor under this contract or any other Federal contract with the same prime contractor, or any other Federally-assisted contract subject to Davis-Bacon prevailing wage requirements, which is held by the same prime contractor, so much of the accrued payments or advances as may be considered necessary to pay laborers and mechanics, including apprentices, trainees, and helpers, employed by the contractor or any subcontractor the full amount of wages required by the contract. In the event of failure to pay any laborer or mechanic, including any apprentice, trainee, or helper, employed or working on the site of work, all or part of the wages required by the contract, the Federal Aviation Administration may, after written notice to the contractor, sponsor, applicant, or owner, take such action as may be necessary to cause the suspension of any further payment, advance, or guarantee of funds until such violations have ceased.

B-3 **PAYROLLS AND BASIC RECORDS**

1. Payrolls and basic records relating thereto will be maintained by the contractor during the course of the work and preserved for a period of three years thereafter for all laborers and mechanics working at the site of the work. Such records will contain the name, address, and social security number of each such worker, his or her correct classification, hourly rates of wages paid (including rates of contributions or costs anticipated for bona fide fringe benefits or cash equivalents thereof of the types described in Section 1 (b)(2)(B) of

January 10, 2005

Monsignor McClancy Memorial High School

the Davis-Bacon Act), daily and weekly number of hours worked, deductions made and actual wages paid. Whenever the Secretary of Labor has found, under 29 CFR 5.5 (a)(1) (iv) that the wages of any laborer or mechanic include the amount of any costs reasonably anticipated providing benefits under a plan or program described in Section 1 (b) (2) (B) of the Davis-Bacon Act, the contractor shall maintain records which show that the commitment to provide such benefits is enforceable, that the plan or program is financially responsible, and that the plan or program has been communicated in writing to the laborers or mechanics affected, and records which show the costs anticipated or the actual costs incurred in providing such benefits. Contractors employing apprentices or trainees under approved programs shall maintain written evidence of the registration of apprenticeship programs and certification or trainee programs, the registration of the apprentices and trainees, and the rates and wage rates prescribed in the applicable programs.

2. (a) The contractor shall submit weekly for each week in which any contract work is performed, a copy of all payrolls to the Sponsors. The payrolls submitted shall set out accurately and completely all of the information required to be maintained under paragraph 5.5 (a)(3) (I) of Regulations, 29 CFR Part 5. This information may be submitted in any form desired. Optional Form WH-347 is available for this purpose and may be purchased from the Superintendent of Documents (Federal Stock Number 029-005-00014-1), US Government Printing Office, Washington, DC 20402. The prime contractor is responsible for the submission of copies of payrolls by all subcontractors.
(b) Each payroll submitted shall be accompanied by a "Statement of Compliance", signed by the contractor or subcontractor or his or her agent who pays or supervises the payment of the persons employed under the contract and shall certify the following:
 - 1 That the payroll for the payroll period contains the information required to be maintained under paragraph 5.5 (a)(3) (I) of Regulations, 29 CFR Part 5 and that such information is correct and complete;
 - 2 That each laborer and mechanic (including each helper, apprentice and trainee) employed on the contract during the payroll period has been paid the full weekly wages earned, without rebate, either directly or indirectly, and that not deductions have been made either directly or indirectly from the full wages earned, other than permissible deductions as set forth in Regulations 29 CFR Part 3;
 - 3 That each laborer or mechanic has been paid not less than the applicable wage rates and fringe benefits or cash equivalents for the classification of work performed, as specified in the applicable wage determination.
(c) The weekly submission of a properly executed certification set forth on the reverse side of Optional Form WH-347 shall satisfy the requirement for submission on the "Statement of Compliance" required by paragraph B-3 (2)(b) of this section.
(d) The falsification of any of the above certifications may subject the contractor or subcontractor to civil or criminal prosecution under Section 1001 of Title 18 and Section 231 of Title 31 of the United States Code.
3. The contractor and subcontractor shall make the records required under paragraph B-3 (2) (b) of this section available for inspection, copying or transcription by authorized representatives of the Federal Aviation Administration or the Department of Labor, and shall permit such representatives to interview employees during working hours on the job. If the contractor or subcontractor fails to submit the required records or to make them available, the Federal agency may, after written notice to the contractor, sponsor, applicant, or any further payment, advance, or guarantee of funds. Furthermore, failure to submit the required records upon request or to make such records available may be grounds for debarment action pursuant to 29 CFR 5.12.

B-4 APPRENTICES AND TRAINEES

1. Apprentices - Apprentices will be permitted to work at less than the predetermined rate for the work they performed when they are employed pursuant to and individually registered in a bona fide apprenticeship program registered with the US Department of Labor, Employment and Training Administration, Bureau of Apprenticeship and Training, or with a State Apprenticeship Agency recognized by the Bureau, or if a person

is employed in his or her first 90 days of probationary employment as an apprentice in such an apprenticeship program, who is not individually registered in the program, but who has been certified by the Bureau of Apprenticeship and Training or a State Apprenticeship (where appropriate) to be eligible for probationary employment as an apprentice. The allowable ratio of apprentices to journeymen on the job site in any craft classification shall not be greater than the ratio permitted to the contractor as to the entire work force under the registered program. Any worker listed on a payroll at an apprentice wage rate, who is not registered or otherwise employed as stated above, shall be paid not less than the applicable wage rate on the wage determination for the work actually performed. Where a contractor is performing construction on a project in a locality other than that in which its program is registered, the ratios and wage rates (expressed in percentages of the journeyman hourly rate) specified in the contractor's or subcontractor's registered program shall be observed. Every apprentice must be paid not less than the rate specified in registered program for the apprentice's level of progress, expressed as a percentage of the journeymen hourly rate specified in the applicable wage determination. Apprentices shall be paid fringe benefits in accordance with the provisions of the apprenticeship program. The apprenticeship program does not specify fringe benefits, apprentices must be paid the full amount of fringe benefits listed on the wage determination for the applicable classification. If the Administrator determines that a different practice prevails for the applicable apprentice classification, fringes shall be paid in accordance with that determination. In the event the Bureau of Apprenticeship and Training or a State Apprenticeship Agency recognized by the Bureau, withdraws approval of an apprenticeship program, the contractor will no longer be permitted to utilize apprentices at least than the applicable predetermined rate for the work performed until an acceptable program is approved.

2. Trainees - Except as provided in 29 CFR 5.16, trainees will not be permitted to work at less than the predetermined rate for the work performed unless they are employed pursuant to and individually registered in a program which has received prior approval, evidenced by formal certification, by the United States Department of Labor, Employment and Training Administration. The ratio of trainees to journeymen on the job site shall not be greater than permitted under the plan approved by the Employment and Training Administration. Every trainee must be paid at not less than the rate specified in the approved program for the trainee's level of progress, expressed as a percentage of the journeyman hourly rate specified in the applicable wage determination. Trainees shall be paid fringe benefits in accordance with the provisions of trainee program. If the trainee does not mention fringe benefits, trainees shall be paid the full amount of fringe benefits listed on the wage determination unless the Administrator of the Wage and Hour Division determines that there is an apprenticeship program associated with the corresponding journeyman wage rate on the wage determination which provides for less than full fringe benefits for apprentices. Any employee listed on the payroll at a trainee rate who is not registered and participating in a training plan approved by the employment and Training Administration shall be paid not less than the applicable wage rate on the wage determination for the classification of work actually performed. In addition, any trainee performing work on the job site in excess of the ratio permitted under the registered program shall be paid not less than the applicable wage rate on the wage determination for the work actually performed. In the event the Employment and Training Administration withdraws approval of a training program, the contractor will no longer be permitted to utilize trainees at less than the applicable predetermined rate for the work performed until an acceptable program is approved.
 3. Equal Employment Opportunity - The utilization of apprentices, trainees and journeymen under this part shall be in conformity with the equal employment opportunity requirements of Executive Order 11246, as amended, and 29 CFR Part 30.
- B-5 COMPLIANCE WITH COPELAND ACT REQUIREMENTS - The contractor shall comply with the requirements of 29 CFR Part 3, which are incorporated by reference in its contract.
- B-6 SUBCONTRACTS - The contractor or subcontractor shall insert in any subcontracts the clauses contained in 29 CFR Part 5.5 (a) (1) through (10) and such other clauses as the Federal Aviation Administration may by appropriate instructions require, and also a clause requiring the subcontractors to include these clauses in any lower tier subcontractor or lower tier subcontractor with all the contract clauses in 29 CFR Part 5.5.
- B-7 CONTRACT TERMINATION DEBARMENT - A breach of contract clauses in 29 CFR 5.5 may be grounds for termination of the contract, and for the debarment as a contractor and a subcontractor as provided in 29 CFR 5.12.

January 10, 2005

Monsignor McClancy Memorial High School

- B-8 COMPLIANCE WITH DAVIS-BACON AND RELATED ACT REQUIREMENTS All rulings and interpretations of the Davis-Bacon and Related Acts contained in 29 CFR Parts 1, 3, and 5 are herein incorporated by reference in this contract.
- B-9 DISPUTES CONCERNING LABOR STANDARDS - Disputes arising out of labor standards provisions of this contract (sponsor) shall not be subject to the general disputes clause of this contract (sponsor). Such disputes shall be resolved in accordance with the procedures of the Department of Labor set forth in 29 CFR Parts 5, 6 and 7. Disputes within the meaning of this clause includes disputes between the contractor (or any of its subcontractors) and the contracting agency, the US Department of Labor, or the employees or their representatives.
- B-10 CERTIFICATION OF ELIGIBILITY
1. By entering into this contract, the contractor certifies that neither it (nor he or she) nor any person or firm who has an interest in the contractor's firm is ineligible to be awarded Government contracts by virtue of Section 3 (a) of the Davis-Bacon Act or 29 CFR 5.12 (a)(1).
 2. No part of this contract shall be subcontracted to any person or firm ineligible for award of a Government contract by virtue of Section 3 (a) of the Davis-Bacon Act or 29 CFR 5.12 (a)(1).
 3. The penalty for making false statements is prescribed in the US Criminal Code, 18 U.S.C. 1001.
- C-1 CONTRACT WORK HOURS AND SAFETY STANDARD ACT - Note: As used in the following, the terms "laborers" and "mechanics" include watchmen and guards.
1. Overtime Requirements - No contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any such laborer or mechanic in any work week in which he or she is employed on such work to work in excess of eight hours in any calendar day or in excess of 40 hours in such work week unless such laborer or mechanic receives compensation at a rate not less than 1 ½ times his basic rate of pay for all hours worked in excess of eight hours in any calendar day or in excess of 40 hours in such work week, whichever is greater.
 2. Violations, Liability for Unpaid Wages, Liquidated Damages - In the event of any violation of the clause set forth in subparagraph (1) of the paragraph, the contractor and any subcontractor responsible therefore shall be liable for the unpaid wages. In addition, such contractor and subcontractor shall be liable to the United States (in the case of work done under contract for the District of Columbia or a territory, to such District or to such territory) for liquidated damages. Such liquidated damages shall be computed, with respect to each individual laborer or mechanic, including watchmen and guards, employed in violation of the clause set forth in subparagraph (1) of this paragraph, in the sum of \$10.00 for each calendar day on which such individual was required or permitted to work in excess of eight hours or in excess of the standard work week of 40 hours without payment of the overtime wages required by the clause set forth in paragraph (1) of this paragraph.
 3. Withholding for Unpaid Wages and Liquidated Damages The FAA shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld, from any moneys payable on account of work performed by the contractor or subcontractor under any such contract or any other Federal contract with the same prime contractor, or any other federally assisted contract subject to the Contract Work Hours and Safety Standards Act, which is held by the same prime contractor, such sums as may be determined to be necessary to satisfy and liabilities of such contractor or subcontractor for unpaid wages and liquidated damages as provided in the clause set forth in subparagraph (2) of this paragraph.
 4. Subcontracts - The contractor or subcontractor shall insert in any subcontracts the clauses set forth in subparagraph (1) through (4) of this paragraph and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for compliance by any subcontractor or lower tier contractor with the clauses set forth in subparagraph (1) through (4) of this paragraph.
- C-2 CONTRACTS SUBJECT ONLY TO CONTRACT WORK HOURS AND SAFETY STANDARDS ACT

January 10, 2005

Monsignor McClancy Memorial High School

1. The contractor or subcontractor shall maintain payrolls and basic payroll records during the course of the work and shall preserve them for a period of three years from the completion of the contract for all laborers and mechanics, including guards and watchmen, working on the contract. Such records shall contain the name and address of each such employee, social security number, correct classifications, hourly rates of wages paid, daily and weekly number of hours worked, deductions made, and actual wages paid.
2. The records to be maintained under paragraph (1) above shall be made available by the contractor or subcontractor for inspection, copying, or transcription by authorized representatives of the Department of Transportation, Federal Aviation Administration and the Department of Labor, and the contractor or subcontractor will permit such representatives to interview employees during working hours on the job.

SECTION D - (HEALTH AND SAFETY REQUIREMENTS) CONTRACTS EXCEEDING \$2,000.

- D-1 It is a condition of this contract, and shall be made a condition of each subcontract entered into pursuant to this contract, that the contractor and any subcontractor shall not require any laborer or mechanic employed in performance of the contract to work in surroundings or under working conditions which are unsanitary, hazardous, or dangerous to his health or safety, as determined under Construction Safety and Health Standards Title 29 CFR Part 1926 and other occupational and health standards (29 CFR Part 1910) promulgated by the United States Secretary of Labor, in accordance with Section 107 of the OWHSSA.

SECTION E - CLEAN AIR AND WATER POLLUTION CONTROL REQUIREMENTS FOR CONSTRUCTION CONTRACTS AND SUBCONTRACTS

- E-1 Contractors and subcontractors agree (for any contract/ subcontract exceeding \$100,000):
- a. That any facility to be used in the performance of the contract or to benefit from the contract is not listed on the Environmental Protection Agency (EPA) List of Violating Facilities.
 - b. To comply with all the requirements of Section 114 of the Clean Air Act and Section 308 of the Federal Water Pollution Control Act and all regulations issued thereunder.
 - c. That as a condition for award of a contract he will notify the awarding official of the receipt of any communication from the EPA indicating that a facility to be utilized for performance of or benefit from the contract is under consideration to listed on the EPA List of Violating Facilities.
 - d. To include or cause to be included in any contract or subcontract which exceeds \$100,000 the aforementioned criteria and requirements.

- E-2 For all projects, contractors and subcontractors agree:

That in the performance of this contract agrees that he will adhere to all state and local regulations concerning air and water pollution controls (unless contrary to Federal requirements), secure necessary permits, inspections, and conduct his operations so as to minimize affects on the *surrounding environment*.

BID GUARANTEE AND BONDING/INSURANCE CLAUSES (FOR BID AND/PR CONTRACTS IN EXCESS OF \$100,000.)

For all bid documents for contracts include:

The requirements for a bid guarantee from each bidder equivalent to five percent of the bid price. The "bid guarantee" shall consist of a firm commitment such as a bid bond, certified check, or other negotiable instrument accompanying a bid as assurance that the bidders will, upon acceptance of his bid, execute contractual documents as may be required within the time specified.

For contracts include:

- A. The contractor agrees to furnish a performance bond for 100 percent of the contract price. This bond is one that is executed in connection with a contract to secure fulfillment of all the contractor's obligations under such contract.

January 10, 2005

Monsignor McClancy Memorial High School

B. The contractor agrees to furnish a payment bond for 100 percent of the contract price. This bond is one that is executed in connection with a contract to assure payment as required by law of all persons supplying labor and material in the execution of work provided for in the contract.

NONDISCRIMINATION IN FEDERALLY-ASSISTED PROGRAMS OF THE DEPARTMENT OF TRANSPORTATION

During the performance of this contract, the contractor for itself, its assignees and successors in interest (hereinafter referred to as the "contractor") agrees as follows:

A. **Compliance with Regulations.** The contractor shall comply with the Regulations relative to nondiscrimination in Federally-assisted programs of the Department of Transportation (hereinafter, "DOT") Title 49, Code of Federal Regulations), Part 21, as they may be amended from time to time, (hereinafter referred to as the Regulations); which are herein incorporated by reference and made part of this contract.

B. **Nondiscrimination.** The contractor, with regard to the work performed by it during the contract, shall not discriminate on the grounds of race, color, or national origin in the selection and retention of subcontractors, including procurement of materials and leases of equipment. The contractor shall not participate either directly or indirectly in the discrimination prohibited by Section 21.5 of the Regulations, including employment practices when the contract covers a program set forth in Appendix B of the Regulations.

C. **Solicitations for Subcontracts, Including Procurement of Materials and Equipment.** In all solicitations either by competitive bidding or negotiation made by the contractor for work to be performed under a subcontract, including procurement of materials or leases of equipment, each potential subcontractor or supplier shall be notified by the contractor of the contractor's obligations under this contract and the Regulations relative to nondiscrimination on the grounds of race, color, or national origin.

D. **Information and Reports.** The contractor shall provide all information and reports required by the Regulations or directives issued pursuant thereto, and shall permit access to its books, records, accounts, other sources of information, and its facilities as may be determined by the sponsor or the Federal Aviation Administration to be pertinent information required of a contractor is in the exclusive possession of one another who fails or refuses to furnish this information, the contractor shall so certify to the sponsor or the Federal Aviation Administration as appropriate, and shall set forth what efforts it has made to obtain the information.

E. **Sanctions for Noncompliance.** In the event of the contractor's noncompliance with nondiscrimination provisions of this contract, the sponsor shall impose such contract sanctions as it or the Federal Aviation Administration may determine to be appropriate, including but not limited to:

- (1) withholding of payments to the contractor under the contract until the contractor complies, and/or
- (2) cancellation, termination, or suspension of the contract, in whole or in part.

F. **Incorporation of Provisions.** The contractor shall include in provisions paragraph 1 through 5 in every subcontract, including procurement of materials and leases of equipment, unless exempt by the Regulations or directives issues pursuant thereto: The contractor shall take such action with respect to any subcontract or procurement as the sponsor or the Federal Aviation Administration may direct as a means of enforcing such provisions including sections for noncompliance. Provided, however, that, in the event a contractor becomes involved in, or is threatened with litigation with a sponsor to enter into such litigation to protect the interests of the sponsor and, in addition, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

G. **Breach of Contract Terms - Sanctions.** Any violation or breach of the terms of this contract on the part of the contractor/subcontractor may result in the suspension or termination of this contract or such other action which may be necessary to enforce the rights of the parties of this agreement.

H. Certification - Foreign Trade Restrictions

The Contractor by submitting a proposal on this Contract certifies that it:

- a. is not owned or controlled by one or more citizens or nationals of a foreign country included in the list of countries that discriminate against the U.S. firms published by the Office of the United States Trade Representative (USTR);
- b. has not knowingly entered into any contract or subcontract for this project that is a citizen or national of a foreign country on said list, or is owned or controlled directly or indirectly by one or more citizens or nationals of a foreign country said list.

January 10, 2005

Monsignor McClancy Memorial High School

c. has not procured any product nor subcontracted for the supply of any product that is produced in a foreign country said list.

Unless the restrictions of this clause are waived by the Secretary of Transportation in accordance with 59 CFR 30.17, no contract shall be awarded to a Contractor who is unable to certify the above. Thereafter, if the Contractor knowingly procures or subcontracts for the supply of any product or service of a foreign country on the said list for use on the project, the Federal Aviation Administration may direct, through the MMMHS, cancellation of the Contract at no cost to the Government or the MMMHS.

Further, the Contractor agrees that, it will incorporate this provision for certification without modification in each contract and in all lower tier subcontracts. The Contractor may rely upon the certification of a prospective subcontractor unless it has knowledge that the certification is erroneous.

The Contractor shall provide immediate written notice to the MMMHS if the Contractor learns that its certification or that of a subcontractor was erroneous when submitted or has become erroneous by reason of changed circumstances. The subcontractor agrees to provide immediate notice to the Contractor, if at any time it learns that its certification was erroneous by reason of changed circumstances.

This certification is a material representation of fact upon which reliance was placed when making the award. If it is later determined that the Contractor or Subcontractor knowingly rendered an erroneous certification, the Federal Aviation Administration may direct, through the Monsignor McClancy Memorial High School cancellation of the Contract or Subcontract for default at no cost to the Government or the Monsignor McClancy Memorial High School.

Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the certification required by this provision. The knowledge and information of a contractor is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

POLICY OF THE DEPARTMENT OF TRANSPORTATION (DOT) REGARDING MINORITY BUSINESS ENTERPRISE

Minority business enterprises shall have the fullest possible participation in the performance of this contract.

Policy - The policy of the Department of Transportation (DOT) that minority business enterprises as defined in 49 CFR Part 23 shall have the maximum opportunity to participate in performance or contracts financed in whole or in part with Federal funds under this agreement. Consequently, the MBE requirements of 49 CFR Part 23 are made part of this agreement.

Objective - The contractor agrees to ensure that minority business enterprises as defined in 49 CFR Part 23 have the maximum opportunity to participate in the performance of contracts and subcontracts financed in whole or in part with Federal funds provided under this agreement. In this regard, all contractors shall take all necessary and reasonable steps in accordance with 49 CFR Part 23 to ensure that minority business enterprises have the maximum opportunity to compete for and perform contracts. Contractors shall not discriminate on the basis of race, color, national origin or sex in the award and performance of DOT assisted contracts.

All bidders*, potential contractors*, or subcontractors* for this DOT assisted contract are hereby notified that failure to carry out the DOT policy and DBE obligation, as set forth in the above, shall constitute a breach of contract which may result in termination of the contract or such other remedy as deemed appropriate by the Monsignor McClancy Memorial High School (recipient) *Includes firms owned and controlled by minorities and firms owned and controlled by women.

Sub-Contract Clauses. All bidders and potential contractors hereby assure that they will include the clauses in all sub-contracts which offer further sub-contracting opportunities.

The apparent successful bidder will be required to submit, at a time before award of the contract designated by Monsignor McClancy Memorial High School (recipient) concerning the Minority Business Enterprise participation in the contract:

- (A) The names and addresses of DBE firms that will participate in the contract;
- (B) A description of the work of each named DBE firm will perform;
- (c) The dollar amount of participation by each named DBE firm.

If the Disadvantaged Business Enterprise participation submitted in response to (A) above does not meet Disadvantaged Business Enterprise goals, information to satisfy the Monsignor McClancy Memorial High School that the bidders made good faith to meet these goals. The successful bidder shall establish and maintain records and

January 10, 2005

Monsignor McClancy Memorial High School

submit reports, as required, which will identify and assess the efforts made to achieve DBE subcontract goals and other DBE affirmative action efforts.

Meeting Minority Business Enterprise goals or making good faith efforts to do so is a condition of being awarded a DOT assisted contract for which contract goals have been established.

D. ORIGIN OF MATERIALS AND EQUIPMENT

The parties agree that the following provision shall be incorporated into all Construction Contracts for the project:

That contractor and subcontractors shall include the clause "BUY AMERICAN - STEEL AND MANUFACTURED PRODUCTS FOR CONSTRUCTION CONTRACTS" in all solicitations for contractors and subcontractors in accordance with the "BUY AMERICAN CLAUSE" in APPENDIX A.

*Buy American
Steel*

January 10, 2005

Monsignor McClancy Memorial High School

submit reports, as required, which will identify and assess the efforts made to achieve DBE subcontract goals and other DBE affirmative action efforts.

Meeting Minority Business Enterprise goals or making good faith efforts to do so is a condition of being awarded a DOT assisted contract for which contract goals have been established.

D. ORIGIN OF MATERIALS AND EQUIPMENT

The parties agree that the following provision shall be incorporated into all Construction Contracts for the project:

That contractor and subcontractors shall include the clause "BUY AMERICAN - STEEL AND MANUFACTURED PRODUCTS FOR CONSTRUCTION CONTRACTS" in all solicitations for contractors and subcontractors in accordance with the "BUY AMERICAN CLAUSE" in APPENDIX A.

CHAPTER I

GENERAL PROVISIONS

1. DEFINITIONS

To avoid undue repetition, the following terms whenever they occur in this Form of Contract or any of the other papers forming a part of the Contract shall be construed as follows:

"Contract" and "Contract Documents" shall mean, in addition to the Contract Form, the Information for Bidders, the Owner's acceptance, the General Conditions, the Specifications and the Contract Drawings (including written Addenda issued over the name of the Architect), all of which are made part hereof as though herein set forth in full. The Contract as so defined shall constitute the complete and exclusive statement of the terms of the agreement between the parties and the Contract may not be explained or supplemented by course of dealing, usage of trade or course of performance.

"Bidder" and "Contractor" shall mean the person, persons, corporation or other entities submitting this proposal for bidding and contract.

The term "days" or "calendar days" in reference to a period of time shall mean consecutive calendar days, Saturdays, Sundays and holidays, included.

The term "construction site" or words of similar import shall mean the Owner's Monsignor McClancy Memorial High School, for the Monsignor McClancy Memorial High, East Elmhurst, New York 11370. and the vicinity thereof.

"Work" shall mean all structures, equipment, plant, labor, materials (including materials and equipment, if any, furnished by the Owner) and other facilities and all other things necessary or proper for or incidental to furnishing and installing noise suppression materials, systems and components at Monsignor McClancy Memorial High School, the Monsignor McClancy Memorial High, East Elmhurst, New York 113; and "performance of Work" and words of similar import shall mean the furnishing of such facilities and the doing of such things.

"Work required by the Contract Drawings and Specifications in their present form" or words of similar import shall include all Work required by the Specifications in their present form (whether or not mentioned in the Specifications) and all the Work involved in or incidental to the accomplishment of the results intended by the Specifications and Contract Drawings in their present form (whether or not mentioned therein or shown thereon).

"Extra Work" shall mean Work required by the Owner which is in addition to that required by the Contract Drawings and Specifications in their present form.

"Contract Drawings" shall mean the Contract Drawings designated in the clause of the Specifications entitled "Contract Drawings" and except as used in the phrase "Contract Drawings in their present form" shall include any future alterations and revisions of said drawings.

"Owner", "MMMHS" and "Monsignor McClancy Memorial High School" shall mean the Monsignor McClancy Memorial High Chief executive officer or his successor in duties acting personally or through one of his authorized representatives for the purposes of this Contract.

"MMMHS Representative" and "Monsignor McClancy Memorial High Representative" are used interchangeably in the contract documents and shall mean the supervising and design Architects, John Ciardullo Associates, for the administration of this contract in all matters concerning the work.

"Architect" shall mean the Architect, John Ciardullo Associates, John Ciardullo, President, acting personally or his representative acting within the scope of the particular authority vested in him.

The term "Permanent Construction" shall include all construction, installation, structures, equipment and materials (including materials and equipment, if any, existing or furnished by the Owner) to be constructed, installed or left by the Contractor at or about the construction site (or elsewhere in the possession of the Owner) after the completion of the Work (whether or not they are yet delivered or installed), even though they are subsequently to be removed by others. The terms, "permanent installation", "permanent structure", "permanent materials", and words or similar import shall have the same meaning as the term "permanent construction".

"Subcontractor" shall mean anyone who performs Work (other than or in addition to the furnishing of materials, plant or equipment) at or about the construction site, directly or indirectly for or in behalf of the Contractor (and whether or not in privity of contract with the Contractor), but shall not include any person who furnishes his own personal labor or his own personal services or who performs Work which consists only of the operation of construction equipment of which he is the lessor.

January 10, 2005

Monsignor McClancy Memorial High School

"Materialman" shall mean anyone who furnishes materials, plant, or equipment to the Contractor or any subcontractor for use at or about the construction site in the performance of Work.

"Materialman" or "subcontractor", however, shall exclude the Contractor or any subsidiary or parent of the Contractor or any person, firm or corporation which has a substantial interest in the Contractor or in which the Contractor or the parent or the subsidiary of the Contractor, or an officer or principal of the Contractor of the parent or of the subsidiary of the Contractor has a substantial interest, provided however, that for the purpose of the clause hereof entitled "Assignments And Subcontracts" the exclusion in this paragraph shall not apply to anyone but the Contractor himself.

"Workingman" or "worker" or "workman" shall mean any employee of the Contractor or of a subcontractor who performs personal labor or personal services at the construction site.

"Lump Sum" shall mean the amount stipulated in the clause hereof entitled "General Agreement".

"Notice" shall mean a written notice.

Whenever they refer to the Work or its performance, "directed", "required", "permitted", "ordered", "designated", "prescribed" and words of similar import shall mean directed, required, permitted, ordered, designated, or prescribed by the MMMHS Representative; and "approved", "acceptable", "satisfactory" and words of similar import shall mean approved by, acceptable or satisfactory to the MMMHS Representative; and "necessary", "reasonable", "proper", "correct" and words of similar import shall mean necessary, reasonable, proper or correct in the judgement of the MMMHS Representative.

Whenever "including", "such as", or words of similar import are used, the specific things thereafter enumerated shall not limit the generality of things preceding such words.

"Owner" and "Monsignor McClancy Memorial High" shall mean the Monsignor McClancy Memorial High Inc., 71-06 31ST Avenue, East Elmhurst, New York 11370 "Custodian" shall mean the Principal of Monsignor McClancy Memorial High School or his designed.

**BID AND
CONTRACT AGREEMENT**

Soundproofing of Monsignor McClancy Memorial High School, East Elmhurst, N.Y.

Description: Aircraft Noise Abatement Project

Pursuant to and in compliance with the invitation for bids dated January 10, 2005 and the Contract Documents relating hereto, the undersigned hereby submits a binding offer to furnish all plant, labor, materials, supplies, equipment and all other facilities things, matters, and work necessary, proper or incidental to all work required by and in strict accordance with the applicable provisions of the referenced solicitation documents which include, but are not limited to, the plans, specification and all of the addenda thereto issued by the MMMHS and sent to the undersigned by U.S. mail, or other appropriate means or delivered to the Bidder prior to the date of opening the bids, whether received by the undersigned or not; for the total sum indicated on page 3 of this document in the "Base Bid Amount" blocks.

Notice of Award will be mailed, telegraphed or delivered to the successful bidder at its address listed on page three (3):

The Contractor shall commence Work under this Contract at a date to be specified in a Notice to Proceed letter issued by the MMMHS and shall complete Work on the Project, on or before 740 Consecutive Calendar Days, as indicated in Section 00900 - Milestone Schedule of the Specification, from the date in the above referenced Notice to Proceed letter.

Liquidated damages in the amount of five hundred dollars (\$500.00) per day shall be assessed against the Contractor for every calendar day exceeding the calendar days allowed in Section 00900 - Milestone Schedule or times as extended in accordance with the clause entitled "Extensions of Time" of the Specification.

Non-Collusive Bidding Certification:

By submission of this bid, each bidder and each person signing on behalf of any bidder certifies, and in the case of a joint bid each party thereto certifies on behalf of its own organization, under penalty of perjury, that to the best of his/her knowledge and belief:

- A. The prices in the bid have been arrived at independently without collusion, consultation, communication or agreement, for the purpose of restricting competition, as to any matter relating to such prices with any other bidder or with any competitor;
- B. Unless otherwise required by law, the prices which have been quoted in the bid have not been knowingly disclosed by the bidder prior to opening, directly or indirectly, to any other bidder to any competitor; and
- C. No attempt has been made or will be made by the bidder to induce any other person, partnership or corporation to submit or not to submit a bid for the purpose of restricting competition.

Representations of the Bidder:

The Bidder represents and certifies that:

- A. The Bidder is financially solvent and competent to perform the Work;

January 10, 2005

Monsignor McClancy Memorial High School

- B. That the Bidder is familiar with all Federal, State, or other laws, ordinances, orders, rules and regulations, which may in any way affect the Work;
- C. That the Bidder has carefully examined the Contract documents and the Site of the Work and is satisfied as to the nature and location of the Work, the character quality and quantity of surface and subsurface materials likely to be encountered, the character or type of equipment and other facilities needed for the performance of the Work, the general and local conditions, and all other materials or items which may affect the Work;
- D. That the Bidder is an independent contractor and not an employee of the MMMHS. Unless the Contract specifically provides otherwise, the conduct and control of the Work shall be entirely the Bidder's responsibility at all times; and
- E. That Fair and Ethical Business Practices will be strictly adhered to during the life of this contract. During the term of this Contract, neither the Bidder nor any director, partner, principal, officer or employee shall:
1. File with a government office or employee, a written instrument which intentionally contains a false statement or false information;
 2. Intentionally falsify business records;
 3. Give, or offer to give, money or any other benefit to a labor official with intent to influence that labor official with respect to any of his or her acts, duties or decisions as a public servant; and
 4. Give, or offer to give, money or any other benefit to a public servant with intent to influence that public servant with respect to any of his or her acts, duties or decisions as a public servant; and
 5. Knowingly participate in the criminal activities of any organized crime group, syndicate or "family", nor shall any person employed by or associated with any such organized crime "family", syndicate or group participate through criminal means in any of the business affairs of the Bidder.
- F. If it becomes known that any director, partner, officer, employee of the Bidder, or any shareholder owning 5% or more of the Bidder's stock:
1. is subject of investigation involving any violation of criminal law or other federal, state or local law or regulation by any governmental agency; or
 2. is arrested, indicted or named as an unindicted coconspirator in any indictment or other accusatory instrument; or
 3. is convicted of any felony under state or federal law and/or any misdemeanor involving a business related crime.
- the bidder shall immediately notify the MMMHS of any such event.**
- G. That any Subcontract executed pursuant to this Contract will include the representations above as part of the Subcontract Agreement.

NONSEGREGATED FACILITIES

NOTICE TO PROSPECTIVE FEDERALLY-ASSISTED CONSTRUCTION CONTRACTORS:

- a. A certification of Nonsegregated Facilities must be submitted prior to the award of a Federally-assisted construction contract exceeding \$10,000 which is not exempt from the provisions of the equal opportunity clause.
- b. Contractors receiving Federally-assisted construction contract awards exceeding \$10,000 which are not exempt from the provisions of the equal opportunity clause will be required to provide for the forwarding of the notice to prospective subcontractors for supplies and construction contracts where the subcontracts exceed \$10,000 and are not exempt from the provisions of the equal opportunity clause. **NOTE: The penalty for making false statements in offers is prescribed in 18 U.S.C. 1001.**

**MONSIGNOR McCLANCY MEMORIAL HIGH SCHOOL
CERTIFICATION OF NONSEGREGATED FACILITIES**

The Federally-assisted construction contractor certifies that he does not maintain or provide for his employees any segregated facilities at any of his establishments, and that he does not permit his employees to perform their services at any location, under his control, where segregated facilities are maintained. The Federally-assisted construction contractor certifies further that he will not maintain or provide for his employees any segregated facilities at any of his establishments, and that he will not allow his employees to perform their services at any location, under his control, where segregated facilities are maintained. The Federally-assisted construction contractor agrees that a breach of his certification is a violation of the equal opportunity clause in his contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, restrooms, and washrooms, restaurants and other eating areas, time clocks, locker rooms and any other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, sex, or national origin, because of habit, local custom, or any other reason. The Federally assisted construction contractor agrees that (except where he has obtained identical certifications from proposed subcontractors for specific time periods) he will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding \$10,000 which are not exempt from the provisions of the equal opportunity clause, and that he will retain such certifications in his files.

**NOTICE TO PROSPECTIVE CONTRACTORS OF REQUIREMENT FOR CERTIFICATION FOR NON
SEGREGATED FACILITIES**

A Certification of Nonsegregated Facilities must be submitted prior to the award of a contract or subcontract exceeding \$10,000 which is not exempt from the provisions of the equal opportunity clause.

Certification - The information above is true and complete to the best of my knowledge and belief.

Monsignor McClancy Memorial High School
SOUNDPROOFING OF MONSIGNOR McCLANCY MEMORIAL HIGH SCHOOL EAST ELMHURST,
NEW YORK

STATEMENT FOR WORK PERMIT

I understand that there are asbestos containing materials at Monsignor McClancy Memorial High School in East Elmhurst, N.Y. where I am about to perform work. I have toured the Facility with the building Administrator and have been shown all areas known to have asbestos containing materials present.

I fully understand and agree that at any time during the course of my work, if I or persons or personnel under my direction discover a material which is known or suspected to contain asbestos which interferes with the performance of contract work, I will cease all such work immediately and report this condition to the building administrator. At no time will I in any way disturb, damage, attempt to clean up, or repair materials which are known or suspected to contain asbestos.

I further understand that any disturbance of asbestos containing material which I, or persons under my direction, cause could result in contamination of the building and asbestos exposure to building occupants. Any disturbance of asbestos containing materials or asbestos contamination which occurs due to an action taken by myself, or persons under my direction, is fully and solely my responsibility and I will be directly responsible for the cost of repairing the disturbed asbestos containing material and associated building decontamination to the satisfaction of the building owner.

CHAPTER II

ADJUSTMENTS AND PAYMENTS

1. ADJUSTMENTS TO LUMP SUM.

If any Work required by the Contract Drawings and Specifications in their present form shall be countermanded or reduced, the Architect shall have full authority on behalf of both parties to make such adjustment by way of reduction in the Lump Sum as he may in his sole discretion deem equitable and reasonable, and in making such adjustment, no allowance to the Contractor shall be made for anticipated profits.

The MMMHS Chief Executive Officer shall have authority to agree in writing with the Contractor for adjustments by way of reduction in the Lump Sum in lieu of those for which provision is heretofore made in this numbered clause.

2. COMPENSATION FOR EXTRA WORK.

The MMMHS Chief Executive Officer shall have the authority to agree in writing with the Contractor upon lump sum or other compensation for Extra Work in lieu of the compensation for which provision is hereinafter made in this numbered clause.

If such agreement on compensation is not made, and Extra Work be performed, the Contractor's compensation shall be increased by the following amounts and such amounts only:

- (a) In the case of Extra Work performed by the Contractor personally, an amount equal to the actual net cost in money of the labor and materials required for such Extra Work, plus such rental for equipment (other than small tools) required for such Extra Work with such overhead and profit as the Architect deems reasonable.
- (b) In the case of Extra Work performed by a subcontractor, an amount equal to the actual net cost in money of the labor and materials required for such net cost plus such rental for equipment (other than small tools) required for such Extra Work as the Architect deems reasonable, plus 5% of the sum of the foregoing cost, percentage of cost, and rental.

As used in this numbered clause (and in this clause only):

"Labor" means foremen, surveyors, laborers, mechanics and other employees below the rank of superintendent, exclusive of timekeepers, directly employed at the construction site, whether employed by the Contractor or by the subcontractors, subject to the Owner's representative's authority to determine what employees of any category are "required for Extra Work and as to the portion of their time allotted to Extra Work: and "cost of labor" means the wages actually paid to and received by such employees plus a proper proportion of (a) vacation allowances and union dues and assessments which the employer actually pays pursuant to contractual obligation upon the basis of such wages, and (b) taxes actually paid by the employer pursuant to law upon the basis of such wages. "Employees" as used above means only the employees of one employer.

"Materials" means temporary and consumable materials as well as permanent materials; and "cost of materials" means the price (including taxes actually paid by the contractor pursuant to law upon the basis of such materials) for which such materials are sold for cash by the manufacturers or producers thereof, or by regular dealers therein, whether or not such materials are purchased directly from the manufacturer, producer or dealer (or if the Contractor is the manufacturer or producer thereof, the reasonable cost to the Contractor of the manufacture and production), plus the reasonable cost of delivering such materials to the construction site in the event that the price paid to the manufacturer, producer or dealer does not include delivery and in case of temporary materials, less their salvage value, if any.

"Work day" in reference to an item of equipment, means a day other than a Saturday, Sunday or legal holiday except that if the particular item of equipment is actually utilized at the construction site by the Contractor or subcontractors under this or any other Contract with the Owner on a Saturday, Sunday or legal holiday said day shall be deemed a work day.

The rental for equipment, whether owned by the Contractor or subcontractors or rented from others and notwithstanding the actual price of any rental or actual costs associated with such equipment, shall be computed by the Architect on the basis of the following, and to all such payments shall be added ten percent (10%) of such rental costs;

- (1) (a) Hourly rental for those items of equipment listed in the "Green Book" (the publication of the Associated Equipment Distributors of 615 West 22nd Street, Oakbrook, Illinois 60523) shall be 100%

January 10, 2005

Monsignor McClancy Memorial High School

of the applicable rates as listed in said book, reduced to an hourly basis (see formula below).

- (b) Hourly rental for those items of equipment not listed in the "Green Book" shall be 100% of the applicable rates given in the "Blue Book" (published by Equipment Guide Book Co., 3980 Fabian Way, Palo Alto, California 94303), reduced to an hourly basis (see formula below). The editions of these publications to be used shall be those in effect on the date of the actual rental of the equipment. None of the provisions of the "Green Book" or the "Blue Book" shall be deemed referred to or included in this Contract excepting only the aforesaid rates.
- (c) If no listing of rates for the item of equipment is made in either of the foregoing publications, the Architect shall determine the reasonable rate of rental of the particular item of equipment by such other means as he finds appropriate.
- (2)(a) In instances where the rate appearing in the "Green Book" or the "Blue Book" are utilized, the Architect shall determine the applicable rate and the hourly rental determined therefrom by applying the following criteria:
 - (b) The rate to be applied for an item of equipment used on a particular Extra Work Order shall be the daily, weekly or monthly rates from the foregoing publications based on the total number of workdays or portions thereof that a particular item of equipment is at the construction site for use by the Contractor or subcontractor. The number of work days in the period for each rate shall be as indicated below:

Three work days or less - daily rate.

More than three work days but not more than fifteen workdays - weekly rate.

More than fifteen work days.

The pro rata portion which one hour bears to the applicable rate shall be determined in accordance with the following formula:

Hourly rate based on daily rental	1/8 (100% x daily rental from "Green Book") or 1/8 (100% x daily rental from "Blue Book") or
Hourly Rate based on weekly rate based	1/40 (100% x weekly rental from "Green Book") or 1/40 (100% x weekly rental from "Blue Book") or
Hourly rate based on monthly rental	1/176 (100% x monthly rental from Green Book) or 1/176 (100% x monthly rental from Blue Book)

- (b) If the Architect should determine that the nature or size of the equipment used by the Contractor in connection with Extra Work is larger or more elaborate, as the case may be, than the size or nature of the minimum equipment determined by the Architect to be suitable for the Extra Work, the reasonable rental will not be based upon the equipment used by the Contractor but will be based upon the smallest or least elaborate equipment determined by the Architect to have been suitable for the performance of the Extra Work.
- (3) If the case of the equipment utilized only for Extra Work: (a) in addition to amounts determined as provided in subparagraphs (1) and (2) above, there will be added to the rental as computed above the taxes on the rental actually paid by the Contractor or subcontractor and the reasonable cost of transporting such equipment to and from the construction site, and (b) notwithstanding the number of hours during which such equipment is utilized, the minimum rental therefore will be for a period of eight hours.

In computing the Contractor's compensation insofar as it is based upon Extra Work, and notwithstanding any provision to the contrary appearing in the Green Book and the Blue Book, no consideration shall be given to any items of cost or expense not expressly set forth above, it being expressly agreed that the costs and percentage additions hereinbefore provided to cover items of cost and expense to the Contractor of any type whatsoever, including administration, overhead, taxes (other than those enumerated above), clean-up, consumable including gas and oil, drafting including printing or other reproduction), coordination, field measurements, maintenance, repairs, insurance, profit to the Contractor and small tools.

Whenever any Extra Work is performed (whether by the Contractor directly or through a subcontractor), the Contractor

January 10, 2005

Monsignor McClancy Memorial High School

shall, at the end of each day submit to the Monsignor McClancy Memorial High School Representative (a) daily time slips showing the name and social security number of each workman employed on such Work the number of hours which he is employed thereon, the character of his' duties, and the wages to be paid to him, (b) a memorandum showing the State and Federal taxes based on such wages, and vacation allowances and union dues and assessments which the employer actually pays pursuant to contractual obligation upon the basis of such wages (c) a memorandum showing the amount and character of the materials furnished for such Work, from whom they were purchased and the amount to be paid therefor, and (d) a memorandum of equipment used in the performance of such Work, together with the rental claimed therefor. Such memoranda and time slips are for the purpose of enabling the Monsignor McClancy Memorial High School Representative to determine the amounts to be paid by the Owner under this numbered clause; and accordingly, they shall constitute a condition precedent to such payment and the failure of the Contractor to furnish them with respect to any Work shall constitute a conclusive and binding determination on his part that such Work is not Extra Work and shall constitute a waiver by the Contractor of claims for payment for such Work. In the event that the Director and the Contractor shall agree in writing upon a lump sum or other compensation for Extra Work in lieu of compensation as provided in the second paragraph of this clause, the daily time slips and memoranda required by this paragraph shall not be required subsequent to the date on which such agreement has been reached.

3. FINAL PAYMENT

After the rendition of the Certificate of Final Completion and upon receipt from the Contractor of such information as may be required, the Architect shall certify in writing to the Owner and to the Contractor the total compensation earned by the Contractor.

If so required, the Contractor shall thereupon (I) certify to the Owner in writing that he has paid and caused his subcontractors to pay at least the prevailing rate of wage and supplements required by the clause hereunder entitled "Prevailing Rate of Wage" and(ii) furnish to the Owner a detailed sworn statement of all claims, just or unjust, of subcontractors, materialmen and other third persons then outstanding and which he has reason to believe thereafter be made on account of the Work.

Within sixty days after issuance of such certificate of total compensation earned (or within sixty days after receipt of the documents required), the Owner shall pay to the Contractor by check the amount stated in said certificate, less all other payments and advances whatsoever to or for the account of the Contractor. All prior estimates and payments shall be subject to correction in this payment, which is throughout this Contract called the Final Payment.

The acceptance by the Contractor, or by anyone claiming by or through him, of Final Payment shall be and shall operate as a release to the Owner of all claims and of all liability to the Contractor for all things done or furnished in connection with the Contract and for every act and neglect of the Owner and others relating to or arising out of the Contract, including claims arising out of breach of contract and claims based on claims of third persons, excepting only his claims for reimbursement for certain sales taxes as hereinbefore provided. No payment, however, final or otherwise, shall operate to release the Contractor or his sureties from any obligations in connection with this Contract or the Performance or Payment Bond.

The Contractor's agreement as provided in the immediately preceding paragraph above shall be deemed to be based upon the consideration forming part of this Contract as a whole and not to be gratuitous: but in any event even if deemed gratuitous and without consideration, such agreement as provided in the immediately preceding paragraph above shall nevertheless be effective. Such release shall include all claims, whether or not in litigation and even though still under consideration by the Owner or the Architect. Such release shall be effective notwithstanding any purported reservation of right by the Contractor to preserve such claim. The acceptance of any check designated as "Final Payment" or bearing similar designation shall be conclusively presumed to demonstrate the intent of the Contractor that such payment was intended to be accepted as final, with the consequences provided in this numbered clause, notwithstanding any purported reservation of rights.

The Contractor agrees that he shall not be entitled to, and hereby waives any right he might otherwise have to, and shall not seek any judgement whether under this Contract or otherwise for any such Final Payment or for an amount equivalent thereto or based thereon, or for any part thereof, if such judgement would have the effect of varying, setting aside, disregarding or making inapplicable the terms of this numbered clause or have the effect in any way of entitling the Contractor to accept such Final Payment or an amount equivalent thereto or based thereon or any part thereof other than

January 10, 2005

Monsignor McClancy Memorial High School

in the same fashion as a voluntary acceptance of a Final Payment subject to all the terms of this Contract including this numbered clause, unless and until the Contractor should obtain a judgement on any claim arising out of or in connection with this Contract (including a claim based on breach of contract) for an amount not included in said Final Payment. In any case in which interest is allowable on the amount of the Final Payment, such interest shall be at the rate of 2% per annum for the period, if any, in which such interest is due.

4. WITHHOLDING OF PAYMENTS.

If (1) the Contractor fails to perform any of his obligations under this contract or any other agreement between the Owner and the Contractor (including his obligation to the Owner to pay any claim lawfully made against him by any materialman, subcontractor or workman or other person which arises out of or in connection with the performance of this Contract or any other agreement with the Owner, or (2) any claim (just or unjust) which arises out of or in connection with this Contract or any other agreement between the Owner and the Contractor is made against the Owner or (3) any subcontractor under this Contract or any other agreement between the Owner and the Contractor fails to pay any claims lawfully made against him by any materialman, subcontractor, workman or other third person which arises out of or in connection with this Contract or any other agreement between the Owner and the Contractor or if in the opinion of the Director any of the aforesaid contingencies is likely to arise, then the Owner shall have the right, in its discretion, to withhold out of any payment (final or otherwise and even though such payment has already been certified as due) such sums as the Director may deem ample to protect it against delay or loss or to assure the payment of just claims of third persons, and to apply such sums in such manner as the Director may deem proper to secure such protection or satisfy such claims. All sums so applied shall be deducted from the Contractor's compensation. Omission by the Owner to withhold out of any payment, final or otherwise, a sum for any of the above contingencies, even though such contingency has occurred at the time of such payment, shall not be deemed to indicate that the Owner does not intend to exercise its right to such contingency. Neither the above provisions for the rights of the Owner to withhold and apply monies nor any exercise or attempted exercise of, or omission to exercise, such rights by the Owner shall create any obligation of any kind to such materialman, subcontractors, workmen or other third persons.

Until actual payment to the Contractor, his right to any amount to be paid under this Contract (even though such amount has already been certified as due) shall be subordinate to the Rights of the Owner under this numbered clause.

If, however, the payment of any amount due to the Contractor shall be improperly delayed by the fault of the Owner, the Owner shall pay the Contractor interest thereon at the rate of 2% per annum for the period of delay, it being agreed that such interest shall be in lieu of and in liquidation of any damages to the Contractor because of such delay.

CHAPTER III

PROVISIONS RELATING TO TIME

1. TIME FOR COMPLETION.

The Contractor shall complete the performance of all Work under this Contract as follows:

Monsignor McClancy Memorial High School complex - Complete all Work required within 740 calendar days after receipt of the Notice to Proceed.

The Contractor shall not commence the performance of the Work until the later of the following dates:

- (a) If a Performance and Payment Bond is required, the date of receipt by him or notice from the Owner that the Performance and Payment Bond furnished by him is satisfactory;
- (b) The date of receipt by him of notice from the Owner that the insurance procured by him pursuant to the insurance clause is satisfactory, as evidenced by the certificate to be furnished in accordance with said insurance clause.

The time for completion shall not be extended on account of the time required to furnish the documents referred to in subparagraphs (a) and (b) above, but the Owner shall give notice to the Contractor within ten days after receipt of the Performance and Payment Bond or certificate of insurance as to whether or not such bond or insurance is satisfactory.

The Contractor's obligations for the performance and completion of the Work within the time or times provided for in this Contract are of the essence of this Contract. The Contractor guarantees that he can and will complete the performance of the Work within the time hereinbefore stipulated or within the time as extended in accordance with the clause hereof entitled "Extensions of Time".

2. EXTENSIONS OF TIME.

The time above provided for the completion of any part of the Contract shall be extended (subject, however, to the provisions of this numbered clause) only if in the opinion of the Architect the Contractor is necessarily delayed in completing such part by such time solely and directly by a cause which meets all the following conditions:

1. Such cause is beyond the Contractor's control and arises without his fault;
2. Such cause comes into existence after the opening of Proposals on this Contract and neither was nor could have been anticipated by investigation before such opening.

Variations in temperature and precipitation shall be conclusively deemed to have been anticipated before the opening of such Proposals on this Contract except to the extent that the actual monthly average temperature varies from a temperature and except to the extent that the actual number of days of precipitation (of 0.1 inch or more) per month exceeds a number equal to two plus the normal number of precipitation per month.

In any case, the variations in temperature and precipitation described in the immediately preceding sentence will be cause for an extension of time only if occurring between the actual time of commencement of the Work at the construction site and the time for completion stipulated in the clause hereof entitled "Time for Completion" (or such time as extended as provided for herein). In the case of portions of months the number of days will be pro-rated by the Architect. Temperature and precipitation shall be as recorded by the U.S. Weather Bureau in its publications, including that entitled "Local Climatological Data with Comparative Data", which is applicable to the area in which the Work is to be performed, and in the case of precipitation, the normal number of days of precipitation (of 0.1 inch or more) per month as abstracted from the aforementioned publications are as follows:

January 10, 2005
Month

Monsignor McClancy Memorial High School
Normal Number of days per month on which precipitation exceeds 0.1"

January	7
February	7
March	8
April	7
May	6
June	6
July	5
August	7
September	6
October	6
November	7
December	7

In any event, even though a cause of delay meets all the above conditions, an extension shall be granted only to the extent that (I) the performance of the Work is actually and necessarily delayed and (ii) the effect of such cause cannot be anticipated and avoided or mitigated by the exercise of all reasonable precautions, efforts and measures (including planning, scheduling and rescheduling), whether before or after the occurrence of the cause of delay, and an extension shall not be granted for a cause of delay which would not have affected the performance of the Contract were it not for the fault of the Contractor is not entitled to an extension of time.

Any reference herein to the Contractor shall be deemed to include subcontractors and materialmen, whether or not in privity of contract with the Contractor, and employees and others performing any part of the Contract and all the foregoing shall be considered as agents of the Contractor.

The period of any extension of time shall be that necessary to make up the time actually lost, subject to the provisions of this numbered clause, and shall be only for the portion of the Contract actually delayed. The Architect may defer all or part of his decision on an extension may be rescinded or shortened if it subsequently is found that delays can be overcome or reduced by the exercise of reasonable precautions, efforts and measures.

As a condition precedent to an extension of time, the Contractor shall give written notice to the Architect within 48 hours after the time when he knows or should know of any cause which might under any circumstances result in delay for which he claims or may claim an extension of time (including those causes which the Owner is responsible for or has knowledge of), specifically stating that an extension is or may be claimed, identifying such cause and describing, as fully as practicable at the time, the nature and expected duration of the delay and its effect on the various portions of the Contract. Since the possible necessity for an extension of time may materially alter the scheduling, plans and other actions of the Owner, and since, with sufficient opportunity, the Owner might if it so elects attempt to mitigate the effect of a delay for which an extension of time might be claimed, and since merely oral notice may cause disputes as to the existence or substance thereof, the giving of written notice as above required shall be of the essence of the Contractor's obligations and failure of the Contractor to give written notice as above required shall be a conclusive waiver of an extension of time.

It shall in all cases be presumed that no extension, or further extension, of time is due unless the Contractor shall affirmatively demonstrate to the satisfaction of the Architect that it is. To this end the Contractor shall maintain adequate records supporting any claim for an extension of time, and in the absence of such records, the foregoing presumption shall be deemed conclusive.

3. DELAYS TO CONTRACTOR.

As between the Contractor and the Owner, the Contractor assumes the risk of all suspensions of, or delays in performance of the Contract, regardless of the length thereof, arising from all causes whatsoever, whether or not relating to this Contract, including wrongful actions or omissions of the Owner, its Chief executive officer, agents, employees and contractors, except only to the extent, if any, that compensation or an extension of time may be due as expressly provided for elsewhere in this Contract for such suspension or delays, and, subject only to such exception, the Contractor shall bear the burden of all costs, expenses and liabilities which he may incur in connection with such suspensions or delays, and all such suspensions, delays, costs, expenses and liabilities of any nature whatsoever, whether or not provided for

January 10, 2005

Monsignor McClancy Memorial High School

in this contract, shall conclusively be deemed to have been within the contemplation of the parties.

Notwithstanding any provisions of this Contract, whether relating to time of performance or otherwise, the Owner makes no representation or guaranty as to when the construction site or any part thereof will be available for the performance of the Contract or as to whether conditions at the construction site will be such as to permit the Contract to be performed thereon without interruption or by any particular sequence or method or as to whether the performance of the Contract can be completed by the time required under this Contract or by any other time.

Wherever in connection with this Contract it is required, expressly or otherwise, that the Owner shall perform any act relating to the Contract, including making available or furnishing any real property, materials, or other things, no guaranty is made by the Owner as to the time of such performance and the delay of the Owner in fulfilling such requirement shall not result in liability of any kind on the part of the Owner except only to the extent, if any, that an extension of time or compensation may be due as expressly provided for elsewhere in this Contract.

4. CANCELLATION FOR DELAY.

If in the performance of the Contract or any portion of it shall, in the opinion of the Monsignor McClancy Memorial High School, be materially delayed, whether or not through the fault of the Contractor, by any cause which affects the Contractor's ability to perform the Contract without affecting to the same degree the Owner's own ability to perform it, either directly or through others, the Owner shall have the right at any time during the existence of such delay to cancel this Contract as to any portion not yet performed, without prejudice to the rights, liabilities and obligations of the parties under this Contract arising out of portions already performed, provided, however, that such right of cancellation shall not exist if the delay be due to any wrongful act or omission of the Owner. In the event of such cancellation, no allowance shall be made for anticipated profits.

5. LIQUIDATED DAMAGES.

Liquidated damages in the amount of five hundred dollars (\$500.00) per day shall be assessed against the Contractor for every calendar day exceeding the calendar days allowed in Section 00900 - Milestone Schedule or times as extended in accordance with the clause entitled "Extensions of Time" of the Specification.

CHAPTER IV

CONDUCT OF CONTRACT

1A. AUTHORITY OF THE MMMHS

Inasmuch as the public interest requires that the project to which this Contract relates shall be performed in the manner in which the Owner acting through the Monsignor McClancy Memorial High School chief executive officer, deems best, the MMMHS shall have absolute authority to determine what is or is not necessary or proper for or incidental to the portion thereof specified in the clause hereof entitled "General Agreement" and the Contract Drawings and Specifications shall be deemed merely his present determination on this point. In the exercise of his authority, he shall have power to alter the Contract Drawings and Specifications; to require the performance of Work not required of them in their present form, even though of a totally different character from that now required; and to vary, increase and diminish the character, quantity and quality of, or to countermand any Work now or hereafter required. Such variation, increase, diminution or countermanding need not be based on necessity but may be based on convenience.

If at any time it shall be, from the viewpoint of the Owner impractical or undesirable in the judgement of the MMMHS chief executive officer to proceed with or continue the performance of the Contract or any part thereof, whether or not for reasons beyond the control of the Owner, he shall have authority to suspend performance of any part or all of the Contract until such time as he may deem it practicable or desirable to proceed. Moreover, if at any time it shall be, from the viewpoint of the Owner, impracticable or undesirable in the judgement of the MMMHS chief executive officer to proceed with or continue the performance of the Contract or any part thereof for reasons beyond the control of the Owner, he shall have authority to cancel this Contract as to any or all portions not yet performed and as to any materials not yet installed even though delivered. Such cancellation shall be without prejudice to the rights and obligations arising out of portions already performed, but no allowance shall be made for anticipated profits.

1. AUTHORITY OF THE MMMHS REPRESENTATIVE.

To resolve all disputes and to prevent litigation the parties to this Contract authorize John Ciardullo, acting personally, to decide all questions of any nature whatsoever arising out of, under, or in connection with, or in any way related to or on account of, this Contract (including claims in the nature of breach of Contract or fraud or misrepresentation before or subsequent to acceptance of the Contractor's Proposal and Claims of a type which are barred by the provisions of this Contract) and his decision shall be conclusive, final and binding on the parties. His decision may be based on such assistance as he may find desirable. The effect of his decision shall not be impaired or waived by any negotiations or settlement offers in connection with the question decided, whether or not he participated therein himself, or by any prior decision of others, which prior decisions shall be deemed subject to review, or by any termination or cancellation of this Contract.

All such questions shall be submitted in writing by the Contractor to the MMMHS Representative, acting personally, for his decision, together with all evidence and other pertinent information in regard to such questions, in order that a fair and impartial decision may be made. In any action against the Owner relating to any such questions the Contractor must allege his complaint and prove such submission, which shall be a condition precedent to any such action. No evidence or information may be introduced or relied upon in such an action that has not been so presented to the MMMHS Representative personally. Neither the requirements of this paragraph nor the time necessary for compliance therewith, however, shall affect the time when the Contractor's cause of action shall be deemed to have accrued for the purposes of any statute controlling actions against the Owner, and the time of such accrual shall be determined without reference to this paragraph.

In performance of the Contract, the Contractor shall conform to all orders, directions and requirements of the MMMHS Representative and shall perform the Contract to the satisfaction of the MMMHS Representative at such times and places, by such methods and in such manner and sequence as he may require, and the Contract shall at all stages be subject to his inspection. The MMMHS Representative shall determine the amount, quality, acceptability and fitness of all parts of the Work and shall interpret the Contract Drawings, Specifications and any orders for Extra Work. The Contractor shall employ no equipment, materials, methods or workers to which the MMMHS Representative objects, and shall remove no materials, equipment, or other facilities from the construction site without permission. Upon request, the MMMHS Representative shall confirm in writing any oral order, direction, requirements or determination.

The enumeration herein or in the Specifications of particular instances in which the opinion, judgement, discretion or determination of the MMMHS Representative shall control or in which the Contractor shall be performed to his satisfaction or subject to his inspection, shall not imply that only the matters of a nature similar to those enumerated shall be so governed and performed.

2. NOTICE REQUIREMENTS.

January 10, 2005

Monsignor McClancy Memorial High School

No claim against the Owner shall be made or asserted in any action or proceeding at law or in equity, and the Contractor shall not be entitled to allowance of such claim, unless the Contractor shall have complied with all requirements relating to the giving of written notice of the information with respect to such claim as provided in this numbered clause. The failure of the Contractor to give such written notice and information as to any claim shall be conclusively deemed to be a waiver by the Contractor of such claim, such written notice and information being conditions precedent to such claim. As used herein "claim" shall include any claim arising out of, under or in connection with, or in any way related to or on account of, this Contract (including claims in the nature of breach of Contract or fraud or misrepresentation before or subsequent to acceptance of the Contractors Proposal and claims of a type which are barred by the provisions of this Contract) for damages, payment or compensation of any nature or for extension of any time for performance of any part of this Contract.

The requirements as to the giving of written notice and information with respect to claims shall be as follows:

1. In the case of any claims for extra work, extension of time for completion, idle salaried workers and equipment, or any other matter for which requirements are set forth elsewhere in this Contract as to notice and information, such requirements shall apply.
2. In the Case of all other types of claim, notice shall have been given to the MMMHS Representative, personally, as soon as practicable, and in any case, within 48 hours, after occurrence of the act, omission, or other circumstance upon which the claim is or will be based, stating as fully as practicable at the time all information relating thereto. Such information shall be supplemented with further information as soon as practicable after it becomes or should become known to the Contractor, including daily records showing all costs which the Contractor may be incurring or all other circumstances which will affect any claim to be made, which records shall be submitted to the MMMHS Representative, personally.

The above requirements for notices and information are for the purpose of enabling the Owner to avoid waste of funds by affording it promptly the opportunity to cancel or revise any order, change its plans, mitigate or remedy the effects of circumstances giving rise to a claim or take such other action as may seem desirable and to verify any claimed expense or circumstances as they occur, and the requirements herein for such notice and information are essential to this Contract and are in addition to any notice required by statute with respect to suits against the Owner.

The above referred to notices and information are required whether or not the Owner is aware of the existence of any circumstances which might constitute a basis for a claim and whether or not the MMMHS Representative has indicated it will consider a claim.

No act, omission, or statement of any kind shall be regarded as a waiver of any of the provisions of this numbered clause or may be relied upon as such waiver except only a written statement signed by the chief executive officer of the MMMHS expressly stating that a waiver is intended as to any particular provision of this numbered clause, and more particularly no discussion, negotiations, considerations, correspondence, or requests for information with respect to a claim by any officer, employee or agent of the Owner shall be construed as a waiver of any provision of this numbered clause or as authority or apparent authority to effect such a waiver.

Since merely oral notice or information may cause disputes as to the existence or substance thereof, and since notice, even if written, to other than the Owner's representative above designated to receive it may not be sufficient to come to the attention of the representative of the Owner with the knowledge and responsibility of dealing with the situation only notice and information complying with the express provisions of this numbered clause shall be deemed to fulfill the Contractor's obligation under this Contract.

3. EXTRA WORK ORDERS.

No Extra Work shall be performed except pursuant to written orders of the MMMHS expressly and unmistakably indicating his intention to treat the Work described therein as Extra Work; and, exclusive of Extra Work expressly authorized by the chief executive officer of the MMMHS, the chief executive officer of the MMMHS shall have authority to order any item of Extra Work, if the cost thereof to the Owner together with the cost of all other Extra Work previously ordered and not expressly authorized as aforesaid will not be in the aggregate in excess of the sum specified in the letter of acceptance of the Contractor's Proposal as the limit on such authority to order extra work; provided, however, that Extra Work in excess of such aggregate amount may be ordered by the MMMHS as above provided to the extent expressly authorized in a writing signed by the MMMHS indicating the approval of funds for the Extra Work is available and approved by the MMMHS.

In the absence of such an order signed by the MMMHS, if the MMMHS Representative shall direct, order or require any Work whether orally or in writing, which the Contractor deems to be Extra Work, the Contractor shall nevertheless comply therewith, but shall within 24 hours give written notice thereof to the MMMHS and MMMHS Representative,

January 10, 2005

Monsignor McClancy Memorial High School

stating why he deemed it to be Extra Work, and shall moreover furnish to the MMMHS Representative time slips and memoranda as required by the clause hereof entitled "Compensation for Extra Work". Said notice, time slips and memoranda are for the purpose of affording to the MMMHS an opportunity to verify the Contractor's claim at the time and (if he desires so to do) to cancel promptly such order, direction or requirement of the MMMHS Representative, of affording the MMMHS Representative an opportunity of keeping an accurate record of the materials, labor and other items involved, and generally of affording to the Owner an opportunity to take such action as it may deem desirable in light of the Contractor's claims. Accordingly, the failure of the Contractor to serve such notice or to furnish such time slips and memoranda shall be deemed to be a conclusive and binding determination on his part that the direction, order or requirement of the MMMHS Representative does not involve the performance of Extra Work, and shall be deemed to be a waiver by the Contractor of all claims for additional compensation or damages by reason thereof, such written notice, time slips and memoranda being a condition precedent to such claims.

4. PERFORMANCE OF EXTRA WORK.

The provisions of this Form of Contract relating generally to Work and its performance shall apply without exception to any Extra Work required and to the performance thereof. Moreover, the provisions of the Specifications relating generally to the Work and its performance shall also apply to any Extra Work required and to the performance thereof, except to the extent that a written order in connection with any particular item of Extra Work may expressly provide otherwise.

5. TITLE TO MATERIALS

All materials to become part of the permanent construction shall be and become the property of the Owner upon delivery at the construction site or upon being especially adapted for use in or as a part of the permanent construction, whichever may first occur, subject however to the Contractor's assumption of risk under the clause hereof entitled "Risks Assumed by Contractor", subparagraph (a).

The Contractor shall promptly furnish to the Owner such bills of sale and other instruments as may be required by it, properly executed, acknowledged and delivered, assuring to it title to such materials, free of encumbrances and shall mark or otherwise identify all such materials as the property of the Owner.

6. ASSIGNMENTS AND SUBCONTRACTS.

Any assignment or other transfer by the Contractor of this Contract or any part hereof or of any of his rights hereunder or of any monies due or to become due hereunder and any delegation of any of his duties hereunder without express consent in writing of the Owner shall be void and of no effect as to the Owner, provided, however, that the Contractor may subcontract portions of the Work to such persons as the MMMHS Representative may, from time to time, expressly approve in writing. For each individual, partnership or corporation proposed by the Contractor as a subcontractor, the Contractor shall submit to the Owner a certification or, if a certification cannot be made, a statement by such a person, partnership or corporation to the same effect as a certification or statement required from the Contractor pursuant to the clauses of the "Information For Bidders" entitled "Certification of No Indictment, Conviction, Suspension, Debarment or Termination" and "Non-Collusive Bidding and Code of Ethics Certification; Certification of No Solicitation Based on Commission, Percentage, Brokerage, Contingent Fee or Other Fee". All further subcontracting by any subcontractor shall also be subject to such approval of the MMMHS Representative. Approval of a subcontractor may be conditioned on (among other things) the furnishing, without cost to the Owner, of a surety bond guaranteeing payment by the subcontractors of claims of materialmen, subcontractors, workmen and other third persons arising out of the subcontractor's performance of any part of the Work.

No consent to any assignment or other transfer, and no approval of any subcontractor, shall under any circumstances operate to relieve the Contractor of any of his obligations; no subcontract, no approval of any subcontractor and no act or omission of the Owner or the MMMHS Representative shall create any rights in favor of such subcontractor and against the Owner; and as between the Owner and the Contractor, all assignees, subcontractors, and other transferees shall for all purposes be deemed to be agents of the Contractor. Moreover, all subcontracts and all approvals of subcontractors shall be and, regardless of their form, shall be deemed to be conditioned upon performance by the subcontractor in accordance with this Contract; and if any subcontractor shall fail to perform the Contract to the satisfaction of the MMMHS Representative, the MMMHS Representative shall have the absolute right to rescind his approval forthwith and to require the performance of the Contract by the Contractor personally or through other approved

January 10, 2005
subcontractors.

Monsignor McClancy Memorial High School

7. CLAIMS OF THIRD PERSONS.

The Contractor undertakes to pay all claims lawfully made against him by subcontractor, materialmen and workmen, and all claims lawfully made against him by other third persons arising out of or in connection with or because of the performance of this Contract and to Cause all subcontractors to pay all such claims lawfully made against them.

8. CERTIFICATES OF PARTIAL COMPLETION.

If at any time prior to the rendition of the Certificate of Final Completion been satisfactorily completed, and if in the judgement of the MMMH construction is not necessary for the operations of the Contractor but w Owner for other purposes, the MMMHS Representative may render to writing to that effect (herein called a Certificate of Partial Completion), may take over and use the portion of the permanent construction describ therefrom.

struction has
permanent
eded by the
ertificate in
r the Owner
: Contractor

The rendition of a Certificate of Partial Completion shall not be constr time to complete the portion of the permanent construction to which it the same in accordance with the terms of this Contract. Moreover, the by the Owner shall not operate to release the Contractor or his sureties from any obligations under or upon this Contract or the Performance and Payment Bond.

AFFIRMATIVE ACTION

Contractor's
to complete

9. CERTIFICATE OF FINAL COMPLETION.

After the satisfactory completion of all Work whatsoever required and the making of such tests and inspections as may be necessary or desirable, the Architect shall render to the Owner and to the Contractor a certificate in writing (herein called the Certificate of Final Completion) certifying that in his opinion all work under this Contract, including Extra Work, has been completed in accordance with the Contract Drawings and Specifications and the requirements of the Architect, and certifying the date as of which it was so completed.

The rendition of the Certificate of final completion shall not be construed to constitute an extension of the Contractor's time for performance in the event that he has failed to complete the Work in accordance with the terms of this Contract. Moreover, the acceptance of the Certificate of Final Completion by the Owner shall not operate to release the Contractor or his sureties from any obligations under or upon this Contract or the Performance and Payment Bond.

10. AFFIRMATIVE ACTION PROGRAMS.

The Contractor assures that it will undertake an affirmative action program as required by 14 CRF Part 152, Subpart E, to insure that no person shall on the grounds of race, creed, color, national origin, or sex be excluded from participating in any employment activities covered in 14 CRF Part 152, Subpart E. The Contractor assures that no person shall be excluded on these grounds from participating in or receiving the services or benefits of any program or activity covered by this Subpart. The Contractor assures that it will require that its covered sub-organizations provide assurances to the Contractor that they will undertake affirmative action programs and that they will require assurances from their sub-organizations, as required by 14 CRF Part 152, Subpart E, to the same effect.

11. PREVAILING RATE OF WAGE.

The Contractor shall pay or provide (and shall cause all subcontractors to pay or provide) to his or their workmen, laborers and mechanics (who are employed by him or them to work on an hourly or daily basis at any trade or occupation at or about the construction site) at least the prevailing rate of Wage and supplements for others engaged in the same trade or occupation in New York as determined by the U.S. department of Labor Davis Bacon Wage Determinations or the City of New York Office of the Comptroller Prevailing Wage Schedule whichever is higher.

The provision of this numbered clause are inserted in this Contract for the benefit of such workmen, laborers and mechanics as well as for the benefit of the Owner; and if the Contractor or any subcontractor shall pay or provide any such workmen, laborer or mechanic less than the rates of wages and supplements above described, such workman, laborer or mechanic shall have a direct right of action against the Contractor or such subcontractor for the difference between the wages and supplements actually paid or provided and those to which he is entitled under this clause. If such workmen, laborer or mechanic is employed by any subcontractor whose subcontract does not contain a provision substantially similar to the provisions of this clause (requiring the payment or provision of at least the above minimum, and providing for a cause of action in the event of the subcontractor's failure to pay or provide such wages and

7. CLAIMS OF THIRD PERSONS.

The Contractor undertakes to pay all claims lawfully made against him by subcontractor, materialmen and workmen, and all claims lawfully made against him by other third persons arising out of or in connection with or because of the performance of this Contract and to Cause all subcontractors to pay all such claims lawfully made against them.

8. CERTIFICATES OF PARTIAL COMPLETION.

If at any time prior to the rendition of the Certificate of Final Completion, any portion of the permanent construction has been satisfactorily completed, and if in the judgement of the MMMHS Representative such portion of the permanent construction is not necessary for the operations of the Contractor but will be immediately useful to and is needed by the Owner for other purposes, the MMMHS Representative may render to the Owner and to the Contractor a certificate in writing to that effect (herein called a Certificate of Partial Completion), and thereupon or at any time thereafter the Owner may take over and use the portion of the permanent construction described in such Certificate and exclude the Contractor therefrom.

The rendition of a Certificate of Partial Completion shall not be construed to constitute an extension of the Contractor's time to complete the portion of the permanent construction to which it relates in the event that he has failed to complete the same in accordance with the terms of this Contract. Moreover, the acceptance of a Certificate of Partial Completion by the Owner shall not operate to release the Contractor or his sureties from any obligations under or upon this Contract or the Performance and Payment Bond.

9. CERTIFICATE OF FINAL COMPLETION.

After the satisfactory completion of all Work whatsoever required and the making of such tests and inspections as may be necessary or desirable, the Architect shall render to the Owner and to the Contractor a certificate in writing (herein called the Certificate of Final Completion) certifying that in his opinion all work under this Contract, including Extra Work, has been completed in accordance with the Contract Drawings and Specifications and the requirements of the Architect, and certifying the date as of which it was so completed.

The rendition of the Certificate of final completion shall not be construed to constitute an extension of the Contractor's time for performance in the event that he has failed to complete the Work in accordance with the terms of this Contract. Moreover, the acceptance of the Certificate of Final Completion by the Owner shall not operate to release the Contractor or his sureties from any obligations under or upon this Contract or the Performance and Payment Bond.

10. AFFIRMATIVE ACTION PROGRAMS.

The Contractor assures that it will undertake an affirmative action program as required by 14 CRF Part 152, Subpart E, to insure that no person shall on the grounds of race, creed, color, national origin, or sex be excluded from participating in any employment activities covered in 14 CRF Part 152, Subpart E. The Contractor assures that no person shall be excluded on these grounds from participating in or receiving the services or benefits of any program or activity covered by this Subpart. The Contractor assures that it will require that its covered sub-organizations provide assurances to the Contractor that they will undertake affirmative action programs and that they will require assurances from their sub-organizations, as required by 14 CRF Part 152, Subpart E, to the same effect.

11. PREVAILING RATE OF WAGE.

The Contractor shall pay or provide (and shall cause all subcontractors to pay or provide) to his or their workmen, laborers and mechanics (who are employed by him or them to work on an hourly or daily basis at any trade or occupation at or about the construction site) at least the prevailing rate of Wage and supplements for others engaged in the same trade or occupation in New York as determined by the U.S. department of Labor Davis Bacon Wage Determinations or the City of New York Office of the Comptroller Prevailing Wage Schedule whichever is higher.

The provision of this numbered clause are inserted in this Contract for the benefit of such workmen, laborers and mechanics as well as for the benefit of the Owner; and if the Contractor or any subcontractor shall pay or provide any such workmen, laborer or mechanic less than the rates of wages and supplements above described, such workman, laborer or mechanic shall have a direct right of action against the Contractor or such subcontractor for the difference between the wages and supplements actually paid or provided and those to which he is entitled under this clause. If such workmen, laborer or mechanic is employed by any subcontractor whose subcontract does not contain a provision substantially similar to the provisions of this clause (requiring the payment or provision of at least the above minimum, and providing for a cause of action in the event of the subcontractor's failure to pay or provide such wages and

January 10, 2005

Monsignor McClancy Memorial High School

supplements) such workman, laborer or mechanic shall have a direct right of action against the Contractor. The Owner shall not be a necessary party to any action brought by the any workman, laborer or mechanic to obtain a money judgement against the Contractor or any subcontractor pursuant to this numbered clause.

Nothing herein contained shall be construed to prevent the Contractor or any subcontractor from paying higher rates of wages or providing higher supplements than the minimum hereinbefore prescribed; and nothing herein contained shall be construed to constitute a representation or guarantee that the Contractor or any subcontractor can obtain workmen, laborers and mechanics for the minimum hereinbefore prescribed.

12. MINIMUM WAGE RATES.

At the direction of the Federal Aviation Administration, the attention of bidders is directed particularly to the Schedule of Minimum Wage Rates attached to the Contract and made a part hereof.

The minimum wage rates as established by the Secretary of Labor are subject to change at any time before the award of the Contract except that if the change is made within 30 days after the bids are opened, or ninety days after the date of the wage decisions, whichever is earlier, the change is not effective. Such a change is necessary in order to comply with a decision of the U.S. Department of Labor.

13. EQUAL EMPLOYMENT OPPORTUNITY

During the performance of this Contract, the Contractor agrees as follows:

- (a) The Contractor will not discriminate against any employee or applicant for employment because of race, creed, sex, color or national origin, and will take affirmative action to insure that they are afforded equal employment opportunities without discrimination because of race, creed, sex, color or national origin. Such action shall be taken with reference, but not be limited to: recruitment, employment, job assignment, promotion, upgrading, demotion, transfer, layoff, or termination, rates of pay or other forms of compensation, and selection for training or retraining, including apprenticeship and on-the-job training.
- (b) The Contractor shall send to each labor union or representative of workers with which he has or is bound by a collective bargaining or other agreement or understanding, a notice, to be provided by the State Commission for Human Rights, advising such labor union or representative of the Contractor's agreement under clauses (a) through (h) (hereinafter called "non-discrimination clauses"). If the Contractor was directed to do so by the Owner as part of the bid or negotiation of the Contract, the Contractor shall request such labor union or representative to furnish him with a written statement that such labor union or representative will not discriminate because of race, creed, sex, color or national origin and that such labor union or representative either will affirmatively cooperate, within the limits of its legal and contractual authority, in the implementation of the policy and provisions of these non-discrimination clauses or that it consents and agrees that recruitment, employment, and the terms and conditions of employment under this Contract, shall be in accordance with the purposes and provisions of these non-discrimination clauses. If such labor union or representative fails or refuses to comply with such a request that it furnish such a statement, the Contractor shall promptly notify the State Commission on Human Rights of such failure or refusal.
- (c) The Contractor shall post and keep posted in conspicuous places, available to employees and applicants for employment, notices to be provided by the State Commission for Human Rights setting forth the substance of the provisions of clauses (a) and (b) and such provisions of the States laws against discrimination as the State Commission for Human Rights shall determine.
- (d) The Contractor shall state, in all solicitations or advertisements for employees placed by or on behalf of the Contractor, that all qualified applicants will be afforded equal employment opportunities without discrimination because of race, creed, sex, color or national origin.
- (e) The Contractor shall comply with the provisions of Sections 291-299 of the Executive law and Civil Rights Law, shall furnish all information and reports deemed necessary by the State Commission for Human Rights under these non-discrimination clauses and such sections of the Executive law, and shall permit access to his books, records and accounts by the State Commission For Human Rights, the Attorney General and the Industrial Commissioner for the purposes of investigation to ascertain compliance with these non-discrimination clauses and such sections of the Executive Law and Civil Rights Law.
- (f) This Contract may be forthwith canceled, terminated or suspended, in whole or in part, by the Owner upon the basis of a finding made by the State Commission for Human Rights that the Contractor has not complied with these non-discrimination clauses, and the Contractor may be declared ineligible for future contracts made by or on behalf of the State, the Port Authority, or other public authority or agency of the State, as well as the

January 10, 2005

Monsignor McClancy Memorial High School

Owner, until he has satisfied the State Commission for Human Rights that he has established and is carrying out a program in conformity with the provisions of these non-discrimination clauses. Such finding shall be made by the State Commission for Human Rights after conciliation efforts by the Commission have failed to achieve compliance with these non-discrimination clauses and after a verified complaint has been filed with the Commission, notice thereof has been given to the Contractor by the Commission and an opportunity has been afforded him to be heard publicly before the State Commissioner of Human Rights or his designed. Such Sanctions may be imposed and remedies invoked independently of or in addition to sanctions and remedies otherwise provided by law.

- (g) The Contractor shall include the provision of clauses (a) through (f) in every subcontract or purchase order in such a manner that such provisions will be binding upon each subcontractor or vendor as to operations to be performed within the State of New York. The Contractor shall take such action in enforcing such provisions of such subcontract or purchase order as the Owner may direct including sanctions or remedies for non-compliance. If the Contractor becomes involved in or is threatened with litigation with a subcontractor or vendor as a result of such direction of the Owner, the Contractor shall promptly notify the chief executive officer of the Owner, requesting him to intervene and protect the interests of the Owner.
- (h) The provisions of this numbered clause which refer to the "State Commission for Human Rights", the "Attorney General" and the "Industrial Commissioner" are inserted in this Contract for illustrative purposes only, for the benefit of the Owner, the Contractor shall substitute the applicable State of New York commissions and authorities who shall have a direct right of action against the Contractor to effectuate the intent of this clause.

CHAPTER V

WARRANTIES MADE AND LIABILITY ASSUMED
BY THE CONTRACTOR

1. CONTRACTOR'S WARRANTIES.

The Contractor represents and warrants:

- (a) That he is financially solvent, that he is licensed by the State of New York, experienced in and competent to perform the type of services contemplated by this Contract, that the facts stated or shown in any papers submitted or referred to in connection with his Proposal are true, and if the Contractor be a corporation, that it is authorized to perform this Contract;
- (b) That he has carefully examined and analyzed the provisions and requirements of this Contract and inspected the construction site, that from his own investigations he has satisfied himself as to the nature of all things needed for the performance of this Contract, the general and local conditions and all other matters which in any way affect this Contract or its performance, and that the time available to him for such examination, analysis, inspection and investigations was adequate;
- (c) That the Contract is feasible of performance in accordance with all its provisions and requirements and that he can and will perform it in strict accordance with such provisions and requirements;
- (d) That no officer, agent, consultant or employee of the Owner is personally interested directly or indirectly in this Contract or the compensation to be paid hereunder;
- (e) That, except only for those representations, statements or promises expressly contained in this Contract, no representation, statement or promise, oral or in writing, of any kind whatsoever by the Owner, its officers, agents, employees or consultants has induced the Contractor to enter into this Contract or has been relied upon by the Contractor, including any with reference to: (1) the meaning, correctness, suitability, or completeness of any provisions or requirements of this Contract; (2) the nature, existence or location of materials, structures, obstructions, utilities or conditions, surface or subsurface, which may be encountered at the construction site; (3) the nature, quantity, quality or size of the materials, equipment, labor and other facilities needed for the performance of this Contract; (4) the general or local conditions which may in any way affect this Contract or its performance; (5) the price of the Contract; or (6) any other matters, whether similar to or different from those referred to in (1) through (5) immediately above, affecting or having any connection with this Contract, the bidding thereon, any discussions thereof, the performance thereof or those employed therein or connected or concerned therewith; and

Moreover, the Contractor accepts the conditions at the Construction site as they may eventually be found to exist and warrants and represents that he can and will perform the Contract under such conditions and that all materials, equipment, labor and other facilities required because of any unforeseen conditions (physical or otherwise) shall be wholly at his own cost and expense, anything in this Contract to the contrary notwithstanding.

Nothing in the Contract Drawings or Specifications or any other part of the Contract is intended as or shall constitute a representation by the Owner as to the feasibility of performance of this Contractor any part thereof. Moreover, the Owner does not warrant or represent either by issuance of the Contract Drawings and Specifications or by any provision of this Contract as to time for performance or completion or otherwise that the Contract may be performed or completed by the times required herein or by any other times.

The Contractor further represents and warrants that he was given ample opportunity and time and by means of this paragraph was requested by the Owner to review thoroughly all documents forming this Contract prior to opening of Proposals on this Contract in order that he might request inclusion in this Contract of any statement, representation, promise or provision which he desired or on which he wished to place reliance; that he did so review said documents, that either every such statement, representation, promise or provision has been included in this Contract or else, if omitted, that he expressly relinquishes the benefit of any such omitted statement, representation, promise or provision and is willing to perform this Contract without claiming reliance thereon or making any other claim on account of such omission.

The Contractor further recognizes that the provisions of this numbered clause (though not only such provisions) are essential to the Owner consent to enter into this Contract and without such provisions, the Owner would not have entered into this Contract.

January 10, 2005

Monsignor McClancy Memorial High School

2. RISKS ASSUMED BY THE CONTRACTOR.

The Contractor assumes the following distinct and several risks, whether they arise from acts or omissions (whether negligent or not) of the Contractor, the Owner, or of third persons, or from any other cause, and whether such risks are within or beyond the control of the Contractor, excepting only risks which arise solely from affirmative acts done by the Owner subsequent to the opening of Proposals on this Contract with actual and wilful intent to cause the loss, damage and injuries described in subparagraphs (a) through (c) below:

- (a) The risk of loss or damage to the permanent construction prior to the rendition of the Certificate of Final Completion (other than loss or damage to the portions of the permanent construction with respect to which Certificates of Partial Completion have been issued), and the Contractor shall forthwith repair, replace and make good any such loss or damage to the permanent construction without cost to the Owner;
- (b) The risk of claims, fines or penalties, just or unjust, made by third persons or assessed by courts or governmental agencies or entities against the Contractor or the Owner on account injuries (including wrongful death), loss, damage or liability of any kind whatsoever arising or alleged to arise out of or in connection with the performance of the Work (whether or not actually caused by or resulting from the performance of the Work) or out of or in connection with the Contractor's operations or presence at or in the vicinity of the construction site or Owner premises, including claims against the Contractor or the Owner for the payment of workers' compensation, whether such claims, fines or penalties are made or assessed and whether such injuries, damage, loss and liability are sustained at any time both before and after the rendition of the Certificate of Final Completion;
- (c) The risk of loss or damage to any property of the Contractor, and of any claims made against the Contractor or the Owner for loss or damage to any property of subcontractors, materialmen, workmen and others performing the Work, occurring at any time prior to completion of removal of such property from the construction site or Owner premises or the vicinity thereof.

The Contractor shall indemnify the Owner against all claims described in sub-paragraphs (b) and (c) above and for all expense incurred by it in the defense, settlement or satisfaction thereof, including expenses of attorneys, except where indemnity would be precluded by New York State Laws, or any other applicable law. Unless a claim is one which the Contractor is not required to indemnify the Owner against as described in the first sentence of this paragraph, such defense shall be at the Contractor's cost.

The provisions of this numbered clause shall also be for the benefit of the MMMHS's, officers, agents, employees and consultants of the Owner so that they shall have all the rights that they would have under this numbered clause if they were named at each place above at which the Owner is named, including a direct right of action against the Contractor to enforce the foregoing indemnity, except, however, that the Owner may at any time in its sole discretion and without liability on its part cancel the benefit conferred on any of them by this numbered clause, whether or not the occasion for invoking such benefit has already arisen at the time of such cancellation.

Neither the issuance of a Certificate of Completion nor the making of Final Payment shall release the Contractor from his obligations under this numbered clause. Moreover, neither the enumeration in this numbered clause nor the enumeration elsewhere in this Contract of particular risks assumed by the Contractor or of particular claims for which he is responsible shall be deemed (a) to limit the effect of the provisions of this numbered clause or of any other clause of this Contract relating to such risks or claims, (b) to imply that he assumes or is responsible for risks or claims only of the type enumerated in this clause or in any other clause of this Contract, or (c) to limit the risks which he would assume or the claims for which he would be responsible in the absence of such enumerations.

3. NO THIRD PARTY RIGHTS.

Nothing contained in this Contract is intended for the benefit of third persons, except to the extent that the Contract specifically provides otherwise by the use of the words "Benefit" or "direct right of action".

CHAPTER VI

RIGHTS AND REMEDIES

1. RIGHTS AND REMEDIES OF THE OWNER.

The Owner shall have the following rights in the event the chief executive officer shall deem the Contractor guilty of a breach of any term whatsoever of this Contract

- (a) The right to take over and complete the Work or any part thereof as agent for and at the expense of the Contractor, either directly or through other contractors.
- (b) The right to cancel this Contract as to any or all of the Work yet to be performed.
- (c) The right to specific performance, an injunction or any other appropriate remedy.
- (d) The right to money damages.

For the purpose of this Contract, breach shall include but not be limited to the following, whether or not the time has yet arrived for performance of an obligation under this Contract: a statement by the Contractor to any representative of the Owner indicating that he cannot or will not perform any one or more of his obligations under this Contract; any act or omission of the Contractor or any other occurrence which makes it improbable at the time that he will be able to perform any one or more of his obligations under this Contract; any suspension of or failure to proceed with any part of the Work by the Contractor which makes it improbable at the time that he will be able to perform any one or more of his obligations under this Contract.

Inasmuch as this Contract is made in reliance upon the Contractor's personal qualifications, the Owner shall also have the rights set forth above in the event the Contractor shall become insolvent or bankrupt or if his affairs are placed in the hands of a receiver, trustee or assignee for the benefit of creditors.

The enumeration in this numbered clause or elsewhere in this Contract of specific rights and remedies of the Owner shall not be deemed to limit any other rights or remedies which the Owner would have in the absence of such enumeration; and no exercise by the Owner of any right or remedy shall operate as a waiver of any other of its rights or remedies not inconsistent therewith or to estop it from exercising such other rights or remedies.

2. RIGHTS AND REMEDIES OF THE CONTRACTOR.

Inasmuch as the Contractor can be adequately compensated by money damages for any breach of this Contract which may be committed by the Owner, the Contractor expressly agrees that no default, act or omission of the Owner shall constitute a material breach of this Contract, entitling him to cancel or rescind it or (unless the MMMHS Representative shall so direct) to suspend or abandon performance.

3. PERFORMANCE OF WORK AS AGENT FOR CONTRACTOR.

In the exercise of its right to take over and complete Work as agent for the Contractor, for which provision is made in the clause hereof entitled "Rights and Remedies of Owner, the Owner shall have the right to take possession of and use or permit the use of any and all plant, materials, equipment and other facilities provided by the Contractor for the purpose of the Work and the Contractor shall not remove any of the same from the site of the Work without express permission. Unless expressly directed to discontinue the performance of all Work, the Contractor shall continue to perform the remainder thereof in such manner as in no way will hinder or interfere with the portions taken over by the Owner.

In the certificate of total compensation earned, for which provision is made in the clause hereof entitled "Final Payment", the MMMHS Representative shall separately state the amount of Work performed by the Owner as agent for the Contractor, shall credit the Owner the cost thereof, and shall credit to the Contractor the compensation earned thereby; and the difference between them shall be payable by the Contractor to the Owner, or vice versa as the case may be. If such difference is in its favor, the Owner may deduct it from the monies due the Contractor, and if such monies be insufficient, the balance thereof shall be payable to it on demand; if in the Contractor's favor, it shall be constitute part of the Final Payment.

The exercise by the Owner of its right to take over the work shall not release the Contractor or his sureties from any of his or their obligations or liabilities under this Contract or the Performance or Payment Bond.

January 10, 2005

Monsignor McClancy Memorial High School

4. NO ESTOPPEL OR WAIVER.

The Owner shall not be precluded or estopped by an acceptance, certificate or payment, final or otherwise, issued or made under this Contract or otherwise issued or made by it, the Architect, or any officer, agent or employee of the Owner, from showing at any time the true amount and character of Work performed, or from showing that any such acceptance, certificate or payment is incorrect or was improperly issued or made; and the Owner shall not be precluded or estopped notwithstanding any such acceptance, certificate or payment, from recovering from the Contractor any damages which it may sustain by reason of any failure on its part to comply strictly with this Contract, and any monies which may be paid to him or for his account in excess of those to which he is lawfully entitled.

Neither the acceptance of the Work or any part thereof, nor any payment therefor, nor any order or certificate issued under this Contract or otherwise issued by the Owner, the Architect, or any officer, agent, or employee of the Owner nor any permission or direction to continue with the performance of the Work, nor any performance by the Owner of any of the Contractor's duties or obligations, nor any aid lent to the Contractor by the Owner in his performance of such duties or obligations, nor any other thing done or omitted to be done by the Owner in his performance of such duties or obligations, nor any other thing done or omitted to be done by the MMMHS, its officers, agents, or employees shall be deemed to be a waiver of any provision of this Contract or of any rights or remedies to which the Owner may be entitled because of any breach thereof, excepting only a resolution of its Officer's, providing expressly for such waiver. No cancellation rescission or annulment hereof, in whole or as to any part of the Work, because of any breach hereof, shall be deemed a waiver of any damages to which the Owner may be entitled because of such breach. Moreover, no waiver by the Owner of any breach of this Contract shall be deemed to be a waiver of any other or any subsequent breach.

CHAPTER VII

MISCELLANEOUS

1. PROVISIONS OF LAW DEEMED INSERTED.

Each and every provision of law and clause required by law to be inserted in this Contract shall be deemed to be inserted herein and the Contract shall be read and enforced as though it were included therein, and if through mistake or otherwise any such provision is not inserted, or is not correctly inserted, then upon application of either party, the Contract shall forthwith be physically amended to make such insertion.

2. INVALID CLAUSES.

If any provision of this Contract shall be such as to destroy its mutuality or to render it invalid or illegal, then, if it shall not appear to have been so material that without it the Contract would not have been made by the parties, it shall not be deemed to form part thereof but the balance of the Contract shall remain in full force and effect.

3. NON-LIABILITY OF THE OWNER REPRESENTATIVES.

Neither the MMMHS nor any officer, representative, agent, or employee thereof shall be charged personally by the Contractor with any liability or held liable to him under any term or provision of this Contract, or because of its execution or attempted execution, or because of any breach hereof.

4. SERVICE OF NOTICES ON THE CONTRACTOR.

Whenever provision is made in this Contract for the giving of any notice to the Contractor, its deposit in any post office or post office box, enclosed in a postpaid wrapper addressed to the Contractor at his office, or its delivery to his office, shall be sufficient service thereof as of the date of such deposit or delivery. Until further notice to the Owner the Contractor's office will be that stated in his Proposal. Notices may also be served personally upon the Contractor; or if a corporation, upon any officer, director, or managing or general agent; or if a partnership upon any partner.

5. MODIFICATION OF CONTRACT.

No change in or modification, termination or discharge of this Contract, in any form whatsoever, shall be valid or enforceable unless it is in writing and signed by the party to be changed therewith or his duly authorized representative, provided, however, that any change in or modification, termination or discharge of this Contract expressly provided for in this Contract shall be effective as so provided.

The authority of any person to order Extra Work or to alter the Contract Drawings and Specifications does not include the power cancel, modify or waive any provision of the Form of Contract.

6. TAX EXEMPTION.

The MMMHS is exempt from payment of state, local taxes, and sales and compensating use taxes of the State of New York and of cities and counties on all materials and supplies incorporated into completed Work. These taxes are not to be included in bids. This exception does not apply to tools, machinery, equipment or other property leased by or to the Contractor or to supplies and materials which, even though they are consumed, are not incorporated into the completed Work, and the Contractor and Subcontractors shall be responsible for and pay any and all applicable taxes, including sales and compensation use taxes, on said leased tools, machinery equipment or other property and upon all said unincorporated supplies and materials.

B. The Contractor shall obtain any and all necessary certificates or other documentation from the appropriate governmental agency or agencies, and use said certificates or other documentation as required by law, rule or regulation.

7. INSURANCE

A. The insurance required shall be written on a per occurrence basis with a company licensed to do business in the State of New York and otherwise acceptable to the MMMHS for not less than the limits of liability set forth below, and shall include contractual liability endorsements and business interruption insurance. All policies of insurance shall be submitted to the MMMHS, for approval prior to the start of any work.

January 10, 2005

Monsignor McClancy Memorial High School

- B. Contractor and its subcontractors for work on this project shall obtain and carry the following insurance:
1. Workers Compensation:
Statutory Employer's Liability: \$500,000.
 2. Comprehensive General Liability Insurance:
including contractual liability endorsement and claims for damages because of bodily injury including personal injury, sickness or disease, or death of any of the Contractor's or Subcontractor's employees or any other person and specifically covering all claims. Bodily and Personal Injury: \$1,000,000 Per Occurrence.
 3. Automobile Insurance: covering all contractor's and employees vehicles on site and off site on company business in the amount of 1,000,000 per occurrence.
 4. Excess Umbrella Liability Insurance: covering all of the foregoing in the amount of \$5,000,000.
- C. Contractor shall furnish original or duplicate original policies of insurance to the MMMHS and one copy of insurance certificates for each policy required herein to the MMMHS and any additional insured; specifically set forth evidence of all coverage required to the satisfaction of the MMMHS; and furnish to the MMMHS and all additional insured copies of any endorsements that are subsequently issued. The Monsignor McClancy Memorial High School, shall be additional insured as well as the Architect and the PA/FAA by the endorsements of Contractor's public liability, property damage and automobile liability insurance policies.
- D. All insurance required hereby shall be written, without the inclusion of any defense costs within the limits of liability, without deductible, and shall name the MMMHS its officers, principals, partners agents, officers and employees, the Architect, Engineers, and any additional person or entity having an interest in the site as an additional insured thereunder. If by the terms of an insurance coverage required hereunder, a mandatory deductible is required, in the event of a paid claim, Contractor shall be responsible for the deductible amount.
- E. Contractor shall bear and be liable for all loss or damage which may happen to said Work or materials at any time prior to the to the completion and acceptance by the MMMHS except for loss or damage caused by the negligence of the MMMHS. The responsibility of Contractor for damage to the Work caused by vandalism shall cease on the date of final completion. Contractor shall and will during the progress of the Work protect and secure said Work from damage and injury, and shall and will repair all such damage and injury, if any, and fully complete and deliver said Work and materials to the MMMHS within the time herein provided and according to the terms and provisions of this contract.
- F. Contractor shall ensure that all Subcontractors comply with the insurance provisions provided herein for Contractor. Contractor shall be responsible to determine and enforce extent of insurance required of its Subcontractors.
- G. Contractor shall maintain insurance that will include coverage for Builder's Risk as well as all insurance required by law to maintain including but not limited to Automobile Liability, Worker's Compensation and Disability Insurance.
- H. Contractor shall by its actions or inactions cause any insurance policies to be canceled or permit them to lapse prior to the issuance of the final Certificate of Completion for the Work at the last Project, and all insurance policies shall include clauses to the effect that (i) the policy shall not be canceled, changed or non-renewed or coverage thereunder reduced until (30) thirty days after the MMMHS and all additional insured have received written notice thereof. Written notice shall be sent by registered mail to Contractor and the MMMHS (ii) the act or omission of the named insured or additional insured will not invalidate the policy as to the other additional insured, and (iii) such insurance shall be primary and non-contributory.
- I. Compliance with the foregoing requirements as to insurance shall not relieve Contractor for liability set forth in other provisions of this contract.

CHAPTER VIII

SPECIAL PROVISIONS

1. CONSTRUCTION REQUIRED BY THE SPECIFICATIONS.

These Specifications relate generally to furnishing and installing noise suppression materials including but not limited to windows, glazing, insulation, weather stripping, trim, and accessories required or necessary for a complete installation, as well as all the necessary ventilating equipment, pipe, ducts, duct insulation, gypsum board components or accessories indicated for the Noise Abatement Work at Monsignor McClancy Memorial High School in East Elmhurst, New York.

These Specifications require the doing of all things necessary or proper for or incidental to the matter referred to in the immediately preceding paragraph, as shown on the Contract Drawings in their present form. In addition, all things shown on the Contract Drawings even though not expressly mentioned in these Specifications, all things mentioned in these Specifications even though not shown on the Contract Drawings, and all things not specified either on the Contract Drawings, or in the Specifications but involved in the carrying out of their intent and in complete and proper execution of the matter referred to in the immediately preceding paragraph are required by these Specifications; and the Contractor shall perform the same as though they were specifically delineated, described and mentioned.

In case of a conflict between a requirement contained in the Specifications and a requirement of the Contract Drawings, the MMMHS Representative shall be the sole arbiter of the requirements of the Contract which shall control.

Some Sections of the Specifications make cross references to construction specified in other Sections of the Specifications, including cross references intended to avoid duplication by the bidders in quoting prices and to point out some of the necessity for coordination. Such cross references are not intended to be complete or all inclusive, and the Contractor shall ascertain for himself both the nature and extent of all construction which may be related to that under each Section of the Specifications whether or not expressly referred to.

Some Sections of the Specifications contain a general description of the construction under such Sections. Such description is merely a very general one and is not intended to outline the construction required by the Specifications and Contract Drawings. Accordingly, such description shall be construed as in aid of and supplemental to, but in no case limiting, impairing or decreasing, the requirements elsewhere set forth with respect to the construction to be performed.

The Contractor's compensation for all construction whatsoever referred to in the Specifications and Contract Drawings in their present form, even though the need for certain items of such construction may be contingent upon future occurrences or determinations or upon other circumstances, shall be deemed to be included in the Lump Sum contained in the Form of Contract unless the Specifications or Contract Drawings expressly state that compensation in addition to such price shall be payable for such items of construction. The express statement in some cases to the effect that certain construction shall be without additional cost to the MMMHS not impair the application of this paragraph in other cases.

The distribution of various parts of the construction among the Divisions and Sections of the Specifications or among the Contract Drawings is not intended as a representation of the most effective or logical method of organizing, scheduling or subcontracting the construction, and the Contractor shall ascertain for himself how to do so unless expressly prescribed in this Contract.

In all cases the provisions of the second paragraph of this numbered Section shall control.

2. AVAILABLE PROPERTY.

Subject to the conditions elsewhere herein, those areas to be occupied by the permanent construction will be made available to the Contractor upon the commencement of his first operations at the construction site, together with the areas indicated on Contract Drawings.

The Contractor shall daily clean up the areas made available to him so that they are free at all times of refuse, rubbish, scrap material or debris.

3. OPERATIONS OF OTHERS.

During the time that the Contractor is performing the Contract, other persons will be engaged in other operations on or about the construction site including operations of the MMMHS, as well as vehicular traffic and pedestrians around the perimeter of the school, all of which shall remain uninterrupted.

The Contractor shall so plan and conduct his operations as to work in harmony with others engaged at the construction site and not to delay, endanger or interfere with the operations of others (whether or not specifically mentioned above),

January 10, 2005

Monsignor McClancy Memorial High School

all to the best interests of Monsignor McClancy Memorial High School, the MMMHS, and the public and as may be directed by the MMMHS Representative.

4. CONTRACTOR'S MEETINGS.

The Contractor shall conduct job progress and coordination meetings with subcontractors in his field office every two weeks, or frequently as job conditions require or the MMMHS Representative may request. The MMMHS Representative shall be notified and, at his option, may attend these meetings. The Contractor shall prepare and distribute minutes to the MMMHS Representative and the subcontractors within forty-eight (48) hours of the day following the meetings.

The Contractor shall attend separate job progress and coordination meetings with the MMMHS Representative every two weeks, or at times otherwise requested by the MMMHS Representative.

5. DELIVERY OF MATERIALS AND RUBBISH REMOVALS.

Delivery of materials and removal of materials or rubbish from the school building shall be made during the hours of 2:30 p.m. to 5:00 p.m. and only through the locations specified below, except as otherwise permitted by the MMMHS Representative.

6. ORDER OF WORK

Work in storerooms, mechanical spaces, and other such spaces not occupied by students or faculty during the hours of Work specified elsewhere, and not limited to restrictions specified in the Order of Work, shall be accomplished at the earliest possible date consistent with the normal progress of the Work.

The Contractor shall take into consideration the fact that the sessions of the school must be continued as usual during progress of the Work. All construction operations affecting normal school operations shall be coordinated with the MMMHS Representative.

The Contractor is responsible for all damage to the existing buildings and adjacent property due to his operations and shall provide and maintain adequate protection against such damage.

The premises shall not be used as a work shop to the detriment of the portion thereof.

Desks, tables, benches and other furniture and equipment shall not be used as workbenches; neither shall materials and furniture be piled thereon without proper protection.

Provide decking on floors, steps, platforms, pavements and roofs where subject to damage from heavy traffic.

Protect doors and door jambs when conveying rubbish and materials.

The Contractor is responsible for all injury to persons due to his operations and shall provide and maintain adequate protection against such injury.

Provide guards, rails, barricades, fences, sidewalk sheds, catch platforms, decking, night lighting and other devices as required by B.O.C.A. Building Code and OSHA as further required to provide adequate protection.

Protect sidewalks and curbs around the premises so that they may be safely used by the public at all times.

Provide barricades around Work areas as required to prevent students and other unauthorized persons from entering therein.

Exterior openings in the buildings' envelopes relating to the Work shall not be left unprotected. The Contractor shall construct weatherproof barriers to prevent infiltration of water and illegal entry.

When the moving of furniture, shades, clocks, pictures, maps, plaster casts and other articles or fixtures is made necessary in the performance of the Work the removing, resetting and relocating together with the necessary repairing, shall be carefully done as a part of the Work of this contract. All removed work shall be protected.

There shall be no interruptions to normal building services during the occupancy of the building by students or faculty, unless otherwise permitted by the High School Principal.

January 10, 2005

Monsignor McClancy Memorial High School

7. CONDITIONS AND PRECAUTIONS.

No vehicles of the Contractor, his subcontractors nor his employees will be permitted to park in or on School property, except for construction vehicles which will be permitted to park at the construction site during the times when the Work is being performed.

Material or construction which must be left in place between working periods shall be securely fastened in a manner approved by the MMMHS Representative so as not to be a hazard.

The Contractor shall take all precautions necessary for protection of persons, traffic, and property resulting from concrete or plaster fragments, dust and debris from concrete or plaster removal, abrasive blasting or other operations, and shall erect tarpaulins or other protective enclosures as required and approved by the MMMHS Representative.

The Contractor shall provide sound suppression devices on gasoline and diesel powered construction equipment and on pneumatic tools as required to maintain noise exposures below the limits specified in Section 1926.52 of the Safety and Health Standards of the U.S. Department of Labor, Occupations Safety and Health Administration, as approved by the MMMHS Representative. The Contractor shall maintain the sound suppression devices in good working condition throughout the length of their use and adjustments and repairs shall be made by him as required to maintain the noise level, as approved by the MMMHS Representative.

No requirement of or omission to require any precautions under this Contract shall be deemed to limit or impair any responsibility or obligation assumed by the Contractor under or in connection with this Contract and the Contractor shall at all times maintain adequate protection to safeguard the public and all persons engaged in the Work and shall take such precautions as will accomplish such end, without undue interference with the public or the operations of the Schools.

8. CONTRACT DRAWINGS.

The Contract Drawings which accompany and form a part of these Specifications bear the general title "The Soundproofing - Monsignor McClancy Memorial High School Complex, East Elmhurst, New York" and are separately numbered and entitled as follows:

The Contract Drawings do not show all of the details of the Work and are intended only to illustrate the character and extent of the work to be performed. Accordingly, they may be supplemented during the performance of the Work by the MMMHS Representative or by the Contractor subject to the approval of the MMMHS Representative, to the extent necessary to further illustrate the Work.

An indication on the Contract Drawings of the existence, nature or location of any utilities, structures, obstructions, conditions, or materials does not constitute a representation as to the conclusions to be drawn therefrom nor a representation that no others exist in addition to those shown, even in the same location: nor does the absence of any indication on said drawings of the existence, nature or location of any utilities, structures, obstructions, conditions or materials constitute a representation that none exist.

After the Contract has been executed, the Contractor will be furnished six copies of the Specifications and Contract Drawings without charge.

9. SHOP DRAWINGS, CATALOG CUTS AND SAMPLES.

The Contractor shall make all working drawings or shop drawings which may be required in addition to the Contract Drawings or in addition to any other drawings which the MMMHS Representative may issue in supplementing the Contract Drawings. As used in this Contract, the terms "working drawings" and "shop drawings" are used interchangeably.

the specific requirements elsewhere set forth in the Specifications for furnishing working drawings for any particular portion of the Contract shall not limit the obligation of the Contractor to furnish working drawings for any other portion when so required by the MMMHS Representative.

In preparing the working drawings, the Contractor shall adopt a sheet of any reasonable size which best suits his needs, but having adopted such size, all sheets thereafter of a similar nature be of the same size as that adopted. Each drawing shall have a margin on the top, bottom and right hand-side of one-half inch and on the left-hand side of one and one-half inches.

January 10, 2005

Monsignor McClancy Memorial High School

Approval of drawings or catalogue cuts which are inconsistent with the requirements of the Contract Drawings and Specifications shall not be deemed to waive or change such requirements or to relieve the Contractor of his obligations to perform such requirements, unless the MMMHS Representative shall expressly and specifically state that he is waiving or changing such requirements, such statements to be effective only if in a writing separate from the approval, identifying the requirements being waived or changed.

The Contractor shall submit a schedule of the dates on which he will furnish such working drawings and catalog cuts in accordance with instructions transmitted with the MMMHS's acceptance of the Proposal. The completed schedule shall be delivered to the MMMHS Representative for his approval within ten days after receipt by the Contractor of the acceptance of the Proposal.

All drawings, data, and other papers of any type whatsoever, whether in the form of writing, figures, or delineations, which are prepared in connection with this Contract and submitted to the MMMHS shall become the property of the MMMHS.

10. SUBSTITUTIONS.

Where a brand name is specified or mentioned herein or called for or mentioned on the Contract Drawings and the phrases "similar and equal to" or "approved equal" are used in connection therewith, substitutions for the brands or makes specifically named may nevertheless be made only in accordance with the Section hereof entitled "Materials and Labor" and Section 01630 of the Contract Specifications.

11. MATERIALS AND LABOR.

Materials and labor (workmanship) shall in every respect be in accordance with the best modern practice and whenever the Contract Drawings, Specifications or directions of the MMMHS Representative admit of a doubt as to what is permissible or fail to note the quality of any construction, the interpretation which calls for the best quality is to be followed. Materials to be installed as part of the permanent construction shall be new materials except as may be otherwise herein specifically required. Materials and workmanship shall be free from defects of any kind.

Wherever on the Contract Drawings or in the Specifications a particular brand or make of material or equipment is shown or specified (and whether or not with the words "or approved equal", "similar and equal to" or words of similar import), any other brand or make which, in the sole opinion of the MMMHS Representative, is equal to that shown or specified may be substituted (except where specifically stated otherwise), but only after being submitted to and expressly approved by the MMMHS Representative. Notwithstanding such approval, however, the Contractor assumes the risk such other brand or make is not equal to that shown or specified and if at any time the substitute shall appear not to be so equal he shall replace the substitute and reimburse the MMMHS for any loss occurring on account of the substitute failing to be so equal. Such submission to the MMMHS Representative shall be made only by including the requested substitution in the list of materials required to be submitted to the MMMHS Representative in accordance with the Section hereof entitled "Inspections and Rejections" within forty five calendar days after the receipt of the acceptance of the Contractor's Proposal. After the approval of said list, no substitutions will be permitted, except that a brand or make named in the Specifications may be submitted for approval in lieu of a brand or make on said list. Any such submission shall not imply or impose on the MMMHS Representative, any obligation whatsoever to discuss, disclose or justify the reasons for his opinion, approval or rejection. Furthermore, the approval of any other brand or make shall not in any way entitle the Contractor to additional compensation therefore, but the MMMHS Representative may make such reduction in the Contractor's compensation as may be equitably warranted because of such approval in lieu of the standard.

The construction called for by the Contract Drawings and Specifications may be adapted for a particular brand or make of material or equipment. Therefore, if any construction not required by the Contract Drawings or Specifications in their present form is necessary or desirable because of the use of another brand or make of material or equipment (even though such other brand or make is approved by the MMMHS Representative or is mentioned in the Contract Drawings or the Specifications and stated to be acceptable), such construction shall be furnished or performed by the Contractor at his expense and subject to the approval of the MMMHS Representative.

In case of a discrepancy between a description or requirement in the Contract Drawings and Specifications for any material or equipment and a catalogue number or other designation for the same material or equipment (even though stated to be acceptable), the description or requirements shall control.

In various paragraphs of these specifications, references may be made to certain standard or tentative specifications or requirements of various organizations. Unless otherwise stated, these references are to be construed as referring to the specifications and requirements in effect on the date set for opening bids upon the present Contract.

The right to use all patented materials, compositions of matter, manufactures, apparatus, appliances, processes of

January 10, 2005

Monsignor McClancy Memorial High School

manufacture or types of construction required in connection with this Contract shall be obtained by the Contractor without separate compensation whether the same is patented before, during or after the performance of the Contract.

The Contractor shall indemnify the MMMHS, the architect, Port Authority and FAA against and save it harmless from all loss and expense incurred in the defense, settlement or satisfaction of any claims in the nature of patent infringement arising out of or in connection with the MMMHS use, in accordance with the preceding paragraph of this numbered clause, of such patentable subject matter or patented material, compositions of matter, manufactures, apparatus, appliances, processes of manufacture or types of construction. If requested by the MMMHS and if notified promptly in writing of any such claim, the Contractor shall conduct all negotiations with respect to and defend such claim without expense to the MMMHS.

12. INSPECTIONS AND REJECTIONS.

All work and all construction, processes of manufacture and methods of construction involved in or related to the performance of the Work shall be at all times and places subject to the inspection of the MMMHS Representative, acting personally or through his Inspectors, and the enumeration in these Specifications of particular portions of such Work, construction, processes of manufacture or methods of construction which will or may be inspected by the MMMHS Representative or such Inspectors shall not be deemed to imply that only such Work, construction, processes of manufacture or methods of construction will or may be so inspected. The MMMHS Representative shall be the judge of the quality and suitability of the Work, construction, processes of manufacture or methods of construction for the purposes for which they are used or to be used. Should they fail to meet his approval they shall be forthwith reconstructed, made good, replaced or corrected, as the case may be, by the Contractor at his own expense. Rejected material shall be removed immediately from the site. The fact that the Inspectors have approved the materials and workmanship shall not relieve the Contractor from his obligation to supply other material and workmanship when so ordered by the MMMHS Representative.

The Contractor, at his own expense, shall furnish such facilities and give such assistance for inspection as the MMMHS Representative may direct. In the case of materials required by the Specifications to be inspected in the factory or plant, and in the case of any other items which the MMMHS Representative may designate, the Contractor shall secure for the MMMHS Representative and his Inspectors free access to all parts of such factories or plants and shall furnish to the MMMHS Representative three copies of purchase orders, two copies of mill shipping statements, and four copies of shipping statements. Moreover, in the case of such materials to be factory or plant inspected, the Contractor shall give at least ten days notice to the MMMHS Representative of his intention to commence the manufacture or preparation of such materials.

Other than the materials and equipment specifically required to be inspected at the manufacturer's factory or plant, all materials will be inspected at the construction site and any portions thereof which are rejected by the MMMHS Representative shall be immediately removed from the construction site by the Contractor and shall be replaced with new materials by the Contractor at his own expense.

Should materials or equipment be delivered to the construction site without having been placed on the aforementioned list and approved, it shall be immediately removed from the construction site by the Contractor at his own expense.

13. MANUFACTURER'S CERTIFICATIONS.

Where materials and equipment are required by these Specifications to conform to certain standard or tentative specifications or requirements of any organizations, including American Society for Testing and Materials, American National Standards Institute, Association Rules for Grading Lumber, Federal Specifications, National Electrical Manufacturers Association, American Association of State Highway and Transportation Officials, American Water Works Association and the International Municipal Signal Association, the Contractor shall furnish to the MMMHS Representative the manufacturer's written certification that each of the materials or equipment conforms to the foregoing standard or tentative specifications. The certification shall be delivered to the MMMHS Representative prior to the installation of the materials to which it refers. Such certifications shall not be binding on or conclusive on the MMMHS and may be rejected at any time by the MMMHS Representative if incorrect, improper or otherwise unsatisfactory in his opinion.

14. NO RELEASE OF CONTRACTOR.

Any provision of this Contract for testing, inspection or approval, and any actual testing, inspection or approval, of any materials, workmanship, plant, equipment, drawings, program, methods of procedure, or of any other thing done or furnished or proposed by the Contractor to be done or furnished in connection with the Contract is for the benefit of the Owner not the Contractor. Any approval of such things shall be construed merely to mean that at that time the MMMHS Representative knows of no good reason for objecting thereto. No such provision for testing or

January 10, 2005

Monsignor McClancy Memorial High School

inspection, no omission of testing or inspection, and no approval shall release the Contractor from his full responsibility for the accurate and complete performance of the Contract in accordance with the Contract Drawings and Specifications or from any duty, obligation or liability imposed upon him by the Contract or from responsibility for injuries to persons or damage to property.

15. ERRORS AND DISCREPANCIES.

If, in the performance of the Contract, the Contractor discovers any errors or omissions in the Contract Drawings or Specifications, or in the marks, lines and elevations furnished by the Owner in the construction undertaken and executed by him, he shall immediately notify the MMMHS Representative and the MMMHS Representative shall promptly verify the same.

If with the Knowledge of such error or omission prior to the correction thereof, the Contractor proceeds with any construction affected thereby, he shall do so at his own risk and the construction so done shall not be considered construction done under and in performance of this Contract unless and until approved and accepted.

16. ACCIDENT AND FIRST AID PROVISIONS.

The Contractor shall promptly report in writing to the MMMHS Representative and to the Owner all accidents whatsoever arising out of or in connection with the performance of the Contract, whether on or adjacent to the construction site, which result in death, injuries, or property damage, giving full details and statements of witnesses. In addition, if death or serious injuries or serious damage is caused, the accident shall be reported immediately by telephone to both the Owner and MMMHS Representative or their respective representatives.

The Contractor shall provide at the construction site such equipment and medical facilities as are necessary to supply first aid service in case of accident, to any who may be injured in the progress of the Contract. He shall have standing arrangements for the removal and hospital treatment of any person who may be injured while engaged in the performance of the Contract.

If any claim is made by a third person against the Contractor or any subcontractor on account of any accident, the Contractor shall promptly report the fact in writing to the Owner and the MMMHS Representative, giving full details of the claim.

17. SAFETY AND SANITARY PROVISIONS.

In the performance of the Contract, the Contractor shall exercise every precaution to prevent injury to persons or damage to property.

He shall, at his own expense, place such watchmen, design such barricades, fences and railings, give such warnings, display such lights, signals and signs, exercise such precaution against fire, adopt and enforce such rules and regulations, and take such other precautions as may be necessary, desirable or proper, or as may be directed.

The Contractor shall employ only such persons as are physically fit and are free from contagious or communicable diseases.

The Contractor shall provide and maintain all necessary toilet and washroom facilities for the use of his workers and those of his subcontractors. Such facility shall be located as directed by the MMMHS Representative within the Contractor's area as indicated on the Contract Drawings. No other toilet or washroom shall be used. The toilet and washroom facility shall be cleaned and maintained by the Contractor as follows:

1. Clean Daily.
2. Wash when required, at least once every week.
3. Replace burned out light bulbs.
4. Furnish and maintain toilet paper and towels as directed.
5. Should any damage or defacement occur, make repairs and take corrective measures promptly as directed by the MMMHS Representative.

He shall use only machinery and equipment adapted to operate with the least possible noise, and shall so conduct his operations that annoyances to occupants of the school, nearby property and the general public will be reduced to a minimum.

The bringing of intoxicating substances onto the construction site and the use and consumption of intoxicating substances at the construction site are prohibited. It shall be the responsibility of the Contractor to insure that all

January 10, 2005

Monsignor McClancy Memorial High School

employees of the Contractor and of all sub-contractors, materialmen and any other persons under contract to or under the control of the Contractor shall comply with the provisions of this paragraph.

The Contractor shall daily clean up all refuse, rubbish, scrap materials and debris caused by his operations, to the end that at all times the construction site shall present a neat, orderly and workmanlike appearance. Before the Certificate of Final-Completion of Work will be issued, the Contractor shall remove all surplus materials, falsework, temporary fences and other temporary structures, including foundations thereof, plant of any description and debris of every nature resulting from his operations and shall put the construction site in a neat, orderly condition.

In the event the Contractor encounters at the construction site, material reasonably believed to be asbestos, polychlorinated biphenyl (PCB) or any other hazardous material, the Contractor shall immediately stop work in the area affected and report the condition in writing to the MMMHS Representative. Work in the affected area shall not thereafter be resumed by the Contractor except upon written order to that effect from the MMMHS Representative.

Within 15 days of the acceptance of his Proposal, the Contractor shall submit to the MMMHS Representative, for his review and approval, the Contractor's Safety Program which shall comply with all applicable Federal, State, Municipal, local and departmental laws and shall include, among other things, the designation by the Contractor of a qualified person to administer such Safety Program.

18. FIRE PROTECTION.

All reasonable precautions for fire protection shall be exercised during the performance of the Contract. An adequate approved system for promptly extinguishing fires shall be provided at all times. Smoking is not permitted within the school buildings at any time.

Fire alarm signals, equipment and water lines shall be continually inspected, accessible and ready for instant use. The operation of each school's fire alarm telegraph, interior fire alarm system, gongs, bells and telephones shall not be interfered with. When these systems are taken off line, the contractor shall pay for restarting, resetting, and or any other charges resulting from the shut down.

East Elmhurst Fire Department Regulations shall govern the storage and use of flammable materials. Flammable materials and fire producing equipment shall not be left about the premises in locations accessible to students.

Except where the MMMHS Representative permits the storage of flammable materials in approved containers, the Contractor is not permitted to store any petroleum products or any other flammable materials on the construction site. During interruptions of the Work flammable mixtures shall be stored in designated locations only or removed entirely from the site.

Contractors using open flame or spark producing tools or equipment such as heating kettles on roofs, blow torches and welding rods shall provide fire guards to maintain a fire watch over the operation of these items at all times when in use.

19. DAILY PROGRESS, EQUIPMENT AND LABOR REPORTS.

The Contractor shall furnish to the MMMHS Representative at the end of each day, a memorandum showing for that day (a) the construction performed, (b) The equipment used, (c) a statement of any unusual happening that occurred, and (d) the number of workers in each trade classification that were employed. Such memorandum shall not be deemed to be a substitute for the notices, time slips, memoranda or other data required under the clauses of the Form of Contract relating to compensation for Extra Work.

20. LAWS AND ORDINANCES.

The Contractor shall comply with all the provisions of Federal, State, City, local and departmental laws, ordinances, rules, regulations and orders which would affect the Contract and the performance thereof. The Contractor shall apply for and pay for all and any permits required by law or by the preceding sentence.

January 10, 2005

Monsignor McClancy Memorial High School

21. IDENTIFICATION.

No person will be permitted on or about the construction site without a pass, permit, or identification badge as required in the provisions of the Division 1 of these specifications and as approved by the MMMHS Representative. The Contractor shall provide such passes, permits or identification badges for his employees, sub-contractors and material persons whenever necessary. Identification badges shall be worn in a conspicuous and clearly visible position by all employees of the Contractor whenever they are working at the construction site.

22. SIGNS.

No advertisement or sign, other than the name and address of the Contractor, will be permitted on any fences, temporary structures or elsewhere on the construction site and such advertisement will be permitted only upon the condition that it is first approved by the MMMHS Representative. In any event, the advertisement shall not exceed two feet by four feet in overall dimensions.

23. CONTRACTOR'S FIELD OFFICE AND REPRESENTATIVE.

At a readily accessible point on or near the construction site, the Contractor shall maintain a field office provided with a telephone.

During the performance of any Work at the construction site, the Contractor shall have a representative thereat who shall be authorized by the Contractor to receive and put into effect promptly all orders, directions and instructions from the MMMHS Representative. The Contractor's representative shall be provided, at all times, with a conformed copy of this Contract and a set of the Contract Drawings.

Orders and directions may be given orally by the MMMHS Representative and shall be received and promptly obeyed by the Contractor or his representative or any superintendent, foreman or other employee of the Contractor who may have charge of the particular part of the Work in relation to which the orders or directions are given. A confirmation in writing of such orders or directions will be given by the MMMHS Representative when so requested by the Contractor.

24. SURVEYS.

The Contractor shall furnish to the MMMHS Representative without additional compensation therefor, any and all information and data regarding points, lines, grades, elevations and other survey information established by the Contractor or required by the MMMHS Representative during the performance of the Contract.

25. TEMPORARY STRUCTURES.

The Contractor shall design, furnish and construct all barricades, fences, staging, falsework, scaffolding and other temporary structures required in the performance of the Contract, whether or not of the type enumerated. All such temporary structures shall be of adequate strength for the purposes for which they are constructed and the Contractor shall maintain them in satisfactory condition. Although the designs for such structures are to be prepared by the Contractor, they shall nevertheless be submitted to the MMMHS Representative for his approval before being used. Neither such approval, however, nor any requirements of the MMMHS Representative, the Specifications or the Contract Drawings shall relieve the Contractor of his responsibility for the design, construction and use of the temporary structures or from any obligations and risks imposed on him under this Contract, and any such approval or requirements shall be deemed merely to relate to minimum standards and not to indicate that the temporary structures are adequate or that they meet the Contractor's obligations under this Contract. Where required such structures shall be painted either an approved dark color paint and shall be repainted whenever necessary during the period that the Contract is being performed.

Upon completion of all other Work, under this Contract, the temporary structures shall be removed from the construction site and disposed of by the Contractor.

26. UTILITY SERVICES.

Except for water and electricity usage as described elsewhere in Division 1 the Contractor shall make arrangements for securing at his own expense any other services which may be required for the performance of the Contract.

January 10, 2005

Monsignor McClancy Memorial High School

27. FINAL INSPECTION.

When, in the opinion of the Contractor, the Construction is completed and ready for Final Inspection, he shall so notify the MMMHS Representative in writing and the MMMHS Representative will give said construction (including any portions with respect to which Certificates of Partial Completion have been issued) a minute and thorough inspection. Before any Certificate of Completion will be issued, any defects or omissions noted on this inspection must be corrected by the Contractor.

28. GUARANTEES.

The Specifications may provide for certain guarantees of portions of the permanent construction. These guarantees are intended for the greater assurance of the Owner and not as a substitute for rights which the Owner might otherwise have. Although such guarantees shall be enforceable as provided, neither any requirement of this Contract with respect to guarantees by the Contractor nor any guarantee given to the Contractor or Owner by any manufacturer shall be deemed to be a limitation upon any rights which the Owner would have, either expressed or implied, in the absence of such guarantees.

All work on this project shall be guaranteed by the Contractor for a period of not less than three years from the date of final completion except for items specifically stated otherwise elsewhere in the Contract Documents

29. PROGRESS SCHEDULE AND ANALYSIS OF BID.

Within fifteen calendar days after acceptance of the Proposal, the Contractor shall prepare a progress schedule for the approval of the MMMHS Representative. The progress schedule shall show the dates for the commencement and completion of the different portions of the Contract. After the approval of the Schedule the Contractor shall maintain and periodically update it at intervals determined by the MMMHS Representative. No changes shall be made therein without the written approval of the MMMHS Representative. Approval of any progress schedule shall not limit, affect or impair the Contractor of his obligation to complete the Contract by the time(s) required in the Form of Contract, even though the schedule approved may be inconsistent with such completion, and in accordance with all other provisions of the Contract, nor shall it constitute a representation by the Owner that the Contractor will be able to proceed or complete in accordance with the schedule.

The MMMHS Representative shall have the right at any time when in his judgement the Work is not proceeding in accordance with the approved progress schedule, or at any time it is likely that the Work may not be completed by the time(s) required in the Form of Contract even though the Contractor is proceeding in accordance with the approved progress schedule, to order the Contractor, without additional compensation, to employ additional shifts, to increase the number of workers employed, to use additional plant or equipment, or to take such other steps as may be required to assure the completion of the various operations within the times allotted therefor in the approved schedule or by the aforesaid completion time(s).

Within fifteen calendar days after acceptance of the Proposal, the Contractor shall prepare a detailed analysis of the bid including a trade payment breakdown of all items included in the Work and required time and material costs including overhead and profit for payment purposes. This breakdown shall be submitted to the MMMHS Representative for approval. The Contractor shall revise the breakdown as directed by the MMMHS Representative and accept it as approved for payment purposes only.

30. ASBESTOS

It has been determined that some asbestos bearing materials are present in the public school complex structure. All asbestos affecting the work has been removed or encapsulated. The Contractor shall not enter rooms in which no work is to be performed, nor disturb or remove any asbestos containing material from any areas of the structures, nor include any cost for asbestos removal in the Bid Proposal for the Work.

The Contractor shall not deviate from dimensions nor details indicated in the Contract Drawings. Deviations from the above dimensions or details which result in the disturbance of known asbestos related materials will require that such materials shall be removed in accordance with all local and State Laws at the sole expense of the Contractor. In addition the Contractor shall indemnify the MMMHS from any and all actions resulting from such disturbance.

The Contractor shall review the available information concerning asbestos including the AHERA report performed by the MMMHS and the Contract Drawings and submit the attached form certifying the same with the bid documents. This Contract does not include the removal of any asbestos, asbestos insulation or asbestos containing material of any kind.

Disadvantaged Business Enterprises

- (1.) The requirements for the Disadvantaged Business Enterprises (DBE) program are set forth in Department of Transportation Regulation, 49 CFR Parts 23 and 26, "Participation by Disadvantaged Business Enterprises in Department of Transportation Programs: Final Rule" which is attached as Exhibit B and is incorporated into this contract by reference.
- (2.) The current PA overall goal for DBE participation in federally assisted contracts is 14.3%. This goal is to be met by use of two strategies: 2% through Race-neutral means and 12.3% through Race-conscious means. These goals are in effect until September 30, 2000 and are subject to annual review and adjustment as appropriate. Therefore the MMMHS must contact the PA to obtain the pertinent DBE goals before executing any consultant and/or construction contracts after that date.
- (3.) This regulation applies to all contracts that include any federal funds. Therefore the MMMHS agrees to include these clauses in all contracts for this project and to enforce such clauses. With regard to paragraph (4.)(b.) (below) the MMMHS agrees to pay each contractor within 7 days of receipt of payment from the Port Authority and to pay over retainage as also specified in paragraph (4.) (b.).
- (4.) The MMMHS agrees to include the following clauses (printed in *Italics*) in all contracts and subcontracts:
 - (a.) *The contractor or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract and shall carry out the applicable requirements of Department of Transportation Regulation, 49 CFR Parts 23 and 26, "Participation by Disadvantaged Business Enterprises in Department of Transportation Programs: Final Rule" (49 CFR Part 26) in the award and administration of DOT assisted contracts. This regulation is incorporated into this contract by reference. Failure by the contractor to carry out these requirements is a material breach of this contract, which may result in the termination of this contract or such other remedy as The Port Authority deems appropriate. This provision shall likewise apply to each subcontractor at each tier.*
 - (b.) *The contractor agrees to pay each subcontractor on this project for satisfactory performance of its subcontract no later than seven (7) days from the receipt of each payment received from the MMMHS or within such later period as is provided in the subcontract.. The contractor agrees further to pay over retainage payments to each subcontractor within fourteen (14) days, or within such later period as is provided in the subcontract, after the subcontractor's work is satisfactorily completed. Any delay or postponement of payment from the above referenced time frame may occur only for good cause following written approval of the Port Authority of New York and New Jersey (PAJ).*
 - (c.) *The Department of Transportation Regulation, (49 CFR parts 23 and 26) Participation by Disadvantaged Business Enterprises in Department of Transportation Programs: Final Rule, (CFR 49Part 26) is incorporated into this contract by reference.*
 - (d.) *The current PA overall goal for DBE participation in federally assisted contracts is 14.3%. This goal is to be met by use of two strategies: 2% through Race-*

neutral means and 12.3% through Race-conscious means. Race-neutral means are described in CFR 49 Part 23 & 26, Paragraph 26.51. The Race-conscious goal is a contract goal. These goals are in effect until revised notification and are subject to annual review and adjustment as appropriate. Therefore the pertinent DBE goals must be obtained from the PA before executing any consultant and/or construction contracts.

- (e.) The obligation of the contractor is to make good faith efforts to meet the Race-conscious or contract goal. The contractor can demonstrate that it has done so by meeting the contract goal or documenting good faith efforts. See Exhibit B, CFR 49 Part 26, Paragraph 26.53 and Appendix A of for descriptions and discussions of good faith efforts. The PA is responsible for determining whether a contractor that has not met the contract goals has documented sufficient good faith efforts to be regarded as responsible.*
- (f.) Assistance is available from the PA Office of Business and Job Opportunity (OBJO) to identify DBE firms and to answer any questions related to the preparation and submission of the DBE Participation Plan. In addition, the PA maintains a computerized directory identifying all firms certified as DBEs. The directory lists the firm's name, certification status, address, responsible officer/owner, telephone number and specialty trade. This Directory is revised annually to ensure data accuracy and integrity. Information pertaining to this directory can be obtained through telephone requests to The Port Authority of NY & NJ, Office of Business and Job Opportunity, Newark Legal and Communications Center, One Riverfront Plaza, Newark, NJ 0719 (973) 565-5527. An Internet version of this Directory is currently under development. When completed it will be integrated into the PA web page for easy access.*
- (g.) Contractors are directed to CFR 49 Part 23 & 26, Paragraph 26.55 "How is DBE participation counted toward goals?" Sub-paragraph (e) which states that 100% of the cost of materials or supplies obtained from a DBE manufacturer may be counted toward the DBE goals but only 60% of the cost of materials or supplies purchased from a DBE regular dealer may be counted toward the goals. More detailed information may be found in the regulation.*

A Unified Certification Program for each state will be put into effect by March 4, 2002. This program is described in CFR 49 Part 23 & 26, Paragraph 26.81.

FEDERAL LAW REQUIREMENTS FOR BID SOLICITATIONS

SECTION 100

100-01 NOTICE OF REQUIREMENT FOR AFFIRMATIVE ACTION TO ENSURE EQUAL EMPLOYMENT OPPORTUNITY (EXECUTIVE ORDER 11246, AS AMENDED).

A. The following is to be made a part of all solicitations for bids on all federally assisted construction contracts or subcontracts in excess of \$10,000.00.

B. The offeror's or bidder's attention is called to the "Equal Opportunity Clause" (Section 100-04) and the "Standard Federal Equal Employment Opportunity Construction Contract Specifications" (Section 100-06) set forth herein.

C. The goals for minority and female participation, expressed in percentage terms FOR THE CONTRACTOR'S WORKFORCE on all construction work in a covered area, are as follows:

Goals for minority participation

(INSERT APPROPRIATE GOAL FROM PAGES 40 to 42)

Goals for female participation

6.9%

22.6%

1. These goals are applicable to all the contractor's CONSTRUCTION WORKFORCE (whether or not it is Federal or federally assisted) performed in the covered area. If the contractor performs construction work in a geographical area located outside of the covered area, it shall apply the goals established for such geographical area where the contractor also is subject to the goals for both its federally involved and nonfederally involved construction.

2. The contractor's compliance with the executive order and the regulations in 41 CFR Part 60-4 shall be based on its implementation of the Equal Opportunity Clause, specific affirmative action obligations required by the specifications set forth in 41 CFR 60-4.3(a), and its efforts to meet the goals established for the geographical area where the contract resulting from this solicitation is to be performed. The hours of minority and female employment and training must be substantially uniform throughout the length of the contract, and the contractor shall make a good faith effort to employ minorities and women evenly on each of its projects. The transfer of minority or female employees or trainees from contractor to contractor or from project to project, for the sole purpose of meeting the contractor goals shall be a violation of

ATTACHMENT IV-6 (2)

the contract, the executive order, and the regulations in 41 CFR Part 60-4. Compliance with the goals will be measured against the total work hours performed.

D. The contractor shall provide written notification to the Director, OFCCP, within 10 working days of award of any construction subcontract in excess of \$10,000.00 at any tier for construction work under the contract resulting from this solicitation. The notification shall list the name, address, and telephone number of the subcontractor, employer identification number, estimated dollar amount of the subcontract, estimated starting and completion dates of the subcontract, and the geographical area in which the contract is to be performed.

E. As used in this notice and in the contract resulting from this solicitation, the "covered area" is (insert description of the geographical areas, where the contract is to be performed giving the state, county and city, if any).

F. The Department of Labor has eliminated all imposed EEO plans and the Philadelphia Plan as a means of complying with Executive Order 11246. Hometown Plans can still be used; however, signatories are required to submit goals and timetables for the utilization of women to the Director, Office of Federal Contract Compliance Programs, Department of Labor, Washington, D.C.

100-02 CERTIFICATION OF NONSEGREGATED FACILITIES. All bidders will be required to submit with their bids a Certification of Nonsegregated Employee Facilities, including an agreement to get a similar certification from proposed subcontractors. These certifications will be required prior to award of contract.

(SEE CERTIFICATION FORM ON NEXT PAGE)

CONTRACTOR'S CERTIFICATION OF NONSEGREGATED FACILITIES

The federally assisted construction contractor certifies that it does not maintain or provide, for its employees, any segregated facilities at any of its establishments and that it does not permit employees to perform services at any location, under its control, where segregated facilities are maintained. The federally assisted construction contractor certifies that it will not maintain or provide, for its employees, segregated facilities at any of its establishments and that it will not permit its employees to perform services at any location, under its control where segregated facilities are maintained. The federally assisted construction contractor agrees that a breach of this certification is a violation of the equal opportunity clause in this contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating area, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation and housing facilities provided for employees which are segregated by explicit directives or are in fact segregated on the basis of race, color, religion or national origin because of habit, local custom, or any other reason. The federally assisted construction contractor agrees that (except where he has obtained identical certifications from proposed subcontractors for specific time periods) he will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding \$10,000.00 which are not exempt from the provisions of the equal opportunity clause and that he will retain such certifications in his files.

The information above is true and complete to the best of my knowledge.

Name and Title (Please type)

Date

Signature

Note: The penalty for making false statements in offers is prescribed in 18 U.S.C. 1001.

100-03 REPORTS.

A. Contractors/Subcontractors with 50 or more employees and Contracts over \$50,000.00. All contractors and subcontractors performing on federally assisted projects are required to file annually (on or before March 31) complete and accurate reports on SF 100 (Employee Information Report, EEO-1) to the Joint Reporting Committee. The first report is due within 30 days after award unless such report was filed within the preceding 12-month period.

Standard Form 100 is normally furnished based on a mailing list, but can be obtained from the Joint Reporting Committee, P.O. Box 2236, Norfolk, Virginia 20501.

B. Contractors/Subcontractors with Contracts over \$10,000.00.

As indicated in paragraph E of the EEO Clause, monthly Employment Utilization Reports, CC 257 (previously SF 257) will be submitted to the OFCCP, at the following addresses:

For downstate New York and New Jersey:

Mr. Harold M. Busch
District Director, OFCCP/ESA
U.S. Department of Labor
26 Federal Plaza, Rm. 36-116
New York, N.Y. 10278

For Upstate New York:

Mr. Garland Sweeney
District Director, OFCCP/ESA
U.S. Department of Labor
Jackson Building, Rm. 609
220 Delaware Avenue
Buffalo, N.Y. 14202

100-04 EQUAL EMPLOYMENT OPPORTUNITY CLAUSE. The following is included IN ENTIRETY in all federally funded construction contracts over \$10,000:

During the performance of this contract, the contractor agrees as follows:

A. The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The contractor will take affirmative action to insure that applicants are employed and that employees are treated during employment without regard to their race, color, religion, sex or nation origin. Such action shall include, but not be limited to the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or

termination, rates of pay or other compensation; and selection for training, including apprenticeship. The contractor agrees to post, in conspicuous places available to employees and applicants for employment, notices (Attached as 100-05) setting forth the provisions of this nondiscrimination clause.

B. The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

C. The contractor will send, to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice (Attached as 100-05) advising the said labor union or workers' representatives of the contractor's commitments under this section and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

D. The contractor will comply with all provisions of Executive Order 11246, as amended, of September 24, 1965, and the rules, regulations, and relevant orders of the Secretary of Labor.

E. The contractor will furnish all information and reports required by Executive Order 11246, as amended, of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the Comptroller General of the United States, Department of Transportation, FAA and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations and orders.

F. In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246, as amended, of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246, as amended, September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provide by law.

G. The contractor will include the portion of the sentence immediately preceding paragraph A and the provisions of

ATTACHMENT IV-6 (6)

paragraphs A through C in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246, as amended, September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the FAA may direct as a means of enforcing such provisions, including sanctions for noncompliance; provided, however, that in the event a contractor becomes involved in, or is threatened with litigation with a subcontractor or vendor as a result of such direction by the FAA, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

H. Contractors and subcontractors may satisfy the requirements of Paragraph B of the referenced EEO clause by complying with any of the following:

1. Stating in the Invitations for Bids that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin, or
2. Including appropriate insignia in display or other advertising as prescribed by the Department of Labor, or
3. Using a single advertisement grouped with other advertisements under a caption which clearly states that all employers in the group assure all qualified applicants will have equal consideration for employment without regard to race, color, religion, sex, or national origin, or
4. Using the phrase "an equal opportunity employer" in a single advertisement in clearly distinguishable type.

SECTION 100-05 NOTICES TO BE POSTED
PER PARAGRAPHS A AND C OF THE EEO CLAUSE.

EQUAL EMPLOYMENT OPPORTUNITY IS THE LAW - DISCRIMINATION IS
PROHIBITED BY THE CIVIL RIGHTS ACT OF 1964 AND BY EXECUTIVE
ORDER NO. 11246

Title VI of the Civil Rights Act of 1964 - Administered by:

THE EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

Prohibits discrimination because of Race, Color, Religion,
Sex, or National Origin by Employers with 75 or more
employees, by Labor Organizations with a hiring hall of 75
or more members, by Employment Agencies, and by Joint Labor-
Management Committees for Apprenticeship or Training. After
July 1, 1967, employees and labor organizations with 50 or
more employees or members will be covered; after July 1,
1968, those with 25 or more will be covered.

ANY PERSON

Who believes he or she has been discriminated against

Executive Order No. 11246 - Administered by:

THE OFFICE OF FEDERAL CONTRACT COMPLIANCE

Prohibits discrimination because of Race, Color, Religion,
Sex or National Origin, and requires affirmative action to
ensure equality of opportunity in all aspects of employment.

By all Federal Government Contractors and Subcontractors,
and by Contractors Performing Work Under a Federally
Assisted Construction Contract, regardless of the number of
employees in either case.

ANY PERSON

Who believes he or she has been discriminated against

SHOULD CONTACT

THE OFFICE OF FEDERAL CONTRACT COMPLIANCE
U.S. Department of Labor, Washington, D.C. 20210

100-06 STANDARD FEDERAL EQUAL EMPLOYMENT OPPORTUNITY
CONSTRUCTION CONTRACT SPECIFICATIONS (EXECUTIVE ORDER 11246,
AS AMENDED)

The following specifications are made a part of all federally assisted construction contracts or subcontracts over \$10,000.00 AND included in all invitations for bids:

A. As used in these specifications:

1. "Covered area" means the geographical area described in the solicitation from which this contract resulted;
2. "Director" means Director, Office of Federal Contract Compliance Programs (OFCCP), U.S. Department of Labor, or any person to whom the Director delegates authority;
3. "Employer identification number" means the Federal social security number used on the Employer's Quarterly Federal Tax Return, U.S. Treasury Department Form 941;
4. "Minority" includes:
 - (a) Black (all persons having origins in any of the Black African racial groups not of Hispanic origin);
 - (b) Hispanic (all persons of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin regardless of race);
 - (c) Asian and Pacific Islander (all persons having origins in any of the original peoples of the Far East, Southeast, Asia, and the Indian subcontinent, or the Pacific Islands); and
 - (d) American Indian or Alaskan native (all persons having origins in any of the original peoples of North America and maintaining identifiable tribal affiliations through membership and participation or community identification).

8. Whenever the contractor, or any subcontractor at any tier, subcontracts a portion of the work involving any construction trade, it shall physically include in each subcontract in excess of \$10,000 the provisions of these specifications and the notice which contains the applicable goals for minority and female participation and which is set

forth in the solicitations from which this contract resulted.

C. If the contractor is participating (pursuant to 41 CFR 60-4.5) in a Hometown Plan approved by the U.S. Department of Labor in the covered area either individually or through an association, its affirmative action obligations on all work in the plan area (including goals and timetables) shall be in accordance with that plan for those trades which have unions participating in the plan. Contractors must be able to demonstrate their participation in and compliance with the provisions of any such Hometown Plan. Each contractor or subcontractor participating in an approved plan is individually required to comply with its obligations under the EEO clause and to make a good faith effort to achieve each goal under the plan in each trade in which it has employees. The overall good faith performance by other contractors or subcontractors toward a goal in an approved plan does not excuse any covered contractor's or subcontractor's failure to take good faith efforts to achieve the plan goals and timetables.

D. The contractor shall implement the specific affirmative action standards provided in paragraphs G.1 to G.16 of these specifications. The goals set forth in the solicitation from which this contract resulted are expressed as percentages of the total hours of employment and training of minority and female utilization the contractor should reasonably be able to achieve in each construction trade in which it has employees in the covered area. Covered construction contractors performing construction work in a geographical area where they do not have a Federal or federally assisted construction contract shall apply to the minority and female goals established for the geographical area where the work is being performed. Goals are published periodically in the Federal Register in notice form, and such notices may be obtained from any OFCCP office or from Federal procurement contracting officers. The contractor is expected to make substantially uniform progress in meeting its goals in each craft during the period specified.

E. Neither the provisions of any collective bargaining agreement nor the failure by a union with whom the contractor has a collective bargaining agreement to refer either minorities or women shall excuse the contractor's obligations under these specifications, Executive Order 11246, as amended, or the regulations promulgated pursuant thereto.

F. In order for the nonworking training hours of apprenticeship and trainees to be counted in meeting the goals, such apprentices and trainees must be employed by the

contractor during the training period and the contractor must have made a commitment to employ the apprentices and trainees at the completion of their training, subject to the availability of employment opportunities. Trainees must be trained pursuant to training programs approved by the U.S. Department of Labor.

G. The contractor shall take specific affirmative actions to ensure EEO. The evaluation of the contractor's compliance with these specifications shall be based upon its effort to achieve maximum results from its actions. The contractor shall document these efforts fully and shall implement affirmative action steps at least as extensive as the following:

1. Ensure and maintain in a working environment free of harassment, intimidation, and coercion at all sites, and in all facilities at which the contractor's employees are assigned to work. The contractor, where possible, will assign two or more women to each construction project. The contractor shall specifically ensure that all foremen, superintendents, and other onsite supervisory personnel are aware of and carry out the contractor's obligation to maintain such a working environment, with specific attention to minority or female individuals working at such sites or in such facilities.
2. Establish and maintain a current list of minority and female recruitment sources, provide written notification to minority and female recruitment sources and to community organizations when the contractor or its unions have employment opportunities available, and maintain a record of the organizations' responses.
3. Maintain a current file of the names, addresses, and telephone numbers of each minority and female off-the-street applicant and minority or female referral from a union, a recruitment source, or community organization and of what action was taken with respect to each such individual. If such individual was sent to the union hiring hall for referral and was not referred back to the contractor by the union or, if referred, not employed by the contractor, this shall be documented in the file with the reason therefore along with whatever additional actions the contractor may have taken.
4. Provide immediate written notification to the Director when the union or unions with which the contractor has a collective bargaining agreement has not referred to the contractor a minority person or

woman sent by the contractor, or when the contractor has other information that the union referral process has impeded the contractor's efforts to meet its obligations.

5. Develop on-the-job training opportunities and/or participate in training programs for the areas which expressly include minorities and women, including upgrading programs and apprenticeship and trainee programs relevant to the contractor's employment needs, especially those programs funded or approved by the Department of Labor. The contractor shall provide notice of these programs to the sources compiled under G.2 above.

6. Disseminate the contractor's EEO policy by providing notice of the policy to unions and training programs and requesting their cooperation in assisting the contractor in meeting its EEO obligations; by including it in any policy manual and collective bargaining agreement; by publicizing it in the company newspaper, annual report, etc.; by specific review of the policy with all management personnel and with all minority and female employees at least once a year; and by posting the company EEO policy on bulletin boards accessible to all employees at each location where construction work is performed.

7. Review, at least annually, the company's EEO policy and affirmative action obligations under these specifications with all employees having any responsibility for hiring, assignment, layoff, termination, or other employment decisions including specific review of these items with onsite supervisory personnel such as superintendents, general foremen, etc., prior to the initiation of construction work at any job site. A written record shall be made and maintained identifying the time and place of these meetings, persons attending, subject matter discussed, and disposition of the subject matter.

8. Disseminate the contractor's EEO policy externally by including it in any advertising in the news media, specifically including minority and female news media, and providing written notification to and discussing the contractors and subcontractors with whom the contractor does or anticipates doing business.

9. Direct its recruitment efforts, both oral and written, to minority, female, and community organizations, to schools with minority and female students; and to minority and female recruitment and

training organizations serving the contractor's recruitment area and employment needs. Not later than one month prior to the date for the acceptance of applications for apprenticeship or other training by any recruitment source, the contractor shall send written notification to organizations, such as the above, describing the openings, screening procedures, and test to be used in the selection process.

10. Encourage present minority and female employees to recruit other minority persons and women and, where reasonable, provide after school, summer, and vacation employment to minority and female youth both on the site and in other areas of a contractor's workforce.

11. Validate all test and other selection requirements where there is an obligation to do so under 41 CFR PART 60-3.

12. Conduct, at least annually, an inventory and evaluation, at least of all minority and female personnel, for promotional opportunities and encourage these employees to seek or to prepare for, through appropriate training, etc., such opportunities.

13. Ensure that seniority practices, job classifications, work assignments, and other personnel practices do not have a discriminatory effect by continually monitoring all personnel and employment related activities to ensure that the EEO policy and the contractor's obligations under these specifications are being carried out.

14. Ensure that all facilities and company activities are nonsegregated except that separate or single-user toilet and necessary changing facilities shall be provided to assure privacy between the sexes.

15. Document and maintain a record of all solicitations of offers for subcontracts from minority and female construction contractors and suppliers, including circulation of solicitations to minority and female contractor associations and other business associations.

16. Conduct a review, at least annually, of all supervisors' adherence to and performance under the contractor's EEO policies and affirmative action obligations.

H. Contractors are encouraged to participate in voluntary associations which assist in fulfilling one or more of their

affirmative action obligations (G.1 to G.16). The efforts of a contractor association, joint contractor-union, contractor-community, or other similar groups of which the contractor is a member and participant, may be asserted as fulfilling any one or more of its obligations under G.1 to G.16 of these specifications provided that the contractor actively participates in the group, makes every effort to assure that the group has a positive impact on the employment of minorities and women in the industry, ensures that the concrete benefits of the program are reflected in the contractor's minority and female workforce participation, makes good faith effort to meet its individual goals and timetables, and can provide access to documentation which demonstrates the effectiveness of actions taken on behalf of the contractor. The obligation to comply, however, is the contractor's and failure of such a group to fulfill an obligation shall not be a defense for the contractor's noncompliance.

I. A single goal for minorities and a separate single goal for women have been established. The contractor, however, is required to provide EEO and to take affirmative action for all minority groups, both male and female, and all women, both minority and nonminority. Consequently, the contractor may be in violation of the executive order if a particular group is employed in a substantially disparate number (for example, even though the contractor has achieved its goals for women generally, the contractor may be in violation of the executive order if a specific minority group of women is underutilized).

J. The contractor shall not use the goals and timetables or affirmative action standards to discriminate against any person because of race, color, religion, sex, or national origin.

K. The contractor shall not enter into any subcontract with any person or firm debarred from Government contracts pursuant to Executive Order 11246, as amended.

L. The contractor shall carry out such sanctions and penalties for violation of these specifications and of the Equal Opportunity Clause, including suspension, termination, and cancellation of existing subcontracts as may be imposed or ordered pursuant to Executive Order 11246, as amended, and in its implementing regulations, by the OFCCP. Any contractor who fails to carry out such sanctions and penalties shall be in violation of these specifications and Executive Order 11246, as amended.

M. The contractor, in fulfilling its obligations under these specifications, shall implement specific affirmative

action steps, at least as extensive as those standards prescribed in paragraph G of these specifications so as to achieve maximum results from its efforts to ensure equal employment opportunity. If the contractor fails to comply with the requirements of the executive order, the implementing regulations, or these specifications, the Director shall proceed in accordance with 41 CFR 60-4.8.

N. The contractor shall designate a responsible official to monitor all employment related activity to ensure that the company EEO policy is being carried out, to submit reports relating to the provisions hereof as may be required by the Government, and to keep records. Records shall at least include for each employee, the name, address, telephone number, construction trade, union affiliation if any, employee identification number when assigned, social security number, race, sex, status (e.g., mechanic, apprentice, trainee, helper, or laborer), dates of changes in status, hours worked per week in the indicated trade, rate of pay, and locations at which the work was performed. Records shall be maintained in an easily understandable and retrievable form; however, to the degree that existing records satisfy this requirement, contractors shall not be required to maintain separate records.

O. Nothing herein provided shall be construed as a limitation upon the application of other laws which establish different standards of compliance or upon the application of requirements for the hiring of local or other area residents (e.g., those under the Public Works Employment Act of 1977 and the Community Development Block Grant Program).

100-07 TITLE VI OF THE CIVIL RIGHTS ACT OF 1964 NONDISCRIMINATION IN FEDERALLY ASSISTED PROGRAMS OF THE DEPARTMENT OF TRANSPORTATION. During the performance of this contract, the contractor, for itself, its assigns and successors in interest (hereinafter referred to as the contractor) agrees as follows:

A. Compliance with Regulations. The contractor shall comply with the Regulations relative to nondiscrimination in federally assisted programs of the Department of Transportation (hereinafter, DOT) Title 49, Code of Federal Regulations, Part 21, as they may be amended from time to time (hereafter, Regulations), which are herein incorporated by reference and made a part of this contract.

B. Nondiscrimination. The contractor, with regard to the work performed by it during the contract, shall not discriminate on the grounds of race, color, or national origin in the selection and retention of subcontractors,

including procurements of materials and leases of equipment. The contractor shall not participate either directly or indirectly in the discrimination prohibited by Section 21.5 of the Regulations including employment practices when the contract covers a program set forth in Appendix B of the Regulations.

C. Solicitations for Subcontracts, Including Procurement of Materials and Equipment. In all solicitations either by competitive bidding or negotiation made by the contractor for work to be performed under a subcontract, including procurements of materials or leases of equipment, each potential subcontractor or supplier shall be notified by the contractor of the contractor's obligations under this contract and the Regulations relative to nondiscrimination on the grounds of race, color, or national origin.

D. Information and Reports. The contractor shall provide all information and reports required by the Regulations or directives issued pursuant thereto, and shall permit access to its books, records, accounts, other sources of information, and its facilities as may be determined by the sponsor or the Federal Aviation Administration to be pertinent to ascertain compliance with such Regulations, orders, and instructions. Where any information required of a contractor is in the exclusive possession of another who fails or refuses to furnish this information the contractor shall so certify to the sponsor or the FAA as appropriate, and shall set forth what efforts it has made to obtain the information.

E. Sanctions for Noncompliance. In the event of the contractor's noncompliance with the nondiscrimination provisions of this contract, the sponsor shall impose such contract sanctions as it or the Federal Aviation Administration may determine to be appropriate, including, but not limited to:

1. Withholding of payments to the contractor under the contract until the contractor complies, and/or
2. Cancellation, termination, or suspension of the contract, in whole or in part.

F. Incorporation of Provisions. The contractor shall include the provisions of paragraphs A and E in every subcontract, including procurements of materials and leases of equipment, unless exempt by the Regulations or directives issued pursuant thereto. The contractor shall take such action with respect to any subcontract or procurement as the sponsor or the Federal Aviation Administration may direct as a means of enforcing such provisions including sanctions for

noncompliance. Provided, however, that, in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or supplier as a result of such direction, the contractor may request the sponsor to enter into such litigation to protect the interests of the sponsor and, in addition, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

G. Breach of Contract Terms - Sanctions. Any violation or breach of the terms of this contract on the part of the contractor/ subcontractor may result in the suspension or termination of this contract or such other action which may be necessary to enforce the rights of the parties of this agreement.

100-08 STANDARD REQUIREMENTS FOR AIRPORT IMPROVEMENT PROGRAM CONTRACTS. The following is included in all federally assisted construction contracts:

A. AIP Project. The work in this contract is included in AIP Grant Nos. _____ which is being undertaken and accomplished by (Sponsor's Name) in accordance with the terms and conditions of a grant agreement between the (Sponsor's Name), hereinafter referred to as the Sponsor, and the United States, under the Airport and Airway Improvement Act of 1982 (AAIA) (P.L. 97-248, 49 U.S.C. 2201 et seq) and Part 152 of the Federal Aviation Regulations (FAR) (14 CFR Part 152), or its successor regulation, pursuant to which the United States has agreed to pay a certain percentage of that Act. The United States is not a party to this contract and no reference in this contract to the FAA or any representative thereof, or to any rights granted to the FAA or any representative thereof, or the United States, by the contract, makes the United States a party to this contract.

B. Consent to Assignment. The contractor shall obtain the prior written consent of the sponsor to any proposed assignment of any interest in or part of this contract.

C. Veteran's Preference. In the employment of labor (except in executive, administrative, and supervisory positions), preference shall be given to veterans of the Viet Nam era and disabled veterans. However, this preference may be given only where the individuals are available and qualified to perform the work to which the employment relates.

D. FAA Inspection and Review. The contractor shall allow any authorized representative of the FAA to inspect

and review any work or materials used in the performance of this contract..

E. Inspection Records. The contractor shall maintain an acceptable cost accounting system. The sponsor, the FAA, and the Comptroller General of the United States shall have access to any books, documents, papers, and records of the contractor which are directly pertinent to the specific contract for the purpose of making audit, examination, excerpts, and transcriptions. The contractor shall maintain all required records for three years after the sponsor makes final payment and all other pending matters are closed.

F. Rights to Inventions - Materials. All rights to inventions and materials generated under this contract are subject to regulations issued by the FAA and the recipient of the Federal grant under which this contract is executed.

G. Disadvantaged Business Enterprises. It is the policy of the Department of Transportation that disadvantaged business enterprises shall have the maximum opportunity to participate in the performance of this contract.

1. The contractor agrees to ensure that disadvantaged business enterprises have the maximum opportunity to participate in the performance of subcontracts. In this regard the contractor shall take all necessary and reasonable steps in accordance with 49 CFR Part 23 to ensure that disadvantaged business enterprises have the maximum opportunity to compete for and perform subcontracts. Contractors shall not discriminate on the basis of race, color, national origin, or sex in the award and performance of this contract.

100-09 CLEAN AIR AND WATER POLLUTION CONTROL REQUIREMENTS.

Contractors and subcontractors must agree for any contract or subcontract exceeding \$100,000.00:

A. That any facility to be used in the performance of the contract or to benefit from the contract is not listed on the Environmental Protection Agency (EPA) List of Violating Facilities;

B. That it will comply with all the requirements of Section 306 of the Clean Air Act, Section 508 of the Clean Water Act, Executive Order 11738, Environmental Protection Agency Regulation (40 CFR Part 15) and all regulations issued thereunder;

C. That it will notify the awarding official of the receipt of any communication from the EPA indicating that a facility to be utilized for performance of or benefit from the contract is under consideration to be listed on the EPA List of Violating Facilities; and

D. That it will include or cause to be included in any contract or subcontract which exceeds \$100,000.00 the aforementioned criteria and requirements.

100-10 BONDING/INSURANCE. The following clauses are included in all federally assisted construction contracts for bids and/or contracts in excess of \$100,000.00:

A. The contractor agrees to furnish a performance bond for 100 percent of the contract price. This bond is one that is executed in connection with a contract to secure fulfillment of all contractor's obligations under such contract.

B. The contractor agrees to furnish a payment bond for 100 percent of the contract price. This bond is one that is executed in connection with a contract to assure payment as required by law of all persons supplying labor and materials in the execution of the work provided for in the contract.

100-11 DISADVANTAGED BUSINESS ENTERPRISE REQUIREMENTS.

Disadvantaged Business Enterprises (DBE) requirements are applicable to each general aviation airport sponsor receiving grant funds in excess of \$250,000; each non-hub airport sponsor (including commuters) receiving grant funds in excess of \$400,000; each large, medium, small hub airport sponsor receiving a grant in excess of \$500,000.

Since the contract to be awarded under this advertised bid falls into the above category, the bid is subject to the following DBE requirements:

A. The successful bidder shall make a good faith effort to use DBE subcontractors and to replace a DBE subcontractor that is unable to perform successfully with another DBE subcontractor. There shall be no substitution of any subcontractors without the prior approval of the sponsor in order to ensure that the substitute firm is an eligible DBE.

B. Definitions

1. A disadvantaged business enterprise is a small business concern:

(a) Which is at least 51% owned by one or more

socially or economically disadvantaged individuals, or, in the case of any publicly owned business, at least 51% of the stock of which is owned by one or more socially and economically disadvantaged individuals; and

(b) Whose management and daily business operations are controlled by one or more socially and economically disadvantaged individuals who own it.

2. Small business concern means a small business as defined pursuant to section 3 of the Small Business Act and relevant regulations promulgated pursuant thereto except that a small business concern shall not include any concern or group of concerns controlled by the same socially and economically disadvantaged individual or individuals which has annual average gross receipts in excess of \$14 million over the previous three fiscal years.

3. Socially and economically disadvantaged individuals means those individuals who are citizens of the United States (or lawfully admitted permanent residents) and who are Women, Black Americans, Hispanic Americans, Native Americans, Asian-Pacific Americans, or Asian-Indian Americans and any other minorities or individuals found to be disadvantaged by the Small Business Administration pursuant to Section 8(a) of the Small Business Act. Recipients shall make a rebuttable presumption that individuals in the following groups are socially and economically disadvantaged. Recipients also may determine, on a case-by-case basis, that individuals who are not a member of one of the following groups are socially and economically disadvantaged:

(a) "Black Americans," which includes persons having origins in any of the Black racial groups of Africa;

(b) "Hispanic Americans," which includes persons of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish or Portuguese culture or origin, regardless of race;

(c) "Native Americans," which includes persons who are American Indians, Eskimos, Aleuts, or Native Hawaiians;

- (d) "Asian-Pacific Americans," which includes persons whose origins are from Japan, China, Taiwan, Korea, Vietnam, Laos, Cambodia, the Philippines, Samoa, Guam, the U.S. Trust Territories of the Pacific, and the Northern Marianas; and
- (e) "Asian-Indian Americans," which includes persons whose origins are from India, Pakistan, and Bangladesh.

C. Bidding Requirements. Each Bidder is required to submit DBE participation information and, as a condition of contract award, must meet the DBE goal or demonstrate to the Airport Sponsor that it made good faith efforts to reach the goal.

The bidder shall make good faith efforts, as defined in Appendix A of 49 CFR Part 23, Regulations of the Office of the Secretary of Transportation, to subcontract (3) of the dollar value of the prime contract to small business concerns owned and controlled by socially and economically disadvantaged individuals (DBE). In the event that the bidder for this solicitation qualifies as a DBE, the contract goal shall be deemed to have been met. Individuals who are rebuttably presumed to be socially and economically disadvantaged include Women, Black Americans, Hispanic Americans, Native Americans, Asian-Pacific Americans, and Asian-Indian Americans. Each Bidder will be required to submit within the bid information concerning the DBE's that will participate in this contract. The information will include: (1) the name and address of each DBE; (2) a description of the work to be performed by each named firm; (3) the dollar value of the contract; and (4) a copy of the DBE Certificate. If the bidder fails to achieve the contract goal stated herein, it shall provide documentation with the bid demonstrating that it made good faith efforts in attempting to do so. A bid that fails to meet these requirements will be considered non-responsive.

D. Procedures to Confirm Good Faith Efforts. If the apparent low bidder, who is otherwise responsive and responsible, cannot meet the goal, he must show that he has made good faith efforts to this end through:

1. Attendance at the pre-bid meeting;
2. Copies of advertisement(s) in trade association newsletters and minority-owned media;
3. A report with a detailed statement of efforts made to locate and negotiate with DBE's, including

information on:

- (a) Efforts made to select portions of the work proposed to be performed by DBE's in order to increase the likelihood of achieving the stated goal;
- (b) Each DBE contacted, but which the bidder considers to be unqualified to perform the work;
- (c) Each DBE contacted, but which the bidder considers to be unavailable; and
- (d) Which organizations that represent or provide assistance to subcontractors were contacted.

The stated percentage goal may be waived if the aforementioned good faith efforts to reach the goal have been made. However, a bidder or proposer's failure to meet the goal or to show meaningful good faith efforts to reach the goal may be grounds for finding the bid non-responsive.

E. To insure that any substitute firm is an eligible DBE, the Contractor shall not substitute subcontractors without the prior approval of the Owner.

F. The Contractor shall establish and maintain records and submit reports, as required and requested, which will identify the efforts and achievements made to meet DBE subcontract goals and other DBE affirmative action efforts.

100-12 FOREIGN TRADE RESTRICTIONS.

This clause is included in all solicitations, contracts, and subcontracts resulting from projects funded under the AIP.

The contractor or subcontractor, by submission of a bid and/or execution of a contract, certifies that it:

- a. Is not owned or controlled by one or more citizens or nationals of a foreign country included in the list of countries that discriminate against U.S. firms published by the Office of the United States Trade Representative (USTR);
- b. Has not knowingly entered into any contract or subcontract for this project with a contractor that is a citizen or national of a foreign country on said list, or is owned or controlled directly or indirectly by one or more citizens or nationals of a foreign country on said list.

c. Has not procured any product nor subcontracted for the supply of any product for use on the project that is produced in a foreign country on said list.

Unless the restrictions of this clause are waived by the Secretary of Transportation in accordance with 49 CFR 30.17, no contract shall be awarded to a contractor or subcontractor who is unable to certify to the above. If the Contractor knowingly procures or subcontracts for the supply of any product or service of a foreign country on the said list for use on the project, the Federal Aviation Administration may direct, through the sponsor, cancellation of the contract at no cost to the Government.

Further, the contractor agrees that, if awarded a contract resulting from this solicitation, it will incorporate this provision for certification without modification in each contract and in all lower tier subcontracts. The contractor may rely upon the certification of a prospective subcontractor unless it has knowledge that the certification is erroneous.

The contractor shall provide immediate written notice to the sponsor if the contractor learns that its certification or that of a subcontractor was erroneous when submitted or has become erroneous by reason of changed circumstances. The subcontractor agrees to provide immediate written notice to the contractor, if at any time it learns that its certification was erroneous by reason of changed circumstances.

This certification is a material representation of fact upon which reliance was placed when making the award. If it is later determined that the contractor or subcontractor knowingly rendered an erroneous certification, the Federal Aviation Administration may direct, through the sponsor, cancellation of the contract or subcontract for default at no cost to the Government.

Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the certification required by this provision. The knowledge and information of a contractor is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

This certification concerns a matter within the jurisdiction of an agency of the United States of America and the making of a false, fictitious, or fraudulent certification may render the maker subject to prosecution under Title 18, United States Code, Section 1001.

100-13 SECRETARY OF LABOR REQUIREMENTS.

A(1) Minimum Wages

(i) All laborers and mechanics employed or working upon the site of the work will be paid unconditionally and not less often than once a week, and without subsequent deduction or rebate on any account (except such payroll deductions as are permitted by regulations issued by the Secretary of Labor under the Copeland Act, the full amount of wages and bona fide fringe benefits (or cash equivalents thereof) due at time of payment computed at rates not less than those contained in the wage determination of the Secretary of Labor which is attached hereto and made a part hereof, regardless of any contractual relationship which may be alleged to exist between the contractor and such laborers and mechanics. Contributions made or costs reasonably anticipated for bona fide fringe benefits under section 1(b)(2) of the Davis-Bacon Act on behalf of laborers or mechanics are considered wages to such laborers or mechanics, subject to the provisions of paragraph (a)(1)(iv) of this section; also, regular contributions made or costs incurred for more than a weekly period (but not less often than quarterly) under plans, funds, or programs which cover the particular weekly period are deemed to be constructively made or incurred during such weekly period. Such laborers and mechanics shall be paid the appropriate wage rate and fringe benefits on the wage determination for the classification of work actually performed, without regard to skill, except as provided in subparagraphs 5.5(a)(4). Laborers or mechanics performing work in more than one classification may be compensated at the rate specified for each classification for the time actually worked therein: Provided, that the employers payroll records accurately set forth the time spent in each classification in which the work is performed. The wage determination (including any additional classification and wage rates conformed under paragraph (a)(1)(ii) of this section) and the Davis-Bacon poster (WH-1321) shall be posted at all times by the contractor and its subcontractors at the site of the work in a prominent and accessible place where it can be easily seen by the workers.

(ii)(A) The contracting officer shall require that any class of laborers or mechanics, including helpers, which is not listed in the wage determination and which is to be employed under the contract shall be classified in conformance with the wage determination. The contracting officer shall approve an additional classification and wage rate and fringe benefits therefore only when the following criteria have been met:

(1) Except with respect to helpers as defined in 29 CFR 5.2(n)(4), the work to be performed by the classification requested is not performed by a classification in the wage determination; and

(2) The classification is utilized in the area by the construction industry; and

(3) The proposed wage rate, including any bona fide fringe benefits, bears a reasonable relationship to the wage rates contained in the wage determination; and

(4) With respect to helpers as defined in 29 CFR 5.2(n)(4), such a classification prevails in the area in which the work is performed.

(ii)(B) If the contractor and the laborers and mechanics to be employed in the classification (if known), or their representatives, and the contracting officer agree on the classification and wage rate (including the amount designated for fringe benefits where appropriate), a report of the action taken shall be sent by the contracting officer to the Administrator of the Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, Washington, D.C. 20210. The Administrator, or an authorized representative, will approve, modify, or disapprove every additional classification action within 30 days of receipt and so advise the contracting officer or will notify the contracting officer within the 30-day period that additional time is necessary.

(ii)(C) In the event the contractor, the laborers or mechanics to be employed in the classification or their representatives, and the contracting officer do not agree on the proposed classification and wage rate (including the amount designated for fringe benefits, where appropriate), the contracting officer shall refer the questions, including the views of all interested parties and the recommendation of the contracting officer, to the Administrator for determination. The Administrator, or an authorized representative, will issue a determination within 30 days of receipt and so advise the contracting officer within the 30-day period that additional time is necessary.

(ii)(D) The wage rate (including fringe benefits where appropriate) determined pursuant to subparagraphs (1)(B) or (C) of this paragraph shall be paid to all workers performing work in the classification under this contract from the first day on which work is performed in the classification.

(iii) Whenever the minimum wage rate prescribed in the

contract for a class of laborers or mechanics includes a fringe benefit which is not expressed as an hourly rate, the contractor shall either pay the benefit as stated in the wage determination or shall pay another bona fide fringe benefit or an hourly cash equivalent thereof.

(iv) If the contractor does not make payments to a trustee or other third person, the contractor may consider as part of the wages of any laborer or mechanic the amount of any costs reasonably anticipated in providing bona fide fringe benefits under a plan or program, Provided, that the Secretary of Labor has found, upon the written request of the contractor, that the applicable standards of the Davis-Bacon Act have been met. The Secretary of Labor may require the contractor to set aside in a separate account assets for the meeting of obligations under the plan or program.

A(2) Withholding. The Federal Aviation Administration shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld from the contractor under this contract or any other Federal contract with the same prime contractor, or any other federally assisted contract subject to Davis-Bacon prevailing wage requirements, which is held by the same prime contractor, so much of the accrued payments or advances as may be considered necessary to pay laborers and mechanics, including apprentices, trainees, and helpers employed by the contractor or any subcontractor for the full amount of wages required by the contracts. In the event of failure to pay any laborer or mechanic, including any apprentice, trainee, or helper, employed or working on the site of the work all or part of the wages required by the contract, the Federal Aviation Administration may, after written notice to the contractor, sponsor, applicant, or owner, take such action as may be necessary to cause the suspension of any further payment, advance, or guarantee of funds until such violations have ceased.

A(3) Payrolls and Basic Records.

(i) Payrolls and basic records relating thereto shall be maintained by the contractor during the course of the work and preserved for a period of three years thereafter for all laborers and mechanics working at the site of the work. Such records shall contain the name, address, and social security number of each such worker, his or her correct classification, hourly rates of wages paid (including rates of contributions or costs anticipated for bona fide fringe benefits or cash equivalents thereof of the types described in section 1(b)(2)(B) of the Davis-Bacon Act), daily and weekly number of hours worked, deductions made and actual wages paid. Whenever the Secretary of Labor

has found under 29 CFR 5.5(a)(1)(iv) that the wages of any laborer or mechanic include the amount of any costs reasonably anticipated in providing benefits under a plan or program described in section 1(b)(2)(CB) of the Davis-Bacon Act, the contractor shall maintain records which show that the commitment to provide such benefits is enforceable, that the plan or program is financially responsible, and that the plan or program has been communicated in writing to the laborers or mechanics affected, and records which show the costs anticipated or the actual cost incurred in providing such benefits. Contractors employing apprentices or trainees under approved programs shall maintain written evidence of the registration of apprenticeship programs and certification of trainee programs, the registration of the apprentices and trainees, and the ratios and wage rates prescribed in the applicable programs.

(ii)(A) The contractor shall submit weekly for each week in which any contract work is performed a copy of all payrolls to the (Sponsor's Name). The payrolls submitted shall set out accurately and completely all of the information required to be maintained under subparagraph 5.5(a)(J)(i) of Regulations, 29 CFR Part 5. This information may be submitted in any form desired. Optional Form WH-347 is available for this purpose and may be purchased from the Superintendent of Documents (Federal Stock Number 029-005-00014-1), U.S. Government Printing Office, Washington, D.C. 20402. The prime contractor is responsible for the submission of copies of payrolls by all subcontractors.

(ii)(B) Each payroll submitted shall be accompanied by a "Statement of Compliance" signed by the contractor or subcontractor or his or her agent who pays or supervises the payment of the persons employed under the contract and shall certify the following:

(1) That the payroll for the payroll period contains the information required to be maintained under subparagraph 5.5(2)(3)(i) of Regulations, 29 CFR Part 5 and that such information is correct and complete;

(2) That each laborer or mechanic (including each helper, apprentice, and trainee) employed on the contract during the payroll period had been paid the full weekly wages earned, without rebate, either directly or indirectly, and that no deductions have been made either directly or indirectly from the full wages earned, other than permissible deductions as set forth in Regulations, 29 CFR Part 3;

(3) That each laborer or mechanic has been paid not

less than the applicable wage rates and fringe benefits or case equivalents for the classification of work performed, as specified in the applicable wage determination.

(ii)(C) The weekly submission of a properly executed certification set forth on the reverse side of Optional Form WH-347 shall satisfy the requirement for submission of the "Statement of Compliance required by paragraph (a)(3)(ii)(B) of this section.

(ii)(D) The falsification of any of the above certifications may subject the contractor or subcontractor to civil or criminal prosecution under Section 1001 of the United States Code.

(iii) The contractor or subcontractor shall make the records required under paragraph (a)(3)(i) of this section available for inspection, copying or transcription by authorized representatives of the Department of Transportation, Federal Aviation Administration, or the Department of Labor, and shall permit such representatives to interview employees during working hours on the job. If the contractor or subcontractor fails to submit the required records or to make them available, the Federal Aviation Administration may, after written notice to the contractor, sponsor, or owner, take such action as may be necessary to cause the suspension of any further payment, advance, or guarantee of funds. Furthermore, failure to submit the required records upon request or to make such records available may be grounds for debarment action pursuant to 29 CFR 5.12.

A(4) Apprentices, Trainees and Helpers.

(i) Apprentices will be permitted to work at less than the predetermined rate for the work they perform when they are employed pursuant to and individually registered in a bona fide apprenticeship program registered with the U.S. Department of Labor, Employment and Training Administration, Bureau of Apprenticeship and Training, or with a State Apprenticeship Agency recognized by the Bureau, or if a person is employed in his or her first 90 days of probationary employment as an apprentice in such an apprenticeship program, who is not individually registered in the program, but who has been certified by the Bureau of Apprenticeship and Training or a State Apprenticeship Agency (where appropriate) to be eligible for probationary employment as an apprentice. The allowable ratio of apprentices to journeymen on the job site in any craft classification shall not be greater than the ratio permitted to the contractor as to the entire work force under the

registered program. Any worker listed on a payroll at an apprentice wage rate, who is not registered or otherwise employed as stated above, shall be paid not less than the applicable wage rate on the wage determination for the classification of work actually performed. In addition, any apprentice performing work on the job site in excess of the ratio permitted under the registered program shall be paid not less than the applicable wage rate on the wage determination for the work actually performed. Where a contractor is performing construction on a project in a locality other than that in which its program is registered, the ratios and wage rates (expressed in percentages of the journeyman's hourly rate) specified in the contractor's or subcontractor's registered program shall be observed. Every apprentice must be paid at not less than the rate specified in the registered program for the apprentice's level of progress, expressed as a percentage of the journeyman hourly rate specified in the applicable wage determination.

Apprentices shall be paid fringe benefits in accordance with the provisions of the apprenticeship program. If the apprenticeship program does not specify fringe benefits, apprentices must be paid the full amount of fringe benefits listed on the wage determination for applicable classification. If the Administrator determines that a different practice prevails for the applicable apprentice classification, fringes shall be paid in accordance with that determination.

In the event the Bureau of Apprenticeship and Training or a State Apprenticeship Agency recognized by the Bureau, withdraws approval, the contractor will no longer be permitted to utilize apprentices at less than the applicable predetermined rate for the work performed until an acceptable program is approved.

(ii) Trainees, except as provided in 29 CFR 5:16, will not be permitted to work at less than the predetermined rate for the work performed unless they are employed pursuant to and individually registered in a program which has received prior approval, evidenced by formal certification by the U.S. Department of Labor, Employment and Training Administration. The ratio of trainees to journeymen on the job site shall not be greater than permitted under the plan approved by the Employment and Training Administration. Every trainee must be paid at not less than the rate specified in the approved program for the trainee's level of progress, expressed as a percentage of the journeyman hourly rate specified in the applicable wage determination. Trainees shall be paid fringe benefits in accordance with the provisions of the trainee program. If the trainee program does not mention fringe benefits, trainees shall be

paid the full amount of fringe benefits listed on the wage determination unless the Administrator of the Wage and Hour Division determines that there is an apprenticeship program associated with the corresponding journeyman wage rate on the wage determination which provides for less than full fringe benefits for apprentices. Any employee listed on the payroll at a trainee rate who is not registered and participating in a training plan approved by the Employment and Training Administration shall be paid not less than the applicable wage rate on the wage determination for the classification of work actually performed. In addition, any trainee performing work on the job site in excess of the ratio permitted under the registered program shall be paid not less than the applicable wage rate on the wage determination for the work actually performed. In the event the Employment and Training Administration withdraws approval of a training program, the contractor will no longer be permitted to utilize trainees at less than the applicable predetermined rate for the work performed until an acceptable program is approved.

(iii) Equal employment opportunity. The utilization of apprentices, trainees and journeymen under this part shall be in conformity with the equal employment opportunity requirements of Executive Order 11246, as amended, and 29 CFR Part 10.

(iv) Helpers. Helpers will be permitted to work on a project if the helper classification is specified on an applicable wage determination or is approved pursuant to the conformance procedure set forth in subparagraph 5.5(a)(1)(ii). The allowable ratio of helpers to journeymen employed by the contractor or subcontractor on the job site shall not be greater than two helpers for every three journeymen (in other words, not more than 40 percent of the total number of journeymen and helpers in each contractor's or in each subcontractor's own work force employed on the job site). Any worker listed on a payroll at a helper wage rate, who is not a helper as defined in 29 CFR 2.5(n)(4), shall be paid not less than the applicable wage rate on the wage determination for classification of work actually performed. In addition, any helper performing work on the job site in excess of the ratio permitted shall be paid not less than the applicable journeyman's (or laborer's, where appropriate) wage rate on the wage determination for the work actually performed.

A(5) Compliance with Copeland Act Requirements. The contractor shall comply with the requirements of 29 CFR Part 3, which are incorporated by reference in this contract.

A(6) Subcontracts. The contractor or subcontractor shall

insert in any subcontracts the clauses contained in 29 CFR 5.5(a)(1) through (10) and such other clauses as the Federal Aviation Administration may by appropriate instructions require, and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for the compliance by any subcontractor or lower tier subcontractor with all the contract clauses in 29 CFR 5.5.

A(7) Contract Termination: debarment. A breach of the contract clauses in 29 CFR 5.5 may be grounds for termination of the contract, and for debarment as a contractor and a subcontractor as provided in 29 CFR 5.12.

A(8) Compliance with Davis-Bacon and Related Act Requirements. All rulings and interpretations of the Davis-Bacon and related acts contained in 29 CFR Parts 1, 3, and 5 are herein incorporated by reference in this contract.

A(9) Disputes Concerning Labor Standards: Disputes arising out of the labor standards provisions of this contract shall not be subject to the general disputes clause of this contract. Such disputes shall be resolved in accordance with the procedures of the Department of Labor set forth in 29 CFR Parts 5, 6, and 7. Disputes within the meaning of this clause include disputes between the contractor (or any of its subcontractors) and the contracting agency, the U.S. Department of Labor, or the employees or their representatives.

A(10) Certification of Eligibility.

(i) By entering into this contract, the contractor certifies that neither it (nor he or she) nor any person or firm who has an interest in the contractor's firm is a person or firm ineligible to be awarded Government contracts by virtue of Section 3(a) of the Davis-Bacon Act or 29 CFR 5.12(A)(1).

(ii) No part of this contract shall be subcontracted to any person or firm ineligible for award of a Government contract by virtue of section 3(a) of the Davis-Bacon Act or 29 CFR 5.12(a)(1).

(iii) The penalty for making false statements is prescribed in the U.S. Criminal Code, 18 U.S.C. 1001.

See Certification Form Next Page

CONTRACTOR'S CERTIFICATION OF ELIGIBILITY

The bidder certifies, by submission of this proposal or acceptance of this contract, that neither it nor its principals is presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency. It further agrees by submitting this bid that it will include this clause without modification in all lower tier transactions, solicitations, bids, proposals, contracts, and subcontracts. Where the bidder/offer/contractor or any lower tier participant is unable to certify to this statement, it shall attach an explanation to this solicitation/proposal.

That, the information above is true and complete to the best of my knowledge.

Name and Title (please print)

Signature

Date

NOTE: The penalty for making false statements in offers is prescribed in 18 U.S.C. 1001

B(1) Contract Work Hours and Safety Standards Act.

(i) Overtime Requirements. No contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any such laborer or mechanic in any workweek in which he or she is employed on such work to work in excess of forty hours in such workweek unless such laborer or mechanic receives compensation at a rate not less than one and one-half times the basic rate of pay for all hours worked in excess of forty hours in such workweek.

(ii) Violation; Liability for unpaid wages; liquidated damages. In the event of any violation of the clause set forth in subparagraph (i) of this clause, the contractor and any subcontractor responsible therefore shall be liable for the unpaid wages. In addition, such contractor and subcontractor shall be liable to the United States (in the case of work done under contract for the District of Columbia or a territory, to such District or to such territory) for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer or mechanic, including watchmen and guards, employed in violation of the clause set forth in subparagraph (i) of this paragraph, in the sum of \$10 for each calendar day for which such individual was required or permitted to work in excess of the standard workweek of forty hours without payment of overtime wages required by the clause set forth in subparagraph (i) of this clause.

(iii) Withholding for unpaid wages and liquidated damages. The (Sponsor's Name) shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld, from any moneys payable on account of work performed by the contractor or subcontractor under any such contract or any other Federal contract with the same prime contractor, or any other federally assisted contract subject to the Contract Work Hours and Safety Standards Act, which is held by the same prime contractor, such sums as may be determined to be necessary to satisfy any liabilities of such contractor or subcontractor for unpaid wages and liquidated damages as provided in the clause set forth in subparagraph (ii) of this paragraph.

(iv) Subcontracts. The contractor or subcontractor shall insert in any subcontracts the clauses set forth in subparagraph (i) through (iv) of this paragraph and also a clause requiring the subcontractors to include these clauses in any lower tier contracts. The prime contractor shall be responsible for compliance by any subcontractor or lower

tier subcontractor with the clauses set forth in subparagraphs (i) through (iv) of this paragraph.

B(2) Contracts subject only to Contract Work Hours and Safety Standards Act.

(i) The contractor or subcontractor shall maintain payrolls and basic payroll records during the course of the work and shall preserve them for a period of three years from the completion of the contract for all laborers and mechanics, including guards and watchmen, working on the contract. Such records shall contain the name and address of each such employee, social security number, correct classifications, hourly rates of wages paid, daily and weekly number of hours worked, deductions made, and actual wages paid.

(ii) The records to be maintained under paragraph (i) above shall be made available by the contractor or subcontractor for inspection, copying, or transcription by authorized representatives of the Department of Transportation, Federal Aviation Administration and the Department of Labor, and the contractor or subcontractor will permit such representatives to interview employees during working hours on the job.

100-14 BUY AMERICAN - STEEL AND MANUFACTURED PRODUCTS FOR CONSTRUCTION CONTRACTS (JAN 1991).

A. The Aviation Safety and Capacity Expansion Act of 1990 provides that preference be given to steel and manufactured products produced in the United States when funds are expended pursuant to a grant issued under the Airport Improvement Program. The following terms apply:

1. Steel and manufactured products. As used in this clause, steel and manufactured products include (1) steel produced in the United States or (2) a manufactured product produced in the United States, if the cost of its components mined, produced or manufactured in the United States exceeds 60 percent of the cost of all its components and final assembly has taken place in the United States. Components of foreign origin of the same class or kind as the products referred to in subparagraphs B.1 or B.2 shall be treated as domestic.

2. Components. As used in this clause, components means those articles, materials, and supplies incorporated directly into steel and manufactured products.

J. Cost of Components. This means the costs for production of the components, exclusive of final assembly labor costs.

B. The successful bidder will be required to assure that only domestic steel manufactured products will be used by the Contractor, subcontractors, materialmen, and suppliers in the performance of this contract, except those:

1. That the U.S. Department of Transportation has determined, under the Aviation Safety and Capacity Expansion Act of 1990, are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality;

2. That the U.S. Department of Transportation has determined, under the Aviation Safety and Capacity Expansion Act of 1990, that domestic preference would be inconsistent with the public interest; or

3. That inclusion of domestic material will increase the cost of the overall project contract by more than 25 percent.

C. The Contractor shall deliver only domestic steel and manufactured products under this contract as defined below:

1. Steel and manufactured products. As used in this clause, steel and manufactured products include (1) those produced in the United States or (2) a manufactured product produced in the United States, if the cost of its components mined, produced or manufactured in the United States exceeds 60 percent of the cost of all its components and final assembly has taken place in the United States.

2. Components. As used in this clause, components means those articles, materials, and supplies incorporated directly into steel and manufactured products.

3. Cost of Components. This means the costs for production of the components, exclusive of final assembly labor costs.

D. The Contractor agrees that only domestic steel and manufactured products will be used by the Contractor, subcontractors, materialmen, and suppliers in the performance of this contract, as defined below:

1. Steel and manufactured products. As used in this clause, steel and manufactured products include (1)

those produced in the United States or (2) a manufactured product produced in the United States, if the cost of its components mined, produced or manufactured in the United States exceeds 60 percent of the cost of all its components and final assembly has taken place in the United States.

2. Components. As used in this clause, components means those articles, materials, and supplies incorporated directly into steel and manufactured products.

3. Cost of components. This means the costs of production of the components, exclusive of final assembly labor costs.

E. List of Supplies/Materials that the U.S. Government Has Determined Are Not Produced In the United States In Sufficient and Reasonably Available Quantities And of Sufficient Quality (Jan. 1991)

Acetylene, black.	Diamonds, industrial, stones and abrasives.
Agar, bulk.	Emetine, bulk.
Anise.	Ergot, crude.
Antimony, as metal or oxide.	Erthrityl tetranitrate.
Asbestos, amosite, chrysolite, and crocidolite.	Fair linen, altar.
Bananas.	Fibers of the following types: abaca, abace, agave, coir, flax, jute, jute burlaps, palmyra and sisal.
Bauxite.	Goat and kidskins.
Beef, corned, canned.	Graphic, natural, crystalline, crucible grade.
Beef extract.	Handsewing needles.
Bephenium Hydroxynapthoate.	Hemp yarn.
Bismuth.	Hog bristles for brushes.
Books, trade, text, technical, or scientific; newspapers, pamphlets; magazines; periodicals; printed briefs and films; not printed in the United States and for which domestics editions are not available.	Hyoscine, bulk.
Brazil nuts, unroasted.	Ipecac, root.
Cadmium, ores and flue dust.	Iodine, crude.
Calcium Cyanamide.	Kaurigum.
Capers.	Lac.
Cashew nuts.	Leather, sheepskin, hair type.
Castor beans and castor oil.	Lavender oil.
	Manganese.
	Menthol, natural bulk.
	Mica.

Chalk, English
 Chestnuts.
 Chicle.
 Chrome ore or chromite.
 Cinchona bark.
 Cobalt, in cathodes,
 rondelles, or other primary
 ore and metal forms.
 Cocoa beans.
 Coconut and coconut meat,
 unsweetened, in shredded
 desiccated or similarly
 prepared form.
 Coffee, raw or green bean.
 Colchicine alkaloid, raw.
 Copra.
 Cork, wood or bark and waste.
 Cover glass, microscope
 slide.
 Cryolite, natural.
 Dammar gum.

Olives (green), pitted or
 unpitted, or stuffed, in
 bulk.
 Opium, crude.
 Oranges, mandarin; canned
 Petroleum, crude oil,
 unfinished oils, and finished
 products (see definitions
 below)
 Pine needle oil.
 Platinum and related group
 metals, refined, as sponge,
 powder, ingots, or cast
 bars.
 Pyrethrum flowers.
 Quartz crystals.
 Quebracho.
 Quinidine.
 Quinine.
 Rabbit fur felt.
 Radium salts, source and
 special nuclear materials.
 Rosettes.
 Rubber, crude and latex.
 Rutile.
 Santonin, crude.
 Secretin.
 Shellac.
 Silk, raw and unmanufactured.

Microprocessor chips (brought
 onto a construction site as
 separate units for
 incorporation into building
 systems during construction
 or repair and alteration of
 real property.)
 Nickel, primary, in ingots,
 pigs, shots, cathodes, or
 similar forms; nickel oxide
 and nickel salts.
 Nitroguanidine (also known as
 picrite).
 Nux vomica crude.
 Oiticica o l.
 Olive oil.

Tungsten.
 Vanilla beans.
 Venom, cobra.
 Wax, canauba.
 Woods; logs, veneer, and
 lumber of the following
 species: Alaskan yellow
 cedar, angelique, balsa,
 ekki, greenhart, lignum
 vitae, mahogany, and teak.
 Yarn, 50 Denier rayon.

Spare and replacement parts for equipment of foreign manufacture, and for which domestic parts are not available.

Spices and herbs, in bulk.

Sugars, raw.

Swords and scabbards.

Talc, block, steatite.

Tantalum.

Tapioca flour and cassava.

Tartar, crude; tartaric acid and cream of tartar in bulk.

Tea in bulk.

Thread, metallic (gold).

Thyme oil.

Tin in bars, blocks, and pigs.

Tripolidine hydrochloride.

Petroleum terms are used as follows:

"Crude oil" means crude petroleum, as it is produced at the wellhead, and liquids (under atmospheric conditions) that have been recovered from mixtures of hydrocarbons that existed in a vaporous phase in a reservoir and that are not natural gas products.

"Finished products" means any one or more of the following petroleum oils, or a mixture or combination of these oils, to be used without further processing except blending by mechanical means:

(A) "Asphalt" - a solid or semi-solid cementitious material that (1) gradually liquefies when heated, (2) has bitumens as its predominating constituents, and (3) is obtained in refining crude oil.

(B) "Fuel oil" - a liquid or liquefiable petroleum product burned for lighting or for the generation of heat or power and derived directly or indirectly from crude oil, such as kerosene, range oil, distillate fuel oils, gas oil, diesel fuel, topped crude oil, or residues.

(C) "Gasoline" - a refined petroleum distillate that, by its consumption, is suitable for use as a carburant in internal combustion engines.

(D) "Jet fuel" - a refined petroleum distillate used to fuel jet propulsion engines.

(E) "Liquefied gases" - hydrocarbon gases recovered from natural gas or produced from petroleum refining and kept under pressure to maintain a liquid state at ambient temperatures.

(F) "Lubricating oil" - a refined petroleum distillate or specially treated petroleum residue used to lessen friction between surfaces.

(G) "Naphtha" - a refined petroleum distillate falling within a distillation range overlapping the higher gasoline and the lower kerosenes.

(H) "Natural gas products" - liquids (under atmospheric conditions) including natural gasoline, that -

(1) are recovered by a process of absorption, adsorption, compression, refrigeration, cycling, or a combination of these processes, from mixtures of hydrocarbons that existed in a vaporous phase in a reservoir, and

(2) when recovered and without processing in a refinery, definitions of products contained in subdivision (B), (C), and (G) above.

(I) "Residual fuel oil" - a topped crude oil or viscous residuum that, as obtained in refining or after blending with other fuel oil, meets or is the equivalent of MILSPEC Mil-F-859 for Navy Special Fuel Oil and any more viscous fuel oil, such as No. 5 or Bunker C.

"Unfinished Oils" means one or more of the petroleum oils listed under "Finished products" above, or a mixture or combination of these oils, that are to be further processed other than by blending by mechanical means.

BUY AMERICAN CERTIFICATE (JAN 1991)

By submitting a bid under this solicitation, except for those items listed by the offeror below or on a separate and clearly identified attachment to this bid, the offeror certifies that steel and each manufactured product, is produced in the United States (as defined in the clause Buy American - Steel and Manufactured Products or Buy American - Steel and Manufactured Products for Construction Contracts) and that components of unknown origin are considered to have been produced or manufactured outside the United States.

Lists of articles, materials, and supplies excepted from this provision are included in Section 100-14 E.

[Docket OST-97-2550; Notice 97-5]

RIN 2105-AB92

Participation by Disadvantaged Business Enterprises in Department of Transportation Programs**AGENCY:** Office of the Secretary, DOT.**ACTION:** Final rule.

SUMMARY: This final rule revises the Department of Transportation's regulations for its disadvantaged business enterprise (DBE) program. The DBE program is intended to remedy past and current discrimination against disadvantaged business enterprises, ensure a "level playing field" and foster equal opportunity in DOT-assisted contracts, improve the flexibility and efficiency of the DBE program, and reduce burdens on small businesses. This final rule replaces the former DBE regulation, which now contains only the rules for the separate DBE program for airport concessions, with a new regulation. The new regulation reflects President Clinton's policy to mend, not end, affirmative action programs. It modifies the Department's DBE program in light of developments in case law requiring "narrow tailoring" of such programs and last year's Congressional debate concerning the continuation of the DBE program. It responds to comments on the Department's December 1992 notice of proposed rulemaking (NPRM) and its May 1997 supplemental notice of proposed rulemaking (SNPRM).

DATES: This rule is effective March 4, 1999. Comments on Paperwork Reduction Act matters should be received by April 5, 1999; however, late-filed comments will be considered to the extent practicable.

ADDRESSES: Persons wishing to comment on Paperwork Reduction Act matters (see discussion at end of preamble) should send comments to Docket Clerk, Docket No. OST-97-2550, Department of Transportation, 400 7th Street, SW., Room 4107, Washington, DC 20590. We emphasize that the docket is open only with respect to Paperwork Reduction Act matters, and the Department is not accepting comments on other aspects of the regulation. We request that, in order to minimize burdens on the docket clerk's staff, commenters send three copies of their comments to the docket. Commenters wishing to have their

submissions acknowledged should include a stamped, self-addressed postcard with their comments. The docket clerk will date stamp the postcard and return it to the commenter. Comments will be available for inspection at the above address from 10 a.m. to 5:00 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Robert C. Ashby, Deputy Assistant General Counsel for Regulation and Enforcement, Department of Transportation, 400 7th Street, SW., Room 10424, Washington, DC 20590, phone numbers (202) 366-9306 (voice), (202) 366-9313 (fax), (202) 755-7687 (TDD), bob.ashby@ost.dot.gov (email); or David J. Goldberg, Office of Environmental, Civil Rights and General Law, Department of Transportation, 400 7th Street, SW., Room 5432, Washington, DC 20590, phone number (202) 366-8023 (voice), (202) 366-8536 (fax).

SUPPLEMENTARY INFORMATION:**Background**

The Department has the important responsibility of ensuring that firms competing for DOT-assisted contracts are not disadvantaged by unlawful discrimination. For eighteen years, the Department's most important tool for meeting this responsibility has been its Disadvantaged Business Enterprise (DBE) program. This program began in 1980. Originally, the program was a minority/women's business enterprise program established by regulation under the authority of Title VI of the Civil Rights Act of 1964 and other nondiscrimination statutes that apply to DOT financial assistance programs. See 49 CFR part 23.

In 1983, Congress enacted, and President Reagan signed, the first statutory DBE provision. This statute applied primarily to small firms owned and controlled by minorities in the Department's highway and transit programs. Firms owned and controlled by women, and the Department's airport program, remained under the original 1980 regulatory provisions. In 1987, Congress enacted, and President Reagan signed, statutes expanding the program to airports and to women-owned firms. In 1991 (for highway and transit programs) and 1992 (for airport programs), Congress enacted, and President Bush signed, statutes reauthorizing the expanded DBE program.

After each statutory amendment, and at other times to resolve program issues, the Department amended part 23. The result has been that part 23 has become

a patchwork quilt of a regulation. In addition, years of interpretation by various grantees and different DOT offices has created confusion and inconsistency in program administration. These problems, particularly in the area of certification, were criticized in General Accounting Office reports. The Department's desire to improve program administration and make the rule a more unified whole led to our publication of a December 1992 notice of proposed rulemaking (NPRM).

The Department received about 600 comments on this NPRM. The Department carefully reviewed these comments and, by early 1995, had prepared a draft final rule responding to them. However, in light of the Supreme Court's June 1995 decision in *Adarand v. Peña* and the Administration's review of affirmative action programs, the Department conducted further review of the DBE program. As a result, rather than issuing a final rule, we issued a supplemental notice of proposed rulemaking (SNPRM) in May 1997. This SNPRM incorporated responses to the comments on the 1992 NPRM and proposed further changes in the program, primarily in response to the "narrow tailoring" requirements of *Adarand*. We received about 300 comments on the SNPRM. The Department has carefully considered these comments, and the final rule responds to them. The final rule also specifically complies with the requirements that the courts have established for a narrowly tailored affirmative action program.

At the same time that the Department was working on this final rule, Congress once again considered reauthorization of the DBE program. In both the House and the Senate, opponents of affirmative action sponsored amendments that would have effectively ended the program. In both cases, bipartisan majorities defeated the amendments. The final highway/transit authorization legislation, known as the Transportation Equity Act for the 21st Century (TEA-21), retains the DBE program. In shaping this final rule, the Department has listened carefully to what both supporters and opponents of the program have said in Congressional debates.

Key Points of the Final Rule

This discussion reviews and responds to the SNPRM comments and the Congressional debates on certain key issues. Congressional debate references are to the *Congressional Record* for March 5 and 6, 1998, for the Senate debate and April 1, 1998, for the House debate, unless otherwise noted.

1. Quotas and Set-Asides

SNPRM Comments: Most comments on this issue came from non-DBE contractors, who argued that the program was a *de facto* quota program. Many of these contractors said that recipients insisted that they meet numerical goals regardless of other considerations, and that the recipients did not take showings of good faith efforts seriously. Some non-DBE contractor organizations argued, in addition, that the program was a quota program because it was based on a statute that had a 10 percent target for the use of businesses defined by a racial classification.

Congressional Debate: Opponents of the DBE program generally asserted that it created quotas or set-asides. Senator McConnell described the entire program, particularly the provision that "not less than 10 percent" of authorized funds go to DBEs, as

* * * a \$17.3 billion quota. In other words, if the government decides that you are the preferred race and gender, then you are able to compete for \$17.3 billion of taxpayer-funded highway contracts. But, if you are the wrong race and gender, then—too bad—you can't compete for that \$17 billion pot. (S1936).

The "not less than 10 percent" language also led opponents, such as Senator Ashcroft, to label the program a "set-aside," (S1405), a term also employed in testimony provided by a law professor from California who said that the statute "imposes a set-aside that's required regardless of the availability of race-neutral solutions." (S1407). Senator Gorton said that the DBE statute provides that "those not defined as disadvantaged in our society are absolutely barred and prohibited from getting certain governmental contracts." (S1415).

On the other hand, supporters of the program were adamant that it was not a quota program. Senator Baucus argued that the program, as implemented by DOT, allows substantial flexibility to recipients and contractors. Recipients could have an overall goal other than 10 percent under current rules, he pointed out. Senator Kerry of Massachusetts added that what the statute does is to "set a national goal. And it is appropriate in this country to set national goals for what we will do to try to break down the walls of discrimination." * * * (S1408). He also alluded to the flexibility of the Secretary to permit overall goals of less than 10 percent. Senator Robb stated:

I want to stress at the outset that this program is not a "quota program," as some have suggested. There is a great difference

[between] an aspirational goal and a rigid numerical requirement. Quotas utilize rigid numerical requirements as a means of implementing a program. The DBE program uses aspirational goals. (S1425).

With respect to individual contract goals, Senator Baucus said, "once a goal is established for a contract, each contractor must make a good-faith effort to meet the goal—not mathematically required, not quota required, but a good faith effort to meet it." (S1402). Senator Baucus pointed to provisions of the SNPRM concerning overall goals, means of meeting them, and good-faith efforts as further narrowly tailoring the program. The SNPRM confirms, he said, that "contract goals are not binding. If a contractor makes good faith efforts to find qualified women or minority-owned subcontractors, but fails to meet the goal, there is no penalty." (S1403). Senator Robb added that "Contract goals are not operated as quotas because they require that the prime contractor make 'good faith efforts' to find DBEs. If a prime contractor cannot find qualified and competitive DBEs, the goal can be waived." (S1425).

One of the Senators who addressed the quota/set-aside issue in the most detail was Senator Domenici. He concluded that "I do not agree that this minority business program we have in this ISTEA bill before us is a program that mandates quotas and mandates set-asides." (S1426). He made this statement, in part, on the basis of March 5, 1998, letter to him signed by Secretary of Transportation Rodney Slater and Attorney General Janet Reno. In relevant part, this letter (which Senator Domenici inserted into the record) read as follows:

The 10 percent figure contained in the statute is not a mandatory set aside or rigid quota. First, the statute explicitly provides that the Secretary of Transportation may waive the goal for any reason * * * Second, in no way is the 10 percent figure imposed on any state or locality * * * Moreover, state agencies are permitted to waive goals when achievement on a particular contract or even for a specific year is not possible. The DBE program does not set aside a certain percentage of contracts or dollars for a specific set of contractors. Nor does the DBE program require recipients to use set-asides. The DBE program is a goals program which encourages participation without imposing rigid requirements of any type. Neither the Department's current nor proposed regulations permit the use of quotas. The DBE program does not use any rigid numerical requirements that would mandate a fixed number of dollars or contracts for DBEs. (S1427).

The debate in the House proceeded in similar terms. Opponents of the DBE program, such as Representative

Roukema (H2000), Representative Cox (H2004) and Speaker Gingrich (H2009) said the legislation constituted a quota, while proponents, such as Representatives Tauscher (H2001), Poshard (H2003), Bontor (H2004) and Menendez (H2004) said the program did not involve quotas or set-asides.

DOT Response: The DOT DBE program is not a quota or set-aside program, and it is not intended to operate as one. To make this point unmistakably clear, the Department has added explicitly worded new or amended provisions to the rule.

Section 26.41 makes clear that the 10 percent statutory goal contained in ISTEA and TEA-21 is an aspirational goal at the national level. It does not set any funds aside for any person or group. It does not require any recipient or contractor to have 10 percent (or any other percentage) DBE goals or participation. Unlike former part 23, it does not require recipients to take any special administrative steps (e.g., providing a special justification to DOT) if their annual overall goal is less than 10 percent. Recipients must set goals consistent with their own circumstances (see § 26.45). There is no direct link between the national 10 percent aspirational goal and the way a recipient operates its program. The Department will use the 10 percent goal as a means of evaluating the overall performance of the DBE program nationwide. For example, if nationwide DBE participation were to drop precipitously, the Department would reevaluate its efforts to ensure nondiscriminatory access to DOT-assisted contracting opportunities.

Section 26.43 states flatly that recipients are prohibited from using quotas under any circumstances. The section also prohibits set-asides except in the most extreme circumstances where no other approach could be expected to redress egregious discrimination. Section 26.45 makes clear that in setting overall goals, recipients aspire to achieving only the amount of DBE participation that would be obtained in a nondiscriminatory market. Recipients are not to simply pick a number representing a policy objective or responding to any particular constituency.

Section 26.53 also outlines what bidders must do to be responsive and responsible on DOT-assisted contracts having contract goals. They must make good faith efforts to meet these goals. Bidders can meet this requirement either by having enough DBE participation to meet the goal or by documenting good faith efforts, even if those efforts did not actually achieve the

goal. These means of meeting contract goal requirements are fully equivalent. Recipients are prohibited from denying a contract to a bidder simply because it did not obtain enough DBE participation to meet the goal. Recipients must seriously consider bidders' documentation of good faith efforts. To make certain that bidders' showings are taken seriously, the rule requires recipients to offer administrative reconsideration to bidders whose good faith efforts showings are initially rejected.

These provisions leave no room for doubt: there is no place for quotas in the DOT DBE program. In the Department's oversight, we will take care to ensure that recipients implement the program consistent with the intent of Congress and these regulatory prohibitions.

2. Sanctions for Recipients Who Fail To Meet Overall Goals

SNPRM Comments: The issue of sanctions for recipients who fail to meet overall goals was not a subject of comments on the SNPRM. Since the Department has never imposed such sanctions, this absence of comment is not surprising.

Congressional Debate: DBE program opponents asserted, in connection with their argument that the DBE program is a quota program, that the Department could impose sanctions for failure to meet goals. "The goals have requirements and the real threat of sanctions," Senator McConnell said. (S1488). Citing a provision of a Federal Highway Administration (FHWA) manual saying that if "a state has violated or failed to comply with Federal laws or * * * regulations," FHWA could withhold Federal funding, Senator McConnell said.

In other words, there are sanctions. The same threats appear in * * * the Federal transportation regulations * * *. When the Federal government is wielding that kind of weapon from on high, it does not have to punish them. A 10 percent quota is still a quota, even if the States always comply and no one is formally punished. (Id.)

Defenders of the DBE program pointed out that the Department had never punished a recipient for failing to meet an overall goal (e.g., Rep. Tauscher, H2001; Senator Boxer, S1433). Senator Domenici asked Secretary Slater and Attorney General Reno whether there are sanctions, penalties, or fines that may be (or ever have been) imposed on a recipient who does not meet DBE program goals. He entered the following reply in the record:

No state has ever been sanctioned by DOT for not meeting its goals. Nothing in the

statute or regulations imposes sanctions on any state recipient that has attempted in good faith, but failed, to meet its self-imposed goals. (S1427).

Senator Lieberman added that if states fail to meet their own goals, "there is no Federal sanction or enforcement mechanism." (S1493).

DOT Response: The Department has never sanctioned a recipient for failing to meet an overall goal. We do not intend to do so. To eliminate any confusion, we have added a new provision (§ 26.47) that explicitly states that a recipient cannot be penalized, or treated by the Department as being in noncompliance with the rule, simply because its DBE participation falls short of its overall goal. For example, if a recipient's overall goal is 12 percent, and its participation is 8 percent, the Department cannot and will not penalize the recipient simply because its actual DBE participation rate was less than its goal.

Overall goals are not quotas, and the Department does not sanction recipients because their participation levels fall short of their overall goals. Of course, if a recipient does not have a DBE program, does not set a DBE goal, does not implement its DBE program in good faith, or discriminates in the way it operates its program, it can be found in noncompliance. But its noncompliance would never be having failed to "make a number."

3. Economic Disadvantage

SNPRM Comments: Some commenters favored eliminating the presumption of economic disadvantage, saying that applicants should have to prove their economic disadvantage. Other commenters favored obtaining additional financial information from applicants so that, even if the presumption remained in force, recipients would have a better idea of whether applicants really were disadvantaged. The question of the standard for determining disadvantage generated substantial comment, with some commenters favoring, and others objecting to, the proposed use of a personal net worth standard to assist recipients in determining whether an applicant was economically disadvantaged. There was also disagreement among commenters concerning the level at which such a standard should be set (e.g., \$750,000, or something higher or lower). These comments, and the Department's response to them, are further discussed in the section-by-section analysis for § 26.67.

Congressional Debate: The Congress debated the topic of who is regarded as

economically disadvantaged under the statute. DBE opponents, including Senators Ashcroft (S1405) and McConnell (S1418) and Representative Cox (H2004), asserted that outrageously rich people could be eligible to participate as DBEs, frequently using the Sultan of Brunei as an example. The basic thrust of their argument was that if the program does not exclude wealthy members of the designated groups—meaning those who are not, in fact, disadvantaged—then it is "overinclusive" and therefore not narrowly tailored. Senator McConnell added that, because the Department's SNPRM did not include a specific dollar amount for a cap on personal net worth, it would not be effective. (S1486). On the other hand, DBE program supporters cited the SNPRM's proposed net worth cap as an effective device to stop wealthy people from participating in the program. These included Minority Leader Daschle (with a reference to a letter from the Associate Attorney General, S1413), Senator Baucus (S1414, S1423), Senator Lieberman (S1493), Senator Boxer (S1433), and Senator Moseley-Braun, who responded to the Sultan of Brunei example by noting that the program was directed primarily at U.S. citizens (S1420).

DOT Response: The final rule (§ 26.67) specifically imposes a personal net worth cap of \$750,000. This means that, regardless of race, gender or the size of their business, any individual whose personal net worth exceeds \$750,000 is not considered economically disadvantaged and is not eligible for the DBE program. The provision also makes it much easier for recipients to determine whether an individual's net worth exceeds the cap. Applicants will have to submit a statement of personal net worth and supporting documentation to the recipient with their applications. If the information shows net worth above the cap, the recipient would rebut the presumption based on the information in the application itself and the individual would not be eligible for the program. In such a case, it would not be necessary for a third party to challenge the economic disadvantage of an applicant in order to rebut the presumption. While there have been very few documented cases of wealthy individuals seeking to take advantage of the Department's program, the revised provisions of part 26 virtually eliminate even the possibility of this type of abuse.

4. Social Disadvantage

SNPRM Comments: A few commenters suggested that the

presumption of social disadvantage, as well as that of economic disadvantage, be eliminated, so that applicants would have to demonstrate both elements of disadvantage. Any presumption of disadvantage tied to a racial classification, in the view of some of these commenters, undermined the constitutionality of the program. Other commenters noted that persons who are not members of the presumptively disadvantaged groups can be eligible and, in some cases, suggested that the criteria for evaluating such applications be clarified.

Congressional Debate: The presumption of social disadvantage drew fire from DBE program opponents because it was allegedly overinclusive. For example, Senator McConnell produced a map illustrating the over 100 countries of origin leading to inclusion in one of the presumed socially disadvantaged groups, pointing out that people from some countries (e.g., Pakistan) are presumed to be socially disadvantaged while those from other countries (e.g., Poland) are not. (S1418). Senator McConnell said that there was no basis for selecting this definition over any other. (Id.) Senator Hatch also listed the countries from which Asian-Pacific Americans and Subcontinent Asian-Americans can originate, suggesting that it was inappropriate to create "all kinds of special interest groups who are vying for these programs." (S1411).

DBE proponents responded that discrimination against minorities and women in general, and against specific minorities in particular (e.g., African Americans) was very real and formed a basis for the presumption of social disadvantage (see discussion below concerning the existence of discrimination). Senator Baucus also noted that this presumption could be overcome. (S1402).

Opponents also charged that the presumption of social disadvantage was underinclusive; that is, "you underinclude people who have a right to be included in the bid process." (Senator McConnell, S1399). The people who are not included who have a right to be, in the view of opponents, are white males (e.g., Senator Sessions' reference to testimony from Adarand Constructors' owner, S1400). Senator Kennedy disagreed with this assertion, saying

Of course, this program doesn't just help women and minorities. It extends a helping hand to firms owned by white males, as well. They can be certified to [participate] if they prove that they have been disadvantaged. Just ask Randy Pech—owner of the Adarand

Construction Firm—because he is currently seeking certification. (S1482).

Senator Domenici was interested in the same question, and entered into the record the following response from Secretary Slater and Attorney General Reno:

Any individual owning a business may demonstrate that he is socially and economically disadvantaged, even if that individual is not a woman or a minority. Both the current and proposed regulations provide detailed guidance to recipients to assist them in making individual determinations of disadvantaged status. And, in fact, businesses owned by white males have qualified for DBE status. (S1427).

DOT Response: By having passed the DBE statutory provision, after lengthy and specific debate, Congress has once again determined that members of the designated groups should be presumed socially disadvantaged. All of these groups are specifically incorporated by reference in the legislation that Congress debated and approved. This presumption (i.e., a determination that it is not necessary for group members to prove individually that they have been the subject of discrimination or disadvantage) is based on the understanding of Members of Congress about the discrimination that members of these groups have faced. The presumption is rebuttable in the DOT program. If a recipient or third party determines that there is a reasonable basis for concluding that an individual from one of the designated groups is not socially disadvantaged, it can pursue a proceeding under § 26.87 to remove the presumption. Likewise, a white male, or anyone else who is not presumed to be disadvantaged, can make an individual showing of social and economic disadvantage and participate in the program on the same basis as any other disadvantaged individual (see § 26.67).

5. The "Low-Bid System"

SNPRM Comments: Non-DBE contractors expressed concern that a variety of provisions under the program and the SNPRM adversely affected the low-bid system, including contract goals, evaluation credits, and good faith efforts guidance concerning prime contractors' handling of subcontractor prices and consideration of other bidders' success in meeting goals.

Congressional Debate: Opponents of the DBE program assert that the program results in white male contractors not receiving contracts they would otherwise expect to receive. Senator Sessions cited the statement of the Adarand company to this effect. (S1400). Senator Ashcroft said that "if two bids come in from two

subcontractors, one owned by a white male and the other by a racial minority, and the bids are the same, or even close, the job will go to the minority-owned company, not the low bidder." (S1405). Senator Gorton inserted into the record letters from a Spokane subcontractor asserting that, in a number of cases, it had lost subcontracts to DBE firms despite having a lower quote. (S1415-16). Representative Roukema also cited examples of firms who made similar assertions. (H2000).

In contrast, DBE program proponents argued that the program was about leveling the playing field for DBEs. Senator Moseley-Braun cited letters from her constituents for the point that

* * * the DBE program is not about taking away contracts from qualified male-owned businesses and handing them over to unqualified female-owned firms. The program is not about denying contracts to Caucasian low bidders in favor of higher bids that happen to have been submitted by Hispanics or African Americans or Asians or women. (S1420).

Without such a program, her constituents' letters said, they would lose the chance to compete. (Id.). Citing testimony from a Judiciary Committee hearing, Senator Kennedy noted that it was the experience of some DBEs that white male prime contractors had accepted higher bids from other firms to avoid working with DBEs. (S1430).

Why would a general contractor accept a higher bid? It doesn't make sense unless you remember that the traditional business network doesn't include women or minorities * * * [A woman business owner testified] that some general contractors would rather lose money than deal with female contractors. (Id.)

DOT Response: For the most part, statutory low-bid requirements exist only at the prime contracting level. That is, state and local governments, in awarding prime contracts, must select the low bidder in many procurements (there may be exceptions in some types of purchases). Nothing in this regulation requires, under any circumstances, a recipient to accept a higher bid for a prime contract from a DBE when a non-DBE has presented a lower bid. This rule does not interfere with recipients' implementation of state and local low-bid legislation.

The selection of subcontractors by a prime contractor is typically not subject to any low-bid requirements under state or local law. Prime contractors have unfettered discretion to select any subcontractor they wish. Price is clearly a key factor, but nothing legally compels a prime contractor to hire the subcontractor who makes the lowest quote. Other factors, such as the prime

contractor's familiarity and experience with a subcontractor, the quality of a subcontractor's work, the word-of-mouth reputation of the subcontractor in the prime contracting community, or the prime's comfort or discomfort with dealing with a particular subcontractor can be as or more important than price in some situations. It is in this context that § 26.53 requires that prime contractors make good faith efforts to achieve DBE contract goals. The rule does not require that recipients ignore price or quality, let alone obtain a certain amount of DBE participation without regard to other considerations. The good faith efforts requirements are intended to ensure that prime contractors cannot simply refuse to consider qualified, competitive DBE subcontractors. At the same time, the good faith efforts waiver of contract goals serves as a safeguard to ensure that prime contractors will not be forced into accepting an unreasonable or excessive quote from a DBE subcontractor.

6. Constitutionality

SNPRM Comments: Non-DBE contractors and their groups argued that the SNPRM proposals, particularly with respect to overall goals and the use of race-conscious measures, failed to meet the *Adarand* narrow tailoring test. Many of these commenters said that the overall goals were suspect because they did not adequately consider the capacity of DBEs to perform contracts and *Adarand* requires that race-conscious measures may be used only after a recipient has demonstrated that race-neutral means have failed. The use of presumptions based on racial classifications was viewed as intrinsically unconstitutional by these commenters, many of whom cited the language of Judge Kane's decision in the *Adarand* remand to this effect. Some commenters also contended that, absent recipient-specific findings of compelling need, the program could not be constitutional. They said that existing information alleging compelling interest—such as various disparity studies or information compiled by the Department of Justice—was inadequate to meet the compelling interest test. DBEs and recipients who commented defended the constitutionality of the program, often citing experience with discrimination in the marketplace and contending that the SNPRM succeeded in narrowly tailoring the program.

Congressional Debate: Proponents and opponents of the DBE program extensively debated the constitutionality of the DBE statutory provision and the entire DBE program. Generally, opponents argued that the

Supreme Court and District Court decisions in *Adarand* rendered the program unconstitutional, while proponents said that the decisions did not have that effect.

Proponents and opponents of the DBE program agreed that the Supreme Court's *Adarand* decision established a two-part test for the constitutionality of a program that uses a racial classification. The program must be based on a compelling governmental interest and be narrowly tailored to further that interest (e.g., Senator McConnell, S1396; Senator Baucus, S1403). Opponents relied on the finding of a Colorado district court on remand that the program was not narrowly tailored and was thus unconstitutional (Senator McConnell, S 1396; Senator Ashcroft, S1405). Proponents replied that the remand decision represented the views of only one district court (Senator Baucus, S1403), that it failed to properly apply the reasoning of the Supreme Court decision with respect to narrow tailoring (Senator Domenici, S1425), and that the Department's forthcoming regulations would ensure that the program was narrowly tailored (see discussion below).

A. Compelling Interest

(1) **Existence of Discrimination.** Proponents (and some opponents) of the DBE provision said that discrimination and/or disadvantage with respect to minorities and/or women persists. In the House, these included Representative Roukema (H2000-01), Representative Norton (H2003), Representative Poshard (H2003), Representative Menendez (H2004), Representative Davis of Illinois (H2005), Representative Boswell (H2005), Representative Lampson (H2006), Representative Kennedy (H2006), Representative Jackson-Lee (H2006), Representative Edwards (H2007), Representative Andrews (H2007), Representative Rodriguez (H2008), Representative Towns (H2010), Representative Dixon (H2010), and Representative Millender-McDonald (H2011). DBE opponents typically remained silent on this point, neither affirming nor denying the existence of discrimination against women and minorities.

There was a similar pattern in the Senate debates. Opponents typically did not address the present existence of discrimination or disadvantage with respect to minorities and women or its continuing effects, spoke of such discrimination as something that existed in the past (Senator Sessions, S1399; Senator Hatch, S1411), or asserted that race-based disadvantage or

discrimination no longer exists (Senator Ashcroft, S1406).

The Senators who said that such discrimination persists included Senator Baucus (S1403, S1413, S1496), Senator Warner (S1403), Senator Kerry (S1408), Senator Wellstone (S1410), Senator Moseley-Braun (S1419-20), Senator Robb (S1422); Senator Brownback (S1423-24), Senator Domenici (S1425-26), Senator Kennedy (S1429-30, S1482), Senator Specter (S1485), Senator McCain (S1489), Senator Lautenberg (S1490), Senator Durbin (S1491), Senator Daschle (S1492), Senator Lieberman (S1493), Senator Bingaman (S1494), Senator Murray (S1495), and Senator Dorgan (S1495).

(2) **Evidence of discrimination or disadvantage.** In comments on the passage of the TEA-21 conference report in the Senate, Senator Chafee noted a Colorado Department of Transportation disparity study that found a disproportionately small number of women- and minority-owned contractors participating in that state's highway construction industry. More than 99 percent of contracts went to firms owned by white men.

(Congressional Record, May 22, 1998; S5413). In the House discussion of the conference report, Representative Norton presented an extensive summary of relevant evidence of discrimination forming the basis for a compelling need for the DBE program. (H3957).

Throughout the debate, the Members who affirmed the existence of discrimination and/or disadvantage asserted a number of factual bases for concluding that the DBE program was necessary. This information is largely drawn from the Senate debate; the briefer House debate contains less detail.

Senator Baucus cited disparities between the earnings of women and men and between the percentage of small businesses women own and the percentage of Federal procurement dollars they receive. He also noted that minorities make up 20 percent of the population, own 9 percent of construction businesses, and get only 4 percent of construction receipts. (S1403). Finally, Senator Baucus, via a letter from the Associate Attorney General, cited to numerous Congressional findings concerning the effects of discrimination in the construction industry and in DOT-assisted programs. (S1413).

Senator Kerry added that women own 9.2 percent of the nation's construction firms but their companies earn only about half of what is earned by male-owned firms. (S1409). Senator Robb

commented that the evidence of racially based disadvantage is "compelling and disturbing." He continued, stating that, "White-owned construction firms receive 50 times as many loan dollars as African-American owned firms that have identical equity." (S1422). Senator Kennedy said that the playing field for women and minorities and other victims of discrimination was still not level. Job discrimination against minorities and the "glass ceiling" for women still persisted, he said, adding that "Nowhere is the deck stacked more heavily against women and minorities than in the construction industry." (S1429). He cited a number of instances in which minority or female contractors encountered overt discrimination in trying to get work. (S1429-30).

Senator Lautenberg said that, for transportation-related contracts, minority-owned firms get only 61 cents for every dollar of work that white male-owned businesses receive. The comparable figure for women-owned firms was 48 cents. He also mentioned that "women-owned businesses have a lower rate of loan delinquency, yet still have far greater difficulty in obtaining loans." (S1490). He then spoke of the continuing effects of past discrimination:

Jim Crow laws were wiped off the books over 30 years ago. However, their pernicious effects on the construction industry remain. Transportation construction has historically relied on the old boy network which, until the last decade, was almost exclusively a white, old boy network. * * * This is an industry that relies heavily on business friendships and relationships established decades, sometimes generations, ago—years before minority-owned firms were even allowed to compete. (Id.)

Senator Durbin referred to recent studies concerning job bias against minorities and women. (S1491). Senator Lieberman referred generally to previous Congressional committee findings and testimony concerning still-existing barriers to full participation for minorities and women. (S1493). He also cited the May 1996 Department of Justice survey of discrimination and its effects in business and contracting. He referred to a recent study in Denver showing that African Americans were 3 times, and Hispanics 1.5 times, more likely than whites to be rejected for business loans. Senator Daschle summed up by saying, "[i]here is clearly a compelling interest in addressing the pervasive discrimination that has characterized the highway construction industry." (S1492).

Throughout the portion of the debate described above, many of the Members stressed that goal-based programs like

the DBE program were the only effective way to combat the continuing effects of discrimination.

Senator Baucus cited the experience of Michigan, in which DBE participation in the state-funded portion of the highway program fell to zero in a nine-month period after the state terminated its DBE program, while the Federal DBE program in Michigan was able to maintain 12.7 percent participation. (S1404). Senator Kerry also raised the Michigan example, and went on to cite similar sharp decreases in DBE participation when Louisiana, Hillsborough County, Florida, and San Jose, California, eliminated affirmative action programs covering state- and locally-funded programs. Senator Kerry asked rhetorically:

* * * is that just the economy of our country speaking, an economy at one moment that is capable of having 12 percent and at another moment, where they lose the incentive to do so, to drop down to zero, to drop down by 99 percent, to drop down by 80 percent, to have .4 at the State level while at the Federal level there are 12 percent? You could not have a more compelling interest if you tried. * * * (S1409-10).

Senator Moseley-Braun added the examples of Arizona, Arkansas, Rhode Island, and Delaware to the jurisdictions cited by other members where state-funded projects without a DBE program have significantly less DBE participation than Federally funded projects subject to the DBE program. She added, "Where there are no DBE programs, women- and minority-owned small businesses are shut out of highway construction." (S1420-21). Senator Kennedy added Nebraska, Missouri, Tampa and Philadelphia to the list of jurisdictions that experienced precipitous drops in DBE participation after goals programs ended. (S1429-30; S1482). He also cited comments from DBE companies that goal programs were needed to surmount discrimination-related barriers. (S1482). Senator Domenici repeated many of the same points as previous DBE proponents concerning the basis for concluding that the program was needed (S1426), as did Senator Kempthorne. (S1494).

Senator Robb emphasized that the DBE program was essential to combating discrimination and ensuring economic opportunity, explicitly linking the fall-off in DBE participation to continuing discrimination:

Where DBE programs at the State level have been eliminated, participation by qualified women and qualified minorities in government transportation contracts has plummeted. There is no way to know whether this discrimination is intentional or subconscious, but the effect is the same. This

experience demonstrates the sad but inescapable truth that, when it comes to providing economic opportunities to women and minorities, passivity equals inequality. (S1422).

3. *Narrow tailoring.*—DBE proponents cited the Department's proposed DBE rule as the vehicle that would ensure that the DBE program would be narrowly tailored. They cited features of the SNPRM including a new mechanism for calculation of overall goals, giving priority to race-neutral measures in meeting goals, a greater emphasis on good faith efforts, DBE diversification, added flexibility for recipients, net worth provisions, ability to challenge presumptions of social and economic disadvantage, and flexibility in goal-setting. In comments on the Senate consideration of the TEA-21 conference report, Senator Baucus concluded by saying:

As I explained in my statements during the debate on the McConnell amendment * * * the program is narrowly tailored, both under the current and the new regulations, which emphasize flexible goals tied to the capacity of firms in the local market, the use of race-neutral measures, and the appropriate use of waivers for good faith efforts. (Congressional Record, May 22, 1998; S5414).

Following Senator Baucus' remarks, Senator Chafee, Chairman of the committee of jurisdiction, requested that he be associated with Senator Baucus' remarks on constitutionality. (S5414).

DBE opponents denied that regulatory change could result in a narrowly tailored program. Senator Smith said "The administration's attempt to comply with the Court's decision by fiddling around with the DOT regulations does not meet the constitutional litmus test." (S1398). The most frequent argument against the efficacy of regulatory change was that a racial classification is inherently unable to be narrowly tailored. (Senator Sessions, S1399-1400; Senator Ashcroft, S1407).

DOT Response: The 1998 debate over DBE legislation was the most thorough in which Congress has engaged since the beginning of the program. The record of this debate clearly supports the Department's view that there is a compelling governmental interest in remedying discrimination and its effects in DOT-assisted contracting. Congress clearly determined that real, pervasive, and injurious discrimination exists. Congress backed up that determination with reference to a wide range of factual material, including private and public contracting, DOT-assisted and state- and locally-funded programs and the financing of the contracting industry. By retaining the DBE statutory provisions

against this factual background. Congress clearly found that there was a compelling governmental interest in having the program.

The courts, including the court in the *Adarand Constructors Inc. v. Peña*, 965 F.Supp. 1556 (D. Colo., 1997) and the court in *In re: Sherbrooke Sodding*, 6-96-CV-41 (D. Minn. 1998), agree that Congress has the power to legislate on a nationwide basis to address nationwide problems. Congress has a unique role as the national legislature to look at the whole of the United States for the basis to find a compelling governmental interest supporting the use of race-based remedies. Congress is not required to make particularized findings of discrimination in individual localities to which a nationwide program may apply. Nor is Congress required to find that the Federal government itself has discriminated before applying a race-conscious remedy. (Id. at 1573).

Having reviewed the extensive evidence of discrimination and its relationship to DOT-assisted contracting, the District Court in *Adarand* determined that current and previous DBE provisions were a "considered response by Congress to the effects of discrimination on the ability of minorities to participate in the mainstream of federal contracting." (Id. at 1576). The court stated that "Congress has a strong basis in evidence for enacting the challenged statutes, which thus serve a 'compelling governmental interest.'" (Id. at 1577). The extensive Congressional debate and information supporting the enactment of the 1998 DBE provision significantly strengthens the existing basis for declaring that this program serves a compelling governmental interest.

The basis for District Court's view that the program at issue in *Adarand* is unconstitutional is stated most clearly in the following passage:

Contrary to the [Supreme] Court's pronouncement that strict scrutiny is not 'fatal in fact,' I find it difficult to envisage a race-based classification that is narrowly tailored. By its very nature, such [a] program is both underinclusive and overinclusive. (Id. at 1580).

By underinclusive, the court said it meant that caucasians and members of non-designated minority groups are excluded. By overinclusive, it said it meant that all the members of the designated groups are presumed to be economically and/or socially disadvantaged, without Congress having inquired whether a particular entity seeking a racial preference has suffered from the effects of past discrimination (citing the Supreme Court's *Croson*

decision, which concerned the powers of state and local governments to use race-based remedies). (Id.)

As Senator Domenici pointed out (S1425), the key words in the District Court's opinion are "Contrary to the [Supreme] Court's pronouncement. * * * The District Court's analysis departs markedly from the controlling decision of the Supreme Court on this issue (*Adarand v. Peña*, 515 U.S. 200 (1995)). The Supreme Court's language with which the District Court disagreed is the following:

Finally, we wish to dispel the notion that strict scrutiny is "strict in theory, but fatal in fact." [citation omitted] The unhappy persistence of both the practice and the lingering effects of racial discrimination against minority groups in this country is an unfortunate reality, and government is not disqualified from acting in response to it * * * When race-based action is necessary to further a compelling interest, such action is within constitutional constraints if it satisfies the "narrow tailoring" test this Court has set out in previous cases. (515 U.S. at 237).

The Supreme Court evidently considers the "not fatal in fact" language to have continuing vitality, having cited it in a subsequent case (*U.S. v. Virginia*, 518 U.S. 515, note 6 (1996)).

Under the District Court's analysis, Congress could never use a race-based classification, no matter how compelling the need, because any such classification would intrinsically fail to be narrowly tailored. This approach effectively moots the determination of whether there is a compelling governmental interest. The Supreme Court's approach, by contrast, permits a racial classification to be used, given the existence of a compelling interest, if it is narrowly tailored.

What is the test for narrow tailoring? As set forth in *United States v. Paradise*, 480 U.S. 149, 171 (1987), the test includes several factors: "the necessity for relief and the efficacy of alternative remedies; the flexibility and duration of the relief, including the availability of waiver provisions; the relationship of the goals to the relevant labor market; and the impact of the relief on the rights of third parties." In *Adarand*, the Supreme Court specifically invited inquiry into whether there was any consideration of the use of race-neutral means to increase minority business participation (related to the efficacy of alternative remedies) and whether the program was appropriately limited so that it will not last longer than the discrimination it is designed to eliminate (related to the duration of relief). (515 U.S. at 238).

This final rule successfully addresses each element of this test:

- *The necessity of relief.* Throughout the debate on the compelling governmental interest, the bipartisan majority of both houses of Congress repeatedly described the necessity of the DBE program's goal-based approach to remedying the effects of discrimination in DOT-assisted contracting. The most significant evidence demonstrating the necessity of a goal-oriented program is the evidence cited of the fall-off in DBE participation in state contracting when goal-oriented programs end, compared to participation rates in the Federal DBE program.

- *Efficacy of alternative remedies.* This element of the narrow tailoring standard is related to the Supreme Court's inquiry concerning race-neutral programs. Under § 26.51 of this rule, recipients are required to meet the maximum feasible portion of their overall goals by using race-neutral measures. Recipients are not required to have contract goals on each contract. Instead, they are instructed to use contract goals only for any portion of their overall goal they cannot meet through race-neutral measures. Contract goals are intended as a safety net to be used when race-neutral means are not effective to ensure that a recipient can achieve "level playing field." Moreover, the regulations provide that recipients must reduce the use of contract goals when other means are sufficient to meet their overall goals. This ensures that race-conscious relief is used only to the extent necessary and is replaced by race-neutral as quickly as possible.

- *Flexibility of relief.* Flexibility is built into the program in a variety of ways. Recipients set their own goals, based on local market conditions; their goals are not imposed by the federal government nor do recipients have to tie them to any uniform national percentage. (§ 26.45). Recipients also choose their own method for goal setting and can choose to base the goal on the evidence that they believe best reflects their market conditions. (§ 26.45). Recipients have broad discretion to choose whether or not to use a goal on any given contract, and if they do choose to use a contract goal, they are free to set it at any level they believe is appropriate for the type and location of the specific work involved. (§ 26.51). The rule also ensures flexibility for contractors by requiring that any contract goal be waived entirely for a prime contractor that demonstrates that it made good faith efforts but was still unable to meet the goal. (§ 26.53). The rule also allows recipients that believe they can achieve equal opportunity for DBEs through different approaches to get waivers releasing

them from almost any of the specific requirements of the rule. (§ 26.103). Recipients can also get exemptions from the rule if they have unique circumstances that make complying with the rule impractical. (§ 26.103).

- *Duration of relief.* The TEA-21 DBE program will end in 2004 unless reauthorized by the Congress. In each successive reauthorization bill for the surface transportation and airport programs, Congress will have the opportunity to examine the current state of transportation contracting and determine whether the DBE program statutes are still necessary to remedy the continuing effects of discrimination. In addition, the duration of relief for individuals and firms are limited by the personal net worth threshold and business size caps. When an individual's personal wealth grows beyond the threshold, he or she will lose the presumption of disadvantage. (§ 26.67). Similarly, when a firm's receipts grows beyond the small business size standards, it loses its eligibility to participate in the program. (§ 26.65). Finally, to ensure that race-conscious remedies are not used any longer than absolutely necessary, § 26.51 requires recipients to reduce the use of contract goals and rely on race-neutral measures to the extent that they are effective.

- *Relationship of goals to the relevant market.* The overall goal setting provisions of § 26.45 require that recipient set overall goals based on demonstrable evidence of the relative availability of ready, willing and able DBEs in the areas from which each recipient obtains contractors. These provisions ensure that there is as close a fit as possible between the goals set by each recipient and the realities of its relevant market. When a recipient sets contract goals, § 26.51 provides that these goals are to be set realistically in relation to the availability of DBEs for the type and location of work involved.

- *Impact of relief on the rights of third parties.* The legitimate interests of third parties (e.g., prime contractors, non-DBE subcontractors) are only minimally impacted by the DBE program, since the program is aimed at replicating a market in which there are no effects of discrimination and the program affects only a relatively small percentage of total federal-aid funds. The design of the overall and contract goal provisions ensures that the use of race-conscious remedies having the potential to affect the interests of third parties is limited to the extent necessary to counter the effects of discrimination. Individual prime contractors are further protected from suffering any undue

burdens by § 26.51, which prevents a prime contractor from losing a contract if it made good faith efforts but was still unable to meet a goal. Non-DBE firms are also protected by § 26.33, which directs recipients to take appropriate steps to address areas of overconcentration of DBE firms in certain types of work that could unduly burden non-DBE firms seeking the same type of work.

- *Inclusion of appropriate beneficiaries.* The certification provisions of Subparts D and E, and particularly the social and economic disadvantage provisions of § 26.67, ensure that only firms owned and controlled by individuals who are in fact socially and economically disadvantaged can participate in the program. Eligibility provisions guard against overinclusiveness by ensuring that individuals with too great net worth are not presumed disadvantaged and by permitting the recipient—on its own initiative or as the result of a complaint—to follow procedures to rebut the presumption of social and/or economic disadvantage. They guard against underinclusiveness by permitting any business owner, including a white male, to demonstrate social and economic disadvantage on an individual basis.

Section-by-Section Analysis

Section 26.1 What Are the Objectives of This Part?

There were relatively few comments on this section of the SNPRM, most of which agreed with the proposed language. We have adopted the suggestion of some commenters that specific reference be made to the role of the DBE program in helping DBEs overcome barriers (e.g., access to capital and bonding) to equal participation. We have also added a specific reference to the role of the program in creating a level playing field on which DBEs can compete fairly for DOT-assisted contracts. Some non-DBE contractors urged that language be added to explicitly oppose "reverse discrimination." The rule clearly states that nondiscrimination is the program's first objective and the Department reiterates here that it opposes unlawful discrimination of any kind.

Section 26.3 To Whom Does This Part Apply?

This provision is unchanged from the SNPRM, except for references to the new TEA-21 statutory provisions. A few commenters wanted this provision to apply to Federal Railroad Administration (FRA) programs, as did

the original version of former part 23. However, FRA does not have specific statutory authority for a DBE program parallel to the TEA-21 language. One commenter asked if the language saying that DBE requirements do not apply to contracts without any DOT funding is inconsistent with Federal Transit Administration (FTA) guidance on applicability. While the structure of the FTA program is such that FTA funds are commingled with local funds in many transit authority contracts (e.g., any contract involving FTA operating assistance funds), to which DBE requirements would apply, a contract which is funded entirely with local funds—and without any Federal funds—would not be subject to requirements under this rule.

Section 26.5 What Do The Terms Used in This Part Mean?

There were relatively few comments on the definitions proposed in the SNPRM. One commenter wanted to substitute the term "historically underutilized business" for DBE. Given the continued use of the DBE term in Congressional consideration of the program, the continued use of the "socially and economically disadvantaged individuals" language in the statute, and the familiarity of concerned parties with the DBE term, we do not believe changing the term would be a good idea.

A few commenters asked for additional definitions or elaboration of existing definitions (e.g., "form of arrangement," "financial assistance program," "commercially useful function"). These terms are either already defined sufficiently or are best understood in context of the operational sections in which they are embedded, and abstract definitions in this section would not add much to anyone's ability to make the program work well. Consequently, we are not adding them. Otherwise the final rule adopts the SNPRM proposals for definitions with only minor editorial changes.

The Department has added, for the sake of clarity and consistency with other Federal programs, definitions of the terms Alaskan native, Alaskan native corporation (ANC), Indian tribe, immediate family member, Native Hawaiian, Native Hawaiian organization, principal place of business, primary industry classification, and tribally-owned concern. These definitions are taken from the SBA's new small disadvantaged business program regulation (13 CFR § 124.3). The definitions of the designated groups included in the definition of "socially

and economically disadvantaged individual" also derive from the SBA regulations, as the Department's DBE statutes require. We believe these will be useful terms of art in implementing the DBE program.

A few commenters requested definitions for the terms "race-conscious" and "race-neutral," and we have provided definitions. A race-conscious program is one that focuses on, and provides benefits only for, DBEs. The use of contract goals is the primary example of a race-conscious measure in the DBE program. A race-neutral program is one that, while benefiting DBEs, is not solely focused on DBE firms. For example, small business outreach programs, technical assistance programs, and prompt payment clauses can assist a wide variety of small businesses, not just DBEs.

Section 26.7 What Discriminatory Actions Are Forbidden?

One commenter wanted to add prohibitions of discrimination based on age, disability and religion. The Department is not doing so, because discrimination on these grounds is already prohibited by other statutes (e.g., the Americans with Disabilities Act with respect to disability). Also, statutes which form the basis for this rule focus on race, color, national origin, and sex. Congress determined that remedial action focused on these areas is necessary. These grounds for discrimination are also most relevant to problems in the DBE program that have been alleged to exist (e.g., disparate treatment of DBE certification applicants by race or sex). Some opponents of the program said that the DBE program discriminates against non-DBEs. However, the Department believes that the program is constitutional and does not violate equal protection requirements. A reference to DOT Title VI regulations has been deleted as unnecessary; otherwise, this provision is the same as in the SNPRM.

Section 26.9 How Does the Department Issue Guidance and Interpretations Under This Part?

Commenters, most of whom were recipients, focused on two issues in this section. First, a majority of the comments favored the "coordination mechanism" concept for ensuring consistent DOT guidance and interpretations. The few that disagreed with this approach did so out of a concern that the mechanism would add delays to the process. These commenters favored additional training

or an 800 number hot line to speed up the process.

We believe that proper coordination of interpretations and guidance is vital to the successful implementation of this rule. As the preambles to the 1992 and 1997 proposed rules mentioned, inconsistent implementation of part 23 has been a continuing problem, which has been criticized by a General Accounting Office report and which has created unnecessary difficulty for recipients, contractors, and the Department itself. A process for ensuring that the Department speaks with one voice on DBE implementation matters, and for letting the public know when DOT has spoken, will greatly improve the service we give our customers.

We do not believe this coordination process will result in significant delays in providing guidance. Nor will it inhibit the ability of DOT staff and customers to communicate with one another. For example, the process does not apply to informal advice provided by staff to recipients or contractors over the phone or in a letter or e-mail. It does maintain, however, the important distinction between informal staff assistance on one hand and a binding institutional position on the other.

For clarity in the process, we have modified the language of the rule text to make clear that interpretations and guidance are binding, official Departmental positions if the Secretary signs them or if the document includes a statement that they have been reviewed and approved by the General Counsel. The General Counsel will consult fully with all concerned offices as part of this review process.

We intend to post significant guidance documents and interpretations on the Department's web site to make them widely and quickly available. As some commenters suggested, we are also continuing to consider forming an advisory committee (or working group of an existing committee) to facilitate customer input into DBE program matters. This is separate from the coordination mechanism, however, which is an internal DOT process.

The rule's provisions regarding exemptions and waivers, previously found in the SNPRM's § 26.9 (c) and (d), are now included as a separate section at § 26.15.

Section 26.11 What Records do Recipients Keep and Report?

The Department asked, in the SNPRM, whether it would be advisable to have one standard reporting form for information about the DBE program. Currently, each operating

administration (OA) has its own reporting form and requirements. Virtually all the commenters that addressed this issue favored a single, DOT-wide reporting form. Commenters also had a wide variety of suggestions for what data should be reported, formats, and retention periods.

The Department is adopting the suggestion of having a single reporting form, which we believe will reduce administrative burdens for recipients, particularly those who receive funds from more than one OA. Because we do not want to delay the issuance of this rule while a form is being developed, we are reserving the date on which this single form requirement will go into effect. We will take comments on the specifics of reporting into account and consult with interested parties as we devise the form, which will be published subsequently in Appendix B to this rule. The Appendix will also address the issues of reporting frequency and record retention periods. Meanwhile, recipients will continue to report as directed by the concerned OA(s), using existing reporting forms.

The rule is also adding a requirement that recipients develop and maintain a "bidders" list. The bidders list is intended to be a count of all firms that are participating, or attempting to participate, on DOT-assisted contracts. The list must include all firms that bid on prime contracts or bid or quote subcontracts on DOT-assisted projects, including both DBEs and non-DBEs. Bidders lists appear to be a promising method for accurately determining the availability of DBE and non-DBE firms and the Department believes that developing bidders data will be useful for recipients. Creating and maintaining a bidders list will give recipients another valuable way to measure the relative availability of ready, willing and able DBEs when setting their overall goals. (See § 26.45). We realize that identifying subcontractors, particularly non-DBEs and all subcontractors that were unsuccessful in their attempts to obtain contracts, may well be a difficult task for many recipients. Mindful of that potential burden, the rule will not impose any procedural requirements for how the data is collected. Recipients are free to choose whether or not they wish to gather this data through their existing bidding and reporting processes. Recipients are encouraged to make use of all of the data already available to them and all methods of reporting and communication with their contracting community that they already have in place. In addition, the Department suggests that recipients consider using a widely publicized public notice or a

widely disseminated survey to encourage all firms that have bid or quoted contracts to make themselves known to recipients.

Once recipients have created the list of bidders, they will have to supplement that information with the age of each firm (since establishment) and the annual gross receipts of the firm (or an average of its annual gross receipts). Recipients can gather this additional information by sending a questionnaire to the firms on the list, or by any other means that the recipient believes will yield reliable information. The recipient's plan for how to create and maintain the list and gather the required information must be included in its DBE program.

Section 26.13 What Assurances Must Recipients and Contractors Make?

There were few comments on this section. Most of these supported the proposal. One comment suggested specific mention of prompt payment, but in view of the substantive requirements on this subject, we do not believe such a mention is needed. Some commenters favored requiring additional public participation as part of the assurance for recipients. Again, given substantive provisions of this rule concerning public participation, we do not believe that repetition here is needed. One commenter said that incorporating the requirements of part 26 in the contract was confusing, since many provisions of part 26 apply only to recipients. We have rewritten the assurance for contractors in response to this concern, specifying that contractors are responsible only for carrying out the requirements of part 26 that apply to them.

Section 26.15 How Can Recipients Apply for Exemptions or Waivers?

There has been some confusion as to this rule's distinction between exemption and waiver. Put simply, exemptions are for unique situations that are most likely not to be either generally applicable to all recipients or to have been contemplated in the rulemaking process. If such a situation occurs and it makes it impractical for a particular recipient to comply with a provision of part 26, the recipient should apply for an exemption from that provision. The waiver provision, by contrast, is not designed for extraordinary circumstances where a recipient may not be able to comply with part 26. Waiver is for a situation where a recipient believes that it can better accomplish the objectives of the DBE program through means other than the specific provisions of part 26.

There were a number of comments about the proposed program waiver provision. Most commenters on this issue favored the proposal, believing it could add flexibility to the way recipients implement the DBE program. A few commenters were concerned that too liberal use of the waiver provision might undermine the goals of the rule.

The Department believes that the waiver provision is an important aspect of the DBE program. The provision ensures that the Department and a recipient can work together to respond to any unique local circumstances. Recipients are encouraged to carefully review the circumstances in their own jurisdictions to determine what mechanisms are best suited to achieving compliance with the overall objectives of the DBE program. If a recipient believes it is appropriate to operate its program differently from the way that a provision of Subpart B or C provides, including, but not limited to, any provisions regarding administrative requirements, overall or contract goals, good faith efforts or counting provisions, it can apply for a waiver. For example, waiver requests could pertain to such subjects as the use of a race-conscious measure other than a contract goal, different ways of counting DBE participation in certain industries, use of separate overall or contract goals to address demonstrated discrimination against specific categories of socially and economically disadvantaged individuals, the use or wording of assurances, differences in information collection requirements and methods, etc.

The Department will, of course, carefully review any applications for waivers to make sure that innovative state or local programs are able to meet the objectives of the statutes and regulation. Decisions on waiver requests are made by the Secretary. This authority has not been delegated to other officials. The waiver provision, which the Department believes will help assist recipients to "narrowly tailor" the program to state and local circumstances and ensure nondiscrimination, remains in the final rule.

Section 26.21 Who Must Have a DBE Program?

The only substantive comment concerning this provision asked that Federal Railroad Administration (FRA) programs be included. The Department is not including FRA programs under this rule because FRA does not have a specific DBE program statute parallel to those covering the Federal Aviation Administration (FAA), FTA, and

FHWA. FRA could consider issuing a rule similar to part 26 under its own, separate statutory authority. The Department shortened paragraph (b)(1) to make it easier to understand. Within 180 days of the effective date of this rule, all recipients with existing programs must submit revised programs to the relevant OA for approval. The only changes from existing programs that recipients would have to make are changes needed to accommodate differences between former part 23 and part 26. Future new recipients would, of course, submit a DBE program as part of the approval process for financial assistance.

Section 26.23 What Is the Requirement for a Policy Statement?

Section 26.25 What Is the Requirement for a Liaison Officer?

Section 26.27 What Efforts Must Recipients Make Concerning DBE Financial Institutions?

There were no substantive comments concerning §§ 26.23–26.27, and the Department is adopting them as proposed.

Section 26.29 What Prompt Payment Mechanisms Must Recipients Have?

There was substantial comment on the issue of prompt payment. A majority of commenters supported the concept of prompt payment provisions. Some recipients pointed out that they already had prompt payment provisions on the books. DBEs generally supported mandating prompt payment provisions though they, as well as other commenters, recognized that slow payment is a problem affecting many subcontractors, not just DBEs. Some of these comments suggested making prompt payment requirements applicable to subcontracts in general, not just DBE subcontracts. Some recipients were concerned about getting in the middle of disputes between prime contractors and subcontractors. Some commenters wanted the Department to mandate prompt payment provisions, while others preferred that their use by recipients remain optional.

Having considered the variety of views expressed on this subject, the Department believes that prompt payment provisions are an important race-neutral mechanism that can benefit DBEs and all other small businesses. Under part 26, all recipients must include a provision in their contracts requiring prime contractors to make prompt payments to their subcontractors, DBE and non-DBE alike. It is clear that DBE subcontractors are significantly—and, to the extent that

they tend to be smaller than non-DBEs, disproportionately—affected by late payments from prime contractors. Lack of prompt payment constitutes a very real barrier to the ability of DBEs to compete in the marketplace. It is appropriate for the Department to require recipients to take reasonable steps to deal with this barrier. We recognize that delayed payments do not affect only DBE contractors; a prompt payment requirement applying to all subcontracts is an excellent example of a race-neutral measure that will assist DBEs, and we are therefore requiring that recipients' prompt payment mechanisms apply to all subcontracts on Federally-assisted contracts.

Paragraph (a) of this section requires recipients to put into their DBE programs a requirement for a prompt payment contract clause. This clause would appear in every prime contract on which there are subcontracting possibilities, and it would obligate the prime contractor to pay subcontractors within a given number of days from the receipt of each payment the recipient makes to the prime contractor. Payment is required only for satisfactory completion of the subcontractor's work. The clause would also apply to the return of retainage from the prime to the subcontractor. Retainage would have to be returned within a given number of days from the time the subcontractor's work had been satisfactorily completed, even if the prime contract had not yet been completed. A majority of commenters on the retainage issue favored a requirement of this kind.

The number of days involved would be selected by the recipient, subject to OA approval as part of the recipient's DBE program. In approving these time frames, the OAs will consider whether they are realistic and sufficiently brief to ensure genuinely prompt payment. Recipients who already operate under prompt payment statutes may use their existing authority in implementing this requirement. It may be necessary to add to existing contract clauses in some cases (e.g., if existing prompt payment requirements do not cover retainage).

Paragraph (b) lists a series of additional measures that the regulation authorizes, but does not require, recipients to use. These include alternative dispute resolution, holding of payments to primes until subcontractors are paid, and other mechanisms that the recipient may devise. All these mechanisms could be made part of the recipient's DBE programs.

Section 26.31 What Requirements Pertain to the DBE Directory?

Recipients maintain directories listing certified DBEs. The issue most discussed by commenters on this section was whether the directory should include material concerning the qualifications of the firm to do various sorts of work. For example, has the firm been pre-qualified by the recipient? Can it do creditable work? What kinds of work does the firm prefer to do? Some commenters also asked that the directory should list the geographical areas in which the firm is willing to work. Other commenters opposed the idea of including this kind of information in the directory.

The Department believes that the directory and the certification process are closely intertwined. The primary purpose of the directory is to show the results of the certification process. Consequently, the directory should list all firms that the recipient has certified, along with basic identifying information for the firm. Since certification under this rule pertains to the various kinds of work a firm's disadvantaged owners can control, it is important to list those kinds of work in the directory. For example, if a firm seeks to work in fields A, B, and C, but the recipient has determined that its disadvantaged owners can control its operations only with respect to A and B, then the directory would recite that the firm is certified to perform work as a DBE in fields A and B.

The focus of the directory is intended to be eligibility. A directory is a list of firms that have been certified as eligible DBEs, with sufficient identifying information to permit interested firms to contact the DBEs. We do not intend to turn a recipient's directory into a comprehensive business resource manual. For example, information about firms' qualifications, geographical preferences for work, performance track record, capitalization, etc. are not required to be part of the directory. Some commenters favored including one or more of these elements, but we are concerned that other business information—however useful in its own right—could clutter up the directory and dilute its focus on certification.

Section 26.33 What Steps Must a Recipient Take to Address Overconcentration of DBEs in Certain Types of Work?

For some time, the Department has heard allegations that DBEs are overconcentrated in certain fields of highway construction work (e.g., guardrail, fencing, landscaping, traffic

control, striping). The concern expressed is that there are so many DBEs in these areas that non-DBEs are frozen out of the opportunity to work. In an attempt to respond to these concerns, the SNPRM asked for comment on a series of options for "diversification" mechanisms, various incentives and disincentives designed to shift DBE participation to other types of work.

The Department received a great deal of comment on these proposals, almost all of it negative. There were few comments suggesting that overconcentration was a serious problem, and many comments said that the alleged problem was not real. Some FTA and FAA recipients said that if there was a problem with overconcentration, it was limited to the highway construction program. As a general matter, recipients said that the proposed mechanisms were costly, cumbersome, and too prescriptive.

Prime contractors opposed the provisions because they would make it more difficult for them to find DBEs with which to meet their goals, while DBEs opposed them because they felt the provisions would penalize success and force them out of areas of business in which they were experienced. Many commenters suggested using outreach or business development plans as ways of assisting DBEs to move into additional areas of work.

The Department does not have data from commenters or other sources to support a finding that "overconcentration" is a serious, nationwide problem. However, as part of the narrow tailoring of the DBE program, we believe it would be useful to give recipients the authority to address overconcentration problems where they may occur. In keeping with the increased flexibility that this rule provides recipients, we give recipients discretion to identify situations where overconcentration is unduly burdening non-DBE firms. If a recipient finds an area of overconcentration, it would have to devise means of addressing the problem that work in their local situations. Possible means of dealing with the problem could include assisting prime contractors to find DBEs in non-traditional fields or varying the use of contract goals to lessen any burden on particular types of non-DBE specialty contractors. While recipients would have to obtain DOT approval of determinations of overconcentration and measures for dealing with them, the Department is not prescribing any specific mechanisms for doing so.

Section 26.35 What Role do Business Development and Mentor-Protégé Programs Have in the DBE Program?

In the SNPRM, both mentor-protégé programs and business development programs (BDPs) were cast as tools to use for diversification. They still may be used for that purpose, as noted in § 26.33. However, the Department believes that they may have a broader application, and their use in the final rule is not limited to diversification purposes. BDPs, in particular, are good examples of race-neutral methods recipients can use to promote the participation of DBEs and other small businesses in their contracting programs.

There were few comments on these provisions. Recipients wanted flexibility, and suggested that these kinds of programs should be optional. Their comments said that such programs were resource-intensive, and that Federal financial assistance for them would be welcome. One contractors' organization offered its own mentor-protégé plan as a model. A few comments voiced suspicion of mentor-protégé plans, on the basis that they allowed fronts and frauds into the program.

The final rule makes the use of BDPs and mentor-protégé programs optional for recipients. An operating administration can direct a particular recipient to institute a BDP, but BDPs are not mandatory across the board. The operating administration would negotiate with the recipient before mandating a BDP.

One feature added to this provision allows recipients to establish a kind of mini-graduation requirement for firms that voluntarily participate in BDPs. One of the purposes of a BDP is to equip DBE firms to compete in the market outside the DBE program. Therefore, a recipient could ask BDP participants to agree—as a condition of receiving BDP assistance—to agree to leave the DBE program after a certain number of years, or after certain business development objectives had been achieved.

Standing alone, mentor-protégé programs are not an adequate substitute for the DBE program. While they can be an important tool to help selected firms, they cannot be counted on to level the playing field for DBEs in general. An effective mentor-protégé program requires close monitoring to guard against abuse, which further limits the number of DBEs they can assist. Even with these limits, a mentor-protégé program that has safeguards to prevent large non-DBE firms from circumventing the DBE program can be a useful

component of a recipient's overall strategy to ensure equal opportunities for DBEs.

The final rule includes safeguards intended to prevent the misuse of mentor-protégé programs. Only firms that a recipient has already certified as DBEs (necessarily including a determination that they are independent firms) can participate as protégés. This is intended to preclude non-DBE firms from creating captive DBE firms to serve as protégés. A non-DBE mentor firm cannot get credit for more than half its goal on any contract by using its own protégé. Moreover, a non-DBE mentor firm cannot get DBE credit for using its own protégé on more than every other contract performed by the protégé. That is, if Mentor Firm X uses Protégé Firm Y to perform a subcontract, X cannot get DBE credit for using Y on another subcontract until Y had first worked on an intervening prime contract or subcontract with a different prime contractor.

To make mentor-protégé relationships feasible, the rule provides that mentors and protégés are not treated as affiliates of one another for size determination purposes. Mentor-protégé programs and BDPs must be approved by the concerned operating administration before they take effect. Recipients who already have such programs in place would make them part of their revised DBE programs sent to the concerned OA within 180 days of the effective date of part 26.

Section 26.37 What Are a Recipient's Responsibilities for Monitoring the Performance of Other Program Participants?

The few comments on this section asked for more detail and clarification. In the interest of flexibility, the Department is reluctant to be prescriptive in the matter of monitoring and enforcement mechanisms. What we are looking for is a strong and effective set of monitoring and compliance provisions in each recipient's DBE program. These mechanisms could be most anything available to the recipient under Federal, state, or local law (e.g., liquidated damages provisions, responsibility determinations, suspension and debarment rules, etc.)

One of the main purposes of these provisions is to make sure that DBEs actually perform work committed to them at contract award. The results that recipients must measure consist of payments actually made to DBEs, not just promises at the award stage. Credit toward goals can be awarded only when payments (including, for example, the return of retainage payments) are

actually made to DBEs. Under the final rule, recipients would keep a running tally of the extent to which, on each contract, performance had matched promises. Prime contractors whose performance fell short of original commitments would be subject to the compliance mechanisms the recipient had made applicable.

Section 26.41 What Is the Role of the Statutory 10 Percent Goal in This Program?

This is a new section, intended to explain what role the 10 percent statutory goal plays in the DBE program. Under former part 23, the 10 percent figure derived from the statute had a role in the setting of overall goals by recipients. For example, if recipients had a goal of less than 10 percent, the rule required them to make a special justification.

This section makes clear that the 10 percent goal is an aspirational goal that applies to the Department of Transportation on a national level, not to individual recipients. It is a goal that the Department can use to evaluate its overall national success in achieving the objectives that Congress has established for this program. However, the national 10 percent goal is not tied to recipients' goal-setting decisions. Recipients set goals based on what will achieve a level playing field for DBEs in their own programs, without regard to the national goal. Recipients are not required to set their overall or contract goals at 10 percent or any other particular level. Recipients are no longer required to make a special justification if their overall goals are less than 10 percent.

As discussed in connection with the Congressional debate on the TEA-21 DBE provision, Congress viewed flexibility concerning the statutory 10 percent goal as an important feature of narrow tailoring and made clear that it was setting a national goal, not a goal for any individual recipient. The Department wants to ensure that state and local programs have sufficient flexibility to implement their programs in a narrowly tailored way. This section is part of the Department's effort toward that end.

Section 26.43 Can Recipients Use Quotas or Set-Asides as Part of This Program?

The DBE program has often been labeled as a "quota" or "set-aside" program, especially, though not exclusively, by its opponents. This label is, and always has been, incorrect. Fifteen years ago, in the preamble to the Department's first rule implementing a DBE statute, the Department carefully

specified that neither quotas nor set-asides were required (see 48 FR 33437-38; July 21, 1983). This remains true today. However, in light of *Adarand* and this year's Congressional debates on the DBE statutes, we believe this point deserves additional emphasis. This regulation prohibits quotas under any circumstances and makes clear that set-asides can only be used as a means of last resort for redressing egregious discrimination.

A number of non-DBE contractors and their organizations continued to assert, in comments on the SNPRM, that the DBE program operates as a quota program. This section makes clear that recipients cannot use quotas on DOT-assisted contracts under any circumstances. A quota is a simple numerical requirement that a recipient or contractor must meet, without consideration of other factors. For example, if a recipient sets a 12 percent goal on a particular contract and refuses to award the contract to any bidder who does not have 12 percent DBE participation, either refusing to look at showings of good faith efforts or arbitrarily disregarding them, then the recipient has used a quota. The Department's regulations have never endorsed this practice. The issue of good faith efforts is discussed further below in connection with § 26.51.

A set-aside is a very specific tool. A contracting agency sets a contract aside for DBEs if it permits no one but DBEs to compete for the contract. Firms other than DBEs are not eligible to bid. The Department's DBE program has never required the use of set-asides and has allowed recipients to use set-asides only under very limited circumstances.

Under the SNPRM, a recipient could use a set-aside on a DOT-assisted contract only if other methods of meeting overall goals were demonstrated to be unavailing and the recipient had legal authority independent of part 26. Comments were divided concerning the use of set-asides. A number of non-DBE contractors opposed the use of set-asides, some of them saying that set-asides might be something they could live with if their use were balanced by the elimination of DBE contract goals on other contracts in the same field. Some recipients and DBEs said, however, that set-asides were a useful tool to achieve goals, particularly for start-up contractors or small contracts.

The Department has carefully reviewed these comments and continues to believe that set-asides should not be used in the DBE program unless they are absolutely necessary to address a specific problem when no other means

would suffice. If a recipient has been unable to remedy the effects of egregious discrimination through other means, it may, as a last resort, make limited use of set-asides to the extent necessary to resolve the problem.

Section 26.45 How Do Recipients Set Overall Goals?

Since its inception, the recipient's overall goal has been the heart of the DBE program. Responding to *Adarand*, DOT clarified the theory and purpose of the overall goal in the SNPRM. In the proposed rule, the Department made clear that the purpose of the overall goal—and, in fact, the DBE program as a whole—is to achieve a "level playing field" for DBEs seeking to participate in federal-aid transportation contracting. To reach a level playing field, recipients need to examine their programs and their markets and determine the amount of participation they would expect DBEs to achieve in the absence of discrimination and the effects of past discrimination. The focus of the goal section of the SNPRM was to propose ways to measure what a level playing field would look like and to seek input on the availability of data to make such a measurement.

The Proposed Rule and Comments

The Department proposed several options that recipients might use for setting overall goals, including three alternative formulas for measuring the availability of ready, willing and able DBEs in local markets. The specific formulas will be discussed below, but generally, they each called for setting a goal that reflected the percentage of locally available firms that were DBEs (i.e. dividing the number of DBEs by the number of all businesses). On all of the alternatives, the SNPRM sought comments on both the feasibility and practical value of the options, as well as the prospects for combining any of the approaches and the question of whether to mandate a single approach or allow each recipient to choose amongst the options. We invited commenters to propose changes to any of the details of the options or to devise entirely new ones. Finally, we asked commenters for their input on the availability of reliable data for use with each of the options.

Hundreds of commenters of all types—including DBEs and non-DBEs, prime and subcontractors, state and local recipients, industry and interest groups and private individuals—responded with a wealth of feedback, opinions and data. It is an understatement to say that there was no consensus among commenters as to the best way to set overall goals. Support for

the proposed options was almost evenly spread over the choices presented, with many commenters firmly against all of the options. Still more suggested that the current, non-formulaic method was the best way to ensure the flexibility to respond to local market conditions. Similarly, among those who expressed an opinion, commenters were split between the propriety of choosing a single "best" method and imposing it on all recipients and allowing recipients to choose amongst all the options. One of the few universal themes in the goal-setting comments was the problem of the availability of reliable data on the number of DBE and non-DBE contractors.

There were a few common threads that different groups of commenters tended to apply to all of the formulas. Among recipients, many comments focused on the lack of data about non-DBE contractors, especially subcontractors. Recipients often noted that they would not have the information needed for the denominator of any of the formulas (i.e. the total number of available businesses). Non-DBE contractors—and industry groups representing them—generally believed that there should be a capacity measure built into any goal setting mechanism. Finally, DBEs—and their industry associations—were concerned that all of the formulas would create goals based only on the current number of DBEs, locking in the effects of past discrimination by ignoring the fact that the lack of opportunities in the past has suppressed the number of DBE firms available today.

Under the proposed rule's Alternative 1, recipients would calculate the percentage of DBE firms in their directories among all firms available to work on their DOT-assisted contracts. Under Alternative 2, recipients would calculate the percentage of all minority- and women-owned firms in certain SIC codes in their areas among all firms in these SIC codes in the same areas. Under Alternative 3, recipients would calculate a percentage based on the average number of DBE firms that had worked on their DOT-assisted contracts in recent years divided by the average number of all firms that had worked on their DOT-assisted contracts in the same period. The SNPRM also proposed that recipients could use other means, such as disparity studies or goals developed by other recipients serving the same area, as a basis for their goals.

Each of the three proposed alternatives received some support, though this was often the rather tepid endorsement of commenters who felt that one or another alternative was the

best of a bad lot. Non-DBE contractors often claimed that the alternatives would unfairly increase goals, while DBE contractors often claimed that the same proposals would unfairly decrease goals.

Commenters said that data for determining the denominators of the equations in Alternatives 1 and 2, as well as the numerator in Alternative 2, did not exist and that it would be a major, time-consuming job to begin to obtain the data. Adaptation of existing information from other sources (e.g., Census data) was said to have significant statistical difficulties. The difficulty of getting data on out-of-state firms was emphasized in some comments.

Commenters looked on the alternatives as cumbersome, creating unreasonable administrative burdens, and as producing statistical results that were skewed in various ways. The use of DBE directories as the source of the numerator in Alternative 1 was criticized on the basis that directories may contain firms that never actually participate in DOT-assisted contracts. It was suggested that the number of firms bidding rather than the number of firms certified would be a more reliable guide, but it was also pointed out that, because subcontractors seldom formally bid for work, this data would be hard to obtain. Some commenters proposed adding overall population statistics to the mix.

A significant number of commenters—primarily non-DBE contractors, but including some recipients and other commenters as well—emphasized the need to take "capacity" into account. Most popular among these comments was using a capacity version of Alternative 3. These comments did not propose a method of determining the capacity of the firms contracting with the recipient.

The Final Rule

In view of the complexity and importance of the goal setting process and the many issues raised by commenters, the Department has decided to adopt a two step process for goal setting. The process is intended to provide the maximum flexibility for recipients while ensuring that goals are based on the availability of ready, willing and able DBEs in each recipient's relevant market. The Department believes that this approach is critical to meeting our constitutional obligation to ensure that the program is narrowly tailored to remedy the effects of discrimination. The first step of the process will be to create a baseline figure for the relative availability of ready, willing and able DBEs in each

recipient's market. The second step will be to make adjustments from the base figure, relying on an examination of additional evidence, past experience, local expertise and anticipated changes in DOT-assisted contracting over the coming year.

Step 1: Determining a Base Figure for the Overall Goal

The base figure is intended to be a measurement of the current percentage of ready, willing and able businesses that are DBEs. Ensuring that this figure is based on demonstrable evidence of each recipient's relevant market conditions will help to ensure that the program remains narrowly tailored. To be explicit, recipients cannot simply use the 10 percent national goal, their goal from the previous year, or their DBE participation level from the previous year as their base figure. Instead, all recipients must take an actual measurement of their marketplace, using the best evidence they have available, and derive a base figure that is as fair and accurate a representation as possible of the percentage of available businesses that are DBEs.

There are many different ways to measure the contracting market and assess the relative availability of DBEs. As discussed above, the SNPRM proposed three alternate formulas to measure relative availability, none of which were particularly popular with commenters. In this final rule, the Department is placing primary emphasis on the principles underlying the measurement, mandating only that a measurement of the relative availability of DBEs be made on the basis of demonstrable evidence of relevant market conditions, rather than requiring that any particular procedure or formula be used. The final rule contains a number of examples of how to create a base figure which recipients are free to adopt in their entirety or to use as guidelines for how to devise their own measurement.

There are several reasons we have taken this approach. First, the Department is aware of the differences in available data in various markets across the nation. The flexibility inherent in this approach will ensure that all recipients can use the procedure to set a reasonable goal and allow each recipient to use the best data available to it. As discussed in another section, this rule will also provide for the development of more standard data for future goal setting. Second, for many recipients, setting goals in this way will be a new exercise. By fixing only the basic principle, but allowing the methodology to change, recipients will

have the opportunity to fine tune the process each year as their experience grows and the data available to them improve. Finally, the rule makes sure that every recipient will have at least one reasonable and practical goal setting method available to them.

The first example for setting a base figure relies on data sources that are immediately available to all recipients: their DBE directories, and a Census Bureau database that DOT and the Census Bureau will make available to all recipients that wish to use it. This example has its roots in the first two goal setting formulas proposed in the SNPRM. Recipients would first assess the number of ready, willing and able DBEs based on their own directories. For some recipients this will be as simple as counting the number of firms in their directory. For others, particularly those using directories maintained by other agencies, the directories will have to be "filtered" for firms involved in transportation contracting. The resulting number of DBEs would become the numerator. The denominator would then be derived from the Census Bureau's County Business Pattern (CBP) database. We will provide user-friendly electronic access to the database via the internet to allow recipients to input the geographic area and SIC codes in which they contract and receive a number for the availability of all businesses.

There are several issues that must be addressed when comparing numbers derived from two different data sources, some of which were raised in the comments on the SNPRM. Recipients will need to ensure that the scope of businesses included in the numerator is as close as possible to the scope included in the denominator. Using as close as possible to the same SIC codes and geographic base is very important. A recipient using its own DBE directory, particularly one that contains only firms in the fields in which it contracts, will still need to determine what fields it will use for the denominator when sorting through the CBP database. The best way to do this would be to examine their contracting program and determine the SIC codes in which they let the substantial majority of their contracts and subcontracts. The geographic area used for both the numerator and the denominator should cover the area from which the recipient draws the substantial majority of its contractors. While it may be sufficient for some state recipients to use their state borders as their contracting area, local transit and airport recipients will rarely have such an obvious choice. Those recipients will need to more carefully examine the

geographic area from which they draw contractors and base their calculation of both the numerator and denominator of the equation on the same area.

The Department and the Census Bureau will make the CBP data available in a format that gives recipients as much flexibility as possible to tailor the data to their contracting programs. Recipients will be able to extract the data in one block for all of the SIC codes they expect to contract in, or by individual SIC codes, allowing them to

weight the relative availability of DBEs in various fields, giving more weight to the fields in which they spend more money. For example, let us assume a recipient estimates that it will expend 10% of its federal aid funds within SIC code 15, 40% in SIC code 16, 25% in SIC code 17, and the remaining 25% on contracting spread over SIC codes 07, 42 and 87. The recipient could separately determine the relative availability of DBEs for each of the three major construction SIC codes (i.e., 15, 16 and

17) and the relative availability of DBEs in the other three SIC codes grouped together and weight each according to the amount of money to be spent in each area. In this example, the recipient could calculate its weighted base figure by first determining the number of DBEs in its directory for each of the groups, then extracting the availability of CBP businesses for the same groups. It would then perform the following calculation to arrive at a base figure for step one of the goal setting process:

$$\text{Base Figure} = \left[.10 \frac{(\text{DBEs in SIC 15})}{\text{CBPs in SIC 15}} + .40 \frac{(\text{DBEs in 16})}{\text{CBPs in 16}} + .25 \frac{(\text{DBEs in 17})}{\text{CBPs in 17}} + .25 \frac{(\text{DBEs in 07,42,87})}{\text{CBPs in 07,42,87}} \right] \times 100$$

As has been stated generally, this formula is offered only as an example of a way that a recipient could choose to use the CBP database. Recipients using the CBP data should choose whether to weight their calculation, and whether to do so by individual SIC codes or by groups of SIC codes, based on their own assessment of what method will best fit their spending pattern.¹

Finally, there is still the question of the propriety of comparing data from two sources as different as DBE directories and the CBP. As mentioned above, some commenters asserted that the directories may contain firms that do not normally perform DOT-assisted contracts. This problem is greatest, of course, for directories maintained by other agencies for purposes beyond DOT-assisted contracting. We believe that the recipient's knowledge of its contracting needs and the contents of its DBE directory will allow it to solve this problem by sorting the directories by SIC code to extract only the firms likely to be interested in DOT-assisted contracting. Any remaining effect from DBEs that are certified in the relevant SIC codes but still do not intend to compete for DOT-assisted contracts will be more than offset by the hurdles involved in actually becoming a DBE. It is important to note here that the certification process itself, with its paperwork, review and on-site inspection, create a filter on the number of existing firms that will be counted in the numerator without there being any equivalent filter culling firms out of the denominator. Ultimately, the Department chose these two data sources for the example because, while they may not be perfect, they represent

the best universally available current data on both the presence of DBEs and the presence of all businesses in local markets. Any recipient that believes it has available to it better sources of local data from which to make a similar calculation for its base figure is encouraged to use them.

The second example for calculating a base figure is using a bidders list to determine the relative availability of DBEs. The concept is similar to the one described above. The recipient would divide the number of available ready, willing and able DBEs by the number for all firms. The difference is that instead of measuring availability by DBE certifications and Census data, the recipient would measure availability by the number of firms that have directly participated in, or attempted to participate in, DOT-assisted contracting in the recent past. This approach has its roots in Alternative 3 from the SNPRM. Of fundamental importance to this approach is that the recipient would need to include all firms that have sought DOT-assisted contracts, regardless of whether they did so by bidding on a prime contract or quoting a job as a subcontractor. Because most DOT recipients derive the substantial majority of their DBE participation through subcontracting, it is absolutely essential that all DBE and non-DBE firms that quote subcontracts be included in the bidders list.² Bidders lists are a very focussed measure of ready, willing and able firms because they filter the pool of available firms by requiring a demonstration of their ability to participate in the process through tracking and identifying

contracting opportunities, understanding the requirements of a particular job and assembling a bid for it. Another attractive feature of the bidding "filter" is that it applies equally to both DBEs and non-DBEs.

The third example included in the final rule for setting a base figure is using data derived from a disparity study. As was discussed in the SNPRM, the Department is not requiring recipients to do a disparity study, but is only making clear that use of disparity study data by recipients that have them or choose to conduct them is a valid means of setting a goal. Disparity studies generally contain a wide array of statistical data, as well as anecdotal data and analysis that can be particularly useful in the goal setting process. We list disparity studies here, not because they are needed to justify operating the DBE program—Congress has already established the compelling need for the DBE program—but because the data a good disparity study provides can be an excellent guide for a recipient to use to set a narrowly tailored goal.

The Department will not set out specific requirements for what data or analysis is required before a disparity study can be used for setting a goal, because we believe that the design and conduct of the study is best left to the local officials and the professional organizations with which they contract to conduct the studies. Instead, we again offer simple general principles that should apply to all studies used for goal setting. Any study data relied on in the goal setting process should be as recent as possible and be focussed on the transportation contracting industry. When setting the goal, first use the study's statistical evidence to set a base figure for the relative availability of DBEs. Other study information, whether it is anecdotal data, analysis or statistical information about related

¹ While it is not statistically necessary to account for 100% of program dollars when performing this type of weighting, the greater the percentage accounted for, the more accurate the resulting calculation will be.

² To prevent any confusion, it is important to note that the DBE program does not use the so-called "benchmarking" system employed in direct Federal procurement. The benchmarking system relies on a unique database created specifically for use in the federal procurement program.

fields, should be included when making adjustments to the base figure (discussed in more detail below), but not included in the base figure for the relative availability of DBEs.

The last specific example included in the rule is using the goal of another recipient as the base figure for goal setting. This option was also included in the SNPRM. It is intended to avoid duplicative work and to lighten the burden the goal setting process might put on smaller recipients. It is important to note that a recipient could only use another recipient's goal if it was set in accordance with this rule and the other recipient performed similar contracting in a similar market area. Using another recipient's approved goal would only satisfy the first step of the goal setting process. It would serve as the base figure, and could not be used to skip over step two of the process. The recipient would need to examine the same additional evidence it would otherwise use to determine whether to adjust its goal from the base figure, as well as being required to make adjustments to account for differences in its local market or contracting program.

The final rule also maintains the option of devising an alternative method of calculating a base figure for the goal setting process. Explicitly listing this option serves to emphasize the point that the options in the rule are examples meant as guidelines intended to ensure maximum flexibility for recipients. Recipients can use this option to take advantage of their unique expertise or any unique source of data that they have that may not be available to other recipients. The concerned operating administration will review and approve the proposals of recipients that believe they can calculate a base figure that will better reflect their relevant market than any of the examples provided in this rule. Approval will be contingent on the proposals following the same principles that apply to any recipient: the methodology must be based on demonstrable data of relevant market conditions and be designed to reach a goal that the recipient would expect DBEs to achieve in the absence of discrimination.

Step 2: Adjusting the Base Figure

As alluded to above, measuring the relative availability of DBEs to derive a base figure is only the first step of the goal setting process. To ensure that they arrive at goals that truly and accurately reflect the participation they would expect absent the effects of discrimination, recipients must go beyond the formulaic measurement of

current availability to account for other evidence of conditions affecting DBEs. To accomplish this second step, recipients must first survey their jurisdiction to determine what types of relevant evidence is available to them. Then, relying on their own knowledge of their contracting markets they must review the evidence to determine whether either an up or down adjustment from the base figure is needed.

One universally available form of evidence that all recipients should consider is the proven capacity of DBEs to perform work on DOT-assisted contracts. All recipients have been tracking and reporting the dollar volume of work that is contracted and subcontracted to DBEs each year. Viewed in isolation, the past achievements of DBEs do not reflect the availability of DBEs relative to all available businesses, but it is an important and current measure of the ability of DBEs to perform on DOT-assisted contracts.

Though not universally available, there are hundreds of existing disparity studies that contain a wealth of statistical and anecdotal evidence on the utilization of disadvantaged businesses. In addition to being a possible source of data for Step 1 of the goal setting process, disparity studies should be considered during Step 2 of the process. The base figure from Step 1 is intended to determine the relative availability of DBEs. The data and analysis in a disparity study can help a recipient determine whether those existing businesses are under- or over-utilized. If a recipient has a study with disparity ratios showing that existing DBEs are receiving significantly less work than expected, an upward adjustment from the base figure is called for. Similarly, if the disparity ratio shows overutilization, a downward adjustment to the base figure would be warranted. The anecdotal evidence and analysis of contracting requirements and conditions that may have a discriminatory impact on DBEs are also important sources that should be examined when determining what adjustment to make to the base figure.³ Finally, disparity studies that are conducted within a recipient's jurisdiction should be examined even if they were not done specifically for the recipient. For example, a state highway agency may find useful data and

³ It is important to note that adjusting the goal is only part of the response a recipient should make to evidence of discriminatory barriers for DBEs. All recipients have a primary responsibility to ensure non-discrimination in their programs and should act aggressively to remove any discriminatory barriers in their programs.

analysis in either a statewide disparity study covering other agencies or in a disparity study examining contracting in a county or city within the state.

If a recipient uses another recipient's goal as its base figure under Step 1 of the goal setting process, it will have to make additional adjustments to ensure that its final goal is narrowly tailored to its market and contracting program. For example, if a local transit or airport authority adopts a statewide goal as its base figure, it must determine the extent that local relative availability of DBEs differs from the relative availability of DBEs in the contracting area relied on by the state. The local recipient would also need to examine the differences in the type of contracting work in its program and determine whether there are significant differences in the relative availability of DBEs in any fields that are unique to its program—or unique to the program of the other recipient. Similarly, if one local recipient used the goal of another local recipient in the same market as its base figure, it would also need to adjust for differences in the contracting fields used by the two programs.

Finally, the rule contains a brief list of other types of data a recipient could consider when adjusting its base figure to arrive at an overall goal. The list is by no means intended to be exhaustive. Instead, it is meant as a guide to the types of information a recipient should look for in Step 2 of the goal setting process. There is a wide array of relevant local, regional and national information about the utilization of disadvantaged businesses. Recipients are encouraged to cast as wide a net as they can to carefully examine their contracting programs and the public and private markets in which they operate.

Additional Goal Setting Issues

The Department proposed, in both the 1992 NPRM and the 1997 SNPRM, that overall goals be calculated as a percentage of DOT funds a recipient expects to expend in DOT-assisted contracts. This is different from the existing part 23 rule, which asked recipients to set overall goals on the basis of all funds, including state and local funds, to be expended in DOT-assisted contracts. This change is for accounting and administrative convenience and is not intended to have a substantive effect on the program. While not the subject of many comments, those who did comment on the proposal favored the change. The final rule adopts this approach.

A few recipients commented that public participation concerning goal setting was bothersome. Nevertheless,

we view it as an essential part of the goal setting process. There are many stakeholders involved in setting goals, and it is reasonable that they should be involved in the process and have an opportunity for comment. The part 23 provision requiring getting a state governor's approval of a goal of less than 10 percent has been eliminated, both because overall goals are no longer tied to the national 10 percent goal and to reduce administrative burdens.

The goal setting provision of the final rule continues to direct recipients to set one annual overall goal for DBEs, rather than group-specific goals separating minority and women-owned businesses.

Section 26.47 Can Recipients Be Penalized for Failing To Meet Overall Goals?

This is a new section of the regulation, the purpose of which is to clarify the Department's views on the situations in which it is appropriate to impose sanctions on recipients with respect to goals. The provision states explicitly what has long been the Department's policy: no recipient is sanctioned, or found in noncompliance, simply because it fails to meet its overall goal. In fact, through the history of the DBE program, the Department never has sanctioned a recipient for failing to obtain a particular amount of DBE participation.

On the other hand, if a recipient fails to set an overall goal which the concerned operating administration approves, or fails to operate its program in good faith toward the objective of meeting the goal, it is subject to a finding of noncompliance and possible sanctions. For example, if a recipient refuses to establish a goal or, having established one, does little or nothing to work toward attaining it, it would be reasonable for the Department to find the recipient in noncompliance. Like all compliance provisions of the rule, this provision is subject to the "court order" exception recently created by statute (see § 26.101(b)).

Section 26.49 How Are Overall Goals Established for Transit Vehicle Manufacturers?

This provision basically continues in effect the existing transit vehicle manufacturer (TVM) provisions of the rule. The SNPRM proposed to change the existing rule in two respects. FHWA or FAA recipients could avail themselves of similar provisions, if they chose. The final rule retains this flexibility. Also, it was proposed that FTA, rather than manufacturers, would set TVM goals. The few comments we received on this section objected to the

latter change. Consequently, we will not adopt the proposed change and will continue to require the TVMs themselves to set their own goals based on the principles outlined in § 26.45 of this rule.

Section 26.51 What Means Do Recipients Use To Meet Overall Goals?

One of the key points of both the SNPRM and this final rule is that, in meeting overall goals, recipients have to give priority to race-neutral means. By race-neutral means (a term which, for purposes of this rule, includes gender neutrality), we mean outreach, technical assistance, procurement process modification, etc.—measures which can be used to increase opportunities for all small businesses, not just DBEs, and do not involve setting specific goals for the use of DBEs on individual contracts. Contract goals, on the other hand, are race-conscious measures.

In the context of these definitions, it is important to note that awards of contracts to DBEs are not necessarily race-conscious actions. Whenever a DBE receives a prime contract because it is the lowest responsible bidder, the resulting DBE participation was achieved through race-neutral means. Similarly, when a DBE receives a subcontract on a project that does not have a contract goal, its participation was also achieved through race-neutral means. Finally, even on projects that do carry contract goals, when a prime awards a particular subcontract to a DBE because it has proven in the past that it does the best or quickest work, or because it submitted the lowest quote, the resulting DBE participation has, in fact, been achieved through race-neutral means. We also note that the use of race-neutral measures (e.g., outreach, technical assistance) specifically to increase the participation of DBEs does not convert these measures into race-conscious measures.

A number of non-DBE contractors commented that race-neutral measures should not only be given priority, but must be tried and fail before any use of contract goals can occur. This, they asserted, is essential for a program to be narrowly tailored. The law on this point is fairly clear, and does not support the commenters' contention. The extent to which race-neutral alternatives were considered and deemed inadequate to remedy the problem is the relevant narrow tailoring question. Both in past legislation and when considering TEA-21, Congress did consider race-neutral alternatives. In fact, as described above, throughout the debate, Member after Member gave examples of how state and local race-neutral programs without

goals fail to overcome the discriminatory barriers that face DBEs. Congress' careful consideration and conclusion that race-neutral means are insufficient, buttressed by this rule's emphasis on achieving as much of the goal as possible through race-neutral means, satisfies this part of the narrow tailoring requirement.

No one opposed the use of race-neutral means, though a number of DBEs and recipients stressed that these means, standing alone, were insufficient to address discrimination and its effects. Most recipients and non-DBE contractors supported the use of race-neutral measures, though some recipients said that increased use of these measures would require additional resources.

The relationship between race-conscious and race-neutral measures in the final rule is very important. The recipient establishes an overall goal. The recipient estimates, in advance, what part of that goal it can meet through the use of race-neutral means. This projection, and the basis for it, would be provided to the concerned operating administration at the same time as the overall goal, and is subject to OA approval.

The requirement of the rule is that the recipient get the maximum feasible DBE participation through race-neutral means. The recipient uses race-conscious measures (e.g., sets contract goals) to get the remainder of the DBE participation it needs to meet the overall goal. If the recipient expects to be able to meet its entire overall goal through race-neutral means, it could, with OA approval, implement its program without any use of contract goals.

For example, suppose Recipient X establishes an 11 percent overall goal for Fiscal Year 2000. This is the amount of DBE participation that X has determined it would have if the playing field were level. Recipient X projects that, using a combination of race-neutral means, it can achieve 5 percent DBE participation. Recipient X then sets contract goals on some of its contracts throughout the year to bring in an additional 6 percent DBE participation. Recipients would keep data separately on the DBE participation obtained through those contracts that either did or did not involve the use of contract goals. Recipients would use this and other data to adjust their use of race-neutral means and contract goals during the remainder of the year and in future years. For example, if Recipient X projected being able to attain 5 percent DBE participation through race-neutral measures, but was only able to obtain 1 percent from the race-neutral measures

It used, Recipient X would increase its future use of contract goals. On the other hand, if Recipient X exceeded its prediction that it would get 5 percent DBE participation from race-neutral measures and actually obtained 10 percent DBE participation from the contracts on which there were no contract goals, it would reduce its future use of contract goals. A recipient that was consistently able to meet its overall goal using only race-neutral measures would never need to use contract goals.

Most recipients and non-DBE contractors agreed with the SNPRM's proposal that (contrary to the part 23 provision on this subject) contract goals not be required on all contracts. This provision is retained in the final rule. We believe that this provision provides recipients the ability to achieve the objective of a narrowly tailored program. The rule also reiterates that the contract goal need not be set at the same level as the overall goal. To express this more clearly, let us return to the above example of Recipient X. Just because Recipient X has an overall goal of 11 percent, it does not have to set a contract goal on each contract. Nor does it have to establish an 11 percent goal on each contract on which it does set a contract goal. Indeed, since X has projected that it can achieve almost half of its overall goal through race-neutral means, it would most likely set contract goals on some contracts but not on others. On contracts with a contract goal, the goal might be 4 percent one time, 18 percent another time, 9 percent another time, depending on the actual work involved in each contract, the location of the work and the subcontracting opportunities available. The idea is for X to set contract goals that, cumulatively over the year, bring in 6 percent DBE participation, which, added to the 5 percent participation X projects achieving from race-neutral measures, ends up meeting the 11 percent overall goal.

The SNPRM asked for comment on evaluation credits as an additional race-conscious measure that recipients could use to meet overall goals. The vast majority of the many comments on this subject opposed the use of evaluation credits, on both legal (e.g., as contrary to narrow tailoring) and policy (e.g., as confusing and subjective) grounds. A smaller number of commenters favored at least giving recipients discretion to use this tool. While the Department does not agree with the contention that evaluation credits are legally suspect, we do agree with much of the sentiment against using them in the DBE program, particularly the practical difficulties they might involve when applied to

subcontracting (which constitutes the main source of DBE participation in the program). As a result, the final rule does not contain an evaluation credits provision.

The SNPRM proposed certain mechanisms for determining when it was appropriate to ratchet back the use of contract goals. Most commenters said they found these particular mechanisms complicated and confusing. The Department believes that, as a matter of narrow tailoring, it is important to have concrete mechanisms in place to ensure that race-conscious measures like contract goals are used only to the extent necessary to ensure a level playing field. The final rule contains examples of four such mechanisms.

The first mechanism applies to a situation in which a recipient estimates that it can meet its overall goal exclusively through the use of race-neutral goals. In this case, the recipient simply does not set contract goals during the year. The second mechanism takes this approach one step further. If the recipient meets its overall goal two years in a row using only race-neutral measures, the recipient continues to use only race-neutral measures in future years, without having to project each year how much of its overall goal it anticipates meeting through race-neutral and race-conscious means, respectively. However, if in any year the recipient does not meet its overall goal, the recipient must make the projection for the following year, using race-conscious means as needed to meet the goal.

The third mechanism applies to recipients who exceed their overall goals for two years in a row while using contract goals. In the third year, when setting their overall goal and making their projection of the amount of DBE participation they will achieve through race-neutral means, they would determine the average percentage by which they exceeded their overall goals in the two previous years. They would then use that percentage to reduce their reliance on contract goals in the coming year, as noted in the regulatory text example. The rationale for this reduction is that the recipient's overall goal represents its best estimation of the participation level expected for DBEs in the absence of discrimination. By exceeding that goal consistently, the recipient may be relying too heavily on race-conscious measures. Scaling back the use of contract goals—while keeping careful track of DBE participation rates on projects without contract goals—will ensure that the recipient's DBE program remains narrowly tailored to overcoming the continuing effects of discrimination.

The fourth mechanism operates within a given year. If a recipient determines part way through the year that it will exceed (or fall short of) its overall goal, and it is using contract goals during that year, it would scale back its use of contract goals (or increase its use of race-neutral means and/or contract goals) during the remainder of the year to ensure that it is using an appropriate balance of means to meet its "level playing field" objectives.

There were also a number of comments on how contract goals should be expressed. Most favored continuing the existing practice of adding together the Federal and local shares of a contract and expressing the contract goal as a percentage of the sum because it works well and avoids confusion. A few comments favored expressing contract goals as a percentage of only the Federal share of a contract. Ultimately, we believe that it is not necessary for the Department to dictate which method to use. Recipients may continue to use whichever method they feel works best and allows them to accurately track the participation of DBEs in their program. Recipients need only ensure that they are consistent and clearly express the method they are using, and report to the Department the total federal aid dollars spent and the federal aid dollars spent with DBEs.

As a last note on this topic, FAA recipients are reminded that funds derived from passenger facility charges (PFCs) are not covered by this part and should not be counted as part of the Federal share in any goal calculation. If a recipient chooses to express its contract goals as a percentage of the combined Federal and local share, it may include the PFC funds as part of the local share.

Section 26.53 What Are the Good Faith Efforts Procedures Recipients Follow in Situations Where There Are Contract Goals?

There was little disagreement about the main point of this section. When a recipient sets a contract goal, the basic obligation of bidders is to make good faith efforts (GFE) to meet it. They can demonstrate these efforts in either of two ways, which are equally valid. First, they can meet the goal, by documenting that they have obtained commitments for enough DBE participation to meet the goal. Second, even though they have not met the goal, they can document that they have made good faith efforts to do so. The Department emphasizes strongly that this requirement is an important and serious one. A refusal by a recipient to accept valid showings of

good faith is not acceptable under this rule.

Appendix A discusses in greater detail the kinds of good faith efforts bidders are expected to make. There was a good deal of comment concerning its contents. Non-minority contractors recited that good faith efforts standards should be "objective, measurable, realistically achievable, and standardized." Not one of these comments provided any examples or suggestions of what "objective, measurable, realistically achievable, and standardized" standards would look like, however. Certainly a one-size-fits-all checklist is neither desirable nor possible. What constitutes a showing of adequate good faith efforts in a particular procurement is an intrinsically fact-specific judgment that recipients must make. Circumstances of procurements vary widely, and GFE determinations must fit each individual situation as closely as possible.

The proposed good faith efforts appendix suggested that one of the factors recipients could take into account is the behavior of bidders other than the apparent successful bidder. For example, if the latter failed to meet the contract goal, but other bidders did, that could suggest that the apparent successful bidder had not exerted sufficient efforts to get DBE participation. Recipients who commented on this issue favored the concept; non-DBE contractors opposed it. The final rule's Appendix A makes clear that recipients are not to use a "conclusive presumption" approach, in which the apparent successful bidder is summarily found to have failed to make good faith efforts simply because another bidder was able to meet the goal. However, the track record of other bidders can be a relevant factor in a GFE determination, in more than one way. If other bidders have met the goal, and the apparent successful bidder has not, this at least raises the question of whether the apparent successful bidder's efforts were adequate. It does not, by itself, prove that the apparent successful bidder did not make a good faith effort to get DBE participation, however. On the other hand, if the apparent successful bidder—even if it failed to meet the goal—got as much or more DBE participation than other bidders, then this fact would support the apparent successful bidder's showing of GFE. The revised Appendix makes these points.

The proposed good faith efforts appendix also expanded on language in part 23 concerning price-based decisions by prime contractors. The existing language provides that a

recipient can use, as evidence of a bidder's failure to make good faith efforts, the recipient's rejection of a DBE subcontractor's "reasonable price" offer. The SNPRM added that a recipient could set a price differential from 1–10 percent to evaluate bidders' efforts. If a bidder did not meet the goal and rejected a DBE offer within the range, the recipient could view the bidder as not making good faith efforts. This was an attempt to provide additional, quantified, guidance to recipients on this issue.

Comment was mixed on this issue. Non-DBE prime contractors generally opposed the price differential idea, saying that it encouraged deviations from the traditional low bid system. It should be noted, however, that subcontracts are typically awarded outside any formal low bid system. Some recipients thought that it was a bad idea to designate a range, because it would limit their discretion, while others liked the additional definiteness of the range. Most recipients supported the "reasonable price" concept in general, even if they had their doubts about the value of a range. Some DBE organizations favored the range approach.

Taking all the comments into consideration, the Department has decided to retain language similar to that of part 23, without reference to any specific range. Appendix A now provides that the fact that some additional costs may be involved in finding and using DBEs is not in itself sufficient reason for a bidder's failure to meet a DBE contract goal, as long as such costs are reasonable. Along with this emphasis on the reasonableness of the cost necessarily comes the fact that prime contractors are not expected to bear unreasonable costs. The availability of a good faith efforts waiver of the contract goal helps to ensure that a prime contractor will not be in a position where it has to accept an excessive or unreasonable bid from a DBE subcontractor. At the same time, any burden that a non-DBE subcontractor might face is also limited by the reasonableness of competing bids. This approach retains flexibility for recipients while avoiding the concerns commenters expressed about a particular range.

The SNPRM proposed that recipients would have to provide for an administrative review of decisions that a bidder's GFE showing was inadequate. The purpose of the provision was to ensure that recipients did not arbitrarily dismiss bidders' attempts to show that they made good faith efforts. The provision was meant to emphasize the

seriousness with which the Department takes the GFE requirement and to help respond to allegations that some recipients administered the program in a quota-like fashion. The SNPRM also asked whether such a mechanism should be operated entirely by the recipient or whether a committee including representatives of DBE and non-DBE contractors should be involved.

A number of recipients, and a few contractors, opposed the idea on the basis of concern about administrative burdens on recipients and potential delays in the procurement process. A greater number of commenters, largely non-DBE contractors but also including recipients and DBEs, supported the proposal as ensuring greater fairness in the process. A significant majority of all commenters said that the recipient should operate the system on its own, because a committee would make the process more cumbersome and raise conflict of interest issues.

The Department will adopt this proposal, which should add to the fairness of the system and make allegations of *de facto* quota operations less likely. The Department intends that reconsideration be administered by recipients. The regulation does not call for a committee involving non-recipient personnel. The Department intends that the process be informal and timely. The recipient could ensure that the process be completed within a brief period (e.g., 5–10 days) to minimize any potential delay in procurements. The bidder would have an opportunity to meet with the reconsideration official, but a formal hearing is not required. To ensure fairness, the reconsideration official must be someone who did not participate in the original decision to reject the bidder's showing. The recipient would have to provide a written decision on reconsideration, but there would be no provision for administrative appeals to DOT.

A point raised by several non-DBE commenters was that DBEs should have to make good faith efforts (even when they were not acting as prime contractors). The commenters suggested things like providing capacity statements and documenting that they have bid on contracts. This point is unrelated to the subject of this section, which has to do with what efforts bidders for prime contracts have to make to show that they have made to obtain DBE subcontractors. It is difficult to see what purpose the additional paperwork burdens these commenters' requests would serve.

One of the most hotly debated issues among commenters was whether DBE

firms bidding on prime contracts should have to meet goals and make good faith efforts to employ DBE subcontractors. Under part 23, DBE prime contractors did not have to meet goals or make good faith efforts. The rationale for this position was that, as DBEs, 100 percent of the work of these contractors counted toward recipients' contract goals, which the firms automatically met.

A significant majority of commenters on this issue—particularly non-DBE contractors but also including some recipients and a few DBEs—argued that DBE primes should meet goals and make GFE the same as other contractors. Failing to do so, they said, went beyond providing a level playing field to the point of providing an unfair advantage for DBE bidders for prime contracts. This change would also increase opportunities for DBE subcontractors, they said. One comment suggested requiring DBE prime contractors to meet goals or make GFE, but stressed that work they performed with their own forces as well as work awarded to DBE subcontractors should count toward goals.

Supporters of the current system said that many prime contracts performed by DBEs are too small to permit subcontracting (of course, goals need be set only on contracts with subcontracting possibilities). Moreover, these commenters—mostly DBEs and recipients—said that there was already inequity as between DBEs and non-DBEs, and requiring DBEs to meet the same requirements simply maintained the inequity. There was also some support for a third option the Department included in the SNPRM, in which DBEs would have to meet goals and make GFE to the extent that work they proposed to perform with their own forces was insufficient to meet goals.

The Department believes that, in a rule aimed at providing a level playing field for DBEs, it is appropriate to impose the same requirements on all bidders for prime contracts. Consequently, part 26 will depart from the part 23 approach and require DBE prime contractors to meet goals and make good faith efforts on the same basis as other prime contractors. However, in recognition of the DBE bidders' status as DBEs, we will permit them to count toward goals the work that they commit to performing with their own forces, as well as the work that they commit to be performed by DBE subcontractors. DBE bidders on prime contracts will be expected to make the same outreach efforts as other bidders and to document good faith

efforts in situations where they do not fully meet contract goals.

Under part 23 and the SNPRM, recipients have a choice between handling bidder compliance with contract goals and good faith efforts requirements as a matter of responsiveness or responsibility. Some recipients and other contractors recounted successful experience with one approach or the other, and suggested reasons why everyone should follow each approach (e.g., responsiveness as a deterrent to bid-shopping; responsibility as a more flexible and cost-effective approach). Both approaches have their merits, and the Department believes the best course is to maintain the existing recipient discretion on this issue.

Some recipients use so-called "design-build" or "turnkey" contracts, in which the design and construction of an entire project is contracted out to a master contractor. The master contractor then lets subcontracts, which are often equivalent to the prime contracts that the recipient would let if it were designing and building the project directly. In a sense, the master contractor stands in the shoes of the recipient.

On design-build contracts, the normal process for setting contract goals does not fit the contract award process well. At the time of the award of the master contract, neither the recipient nor the master contractor knows in detail what the project will look like or exactly what contracting opportunities there will be, let alone the identity of DBEs who may subsequently be involved. In these situations, the recipient may alter the normal process, setting a project goal to which the master contractor commits. Later, when the master contractor is letting subcontracts, it will set contract goals as appropriate, standing in the shoes of the recipient. The recipient will exercise oversight of this process.

The final issue in this section has to do with replacement of DBEs that drop out of a contract. What actions, if any, should a prime contractor have to take when a DBE is unable to complete a subcontract, for whatever reason? Should it matter whether or not the DBE's participation is needed to achieve the prime contractor's goal?

Comment on this issue came mostly from recipients, with some non-DBE contractors and a few DBEs providing their views. A majority of the commenters believed that replacement of a fallen-away DBE with another DBE (or making a good faith effort toward that end) should be required only when needed to ensure that the prime contractor continued to meet its contract

goal. Others said that, since using DBEs to which the prime had committed at the time of award was a contractual requirement, replacement or good faith efforts should be required regardless of the prime's ability to meet the goal without the lost DBE's participation.

The Department believes that, in a narrowly tailored rule, it is not appropriate to require DBE participation at a level exceeding that needed to ensure a level playing field. Consequently, we will require a prime contractor to replace a fallen-away DBE (or to demonstrate that it has made good faith efforts toward that end) only to the extent needed to ensure that the prime contractor is able to achieve the contract goal established by the recipient for the procurement. The Department will also retain the SNPRM provision—supported by most commenters who mentioned it—that a prime contractor may not terminate a DBE firm for convenience and then perform the work with its own forces without the recipient's written consent. This provision is intended to prevent abuse of the program by a prime contractor who would commit to using a DBE and then bump the DBE off the project in favor of doing the work itself.

Section 26.55 How Is DBE Participation Counted Toward Goals?

In a narrowly tailored program, it is important that DBE credit be awarded only for work actually being performed by DBEs themselves. The necessary implication of this principle is that when a DBE prime contractor or subcontractor subcontracts work to another firm, the work counts toward DBE goals only if the other firm is itself a DBE. This represents a change from the existing rule and the SNPRM, which said that all the work of a DBE's contract (implicitly including work subcontracted to non-DBEs) counts toward goals. A few comments urged such a change. The new language is also consistent with the way that the final rule treats goals for DBE prime contractors.

The value of work performed by DBEs themselves is deemed to include the cost of materials and supplies purchased, and equipment leased, by the DBE from non-DBE sources. For example, if a DBE steel erection firm buys steel from a non-DBE manufacturer, or leases a crane from a non-DBE construction firm, these costs count toward DBE goals. There is one exception: if a DBE subcontractor buys supplies or leases equipment from the prime contractor on its contract, these costs do not count toward DBE goals. Several comments from prime contractors suggested these costs should

count, but this situation is too problematic, in our view, from an independence and commercially useful function (CUF) point of view to permit DBE credit.

One of the most difficult issues in this section concerns how to count DBE credit for the services of DBE trucking firms. The SNPRM proposed that, to be performing a CUF, a DBE trucking firm had to own 50 percent of the trucks it used in connection with a contract. A number of comments said that this requirement was out of step with industry practice, which commonly involves companies leasing trucks from owner-operators and other sources for purposes of a project. In response to these comments, the Department revisited this issue and reviewed the trucking CUF policies of a number of states. The resulting provision requires DBEs to have overall control of trucking operations and own at least one truck, but permits leasing from a variety of sources under controlled conditions, with varying consequences for DBE credit awarded.

A DBE need not provide all the trucks on a contract to receive credit for transportation services, but it must control the trucking operations for which it seeks credit. It must have at least one truck and driver of its own, but it can lease the trucks of others, both DBEs and non-DBEs, including owner operators. For work done with its own trucks and drivers, and for work with DBE lessees, the firm receives credit for all transportation services provided. For work done with non-DBE lessees, the firm gets credit only for the fees or commissions it receives for arranging the transportation services, since the services themselves are being performed by non-DBEs.

When we say that a DBE firm must own at least one of the trucks it uses on a contract, we intend for recipients to have a certain amount of discretion for handling unexpected circumstances, beyond the control of the firm. For example, suppose firm X starts the contract with one truck it owns. The truck is disabled by an accident or mechanical problem part way through the contract. Recipients need not conclude that the firm has ceased to perform a commercially useful function.

Most commenters who addressed the issue agreed with the SNPRM proposal that a DBE does not perform a CUF unless it performs at least 30 percent of the work of a contract with its own forces (a few commenters suggested 50 percent). This provision has been retained. A commenter suggested that the use of two-party checks by a DBE and another firm should not

automatically preclude there being a CUF. While we do not believe it is necessary to include rule text language on this point, we agree with the commenter. As long as the other party acts solely as a guarantor, and the funds do not come from the other party, we do not object to this practice where it is a commonly-recognized way of doing business. Recipients who accept this practice should monitor its use closely to avoid abuse.

One commenter noted an apparent inconsistency between counting 100 percent of the value of materials and supplies used by a DBE construction contractor (e.g., in the context of a furnish and install contract) and counting only 60 percent of the value of goods obtained by a non-DBE contractor from a DBE regular dealer. The two situations are treated differently, but there is a policy reason for the difference. There is a continuing concern in the program that, if non-DBEs are able to meet DBE goals readily by doing nothing more than obtaining supplies made by non-DBE manufacturers through DBE regular dealers, the non-DBEs will be less likely to hire DBE subcontractors for other purposes. As a policy matter, the Department does not want to reduce incentives to use DBE subcontractors, so we have not permitted 100 percent credit for supplies in this situation. Giving 100 percent credit for materials and supplies when a DBE contractor performs a furnish and install contract does not create the same type of disincentive, so the policy concern does not apply. In our experience, the 60 percent credit has been an effective incentive for the use of DBE regular dealers, so those firms are not unduly burdened.

Section 26.61 How Are Burdens of Proof Allocated in the Certification Process?

This section, which states a "preponderance of evidence" standard for applicants' demonstration to recipients concerning group membership, ownership, control, and business size, received favorable comment from all commenters who addressed it. We are retaining it with only one change, a reference to the fact that, in the final rule, recipients will collect information concerning the economic status of prospective DBE owners.

Section 26.63 What Rules Govern Group Membership Determinations?

There were several comments on details of this provision. One commenter suggested that tribal

registration be used as an identifier for Native Americans. The suggestion is consistent with long-standing DOT guidance; however this section of the regulation is meant to set out general rules applicable to all determinations of group membership, not to enumerate means of making the determination for specific groups. The same commenter suggested that if someone knowingly misrepresents himself as a group member, he should not be given further consideration for eligibility. Misrepresentation of any kind on an application is a serious matter. Indeed, misrepresentation of material facts in an application can be grounds for debarment or even criminal prosecution. While it would certainly be appropriate for recipients to take action against someone who so misrepresented himself, the regulatory text on group membership is not the place to make a general point about the consequences of misrepresentation.

Some commenters wanted further definition of what "a long period of time" means. We believe it would be counterproductive to designate a number of years that would apply in all cases, since circumstances are likely to differ. The point is to avoid "certification conversions" in which an individual suddenly discovers, not long before the application process, ancestry or culture with which he previously has had little involvement.

We are adopting the SNPRM provision without substantive change.

Section 26.65 What Rules Govern Business Size Determinations?

By statute, the Department is mandated to apply SBA small business size standards to determining whether a firm is a small business. The Department is also mandated to apply the statutory size cap (\$16.6 million in the current legislation, which the Department adjusts for inflation from time to time). Consequently, the Department cannot adopt the variety of comments we received to adjust size standards or the gross receipts cap to take differences among industries or regions into account. We are adopting the proposed language, using the new statutory gross receipts cap. As under part 23, a firm must fit under both the relevant SBA size standard and the generally applicable DOT statutory cap to be eligible for certification.

A few commenters asked for additional guidance for situations in which a firm is working in more than one SIC code, and the SBA size standards for the different SIC codes are different. First, size determinations are made for the firm as a whole, not for one

division or another. Second, suppose the size of Firm X (e.g., determined through looking at the firm's gross receipts) is \$5 million, and X is seeking certification as a DBE in SIC code yyyy and zzzz, whose SBA small business size standards are \$3.5 and \$7 million, respectively. Firm X would be a small business that could be certified as a DBE, and that could receive DBE credit toward goals, in SIC code zzzz but not in SIC code yyyy. This approach to the issue of differing standards being involved with the same firm fits in well with the general requirement of part 26 that certification be for work in particular SIC codes.

Section 26.67 What Rules Determine Social and Economic Disadvantage?

The statutes governing the DBE program continue to state that members of certain designated groups are presumed to be both socially and economically disadvantaged. Therefore, the Department is not adopting comments suggesting that one or both of the presumptions be eliminated from the DBE rule. While the rule does specify that applicants who are members of the designated groups do have to submit a signed certification that they are, in fact, socially and economically disadvantaged, this requirement should not be read as making simple "self-certification" sufficient to establish disadvantage. As has been the case since the beginning of the DBE program, the presumptions of social and economic disadvantage are rebuttable.

The Department is making an important change in this provision in response to comments about how to rebut the presumption of economic disadvantage. Recipient comments unanimously said that recipients should collect financial information, such as statements of personal net worth (PNW) and income tax returns, in order to determine whether the presumption of economic disadvantage really applies to individual applicants. Particularly in the context of a narrowly tailored program, in which it is important to ensure that the benefits are focussed on genuinely disadvantaged people (not just anyone who is a member of a designated group), we believe that these comments have merit. While charges by opponents of the program that fabulously wealthy persons could readily participate under part 23 have been exceedingly hyperbolic and inaccurate (e.g., references to the Sultan of Brunei as a potential DBE), it is appropriate to give recipients this tool to make sure that non-disadvantaged persons do not participate.

For this reason, part 26 requires recipients to obtain a signed and notarized statement of personal net worth from all persons who claim to own and control a firm applying for DBE certification and whose ownership and control are relied upon for DBE certification. These statements must be accompanied by appropriate supporting documentation (e.g., tax returns, where relevant). The rule does not prescribe the exact supporting documentation that should be provided, and recipients should strive for a good balance between the need for thorough examination of applicants' PNW and the need to limit paperwork burdens on applicants. For reasons of avoiding a retroactive paperwork burden on firms that are now certified, the rule does not require recipients to obtain this information from currently certified firms. These firms would submit the information the next time they apply for renewal or recertification. The final rule's provisions on calculating personal net worth are derived directly from SBA regulations on this subject (see 13 CFR § 124.104(c)(2), as amended on June 30, 1998).

One of the primary concerns of DBE firms commenting about submitting personal financial information is ensuring that the information remains confidential. In response to this concern, the rule explicitly requires that this material be kept confidential. It may be provided to a third party only with the written consent of the individual to whom the information pertains. This provision is specifically intended to preempt any contrary application of state or local law (e.g., a state freedom of information act that might be interpreted to require a state transportation agency to provide to a requesting party the personal income tax return of a DBE applicant who had provided the return as supporting documentation for his PNW statement). There is one exception to this confidentiality requirement. If there is a certification appeal in which the economic disadvantage of an individual is at issue (e.g., the recipient has determined that he or she is not economically disadvantaged and the individual seeks DOT review of the decision), the personal financial information would have to be provided to DOT as part of the administrative record. The Department would treat the information as confidential.

Creating a clear and definitive standard for determining when an individual has overcome the economic disadvantage that the DBE program is meant to remedy has long been a contentious issue. In 1992, the

Department proposed to use a personal net worth standard of \$750,000 to rebut the presumption of disadvantage for members of the designated groups. In 1997, the Department proposed a similar idea, though rather than use the \$750,000 figure, the SNPRM asked the public for input on what the specific amount should be. Finally, as discussed in detail above, the issue of ensuring that wealthy individuals do not participate in the DBE program was a central part of the 1998 Congressional debate.

Public comment on both proposals was sharply divided. Roughly equal numbers of commenters thought \$750,000 was too high as thought it was too low. Commenters proposed figures ranging from \$250,000 to \$2 million. Others supported the \$750,000 level, which is based on the SBA's threshold for participation in the SDB program (it is also the retention level for the 8(a) program). One theme running through a number of comments was that recipients should have discretion to vary the threshold depending on such factors as the local economy or the type of firms involved. Some comments opposed the idea of a PNW threshold altogether or suggested an alternative approach (e.g., based on Census data about the distribution of wealth).

Others commented that rebutting the presumption did not go far enough, pointing out that the only way to ensure that wealthy people did not participate in the program was for the threshold to act as a complete bar on the eligibility of an individual to participate in the program. Congress appears to share this concern. While they differed on the effectiveness of past DOT efforts, both proponents and opponents of the program agreed that preventing the participation of wealthy individuals was central to ensuring the constitutionality of the DBE program.

The Department agrees and, in light of the comments and the intervening TEA-21 debate, is adopting the clearest and most effective standard available: when an individual's personal net worth exceeds the \$750,000 threshold, the presumption of economic disadvantage is conclusively rebutted and the individual is no longer eligible to participate in the DBE program. The Department is using the \$750,000 figure because it is a well established and effective part of the SBA programs and is a reasonable middle ground in view of the wide range of comments calling for higher or lower thresholds. Using a figure any lower, as some commenters noted, could penalize success and make growth for DBEs difficult (since, for example, banks and insurers frequently

look to the personal assets of small business owners in making lending and bonding decisions). Operating the threshold as a cap on eligibility for all applicants also serves to treat men and women, minorities and non-minorities equally.

When a recipient determines, from the PNW statement and supporting information, that an individual's personal net worth exceeds \$750,000, the recipient must deem the individual's presumption of economic disadvantage to have been conclusively rebutted. No hearing or other proceeding is called for in this case. When this happens in the course of an application for DBE eligibility, the certification process for the applicant firm stops, unless other socially and economically disadvantaged owners can account for the required 51 percent ownership and control. A recipient cannot count the participation of the owner whose presumption of economic disadvantage has been conclusively rebutted toward the ownership and control requirements for DBE eligibility.

There may be other situations in which a recipient has a reasonable basis (e.g., from information in its own files, as the result of a complaint from a third party) for believing that an individual who benefits from the statutory presumptions is not really socially and/or economically disadvantaged. In these cases, the recipient may begin a proceeding to rebut the presumptions. For example, if a recipient had reason to believe that the owner of a currently-certified firm had accumulated personal assets well in excess of \$750,000, it might begin such a proceeding. The recipient has the burden of proving, by a preponderance of evidence, that the individual is not disadvantaged. However, the recipient may require the individual to produce relevant information.

It is possible that, at some time in the future, SBA may consider changing the \$750,000 cap amount. The Department anticipates working closely with SBA on any such matter and seeking comment on any potential changes to this rule that would be coordinated with changes SBA proposes for Federal procurement programs in this area.

Under part 23, recipients had to accept 8(a)-certified firms (except for those who exceeded the statutory gross receipts cap). The SNPRM proposed some modifications of this requirement. Recipients were concerned that in some situations information used for 8(a) certification could be inaccurate or out of date. They noted differences between 8(a) and DBE certification standards and procedures. They asked for the ability to

look behind 8(a) certifications and make their own certification decisions.

In response to these comments, the Department is providing greater discretion to recipients. Under part 26, recipients can treat 8(a) certifications as they do certifications made by other DOT recipients. A recipient can accept such a certification in lieu of conducting its own certification process or it can require the firm to go through part or all of its own application process. Because SBA is beginning a certification process for firms participating in the small and disadvantaged business (SDB) program, we will treat certified SDB firms in the same way. If an SDB firm is certified by SBA or an organization recognized by SBA as a certifying authority, a recipient may accept this certification instead of doing its own certification. (This does not apply to firms whose participation in the SDB program is based on a self-certification.) We note that this way of handling SBA program certifications is in the context of the development by DOT recipients of uniform certification programs. If a unified certification program (UCP) accepts a firm's 8(a) or 8(d) certification, then the firm will be certified for all DOT recipients in the state.

People who are not presumed socially and economically disadvantaged can still apply for DBE certification. To do so, they must demonstrate to the recipient that they are disadvantaged as individuals. Using the guidance provided in Appendix E, recipients must make case-by-case decisions concerning such applications. It should be emphasized that the DBE program is a disadvantage-based program, not one limited to members of certain designated groups. For this reason, recipients must take these applications seriously and consider them fairly. The applicant has the burden of proof concerning disadvantage, however.

Section 26.69 What Rules Govern Determinations of Ownership?

Commenters on the ownership provisions of the SNPRM addressed a variety of points. Most commenters agreed that the general burden of proof on applicants should be the preponderance of the evidence. A few commenters thought that this burden should also apply in situations where a firm was formerly owned by a non-disadvantaged individual. For some of these situations, the SNPRM proposed the higher "clear and convincing evidence" standard, because of the heightened opportunities for abuse involved. The Department believes this safeguard is necessary, and we will

retain the higher standard in these situations.

Commenters asked for more guidance in evaluating claims that a contribution of expertise from disadvantaged owners should count toward the required 51 percent ownership. They cited the potential for abuse. The Department believes that there may be circumstances in which expertise can be legitimately counted toward the ownership requirement. For example, suppose someone with a great deal of expertise in a computer-related field, without whom the success of his or her high-tech start-up business would not be feasible, receives substantial capital from a non-disadvantaged source.

We have modified the final rule provision to reflect a number of considerations. Situations in which expertise must be recognized for this purpose are limited. The expertise must be outstanding and in a specialized field: everyday experience in administration, construction, or a professional field is unlikely to meet this test. (This is not a "sweat equity" provision.) We believe that it is fair that the critical expertise of this individual be recognized in terms of the ownership determination. At the same time, the individual must have a significant financial stake in the company. This program focuses on entrepreneurial activity, not simply expertise. While we will not designate a specific percentage of ownership that such an individual must have, entrepreneurship without a reasonable degree of financial risk is inconceivable.

The SNPRM's proposals on how to treat assets obtained through inheritance, divorce, and gifts were somewhat controversial. Most comments agreed with the proposal that assets acquired through death or divorce be counted. One commenter objected to the provision that such assets always be counted, saying that the owner should have to make an additional demonstration that it truly owned the assets before the recipient counted them. We do not see the point of such an additional showing. If a white male business owner dies, and his widow inherits the business, the assets are clearly hers, and the deceased husband will play no further role in operating the firm. Likewise, assets a woman obtains through a divorce settlement are unquestionably hers. Absent a term of a divorce settlement or decree that limits the customary incidents of ownership of the assets or business (a contingency for which the proposed provision provided), there is no problem for which an additional showing of some

sort by the owner would be a useful remedy.

A majority of comments on the issue of gifts opposed the SNPRM proposal, saying that gifts should not be counted toward ownership at all. The main reason was that allowing gifts would make it easier for fronts to infiltrate the program. Some comments also had a flavor of opposition to counting what commenters saw as unearned assets. The Department understands these concerns. If a non-disadvantaged individual who provides a gift is no longer connected with the business, or a disadvantaged individual makes the gift, the issue of the firm being a potential front is much reduced. Where a non-disadvantaged individual makes a gift and remains involved with the business, the concern about potential fronts is greater.

For this reason, the SNPRM erected a presumption that assets acquired by gift in this situation would not count. The applicant could overcome this presumption only by showing, through clear and convincing evidence—a high standard of proof—that the transfer was not for the purpose of gaining DBE certification and that the disadvantaged owner really controls the company. This provides effective safeguards against fraud, without going to the unfair extreme of creating a conclusive presumption that all gifts are illegitimate. Also, for purposes of ownership, all assets are created equal. If the money that one invests in a company is really one's own, it does not matter whether it comes from the sweat of one's brow, a bank loan, a gift or inheritance, or hitting the lottery. As long as there are sufficient safeguards in place to protect against fronts—and we believe the rule provides them—the origin of the assets is unimportant. We are adopting the proposed provisions without change.

Commenters were divided about how to handle marital property, especially in community property states. Some commenters believed that such assets should not be counted at all. This was based, in part, on the concern that allowing such assets to be counted could make it difficult to screen out interspousal gifts designed to set up fronts, even if irrevocable transfers of assets were made. Other commenters said they thought the proposal was appropriate, and some of these thought the requirement for irrevocable transfers was unfair.

The Department is adopting the proposed language. In a community property state, or elsewhere where property is jointly held between spouses, the wife has a legal interest in

a portion of the property. It is really hers. It would be inappropriate to treat this genuine property interest as if it did not exist for purposes of DBE ownership.

To ensure the integrity of the program, it is necessary to put safeguards in place. The regulation does so. First, recipients would not count more assets toward DBE ownership than state law treats as belonging to the wife (the final rule provision adds language to this effect). Second, the irrevocable transfer requirement prevents the husband from being in a position to continue to claim any ownership rights in the assets. If an irrevocable transfer of assets constitutes a gift from a non-disadvantaged spouse who remains involved in the business, then the presumption/clear and convincing evidence mechanism discussed above for gifts would apply to the transaction. If recipients in community property states wanted to establish a mechanism for allocating assets between spouses that was consistent with state law, but did not require court involvement or other more formal procedures, they could propose doing so as part of their DBE programs, subject to operating administration approval.

Most commenters supported the SNPRM's proposal concerning trusts, particularly the distinction drawn between revocable living and irrevocable trusts. One commenter favored counting revocable living trusts when the same disadvantaged individual is both the grantor and beneficiary. The Department believes there is merit in making this exception. If the same disadvantaged individual is grantor, beneficiary, and trustee (i.e., an individual puts his own money in a revocable living trust for tax planning or other legitimate purposes and he alone plays the roles of grantor, beneficiary, and trustee), the situation seems indistinguishable for DBE program purposes from the situation of the same individual controlling his assets without the trust. In all other situations, revocable living trusts would not count.

Some comments asked for clarification of the 51 percent ownership requirement, a subject on which the Department has received a number of questions over the years. The Department has clarified this requirement, with respect to corporations, by stating that socially and economically disadvantaged individuals must own 51 percent of each class of voting stock of a corporation, as well as 51 percent of the aggregate stock. A similar point applies to partnerships and limited liability companies. This latter type of company was not

mentioned in the SNPRM, but a commenter specifically requested clarification concerning it. (We have also noted, in § 26.83, that limited liability companies must report changes in management responsibility to recipients. This is intended to include situations where management responsibility is rotated among members.) These clarifications are consistent with SBA regulations.

There are some ownership issues (e.g., concerning stock options and distribution of dividends) that SBA addresses in some detail in its regulations (see 13 CFR § 124.105 (c), (e), (f)) that were not the subject of comments to the DOT SNPRM. These issues have not been prominent in DOT certification practice, to the best of our knowledge, so we are not adding them to the rule. However, we would use the SBA provisions as guidance in the event such issues arise.

Section 26.71 What Rules Govern Determinations Concerning Control?

Commenters generally agreed with the proposed provisions concerning expertise and delegation of responsibilities. 51 percent control of voting stock, and differences in remuneration. A few commenters expressed concern about having to make judgments concerning expertise. However, this expertise standard, as a matter of interpretation, has been part of the DBE program since the mid-1980s. We do not believe that articulating it in the regulatory text should cause problems, and we believe it is a very reasonable and understandable approach to expertise issues. The provision concerning 51 percent ownership of voting stock, as discussed above, has been relocated in the ownership section of the rule. The Department has added three useful clarifications of the general requirement that disadvantaged owners must control the firm (e.g., by serving as president or CEO, controlling a corporate board). These clarifications are based on SBA's regulations (see 13 CFR § 124.106(a)(2), (b), (d)(1)). The Department intends to use other material in 13 CFR § 124.106 as guidance on control matters, when applicable. Otherwise, the Department is adopting these provisions as proposed.

There was some concern about the proposal concerning licensing. Some recipients thought that it would be better to require a license as proof of control in the case of all licensed occupations. We do not think it is justifiable for the DBE program to require more than state law does. If state law allows someone to run a certain

type of business (e.g., electrical contractors, engineers) without personally having a license in that occupation, then we do not think it is appropriate for the recipient to refuse to consider that someone without a license may be able to control the business. The rule is very explicit in saying that the recipient can consider the presence or absence of a license in determining whether someone really has sufficient ability to control a firm.

Family-owned firms have long been a concern in the program. The SNPRM provided explicitly that if the threads of control in a family-run business cannot be disentangled, such that the recipient can specifically find that a woman or other disadvantaged individual independently controls the business, the recipient may not certify the firm. A business that is controlled by the family as a group, as distinct from controlled individually by disadvantaged individuals, is not eligible.

Notwithstanding this provision, a few recipients commented that certifying any businesses in which non-disadvantaged family members participate would open the program to fronts. We do not agree. Non-disadvantaged individuals can participate in any DBE firm, as long as disadvantaged individuals control the firm. It is not fair and does not achieve any reasonable program objective to say that an unrelated white male may perform functions in a DBE while the owner's brother may never do so.

Commenters generally supported the provision calling for recipients to certify firms only for types of work in which disadvantaged owners had the ability to control the firm's operations. One commenter suggested that recipients, while not requiring recertification of firms seeking to perform additional types of work as DBEs (e.g., work in other than their primary industrial classification), should have to approve a written request from firms in this position. We do believe it is necessary for recipients to verify that disadvantaged owners can control work in an additional area, and we have added language to this effect. Recipients will have discretion about how to administer this verification process.

Commenters asked for additional clarification about the eligibility of people who work only part-time in a firm. We have done so by adding examples of situations that do not lead to eligibility (part-time involvement in a full-time firm and absentee ownership) and a situation that may, depending on circumstances, be compatible with eligibility (running a part-time firm all the time it is operating). It should be

noted that this provision does not preclude someone running a full-time firm from having outside employment. Outside employment is incompatible with eligibility only when it interferes with the individual's ability to control the DBE firm on a full-time basis.

One commenter brought to the Department's attention the situation of DBEs who use "employee leasing companies." According to the commenter, employee leasing companies fill a number of administrative functions for employers, such as payroll, personnel, forwarding of taxes to governmental entities, and drug testing. Typically, the employees of the underlying firm are transferred to the payroll of the employee leasing firm, which in turn leases them back to the underlying employer. The underlying employer continues to hire, fire, train, assign, direct, control etc. the employees with respect to their on-the-job duties. While the employee leasing firm sends payments to the IRS, Social Security, and state tax authorities on behalf of the underlying employer, it is the latter who is remains responsible for paying the taxes.

For practical and legal purposes, the underlying employer retains an employer-employee relationship with the leased employees. The employee leasing company does not get involved in the operations of the underlying employer. In this situation, the use of an employee leasing company by a DBE does not preclude the DBE from meeting the control requirements of this rule. Nor does the employee leasing company become an affiliate of the DBE for business size purposes. Case-by-case judgement, of course, remains necessary. Should an employee leasing company in fact exercise control over the on-the-job activities of employees of the DBE, then the ability of the DBE to meet control requirements would be compromised.

One commenter said, as a general matter, that independence and control should be considered separately. We view independence as an aspect of control: If a firm is not independent of some other business, then the other firm, not the disadvantaged owners, exercise control. While independence is an aspect of control that recipients must review, we do not see any benefit in separating consideration of the two concepts.

A recent court decision (*Jack Wood Construction Co., Inc. v. U.S. Department of Transportation*, 12 F. Supp. 2d 25 (D.D.C., 1998)) overturned a DOT Office of Civil Rights certification appeal decision that upheld a denial of certification based on lack of control.

The court, reading existing part 23 closely, said that a non-disadvantaged individual who was an employee, but not an owner, of a firm could disproportionately control the affairs of a firm without making it ineligible. The court also said that the existing rule language did not make it necessary for a disadvantaged owner to have both technical and managerial competence to control a firm. Part 26 solves both problems that the court found to exist in part 23's control provisions (see § 26.71(e)-(g)).

Section 26.73 What Are Other Rules Affecting Certification?

There were relatively few comments on this section. One commenter disagreed with the proposal to continue the provision that a firm owned by a DBE firm, rather than by socially and economically disadvantaged individuals, was not eligible. The argument against this provision, as we understand it, is that precluding a DBE firm from being owned by, for example, a holding company that is in turn owned by disadvantaged individuals would deny those individuals a financing and tax planning tool available to other businesses.

This argument has merit in some circumstances. The purpose of the DBE program is to help create a level playing field for DBEs. It would be inconsistent with the program's intent to deny DBEs a financial tool that is generally available to other businesses. The Department will allow this exception. Recipients must be careful, however, to ensure that certifying a firm under this exception does not have the effect of allowing the firm, or its parent company, to evade any of the requirements or restrictions of the certification process. The arrangement must be consistent with local business practices and must not have the effect of diluting actual ownership by disadvantaged individuals below the 51 percent requirement. All other certification requirements, including control by disadvantaged individuals and size limits, would continue to apply.

Another commenter suggested a firm should not be certified as a DBE if its owners have interests in non-DBE businesses. We believe that a *per se* rule to this effect would be too draconian. If owners of a DBE—whether disadvantaged individuals or not—also have interests in other businesses, the recipient can look at the relationships among the businesses to determine if the DBE is really independent.

One commenter opposed basing certification on the present status of

firms, seeking discretion to deny certification based on the history of the firm. We believe there is no rational or legal basis for denying certification to a firm on the basis of what it was in the past. Is it a small business presently owned and controlled by socially and economically disadvantaged individuals? If so, it would be contrary to the statute, and to the intent of the program, to deny certification because at some time—perhaps years—in the past, it was not owned and controlled by such individuals. The rule specifies that recipients may consider whether a firm has engaged in a pattern of conduct evincing an intent to evade or subvert the program.

The final provision of this section concerns firms owned by Alaska Native Corporations (ANCs), Indian tribes, and Native Hawaiian Organizations. Like the NPRM, it provides that firms owned by these entities can be eligible DBEs, even though their ownership does not reside, as such, in disadvantaged individuals. These firms must meet the size standards applicable to other firms, including affiliation (test large combinations of tribal or ANC-owned corporations put other DBEs at a strong competitive disadvantage). Also, they must be controlled by socially and economically disadvantaged individuals. For example, if a tribe or ANC owns a company, but its daily business operations are controlled by a non-disadvantaged white male, the firm would not be eligible.

Commenters pointed us to the following provision of the Alaska Native Claims Settlement Act (ANCSA):

(e) Minority and economically disadvantaged status—

(1) For all purposes of Federal law, a Native Corporation shall be considered to be a corporation owned and controlled by Natives and a minority and economically disadvantaged business enterprise if the Settlement Common Stock of the corporation and other stock of the corporation held by holders of Settlement Common Stock and by Natives and descendants of Natives, represents a majority of both the total equity of the corporation and the total voting power of the corporation for the purposes of electing directors.

(2) For all purposes of Federal law, direct and indirect subsidiary corporations, joint ventures, and partnerships of a Native Corporation qualifying pursuant to paragraph (1) shall be considered to be entities owned and controlled by Natives and a minority and economically disadvantaged business enterprise if the shares of stock or other units of ownership interest in any such entity held by such Native Corporation and by the holders of its Settlement Common Stock represent a majority of both—

(A) The total equity of the subsidiary corporation, joint venture, or partnership; and

(B) The total voting power of the subsidiary corporation, joint venture, or partnership for the purpose of electing directors, the general partner, or principal officers. (43 U.S.C. 1626(e)).

The question for the Department is whether, reading this language together with the language of the Department's DBE statutes, DOT must alter these provisions.

The DOT DBE statute (TEA-21 version) provides as follows:

(b) Disadvantaged Business Enterprises.—

(1) General rule.—Except to the extent that the Secretary determines otherwise, not less than 10 percent of the amounts made available for any program under titles I, III, and V of this Act shall be expended with small business concerns owned and controlled by socially and economically disadvantaged individuals.

(2) Definitions.—In this subsection, the following definitions apply:

(A) Small business concern.—The term "small business concern" has the meaning such term has under section 3 of the Small Business Act (15 U.S.C. 632); except that such term shall not include any concern or group of concerns controlled by the same socially and economically disadvantaged individual or individuals which has average annual gross receipts over the preceding 3 fiscal years in excess of \$16,600,000, as adjusted by the Secretary for inflation.

(B) Socially and economically disadvantaged individuals.—The term "socially and economically disadvantaged individuals" has the meaning such term has under section 8(d) of the Small Business Act (15 U.S.C. 637(d)) and relevant subcontracting regulations promulgated pursuant thereto; except that women shall be presumed to be socially and economically disadvantaged individuals for purposes of this subsection.

(4) Uniform certification.—The Secretary shall establish minimum uniform criteria for State governments to use in certifying whether a concern qualifies for purposes of this subsection. Such minimum uniform criteria shall include but not be limited to on-site visits, personal interviews, licenses, analysis of stock ownership, listing of equipment, analysis of bonding capacity, listing of work completed, resume of principal owners, financial capacity, and type of work preferred.

While the language § 1626(e) is broad, the terms used in the two statutes are not identical. Section 1626(e) refers to "minority and economically disadvantaged business enterprise[s]", while the Department's statutes refer to "small business concerns owned and controlled by socially and economically disadvantaged individuals." Requirements applicable to the former need not necessarily apply to the latter.

The legislative history of § 1626(e) lends support to distinguishing the two statutes. The following excerpt from House Report 102-673 suggests that the intent of Congress in enacting this provision was to focus on direct Federal procurement programs:

[The statute] amends section [1626(e)] of ANCSA to clarify that Alaska Native Corporations are minority and economically disadvantaged business enterprises for the purposes of implementing the SBA programs * * * This section would further clarify that Alaska Native Corporations and their subsidiary companies are minority and economically disadvantaged business enterprises for purposes of qualifying for participation in federal contracting and subcontracting programs, the largest of which include the SBA 8(a) program and the Department of Defense Small and Disadvantaged Business Program. These programs were established to increase the participation of certain segments of the population that have historically been denied access to Federal procurement activities. While this section eliminates the need for Alaska Native Corporations or their subsidiaries to prove their "economic" disadvantage the corporations would still be required to meet size requirements as small businesses. This will continue to be determined on a case-by-case basis. (Id. at 19.)

This statute, in other words, was meant to apply to direct Federal procurement programs like the 8(a) program or the DOD SBD program, rather than a program involving state and local procurements reimbursed by DOT financial assistance.

The TEA-21 program is a more recent, more specific statute governing DOT recipients' programs. In contrast, the older, more general section 1626(e) evinces no specific intent to govern the DOT DBE program. There is no evidence that Congress, in enacting section 1626(e), had any awareness of or intent to alter the DOT DBE program.

A number of provisions of the TEA-21 statute suggest that Congress intended to impose specific requirements for the DOT program, without regard to other more general statutory references. For example, the \$16.6 million size cap and the uniform certification requirements suggest that Congress wanted the eligibility for the DOT program to be determined in very specific ways, giving no hint that they intended these specific requirements to be overridden in the case of ANCs.

The Department concludes that section 1626(e) is distinguishable from the DOT DBE statutes, and that the latter govern the implementation of the DBE program. The Department is not compelled to alter its approach to certification in the case of ANCs.

Section 26.81 What Are the Requirements for Unified Certification Programs?

As was the case following the 1992 NPRM, a significant majority of the large number of commenters addressing the issue favored implementing the proposed UCP requirement, which the final rule retains largely as proposed. A few commenters suggested that airports be included in UCPs for concession purposes as well as for FAA-assisted contracting, because there are not any significant differences between the certification standards for concessionaires and contractors (the only exception is size standards, which are easy to apply). We agree, and the final rule does not make an exception for concessions (regardless of the CFR part in which the concessions provisions appear). Some commenters wanted either a longer or shorter implementation period than the SNPRM proposed, but we believe the proposal is a good middle ground between the goal of establishing UCPs as soon as possible and the time recipients will need to resolve organizational, operational, and funding issues.

There were a number of comments and questions about details of the UCP provision. One recipient wondered whether a UCP may or must be separate from a recipient and what the legal liability implications of various arrangements might be. As far as the rule is concerned, a UCP can either be situated within a recipient's organization or elsewhere. Recipients can take state law concerning liability into account in determining how best to structure a UCP in their state. Another recipient asked if existing UCPs could be exempted from submitting plans for approval. Rather than being exempted, we believe that it would be appropriate for such UCPs to submit their existing plans. They would have to change them only to the extent needed to conform to the requirements of the rule.

Some commenters asked about the relationship of UCPs to recipients. For example, should a recipient be able to certify a firm that the UCP had not certified (or whose application the UCP had not yet acted on) or refuse to recognize the UCP certification of a firm the recipient did not think should be eligible? In both cases, the answer is no. Allowing this kind of discretion would fatally undermine the "one-stop shopping" rationale of UCPs. However, a recipient could, like any other party, initiate a third-party challenge to a UCP certification action, the result of which could be appealed to DOT.

We would emphasize that the form of the UCP is a matter for negotiation among DOT recipients in a state, and this regulation does not prescribe its organization. A number of models are available, including single state agencies, consortia of recipients that hire a contractor or share the workload among themselves, mandatory reciprocity among recipients, etc. It might be conceivable for a UCP to be a "virtual entity" that is not resident in any particular location. What matters is that the UCP meet the functional requirements of this rule and actually provide one-stop shopping service to applicants. The final rule adds a provision to clarify that UCPs—even when not part of a recipient's own organization—must comply with all provisions of this rule concerning certification and nondiscrimination. Recipients cannot use a UCP that does not do so. For example, if a UCP fails to comply with part 26 certification standards and procedures, or discriminates against certain applicants, the Secretary reserves the right to direct recipients not to use the UCP, effectively "decertifying" the UCP for purposes of DOT-assisted programs. In this case, which we hope will never happen, the Department would work with recipients in the state on interim measures and replacement of the erring UCP.

The SNPRM proposed "pre-certification." That is, the UCP would have to certify a firm before the firm became eligible to participate as a DBE in a contract. The application could not be submitted as a last-minute request in connection with a procurement action, which could lead to hasty and inaccurate certification decisions. Commenters were divided on this issue, with most expressing doubts about the concept. The Department believes that avoiding last-minute (and especially post-bid opening) applications is important to an orderly and accurate certification process, so we are retaining this requirement. However, we are modifying the timing of the requirement, by requiring that certification take place before the bid/offer due date, rather than before the issuance of the solicitation. The certification action must be completed by this date in order for the firm's proposed work on the particular contract to be credited toward DBE goals. It is not enough for the application to have been submitted by the deadline.

The SNPRM proposed that, once UCPs were up and running, a UCP in State A would not have to process an application from a firm whose principal

place of business was in State B unless State B had first certified the firm. Most commenters supported this proposal, one noting that it would help eliminate problems of having to make costly out-of-state site visits. It would also potentially reduce confusion caused by multiple, and potentially conflicting, outcomes in certification decisions. One commenter was concerned that this provision would lead to "free-rider" problems among recipients. The Department will be alert to this possibility, but we do not see it as precluding going forward with this provision. We have added a provision making explicit that when State B has certified a firm, it would have an obligation to send copies of the information and documents it had on the firm to State A when the firm applied there.

All save one of the comments on mandatory reciprocity opposed the concept. That is, commenters favored UCPs being able to choose whether or not to accept certification decisions made by other UCPs. The Department urges UCPs to band together in multi-state or regional alliances, but we believe that it is best to leave reciprocity discretionary. Mandatory reciprocity, even among UCPs, could lead to forum shopping problems.

UCPs will have a common directory, which will have to be maintained in electronic form (i.e., on the internet). One commenter suggested that this electronic directory be updated daily. We think this comment has merit, and the final rule will require recipients to keep a running update of the electronic directory, making changes as they occur.

Section 26.83 What Procedures Do Recipients Follow in Making Certification Decisions?

Commenters generally supported this certification process section, and we are adopting it with only minor changes. Commenters suggested that provision for electronic filing of applications be discretionary rather than mandatory. We agree, and the final rule does not mandate development of electronic filing systems. Some commenters remained concerned about site visits and asked for more guidance on the subject. We intend to provide future guidance on this subject.

Most commenters who addressed the subject favored the development of a mandatory, nationwide, standard DOT application form for DBE eligibility. A number of commenters supplied the forms they use as examples. We believe that this is a good idea, which will help avoid confusion among applicants in a nationwide program. However, we have

not yet developed a form for this purpose. The final rule reserves a requirement for recipients to use a uniform form. We intend to work on developing such a form during the next year, in consultation with recipients and applicants. Meanwhile, recipients can continue to use existing forms, modified as necessary to conform to the requirements of this part.

The SNPRM said recipients could charge a reasonable fee to applicants. A majority of commenters, both recipients and DBEs, opposed the idea of a fee or said it should be capped at a low figure. Fees are not mandatory, and they would be limited, under the final rule, to modest application fees (not intended to recover the cost of the certification process). However, if a recipient wants to charge a modest application fee, we do not see that it is inconsistent with the nature of the program to allow it to do so. Fee waivers would be required if necessary (i.e., a firm who showed they could not afford it). All fees would have to be approved by the concerned OA as part of the DBE program approval process, which would preclude excessive fees.

Given that reciprocity is discretionary among recipients, we thought it would be useful to spell out the options a recipient has when presented by an applicant with the information that another recipient has certified the firm. The recipient may accept the other recipient's certification without any additional procedures. The recipient can make an independent decision based, in whole or in part, on the information developed by the first recipient (e.g., application forms, supporting documents, reports of site visits). The recipient may make the applicant start an entire new application process. The choice among these options is up to the recipient. (As noted above, UCPs will have these same options.)

Most commenters on the subject supported the three-year term for certifications. Some wanted a shorter or longer period. We believe the three-year term is appropriate, particularly given the safeguards of annual and update affidavits that the rule provides. In response to a few comments that recipients should have longer than the proposed 21 days after a change in circumstances to submit an update affidavit, we have extended the period to 30 days. If recipients want to have a longer term in their DBE programs than the three years provided in the rule, they can do so, with the Department's approval, as part of their DBE programs.

A few recipients said that the 90-day period for making decisions on

applications (with the possibility of a 60-day extension) was too short. Particularly since this clock does not begin ticking until a complete application, including necessary supporting documentation, is received from the applicant, we do not think this time frame is unreasonable. We would urge recipients and applicants to work together to resolve minor errors or data gaps during the assembly of the package, before this time period begins to run.

Section 26.85 What Rules Govern Recipients' Denials of Initial Requests for Certification?

A modest number of commenters addressed this section, most of whom supported it as proposed. One commenter noted that it was appropriate to permit minor errors to be corrected in an application without invoking the 12-month reapplication waiting period. We agree, and we urge recipients to follow such a policy. Most commenters thought 12 months was a good length for a reapplication period. A few opposed the idea of a waiting period or thought a shorter period was appropriate. The rule keeps 12 months, but permits recipients to seek DOT approval, through the DBE program review process, for shorter periods.

Section 26.87 What Procedures Does a Recipient Use To Remove a DBE's Eligibility?

As long ago as 1983, the Department (in the preamble to the first DBE rule) strongly urged recipients to use appropriate due process procedures for decertification actions. Recipient procedures are still inconsistent and, in some cases, inadequate, in this respect. Quite recently, for example, litigation forced one recipient to rescind a decertification of an apparently ineligible firm because it had failed to provide administrative due process. We believe that proper due process procedures are crucial to maintaining the integrity of this program. The majority of commenters agreed, though a number of commenters had concerns about particular provisions of the SNPRM proposal.

Some recipients, for example, thought separation of functions was an unnecessary requirement, or too burdensome, particularly for small recipients. We believe separation of functions is essential: there cannot be a fair proceeding if the same party acts as prosecutor and judge. We believe that the burdens are modest, particularly in the context of state DOTs and statewide UCPs. We acknowledge that for small recipients, like small airports and transit

authorities, small staffs may create problems in establishing separation of functions (e.g., if there is only one person in the organization who is knowledgeable about the DBE program). For this reason, the rule will permit small recipients to comply with this requirement to the extent feasible until UCPs are in operation (at which time the UCPs would have to ensure separation of functions in all such cases). The organizational scheme for providing separation of functions will be part of each recipient's DBE program. In the case of a small recipient, if the DBE program showed that other alternatives (e.g., the airport using the transit authority's DBE officer as the decisionmaker in decertification actions, and vice-versa) were unavailable, the Department could approve something less than ideal separation of functions for the short term before the UCP becomes operational. In reviewing certification appeals from such recipients, the Department would take into account the absence of separation of functions.

It is very important that the decisionmaker be someone who is familiar with the DBE certification requirements of this part. The decisionmaker need not be an administrative law judge or some similar official; a knowledgeable program official is preferable to an ALJ who lacks familiarity with the program.

Another aspect of the due process requirements that commenters addressed was the requirement for a record of the hearing, which some commenters found to be burdensome. We want to emphasize that, while recipients have to keep a hearing record (including a verbatim record of the hearing), they do not need to produce a transcript unless there is an appeal. A hearing record is essential, because DOT appellate review is a review of the administrative record.

Some commenters suggested deleting two provisions. One of these allowed recipients to impose a sort of administrative temporary restraining order on firms pending a final decertification decision. The other allowed the effect of a decertification decision to be retroactive to the date of the complaint. The Department agrees that these two provisions could lead to unfairness, and so we have deleted them.

Section 26.89 What Is the Process for Certification Appeals to the Department of Transportation?

Several commenters addressed this section, supporting it with a few requests for modification. Some

commenters wanted a time limit for DOT consideration of appeals. We have added a provision saying that if DOT takes longer than 180 days from the time we receive a complete package, we will write everyone concerned with an explanation of the delay and a new target date for completion. Some commenters thought a different time limit for appeals to the Department (e.g., 180 days) would be beneficial. We believe that 90 days is enough time for someone to decide whether a decision of a recipient or UCP should be appealed and write a letter to DOT. This time period starts to run from the date of the final recipient decision on the matter. DOT can accept late-filed appeals on the basis of a showing of good cause (e.g., factors beyond the control of the appellant). Some recipients thought that more time might be necessary to compile an administrative record, so we have permitted DOT to grant extensions for good cause. Generally, however, the Department will adhere to the 90-day time period in order to prevent delays in the appeals process. As a clarification, we have added a provision that all recipients involved must provide administrative record material to DOT when there is an appeal. For example, State A has relied on the information gathered by State B to certify Firm X. A competitor files an ineligibility complaint with State A, which decertifies the firm. Firm X appeals to the Department. Both State A and State B must provide their administrative record materials to DOT for purposes of the appeal. (The material would be provided to the Departmental Office of Civil Rights.)

Section 26.91 What Actions Do Recipients Take Following DOT Certification Appeal Decisions?

There were few comments concerning this section. Some comments suggested DOT appeal decisions should have mandatory nationwide effect. That is if DOT upheld the decertification action of Recipient A, Recipients B, C, D, E, etc. should automatically decertify the firm. This approach is inconsistent with the administrative review of the record approach this rule takes for appeals to DOT.

A DOT decision that A's decertification was supported by substantial evidence is not a DOT decision that the firm is ineligible. It is only a finding that A had enough evidence to decertify the firm. Other results might also be supported by substantial evidence. Nevertheless, when the Department takes action on an appeal, other recipients would be well

advised to review their own decisions to see if any new proceedings are appropriate. One comment suggested the Department should explain a refusal to accept a complaint. This is already the Department's practice.

The SNPRM included a proposal to permit direct third-party complaints to the Department. There were few comments on this proposal, which would have continued an existing DOT practice. Some of these comments suggested dropping this provision, saying it made more sense to have all certification matters handled at the recipient level in the first instance. Others raised procedural issues (e.g., the possibility of the Department holding *de novo* hearings). The Department has reconsidered this proposal, and we have decided to delete it. We believe it will avoid administrative confusion and simplify procedures for everyone if all certification actions begin at the recipient level, with DOT appellate review on the administrative record.

Subpart F—Compliance and Enforcement

There were very few comments concerning this subpart, which we are adopting as proposed. One section has been added to reflect language in TEA-21 that prohibits sanctions against recipients for noncompliance in situations where compliance is precluded by a final Federal court order finding the program unconstitutional.

DBE Participation in Airport Concessions

The Department proposed a number of changes to its airport concessions DBE program rule in the 1997 SNPRM. We received a substantial number of comments on these proposals. The Department is continuing to work on its responses to these comments, as well as on refinements of the rule to ensure that it is narrowly tailored. This work is not complete. Rather than postpone issuance of the rest of the rule pending completion of this work, we are not issuing final concessions provisions at this time. The existing concessions provisions of 49 CFR part 23 will remain in place pending completion of the revised rule.

Regulatory Analyses and Notices Executive Order 12866

This rule is a significant rule under Executive Order 12866, because of the substantial public interest concerning and policy importance of programs to ensure nondiscrimination in Federally-assisted contracting. It also affects a wide variety of parties, including

recipients in three important DOT financial assistance programs and the DBE and non-DBE contractors that work for them. It has been reviewed by the Office of Management and Budget. It is also a significant rule for purposes of the Department's Regulatory Policies and Procedures.

We do not believe that the rule will have significant economic impacts, however. In evaluating the potential economic impact of this rule, we begin by noting that it does not create a new program. It simply revises the rule governing an existing program. The economic impacts of the DBE program are created by the existing regulation and the statutes that mandate it, not by these revisions. The changes that we propose in this program are likely to have some positive economic impacts. For example, "one-stop shopping" and clearer standards in certification are likely to reduce costs for small businesses applying for DBE certification, as well as reducing administrative burdens on recipients.

The rule's "narrow tailoring" changes are likely to be neutral in terms of their overall economic impact. These could have some distributive impacts (e.g., if the proposed goal-setting mechanism results in changes in DBE goals, a different mix of firms may work on recipients' contracts), but there would probably not be net gains or losses to the economy. There could be some short-term costs to recipients owing to changes in program administration resulting from "narrow tailoring," however.

In any event, the economic impacts are quite speculative and appear nearly impossible to quantify. Comments did not provide, and the Department does not have, any significant information that would allow the Department to estimate any such impacts.

Regulatory Flexibility Act Analysis

The DBE program is aimed at improving contracting opportunities for small businesses owned and controlled by socially and economically disadvantaged individuals. Virtually all the businesses it affects are small entities. There is no doubt that a DBE rule always affects a substantial number of small entities.

This rule, while improving program administration and facilitating DBE participation (e.g., by making the certification process clearer) and responding to legal developments, appears essentially cost-neutral with respect to small entities in general (as noted above, the one-stop shopping feature is intended to benefit small entities seeking to participate). It does

not impose new burdens or costs on small entities, compared to the existing rule. It does not affect the total funds or business opportunities available to small businesses that seek to work in DOT financial assistance programs. To the extent that the proposals in this rule (e.g., with respect to changes in the methods used to set overall goals) lead to different goals than the existing rule, some small firms may gain, and others lose, business.

There is no data of which the Department is aware that would permit us, at this time, to measure the distributive effects of the revisions on various types of small entities. It is likely that any attempt to gauge these effects would be highly speculative. For this reason, we are not able to make a quantitative, or even a precise qualitative, estimate of these effects.

Paperwork Reduction Act

A number of provisions of this rule involve information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA). One of these provisions, concerning a report of DBE achievements that recipients make to the Department, is the subject of an existing OMB approval under the PRA.

With one exception, the other information collection requirements of the rule continue existing part 23 requirements, major elements of the DBE program that recipients and contractors have been implementing since 1980 or 1983. While the final rule modifies these requirements in some ways, the Department believes the overall burden of these requirements will remain the same or shrink. These requirements are the following:

- Firms applying for DBE certification must provide information to recipients to allow them to make eligibility decisions. Currently certified firms must provide information to recipients to allow them to review the firms' continuing eligibility. (After the UCP requirements of the rule are implemented, the burdens of the certification provisions should be substantially reduced.)

- When contractors bid on prime contracts that have contract goals, they must document their DBE participation and/or the good faith efforts they have made to meet the contract goals. (Given the final rule's emphasis on race-neutral measures, it is likely the burden in this area will be reduced.)

- Recipients must maintain a directory of certified DBE firms. (Once UCPs are implemented, there will be 52 consolidated directories rather than the hundreds now required, reducing burdens substantially.)

- Recipients must calculate overall goals and transmit them to the Department for approval. (The process of setting overall goals is more flexible, but may also be more complex, than under part 23. As they make their transition to the final rule's goal-setting process during the first years of implementation, recipients may temporarily expend more hours than in the past on information-related tasks.)

- Recipients must have a DBE program approved by the Department. (The final rule includes a one-time requirement to submit a revised program document making changes to conform to the new regulation.)

The Department estimates that these program elements will result in a total of approximately 1.58 million burden hours to recipients and contractors combined during the first year of implementation and approximately 1.47 million annual burden hours thereafter.

The final rule also includes one new information collection element. It calls for recipients to collect and maintain data concerning both DBE and non-DBE bidders on DOT-assisted contracts. This information is intended to assist recipients in making more precise determinations of the availability of DBEs and the shape of the "level playing field" the maintenance of which is a major objective of the rule. The Department estimates that this requirement will add 254,595 burden hours in the first year of implementation. This figure is projected to decline to 193,261 hours in the second year and to 161,218 hours in the third and subsequent years.

Both as the result of comments and what the Department learns as it implements the DBE program under part 26, it is possible for the Department's information needs and the way we meet them to change. Sometimes the way we collect information can be changed informally (e.g., by guidance telling recipients they need not repeat information that does not change significantly from year to year). In other circumstances, a technical amendment to the regulation may be needed. In any case, the Department will remain sensitive to situations in which modifying information collection requirements becomes appropriate.

As required by the PRA, the Department has submitted an information collection approval request to OMB. Organizations and individuals desiring to submit comments on information collection requirements should direct them to the Department's docket for this rulemaking. You may also submit copies of your comments to

the Office of Information and Regulatory Affairs (OIRA), OMB, Room 10235, New Executive Office Building, Washington, DC, 20503; Attention: Desk Officer for U.S. Department of Transportation.

The Department considers comments by the public on information collections for several purposes:

- Evaluating the necessity of information collections for the proper performance of the Department's functions, including whether the information has practical utility.

- Evaluating the accuracy of the Department's estimate of the burden of the information collections, including the validity of the methods and assumptions used.

- Enhancing the quality, usefulness, and clarity of the information to be collected.

- Minimizing the burden of the collection of information on respondents, including through the use of electronic and other methods.

The Department points out that, with the exception of the bid data collection, all the information collection elements discussed in this section of the preamble have not only been part of the Department's DBE program for many years, but have also been the subject of extensive public comment following the 1992 NPRM and 1997 SNPRM. Among the over 900 comments received in response to these notices were a number addressing administrative burden issues surrounding these program elements. In this final rule, the Department has responded to these comments.

OMB is required to make a decision concerning information collections within 30-60 days of the publication of this notice. Therefore, for best effect, comments should be received by DOT/OMB within 30 days of publication. Following receipt of OMB approval, the Department will publish a Federal Register notice containing the applicable OMB approval numbers.

Federalism

The rule does not have sufficient Federalism impacts to warrant the preparation of a Federalism assessment. While the rule concerns the activities of state and local governments in DOT financial assistance programs, the rule does not significantly alter the role of state and local governments vis-a-vis DOT from the present part 23. The availability of program waivers could allow greater flexibility for state and local participants, however.

List of Subjects

49 CFR Part 23

Administrative practice and procedure, Airports, Civil rights,

Concessions, Government contracts, Grant programs—transportation, Minority businesses, Reporting and recordkeeping requirements.

49 CFR Part 26

Administrative practice and procedure, Airports, Civil rights, Government contracts, Grant programs—transportation, Highways and roads, Mass transportation, Minority businesses, Reporting and recordkeeping requirements. Issued this 8th day of January, 1999, at Washington, DC.

Rodney E. Slater,

Secretary of Transportation.

For the reasons set forth in the preamble, the Department amends 49 CFR subtitle A as follows:

PART 23—PARTICIPATION BY DISADVANTAGED BUSINESS ENTERPRISE IN AIRPORT CONCESSIONS

1. Revise the heading of 49 CFR part 23 as set forth above.
2. Revise the authority citation for 49 CFR part 23 to read as follows:
Authority: 42 U.S.C. 200d et seq.; 49 U.S.C. 47107 and 47123; Executive Order 12138, 3 CFR, 1979 Comp., p. 393.

Revision 1: Authority for Part 23 is restated.

Subparts A, C, D, and E—[Removed and Reserved]

3. Remove and reserve subparts A, C, D, and E of part 23.

§ 23.89 [Amended]

4. Amend § 23.89 as follows:

a. In the definition of "disadvantaged business," remove the words "§ 23.61 of subpart D of this part" and add the words "49 CFR part 26"; and remove the words "§ 23.61" in the last line of the definition and add the words "49 CFR part 26".

b. In the definition of "small business concern," paragraph (b), remove the words "§ 23.43(d)" and add the words "§ 23.43(d) in effect prior to March 4, 1999 (See 49 CFR Parts 1 to 99 revised as of October 1, 1998.)".

c. In the definition of "socially and economically disadvantaged individuals," remove the words "§ 23.61 of subpart D of this part" and add "49 CFR part 26".

§ 23.93 [Amended]

5. Amend § 23.93(a) introductory text by removing the words "§ 23.7" and adding the words "§ 26.7".

§ 23.95 [Amended]

6. Amend § 23.95(a)(1) by removing the words "based on the factors listed in § 23.43(g)(5)" and adding the words "consistent with the process for setting overall goals set forth in 49 CFR 26.45".

Revision 2: In §

7. In addition, amend § 23.95 as follows:

a. In paragraph (f)(1), remove the words "§ 23.51" and add the words "49 CFR part 26, subpart E";

b. In paragraph (f)(2), remove the words "Except as provided in § 23.51(c), each" and add "Each";

c. Remove paragraph (f)(5); d. In paragraph (g)(1), remove the words "§ 23.53" and add the words "49 CFR part 26, subpart D".

Revision 2. In § 23.95 remove and reserve paragraphs (f)(2) and (f)(3).

§ 23.97 [Amended]

8. Amend § 23.97 by removing the words "§ 23.55" and adding the words "49 CFR 26.89".

§ 23.11 [Removed]

9. Remove § 23.111.

10. Add a new 49 CFR part 26, to read as follows:

PART 26—PARTICIPATION BY DISADVANTAGED BUSINESS ENTERPRISES IN DEPARTMENT OF TRANSPORTATION FINANCIAL ASSISTANCE PROGRAMS

Subpart A—General

- Sec. 26.1 What are the objectives of this part?
26.3 To whom does this part apply?
26.5 What do the terms used in this part mean?
26.7 What discriminatory actions are forbidden?
26.9 How does the Department issue guidance and interpretations under this part?
26.11 What records do recipients keep and report?

26.13 What assurances must recipients and contractors make?

- 26.15 How can recipients apply for exemptions or waivers?

Subpart B—Administrative Requirements for DBE Programs for Federally-Assisted Contracting

- 26.21 Who must have a DBE program?
26.23 What is the requirement for a policy statement?
26.25 What is the requirement for a liaison officer?
26.27 What efforts must recipients make concerning DBE financial institutions?
26.29 What prompt payment mechanisms may recipients have?
26.31 What requirements pertain to the DBE directory?
26.33 What steps must a recipient take to address overconcentration of DBEs in certain types of work?

26.35 What role do business development and mentor-protégé programs have in the DBE program?

26.37 What are a recipient's responsibilities for monitoring the performance of other program participants?

Subpart C—Goals, Good Faith Efforts, and Counting

26.41 What is the role of the statutory 10 percent goal in this program?

26.43 Can recipients use set-asides or quotas as part of this program?

26.45 How do recipients set overall goals?

26.47 Can recipients be penalized for failing to meet overall goals?

26.49 How are overall goals established for transit vehicle manufacturers?

26.51 What means do recipients use to meet overall goals?

26.53 What are the good faith efforts procedures recipients follow in situations where there are contract goals?

26.55 How is DBE participation counted toward goals?

Subpart D—Certification Standards

26.61 How are burdens of proof allocated in the certification process?

26.63 What rules govern group membership determinations?

26.65 What rules govern business size determinations?

26.67 What rules govern determinations of social and economic disadvantage?

26.69 What rules govern determinations of ownership?

26.71 What rules govern determinations concerning control?

26.73 What are other rules affecting certification?

Subpart E—Certification Procedures

26.81 What are the requirements for Unified Certification Programs?

26.83 What procedures do recipients follow in making certification decisions?

26.85 What rules govern recipients' denials of initial requests for certification?

26.87 What procedures does a recipient use to remove a DBE's eligibility?

26.89 What is the process for certification appeals to the Department of Transportation?

26.91 What actions do recipients take following DOT certification appeal decisions?

Subpart F—Compliance and Enforcement

26.101 What compliance procedures apply to recipients?

26.103 What enforcement actions apply in FHWA and FTA programs?

26.105 What enforcement actions apply in FAA Programs?

26.107 What enforcement actions apply to firms participating in the DBE program?

26.109 What are the rules governing information, confidentiality, cooperation, and intimidation or retaliation?

Appendix A to part 26—Guidance Concerning Good Faith Efforts

Appendix B to part 26—Forms [Reserved]

Appendix C to part 26—DBE Business Development Program Guidelines Appendix D to part 26—Mentor-Protégé Program Guidelines

Appendix E to part 26—Individual Determinations of Social and Economic Disadvantage

Authority: 23 U.S.C. 324; 42 U.S.C. 2000d et seq.; 49 U.S.C. 1615, 47107, 47113, 47123;

Revision 3. Authority is revised by adding: Sec. 1101(b), Pub. L. 105-178, 112 Stat. 107, 113

Sec. 1101(b), Pub. L. 105-178, 112 Stat. 107, 113.

Subpart A—General

§ 26.1 What are the objectives of this part?

This part seeks to achieve several objectives:

- (a) To ensure nondiscrimination in the award and administration of DOT-assisted contracts in the Department's highway, transit, and airport financial assistance programs;
 - (b) To create a level playing field on which DBEs can compete fairly for DOT-assisted contracts;
 - (c) To ensure that the Department's DBE program is narrowly tailored in accordance with applicable law;
 - (d) To ensure that only firms that fully meet this part's eligibility standards are permitted to participate as DBEs;
 - (e) To help remove barriers to the participation of DBEs in DOT-assisted contracts;
 - (f) To assist the development of firms that can compete successfully in the marketplace outside the DBE program;
- and
- (g) To provide appropriate flexibility to recipients of Federal financial assistance in establishing and providing opportunities for DBEs.

§ 26.3 To whom does this part apply?

(a) If you are a recipient of any of the following types of funds, this part applies to you:

(1) Federal-aid highway funds authorized under Titles I (other than Part B) and V of the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA), Pub. L. 102-240, 105 Stat. 1914, or Titles I, III, and V of the Transportation Equity Act for the 21st Century (TEA-21), Pub. L. 105-178, 112 Stat. 107.

(2) Federal transit funds authorized by Titles I, III, V and VI of ISTEA, Pub. L. 102-240 or by Federal transit laws in Title 49, U.S. Code, or Titles I, III, and V of the TEA-21, Pub. L. 105-178.

(3) Airport funds authorized by 49 U.S.C. 47101, et seq.

(b) [Reserved]

(c) If you are letting a contract, and that contract is to be performed entirely outside the United States, its territories and possessions, Puerto Rico, Guam, or the Northern Marianas Islands, this part does not apply to the contract.

(d) If you are letting a contract in which DOT financial assistance does not participate, this part does not apply to the contract.

26.5 What do the terms used in this part mean?

Affiliation has the same meaning the term has in the Small Business Administration (SBA) regulations, 13 CFR part 121.

(1) Except as otherwise provided in 13 CFR part 121, concerns are affiliates of each other when, either directly or indirectly:

- (i) One concern controls or has the power to control the other; or
- (ii) A third party or parties controls or has the power to control both; or
- (iii) An identity of interest between or among parties exists such that affiliation may be found.

(2) In determining whether affiliation exists, it is necessary to consider all appropriate factors, including common ownership, common management, and contractual relationships. Affiliates must be considered together in determining whether a concern meets small business size criteria and the statutory cap on the participation of firms in the DBE program.

Alaska Native means a citizen of the United States who is a person of one-fourth degree or more Alaskan Indian (including Tsimshian Indians not enrolled in the Metlakta Indian Community), Eskimo, or Aleut blood, or a combination of those bloodlines. The term includes, in the absence of proof of a minimum blood quantum, any citizen whom a Native village or Native group regards as an Alaska Native if their father or mother is regarded as an Alaska Native.

Alaska Native Corporation (ANC) means any Regional Corporation, Village Corporation, Urban Corporation, or Group Corporation organized under the laws of the State of Alaska in accordance with the Alaska Native Claims Settlement Act, as amended (43 U.S.C. 1601, et seq.).

Compliance means that a recipient has correctly implemented the requirements of this part.

Rev 4. Add: to Contract definition: For purposes of this part, a lease is considered to be a contract.

Contract means a legally binding relationship obligating a seller to furnish supplies or services (including, but not limited to, construction and professional services) and the buyer to pay for them. For purposes of this part, a lease is considered to be a contract.

Contractor means one who participates, through a contract or subcontract (at any tier), in a DOT-assisted highway, transit, or airport program.

Department or DOT means the U.S. Department of Transportation, including the Office of the Secretary, the Federal Highway Administration (FHWA), the Federal Transit Administration (FTA), and the Federal Aviation Administration (FAA).

Disadvantaged business enterprise or DBE means a for-profit small business concern—

(1) That is at least 51 percent owned by one or more individuals who are both socially and economically disadvantaged or, in the case of a corporation, in which 51 percent of the stock is owned by one or more such individuals; and

(2) Whose management and daily business operations are controlled by one or more of the socially and economically disadvantaged individuals who own it.

DOT-assisted contract means any contract between a recipient and a contractor (at any tier) funded in whole or in part with DOT financial assistance, including letters of credit or loan guarantees, except a contract solely for the purchase of land.

Good faith efforts means efforts to achieve a DBE goal or other requirement of this part which, by their scope, intensity, and appropriateness to the objective, can reasonably be expected to fulfill the program requirement.

Immediate family member means father, mother, husband, wife, son, daughter, brother, sister, grandmother, grandfather, grandson, granddaughter, mother-in-law, or father-in-law.

Indian tribe means any Indian tribe, band, nation, or other organized group or community of Indians, including any ANC, which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians, or is recognized as such by the State in which the tribe, band, nation, group, or community resides. See definition of "tribally-owned concern" in this section.

Joint venture means an association of a DBE firm and one or more other firms to carry out a single, for-profit business enterprise, for which the parties combine their property, capital, efforts, skills and knowledge, and in which the DBE is responsible for a distinct, clearly defined portion of the work of the contract and whose share in the capital contribution, control, management, risks, and profits of the joint venture are commensurate with its ownership interest. *Native Hawaiian* means any individual whose ancestors were natives, prior to 1778, of the area which now comprises the State of Hawaii.

Native Hawaiian Organization means any community service organization serving Native Hawaiians in the State of Hawaii which is a not-for-profit organization chartered by the State of Hawaii, is controlled by Native Hawaiians, and whose business activities will principally benefit such Native Hawaiians.

Noncompliance means that a recipient has not correctly implemented the requirements of this part.

Operating Administration or OA means any of the following parts of DOT: the Federal Aviation Administration (FAA), Federal Highway Administration (FHWA), and Federal Transit Administration (FTA). The "Administrator" of an operating administration includes his or her designees.

Personal net worth means the net value of the assets of an individual remaining after total liabilities are deducted. An individual's personal net worth does not include: The individual's ownership interest in an applicant or participating DBE firm; or the individual's equity in his or her primary place of residence. An individual's personal net worth includes only his or her own share of assets held jointly or as community property with the individual's spouse.

Primary industry classification means the four digit Standard Industrial Classification (SIC) code designation which best describes the primary business of a firm. The SIC code designations are described in the Standard Industry Classification Manual. As the North American Industrial Classification System (NAICS) replaces the SIC system, references to SIC codes and the SIC Manual are deemed to refer to the NAICS manual and applicable codes. The SIC Manual and the NAICS Manual are available through the National Technical Information Service (NTIS) of the U.S. Department of Commerce (Springfield, VA, 22261). NTIS also makes materials available through its web site (www.ntis.gov/naics).

Primary recipient means a recipient which receives DOT financial assistance and passes some or all of it on to another recipient.

Principal place of business means the business location where the individuals who manage the firm's day-to-day operations spend most working hours and where top management's business records are kept. If the offices from which management is directed and where business records are kept are in different locations, the recipient will determine the principal place of business for DBE program purposes.

Program means any undertaking on a recipient's part to use DOT financial assistance, authorized by the laws to which this part applies.

Race-conscious measure or program is one that is focused specifically on assisting only DBEs, including women-owned DBEs.

Race-neutral measure or program is one that is, or can be, used to assist all small businesses. For the purposes of this part, *race-neutral* includes gender-neutrality.

Recipient is any entity, public or private, to which DOT financial assistance is extended, whether directly or through another recipient, through the programs of the FAA, FHWA, or FTA, or who has applied for such assistance.

Secretary means the Secretary of Transportation or his/her designee.

Set-aside means a contracting practice restricting eligibility for the competitive award of a contract solely to DBE firms.

Small Business Administration or SBA means the United States Small Business Administration.

Small business concern means, with respect to firms seeking to participate as DBEs in DOT-assisted contracts, a small business concern as defined pursuant to section 3 of the Small Business Act and Small Business Administration regulations implementing it (13 CFR part 121) that also does not exceed the cap on average annual gross receipts specified in § 26.65(b).

Socially and economically disadvantaged individual means any individual who is a citizen (or lawfully admitted permanent resident) of the United States and who is—

(1) Any individual who a recipient finds to be a socially and economically disadvantaged individual on a case-by-case basis.

(2) Any individual in the following groups, members of which are rebuttably presumed to be socially and economically disadvantaged:

(i) "Black Americans," which includes persons having origins in any of the Black racial groups of Africa;

(ii) "Hispanic Americans," which includes persons of Mexican, Puerto Rican, Cuban, Dominican, Central or South American, or other Spanish or Portuguese culture or origin, regardless of race;

(iii) "Native Americans," which includes persons who are American Indians, Eskimos, Aleuts, or Native Hawaiians;

(iv) "Asian-Pacific Americans," which includes persons whose origins are from Japan, China, Taiwan, Korea, Burma (Myanmar), Vietnam, Laos, Cambodia (Kampuchea), Thailand, Malaysia, Indonesia, the Philippines, Brunel, Samoa, Guam, the U.S. Trust Territories of the Pacific Islands (Republic of Palau), the Commonwealth of the Northern Marianas Islands, Macao, Fiji, Tonga, Kiribati, Juvalu, Nauru, Federated States of Micronesia, or Hong Kong;

(v) "Subcontinent Asian Americans," which includes persons whose origins are from India, Pakistan, Bangladesh, Bhutan, the Maldives Islands, Nepal or Sri Lanka;

(vi) Women;

(vii) Any additional groups whose members are designated as socially and economically disadvantaged by the SBA, at such time as the SBA designation becomes effective.

Tribally-owned concern means any concern at least 51 percent owned by an Indian tribe as defined in this section.

You refers to a recipient, unless a statement in the text of this part or the context requires otherwise (i.e., "You must do XYZ" means that recipients must do XYZ).

§ 26.7 What discriminatory actions are forbidden?

(a) You must never exclude any person from participation in, deny any person the benefits of, or otherwise discriminate against anyone in connection with the award and performance of any contract covered by this part on the basis of race, color, sex, or national origin.

(b) In administering your DBE program, you must not, directly or through contractual or other arrangements, use criteria or methods of administration that have the effect of defeating or substantially impairing accomplishment of the objectives of the program with respect to individuals of a particular race, color, sex, or national origin.

§ 26.9 How does the Department issue guidance and interpretations under this part?

(a) This part applies instead of subparts A and C through E of 49 CFR part 23 in effect prior to March 4, 1999. (See 49 CFR Parts 1 to 99, revised as of October 1, 1998.) Only guidance and interpretations (including interpretations set forth in certification appeal decisions) consistent with this part 26 and issued after March 4, 1999 have definitive, binding effect in implementing the provisions of this part and constitute the official position of the Department of Transportation.

(b) The Secretary of Transportation, Office of the Secretary of Transportation, FHWA, FTA, and FAA may issue written interpretations of or written guidance concerning this part. Written interpretations and guidance are valid and binding, and constitute the official position of the Department of Transportation, only if they are issued over the signature of the Secretary of Transportation or if they contain the following statement:

The General Counsel of the Department of Transportation has reviewed this document and approved it as consistent with the language and intent of 49 CFR part 26.

§ 26.11 What records do recipients keep and report?

(a) [Reserved]

(b) You must continue to provide data about your DBE program to the Department as directed by DOT operating administrations.

(c) You must create and maintain a bidders list, consisting of all firms bidding on prime contracts and bidding or quoting subcontracts on DOT-assisted projects. For every firm, the following information must be included:

- (1) Firm name;
- (2) Firm address;
- (3) Firm's status as a DBE or non-DBE;
- (4) The age of the firm; and
- (5) The annual gross receipts of the firm.

§ Section 26.13 What assurances must recipients and contractors make?

(a) Each financial assistance agreement you sign with a DOT operating administration (or a primary recipient) must include the following assurance: The recipient shall not discriminate on the basis of race, color, national origin, or sex in the award and performance of any DOT-assisted contract or in the administration of its DBE program or the requirements of 49 CFR part 26. The recipient shall take all necessary and reasonable steps under 49 CFR part 26 to ensure nondiscrimination in the award and administration of DOT-assisted contracts. The recipient's DBE program, as required by 49 CFR part 26 and as approved by DOT, is incorporated by reference in this agreement. Implementation of this program is a legal obligation and failure to carry out its terms shall be treated as a violation of this agreement. Upon notification of the recipient of its failure to carry out its approved program, the Department may impose sanctions as provided for under part 26 and may, in appropriate cases, refer the matter for enforcement under 18 U.S.C. 1001 and/or the Program Fraud Civil Remedies Act of 1986 (31 U.S.C. 3801 et seq.).

(b) Each contract you sign with a contractor (and each subcontract the prime contractor signs with a subcontractor) must include the following assurance: The contractor, sub recipient or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. The contractor shall carry out applicable requirements of 49 CFR part 26 in the award and administration of DOT-assisted contracts. Failure by the contractor to carry out these requirements is a material breach of this contract, which may result in the termination of this contract

or such other remedy as the recipient deems appropriate.

§ 26.15 How can recipients apply for exemptions or waivers?

(a) You can apply for an exemption from any provision of this part. To apply, you must request the exemption in writing from the Office of the Secretary of Transportation, FHWA, FTA, or FAA. The Secretary will grant the request only if it documents special or exceptional circumstances, not likely to be generally applicable, and not contemplated in connection with the rulemaking that established this part, that make your compliance with a specific provision of this part impractical. You must agree to take any steps that the Department specifies to comply with the intent of the provision from which an exemption is granted. The Secretary will issue a written response to all exemption requests.

(b) You can apply for a waiver of any provision of Subpart B or C of this part including, but not limited to, any provisions regarding administrative requirements, overall goals, contract goals or good faith efforts. Program waivers are for the purpose of authorizing you to operate a DBE program that achieves the objectives of this part by means that may differ from one or more of the requirements of Subpart B or C of this part. To receive a program waiver, you must follow these procedures:

(1) You must apply through the concerned operating administration. The application must include a specific program proposal and address how you will meet the criteria of paragraph (b)(2) of this section. Before submitting your application, you must have had public participation in developing your proposal, including consultation with the DBE community and at least one public hearing. Your application must include a summary of the public participation process and the information gathered through it.

(2) Your application must show that—

(i) There is a reasonable basis to conclude that you could achieve a level of DBE participation consistent with the objectives of this part using different or innovative means other than those that are provided in subpart B or C of this part;

(ii) Conditions in your jurisdiction are appropriate for implementing the proposal;

(iii) Your proposal would prevent discrimination against any individual or group in access to contracting opportunities or other benefits of the program; and

(iv) Your proposal is consistent with applicable law and program requirements of the concerned operating administration's financial assistance program.

(3) The Secretary has the authority to approve your application. If the Secretary grants your application, you may administer your DBE program as provided in your proposal, subject to the following conditions:

(i) DBE eligibility is determined as provided in subparts D and E of this part, and DBE participation is counted as provided in § 26.49;

(ii) Your level of DBE participation continues to be consistent with the objectives of this part;

(iii) There is a reasonable limitation on the duration of your modified program; and

(iv) Any other conditions the Secretary makes on the grant of the waiver.

(4) The Secretary may end a program waiver at any time and require you to comply with this part's provisions. The Secretary may also extend the waiver, if he or she determines that all requirements of paragraphs (b)(2) and

(3) of this section continue to be met. Any such extension shall be for no longer than period originally set for the duration of the program.

Subpart B—Administrative Requirements for DBE Programs for Federally-Assisted Contracting

§ 26.21 Who must have a DBE program?

(a) If you are in one of these categories and let DOT-assisted contracts, you must have a DBE program meeting the requirements of this part:

- (1) All FHWA recipients receiving funds authorized by a statute to which this part applies;

Revision 5: Revise § 26.21(a)(2) to read:

(2) FTA recipients that receive \$250,000 in FTA planning, capital or operating assistance in a Federal fiscal year, exclusive of transit vehicle purchases, and transit vehicle manufacturers who must submit an overall goal under § 26.49.

~~(2) FTA recipients that receive \$250,000 or more in FTA planning, capital, and/or operating assistance in a Federal fiscal year;~~

(2) FTA recipients that receive \$250,000 in FTA planning, capital or operating assistance in a Federal fiscal year, exclusive of transit vehicle purchases, and transit vehicle manufacturers who must submit an overall goal under § 26.49.

(3) FAA recipients that receive a grant of \$250,000 or more for airport planning or development.

(b)(1) You must submit a DBE program conforming to this part by August 31, 1999 to the concerned operating administration (OA). Once the OA has approved your program, the approval counts for all of your DOT-assisted programs (except that goals are reviewed and approved by the particular operating administration that provides funding for your DOT-assisted contracts).

Revision 6 In §

(2) You do not have to submit regular updates of your DBE programs, as long as you remain in compliance. However, you must submit significant changes in the program for approval.

(c) You are not eligible to receive DOT financial assistance unless DOT has

approved your DBE program and you are in compliance with it and this part. You must continue to carry out your program until all funds from DOT financial assistance have been expended.

§ 26.23 What is the requirement for a policy statement?

You must issue a signed and dated policy statement that expresses your commitment to your DBE program, states its objectives, and outlines responsibilities for its implementation. You must circulate the statement throughout your organization and to the DBE and non-DBE business communities that perform work on your DOT-assisted contracts.

§ 26.25 What is the requirement for a liaison officer?

You must have a DBE liaison officer, who shall have direct, independent access to your Chief Executive Officer concerning DBE program matters. The liaison officer shall be responsible for implementing all aspects of your DBE program. You must also have adequate staff to administer the program in compliance with this part.

26.27 What efforts must recipients make concerning DBE financial institutions?

You must thoroughly investigate the full extent of services offered by financial institutions owned and controlled by socially and economically disadvantaged individuals in your community and make reasonable efforts to use these institutions. You must also encourage prime contractors to use such institutions.

§ 26.29 What prompt payment mechanisms must recipients have?

(a) You must establish, as part of your DBE program, a contract clause to require prime contractors to pay subcontractors for satisfactory performance of their contracts no later than a specific number of days from receipt of each payment you make to the prime contractor. This clause must also require the prompt return of retainage payments from the prime contractor to the subcontractor within a specific number of days after the subcontractor's work is satisfactorily completed.

(1) This clause may provide for appropriate penalties for failure to comply, the terms and conditions of which you set.

(2) This clause may also provide that any delay or postponement of payment among the parties may take place only for good cause, with your prior written approval.

(b) You may also establish, as part of your DBE program, any of the following

additional mechanisms to ensure prompt payment:

(1) A contract clause that requires prime contractors to include in their subcontracts language providing that prime contractors and subcontractors will use appropriate alternative dispute resolution mechanisms to resolve payment disputes. You may specify the nature of such mechanisms.

(2) A contract clause providing that the prime contractor will not be reimbursed for work performed by subcontractors unless and until the prime contractor ensures that the subcontractors are promptly paid for the work they have performed.

(3) Other mechanisms, consistent with this part and applicable state and local law, to ensure that DBEs and other contractors are fully and promptly paid.

§ 26.31 What requirements pertain to the DBE directory?

You must maintain and make available to interested persons a directory identifying all firms eligible to participate as DBEs in your program. In the listing for each firm, you must include its address, phone number, and the types of work the firm has been certified to perform as a DBE. You must revise your directory at least annually and make updated information available to contractors and the public on request.

§ 26.33 What steps must a recipient take to address overconcentration of DBEs in certain types of work?

(a) If you determine that DBE firms are so overconcentrated in a certain type of work as to unduly burden the opportunity of non-DBE firms to participate in this type of work, you must devise appropriate measures to address this overconcentration.

(b) These measures may include the use of incentives, technical assistance, business development programs, mentor-protégé programs, and other appropriate measures designed to assist DBEs in performing work outside of the specific field in which you have determined that non-DBEs are unduly burdened. You may also consider varying your use of contract goals, to the extent consistent with § 26.51, to ensure that non-DBEs are not unfairly prevented from competing for subcontracts.

(c) You must obtain the approval of the concerned DOT operating administration for your determination of overconcentration and the measures you devise to address it. Once approved, the measures become part of your DBE program.

§ 26.35 What role do business development and mentor-protégé programs have in the DBE program?

(a) You may or, if an operating administration directs you to, you must establish a DBE business development program (BDP) to assist firms in gaining the ability to compete successfully in the marketplace outside the DBE program. You may require a DBE firm, as a condition of receiving assistance through the BDP, to agree to terminate its participation in the DBE program after a certain time has passed or certain objectives have been reached. See Appendix C of this part for guidance on administering BDP programs.

(b) As part of a BDP or separately, you may establish a "mentor-protégé" program, in which another DBE or non-DBE firm is the principal source of business development assistance to a DBE firm.

(1) Only firms you have certified as DBEs before they are proposed for participation in a mentor-protégé program are eligible to participate in the mentor-protégé program.

(2) During the course of the mentor-protégé relationship, you must:

(i) Not award DBE credit to a non-DBE mentor firm for using its own protégé firm for more than one half of its goal on any contract let by the recipient; and

(ii) Not award DBE credit to a non-DBE mentor firm for using its own protégé firm for more than every other contract performed by the protégé firm.

(3) For purposes of making determinations of business size under this part, you must not treat protégé firms as affiliates of mentor firms, when both firms are participating under an approved mentor-protégé program. See Appendix D of this part for guidance concerning the operation of mentor-protégé programs.

(c) Your BDPs and mentor-protégé programs must be approved by the concerned operating administration before you implement them. Once approved, they become part of your DBE program.

§ 26.37 What are a recipient's responsibilities for monitoring the performance of other program participants?

(a) You must implement appropriate mechanisms to ensure compliance with the part's requirements by all program participants (e.g., applying legal and contract remedies available under Federal, state and local law). You must set forth these mechanisms in your DBE program.

(b) Your DBE program must also include a monitoring and enforcement mechanism to verify that the work committed to DBEs at contract award is

actually performed by the DBEs. This mechanism must provide for a running tally of actual DBE attainments (e.g., payments actually made to DBE firms) and include a provision ensuring that DBE participation is credited toward overall or contract goals only when payments are actually made to DBE firms.

Subpart C—Goals, Good Faith Efforts, and Counting

§ 26.41 What is the role of the statutory 10 percent goal in this program?

(a) The statutes authorizing this program provide that, except to the extent the Secretary determines otherwise, not less than 10 percent of the authorized funds are to be expended with DBEs.

(b) This 10 percent goal is an aspirational goal at the national level, which the Department uses as a tool in evaluating and monitoring DBEs' opportunities to participate in DOT-assisted contracts.

(c) The national 10 percent goal does not authorize or require recipients to set overall or contract goals at the 10 percent level, or any other particular level, or to take any special administrative steps if their goals are above or below 10 percent.

§ 26.43 Can recipients use set-asides or quotas as part of this program?

(a) You are not permitted to use quotas for DBEs on DOT-assisted contracts subject to this part.

(b) You may not set-aside contracts for DBEs on DOT-assisted contracts subject to this part, except that, in limited and extreme circumstances, you may use set-asides when no other method could be reasonably expected to redress egregious instances of discrimination.

§ 26.45 How do recipients set overall goals?

(a) You must set an overall goal for DBE participation in your DOT-assisted contracts.

(b) Your overall goal must be based on demonstrable evidence of the availability of ready, willing and able DBEs relative to all businesses ready, willing and able to participate on your DOT-assisted contracts (hereafter, the "relative availability of DBEs"). The goal must reflect your determination of the level of DBE participation you would expect absent the effects of discrimination. You cannot simply rely on either the 10 percent national goal, your previous overall goal or past DBE participation rates in your program without reference to the relative availability of DBEs in your market.

(c) Step 1. You must begin your goal setting process by determining a base figure

for the relative availability of DBEs. The following are examples of approaches that you may take toward determining a base figure. These examples are provided as a starting point for your goal setting process. Any percentage figure derived from one of these examples should be considered a basis from which you begin when examining all evidence available in your jurisdiction. These examples are not intended as an exhaustive list. Other methods or combinations of methods to determine a base figure may be used, subject to approval by the concerned operating administration.

(1) Use DBE Directories and Census Bureau Data. Determine the number of ready, willing and able DBEs in your market from your DBE directory. Using the Census Bureau's County Business Pattern (CBP) data base, determine the number of all ready, willing and able businesses available in your market that perform work in the same SIC codes. (Information about the CBP data base may be obtained from the Census Bureau at their web site, www.census.gov/cpcd/cbp/view/cbpview.html.) Divide the number of DBEs by the number of all businesses to derive a base figure for the relative availability of DBEs in your market.

(2) Use a bidders list. Determine the number of DBEs that have bid or quoted on your DOT-assisted prime contracts or subcontracts in the previous year. Determine the number of all businesses that have bid or quoted on prime or subcontracts in the same time period. Divide the number of DBE bidders and quoters by the number for all businesses to derive a base figure for the relative availability of DBEs in your market.

(3) Use data from a disparity study. Use a percentage figure derived from data in a valid, applicable disparity study.

(4) Use the goal of another DOT recipient. If another DOT recipient in the same, or substantially similar, market has set an overall goal in compliance with this rule, you may use that goal as a base figure for your goal.

Revision 6: In §26.45(c)(5) Remove the words "Subject to the approval of the DOT operating administration, you" and add "You" in its place.

(5) Alternative methods. Subject to the approval of the DOT operating administration, you may use other methods to determine a base figure for your overall goal. Any methodology you choose must be based on demonstrable evidence of local market conditions and be designed to ultimately attain a goal that is rationally related to the relative availability of DBEs in your market.

(d) Step 2. Once you have calculated a base figure, you must examine all of the evidence

available in your jurisdiction to determine what adjustment, if any, is needed to the base figure in order to arrive at your overall goal.

(1) There are many types of evidence that must be considered when adjusting the base figure. These include:

(i) The current capacity of DBEs to perform work in your DOT-assisted contracting program, as measured by the volume of work DBEs have performed in recent years;

(ii) Evidence from disparity studies conducted anywhere within your jurisdiction, to the extent it is not already accounted for in your base figure; and

(iii) If your base figure is the goal of another recipient, you must adjust it for differences in your local market and your contracting program.

(2) You may also consider available evidence from related fields that affect the opportunities for DBEs to form, grow and compete. These include, but are not limited to:

(i) Statistical disparities in the ability of DBEs to get the financing, bonding and insurance required to participate in your program;

(ii) Data on employment, self-employment, education, training and union apprenticeship programs, to the extent you can relate it to the opportunities for DBEs to perform in your program.

(3) If you attempt to make an adjustment to your base figure to account for the continuing effects of past discrimination (often called the "but for" factor) or the effects of an ongoing DBE program, the adjustment must be based on demonstrable evidence that is logically and directly related to the effect for which the adjustment is sought.

(c) Once you have determined a percentage figure in accordance with paragraphs (c) and (d) of this section, you should express your overall goal as follows:

(1) If you are an FHWA recipient, as a percentage of all Federal-aid highway funds you will expend in FHWA-assisted contract in the forthcoming fiscal year;

(2) If you are an FTA or FAA recipient as a percentage of all FTA or FAA funds (exclusive of FTA funds to be used for the purchase of transit vehicles) that you will expend in FTA or FAA-assisted contracts in the forthcoming fiscal year. In appropriate cases, the FTA or FAA Administrator may permit you to express your overall goal as a percentage of funds for a particular grant or project or group of grants and/or projects.

(f) (1) If you set overall goals on a fiscal year basis, you must submit them to the applicable DOT operating administration for review on August 1 of each year, unless the Administrator of the concerned operating administration establishes a different submission date.

(2) If you are an FTA or FAA recipient and set your overall goal on a project or grant basis, you must submit the goal for review at a time determined by the FTA or FAA Administrator.

(3) You must include with your overall goal submission a description of the methodology you used to establish the goal, including your base figure and the evidence with which it was calculated, and the adjustments you made to the base figure and the evidence relied on for the adjustments. You should also include a summary listing of the relevant available evidence in your jurisdiction and, where applicable, an explanation of why you did not use that evidence to adjust your base figure. You must also include your projection of the portions of the overall goal you expect to meet through race-neutral and race-conscious measures, respectively (see § 26.51 (c)).

(4) You are not required to obtain prior operating administration concurrence with the your overall goal. However, if the operating administration's review suggests that your overall goal has not been correctly calculated, or that your method for calculating goals is inadequate, the operating administration may, after consulting with you, adjust your overall goal or require that you do so. The adjusted overall goal is binding on you.

(5) If you need additional time to collect data or take other steps to develop an approach to setting overall goals, you may request the approval of the concerned operating administration for an interim goal and/or goal-setting mechanism. Such a mechanism must:

(i) Reflect the relative availability of DBEs in your local market to the maximum extent feasible given the data available to you; and

(ii) Avoid imposing undue burdens on non-DBEs.

(g) In establishing an overall goal, you must provide for public participation. This public participation must include:

(1) Consultation with minority, women's and general contractor groups, community organizations, and other officials or organizations which could be expected to have information concerning the availability of disadvantaged and non-disadvantaged businesses, the effects of discrimination on opportunities for DBEs, and your efforts to establish a level playing field for the participation of DBEs.

(2) A published notice announcing your proposed overall goal, informing the public that the proposed goal and its rationale are available for inspection during normal business hours at your principal office for 30 days following the date of the notice, and informing the public that you and the Department will accept comments on the goals for 45 days from the date of the notice. The notice must include addresses to which comments may be sent, and you must publish it in general circulation media and available minority-focused media and trade association publications.

(h) Your overall goals must provide for participation by all certified DBEs and must not be subdivided into group-specific goals.

§ 26.47 Can recipients be penalized for failing to meet overall goals?

(a) You cannot be penalized, or treated by the Department as being in noncompliance with this rule, because your DBE participation falls short of your overall goal, unless you have failed to administer your program in good faith.

(b) If you do not have an approved DBE program or overall goal, or if you fail to implement your program in good faith, you are in noncompliance with this part.

§ 26.49 How are overall goals established for transit vehicle manufacturers?

(a) If you are an FTA recipient, you must require in your DBE program that each transit vehicle manufacturer, as a condition of being authorized to bid or propose on FTA-assisted transit vehicle procurements, certify that it has complied with the requirements of this section. You do not include FTA assistance used in transit vehicle procurements in the base amount from which your overall goal is calculated.

(b) If you are a transit vehicle manufacturer, you must establish and submit for FTA's approval an annual overall percentage goal. In setting your overall goal, you should be guided, to the extent applicable, by the principles underlying § 26.45. The base from which you calculate this goal is the amount of FTA financial assistance included in transit vehicle contracts you will perform during the fiscal year in question. You must exclude from this base funds attributable to work performed outside the United States and its territories, possessions, and commonwealths. The requirements and procedures of this part with respect to submission and approval of overall goals apply to you as they do to recipients.

(c) As a transit vehicle manufacturer, you may make the certification required by this section if you have submitted the goal this section requires and FTA has approved it or not disapproved it.

(d) As a recipient, you may, with FTA approval, establish project-specific goals for DBE participation in the procurement of transit vehicles in lieu of complying through the procedures of this section.

(e) If you are an FHWA or FAA recipient, you may, with FHWA or FAA approval, use the procedures of this section with respect to procurements of vehicles or specialized equipment. If you choose to do so, then the manufacturers of this equipment must meet the same requirements (including goal approval by FHWA or FAA) as transit vehicle manufacturers must meet in FTA-assisted procurements.

§ 26.51 What means do recipients use to meet overall goals?

(a) You must meet the maximum feasible portion of your overall goal by using race-neutral means of facilitating DBE participation. Race-neutral DBE participation includes any time a DBE wins a prime contract through customary competitive procurement procedures, is awarded a subcontract on a prime contract that does not carry a DBE goal, or even if there is a DBE goal, wins a subcontract from a prime contractor that did not consider its DBE status in making the award (e.g., a prime contractor that uses a strict low bid system to award subcontracts).

(b) Race-neutral means include, but are not limited to, the following:

(1) Arranging solicitations, times for the presentation of bids, quantities, specifications, and delivery schedules in ways that facilitate DBE, and other small businesses, participation (e.g., unbundling large contracts to make them more accessible to small businesses, requiring or encouraging prime contractors to subcontract portions of work that they might otherwise perform with their own forces);

(2) Providing assistance in overcoming limitations such as inability to obtain bonding or financing (e.g., by such means as simplifying the bonding process, reducing bonding requirements, eliminating the impact of surety costs from bids, and providing services to help DBEs, and other small businesses, obtain bonding and financing);

(3) Providing technical assistance and other services;

(4) Carrying out information and communications programs on contracting procedures and specific

contract opportunities (e.g., ensuring the inclusion of DBEs, and other small businesses, on recipient mailing lists for bidders; ensuring the dissemination to bidders on prime contracts of lists of potential subcontractors; provision of information in languages other than English, where appropriate);

(5) Implementing a supportive services program to develop and improve immediate and long-term business management, record keeping, and financial and accounting capability for DBEs and other small businesses;

(6) Providing services to help DBEs, and other small businesses, improve long-term development, increase opportunities to participate in a variety of kinds of work, handle increasingly significant projects, and achieve eventual self-sufficiency;

(7) Establishing a program to assist new, start-up firms, particularly in fields in which DBE participation has historically been low;

(8) Ensuring distribution of your DBE directory, through print and electronic means, to the widest feasible universe of potential prime contractors; and

(9) Assisting DBEs, and other small businesses, to develop their capability to utilize emerging technology and conduct business through electronic media.

(c) Each time you submit your overall goal for review by the concerned operating administration, you must also submit your projection of the portion of the goal that you expect to meet through race-neutral means and your basis for that projection. This projection is subject to approval by the concerned operating administration, in conjunction with its review of your overall goal.

(d) You must establish contract goals to meet any portion of your overall goal you do not project being able to meet using race-neutral means.

(e) The following provisions apply to the use of contract goals:

(1) You may use contract goals only on those DOT-assisted contracts that have subcontracting possibilities.

(2) You are not required to set a contract goal on every DOT-assisted contract. You are not required to set each contract goal at the same percentage level as the overall goal. The goal for a specific contract may be higher or lower than that percentage level of the overall goal, depending on such factors as the type of work involved, the location of the work, and the availability of DBEs for the work of the particular contract. However, over the period covered by your overall goal, you must set contract goals so that they will cumulatively result in meeting any portion of your overall goal you do not

project being able to meet through the use of race-neutral means.

(3) Operating administration approval of each contract goal is not necessarily required. However, operating administrations may review and approve or disapprove any contract goal you establish.

(4) Your contract goals must provide for participation by all certified DBEs and must not be subdivided into group-specific goals.

(f) To ensure that your DBE program continues to be narrowly tailored to overcome the effects of discrimination, you must adjust your use of contract goals as follows:

(1) If your approved projection under paragraph (c) of this section estimates that you can meet your entire overall goal for a given year through race-neutral means, you must implement your program without setting contract goals during that year.

Example to Paragraph (f)(1): Your overall goal for Year I is 12 percent. You estimate that you can obtain 12 percent or more DBE participation through the use of race-neutral measures, without any use of contract goals. In this case, you do not set any contract goals for the contracts that will be performed in Year I.

(2) If, during the course of any year in which you are using contract goals, you determine that you will exceed your overall goal, you must reduce or eliminate the use of contract goals to the extent necessary to ensure that the use of contract goals does not result in exceeding the overall goal. If you determine that you will fall short of your overall goal, then you must make appropriate modifications in your use of race-neutral and/or race-conscious measures to allow you to meet the overall goal.

Example to Paragraph (f)(2): In Year II, your overall goal is 12 percent. You have estimated that you can obtain 5 percent DBE participation through use of race-neutral measures. You therefore plan to obtain the remaining 7 percent participation through use of DBE goals. By September, you have already obtained 11 percent DBE participation for the year. For contracts let during the remainder of the year, you use contract goals only to the extent necessary to obtain an additional one percent DBE participation. However, if you determine in September that your participation for the year is likely to be only 8 percent total, then you would increase your use of race-neutral and/or race-conscious means during the remainder of the year in order to achieve your overall goal.

(3) If the DBE participation you have obtained by race-neutral means alone meets or exceeds your overall goals for two consecutive years, you are not required to make a projection of the

amount of your goal you can meet using such means in the next year. You do not set contract goals on any contracts in the next year. You continue using only race-neutral means to meet your overall goals unless and until you do not meet your overall goal for a year.

Example to Paragraph (f)(3): Your overall goal for Years I and Year II is 10 percent. The DBE participation you obtain through race-neutral measures alone is 10 percent or more in each year. (For this purpose, it does not matter whether you obtained additional DBE participation through using contract goals in these years.) In Year III and following years, you do not need to make a projection under paragraph (c) of this section of the portion of your overall goal you expect to meet using race-neutral means. You simply use race-neutral means to achieve your overall goals. However, if in Year VI your DBE participation falls short of your overall goal, then you must make a paragraph (c) projection for Year VII and, if necessary, resume use of contract goals in that year.

(4) If you obtain DBE participation that exceeds your overall goal in two consecutive years through the use of contract goals (i.e., not through the use of race-neutral means alone), you must reduce your use of contract goals proportionately in the following year.

Example to Paragraph (f)(4): In Years I and II, your overall goal is 12 percent, and you obtain 14 and 16 percent DBE participation, respectively. You have exceeded your goals over the two-year period by an average of 25 percent. In Year III, your overall goal is again 12 percent, and your paragraph (c) projection estimates that you will obtain 4 percent DBE participation through race-neutral means and 8 percent through contract goals. You then reduce the contract goal projection by 25 percent (i.e., from 8 to 6 percent) and set contract goals accordingly during the year. If in Year III you obtain 11 percent participation, you do not use this contract goal adjustment mechanism for Year IV, because there have not been two consecutive years of exceeding overall goals.

(g) In any year in which you project meeting part of your goal through race-neutral means and the remainder through contract goals, you must maintain data separately on DBE achievements in those contracts with and without contract goals, respectively. You must report this data to the concerned operating administration as provided in § 26.11.

§ 26.53 What are the good faith efforts procedures recipients follow in situations where there are contract goals?

(a) When you have established a DBE contract goal, you must award the contract only to a bidder/offeror who makes good faith efforts to meet it. You must determine that a bidder/offeror has made good faith efforts if the bidder/

offeror does either of the following things:

- (1) Documents that it has obtained enough DBE participation to meet the goal; or
 - (2) Documents that it made adequate good faith efforts to meet the goal, even though it did not succeed in obtaining enough DBE participation to do so. If the bidder/offeror does document adequate good faith efforts, you must not deny award of the contract on the basis that the bidder/offeror failed to meet the goal. See Appendix A of this part for guidance in determining the adequacy of a bidder/offeror's good faith efforts.
- (b) In your solicitations for DOT-assisted contracts for which a contract goal has been established, you must require the following:
- (1) Award of the contract will be conditioned on meeting the requirements of this section;
 - (2) All bidders/offerors will be required to submit the following information to the recipient, at the time provided in paragraph (b)(3) of this section:
 - (i) The names and addresses of DBE firms that will participate in the contract;
 - (ii) A description of the work that each DBE will perform;
 - (iii) The dollar amount of the participation of each DBE firm participating;
 - (iv) Written documentation of the bidder/offeror's commitment to use a DBE subcontractor whose participation it submits to meet a contract goal;
 - (v) Written confirmation from the DBE that it is participating in the contract as provided in the prime contractor's commitment; and
 - (vi) If the contract goal is not met, evidence of good faith efforts (see Appendix A of this part); and
 - (3) At your discretion, the bidder/offeror must present the information required by paragraph (b)(2) of this section—
 - (i) Under sealed bid procedures, as a matter of responsiveness, or with initial proposals, under contract negotiation procedures; or
 - (ii) At any time before you commit yourself to the performance of the contract by the bidder/offeror, as a matter of responsibility.
 - (c) You must make sure all information is complete and accurate and adequately documents the bidder/offeror's good faith efforts before committing yourself to the performance of the contract by the bidder/offeror.
 - (d) If you determine that the apparent successful bidder/offeror has failed to meet the requirements of paragraph (a)

of this section, you must, before awarding the contract, provide the bidder/offeror an opportunity for administrative reconsideration.

- (1) As part of this reconsideration, the bidder/offeror must have the opportunity to provide written documentation or argument concerning the issue of whether it met the goal or made adequate good faith efforts to do so.
- (2) Your decision on reconsideration must be made by an official who did not take part in the original determination that the bidder/offeror failed to meet the goal or make adequate good faith efforts to do so.
- (3) The bidder/offeror must have the opportunity to meet in person with your reconsideration official to discuss the issue of whether it met the goal or made adequate good faith efforts to do so.
- (4) You must send the bidder/offeror a written decision on reconsideration, explaining the basis for finding that the bidder did or did not meet the goal or make adequate good faith efforts to do so.
- (5) The result of the reconsideration process is not administratively appealable to the Department of Transportation.
- (e) In a "design-build" or "turnkey" contracting situation, in which the recipient lets a master contract to a contractor, who in turn lets subsequent subcontracts for the work of the project, a recipient may establish a goal for the project. The master contractor then establishes contract goals, as appropriate, for the subcontracts it lets. Recipients must maintain oversight of the master contractor's activities to ensure that they are conducted consistent with the requirements of this part.
 - (f)(1) You must require that a prime contractor not terminate for convenience a DBE subcontractor listed in response to paragraph (b)(2) of this section (or an approved substitute DBE firm) and then perform the work of the terminated subcontract with its own forces or those of an affiliate, without your prior written consent.
 - (2) When a DBE subcontractor is terminated, or fails to complete its work on the contract for any reason, you must require the prime contractor to make good faith efforts to find another DBE subcontractor to substitute for the original DBE. These good faith efforts shall be directed at finding another DBE to perform at least the same amount of work under the contract as the DBE that was terminated, to the extent needed to meet the contract goal you established for the procurement.

(3) You must include in each prime contract a provision for appropriate administrative remedies that you will invoke if the prime contractor fails to comply with the requirements of this section.

(g) You must apply the requirements of this section to DBE bidders/offerors for prime contracts. In determining whether a DBE bidder/offeror for a prime contract has met a contract goal, you count the work the DBE has committed to performing with its own forces as well as the work that it has committed to be performed by DBE subcontractors and DBE suppliers.

§ 26.55 How is DBE participation counted toward goals?

(a) When a DBE participates in a contract, you count only the value of the work actually performed by the DBE toward DBE goals.

(1) Count the entire amount of that portion of a construction contract (or other contract not covered by paragraph (a)(2) of this section) that is performed by the DBE's own forces. Include the cost of supplies and materials obtained by the DBE for the work of the contract, including supplies purchased or equipment leased by the DBE (except supplies and equipment the DBE subcontractor purchases or leases from the prime contractor or its affiliate).

(2) Count the entire amount of fees or commissions charged by a DBE firm for providing a bona fide service, such as professional, technical, consultant, or managerial services, or for providing bonds or insurance specifically required for the performance of a DOT-assisted contract, toward DBE goals, provided you determine the fee to be reasonable and not excessive as compared with fees customarily allowed for similar services.

(3) When a DBE subcontracts part of the work of its contract to another firm, the value of the subcontracted work may be counted toward DBE goals only if the DBE's subcontractor is itself a DBE. Work that a DBE subcontracts to a non-DBE firm does not count toward DBE goals.

(b) When a DBE performs as a participant in a joint venture, count a portion of the total dollar value of the contract equal to the distinct, clearly defined portion of the work of the contract that the DBE performs with its own forces toward DBE goals.

(c) Count expenditures to a DBE contractor toward DBE goals only if the DBE is performing a commercially useful function on that contract.

(1) A DBE performs a commercially useful function when it is responsible for execution of the work of the contract and is carrying out its responsibilities

by actually performing, managing, and supervising the work involved. To perform a commercially useful function, the DBE must also be responsible, with respect to materials and supplies used on the contract, for negotiating price, determining quality and quantity, ordering the material, and installing (where applicable) and paying for the material itself. To determine whether a DBE is performing a commercially useful function, you must evaluate the amount of work subcontracted, industry practices, whether the amount the firm is to be paid under the contract is commensurate with the work it is actually performing and the DBE credit claimed for its performance of the work, and other relevant factors.

(2) A DBE does not perform a commercially useful function if its role is limited to that of an extra participant in a transaction, contract, or project through which funds are passed in order to obtain the appearance of DBE participation. In determining whether a DBE is such an extra participant, you must examine similar transactions, particularly those in which DBEs do not participate.

(3) If a DBE does not perform or exercise responsibility for at least 30 percent of the total cost of its contract with its own work force, or the DBE subcontracts a greater portion of the work of a contract than would be expected on the basis of normal industry practice for the type of work involved, you must presume that it is not performing a commercially useful function.

(4) When a DBE is presumed not to be performing a commercially useful function as provided in paragraph (c)(3) of this section, the DBE may present evidence to rebut this presumption. You may determine that the firm is performing a commercially useful function given the type of work involved and normal industry practices.

(5) Your decisions on commercially useful function matters are subject to review by the concerned operating administration, but are not administratively appealable to DOT.

(d) Use the following factors in determining whether a DBE trucking company is performing a commercially useful function:

(1) The DBE must be responsible for the management and supervision of the entire trucking operation for which it is responsible on a particular contract, and there cannot be a contrived arrangement for the purpose of meeting DBE goals.

(2) The DBE must itself own and operate at least one fully licensed, insured, and operational truck used on the contract.

(3) The DBE receives credit for the total value of the transportation services it provides on the contract using trucks it owns, insures, and operates using drivers it employs.

(4) The DBE may lease trucks from another DBE firm, including an owner-operator who is certified as a DBE. The DBE who leases trucks from another DBE receives credit for the total value of the transportation services the lessee DBE provides on the contract.

(5) The DBE may also lease trucks from a non-DBE firm, including an owner-operator. The DBE who leases trucks from a non-DBE is entitled to credit only for the fee or commission it receives as a result of the lease arrangement. The DBE does not receive credit for the total value of the transportation services provided by the lessee, since these services are not provided by a DBE.

(6) For purposes of this paragraph (d), a lease must indicate that the DBE has exclusive use of and control over the truck. This does not preclude the leased truck from working for others during the term of the lease with the consent of the DBE, so long as the lease gives the DBE absolute priority for use of the leased truck. Leased trucks must display the name and identification number of the DBE.

(e) Count expenditures with DBEs for materials or supplies toward DBE goals as provided in the following:

(1)(i) If the materials or supplies are obtained from a DBE manufacturer, count 100 percent of the cost of the materials or supplies toward DBE goals.

(ii) For purposes of this paragraph (e)(1), a manufacturer is a firm that operates or maintains a factory or establishment that produces, on the premises, the materials, supplies, articles, or equipment required under the contract and of the general character described by the specifications.

(2)(i) If the materials or supplies are purchased from a DBE regular dealer, count 60 percent of the cost of the materials or supplies toward DBE goals.

(ii) For purposes of this section, a regular dealer is a firm that owns, operates, or maintains a store, warehouse, or other establishment in which the materials, supplies, articles or equipment of the general character described by the specifications and required under the contract are bought, kept in stock, and regularly sold or leased to the public in the usual course of business.

(A) To be a regular dealer, the firm must be an established, regular business that engages, as its principal business and under its own name, in the

purchase and sale or lease of the products in question.

(B) A person may be a regular dealer in such bulk items as petroleum products, steel, cement, gravel, stone, or asphalt without owning, operating, or maintaining a place of business as provided in this paragraph (e)(2)(ii) if the person both owns and operates distribution equipment for the products. Any supplementing of regular dealers' own distribution equipment shall be by a long-term lease agreement and not on an ad hoc or contract-by-contract basis.

(C) Packagers, brokers, manufacturers' representatives, or other persons who arrange or expedite transactions are not regular dealers within the meaning of this paragraph (e)(2).

(3) With respect to materials or supplies purchased from a DBE which is neither a manufacturer nor a regular dealer, count the entire amount of fees or commissions charged for assistance in the procurement of the materials and supplies, or fees or transportation charges for the delivery of materials or supplies required on a job site, toward DBE goals, provided you determine the fees to be reasonable and not excessive as compared with fees customarily allowed for similar services. Do not count any portion of the cost of the materials and supplies themselves toward DBE goals, however.

(f) If a firm is not currently certified as a DBE in accordance with the standards of subpart D of this part at the time of the execution of the contract, do not count the firm's participation toward any DBE goals, except as provided for in § 26.87(l).

(g) Do not count the dollar value of work performed under a contract with a firm after it has ceased to be certified toward your overall goal.

(h) Do not count the participation of a DBE subcontractor toward the prime contractor's DBE achievements or your overall goal until the amount being counted toward the goal has been paid to the DBE.

Subpart D—Certification Standards

§ 26.81 How are burdens of proof allocated in the certification process?

(a) In determining whether to certify a firm as eligible to participate as a DBE, you must apply the standards of this subpart.

(b) The firm seeking certification has the burden of demonstrating to you, by a preponderance of the evidence, that it meets the requirements of this subpart concerning group membership or individual disadvantage, business size, ownership, and control.

(c) You must rebuttably presume that members of the designated groups

identified in § 26.67(a) are socially and economically disadvantaged. This means that they do not have the burden of proving to you that they are socially and economically disadvantaged. However, applicants have the obligation to provide you information concerning their economic disadvantage (see § 26.67).

(d) Individuals who are not presumed to be socially and economically disadvantaged, and individuals concerning whom the presumption of disadvantage has been rebutted, have the burden of proving to you, by a preponderance of the evidence, that they are socially and economically disadvantaged. (See Appendix E of this part.)

(e) You must make determinations concerning whether individuals and firms have met their burden of demonstrating group membership, ownership, control, and social and economic disadvantage (where disadvantage must be demonstrated on an individual basis) by considering all the facts in the record, viewed as a whole.

§ 26.63 What rules govern group membership determinations?

(a) If you have reason to question whether an individual is a member of a group that is presumed to be socially and economically disadvantaged, you must require the individual to demonstrate, by a preponderance of the evidence, that he or she is a member of the group.

(b) In making such a determination, you must consider whether the person has held himself out to be a member of the group over a long period of time prior to application for certification and whether the person is regarded as a member of the group by the relevant community. You may require the applicant to produce appropriate documentation of group membership.

(1) If you determine that an individual claiming to be a member of a group presumed to be disadvantaged is not a member of a designated disadvantaged group, the individual must demonstrate social and economic disadvantage on an individual basis.

(2) Your decisions concerning membership in a designated group are subject to the certification appeals procedure of § 26.89.

§ 26.65 What rules govern business size determinations?

(a) To be an eligible DBE, a firm (including its affiliates) must be an existing small business, as defined by Small Business Administration (SBA) standards. You must apply current SBA business size standard(s) found in 13 CFR part 121 appropriate to the type (s) of work the firm seeks to perform in DOT-assisted contracts.

(b) Even if it meets the requirements of paragraph (a) of this section, a firm is not an eligible DBE in any Federal fiscal year if the

firm (including its affiliates) has had average annual gross receipts, as defined by SBA regulations (see 13 CFR 121.402), over the firm's previous three fiscal years, in excess of \$16.6 million. The Secretary adjusts this amount for inflation from time to time.

Revision 7: In § 26.67, Revise paragraph (a)(2)(i); redesignate paragraph (a)(2)(ii) as (a)(2)(iii) and add new paragraph (a)(2)(ii)
§ 26.67 What rules determine social and economic disadvantage?

(a) Presumption of disadvantage.

(1) You must rebuttably presume that citizens of the United States (or lawfully admitted permanent residents) who are women, Black Americans, Hispanic Americans, Native Americans, Asian-Pacific Americans, Subcontinent Asian Americans, or other minorities found to be disadvantaged by the SBA, are socially and economically disadvantaged individuals. You must require applicants to submit a signed, notarized certification that each presumptively disadvantaged owner is, in fact, socially and economically disadvantaged.

(2)(i) You must require each individual owner of a firm applying to participate as a DBE (except a firm applying to participate as an airport concessionaire) whose ownership and control are relied upon for DBE certification to submit a signed, notarized statement of personal net worth, with appropriate supporting documentation. This statement and documentation must not be unduly lengthy, burdensome or intrusive.

(ii) Notwithstanding any provision of state law, you must not release an individual's personal net worth statement nor any documentation supporting it to any third party without the written consent of the submitter. *Provided* that you must transmit this information to DOT in any certification appeal proceeding under § 26.89 in which the disadvantaged status of the individual is in question.

In determining net worth, you must exclude an individual's ownership interest in the applicant firm and the individual's equity in his or her primary residence (except any portion of such equity that is attributable to excessive withdrawals from the applicant firm). A contingent liability does not reduce an individual's net worth. The personal net worth of an individual claiming to be an Alaska Native will include assets and income from sources other than an Alaska Native Corporation and exclude any of the following which the individual receives from any Alaska Native Corporation: cash (including cash dividends on stock received from an ANC) to the extent that it does not, in the aggregate, exceed \$2,000 per individual per annum; stock (including stock issued or distributed by an ANC as a dividend or distribution on stock); a partnership interest; land or an interest in land (including land or an interest in land received from an ANC as a dividend or distribution on stock); and an interest in a settlement trust.

(b) Rebuttal of presumption of disadvantage.

(1) If the statement of personal net worth that an individual submits under paragraph (a)(2) of this section shows that the individual's personal net worth exceeds \$750,000, the individual's presumption of economic disadvantage is rebutted. You are not required to have a proceeding under paragraph (b)(2) of this section in order to rebut the presumption of economic disadvantage in this case.

(2) If you have a reasonable basis to believe that an individual who is a member of one of the designated groups is not, in fact, socially and/or economically disadvantaged you may, at any time, start a proceeding to determine whether the presumption should be regarded as rebutted with respect to that individual. Your proceeding must follow the procedures of § 26.87.

(3) In such a proceeding, you have the burden of demonstrating, by a preponderance of the evidence, that the individual is not socially and economically disadvantaged. You may require the individual to produce information relevant to the determination of his or her disadvantage.

(4) When an individual's presumption of social and/or economic disadvantage has been rebutted, his or her ownership and control of the firm in question cannot be used for purposes of DBE eligibility under this subpart unless and until he or she makes an individual showing of social and/or economic disadvantage. If the basis for rebutting the presumption is a determination that the individual's personal net worth exceeds \$750,000, the individual is no longer eligible for participation in the program and cannot regain eligibility by making an individual showing of disadvantage.

(c) 8(a) and SDB Firms. If a firm applying for certification has a current, valid certification from or recognized by the SBA under the 8(a) or small and disadvantaged business (SDB) program (except an SDB certification based on the firm's self-certification as an SDB), you may accept the firm's 8(a) or SDB certification in lieu of conducting your own certification proceeding, just as you may accept the certification of another DOT recipient for this purpose. You are not required to do so, however.

(d) Individual determinations of social and economic disadvantage. Firms owned and controlled by individuals who are not presumed to be socially and economically disadvantaged (including individuals whose presumed disadvantage has been rebutted) may apply for DBE

certification. You must make a case-by-case determination of whether each individual whose ownership and control are relied upon for DBE certification is socially and economically disadvantaged. In such a proceeding, the applicant firm has the burden of demonstrating to you, by a preponderance of the evidence, that the individuals who own and control it are socially and economically disadvantaged. An individual whose personal net worth exceeds \$750,000 shall not be deemed to be economically disadvantaged. In making these determinations, use the guidance found in Appendix E of this part. You must require that applicants provide sufficient information to permit determinations under the guidance of Appendix E of this part.

§ 26.69 What rules govern determinations of ownership?

(a) In determining whether the socially and economically disadvantaged participants in a firm own the firm, you must consider all the facts in the record, viewed as a whole.

(b) To be an eligible DBE, a firm must be at least 51 percent owned by socially and economically disadvantaged individuals.

(1) In the case of a corporation, such individuals must own at least 51 percent of the each class of voting stock outstanding and 51 percent of the aggregate of all stock outstanding.

(2) In the case of a partnership, 51 percent of each class of partnership interest must be owned by socially and economically disadvantaged individuals. Such ownership must be reflected in the firm's partnership agreement.

(3) In the case of a limited liability company, at least 51 percent of each class of member interest must be owned by socially and economically disadvantaged individuals.

(c) The firm's ownership by socially and economically disadvantaged individuals must be real, substantial, and continuing, going beyond pro forma ownership of the firm as reflected in ownership documents. The disadvantaged owners must enjoy the customary incidents of ownership, and share in the risks and profits commensurate with their ownership interests, as demonstrated by the substance, not merely the form, of arrangements.

(d) All securities that constitute ownership of a firm shall be held directly by disadvantaged persons. Except as provided in this paragraph (d), no securities or assets held in trust, or by any guardian for a minor, are

considered as held by disadvantaged persons in determining the ownership of a firm. However, securities or assets held in trust are regarded as held by a disadvantaged individual for purposes of determining ownership of the firm, if—

(1) The beneficial owner of securities or assets held in trust is a disadvantaged individual, and the trustee is the same or another such individual; or

(2) The beneficial owner of a trust is a disadvantaged individual who, rather than the trustee, exercises effective control over the management, policy-making, and daily operational activities of the firm. Assets held in a revocable living trust may be counted only in the situation where the same disadvantaged individual is the sole grantor, beneficiary, and trustee.

(e) The contributions of capital or expertise by the socially and economically disadvantaged owners to acquire their ownership interests must be real and substantial. Examples of insufficient contributions include a promise to contribute capital, an unsecured note payable to the firm or an owner who is not a disadvantaged individual, or mere participation in a firm's activities as an employee. Debt instruments from financial institutions or other organizations that lend funds in the normal course of their business do not render a firm ineligible, even if the debtor's ownership interest is security for the loan.

(f) The following requirements apply to situations in which expertise is relied upon as part of a disadvantaged owner's contribution to acquire ownership:

(1) The owner's expertise must be—

(i) In a specialized field;

(ii) Of outstanding quality;

(iii) In areas critical to the firm's operations;

(iv) Indispensable to the firm's potential success;

(v) Specific to the type of work the firm performs; and

(vi) Documented in the records of the firm. These records must clearly show the contribution of expertise and its value to the firm.

(2) The individual whose expertise is relied upon must have a significant financial investment in the firm.

(g) You must always deem as held by a socially and economically disadvantaged individual, for purposes of determining ownership, all interests in a business or other assets obtained by the individual—

(1) As the result of a final property settlement or court order in a divorce or legal separation, provided that no term or condition of the agreement or divorce

decree is inconsistent with this section; or

(2) Through inheritance, or otherwise because of the death of the former owner.

(h)(1) You must presume as not being held by a socially and economically disadvantaged individual, for purposes of determining ownership, all interests in a business or other assets obtained by the individual as the result of a gift, or transfer without adequate consideration, from any non-disadvantaged individual or non-DBE firm who is—

(i) Involved in the same firm for which the individual is seeking certification, or an affiliate of that firm;

(ii) Involved in the same or a similar line of business; or

(iii) Engaged in an ongoing business relationship with the firm, or an affiliate of the firm, for which the individual is seeking certification.

(2) To overcome this presumption and permit the interests or assets to be counted, the disadvantaged individual must demonstrate to you, by clear and convincing evidence, that—

(i) The gift or transfer to the disadvantaged individual was made for reasons other than obtaining certification as a DBE; and

(ii) The disadvantaged individual actually controls the management, policy, and operations of the firm, notwithstanding the continuing participation of a non-disadvantaged individual who provided the gift or transfer.

(i) You must apply the following rules in situations in which marital assets form a basis for ownership of a firm:

(1) When marital assets (other than the assets of the business in question), held jointly or as community property by both spouses, are used to acquire the ownership interest asserted by one spouse, you must deem the ownership interest in the firm to have been acquired by that spouse with his or her own individual resources, provided that the other spouse irrevocably renounces and transfers all rights in the ownership interest in the manner sanctioned by the laws of the state in which either spouse or the firm is domiciled. You do not count a greater portion of joint or community property assets toward ownership than state law would recognize as belonging to the socially and economically disadvantaged owner of the applicant firm.

(2) A copy of the document legally transferring and renouncing the other spouse's rights in the jointly owned or community assets used to acquire an ownership interest in the firm must be included as part of the firm's application for DBE certification.

(j) You may consider the following factors in determining the ownership of a firm. However, you must not regard a contribution of capital as failing to be real and substantial, or find a firm ineligible, solely because—

(1) A socially and economically disadvantaged individual acquired his or her ownership interest as the result of a gift, or transfer without adequate consideration, other than the types set forth in paragraph (h) of this section;

(2) There is a provision for the co-signature of a spouse who is not a socially and economically disadvantaged individual on financing agreements, contracts for the purchase or sale of real or personal property, bank signature cards, or other documents; or

(3) Ownership of the firm in question or its assets is transferred for adequate consideration from a spouse who is not a socially and economically disadvantaged individual to a spouse who is such an individual. In this case, you must give particularly close and careful scrutiny to the ownership and control of a firm to ensure that it is owned and controlled, in substance as well as in form, by a socially and economically disadvantaged individual.

§ 26.71 What rules govern determinations concerning control?

(a) In determining whether socially and economically disadvantaged owners control a firm, you must consider all the facts in the record, viewed as a whole.

(b) Only an independent business may be certified as a DBE. An independent business is one the viability of which does not depend on its relationship with another firm or firms.

(1) In determining whether a potential DBE is an independent business, you must scrutinize relationships with non-DBE firms, in such areas as personnel, facilities, equipment, financial and/or bonding support, and other resources.

(2) You must consider whether present or recent employer/employee relationships between the disadvantaged owner(s) of the potential DBE and non-DBE firms or persons associated with non-DBE firms compromise the independence of the potential DBE firm.

(3) You must examine the firm's relationships with prime contractors to determine whether a pattern of exclusive or primary dealings with a prime contractor compromises the independence of the potential DBE firm.

(4) In considering factors related to the independence of a potential DBE firm, you must consider the consistency of relationships between the potential

DBE and non-DBE firms with normal industry practice.

(c) A DBE firm must not be subject to any formal or informal restrictions which limit the customary discretion of the socially and economically disadvantaged owners. There can be no restrictions through corporate charter provisions, by-law provisions, contracts or any other formal or informal devices (e.g., cumulative voting rights, voting powers attached to different classes of stock, employment contracts, requirements for concurrence by non-disadvantaged partners, conditions precedent or subsequent, executory agreements, voting trusts, restrictions on or assignments of voting rights) that prevent the socially and economically disadvantaged owners, without the cooperation or vote of any non-disadvantaged individual, from making any business decision of the firm. This paragraph does not preclude a spousal co-signature on documents as provided for in § 26.69(j)(2).

(d) The socially and economically disadvantaged owners must possess the power to direct or cause the direction of the management and policies of the firm and to make day-to-day as well as long-term decisions on matters of management, policy and operations.

(1) A disadvantaged owner must hold the highest officer position in the company (e.g., chief executive officer or president).

(2) In a corporation, disadvantaged owners must control the board of directors.

(3) In a partnership, one or more disadvantaged owners must serve as general partners, with control over all partnership decisions.

(e) Individuals who are not socially and economically disadvantaged may be involved in a DBE firm as owners, managers, employees, stockholders, officers, and/or directors. Such individuals must not, however, possess or exercise the power to control the firm, or be disproportionately responsible for the operation of the firm.

(f) The socially and economically disadvantaged owners of the firm may delegate various areas of the management, policymaking, or daily operations of the firm to other participants in the firm, regardless of whether these participants are socially and economically disadvantaged individuals. Such delegations of authority must be revocable, and the socially and economically disadvantaged owners must retain the power to hire and fire any person to whom such authority is delegated. The managerial role of the socially and economically disadvantaged owners in

the firm's overall affairs must be such that the recipient can reasonably conclude that the socially and economically disadvantaged owners actually exercise control over the firm's operations, management, and policy.

(g) The socially and economically disadvantaged owners must have an overall understanding of, and managerial and technical competence and experience directly related to, the type of business in which the firm is engaged and the firm's operations. The socially and economically disadvantaged owners are not required to have experience or expertise in every critical area of the firm's operations, or to have greater experience or expertise in a given field than managers or key employees. The socially and economically disadvantaged owners must have the ability to intelligently and critically evaluate information presented by other participants in the firm's activities and to use this information to make independent decisions concerning the firm's daily operations, management, and policymaking. Generally, expertise limited to office management, administration, or bookkeeping functions unrelated to the principal business activities of the firm is insufficient to demonstrate control.

(h) If state or local law requires the persons to have a particular license or other credential in order to own and/or control a certain type of firm, then the socially and economically disadvantaged persons who own and control a potential DBE firm of that type must possess the required license or credential. If state or local law does not require such a person to have such a license or credential to own and/or control a firm, you must not deny certification solely on the ground that the person lacks the license or credential. However, you may take into account the absence of the license or credential as one factor in determining whether the socially and economically disadvantaged owners actually control the firm.

(i)(1) You may consider differences in remuneration between the socially and economically disadvantaged owners and other participants in the firm in determining whether to certify a firm as a DBE. Such consideration shall be in the context of the duties of the persons involved, normal industry practices, the firm's policy and practice concerning reinvestment of income, and any other explanations for the differences proffered by the firm. You may determine that a firm is controlled by its socially and economically disadvantaged owner although that

owner's remuneration is lower than that of some other participants in the firm.

(2) In a case where a non-disadvantaged individual formerly controlled the firm, and a socially and economically disadvantaged individual now controls it, you may consider a difference between the remuneration of the former and current controller of the firm as a factor in determining who controls the firm, particularly when the non-disadvantaged individual remains involved with the firm and continues to receive greater compensation than the disadvantaged individual.

(j) In order to be viewed as controlling a firm, a socially and economically disadvantaged owner cannot engage in outside employment or other business interests that conflict with the management of the firm or prevent the individual from devoting sufficient time and attention to the affairs of the firm to control its activities. For example, absentee ownership of a business and part-time work in a full-time firm are not viewed as constituting control. However, an individual could be viewed as controlling a part-time business that operates only on evenings and/or weekends, if the individual controls it all the time it is operating.

(k)(1) A socially and economically disadvantaged individual may control a firm even though one or more of the individual's immediate family members (who themselves are not socially and economically disadvantaged individuals) participate in the firm as a manager, employee, owner, or in another capacity. Except as otherwise provided in this paragraph, you must make a judgment about the control the socially and economically disadvantaged owner exercises vis-a-vis other persons involved in the business as you do in other situations, without regard to whether or not the other persons are immediate family members.

(2) If you cannot determine that the socially and economically disadvantaged owners—as distinct from the family as a whole—control the firm, then the socially and economically disadvantaged owners have failed to carry their burden of proof concerning control, even though they may participate significantly in the firm's activities.

(l) Where a firm was formerly owned and/or controlled by a non-disadvantaged individual (whether or not an immediate family member), ownership and/or control were transferred to a socially and economically disadvantaged individual, and the non-disadvantaged individual remains involved with the firm in any capacity, the disadvantaged individual

now owning the firm must demonstrate to you, by clear and convincing evidence, that:

(1) The transfer of ownership and/or control to the disadvantaged individual was made for reasons other than obtaining certification as a DBE; and

(2) The disadvantaged individual actually controls the management, policy, and operations of the firm, notwithstanding the continuing participation of a non-disadvantaged individual who formerly owned and/or controlled the firm.

(m) In determining whether a firm is controlled by its socially and economically disadvantaged owners, you may consider whether the firm owns equipment necessary to perform its work. However, you must not determine that a firm is not controlled by socially and economically disadvantaged individuals solely because the firm leases, rather than owns, such equipment, where leasing equipment is a normal industry practice and the lease does not involve a relationship with a prime contractor or other party that compromises the independence of the firm.

(n) You must grant certification to a firm only for specific types of work in which the socially and economically disadvantaged owners have the ability to control the firm. To become certified in an additional type of work, the firm need demonstrate to you only that its socially and economically disadvantaged owners are able to control the firm with respect to that type of work. You may not, in this situation, require that the firm be recertified or submit a new application for certification, but you must verify the disadvantaged owner's control of the firm in the additional type of work.

(o) A business operating under a franchise or license agreement may be certified if it meets the standards in this subpart and the franchiser or licensor is not affiliated with the franchisee or licensee. In determining whether affiliation exists, you should generally not consider the restraints relating to standardized quality, advertising, accounting format, and other provisions imposed on the franchisee or licensee by the franchise agreement or license, provided that the franchisee or licensee has the right to profit from its efforts and bears the risk of loss commensurate with ownership. Alternatively, even though a franchisee or licensee may not be controlled by virtue of such provisions in the franchise agreement or license, affiliation could arise through other means, such as common management or excessive restrictions on

the sale or transfer of the franchise interest or license.

(p) In order for a partnership to be controlled by socially and economically disadvantaged individuals, any non-disadvantaged partners must not have the power, without the specific written concurrence of the socially and economically disadvantaged partner(s), to contractually bind the partnership or subject the partnership to contract or tort liability.

(q) The socially and economically disadvantaged individuals controlling a firm may use an employee leasing company. The use of such a company does not preclude the socially and economically disadvantaged individuals from controlling their firm if they continue to maintain an employer-employee relationship with the leased employees. This includes being responsible for hiring, firing, training, assigning, and otherwise controlling the on-the-job activities of the employees, as well as ultimate responsibility for wage and tax obligations related to the employees.

§ 26.73 What are other rules affecting certification?

(a)(1) Consideration of whether a firm performs a commercially useful function or is a regular dealer pertains solely to counting toward DBE goals the participation of firms that have already been certified as DBEs. Except as provided in paragraph (a)(2) of this section, you must not consider commercially useful function issues in any way in making decisions about whether to certify a firm as a DBE.

(2) You may consider, in making certification decisions, whether a firm has exhibited a pattern of conduct indicating its involvement in attempts to evade or subvert the intent or requirements of the DBE program.

(b) You must evaluate the eligibility of a firm on the basis of present circumstances. You must not refuse to certify a firm based solely on historical information indicating a lack of ownership or control of the firm by socially and economically disadvantaged individuals at some time in the past, if the firm currently meets the ownership and control standards of this part. Nor must you refuse to certify a firm solely on the basis that it is a newly formed firm.

(c) DBE firms and firms seeking DBE certification shall cooperate fully with your requests (and DOT requests) for information relevant to the certification process. Failure or refusal to provide such information is a ground for a denial or removal of certification.

(d) Only firms organized for profit may be eligible DBEs. Not-for-profit organizations, even though controlled by socially and economically disadvantaged individuals, are not eligible to be certified as DBEs.

(e) An eligible DBE firm must be owned by individuals who are socially and economically disadvantaged. Except as provided in this paragraph, a firm that is not owned by such individuals, but instead is owned by another firm—even a DBE firm—cannot be an eligible DBE.

(1) If socially and economically disadvantaged individuals own and control a firm through a parent or holding company, established for tax, capitalization or other purposes consistent with industry practice, and the parent or holding company in turn owns and controls an operating subsidiary, you may certify the subsidiary if it otherwise meets all requirements of this subpart. In this situation, the individual owners and controllers of the parent or holding company are deemed to control the subsidiary through the parent or holding company.

(2) You may certify such a subsidiary only if there is cumulatively 51 percent ownership of the subsidiary by socially and economically disadvantaged individuals. The following examples illustrate how this cumulative ownership provision works:

Example 1: Socially and economically disadvantaged individuals own 100 percent of a holding company, which has a wholly-owned subsidiary. The subsidiary may be certified, if it meets all other requirements.

Example 2: Disadvantaged individuals own 100 percent of the holding company, which owns 51 percent of a subsidiary. The subsidiary may be certified, if all other requirements are met.

Example 3: Disadvantaged individuals own 80 percent of the holding company, which in turn owns 70 percent of a subsidiary. In this case, the cumulative ownership of the subsidiary by disadvantaged individuals is 56 percent (80 percent of the 70 percent). This is more than 51 percent, so you may certify the subsidiary, if all other requirements are met.

Example 4: Same as Example 2 or 3, but someone other than the socially and economically disadvantaged owners of the parent or holding company controls the subsidiary. Even though the subsidiary is owned by disadvantaged individuals, through the holding or parent company, you cannot certify it because it fails to meet control requirements.

Example 5: Disadvantaged individuals own 60 percent of the holding company, which in turn owns 51 percent of a subsidiary. In this case, the cumulative ownership of the subsidiary by disadvantaged individuals is about 31 percent. This is less than 51 percent, so you cannot certify the subsidiary.

Example 6: The holding company, in addition to the subsidiary seeking certification, owns several other companies. The combined gross receipts of the holding companies and its subsidiaries are greater than the size standard for the subsidiary seeking certification and/or the gross receipts cap of § 26.65(b). Under the rules concerning affiliation, the subsidiary fails to meet the size standard and cannot be certified.

(f) Recognition of a business as a separate entity for tax or corporate purposes is not necessarily sufficient to demonstrate that a firm is an independent business, owned and controlled by socially and economically disadvantaged individuals.

(g) You must not require a DBE firm to be prequalified as a condition for certification unless the recipient requires all firms that participate in its contracts and subcontracts to be prequalified.

(h) A firm that is owned by an Indian tribe, Alaska Native Corporation, or Native Hawaiian organization as an entity, rather than by Indians, Alaska Natives, or Native Hawaiians as individuals, may be eligible for certification. Such a firm must meet the size standards of § 26.65. Such a firm must be controlled by socially and economically disadvantaged individuals, as provided in § 26.71.

Subpart E—Certification Procedures

§ 26.81 What are the requirements for Unified Certification Programs?

(a) You and all other DOT recipients in your state must participate in a Unified Certification Program (UCP).

(1) Within three years of March 4, 1999, you and the other recipients in your state must sign an agreement establishing the UCP for that state and submit the agreement to the Secretary for approval. The Secretary may, on the basis of extenuating circumstances shown by the recipients in the state, extend this deadline for no more than one additional year.

(2) The agreement must provide for the establishment of a UCP meeting all the requirements of this section. The agreement must specify that the UCP will follow all certification procedures and standards of this part, on the same basis as recipients; that the UCP shall cooperate fully with oversight, review, and monitoring activities of DOT and its operating administrations; and that the UCP shall implement DOT directives and guidance concerning certification matters. The agreement shall also commit recipients to ensuring that the UCP has sufficient resources and expertise to carry out the requirements of this part. The agreement shall include an implementation schedule ensuring

that the UCP is fully operational no later than 18 months following the approval of the agreement by the Secretary.

(3) Subject to approval by the Secretary, the UCP in each state may take any form acceptable to the recipients in that state.

(4) The Secretary shall review the UCP and approve it, disapprove it, or remand it to the recipients in the state for revisions. A complete agreement which is not disapproved or remanded within 180 days of its receipt is deemed to be accepted.

(5) If you and the other recipients in your state fail to meet the deadlines set forth in this paragraph (a), you shall have the opportunity to make an explanation to the Secretary why a deadline could not be met and why meeting the deadline was beyond your control. If you fail to make such an explanation, or the explanation does not justify the failure to meet the deadline, the Secretary shall direct you to complete the required action by a date certain. If you and the other recipients fail to carry out this direction in a timely manner, you are collectively in noncompliance with this part.

(b) The UCP shall make all certification decisions on behalf of all DOT recipients in the state with respect to participation in the DOT DBE Program.

(1) Certification decisions by the UCP shall be binding on all DOT recipients within the state.

(2) The UCP shall provide "one-stop shopping" to applicants for certification, such that an applicant is required to apply only once for a DBE certification that will be honored by all recipients in the state.

(3) All obligations of recipients with respect to certification and nondiscrimination must be carried out by UCPs, and recipients may use only UCPs that comply with the certification and nondiscrimination requirements of this part.

(c) All certifications by UCPs shall be pre-certifications; i.e., certifications that have been made final before the due date for bids or offers on a contract on which a firm seeks to participate as a DBE.

(d) A UCP is not required to process an application for certification from a firm having its principal place of business outside the state if the firm is not certified by the UCP in the state in which it maintains its principal place of business. The "home state" UCP shall share its information and documents concerning the firm with other UCPs that are considering the firm's application.

(e) Subject to DOT approval as provided in this section, the recipients in two or more states may form a regional UCP. UCPs may also enter into written reciprocity agreements with other UCPs. Such an agreement shall outline the specific responsibilities of each participant. A UCP may accept the certification of any other UCP or DOT recipient.

(f) Pending the establishment of UCPs meeting the requirements of this section, you may enter into agreements with other recipients, on a regional or inter-jurisdictional basis, to perform certification functions required by this part. You may also grant reciprocity to other recipient's certification decisions.

(g) Each UCP shall maintain a unified DBE directory containing, for all firms certified by the UCP (including those from other states certified under the provisions of this section), the information required by § 26.31. The UCP shall make the directory available to the public electronically, on the internet, as well as in print. The UCP shall update the electronic version of the directory by including additions, deletions, and other changes as soon as they are made.

(h) Except as otherwise specified in this section, all provisions of this subpart and subpart D of this part pertaining to recipients also apply to UCPs.

§ 26.83 What procedures do recipients follow in making certification decisions?

(a) You must ensure that only firms certified as eligible DBEs under this section participate as DBEs in your program.

(b) You must determine the eligibility of firms as DBEs consistent with the standards of subpart D of this part. When a UCP is formed, the UCP must meet all the requirements of subpart D of this part and this subpart that recipients are required to meet.

(c) You must take all the following steps in determining whether a DBE firm meets the standards of subpart D of this part:

(1) Perform an on-site visit to the offices of the firm. You must interview the principal officers of the firm and review their résumés and/or work histories. You must also perform an on-site visit to job sites if there are such sites on which the firm is working at the time of the eligibility investigation in your jurisdiction or local area. You may rely upon the site visit report of any other recipient with respect to a firm applying for certification;

(2) If the firm is a corporation, analyze the ownership of stock in the firm;

(3) Analyze the bonding and financial capacity of the firm;

(4) Determine the work history of the firm, including contracts it has received and work it has completed;

(5) Obtain a statement from the firm of the type of work it prefers to perform as part of the DBE program and its preferred locations for performing the work, if any;

(6) Obtain or compile a list of the equipment owned by or available to the firm and the licenses the firm and its key personnel possess to perform the work it seeks to do as part of the DBE program;

(7) Require potential DBEs to complete and submit an appropriate application form.

(i) *Uniform form.* [Reserved]

(ii) You must make sure that the applicant attests to the accuracy and truthfulness of the information on the application form. This shall be done either in the form of an affidavit sworn to by the applicant before a person who is authorized by state law to administer oaths or in the form of an unsworn declaration executed under penalty of perjury of the laws of the United States.

(iii) You must review all information on the form prior to making a decision about the eligibility of the firm.

(d) When another recipient, in connection with its consideration of the eligibility of a firm, makes a written request for certification information you have obtained about that firm (e.g., including application materials or the report of a site visit, if you have made one to the firm), you must promptly make the information available to the other recipient.

(e) When another DOT recipient has certified a firm, you have discretion to take any of the following actions:

(1) Certify the firm in reliance on the certification decision of the other recipient;

(2) Make an independent certification decision based on documentation provided by the other recipient, augmented by any additional information you require the applicant to provide; or

(3) Require the applicant to go through your application process without regard to the action of the other recipient.

(f) Subject to the approval of the concerned operating administration as part of your DBE program, you may impose a reasonable application fee for certification. Fee waivers shall be made in appropriate cases.

(g) You must safeguard from disclosure to unauthorized persons information gathered as part of the certification process that may

reasonably be regarded as proprietary or other confidential business information, consistent with applicable Federal, state, and local law.

(h) Once you have certified a DBE, it shall remain certified for a period of at least three years unless and until its certification has been removed through the procedures of § 26.87. You may not require DBEs to reapply for certification as a condition of continuing to participate in the program during this three-year period, unless the factual basis on which the certification was made changes.

(i) If you are a DBE, you must inform the recipient or UCP in writing of any change in circumstances affecting your ability to meet size, disadvantaged status, ownership, or control requirements of this part or any material change in the information provided in your application form.

(1) Changes in management responsibility among members of a limited liability company are covered by this requirement.

(2) You must attach supporting documentation describing in detail the nature of such changes.

(3) The notice must take the form of an affidavit sworn to by the applicant before a person who is authorized by state law to administer oaths or of an unsworn declaration executed under penalty of perjury of the laws of the United States. You must provide the written notification within 30 days of the occurrence of the change. If you fail to make timely notification of such a change, you will be deemed to have failed to cooperate under § 26.109(c).

(j) If you are a DBE, you must provide to the recipient, every year on the anniversary of the date of your certification, an affidavit sworn to by the firm's owners before a person who is authorized by state law to administer oaths or an unsworn declaration executed under penalty of perjury of the laws of the United States. This affidavit must affirm that there have been no changes in the firm's circumstances affecting its ability to meet size, disadvantaged status, ownership, or control requirements of this part or any material changes in the information provided in its application form, except for changes about which you have notified the recipient under paragraph (i) of this section. The affidavit shall specifically affirm that your firm continues to meet SBA business size criteria and the overall gross receipts cap of this part, documenting this affirmation with supporting documentation of your firm's size and gross receipts. If you fail to provide this affidavit in a timely manner, you will be

deemed to have failed to cooperate under § 26.109(c).

(k) If you are a recipient, you must make decisions on applications for certification within 90 days of receiving from the applicant firm all information required under this part. You may extend this time period once, for no more than an additional 60 days, upon written notice to the firm, explaining fully and specifically the reasons for the extension. You may establish a different time frame in your DBE program, upon a showing that this time frame is not feasible, and subject to the approval of the concerned operating administration. Your failure to make a decision by the applicable deadline under this paragraph is deemed a constructive denial of the application, on the basis of which the firm may appeal to DOT under § 26.89.

§ 26.85 What rules govern recipients' denials of initial requests for certification?

(a) When you deny a request by a firm, which is not currently certified with you, to be certified as a DBE, you must provide the firm a written explanation of the reasons for the denial, specifically referencing the evidence in the record that supports each reason for the denial. All documents and other information on which the denial is based must be made available to the applicant, on request.

(b) When a firm is denied certification, you must establish a time period of no more than twelve months that must elapse before the firm may reapply to the recipient for certification. You may provide, in your DBE program, subject to approval by the concerned operating administration, a shorter waiting period for reapplication. The time period for reapplication begins to run on the date the explanation required by paragraph (a) of this section is received by the firm.

(c) When you make an administratively final denial of certification concerning a firm, the firm may appeal the denial to the Department under § 26.89.

§ 26.87 What procedures does a recipient use to remove a DBE's eligibility?

(a) *Ineligibility complaints.* (1) Any person may file with you a written complaint alleging that a currently-certified firm is ineligible and specifying the alleged reasons why the firm is ineligible. You are not required to accept a general allegation that a firm is ineligible or an anonymous complaint. The complaint may include any information or arguments supporting the complainant's assertion that the firm is ineligible and should not

continue to be certified. Confidentiality of complainants' identities must be protected as provided in § 26.109(b).

(2) You must review your records concerning the firm, any material provided by the firm and the complainant, and other available information. You may request additional information from the firm or conduct any other investigation that you deem necessary.

(3) If you determine, based on this review, that there is reasonable cause to believe that the firm is ineligible, you must provide written notice to the firm that you propose to find the firm ineligible, setting forth the reasons for the proposed determination. If you determine that such reasonable cause does not exist, you must notify the complainant and the firm in writing of this determination and the reasons for it. All statements of reasons for findings on the issue of reasonable cause must specifically reference the evidence in the record on which each reason is based.

(b) *Recipient-initiated proceedings.* If, based on notification by the firm of a change in its circumstances or other information that comes to your attention, you determine that there is reasonable cause to believe that a currently certified firm is ineligible, you must provide written notice to the firm that you propose to find the firm ineligible, setting forth the reasons for the proposed determination. The statement of reasons for the finding of reasonable cause must specifically reference the evidence in the record on which each reason is based.

(c) *DOT directive to initiate proceeding.* (1) If the concerned operating administration determines that information in your certification records, or other information available to the concerned operating administration, provides reasonable cause to believe that a firm you certified does not meet the eligibility criteria of this part, the concerned operating administration may direct you to initiate a proceeding to remove the firm's certification.

(2) The concerned operating administration must provide you and the firm a notice setting forth the reasons for the directive, including any relevant documentation or other information.

(3) You must immediately commence and prosecute a proceeding to remove eligibility as provided by paragraph (b) of this section.

(d) *Hearing.* When you notify a firm that there is reasonable cause to remove its eligibility, as provided in paragraph (a), (b), or (c) of this section, you must

give the firm an opportunity for an informal hearing, at which the firm may respond to the reasons for the proposal to remove its eligibility in person and provide information and arguments concerning why it should remain certified.

(1) In such a proceeding, you bear the burden of proving, by a preponderance of the evidence, that the firm does not meet the certification standards of this part.

(2) You must maintain a complete record of the hearing, by any means acceptable under state law for the retention of a verbatim record of an administrative hearing. If there is an appeal to DOT under § 26.89, you must provide a transcript of the hearing to DOT and, on request, to the firm. You must retain the original record of the hearing. You may charge the firm only for the cost of copying the record.

(3) The firm may elect to present information and arguments in writing, without going to a hearing. In such a situation, you bear the same burden of proving, by a preponderance of the evidence, that the firm does not meet the certification standards, as you would during a hearing.

(e) *Separation of functions.* You must ensure that the decision in a proceeding to remove a firm's eligibility is made by an office and personnel that did not take part in actions leading to or seeking to implement the proposal to remove the firm's eligibility and are not subject, with respect to the matter, to direction from the office or personnel who did take part in these actions.

(1) Your method of implementing this requirement must be made part of your DBE program.

(2) The decisionmaker must be an individual who is knowledgeable about the certification requirements of your DBE program and this part.

(3) Before a UCP is operational in its state, a small airport or small transit authority (i.e., an airport or transit authority serving an area with less than 250,000 population) is required to meet this requirement only to the extent feasible.

(f) *Grounds for decision.* You must not base a decision to remove eligibility on a reinterpretation or changed opinion of information available to the recipient at the time of its certification of the firm. You may base such a decision only on one or more of the following:

(1) Changes in the firm's circumstances since the certification of the firm by the recipient that render the firm unable to meet the eligibility standards of this part;

(2) Information or evidence not available to you at the time the firm was certified;

(3) Information that was concealed or misrepresented by the firm in previous certification actions by a recipient;

(4) A change in the certification standards or requirements of the Department since you certified the firm; or

(5) A documented finding that your determination to certify the firm was factually erroneous.

(g) *Notice of decision.* Following your decision, you must provide the firm written notice of the decision and the reasons for it, including specific references to the evidence in the record that supports each reason for the decision. The notice must inform the firm of the consequences of your decision and of the availability of an appeal to the Department of Transportation under § 26.89. You must send copies of the notice to the complainant in the ineligibility complaint or the concerned operating administration that had directed you to initiate the proceeding.

(h) *Status of firm during proceeding.*
(1) A firm remains an eligible DBE during the pendency of your proceeding to remove its eligibility.

(2) The firm does not become ineligible until the issuance of the notice provided for in paragraph (g) of this section.

(i) *Effects of removal of eligibility.* When you remove a firm's eligibility, you must take the following action:

(1) When a prime contractor has made a commitment to using the ineligible firm, or you have made a commitment to using a DBE prime contractor, but a subcontract or contract has not been executed before you issue the decertification notice provided for in paragraph (g) of this section, the ineligible firm does not count toward the contract goal or overall goal. You must direct the prime contractor to meet the contract goal with an eligible DBE firm or demonstrate to you that it has made a good faith effort to do so.

(2) If a prime contractor has executed a subcontract with the firm before you have notified the firm of its ineligibility, the prime contractor may continue to use the firm on the contract and may continue to receive credit toward its DBE goal for the firm's work. In this case, or in a case where you have let a prime contract to the DBE that was later ruled ineligible, the portion of the ineligible firm's performance of the contract remaining after you issued the notice of its ineligibility shall not count toward your overall goal, but may count toward the contract goal.

(3) *Exception:* If the DBE's ineligibility is caused solely by its having exceeded the size standard during the performance of the contract, you may continue to count its participation on that contract toward overall and contract goals.

(j) *Availability of appeal.* When you make an administratively final removal of a firm's eligibility under this section, the firm may appeal the removal to the Department under § 26.89.

§ 26.89 What is the process for certification appeals to the Department of Transportation?

(a)(1) If you are a firm which is denied certification or whose eligibility is removed by a recipient, you may make an administrative appeal to the Department.

(2) If you are a complainant in an ineligibility complaint to a recipient (including the concerned operating administration in the circumstances provided in § 26.87(c)), you may appeal to the Department if the recipient does not find reasonable cause to propose removing the firm's eligibility or, following a removal of eligibility proceeding, determines that the firm is eligible.

(3) Send appeals to the following address: Department of Transportation, Office of Civil Rights, 400 7th Street, SW, Room 2401, Washington, DC 20590.

(b) Pending the Department's decision in the matter, the recipient's decision remains in effect. The Department does not stay the effect of the recipient's decision while it is considering an appeal.

(c) If you want to file an appeal, you must send a letter to the Department within 90 days of the date of the recipient's final decision, including information and arguments concerning why the recipient's decision should be reversed. The Department may accept an appeal filed later than 90 days after the date of the decision if the Department determines that there was good cause for the late filing of the appeal.

(1) If you are an appellant who is a firm which has been denied certification, whose certification has been removed, whose owner is determined not to be a member of a designated disadvantaged group, or concerning whose owner the presumption of disadvantage has been rebutted, your letter must state the name and address of any other recipient which currently certifies the firm, which has rejected an application for certification from the firm or removed the firm's eligibility within one year prior to the date of the appeal, or before

which an application for certification or a removal of eligibility is pending. Failure to provide this information may be deemed a failure to cooperate under § 26.109(c).

(2) If you are an appellant other than one described in paragraph (c)(1) of this section, the Department will request, and the firm whose certification has been questioned shall promptly provide, the information called for in paragraph (c)(1) of this section. Failure to provide this information may be deemed a failure to cooperate under § 26.109(c).

(d) When it receives an appeal, the Department requests a copy of the recipient's complete administrative record in the matter. If you are the recipient, you must provide the administrative record, including a hearing transcript, within 20 days of the Department's request. The Department may extend this time period on the basis of a recipient's showing of good cause. To facilitate the Department's review of a recipient's decision, you must ensure that such administrative records are well organized, indexed, and paginated. Records that do not comport with these requirements are not acceptable and will be returned to you to be corrected immediately. If an appeal is brought concerning one recipient's certification decision concerning a firm, and that recipient relied on the decision and/or administrative record of another recipient, this requirement applies to both recipients involved.

(e) The Department makes its decision based solely on the entire administrative record. The Department does not make a de novo review of the matter and does not conduct a hearing. The Department may supplement the administrative record by adding relevant information made available by the DOT Office of Inspector General; Federal, state, or local law enforcement authorities; officials of a DOT operating administration or other appropriate DOT office; a recipient; or a firm or other private party.

(f) As a recipient, when you provide supplementary information to the Department, you shall also make this information available to the firm and any third-party complainant involved, consistent with Federal or applicable state laws concerning freedom of information and privacy. The Department makes available, on request by the firm and any third-party complainant involved, any supplementary information it receives from any source.

(1) The Department affirms your decision unless it determines, based on the entire administrative record, that your decision is unsupported by

substantial evidence or inconsistent with the substantive or procedural provisions of this part concerning certification.

(2) If the Department determines, after reviewing the entire administrative record, that your decision was unsupported by substantial evidence or inconsistent with the substantive or procedural provisions of this part concerning certification, the Department reverses your decision and directs you to certify the firm or remove its eligibility, as appropriate. You must take the action directed by the Department's decision immediately upon receiving written notice of it.

(3) The Department is not required to reverse your decision if the Department determines that a procedural error did not result in fundamental unfairness to the appellant or substantially prejudice the opportunity of the appellant to present its case.

(4) If it appears that the record is incomplete or unclear with respect to matters likely to have a significant impact on the outcome of the case, the Department may remand the record to you with instructions seeking clarification or augmentation of the record before making a finding. The Department may also remand a case to you for further proceedings consistent with Department instructions concerning the proper application of the provisions of this part.

(5) The Department does not uphold your decision based on grounds not specified in your decision.

(6) The Department's decision is based on the status and circumstances of the firm as of the date of the decision being appealed.

(7) The Department provides written notice of its decision to you, the firm, and the complainant in an ineligibility complaint. A copy of the notice is also sent to any other recipient whose administrative record or decision has been involved in the proceeding (see paragraph (d) of this section). The notice includes the reasons for the Department's decision, including specific references to the evidence in the record that supports each reason for the decision.

(8) The Department's policy is to make its decision within 180 days of receiving the complete administrative record. If the Department does not make its decision within this period, the Department provides written notice to concerned parties, including a statement of the reason for the delay and a date by which the appeal decision will be made.

(g) All decisions under this section are administratively final, and are not subject to petitions for reconsideration.

§ 26.91 What actions do recipients take following DOT certification appeal decisions?

(a) If you are the recipient from whose action an appeal under § 26.89 is taken, the decision is binding. It is not binding on other recipients.

(b) If you are a recipient to which a DOT determination under § 26.89 is applicable, you must take the following action:

(1) If the Department determines that you erroneously certified a firm, you must remove the firm's eligibility on receipt of the determination, without further proceedings on your part.

Effective on the date of your receipt of the Department's determination, the consequences of a removal of eligibility set forth in § 26.87(i) take effect.

(2) If the Department determines that you erroneously failed to find reasonable cause to remove the firm's eligibility, you must expeditiously commence a proceeding to determine whether the firm's eligibility should be removed, as provided in § 26.87.

(3) If the Department determines that you erroneously declined to certify or removed the eligibility of the firm, you must certify the firm, effective on the date of your receipt of the written notice of Department's determination.

(4) If the Department determines that you erroneously determined that the presumption of social and economic disadvantage either should or should not be deemed rebutted, you must take appropriate corrective action as determined by the Department.

(5) If the Department affirms your determination, no further action is necessary.

(c) Where DOT has upheld your denial of certification to or removal of eligibility from a firm, or directed the removal of a firm's eligibility, other recipients with whom the firm is certified may commence a proceeding to remove the firm's eligibility under § 26.87. Such recipients must not remove the firm's eligibility absent such a proceeding. Where DOT has reversed your denial of certification to or removal of eligibility from a firm, other recipients must take the DOT action into account in any certification action involving the firm. However, other recipients are not required to certify the firm based on the DOT decision.

Subpart F—Compliance and Enforcement

§ 26.101 What compliance procedures apply to recipients?

(a) If you fail to comply with any requirement of this part, you may be subject to formal enforcement action

under § 26.103 or § 26.105 or appropriate program sanctions by the concerned operating administration, such as the suspension or termination of Federal funds, or refusal to approve projects, grants or contracts until deficiencies are remedied. Program sanctions may include, in the case of the FHWA program, actions provided for under 23 CFR 1.36; in the case of the FAA program, actions consistent with 49 U.S.C. 47106(d), 47111(d), and 47122; and in the case of the FTA program, any actions permitted under 49 U.S.C. chapter 53 or applicable FTA program requirements.

(b) As provided in statute, you will not be subject to compliance actions or sanctions for failing to carry out any requirement of this part because you have been prevented from complying because a Federal court has issued a final order in which the court found that the requirement is unconstitutional.

§ 26.103 What enforcement actions apply in FHWA and FTA programs?

The provisions of this section apply to enforcement actions under FHWA and FTA programs:

(a) *Noncompliance complaints.* Any person who believes that a recipient has failed to comply with its obligations under this part may file a written complaint with the concerned operating administration's Office of Civil Rights. If you want to file a complaint, you must do so no later than 180 days after the date of the alleged violation or the date on which you learned of a continuing course of conduct in violation of this part. In response to your written request, the Office of Civil Rights may extend the time for filing in the interest of justice, specifying in writing the reason for so doing. The Office of Civil Rights may protect the confidentiality of your identity as provided in § 26.109(b). Complaints under this part are limited to allegations of violation of the provisions of this part.

(b) *Compliance reviews.* The concerned operating administration may review the recipient's compliance with this part at any time, including reviews of paperwork and on-site reviews, as appropriate. The Office of Civil Rights may direct the operating administration to initiate a compliance review based on complaints received.

(c) *Reasonable cause notice.* If it appears, from the investigation of a complaint or the results of a compliance review, that you, as a recipient, are in noncompliance with this part, the appropriate DOT office promptly sends you, return receipt requested, a written notice advising you that there is reasonable cause to find you in

noncompliance. The notice states the reasons for this finding and directs you to reply within 30 days concerning whether you wish to begin conciliation.

(d) *Conciliation.* (1) If you request conciliation, the appropriate DOT office shall pursue conciliation for at least 30, but not more than 120, days from the date of your request. The appropriate DOT office may extend the conciliation period for up to 30 days for good cause, consistent with applicable statutes.

(2) If you and the appropriate DOT office sign a conciliation agreement, then the matter is regarded as closed and you are regarded as being in compliance. The conciliation agreement sets forth the measures you have taken or will take to ensure compliance. While a conciliation agreement is in effect, you remain eligible for FHWA or FTA financial assistance.

(3) The concerned operating administration shall monitor your implementation of the conciliation agreement and ensure that its terms are complied with. If you fail to carry out the terms of a conciliation agreement, you are in noncompliance.

(4) If you do not request conciliation, or a conciliation agreement is not signed within the time provided in paragraph (d)(1) of this section, then enforcement proceedings begin.

(e) *Enforcement actions.* (1) Enforcement actions are taken as provided in this subpart.

(2) Applicable findings in enforcement proceedings are binding on all DOT offices.

§ 26.105 What enforcement actions apply in FAA Programs?

(a) Compliance with all requirements of this part by airport sponsors and other recipients of FAA financial assistance is enforced through the procedures of Title 49 of the United States Code, including 49 U.S.C. 47106(d), 47111(d), and 47122, and regulations implementing them.

(b) The provisions of § 26.103(b) and this section apply to enforcement actions in FAA programs.

(c) Any person who knows of a violation of this part by a recipient of FAA funds may file a complaint under 14 CFR part 16 with the Federal Aviation Administration Office of Chief Counsel.

§ 26.107 What enforcement actions apply to firms participating in the DBE program?

(a) If you are a firm that does not meet the eligibility criteria of subpart D of this part and that attempts to participate in a DOT-assisted program as a DBE on the basis of false, fraudulent, or deceitful statements or representations

or under circumstances indicating a serious lack of business integrity or honesty, the Department may initiate suspension or debarment proceedings against you under 49 CFR part 29.

(b) If you are a firm that, in order to meet DBE contract goals or other DBE program requirements, uses or attempts to use, on the basis of false, fraudulent or deceitful statements or representations or under circumstances indicating a serious lack of business integrity or honesty, another firm that does not meet the eligibility criteria of subpart D of this part, the Department may initiate suspension or debarment proceedings against you under 49 CFR part 29.

(c) In a suspension or debarment proceeding brought under paragraph (a) or (b) of this section, the concerned operating administration may consider the fact that a purported DBE has been certified by a recipient. Such certification does not preclude the Department from determining that the purported DBE, or another firm that has used or attempted to use it to meet DBE goals, should be suspended or debarred.

(d) The Department may take enforcement action under 49 CFR Part 31, Program Fraud and Civil Remedies, against any participant in the DBE program whose conduct is subject to such action under 49 CFR part 31.

(e) The Department may refer to the Department of Justice, for prosecution under 18 U.S.C. 1001 or other applicable provisions of law, any person who makes a false or fraudulent statement in connection with participation of a DBE in any DOT-assisted program or otherwise violates applicable Federal statutes.

§ 26.109 What are the rules governing information, confidentiality, cooperation, and intimidation or retaliation?

(a) *Availability of records.* (1) In responding to requests for information concerning any aspect of the DBE program, the Department complies with provisions of the Federal Freedom of Information and Privacy Acts (5 U.S.C. 552 and 552a). The Department may make available to the public any information concerning the DBE program release of which is not prohibited by Federal law.

(2) If you are a recipient, you shall safeguard from disclosure to unauthorized persons information that may reasonably be considered as confidential business information, consistent with Federal, state, and local law.

(b) *Confidentiality of information on complainants.* Notwithstanding the provisions of paragraph (a) of this

section, the identity of complainants shall be kept confidential, at their election. If such confidentiality will hinder the investigation, proceeding or hearing, or result in a denial of appropriate administrative due process to other parties, the complainant must be advised for the purpose of waiving the privilege. Complainants are advised that, in some circumstances, failure to waive the privilege may result in the closure of the investigation or dismissal of the proceeding or hearing. FAA follows the procedures of 14 CFR part 16 with respect to confidentiality of information in complaints.

(c) *Cooperation.* All participants in the Department's DBE program (including, but not limited to, recipients, DBE firms and applicants for DBE certification, complainants and appellants, and contractors using DBE firms to meet contract goals) are required to cooperate fully and promptly with DOT and recipient compliance reviews, certification reviews, investigations, and other requests for information. Failure to do so shall be a ground for appropriate action against the party involved (e.g., with respect to recipients, a finding of noncompliance; with respect to DBE firms, denial of certification or removal of eligibility and/or suspension and debarment; with respect to a complainant or appellant, dismissal of the complaint or appeal; with respect to a contractor which uses DBE firms to meet goals, findings of non-responsibility for future contracts and/or suspension and debarment).

(d) *Intimidation and retaliation.* If you are a recipient, contractor, or any other participant in the program, you must not intimidate, threaten, coerce, or discriminate against any individual or firm for the purpose of interfering with any right or privilege secured by this part or because the individual or firm has made a complaint, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this part. If you violate this prohibition, you are in noncompliance with this part.

Appendix A to Part 26—Guidance Concerning Good Faith Efforts

1. When, as a recipient, you establish a contract goal on a DOT-assisted contract, a bidder must, in order to be responsible and/or responsive, make good faith efforts to meet the goal. The bidder can meet this requirement in either of two ways. First, the bidder can meet the goal, documenting commitments for participation by DBE firms sufficient for this purpose. Second, even if it doesn't meet the goal, the bidder can document adequate good faith efforts. This means that the bidder must show that it took

all necessary and reasonable steps to achieve a DBE goal or other requirement of this part which, by their scope, intensity, and appropriateness to the objective, could reasonably be expected to obtain sufficient DBE participation, even if they were not fully successful.

II. In any situation in which you have established a contract goal, part 26 requires you to use the good faith efforts mechanism of this part. As a recipient, it is up to you to make a fair and reasonable judgment whether a bidder that did not meet the goal made adequate good faith efforts. It is important for you to consider the quality, quantity, and intensity of the different kinds of efforts that the bidder has made. The efforts employed by the bidder should be those that one could reasonably expect a bidder to take if the bidder were actively and aggressively trying to obtain DBE participation sufficient to meet the DBE contract goal. Mere *pro forma* efforts are not good faith efforts to meet the DBE contract requirements. We emphasize, however, that your determination concerning the sufficiency of the firm's good faith efforts is a judgment call: meeting quantitative formulas is not required.

III. The Department also strongly cautions you against requiring that a bidder meet a contract goal (i.e., obtain a specified amount of DBE participation) in order to be awarded a contract, even though the bidder makes an adequate good faith efforts showing. This rule specifically prohibits you from ignoring *bona fide* good faith efforts.

IV. The following is a list of types of actions which you should consider as part of the bidder's good faith efforts to obtain DBE participation. It is not intended to be a mandatory checklist, nor is it intended to be exclusive or exhaustive. Other factors or types of efforts may be relevant in appropriate cases.

A. Soliciting through all reasonable and available means (e.g., attendance at pre-bid meetings, advertising and/or written notices) the interest of all certified DBEs who have the capability to perform the work of the contract. The bidder must solicit this interest within sufficient time to allow the DBEs to respond to the solicitation. The bidder must determine with certainty if the DBEs are interested by taking appropriate steps to follow up initial solicitations.

B. Selecting portions of the work to be performed by DBEs in order to increase the likelihood that the DBE goals will be achieved. This includes, where appropriate, breaking out contract work items into economically feasible units to facilitate DBE participation, even when the prime contractor might otherwise prefer to perform these work items with its own forces.

C. Providing interested DBEs with adequate information about the plans, specifications, and requirements of the contract in a timely manner to assist them in responding to a solicitation.

D. (1) Negotiating in good faith with interested DBEs. It is the bidder's responsibility to make a portion of the work available to DBE subcontractors and suppliers and to select those portions of the work or material needs consistent with the

available DBE subcontractors and suppliers, so as to facilitate DBE participation. Evidence of such negotiation includes the names, addresses, and telephone numbers of DBEs that were considered; a description of the information provided regarding the plans and specifications for the work selected for subcontracting; and evidence as to why additional agreements could not be reached for DBEs to perform the work.

(2) A bidder using good business judgment would consider a number of factors in negotiating with subcontractors, including DBE subcontractors, and would take a firm's price and capabilities as well as contract goals into consideration. However, the fact that there may be some additional costs involved in finding and using DBEs is not in itself sufficient reason for a bidder's failure to meet the contract DBE goal, as long as such costs are reasonable. Also, the ability or desire of a prime contractor to perform the work of a contract with its own organization does not relieve the bidder of the responsibility to make good faith efforts. Prime contractors are not, however, required to accept higher quotes from DBEs if the price difference is excessive or unreasonable.

E. Not rejecting DBEs as being unqualified without sound reasons based on a thorough investigation of their capabilities. The contractor's standing within its industry, membership in specific groups, organizations, or associations and political or social affiliations (for example union vs. non-union employee status) are not legitimate causes for the rejection or non-solicitation of bids in the contractor's efforts to meet the project goal.

F. Making efforts to assist interested DBEs in obtaining bonding, lines of credit, or insurance as required by the recipient or contractor.

G. Making efforts to assist interested DBEs in obtaining necessary equipment, supplies, materials, or related assistance or services.

H. Effectively using the services of available minority/women community organizations; minority/women contractors' groups; local, state, and Federal minority/women business assistance offices; and other organizations as allowed on a case-by-case basis to provide assistance in the recruitment and placement of DBEs.

V. In determining whether a bidder has made good faith efforts, you may take into account the performance of other bidders in meeting the contract. For example, when the apparent successful bidder fails to meet the contract goal, but others meet it, you may reasonably raise the question of whether, with additional reasonable efforts, the apparent successful bidder could have met the goal. If the apparent successful bidder fails to meet the goal, but meets or exceeds the average DBE participation obtained by other bidders, you may view this, in conjunction with other factors, as evidence of the apparent successful bidder having made good faith efforts.

Appendix B to Part 26—Forms [Reserved]

Appendix C to Part 26—DBE Business Development Program Guidelines

The purpose of this program element is to further the development of DBEs, including but not limited to assisting them to move into non-traditional areas of work and/or compete in the marketplace outside the DBE program, via the provision of training and assistance from the recipient.

(A) Each firm that participates in a recipient's business development program (BDP) program is subject to a program term determined by the recipient. The term should consist of two stages; a developmental stage and a transitional stage.

(B) In order for a firm to remain eligible for program participation, it must continue to meet all eligibility criteria contained in part 26.

(C) By no later than 6 months of program entry, the participant should develop and submit to the recipient a comprehensive business plan setting forth the participant's business targets, objectives and goals. The participant will not be eligible for program benefits until such business plan is submitted and approved by the recipient. The approved business plan will constitute the participant's short and long term goals and the strategy for developmental growth to the point of economic viability in non-traditional areas of work and/or work outside the DBE program.

(D) The business plan should contain at least the following:

(1) An analysis of market potential, competitive environment and other business analyses estimating the program participant's prospects for profitable operation during the term of program participation and after graduation from the program.

(2) An analysis of the firm's strengths and weaknesses, with particular attention paid to the means of correcting any financial, managerial, technical, or labor conditions which could impede the participant from receiving contracts other than those in traditional areas of DBE participation.

(3) Specific targets, objectives, and goals for the business development of the participant during the next two years, utilizing the results of the analysis conducted pursuant to paragraphs (C) and (D)(1) of this appendix;

(4) Estimates of contract awards from the DBE program and from other sources which are needed to meet the objectives and goals for the years covered by the business plan; and

(5) Such other information as the recipient may require.

(E) Each participant should annually review its currently approved business plan with the recipient and modify the plan as may be appropriate to account for any changes in the firm's structure and redefined needs. The currently approved plan should be considered the applicable plan for all program purposes until the recipient approves in writing a modified plan. The recipient should establish an anniversary date for review of the participant's business plan and contract forecasts.

(F) Each participant should annually forecast in writing its need for contract awards for the next program year and the succeeding program year during the review of its business plan conducted under paragraph (E) of this appendix. Such forecast should be included in the participant's business plan. The forecast should include:

(1) The aggregate dollar value of contracts to be sought under the DBE program, reflecting compliance with the business plan;

(2) The aggregate dollar value of contracts to be sought in areas other than traditional areas of DBE participation;

(3) The types of contract opportunities being sought, based on the firm's primary line of business; and

(4) Such other information as may be requested by the recipient to aid in providing effective business development assistance to the participant.

(C) Program participation is divided into two stages: (1) a developmental stage and (2) a transitional stage. The developmental stage is designed to assist participants to overcome their social and economic disadvantage by providing such assistance as may be necessary and appropriate to enable them to access relevant markets and strengthen their financial and managerial skills. The transitional stage of program participation follows the developmental stage and is designed to assist participants to overcome, insofar as practical, their social and economic disadvantage and to prepare the participant for leaving the program.

(H) The length of service in the program term should not be a pre-set time frame for either the developmental or transitional stages but should be figured on the number of years considered necessary in normal progression of achieving the firm's established goals and objectives. The setting of such time could be factored on such items as, but not limited to, the number of contracts, aggregate amount of the contract received, years in business, growth potential, etc.

(I) Beginning in the first year of the transitional stage of program participation, each participant should annually submit for inclusion in its business plan a transition management plan outlining specific steps to promote profitable business operations in areas other than traditional areas of DBE participation after graduation from the program. The transition management plan should be submitted to the recipient at the same time other modifications are submitted pursuant to the annual review under paragraph (E) of this section. The plan should set forth the same information as required under paragraph (F) of steps the participant will take to continue its business development after the expiration of its program term.

(J) When a participant is recognized as successfully completing the program by substantially achieving the targets, objectives and goals set forth in its program term, and has demonstrated the ability to compete in the marketplace, its further participation within the program may be determined by the recipient.

(K) In determining whether a concern has substantially achieved the goals and

objectives of its business plan, the following factors, among others, should be considered by the recipient:

(1) Profitability;

(2) Sales, including improved ratio of non-traditional contracts to traditional-type contracts;

(3) Net worth, financial ratios, working capital, capitalization, access to credit and capital;

(4) Ability to obtain bonding;

(5) A positive comparison of the DBE's business and financial profile with profiles of non-DBE businesses in the same area or similar business category; and

(6) Good management capacity and capability.

(L) Upon determination by the recipient that the participant should be graduated from the developmental program, the recipient should notify the participant in writing of its intent to graduate the firm in a letter of notification. The letter of notification should set forth findings, based on the facts, for every material issue relating to the basis of the program graduation with specific reasons for each finding. The letter of notification should also provide the participant 45 days from the date of service of the letter to submit in writing information that would explain why the proposed basis of graduation is not warranted.

(M) Participation of a DBE firm in the program may be discontinued by the recipient prior to expiration of the firm's program term for good cause due to the failure of the firm to engage in business practices that will promote its competitiveness within a reasonable period of time as evidenced by, among other indicators, a pattern of inadequate performance or unjustified delinquent performance. Also, the recipient can discontinue the participation of a firm that does not actively pursue and bid on contracts, and a firm that, without justification, regularly fails to respond to solicitations in the type of work it is qualified for and in the geographical areas where it has indicated availability under its approved business plan. The recipient should take such action if over a 2-year period a DBE firm exhibits such a pattern.

Appendix D to Part 26—Mentor-Protégé Program Guidelines

(A) The purpose of this program element is to further the development of DBEs, including but not limited to assisting them to move into non-traditional areas of work and/or compete in the marketplace outside the DBE program, via the provision of training and assistance from other firms. To operate a mentor-protégé program, a recipient must obtain the approval of the concerned operating administration.

(B)(1) Any mentor-protégé relationship shall be based on a written development plan, approved by the recipient, which clearly sets forth the objectives of the parties and their respective roles, the duration of the arrangement and the services and resources to be provided by the mentor to the protégé. The formal mentor-protégé agreement may set a fee schedule to cover the direct and indirect cost for such services rendered by

the mentor for specific training and assistance to the protégé through the life of the agreement. Services provided by the mentor may be reimbursable under the FTA, FHWA, and FAA programs.

(2) To be eligible for reimbursement, the mentor's services provided and associated costs must be directly attributable and properly allowable to specific individual contracts. The recipient may establish a line item for the mentor to quote the portion of the fee schedule expected to be provided during the life of the contract. The amount claimed shall be verified by the recipient and paid on an incremental basis representing the time the protégé is working on the contract. The total individual contract figures accumulated over the life of the agreement shall not exceed the amount stipulated in the original mentor/protégé agreement.

(C) DBEs involved in a mentor-protégé agreement must be independent business entities which meet the requirements for certification as defined in subpart D of this part. A protégé firm must be certified before it begins participation in a mentor-protégé arrangement. If the recipient chooses to recognize mentor/protégé agreements, it should establish formal general program guidelines. These guidelines must be submitted to the operating administration for approval prior to the recipient executing an individual contractor/ subcontractor mentor-protégé agreement.

Appendix E to Part 26—Individual Determinations of Social and Economic Disadvantage

The following guidance is adapted, with minor modifications, from SBA regulations concerning social and economic disadvantage determinations (see 13 CFR 124.103(c) and 124.104).

Social Disadvantage

1. Socially disadvantaged individuals are those who have been subjected to racial or ethnic prejudice or cultural bias within American society because of their identities as members of groups and without regard to their individual qualities. Social disadvantage must stem from circumstances beyond their control. Evidence of individual social disadvantage must include the following elements:

(A) At least one objective distinguishing feature that has contributed to social disadvantage, such as race, ethnic origin, gender, disability, long-term residence in an environment isolated from the mainstream of American society, or other similar causes not common to individuals who are not socially disadvantaged;

(B) Personal experiences of substantial and chronic social disadvantage in American society, not in other countries; and

(C) Negative impact on entry into or advancement in the business world because of the disadvantage. Recipients will consider any relevant evidence in assessing this element. In every case, however, recipients will consider education, employment and business history, where applicable, to see if the totality of circumstances shows disadvantage in entering into or advancing in the business world.

(1) *Education.* Recipients will consider such factors as denial of equal access to institutions of higher education and vocational training, exclusion from social and professional association with students or teachers, denial of educational honors rightfully earned, and social patterns or pressures which discouraged the individual from pursuing a professional or business education.

(2) *Employment.* Recipients will consider such factors as unequal treatment in hiring, promotions and other aspects of professional advancement, pay and fringe benefits, and other terms and conditions of employment; retaliatory or discriminatory behavior by an employer or labor union; and social patterns or pressures which have channeled the individual into non-professional or non-business fields.

(3) *Business history.* The recipient will consider such factors as unequal access to credit or capital, acquisition of credit or capital under commercially unfavorable circumstances, unequal treatment in opportunities for government contracts or other work, unequal treatment by potential customers and business associates, and exclusion from business or professional organizations.

II. With respect to paragraph I.(A) of this appendix, the Department notes that people with disabilities have disproportionately low incomes and high rates of unemployment. Many physical and attitudinal barriers remain to their full participation in education, employment, and business opportunities available to the general public. The Americans with Disabilities Act (ADA) was passed in recognition of the discrimination faced by people with disabilities. It is plausible that many individuals with disabilities—especially persons with severe disabilities (e.g., significant mobility, vision, or hearing impairments)—may be socially and economically disadvantaged.

III. Under the laws concerning social and economic disadvantage, people with disabilities are not a group presumed to be disadvantaged. Nevertheless, recipients should look carefully at individual showings of disadvantage by individuals with disabilities, making a case-by-case judgment about whether such an individual meets the criteria of this appendix. As public entities subject to Title II of the ADA, recipients must also ensure their DBE programs are accessible to individuals with disabilities. For example, physical barriers or the lack of application and information materials in accessible formats cannot be permitted to thwart the access of potential applicants to the certification process or other services made available to DBEs and applicants.

Economic Disadvantage

(A) *General.* Economically disadvantaged individuals are socially disadvantaged individuals whose ability to compete in the free enterprise system has been impaired due to diminished capital and credit opportunities as compared to others in the same or similar line of business who are not socially disadvantaged.

(B) *Submission of narrative and financial information.*

(1) Each individual claiming economic disadvantage must describe the conditions which are the basis for the claim in a narrative statement, and must submit personal financial information.

(2) When married, an individual claiming economic disadvantage also must submit separate financial information for his or her spouse, unless the individual and the spouse are legally separated.

(C) *Factors to be considered.* In considering diminished capital and credit opportunities, recipients will examine factors relating to the personal financial condition of any individual claiming disadvantaged status, including personal income for the past two years (including bonuses and the value of company stock given in lieu of cash),

personal net worth, and the fair market value of all assets, whether encumbered or not. Recipients will also consider the financial condition of the applicant compared to the financial profiles of small businesses in the same primary industry classification, or, if not available, in similar lines of business, which are not owned and controlled by socially and economically disadvantaged individuals in evaluating the individual's access to credit and capital. The financial profiles that recipients will compare include total assets, net sales, pre-tax profit, sales/working capital ratio, and net worth.

(D) *Transfers within two years.*

(1) Except as set forth in paragraph (D)(2) of this appendix, recipients will attribute to an individual claiming disadvantaged status any assets which that individual has transferred to an immediate family member, or to a trust, a beneficiary of which is an immediate family member, for less than fair market value, within two years prior to a concern's application for participation in the DBE program, unless the individual claiming disadvantaged status can demonstrate that the transfer is to or on behalf of an immediate family member for that individual's education, medical expenses, or some other form of essential support.

(2) Recipients will not attribute to an individual claiming disadvantaged status any assets transferred by that individual to an immediate family member that are consistent with the customary recognition of special occasions, such as birthdays, graduations, anniversaries, and retirements.

(3) In determining an individual's access to capital and credit, recipients may consider any assets that the individual transferred within such two-year period described by paragraph (D)(1) of this appendix that are not considered in evaluating the individual's assets and net worth (e.g., transfers to charities).

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Parts 23 and 26

[Docket OST-97-2550]

RIN 2105-AB92

Participation by Disadvantaged
Business Enterprises in Department of
Transportation Programs

AGENCY: Office of the Secretary, DOT.

ACTION: Final rule; correction.

SUMMARY: In its final disadvantaged business enterprise (DBE) rule, the Department intended to ensure the confidentiality of personal financial information submitted to recipients by owners of DBE firms. The Department inadvertently omitted the regulatory text language on this point. This correction document remedies this omission. In addition, this document corrects minor omissions concerning the threshold for Federal Transit Administration recipients to establish DBE programs and a requirement for transit vehicle manufacturers to have DBE programs, removes a potentially confusing word from the rule's provisions concerning DOT review of recipients' overall goals, clarifies language concerning the certification and personal net worth of airport concessionaires and others, and clarifies that a lease is viewed as a contract for purposes of the rule.

DATES: This rule is effective June 28, 1999.

FOR FURTHER INFORMATION CONTACT: Robert C. Ashby, Deputy Assistant General Counsel for Regulation and Enforcement, Department of Transportation, 400 7th Street, SW., Room 10424, Washington, DC 20590, phone numbers (202) 366-9306 (voice), (202) 366-9313 (fax), (202) 755-7687 (TDD), bob.ashby@ost.dot.gov (email).

SUPPLEMENTARY INFORMATION:

Privacy

In discussing the requirement of the DBE final rule that owners of DBE firms submit a statement of personal net worth, with supporting documentation, the Department addressed commenters' concerns about the confidentiality of the information. The preamble to the rule said the following:

One of the primary concerns of DBE firms commenting about submitting personal financial information is ensuring that the information remains confidential. In response to this concern, the rule explicitly requires that this material be kept confidential. It may be provided to a third party only with the written consent of the individual to whom the information pertains. This provision is specifically intended to pre-empt any contrary application of state or local law (e.g., a state freedom of information act that might be interpreted to require a state transportation agency to provide to a requesting party the personal income tax return of a DBE applicant who had provided the return as supporting documentation for his PNW statement). There is one exception to this confidentiality requirement. If there is a certification appeal in which the economic disadvantage of an individual is at issue (e.g., the recipient has determined that he or she is not economically disadvantaged and the individual seeks DOT review of the decision), the personal financial information would have to be provided to DOT as part of the administrative record. The Department would treat the information as confidential. (64 FR 5117; February 2, 1999).

Unfortunately, through editorial error on the Department's part, the regulatory text provision referred to was omitted from the final rule. We regret any confusion that this omission may have caused, and we are correcting the error by inserting the language in a new paragraph (a)(2)(iii) of § 26.67 of the rule.

FTA Requirements for DBE Programs

In § 26.21(a)(2) of the rule, the Department states that FTA recipients who receive more than \$250,000 in various forms of FTA assistance must have a DBE program. The phrase "exclusive of transit vehicle purchases" was inadvertently omitted from this paragraph. This omission has raised questions from some recipients, and we are reinserting the omitted language to avoid confusion. In addition, this provision did not make explicit that transit vehicle manufacturers must have DBE programs, so we are adding language to make this clear.

Review of Overall Goals

While operating administrations review recipients' overall goal submissions, recipients are not required to obtain prior concurrence by operating administrations with their overall goals (see § 26.45(f)(4)).

However, as the result of an editorial oversight, § 26.21(b)(1) of the rule makes a reference to overall goals being "approved" by operating administrations. Because prior concurrence is not required, this reference is incorrect and could be misleading. Therefore, we are removing it.

Concessionaires

In the February 2, 1999, final DBE rule, the Department removed all of former part 23 except the portion concerning airport concessionaires. The airport concession provisions were modified for consistency with the new 49 CFR part 26. In one respect, however, the amendment of the airport concessions provision failed to delete language concerning certification procedures that referred to the (now deleted) certification provisions of former part 23. While we have provided guidance to airports that they should follow part 26 procedures, we believe it would be useful to delete the language referring to former part 23's procedures. Therefore, this rule eliminates two paragraphs in § 23.95. Recipients should follow part 26 certification procedures for concessionaires as well as for other contractors.

Airports have expressed concern that the rule is unclear concerning the application to concessionaires of the \$750,000 personal net worth (PNW) cap and PNW statement requirements of § 26.67. The Department is currently working to complete a final rule concerning airport concessions. The PNW cap applicable to concessionaires is one of the matters being considered in this rulemaking. The PNW cap amount that the Department applies to concessionaires may or may not be \$750,000. Pending completion of the final rule on airport concessions, the Department believes it best to resolve the current uncertainty by making the \$750,000 cap amount and PNW statement requirement of § 26.67 inapplicable to airport concessionaires.

We are amending § 26.67(a)(2)(i) to specify that disadvantaged owners of airport concessionaires are not required to submit PNW statements. Consequently, the rebuttal of the presumption of economic disadvantage based on a PNW statement an individual is required to submit (see § 26.67(b)(1)) also does not apply to airport concessionaires.

Definition of "Contract"

The 49 CFR part 23 definition of "contract" specified that a lease was

viewed as a contract. The part 26 definition inadvertently omitted this sentence. To avoid any potential confusion on this point, this correction document adds a sentence on leases.

Clarification Concerning Personal Net Worth Documentation

The Department has received a number of questions and expressions of concern about the documentation it is appropriate for recipients to require in ascertaining the personal net worth of owners of DBE firms. The Department believes that it is important to clarify the rule to state that this documentation, and the PNW statement itself, should not be unduly lengthy, burdensome or intrusive.

The Department uses the Small Business Administration's implementation of its PNW requirements as a model for recipients' practices. SBA requires a two-page form, supported by two years' of personal and business tax returns. With respect to the information routinely collected from applicants or owners of currently certified DBEs for purposes of ascertaining PNW, the Department believes that recipients should not exceed the information sought by SBA in its programs. Consequently, while recipients are not required to use the SBA form verbatim, they should use a form of similar length and content. Recipients may appropriately collect and retain copies of two years' of the individuals personal and business tax returns.

On the other hand, the Department regards as unduly lengthy, burdensome, or intrusive such practices as using a form significantly longer or more complex than the SBA form (e.g., a multipage PNW form), requiring inventories of personal property or appraisals of real property. Such practices are contrary to part 26.

Regulatory Analyses and Notices

This set of amendments correcting part 26 is not a significant rule under Executive Order 12866 or the Department's Regulatory Policies and Procedures. The Department certifies that the amendments will not have significant economic impacts on a substantial number of small entities. This is because the amendments are technical corrections that will not impose costs on entities, regardless of their size. They do not have Federalism impacts sufficient to warrant the preparation of a Federalism impact statement. They do not impose information collection requirements.

These amendments relate to regulatory provisions that have already

been the subject of notice and comment (as part of the Department's May 1997 supplemental notice of proposed rulemaking concerning the DBE program).

Because the amendments merely correct accidental omissions from the regulatory text or remove a potentially confusing reference, we do not believe that additional notice and comment would be productive. Therefore, the Department has determined that further notice and comment would be impracticable, unnecessary, and contrary to the public interest. The Department has good cause to make the corrections effective immediately in order to avoid confusion and any adverse effects on DBEs or recipients from the absence of the omitted language.

List of Subjects

49 CFR Part 23

Administrative practice and procedure, Airports, Civil rights, Concessions, Government contracts, Grant programs—transportation, Minority businesses, Reporting and recordkeeping requirements.

49 CFR Part 26

Administrative practice and procedure, Airports, Civil rights, Government contracts, Grant programs—transportation, Highways and roads, Mass transportation, Minority businesses, Reporting and recordkeeping requirements.

Issued this 11th day of June, 1999, at Washington, D.C.

Rodney E. Slater,
Secretary of Transportation.

For the reasons set forth in the preamble, the Department amends 49 CFR parts 23 and 26 as follows:

PART 23—[AMENDED]

1. The authority citation for part 23 continues to read as follows:

Authority: 42 U.S.C. 200d et seq.; 49 U.S.C. 47107 and 47123; Executive Order 12138, 3 CFR, 1979 Comp., p. 393.

§ 23.95 [Amended]

2. In § 23.95, remove and reserve paragraphs (f)(2) and (f)(3).

PART 26—[AMENDED]

3. The authority citation for part 26 is revised to read as follows:

Authority: 23 U.S.C. 324; 42 U.S.C. 2000d, et seq.; 49 U.S.C. 1615, 47107, 47113, 47123; Sec. 1101(b), Pub. L. 105-178, 112 Stat. 107, 113.

4. In the definition of the term "Contract" in § 26.5, add a sentence at

the end of the definition, to read as follows:

§ 26.5 What do the terms used in this part mean?

* * * * *
Contract * * * For purposes of this part, a lease is considered to be a contract.
* * * * *

5. In § 26.21, revise paragraph (a)(2) to read as follows:

§ 26.21 Who must have a DBE program?

(a) * * *
(2) FTA recipients that receive \$250,000 in FTA planning, capital, and/or operating assistance in a Federal fiscal year, exclusive of transit vehicle purchases, and transit vehicle manufacturers who must submit an overall goal under § 26.49;
* * * * *

§ 26.21 [Amended]

5. In § 26.21(b)(1), in the parenthetical phrase, remove the words "and approved" following the word "reviewed".

§ 26.45 [Amended]

6. In § 26.45(c)(5), remove the words "Subject to the approval of the DOT operating administration, you" and add "You" in its place.

7. Amend § 26.67 as follows:
a. Revise paragraph (a)(2)(i); and
b. Redesignate paragraph (a)(2)(ii) as paragraph (a)(2)(iii), and add a new paragraph (a)(2)(ii), to read as follows:

§ 26.67 What rules determine social and economic disadvantage?

(a) * * *
(2)(i) You must require each individual owner of a firm applying to participate as a DBE (except a firm applying to participate as a DBE airport concessionaire) whose ownership and control are relied upon for DBE certification to submit a signed, notarized statement of personal net worth, with appropriate supporting documentation. This statement and documentation must not be unduly lengthy, burdensome, or intrusive.
(ii) Notwithstanding any provision of state law, you must not release an individual's personal net worth statement nor any documentation supporting it to any third party without the written consent of the submitter. Provided, that you must transmit this information to DOT in any certification appeal proceeding under § 26.89 in which the disadvantaged status of the individual is in question.
* * * * *

220 SCHEDULE OF PREVAILING WAGES AND SUPPLEMENTAL BENEFITS

ADDENDUM NO. 2, BOILERMAKER, SHEET METAL WORKER
AND BOILERMAKER APPRENTICE

EFFECTIVE PERIOD DECEMBER 15, 2004 THROUGH JUNE 30, 2005

CLASSIFICATION: BOILERMAKER

WAGE RATE PER HOUR: \$40.30

SUPPLEMENTAL BENEFIT RATE PER HOUR: \$29.15 for new construction
\$27.15 for repair or
maintenance work.

***** OVERTIME: (2, 5, 8, 13 for repair or maintenance work, 4, 5, 8 for all new
work, 13 when any of the following holidays are worked - 2, 6, 8, 9, 11,
12, 15, 16, 20). See Overtime and Holiday Legends.

SHIFT RATES:

For New Construction Work requiring two (2) shifts, the first shift shall be paid straight time for the first six (6) hours worked and double time for additional hours worked. The second shift shall be paid straight time for the first six (6) hours worked and double time for additional hours worked. All hours worked on the second shift shall receive a 10% wage rate differential.

SHIFT RATES:

For Repair and Maintenance Work, when shifts are required the first shift shall work eight (8) hours at the regular straight-time rate. The second shift shall work seven and one-half (7 1/2) hours and receive eight (8) times the regular straight time hourly rate plus twenty-five (\$.25) cents. The third shift shall work seven (7) hours and receive eight (8) times the regular straight time hourly rate plus fifty (\$.50) cents. A thirty (30) minute lunch period shall not be considered as time worked.

EFFECTIVE PERIOD: JULY 2, 2004 THROUGH JUNE 30, 2005

LABOR LAW §220 PREVAILING WAGE SCHEDULE

Pursuant to Labor Law §220 (3) the Comptroller of the City of New York has promulgated this schedule solely for Workers, Laborers and Mechanics engaged by private contractors on New York City public work contracts. Contracting agencies anticipating doing work which requires the employment of a trade or classification not included in this schedule must request the Comptroller to establish a proper classification for the work pursuant to Labor Law §220 (3-a) (a). The prevailing rate schedule as promulgated by the Comptroller, must, in compliance with law, be annexed to and form part of the contract.

The appropriate schedule of prevailing wages and benefits must be posted at all public work sites pursuant to Labor Law §220 (3-a) (a).

This schedule is applicable for work performed from July 1, 2004 through June 30, 2005, unless otherwise noted. You will be notified of any changes to this schedule by addenda published on our web site www.comptroller.nyc.gov. The rate of wages and supplemental benefits to be paid or provided are those that prevail at the time the work is being performed. Preliminary schedules for future one-year periods are published annually in the City Record on or about June 1st of each succeeding year. Final schedules are published on or about July 1st in the City Record and on our web site www.comptroller.nyc.gov.

The Comptroller's Office has attempted to include all overtime, shift and night differential, Holiday, Saturday, Sunday or other premium time work. However, this schedule does not set forth every prevailing practice with respect to such rates with which employers must comply. All such rates and practices are nevertheless part of the employer's prevailing wage obligation and contained in the collective bargaining agreements of the prevailing wage unions. These collective bargaining agreements are available for inspection by appointment. Requests for appointments may be made by calling (212) 669-4437, Monday through Friday between the hours of 9 a.m. and 5 p.m.

Answers to questions concerning the application of premium rates and or prevailing trade practices may be found in the collective bargaining agreements of the prevailing union or by requesting such information from the Bureau of Labor Law's Classification and Determination unit by calling William Helfman at (212) 669-4440.

All other inquiries concerning compliance with the Prevailing Wage Law, should be directed to; Bureau of Labor Law, ATT: William Helfman, Office of the Comptroller, 1 Centre Street, Room 1122, New York, N.Y. 10007; Fax (212) 815-8672.

Office of the Comptroller, City of New York

Prevailing rates and ratios for apprentices are attached to this schedule as Appendix #1. Pursuant to Labor Law §220 (3-e), only apprentices who are individually registered in a bona fide program to which the employer contractor is a participant, registered with the New York State Department of Labor, may be employed on a public work project. Trainees, Assistants and Helpers who are not journey persons or not registered apprentices pursuant to Labor Law §220 (3-e) may not be substituted for apprentices and must be paid as journey persons.

Workers, Laborers and Mechanics employed on a public work project must receive not less than the prevailing rate of wage and benefits for the classification of work performed by each upon such public work. Contractors are solely responsible for maintaining original payroll records which delineate, among other things, the hours each employee worked within a given classification. Contractors using rates and/or classifications not promulgated by the Comptroller do so at their own risk. Additionally, prior to bid, Agency Chief Contracting Officers must contact the Bureau of Labor Law when the need arises for a work classification not published in this schedule.

Prevailing Rate Schedule Information: The information below is intended to assist you in meeting your prevailing wage rate obligation.

Covered Workers: Any and all individuals who are engaged, employed or otherwise occupied as Workers, Laborers or Mechanics on the public work site.

Supplemental Benefits: Employers may meet supplemental benefits obligation by paying the hourly supplemental benefits rate to their employees in cash. Such cash payments are considered income to the employee. Employers who elect to provide bona fide supplemental benefits to their employees will be given hourly cash credit for such benefits up to the hourly benefits rate set forth in the applicable schedule for the relevant trade or occupation at issue.

Particular attention should be given to the supplemental benefits requirement. Although in most instances the payment or provision for supplemental benefits is for each hour worked, some classifications require the payment or provision of supplemental benefits for each hour paid. Consequently, some prevailing practices require benefits to be purchased at the overtime, shift differential, Holiday, Saturday, Sunday or other premium time rate.

Office of the Comptroller, City of New York

Contractors are advised to review the applicable Collective Bargaining Agreements and the Comptroller's Prevailing Wage Schedule before bidding on Public Work. If there are any questions concerning prevailing wages, benefits, overtime, Holiday pay, shift differentials or any prevailing practice, please contact this office.

Any error as to compensation under the prevailing wage law or other information as to trade classification made by the contracting agency in the contract documents or in any other communication will not preclude a finding against the contractor of prevailing wage violation.

**William Helfman, Director
Classifications and Determinations
Bureau of Labor Law**

EFFECTIVE PERIOD: JULY 1, 2004 THROUGH JUNE 30, 2005

230 SCHEDULE OF PREVAILING WAGES AND SUPPLEMENTAL BENEFITS

ADDENDUM NO. 1, EXTERMINATOR AND AIR CONDITIONING AND
REFRIGERATION

EFFECTIVE PERIOD DECEMBER 15, 2004 THROUGH JUNE 30, 2005

CLASSIFICATION: EXTERMINATOR

WAGE RATE PER HOUR:	\$17.74
Effective February 1, 2005	\$18.57
SUPPLEMENTAL BENEFIT RATE PER HOUR:	\$ 4.83

OVERTIME: (2, 8) If an employee works six (6) consecutive days the 6th day is paid at time and on half. All work performed before regular starting time, or after eight (8) hours on any day, or on the sixth (6th) day of the regular work week, shall be paid for at time one-half the regular rate of pay. If required to work before the regular starting time, the employee shall never the less be paid for the eight (8) hour day beginning the regular starting time, in addition to the overtime pay for the work before the regular starting time. All work performed on Sunday shall be paid for at double the rate of pay except that employees hired on or after September 15, 1993 can be assigned any five (5) consecutive day work week without the requirement of double-time for Sunday. (See Overtime Legend).

Paid Holidays: (2, 5, 8, 9, 10, 11, 16, 20) Plus employee's birthday and two (2) additional holidays as floating holidays and one (1) additional day either for Martin Luther King's Birthday or Yom Kippur. All employees hired on or after February 1, 2001 shall not be entitled to floating holidays or a day off for their Birthday. See Holiday Legend.

Regular Work Day shall be any **Eight consecutive hours from 6:00 A.M. - 8:00 P.M.** with one hour off for lunch. A second shift can be worked and paid at an additional twelve dollars (\$12.00) per week.

Continued on following page

EFFECTIVE PERIOD DECEMBER 15, 2004 THROUGH JUNE 30, 2005

The Regular Work Week of day workers shall consist of forty (40) hours in any five (5) consecutive days Monday through Saturday, with two (2) consecutive days off. If a day worker works a split week by working one (1) or more days and one (1) or more nights, time and one half shall be paid for each night's work. If a day worker splits a week by working one (1) day and one or more nights, time and one-half shall be paid for each nights work.

The Regular Work Week of Night Workers shall consist of five (5) consecutive nights totaling forty (40) hours. Any employee required to work between 5:00 P.M. and 7:00 A.M. for any given eight (8) hours consecutively shall receive an additional forty (\$.40) cents per hour above the employees' regular straight time hourly rate. If a Night Worker works a split week by working one (1) or more nights and one (1) or more days, time and one-half the night rate shall be paid for each day worked. A night worker required to work on Saturday night shall be paid at time one half regardless of the number of nights the employee has worked during his regular work week.

Vacation: All employees hired before February 1, 2001 shall be be entitled to paid vacations as follows:

During the employees first 52 weeks of employment.....1 week 5 days
During the employees second 52 weeks of employment..2 weeks 10 days

OVERTIME: (2, 5, 8, 13,) See Overtime Legend.

(Local #638B)

EFFECTIVE PERIOD DECEMBER 15, 2004 THROUGH JUNE 30, 2005

This schedule of prevailing wages and supplemental fringe benefits must be posted at the public work site as required by New York State Labor Law § 231 (6).

LABOR LAW § 230 BUILDING SERVICE EMPLOYEES

In accordance with Labor Law §230 et seq. the Comptroller of the City of New York has promulgated this schedule of prevailing wages and supplemental benefits for building service employees engaged on building service contracts in excess of \$1,500.00. Prevailing rates are required to be annexed to and form part of the contract pursuant to §231 (4); however, only rates for trades anticipated by the contracting agency to be required on the work need be annexed to the contract.

Pursuant to §231 (4) contracting agencies that anticipate doing work that may require building service trades or classifications not included in this schedule, must request the Comptroller to establish a proper classification and wage determination for the work. Contractors using trades and/or classifications for which the Comptroller has not promulgated wages and benefits do so at their own risk.

Labor Law § 231 (6) requires contractors to post on the site of the work a current copy of this schedule of wages and supplements.

This schedule is applicable to work performed from July 1, 2004 through June 30, 2005, unless otherwise noted. Changes to this schedule are published on our web site www.comptroller.nyc.gov . Contractors must pay the wages and supplements in effect when the building service employee performs the work. Preliminary schedules for future one-year periods appear in the City Record on or about June 1 each succeeding year. Final schedules appear on or about July 1 in the City Record and on the our web site www.comptroller.nyc.gov .

Building service employees on public contracts must receive not less than the prevailing rate of wage and supplements for the classification of work performed. Contractors are solely responsible for maintaining original payroll records delineating, among other things, the hours worked by each employee within a given classification.

Employers may pay cash supplements; however, cash payments made in lieu of providing bona fide benefits is considered income to the employee. Employers providing bona fide benefits are credited for the cost of such benefits up to the hourly rate for benefits in the schedule for the trade or occupation at issue. Employers may combine cash supplements with in-kind supplements to meet the prevailing rate minimum.

Office of the Comptroller, City of New York

Particular attention should be given to the supplemental benefits requirement. Although in most instances the payment or provision for supplemental benefits is tied to hours worked, some classifications require the payment or provision of supplemental benefits at overtime or premium time rates. Contractors are advised to review the applicable collective bargaining agreements and the Comptroller's Prevailing Wage Schedule before bidding on public work. Any Prevailing Wage Rate error made by the Contracting Agency, whether in a contract document or other communication, will not preclude a finding against the contractor of prevailing-wage violation.

Because this schedule may not list each prevailing wage practice, contractors should familiarize themselves with the prevailing collective bargaining agreements. Please make appointments to inspect such agreements by calling (212) 669-4437, Monday through Friday between the hours of 9:00 A.M. and 5:00 P.M.

Answers to questions concerning premium rates and or prevailing trade practices may also be obtained from the Classification and Determination Unit by calling William Helfman, Director, at (212) 669-4440. Please direct all other compliance issues to; Bureau of Labor Law, Attn: William Helfman, Office of the Comptroller, 1 Centre Street, Room 1122, New York, N.Y. 10007; Fax (212) 815-8672.

**Office of the REFRIGERATION AND AIR CONDITIONER
 MAINTENANCE AND INSTALLATION
 SERVICE PERSON**

	<u>Wage Rate Per Hour</u>	<u>Supplemental Benefit Rate Per Hour</u>
Journey person	\$27.45	\$7.46
Fourth Year of Employment	\$22.54	\$6.93
Third Year of Employment	\$18.69	\$6.46
Second Year of Employment	\$16.05	\$6.12
First Year (2nd six months of Employment)	\$13.34	\$5.83
First Year (1st six months of Employment)	\$8.28	\$5.49

1. No First or Second year serviceperson employed on service or repair work shall be allowed to do any work in the field unless the worker is accompanied and supervised by one or more service mechanics except in the event of emergency arising when the Employer must use his own discretion as to sending First or Second year men out to answer calls.
2. For every three (3) servicemen or maintenance mechanics steadily employed, the Employer may employ one (1) First year or Second year person, and if acceptable to the Employer, shall be continuously employed for one (1) year.
3. First and Second year persons shall be allowed to perform the following work:
 - 1) Filter changing and maintenance thereof.
 - 2) Oil and greasing.
 - 3) Tower and coil cleaning, scraping and painting.
 - 4) General housekeeping.
 - 5) Delivery and truck driving of parts and/or equipment trucks.
 - 6) Taking of water samples.

**PAID HOLIDAYS: (2, 3#, 4, 5#, 8#, 9, 10, 11#, 15, 16, 20) See Holiday Legend.
 # Double time and one half the regular hourly rate for work performed on these holidays.**

OVERTIME: (2, 5, 8, 13,) See Overtime Legend.

(Local #638B) (Contract expired June 30, 2004)

Office of the Comptroller, City of New York

CLASSIFICATION: REFUSE REMOVER

A. Rubbish and Garbage Route Trucks

1. On open-trucks, rack body, or trucks which have no self contained mechanical loading device, up to 22-yard capacity:

<u>Title</u>	<u>Wage Rate per Hour</u>
Chauffeur	\$22.67
Effective December 1, 2004	\$23.41

Helper	\$22.45
Effective December 1, 2004	\$23.19

2. On 10-wheel, open trucks, container loaders, dinomaster, over-cab loaders, rack body trucks, or any trucks 22 yards to and including 25 yards capacity:

<u>Title</u>	<u>Wage Rate per Hour</u>
Chauffeur	\$22.82
Effective December 1, 2004	\$23.56

Helper	\$22.45
Effective December 1, 2004	\$23.20

3. On rubbish and garbage trucks (except as provided in section "B" Below) 24 yards to and including 31 yards capacity:

<u>Title</u>	<u>Wage Rate per Hour</u>
Chauffeur	\$23.19
Effective December 1, 2004	\$23.93

Helper	\$22.88
Effective December 1, 2004	\$23.63

B. Roll-Off Trucks

1. Single axle working non-compactor containers up to 15 yards capacity on rubbish and garbage removal only:

Continued on following page

Office of the Comptroller, City of New York

<u>Title</u>	<u>Wage Rate per Hour</u>
Chauffeur	\$23.37
Effective December 1, 2004	\$24.12

2. Roll-Off Trucks other than those described in (1) above up to and including 42 yards capacity:

<u>Title</u>	<u>Wage Rate per Hour</u>
Chauffeur	\$24.36
Effective December 1, 2004	\$25.10

3. On any Roll-Off Truck with more than 42 yards capacity or any Tractor Trailer Trucks:

<u>Title</u>	<u>Wage Rate per Hour</u>
Chauffeur	\$25.58
Effective December 1, 2004	\$26.33

SUPPLEMENTAL BENEFIT RATE PER HOUR	
FOR ALL REFUSE REMOVER TITLES:	\$ 6.09
Effective December 1, 2004	\$ 6.34
Effective June 1, 2005	\$ 6.59

PAID HOLIDAYS: (2, 3#, 6#, 8, 9, 10, 11#, 16, 20, the employee's birthday, four personal days). See Holiday Legend.

VACATION:

Annual vacations with pay in advance on the pay day before the vacation shall be given by the Employer to each employee as follows (not less than 40 hours for each week) at the Employee's regular rate of pay:

- Those employed 1 year but less than 2 years - 1 week.
- Those employed 2 years but less than 5 years - 2 weeks in each year.
- Those employed 5 years but less than 15 years - 3 weeks in each year.
- Those employed 15 years but less than 25 years - 4 weeks in each year.
- Those employed 25 years or more - 5 weeks in each year.

Continued on following page

Office of the Comptroller, City of New York

SICK LEAVE:

- (a) Employees shall be entitled to 7 paid leave days for each contract year. Unused sick leave shall be paid to employees as an attendance incentive bonus at the end of each contract year.
- (b) During the first year of employment, employees shall be paid two (2) days sick leave after completing six months of employment. Following such six months of employment, such employee shall then receive pro-rata sick leave pay on the basis of one (1) day sick leave pay for each two (2) months or major portion of two (2) months worked until the following December 1st. Once an employee has completed 6 months or more of employment by December 1st, he shall be treated like other employees as set forth in (a) above.
- (c) Once an employee has used up his sick leave, the employee must, upon request of the employer, put in writing the nature of the illness for which the employee was absent.

OVERTIME: (2, 5, triple time for Sunday, 13 for (#) designated holidays, all other holidays triple time). See Overtime Legend.

(Local #813)

CLASSIFICATION: SECURITY

<u>Title</u>	<u>Wage Rate Per Hour</u>	<u>Supplemental Benefit Rate Per Hour</u>
Security Guard (Unarmed)	\$ 9.10	\$ 1.50
Security Guard (Armed)	\$ 16.90	-----

OVERTIME: Any work in excess of eight hours within any twenty four hour period and work in excess of forty hours in a week is overtime, and must be compensated at time and one half the hourly wage and at straight time for the supplemental benefit rate.

Office of the Comptroller, City of New York

CLASSIFICATION: WINDOW CLEANER

<u>TITLE</u>	<u>WAGE RATE PER HOUR</u>
Window Cleaner	\$21.84
Power Operated Scaffolds, Manual Scaffolds, and Boatswain Chairs	\$23.47
SUPPLEMENTAL BENEFIT RATE PER HOUR:	\$6.02
Effective December 31, 2004	\$6.25

PAID HOLIDAYS: (2, 3, 5, 7, 8, 9, 10, 11, 16, 17, 20, plus one personal day).
See Holiday legend.

VACATION:

After seven months but less than one year of service - one week.
One year but less than five years of service- two weeks.
Five years of service but less than 15 years of service- three weeks.
15 years of service but less than 25 years of service- four weeks.
21 years - 21 days.
22 years - 22 days.
23 years - 23 days.
24 years - 24 days.
25 years or more of service - five weeks.
Plus one day per year for medical visit.

SICK LEAVE:

Ten days after one year worked. Unused sick days to be paid in cash. An employee who is entitled to and receive a payment of 10 days of unused sick days shall also receive a hundred-dollar bonus.

OVERTIME: (2, 5, 8, 12 plus the days pay). See Overtime legend.

TRUCK DRIVER CLASSIFICATIONS

GROUP 1: Closed body trucks with self contained loading unit up to and including 22 yard capacity

GROUP 2: Open trucks, rack body or trucks with no self contained mechanical loading device, up to 22 yard capacity. One-container tractor hoist

GROUP 3: 10 wheel, open trucks, container loaders, dino-master, over-cab loaders, rack body trucks, or any trucks 22 yards to and including 25 yards capacity

GROUP 4: Rubbish and garbage trucks, 26 yards to and including 31 yards

GROUP 5: Single axle working non-compactor containers up to 15 yards capacity on rubbish and garbage removal

GROUP 6: Roll-off trucks up to and including 42 yard capacity

GROUP 7: Roll-off truck with more than 42 yard capacity or any tractor trailer trucks

GROUP 8: One-container tractor hoist on construction and alteration debris removal

WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.

=====

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

In the listing above, the "SU" designation means that rates listed under the identifier do not reflect collectively bargained wage and fringe benefit rates. Other designations indicate unions whose rates have been determined to be prevailing.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

- * an existing published wage determination
- * a survey underlying a wage determination
- * a Wage and Hour Division letter setting forth a position on a wage determination matter
- * a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.

Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

SECTION 00900
MILESTONE SCHEDULE

1.01 GENERAL

- A. These supplemental requirements only add to the General Requirements. In no case shall the supplemental requirements take precedence over the General Requirements unless specifically noted.

1.02 DEFINITIONS

- A. Percent Complete

Percent complete is used as a guide for providing equitable compensation to the Contractor for work completed and/or material purchased and stored (if approved) in accordance with Contract Documents.

The cost-load CPM should be the basis for the construction cost monitoring. By adding the values in a series, dividing the distribution of the activities in the series into one hundred groups of equal frequency, the percent complete for every activity can be estimated.

- B. Substantial Completion

The project can be used for the purpose it was intended for, and all remaining incomplete work is comprised of relatively minor items that the Contractor agrees to correct while the facility is occupied and/or all systems are operational. Training session shall be complete and all manuals turned over to the SMC Representative.

The date of substantial completion of a project is the date when all construction is sufficiently completed, in accordance with the Contract Documents, as modified by any change orders agreed to by the parties, so that the Owner can occupy all spaces in the project and operate the specified system for the use for which it was intended.

1.03 TIME FOR CLOSE-OUT ACTIVITIES

The following time durations shall be allowed for the close-out activities of this project:

<u>Activity</u>	<u>Consecutive Calendar Days Allowed</u>
Construction start to substantial completion	519
Substantial completion to punch list completion	42
Substantial completion to Administration completion (change order, etc)	56
Substantial completion to Final Acceptance by NYC Building Department	84
Substantial completion to final payment	119

1.04 PHASING SCHEDULE

The following phasing schedule represents the Order of Work, Section 01900, Existing Structures Work, and is not intended to be all-inclusive, but represents specific work that must be completed within a specific time frame.

January 10, 2005

Soundproofing of Monsignor McClancy Memorial High School

<u>PHASING SCHEDULE</u>	M	A	M	J	J	A	S	O	N	D	J	F	M	A	M	J	J	A	S	O	N	D	J

SECTION 01000
SPECIFICATIONS FORMAT

1.01 FORMAT

- A. These Specifications generally follow the Construction Specifications Institute format:

Divisions
Sections
Articles
Paragraphs
Subparagraphs

- B. Generally each Section, except for Division 1 Sections, is divided into three (3) parts:

Part 1 - General
Part 2 - Products
Part 3 - Execution

Note: Certain Sections may contain a "Part 4 - Schedules".

1.02 LANGUAGE

- A. The Specifications language is written using both indicative mood and imperative mood.

Where the imperative mood is used, the language is directed to the Contractor, unless specifically indicated otherwise.

- B. Where a colon (:) is used after a subject, the phrase "shall be" (or variations thereof) is to be inferred.

- C. Where "MMMHS" is used, the term means Monsignor McClancy Memorial High School School.

- D. Where "MMMHS Representative" is used, the term means John Ciardullo Associates and his consultants.

- E. Instruction Terms

Wherever reference is made in the Contract to the Work or its performance, the terms "directed", "required", "permitted", "ordered", "designated", "prescribed", and words of similar import shall imply the direction, requirement, permission, order, designation or prescription of the MMMHS or MMMHS Representative.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

F. Approval and Acceptance Terms

"Approved", "acceptable" "satisfactory" and words of similar import shall mean and intend: approved by, acceptable to, or satisfactory to, the MMMHS or MMMHS Representative.

G. Where the words "furnished and installed" is used, the meaning shall be that the item or product shall be "furnished, delivered, and installed/erected/applied/connected for its intended use and as required for the completed Work".

H. Where the word "provide" is used, the meaning shall be that the item or product shall be "furnished, delivered, and installed/erected/applied/connected for its intended use and as required for the completed Work".

END OF SECTION

SECTION 01010
SUMMARY OF THE WORK

1.01 WORK UNDER THE CONTRACT

- A. The Work shall be as described in the Contract Documents including Work identified as ITEM 1 which generally consist of windows and unit ventilators in the Cafeteria. The Contractor shall provide two bid figures (Base Bid Amount excluding Item 1 and Bid Amount Item 1) in the BID AND CONTRACT AGREEMENT, which can be found in the GENERAL CONDITIONS section of this Specification in CHAPTER 1 - General Provisions.

1.02 ITEMS NOT INCLUDED

The following items shown on the Drawings or noted in the Specification are not included in the Work:

- A. Items Labeled "existing to remain".
- B. Removal of asbestos containing items i.e. existing VAT at chases, portions of existing window sealant, and all existing main roof membrane systems.
- C. Items indicated "N.I.C." (Not in Contract).

1.03 OPENINGS AND CHASES

- A. The Contractor shall cut/fill-in/build openings, including but not limited to channels and chases as required to complete the Work as set forth in the Contract and as directed by the MMMHS Representative before any work is installed.
- B. After the installation and completion of all work for which openings, including but not limited to channels and chases, have been provided by the Contractor, the Contractor shall build in, over, around and finish all such openings as required to complete the Work.
- C. If a contractor fails to furnish drawings and information required in connection with such openings before the Contractor performs any Work affected thereby, said contractor who so fails to furnish such Drawings and information shall bear the cost of all cutting and refinishing including that part of the Contractor's Work affected.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- D. The Contractor shall furnish and install all sleeves, inserts, hangers and supports required for the execution of the Work.
- E. Specific instructions shall be obtained from the MMMHS Representative before cutting beams or other structural members, arches and lintels.
- F. The Contractor shall not endanger the Work and shall not cut or alter the Work unless prior approval and instructions are received from the MMMHS Representative.

1.04 SCHEDULING

- A. The Contractor shall deliver to the MMMHS Representative schedules and forms in accordance with the Contract.
- B. The MMMHS Representative may require the Contractor to modify schedules which the Contractor has submitted either before or after such schedules are approved so that:
 - 1. The Work shall not be delayed.
 - 2. Changes in the Work are reflected in the schedules of the Contractor.

1.05 CONTRACT DOCUMENTS

- A. Documents Furnished to the Contractor - After the award of the Contract, the Contractor will be furnished with five (5) sets of paper prints of all Construction Drawings and five (5) complete sets of specifications.
- B. Additional Copies of Drawings and Specifications, when requested, will be furnished to the Contractor by the MMMHS Representative at \$150.00 per set.
- C. Copies to Subcontractors - The Contractor shall furnish to each of the Subcontractors and Materialmen such copies of Contract Drawings, Supplementary Drawings, and copies of the Specifications as may be required for each to perform its respective work.

1.06 PROJECT WORKING HOURS

- A. The normal working hours for this Project shall be from 7:00 AM to 4:00 PM, Monday through Friday, except Legal Holidays. This period shall apply unless specifically indicated otherwise in the Contract Documents, or changed

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

by the MMMHS Representative.

- B. Overtime work will be as defined in the NY State Labor Law Section 220.
- C. No overtime work shall be performed without prior approval by the School Principal, Director of Buildings and Grounds or the MMMHS Representative.

1.07 SECURITY

A. Employee Identification

- 1. The Contractor shall provide photo-identification badges for all of the Contractor's employees and, in addition, require that all Sub-contractors provide photo-identification badges for their employees. Badges are to be worn on outer clothing and be conspicuously displayed at all times while present on the premises of the MMMHS.

The badge is to include the Contractor's name, the employee's name, the employee's social security number, date of birth, height and weight, and a photograph of the employee.

- 2. The Contractor is hereby notified that any employee or representative of the MMMHS shall have the right to inspect the badge. If the Contractor's employee refuses to display or produce a badge for examination, the MMMHS Representative shall be notified, and the Contractor may be directed to remove the employee from the premises until such time as the employee is able or willing to produce said badge.

- B. No visitors shall be permitted on the Site without prior approval of the School Principal, Director of Buildings and Grounds or the MMMHS Representative.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 01026
APPLICATIONS FOR PAYMENT

1.01 PAYMENT

A. Payment will be made in accordance with Payment Section of the General Conditions, pursuant to which the Contractor shall submit a detailed breakdown by trade for the MMMHS Representative's approval. The payment to the Contractor shall be contingent upon compliance with the following conditions:

1. First Application for Payment

Contractor shall submit to the MMMHS Representative the following documents:

- a. An acceptable summary breakdown of the applicable CSI Divisions. Submit the Breakdown sufficiently in advance of the first application for payment to allow for at least two iterations to be completed prior to the first payment. The MMMHS Representative will advise Contractor of the required corrections within 10 days of the submittal of the breakdown. In case there is no agreement between the MMMHS Representative and the Contractor after two iterations, Contractor has the option to request processing of the first payment based on the summary breakdown acceptable to the MMMHS Representative.
- b. An acceptable detailed breakdown of each CSI Division against which payment is requested. Contractor shall submit the detailed breakdown sufficiently in advance as per the procedure indicated in 1.01 A.1.a. If the MMMHS Representative and the Contractor do not agree on the detailed breakdown, Contractor has the option to request processing of the first application for payment based on a breakdown acceptable to the MMMHS Representative.
- c. An acceptable CPM, logic diagram, Activity reports and summary schedule as specified in Section 01311.

2. Subsequent Applications for Payment

Contractor shall submit the following documents to

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

the MMMHS Representative:

- a. Current and acceptable CPM, summary schedule, current monthly update of the logic diagram and activity reports.
- b. Monthly Progress of Activities.
- c. An acceptable detailed breakdown of the CSI Divisions against which payment is requested sufficiently in advance as indicated in 1.01 A. 1. b. This shall be submitted and approved before the application for payment is submitted.
- d. Detailed breakdown of all CSI Divisions shall be submitted within 4 months from NTP.
- e. If Contractor fails to comply with any of the above requirements, the application for payment will not be processed by the MMMHS Representative.

END OF SECTION

SECTION 01045
CUTTING, PATCHING, AND REMOVALS

1.01 CUTTING AND PATCHING

- A. Contractor shall do all cutting and patching, painting and finishing of existing work which is disturbed while performing the Work. Contractor shall be responsible for restoring new work which is damaged. All work shall be restored to provide a new appearance and to be structurally sound.
- B. The work shall be done by competent workmen skilled in the trade required by the restoration.
- C. As soon as practicable after the commencement of work and prior to any imminent placing of concrete, steel, or masonry, the Contractor shall submit to the MMMHS Representative shop drawings indicating the location and size of all penetrations, including, but not limited to, sleeves and ducts, which will be required to accommodate the respective trades in order that it may be determined if such penetrations will materially weaken the building structure. The shop drawings will be stamped and returned if approved. If not approved, reasons will be stated and submitted to the Contractor. The Contractor shall continue to submit shop drawings as the work progresses and shall not proceed with portions of Work having penetrations until such penetrations are approved.
- D. Examination:
 - 1. Prior to cutting, drilling, or removal, investigate both sides of the surface involved. Determine the exact location of structural members.
 - 2. If unforeseen obstructions are encountered, take precautions necessary to prevent damage and obtain instructions from the MMMHS Representative before proceeding with the Work.
- E. Preparation:
 - 1. Provide temporary shoring and other supports necessary to prevent settlement or other damage to existing construction which is to remain.
 - 2. Prepare existing surfaces properly to receive, and where required, to bond with the Work.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

F. Removals, Cutting, Altering:

1. In addition to items indicated on the Contract Drawings to be removed, remove existing construction superseded by the Work except items such as pipes, conduits, recessed boxes, and ducts which are built into existing construction that is to remain. Cut off and conceal such items at face of remaining construction. Provide cover plates on recessed boxes.
2. Remove and alter existing construction as required to install and connect the Work to adjacent construction in an approved manner.
3. Cut and alter existing materials as required to perform the Work. Limit the cutting to the smallest amount necessary. Core drill for holes and saw-cut other openings.
4. Perform cutting, drilling, and removals in a manner which will prevent damage to construction which is to remain.

G. Patching:

1. Patch existing construction and finishes defaced, damaged, or left incomplete due to alterations or removals. Patching, except as otherwise indicated, shall be limited to the areas which have been cut or altered; match materials and finish of area patched.

END OF SECTION

SECTION 01060
PERMITS AND FEES

1.01 REQUIREMENTS

- A. Contractor shall make the necessary arrangements for, and obtain all permits required for the Work, including paying the costs and expenses thereof.
- B. Contractor shall be responsible for the payment of fees which are assessed by any City, State, or Federal agency having jurisdiction over the Work.
- C. Contractor shall be responsible for the renewal of all permits and associated renewal fees until completion of the related work or as required by the governing agency.
- D. Contractor shall pay all associated costs and fees and make all required arrangements through the appropriate utilities for temporary and permanent electrical power.
- E. Contractor shall employ a qualified licensed firm/individual, experienced with the New York City filing, approval and permit procedures; such firm/individual shall prepare and submit all required applications and related documentation to the appropriate agency for processing. The correct and timely submittal of the documentation is solely the responsibility of Contractor. Under no circumstances will time extensions be granted for delays caused by incomplete, incorrect, or untimely submissions of application documentation.
- F. Through the duration of the Work, Contractor shall arrange and coordinate all required inspections. No additional compensation will be paid for repairs, patching and replacement of work required to be removed, opened, or otherwise disturbed to facilitate such inspections.
- H. Before certificates of final payments are issued, Contractor will be required to arrange for all final inspections by the inspection staff of the New York City Building Department and others having jurisdiction, and secure all reports and proofs of inspections. Contractor shall coordinate and arrange for all such inspections. No additional compensation will be paid for repairs, patching, and replacement of work required to be removed, opened or otherwise disturbed to facilitate such inspections.

SECTION 01200
PROJECT MEETINGS

1.01 PURPOSE

Project meetings shall be held to accomplish the following:

- A. Coordinate the Work.
- B. Establish a sound working procedure and relationship between the Contractor, all other contractors, and the MMMHS Representative.
- C. Surface problem areas, assign responsibilities to appropriate parties: i.e., Designer, MMMHS Representative, or Contractor.
- D. Review the progress of the Work, review quality of work in place, review approval required by the Work and review delivery of materials.
- E. Expedite the Work to completion within the scheduled time limit.

1.02 INITIAL JOB MEETING (PRE-CONSTRUCTION MEETING)

- A. The MMMHS Representative will call a Pre-Construction meeting which the Contractor shall attend. This meeting will be called prior to the start of construction.

1.03 JOB PROGRESS MEETINGS

- A. Job progress meetings will be scheduled by the MMMHS Representative during the course of construction; the Representative will preside. The Contractor or the Contractor's duly authorized representative and such Subcontractors, materialmen and vendors as required by the Contractor or the MMMHS Representative shall be present at all job progress meetings. The Contractors and Subcontractors, materialmen and vendors shall answer questions on progress, workmanship, approvals required, delivery of material and other subjects concerning the Work.
- B. The MMMHS Representative will provide that minutes of these meetings will be recorded and typed, and copies will be distributed to all parties involved.

END OF SECTION

SECTION 01300
SUBMITTALS

1.01 SCHEDULES AND RECORDS

- A. Within the time set forth in the Contract, the Contractor is required to complete and submit to the MMMHS Representative the following forms:
1. A preliminary construction progress schedule or bar chart, as applicable, no later than fifteen (15) calendar days after receipt by the Contractor of the Notice to Proceed.
 2. The date on which the Contractor proposes to award each subcontract, no later than fifteen (15) calendar days after receipt by the Contractor of the Notice to Proceed.
 3. On a form approved by the MMMHS Representative, a schedule of anticipated monthly requisition amounts. Such schedule shall be submitted from time to time as directed by the MMMHS Representative, the first such submission being required to be made by the Contractor within fifteen (15) calendar days of receipt by the Contractor of a written order to proceed issued by the MMMHS Representative. The amounts employed in preparing such schedules in no way shall be binding upon the MMMHS.

END OF SECTION

SECTION 01311
PROGRESS SCHEDULE

PART 1 - GENERAL

1.01 METHODS

- A. The Contractor shall comply with Project Progress Scheduling as specified herein.

1.02 PROGRESS SCHEDULE (BAR CHART)

- A. The Contractor shall submit four (4) sets of a detailed Bar Chart Schedule. As a minimum, the number of activities in the schedule shall match the number of Specification Sections in the Contract documents. The Contractor's schedule shall include all pertinent activities including but not limited to submittal dates, required approval dates of shop drawings, purchasing activities, ordering and delivery dates and activities interfacing or interacting with Subcontractor or services. The Schedule shall be updated every month and as required by the conditions of the Work.
- B. The Contractor shall provide a preliminary schedule within 15 working days from the award of the Contract. The Contractor shall then schedule a meeting with the Subcontractors and the MMMHS Representative, to review the preliminary schedule. Any revisions required by the MMMHS Representative as a result of this review or to eliminate conflicts or for compliance with the Contract completion dates will be made to the schedule by the Contractor and submitted for the MMMHS Representative's approval within seven (7) days of the review meeting. The Contractor shall submit a Final schedule within 15 days of the approval of the preliminary schedule or revisions thereof.
- C. If, in the opinion of the MMMHS Representative the Work falls behind schedule, the Contractor shall be required to submit, within seven days of notification, a revised schedule demonstrating a proposed plan to make up the slippage in the schedule and ensure the completion of Work within the Contract time. If the MMMHS finds the proposed plan not acceptable, the Contractor shall resubmit a revised schedule for approval within seven calendar days of the notification from the MMMHS Representative. The revised schedule shall require the Contractor to increase the work force, the construction

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

plant and equipment and/or increase the number of work shifts at no additional cost to the MMMHS. The Contractor shall also bear all the cost for the preparation of the preliminary and all subsequent schedules as well as the cost of additional manpower and equipment.

- D. The Contractor's detailed Schedule of Work shall include, but not be limited to the following:
1. Sequencing (e.g., Excavation must precede Foundations).
 2. Testing Activities/Required Inspections (where applicable).
 3. Subcontractor submittals and approvals.
 4. Shop Drawing Preparation and Approval Activities.
 5. Procurement Schedule (Order Dates, Deliveries, etc.).
 6. Requirement for any On Site Shutdowns that may impact work.
 7. Training or Instruction of School Personnel.
 8. Anticipated Start and Completion Dates for each activity .
 9. Anticipated Durations in work days of each activity.
 10. Final Inspection/Beneficial Occupancy.
- E. In addition to this schedule, two days prior to every monthly job meeting, based on the current approved schedule, the Contractor shall submit a schedule showing all scheduled activities for the following four weeks and a report of progress in the previous four weeks. The schedule will be submitted in a format acceptable to the MMMHS Representative. The Contractor is responsible for reviewing these schedules and coordinate the same with the Subcontractors.

1.03 CONTRACTOR'S DAILY REPORT

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- A. As soon as the Contractor has started Work on the project, the Contractor shall submit weekly to the MMMHS Representative reports of the Work performed the previous day by any of the Contractor's employees, including the employees of the Subcontractors.
- B. The reports shall be prepared by the Contractor's Superintendent and shall bear the Contractor's signature. Each report shall contain the following information:
 - 1. The type of material and the major equipment being installed by the Contractor and the total number of employees worked in each category on that particular day.
 - 2. The names of the Subcontractors working and the type of materials and major equipment being installed, together with the total number employees working for each Subcontractor on that particular day.
 - 3. The major construction equipment being used by each Contractor and Subcontractor.
 - 4. Work pertaining to a Change Order and work being performed under protest.

SECTION 01340
SHOP DRAWINGS AND SAMPLES

1.01 CONTRACTOR SUBMITTAL

- A. Contractor shall submit the Shop Drawings, technical data, and Samples required by the Contract. Contractor shall adhere to all submittal and scheduling requirements for Shop Drawings and Samples. After examination of such Shop Drawings and Samples by the MMMHS Representative and the return of such items by the MMMHS Representative to Contractor, it shall make corrections indicated and shall furnish to the MMMHS Representative the required number of corrected copies of Shop Drawings and Samples.

1.02 SHOP DRAWINGS

- A. Shop Drawings shall be accompanied by a letter of transmittal to the MMMHS Representative requesting approval. Transmittals shall contain submittal items from only one Specifications Section.
- B. Each Shop Drawings and letter of transmittal shall be identified with the following information:
1. Project title.
 2. Date of the drawing, including dates of any revisions.
 3. Name of Contractor, name of Subcontractor, material supplier and manufacturer, as applicable.
 4. Name of person or firm preparing Shop Drawings.
 5. Contract Drawing numbers and Specifications, Section Division and Paragraph numbers used as references in preparing Shop Drawings, and titles of items to which the Shop Drawings refer.
- C. Shop Drawings shall show the design, dimensions, connections and other details necessary to ensure that the Shop Drawings accurately interpret the Contract Documents, and shall also show adjoining Work in such Detail as required to provide proper connections with said adjoining Work. Where adjoining connected Work requires Shop Drawings, such Shop Drawings shall be submitted to the MMMHS Representative for approval at the same time so that connections can be checked.

- D. The Contractor shall verify all field measurements. Measurements available prior to submittal of Shop Drawings shall be shown and so noted on the Shop Drawings. Measurements not available prior to submission of Shop Drawings shall be noted on the Shop Drawings as not available and such measurements shall be obtained by the Contractor prior to fabrication.
- E. The Contractor shall submit manufacturer's drawings and specifications when necessary to fully explain apparatus and equipment required by the Work. These manufacturer's drawings and specifications shall be treated as Shop Drawings. Manufacturer's catalog numbers alone are not acceptable as sufficient information for compliance with this requirement.
- F. The Contractor shall submit original shop drawings specifically intended for the project and shall not submit photostatic reproductions or copies of the Contract Drawings as shop drawings.

1.03 PROCEDURE FOR SUBMITTAL AND APPROVAL OF ALL SHOP DRAWINGS

- A. The Contractor shall submit 8 prints of Shop Drawings and product data to the MMMHS Representative for review and approval. A satisfactory Shop Drawing will be stamped and dated; 3 prints will be returned to the Contractor.
- B. Should the Shop Drawings not be satisfactory, they will be stamped and noted accordingly and two sets of such Shop Drawings will be returned to the Contractor with the necessary corrections and changes to be made in accordance with the notations indicated thereon.
- C. The Contractor shall make such corrections and changes and again submit 8 prints of the Shop Drawings and product data for the approval of the MMMHS Representative. The Contractor shall revise and resubmit the Shop Drawings as required by the MMMHS Representative until approval thereof is obtained.

1.04 RESPONSIBILITY, SCHEDULE, PROCEDURES

- A. Variations - If the Shop Drawings show variations from the Contract requirements because of standard shop practice, or other reasons, the Contractor shall make specific mention of such variations in the letter of transmittal.
- B. Responsibility of Contractor

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. The approval of Shop Drawings will be general and shall not relieve the Contractor of responsibility for the accuracy of such Shop Drawings, nor for the proper fitting and construction of the Work, nor of the furnishing of materials or Work required by the Contract and not indicated on the Shop Drawings. Approval of Shop Drawings shall not be construed as approving departures from the Contract Drawings, Supplementary Drawings or Specifications.
 2. Contractor shall be responsible for coordinating Shop Drawings of the various trades before submittal so as to avoid conflicting locations and conflicting routing of items and interference between items. Corrections resulting from such conflicts and interference shall be made by and at the expense of the Contractor.
- C. Shop Drawing and Sample Submittal Schedule - To enable the Work to be transacted in an orderly and expeditious manner, the Contractor shall within thirty (30) days after the Notice to Proceed submit a proposed progress schedule showing the anticipated time of commencement and completion of the submission of Shop Drawings and Samples for each of the various operations to be performed under the Contract.

This schedule shall be interfaced with the Construction Progress Schedule required by another Article in the General Requirements.

- D. Procedure for preparing, forwarding, checking and returning of all Shop Drawings shall be generally as follows:
1. The Contractor shall make available to the Contractor's Subcontractors the necessary Contract Documents and have them determine dimensions and conditions in the field, particularly with reference to coordination with other trades or work under other contracts;
 2. The Contractor shall direct the Subcontractors to prepare Shop Drawings for submission to the MMMHS Representative, in accordance with the requirements of these "General Requirements".
 3. The Contractor shall also direct the Contractor's Subcontractors to flag or circle corrections made on all resubmissions for approval, so as to be readily seen, and that the symbol "Sub" be used to

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

identify the source of correction or information that has been added.

4. The Contractor shall:
 - a. Review and be responsible to the MMMHS for information shown on Subcontractor's shop and installation drawings and manufacturer's data, and also for conformity to Contract Documents.
 - b. Flag corrections made on all submissions for approval, so as to be readily seen, use the symbols "GC", "PL", "MECH" and "EL" to indicate that the correction and/or information added was made by the respective Subcontractor.
 - c. Clearly designate which trade is to perform the work when the use of "Work by Others" or other similar phrases are indicated on the Drawings before submission to the MMMHS Representative.
 - d. Stamp all submissions "Recommended for Approval", date and forward required copies to the MMMHS Representative.

E. In order to expedite shop drawing procedures, the Contractor shall write a bi-weekly Shop Drawing status letter to the MMMHS Representative containing the following subject matter:

1. A list of all Shop Drawings which have been sent to but not returned by the MMMHS Representative, giving name of the Subcontractor, Drawing number, title and date of submission.
2. An indication of the desired priority of the return, if necessary.

Note: The status letter shall be prepared and sent at a given time, preferably Friday morning, to enable the MMMHS Representative to receive the letter on Monday morning. This procedure shall be maintained throughout the active Shop Drawing period of construction.

1.05 SAMPLES

- A. Samples shall be accompanied by a letter of transmittal to the MMMHS Representative requesting approval.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- B. Each sample shall be labeled with the following information:
1. Project title.
 2. Date of submission.
 3. Name and quality of the material.
 4. Name of Contractor, name of Subcontractor, Material Supplier and Manufacturer, as applicable.
 5. Contract Drawing numbers and Specification Section, Division and Paragraph numbers used as reference in preparing Samples.
- C. Samples shall be of sufficient size to show the quality, type, color, finish and texture of the material required to be furnished by the Contractor pursuant to the Contract. Furnish specific sizes and quantities where indicated in the respective technical Sections. Where quantities are not indicated, submit 3 samples. All products used on the project shall require a sample submission, whether so stated in the specification or not.
- D. Valuable Samples, such as windows, not destroyed by inspection or test, will be returned to the Contractor and may be incorporated into the Work after all questions of acceptability have been settled, providing suitable permanent records are made as to location of the Samples, their properties, and other pertinent information.

1.06 CONTRACTOR RESPONSIBILITY

- A. The MMMHS Representative's approval of Shop Drawings and samples shall not relieve the Contractor of responsibility for any deviation from the requirements of the Contract. The Contractor shall be responsible for the accuracy of the Shop Drawings and Samples and for the conformity of Shop Drawings and Samples with the Contract unless the Contractor has notified the MMMHS Representative of the deviation in writing at the time of submission and has received from the MMMHS Representative's written approval of the specified deviations. The MMMHS Representative's approval shall not relieve the Contractor of responsibility for errors or omissions in the Shop Drawings and Samples.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1.07 COMMENCEMENT OF WORK

- A. No portion of the Work shall be commenced until required Shop Drawings and Samples are approved by the MMMHS Representative.

END OF SECTION

SECTION 01380
PROGRESS PHOTOGRAPHS

1.01 PHOTOGRAPH SUBMISSION

- A. The Contractor shall take and submit to the MMMHS Representative, representative photographs of the Site and the Work being performed under this Contract. Photographs shall be taken prior to start of Work and thereafter on a monthly basis, and at the completion of the Work. The number and locations from which the photographs are taken shall be subject to the direction and approval of the MMMHS Representative and shall be sufficient to record the conditions existing prior to the commencement of Work and thereafter as directed by the MMMHS Representative to sufficiently document and record the overall progress of the Work Site, construction, architectural and structural details.
- B. All photographs shall be in 35mm color slide format and shall be concisely labeled with date, time, Project No. and subject. The slides shall be delivered in flexible, plastic, archival quality, slide files containing 20 pockets for 2" x 2" slides.
- C. In addition to the 35 mm slides, the Contractor shall furnish one 4" x 6" color print of each of the slides.
- D. The costs for taking, processing, labeling, mounting and delivering all slides and photographs shall be included in the Contractor's Bid Amount.
- E. Quantity of Photographs

Provide an average of 20 photographs per month over the life of the Project.

END OF SECTION

SECTION 01400
QUALITY CONTROL

1.01 SERVICES AND ITEMS INCLUDED

- A. Controlled inspections shall be performed by a Professional Engineer or Registered Architect (licensed in the State of NY) retained by the Contractor on behalf of the MMMHS. All costs related to the controlled inspections shall be the responsibility of the Contractor. All forms required for this purpose by the NYC Building Department or other agency shall be prepared and filed by the Engineer or Architect retained by the Contractor.

1.02 CONTROLLED INSPECTIONS

- A. Material and service equipment designated for "Controlled Inspection" under the provisions of the New York City Building Code shall be inspected, tested and witnessed by or under the supervision of a licensed Engineer or a licensed Architect.
- B. The Engineer or Architect employed for "Controlled Inspections" shall file all initial amendments or Statements of Responsibility Form TR-1, properly executed, before work commences and all final amendments immediately upon completion of work with the Building Department. A copy of each approved amendment or Form TR-1 must be on file with the New York City Building Department before work commences and copies of final amendments or TR-1 Forms must be on file before final acceptance of the Work.
- C. Contractor shall notify in writing the Engineer or Architect responsible for controlled inspections at least 48 hours before the specific work item commences.
- D. Inspections and tests performed under controlled inspection shall in no way relieve the Contractor of the responsibility to construct the project in accordance with the Drawings and Specifications.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1.03 MANUFACTURERS' FIELD OBSERVATIONS AND TESTS

- A. Provide observations and tests as specified in the respective technical Sections.

1.04 MOCK-UPS AND FIELD SAMPLES

- A. Provide mock-ups and field samples as specified in the respective technical Sections.

1.05 ACCEPTANCE TESTS

- A. Governmental Agencies - All equipments and appliances furnished and installations made under the Contract shall conform to the requirements of the Specifications, and shall in any event be not less than that necessary to comply with the minimum requirement of all governmental agencies having jurisdiction.
- B. Notice of Tests - Whenever the Specifications or any governmental agency having jurisdiction requires the acceptance test, Contractor shall give written notice 48 hours in advance to all parties concerned of the time when these tests will be conducted.
- C. Utilities and Instruments - Contractor shall furnish energy, fuel, oil, water, air, smoke, light and electrical instruments as required for all testing.
- D. Contractor shall furnish labor and material necessary to conduct the acceptance tests at no additional cost to the MMMHS.
- E. Certificate - The final acceptance by the MMMHS shall be contingent upon the Contractor delivering to the MMMHS Representative all necessary certificates evidencing compliance in every respect with the requirements of the agencies having jurisdiction.

END OF SECTION

SECTION 01426
SAMPLE ROOM

1.01 PURPOSE

- A. A complete sample of a typical room that incorporates all of the individual materials, equipment and finishes shall be constructed.
- B. The Sample Room will serve to establish an acceptable level of quality.
- C. The MMMHS Representative will have an opportunity to view and approve the finished room before Contractor begins the finish production work for any other spaces within the building.

1.02 EXECUTION

- A. A room, designated by the MMMHS Representative, shall be constructed as the Sample Room. Contractor shall include within its base bid all costs associated with the construction of this room, including, but not limited to, the out-of-sequence construction of this room.
- B. The Sample Room shall include all work indicated in the Contract Documents for the specific classroom and shall include, but not be limited to, removals, replacement windows, gypsum board walls and ceilings, plaster patching, mechanical work, electrical work, and painting.
- C. All Submittals and Shop Drawings and Samples required for any of the components required to complete the Sample Room shall be scheduled, submitted and approved prior to constructing the Sample Room.
- D. Construction of the Sample Room shall be included in Contractor's Master Schedule.
- E. The Sample Room shall remain as a permanent part of the building. This room shall be accessible to the MMMHS and the MMMHS Representative at all times. All corrective work to achieve the level of quality required shall be the responsibility of Contractor.
- F. The MMMHS Representative's approval of Sample Room shall not relieve Contractor of responsibility for any deviation from the requirements of the Contract. Contractor shall be responsible for the conformity of the Sample Room with the Contract unless Contractor has

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

notified the MMMHS Representative of the deviation in writing prior to constructing the Sample Room and has received from the MMMHS Representative's written approval of the deviations. The MMMHS Representative's approval shall not relieve Contractor of responsibility for errors or omissions in the Sample Room construction.

END OF SECTION

SECTION 01500
TEMPORARY FACILITIES AND CONTROLS

1.01 REQUIREMENTS

- A. The Contractor shall Provide the temporary facilities and controls as hereinafter specified and as required by law.

1.02 TEMPORARY LIGHTING AND ELECTRIC SERVICE

- A. The Contractor shall Provide and maintain all temporary lighting and power required, including exterior lighting and security lighting, in connection with the Contractor's operations from the commencement of the Work until the completion of the structure or for such other time as directed by the MMMHS Representative. When the use of such temporary lighting and power is no longer required, all temporary wiring and equipment shall be completely removed by the Contractor. The minimum temporary lighting to be provided is at the rate of one-quarter watt per square foot and is to be maintained in each room requiring Work. However, provide sufficient level of lighting to perform the Work. All temporary wiring and equipment shall be in conformity with the National Electric Code. Three-phase temporary power circuits shall be installed as required to operate construction equipment of the various trades and to install and test equipment. The Contractor shall install and maintain temporary or permanent service for the permanently installed building equipment, so that such equipment may be operated when required and so ordered by the MMMHS Representative. The Contractor may use the existing power within the School Building for construction within the facilities if available. The Contractor shall make the necessary application to the lighting company and pay for all charges, costs and expenses incidental to the installation and maintenance of temporary power as required in connection with the Contractor's office trailer and the temporary classroom trailers, and the Contractor shall pay for all power used. At the completion of each interior area of the Project, the Contractor shall remove the temporary lighting. At the completion of the entire Project, the Contractor shall remove the temporary lighting and power from the Site and shall restore the Site to its original condition.

1.03 TEMPORARY TOILET FACILITIES

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- A. The Contractor shall provide and maintain chemical toilet accommodations in the Contractor's Staging Area for all persons employed or engaged in the Work; such facilities shall meet any and all requirements of law, rule or regulation. The Contractor shall remove such facilities at the completion of the Work or at such earlier time as the MMMHS Representative may direct.

1.04 INTERRUPTION OF UTILITY SERVICES

- A. The Contractor shall submit to the MMMHS Representative, for approval, a proposed schedule of all utility shutdowns and cutovers of all types which may be required in connection with the Work. Utility shutdowns shall only be performed on weekends or days of the week when the school building is not being utilized. Such schedule shall provide a minimum of two (2) weeks advance notice to the MMMHS Representative prior to the item of the proposed shutdown or cutover.
- B. Any shutdowns or cutovers shall be at the sole expense of the Contractor.

1.05 TEMPORARY ENCLOSURES

- A. The Contractor shall provide and maintain temporary weather-resistant enclosures for all openings in exterior walls and roof that are not permanently enclosed.

1.06 TEMPORARY FENCE ENCLOSURES

- A. The Contractor shall provide and maintain temporary fence enclosures for the Contractor's Staging Area.
- B. Provide a construction fence as indicated on the Drawings and in accordance with the NYC Building Code. The construction fence, gates and all accessories shall be galvanized.
- C. Develop, and submit to the MMMHS Representative for approval, detailed fence shop drawings, indicating bracing, gates and other pertinent information.

1.07 EXISTING PARKING LOT

- A. The Contractor may only use area of the school's existing parking lot designated as the Contractor's Staging Area as indicated on the Drawings. The Contractor and his its forces shall not block off, use or park in the remaining portion of the school's parking lot.

1.08 FIRE PREVENTION CONTROL

- A. Comply with the safety provisions of the National Fire Protection Association's "National Fire Codes" pertaining to the Work and, particularly, in connection with any cutting or welding performed as part of the Work.

1.09 POLLUTION CONTROL

The Contractor shall:

- A. Comply with all laws, rules and regulations governing pollution control, including but not limited to those of the Department of Environmental Conservation of NYS.
- B. Refrain from the disposal of volatile fluid wastes into storm or sanitary sewer systems, approved sewage disposal systems or any waterway.
- C. Refrain from burning trash or waste materials.

1.10 TEMPORARY CLASSROOMS

- A. The Contractor shall provide temporary classroom trailers, comprising one classroom, including stairs, ramps, platforms and railings to access the trailers, as shown on the Contract Drawings, for the School's use during the course of the Work. The temporary classroom units will be funded by the F.A.A. and the P.A.
 - 1. The Contractor shall supply temporary classroom trailers in full compliance with the NYC Building Code and shall provide for all work necessary to provide the trailers with a temporary electric service from the local electric utility company.
 - 2. All toilet and sink facilities in the classroom trailers shall be self contained.
 - 3. At the completion of the Project, the Contractor shall remove the temporary classroom trailers and temporary electric service from the Site and shall restore the Site as indicated on the Drawings and directed by the MMMHS Representative.
 - 4. The Contractor shall provide temporary classroom trailers from a recognized leasing company such as GE Capital Modular Space in Farmingdale, NY 11735 or equal.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

5. The Contractor shall furnish and install a wall mounted telephone in each temporary classroom with intercom only capabilities connected to the school's main telephone board. Intercom phones shall be compatible with the school's existing telephone system. The Contractor shall run all intercom phone wiring on temporary supports at 10'-0" above finished grade. The Contractor shall maintain the intercom telephones and wiring for the duration of the Contract. Upon completion of the Project, the Contractor shall remove the equipment, wiring and temporary wiring support and restore the Site to its original condition.

1.11 TEMPORARY FIELD OFFICES

A. Contractor's Field Office

The Contractor shall provide a temporary office trailer, for the Contractor's and the MMMHS Representative's use during the course of the Work.

1. The Contractor shall supply a temporary office trailer in full compliance with the NYC Building Code and shall provide and pay for all work necessary to provide the trailers with a temporary electric service from the local electric utility company. The trailer shall be located within the Contractor's Staging Area.
2. All toilet and sink facilities in the office trailer shall be self contained.
3. At the completion of the Project, the Contractor shall remove the temporary office trailer from the Site and shall restore the Site and finish the area as indicated on the Drawings and directed by the MMMHS Representative.
4. The Contractor shall provide a lockable office within his temporary office trailer for the exclusive use of the MMMHS Representative. The MMMHS Representative shall have access to this office and the Contractor's Staging Area at all times.
 - a. Bear all costs in relation to the furnishings, construction and removal of such office.
 - b. Office shall be of sufficient size to include

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

the following furniture/equipment/utilities which the Contractor shall provide, pay for, and maintain:

1. Heater and Air Conditioner with thermostatic controls, to provide for inside temperature of 70 degrees F.
2. Electrical System complete with fluorescent lighting and electric outlets.
3. Large aluminum windows and screens.
4. Plan table 36" X 72" and plan rack.
5. One kneehole desk and two office chairs.
6. Two lockable legal size 4-drawer metal filing cabinets, suspension type provided with follower and rod.
7. Fifty (50) vertical file guides and 50 manila folders.
8. Two Stanley mason's level, one 48" long and one 24" long, walnut and redwood stock 2 1/4" X 11/16" with aluminum tips and one Stanley 25 foot tape measure. Upon completion of contract, this equipment shall become property of Contractor.
9. Three (3) blue safety hats, of approved type, for use of the MMMHS Representatives. Upon completion of contract, safety hats to become property of Contractor.
10. Copy Machine: Provide and maintain Xerox #1012, or approved equal, table top copier, capable of coping sizes 8 1/2" X 11" and 8 1/2" X 14". Provide all supplies as required.
11. Install a telephone for the sole use of the MMMHS Representative and pay all service and toll charges incurred as a result of the use of such telephone service.

1.12 MAINTENANCE OF TEMPORARY CLASSROOMS AND FIELD OFFICE

A. Temporary classrooms

1. Maintain 70 degree temperature inside year round, during school hours.
2. Keep weatherproof and water-tight.
3. Replace burned out fluorescent tubes and incandescent bulbs.
4. Maintain all systems in proper working order.
5. Provide normal snow removal operations for the temporary classroom's exterior deck, steps and ramps and the temporary asphalt pavement leading to the temporary classroom trailers.
6. Normal cleaning operations will be by School Custodian.

B. Contractor's Field Office

1. Clean daily.
2. Wash, when required, and at least once every week.
3. Maintain 70 degree temperature inside year round, during work hours.
4. Keep weatherproof and water-tight.
5. Replace burned out fluorescent tubes and incandescent bulbs.

1.13 RUBBISH REMOVAL

A. The Contractor shall:

1. Keep the Work free from rubbish at all times.
2. Clean all enclosed structures daily.
3. Remove rubbish from the Site at least once a week.

B. The Contractor shall conform with the following:

1. Burning of rubbish will not be permitted.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. All rubbish shall be lowered by way of chutes or lowered in receptacles. Under no circumstances shall any rubbish be dropped or thrown from one (1) level to another inside or outside any building.
 3. Do not throw rubbish from the windows or other parts of the building. Wet down masonry rubbish, dirt and other dust-producing material from time to time.
 4. Remove from the site all surplus materials as the Work progresses.
 5. At the conclusion of the work, all erection plant tools, temporary structure and materials belonging to the Contractor shall be promptly taken away.
 6. In the event the Contractor fails to maintain the premises in a neat condition acceptable to the MMMHS Representative and postpones or delays the removal of rubbish, the MMMHS may order such rubbish or dirt removed by other parties, if in its opinion this failure results in the clear and present danger of fire or personal injury. In such event, there shall be withheld from any payment to the Contractor a sum determined by the MMMHS sufficient to cover the cost of removal by other parties.
- C. All materials, fixtures and equipment, removed in the process of the work under this Contract shall remain the property of the MMMHS. The MMMHS Representative will examine the materials, fixtures and equipment removed, and determine which items shall be retained by the MMMHS. The Contractor shall move and store such items where directed by the MMMHS Representative. All other materials, fixtures, and equipment shall be removed and be disposed of by the Contractor in the same manner as rubbish.

1.14 DISCONTINUE, CHANGES AND REMOVAL

The Contractor shall:

- A. Discontinue all temporary services required by the Contract when so directed by the MMMHS Representative. The discontinuance of any such temporary service prior to the completion of the Work shall not render the MMMHS liable for any additional cost entailed thereby.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- B. Remove and relocate such temporary facilities without additional cost to the MMMHS, and restore the Site and the work to a condition satisfactory to the MMMHS Representative.

1.15 MOISTURE AND CONDENSATION CONTROL

- A. The Contractor shall provide for ventilation of all structures until Physical Completion and acceptance of the Work and shall control such ventilation to avoid excessive rates of drying of construction materials, including but not limited to concrete and to plaster, and to prevent condensation on sensitive surfaces.

1.16 STORAGE OF MATERIALS

- A. Provide and maintain adequate storehouses, material sheds, protection or other structures as may be required for any of the Work, or for the storage of materials. Adopt methods, procedures and ways and means to meet the conditions of all seasons. All materials must be stored in watertight structures, not tarps or covers exposed to the weather, unless acceptable to the MMMHS Representative.

1.17 CONCESSIONS ON SITE

- A. No restaurants, lunchrooms or other concessions of any kind whatsoever shall be operated on the site of this Project except with written permission of the School Principal.

1.18 TREE PROTECTION

- A. Provide adequate protection for the duration of the Project Work for existing trees which are to remain at the Site. Contractor shall bear the expense of replacing trees that are damaged.

1.19 SCAFFOLDING AND LADDERS

- A. The Contractor shall furnish and securely set scaffolding required for the Work.
- B. All scaffolding shall be of good, sound materials, of adequate dimensions for its intended use and substantially braced and tied to ensure absolute safety for its users.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1.20 SIDEWALK SHEDS

- A. The Contractor shall provide sidewalk sheds of the type and in locations as required by the Work and the NYC Building Code.

END OF SECTION

SECTION 01513
HEAT DURING CONSTRUCTION

1.01 GENERAL

- A. All work shall be performed under such ambient temperature and humidity conditions as are necessary or required to satisfactorily carry out the Work of this Contract. The Contractor is responsible for arranging to have such temporary heat, as may be necessary or may be called for herein to maintain adequate ambient temperature (between 45 and 55 degrees F, except where higher temperatures are required) and humidity conditions in work areas and shall pay all expenses relating thereto. Spaces occupied by students and school staff shall be maintained at 70 degrees F and not be disrupted.
- B. The Contractor shall provide all connections, fittings, controls, piping and terminal units, and individual heating units as may be necessary to maintain adequate conditions as described above. Heating Units shall be of an approved type meeting applicable NYC codes and ordinances.
- C. Systems for temporary heat may be connected to the existing heating system (where applicable) to the extent and at such locations as designated by the MMMHS Representative.
- D. The cost of fuel shall be paid for by the Contractor unless such temporary heat is obtained from the existing heating system.
- E. Take precautions to protect all portions of the building from smoke and gas damage and to prevent hazardous conditions which may result in damage to property or injury to persons.
- F. At the completion of the project all piping shall be disconnected and capped and the existing system, if connected to, shall be restored to its original condition. All damages to the existing system shall be repaired by the Contractor at no additional cost to the MMMHS.

END OF SECTION

SECTION 01600
MATERIAL AND EQUIPMENT

1.01 DELIVERY, STORAGE AND PROTECTION

- A. Materials stored on the Site shall be neatly arranged and protected, and shall be stored in an orderly fashion in locations that shall not interfere with the progress of the Work or with the daily functioning of the School.
- B. Should it become necessary during the course of the Work to move materials or equipment stored on the Site, the Contractor, at the direction of the MMMHS Representative, shall move such material or equipment.
- C. Contractor shall furnish to the MMMHS Representative a copy of each material order, indicating date of order and quantity of material, and shall also notify the MMMHS Representative when material has been delivered to the site and state the quantities.
- D. Ample quantities - Contractor shall deliver materials in ample quantities to ensure the most speedy and uninterrupted progress of the work so as to complete the Work within the Contract time.
- E. Manufacturer's containers shall be delivered with unbroken seals and shall bear proper labels.
- F. Contractor shall coordinate deliveries in order to avoid delay in, or the impeding of the progress of the Work. Deliveries shall be made during regular work hours, unless approved otherwise by the MMMHS Representative.
- G. Stackings - All materials shall be properly stacked in convenient places adjacent to the Work, or in other areas approved by the MMMHS Representative, and protected as recommended by the respective material manufacturer.
- H. Overloading - If approval is given to store materials in any part of the building area, they shall be so stored as to cause no overloading of the existing structure.
- I. No Interference - If it becomes necessary to remove and restack materials to avoid impeding the progress of any part of the Work or interfering with the work to be done by any other contractor, or interfering with the school's activities, Contractor shall remove and restack such materials at no additional cost to the MMMHS.

1.02 APPROVAL OF MATERIALS

- A. Local Laws - All materials, appliances and types of methods of construction shall be in accordance with the Contract Documents, and shall in no event be less than that necessary to conform to the requirements of the Administrative Code and the Charter of the City of New York.
- B. Repute of Manufacturer - No manufacturer will be approved for any materials to be furnished under the Contract unless the manufacturer shall be of good reputation, shall have a plant of ample capacity and shall have successfully produced similar products.
- C. All transactions with the Manufacturers and Subcontractors shall be through Contractor unless Contractor requests in writing to the MMMHS Representative that the manufacturer or subcontractor deal directly with the MMMHS Representative. Any such transactions shall not in any way release Contractor from full responsibility under the Contract.
- D. All Materials, fixtures, fittings, supplies and equipment furnished under the Contract shall be new and unused, of first-grade quality and of the best workmanship and design. Where existing work is removed or disturbed, all replacement materials shall match existing unless prior approval of variance is given in writing by the MMMHS Representative.

1.03 MANUFACTURER'S SHOP PAINT

- A. For all manufactured products and equipment requiring shop paint in the State of New York, paint used shall be:
 - 1. In compliance with Federal regulations and with the regulations of the State of New York and of the City of New York.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. In compliance with Part 205, "Architectural Surface Coatings", Department of Environmental Conservation, State of New York, governing the emission of Volatile Organic Compounds.
 3. In compliance with the non-photo chemical reactive solvents requirements of N.Y.C. Law 49.
 4. Be compatible with the finish painting for the respective product and the condition of use.
- B. The provisions of Art. 1.03-A, herein, shall supersede shop coat paints specified in the respective technical Sections of these Specifications, where in conflict.

END OF SECTION

Monsignor McClancy Memorial High School

SECTION 01630
PRODUCT SUBSTITUTIONS AND OPTIONS

1.01 CONSIDERATION FOR APPROVAL

- A. Products, materials, systems and equipment specified herein shall be used for this Project unless approval for submitted substitutions is obtained from the MMMHS Representative.
- B. Consideration for approval of substituted products, materials, systems, and equipment will be as stipulated in Materials and Labor Section of the Special Conditions.
- C. Requests will not be considered if made for a certain item or items if made at such date which will not allow time for proper MMMHS Representative analysis and determination for decision before need for incorporation of item or items in the Work of the Project.
- D. Request for approval of substitute window manufacturer must comply with all submission requirements of Section 08524 of this Specification.

1.02 INFORMATION FOR SUBMITTAL

- A. Submit product literature, samples, drawings, life cycle cost data, maintenance data, and other pertinent documentation that the MMMHS Representative may require to make a proper analysis and determination.

1.03 APPROVAL DECISION

- A. The decision for approval or rejection of a product substitution shall rest solely with the MMMHS Representative.

1.04 ACCOMMODATIONS FOR SUBSTITUTIONS

- A. In the event substitute products, materials, systems and equipment which are accepted cause accommodations incurring additional costs, such costs shall be borne by the Contractor.

END OF SECTION

SECTION 01650
FACILITY START-UP, DEMONSTRATION, TRAINING

1.01 START-UP AND DEMONSTRATION

Note: See 01730 for HVAC OPERATION, TRAINING, MANUAL for HVAC operation and training.

- A. Contractor shall start-up and demonstrate, in the presence of the MMMHS Representative and the Director of Buildings and Grounds, the proper operation of all equipment provided in this Contract; refer to respective technical Sections for detailed procedures. If procedures are not specified for specific items of equipment, follow that recommended by the item Manufacturer.

1.02 TRAINING

- A. Contractor shall provide the services of factory-trained representatives to instruct and train designated MMMHS personnel in the proper operation and maintenance of each item of equipment.
- B. Contractor and the MMMHS Representative shall mutually agree upon the times set for the instruction and training.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 01700
PROJECT CLOSEOUT

1.01 FINAL CLEANUP

- A. Contractor shall leave the Work ready for use and occupancy without the need of further cleaning of any kind.
- B. Contractor shall remove all tools, appliances, project signs, material and equipment from the premises as soon as possible upon completion of the Work.
- C. The Work shall be turned over to the MMMHS in new condition, in proper repair and in perfect adjustment.

1.02 REQUIRED CLOSEOUT DOCUMENTATION

- A. Prior to final payment, the MMMHS Representative shall receive the following documents as required by the Contract:
 - 1. Contractor's general guarantee.
 - 2. Specific guarantees, warranties, material, equipment and other items of work.
 - 3. All certificates obtained in connection with the Work.
 - 4. All approvals from the NYC Building Department and other agencies have jurisdiction.
 - 5. Project Record Documents.
 - 6. All final photographs of the Work.
- B. The MMMHS Representative shall also receive from the Contractor prior to final payment:
 - 1. A complete listing of all Subcontractors, business addresses and items supplied by each such Subcontractor.
 - 2. A listing of manufacturers of major materials, equipment and systems installed in the Work.
 - 3. A copy of all test data taken in connection with the Work.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

4. At least 3 copies of all operation and maintenance manuals, but more than 3 copies if indicated otherwise in another Section.
5. All keys, tools, screens, spare construction material, finishing material and equipment required to be furnished to the MMMHS as part of the Work.

1.03 ORIENTATION INSTRUCTION

- A. Prior to final payment appropriate maintenance personnel of the MMMHS shall be oriented and instructed by the Contractor in the operation of all systems and equipment as required by the Contract.

1.04 PROJECT CLOSEOUT INSPECTIONS

- A. When the Work has reached such a point of completion that the building, equipment or apparatus or any part thereof required by the MMMHS for occupancy or use can be so occupied and used for the purpose intended, the MMMHS shall make a detailed inspection of the Work to ensure that all requirements of the Contract have been met and that the Work is complete and is acceptable.
- B. A copy of the report of the inspection shall be furnished to the Contractor as the inspection progresses so that the Contractor may proceed without delay with any part of the Work found to be incomplete or defective.
- C. When the items appearing on the report of inspection have been completed or corrected, Contractor shall so advise the MMMHS Representative. After receipt of the notification, the MMMHS Representative will inform the Contractor of the date and time of final inspection. A copy of the report of the final inspection containing all remaining contract exceptions, omissions and in completions will be furnished to Contractor.
- D. After receipt of notification of completion and all remaining contract exceptions, omissions and in completions from Contractor, the MMMHS Representative shall make an inspection to verify completion of the exception items appearing on the report of final inspection.
- E. Inspections
 1. Before certificates of final payments are issued,

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Contractor shall arrange for all final inspections by the inspection staff of the Department of Buildings and other City agencies having jurisdiction, and secure all reports by such inspectional staff and other City agencies.

2. Contractor or Vendor for the Electrical Work shall submit proof of filing for a certificate of electrical inspection, by forwarding to the MMMHS Representative the pink copy of the job position card issued by the Bureau of Electric Control in connection with each application for certificate of electrical inspection. Submit BEC Certificate of Inspection before Contract closeout and as a condition for final payment.

END OF SECTION

SECTION 01720
PROJECT RECORD DOCUMENTS

1.01 PROJECT RECORD DOCUMENTS

- A. The purpose of the Project Record Documents is to record the actual location of the Work in place, including, but not limited to, concealed piping within buildings, concealed valves and control equipment, connections, switches, and cut-outs, and to record changes in the Work.
- B. In addition to the sets of Contract Documents that are required by Contractor on the Site to perform the Work, Contractor shall maintain, at the Site, 1 copy of all Drawings, Specifications, and Addenda, that are part of the Contract as awarded, and also Change Orders, Modifications, approved Shop Drawings, and other approved changes. Each of these documents shall be clearly marked "Project Record Copy" as indicated below, maintained in a clean and neat condition available at all times for inspection by the MMMHS Representative and shall not be used for any other purpose during the progress of the Work.
1. Each record copy shall bear the legend "PROJECT RECORD COPY" in heavy block lettering, ½" high and contain the following data:

PROJECT RECORD COPY

- a. Contractor's Name _____
Contractor's Address _____
Made by _____ Date _____
- b. Checked by _____ Date _____
2. Changes from the Contract as awarded Documents shall be conspicuously encircled.
- C. Project Record Requirements
1. The Contractor shall mark-up the "Project Record Documents" to show:
- a. Approved changes in the Work.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- b. Location of concealed Work.
 - c. Details not shown in the original Contract Documents.
 - d. All relocations of Work.
 - e. All changes in dimensions.
 - f. All access doors.
 - g. Location of all heating, ventilating, air conditioning and electrical assemblies.
2. Such information shall include, but shall not be limited to:
- a. All structural changes.
 - b. All substitutions.
 - c. All approved Change Orders.
- D. Contractor shall keep the Project Record Documents up-to-date from day to day as the Work progresses. Appropriate documents shall be updated promptly and accurately; no Work shall be permanently concealed until all required information has been recorded.
- E. Each month these record drawings will be examined by the MMMHS Representative prior to recommending the approval of the partial payment request to ascertain that the record prints reflect the changes to date.
- F. Record Shop Drawings: If installed equipment is at variance with the respective approved Shop Drawings, Contractor shall furnish to the MMMHS Representative revised Shop Drawings indicating the actual completed installation.
- G. Shop Drawings for Permanent Records - Contractor shall submit a list of all approved Shop Drawings of the Work as installed. From this list the MMMHS Representative will select the drawings desired for permanent records. Contractor shall furnish these in a bound set to the MMMHS Representative.
- H. All of the above listed requirements of this Article shall be at Contractor's expense.
- I. The Project Record Documents shall be submitted by

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Contractor to the MMMHS Representative when all the Work is completed and shall be approved by the MMMHS Representative before Contractor may request final payment and shall become the property of the MMMHS.

J. Final payment shall be contingent on completion of the above listed requirements in this Section.

K. Approval of Bureau of Electric Controls:

1. The Bureau of Electric Controls job number for the Contract shall appear on all drawings, samples or other materials submitted for approval, together with the Contractor Number and name of the project.
2. The Contractor shall submit drawings to be reviewed, approved and signed by the electrical inspector of the Bureau of Electric Controls for Agency approval. Prints shall be submitted and re-submitted at Contractor's expense until approved.

END OF SECTION

SECTION 01730
HVAC OPERATION, TRAINING, MANUAL

1.01 TRAINING OF CUSTODIAL STAFF

- A. Contractor shall advise the Director of Buildings and Grounds, through the MMMHS Representative, of the schedule of installation of mechanical equipment. During the construction phase, the Director of Building and Grounds shall have access to the site as an observer during all times Contractor is working. The MMMHS Representative will advise the Director of Buildings and Grounds not to interfere or give directives to Contractor.

The Director of Buildings and Grounds shall be advised of all checkouts and adjustments to systems in preparation to startup and shall be given the opportunity to observe this phase of the installation.

- B. Contractor shall furnish the services of a factory-trained representative, whose duty shall be to train the Custodian in the operation, troubleshooting and basic maintenance of each mechanical system. Operating and maintenance instructions shall consist of not less than 10 days for heating, ventilating and air conditioning equipment apportioned as follows:
1. The Director of Buildings and Grounds and the Custodian shall be instructed in the operation and maintenance requirements of the heating and ventilating system on 4 consecutive school days between the hours of 8:00 a.m. and 3:00 p.m.
 2. The Director of Buildings and Grounds and the Custodian shall be instructed in the operation and maintenance of the temperature control system, pumps and all other systems and equipment installed under this Contract during any 2 school days (not necessarily consecutive) between the hours of 8:00 a.m. and 3:00 p.m.
 3. The exact dates and hours for the instruction periods indicated in 1. and 2. above, will be mutually agreeable to the MMMHS Representative, Contractor, and the Director of Buildings and Grounds and the Custodian.
 4. The number of days for the instruction periods

indicated in 1. and 2. above is a minimum; if the MMMHS determines that more instruction time is needed for the Director of Buildings and Grounds and the Custodian to be adequately trained in the operation and maintenance of the mechanical equipment, Contractor shall provide the additional training at no extra cost to the MMMHS.

1.02 OPERATION AND MAINTENANCE MANUAL

- A. Prior to the final checkout, adjustment and startup of the system, Contractor shall furnish the Director of Buildings and Grounds with a draft of the Operation and Maintenance manual for review and comment.

Contractor shall furnish the MMMHS Representative with 5 copies of the final Operating and Maintenance Manual which shall be typewritten (double spaced) on heavy bond paper securely bound in a loose-leaf type book. The manual shall contain at a minimum, but not necessarily be limited to, the following items for each item of machinery and heating, ventilating and air conditioning system (or any other system) installed under this Contract:

1. Complete starting and stopping instructions.
2. Troubleshooting instructions.
3. Routine, periodic and special maintenance instructions.
4. Manufacturers manuals for various components of the system.
5. Actual locations of all starters, contactors, valve charts, and other pertinent items.
6. Complete parts list and telephone number and address of the manufacturer and local distributor.

Contractor shall deliver all copies of the manual to the MMMHS Representative prior to the training period specified above and shall obtain a signed receipt. The MMMHS Representative shall deliver 3 copies to the Director of Buildings and Grounds prior to the training period.

Monsignor McClancy Memorial High School

SECTION 01740
GUARANTEES, WARRANTIES, BONDS
AND MAINTENANCE CONTRACTS

1.01 CONTRACTOR'S GUARANTEE

A. The Contractor shall furnish a written guarantee in the following form:

"GUARANTEE"

PROJECT _____

The Contractor hereby guarantees that the Work specified for the aforesaid Contract will be free from defects of material and workmanship for a period as specified in the General Conditions.

The Contractor also guarantees that it will repair or replace, whichever may be deemed necessary by the Monsignor McClancy Memorial High School, all defective material or workmanship of the Work, that may appear within the guarantee period, to the satisfaction of the Monsignor McClancy Memorial High School and without any cost or expense to the Monsignor McClancy Memorial High School.

Contractor

By _____

Date _____

Sworn to me before this

_____ day of _____, 20__

Notary Public

D. Scheduling of corrective Work will be determined by the MMMHS. Work required to correct defective material or workmanship during the guarantee periods shall be done by the Contractor without cost to the MMMHS.

E. Should the Contractor fail to remedy defects immediately,

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

the MMMHS may furnish such materials and labor as are necessary to bring the Work to the standard called for and the Contractor shall reimburse the MMMHS in full immediately.

1.02 WARRANTIES AND GUARANTEES (OTHER THAN CONTRACTOR'S)

- A. Warranties and guarantees as specified in the respective Sections for products and systems shall be in addition to the Contractor's guarantee, and shall be for such periods and with such conditions as stipulated.

1.03 BONDS

- A. The Contractor shall provide bonds as stipulated in Insurance/Bonding Section of the General Conditions and respective Sections for products and systems.

1.04 COMMENCEMENT DATE OF WARRANTIES AND GUARANTEES

- A. All warrantee and guarantee periods shall commence on the date of Substantial Completion of the entire project, not the occupancy dates or completion date of individual areas or items of Work of the project.

END OF SECTION

SECTION 01900
EXISTING STRUCTURES WORK

1.01 ORDER OF WORK

- A. To maintain school activities with a minimum of interference and to complete all the work of all Trades within the required Contract Time, the Work of this Contract shall be performed in "Stages" as set forth at the end of this Section.

1.02 EXAMINATION OF PREMISES

- A. Verification of Existing Conditions After Award
1. Various existing conditions at locations of the Work which cannot be determined until removals are under way cannot be indicated on the Drawings or described in the Specifications.
 2. Perform all such removals as required to verify all existing conditions before fabricating the work.
 3. Before removing any enclosure that will expose the interior of the building to the elements or before disturbing any structural work, make all possible preliminary investigations to verify the existing conditions thereat.
 4. Where removals or preliminary investigations reveal existing conditions that differ materially from what is indicated or specified, or that may require changes, immediately notify the MMMHS Representative in writing and await instructions before proceeding further with that part of the Work.

B. Discrepancies in Existing Conditions

During the process of the Work, should conditions be encountered that materially differ from those shown on the Drawings or indicated in the Specifications, or conditions which could not reasonably have been anticipated, which conditions will materially affect the cost of the Work, such conditions shall immediately be called to the attention of the MMMHS Representative, before they are further disturbed. The MMMHS Representative will promptly investigate the conditions and if it is found that they do so materially differ,

shall issue a change order.

1.03 ASBESTOS

- A. If, during the course of construction, the Contractor believes materials which might contain asbestos may be disturbed during performance of the Work, the Contractor shall immediately notify the MMMHS Representative of the area(s) of concern.
- B. If the presence of friable asbestos is suspected, the Contractor shall be directed to suspend work in the area in question and be redirected by the MMMHS Representative to other areas or work, if available. The MMMHS will obtain a sample of the suspected substance and expedite its analysis in order to confirm whether asbestos is present. Should no friable asbestos be found, the Contractor shall be directed to resume work immediately.
- C. Scheduled removal of asbestos containing items ie. existing VAT at chases, portions of existing window sealant, and all existing main roof membrane systems will be performed by an asbestos removal contractor under a separate contract.

1.04 PRECAUTIONS AGAINST LEAD PAINT EXPOSURE

- A. When removing existing paint from surfaces, treat all paint with the assumption that it contains lead.
 - 1. Where removal of existing paint is on-going, provide dust partitions (Refer to Art.1.18, herein) and other means of containing dust, dirt, paint particles, and debris to the immediate work area. Workers shall not track dust and paint particles through occupied areas. Where possible, provide separate work area access and exit for workers.
 - 2. Clean-up: Provide daily clean-up in accordance with Art. 1.20, herein, as a minimum clean-up requirement. Provide more frequent clean-up as conditions require.
 - 3. Disposal: Bag, remove from premises, and dispose of all existing paint materials, dust, dirt, and debris removed from existing painted surfaces, in compliance with New York City, New York State, and Federal regulations pertaining to lead-containing paint.

1.05 NON-INTERFERENCE WITH SCHOOL FUNCTIONS

- A. Perform the Work in such a manner that normal school functions may be carried on throughout the period of work with a minimum of interference. Before commencing work in any portion of the premises normally used for school functions, meet with the MMMHS Representative, the Director of Buildings and Grounds, and the School Principal and perfect a working agreement. Noise shall be kept to a minimum.

1.06 PROTECTION

A. General Safety Restrictions

1. The operation of the fire alarm telegraph, the interior fire alarm system, gongs, bells and telephones shall not be interfered with.
2. Nothing shall be done to in any way block the streets at or about exits, or the exits themselves.
3. There shall be no unauthorized interference with the free and unobstructed use of hallways, stairways, toilets and rooms.
4. No part of the building or premises shall be closed to the use of the occupants without the permission of the MMMHS Representative, the Director of Buildings and Grounds, and the School Principal. When such permission has been given, erect temporary partitions and barriers wherever required to ensure the absolute safety of the occupants of the building and premises.

B. Precautions Against Fire

1. Take every precaution in the performance of the Work to prevent fires.
2. Smoking shall not be permitted within the premises at any time.
3. N.Y.C. Fire Department regulations shall govern the storage and use of flammable materials. Flammable materials and fire-producing equipment shall not be left unattended about the premises in locations accessible to pupils.
4. Rubbish shall be removed as hereinafter specified.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

5. Fire extinguishers and other protective equipment shall be provided as required by regulations.
6. During all interruptions of Work, flammable mixtures shall be stored in designated locations.

C. Fire Watch

When open flame or spark-producing tools and equipment such as heating kettles on roofs, blow torches and welding rods are being used, the Contractor shall provide fire guards to maintain a fire watch over the operation of these items at all times during the use. Provide additional fire guards required by Fire Department as determined by the Local Fire Department inspector after Work is under way.

D. Temporary Maintenance of Hazardous Conditions

1. Upon receipt of the Notice to Proceed, carefully inspect all existing work which is required to be repaired, altered or removed. Any such work which is found to be weakened, structurally unsafe or otherwise hazardous, shall be immediately put in a safe condition and so maintained until such time as the permanent work in connection therewith is completed.
2. Any restrictions regarding sequence of operations and locations of work do not apply to the elimination of hazardous conditions; all parts of the premises will be available at all times for the performance of such work.

E. Protection of Property

1. The Contractor shall be responsible for all damage to all new and existing work on the premises due to the Contractor's operations, and shall provide and maintain adequate protection against such damage.
2. The Contractor shall protect, move, store, and reinstall school furniture and materials of any nature from damage from his Work including but not limited to chairs, desks, book shelves, cabinets, tables, books, maps, charts, art work, statuary, etc.
3. The premises shall not be used as a work shop to the detriment of any portion thereof.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

4. Desks, tables, benches and other furniture and equipment shall not be used as workbenches; neither shall materials and furniture be piled thereon without proper protection.
5. Provide decking on floors, steps, platforms, pavements and roofs where subject to damage from heavy traffic.
6. Protect doors and door jambs when conveying rubbish and materials.
7. Provide and maintain barricades to confine dust to work areas.
8. Provide watertight enclosures over openings at roof and walls; remove temporary waterproofing protection for installation of new permanent work.
9. All damage to adjoining work due to failure to provide adequate protection shall be corrected by the Contractor at the Contractor's expense.
10. After completion of the Work, the Contractor shall thereafter protect Work until it is accepted.

F. Protection of Public

1. The Contractor shall be responsible for all injury to persons due to the Contractor's operations and shall provide and maintain adequate protection against such injury.
2. Provide guards, rails, barricades, fences, sidewalk sheds, catch-platforms, decking, night lighting, and all other items as required by New York City Building Laws and as further required to provide adequate protection.
3. Protect sidewalks and curbs around the premises so that they may be safely used by the public at all times.
4. Provide barricades around work areas as required to prevent pupils and other unauthorized persons from entering therein.

G. Stability and Integrity of Existing Structures

1. Shoring of members and protection of the existing structure during construction is the responsibility

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

of the Contractor and shall comply with the requirements of the NYC Building Code.

2. The most stringent requirements of the Building Code, Contract Drawings, Specifications, or any authorities having jurisdiction shall govern this Work.
3. Coordinate Work of this Section with Work of all other Divisions so as to properly, and completely, install all Work as indicated on Drawings or specified.
4. The Contractor shall engage a Professional Engineer licensed in the State of New York to prepare details of bracing and other construction required to maintain the "Stability and Integrity of Existing Structures During Construction Operations" (R&R 6/11/83). Contractor's Engineer shall file Form TR-1 with the Building Department and is responsible for maintaining the stability of the existing building during removals and placement of new Work and is responsible for preparation of all design and shop drawings and their approval by the Building Department. Contractor's Engineer is responsible for the Controlled Inspection described in the Rules and Regulations of the Building Department dated 6/11/83 given in the Building Code.

1.07 FRATERNIZATION

- A. Contractor shall prohibit all contact between Contractor's employees (including Subcontractor's employee's and visitors to the site) and the students and school staff.

1.08 WORK SCHEDULE

A. General:

1. All Work must be performed according to a Work schedule that will not disrupt school activities.
2. All Work performed on the job site during periods other than normal working hours shall be with the express permission of the MMMHS Representative, the Director of Buildings and Grounds, and the School Principal. Normal working hours are described in Section 01010, Summary Of The Work. Permission

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

shall be requested of the MMMHS Representative, at least 72 hours in advance of the planned overtime periods.

3. All decisions affecting the normal operation of the school will be coordinated with the MMMHS Representative, the Director of Buildings and Grounds, and the School Principal.

- B. Voluntary Overtime Work (weekdays till 10:00 PM; weekends 11:00 AM to 5:00 PM):

When permission to perform overtime or alternate shift Work is requested by the Contractor for the Contractor's own purposes, in order to meet schedules, perform work conflicting with school hours or for the Contractor's own convenience, the Overtime Work shall be considered to have been included in the Contract Price and no increase in the Contract Price, or Extra, will be granted for the Overtime Work. Additionally, the Contractor shall pay for the Custodian wages after 4:00PM on weekdays and any time work is performed on weekends and holidays.

- C. Mandatory Work After School Hours (weekdays till 10:00 PM; weekends 11:00 AM to 5:00 PM):

The following Construction Work also shall be done under the provisions and terms for Voluntary Overtime Work including no increase in the Contract Price, or Extra and payment of Custodial wages:

1. If at any time, in the judgement of the MMMHS Representative, any item of Work is behind the accepted construction progress schedule, or is causing a delay that will affect the contract completion date, then the MMMHS Representative may order the Contractor to increase The Contractor's Work force or to work the Contractor's forces and the forces of any Subcontractor overtime, at the Contractor's expense, until such time as all items of work have progressed to be in accordance with the accepted construction progress schedule.

- D. Contractor's Procedure Prior to Commencing any Overtime Work:

1. Make immediate application to the Industrial Commission of the Department of Labor, State of New York, for dispensation in accordance with Subdivision 2, of Section 220 of the Labor Law.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Make immediate application to secure permits from the Department of Buildings.
- E. Contractor's Procedure During Overtime periods:
1. Proceed expeditiously with Work.
 2. Do not begin any Work in any space unless all of the required materials and labor to complete that Work are at the job when Overtime work is scheduled to begin.
 3. Complete all Work in each phase by all trades that have Work to be accomplished in each phase and inside each defined area.
 4. All other limitations and restrictions governing Contract Work during school sessions shall apply to Overtime Work.
- F. Opening Permits
1. For work that must be performed after-school-hours, the Contractor shall obtain from the Department of Buildings an "After-Hour Work Permit".

1.09 CONTRACTOR'S SUPERINTENDENT

- A. The Contractor shall man the Site with a full time Superintendent any time the Contractor's forces or the Subcontractors are performing work. The Superintendent shall have the full authority of the Contractor to make decisions affecting the Work. The Superintendent shall have at least eight years of experience working as a Superintendent on comparable size and type of projects. The use of an individual as a Superintendent for this project is subject to the approval of the MMMHS Representative.
- B. Submit Superintendent's resume to the MMMHS Representative and make individual available for an interview with the MMMHS Representative.

1.10 DIRECTIONS AND APPROVALS GIVEN TO THE CONTRACTOR

- A. The Contractor, Contractor's Superintendent, Contractor's employees and the Contractor's Subcontractors shall request approvals and accept orders and directions from the MMMHS Representative only. No other MMMHS employees or staff are authorized to direct the Contractor without

authorization of the MMMHS Representative.

1.11 REMOVAL OF RUBBISH

- A. Remove all rubbish (e.g., dirt, refuse, empty containers and packages, removed materials that become property of Contractor) from the premises as the work progresses. No rubbish of any kind shall be stored in any rooms, halls, passageways or yards and no accumulation of rubbish shall be allowed to remain in or about the premises at any time during the course of the work for more than 24 hours, with the exception of the Contractor's Staging Area which shall have rubbish removed from the area on a weekly basis. Should the Contractor fail to keep the building, premises and surrounding sidewalks and streets clean and free from rubbish resulting from the Work, then the MMMHS may have such rubbish removed by others in accordance with the terms of the Contract.

1.12 PATCHING VOIDS

- A. Where finished floor, walls or ceilings have voids as a result of Work specified, the Contractor shall patch the voids with the same materials of the adjacent existing surface and match its level and finish.

1.13 WATER

- A. Water required for construction may be taken only from existing hose bibs or Janitor's Sink Closets.

1.14 ELECTRIC CURRENT

- A. Except where required to maintain proper school functions, the existing electrical outlets on the premises will be available to the Contractor for the operation of low amperage power-driven tools.

1.15 STORAGE SPACE

- A. The Contractor shall assume that no interior space within the existing school building is available for the storage of materials which is liable to be damage by weather. Limited interior space may be assigned for storage at the discession of the MMMHS Representative.

1.16 MECHANICAL WORK

- A. The removing of heating and ventilating and electric work, including pipes, metal ducts, lighting fixtures,

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

wires, and other incidental removals, and the repairing, altering, extending and replacing of such work will be done by the Contractor, as required for the completion of the Work.

- B. All work damaged, disturbed or otherwise affected by the alterations shall be repaired.

1.17 MOVING OF FURNITURE, ARTICLES, AND FIXTURES

- A. When the moving of furniture, blinds, curtains, clocks, pictures, maps, plaster casts and other articles or fixtures is made necessary in the carrying on of the alterations, repair work, painting, cutting of openings through or removing of existing walls and partitions, or for any other such reason, the removing, resetting and relocating together with the necessary repairing, shall be carefully done as a part of this Contract.
- B. The Contractor shall move all furniture and other articles and existing items necessary to accomplish the Work of this Contract.
- C. Existing window curtains, accessories and other items shall be removed, stored and reinstalled and left in good condition.
- D. Existing window blinds, accessories and other items shall be carefully removed and turned over to the Director of Buildings and Grounds.
- E. All removed work shall be protected.

1.18 TEMPORARY DUST PARTITIONS AND BARRIERS

- A. Provide temporary dust-tight partitions and doors complying with all requirements of the City of New York City Building Code and all authorities having jurisdiction.
 - 1. Partitions shall extend tightly between walls and partitions, and tightly from floor to ceiling, at locations directed by the MMMHS Representative.
 - 2. Partitions shall be of 2"x4" stud framing, 16" on center with 2"x 4" sill and cap members. Framing shall be entirely covered both sides with 5/8", gypsum wall boards. Provide 3" sound attenuation mineral fire blankets between studs. Both sides of

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

the partition shall be finished with 1/4" x 2" tempered hardboard batten strips over all joints, horizontal and vertical.

3. Provide continuous neoprene gasketing at juncture of Partition with walls, floor and ceilings or underside of structure.
4. Provide at least one, hollow metal door and frame assembly in each partition, where required for access. Door shall be 36" wide by 84" high and each door shall be equipped with hardware as directed by the MMMHS Representative.

B. Dust Barriers

1. Construct of PVC piping framework, telescoping, with holes and pegs to allow adjustment of heights. Cover framework completely with polyethylene film, 6-mils minimum thickness, with flap for access. Install at doorways to form vestibule between work area and other areas, at locations directed by the MMMHS Representative. Tape junctures to obtain dust-tight barrier. Construct in manner to provide easy assembly and disassembly.

1.19 CUTTING, PATCHING AND REMOVALS

- A. Remove portions of existing slabs, ceilings, walls and partitions; cut new openings in slabs, walls and partitions for new chases, equipment, lintels, and other items; do all cutting and removal of existing work required by the Drawings and the Specifications, or as may be required for the proper installation of the new Work. Block up and patch slabs, walls, partitions, ceilings, and other areas and surfaces, with materials indicated on the Drawings or specified herein. If type of material for patching is not indicated, match existing adjacent materials and finishes.
- B. Provide all supports, shorings, bracing, and other means, required for existing beams, lintels, walls, and other components, at locations where alterations occur.
- C. Remove portions of existing walls, slabs, fireproofing and ceilings where required to provide for installation of new steel.
- D. Existing unfinished, unexposed walls and ceilings that become exposed walls and ceilings of finished rooms and

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

other locations due to the Work of this Contract, shall be finished to match the adjoining wall and ceiling finish, unless otherwise specified.

- E. All holes in existing slabs and floors due to removal of piping, ductwork, enclosures, duct enclosures, and other items, shall be slabbed over and filled properly before any floor finish or partition enclosure is installed.
- F. Avoid damaging existing electric conduits in floor fill and slabs when cutting holes through slabs; verify conditions at the building.
- G. Where alterations occur in rooms and no new finish floor is indicated or specified, the existing floor shall be carefully protected and after alteration Work is completed, do all patching, repairing and replacing that may be required to provide a complete finished floor.
- H. Remove hung and furred ceilings or portions of ceilings as indicated on the Drawings, or herein specified, or required for proper installation of new Work.
- I. Where windows are to be removed, also remove all trim, frames, bucks, blocking, and other miscellaneous components, unless otherwise indicated on Drawings.
- J. Remove exposed bolts, supports, brackets, cleats, grounds, and other items, that are no longer required for the purpose for which they were originally installed.
- K. All existing work damaged or lost as a result of performing the required new Work, shall be patched, repaired or replaced with new, and finished to match the new Work to the satisfaction of the MMMHS Representative.
- L. Where existing work required to be removed and reinstalled is found to be defective in any way, it shall be reported to the MMMHS Representative before it is disturbed.
- M. Refer also to Section 01045.

1.20 CLEAN-UP

A. Wet-Mopping

The Contractor shall provide daily wet mopping of floors subject to construction dust in all areas affected by the Work.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

B. Upon completion of the Work, the Contractor shall provide thorough clean-up, performed by a professional cleaning service, of all areas affected by the Work as follows:

1. In general, clean-up requirements are limited to the removal of all rubbish, spatters, stains, smears, fingermarks, foot tracks, from finish surfaces and the broom cleaning of floors, and other areas on the premises that are affected by the Work.
2. Where work that causes the dissemination of dust has been performed, clean-up operations shall include, in addition to the operations hereinbefore specified, the washing of windows, the mopping of floors and the dusting and washing of walls, sills, furniture, and other surfaces, all as required to restore the affected areas to the same state of cleanliness existing before work began.
3. In performing dust-creating work, provide dust enclosures and foot mats to minimize the spread of dust and foot marks. Refer to Art. 1.18 of this Section.
4. These clean-up requirements are in addition to the required daily removal of rubbish.

C. Wet Wiping

The Contractor shall provide wet wiping, by a professional cleaning service, of all surfaces (including furniture) in all areas affected by the Work, immediately prior to the releasing of the areas of school use.

D. Waxing

The Contractor shall provide waxing, by a professional cleaning service, of all floors in all areas affected by the Work, immediately prior to the releasing of the areas of school use.

1.21 ORDER OF WORK (See 1.01 THIS SECTION)

A. General

1. The Contractor shall take full advantage of school vacation periods during summer recess, winter recess and spring recess to minimize disruption of normal school operations.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Information currently available from the MMMHS, but subject to change, is that summer recess for 1996 is scheduled to begin on 6-21-96 and end on 9-3-96; summer recess for 1997 is scheduled to begin on 6-20-97 and end on 9-2-97. Exact dates for the winter recess and spring recess closings are not available at present.
3. Except as modified below, four existing classrooms/rooms, at any one time, will be made available to the Contractor. Locations of classrooms/rooms to be made available to the Contractor shall be subject to the approval of the MMMHS Representative, Director of Buildings and Grounds and the School Principal. Work may be permitted in more than four classrooms/rooms at any one time by authorization of the MMMHS Representative, Director of Buildings and Grounds and the School Principal. Furniture shall be moved between rooms to receive work and completed rooms in the school building by the school custodian.
4. Generally, work in offices, Storage Rooms, Student's Toilets, Guidance Rooms, Teacher's Lunch Room, Nurses Room and other similar type spaces, shall be performed in only one space at any one time and shall be coordinated with the MMMHS Representative, Director of Buildings and Grounds and the School Principal prior to the start of such work. Work may be permitted in more than one space at a time only by authorization of the MMMHS Representative, Director of Buildings and Grounds and the School Principal.
5. All work in corridors and fire stairs shall be performed after 3:00 PM. Corridors and fire stairs shall be kept free and clear from all debris, construction materials, tools or equipment. All paths of egress shall remain unobstructed during occupancy of the building by students and/or staff. Work in corridors and fire stairs is subject to the authorization of the MMMHS Representative, Director of Buildings and Grounds and the School Principal.
6. The Contractor shall provide the temporary construction fencing and Contractor's trailer prior to performing any other work at the Site.
7. The Contractor shall perform the main roof reroofing work during the summer recess of 2003 and complete the Work prior to the commencement of the

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

new school year.

8. The Contractor shall perform the Sample Room work during the summer recess of 2003 and complete the Work prior to the commencement of the new school year.
9. The Contractor shall complete the installation of the temporary classroom trailers prior to the commencement of the new school year in 2003.

Completion of temporary classroom trailers shall include all associated sitework and the relocation of existing classroom furniture from within the school building to the trailer classrooms by the Contractor as directed by the MMMHS Representative. This relocated furniture shall be left in the trailer classrooms until substantial completion of the project at which time the Contractor shall move the trailer classroom furniture back into the school building as directed by the MMMHS Representative.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 02070
SELECTIVE REMOVALS & DEMOLITION

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

A. Extent of Work

Removal and demolition of selected items from selected areas of the project as indicated on the Drawings; items to be removed include, but are not limited to, the following:

1. Temporary chain link construction fence, gates and foundations.
2. Excavation requiring shoring and Trenching, including removal of concrete and asphalt pavement.
3. Removal and relocation of classroom trailers.
4. Portions of concrete slabs.
5. Roofing and Roof curbs.
6. Portions of interior and exterior brick, block, and ceramic tile.
7. Hung ceiling system components and finishes.
8. Finished carpentry.
9. Wood blocking, furring, etc.
10. Portions of foam roofing system and asbestos containing flashing (Asbestos Removal under separate contract).
11. Metal doors and frames.
12. Aluminum windows (removal of windows containing asbestos containing sealant shall be closely coordinated and scheduled with the asbestos removal contractor under separate contract who shall perform all asbestos removals for this project).
13. Portions of metal partitions.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

14. Portions of wire lath, fasteners and accessories.
15. Portions of plaster.
16. Portions of wood sub-flooring and finished flooring (removal of VAT shall be closely coordinated and scheduled with the asbestos removal contractor under separate contract who shall perform all asbestos removals for this project).
17. Metal window guards.
18. Window shades and hardware.
19. Rooftop equipment and accessory items shown on the Contract Drawings.
20. Heating/Ventilating items.
21. Electrical items.

1.02 RELATED SECTIONS

- A. Temporary Dust Partitions and Barriers..... Section 01900

1.03 SUBMITTALS

- A. Submit a schedule indicating proposed methods and sequence of operations for selective removals and demolition Work (including scheduling of asbestos containing materials to be removed by the asbestos removal contractor under separate contract for this project) prior to commencement of operations. Include details for dust and noise control operation. Provide a detailed sequence of removals and demolition work to ensure uninterrupted progress of school sessions.

1.04 RESPONSIBILITY, PROTECTION, DAMAGES, RESTRICTIONS

- A. Condition of Space

DDC assumes no responsibility for actual condition of the space in which removals and demolition Work is performed.

- B. Protections

Provide temporary barricades and other forms of protection required to protect DDC property, personnel, students and general public from injury due to selective removals and demolition work.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Provide protective measures as required (including sidewalk sheds as required by the Drawings and required by the Building Code) to provide free and safe passage of students, DDC personnel, and the general public.
2. Protect from damage existing finish work that is to remain in place and which becomes exposed during operations.
3. Protect floors with building paper or other suitable covering.

C. Damages

Promptly repair any and all damages to all property and finishes caused by the removals and demolition work; to the DDC Representative's satisfaction and at no extra cost to DDC.

D. Explosives

The use of explosives is prohibited.

E. Power-driven Tools (for interior removals and demolition).

Only hand-held electric power-driven tools conforming to the following criteria shall be used to cut or drill concrete and masonry:

1. Electric Chiseling Hammer
 - a. Power Data 115 Volts AC
7-8 Amps
Three-wire grounded connection
 - b. Percussion 2400-2600 Impacts/Minute
 - c. Type/Size Hand-held (+ 18-inch length)
 - d. Unit Weight 12-15 pounds (minus chisel bit)
2. Electric Hammer Drill
 - a. Power Data 115 Volts AC
5-8 Amps
Three-wire grounded connection
 - b. Percussion 2400-3200 Impacts/Minute

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- c. Type/Size Hand-held (+ 18-inch length)
- d. Unit Weight 12-15 pounds (minus chisel bit)
- e. Speed Data 0-0500 RPM (Under load)

All other electric power-driven tools proposed for use in cutting shall be submitted for approval.

PART 2 - PRODUCTS - NOT APPLICABLE

PART 3 - EXECUTION

3.01 INSPECTION

- A. Prior to commencement of the selective removals and demolition Work, inspect the areas in which the Work will be performed. Determine and list the existing conditions of rooms or area surfaces and equipment. After the Work in each respective area is completed, determine if adjacent surfaces or equipment have been damaged as a result of the Work; if so, the damage shall be corrected at the Contractor's expense.

3.02 REMOVALS AND DEMOLITION WORK

- A. Perform selective removal and demolition Work in a systematic manner and use such methods as required to complete the Work indicated on the Drawings in accordance with the requirements of the Project Specifications and governing City, State, and Federal regulations.
- B. When walls, partitions, floors, and ceilings (or portions thereof) are indicated to be removed; unless indicated otherwise:
 - 1. Remove all items attached to the surfaces of the construction to be removed.
 - 2. Remove all connectors, piping, ductwork and other HVAC items and accessories occurring on or in the construction to be removed; cap and/or re-route piping and ductwork as indicated on Drawings, as specified in HVAC - Div. 15, or required by the Work.
 - 3. Remove all electrical wiring, to include, but not limited to, lighting, communications, alarms and all related appurtenances, conduits, devices, fixtures, and other electrical items and

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

accessories occurring on or in the construction to be removed; disconnect power and remove wiring and conduit back to source. New electrical work shall be as indicated on Drawings and as specified in Electrical - Div. 16.

3.03 DISPOSAL OF DEMOLISHED MATERIALS

- A. Remove debris, rubbish and other materials resulting from the removals and demolitions from the building immediately; transport and legally dispose of materials off-site. Disposal method shall be in accordance with City, State, and Federal regulations.
- B. Burning of removed materials is not permitted on the job site.

3.04 CLEAN-UP AND REPAIR

- A. Upon completion of removals and demolition Work, remove tools, equipment and all remaining demolished materials from the site.
- B. Repair all damaged areas caused by the removals and demolition Work. Repair adjacent construction or surfaces soiled or damaged by selective demolition work.
- C. All areas in which Work was performed under this Section shall be left "mop-clean."

3.05 OWNERSHIP OF MATERIALS

- A. All equipment, materials, and items removed shall remain the property of DDC, if desired; equipment, material and items not desired to be re-used or retained by DDC shall be removed from the site by the Contractor. The DDC Representative will designate which equipment, materials and items will be retained.

END OF SECTION

SECTION 02072
REMOVAL, STORAGE AND REINSTALLATION

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

A. This Section specifies requirements for Removal, Storage and Reinstallation of certain items as shown on the Contract Drawings; items to be removed, stored and reinstalled or turned over to the MMMHS including, but are not limited to, the following:

1. Exterior window guards (scrape and paint prior to reinstallation).
2. Window curtains, curtain rods and hardware (reinstall as directed by the Director of Buildings & Grounds).
3. Window blinds, valances and hardware (turned over to Director of Buildings & Grounds).
4. Statuary and foundations at temporary classroom trailers.
5. Blue stone pavers and base at temporary classroom trailers.
6. Window air conditioning units to be removed and turned over to Director of Buildings & Grounds.

1.02 RELATED SECTIONS

A. Dust Partitions Section 01900

1.03 QUALITY ASSURANCE

A. Perform inspection of all existing items to be removed and reinstalled under the Contract and report in writing to MMMHS Representative listing the damaged items found, if any.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1.04 STORAGE AND HANDLING

- A. Store items, immediately upon removal. Protect until reinstalled.
- B. Arrange Storage in a manner to provide access for maintenance of items and for inspection.
- C. Enclosed Storage
 - 1. Store items, subject to damage by the elements, in substantial weather tight enclosures.
 - 2. Provide temperature control and ventilation for sensitive items as required.
 - 3. Store unpacked and loose items on shelves, in bins, or in neat groups of like items.
 - 4. For items subject to discoloration deterioration from exposure to the elements, cover with impervious sheet material. Provide ventilation to avoid condensation.
- D. General: All materials which become damaged or otherwise unfit for use during, removal, handling, storage, or reinstallation shall be replaced at the expense of the Contractor.

PART 2 - PRODUCTS - NOT APPLICABLE

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Periodically inspect stored items on a scheduled basis.
- B. Do not expose any items to the elements.

3.02 INSTALLATION

- A. Reinstall, in good working condition, all items that were removed and scheduled for reuse.
- B. Set items plumb, level and true to line. Before issuance of the Certificate of Final Completion, remove all temporary protection and leave items clean and in working order.

END OF SECTION

SECTION 02100
SITE PREPARATION

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Remove vegetation, and existing improvements only where indicated on the Drawings. Strip grass, topsoil, and grub all roots. Protect existing trees and other vegetation to remain. Perform Work in conjunction with Section 02200.

Items to be removed include, but are not limited to, the following:

- 1. Asphalt paving, base material and soil at chain link fence posts.
- 2. Grass stripping and top soil removal at the temporary asphalt pavement and temporary classroom trailers.
- 3. Sidewalk and Street Paving (see Section 02513).

1.02 RELATED SECTIONS AND WORK

- A. Tree Protection.....Section 01500
- B. Selective Demolitions and Removals.....Section 02070
- C. Removal, Storage and Reinstallation.....Section 02072
- D. Earthwork.....Section 02200
- E. Sidewalk and Street Paving.....Section 02513

1.03 DEFINITIONS

- A. Improvements

Man-produced items such as concrete, brick, asphalt, piping, etc. Those items not naturally occurring.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1.04 QUALITY ASSURANCE

A. Qualifications

Company specializing in the Work of this Section shall have a minimum of 3 years experience.

B. Regulatory Requirements

Work of this Section shall conform to all requirements of the NYC Building Code and all applicable regulations of governmental authorities having jurisdiction, including safety, health, and anti-pollution regulations. Where more severe requirements than those contained in the Building Code are given in this Section, the requirements of this Section shall govern.

1.05 EXISTING CONDITIONS

A. Obtain all Building Department data available on the lots.

B. Prior to clearing and removal or abandonment of improvements, ascertain the exact locations of all existing underground utilities. Protect these during subsequent operations.

1.06 SEQUENCING AND SCHEDULING

A. Perform work in such a manner to ensure a minimum interference with roads, walks, adjacent properties, and facilities to remain open. Do not close or obstruct these items without obtaining permits from the agencies having jurisdiction or the permission of the adjacent owners.

PART 2 - PRODUCTS - NOT APPLICABLE

PART 3 - EXECUTION

3.01 VERIFICATION OF CONDITIONS

A. Verify that existing site conditions match those of the pre-bid inspection. Notify the MMMHS Representative in writing prior to commencement of Work of any discrepancies.

3.02 PROTECTION

- A. Provide adequate protection measures to protect workmen and pedestrians at the site.
- B. Provide for surface drainage during construction to avoid creating a nuisance to MMMHS students and personnel.
- C. Existing Improvements
 - 1. Prevent damage to existing improvements to remain. If they are damaged during construction, restore improvements to their original condition at no cost to the MMMHS.
- D. Existing Trees and Vegetation
 - 1. Hire a qualified horticulturist or arborist to supervise the protection of and the repair or replacement of damaged trees or other vegetation.
 - 2. Protect existing trees and other vegetation to remain from damage due to construction to the satisfaction of the MMMHS Representative.
 - a. The Contractor shall be responsible for the protection of tops, trunks, and root systems of existing trees on the project site that are to remain. Existing trees subject to construction damage shall be boxed, fenced, or otherwise protected before any work is started; remove boxing when directed. Do not permit heavy equipment or stockpiles within branch spread. Under the direction of the horticulturist, remove interfering branches without injury to trunks and cover scars with tree paint.
 - 3. Repair or replace damaged trees or vegetation to the satisfaction of the MMMHS Representative.

3.03 CLEARING OF SITE

A. General

Remove vegetation, roots, improvements, rubbish, site debris, and all other materials and encumbrances of every name and nature visible to sight or found in excavating unless designated to remain.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

B. Top Soil

1. Strip top soil to full depths encountered (minimum 6"). Prevent top soil from mixing with subsoil.
2. Leave existing top soil in place within driplines of existing trees to remain.
3. Additional excavation required is described in Section 02200.

C. Removal and Abandonment of Improvements

1. Remove all existing above and below grade improvements that interfere with the new construction, unless they are designated to remain or be abandoned.
2. Remove portions of improvements to remain to facilitate new construction.
3. Remove asphalt paving, base material and soil at chain link fence posts.

D. Disposal

1. Remove and legally dispose of away from the premises all excavated material of every kind.
2. Burning of material on the site is not permitted.

END OF SECTION

SECTION 02200
EARTHWORK

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Excavate for new construction, fill and backfill as required, prepare subgrades and place aggregate bases for foundations, sidewalks, and pavements. Protect all adjoining properties and existing structures from damage. Perform Work in conjunction with Section 02100.

1.02 RELATED SECTIONS AND WORK

- A. Site Preparation.....Section 02100
- B. Asphaltic Concrete Paving.....Section 02511
- C. Sidewalk and Street Paving.....Section 02513
- D. Landscaping.....Section 02900

1.03 REFERENCES

- A. American Society of Testing and Materials (ASTM) standards, latest editions.
 - D422 Standard Test Methods for Particle-Size Analysis of Soils.
 - D698 Standard Test Methods for Moisture-Density Relations using 5.5.lb. (2.5-kg) Rammer and 12-in. (304.8-mm) Drop.
 - D1556 Standard Test Method for Density of Soil in Place by the Sand-Cone Method.
 - D2167 Standard Test Method for Density and Unit Weight of Soil In-Place by the Rubber Balloon Method.
 - D2922 Standard Test Methods for Density of Soil and Soil-Aggregate in Place by Nuclear Methods (Shallow Depth).

1.04 DEFINITIONS

- A. Excavation

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Excavation is considered unclassified and consists of removal of material encountered to contract level and subsequent legal disposal of such.

B. Improvements

Man-produced items such as concrete, brick, asphalt, piping, conduit, etc. Those items not naturally occurring.

1.05 SUBMITTALS

A. Product Data

Provide manufacturer's information on the compaction equipment to be used on each type of material for review.

B. Shop Drawings

Submit shop drawings and/or Engineer's reports required under Article 3.02, "Preparation and Protection".

C. Samples

Provide 15 pound bag of each material used for fill, backfill, aggregate base, to the Contractor's testing laboratory for analysis who shall forward results to the MMMHS Representative.

D. Quality Control Submittals

1. Design Data.

Provide the following information:

- a. Gradation analysis for aggregate bases.

2. Condition Survey Submittals

- a. Provide three (3) copies of all photographs required to be taken under Article 3.02 to the MMMHS Representative.

3. Certificates

- a. Provide certificate guaranteeing aggregate materials used for construction conforms to the gradation supplied.

1.06 QUALITY ASSURANCE

A. Qualifications

1. Company specializing in performing the Work of this Section shall have a minimum of 3 years experience and shall have worked on 3 projects of similar size.
2. Preparation of details of shoring and bracing shall be under the direct supervision of and bear the seal of a Licensed Professional Engineer of the State of New York experienced in the design of such work, who shall be engaged by the Contractor and who shall also be responsible for construction supervision of such.

B. Regulatory Requirements

1. Work of this Section shall conform to all requirements of the NYC Building Code and all applicable regulations of governmental authorities having jurisdiction, including safety, health, and anti-pollution regulations. Where more severe requirements than those contained in the Building Code are given in this Section, the requirements of this Section shall govern.
2. Work outside the street line shall conform to the requirements of the governmental authorities or utilities having jurisdiction (ie. DOT, DEP, etc.). Where more stringent requirements than those contained in the applicable governmental authority specifications are given in this Section, the requirements of this Section shall govern.
3. "Safety and Health Standards, Subpart P - Excavations, Trenching and Shoring" - OSHA.

1.07 DELIVERY, STORAGE, AND HANDLING

- A. Aggregate materials to be used for project are to be stockpiled separately at the producer's facility and shall be accessible to inspection and testing by the Contractor's Testing Laboratory if so requested by the MMMHS Representative.

1.08 PROJECT/SITE CONDITIONS

- A. Existing Conditions

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Site information
 - a. Obtain all Building Department data available on the lots being affected by the project construction.
2. Existing Utilities
 - a. Locate existing underground utilities:
 1. Provide adequate means of support and protection for utilities to remain during Work.
 2. Demolish and remove underground utilities designated to be removed. Coordinate with utility companies for shut-off of services if lines are active.
 - b. Consult immediately with the utility owner for directions should uncharted or incorrectly charted piping or other utilities be encountered during excavation. Cooperate with the utility owner and the MMMHS in keeping the School's services and facilities in operation. Repair damaged utilities to the satisfaction of the Utility Owner.
 - c. Do not interrupt existing utilities serving facilities occupied and used by the MMMHS during occupied hours, except when permitted in writing by the MMMHS and only after acceptable temporary utility service has been provided. Do not proceed with interruption of services without providing a minimum of 48-hours notice to the MMMHS and receiving their written approval.
 - d. Coordinate all Work with the Work of Division 16.

1.09 SEQUENCING AND SCHEDULING

- A. Perform work in such a manner to ensure a minimum interference with roads, walks, and facilities to remain open. Do not close or obstruct these items without obtaining permits from the agencies having jurisdiction or the permission of the MMMHS.

PART 2 - PRODUCTS

2.01 MATERIALS

A. Restricted Material

Remove all debris from improvements and soil excavated during construction from premises and legally dispose of away from premises.

B. Aggregate Base (Porous Fill)

1. Aggregate base course under pavements and slabs shall be composed of ledge rock, talus, or gravel which is uniform in quality and free of wood, loam, clay, dirt, roots, bark, and any other extraneous material. The aggregate shall be produced from material showing a percentage of wear by the Los Angeles wear test (ASTM C131) of not more than 35%.

2. Stone shall have the following gradation:

Sieve	Percent Passing by Weight
1 1/2"	90-100
3/4"	60-97
3/8"	25-60
No. 4	25-60
No. 16	15-40
No. 200	0-10

2.02 EQUIPMENT

A. Provide proper compaction equipment to properly compact subgrade and aggregate. Employ a Licensed Professional Engineer to determine soil type and which equipment will give the proper compaction.

2.03 SOURCE QUALITY CONTROL

A. Tests

The Contractor shall engage a Testing Laboratory who shall perform the following laboratory tests and forward the results to the MMMHS Representative:

1. Sieve Analysis: Performed in accordance with ASTM D422 on submitted aggregate samples to verify material meets gradation requirements.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Moisture Density Curve: Optimum moisture content obtained from submitted aggregate samples, tested in accordance with ASTM D698.

B. Inspection

1. Testing Laboratory

- a. The Contractor shall engage an approved Testing Laboratory or Inspection Agency to perform laboratory tests and field compaction testing on the aggregate materials and subgrade.

PART 3 - EXECUTION

3.01 EXAMINATION

A. Verification of Conditions

Verify existing site conditions match those of the pre-bid inspections. Notify the MMMHS Representative in writing prior to commencement of Work of any discrepancies.

B. Preparation

1. Before starting any excavation work for new construction, ascertain the exact locations of all existing underground drain lines, piping, and conduits. Consult with the Mechanical/Electrical Trades.
2. At location where any of the above services interfere with the excavation work, notify the SSRC Representative before continuing with any more excavation.

3.02 PREPARATION AND PROTECTION

A. Condition Survey

1. General: The Contractor shall perform a condition survey of the existing school building prior to beginning excavation.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Photographs: Take photographs of the existing school at the sidewalk/street pavement area where trenching will be performed so that the surfaces may be examined during construction and compared with the pre-work condition. If any cracks or other stress signs are exhibited by the building, halt operations until corrective action has been provided and is acceptable to the MMMHS Representative.

3.03 EXCAVATION - GENERAL

- A. Excavate all earth, rock, and materials of every kind to the Contract elevations and dimensions required by the Drawings and Specifications and any additional required for safe slope of excavation, regardless of the character of materials and obstructions encountered.
- B. No additional compensation will be allowed for excavation work carried below the levels shown on Drawings unless same has been authorized in writing by the MMMHS Representative. Contractor is responsible for all remedial work due to unauthorized excavation.
- C. For pavements and slabs on grade, excavate to depths required for installation of aggregate base or pavement as specified herein or shown on Drawings.
- D. Remove all excavated material from the site and legally dispose of away from the premises. Burning of material on the site is not permitted.
- E. At all seeded areas, excavate to 8" below finished grade. If rock occurs within 18" of finished grade, all rock shall be removed to a depth of 18".

3.04 EXCAVATION - ROCK

- A. Excavate rock where encountered by means other than blasting. Blasting will not be permitted.

3.05 DISPOSAL OF EXCAVATED MATERIAL

Legally dispose of all excavated materials off-site.

3.06 FILLING AND GRADING

- A. General

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Do not commence filling and backfilling operations until construction below finish grade has been approved, underground utilities inspected and tested, and other improvements installed, trash and debris removed, and temporary and permanent bracing installed.
2. Do not commence backfilling, filling and grading until existing subgrade has been compacted.
3. Fill all excavations, backfill against all walls, and do all filling and grading necessary to bring the surfaces to the level required.
4. Take particular care when rolling over areas where trenches or other excavations have been made and backfilled.
5. Fill voids caused by the removal of below grade improvements.
6. Grade bottoms of pavements to maintain uniform thickness of the slabs.

B. Compaction of existing subgrade

1. Site preparation

Existing subgrade shall be free from stumps, bushes, roots, sod, topsoil, rubbish, garbage, and any other material that may decay.

2. Grading

- a. Prior to placing fill or backfill in any area, grading is to be performed as required to maintain the grade of adjacent areas.
- b. On completion of grading as specified above, closely examine to determine whether excessive wetness, springs, or other seepage of water can be observed at any point. If such conditions exist, positive drainage in suitable form, such as french drains or tilling, must be provided before placement of fill is undertaken.
- c. When the fill area has been prepared as specified above, compact the natural ground surface by methods specified for compaction of fill.

C. Placement and Compaction of Aggregate Bases

1. Provide aggregate base under all pavements, in voids created when fence posts foundations at staging area are removed, and wherever else indicated on the Drawings. Provide 6" minimum unless specified or shown otherwise elsewhere.
2. Verify finished subgrade is at proper level.
3. Prior to placement of material, hand tamper.
4. Place aggregate base in layers of uniform thickness, but not exceeding 6". Compact material to either 80% of relative density or 95% of standard laboratory density at optimum moisture in accordance with ASTM D698. Maintain optimum moisture content for compacting the material. Place material in single layer for aggregate courses six inches or less. Alternate grading and rolling to obtain a smooth, even, and uniformly compacted course.

3.07 FIELD QUALITY CONTROL

A. Tests

1. Sieve Analysis: The Contractor's Laboratory will perform sieve analysis in accordance with ASTM D422 on aggregate materials at the site prior to placement in order to verify conformance with the submitted samples and forward a copy of the results to the MMMHS Representative.

3.08 PROTECTION

- A. Protect graded and compacted areas from traffic and erosion. Keep free of trash and debris.
- B. When completed compacted areas are disturbed by subsequent construction or weather, scarify surface, re-shape, and compact to required density prior to further construction.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- C. Where settling is measurable or observable at excavated areas during general project warranty period, remove surface (pavement, lawn or other finish), add backfill material, compact, and replace surface treatment. Restore appearance, quality, and condition of surface or finish to match adjacent work, and eliminate evidence of restoration to greatest extent possible.

END OF SECTION

SECTION 02360
PILE FOUNDATIONS

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

A. Furnish labor, material, equipment services to perform the Work of this Section, including but not limited to the following:

1. Furnish and drive all piles and cut tops at required levels.
2. Furnish and install pile caps and brace beams.
3. Furnish location survey for all piles.
4. Furnish and fill concrete in pipe piles.
5. Furnish and install all other related items required by Drawings and Specifications.

B. No change in contract price shall be due for any variation in pile footage. The Contractor is completely responsible for estimating the pile lengths required to properly install the piles to the correct driving resistance, while also meeting the minimum embedment into good material specified. Any minimum lengths shown are minimum embedments needed to meet bearing capacity or liquefaction requirements and do not necessarily have relation to the depth required to meet the driving resistance for each pile capacity, which may be substantially longer.

1.02 RELATED SECTIONS

- | | |
|---------------------------------|---------------|
| A. Site Preparation | Section 02100 |
| B. Earthwork | Section 02200 |
| C. Cast-In-Place Concrete | Section 03300 |
| D. Structural Steel | Section 05120 |

1.03 REFERENCES

- A. American Society of Testing and Materials (ASTM) standards, latest editions.

A36 Standard Specification for Structural Steel.

A252 Standard Specification for Welded and Seamless Steel Pipe Piles.

1.04 DEFINITIONS

- A. "Friction piles" as used in the Specifications means piles which receive their principal support other than by direct bearing on rock, or hardpan overlaying rock, or gravel-boulder formations overlaying rock.

- B. "End-bearing piles" as used in the Specifications are those which receive their principal support by direct bearing on rock, or on hardpan overlaying rock, or on gravel-boulder formations directly overlaying rock.

1.05 DESIGN REQUIREMENTS

- A. The Drawings indicate whether an "end-bearing" pile or a "friction" pile is required.

- B. The design requirements of the pile are give on the Drawings.

- C. Pipe File

1. Welded and seamless pipe pile shall conform to ASTM A252, Grade 2. The Contractor is responsible for determining if the stresses associated with the pile driving equipment will necessitate the use of Grade 3 material or a greater wall thickness. The Contractor shall utilize material suitable for the condition at the site. Pipe piles shall have a watertight bottom closure adequate to resist all forces incidental to driving, without rupture or leakage. The type of closure meeting this requirement shall be determined by the Contractor.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. The closure plate shall conform to the requirements of the NYC Building Code. The steel plate shall be welded to the lower end of the pipe pile by a continuous weld of adequate strength to maintain water tightness under all conditions. The steel closure plates, and the reinforcing for the tip end shall conform to ASTM A36.
 3. Pipe piles known in the industry as rejected oil well casings may only be used as a form for the concrete and shall have no assumed load bearing capacity. Diameters under 10" will not be permitted.
- D. All piles and all details in connection therewith (minimum length, shoes, tips, splices, spacing, etc.) shall comply with the Building Code. All splices shall be performed by certified welders, and such welding will be certified by the Professional Engineer supervising the pile installation.

1.06 SUBMITTALS

A. Pile Submittals

1. Pile Type

- a. Prior to commencement of Work, submit full descriptive data on the pile to be installed to the Engineer of Record for review and approval, including but not limited to the following:

- 1) Pile material, diameter and wall thicknesses
- 2) Name of pile supplier
- 3) Pile driving equipment, including hammer and cushion block
- 4) Pile closure plate
- 5) Method of splicing pile
- 6) Strength of concrete filling piles

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- b. Submit results of wave equation analysis demonstrating adequate strength and cross-sectional area of the proposed pile shell.
 - c. Submit proposed load test method, including method of casing off piles.
 - d. After approval, submit nine copies, three of which have been sealed and signed by a Licensed Professional Engineer for filing with the Building Department.
2. Pile Identification Plan
- a. Prior to commencement of work, submit in accordance with paragraph 27-688(a) a plan showing the designation of all piles by an identifying system to the Engineer of Record for review and approval. The sheet size shall be equal to that of the Drawings.
 - b. The plan shall include the location of the centerline of each pile group by a coordinate system from a selected base reference axes. It shall incorporate the column grid identification system shown on the Drawings and the pile cut-off elevations.
 - c. After approval, submit nine copies, three of which have been sealed and signed by the Licensed Land Surveyor who will be performing the survey work, for filing with the Building Department.
3. Index Piles:
- a. Proposed index pile locations
 - b. Proposed final driving resistance compatible with the proposed pile hammer and based on wave equation analysis.
4. Partial Surveys: Submit partial pile surveys to the Engineer of Record periodically during pile driving operations to facilitate corrective design measures.

5. Final Submittals: Location Survey and Reports
 - a. Upon completion and approval of all pile driving, submit original location survey tracing to the Engineer of Record showing location of all piles, including obstructed, damaged, and compensating piles, indicating their center line deviation from their contract location. Provide pile driving reports, which include deviations, depth of pile, and cutoff elevations.
 - b. Include nine copies, three of which have been sealed and signed with original signature by the Licensed Land Surveyor, for filing in the Building Department. Reports shall be signed by the Engineer designated for Controlled Inspection.
 - c. Load Tests: If load test are required, submit load test report to the Engineer of Record. Submit nine copies of each, three of which have been sealed and signed with original signature by a Licensed Professional Engineer, for filing in the Building Department.
- B. Condition Survey Submittals
 1. Provide copies of all photographs required to be taken under Article 3.01 to the Authority's field representative. Coordinate with Section 02200.
 2. Provide copies of survey logs and benchmarks required to be taken under Article 3.02 to the Authority's field representative. Coordinate with Section 02200.
- C. Certificates

Submit steel manufacturer's certificate certifying materials conform to specified requirements (steel affidavits).

1.07 QUALITY ASSURANCE

A. Qualifications

File Installer - Company specializing in performing the Work of this Section shall have a minimum of 3 years experience and three projects with similar quantities of piles.

B. Regulatory Requirements

1. Work of this Section shall conform to all requirements of the NYC Building Code and all applicable regulations of governmental authorities having jurisdiction, including safety, health, noise and anti-pollution regulations. Where more severe requirements than those contained in the Building Code are given in this Section, the requirements of this Section shall govern.
2. Contractor shall pay for all expenses that may be incurred where the Code states that the work shall be done "at the expense of the owner" or a similar phrase.

C. Certification

1. Structural steel and concrete shall conform to the material acceptance, certification and inspection requirements of Article 7, Chapter 1-Subchapter 1 and Tables 10-1 and 10-2 of the Building Code (Title 27).
2. Qualify welding processes and welding operators in accordance with AWS "Standard Qualification Procedure".

1.08 DELIVERY, STORAGE AND, HANDLING

- A. Protect piles to prevent damage during shipping and handling.
- B. Prevent piles from becoming contaminated with grease, oil, dirt or other unsuitable material. Remove any unsuitable material or coating.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- C. Store piles in orderly groups above ground on cribbing or other suitable method to prevent distortion of members. Piles exhibiting variations beyond tolerance limits will be considered distorted and may not be used in the work.

1.09 FIELD MEASUREMENTS

- A. In conjunction with the Work of other Sections, verify field measurements match dimensions on Drawings. Take field measurements as required by Drawings.
- B. The Licensed Land Surveyor engaged by the Contractor shall determine the exact location of the driven piles to the nearest 1/2 inch and indicate them on the location survey plan.

1.10 BORING DATA

- A. The subsurface information (borings or other subsurface explorations) contained in the Contract Documents were obtained primarily for the use in preparing the foundation design and is included in the Contract Documents for the convenience of the Contractor.
- B. The Authority does not guarantee the accuracy of, nor can the Authority be held responsible for conclusions derived from, boring diagrams and subsoil data furnished by the Authority. All bidders (prior to bid opening date) and the Contractor have the right to inspect any information at the Authority and Division of School Facilities regarding subsoil conditions at the site. Boring samples, the Contract on which the borings were obtained, and field notes taken during boring operations, are available for inspection.
- C. The Authority assumes no responsibility for the Contractor's failure to examine all available subsoil information, from any source, and makes no representation regarding the character of the soil or subsurface conditions which may be encountered during the performance of the Construction Work.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- D. Prior to the commencement of any Work, examine all Drawings and Specifications, visit the site, consult the records of existing adjacent construction, including existing utilities and their connections, if any, and all conditions and limitations which might affect the Work required under this Section.
- E. Additional test borings and other exploratory operations may be made by the Contractor, subject to the approval of the Authority, at no additional cost to the Authority.

1.11 FOUNDATION CHANGES

- A. The Authority reserves the right to change slightly or radically, at its discretion, the design of the foundation. If the foundation design is so changed, the contract price will be adjusted on a unit price basis as set forth in Section 02250, "Foundation and Other Change Adjustments".

PART 2 - PRODUCTS

2.01 MATERIALS

A. Piles

Material for the approved type of pile shall conform to Article 10, Chapter 1 - Subchapter 11 of the Building Code (Title 27), "Pile Types - Specific Requirements."

1. Welded and seamless pipe pile: Shall conform to ASTM A252, Grade 2. Refer to Article 1.05 of this Section.
2. Closure plates: Shall conform to ASTM A36. Refer to Article 1.05 of this Section.

B. Concrete

Material shall comply with the applicable requirements of Section 03300. Compressive strength is indicated on Drawings.

2.02 EQUIPMENT

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- A. Furnish all necessary equipment, including pre-drilling, jetting and spudding apparatus, to drive the piles to required resistance and depths without damaging the adjacent buildings and properties.
- B. All equipment shall be in first-class working condition to insure against avoidable delays in the progress of the Work. Equipment disapproved by the Authority because of its poor condition may not be used. In conformance with paragraph 27-704(b), the cushion or cap block shall be a solid block of hardwood with its grains parallel to the axis of the pile and enclosed in a tight-fitting steel housing, or shall be an equivalent assemblage. If laminated materials are used, the type and construction of these materials shall be such that their strength is equal to, or greater than, hardwood. Wood chips, pieces of rope, hose, shavings, or automobile tires and similar materials shall not be used. Cap blocks shall be replaced if burned, crushed or otherwise damaged.
- C. Secure all necessary permits required by the NYC Building Code for equipment and apparatus used in the installation of piling.
- D. Post at the job site all such permits in accordance with paragraph 27-194.

PART 3 - EXECUTION

3.01 PROTECTION OF EXISTING STRUCTURES DURING PILE DRIVING

- A. Protect structures, underground utilities and other construction from damage caused by pile driving operations. If unmarked or unknown utilities are uncovered during excavation, notify the Authority and the Engineer of Record to receive further instructions prior to proceeding further. Should damage to adjacent construction or utilities occur due to Work under this Section, all costs in connection with the repair of such damage and the restoration of damaged construction to its original condition shall be borne by the Contractor.
- B. Engineer

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Engage the services of a licensed Professional Engineer to monitor the pile driving operations and assure that damage does not occur to adjacent buildings or properties. The engineer shall monitor accelerometers and benchmarks and help in determining appropriate changes to the pile driving operations should the accelerometers, benchmarks, photographs, etc. show adjacent properties or buildings are in danger of being damaged.

C. Benchmarks

1. Provide surveyed elevation benchmarks and accelerometers on adjacent structures before commencing work when structures are adjacent to pile driving operations. Record and report elevation of each benchmark after driving each pile and at least twice a day while pile driving is in progress. Monitor accelerometers regularly while each pile is being driven.
2. Should benchmark readings indicate displacement or accelerometers exceed reasonable limits for particle velocity (depending on condition of adjacent structure), halt driving operations until corrective action has been provided and is acceptable to the Authority. Corrective action may require pre-drilling at individual pile locations at the Contractor's cost.
3. Take photographs and other measures required in Section 02200 to record existing conditions.

3.02 EXCAVATION

- A. Do not drive piles until the excavation in the area they are to occupy has been completed. Excavate earth in accordance with Section 02200 and stop at an elevation of 6" to 12" above bottom of pile cap before piles are driven. Final excavation will be done by hand after piles have been driven and the pile group approved.

3.03 PILE DRIVING

A. General

1. Install piles in accordance with the New York City Building Code, Articles 7-10, Chapter 1 - Subchapter 11.
2. Energy required for driving pile is given in Table 11-4 of the Building Code.
3. Immediately after driving each pile, provide and install temporary capping devices.
4. After the first pile in a group is driven, establish a reference point grade. After all piles in the group are driven, determine the reference point grade. If uplift of 1/4" or more has occurred, then redrive all piles in the group to the final penetration resistance.
5. After installation to final depth, the Engineer for Controlled Inspection will inspect the pile shells immediately before filling with concrete. The pile shells shall be free of water prior to placing of concrete.
6. Fill space between pile shaft and surrounding ground with material specified in Section 02200 to assure that no voids are left adjacent to the pile shafts.
7. No extra payment whatsoever will be made for lost rig time.

B. Index Pile Driving

1. Install a minimum of 20 index piles prior to performing the pile load tests.
2. Index pile locations shall be selected by the Contractor and approved by the Authority's Engineer.
3. Install the index piles in the same manner and with the same equipment as for the production piles.

4. Piles shall be driven to the proposed final driving resistance as determined by the Contractor for the proposed pile driving equipment.
5. If piles cannot be driven to the required minimum embedment due to dense layers of natural material, densification, or other obstructions, pre-drill through dense material to allow for the pile to meet the minimum embedment requirements.

C. Production Piles

1. All frictional resistance shall be obtained wholly in virgin strata.
2. Drive piles to the final penetration resistances required for the required pile capacity as required by table 11-4 of the code and, for piles requiring a load test, as verified by the successful pile load tests. Production piles shall be installed by the same equipment and with the same procedures as the index piles.
3. Resistance obtained in consolidated fill overlying softer strata is not acceptable and shall be compensated as per paragraph 27-700).
4. Shells, when used as friction piles, shall be of sufficient strength and rigidity to withstand all stresses, to prevent distortion caused by driving adjacent piles, to prevent collapse due to the soil and hydrostatic pressure, and to maintain perfect shape after being driven.
5. The variation of length of piles within a pile group (ratio of longest pile to length of shortest pile) shall not exceed 1.30.
6. Piles are to be driven to at least the minimum embedment indicated, even if the piles meet the required frictional resistance due to blow counts or maximum number of blows permitted. If there is difficulty in meeting this criteria and the maximum number of permitted blows are met, provide pre-drilling to a depth that will permit the correct installation.

3.04 PRE-DRILLING/JETTING

- A. Perform pre-drilling/jetting at the Contractor's cost:
1. when noted on Drawings or specified herein; or
 2. where unforeseen local conditions occur or consolidated fill overlies softer strata, thus creating a false resistance at top of pile; or
 2. when, due to heavy resistance such as stiff layers of natural material or obstructions, the piles as shown do not produce the minimum length or the minimum diameter required at cut-off levels or the piles within a group do not meet the requirements given in 3.03 C.4 above, provide such pre-drilling and jetting required, but obtain the Authority's approval before any pre-drilling/jetting is performed. The authority shall be the sole judge regarding (2) and (3).
 4. in order to reduce the vibration to adjacent structures and when settlement of adjacent buildings or structures are measured during conventional pile driving. The Contractor's engineer shall determine the depths and to what distance away from the structure pre-drilling is required.
- B. All pre-drilling and jetting, including that required by the preceding paragraph, shall comply with paragraph 27-705(b) of the Building Code.

3.05 DAMAGED OR DISPLACED PILES

- A. In the event any pile be damaged during installation and not satisfactorily repaired, or be driven out of design position sufficiently to result in a loading in excess of that allowed by paragraph 27-691 of the Building Code, or be rejected for any reason, remove or abandon it. Drive additional pile or piles before concrete has been poured in the adjacent piles and make such changes in pile caps or other construction necessary to provide for proper load distribution.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- B. The location of any additional or replacement piles or redesign shall be subject to the approval of the Engineer of Record. Fill any abandoned pile shells or holes left in the ground with concrete or sand. Where cast-in-place piles are used, the gage of steel shells shall be sufficient to withstand required driving. Contractor is responsible for ripped or collapsed shells and for delays resulting from mandrels stuck in shells.
- C. Provide and pay for work of whatever nature (including cost of redesign) required on account of rejected, damaged, or displaced piles.
- D. If during the driving of any piles any of the piles previously driven heave or lift, redrive such heaved or lifted piles to the required load bearing capacity and without additional cost to the Authority.

3.06 OBSTRUCTIONS

- A. No extra payment will be made to the Contractor for the overcoming of obstructions under any conditions whatsoever.
- B. Pre-drilling/spudding/jetting is to be performed by the Contractor at own expense and with the approval of the Engineer for Controlled Inspection.
- C. Excavations to remove obstructions is to be performed by the Contractor at own expense.
- D. Additional piles driven in another location because of obstructions at any elevation are subject to the approval of the Engineer of Record as specified under "Damaged or Displaced Piles". Provide all required additional piles at own expense and pay for the redesign and additional costs involved in construction of pile caps and tie-beams.

3.07 CAST-IN-PLACE CONCRETE PILES, CONCRETE-FILLED PIPE PILES

- A. Placement
 - 1. Placement of concrete shall conform to the requirements of paragraph 27-709 of the Building Code.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Do not place concrete in piles until the pile group or cluster has been completed, inspected, and accepted and all driving within a radius of 15', or within the heave range, has been completed, inspected, and accepted.
3. Before concrete is placed, make the inside of the accepted piles free from all solid matter and water.
4. The Engineer for Controlled Inspection of the pile installation will inspect the piles prior to placing concrete. Provide the Engineer with a shielded light to make the inspections. Any pile showing signs of rupture, buckling, or damage will be rejected. Water in the pile will be permitted only if the water can be pumped out and the concrete placed in a dry pile. If the Engineer determines the rate of water coming into the pile is too high to be removed successfully before placing concrete or which might adversely affect the quality of the concrete, the pile will be rejected. No more than 1" of standing water shall be permitted in any pile at the time of placing concrete.
5. Deposit concrete by an elephant trunk or through a funnel to prevent segregation of material. There shall be no obstruction to the free displacement of air from pile shaft as concrete is placed. Concrete is not to be placed from the top of the shaft.
6. Place concrete in one continuous operation. Cold joints will not be allowed. The concrete fill shall be thoroughly vibrated in at least the upper 6' of each pile.

B. Protection

In freezing weather protect the exposed portion of the pile above ground against freezing by covering with tarpaulins and salt hay or heating, so that the temperature around the pile butts do not fall below 50°F for a period of 72 hours after concrete is placed. Do not use anti-freeze compounds in the concrete.

C. Inspection

Controlled Inspection of the concrete for piles is part of the Work of Section 03300. Do not pour concrete except in the presence of the Engineer for Controlled Inspection of the Concrete Work and of the piling.

3.08 PILE CAPS AND BRACE BEAMS

- A. Concrete work shall comply with Division 3 of this Specification. Pile caps and brace beams shall conform to paragraph 27-694 of the Building Code.

3.09 FIELD QUALITY CONTROL

A. Load Tests

1. Provide and pay for all load tests required by the provisions of paragraph 27-700(d)(1)(2)(3) of the Building Code.
 - a. A minimum of three successful pile load compression tests are required. Provide additional load tests to meet the building code requirements.
 - a. Piles to be load tested shall be selected by the Authority's Engineer.
 - c. Load tested piles shall be cased-off to the top of the bearing material in accordance with paragraph 27-700(d)(7). Include method of casing-off in the load test submittal.
2. Provide and pay for all load tests and special procedures required by the provisions of paragraph 27700(e)(2), "Substantiation of Higher Allowable Loads", when the capacity of the project pile exceeds the basic maximum pile load given in Table 11-6.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

3. When load tests are required by paragraph 27700(d)(6) or where in the opinion of the Authority load tests are required to prove the carrying of any driven pile or piles, load tests shall be performed according to Building Code requirements. Such tests shall be paid for as an extra cost to the Contractor by the Authority where such pile load tests are successful. No payment shall be made for load tests that are unsuccessful.
4. Load Test procedures shall conform to the requirements of paragraph 27-700(d)(4) and shall be supervised by a Licensed Professional Engineer engaged by the Contractor. Submit to the Authority for approval the name of the Licensed Professional Engineer and the Licensed Land Surveyor who will provide the necessary services in connection with the load test. The Authority's engineer will also witness the test and verify the results.
5. Submit the load test report prepared by the Licensed Professional Engineer to the Engineer of Record for approval. The Engineer of Record will file the load test report and obtain Building Department approvals. Submit to the Authority the approved copy of the amendment and load test report.

B. Inspection

1. Engineer for Controlled Inspection
 - a. The Authority will assign, under the requirements of paragraph 27-721 of the Building Code, a Licensed Professional Engineer who will be responsible for Controlled Inspection of the pile installation. The Engineer will be on the site during pile installations to insure and certify that piles are installed in accordance with design and code requirements.
 - b. With respect to cast-in-place concrete piles, the Engineer will verify the integrity of the

January 10, 2005

**Soundproofing of
Monsignor McClancy Memorial High School**

pile shells immediately before concreting according to paragraph 27-709(c)(1).

- c. The Engineer will prepare and periodically submit to the Engineer of Record for review a report of the pile driving as required by paragraph 27-688(b) to allow for pile cap work to proceed.
 - d. The Engineer will submit full data to the Engineer of Record for review to facilitate the corrective design requirements. The Engineer will certify the piles, as driven in the corrective design, comply with the Design and Code requirements.
 - e. Upon completion and approval of all pile driving, the Engineer will deliver to the Engineer of Record original pile driving reports and copies for review and filing in the Building Department. Besides indicating the location of all piles including the obstructed, damaged, and compensating piles, the report will include percentage out-of-plumb, final blow count, cut-off elevation, and length below cut-off of each pile.
2. Contractor's Responsibility
- a. The Contractor shall notify the Authority at least 72 hours prior to each day of pile driving to allow for the appropriate personnel to be on the site.
 - b. The Contractor shall prepare and periodically submit to the Engineer of Record for review partial area surveys to permit pile cap work to proceed and to facilitate the design of corrective measures.
 - c. Upon completion and approval of all pile driving, the Contractor shall deliver to the Engineer of Record the original tracings (equal in size to that of the Drawings) and the requisite copies for review and filing in the Building Department.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

3. Licensed Surveyor: Engage the services of a Licensed Land Surveyor registered in the State of New York and approved by the Authority for the performance of the survey work called for herein, as per paragraph 27-688(b) of the Building Code. The installed location of each pile shall be established by survey and shown on drawings, in accordance with the provisions of the Building Code.

C. Pile Review and Corrective Measures

1. Review: The Engineer of Record, upon receiving the asdriven pile survey, will perform a complete pile review to determine the true loadings on the piles due to pile group eccentricities, including a review of the pile cap design. The pile review will determine if pile corrective measures are required.
2. Design of Corrective Measure: The Engineer of Record will perform all necessary design and filing to obtain Building Department Approval of all necessary corrective measures required due to pile driving operations as required by paragraph 27-691 of the Building Code.
3. Payment for Design of Corrective Measures: Pay all costs incurred by the Authority for the design of corrective measures (not the pile review).

END OF SECTION

SECTION 02511
ASPHALTIC CONCRETE PAVING

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide material, labor, equipment, services required to install asphaltic concrete paving and related work as shown on the Contract Drawings.
- B. Work includes paving over subbase.

1.02 RELATED SECTIONS AND WORK

- A. Site Preparation.....Section 02100
- B. Earthwork.....Section 02200
- C. Sidewalk and Street Paving.....Section 02513

1.03 REFERENCES

- A. Standard Specifications - New York City Department of Transportation Bureau of Highway Operations.
- B. Construction Specifications for Asphaltic Concrete and Other Plant-Mix Types - The Asphalt Institute, Fourth Edition.

1.04 DEFINITIONS

- A. Subbase

Compacted aggregate base or stone ballast which will receive the base course.
- B. Base Course

Asphaltic concrete mixture usually referred to as plant-mix (described by the term binder mixture by NYCDOT) which is used as a base for the final asphaltic wearing surface when a portland cement concrete base is not used.

C. Surface Course

Final asphaltic concrete wearing surface, usually referred to as surfacing mix (described by the terms fine or extra fine asphaltic concrete mixture by NYCDOT), placed over plant-mix or portland cement concrete base.

1.05 SUBMITTALS

A. Product Data

Provide manufactures' information on the following:

1. Prime coat
2. Tack coat
3. Sealer
4. Herbicide

B. Quality Control Submittals

1. Design Data: Submit design mix formulas for plant-mix and surfacing mix and name of producer.
2. Certificates: Provide material certificates from producer, material supplier, and Contractor certifying that each material item complies with, or exceeds the specified requirements.

1.06 QUALITY ASSURANCE

A. Qualifications

1. Producer: Company specializing in production of asphaltic concrete shall have more than five years experience.
2. Installer: Company specializing in installation of asphaltic concrete shall have more than three years experience and at least two jobs with similar quantity of material.

B. Regulatory Requirements

1. Work of this Section shall comply with the requirements of the NYC Building Code and those agencies having jurisdiction over noise, pollution, etc.
2. Requirements for asphaltic concrete, including, but not limited to handling, equipment, transportation etc., not specified herein shall conform to the more stringent of the New York City Department of Highway Standard Specifications and AASHTO "Standard Specification for Transportation, Materials, Methods of Sampling and Testing".

1.07 ENVIRONMENTAL REQUIREMENTS

A. Asphaltic Concrete

1. Do not install asphaltic concrete paving when there is frost on the subbase or base; when the subbase or base is wet; or when the air temperature is 40°F or below.
2. Materials containing frost will be rejected.

B. Prime and tack coats

Apply prime and tack coats when air temperature is above 50°F and when temperature has not been below 35°F for 12 hours immediately prior to application. Do not apply when base is wet or contains an excess of moisture.

C. Sealer

Apply sealer under conditions similar to prime and tack coats.

1.08 WARRANTY

- A. Cracking, blistering, running, or deviation from requirements specified under "Finish" will be considered defects under the warranty conditions of the Contract.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

A. Sealer

1. Karnack Corp., Clark N.J. 07066.
2. Neyra Industries, Cincinnati, Ohio 45241

B. Herbicide

1. Allied Chemical Corp.
2. Ciba-Giegy Corp.
3. Dow Chemical U.S.A.
4. U.S. Borax and Chemical Corp.

2.02 MATERIALS

A. Asphaltic Concrete

Materials shall comply with Section 3.01 of NYCDOT Standard Specifications for each item.

B. Prime Coat

Cut-back asphalt type, AASHTO M82, (ASTM D2027) MC-30, MC-70 or MC-250.

C. Tack Coat

Emulsified Asphalt; AASHTO M140 (ASTM D977) or M208 (ASTM D2397); SS-1h, CSS-1 or CSS-1h, Diluted with one part water to one part emulsified asphalt.

D. Sealer

Pitch, coal tar emulsion sealer meeting Federal Specification RP-355d containing no volatile organics.

1. Karnack 152 Driveway Seal.
2. Neyra Jennite NJ-S1

E. Herbicide

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Commercial chemical for weed control, registered by the
Environmental Protection Agency.

2.03 EQUIPMENT

- A. Provide proper compaction equipment to properly compact asphaltic concrete pavement.

2.04 MIXES

- A. Bituminous material shall come from one source only.
B. Bitumen and aggregate composition shall be plant mixed entirely.
C. Composition

1. Aggregate:

Percent Passing by Weight of Aggregate

Sieve Size	Surface Course (Extra Fine Surfacing Mix)	Base Course (Plant-mix)	Variation from Job Mix Formula (Plant-mix)
1 1/2"	-	100	-
1"	-	95-100	-
1/2"	100	70-90	±6
3/8"	98-100	-	
1/4"	-	48-74	±7
1/8"	-	32-62	±7
No. 4	70-90	-	
No. 8	38-65	-	
No. 20	-	15-39	±7
No. 40	-	8-27	±7
No. 50	6-25	-	
No. 80	-	4-16	±4
No. 200	2-8*	2-8	±2

* Under no circumstances shall the final mix contain less than 2% of material passing the No. 200 sieve.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Asphaltic Cement (Bitumen)

Mix	Percent Bitumen by Total Weight Soluble in Chloroform	Variation from Job Mix Formula
Plant-mix	4.5-6.5	±.4
Extra Fine Surfacing Mix	5.0-8.0	-

D. Penetration Grade of the asphaltic concrete shall be 85-100.

2.05 SOURCE QUALITY CONTROL

A. Inspection

1. The Contractor shall engage a Licensed Professional Engineer to perform inspections at the plant to ensure that the mix provided is that of the design mix.
2. Notify the Engineer 72 hours in advance of each asphaltic concrete placement so that the Engineer can cover the work at the plant.

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Verify that all grades onto which asphaltic concrete is to be placed are at the required levels prior to placement. Do not begin work until all improper conditions are remedied. Installation of aggregate subbase is described in Section 02200.

3.02 PREPARATION

A. Protection

1. Provide tarpaulins for use during emergencies, such as rain, chilling winds or unavoidable delay to cover and protect paving materials.
2. Protect pavement from debris and damage from equipment and other work.

B. Surface Preparation

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Remove all loose and foreign materials before proof rolling and application of herbicide and prime coat.
2. Proof roll prepared subbase surface to check for unstable areas and areas requiring additional compaction.
3. Do not begin paving work until deficient subbase areas have been corrected and are ready to receive paving.
4. Subbase shall be dry and free from any standing water.
5. Apply weed control agent in accordance with manufacturer's recommended dosages and application instructions. Apply to compacted, dry subbase prior to application of prime coat.
6. Apply prime coat at rate of 0.20 to 0.50 gal per sq yd over compacted subbase. Apply material to penetrate and seal, but not flood, surface. Cure and dry as long as necessary to attain penetration and to allow for evaporation of volatiles.

3.03 PLACING

A. General

1. Establish and maintain required lines and elevations.
2. Place asphaltic concrete mixture on prepared surface, spread and strike-off. Spread mixture at minimum temperature of 225°F. Place inaccessible and small areas by hand. Place each course to required grade, cross-section, and compacted thickness.
3. Begin rolling when mixture will bear roller weight without excessive displacement. Compact mixture with hot hand tampers or vibrating plate compactors in areas inaccessible to rollers.

B. Asphaltic Concrete Base Course - Plant-Mix

1. Provide plant-mix base.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Spread sufficient plant-mix to develop a uniform 4" thickness after rolling and compaction.
3. Sprinkle with clean water, then compact with 5 to 8-ton roller. In areas where the use of a roller is impracticable, heavy mechanical tampers may be used to consolidate the material.

C. Asphaltic Concrete Surface Course - Surfacing Mix

1. Prior to placement of surface course, apply tack coat to contact surfaces of previously constructed asphalt. Distribute at rate of 0.05 to 0.15 gal per sq yd of surface. Allow to dry until at proper condition to receive paving.
2. Place surface course over base only when base is dry and free from standing water.
3. Spread in loose layer and of such depth which will result in a uniform course having the thickness of 1¹/₂" after compaction and rolling.
4. Compact the material with approved roller to a smooth even surface and to the levels indicated.
5. Roller shall be a minimum 8-ton tandem type having a rear wheel compression of 200-300 lbs per lineal inch, provided that if a roller less than 8-tons weight is used for general rolling, the entire surface course shall also be rolled once with a roller weighing 8-tons or more.
6. Motion of roller shall be slow enough to avoid displacement of the surface rolled.
7. Keep roller wheels moistened with water to prevent adhesion of the materials to wheels, but without use of excessive amount. Use of any liquids other than water for this purpose is prohibited.
8. If the operation of laying materials is interrupted, the end of the laid material shall be left unrolled until the work is resumed so that there will be no joints in the topping.
9. Make joints between old and new pavements, or between successive days' work, to ensure continuous bond between adjoining work. Construct joints to have same texture, density and smoothness as other

sections of the asphaltic concrete course. Clean contact surfaces and apply tack coat.

10. The use of liquid bitumen or hot smoothing irons in finishing such joints is prohibited.
11. At locations inaccessible to rollers, compression shall be effected with iron tampers weighing not less than 25 lbs, having a maximum bearing area of 48in².
12. Any surfacing material (IE. sealer, etc.) to be placed on the asphaltic concrete surface shall only be done after the asphaltic concrete has cured and the oils have dissipated. Consult with the product manufacturer for their exact requirements.

3.04 FINISH

- A. The rolled finish surface shall be free from porosity, fissures, or blemishes, true to crown and grade; free from depression, waves, bunches, or unevenness so as to allow complete runoff.
- B. Should defects in composition compactness or surface finish appear in the completed work, remove defective areas to full depth of the course and replace with thickness and finish specified.
- C. With permission of the MMMHS Representative, minor surface defects may be repaired with approved sealing compound.

3.05 PATCHING

- A. Remove and replace paving areas mixed with foreign materials and defective areas in a manner acceptable to the MMMHS Representative. Cut-out such areas and fill with fresh, hot, asphaltic concrete. Compact by rolling to maximum surface density and smoothness.

3.06 SEALER APPLICATION

- A. After asphaltic concrete surface course has been tested and approved for allowable tolerances and the surface is hardened to a degree acceptable to the sealer manufacturer (a minimum of 90 days), apply the sealer in accordance with the manufacturer's instructions.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- B. Sweep surfaces clean of dust and dirt; remove oil and grease spots with household detergent. Flush entire surface with water; remove all remaining water puddles.
- C. Pour sealer onto dampened pavement; pour in spots or ribbons, then spread evenly with push broom or squeegee.
- D. Allow sealer to dry about 24 hours minimum depending on weather conditions before opening surface to traffic.
- E. Apply at a rate 1¹/₂ gallons of sealer for every 100 sq ft of surface. Apply in warm, dry weather only.

3.07 TOLERANCES

- A. The thickness of the plant-mix and surface course shall not vary by more than 1/4".
- B. The finish elevation for the plant-mix shall not vary from grade by more than 1/4", the surface course by more than 1/8".
- C. The smoothness tolerance for the plant-mix is 1/4", the surface course 1/8", when measured as described under "Field Quality Control".

3.08 FIELD QUALITY CONTROL

- A. Testing and Inspection
 - 1. Pay for any tests such as cores required by the MMMHS Representative when such tests show non-conformance with the Drawings and Specifications.
 - 2. Test finished surface of each asphaltic concrete course for smoothness, using 10-foot straightedge applied parallel with, and at right angles to, centerline of paved area.
 - 3. Check the final surface for depressions by applying water in the presence of the SSRCS Representative. Water should not pond and should flow to all catch basins, trench drains or grass areas.

3.09 CLEANING

- A. After completion of paving operations, clean surfaces of excess or spilled asphalt materials to the satisfaction of the MMMHS Representative.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

3.10 PROTECTION

- A. After final rolling, do not permit vehicular or pedestrian traffic on asphaltic concrete pavement until it has cooled and hardened so as not to be marked and in no case sooner than 6 hours.
- B. Provide barricades and warning devices as required to protect pavement and the general public.

3.11 TEMPORARY ASPHALT PAVEMENT AND STONE BALLAST REMOVAL

- A. Remove temporary asphalt pavement and stone ballast subbase upon removal of temporary trailers.
- B. Restore grass area as indicated on the Drawings.

END OF SECTION

SECTION 02513
SIDEWALK AND STREET PAVING

PART 1 - GENERAL

The Contractor shall pay the local utility company for providing the temporary electric service for all trailers on the site which shall include all removal, excavation, electrical service work, backfilling and pavement work with the exception of the replacement work for the concrete sidewalk, curb and sidewalk foundation material which the Contractor shall provide in accordance with the related portions of this specification Section and using "Landmark Grey Cement" for the sidewalk pavement (to match existing adjacent sidewalk) with a broom finish.

1.01 DESCRIPTION OF WORK

- A. All items of Work outside the street line which are under the jurisdiction of the New York City Department of Transportation (NYCDOT).
- B. Construct all concrete sidewalks, pavements, concrete curbs, steel faced concrete curbs, asphaltic concrete pavement, pavement markings and items shown on Drawings, specified herein, as required by site conditions and NYCDOT.
- C. Pay for tests required by NYCDOT to ensure compliance with NYCDOT Specifications.

1.02 RELATED SECTIONS

- A. Site Preparation.....Section 02100
- B. Earthwork.....Section 02200
- C. Asphaltic Concrete Paving.....Section 02511
- D. Cast-in-Place Concrete.....Section 03300

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1.03 REFERENCES

- A. "Standard Specifications - New York City Department of Transportation, Bureau of Highway Operations" dated June, 1986 with latest amendments. (NYCDOT Standard Specifications)
- B. "Standard Details of Construction" of the New York City Department of Transportation, Bureau of Traffic Operations - Street Design, dated August, 1988 with latest amendments. (NYCDOT Standard Details)

1.04 SUBMITTALS

A. Product Data

Provide manufactures' information for the welded steel wire fabric.

B. Shop Drawings

- 1. Steel reinforcing
- 2. Steel curb facing

C. Certificates and Mixes

Provide certificates or certifications for the following items:

- 1. Concrete design mix
- 2. Asphaltic concrete job mix formulas for each course.
- 3. Gradation analysis for aggregate base course and subbase course.
- 4. Reinforcing bars

1.05 QUALITY ASSURANCE

A. Qualifications

Company specializing in the Work of this Section shall have more than three years experience and at least two jobs with similar quantity of material.

B. Regulatory Requirements

Materials and methods of construction shall conform to:

1. "NYCDOT Standard Specifications": Section numbers referred to in Parts 2 and 3 of this Specification Section, such as "Section 4.13.3(b)" or "Section 2.23", etc. refer to the sections given in the NYCDOT Standard Specification which govern this work outside the street line.
2. "NYCDOT Standard Details": Drawing numbers referred to in Parts 2 and 3 of this Specification Section, such as "Drawing H-1044" or "Drawing H-1010", etc., refer to the Drawings in the NYCDOT Standard Details which govern this work outside the street line.

Where more stringent requirements are given in this Specification Section, the requirements of this Specification Section shall govern.

PART 2 - PRODUCTS

2.01 MATERIALS

A. Sidewalk and Driveway Foundation Material

Material for sidewalk foundation course shall conform to the requirements of Section 2.02 for size No. 3 broken stone or gravel. Foundation course shall be 6" thick.

B. Concrete for Sidewalks

Concrete shall comply with the requirements of Section 4.13.3(b). Cement used shall be Type IIa.

C. Preformed Expansion Joint Filler

Material shall conform to the requirements of Section 2.15, 1/4"thick, Type IV.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

D. Asphaltic Blown Joint Filler

Material shall conform to the requirements of Section 2.16.

E. Welded Steel Wire Fabric

Material shall conform to the requirements of Section 2.25. Fabric shall be 6x6-W2.9xW2.9 wherever fabric is indicated.

F. Steel Bars for Concrete Reinforcement

Material shall conform to the requirements of Section 2.23, Type I, Grade 60.

G. Concrete for Curb

Concrete shall comply with the requirements of Section 4.08.3, except the minimum compressive strength shall be 3500 psi.

H. Concrete for Steel-faced Curb and Facing

Concrete and steel facing shall comply with the requirements of Section 4.09.3, except the minimum compressive strength shall be 3500 psi.

I. Asphaltic Concrete Base Course

Material shall conform to the requirements of Section 3.01 for binder mixture.

J. Concrete Base for Pavement

Material shall comply with the requirements of Section 4.04.3.

K. Asphaltic Concrete Surface Course

Material shall conform to the requirements of Section 3.01 for fine asphaltic concrete mixture.

L. Concrete Pavements

Concrete materials shall comply with the requirements for Section 4.05.3.

M. Dense Graded Stone Base Course

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Material shall comply with requirements of Section 6.46.3.

N. Painted Pavement Markings

Paint shall comply with the requirements for Section 6.49.2, color as indicated on drawings or determined by NYCDOT.

2.02 SOURCE QUALITY CONTROL

A. Testing

Testing of Concrete is described in Section 03300 of this Specification.

B. Inspection

1. Portland Cement Concrete

Concrete work is treated as Controlled Inspection and is described in Section 03300 of this Specification.

2. Asphaltic Concrete

a. The Contractor shall engage a Licensed Professional Engineer to provide inspection services at the plant to ensure that the mix provided is that of the design mix.

b. Notify the Engineer 72 hours in advance of each asphaltic concrete placement so that the Engineer can cover the work at the plant.

PART 3 - EXECUTION

3.01 PREPARATION

A. Do not start excavation around city monuments and bench marks until said monuments or bench marks have been referenced and reset or otherwise disposed of by the Chief Engineer of the Bureau of Highways. Furnish labor and materials required to remove, care for, and reset all such monuments and bench marks.

B. Carefully remove all existing traffic signs at locations where new sidewalks are to be installed and store on the premises in a safe place, protected from the weather.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Ten days prior to their removal, notify in writing the New York City Department of Traffic when signs will be ready for pick-up by the Department of Traffic. Forward copy of the letter to the Traffic Department to the SSRCC Representative.

3.02 CONSTRUCTION

A. Concrete Sidewalk

Construct concrete sidewalk in accordance with the requirements of Section 4.13.4 and Drawing H-1045, Type I, except that Welded Steel Wire Fabric shall be installed for all sidewalks. Place fabric 1 $\frac{1}{2}$ " from top of slab. Score pattern shall be 5'-0" x 5'-0" or as shown on Drawings in accordance with D.I.S.M.A.

B. Concrete Curb

Concrete curb shall be constructed in accordance with Section 4.08.4 and Drawing H-1044. Curb height shall be 18".

C. Steel-faced Concrete Curb

Steel-faced concrete curb shall be constructed in accordance with Section 4.09.4 and Drawing H-1010. Curb height shall be 18".

D. Asphaltic Concrete Pavement

1. Prepare earth subgrade in accordance with Section 4.04.4A.
2. Construct subbase course to the compacted depth indicated on the Drawings in accordance with Section 4.01.4J.
3. Construct asphaltic concrete base course to the compacted depth indicated on the Drawings in accordance with Section 4.01.4E-I.
4. Construct asphaltic concrete surface course to the compacted depth indicated on the Drawings in accordance with Section 4.01.5B-D.

E. Asphaltic Concrete Pavement with Concrete Base

1. Prepare earth subgrade in accordance with Section 4.04.4.
2. Construct concrete base to the levels indicated on the Drawings in accordance with Section 4.04.4.
3. Construct asphaltic concrete wearing course to the compacted depth indicated on the Drawings in accordance with Section 4.02, using the material of 4.02.2(c); 3" course of binder mixture and surface mixture.

F. Painted Pavement Markings

Pavement markings shall be painted as shown on the Drawings and in accordance with the requirements of Section 6.49.3.

G. Restoration of Existing Pavement

Existing roadway pavement damaged due to trenching or sewer installation operation shall be restored as shown on Drawing H-1042A.

H. Restoration of Existing Sidewalk

Existing sidewalks, driveways and pedestrian ramps to remain damaged due to trenching or other excavations shall be restored as per the details for new work, with color to match the existing.

3.03 FIELD QUALITY CONTROL

A. Testing

1. Concrete testing is described in Section 03300 of this Specification.
2. Pay for tests required by NYCDOT to ensure compliance with NYCDOT Specifications.
3. Pay for any tests such as cores required by the SSRCC Representative when such tests show non-conformance with the Drawings and Specifications.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

B. Inspection

1. Concrete work is treated as Controlled Inspection and is described in Section 03300 of this Specification.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 02521
CONCRETE CURBS AND PAVEMENTS

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Furnish material, equipment, labor, services required to provide for concrete curbs and pavements. Work includes the installation of formwork, reinforcement, expansion joints and other items listed herein. Provide special formwork or formliners for concrete with smooth finishes. Allow ample time and facility for the Work of other Divisions to be installed.

1.02 PRODUCTS INSTALLED BUT NOT FURNISHED UNDER THIS SECTION

- A. Fence sleeves for chain link fence.....Section 02831
- B. Shoes/sleeves for Wrought Iron Fence,
other items.....Section 05700

1.03 RELATED SECTIONS

- A. Earthwork.....Section 02201
- B. Asphaltic Concrete Paving.....Section 02511
- C. Sidewalk and Street Paving.....Section 02513
- D. Trench Drains.....Section 02721
- E. Chain Link Fences and Gates.....Section 02831
- F. Early Childhood Playground Equipment.....Section 02860
- G. Outdoor Game Equipment.....Section 02862
- H. Grouting.....Section 03610

1.04 REFERENCES

- A. American Society of Testing and Materials (ASTM) standards, latest editions.
- B. American Concrete Institute (ACI) standards, latest editions.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- C. "Placing Reinforcing Bars - CRSI-WCRSI Recommended Practices", latest edition. Concrete Reinforcing Steel Institute.

1.05 DEFINITIONS

- A. Exposed to view

Situated so that it can be seen from eye level from a public location. A public location is that which is accessible to persons not responsible for operation or maintenance of the building.

1.06 SUBMITTALS

- A. Product Data

Submit manufacturers' information for the following:

1. Admixtures
2. Curing compounds
3. Bonding Agent
4. Welded Wire Fabric
5. Overlaid plyform formwork and formliners
6. Expansion joint filler
7. Expansion joint sealant

- B. Samples

1. 12"x12" samples of the overlaid plyform formwork and formliners.

- C. Shop Drawings

1. Immediately after award of Contract, prepare shop drawings showing all fabrication dimensions and locations for placing of the reinforcing steel and accessories, follow detailing recommendations of ACI 315.
2. Shop drawings checked and approved or disapproved by the Engineer of Record shall not render the

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Engineer responsible for any errors in construction dimensions, quantities, etc. which shall have been made in preparation of the shop drawings.

3. Do not order or deliver reinforcement to job site prior to approval of drawings.

D. Quality Control Submittals

1. Design Data: Submit design mixes for concrete, including list of admixtures to be used, to the Testing Laboratory and the Engineer of Record. After approval and prior to placement, send the approved mix to the Authority's laboratory.

2. Certificates

- a. BSA or MEA approval for the admixtures and cement used.

- b. Concrete producer's certificate must be presented at site before concrete is placed in accordance with paragraph 27-605(c)(2) of the Building Code. Also to be submitted to the Building Department.

- c. The Contractor's superintendent's (the person supervising the concrete work) affidavit that all items have been installed as per the documents. Also to be submitted to the Building Department.

1.07 QUALITY ASSURANCE

A. Qualifications

1. Installer: Company specializing in performing the Work of this Section shall have three years minimum experience.
2. Producer: Company specializing in the production of concrete shall have a minimum of five years experience.

B. Regulatory Requirements

1. Building Code: Work of this Section shall conform to all requirements of the NYC Building Code and

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

all applicable regulations of governmental authorities having jurisdiction including safety, health, noise, and anti-pollution regulations. Where more severe requirements than those contained in the Building Code are given in this Section, the requirements of this Section shall govern.

2. NYC Board of Standards and Appeals (BSA) approvals, or
3. NYC Materials and Equipment Acceptance (MEA) approvals.
4. Industry Standards: The ACI Standards listed under references apply to Work of this Section. Where more severe requirements than those contained in the Standards are given in this Section or the Building Code, requirements of this Section or the Building Code shall govern. The Contractor shall keep a copy of ACI SP-15 - "Field Reference Manual" at the site.

C. Certifications

1. Cast-in-Place Concrete shall conform to the material acceptance, certification, and inspection requirements of Article 7, Chapter 1 - Subchapter 1 and Tables 10-1 and 10-2 of the Building Code (Title 27).
2. Acquire cement and aggregate from same source for all work.

D. Coordination

Coordinate the work of all Divisions so that items to be installed are done so correctly and in proper sequence.

1.08 DELIVERY, STORAGE, AND HANDLING

- A. Protect material from the elements and from other damage on the site before, during, and after installation. Store reinforcement in location to prevent rusting, etc.
- B. Insure proper identification of reinforcement after bundles are broken.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- A. Replace and pay for material and work damaged to the satisfaction of the Authority.
- D. Epoxy-Coated Reinforcing Bars
 - 1. Equipment for handling epoxy-coated bars shall have protected contact areas. Lift Bundles of coated bars at multiple pick-up points to minimize bar-to-bar abrasion from sags in the bundles.
 - 2. Do not drop or drag coated bars or bundles of coated bars. Store coated bars on protective cribbing.
 - 3. Fading of the color of the coating shall not be cause for rejection of epoxy-coated reinforcing bars. Coating damage due to handling, shipment, and placing need not be repaired in cases where the damaged area is 0.1 in² or smaller. Repair damaged areas larger than 0.1 in² in accordance with Article 2.02. The maximum amount of damage, including repaired and unrepaired areas, shall not exceed 2% of the surface area of each bar. Bars with greater than 2% damaged areas will be rejected.

1.09 ENVIRONMENTAL REQUIREMENTS

- A. Adequately protect concrete placed during rain, sleet, or snow, or when the mean daily temperature falls below 40°F or rises above 90°F as provided in Article 3.07.

PART 2 - PRODUCTS

2.01 MATERIALS

- A. Rough Formwork: Shall be Commercial Douglas Fir, DFPA: 5/8" thick minimum.
- B. Overlaid Plyform Formwork: Shall be B-Matte Formguard by Simpson Timber Company.
- C. Smooth Form Finish Formliner: Shall be #340 Smooth Face by Greenstreak.
- D. Release Agent: Shall be chemically reactive agent for coating forms.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- E. Form Ties: Wire ties not permitted. Form ties for exposed concrete shall be adjustable, leave no metal closer than 1 $\frac{1}{2}$ " to the surface, and free of devices which leave holes or depressions larger than 7/8" back of exposed surface.
- F. Reinforcing Bars: All reinforcing bars shall be of deformed type of new billet steel conforming to current requirements of ASTM A615 Grade 60. No rail or re-rolled steel will be permitted. All bars shall be epoxy coated in accordance with ASTM A775.
- G. Welded Steel Wire Fabric: Wire Fabric shall conform to the requirements of ASTM A185. All wire mesh shall be epoxy coated in accordance with ASTM A775.
- H. Supports for Reinforcement: Support for reinforcement supported by ground shall be coated wire bar supports or bar supports made of dielectric material or other acceptable materials or precast concrete block, 4" square minimum, having a compressive strength equal to that of the concrete being placed. Wire bar supports shall be coated with dielectric material for a minimum distance of 2" from the point of contact with the epoxy-coated reinforcing bars.
- I. Cement: Shall conform to ASTM C150 Type II and shall be of the non air-entrained type.
- J. Admixtures
 - 1. The use of admixtures shall comply with the requirements of paragraph 27-608 of the Building Code. The final soluble chloride content in concrete, percent by weight of cement, due to the addition of admixtures and other ingredients shall not exceed 0.10 at 28 days.
 - 2. Air-entraining admixtures shall conform to ASTM C260.
 - 3. Chemical admixtures shall conform to ASTM C494.
- K. Water: Shall be clean New York City water free of injurious foreign matter conforming to the requirements for water specified in ASTM C94.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- L. Aggregate: Aggregate shall conform to ASTM C33, No.67 or No.8. Maximum size of coarse aggregate shall conform to paragraph 3.3.3 of ACI 318.
- M. Curing Compounds: Liquid curing compound shall conform to ASTM C309.
- N. Bonding Agent
 - 1. Epoxy/acrylic resin that will not form a vapor barrier with the concrete with the following properties:
 - a. Bond strength of 1800 psi in 2 hours when tested in accordance with ASTM C882.
 - b. Flexural strength of 2000 psi in 28 days when tested in accordance with ASTM C78.
 - c. Tensile strength of 800 psi in 28 days when tested in accordance with ASTM C190.
 - 2. Bonding agent shall be "CR246 Sto Bonding and Anti-corrosion Agent" by Sto Concrete Restoration Division or Armatec 110 by Sika Corp.
- O. Expansion Joint Filler: Closed-Cell Polyurethane or Closed-Cell Expanded polyethylene Joint Filler - Resilient, compressible, semi-rigid; W.R. Meadow's Ceramar; A.C. Horn's Closed Cell Plastic Foam Filler, Code 5401; Sonneborn's Sonoflex F.
- P. Expansion Joint Sealant: Type 1A Sealant
 - 1. For Horizontal Joints: Two-part, self-leveling polyurethane sealant for traffic bearing construction; Mameco's Vulkem 255, Pecora's Urexpan NR-200, or Bostik's Chem-Calk 550 or Products Research & Chemical's RC-2SL.
 - 2. For Vertical Joints: Two-part, non-sag polyurethane sealant; Mameco's Vulkem 227, Pecora's Dynatrol II, or Bostik's Chem-Calk 500 or Products Research & Chemical's RC-2.

2.03 MIXES

A. General

Concrete for all parts of the Work shall be of the specified quality capable of being placed without excessive segregation and, when hardened, of developing all characteristics required by the Specifications and Drawings.

B. Strength

The minimum compressive strength of the concrete shall be 3500 psi with a minimum cement content of 610 lbs and a maximum water to cement ratio of 0.45. Strength requirements are based on 28-day compressive strength.

C. Method of Proportioning

1. Proportion concrete mix of strength listed in B above in accordance with the requirements of paragraph 27605(c) of the Building Code, "Average Concrete" (Method III). The Testing Laboratory and the Engineer of Record will review the design mix.
2. Pumping of concrete is permitted if a pump mix is designed in accordance with Method I or Method II and approved by the Engineer of Record. Provide a minimum of 1/2 bag extra of cement over the amount required to attain the correct concrete strength for pump mixes.
3. Proportion and produce normal weight concrete to have a maximum slump of 4", prior to addition of high-range water-reducers if used. A tolerance of up to 1" above the indicated maximum shall be allowed for individual batches provided the average for all batches or the most recent 10 batches tested, whichever is fewer, does not exceed the maximum limit. The slump shall be determined by ASTM C143. Concrete containing High Range Water Reducer shall have a slump not exceeding 9", unless other wise approved by the Engineer of Record. The concrete shall arrive at the job site at a slump of 2" to 3".

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

4. Concrete shall be air-entrained with an air content for the grading size of coarse aggregate as follows:

- a. No.8....7¹/₂%
- b. No.67....6%

Tolerance on air content as delivered shall be ±1.5%.

2.04 SOURCE QUALITY CONTROL

A. Tests

- 1. The Engineer of Record will review the proposed materials for compliance with the Specifications prior to construction.
- 2. The Testing Laboratory will perform field tests as work progresses as listed in "Field Quality Control".

B. Inspection

1. Testing Laboratory

- a. Concrete work is subject to semi-controlled inspection in accordance with the requirements of subdivision (b) of Section 27132 of the Building Code.
- b. The Authority will assign, in accordance with subdivision (b) of Section 27607, a licensed concrete testing laboratory to perform the required field testing. The Testing Laboratory will review the mix design, perform field testing, and inspect the work as it progresses. The listing of services to be performed by the testing Laboratory are given in Chapter 16 of ACI 301.
- c. The Testing Laboratory must be present when the concrete is being batched, mixed, and placed.

2. Notification

January 10, 2005

**Soundproofing of
Monsignor McClancy Memorial High School**

- a. Notify the Authority in writing at least seventy-two hours in advance of each concrete placement. The Authority will notify the Testing Laboratory immediately to order out the necessary concrete technicians to cover the work.
 - b. Once the concrete technicians are ordered out and a cancellation follows, the Contractor will be charged One Hundred Fifty Dollars for each technician so ordered to appear, unless a cancellation order is issued to the Laboratory by 3 PM the day before the concrete placement.
 - c. During the placement of the concrete, notify the Authority immediately of any delay at the concrete plant or at the job site. Do not mix concrete or add admixtures unless the Technician is present as per paragraphs 27605(a)(5) and 27-608 of the Building Code.
3. Contractors Responsibility for Quality Control
- a. The Authority shall receive the producer's certificate stating the concrete meets the Specification requirements.
 - b. The tests and inspections, as provided in the Code, do not in any way relieve the Contractor of responsibility to construct the Work in accordance with the Drawings and Specifications and to use safe, standard methods of construction at all times, safeguarding the public, workmen, and structure. The Contractor shall be solely responsible for the physical control of the materials and concrete mixes, and shall see that such mix designs, tests, and controls are in accordance with the Code and Specifications. . The Contractor's superintendent shall attest that the work was installed in accordance with the documents.
 - c. Exercise extreme care in selecting the mixing plant and check whether the plant has the proper equipment. Visit the plant periodically and take whatever steps are necessary to assure the compliance with the

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Contract Documents, the Building Code, and
ASTM C94.

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Prior to placement of concrete, verify that the concrete cover over the reinforcement is that specified on Drawings.
- B. Verify that reinforcement and all other embedded items are provided and held securely, positioned accurately, and will not be a detriment to concrete placement.
- C. Examine all adjoining work on which this Work is in anyway dependent for proper installation and workmanship. Report to the Authority any condition that prevents the performance of this Work.

3.02 PROTECTION

- A. Protect members on grade and the subgrade from freezing before and after installation.
- B. Protect adjacent finish materials and previously poured concrete against spatter during concrete placement.
- C. Provide barricades and safeguards around excavations, etc. to protect workmen and the public from injury and to comply to all Building Code, OSHA, and other authorities having jurisdiction regulations.

3.03 FORMWORK

- A. Provide formwork where ever necessary to confine concrete to the required shapes shown on Drawings. Follow all procedures of Chapter 4 of ACI 301 and ACI 347. Formwork, reinforcement, and embedded items shall be clean of all accumulated mortar from previous concreting and other foreign material. Repair or replace any formwork as required.
- B. Cover the surfaces of the rough or overlaid plyform formwork (when used) with an approved form release agent that will effectively prevent absorption of moisture, prevent bond with the concrete, and which will not stain the concrete surfaces. Do not apply oil or release

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

agents on formwork for concrete to receive additional concrete (such as at construction joints). Apply at a rate that will help achieve the finish specified below. Follow manufacture's recommendations.

- C. Adequately support and substantially brace formwork to hold lines and shape. Securely brace forms against lateral deflection. Formwork shall be tight jointed to prevent leakage of concrete.
- D. Place chamfer strips in the corners of forms to produce beveled edges (chamfers) on permanently exposed surfaces.
- E. Provide "Rough Form Finish" for surfaces not exposed to view. Use dress, square-edged lumber or metal forms coated with a release agent.
- F. Provide "Smooth Form Finish" for surfaces exposed to view and the elements. Use dress, square-edged lumber with form liner or overlaid plyform forms with applicable release agent. Do not exceed manufacture's recommendations for number of re-uses for the form liner or overlaid plyform. Arrange the forms or form liner in an orderly and symmetrical fashion, keeping the number of seams to a practical minimum.
- G. Remove forms in such a manner as to assure the complete safety of the structure. Formwork not supporting the weight of the concrete may be removed as soon as the concrete has hardened sufficiently to resist damage from removal operations and as required by I below.
- H. When repair of surface defects or finishing is required at an early age, remove forms as soon as the concrete has hardened sufficiently to resist damage from removal operations.

3.04 REINFORCEMENT

- A. Place reinforcement in accordance with CRSI "Placing Reinforcement Bars" and Chapter 5 of ACI 301.
- B. Unless otherwise permitted, welding of crossing bars (tack welding) for assembly of reinforcement is prohibited.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- C. Support and fasten together all reinforcement to prevent displacement by construction loads or placing of concrete.
- D. Lifting of bars and welded wire fabric into position during placement of concrete is not permitted.
- E. Where the concrete surface will be exposed to the weather in the finished structure, the portions of all accessories within 1/2" of the concrete surface shall be non-corrosive or protected against corrosion.
- F. Provide minimum protective cover given in Chapter 7 of ACI 318 if not indicated on Drawings.
- G. All splices not shown on the Project Drawings shall be shown on the shop drawings and approved by the Engineer of Record.
- H. All embedment lengths not shown on the Project Drawings shall be shown on the shop drawings and approved by the Engineer of Record.

3.05 PREPARATION

- A. Remove ice, excess water, trash, and rubbish from forms.
- B. Remove hardened concrete from inner surfaces of conveying equipment and all formwork, reinforcement, and dowels.
- C. Prepare previously placed concrete to be in contact with new concrete in the manner described under "Construction Joints".
- A. Prepare existing concrete to be in contact with new concrete by roughening and cleaning the surface and applying a bonding agent. Surface must be free of laitance. Concrete must be placed after agent cures and within 24 hours of applying bonding agent. If time elapses, apply a new application.
- E. Sprinkle semi-porous grades with water to prevent suction and provide concrete seal for porous subgrade.
- F. Do not place concrete on frozen ground.

3.06 JOINTS AND EMBEDDED ITEMS

A. Construction Joints

1. Make joints not shown on Drawings at locations that will least impair the strength of the structure. Such location is subject to the approval of the Engineer of Record.
2. Continue reinforcement across joints. Provide longitudinal keys at least 1½" deep in walls and provide other keys as required.
3. Thoroughly clean concrete surface of oil, grease, and other contaminants and remove all laitance prior to placement of adjoining concrete. Roughen surface of the concrete in an approved manner that will expose the aggregate uniformly and will not leave laitance, loosened particles of aggregate, or damaged concrete at the surface. Dampen surface immediately prior to placement.

B. Expansion Joints

1. Do not extend reinforcement or other embedded metal items bonded to concrete continuously through expansion joint. Provide smooth dowels greased on one end at the joints.
2. Provide premolded expansion joint filler at the joint of the sizes indicated on the Drawings or specified herein.

C. Embedded items

1. Place all fence sleeves, shoes, and other embedded items required for the Work of other Divisions or for their support prior to concreting.
2. Provide ample notice and opportunity for items of other Division to be introduced and/or furnished for installation before concrete is placed. Coordinate the Work of the other Divisions so all items are placed in their proper location.
3. Set metal pipe sleeves, sockets, shoes, etc. into concrete to receive fence posts or any other items, all as indicated on details.

3.07 MIXING AND PLACING CONCRETE

A. General

1. Notify Authority at least 72 hours in advance of each concrete placement. Do not place concrete without approval of the Authority.
1. Do not allow rainwater to increase mixing water nor damage surface finish.
3. When placing concrete in cold weather (below 40°F), concrete shall have an accelerating admixture added.
4. Production of concrete, including batching and mixing, shall be done in accordance with the requirements of Chapter 7 of ACI 301.
5. Placement of concrete shall be done in accordance with the requirements of Chapter 8 of ACI 301. All consolidation shall be done by vibration.

B. Mixing

1. Batch, mix, and transport ready-mixed concrete in accordance with the appropriate sections of ASTM C94. Plant equipment and facilities shall meet the latest standards of the National Ready-Mix Concrete Association (NRMCA).
2. Batch and mix other concrete in accordance with subchapter 7.2 of ACI 301.
2. Use of chemical admixtures must be approved by the Engineer of Record.
3. Unless otherwise approved by the Engineer of Record, concrete shall be deposited within 1½ hours or 300 revolutions of the mixing drum, whichever comes first, after introduction of water to the cement or cement to the aggregate. When the ambient temperature rises above 90°F, the time shall be decreased to 1 hour.
5. Tempering and control of mixing water

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- a. Mix concrete only in quantities for immediate use. Concrete which has started to set shall not be retempered, but shall be discarded.
 - b. When approved by the Engineer of Record, a maximum of 30% of the total water required by the design mix may be withheld from batching at the plant, provided there is an accurate method of measuring the remainder of the water to be added at the site that is approved by the Authority's laboratory.
- C. Placing: Place concrete in accordance with ACI 301 and ACI 304R.
1. Consolidate all concrete by vibration so that the concrete is thoroughly worked around the reinforcement, around embedded items and into corners of forms, eliminating all air or stone pocket or weakness. Internal vibrators shall be the largest size and most powerful that can be used in the Work, as described in Table 5.1.5 of ACI 309R, with a minimum frequency of 7000 revolutions per minute and shall be operated by competent workmen. Over-vibrating and use of vibrators to transport concrete within forms is not permitted. Insert and withdraw vibrators at many points, from 18" to 30" apart. At each insertion, the duration shall be sufficient to consolidate the concrete but not sufficient to cause segregation, generally from 5 to 15 sec duration. Keep a spare vibrator on the job site during all concrete placing operations.
 2. Cold Weather Concrete Protection

When the mean daily temperature of the atmosphere is less than 40°F during concreting, or within 24 hours thereafter, follow the procedures outlined in ACI 306R to protect the concrete. Temperature of the plastic concrete shall be no lower than 55°F. Heat all forms, reinforcing steel, and surfaces to receive concrete above the freezing point and keep them completely free of frost, snow, and ice.
 3. Hot Weather Protection: When the mean daily temperature of the atmosphere is over 90°F during

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

concreting, follow the procedures outlined in ACI 305R to protect the concrete.

3.08 FINISHING OF FORMED SURFACES AND REPAIR OF SURFACE DEFECTS

A. General

1. Remove forms as soon as practicable.
2. Repair surface defects, including tie holes and cracks, immediately after form removal. Patches shall be of quality to match the specified finish.
3. Remove oil, grease, compounds, and other contaminants from surfaces and areas to be repaired.
4. Provide finishes specified below immediately after form removal.
5. Provide curing and protection.

B. Repair of Surface Defects

Repair surface defects in accordance with subchapter 9.2 of ACI 301. At the Authority's discretion, repair mortars and coatings shall be employed to rectify defects. Materials shall be as selected by the Authority.

C. Tie Holes and Other Repairs

1. Remove ties, nails, and other form accessories below the concrete surface when the surface is exposed to view and/or the elements. For surfaces not exposed to view or the above mentioned conditions, remove metal to the surface.
2. Undercut surfaces of holes. After cleaning and thoroughly dampening the holes, fill them solid with the patching mortar. The mortar shall match the color of the existing concrete for concrete exposed to view as specified in paragraph B above.

D. Formed Finishes

1. Rough Form Finish: Provide for concrete not exposed to view.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- a. Repair concrete surface as indicated above.
 - b. Chip or rub off fins exceeding 1/4" in height.
2. Smooth Form Finish: Provide for concrete exposed to view. Concrete shall have a CS 1, CS 2, or CS 3 finish as developed by the Cresset Chemical Company and shall have been placed without the need for patching or removal of fins, etc.
- a. Repair concrete surfaces is indicated above.
 - b. Chip or rub off fins completely and grind smooth.
 - c. Provide smooth rubbed finish as follows:
 1. Produce on newly hardened concrete no later than the day following form removal.
 2. Wet the surfaces and rub with a No. 16 carborundum brick or other equal abrasive to obtain a smooth, even surface of uniform appearance without applying any cement or other coating.
 3. Obtain the final finish by thoroughly rubbing with a No. 30 carborundum brick. The surface shall be wet for a period of 3 days. The Authority shall be the sole judge if the finish is proper.

E. Acceptance of Concrete Finish

If the finish produced is not acceptable to the Authority, the Contractor shall be responsible for all costs incurred to produce an acceptable finish by whatever means determined by the Authority. Remove stains, rust, efflorescence, and other surface deposits to the satisfaction of the Authority.

3.09 PAVEMENTS AND SLABS

A. General

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Mixing and placing shall be carefully coordinated with finishing. Do not place concrete more rapidly than it can be spread, straightedged, and darbied or bull floated. Provide darbying, floating, troweling, etc. at the correct time interval after pouring to prevent dusting and a non-durable surface as specified in ACI 302.1R. These operations must be performed before bleeding water has an opportunity to collect on the surface.
2. To obtain good surfaces and avoid cold joints, the size of finishing crews shall be planned with due regard for the effects of concrete temperature and atmospheric conditions on the rate of hardening of the concrete.

B. Finishing

1. Slope pavements uniformly toward drains. If pitch or elevations are not shown on Drawings, provide a minimum of 1/8" per foot.
2. Finish pavement surface to a true smooth plane by steel troweling and finished by rolling with a toothed roller or float with a wood float. Score concrete pavement in squares of approximately 5'0" and/or as shown on Drawings. Each rectangular slab shall have all edges neatly rounded with proper tools and be bounded on all sides by a troweled border about 1" in width.
3. Level ramp, step and driveway surfaces with wood float and follow with a broom finish perpendicular to direction of traffic.

C. Placement

1. General
 - a. Aggregate base material and preparation is given in Section 02201.
 - b. Where pavements to remain are damaged or destroyed as a result of the Work, patch, repair, or replace as required. Color to match existing.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- c. Subgrade and/or aggregate base shall be free of frost before concrete placing begins.
 - d. Saw cut required joints within 24 hours after placement. Cut into 1/4 depth of slab using 3/16" thick blade.
 - e. Wet subgrade or aggregate base immediately prior to placement of concrete.
 - f. Pour slab to required thickness.
2. Pavements
- a. Provide 4" thick concrete slab unless otherwise indicated.
 - b. Provide 6 x 6 - W2.9 x W2.9 WWF 1 1/2" from top surface.
3. Driveways
- a. Provide 7" thick concrete slab.
 - b. Provide #4 @ 12" placed 2" from surface.
4. Expansion joints
- a. Provide expansion joints for all exterior concrete pavement, slabs under asphalt, driveways, etc. specified under this Section. Expansion joints shall occur at intervals not to exceed 20' in each direction or as indicated on Drawings.
 - b. Provide continuous expansion joints at the following locations: Driveways and other concrete pavements abutting area walls, buildings, retaining or any other walls, check pieces, steps, curbs.
 - c. Expansion joint shall be 1/2" wide, full depth minus 1/4" to allow for the poured joint sealer.

3.10 MISCELLANEOUS CONCRETE WORK

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- A. Provide curbs, footings, walls, ramps, and other miscellaneous concrete work.

3.11 PATCHING AND BONDING TO EXISTING CONCRETE

- A. Provide bonding agent whenever new concrete is to be poured against existing concrete, whenever the time between concrete pours is longer than that allowed for proper bond, and wherever bonding agent is indicated on the Drawings to be applied.
- B. Remove loose concrete from surface to be bonded with new concrete and clean. Remove rust from reinforcement and structural steel by power chipping and power driven brushes.
- C. Apply bonding agent in accordance with manufacturer's specifications. Pour concrete as soon as bonding agent has cured and before 24 hours after placement. If the 24-hour period has elapsed, then the bonding agent must be reapplied.

3.12 CURING AND PROTECTION

- A. General
 - 1. Begin curing concrete immediately after placement and finishing. Protect all freshly deposited concrete from premature drying and excessively hot or cold temperatures and maintain it with minimal moisture loss at a relatively constant temperature for the period of time necessary for the hydration of the cement and proper hardening of the concrete. Detailed procedures are given in ACI 308.
 - 2. Do not apply curing compounds to surfaces receiving additional concrete. Provide only wet curing.
- B. Procedure
 - 1. Concrete surfaces not in contact with forms:
 - a. Ponding or continuous non-manual sprinkling.
 - b. Absorptive mat or fabric, sand, or other covering kept continuously wet.
 - c. Curing compounds conforming to ASTM C309.

2. Concrete surfaces in contact with forms:
 - a. Minimize moisture loss from forms exposed to heating by the sun by keeping forms wet until they are removed.
 - b. After form removal, cure with one of the methods listed in 1 above.
3. Continue curing until a total of 7 days has elapsed during which the temperature of the air in contact with concrete has remained above 50°F. Prevent rapid drying during and at the end of the curing period.

C. Cold Weather Curing

Concrete must be protected from water loss. This shall be accomplished by the application as soon as possible without harm to the concrete surfaces of either (a) exhaust steam, or vapor-resistant paper or polyethylene film, or (b) curing compounds. In all other respects, curing shall conform to applicable provisions of this Section. Concrete temperature shall be maintained between 50°F and 70°F.

D. Hot Weather Curing

1. During the period June 1 to October 1 or when hot weather conditions require it, maintain continuous water curing for a minimum period of twenty-four hours. Provide for wind breaks, shading, and other necessary provisions.
2. After 24 hours, curing shall be by one of the methods specified under B above. In all other respects, curing shall conform to applicable provisions of this Specification. Upon termination of the specified moist curing, every effort should be made to reduce the rate of drying by avoiding air circulation.

- E. Protection from mechanical injury: Protect concrete from mechanical disturbances during curing period as described under "Protection and Cleaning".

3.13 TOLERANCES

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- A. Construct formwork so that concrete surfaces will conform to the tolerance limits listed in Table 4.3.1 of ACI 301.
- B. Establish and maintain in an undisturbed condition and until final completion and acceptance of the project sufficient control points and bench marks to be used for reference purposes to check tolerances.
- C. Place reinforcing bars in accordance with the tolerances given in paragraph 5.6.2 of ACI 301.
- D. Move bars as necessary to avoid interference with other reinforcement, conduits, or imbedded items. If bars are moved more than one bar diameter, or enough to exceed the above tolerances, the resulting arrangements are subject to approval by the Engineer of Record.

3.14 FIELD QUALITY CONTROL

A. Tests

Tests to be performed by the Authority's Testing Laboratory during construction are as follows:

1. Compliance of materials to Specifications tested from production samples.
2. Determination of the slump of the concrete for each sample taken and whenever consistency of the concrete appears to vary using ASTM C143. The Testing Laboratory will reject any concrete that does meet the slump requirements.
3. Determination of water content of freshly mixed concrete utilizing the procedure of AASHTO TP23. Concrete that does not meet the maximum water to cement ratio or the proportions given in the approved design mix will be immediately rejected regardless of slump.
4. Strength tests on the specimens in accordance with ASTM C39. The minimum number of specimens to be taken daily will conform to ACI 318-89 paragraph 4.7 as modified by the Building Code except that four (4) test cylinders will be molded for each 50 cubic yards, or portions thereof, of concrete placed in any one day's concreting. Specimens will be stored at the site in the insulated curing box provided by the Contractor. Each group of specimens is considered one strength test. Three cylinders shall be tested at 28 days for acceptance and one at 7 days for information. If one specimen in a test manifests evidence of improper sampling, molding, or testing, it shall be discarded and the average strength of the remaining cylinders shall be considered the test result. Should all specimens in a test show any of the above defects, the entire test shall be discarded.
5. Determination of air content and unit weight of concrete sample for each strength test in accordance with ASTM C173 or C231 and ASTM C138.
6. Determination of temperature of concrete sample for each strength test.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

7. Determination of water soluble chloride content in the concrete, percent by weight of cement, of each sample.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

B. Inspection

1. Refer to "Source Quality Control" for responsibility and procedure.
2. Keep a record of all inspections, the name of the persons making them, and the name of the foreman in charge of formwork at the site. Submit to the Authority's representative on the site a copy of the inspection records prior to each concrete placement.
3. The Contractor shall cooperate in the making of all tests by the Laboratory Technician by:
 - a. Providing an insulated curing box of sufficient size and strength to contain all specimens made in any four consecutive working days and meeting all the requirements of paragraph 27607(a)(1) of the Building Code. The Contractor shall furnish an outlet to provide the necessary temperature in the storage box, pending delivery to the Laboratory of the test cylinders.
 - b. Providing a buggy for transporting the concrete taken from the mixer (and/or point of placement) to the location of the curing box for testing and the preparation of specimens.
 - c. Protecting the property of the Laboratory and keeping test specimens free from vibration and other disturbances as specified in paragraph 27607(a)(1).
 - d. Providing a microwave of the size specified in AASHTO TP23 and a portable generator.

C. Evaluation and Acceptance of Concrete

1. Strength tests on concrete will be evaluated according to ACI 318-89, paragraph 4.7 as modified by the Building Code by the Engineer of Record. If the tests fail, the adequacy of the concrete will be checked according to the requirements of paragraph 27-597 of the Building Code. Concrete exposed to the elements with indications of poor

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

durability will be rejected regardless of strength.

2. Pay for additional costs of labor and materials required at the job for all damages resulting from testing. Remove and replace concrete work that is not of adequate strength or weather resistance and cannot be made to work by remedial methods acceptable to the Authority at own cost. The Contractor shall be held responsible for all delays and damages to the work of other Divisions that occur as a result of non-conformance.
3. Pay for all expenses borne by the Authority resulting from low strength test procedures or evidence of poor durability (such as high slump) specified above.

3.15 PROTECTION AND CLEANING

- A. During the curing period, and thereafter as conditions may require, protect the concrete from damaging mechanical disturbances, particularly excessive load stresses, heavy shock, and excess vibration. Protect all finished concrete surfaces from damage caused by construction equipment, materials or methods, and by rain or running water.

3.16 ACCEPTANCE OF CONCRETE WORK

- A. The provisions of Chapter 18 of ACI 301 apply to the acceptance of the concrete work.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 02831
TEMPORARY CHAIN LINK FENCES AND GATES

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide Contractor's staging area temporary chain link fence and gate work as indicated on the Drawings and specified herein.

1.02 PRODUCTS FURNISHED BUT NOT INSTALLED UNDER THIS SECTION

- A. Pipe sleeves for casting into concrete.....Section 03300

1.03 RELATED SECTIONS AND WORK

 - F669 Standard Specification for Strength Requirements of Metal Posts and Rails for Industrial Chain Link Fence.
 - F1234 Standard Specification for Protective Coatings on Steel Framework for Fences

1.05 SUBMITTALS

A. Shop Drawings

Furnish complete layout of fences, giving post spacing, and other pertinent information, for approval prior to erection.

B. Samples, three (3) of each:

Posts, rails, tie wire, wire fabric, fittings, and other accessory items for approval prior to erection.

C. Quality Control Submittals

Furnish materials list indicating the ASTM for each item supplied and certification stating that fencing materials installed comply with the requirements of ASTM Specifications referred to herein.

1.06 QUALITY ASSURANCE

A. Qualifications

1. Installer: Company specializing in the installation of the type of fence work specified herein shall have a minimum of 3 years successful experience.

2. Manufacturer: Company specializing in the manufacture of the type of fence work specified herein shall have a minimum of 5 years successful experience.

B. All fencing items shall be produced by a single manufacturer.

1.07 DELIVERY, STORAGE AND HANDLING

A. Deliver, store, and handle fence work materials as recommended by the manufacturer to protect from damage.

PART 2 - PRODUCT

2.01 FENCING

A. Material

1. Framework: Fences shall have a framework

consisting of uprights and horizontal members conforming to ASTM F669, Group IC, of sizes shown on the Drawings. Connect with malleable cast iron or pressed steel fittings conforming to ASTM F626, not less than 3/16" thick, and 3/8" minimum diameter bolts conforming to ASTM A307. Pipe sizes are as indicated on the Drawings.

2. Fence Fabric: Fence fabric shall be chain link woven steel wire conforming to ASTM A392 of gage and mesh size shown on Drawings.
3. Wire Ties: Steel and aluminum wire ties shall conform to ASTM F626. Steel ties shall be 9-gage minimum and aluminum ties 6-gage minimum.

B. Galvanizing

1. Posts and rails shall be hot-dip galvanized in accordance with ASTM F1234 Type A, except that the weight of zinc coating shall be 2.0 oz per sq ft.
2. Fittings shall be hot-dip galvanized in accordance with ASTM F626, except that the weight of zinc coating shall be 2.0 oz per sq ft.
3. Wire fabric shall be hot-dip galvanized after weaving in accordance with ASTM A392 Class II, weighing 2.0 oz per sq ft of wire surface.
4. Bolts shall be hot-dip galvanized in accordance with ASTM A153.

2.02 GATES

- A. Construct of same materials and finishes as the fences; members shall be securely assembled and connected as indicated on Drawings.
- B. Provide threaded, slip fittings or welded frame for the construction of the gates as indicated on the Drawings.
- C. All gates shall be braced with truss rods and turnbuckles as indicated on the Drawings.

2.03 LOCKING DEVICE

- A. All locking devices for gates shall be on the external side of the gates.
- B. All gates shall be so arranged that they can be locked

when closed and locked back to the fence when open.

2.04 PADLOCKS

- A. Furnish padlocks for new gates. Locks to be set up alike: Furnish five (4) keys to the Director of Buildings & Grounds.
- B. Padlock case shall be of 1³/₄" extruded brass, cornered elliptical shape. The width of the case shall be 1³/₄", the depth 1⁹/₃₂" and the thickness 13/16". The shackle shall be of hardened steel cadmium plated with a diameter of 11/32". The width of the opening of shackle from the top of the case to the inside of the shackle shall be 29/32". The shackle shall lock at both the toe and the heel.
- C. Cylinder shall be capable of being keyed alike.
- D. Padlocks shall have 14 gage steel wire chains 9" long attached to lock and riveting pins with rivets and clevis. Chains, rivets, clevis and riveting pins shall be hot dipped galvanized or cadmium plated. Chains shall be galvanized after fabrication.

PART 3 - EXECUTION

3.01 ERECTION

- A. Check each post for vertical and top alignment and hold in position during placement and finishing operations.
- B. Set framework plumb, with the uprights placed in sleeves cast in footings and set in with non-shrink grout. Completely fill sockets with grout, crowning the grout to shed water away from the posts.
- C. Space uprights at not more than 10' on center, and set rails at the various heights shown.
- D. Where gates occur, provide additional rails and tie rods with the gate posts and fence posts as indicated on the Drawings.
- E. Anchor bottom rail of the fence down between posts.
- F. Secure fence fabric to the framework as follows:
 - 1. Top portion of Fence: Secure to framework with aluminum wire with telegraph splice (no less than three turns). Space wire 16" on centers for both

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

posts and rails.

2. Bottom portion of fence: Secure to framework with galvanized steel wire with telegraph splice (no less than one turn). Space wires 12" on center on posts and 16" on center on rails.

- G. Knuckle the fence fabric of fences at the top and bottom.

3.02 FIELD TOUCH-UP

- A. Prior to installation of fence post, touch up fence sleeves coating damaged during installation and cut surfaces with repair paint listed in B below.
- B. After installation is complete, touch-up all fencing members damaged during transportation and erection using galvanizing repair paint conforming to ASTM A780.

3.03 TEMPORARY CHAIN LINK FENCE AND GATE REMOVAL

- A. At the completion of the project, remove and dispose of off site, fencing, gates and post foundations.
- B. Restore/patch holes in existing asphalt pavement at fence post foundation as indicated on the Drawings.

END OF SECTION

SECTION 02900
LANDSCAPING

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide all landscaping Work as indicated on the Drawings and as specified herein.

1.02 RELATED SECTIONS

- A. Site Preparation.....Section 02100
- B. Earthwork - (General excavation at seeded, sodded, planted, trees and shrubbery areas).....Section 02200

1.03 REFERENCES

The following specifications and standards listed below, but referred to thereafter by basic designation only, form a part of this specification to the extent indicated by the references thereto:

- A. American Joint Committee on Horticultural Nomenclature:
Standard Plant Names (Current Edition).
- B. American Association of Nurserymen:
Horticultural Standards (Current Edition).
- C. American National Standards Institute (ANSI).
- D. U.S. Department of Agriculture.
- E. Federal Specifications (FS).
- F. Association of Official Agriculture Chemists.

1.04 SUBMITTALS

- A. Qualifications

Submit for approval the name of the firm performing the Work of this Section; list experience and qualifications.

- B. Planting Schedule

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Before commencing planting submit a proposed schedule of delivery and planting of grass for approval.

C. Topsoil

Submit testing reports specified in Part 2.

1.05 QUALITY ASSURANCE

- A. A single landscaping firm with a minimum of 5 years of successful landscaping work shall perform the Work of this Section.
- B. For packaged materials, include manufacturer's certified analysis. For other materials, provide an independent reputable laboratory analysis, made in compliance with Association of Official Agriculture Chemists methods.
- C. Make no substitutions for materials specified and scheduled, without prior approval by the MMMHS Representative.
- D. Provide natural top soil from a recognized acceptable source.

1.06 RECEIPT OF MATERIALS

- A. Furnish a receipt for all bulk deliveries of top soil and humus, brought to job each day, prior to unloading.
- B. Provide tags on all bags identifying material and weight for all bagged items delivered to job.
- C. Material not complying with above requirements will not be accepted.

1.07 GUARANTEE

- A. Seeding is subject to the one year Guarantee requirements set forth in the Contract for the entire work of this Contract, provided that Landscaping has been completed and accepted at the start of the Contract Guarantee period.
- B. At the end of this period all seeding that is dead or in a dying condition shall be replaced.
- C. Inspect the plant material during the one year guarantee period, in order to ascertain that the material is receiving the proper care by the MMMHS.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- D. If the Contractor is of the opinion that the care and watering given the grass, by the MMMHS, is insufficient or may cause them to die prematurely, the Contractor shall immediately, and in sufficient time to permit the condition to be satisfactorily rectified, notify the MMMHS in writing, otherwise no consideration will be given such claims.

1.08 DELIVERY, STORAGE AND HANDLING

- A. Deliver packaged materials in unopened packages or containers, labeled with manufacturer's name, name of product, and other pertinent information.
- B. Storage of materials on site shall be in areas approved by the MMMHS Representative.

PART 2 - PRODUCT

2.01 MATERIALS

A. Topsoil

1. New topsoil: natural topsoil of good, rich, uniform quality, free from a mixture of subsoil, weeds, clay lumps, brush, poison ivy roots and other undesirable material harmful to plant growth. Meet the following requirements:

- a. pH: 5.0 to 7.0 inclusive
- b. Organic Matter: 7% (loss on ignition)
- c. Specific Conductance: less than 2,000 microohms/cm
- d. Texture: sandy loam
- e. Good internal rate of percolation
- f. Clay content: 10%-20%
- g. Sieve Analysis, as follows:

<u>Sieve Size</u>	<u>%Passing</u>
1"	100%
½"	97%
#10	60-80%
#40	40-60%
#60	40-60%
#100	10-30%
#200	10-20%

2. Include the following information in soil testing reports:
 - a. Color
 - b. pH
 - c. Specific Conductance: Micro-ohms/cm
 - d. Organic Matter (loss on ignition)
 - e. Texture
 - f. Mechanical Analysis: % passing 1", ½", #10, #40, #60, #100 and #200 sieves.
 - g. Available nutrients.
 - h. Corrective recommendations in lbs/AC for nutrients and pH.

2.02 COMMERCIAL FERTILIZER

- A. Commercial Fertilizer shall have the following composition by weight:

Nitrogen 10%; Phosphoric Acid 6%; Potash 4%; these elements may be organic, inorganic or a combination, and shall be available according to the methods adopted by the Association of Official Agricultural Chemists. The nitrogen content shall have 50% total from approved organic sources.

- B. The MMMHS reserves the right to reject on, or after, delivery any material which does not, in its opinion, meet these specifications.
- C. All Commercial Fertilizer shall be delivered in standard size bags of manufacturer, showing weight, analysis and name of manufacturer. It shall be stored in such a manner that its effectiveness will not be impaired.

2.03 GROUND LIMESTONE (Calcium Carbonate)

- A. At least 50% of the material shall pass through a 200 mesh sieve and at least 90% shall pass through a 100 mesh sieve and 100% shall pass through a 10 mesh sieve. For purposes of calculation, total carbonates shall be considered as calcium carbonate. The total carbonates shall be not less than 80%, or 44.8% calcium oxide

equivalent.

- B. Deliver the ground limestone in standard size bags of the manufacturer showing weight, analysis and name of the manufacturer. Store in a manner to ensure preservation of its qualities and fitness for the work.

2.04 GRASS SEED

- A. All grass seed shall be fresh, recleaned grass seed of the latest crop mixed in the following proportions by weight and meeting the following standards of pure live seed (P.L.S.) content, purity and germination.

Grass	P.L.S.	Max. Weed Seed
40% Creeping Red Fescue (Illahee Strain)	90%	0.50%
30% Kentucky Bluegrass.....	80%	0.50%
10% Red Top (Fancy recleaned).....	85%	1.00%
20% Blue Tag Perennial Rye.....	88%	0.50%

- B. Present a certificate of P.L.S. test of the grass seed intended for use, obtained from a well recognized seed test laboratory that is not engaged in the business of selling seeds. This certificate shall state the true quality of the seeds which the Contractor proposes to furnish.
- C. Grass seed shall meet the tolerance for germination and purity according to the standards tabulated on pages 22 and 23 of U.S. Department of Agriculture, Service and Regulatory Announcements No. 156. Deliver all grass seed in sealed bags of the vendor showing the weight, analysis and vendor's name.

PART 3 - EXECUTION

3.01 PLANTING TIME

- A. Grass
Seed.....March 15 - May 1 Aug. 15 - Oct. 1

3.02 PLANTING OPERATIONS

- A. In general planting shall be done only in periods specified in Par. 3.01, unless otherwise directed by the MMMHS Representative.

3.03 LAYING TOPSOIL

- A. Clear the sub-soil upon which topsoil is to be placed of all stones, woody roots, rubbish and other objectionable matter, scarify the surface thoroughly and loosen to a depth of at least 4"; spread the topsoil to a smooth even surface and to the depth required, then rake or otherwise manipulate to form smooth drainage grades to levels to meet the existing adjacent grades.
- B. Deposit topsoil and spread to a minimum depth of 8" over earth where seeded areas are indicated on the Drawings.

3.04 SEEDING

- A. After topsoil has been placed, rake all areas indicated on the Drawings or specified to be seeded to true lines, free from all unsightly variations, bumps, ridges and depressions. Remove all sticks, stones, roots, and other objectionable material which might interfere with the formation of a finely pulverized seed-bed from the soil.
- B. Thoroughly roll the prepared lawn area with an approved lawn roller and level all low spots.
- C. Apply ground limestone at the rate of 46 pounds per thousand square feet and evenly distribute and work lightly into the top of the soil to a depth of 3" either by hand or by machine at least 5 days before applying commercial fertilizer.
- D. Apply acceptable Commercial Fertilizer at a rate of 25 pounds per thousand square feet and work lightly in to the top 3" of topsoil.
- E. The rate of seeding shall be 5 pounds per thousand square feet. Sew the grass seed by approved machine in such a manner that a uniform stand shall result. After seeding, evenly rake the surface with a fine-toothed rake and roll with approved roller weighing at least 200 pounds.
- F. Sew grass seed only in periods listed in Par. 3.01 or at such other times as are approved by the MMMHS Representative. All seeding is to be done in dry or moderately dry soil and at times when the wind does not exceed a velocity of 5 miles per hour.

3.05 GROUND LIMESTONE

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- A. Distribute the ground limestone evenly over all lawn, areas by machine at least five (5) days before applying Commercial Fertilizer. The ground limestone shall be incorporated with the soil as specified under Par. 3.04 - "SEEDING".

3.06 COMMERCIAL FERTILIZER

- A. Add to all seeded areas at the rate of 25 lbs. per thousand square feet and work lightly into top 3" of top soil.

3.07 WATERING

- A. Thoroughly saturate the soil with water at the time of planting, and as many times later as seasonable conditions require, until acceptance of the work.

3.08 MAINTENANCE OF SEEDING

- A. Maintain all seeded areas until final acceptance of the Contract and provide regrading, refertilizing, reseeding as required to keep area healthy and neat in appearance. After the grass is started, any parts or areas which fail to show a uniform stand, for any reason whatsoever, shall be reseeded with the same mixture as originally used, and such reseeding shall be repeated until all required areas are covered with grass. Reseeding shall be carried on only during the seeding periods.
- B. Properly water, mow and otherwise maintain all seeded areas throughout the life of the contract, and until Work is accepted. Maintain the grass at a maximum height of 2-1/2".

3.09 ACCEPTANCE OF THE WORK

- A. Maintain all landscaping installed until acceptance is granted upon total completion of planting. Maintenance includes cutting of grass and all other plant operations.
- B. Acceptance shall be granted upon a healthy growth and a complete stand of grass in all lawn areas.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 03200
CONCRETE REINFORCEMENT

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide and install all reinforcement and associated items required for cast-in-place concrete and reinforced masonry.

1.02 RELATED SECTIONS

- A. Concrete Formwork.....Section 03100
- B. Cast-in-Place Concrete.....Section 03300
- C. Unit Masonry.....Section 04200

1.03 REFERENCES

- A. American Society of Testing and Materials (ASTM) standards, latest editions.
 - A82 Standard Specification for Steel Wire, Plain, for Concrete Reinforcement.
 - A184 Standard Specification for Fabricated Deformed Steel Bar Mats for Concrete Reinforcement.

 - A615 Standard Specifications for Deformed and Plain Billet-Steel Bars for Concrete Reinforcement.
 - A775 Standard Specification for Epoxy-Coated Reinforcing Steel Bars.
- B. American Concrete Institute (ACI) standards, latest editions.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- ACI 301 "Specification for Structural Concrete for Buildings."
- ACI 315 "Details and Detailing of Concrete Reinforcement."
- ACI 318 "Building Code Requirements for Reinforced Concrete (RS 10-3 of the NYC Building Code).
- C. "Placing Reinforcing Bars - CRSI-WCRSI Recommended Practices", latest edition. Concrete Reinforcing Steel Institute.
- D. "Structural Welding Code - Reinforcing Steel" D1.4 - American Welding Society (AWS).
- E. "Near-White Blast Cleaning" SSPC-SP10 - Steel Structures Painting Council (SSPC).

1.04 DESIGN REQUIREMENTS

- A. Development lengths (and thereby splices) of epoxy-coated bars shall be increased 1.5 over the values given in ACI 318-89 for non-coated bars.

1.05 SUBMITTALS

A. Product Data

Submit manufacturers' information for the following:

- 1. Steel welded wire fabric
- 2. Supports
- 3. Mechanical connectors

B. Shop Drawings

- 1. Immediately after award of Contract, prepare shop drawings showing all fabrication dimensions and locations for placing of the reinforcing steel and accessories.
- 2. Follow detailing recommendations of ACI 315.
- 3. Submit drawings gradually and not all at the same time so that sufficient time is allowed for

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

checking and approval. Improperly prepared and incomplete shop drawings will be disapproved without review.

4. Shop drawings checked and approved or disapproved by the Engineer of Record shall not render the Engineer responsible for any errors in construction dimensions, quantities, etc. which shall have been made in preparation of the shop drawings.
5. Do not order or deliver reinforcement to job site prior to approval of drawings.
6. Indicate location of epoxy-coated bars on the drawings.

C. Samples

1. Submit an 8 oz sample of the epoxy coating material from each batch for approval. Package the sample in an airtight container and identify by batch number.
2. Submit a sample of the epoxy patching material for approval. The patching material shall be compatible with the coating material and meet the requirements of ASTM A775 Annex A1.

D. Certificates

1. Submit certificate stating that reinforcement meets or exceeds the specified requirements.
2. Submit certification that properly identifies the number of each batch of epoxy coating material used on the project, material, quantity represented, date of manufacture, name and address of manufacturer and a statement that the supplied epoxy-coated reinforcing bars meet the requirements of this specification and the requirements of ASTM A775 including Annex A1.

1.06 QUALITY ASSURANCE

A. Qualifications

Company specializing in performing the Work of this Section shall have three years minimum experience.

B. Regulatory Requirements

1. Building Code

Work of this section shall conform to all requirements of the NYC Building Code. As per paragraph 27-604, "Identification of metal-reinforcement", deliveries will be rejected unless:

- a. All reinforcing bars are identifiable as to point of origin, grade of steel and size.
- b. All bundles or rolls of cold drawn steel wire reinforcement are securely tagged to identify the manufacturer, the grade of steel and the size.

Where more severe requirements than those contained in the Building Code are given in this Section and ACI 318, the requirements of this Section and ACI 318 shall govern:

2. Industry Standards

Details of Concrete reinforcement not covered herein shall be in accordance with "Building Code Requirements for Reinforced Concrete" (ACI 318) and "Details and Detailing of Concrete Reinforcement" (ACI 315), latest editions and the Concrete Reinforcing Steel Institute Manual on "Placing Reinforcing Bars" (CRSI-76).

1.07 DELIVERY, STORAGE, AND HANDLING

- A. Store in location to prevent rusting, etc.
- B. Protect reinforcement before, during, and after installation.
- C. Insure proper identification after bundles are broken.
- D. Epoxy-Coated Reinforcing Bars
 1. Equipment for handling epoxy-coated bars shall have protected contact areas. Lift Bundles of coated bars at multiple pick-up points to minimize bar-to-bar abrasion from sags in the bundles.

2. Do not drop or drag coated bars or bundles of coated bars. Store coated bars on protective cribbing.
3. Fading of the color of the coating shall not be cause for rejection of epoxy-coated reinforcing bars. Coating damage due to handling, shipment, and placing need not be repaired in cases where the damaged area is 0.1 in² or smaller. Repair damaged areas larger than 0.1 in² in accordance with Article 2.02. The maximum amount of damage, including repaired and unrepaired areas, shall not exceed 2% of the surface area of each bar. Bars with greater than 2% damaged areas will be rejected.

PART 2 - PRODUCTS

2.01 MATERIALS

A. Non-coated Reinforcing Bars

1. All non-coated reinforcing bars shall be of deformed type of new billet steel conforming to current requirements of ASTM A615. No rail or re-rolled steel will be permitted.
2. Grade or yield strength of reinforcing bars are indicated on Drawings.

B. Welded Steel Wire Fabric

1. Wire Fabric shall conform to the requirements of ASTM A185.
2. Required net area, placement details, and other requirements are indicated on Drawings.

C. Epoxy-Coated Reinforcing Bars

1. All steel reinforcing bars to be coated shall be of deformed type of new steel conforming to current requirements of ASTM A615. Bars shall be free of contaminants such as oil, grease or paint. No rail or re-rolled steel will be permitted.
2. Grade or yield strength of reinforcing bars are indicated on Drawings.

3. Bars shall be epoxy-coated in accordance with ASTM A775.
4. The coating material shall be of organic composition meeting the requirements listed in ASTM A775 Annex A1 entitled "Requirements for Organic Coating." Resistance to chemicals, applied voltage, chloride permeability, flexibility, bond strength, abrasion resistance, impact, and hardness shall be tested in accordance with Annex A1.

D. Supports for Reinforcement

1. Non-coated Reinforcement

- a. Supports for reinforcement supported by formwork or deck shall consist of metal bolsters and chairs of adequate strength, size, and number. Provide CRSI Class C supports (plastic tipped) for formed concrete surfaces and Class A (bright basic) for metal deck.
- b. Supports for reinforcement of slabs supported by ground shall consist of above supports with sand plates or horizontal runners. Support for reinforcement of footings/ pilecaps shall consist of the above supports or precast concrete block, 4" square, having a compressive strength equal to that of the concrete being placed.

2. Epoxy-coated Reinforcement

- a. Epoxy-coated reinforcing bars supported from formwork shall rest on coated wire bar supports, or on bar supports made of dielectric material or other acceptable materials. Wire bar supports shall be coated with dielectric material for a minimum distance of 2" from the point of contact with the epoxy-coated reinforcing bars.
- b. Reinforcing bars used as support bars shall be epoxy-coated. In walls having epoxy-coated reinforcing bars, spreader bars, where specified on the Drawings or shop drawings,

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

shall be epoxy-coated. Proprietary combination bar clips and spreaders used in walls with epoxy-coated reinforcing bars shall be made of corrosion-resistant material.

E. Tie Wire

Tie wire for fastening epoxy-coated reinforcing bars shall be nylon-epoxy, plastic-coated, or other material acceptable to the Authority.

2.02 FABRICATION

A. General

Fabricate reinforcing bars in accordance with fabricating allowances given in ACI 315.

B. Epoxy-Coated Bars

1. Surface Preparation

Clean the surface of the steel reinforcing bars to be coated by abrasive blast cleaning to near-white metal in accordance with SSPC-SP10.

2. Application of Coating (In Shop)

a. Apply the coating to the cleaned surface as soon as possible after cleaning and before oxidation of the surface discernible to the unaided eye occurs. However, in no case delay application of the coating more than 8 hours after cleaning.

b. The coating shall be applied by the Electrostatic Spray Method and fully cured in accordance with the recommendations of the manufacturer of the coating material.

c. Coat ends of bars in accordance with the manufacturer's standards.

3. Thickness of Coating Material
 - a. The film thickness of the coating after curing shall be 5 to 12 mils inclusive. Take a minimum of 15 measurements approximately evenly spaced along each side of the test bar. At least 90% of these measurements shall be within the specified limits.
 - b. Test the thickness of the film coating in accordance with ASTM G12.
4. Coating Repair: Repair coating damage due to fabrication or handling in cases where damaged area is 0.1 in² or greater. Repair all damaged areas larger than 0.1 in² with patching material. The maximum amount of damage shall not exceed 24% of the surface area of each bar. Patch in accordance with the patching material manufacturer's recommendations. Repair ends of bars cut in the field with the patching material.
5. Bending of Epoxy-Coated Reinforcement: Bend all epoxy-coated reinforcement cold unless otherwise approved by the Authority. When epoxy coated reinforcement bars are field or shop bent, repair coating damage in accordance with paragraph B.4 above. Rollers of bending apparatus shall have neoprene collars.

2.03 SOURCE QUALITY CONTROL

- A. The Authority shall have the right to inspect the material at all times while work on the Contract is being performed. Epoxy-coated reinforcing bars that do not meet the requirements of this Specification will be rejected. Replace all rejected bars at no cost to the Authority.

PART 3 - EXECUTION

3.01 PLACEMENT

- A. General
 1. Place reinforcement in accordance with CRSI "Placing Reinforcement Bars."

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Unless otherwise permitted, welding of crossing bars (tack welding) for assembly of reinforcement is prohibited.
3. Avoid cutting or puncturing vapor barrier during placement.

B. Supports

1. Support and fasten together all reinforcement to prevent displacement by construction loads or placing of concrete.
2. Provide supports specified in Article 2.01.
3. Provide Continuous High Chair Upper (CHCU) or Continuous Support (CS) for welded wire fabric in the metal deck and place every four feet (4') parallel to the supporting beams.
4. Lifting of bars and welded wire fabric into position during placement of concrete is not permitted.
5. Where the concrete surface will be exposed to the weather in the finished structure, the portions of all accessories within 1/2" of the concrete surface shall be non-corrosive or protected against corrosion.

C. Cover

Provide minimum protective cover given in Chapter 7 of ACI 318 if not indicated on Drawings.

D. Splices

1. All splices not shown on the Project Drawings shall be shown on the shop drawings and approved by the Engineer of Record.
2. Welded splices - Provide where indicated on Drawings. All welding shall conform to AWS D1.4.
 - a. Provide suitable ventilation when welding epoxy-coated reinforcing bars.

- b. After completion of welding on epoxy-coated reinforcing bars, repair coating damage in accordance with Article 2.02. All welds, and all steel splice members when used to splice bars, shall be coated with the same material used for repair of coating damage.

3. Mechanical Connectors

- a. Provide where indicated on Drawings. Install in accordance with splice device manufacturer's recommendations.
- b. After installing mechanical connectors on epoxy-coated reinforcing bars, coating damage shall be repaired in accordance with Article 2.02. All parts of mechanical connectors used on coated bars, including steel splice sleeves, bolts, and nuts shall be coated with the same material used for repair of coating damage.

E. Embedment Lengths

All embedment lengths not shown on the Project Drawings shall be shown on the shop drawings and approved by the Engineer of Record.

3.02 FIELD CUTTING

- A. When epoxy-coated reinforcing bars are cut in the field, coat the ends of the bars with the same material used for repair of coating damage.

3.03 TOLERANCES

- A. Place reinforcing bars in accordance with the tolerances given in paragraph 5.6.2 of ACI 301.
- B. Move bars as necessary to avoid interference with other reinforcement, conduits, or imbedded items. If bars are moved more than one bar diameter, or enough to exceed the above tolerances, the resulting arrangements are subject to approval by the Engineer of Record.

3.04 FIELD QUALITY CONTROL

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- A. Under the requirements of paragraph 27-607, the Authority will designate an Engineer for Controlled Inspection to inspect the size and placement of reinforcement. A record will be made of all inspection of reinforcement at the bending bench and in place.
- B. Do not proceed with the completion of wall forms until all reinforcement has been approved and recorded by the Authority's representative.
- C. Do not proceed with concreting until all reinforcing in place has been approved and recorded.
- D. Promptly correct all reinforcement displaced during pouring of concrete.
- E. Damaged reinforcement shall not be used.

3.05 CLEANING

- A. Steel reinforcement shall be free of all rust, scale, oil, paint, grease, loose mill scale, and all other foreign matter that will prevent bonding of concrete and steel just prior to pouring of concrete.

END OF SECTION

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 03300
CAST-IN-PLACE CONCRETE

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Furnish material, equipment, labor, services required to provide for cast-in-place concrete. Work includes but is not limited to structural, sitework, and slabs. Grouting is part of the Work of Section 03610.

1.02 PRODUCTS INSTALLED BUT NOT FURNISHED UNDER THIS SECTION

- A. Fence sleeves for chain link fence.....Section 02831

1.03 RELATED SECTIONS AND WORK

- A. Chain Link Fences and Gates.....Section 02831

1.05 DEFINITIONS

A. Exposed to view

Situated so that it can be seen from eye level from a public location. A public location is that which is accessible to persons not responsible for operation or maintenance of the building.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

B. Normal weight concrete

Concrete for which density is not a controlling attribute, made with aggregates of the types covered by ASTM C33 and usually having unit weights in the range of 135 to 160 lb/ft³.

1.06 SUBMITTALS

A. Product Data

Submit manufacturers' information for the following:

1. Admixtures
2. Curing compounds
3. Hardener
4. Bonding Agent

B. Quality Control Submittals

1. Design Data: Submit design mixes for concrete, including list of admixtures to be used, to the Testing Agency, the Engineer for Controlled Inspection, and the Architect of Record. Design mix for lightweight concrete shall include both the dry and saturated (SSD) weights of the aggregate.
2. Test Reports: Strength Test Report (28 day) for preliminary trial mix (with all admixtures).
3. Certificates
 - a. BSA or MEA approval for the admixtures and cement used.
 - b. Admixture manufacturer's certificate stating the maximum water soluble chloride content in the concrete, percent by weight of cement, the use of the admixture will yield.
 - c. Concrete producer's certificate must be presented at site before concrete is placed in accordance with paragraph 27-605(a)(5) of the Building Code.

1.07 QUALITY ASSURANCE

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

A. Qualifications

1. Installer: Company specializing in performing the Work of this Section shall have three years minimum experience.
2. Producer: Company specializing in the production of concrete shall have a minimum of five years experience and shall be New York State DOT approved.

B. Regulatory Requirements

1. Building Code: Work of this Section shall conform to all requirements of the NYC Building Code and all applicable regulations of governmental authorities having jurisdiction including safety, health, noise, and anti-pollution regulations. Where more severe requirements than those contained in the Building Code are given in this Section, the requirements of this Section shall govern.
2. NYC Board of Standards and Appeals (BSA) approvals, or
3. NYC Materials and Equipment Acceptance (MEA) approvals.
4. Industry Standards: The ACI Standards listed under references apply to Work of this Section. Where more severe requirements than those contained in the Standards are given in this Section or the Building Code, requirements of this Section or the Building Code shall govern. The Contractor shall keep a copy of ACI SP-15 - "Field Reference Manual" at the site.

C. Certifications

1. Cast-in-Place Concrete shall conform to the material acceptance, certification, and inspection requirements of Article 7, Chapter 1 - Subchapter 1 and Tables 10-1 and 10-2 of the Building Code (Title 27).
2. Acquire cement and aggregate from same source for all work.

D. Coordination

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Coordinate the work of all Divisions so that items to be installed are done so correctly and in proper sequence.

1.08 DELIVERY, STORAGE, AND HANDLING

- A. Protect material from the elements and from other damage on the site.
- B. Replace and pay for material and work damaged to the satisfaction of the MMMHS Representative.

1.09 ENVIRONMENTAL REQUIREMENTS

- A. Adequately protect concrete placed during rain, sleet, or snow, or when the mean daily temperature falls below 40°F or rises above 90°F as provided in Article 3.05.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

- A. Admixtures
 - 1. Euclid Chemical Company
 - 2. Master Builders
 - 3. Sika Chemical Corporation
 - 4. Anti Hydro Company
 - 5. Chem Masters
 - 6. Stonehard Inc.
 - 7. W.R. Grace & Co.
- B. Bonding Agent
 - 1. Larsen Products Corp., Rockville, Maryland.
 - 2. Chem Masters, Chagrin Falls, Ohio.
- C. Chemical Hardener
 - 1. Sonneborn/Rexnord
 - 2. Anti Hydro Company, Newark, N.J.

2.02 MATERIALS

A. Cement

Shall conform to ASTM C150 and shall be of the non air-entrained types:

1. Unless otherwise specified or approved by the Architect of Record, cement shall be Type I.
2. Cement shall not contain ingredients which would result in more than two percent air being entrained in the concrete.

B. Admixtures

1. General

- a. The use of admixtures shall comply with the requirements of paragraph 27-608 of the Building Code.
 - b. The final soluble chloride content in concrete, percent by weight of cement, due to the addition of admixtures and other ingredients shall not exceed 0.10 at 28 days.
2. Air-entraining admixture: Shall conform to ASTM C260.
 3. Water-reducing admixture: Shall conform to ASTM C494, Type A or D, and contain no more chloride ions than found in drinking water.
 4. High range, water-reducing admixture (super-plasticizer): Shall conform to ASTM C494, Type F or G, and contain no more chloride ions than found in drinking water.
 5. Water reducing, accelerating admixture: Shall conform to ASTM, Type C or E, and contain no more chloride ions than found in drinking water.
 6. Water reducing, retarding admixture: Shall conform to ASTM C494, Type D, and contain no more chloride ions than found in drinking water.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

C. Water

Shall be clean New York City water free of injurious foreign matter conforming to the requirements for water specified in ASTM C94.

D. Aggregates

Fine and coarse aggregates shall be regarded as separate ingredients. Each size of coarse aggregate, as well as the combination of sizes when two or more are used, shall conform to the appropriate grading requirements of the applicable ASTM specifications. Maximum size of coarse aggregate shall conform to paragraph 3.3.3 of ACI 318.

1. Aggregates for normal weight concrete shall conform to ASTM C33 and be of Size No.67 and/or No.8.

E. Curing Compounds

1. Curing paper shall conform to ASTM C171.
2. Liquid curing compound shall conform to ASTM C309.

F. Bonding Agent

1. Bonding agent shall meet the following performance characteristics.
 - a. Tensile bond strength (ASTM C190)....385 psi.
 - b. Flexural bond strength (ASTM C78)....603 psi.
 - c. Shear bond strength (ASTM C39).....470 psi.
 - d. Will withstand extreme temperature changes without loss of bond and will pass 2-hr fire test in accordance with ASTM E119.
2. Shall be Weld-Crete by Larsen Products Corp.

G. Chemical Hardener

Shall be equal to "Lapidolith" by Sonneborn/Rexnord.

2.03 MIXES

A. General

Concrete for all parts of the Work shall be of the specified quality capable of being placed without excessive segregation and, when hardened, of developing all characteristics required by the Specifications and Drawings.

B. Strength

The strength of the concrete shall be a minimum of 3500 PSI. Strength requirements are based on 28-day compressive strength.

C. Method of Proportioning

1. Proportion, batch, and mix concrete in accordance with Method I or Method II of the Building Code. The Engineer designated for Controlled Inspection is responsible for acceptance of the method used and for approval of all design mixes, subject to review by the Architect of Record.

a. Method I - Mixes with Minimum Cement Content

1) Proportion concrete mix in accordance with the requirements of paragraph 27-605(a)(4), "Previously Accepted Mixes". The previously accepted mixes shall have included the admixtures specified and/or those to be added to increase workability.

2) If previously accepted mixes are not available, proportion concrete mix in accordance with paragraph 27-605(a)(3), "Preliminary Tests". Under this method, engage a licensed concrete testing laboratory approved by the Engineer for Controlled Inspection and the Architect of Record to design a concrete mix with minimum cement content and perform the necessary tests. Include all admixtures that will be used during construction. Any testing required under 27-605(a)(3) shall be at the Contractor's expense.

b. Method II - Proportioning on the Basis of Field Experience

Proportion concrete mix in accordance with paragraph 27-605(b)(1), "Proportioning". Mixes shall have included all admixtures that will be used during this construction.

2. Pumping of concrete is permitted if a pump mix is submitted and approved by the Engineer for Controlled Inspection. Provide a minimum of ¼ bag extra of cement over the amount required to attain the correct concrete strength for pump mixes.

D. Normal Weight Concrete

1. Unless otherwise specified, proportion and produce normal weight concrete to have a slump of 4" or less, prior to addition of any water-reducers if used. A tolerance of up to 1" above the indicated maximum shall be allowed for individual batches provided the average for all batches or the most recent 10 batches tested, whichever is fewer, does not exceed the maximum limit. The slump shall be determined by ASTM C143.
2. Normal weight concrete shall be air-entrained with an air content for the grading size of coarse aggregate as follows:
 - a. No.8.....7½%
 - b. No.67.....6%

Tolerance on air content as delivered shall be ±1.5%.

2.04 SOURCE QUALITY CONTROL

A. Tests

1. The Contractor's Testing Laboratory will review and/or check test proposed materials for compliance with the Specifications prior to construction.
2. The Testing Laboratory will perform field tests as work progresses as listed in "Field Quality Control".

B. Inspection

1. Testing Laboratory

a. The Contractor shall engage a Licensed Concrete Testing Laboratory to inspect batching of the concrete and perform all field tests. The Laboratory will perform the following services:

- 1) Review and/or check-test the Contractor's proposed materials for compliance with the Specifications.
- 2) Review and/or check-test the Contractor's proposed mix design as required by the Engineer for Controlled Inspection.
- 3) Secure production samples of materials at plants or stock-piles during the course of the Work and test for compliance with the Specifications.
- 4) Perform tests during construction as required by paragraph 27-607 of the Building Code. The Laboratory will obtain samples at the mixer and when directed by the Engineer for Controlled Inspection at the point of placement by the following methods:
 - a) Secure composite samples in accordance with ASTM C172. Each sample shall be obtained from a different batch of concrete on a random basis, avoiding any selection of the test batch other than by a number selected at random before commencement of concrete placement.
 - b) Mold and cure specimens from each sample in accordance with ASTM C31. The minimum number of specimens to be taken daily will conform to ACI 318-83 paragraph 4.7 as modified by the Building Code except that four (4) test cylinders shall be molded for each 50 cubic yards of each class of concrete placed in any one day's concreting.

January 10, 2005

**Soundproofing of
Monsignor McClancy Memorial High School**

- b. The Laboratory will assign, under the requirements of paragraph 27-605(a)(5), at least one qualified concrete technician to be stationed at the batch plant. If Method II is used for proportioning, batching, and mixing, the Engineer for Controlled Inspection has the option of stationing the technician at the plant. At least one qualified concrete technician will be stationed at the site to obtain the test specimens.

 - c. The Laboratory will be responsible to and under the supervision of the Engineer designated for "Controlled Inspection".
2. Engineer for Controlled Inspection
- a. The Contractor shall engage a Licensed Professional Engineer, under the requirements of Sections 27-132, 27-607 and Tables 10-1 and 10-2 of the Building Code, who will supervise the testing of the materials and the inspection of concrete construction. The Engineer is responsible for approval of all design mixes, subject to review by the Architect of Record, and any required filing with the Building Department, as well as maintaining the controlled inspection log book required by paragraph 27-607(a)(3).

 - b. The Engineer will check that all required tests are made and the results submitted and shall have the right to order the Contractor to make such changes of the mix of concrete as required to produce concrete of the necessary strength. The Engineer will also report to the Building Department Superintendent any deviation from the requirements of the Code, as indicated by records of inspection and reports of tests.
3. Notification
- a. The Contractor shall notify the Testing Laboratory 72 hours in advance of each concrete placement to order out the necessary concrete technicians to cover the work.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- b. Do not mix concrete or add admixtures unless the Technician is present as per paragraphs 27-605(a)(5) and 27-608 of the Building Code.
4. Contractors Responsibility for Quality Control
 - a. The Contractor will receive a copy of all reports prepared by the Laboratory and/or Engineer for Controlled Inspection. Copies of all daily concrete reports prepared by the Engineer and Testing Laboratory reports shall be sent in triplicate to the Architect of Record.
 - b. The tests and inspections, as provided in the Code, do not in any way relieve the Contractor of responsibility to construct the Work in accordance with the Drawings and Specifications and to use safe, standard methods of construction at all times, safeguarding the public, workmen, and structure. The Contractor shall be solely responsible for the physical control of the materials and concrete mixes, and shall see that such mix designs, tests, and controls are in accordance with the Code and Specifications.
 - c. Exercise extreme care in selecting the mixing plant and check whether the plant has the proper equipment. Visit the plant periodically and take whatever steps are necessary to assure the compliance with the Contract Documents, the Building Code, and ASTM C94.
 - d. It shall be the Contractor's complete responsibility to adjust, alter, and/or correct any controls necessary in materials and/or concrete operation based upon tests and inspections made by his Testing Laboratory and Engineer. If, during the course of the concrete operations, more cement is needed per cubic yard above the amount specified or required, provide same at no additional cost to the MMMHS Representative.

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Prior to placement of concrete, verify that the concrete cover over the reinforcement is that specified on Drawings.
- B. Verify that dowels, reinforcement, and all other embedded items are provided and held securely, positioned accurately, and will not be a detriment to concrete placement.
- C. Examine all adjoining work on which this Work is in anyway dependent for proper installation and workmanship. Report to the MMMHS Representative any conditions which prevents the performance of this Work.

3.02 PROTECTION

- A. Protect adjacent finish materials against spatter during concrete placement.
- B. Provide barricades and safeguards around openings, etc. to protect workmen from injury and to comply to all Building Code, OSHA, and other authorities having jurisdiction regulations.

3.03 PREPARATION

- A. Remove ice, excess water, trash, and rubbish from forms.
- B. Remove hardened concrete from inner surfaces of conveying equipment and all formwork, reinforcement, and dowels.
- C. Prepare existing concrete to be in contact with new concrete by roughening and cleaning the surface and applying a bonding agent.

3.04 EMBEDDED ITEMS

- A. Embedded items
 - 1. Place all fence pipe sleeves, dowels, and other embedded items required for the Work of other Divisions or for their support prior to concreting.
 - 2. Provide ample notice and opportunity for items of other Division to be introduced and/or furnished for installation before concrete is placed. Coordinate the Work of the other Divisions so all items are placed in their proper location.

3. Set metal pipe sleeves, etc. into concrete to receive fence posts or any other items, all as indicated on details.

B. Placement of Embedded Items

Position embedded items accurately and support against displacement. Fill voids in sleeves temporarily with readily removable material to prevent the entry of concrete into the voids.

3.05 MIXING AND PLACING CONCRETE

A. General

1. Notify MMMHS Representative at least 72 hours in advance of each concrete placement. Do not place concrete without approval of the Engineer for Controlled Inspection.
2. Do not allow rain water to increase mixing water nor damage surface finish.

B. Mixing

1. Batch, mix, and transport ready-mixed concrete in accordance with the appropriate sections of ASTM C94. Truck mixers and agitators shall meet the requirements of the Truck Mixers Manufacturer's Bureau or shall comply with Section 8.1.2 of ASTM C94. Batch all other concretes in accordance with subchapter 7.2 of ACI 301.
2. Batch ready-mixed concrete only in plants which meet the latest standards of the National Ready-Mix Concrete Association (NRMCA). Only plants meeting the requirements for certification of the NRMCA for automatic batching and automatic recording will be permitted.
3. Tempering and control of mixing water
 - a. Mix concrete only in quantities for immediate use. Concrete which has started to set shall not be retempered, but shall be discarded.

- b. When concrete arrives at the project with slump below that suitable for placing as indicated in the Specifications, water may be added only if neither the maximum permissible water-cement ratio nor the maximum slump is exceeded.
 - c. The water shall be incorporated by additional mixing equal to at least half of the total mixing required. An addition of water above that permitted by the limitation on water-cement ratio shall be accompanied by a quantity of cement sufficient to maintain the proper water-cement ratio. Such addition shall be authorized by the Engineer for Controlled Inspection.
4. Weather Conditions
- a. Cold weather
 - 1) The temperature of concrete delivered at the site shall conform to the temperature limitations given in Table 7.6.1.1 of ACI 301.
 - 2) If water or aggregate is heated above 100°F, combine the water with the aggregate in the mixer before cement is added. Cement shall not be mixed with water or with mixtures of water and aggregate having a temperature greater than 100°F.
 - 3) Detailed requirements are given in ACI 306.
 - b. Hot Weather
 - 1) Cool the ingredients before mixing, or substitute flake ice or well-crushed ice of a size that will melt completely during mixing for all or part of the mixing water if, due to high temperature, low slump, flash set, or cold joints are encountered.
 - 2) Detailed requirements are given in ACI 305.

5. Admixtures - General

- a. Add all admixtures prior to mixing unless otherwise specified or directed.
- b. Air-entraining admixtures and other chemical admixtures shall be charged into the mixer as solutions and shall be measured by means of an approved mechanical dispensing device. The liquid shall be considered a part of the mixing water. Admixtures that cannot be added in solution may be weighed or may be measured by volume if so recommended by the manufacturer. The accuracy of measurement of any admixture shall be within ± 1.5 percent.
- c. If two or more admixtures are used in the concrete, add them separately to avoid possible interaction that might interfere with the efficiency of either admixture or adversely affect the concrete. Do not charge admixtures into the mixer in such a manner that they will come in direct contact with the cement.
- d. Use of accelerating admixtures in cold weather must be approved by the Engineer for Controlled Inspection. Use of such admixture will not relax cold weather placement requirements.
- e. Use of retarding admixtures in hot weather must be approved by the Engineer for Controlled Inspection. Use of such admixtures will not relax hot weather placement requirements.

C. Placing

1. General: Place concrete in accordance with ACI 304R and ACI 318.
2. Conveying
 - a. Handle concrete from the mixer to place of final deposit as rapidly as practicable by methods which will prevent separation or loss of ingredients and in a manner which will assure that the required quality of concrete is obtained.

- b. Conveying equipment shall be approved and shall be of a size and design such that detectable setting of concrete shall not occur before adjacent concrete is placed. Conveying equipment shall be cleaned at the end of each operation or work day. Conveying equipment and operations shall conform to the following additional requirements:
- 1) Truck mixers, agitators, and nonagitating units and their manner of operation shall conform to the applicable requirements of ASTM C94.
 - 2) Chutes shall be metal or metal-lined and shall have a slope not exceeding 1 vertical to horizontal and not less than 1 vertical to 3 horizontal. Chutes more than 20' long and chutes not meeting the slope requirements may be used provided they discharge into a hopper before distribution.
 - 3) Pumping or pneumatic conveying equipment shall be of suitable kind with adequate pumping capacity. Pneumatic placement shall be controlled so that segregation is not apparent in the discharged concrete. The loss of slump in pumping or pneumatic conveying equipment shall not exceed 2". Pumping is permitted only if a pump mix has been approved by the Engineer for Controlled Inspection.
3. Depositing: Detailed recommendations are given in ACI 304R.

a. General

- 1) Deposit concrete continuously, or in layers of such thickness that no concrete will be deposited on concrete which has hardened sufficiently to cause the formation of seams or planes of weakness within the section.
- 2) Carry out placement at such a rate that the concrete which is being integrated with fresh concrete is still plastic. Do not deposit concrete which has partially

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

hardened or has been contaminated by foreign material.

b. Segregation: Deposit concrete as nearly as practicable in its final position to avoid segregation due to rehandling or flowing. Do not subject concrete to any procedure which will cause segregation.

c. Consolidation

1) Consolidation of concrete and the use and type of concrete shall be in accordance with ACI 309R.

4. Cold Weather Concrete Protection: Detailed requirements are given in ACI 306.

When the mean daily temperature of the atmosphere is less than 40°F during concreting, or within 24 hours thereafter, follow the procedures outlined in ACI 306R to protect the concrete. Temperature of the plastic concrete shall be no lower than 55°F. Heat all forms, reinforcing steel, and surfaces to receive concrete above the freezing point and keep them completely free of frost, snow, and ice.

5. Hot Weather Protection: When the mean daily temperature of the atmosphere is over 90°F during concreting, follow the procedures outlined in ACI 305R to protect the concrete.

a. All concrete, at the time it is actually deposited in the forms, shall have a temperature not lower than 50°F but never above 90°F.

b. Cover reinforcement with water-soaked burlap to cool steel so its temperature will not exceed the ambient air temperature immediately before concrete placement.

c. Dry surfaces which are to receive concrete should be wet down before commencing placement of concrete and the temperature of such surfaces should not exceed the temperature of the concrete being placed.

3.06 FINISHING OF FORMED SURFACES AND REPAIR OF SURFACE DEFECTS

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

A. General

1. Repair surface defects, including tie holes and cracks, immediately after form removal. Patches shall be of quality to match the specified finish.
2. Remove oil, grease, compounds, and other contaminants from surfaces and areas to be repaired and those receiving coatings (ie. membranes of any kind).
3. Provide finishes specified below immediately after form removal.
4. Provide curing and protection.

B. Repair of Surface Defects

1. Remove all honeycombed and other defective concrete down to sound concrete. If chipping is necessary, the edges shall be perpendicular to the surface or slightly undercut. Undercut all cracks a minimum of 1" x 1". No feathered edges will be permitted. Dampen the area to be patched and an area at least 6" wide surrounding it to prevent absorption of water from the patching mortar. A bonding grout shall be prepared using a mix of approximately 1 part cement to 1 part fine sand passing a No. 30 mesh sieve, mixed to the consistency of thick cream, and then well brushed into the surface.
2. The patching mortar shall be made of the same materials and of approximately the same proportions as used for the concrete, except that the coarse aggregate shall be omitted and the mortar shall consist of not more than 1 part cement to 2¹/₂ parts sand by damp loose volume. The quantity of mixing water shall be no more than necessary for handling and placing. Mix the patching mortar in advance and allowed to stand with frequent manipulation with a trowel, without addition of water, until it has reached the stiffest consistency that will permit placing.
3. After surface water has evaporated from the area to be patched, brush the bond coat well into the surface. When the bond coat begins to lose the water sheen, apply the premixed patching mortar. The mortar shall be thoroughly consolidated into place and struck off so as to leave the patch slightly higher than the surrounding surface. To

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

permit initial shrinkage, leave it undisturbed for at least 1 hr before final finishing. Keep the patched area damp for 7 days. Do not use metal tools for finishing a patch in a formed wall which will be exposed.

C. Tie Holes and Other Repairs

1. Remove ties, nails, and other form accessories below the concrete surface for surfaces to receive membrane waterproofing.
2. Undercut surfaces of holes. After cleaning and thoroughly dampening the holes, fill them solid with the patching mortar.

3.07 SLABS

A. Placement

1. Mixing and placing shall be carefully coordinated with finishing. Do not place concrete more rapidly than it can be spread, straightedged, and darbied or bull floated. Provide darbying, floating, troweling, etc. at the correct time interval after poring to prevent dusting and a non-durable surface as specified in ACI 302.1R. These operations must be performed before bleeding water has an opportunity to collect on the surface.

B. Leveling and Finishing

1. General

- a. Unless otherwise indicated on the Drawings or specified herein, make all roof slabs pitch uniformly with the slope of the existing adjacent roof slabs.
- b. Follow detailed recommendations for finishing given in ACI 301, Chapter 11, and ACI 302.1R.
- c. Protect finishes from contamination from time of placing until time of acceptance, placement of topping, etc.
- d. Remove defects that do not meet tolerances by grinding.

2. Finishes

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- a. Surfaces intended to receive roofing, water-proofing membranes: Darby and float surface. Leave surface free from depressions, bulges, rough spots, and other defects.
- b. Top of fence post foundations: Finish surface with a wood float.

3.08 PATCHING AND REPAIRING EXISTING CONCRETE

- A. Provide bonding agent whenever new concrete is to be poured against existing concrete and wherever bonding agent is indicated on the Drawings to be applied.
- B. Remove loose concrete from existing concrete surface to be bonded with new concrete and clean. Remove rust from reinforcement and structural steel by power chipping and power driven brushes.
- C. Apply bonding agent in accordance with manufacturer's specifications. Pour concrete as soon as bonding agent has cured.

3.09 CURING AND PROTECTION

- A. General
 1. Begin curing concrete immediately after placement and finishing. Protect all freshly deposited concrete from premature drying and excessively hot or cold temperatures and maintain it with minimal moisture loss at a relatively constant temperature for the period of time necessary for the hydration of the cement and proper hardening of the concrete. Detailed procedures are given in ACI 308.
 2. Do not apply curing compounds to surfaces receiving cement coat waterproofing, adhesives, membranes or additional concrete unless approved by adhesive or material manufacturer. Provide only wet curing.
- B. Procedure
 1. Concrete surfaces not in contact with forms:
 - a. Absorptive mat or fabric, sand, or other covering kept continuously wet.
 - b. Curing compounds conforming to ASTM C309.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Continue curing until a total of 7 days has elapsed during which the temperature of the air in contact with concrete has remained above 50°F. Prevent rapid drying during and at the end of the curing period.

C. Cold Weather Curing

Concrete must be protected from water loss. This shall be accomplished by the application as soon as possible without harm to the concrete surfaces of either (a) exhaust steam, or vapor-resistant paper or polyethylene film, or (b) curing compounds. In all other respects, curing shall conform to applicable provisions of this Section. Concrete temperature shall be maintained between 50°F and 70°F.

D. Hot Weather Curing

1. During the period June 1 to October 1 or when hot weather conditions require it, maintain continuous water curing for a minimum period of twenty-four hours. Provide for wind breaks, shading, and other necessary provisions.
2. After 24 hours, curing shall be by one of the methods specified under B above. In all other respects, curing shall conform to applicable provisions of this Specification. Upon termination of the specified moist curing, every effort should be made to reduce the rate of drying by avoiding air circulation.

E. Protection from mechanical injury: Protect concrete from mechanical disturbances during curing period as described under "Protection and Cleaning".

3.10 FIELD QUALITY CONTROL

A. Tests

Tests to be performed by the Contractor's Testing Laboratory during construction are as follows:

1. Compliance of materials to Specifications tested from production samples.
2. Determination of the slump of the concrete for each sample taken and whenever consistency of the concrete appears to vary using ASTM C143. The Engineer designated for Controlled Inspection will reject any concrete that does not meet the slump requirements.
3. Strength tests on the specimens in accordance with ASTM C39. Each group of specimens is considered one strength test. Three cylinders shall be tested at 28 days for acceptance and one at 7 days for information. If one specimen in a test manifests evidence of improper sampling, molding, or testing, it shall be discarded and the average strength of the remaining cylinders shall be considered the test result. Should all specimens in a test show any of the above defects, the entire test shall be discarded.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

4. Determination of air content and unit weight of normal weight concrete sample for each strength test in accordance with ASTM C173 or C231 and ASTM C138.
5. Determination of air content and unit weight of lightweight concrete sample for each strength test in accordance with ASTM C173 or C231 and ASTM C567.
6. Determination of temperature of concrete sample for each strength test.
7. Determination of water soluble chloride content in the concrete, percent by weight of cement, of each sample.

B. Inspection

1. Refer to "Source Quality Control" for responsibility and procedure.

C. Evaluation and Acceptance of Concrete

1. Strength tests on structural concrete will be evaluated according to ACI 318-83, paragraph 4.7 as modified by the Building Code.
2. When the average strength of the test cylinders, as defined in ACI 318-83 paragraph 4.7 as modified by the Building Code, falls consistently below the specified strength ($f'c$), the MMMHS Representative shall have the right to order the Contractor to change the proportions or the water content of the concrete to secure the required strength for the remaining portion of the structure, all at the Contractor's expense. It is the Contractor's complete responsibility to modify the concrete mix design, material controls, and/or concrete operations where necessary to obtain the compressive strength required by the design and Specification.
3. When the average strength of test cylinders for any portion of the structure is less than that required by the design or Specification, or where there is other evidence that the quality of the concrete is below Specification requirements, the adequacy of the concrete will be checked according to the requirements of paragraph 27-597 of the Building Code either by structural analysis or by core or load tests or by any combination of these

procedures. The Architect of Record will determine which procedures to use:

- a. Structural Analysis Computations (27-597), which will be performed by the Architect of Record.
 - b. Core Tests (27-598) - Performed in accordance with ASTM C42.
 - c. Load Tests (27-599(b)).
 - d. Non-destructive tests.
4. Low Strength Tests of Concrete - Results
- a. Pay for additional costs of labor and materials required at the job for all damages resulting from load tests and the taking of cores. Remove and replace concrete work that is not of adequate strength and cannot be made to work by remedial methods acceptable to the MMMHS Representative at own cost. The Contractor shall be held responsible for all delays and damages to the work of other Divisions that occur as a result of non-conformance.
 - b. Pay for all expenses borne by the MMMHS Representative resulting from low strength test procedures specified above.

3.11 PROTECTION AND CLEANING

A. General

During the curing period, and thereafter as conditions may require, protect the concrete from damaging mechanical disturbances, particularly excessive load stresses, heavy shock, and excess vibration. Protect all finished concrete surfaces from damage caused by construction equipment, materials or methods, and by rain or running water. Self-supporting structures shall not be loaded in such a way as to overstress the concrete.

3.12 ACCEPTANCE OF CONCRETE WORK

A. General

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Completed concrete work which meets all applicable requirements will be accepted without qualification.
2. Completed concrete work which fails to meet one or more requirements but which has been repaired to bring it into compliance will be accepted without qualification.
3. Completed concrete work which fails to meet one or more requirements and which cannot be brought into compliance may be accepted or rejected as provided in these Specifications or in the Contract Documents. In this event, modifications may be required to assure that remaining work complies with the requirements.
4. Concrete work judged inadequate by structural analysis, core test, results of load test or deemed unacceptable due to appearance shall be repaired, reinforced with additional construction if so directed by the Architect of Record, or be replaced if so directed by the Engineer at the Contractor's expense.
5. Pay all costs incurred by the MMMHS Representative in providing additional testing and/or analysis required by this Section.

B. Dimensional Tolerances

1. Finished slabs exceeding the tolerances may be repaired provided that strength is not adversely affected. High spots may be removed with a terrazzo grinder, low spots filled with a patching compound, or other remedial measures performed as permitted.

C. Strength of Structure

1. The strength of the structure in place will be considered potentially deficient if it fails to comply with any requirements which control the strength of the structure, including but not necessarily limited to the following conditions:
 - a. Low concrete strength as described under "Field Quality Control".
 - b. Reinforcing steel size, quantity, strength, position, or arrangement at variance with the

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

requirements of Section 03200 or the Contract Documents.

- c. Concrete which differs from the required dimensions or location in such a manner as to reduce the strength.
 - d. Curing less than that specified.
 - e. Inadequate protection of concrete from extremes of temperature during early stages of hardening and strength development.
 - f. Mechanical injury as defined under "Protection and Cleaning", construction fires, accidents, or premature removal of formwork likely to result in deficient strength.
2. Structural analysis and/or additional testing may be required when the strength of the structure is considered potentially deficient.
 3. Core tests may be required when the strength of the concrete in place is considered potentially deficient.
 4. If core tests are inconclusive or impractical to obtain or if structural analysis does not confirm the safety of the structure, load tests may be required and their results evaluated in accordance with Chapter 20 of ACI 318.

END OF SECTION

SECTION 03610
GROUTING

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Furnish material, equipment, labor, services required to provide non-shrink grout. Work includes, but is not limited to grouting under steel, equipment supports, filling of fence and rail posts sleeves, and wherever else shown on Drawings or required.

1.02 RELATED SECTIONS AND WORK

- A. Chain Link Fences and Gates.....Section 02831
- B. Cast-in-Place Concrete.....Section 03300
- C. Metal Fabrications.....Section 05500

1.03 REFERENCES

- A. American Society of Testing and Materials (ASTM) Standards, latest editions.

1.04 SUBMITTALS

- A. Product Data

Submit manufacturer's information on the non-shrink grout.

1.05 QUALITY ASSURANCE

- A. Qualifications

Company Specializing in performing the work of this section shall have three years minimum experience.

1.06 DELIVERY, STORAGE, AND HANDLING

- A. Protect material from the elements and from other damage at site.
- B. Replace and pay for material and work damaged to the satisfaction of the MMHS Representative.

1.07 ENVIRONMENTAL REQUIREMENTS

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- A. Follow manufacturer's recommendations for placement temperatures.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

A. Grout

1. US Grout Corp., Old Greenwich, Connecticut
2. Sika Corp., Lyndhurst, NJ or approved equal

2.02 MATERIALS

A. Grout

1. Grout shall be non-shrink, made from factory-premixed material containing no corrosive irons, aluminum, or gypsums, with the following properties:
 - a. Non-shrink from time of mixing ASTM C827
No expansion after set.....ASTM C827
Initial set time.....ASTM C191
Compressive Strength.....ASTM C109
 - b. An effective bearing area (EBA) of 95 to 100 percent.
 - c. Grout that contains water reducers, accelerators or fluidifiers shall have no drying shrinkage greater than the equivalent sand cement and water mix as tested under ASTM C596.
2. The grout shall not shrink below its placement volume and shall not expand after set. Grout shall have a 1-day compressive strength of not less than 3000 psi and a minimum compressive strength of 7000 psi in 28 days.
3. Grout shall have a initial setting time of not less than 45 minutes.
4. Products:
 1. "Five Star Grout" by U.S. Grout Corp.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. SikaGrout 212 by Sika Corp.

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Examine all adjoining work on which this Work is in anyway dependent for proper installation and workmanship. Report to the MMMHS Representative any conditions which prevents the performance of this Work.

3.02 SURFACE PREPARATION

- A. Concrete surface shall be free of all loose material.
- B. Steel shall be clean and free of corrosion.
- C. Surfaces shall be free of oil, grease, loose paint, corrosive deposits, dust, latence and other contaminants.
- D. Sleeves and holes shall be clean of dust and debris.

3.03 APPLICATION

- A. Perform all grouting in accordance with the recommendations of ACI, CSI, and the grout manufacturer's published specifications for site preparation, product mixing, and placing. For grouting in weather below 50°F, contact manufacturer for cold weather instructions.
- B. Arrange with the manufacturer of the grout for the services of a qualified field representative to instruct the work crews in the mixing of components, preparation of surfaces, technique of installation, and inspection procedures. The representative shall remain at the job site after work commences until the representative is satisfied that the grout is being installed correctly.
- C. Locations
 1. Provide grout, unless otherwise specified, under loose lintels. Work grout under plates to provide full and even bearing.
 2. Provide grout for grouting fence poles into sleeves.
 3. Provide grout under equipment supports.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

4. Provide grout wherever else it is indicated on Drawings or Specifications.

D. Follow manufacturer's instructions for curing.

3.04 PROTECTION AND CLEANING

A. Clean all adjacent area of excess material and clean all floors and walls of powder and droppings.

3.05 FIELD QUALITY CONTROL

A. The MMMHS Representative will inspect and reject any that contains cracks or other defects. These areas shall be fixed at contractor's expense.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 03733
CONCRETE REPAIR WORK

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide labor, materials, equipment, services to provide for the structural repair of basement exterior concrete foundation/retaining wall with manufactured structural repair concrete/mortar as shown on Drawings and as specified herein. Work includes removing spalled and deficient concrete surfaces and cleaning and coating of exposed steel reinforcement.

1.02 RELATED SECTIONS

- A. Selective Removals and Demolition.....Section 02070
- B. Concrete Reinforcement.....Section 03200

1.03 REFERENCE STANDARDS

- A. American Society of Testing and Materials (ASTM)
- B. Steel Structures Painting Council (SSPC)
 - 1. "Hand Tool Cleaning - SP2"
 - 2. "Power Tool Cleaning - SP3"

1.04 SUBMITTALS

- A. Product Data

Provide manufacturer's information on the anti-corrosion coating and structural repair concrete/mortar.
- B. Quality Control Submittals
 - 1. Certificates: Furnish manufacturer's certification that materials meet or exceed Specification requirements.
 - 2. Manufacturer's Instructions: Furnish manufacturer's literature, specifications, and application instructions.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

3. Repair Procedure: Submit written description of repair procedures and operations sequencing based on manufacturer's requirements prior to commencing the Work.

1.05 QUALITY ASSURANCE

A. Qualifications

Company specializing in the Work of this Section shall have a minimum of three years experience and at least two projects with similar quantity of materials.

B. Manufacturer's Representative

All work of this Section shall be performed under the supervision of the repair material manufacturer's representative.

C. Job Mockups

Prior to performing the work of this Section, prepare a sample panel of not less than 10 sq. ft. of concrete repair work. Do not proceed further with the work until the sample panel has been approved by the Authority's representative. Sample shall be a portion of the area to be restored and may be kept if approved.

1.06 DELIVERY, STORAGE, AND HANDLING

- A. Materials specified shall be delivered to the site in sealed, properly labeled containers. Containers shall indicate manufacturer's name, trade name of product, lot number, shelf life of product, and mix ratio (if applicable).

- B. Keep containers tightly closed when not in use. Comply with manufacturer's printed instructions for storing and protecting materials.

- C. Do not store liquid material in hot sun. Keep material from freezing.

1.07 ENVIRONMENTAL REQUIREMENTS

- A. Do not apply if the temperature is below 50°F or above 85°F unless the material manufacturer is consulted for recommendations.

- B. Do not use frozen materials or materials coated with ice or frost.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- C. Do not apply when there is expectation of rain within 24 hours.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

- A. U.S. Grout Corp., Fairfield Connecticut.
B. Sto Concrete Restoration Div., Atlanta Georgia

2.02 MATERIALS

- A. Structural Repair Concrete - Non-formwork Application
1. Shall have non-shrink characteristics and be of high compressive and bond strength, capable of being troweled in place for vertical and overhead applications without the need of formwork, conforming to the following properties:
 - a. Compressive strength of 5500 psi in 28 days when tested in accordance with ASTM C109.
 - b. Bond strength of 2000 psi in 7 days when tested in accordance with ASTM C882.
 - c. Flexural strength of 1200 psi in 7 days when tested in accordance with ASTM C78.
 - d. Maximum linear length change shall be 0.075% when tested in accordance with ASTM C157.
 2. Repair concrete/mortar shall be " CR702 Sto Overhead Mortar" as manufactured by Sto Concrete Restoration Division.
- B. Anti-corrosion Coating
1. Corrosion-inhibiting, epoxy/acrylic resin, protective coating for steel reinforcing bars which will not form a vapor barrier or bond break with the repair mortar with the following properties:
 - a. Bond strength of 1800 psi in 2 hours when tested in accordance with ASTM C882.
 - b. Flexural strength of 2000 psi in 28 days when tested in accordance with ASTM C78.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- c. Tensile strength of 800 psi in 28 days when tested in accordance with ASTM C190.
2. Anti-corrosion coating shall be "CR246 Sto Bonding and Anti-corrosion Agent" by Sto Concrete Restoration Division.

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Examine all adjoining work on which this Work is in anyway dependent for proper installation and workmanship. Report to the Authority any conditions which prevents the performance of this Work.

3.02 PREPARATION AND PROTECTION

A. Protection

Protect adjacent surfaces not to be restored. Protect sills, ledges, and projections from material droppings.

B. Surface Preparation

1. Remove spalled and weak concrete and remove all loose and foreign material. Chip substrate by bush hammering or other mechanical means acceptable to the repair concrete/mortar manufacturer to obtain a minimum surface profile of 1/16" with a new aggregate fractured surface. Perimeter of repair shall have a minimum of 1/8" in depth. Feather edging is not permitted.
2. If steel reinforcing is exposed, chip out behind the reinforcing steel. Chip a minimum of 1/4" behind the bar and 3" past the point where the bar is exposed. Concrete behind bars shall be removed enough to allow for entire bar to be cleaned. Remove concrete to the point past where sound material begins.
3. Exposed steel reinforcement and steel beams shall be free of all rust, scale, oil, paint, grease, loose mill scale, and all other foreign matter which will prevent bonding with the repair concrete. Use power chipping or power driven brushes and clean to an SSPC-SP2 or SP3 surface preparation.

3.03 ANTI-CORROSION COATING APPLICATION

- A. Mix anti-corrosion coating in accordance with manufacturer's instructions. Apply to dry reinforcing steel using a stiff bristle brush. Brush in well to ensure continuous coverage. Apply in two coats of approximately 10 mils each or as per manufacturer's latest recommendations.
- B. Protect coated steel from weather and allow to dry a minimum of 30-45 minutes between coats or repair concrete/mortar application. However, apply repair material within 24 hours after last coating. If 24 hour period elapses, reapply bonding agent and allow to dry as above.

3.04 REPAIR CONCRETE/MORTAR APPLICATION

- A. Mix structural repair concrete in accordance with manufacturer's instruction. Follow time limits set by manufacturer to prevent hardening of material prior to placement.
- B. Prior to application of material, thoroughly saturate surface with water. Remove any standing water prior to patching.
- C. Apply a scrub coat of the repair material of proportions determined by manufacturer (indicate in written repair procedure). While still damp, apply repair concrete/mortar.
- D. Apply material behind and around rebars first to completely fill void.
- E. Apply repair concrete/mortar, non-formwork, on vertical surfaces with a trowel or other such device, all in accordance with the manufacturer's recommendations. Apply in lifts of up to 2" or as determined by material manufacturer at a consistency that the material will not slump. Follow manufacturer's instructions for scoring, curing, priming, and approximate time between layers. Do not leave voids. Trowel exposed surface smooth and to same shape and finish as existing wall.
- F. Pour or trowel repair concrete, horizontal application, into hole until it is to the same level and at the same pitch as the surrounding area. Trowel exposed surface smooth and to same shape and finish as existing surface.

3.05 CURING

January 10, 2005

**Soundproofing of
Monsignor McClancy Memorial High School**

- A. As soon as surface of patch has hardened, cure patch a minimum of 48 hours by applying water-based acrylic curing compounds conforming to ASTM C309, misting, wet burlap, etc.
- B. Follow manufacturer's latest recommendations for any other recommendations. The curing provision of A above shall not be waved unless manufacturer does not permit it.

3.06 PROTECTION AND CLEANING

- A. Clean all adjacent areas of excess material and clean all horizontal surfaces and walls of powder and droppings. Remove misplaced materials from surfaces immediately.
- B. Protect material from freezing and from rainfall prior to final set.

3.07 FIELD QUALITY CONTROL

- A. The Authority will inspect surfaces and reject any that contain cracks or other defects. The repair will be tested for soundness and structural integrity. Any defective areas shall be fixed at Contractor's expense.
- B. Engage the services of the material manufacturer's representative to instruct in the proper usage of the material and to inspect the work throughout the project.

SECTION 04200
UNIT MASONRY

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide concrete unit masonry work as specified herein, as shown on the Drawings, and as needed for a complete and proper installation. The terms Concrete Masonry Unit (CMU) and Concrete Block are inter-changeable.

1.02 WORK INSTALLED BUT NOT FURNISHED UNDER THIS SECTION

- A. Loose lintels.....Section 05500

1.03 RELATED SECTIONS

- A. Concrete Reinforcement.....Section 03200
- B. Grouting.....Section 03610
- C. Painting.....Section 09900
- D. Electrical.....Division 16

1.04 DESIGN REQUIREMENTS

- A. No air-entraining admixtures or material containing such shall be permitted in the mortar. Also, no anti-freeze compounds, calcium chloride, or other compounds, unless expressly permitted otherwise, shall be permitted in the mortar.
- B. Mortar types to be used at the following locations, unless otherwise stated:
 - 1. Reinforced concrete masonry units - Type S

1.05 REFERENCES

- A. American Society of Testing and Materials (ASTM) standards, latest editions.
 - A153 Standard Specification for Zinc Coating (Hot-Dip) on Iron and Steel Products.
 - C33 Standard Specification for Concrete Aggregates.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- C90 Standard Specification for Hollow, Load-Bearing Concrete Masonry Units.
- C109 Standard Test Method for Compressive Strength of Hydraulic Cement Mortars (Using 2-inch or 50 MM Cube Specimens).
- C129 Standard Specification for Non-Load-Bearing Concrete Masonry Units.
- C140 Standard Methods of Sampling and Testing Concrete Masonry Units.
- C144 Standard Specifications for Aggregate for Masonry Mortar.
- C150 Standard Specification for Portland Cement.
- C207 Standard Specification for Hydrated Lime for Masonry Purposes.
- C270 Standard Specification for Mortar for Unit Masonry.
- C331 Standard Specification for Lightweight Aggregates for Concrete Masonry Units.
- C595 Standard Specifications for Blended Hydraulic Cements.

B. Industry Standards.

"Standard for Concrete Masonry Units" - UL 618-
Underwriters Laboratory.

1.06 SUBMITTALS

A. Product Data

1. Submit complete data for concrete masonry units. Submit a list indicating the maximum dry weight of each type and size of CMU to be used in the project.
2. Provide name of lightweight aggregate producer.

B. Samples

1. Submit 3 of each type of anchor, tie, continuous reinforcement.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

C. Quality Control Submittals

1. Schedule of Uses: By mortar type.
2. Certificates
 - a. Submit the lightweight CMU producer's and GCB manufacturer's certificate stating that the minimum equivalent thickness and mix design are in conformance with UL 618 for the indicated fire rating.
 - b. Submit lightweight CMU producers certificate stating aggregate used is 100% lightweight, expanded shale, clay, or slate (rotary kiln) aggregate, in accordance with ASTM C331.
 - c. Furnish notarized Building Department affidavit from masonry manufacturer (Form 10H) stating materials delivered to project comply with the Specification requirements.
 - d. Furnish notarized Building Department affidavit from masonry supplier (Form 10J) stating materials delivered to project comply with the specification requirements.
 - e. Submit MEA toxicity approval for the GCB.

1.07 QUALITY ASSURANCE

A. Qualifications

Company specializing in the Work of this Section shall have a minimum of three years experience and at least two projects with similar quantity of materials.

B. Regulatory Requirements

1. Building Code: Work of this Section shall conform to all requirements of the NYC Building Code and all applicable regulations of governmental authorities having jurisdiction, including safety, health, noise, and anti-pollution regulations. Where more severe requirements than those contained in the Building Code are given in this Section, the requirements of this Section shall govern.
2. UL 618: Fire rating of CMU and assemblies shall conform to the requirements UL 618.
3. NYC Board of Standards and Appeals (BSA) approvals, or
4. NYC Materials and Equipment Acceptance (MEA) approvals.

C. Certification

Reinforced and unreinforced masonry shall conform to the materials acceptance, certification and inspection requirements of Article 7, Chapter 1 - Subchapter 1 and Tables 10-1 of the Building Code (Title 27).

1.08 DELIVERY, STORAGE, AND HANDLING

A. Deliver materials to project site in undamaged condition and store in location and with protection as needed for the following:

1. Concrete Masonry Units: Prevent harm from contaminants, temperature changes, corrosion, and other causes. Limit moisture absorption in conformance with the applicable ASTM.
2. Cementitious Mortar: Keep in dry conditions.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

3. Aggregates: Keep in dry, clean area where grading can be controlled.
4. Accessories, Ties, and Reinforcement: Keep in area to prevent corrosion and to keep clean.

1.09 ENVIRONMENTAL REQUIREMENTS

- A. Masonry units and mortar shall be preconditioned and masonry protected for the following cold weather conditions:
1. For average daily air temperature between 40°F and 32°F:
 - a. Heat mixing water and aggregate to minimum a 70°F and to a maximum 120°F.
 - b. Protect masonry from rain or snow for 24 hours.
 2. For average daily air temperature between 32°F and 25°F:
 - a. Heat mixing water and aggregate to minimum a 70°F and to a maximum 120°F.
 - b. Completely cover masonry for 24 hours.
 3. For average daily air temperature between 25°F and 20°F:
 - a. Heat mixing water and aggregate to minimum a 70°F and to a maximum 120°F.
 - b. Provide heat source on both sides of masonry construction.
 - c. Provide wind breaks for wind in excess of 15 miles per hour.
 - d. Cover masonry completely with insulating blankets for 24 hours.
 4. For average daily air temperature below 20°F:
 - a. Heat mixing water and aggregate to a minimum 70°F and to a maximum 120°F.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- b. Provide enclosures and heat to maintain 32°F when laid.
- c. Keep temperature of masonry units a minimum of 30°F when laid.
- d. Maintain masonry temperature above 32°F for 24 hours by enclosure and supplemental heat.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

- A. Aggregate for Concrete Masonry Units (CMU)
 - 1. Northeast Solite Corporation, Mt. Marion, N.Y.
 - 2. Norlite Corporation, Cohoes, N.Y. or approved equal
- B. Reinforcement and Ties
 - 1. Hohmann & Barnard, Inc., Hauppauge, N.Y.
 - 2. Dur-O-Wall, Arlington Heights, IL. or approved equal

2.02 MATERIALS

- A. Base Materials
 - 1. Cement
 - a. Type I ASTM C150
 - 2. Sand for Mortar Mix ASTM C144
 - 3. Aggregate for CMU - 100% light-weight aggregate, expanded clay shale or slate (rotary kiln process). No mixture with other aggregates allowed. ASTM C331
 - 4. Aggregate for Masonry Grout ASTM C404
 - 5. Hydrated Lime ASTM C207
Type "S"
 - 6. Water - Clean, potable New York City water free of injurious materials.

- B. Concrete Masonry Units (CMU)
 - 1. Types
 - a. Hollow Load Bearing: ASTM C90, Grade N-I. Aggregate shall conform to ASTM C331.
 - 2. Size
 - a. Nominal face dimension 8" x 16", except as noted otherwise.
 - 3. Unit weight: Unit weight of concrete for CMU not to exceed 90 pcf when tested in accordance with ASTM C140.
 - 4. UL fire ratings: Units manufactured with equivalent solid thicknesses, face shell thicknesses, web thicknesses, and other characteristics to obtain fire ratings as indicated on the Drawings.
- C. Reinforcement and Ties
 - 1. Material
 - a. Reinforcement and Ties for Concrete Masonry Walls: Hot-dip galvanized (after fabrication), ASTM A153.
 - 2. Manufactured Units. All units listed manufactured by Hohmann & Barnard.
 - a. Concrete Masonry Unit Walls: LOX-ALL #120 Truss-Mesh, 9 gage, of proper width for wall thickness.
 - b. Concrete Masonry Unit Walls (Non-Loading Bearing):
 - 1. For Wall Carried up Separately: Hot dip galvanized steel straps, 1/4" x 1 1/2" x 24" with 2 bent ends (90 degrees).

2.03 MIXES

A. Mortar (basic)

Shall conform to ASTM C270 and BIA M1-88. Provide Type I cement. Masonry cement shall not be used as a substitute.

January 10, 2005.

Soundproofing of
Monsignor McClancy Memorial High School

1. Type N: 1 part gray cement, 1 part lime, 6 parts sand. Minimum compressive strength shall be 1800 psi at 28 days.

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Examine all adjoining Work on which this Work is in anyway dependent for proper installation and workmanship. Report to the MMMHS Representative any conditions which prevents the performance of this Work.

3.02 PROTECTION

- A. Remove excess mortar from walls as soon after laying units as practicable to prevent staining and to facilitate cleaning of wall.
- B. Brace walls as needed until sufficiently set, or until intersecting walls provide lateral support.

3.03 MIXING PROCEDURES FOR MORTAR

- A. Measure material by volume or equivalent weight. Do not measure by shovel.
- B. Mix ingredients in a clean mechanical mixer for a minimum of 3 minutes, maximum of 5, with the minimum amount of water to produce a workable consistency.
- C. Mortar that has stiffened because of evaporation of water from the mortar shall be retempered as frequently as needed to restore the required consistency. Mortar shall be used within 2¹/₂ hours after initial mixing.

3.04 LAYING - GENERAL

- A. Lay units true to dimensions, plumb and level, square; bond work in bond indicated on the Drawings or specified herein. Lay courses level with joints uniform; vertical joints spaced properly for plumb alignment.
- B. Fill bed joints and cross joints solid with mortar. Furrowed bed and spotted cross joints not permitted. For hollow block units, apply mortar full length on all bearing surfaces.
- C. Remove excess mortar, leaving masonry surface clean.
- D. Cut concrete masonry units with circular masonry saw.
- E. Build-in miscellaneous metal inserts and other items not furnished under this Section but specified to be installed under this Section.

3.05 CONCRETE MASONRY UNITS (CMU)

- A. General
 - 1. Lay blocks in type N mortar, with cells vertical. Provide running bond unless shown otherwise on the Drawings or as indicated below.
 - 2. Extend interior partitions and furring up to underside of slabs. Leave sufficient space to install non-shrink firestopping mortar and caulking (See Section 07270).
 - 3. Where concrete masonry wall intersect existing columns, bond together with metal wall ties spaced

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

8" o.c. min., vertically. Refer to Article on
"Reinforcement".

B. Horizontal and Vertical Face Joints

1. Make joints uniform and 3/8" thick, unless otherwise indicated.
2. Shove vertical joints tight.
3. Tool joints with a smooth, non-staining tool, when thumb print hard, at surfaces to be painted or exposed.

C. Exposed and Painted Surfaces

1. Smooth, even texture, free of chips, cracks, or other imperfections and free from any material that will stain paint.
2. Set block up with special care for plane, jointing, pattern, and cutting.
3. Keep faces of units clean; clean off mortar droppings on block face immediately.
4. Defective units will be rejected. Replace defective units with perfect units at no extra cost to the MMMHS.
5. Tool joints with a smooth, non-staining tool to produce a smooth and slightly concave surface.
6. See Drawings for thickness of Concrete block.

3.06 CUTTING AND FITTING (CMU BLOCKS)

- A. Cut units with a motor-driven carborundum saw; provide smooth, straight edges.

3.07 REINFORCEMENT

A. Concrete Masonry Unit and Glazed Concrete Block Walls:

1. Provide mesh continuous at every third block course.
2. Provide galvanized, corrugated metal wall ties at 8" o.c. vertical spacing. Embed in masonry 4" minimum each wall.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- B. Size (width) of reinforcement as required for 4", 6", 8", 10" partitions.

3.08 CLEANING

A. Concrete Masonry Units

1. Clean wall surfaces to be painted; rub with carborundum stone: remove mortar from surfaces; remove rough edges from joints.
2. Point up holes and joints. Brush with stiff bristle brush. Leave surface in condition to receive paint.
3. Do not use wire brush.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 04435
CAST STONE

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. The Work of this Section includes all labor, materials, equipment and services necessary to:

Provide cast stone copings, bandings; window sills, windows surrounds and all other units as indicated on Drawings, specified herein, and as needed for a complete and proper installation.

1.02 RELATED WORK SPECIFIED ELSEWHERE

- A. Unit Masonry Section 04200
B. Flashing Section 07600
C. Joint Sealers Section 07900

1.03 REFERENCES

- A. American Concrete Institute (ACI).
B. Concrete Reinforcing Steel Institute (CRSI).
C. Precast Concrete Institute (PCI).
D. American Society for Testing and Materials (ASTM).

1.04 SUBMITTALS

- A. Submit the following product information
1. Materials list of items proposed to be provided under this Section.
 2. Manufacturer's specifications and other data needed to prove compliance with the specified requirements.
 3. Laboratory Tests Reports (for Source Quality Control) from a qualified testing laboratory indicating compliance with the requirements specified herein. Source Quality Control testing requirements will be waived if the casting plant

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

is PCI certified. Submit documentation of PCI Plant Certification Program in order to obtain waiver.

4. Qualification Data: For firms specified in "Quality Assurance" Article to demonstrate their capabilities and experience. Include lists of completed projects with project names and addresses, names and addresses of architects and owners, and other information specified.

- a. Include copies of material test reports for completed projects, indicating compliance of cast stone with ASTM C 1364.

5. Shop Drawings showing complete information for fabrication and erection of the Work of this Section, including, but not limited to:

- a. Show fabrication and installation details for cast stone units. Include dimensions and cross sections; details, locations, size, and type of reinforcement and anchorages, including special reinforcement and lifting devices necessary for handling and erection. Indicate finished faces.

Include plans and building elevations showing layout of units and locations of joints and anchors.

- b. Erection procedures, sequence of erection, and required handling equipment.
 - c. Layout, dimensions, and identification of each precast unit corresponding to the sequence and procedure of installation.
 - d. Details of inserts, connections, and joints, including accessories.
 - e. Location and details of anchorage devices that are to be embedded in other construction.

B. Samples

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Cast Stone: Submit 3 cast stone samples approximately 12" x 12" x 4", showing quality, texture, and color of the proposed finish.
2. Samples for Initial Selection of Mortar Color: Submit the full range of colors available. Where mortar color is to match existing, provide proposed colors.
3. Samples for Verification of Mortar Color: For each mortar color required, submit the full range expected in the finished construction. Make samples using the same ingredients to be used on Project. Label samples to indicate type and amount of colorant used.
4. Submit 3 samples each of anchorages and other attachments and accessories.
5. Full Size Cast Stone Samples: Prior to start of installation, and after the review of finish Samples, submit one full size Sample of each shape of required cast stone unit, delivered to the job site. Acceptable full size samples may be incorporated in the construction.
6. Review of samples by the Authority will be for color, texture, and general condition only. Compliance with all other requirements is the exclusive responsibility of the Contractor.

1.05 QUALITY ASSURANCE

A. Use adequate numbers of skilled workman who are thoroughly trained and experienced in the necessary crafts and who are completely familiar with the specified requirements and the methods needed for proper performance of the Work of this Section.

B. Manufacturer Qualifications

A firm experienced in manufacturing cast stone units similar to those indicated for this Project and with a record of successful in-service performance, as well as sufficient production capacity to manufacture required units.

- C. Testing Laboratory Qualifications: An independent testing laboratory qualified according to ASTM E 329 to conduct the testing specified, as documented according to ASTM E 548.
- D. Source Limitations for Cast Stone: Obtain cast stone units through one source from a single manufacturer.
- E. Source Limitations for Mortar Materials: Obtain mortar ingredients of a uniform quality, including color, from one manufacturer for each cementitious component and from one source or producer for each aggregate.

1.06 DELIVERY, STORAGE AND HANDLING

- A. Deliver the Work of this Section to the job site in such quantities and at such times as to assure the continuity of construction; carefully pack or crate to prevent damage.
- B. Store units at the job site in a manner to prevent cracking, distortion, warping, staining, and other physical damage, and in a manner to keep markings visible.
- C. Lift and support the units only at designated lifting points or supporting points as shown on the approved Shop Drawings.
- D. Any units damaged before final acceptance shall be replaced.
- E. Patching of units will not be acceptable.
- F. Pack, handle, and ship cast stone units in suitable packs or pallets.
 - 1. Lift with wide-belt slings; do not use wire rope or ropes that might cause staining. Move cast stone units, if required, using dollies with wood supports.
 - 2. Store cast stone units on wood skids or pallets with nonstaining, waterproof covers. Arrange to distribute weight evenly and to prevent damage to units. Ventilate under covers to prevent condensation.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- G. Store installation materials on elevated platforms, under cover, and in a dry location.
- H. Store mortar aggregates where grading and other required characteristics can be maintained and contamination avoided.

PART 2 - PRODUCT

2.01 CAST STONE MATERIALS

- A. General: Comply with ASTM C 1364 and the following:
 - B. Portland Cement: ASTM C 150, Type I, white, containing not more than 0.60 percent total alkali when tested according to ASTM C 114.
 - C. Coarse Aggregates: Granite, quartz, or limestone complying with ASTM C 33; gradation as needed to produce required textures.
 - D. Fine Aggregates: Manufactured or natural sands complying with ASTM C 33, gradation as needed to produce required textures.
 - E. Coloring Admixture for Cast Stone: ASTM C 979 , synthetic mineral-oxide pigments or colored water-reducing admixtures, temperature stable, nonfading, and alkali resistant.
 - F. Air-Entraining Admixture: ASTM C 260, certified by the manufacturer to be compatible with other admixtures used.
 - 1. Add to mixes for units exposed to the exterior at manufacturer's prescribed rate to result in an air content of 5 to 7 percent.
 - G. Other Admixtures: ASTM C494.
 - H. Reinforcement: Deformed steel bars complying with ASTM A 615/A 615M.
 - 1. Epoxy Coating: ASTM A 775/A 775M.
 - I. Anchors, pins and Inserts: Fabricated from stainless steel complying with ASTM A 276 or ASTM A 666, Type 304.

J. Sealant (Provided under Section 07900):

1. Type 1C Sealant (one-part polyurethane) as specified in Section 07900 - JOINT SEALERS, as applicable for vertical joints and for horizontal joints.

2.02 CAST STONE UNITS

A. Provide cast stone units complying with ASTM C 1364.

1. Compressive Strength: At 28 days after manufacture, not less than 6500 psi, when tested in accordance with Test Method ASTM C 1194.
2. Absorption, Cold Water: At 28 days after manufacture, not greater than 6%, when tested in accordance with Method A, Cold Water of Test Method ASTM C 1195.
3. Provide units that are resistant to freezing and thawing as determined by laboratory testing according to ASTM C 666, Procedure A, as modified by ASTM C 1364.
4. Fabricate the Work of this Section to the sizes and shapes indicated, and of texture matching the approved Samples.
5. Provide finished units which are straight, true to size and shape, and within the specified casting tolerances.
6. Make exposed edges sharp, straight, and square, unless indicated otherwise. Make flat surfaces into a true plane.
7. Warped, cracked, broken, spalled, stained, and otherwise defective units will not be acceptable.
8. Place and secure in the forms all anchors, clips, stud bolts, inserts, lifting devices, shear ties, and other devices required for handling and installing the precast units and for attachment of subsequent items as indicated or specified.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- B. Reinforce units as indicated and as required by ASTM C 1364. Use epoxy-coated reinforcement.
- C. Fabricate units with sharp arris and details accurately reproduced with indicated texture on all exposed surfaces, unless otherwise indicated. Match existing units in texture, color and shape where units are being replaced. Take all molds as necessary.
 - 1. Slope exposed horizontal surfaces at least 1:12, unless otherwise indicated.
 - 2. Provide raised fillets at backs of sills and at ends indicated to be built into jambs.
 - 3. Provide drips on projecting elements, unless otherwise indicated.
- D. Colors and Textures
 - 1. Color shall be as selected by the Architect.
 - 2. Color shall be uniform for each unit and consistent for all units.
- E. Casting tolerances

Maintain casting, bowing, warping, and dimension tolerance below the following maximums:

 - 1. Overall dimension for height and width of units: Plus zero, and minus 1/16" of unit length.
 - 2. Make thickness of units plus or minus 1/8" maximum.
 - 3. Bowing or warping: Do not exceed 1/360 of the length.
 - 4. Insert locations: Place within plus or minus 1/4" in each direction.
- F. Cure and finish units as follows:
 - 1. Cure units in totally enclosed curing room under dense fog and water spray at 95 percent relative humidity for a minimum of 24 hours. Follow PCI recommendations.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Yard cure units until the sum of the mean daily temperatures for each day equals or exceeds 350 deg F.
3. Acid etch units to remove cement film from surfaces indicated to be finished.

2.03 MORTAR MATERIALS

- A. Portland Cement: ASTM C 150, Type I or II, except Type III may be used for cold-weather construction. Provide natural color, white, or a blend to produce mortar color indicated.
- B. Hydrated Lime: ASTM C 207, Type S.
- C. Mortar Aggregate: ASTM C 144.
 1. White-Mortar Aggregates: Natural, white sand or ground, white stone.
- D. Mortar Coloring: Provide pure mineral pigments, natural and synthetic iron oxides, and chromium oxides compounded for use in mortar mixes. Material shall conform to ASTM C979. Coloring shall not contain alkalyde salts. No liquid colorants shall be permitted. Use only pigments with record of satisfactory performance in masonry mortars.
- E. Water: Potable.

2.04 MORTAR MIXES

- A. Setting Mortar: Comply with ASTM C 270, Proportion Specification, Type S.
 1. Limit cementitious materials to portland cement and lime. The use of masonry cement is not permitted.
 2. Pigmented Mortar: Select and proportion pigments with other ingredients to produce color required. Do not exceed pigment-to-cement ratio of 1:10, by weight.

2.05 ACCESSORIES

- A. Anchors: Type and size indicated, fabricated from stainless steel complying with ASTM A 276 or ASTM A 666, Type 304.
- B. Dowels: Round stainless-steel bars complying with ASTM A 276, Type 304, 1/2-inch (12-mm) diameter.
- C. Job-Mixed Detergent Solution: Solution of 1/2 cup (125 mL) of dry-measure tetrasodium polyphosphate and 1/2 cup (125 mL) of dry-measure laundry detergent dissolved in 1 gal. (4 L) of water.

2.06 SOURCE QUALITY CONTROL

- A. Employ an independent testing agency to sample and test cast stone units according to ASTM C 1364-97 and the specific test methods specified herein.

Include testing for:

- 1. Compressive Strength in accordance with Test Method ASTM C 1194. Test units from each 500 ft³ of cast stone.
 - 2. Absorption Cold Water in accordance with Test Method ASTM C 1195. Test units from each 500 ft³ of cast stone.
 - 3. Resistance to Freezing and Thawing in accordance with Test Method ASTM C 666. Test one unit from each cast stone mixture design.
- B. If test specimens fail, the specimens and the entire 500 ft³ lot they came from shall be rejected and shall not be used in the project.
 - C. The requirements for Source Quality Control testing, will be waived by the Authority if the casting plant is PCI Certified. See Art. 1.04,A.,3. for submittals.

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Examine substrates and conditions, with installer present, for compliance with requirements for installation tolerances and other conditions affecting performance of cast stone.

- B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.02 INSTALLATION

- A. Coordinate as required with other trades to assure proper and adequate accommodation with the Work of this Section.
 - B. Set cast stone as indicated on Drawings. Install anchors, supports, fasteners, and other attachments indicated or necessary to secure units in place. Set units accurately in locations indicated with edges and faces aligned according to established relationships and indicated tolerances.
- C. Drench units with clear water just before setting.
- D. Set units in full bed of mortar with full head joints, unless otherwise indicated. Build anchors and ties into mortar joints as units are set. Anchors to be set in substrate with non shrink grout.
 - 1. Coping Stone: Set 3/8" of mortar prior to installation of flashing providing full bed. Rake joint to allow for sealant installation. Seal flashing penetrations with sealant. Install another 3/8" mortar on top of flashing and place stone. Provide full bed of mortar.
 - 2. Fill dowel holes and anchor slots with mortar.
 - 3. Fill collar joint solid as units are set.
 - 4. Build concealed flashing into mortar joints as units are set.
- E. After units are set in or on the wall they shall have all top surfaces covered and protected from the elements at the close of each day's work and shall be kept covered and protected until all the Work is completed.
- F. Lead, Plastic or hard rubber buttons shall be used in setting large units to sustain the weight until mortar has set.
- G. All joints in units shall be raked out 3/8" deep and shall be filled with joint sealer, (after bond breaker tape) as specified in Article 2.01 in this Section.

H. Expansion Joints

Provide expansion, control, and pressure-relieving joints of widths and at locations indicated.

Provide expansion joints at a maximum spacing of approximately 40 feet on center. Match joint spacing with parapet expansion joints.

Provide filler seal, bond breaker tape, and joint sealers at expansion joints where indicated on the Drawings and where required for proper installation. (See Section 07900 Joint Sealers).

Keep joints free of mortar and other rigid materials.

I. Protect mortar and cast stone units from freezing during construction and maintain an ambient temperature for cast stone work of at least 32°F for a period of at least 72 hours.

At 40°F and below, heat water or sand to a minimum of 70°F and to maximum of 160°F.

At 32°F and below, heat mixing water and sand to a minimum of 70°F and to maximum of 160°F.

Do not use admixtures to lower the freezing temperature of the mortar.

J. Discrepancies

1. Immediately notify Authority's Representative.
2. Do not proceed until fully corrected.

3.03 INSTALLATION TOLERANCES

- A. Variation from Plumb: Do not exceed 1/8 inch in 10 feet (3 mm in 3 m) or 1/4 inch in 20 feet (6 mm in 6 m) or more.
- B. Variation from Level: Do not exceed 1/8 inch in 10 feet (3 mm in 3 m), 1/4 inch in 20 feet (6 mm in 6 m), or 3/8 inch (9 mm) maximum.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- C. Variation in Joint Width: Do not vary joint thickness more than 1/8 inch in 36 inches (3 mm in 900 mm) or one-fourth of nominal joint width, whichever is less.
- D. Variation in Plane between Adjacent Surfaces (Lipping): Do not exceed 1/16-inch (1.5-mm) difference between planes of adjacent units or adjacent surfaces indicated to be flush with units.

3.04 FIELD QUALITY CONTROL

- A. If there is evidence that the strength of cast stone units may be deficient or may not comply with the specified requirements, the Authority will employ an independent testing laboratory to obtain, prepare, and test cores drilled from hardened cast stone units to determine the compressive strength according to ASTM C 42. Include in the bid, a minimum of 3 units to be field tested and destroyed. If the units are found to be defective, other units will be tested and replaced at no cost to the Authority.
 - 1. Allow the Authority's testing laboratory access to material storage areas. Cooperate with the Authority's testing laboratory and provide samples of materials and concrete mixes as may be requested for testing and evaluation.
 - 2. A minimum of three representative cores will be taken from units of suspect strength, from locations directed by the Authority.
 - 3. Cores will be tested in an air-dry condition.
 - 4. The strength of the cast stone for each series of 3 cores will be considered satisfactory if the average compressive strength is equal to at least 85 percent of the 28-day design compressive strength and no single core is less than 75 percent of the 28-day design compressive strength.
 - a. Test results will be made in writing on the same day that tests are performed, with copies to Authority, Contractor, and cast stone fabricator. Test reports will include the following:
 - b. Project identification name and number.

- c. Date when tests were performed.
 - d. Name of cast stone fabricator.
 - e. Name of testing laboratory.
 - f. Identification letter, name, and type of cast stone, unit or units represented by core tests; design compressive strength; type of break; compressive strength at breaks, corrected for length-diameter ratio; and direction of applied load to core in relation to horizontal plane of cast stone as placed.
- B. Defective Work: Cast Stone units that do not comply with the specified requirements, including compressive strength, manufacturing tolerances, and finishes, are unacceptable. The Contractor shall remove and replace defective Work with cast stone units that comply with the specified requirements at no cost to the Authority.
- C. Additional testing, at Contractor's expense, will be performed by the Authority's testing laboratory to determine compliance of corrected Work with specified requirements.

3.05 ADJUSTING AND CLEANING

- A. Remove and replace stained and otherwise damaged units and units not matching approved Samples.
- B. Replace units in a manner that results in cast stone matching approved Samples, complying with other requirements, and showing no evidence of replacement.
- C. In-Progress Cleaning: Clean cast stone as work progresses. Remove mortar fins and smears before tooling joints.
- D. Final Cleaning: After mortar is thoroughly set and cured, and after completion of other work liable to damage or soil cast stone units, clean exposed cast stone as follows:
 - 1. Remove large mortar particles by hand with wooden paddles and nonmetallic scrape hoes or chisels.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Protect adjacent surfaces from contact with cleaner by covering them with liquid strippable masking agent, polyethylene film, or waterproof masking tape.

3. Clean in conjunction with the cleaning of all other masonry work. Do not clean in temperature below 50 degrees F. Clean by scrubbing with soap powder and water, applied vigorously with stiff fiber brushes, adding clean, sharp, fine, white sand to the soap and water mixture where necessary. After scrubbing, drench all surfaces of the cast stone units thoroughly with clean water. The use of sand blast, wire brushes; or acids of any kind will not be permitted under any circumstances for the cleaning of cast stone Work. Start the cleaning operation at the top of the structure and proceed downward.

END OF SECTION

SECTION 04520
MASONRY RESTORATION

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK:

- A. Provide all masonry restoration Work as indicated on the Drawings and as specified herein.

1.02 RELATED SECTIONS

- A. Unit Masonry Section 04200
- B. Cast Stone Section 04435
- C. Masonry Cleaning Section 04510
- D. Joint Sealers Section 07900

1.03 REFERENCES

- A. American Society for Testing and Materials (ASTM)
- B. N.Y. State Office of Parks, Recreation and Historic Preservation (OPRHP)/State Historic Preservation Office(r) (SHPO)

1.04 SUBMITTALS

- A. Product Data
 - 1. Portland Cement: Brand and manufacturer's name.
 - 2. Lime: Brand and manufacturer's name.
 - 3. Mortar Pigments: Brand and manufacturer's name.
 - 4. Packaged Products: Manufacturer's specifications and application instructions.
 - 5. Sand: Location of pit, name of owner, and previous test data.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

6. Masonry reinforcement, anchors and helical masonry ties.

B. Samples

Deliver to the Site for comparison with existing masonry.

1. Mortar for Exposed Joints and Cracks: Each required type, minimum 12" long by full thickness, showing finish and color.
2. Masonry Units: Each required type, full size, showing finish and full color range.
3. Masonry reinforcement, anchors and helical masonry ties.

C. Tests

Provide test results prepared by the helical masonry tie manufacturer's Company Field Representative (CFR) for the helical masonry tie pull out tests with recommendations.

D. Quality Control Submittals

1. Schedule of Uses: By mortar type.
2. Certificates
 - a. Furnish notarized Building Department affidavit from masonry manufacturer (Form 10H) stating materials delivered to project comply with the Specification requirements.
 - b. Furnish notarized Building Department affidavit from masonry supplier (Form 10J) stating materials delivered to project comply with the Specification requirements.

E. Certifications

1. Provide a letter signed and sealed by a New York State Professional Engineer or Registered

Architect describing the Contractor's method of operation for removal and installation of masonry, and stating whether bracing/shoring for structural stability is required or not required. Provide calculations, if requested.

2. If bracing/shoring of the masonry is required, submit stability drawings prepared, signed and sealed by a New York State Professional Engineer or Registered Architect.

1.05 QUALITY ASSURANCE

A. Qualifications

1. Company specializing in the Work of this Section shall have a minimum of three years experience and at least three successful projects with similar quantity of materials. References shall list address and completion date of project and the name and telephone number of contact person.

B. Regulatory Requirements

Building Code: Work of this Section shall conform to all requirements of the NYC Building Code and all applicable regulations of governmental authorities having jurisdiction, including safety, health, noise, and anti-pollution regulations. Where more severe requirements than those contained in the Building Code are given in this Section, the requirements of this Section shall govern.

C. Certification

Reinforced and unreinforced masonry shall conform to the material acceptance certification and inspection requirements of Article 7, Chapter 1 - Subchapter 1 and Tables 10-1 and 10-2 of the Building Code (Title 27).

1.06 DELIVERY, STORAGE, AND HANDLING

A. Packaged Products

1. Deliver materials to the site in manufacturer's original, sealed containers. Do not deliver

materials which have exceeded shelf life limitation set forth by the manufacturer. Material containers shall bear the manufacturer's label indicating manufacturer's name, trade name of product, lot number, shelf life of product, and mix ratio (if applicable). This includes individual bags of pre-bagged mortar mixes.

2. Comply with manufacturer's printed instructions for storing and protecting materials.

B. Bulk Aggregate

Store in a manner which will keep aggregate clean and protected from the weather elements.

1.07 ENVIRONMENTAL REQUIREMENTS

A. Construction Requirements

For factory packaged products, comply with manufacturer's printed limitations and instructions.

Salt or other chemicals for lowering the freezing temperature of the mortar shall not be used.

Masonry units, mortar, and grout shall be preconditioned and masonry protected for the following cold weather conditions:

1. Air temperature 40°F to 32°F:
 - a. Heat mixing water or sand to minimum of 70°F and to maximum of 160°F.
2. Air temperature 32°F to 25°F:
 - a. Heat mixing water and sand to minimum of 70°F and to maximum of 160°F.
 - b. Provide heat source to maintain a minimum air temperature 32°F on each side of masonry construction.
3. Air temperature 25°F to 20°F:

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- a. Heat mixing water and sand to minimum of 70°F and to maximum of 160°F.
 - b. Provide heat source to maintain a minimum air temperature of 32° on each side of masonry construction.
 - c. Provide wind breaks for wind in excess of 15 miles per hour.
4. Air temperature 20°F and Below:
- a. Heat mixing water and sand to a minimum of 70°F and to maximum of 160°F.
 - b. Provide enclosures and heat source to maintain a minimum air temperature of 32°F on each side of masonry construction during construction.
 - c. Keep temperature of masonry units a minimum of 30°F when laid.

B. Protection Requirements

1. Mean Daily Air Temperature of 40°F to 32°F:
 - a. Protect masonry from rain or snow for 24 hours.
2. Mean Daily Air Temperature of 32°F and Below:
 - a. An air temperature of at least 32°F shall be maintained on each side of masonry for a period of at least 72 hours for Type N mortar and for pointing mortar.

C. Wetting of Clay Masonry Units

For units with initial rates of absorption which require their wetting before laying, follow the following cold weather requirements:

1. If surface temperatures are above 32°F, use water heated to about 70°F.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. If surface temperatures are below 32°F, use water heated to about 120°F.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

A. Reinforcement and Ties

1. Hohmann & Barnard, Inc., Hauppauge, N.Y.
2. Dur-O-Wall, Arlington Heights, IL.
3. Helifix North America Corporation (Rep.: Patrick Sweeney, 888 992-9989)
4. Blok-Lok Ltd. (Rep.: Scott Burns, 800 561-3026),

B. Mortar Coloring

1. "SGS" Mortar Colors, Solomon Grind-Chem Services, Inc.
2. "True Tone Mortar Colors", Davis Colors, Rockwood Industries, Inc.
3. "Flamingo Colors ", The Riverton Corporation.

C. Masonry Cleaner

1. ProSoCo, Inc., South Plainfield, N.J.
2. Sure-Kleen

D. Restoration Mortar

1. Cathedral Stone Products
2. Edison Coatings, Inc.

2.02 FACE BRICK DISTRIBUTORS

- A. Consolidated Brick and Building Supplies, Inc., N.Y., N.Y.
- B. Tri-State Brick & Building Materials, Inc. N.Y., N.Y.
- C. Belden-Stark Brick Corp., N.Y., N.Y.

B. Masonry Units

1. Match existing units in type, grade, size, appearance, and texture unless otherwise indicated.
2. In addition to 1. above, brick shall be clay or shale, ASTM C216, grade SW, solid.

C. Accessories:

1. Material

a. Reinforcement and anchors

- 1) Stainless Steel: 18-8, type 304
- 2) Sheet Steel: (No. 2B finish), cold-rolled, annealed, ASTM A240.
- 3) Wire Steel: ASTM A580

b. Manufactured Units: All manufactured units shall be as follows:

- 1) LOX-ALL #120 Truss-Mesh, 9 gage, of proper width for the wall thickness.
- 2) Veneer Anchor: DW-10HS Manufacturers Hohmann & Barnard or approved equal. Stainless steel Type 304, ASTM A580.
- 3) Vee Tie: Stainless steel, masonry wire ties. Manufacturer - Hohmann & Barnard or approved equal.
- 4) Anchors: Manufacturers - Rawlplug; RKL. ¼" diameter, 2" long flat head stainless steel Zamac Nailing Fastener by Rawlplug Company Inc. of approved equal.
- 5) Wire: Stainless steel continuous wire by Hohmann & Barnard or approved equal.
- 6) If the actual space between wythes of solid masonry limits the use of a particular anchor, notify the Engineer

of Record for an acceptable alternate anchor.

- 7) Seismicclips: #187 by Hohmann & Barnard or approved equal.

2.04 MIXES

A. Mortar Types

1. All Mortar:
 - a. Comply with ASTM C270 and BIA-M1-88.
 - b. Provide Type I Portland cement. Masonry cement shall not be used as a substitute.
 - c. Preconstruction testing with the proportions carefully monitored is to be used to establish the upper end of the strength range of the mortar, which should generally be near the minimum strength of the next higher strength mortar.
 - d. The maximum strength of each mortar shall not exceed the minimum strength of the next higher strength mortar type.
 - e. Air content of mortar shall be less than 12%.
2. Rebuilding Mortar; Type N: 1 part Portland cement, 1 part lime, 6 parts dry sand.
3. Repointing Mortar: Comply with ASTM C 270, X3 Tuck Pointing Mortar. Add sufficient water to dry mix to produce a damp mix that will retain its shape when pressed into a ball by hand. Mix from 3 to 7 min. in mechanical mixer. Let mortar stand for not less than 1 hour nor more than 1-1/2 hours for prehydration. Add sufficient water to bring mortar to proper consistency for tuck pointing, somewhat drier than mortar used for laying units. Use mortar within 2-1/2 hours of its initial mixing; tempering is permitted during this period.
 - a. Brick: (Type O) 1 part Portland cement, 2 parts lime, 7 parts dry sand.

- d. For all pointing mortar: In addition to use of mortar pigments, color, white Portland cement and colored aggregates may be used as required to accomplish the matching of mortar color desired.

4. Masonry Repair Mortar:

- a. Material capable of filling the holes created due to the installation of the helical masonry ties in bricks. Material shall match properties of the existing natural material, be freeze-thaw resistant and shall be color to match the existing bricks.

- 1) Repair mortar for bricks shall be Jahn Repair Mortar M100 as manufactured by Cathedral Stone Products or Custom Series 45 as manufactured by Edison Coatings, Inc.

B. Mortar Color

For exposed mortar, select materials (complying with the requirements) and proportion pigments with other ingredients as necessary to match the color of existing corresponding materials. White Portland cement and colored aggregates similar to the existing may be used as required to accomplish the matching of mortar color desired.

2.05 SOURCE QUALITY CONTROL

- A. The Authority will assign a Licensed Professional Engineer designated for Controlled Inspection who will inspect the masonry construction under the requirements of paragraphs 27-132 and 27-602, Tables 10-1 and 10-2 (Reinforced and Unreinforced Masonry), and R&R 9/29/83 (Appendix A) (Curtain Wall Construction) of the Building Code

- B. Preconstruction testing of mortar properties will be done in accordance with ASTM C780. The Contractor shall assist the Authority's laboratory by any means

necessary and shall supply the approved base materials to the laboratory for testing.

PART 3 - EXECUTION

3.01 PREPARATION

A. Protection: Protect adjacent surfaces not being restored. Protect sills, ledges, and projections from material droppings. Also protect any painted surfaces which are not included in the Work from impact or damage.

B. Surface Preparation

1. Prepare surfaces to be restored in compliance with product manufacturer's printed instructions and as specified.
2. Remove dirt, dust, and foreign material from surfaces to be restored.
3. Clean areas to be restored with compressed air or water flushing, except as otherwise recommended by the mortar manufacturer.

C. Materials Preparations

1. Do not further wet concrete masonry units and stone that are already wet.
2. Wet bricks that have a high absorption rate. Wet bricks until water runs off. Install bricks when surface is slightly damp.
3. Prepare exposed mortar to match the color and appearance of existing adjoining mortar.

3.02 PROTECTION

A. Cover top of masonry wall with waterproof plastic membrane at the end of the work period and at other times when Work needs to be protected from rain and other precipitation. Extend cover down sides as needed to thoroughly protect the Work.

- B. During cold weather, do not use wet masonry units and frozen masonry units.
- C. Do not use frozen materials or lay masonry on frozen materials; remove frozen materials from wall. Refer to Part 1 of this Section, "Environmental Requirements" for temperature restrictions.
- D. Remove excess mortar from walls as soon after laying units as practicable to prevent staining and to facilitate cleaning of wall.
- E. Brace walls as needed until sufficiently set, or until intersecting walls provide lateral support.
- F. Scaffolding shall not be supported from a parapet wall on which work is being performed.

3.03 MIXING PROCEDURE FOR MORTAR

- A. Use following procedure (B., C., and D.) for Type N mortar; for Pointing Mortar, use procedure specified in 2.01 A.3. and B. and C. in this Article.
- B. Measure material by volume or equivalent weight. In measuring by volume, use a container to measure ingredients. Do not measure by shovel.
- C. Mix ingredients in a clean mechanical mixer for a minimum of 3 minutes, maximum of 5, with the minimum amount of water to produce a workable consistency.
- D. Mortar that has stiffened because of evaporation of water from the mortar shall be retempered as frequently as needed to restore the required consistency. Mortar shall be used within 2¹/₂ hours after initial mixing.
- E. For prepackaged masonry repair mortar, mix with water or manufacturer's polymer in proportions defined by manufacturer to provide the required consistency.

2.04 REPOINTING JOINTS

- A. The Contractor shall take all precautions required to ensure the original appearance of the building is maintained (not changed) and the existing brick is not damaged. The new mortar shall match the original in color & texture and the new joint shall match the existing joint tooling, size and profile. For joints that are set back from the brick face (raked joints), provide a sloping joint starting at the original depth at the top and sloping to the brick face at the bottom that will prevent water sitting on the brick while maintaining the intended shadow line.
- B. Rake or cut out joints to a minimum uniform depth of 3/4" and until sound surface is reached. Do not spall edges of masonry units or widen joints.

1. Mortar Removal for Non SHPO Designated/Landmark Buildings

Where cutting is required to remove existing mortar and joint filler, use a rotary power masonry saw wherever possible without damaging masonry. Masonry saw shall have a vacuum attachment to reduce dust. Use non-power tools for vertical brick joints.

2. Mortar Removal for SHPO Designated/Landmark Buildings:

The Contractor has the option of removing existing mortar from historic masonry surfaces using either hand held non-power tools for all joints or a combination of power tools/hand held non-power tools for horizontal joints & non-powered hand held tools for vertical joints. Removal of mortar shall be done without damaging the existing masonry units.

a. Mortar Removal With Hand Held Non-Power Tools

Use chisels with 1-1/2" maximum heads for cutting out the mortar. Sharpen chisels hourly to minimize chipping. One quarter inch chip per linear yard of cutting is the minimum standard of acceptable skill.

Additional damage may be grounds for removal of the technician from the project.

b. Mortar Removal With Combination of Power Tools & Hand Held Non-Power Tools

1) Use of power tools is permitted only on horizontal joints thicker than 1/8". Hand rake head (vertical) joints and any joints less than or equal to 1/8" in thickness. The width of the chisel must not exceed three quarters of the width of the mortar joint. The pneumatic carving tool is preferable for raking narrow joints. Sharpen chisels hourly to minimize chipping.

2) Existing mortar from horizontal joints may be removed by first cutting the center of the joint using either:

a

a 4-1/2" (maximum) angle grinder, such as Type 100 Black and Decker Industrial Heavy Duty slow speed grinder or equal, with a 4" maximum 1/8" thick diamond blade circular head.

or

a Barre Short Stroke Pneumatic Carving Tool (type S or D with a Splitter or Cape Chisel) as manufactured by Trow and Holden Co., Barre, VT 05641.

3) Hand rake out the mortar after a single pass has been made with the angle grinder or carving tool. Use chisels with 1-1/2" maximum heads for cutting out the mortar. Sharpen chisels hourly to minimize chipping. One quarter inch chip per linear yard of cutting is the minimum standard of acceptable skill. Additional damage may be grounds for removal of the technician from the project.

3. Cut the mortar and joint filler cleanly from the sides of the joints, leaving square corners. Flush joints clean with water or compressed air.
- C. Dampen joints slightly before application of mortar, making sure there is no free water. Pack pointing mortar tightly in joints in thin layers (1/4" max.), with each layer "thumbprint hard" before applying the next layer. Tool joints to match existing adjoining joints.
1. Where joint sealant is required, backpack the joints tightly out to a uniform depth of 1/4", or as indicated on Drawings. Refer to Section 07900 for sealants. Apply bondbreaker tape prior to installing sealants.
- D. Cure mortar by maintaining in a damp condition for at least 72 hours.

3.05 REPLACING MASONRY UNITS

- A. The Contractor is responsible for performing Work in a safe manner. Provide temporary shoring or other supports as required to prevent displacement of existing masonry that is to remain. Perform the removal Work with such care as may be required to prevent failure of the masonry or damage to adjoining masonry that is to remain. Follow method of operation and/or bracing scheme required to be provided in Article 1.04 titled "Submittals".
- B. Remove the deteriorated and damaged masonry units to their full depth, including the surrounding joint mortar. Wet masonry to reduce dust. Install helical masonry ties at perimeter of replacement prior to removal as indicated in details on the Drawings. Wherever possible without damaging masonry, use a rotary power masonry saw for cutting Work. Masonry saw shall have a vacuum attachment to reduce dust. Leave square corners at adjoining masonry which is to remain. Clean joints and cavities by flushing with water or compressed air.
- C. Dampen contact surfaces slightly before application of mortar, making sure there is no free water. Install

matching masonry units with Type N mortar. Install units to match and align with existing masonry. Maintain bonding and coursing pattern of existing masonry. Use presoaked wood wedges where necessary to properly set the units and maintain uniform matching joints. Backpack and fill joints full of mortar. Finish joints to match existing adjoining joints as described in Art. 3.04- Repointing Joints. Fill open joints in backup. In solid masonry construction, ensure that entire collar joint is filled between the backup and the face masonry. Collar joint is likely to vary substantially, up to 3" in locations.

D. Install accessories as indicated on Drawings.

E. Area Face Brick Replacement

1. Single wythes of brick shall be replaced in 4 foot lengths maximum unless indicated otherwise by the "methods of operation" submitted by the Contractor's Engineer as required to be submitted in the Article 1.04 titled "Submittals".
2. Install reinforcement every 16" each way and secure it to backup masonry as indicated on Drawings.

F. Replacement by Brick Stitching

Remove and replace existing brick to their full depth with new face brick, one brick each on both sides of crack in masonry. Also remove and replace all existing pushed-out, missing, split or otherwise defective face bricks to match the adjoining existing good sound masonry. If the existing masonry work has a solid masonry common-bond pattern, existing sound header bricks shall remain. However, any cracked, defective or loose header brick shall be replaced. All new brick work shall be toothed into existing good work. At horizontal cracks the replacement of bricks shall be done in 4 foot lengths maximum unless indicated otherwise by the "methods of operation" submitted by the Contractor's Engineer as required to be submitted in Article 1.04 titled "Submittals". Existing mortar bed for replaced brick shall be thoroughly removed and

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

the back parged with a coat of new mortar to fill the
collar joint.

3.06 FIELD QUALITY CONTROL

- A. The Authority will assign, under the requirements of paragraphs 27-132 and 27-602, Tables 10-1 and 10-2 (Reinforced and Unreinforced Masonry), and R&R 9/29/83 (Appendix A) (Curtain Wall Construction) of the Building Code a Licensed Professional Engineer designated for Controlled Inspection who will inspect the masonry construction. If the masonry work is not designated for Controlled Inspection, the masonry work will be subject to Quality Control Inspection, with testing and inspection similar to that listed below for Controlled Inspection.
- B. The Contractor, upon award of the Contract, will receive a signed statement stating that the Engineer designated for Controlled Inspection has assumed the responsibility for masonry inspection and will file all reports as required by the Building Department.
- C. The Engineer will make inspections and any testing deemed necessary. Mortar suspected or tested to be too strong or too weak will be subject to petrographic analysis or other methods deemed necessary by the Engineer of Record and Engineer designated for Controlled inspection. The Contractor shall pay for all tests if they verify improper work. Inspection are to include, but not be limited to, the following:
1. Proper installation of reinforcement of brick on angles.
 2. Proper installation of mortar. Those mortar properties listed in the Appendix of ASTM C780 are to be tested at the discretion of Engineer designated for Controlled Inspection or the Architect/Engineer of Record. Mortar strengths, when tested, will be determined in accordance with ASTM C780 using cubes.
 3. Proper installation of weeps, flashing, cleaning of cavity (if cavity wall construction), etc.
- D. The Architect or Engineer of Record will analyze any results not found to be in conformance with the applicable ASTM, industry practice, and the

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Specifications and determine if the masonry in question is to be removed and redone.

- E. Cooperate with the Engineer for Controlled Inspection and the Testing Laboratory performing Controlled Inspection testing.
- F. The contractor's engineer shall monitor the restoration procedure to ensure compliance with the "methods of operation" and to ensure safety of the structure.

3.07 CLEANING

- A. As the Work proceeds and after completion of Work, remove excess mortar, droppings, smears, stains, and other soiling substances resulting from the Work of this Section. Remove misplaced materials from surfaces immediately.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 05120
STRUCTURAL STEEL

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Furnish and erect all structural steel, including but not limited to that defined by the AISC "Code of Standard Practice for Steel Buildings and Bridges" and as shown on Drawings. Provide shop painting and galvanizing as specified.

1.02 PRODUCTS FURNISHED BUT NOT INSTALLED UNDER THIS SECTION

- A. Anchor Bolts for Casting into Concrete....Section 03300

1.03 PRODUCTS INSTALLED BUT NOT FURNISHED UNDER THIS SECTION

- A. Loose Bearing and Base Plates.....Section 05500

1.04 RELATED SECTIONS AND WORK

- A. Cast-in-place concrete fireproofing.....Section 03300
- B. Grouting under base and bearing plates....Section 03610
- C. Masonry and erection of loose lintels....Section 04200
- D. Metal DeckSection 05300
- E. Metal Fabrications - Non-framing fabrications affecting structural steel work including loose lintels and spandrel beam lintels secured to concrete.....Section 05500
- F. Ornamental Metal.....Section 05700
- G. Steel Stairs.....Section 05710
- H. Cementitious Sprayed Fireproofing.....Section 07250
- I. Firestopping.....Section 07270
- J. Field coat painting.....Section 09900
- K. Sheave beams and guides for elevators....Division 14

1.06 SUBMITTALS

A. Product Data

Submit manufacturers' specifications for the following products:

1. Primer paint, galvanizing repair paint
2. Stud shear connectors
3. Proprietary bolts, fasteners

B. Shop Drawings

1. Failure to submit legible shop drawings will be cause for disapproval without review.
2. Moment connections have been designed by the Engineer of Record and are shown on the Drawings. Shear connections (framed beam, seated beam, single plate, etc.) shall be designed and detailed by the structural steel detailer, unless otherwise shown on Drawings.
3. Immediately after award of Contract and before preparing steel shop drawings, submit for review a set of job standards showing all necessary joint details with full particulars of connection pieces, shop and field welds, and holes for erection bolts and permanent bolts. These shall include the moment and shear connections designed by the Engineer of Record as well as those designed by the detailer. Appropriate marks for designating all types and sizes of joint details shall be included. After approval of these job standards, the erection plan shall be marked to indicated unmistakably the type and size of joint to be used for every beam connection. Do not order steel in advance of approval of the job standards and the erection plans with joint marks, except at own risk.
4. Prepare remainder of steel shop drawings after approval of erection plan. Submit drawings gradually and not all at the same time so that sufficient time is allowed for checking and approval. All drawings shall be prepared under supervision of and bear the seal of a Licensed Professional Engineer (New York State). Do not submit unchecked shop drawings. First submissions

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

of all drawings shall have one set sealed and signed by the Engineer. After final approval of all shop drawings, submit a final set sealed and signed by the Professional Engineer.

5. Steel shop drawings shall include framing plans, bolted and welded work, and details such as camber and other pertinent data not shown on job standards. Connection details for individual beams are not required to be submitted provided that all such connections are covered by the job standard details. Detail openings and reinforcement due to other Work. Coordinate with Drawings of other Work.
6. Indicate welds by standard AWS symbols and show size, length, and type of each weld in accordance with AWS A2.0.
7. Identify columns using same identification system shown on Drawings.
8. Provide setting drawings, templates, and directions for installation of anchor bolts and other anchorages to be installed under other Sections.
9. Shop drawings will be checked for size of material and strength of connection by the Engineer of Record, which shall not render the Engineer responsible for any errors in construction dimensions, etc. which shall have been made in preparation of shop drawings. The Contractor shall assume full responsibility for the correctness of dimensions and fit.
10. Calculations shall be submitted upon request.

C. Quality Control Submittals

1. Certificates and Affidavits
 - a. Furnish notarized Building Department affidavit from steel manufacturer (Form SS24) certifying materials conform to Specification requirements.
 - b. Furnish bolt manufacturer's test reports, covering physical and chemical tests, for each lot of high strength bolts submitted.

- c. Furnish steel manufacturer's certificate certifying welders employed on the Work have met AWS qualifications within the previous twelve months.
 - d. Furnish complete listing of ASTM's of materials listed in Part 2 of this Section and certification that materials supplied meet those listed.
2. Surveys: Submit signed and sealed copies of each survey conducted by a Licensed Land Surveyor showing elevations and locations of base plate and anchor bolts to receive structural steel and final elevations and locations for major members. Indicate discrepancies between actual installation and Contract Documents.

1.07 QUALITY ASSURANCE

A. Qualifications

1. Fabricator: Company specializing in the fabrication of steel products to be used in this Contract shall have a minimum of five years experience.
2. Erector: Company specializing in performing the Work of this Section shall have a minimum of three years experience and have done at least three projects with similar quantity of material.
3. Detailer: Connections not detailed on the Drawings shall be detailed under direct supervision of a Professional Structural Engineer experienced in design of this Work and licensed by the State of NY.

B. Regulatory Requirements

1. Building Code: Work of this Section shall conform to all requirements of the NYC Building Code and all applicable regulations of governmental authorities having jurisdiction, including safety, health, noise, and anti-pollution regulations. Where more severe requirements than those contained in the Building Code are given in this Section, the requirements of this Section shall govern.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. New York City Board of Standards and Appeals (BSA): Rules for Arc and Gas Welding and Oxygen Cutting and Steel Covering the Specifications for Design, Fabrication, and Inspection of Arc and Gas Welded Steel Structures and Qualification of Welders and Supervisors.
3. Industry Standards: Standards specified herein apply to Work of this Section. Where more severe requirements than those contained in the Standards are given in this Section or the Building Code, requirements of this Section or the Building Code shall govern.
 - a. "Code of Standard Practice for Steel Buildings and Bridges" - AISC. Modification to the code shall be as follows:
 - 1) Paragraph 1.2 Definitions:
 - a) Modify "Architect/Engineer" to read "The Authority's designated representative for the preparation of the plans and specifications."
 - b) Modify "General Contractor" to read "The Authority's designated representative for construction of the structure."
 - c) Modify "Owner" to read "The Owner for the purpose of construction of the proposed school building is the NYC School Construction Authority."
 - 2) Paragraph 3.1 Structural Steel: Modify beginning of first sentence to read "In order to insure adequate and complete bids, the Contract Documents provide structural steel plans showing in sufficient detail the Work to be performed..."
 - 3) Paragraph 3.1.1: Add to the end of the sentence the words "unless otherwise noted."

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- 4) Paragraph 3.3 Discrepancies: Delete and replace with the following: "In case of discrepancies in the plans and specifications or between the two, the more restrictive shall govern unless otherwise agreed upon by the Engineer. Notify the Engineer of any discrepancies. In case of discrepancies between scaled dimensions on the plans and figures written on them, the figures shall govern."
 - 5) Paragraph 4.1 Owner Responsibility: Delete this paragraph and replace with the following: "Paragraph 4.1 Contractor's Responsibility - The Contractor is responsible for supplying the fabricator and erector with all Drawings and Specifications in order that they may proceed properly and expeditiously with the Work."
 - 6) Paragraph 4.2 Approval: Delete the second sentence in its entirety.
 - 7) Paragraph 4.2.1: Delete the second sentence in its entirety.
 - 8) Paragraph 4.2.2: Delete the paragraph in its entirety.
 - 9) Paragraph 5.2.3: After the words "Owner" on the next to last line, remove the words "except where the quality of the material could not affect the integrity of the structure."
 - 10) Paragraph 9.1.1: Remove the word "completely".
- b. RS 10-5a - AISC. As modified by the New York City Building Code.
 - c. "Specifications for Structural Joints using ASTM A325 or A490 Bolts" approved by the Research Council on Riveted and Bolted Structural Joints of the Engineering Foundation (RCRBSJ) - AISC.
 - d. "Structural Welding Code" - AWS.

C. Certifications

1. Structural steel shall conform to the material acceptance, certification, and inspection requirements of Article 7, Chapter 1 - Subchapter 1 and Tables 10-1 and 10-2 of the Building Code (Title 27).
2. Qualify welding processes and welding operators in accordance with AWS "Standard Qualification Procedure".

1.08 DELIVERY, STORAGE, AND HANDLING

- A. Deliver materials to the site at such intervals as to insure uninterrupted progress of Work.
- B. Deliver anchor bolts and other anchorage devices, which are to be embedded in cast-in-place concrete or masonry in ample time so to as not to delay Work.
- C. Store materials to permit easy access for inspection and identification.
 1. Shop-primed steel. (Painted or galvanized): Primed steel stored in the field or shop shall be kept off ground (using pallets, platforms, or other supports) and so positioned as to minimize water-holding pockets, dust, and other contamination of the primer. Repair damage to primed surfaces due to improper storage in a manner approved by the Authority.
 2. Unpainted Steel: Steel stored in field or shop shall be kept off ground (using pallets, platforms or other supports), kept clean and in general protected against damage and corrosion.
- D. Do not store materials on erected structure in a manner that might cause distortion or damage to the members or supporting structures. Repair or replace damaged materials or structures as directed by the Authority.

1.09 FIELD MEASUREMENTS

- A. Take field measurements as required by Drawings. Where possible take field measurements of existing conditions prior to fabrication. Verify that field measurements are same as those shown on Drawings and shop drawings. Report all deviations to the Authority in writing.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

PART 2 - PRODUCTS

2.01 MANUFACTURERS

- A. Stud Shear Connectors
 - 1. KSM Products, Inc.
 - 2. Nelson Stud Welding Co.
- B. Paint
 - 1. Tnemec Co.
 - 2. Sherwin Williams
 - 3. Con-Lux
- C. Proprietary Anchor Bolts, Fasteners
 - 1. Hilti, Inc.
 - 2. ITW Ramset/Redhead, Inc.

2.02 MATERIAL

- A. Structural Steel Shapes, Plates, and Bars

Structural steel shall conform to the provisions of ASTM A36 and tube steel to the provisions of ASTM A500, Grade B, unless otherwise noted.
- B. Headed Stud-Type Shear Connectors Shall conform to the provisions of ASTM A108, Grade 1015 or 1020, and Articles 4.26 and 4.27 of AWS D1.1.
- C. Bolts
 - 1. Anchor Bolts: Shall conform to the provisions of ASTM A36. Size and detailing indicated on Drawings.
 - 2. Unfinished Bolts: Shall conform to the provision of ASTM A307.
 - 3. High-Strength Bolts: Shall conform to the requirements of ASTM A325 unless otherwise indicated on Drawings.

4. Proprietary Expansion Bolts, Fasteners, etc.: Provide types as indicated on Drawings.

D. Hardware

1. Nuts for anchor bolts and unfinished bolts shall conform to the requirements of ASTM A563.
2. Nuts for high-strength bolts shall conform to the provisions of ASTM A194 or ASTM A563 as specified in ASTM A325.
3. Washers shall conform to the provisions of ASTM F436.

E. Filler Metal for Welding

1. Welding electrode shall conform to E70XX classification of AWS A5.1, except as described below.
2. Welding electrode shall be compatible with steel where connections are made to steel of existing building.

F. Structural Steel Primer Paint

Provide type of primer indicated on steel under the following application conditions.

1. General application: Modified alkyd rust-inhibitive type containing no lead equal to Tnemec Co. No. 10-99 or Con-lux Ferrox 25 Red Primer. Product shall have BSA or MEA approval for use on structural steel. Red oxide paint is not acceptable.
2. Cavity wall and exterior application: Epoxy paint equal to Tnemec Co. Series 27 Typoxy or Con-lux Epolon Low Temperature Cure Epoxy Mastic.
3. Touch-up primer for cavity wall and exterior application: High adhesion high-solids epoxy coating equal to Tnemec Co. Series 135 Chembuild or Con-lux Epolon Mastic 36 White.

G. Hot-Dip Galvanizing

1. Galvanize structural shapes in accordance with ASTM A123.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Galvanize hardware in accordance with ASTM A153.
3. Galvanizing repair paint for regalvanizing welds and damaged areas shall conform to ASTM A780 and comply with Military Specification MIL-P-21035.

2.03 SHOP ASSEMBLY - FABRICATION

A. General

1. Do not fabricate until shop drawings have been approved.
2. Fabricate and assemble steel in shop to greatest extent possible. Fabricate items and assemblies in accordance with AISC Specifications and the shop drawings.
3. Properly mark members for field assembly. Fabricate items in order to match delivery sequence which will expedite erection.
4. Mill column ends at base plates, cap plates, and splices to a common plane by means of an approved milling machine.

B. Shop Connections

1. Weld or high-strength bolt shop connections as indicated on Drawings.
2. High-strength bolt connections are friction (slip-critical) connections. Install high-strength bolts in accordance with "Specification for Structural Joints using ASTM A325 or A490 Bolts" (RCRBSJ).
3. Welding: Comply with "Structural Welding Code" for procedures, appearance, and quality of welds and methods used in correcting welded work.
4. Holes for other Work
 - a. Provide holes and openings required for securing other Work to steel framing and for passage of other Work through framing members. Coordinate with Drawings of other Work.
 - b. Provide threaded nuts welded to framing, and other specialty items as indicated to receive other Work.

- c. Cut, drill, or punch holes perpendicular to metal surfaces. Do not flame cut holes or enlarge holes by burning. Drill holes in bearing plates.
 - d. Reinforce all openings with steel shapes as shown on shop drawings.
- C. Shear Stud Connectors (Non-Metal Deck Construction)
- 1. Weld shear studs to beams with automatically timed stud welding equipment at spacing shown on Drawings. Size, type, and length specified on Drawings.
 - 2. Top flanges of beams must be free of paint, heavy rust, mill scale, dirt, ice and/or water, and any other material which will interfere with the welding operation.

2.04 SHOP PAINTING

A. General

Apply one shop coat of primer paint on structural steel except as follows:

- 1. Structural steel that is encased in concrete.
- 2. Steel work or portions of such to receive sprayed fireproofing.
- 3. Top flanges of structural steel members requiring stud shear connectors or supporting metal deck.
- 4. Contact surfaces of structural steel that are to be bolted or welded together.
- 5. Surfaces of structural steel within 2" of field welds, unless paint is approved to be weldable by BSA or MEA.
- 6. Contact milled bearing surfaces.
- 7. Exterior steel members and clips to be galvanized.

B. Cleaning and Surface Preparation

- 1. Clean all steel first in accordance with SSPC-SP1.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Clean steel work not to be painted (except steel work to be galvanized) in accordance with SSPC-SP2.
3. Clean steel work to be painted within the same day as it will be applied and in accordance with the following methods, determined by location and exposure:
 - a. Interior steel not exposed to view: SSPC-SP2.
 - b. Interior steel exposed to view: SSPC-SP3.
 - c. Cavity wall and exterior steel exposed to weather: SSPC-SP6.

C. Shop Coat

1. Apply structural steel primer paint (general application) at a rate to provide dry film thickness of 2.0 to 3.5 mils. Apply primer paint (cavity wall and exterior application) at a rate to provide dry film thickness of 4.0 to 6.0 mils. Provide full coverage of joints, corners, edges, and exposed surfaces.
2. Apply to dry surfaces only, when surface temperatures are above dew-point, by brush, spray, or roller, thoroughly and evenly, in strict accord with manufacturer's instructions for every detail of handling.
3. Apply second coat of the approved primer, in a darker shade, to surfaces inaccessible to painting after assembly or erection.
4. Protect machined surfaces with an approved rust-inhibitive coating which is readily removable prior to erection.

D. Concrete Contact Surfaces

Paint steel work at least two inches into the area in contact with concrete, where applicable.

2.05 GALVANIZING

A. General

Hot-dip galvanize the following members:

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. All angles supporting exterior masonry or exposed to the weather, including shelf, arch, and relieving angles.
 2. All connections between the above angles and the supporting structural member, including clip angles and hardware.
 3. All exterior steel supporting mechanical equipment (dunnage steel) and any other steel members indicated on Drawings.
- B. Cleaning and Surface Preparation
1. Hardware (bolts, nuts, etc.): Clean and leave free of mill scale before galvanizing.
 2. Steel members: Clean in accordance with SSPC-SP8 before galvanizing.
- C. Shop Coat - Hot-dip Galvanizing
1. Galvanize hardware in accordance with ASTM A153.
 2. Galvanize steel shapes in accordance with ASTM A123. Apply zinc coating as per Thickness Grade specified in ASTM A123.

2.06 SOURCE QUALITY CONTROL

- A. Testing
1. General
 - a. Structural steel work is subject to all tests required by the Controlled Inspection requirements of the NYC Building Code.
 - b. Cooperate with the Testing Laboratory in making all required tests.
 2. Tests: To be performed by the Authority's Testing Laboratory.
 - a. Shop bolted connections: Tested in accordance with AISC specifications.
 - b. Shop welding: The laboratory will perform the following functions:

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- 1) Certify welders.
 - 2) Visually inspect all welds, record type and locations of defects, and perform tests if necessary. Check all corrected work.
 - 3) Perform following non-destructive tests if necessary or as required by Engineer for Controlled Inspection. Tests used shall be at Engineer for Controlled Inspection or Testing Laboratory option:
 - a) Liquid Penetrant Inspection: ASTM E165.
 - b) Magnetic Particle Inspection: ASTM E109. Perform on roof pass and on finished weld.
 - c) Radiographic Inspection: ASTM E94 or E149. Minimum quality level 2-2T.
 - d) Ultrasonic Inspection: ASTM E164.
- c. Coupon Test: The laboratory will perform coupon tests of the steel of the existing building to determine compatible electrode for welding new steel to existing.
3. Welding of Critical Joints
- a. All welded joints that are critical to the integrity of the structure, and require non-destructive testing to assure the adequacy of the critical weld, are indicated on the Drawings.
 - b. To insure general weld quality of less critical groove and butt welds, a quality control program may be required to check the welds by non-destructive testing. The Drawings specify whether non-destructive testing is required and, if necessary, the method of inspection.

- c. Requirements of critical welds and non-destructive testing shall be in conformance with NYC BSA Rules for Arc and Gas Welding, Rules 16.5 through 16.5.3, and Rule 17.

B. Inspection

1. Testing Laboratory

- a. The Authority will engage an approved Testing Laboratory or Inspection Agency to assist in the inspection of steel fabrication and conduct tests at the mill, shop, or foundry. The laboratory will assist in checking erection tolerances and provide shop and field testing required for all structural steel work, including metal deck and studs.
- b. The Testing Laboratory will be responsible to and under the supervision of the Licensed Professional Engineer designated for "Controlled Inspection".

2. Engineer for Controlled Inspection

- a. The Authority will assign, under the requirements of paragraphs 27-132, 27-616, and Tables 10-1 and 10-2 of the Building Code, a Licensed Professional Engineer to supervise the Work listed above under "Testing Laboratory.
- b. The Contractor, upon award of the Contract, will receive a signed statement stating that the Engineer designated for Controlled Inspection has assumed the responsibility for inspection of the structural steel and will file all reports required by the Building Department.

3. Notification: Notify the Authority before beginning fabrication of the structural steel and supply laboratory with copies of agreements, approved drawings, approved prints of all shop details, etc., and all necessary information relating thereto. Do not ship material to job site until after inspection and approval by the Testing Laboratory.

4. Discretionary Inspections: No mill, shop, foundry, or field inspection, such as is above provided for, shall be held to prohibit or preclude inspection of

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

such materials during delivery and erection at the building by such other persons as the Authority shall direct.

5. Reports: Shop and field reports, including shipments, will be submitted by the Testing Laboratory to the Authority as the work proceeds at the shop or job site. A final report will be submitted by the Testing Laboratory when work is completed at the shop, and again when work is completed in the field. The Engineer for Controlled Inspection reserves right to reject material not in compliance with specified requirements at any time.
6. Corrections: Correct deficiencies in work which inspections and tests have indicated to not be in compliance with requirements. Pay for additional tests, at own expense, necessary to reconfirm any non-compliance of original work and as necessary to show compliance of corrected work.
7. Contractor's Responsibility: Inspection and acceptance or failure to inspect shall in no way relieve the Contractor or the mill and shops from their responsibility to furnish satisfactory material strictly in accordance with Drawings and Specifications.

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Verify that field conditions are acceptable and that erection may proceed. Notify the Authority in writing of conditions which adversely affect the Work. Do not proceed with erection until conditions have been corrected. Beginning of installation means the erector accepts existing conditions.

3.02 ERECTION

A. General

1. Erection shall conform to paragraphs 27-1033 through 27-1035 of the NYC Building Code and Section 1.25 of Reference Standard RS 10-5a, as amended.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. All work shall be erected plumb, square, and true to lines and levels in strict accordance with the structural requirements of the building.
3. Provide all machinery, apparatus, and staging required for the erection of steel work in a thoroughly safe and efficient manner. Install, maintain and remove, without injury to other Work, such temporary bracing, scaffolding, etc. as may be necessary or required. Care shall be taken that no part of the structure is overloaded during construction.
4. Arrange for deliveries of material to facilitate the rapid and continuous progress of operation, but the site or streets adjacent to same shall not be used for the storage of material unless absolutely necessary and then only under special permission of the Authority and other authorities having jurisdiction.
5. Employ a Licensed Professional Engineer or Land Surveyor to ensure accurate erection of the steel.
6. Do not alter or cut structural members without approval of the Engineer of Record.

B. Temporary Shoring and Bracing

Provide temporary shoring and bracing members with connections of sufficient strength to bear erection loads and guy wires to maintain structure plumb and in true alignment until completion of erection. Remove temporary work when permanent members and bracing are in place and final connections are made.

C. Anchors Bolts

1. Furnish to the concrete and brick masons anchor bolts and other connectors required for securing structural steel to the foundation and other in-place concrete work, together with instructions, templates, etc. necessary for setting them.
2. Tighten anchor bolts after support members have been positioned and plumbed. Cut off protruding edges of wedges or shims flush with edge of base or bearing plate prior to packing with grout.

D. Base and Bearing Plates

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Clean concrete and masonry bearing surfaces of loose and bond-reducing materials.
2. Set loose and attached base plates and bearing plates for structural members on shims and other adjusting devices.
3. Grouting under plates is part of the Work of Section 03610.

E. Field Assembly

1. Erect structural frames accurately to lines and elevations indicated. Align and adjust members forming a part of a complete frame or structure before permanently fastening.
2. Clean bearing surfaces and other surfaces which will be in permanent contact before assembly.
3. Perform necessary adjustments to compensate for discrepancies in elevations and alignment.
4. Level and plumb individual members of structure within specified AISC tolerances.
5. Establish required leveling and plumbing measurements on mean operating temperature of structure. Make allowances for difference between temperature at time of erection and mean temperature at which structure will be when completed and in service.
6. Splice members only where indicated and accepted on shop drawings.

F. Connections

1. Field connections shall be bolted except where indicated on Drawings.
 - a. Provide high-strength bolts for bolted connections except where unfinished bolts are indicated on the Drawings. High-strength bolt connections are friction (slip-critical) connections. Install high-strength bolts in accordance "Specification for Structural Joints using ASTM A325 or A490 Bolts."
 - b. Provide unfinished bolts where indicated on Drawings. Lock nuts by upsetting bolt end or

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

by similar method when unfinished bolts are not encased in concrete. Tighten all bolts and nuts fully.

- c. Proprietary expansion bolts or fasteners shall be tightened to the torque values specified by the manufacturer.
- d. For ASTM A307 or A325 bolts, hardened washer shall be installed under the turned element. For ASTM A490 bolts, hardened washer shall be installed under the head and nut.

2. Holes

- a. The size of bolt holes shall be in accordance with AISC "Specification for the Design, Fabrication and Erection of Structural Steel for Buildings."
- b. Ream holes that must be enlarged to admit bolts. Burning or use of drift pins is not permitted.

G. Erection Holes

Fill erection bolt-holes on exposed to view members with plug welds and grind smooth.

H. Lintels and Relieving Angles

- 1. Furnish and erect all exterior steel lintels and relieving angles connected (by hangers, clips, bolts or otherwise) to the structural steel work.
- 2. Galvanize all exterior lintels and hardware.
- 3. Loose lintels (interior and exterior) and lintels secured to concrete are part of the Work of other Sections.

I. Gas Cutting

Gas cutting in field of primary members to correct fabrication errors is not permitted. Gas cutting of secondary members not under stress is permitted with approval of Engineer of Record.

J. Field Touch-Up

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Painted Members: After erection, clean all damaged areas in shop coat, exposed surfaces of bolts, bolt heads, nuts and washers, abrasions, and all field welds and unpainted areas adjacent to field welds to the same standards as the shop coat and paint with primer paint to same thickness as the shop coat. Finish painting is specified in Section 09900.
2. Galvanized Members: After erection, clean and paint all damaged areas to the galvanizing, welds, and areas adjacent to welds with the galvanizing repair paint. Primer and finish painting specified in Section 09900.

3.03 TOLERANCES

- A. Erection tolerances shall be in accordance with "Code of Standard Practice for Steel Buildings and Bridges".

3.04 FIELD QUALITY CONTROL

- A. Cooperate with the Engineer for Controlled Inspection and the Testing Laboratory performing Controlled Inspection testing.
- B. The Engineer for Controlled Inspection and the Testing Laboratory will check erection of structural framework for permissible tolerances and test field bolting and welding as listed in Part 2 of this Section.

3.05 CLEANING

- A. Structural steel or portions of such to receive sprayed fireproofing shall be clean of dust, grease, oils, loose material, and any other matter which would impair the adhesion of the fireproofing material to the steel.

END OF SECTION

SECTION 05170
SUPPORT SYSTEM FOR SUSPENDED CEILINGS

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide structural ceiling suspension system as indicated on the Drawings and as specified herein, for all suspended ceiling systems.
- B. This suspension system shall include the attachment to overhead slab, steel angle, plate hanger, and running channels.
- C. Provide supports for furred areas, and for opening frames, lighting fixtures frames, furred ceilings and other items as indicated on the Drawings.
- D. Furring members and other attachments for the various ceiling materials and systems shall be as specified in the respective Section.

1.02 RELATED SECTIONS

- A. Furring and Lathing Section 09205
- B. Gypsum Board Section 09250

1.03 REFERENCES

- A. American Society for Testing and Materials (ASTM)

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School
and Cold-rolled, General Requirements
for.

1.04 SUBMITTALS

- A. Submit Shop Drawings showing suspension assembly, indicating all components, connections and anchorages, and grid layout.
- B. Submit three (3) samples of each component of the assembly.
- C. Submit sample of anchor and descriptive literature indicating its characteristics; submit laboratory report certifying pullout and shear capabilities for the anchor embedded in the materials to be used in this Project.

1.05 REGULATORY REQUIREMENTS

- A. New York City Building Code.

PART 2 - PRODUCTS

2.01 MATERIALS

- A. Steel Angle and Plate

ASTM A-36. Provide angle 3"x3"x3/16"x1" wide, with 1³/₈" long slot for 3/8" bolt. Provide plate 1" wide x 3/16" thick with 1³/₈" long slot for 3/8" bolt. Provide shop coat of asphaltum paint.

- B. Bolts

ASTM A307, 3/8" diameter, with lock washers and nuts. Provide shop coat of asphaltum paint.

- C. Running Channels

1¹/₂" deep x 7/16" wide flanges, 475 lbs. per 1000' painted, 508 lbs. per 1000', galvanized. $S(\text{in.}^3) = .0538$, $I(\text{in.}^4) = .0404$. Provide shop coat of asphaltum paint for paint channels.

ASTM A568 for painted channels.

- D. Sleeve Anchors (Angle to Deck) - Installed after Deck in Place:

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Manufacturers
 - a. Hilti Fastening Systems.
 - b. Illinois Tool Works, Inc.
2. Stainless Steel
3. Bolts: Minimum diameter of 3/8", with hex head.
Threaded stud at Optional Method.

2.02 PAINTING

- A. All steel members and accessories of the support system shall be dipped or painted with one coat approved asphaltum paint.

PART 3 - EXECUTION

3.01 COORDINATION WITH OTHER TRADES

- A. Coordinate this Work with the various trades who may have ducts, pipes, conduits, or other Work in the spaces above the suspended ceilings, in order that anchors, hangers and running channels may be properly placed to avoid such ducts, pipes, conduits, and other obstructions. Any changes required to be made in the locations of anchors, hangers, and running channels by reason of the Contractor's failure to observe this requirement shall be made by the Contractor without additional cost to the MMMHS.
- B. Coordinate Work with Ceiling Systems Work.

3.02 SUPPORT SYSTEM LOCATIONS

- A. Provide support system: for all suspended ceiling systems as indicated on the Drawings; for duct enclosures; for other enclosures or furring systems indicated on the Drawings and specified herein.

3.03 INSTALLATION

- A. Secure 3" x 3" steel angle to structural concrete deck with drop in anchors; install anchors as recommended by the manufacturer. Space at 48" o.c. maximum in each direction to accommodate the running channel layout.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- B. Attach steel plate hangers to angle with 3/8" diameter bolt, lock washer, and nut.
- C. Attach running channels to plate hangers with 3/8" diameter bolt, lock washer and nut. Install channels level, at proper height, and ready to receive the ceiling system: provide furring channels for gypsum board.

3.04 CEILING OPENINGS

- A. Provision shall be made for the installation of lighting fixtures, ventilating or air conditioning equipment, access openings, and other ceiling openings.
- B. Rigid frames of furring channels or angles shall be provided around openings, adequately braced and reinforced.

END OF SECTION

- E. "Structural Welding Code - AWS D1.1" - American Welding Society (AWS).
- F. "Specifications for Mild Steel Covered Arc - Welding Electrodes - AWS A5.1" - AWS.
- G. "Design Manual for Floor Decks and Roof Decks" - Steel Deck Institute (SDI).
- H. "Fire Resistance Directory" - Underwriters Laboratory (UL).

1.04 DESIGN REQUIREMENTS

- A. Design of metal deck shall be governed by RS 10-6 of the Building Code.
- B. Metal deck unit sizes and gages are indicated on the Drawings.
- C. Metal decks shall be capable of carrying the total loads indicated on Drawings without exceeding a maximum fiber stress of 20,000 psi. Metal deck shall be able to resist wet concrete plus construction loads without the use of shoring.
- D. Maximum allowable deflection under live load shall not exceed 1/360 of the span.
- E. Unit shall span over three or more supports except where steel layout does not permit. Units shall abut at end joints over beams requiring studs. Otherwise, end laps of deck sheets shall be a minimum of 2".
- F. Shoring of metal deck is not permitted.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- G. Stud design shall conform to Section 1.11.4 of RS 105a.
- H. Use of piercing, non-piercing, and integral hanger tabs is not permitted.
- 1. Units included in a fire rated assembly must be classified in appropriate UL designs and MEA approvals.
- J. The use of fasteners of equal or greater uplift capacity than welds for anchoring deck to steel for A, D, and G series assemblies is permitted in accordance with the UL Fire Resistance Directory.

1.05 SUBMITTALS

A. Product Data

Submit manufacturer's specifications for

- 1. Shear stud connectors
- 2. Deck Fasteners, if used

B. Shop Drawings

- 1. Prepare metal deck shop drawings immediately after award of Contract.
- 2. Shop drawings shall include, but not be limited to the following:
 - a. Type and gage of metal deck.
 - b. Welding or fastener pattern.
 - c. Side and end details of metal deck.
 - d. Supplementary framing details.
 - e. Location of all openings and fittings.
 - f. Shop finish.
 - g. Size, location, and spacing of stud shear connectors, where required, for each beam.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- h. Designation of welding electrode strength to be used.
3. Shop drawings reviewed by the Engineer of Record for general conformity with the Drawings shall not relieve the Contractor or the metal deck supplier of responsibility for correctness of fit, quantities of materials, and adequacy of attachment details of deck and accessories to the structural steel. Deck must have BSA or MEA approval as part of the fire rated assembly. Approval of shop drawings does not absolve the Contractor of this requirement. Coordinate with Section 07250.
4. Calculations: Submit calculations for the load tables of the metal deck supplied. Calculations shall be signed and sealed by a licensed Professional Engineer.

C. Quality Control Submittals

1. Certificates
 - a. Submit notarized certificates from the manufacturers of the specified materials stating compliance with the applicable requirements set forth for all materials specified in this Section.
 - b. Submit certificate stating welders employed for installation of the metal deck have met AWS qualifications within the previous 12 months.
 - c. Furnish BSA or MEA resolution for approval of material as part of fire rated assembly. Refer to Section 07250.
2. Manufacturers' Instructions: Furnish manufacturers' printed material, specifications and installation instructions for each type of decking, accessories, and studs.

1.06 QUALITY ASSURANCE

A. Qualifications

1. Manufacturer: Company specializing in the manufacture of metal deck as used in this Contract shall have a minimum of five years experience.
2. Erector: Company specializing in performing the Work of this Section shall have a minimum of three years experience and have done at least three projects with similar quantity of material.

B. Regulatory Requirements

1. Building Code: Work of this Section shall conform to all requirements of the NYC Building Code and all applicable regulations of other governmental authorities. Where more severe requirements than those contained in the Building Code are given in this Section, the requirements of this Section shall govern.
2. New York City Board of Standards and Appeals (BSA) and Materials and Equipment Acceptance (MEA)
 - a. Rules for Arc and Gas Welding and Oxygen Cutting and Steel Covering the Specifications for Design, Fabrication, and Inspection of Arc and Gas Welded Steel Structures and Qualification of Welders and Supervisors.
 - b. Composite metal deck shall have NYC BSA or MEA approval with respect to the following:
 1. Floor and roof construction to be used as a composite floor and a composite beam system (structural steel beams with approved shear connectors).
 2. Load tests to substantiate load tables for metal deck use in conjunction with concrete slab to form composite action.
 3. As a component part of a one and a half-hour fire resistive floor construction without need for sprayed fireproofing on underside of deck.
 4. As a component part of a three-hour fire resistive floor construction with use of

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School
sprayed fireproofing on underside of
deck.

- c. Roof deck shall have NYC BSA or MEA approval as a component part of a one and a half-hour fire resistive roof construction without the need for sprayed fireproofing on underside of deck, unless indicated otherwise.
 - d. Stud shear connectors shall have NYC BSA or MEA approval with respect to material and welding of studs through the metal deck by automatically-timed welding equipment.
 - e. All conditions and requirements of the required approvals must be fully complied with.
3. Industry Standards: Standards specified herein shall apply to Work of this Section. Where more severe requirements than those contained in the standards are given in this section or the Building Code, requirements of this Section or the Building Code shall govern.
- a. RS 10-5a - AISC - As modified by the Building Code.
 - b. RS 10-5b - AISC - As modified by the Building Code.
 - c. RS 10-6 - AISC - As modified by the Building Code.
 - d. "Rules for Design of Composite Construction with Metal Decks or Lightweight Concrete" - Department of Buildings.
 - e. Fire Resistance Directory - UL.
4. Recommendations or suggestions in the codes and references listed in this Article and under "References" shall be deemed to be mandatory unless they are in violation of the Building Code.

C. Certifications

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Structural metal deck and stud shear connectors shall conform to the material acceptance, certification and inspection requirements of Article 7, Chapter 1 - Subchapter 1 and Tables 10-1 and 10-2 of the Building Code (Title 27).
2. Qualify welding processes and welding operators in accordance with AWS "Standard Qualification Procedure".

1.07 DELIVERY, STORAGE, AND HANDLING

- A. Deliver deck to site undamaged with each deck unit bearing the UL label and marking for specific system detailed.
- B. Store deck units off the ground with one end elevated to provide drainage. Protect units from the elements with a waterproof covering.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

- A. Metal Deck and Accessories
 1. H.H. Robertson Company.
 2. Bowman Construction Products, Cyclops Corp., E.G. Smith Division.
 3. United Steel Deck, Inc.
- B. Stud Shear Connectors
 1. KSM Products, Inc.
 2. Nelson Stud Welding Co.

2.02 MATERIALS

- A. Steel for Roof Deck
 1. Formed from galvanic steel sheets conforming to ASTM A653.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Minimum yield point of 33000 psi.
3. Deck to receive sprayed fireproofing shall be free of lubricants or oils that would impair the adhesion of the fireproofing material.

B. Miscellaneous Steel Shapes

Shall conform to the requirements of ASTM A36. Members to receive sprayed fireproofing shall be unprimed and free of lubricants or oils that would impair the adhesion of the fireproofing material.

C. Shop Finish

1. Metal deck: Steel sheet shall receive before being formed a coating of zinc conforming to ASTM A653 coating class G90 or to Federal Specification QQ-S-775d, Class e (both sides).
2. Steel roof deck: Steel sheet shall receive before being formed a coating of zinc conforming to ASTM A653 coating class G90 or to Federal Specification QQ-S-775d, Class e (both sides). Roof deck exposed to view, such as in the gymnasium, shall be cleaned and phosphatized prior to priming. Primer shall be applied in the shop and is specified in Section 09900 (Zinc dust-zinc oxide primer - 2.5 Mils DFT).

D. Filler Metal for Welding

Welding electrodes shall conform to E70XX classification of AWS A5.1.

E. Metal Deck Accessories (cants, closure pieces, etc.)

Shall conform to the requirements of ASTM A653, coating class G90. Unless a thicker gage is required by design considerations, minimum thickness shall be same gage as metal deck. Accessories to receive sprayed fireproofing shall be free of lubricants and oils that would impair the adhesion of the fireproofing material.

F. Headed Stud Type Shear Connector

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Shall conform to the requirements of ASTM A108, Grade 1015 or 1020, and Articles 4.26 and 4.27 of AWS D1.1.

G. Galvanizing Repair Paint

Shall conform to the requirements of ASTM A780 and comply with Military Specification MIL-P-21035.

H. Power Driven Fasteners (if used)

Power driven fasteners of a type that will provide equal or greater uplift resistance than a $\frac{3}{8}$ " puddle weld.

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Do not begin placement of metal deck until all surfaces and members are deemed acceptable to receive the deck. Do not proceed with Work until any unsatisfactory conditions have been corrected to the satisfaction of the deck installer.

3.02 ERECTION

A. General

1. Care should be taken to avoid overloading the supporting structural elements when placing bundles of metal deck or other construction loads on floors and roof.
2. Do not use floor deck units for storage or working platforms until they are permanently secured.

B. Metal Deck and Accessories

1. Lay units in strict accordance with manufacturer's instructions and requirements and as shown on Drawings.
2. Adjust units in place before permanent fastening and accurately align end to end. Rectify inaccuracies in alignment and level of bearing before units are finally placed.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

3. Provide proper bearing at all supports. Metal deck must be placed to bear fully on surface of beam flanges.
4. Provide angle and channel supports for metal deck at locations where deck cannot be properly seated due to obstructions by structural connections and where shown on Drawings.
5. Anchor deck by welding directly through the bottom of the rib at all structural supports by welds not less than 3/4" in diameter or power driven fasteners of equivalent strength, spaced not more than 12" across the width of the unit. Where two units abut, each unit shall be so fastened to the steel framing. Welds shall be free of sharp points or edges.
6. Fasten side laps of adjacent units between supports by mechanically fastening with sheet metal screws of size and spacing indicated on the Drawings to provide diaphragm strength required by seismic design. In no case shall fasteners exceed three feet. Fasteners for exposed to view roof deck shall be attached from underside of deck and have a pan-head finish.
7. Furnish, install, and weld in position all accessories, including closures, cant strips, etc., where required.
 - a. Furnish sheet metal closures for open ends of all cell raceways at columns, walls, and openings shown on Drawings.
 - b. Provide sheet steel cover plate (or closure tape) as required to close panel end conditions where panels change direction or abut.
 - c. Furnish material for column closures to close openings between panels and structural columns.
 - d. Provide welding hole cover, with friction fastening, to close welding access holes when required.

C. Stud Shear Connector Welding

1. Weld studs to steel beams through the steel deck with automatically-timed stud welding equipment.
2. Stud welding shall conform to the requirements of AWS D1.1 with respect to workmanship, quality control, and field inspection.
3. Manufacturer shall supply guidance and instruction in proper installation method
4. Additional requirements for stud welding with metal deck:
 - a. Top flanges of beams must be free of paint, heavy rust, millscale, dirt, ice and water, and any other material that will interfere with the welding operation.
 - b. Metal deck must be free of dirt, ice, water, and other foreign materials which will interfere with the welding operation.

D. Cutting, Drilling, and Reinforcing of Openings

1. Where predetermined openings (such as stairs, elevators, etc.) are framed by structural steel beams on all sides (shown on the Drawings), the metal deck shall be engineered by the manufacturer to fit these conditions.
2. Any opening which is not framed by structural steel beams on all sides, and which is required in steel decking, shall be cut by the respective trades requiring it.
3. Reinforcing of Openings in Steel Deck
 - b. Holes 6" or less in dimension need not be reinforced.
 - b. Holes greater than 6" but less than 30" in any dimension shall be reinforced by the General Contractor as shown on the Structural Contract Drawings.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

E. Field Touch Up

Clean scarred and rusted areas in galvanizing after deck installation is completed and paint welds and the scarred and rusted areas with the galvanizing repair paint. Apply in accordance with the manufacturer's instructions.

3.04 FIELD QUALITY CONTROL

A. Welding of metal deck and shear studs is subject to Controlled Inspection and Testing and is included in the Quality Control Work of Section 05120.

3.05 CLEANING

A. Metal deck and accessories to receive sprayed fireproofing shall be clean of dust, grease, excessive oils, loose materials, and any other matter which would impair the adhesion of the fireproofing material to the deck and accessories.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 05500
METAL FABRICATIONS

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide metal fabrications and miscellaneous metals as indicated on the Drawings and as specified herein, including, but not limited to the following:
 - 1. Apparatus supports, miscellaneous hangers and accessories
 - 2. Lintels (Interior) - Furnish to Mason
 - 3. Lintels (Exterior) - Furnish to Mason
 - 4. Painting

1.02 RELATED SECTIONS

- A. Furring and Lathing Section 09205
- B. Plaster Section 09210
- C. Painting Section 09900
- D. Mechanical/Electrical.....Divisions 15 & 16

1.03 PRODUCTS FURNISHED BUT NOT INSTALLED UNDER THIS SECTION

- A. Lintels (Interior)
- B. Lintels (Exterior)

1.04 REFERENCES

- A. American Society for Testing and Materials (ASTM)

1.05 SUBMITTALS

- A. Shop Drawings
 - 1. Show all locations, markings, quantities, materials, sizes and shapes.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Indicate all methods of connecting, anchoring, fastening, bracing and attaching work of other trades.
3. Do not fabricate before approval of Shop Drawings.

1.06 QUALITY ASSURANCE

- A. Items provided in this Section shall be manufactured and fabricated by firms experienced in the type of Work specified.
- B. Installation shall be by installers experienced in the type of Work specified for the respective item.

1.07 PRODUCT HANDLING

- A. Before shipment to the job, all finishes shall be adequately protected for transporting and erecting periods.
- B. Replace damaged items, with the approval of the MMMHS Representative, and at no additional cost to the MMMHS.

PART 2 - PRODUCTS

2.01 MATERIALS

- A. All hot-rolled steel members in this Section
ASTM A36.
- B. Anchor Bolts
ASTM A307.

2.02 GALVANIZING

- A. All items in this Section indicated to have galvanized coating

Comply with ASTM A123 for Structural shapes and ASTM 153 for hardware items.

2.03 APPARATUS SUPPORTS, MISCELLANEOUS HANGERS AND ACCESSORIES

- A. Provide bolts, stud bolts, for and any proprietary bolts and fasteners for the support of apparatus and other items as indicated on the Drawings or as required.

2.04 LINTELS (INTERIOR)

A. Scope

Furnish to the mason at proper time for setting, all loose lintels for all openings in walls and partitions.

B. General Locations

1. Lintels for all openings for registers and louvers in connection with Heating and Ventilation Equipment.
2. Lintels for all conditions of openings in walls and partitions where ducts, pipes and other mechanical equipment pass through walls.
3. Lintels for doors in masonry walls.
4. See Drawing Details for size and number of lintels required for the support of masonry for the various wall thicknesses.
5. All loose lintels indicated on the Drawings.
6. Bear lintels a minimum of 4" on wall at each jamb.

2.05 LINTELS (EXTERIOR)

- A. Furnish to mason at the proper time for setting all steel lintels in exterior walls.
- B. All lintels in exterior walls shall be hot-dip galvanized in accordance with ASTM A123.
- C. Lintels for masonry openings for auditorium unit ventilator louvers.

2.06 MISCELLANEOUS

- A. Provide all other miscellaneous metal Work. All Work in connection with bolts, anchors, and inserts shall be furnished at the proper time for setting.

PART 3 - EXECUTION

3.01 INSPECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- A. Make all required measurements in the field to ensure proper and adequate fit.

3.02 DISCREPANCIES

- A. Immediately notify the MMMHS Representative.
- B. Do not proceed until fully corrected.

3.03 FABRICATION

- A. Welding

Comply with requirements of the American Welding Society (AWS).

- B. All Welding: By licensed welder.
- C. Welding Electrodes: E60XX classification of AWS A5.1.
- D. Grind welds smooth.

3.04 ERECTION

- A. Coordinate with other trades involved. Secure and anchor item as detailed.
- B. After erection, all damaged surfaces of shop coat shall be touched up, with Tnemec primer.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 05710
STEEL STAIRS

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

A. Provide Steel Stairs Work as indicated on the Drawings and as specified herein, including, but not limited to the following:

1. Egress stairs

1.02 RELATED SECTIONS

A. Painting Section 09900

1.03 REFERENCES

- A. American Society for Testing and Materials (ASTM).
- B. American Welding Society (AWS).

1.04 SUBMITTALS

A. Shop Drawings

1. Prepare and submit complete Shop Drawings of all stair work, windows guards, and frames to receive wire mesh panels.
2. Compare the stairs Drawings with the superstructure Contract Drawings at the time the structural steel Shop Drawings or reinforced concrete Shop Drawings are being prepared to ensure the maintenance of proper sized openings, head room and all other clearances.
3. Assume all responsibility for the correctness and accuracy of installation, and take and verify all measurements at the Building. The Contractor shall assume full responsibility for the correctness of dimensions and fit.
4. Provide all work and material necessary to comply with requirements of N.Y.C. Building Code for such stairs.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

5. All drawings shall be prepared under supervision of and bear the seal of a Licensed Professional Engineer. Do not submit unchecked shop drawings. First submissions of all drawings shall have one set sealed and signed by the Engineer. After final approval of all shop drawings, submit a final set sealed and signed by the Professional Engineer.
6. Shop drawings will be checked for size of material and strength of connection by the Engineer of Record, which shall not render the Engineer responsible for any errors in construction dimensions, etc. which shall have been made in preparation of shop drawings.

B. Samples

1. Submit three (3) samples of metal stair treads and platform material for approval.

1.05 QUALITY ASSURANCE

A. Fabricators

Five (5) years minimum experience in steel fabrications of stairs or similar Work.

B. Welding

By a licensed welder.

- C. Comply with requirements of the New York City Building Code.

1.06 DELIVERY, STORAGE, AND HANDLING

- A. Protect stairs and all other fabricated items during shipment, storage, erection, and after erection until the Project Work is completed.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

- A. Cast Iron Treads - As shown on the drawings

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Manufacturers

American Abrasive Metals Co.	Roseland, NJ 07068
American Safety Tread Co., Inc.	Helena, AL 35080
Wooster Products Inc.	Wooster OH 44691

2.02 MATERIALS

- A. Steel plate, angles, channels, beams, bars, and other hot-rolled Sections: ASTM A36.
- B. Gray Cast Iron
ASTM A48.
- C. Seamless Tubular Steel
ASTM A500.
- D. Cold-Rolled Steel Plate
ASTM A568, Grade 36.
- E. Wrought Iron Pipe (Handrails)
ASTM A53.
- F. Bolts
ASTM A325; A563 nuts.
- G. Welding Rods
E70 Classification of AWS A5.1.

2.03 FABRICATION - EGRESS STAIRS

- A. Construction
 - 1. Steel channel stringers, combined with steel plate risers to receive cast iron treads; pipe handrails, bolted and welded connections, or as indicated on the Drawings.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Secure cast iron treads in place with 3/8" flat head bolts.

Brackets for treads and risers: angle irons securely attached to stringers.

3. Riser for stairs in 1. and 2., above: For 4'-9" or wider: 3/16" crimped steel plates. For less than 4'-9" width: 10 gauge crimped steel plate.
5. Handrails: 1" schedule 40 wrought iron pipe supported on cast-iron brackets and wall plates secured to walls. The bends in railings: cast iron of diameter equal to the external diameter of the pipes with extensions to fit into the pipes. Weld pipes and bends together; grind welds smooth. Railings: free from burrs and imperfections, and perfectly smooth and clean for painting.

2.03 PAINING

- A. Paint stair work, except the tops of the cast iron treads, with one shop coat of rust inhibitive primer: Tnemec 1099 or Benjamin Moore Ironclad Retardo Rust Inhibitive Paint 163 as specified in Section 09900.
- B. Immediately after erection, fill all open joints with a suitable putty; scrape and sand smooth all bolts and all damaged surfaces of shop coat and all rough surfaces and then touch up with the rust inhibitive primer.

PART 3 - EXECUTION

3.01 CONNECTIONS

- A. Connect steel stairs to the structural steel framework before concrete and/or sprayed fireproofing is installed. In a reinforced concrete superstructure or portion thereof, secure the steel stairs to the concrete superstructure as indicated on Drawings.
- B. For minor connections, such as brackets to strings; bolt treads to risers, using hexagonal nuts where exposed.
- C. Other connections

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Fillet welds; grind smooth, where exposed.

3.02 TEMPORARY STAIRS

- A. If the permanent stairs are used as a temporary stairs,
provide wood treads for protection of the steel pans.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 06100
ROUGH CARPENTRY

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide rough carpentry Work as indicated on the Drawings, as required for the completed Work of this Contract, and as specified herein, including, but not limited to, the following:
1. Pressure treated wood blocking for installation of replacement windows.
 2. Pressure treated wood blocking for installation of main roofing system [ITEM 1].
 3. Anchors.
 4. Preservative treatment for wood.

1.02 RELATED SECTIONS

- A. Miscellaneous Building Insulation.....Section 07212
- B. Hot Polymeric Fluid Applied
Waterproofing - Item 1.....Section 07550
- C. Aluminum Projected and Casement Windows....Section 08524

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

I. American Wood Preservers Bureau (AWPB).

1.04 SUBMITTALS

A. Quality Control Submittals

1. Certificates: Certification for the following wood treatments:
 - a. Pressure Treatment: Certification by treating plant stating chemicals and process used, net amount of chemical preservative retained, and conformance with specified standards.
 - b. Waterborne Preservatives: Certified written statement that moisture content of treated materials was reduced to a maximum of 19 percent prior to shipment to Project site.

1.05 QUALITY ASSURANCE

A. Mill and Producers Mark

Each piece of lumber shall be gradestamped indicating type, grade, mill, and grading agency certified by the Board of Review of the American Lumber Standards Committee. Mark shall appear on unfinished surface, or ends of pieces with finished surfaces.

1. Pressure Preservative Treated Material: Accredited agency quality mark on each piece of wood including treatment.

B. Standards

Comply with the following unless otherwise specified or indicated on the Drawings:

1. Lumber: American Softwood Lumber Standard PS 20 by the U.S. Department of Commerce. Comply with applicable provisions by each indicated use.
2. Grading Rules:
 - a. Douglas Fir, Hem-Fir, Idaho White Pine, and other Western Woods: Western Wood Products Association (WWPA) or West Coast Lumber Inspection Bureau (WCLIB).

3. Preservative Treatment: American Wood Preservers' Association (AWPA) and American Wood Preservers Bureau (AWPB) Standards, quality control methods, and inspection requirements.

C. Regulatory Agencies

1. NYC Board of Standards and Appeals (BSA).
2. NYC Materials and Equipment Acceptance (MEA).

1.06 DELIVERY, STORAGE, AND HANDLING

- A. Keep materials dry during delivery. Store materials 6" minimum above ground surface. Protect against exposure to weather and contact with damp or wet surfaces. Stack lumber and provide air circulation between stacks.
- B. Cover stored materials until ready for use for protection from moisture. Place and anchor covering in a manner which will assure good ventilation under the covering.

1.07 PROJECT CONDITIONS

- A. Correlate location of supporting members to allow proper attachment of other Work.

PART 2 - PRODUCT

2.01 LUMBER

A. General

Furnish seasoned dimensional lumber dressed to nominal sizes indicated with 19 percent maximum moisture content at time of dressing, marked "S-DRY". Comply with dry size requirements of PS 20.

1. Dress: Surfaced 4 sides (S4S) unless otherwise indicated.

B. Miscellaneous Lumber

Standard grade, No. 3 grade, or better grade of the following species unless otherwise indicated:

1. Blocking: Douglas Fir, Hem-Fir or Idaho White Pine.

2.02 PRESERVATIVE TREATMENT

A. Pressure Treatment (Above Ground Use)

Provide the following wood items with waterborne preservatives for above ground use, complying with AWPB LP-2.

1. Blocking and similar concealed members in contact with masonry.

2.03 FRAMING HARDWARE

A. Anchoring Devices

Provide items of type, size, style, grade, and class as required for secure installation of the Work. Unless shown or specified otherwise, comply with the following:

1. Manufacturers
 - a. Hilti Fastening Systems.
 - b. Illinois Tool Works, Inc.
2. Stainless Steel
3. Bolts: Minimum diameter of 3/8", with hex head. Threaded stud at Optional Method.
4. Safe working loads: for pullout: 400 lbs. (Min.); for sheer: 400 lbs. (Min.) In 3000 p.s.i. lightweight concrete.

PART 3 - EXECUTION

3.01 EXAMINATION

A. Verification of Conditions

Examine substrate and supporting structure on which rough carpentry is to be installed for defects that will adversely affect the execution and quality of the Work. Do not proceed with installation until unsatisfactory conditions are corrected.

3.02 INSTALLATION - GENERAL

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- A. Do not use units of material with defects which impair the quality of the Work and units which are too small to fabricate the Work with minimum joints or with optimum joint arrangement.
- B. Install Work accurately to required lines and levels with members plumb and true, accurately cut and fitted and securely fastened. Closely fit rough carpentry to other associated construction.
- C. Securely attach carpentry Work to substrates by anchoring and fastening as indicated. Make tight connections between members. Install fasteners without splitting wood; predrill as required.

3.03 WOOD BLOCKING

- A. Install required items where indicated and where required for support, attachment of other Work. Form to shapes indicated or required. Coordinate locations and cut and shim as required to provide items at true and level planes to receive Work to be attached.
 - 1. Attach to substrates as indicated; if not indicated, size and space fasteners as required to support applied loading. Maximum spacing of fasteners shall not exceed 16". Unless otherwise shown on the Drawings, install and secure material to non-wood construction as follows:
 - a. To Masonry: Attach materials with anchors.

3.04 ROUGH HARDWARE

- A. Furnish all rough hardware, such as nails, bolts, buck anchors and all other rough hardware required to secure the carpentry work in place, unless otherwise specified.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 06200
FINISH CARPENTRY

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide all finish carpentry Work as indicated on the Drawings and as specified herein, including, but not limited to the following:
1. Interior wood finish and trim, including, but not limited to: Platforms, casework and plywood paneling (where indicated).
 2. Wood Finish and plywood paneling in Office.

1.02 RELATED SECTIONS

- A. Rough Carpentry Section 06100
- B. Custom Casework Section 06410
- C. Finish Hardware Section 08710

1.03 REFERENCES

- A. Architectural Woodwork Institute (AWI)
- B. American Society for Testing and Materials (ASTM)
- C. American National Standards Institute (ANSI)
- D. Underwriter's Laboratories, Inc. (UL)

1.04 SUBMITTALS

- A. Product Data
- Submit manufacturer's or supplier's product data for each product and process specified as work of this Section and incorporated into items of finish carpentry.
- B. Quality Certification
- Submit woodwork Manufacturer's (Fabricator's) certification, stating that fabricated woodwork complies

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

with AWI quality grades and other requirements indicated herein.

C. Wood Treatment Data

Submit chemical treatment manufacturer's instructions for handling, storing, installation, and finish of treated material.

D. Fire-Retardant Treatment

Provide certification by treating plant that treated materials comply with requirements. Submit certification of approval by NYC Board of Standards and Appeals (BS/A) or Materials and Equipment Acceptance (MEA).

E. Shop Drawings

Submit Shop Drawings showing location of each fabricated item, dimensioned plans and elevations, large scale details and profiles, attachment devices and other components.

1. Identify woodwork item using same identification system shown on Architectural Drawings.
2. Coordinate details and cut-outs to accommodate accessories specified under other Sections.

1.05 QUALITY ASSURANCE

A. AWI Quality Standard

Comply with applicable requirements of the AWI "Architectural Woodwork Quality Standards", except where indicated otherwise.

B. Fabrication and Installation Qualifications

Firm which can demonstrate a minimum of 5 years of successful experience in fabricating and installing woodwork items similar in type and quality to those required for this project.

C. Submit name of firm to the Authority for approval.

D. Regulatory Agencies:

1. NYC Board of Standards and Appeals (BS/A)

2. NYC Materials and Equipment Acceptance (MEA)

1.06 DELIVERY, STORAGE, AND HANDLING

- A. Protect woodwork during transit, delivery, storage and handling to prevent damage, soiling and deterioration.
- B. Do not deliver woodwork until operations which could damage, soil or deteriorate woodwork have been completed in installation areas. If woodwork must be stored, store only in areas meeting requirements and conditions specified for installation areas.

1.07 PROJECT CONDITIONS

A. Conditioning

Woodwork Installer shall advise the Authority's Representative of temperature and humidity requirements, in writing for woodwork installation and storage areas. Do not install woodwork until required temperature and relative humidity have been stabilized.

B. Maintain temperature and humidity conditions in installation area as required to maintain moisture content of installed woodwork within 1.0 percent of optimum moisture content as follows:

- 1. Optimum moisture content of wood: 5-10%
- 2. Relative humidity required to be maintained in installation and storage areas: 25-55%

PART 2 - PRODUCT

2.01 MATERIAL

A. General

- 1. All interior wood finish shall be made up of thoroughly seasoned, kiln dried woods of the kinds specified.
- 2. All material shall be clear on all exposed faces and edges, free from checks, cracks or other blemishes that would mar the appearance of the finished wood.
- 3. In assembling interior woodwork, arrange so that variations in grain pattern are kept to a minimum.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

4. All material shall be product of one mill.

B. Species and Grades (Lumber)

1. Plain Sawn Appalachian Red Oak, AWI Grade I (for transparent finish): interior wood finish throughout, except as otherwise specified or shown on Drawings.

C. Species, Grades, Types (Plywood)

1. Veneer: Oak and White Birch, as specified herein, AWI Grade I.

2. Grain Appearance: Running Match.

3. Core: Particleboard or fiberboard, medium density, fire-retardant.

2.02 FABRICATION, GENERAL

A. Wood Moisture Content

Comply with requirements of referenced quality standard for moisture content of lumber at time of fabrication and for relative humidity in installation areas. (See Art. 1.07).

B. Fabricate woodwork to dimensions, profiles, and details indicated.

C. Complete fabrication, assembly, finishing, and other work before shipment to maximum extent possible. Disassemble components only as necessary for shipment and installation. Where necessary, provide ample allowance for scribing, trimming, and fitting.

D. Pre-Cut Openings

Provide woodwork with pre-cut openings, where possible, for hardware, appliances, plumbing fixtures, electrical work and similar items. Locate openings accurately and use templates or roughing-in diagrams for proper size and shape. Smooth edges of cutouts.

E. Measurements

Before fabrication of woodwork to be fitted to other construction, obtain field measurements and verify

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

dimensions and shop drawings detail as required for accurate fit.

1. Where field measurements before fabrication would delay the project, fabricate without field measurements and provide ample borders and edges to allow for scribing and trimming of woodwork.

2.03 FIRE-RETARDANT MATERIALS

- A. Where fire-retardant treated lumber, plywood, and panel products are required by Building Code, provide materials which are pressure impregnated with fire-retardant chemicals and comply with the following requirements:

1. Fire-Retardant Chemicals: Use chemicals which do not bleed through or otherwise adversely affect adhesives or finishes. Do not use colorants to distinguish treated lumber and panels from untreated lumber and panels.

- B. Fire-Performance Characteristics

Provide materials which are identical to those tested in accordance with ASTM methods and time periods indicated, are listed for fire performance characteristics by Underwriter's Laboratories, Inc., or other testing agency acceptable to authorities having jurisdiction.

1. Marking: Identify treated lumber with separable paper classification marking of inspecting and testing agency.
2. Surface Burning Characteristics: Not exceeding values indicated below, tested in accordance with ASTM E84 for 30 minutes which no evidence of significant combustion.
 - a. Flame Spread: 25.
 - b. Smoke Developed: 50.

- C. Kiln-dry woodwork after treatment to levels required for non-fire-retardant woodwork materials. Maintain moisture content required by kiln drying, before and after treatment. Do not use treated lumber which does not comply with requirements of referenced woodworking standard.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- D. Where fire-retardant particleboard and fiberboard are used, provide panels with fire-retardant chemicals to achieve surface-burning characteristics of 20 for flame spread and 25 for smoke developed when tested in accordance with ASTM E84.

Comply with ANSI A108.1 for Grade 1-M-1 panels with density of 45 lbs./cu. ft. for thickness of 3/4" and less and 44 lbs./cu. ft. for thickness of 13/16" to 1 1/4".

Linear expansion: 0.35% for 45 lb. density and 0.50% for 44 lb. density.

Screw-holding capacity, face and edge: 300 lbs. and 250 lbs., respectively, for 45 lb. density, and 250 and 175 lbs., respectively, for 44 lb. density.

2.04 LUMBER THICKNESS

- A. Finish thicknesses of members, and tolerances permitted:

Comply with AWI-100-S-2.

2.05 GLUING

- A. Gluing for wood member thickness and for wood member width

Comply with AWI-100-S-2.

at head of proscenium arch and trim at windows: White birch.

2.06 PAINTING (SHOP APPLIED)

- A. Oak Woodwork:

1 coat of stain

1 coat of filler (wipe off excess)

1 coat of sealer (after filler is dried)

- B. White Birch and White Maple - (Grade I):

1 coat of stain

1 coat of sealer

- C. Final finishing shall be provided in Section 09900.

PART 3 - EXECUTION

3.01 CONDITION OF SURFACES

- A. Examine all grounds, stripping and blocking, to secure paneling and other items provided under this Section.
- B. Do not install until all defects are corrected.

3.02 INSTALLATION

- A. Install woodwork plumb and level without distortion.
- B. Shim as necessary with concealed shims.
- C. Accurately scribe and closely fit all face plates, filler strips and trim strips to irregularities of adjacent surfaces.
- D. Do all Work in strict accordance with the details for the various portions of the Work.
- E. For adjoining pieces of hardboard, carefully select to match the color and grain as closely as possible.
- F. Interior finish

High-speed machine work, free from planing machine marks, sandpapered smooth, ready to receive paint or varnish.
- G. Carefully fit woodwork and secure with finishing nails; countersink nails.
- H. Do not allow kerfing on faces of trim or moldings.
- I. Properly house stiles and rails into framework and properly nail and glue all parts together.
- J. Miter, with miters doweled or clamped, all trim joints except window trim.
- K. For joining of window trim, see Details.
- L. Round base and all other moldings on walls at all salient angles; where columns occur in partitions, follow contour.
- M. Carefully cut and fit wood trim at convectors.
- N. Install all trim, when applied to a surface less than 13 feet in length, in one length: no piecing will be

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

accepted. Provide bevel joints, where joints are required; no butt joints will be accepted.

- O. In addition to machine sanding, sand all interior woodwork by hand with 00 sandpaper to give trim a smooth surface for finishing.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

3.03 APPLYING HARDWARE

- A. Apply all miscellaneous hardware not specified to be installed under Section 08710 and other Sections.

SECTION 07115
SHEET MEMBRANE WATERPROOFING FOR FOUNDATIONS

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide sheet membrane waterproofing for foundation walls and slabs as indicated on the Drawing and as required for a complete watertight installation.

1.02 RELATED SECTIONS

- A. Earthwork.....Section 02200
- B. Concrete Formwork.....Section 03100
- C. Concrete Reinforcement.....Section 03200
- D. Cast-In-Place Concrete Section 03300

1.03 REFERENCES

- A. American Society for Testing and Materials (ASTM)
- B. Federal Specifications (FS)

1.04 DESIGN CRITERIA

- 1. Waterproofing system shall be complete and consist of all liquid membranes, tapes, and other material required for the system to be watertight. System shown on Drawings and specified herein are based on Grace Construction Products materials. Other manufacturer's listed are acceptable if they have a complete system which meets the performance requirements of this specification. Regardless of manufacturer used, the Contractor is responsible for providing a complete system and shall discuss with manufacturer prior to bid.
- B. The Grace polyethylene membrane (Preprufe) used on the underside of slabs may not require the use of a mud mat. If other systems are used, the use of a mud mat is required. It is also to be used for blind side applications where lagging or formwork is not to be removed. The Carlisle butyl rubber membrane (.120 Butyl) requires protection board on each side as a

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

minimum. Mud mat, protection board, and all additional detailing required by the Architect/Engineer of Record to provide for the proper installation of the membrane shall be at no cost to the Authority.

1.05 SUBMITTALS

A. Submittals Package

Submit the Shop Drawings, product data, and samples specified below at the same time, as a package.

B. Product Data

Catalog sheets, Specifications, and installation instructions for each material specified.

1. *Revise the membrane manufacturer's product data as necessary to suit the requirements of the Contract Documents. Manufacturer's details are not to be used for the Work of this Contract.*

a. *Unless approved otherwise in writing by the Authority, the requirements of the Contract Documents take precedence over the approved waterproofing manufacturer's specifications and details.*

b. *Any materials, installation procedures, or details not included in the Contract Documents must be approved by the Authority.*

2. *Manufacturer's Warranty Sample: Submit a sample copy of the membrane manufacturer's five (5) year materials warranty.*

C. Shop Drawings

When there is a proposed deviation from the Contract Documents, submit the revised detail, labeled as such for approval. The revised detail shall show existing conditions and shall be referenced directly to the related details on the Contract Drawings. Details not shown on the Contract Drawings shall be as recommended by the waterproofing manufacturer and approved by the Architect/Engineer.

D. Samples

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Sheet Membrane, each type: Two 3-foot square pieces.
2. Liquid membrane
3. Tape
4. Adhesive
5. Drainage panel
6. Primer.

E. Quality Control Submittals

1. Membrane Waterproofing Manufacturer's Certification:
 - a. Submit a letter certifying that the manufacturer has been actively marketing the submitted system for a minimum of three (3) years.
 - b. Submit the names and addresses of 10 previous waterproofing projects. Include the type and size of each project, and name and telephone number of a contact person at the project location.
2. Applicator's Certification:
 - a. Submit a letter certifying that the applicator has been actively installing waterproofing systems for the past five (5) years.
 - b. Submit the names and addresses of five (5) previous waterproofing projects. Include the type and size of each project, the waterproofing manufacturer's name, and the name and telephone number of a contact person at the project location.
 - c. Submit a letter certifying that the supervisor or foreman and the workers applying the waterproofing materials have at

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

least three (3) years experience in the application of waterproofing materials.

3. Manufacturer's Instructions: Furnish manufacturer's literature, specifications, and application instructions.
4. Manufacturer's Field Reports: Submit copies of inspection reports.

F. Contract Closeout Submittals:

1. Manufacturer's Warranty: Upon acceptance of the completed Work of this Section, furnish the membrane manufacturer's written five (5) year materials warranty.
2. Contractor's written five (5) years guarantee covering materials and workmanship.

1.06 QUALITY ASSURANCE

A. Membrane Manufacturer's Qualifications

1. The manufacturer must have been actively marketing a self adhering rubberized asphalt sheet membrane waterproofing system in the United States for a minimum of three (3) years.
2. The manufacturer's rubberized asphalt sheet membrane must have previously been installed on a minimum of 10 waterproofing projects of comparable scope and complexity to the Work of this Section.

B. Applicator's Qualifications

1. The waterproofing applicator must have been actively installing waterproofing systems for the past five (5) years.
2. The waterproofing applicator must have previously installed and completed a minimum of five (5) waterproofing projects of comparable scope and complexity to the Work of this Section.
3. The person supervising the Work of this Section and the workers applying the waterproofing materials shall have had at least three (3) years

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

of experience in the application of waterproofing materials.

1.07 DELIVERY, STORAGE, AND HANDLING

A. Delivery

Deliver all materials to the site in the manufacturer's labeled, unbroken containers. Membrane rolls must be packaged in rigid containers to prevent membrane distortion.

B. Storage

1. Do not double stack pallets of membrane.
2. Store all materials on wooden platforms in a well-ventilated place.
3. Store insulation and protection board flat.
4. Cover all materials on top and sides with tarpaulins allowing for adequate ventilation. Keep materials dry at all times.
5. Store all materials away from high heat, flames, and sparks.

C. Handling

1. Handle all materials in a manner to prevent damage. Mark and remove all damaged material from the site.
2. Do not smoke or use open flames near primer, mastics, or liquid membrane.

1.08 PROJECT CONDITIONS

- A. Do not execute the Work of this Section without notifying the Authority's Representative at least five (5) days before commencing.
- B. Do not execute the Work of this Section unless the substrate is smooth, dry, and free of all dirt, dust and debris. Concrete shall be cured 28 days minimum prior to installing material.
- C. Unless approved otherwise by the Authority, do not execute the Work of this Section when the air or

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

surface temperature of the structural substrate is below 30°F.

- D. Maintain the groundwater level below the waterproofing at all times.
- E. Do not apply the waterproofing system in areas where dust is being generated from adjacent work areas. If necessary, erect temporary dust barrier or screens to keep the area being waterproofed clean and free of dust and dirt.
- F. Do not leave polyethylene type membrane exposed for more than 30 days and the rubberized asphalt type membrane for more than 60 days.

1.08 WARRANTY AND GUARANTEE

A. Warranty

The Contractor shall provide, from the membrane Manufacturer, a written 5-year warranty for the materials used in the membrane application, providing for replacement of defective material.

B. Guarantee

The Contractor shall furnish a written five (5) year guarantee, providing that the membrane materials and workmanship will be free from leaks and defects; and that if leaks and defects do occur, the membrane system and all other work damaged by the failure, including Work which must be removed for access to the waterproofing materials, will be repaired or replaced at the Contractor's expense.

PART 2 - PRODUCT

2.01 MANUFACTURERS

- A. Grace Construction Products, Cambridge, MA.
- B. Carlisle Coatings and Waterproofing, Sapula OK
- C. Northern Elastomeric Inc. (NEI) Brentwood, NH 03833

2.02 MATERIALS

A. Wall and Slab Sheet Membrane Waterproofing

Self-adhesive, cold-applied composite sheet consisting of rubberized asphalt with cross-laminated polyethylene film permanently bonded to the outer surface.

1. Physical Properties

- a. Flexibility - ASTM D1970 (180 degrees bend over one-inch mandrel at -45 degrees F): Unaffected.
- b. Tensile Strength - ASTM D412, Die C modified: 325 psi minimum
- c. Tensile Strength, film - ASTM D882: 5000 lb/in²
- d. Elongation (Rubberized Asphalt) - ASTM D 412 (Die C) modified: 300 percent minimum.
- e. Cycling Over Crack at -25 degrees F - ASTM C836: No effect 100 cycles.
- f. Puncture Resistance - ASTM E154: 40 pounds minimum
- g. Permeance - ASTM E 96 method B: 0.05 perms maximum
- h. Water Absorption - ASTM D570: 0.1 percent maximum
- i. Total Membrane Thickness - ASTM D3767, Method A: 60 mils nominal
- j. Peel Strength - ASTM D1876: 5 lb/in.
- k. Resistance to Hydrostatic Head - ASTM D5385: 231 ft of water

2. Material shall be Bituthene 4000 by Grace Construction Products, CW-701 by Carlisle Coatings and Waterproofing, or Hydroseal 3000 by NEI.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

B. Slab Sheet Membrane Waterproofing (Also for blind side formwork application)

Cold-applied composite sheet consisting of high-density polyethylene film, synthetic adhesive, and protective coating. Material is placed such that concrete is cast against the protective coating.

1. Physical Properties

- a. Flexibility - ASTM D1970 (180 degrees bend over one-inch mandrel at -10 degrees F): Unaffected.
 - b. Tensile Strength, film - ASTM D882: 5000 lb/in²
 - c. Elongation (Rubberized Asphalt) - ASTM D 412 (Die C) modified: 300 percent minimum.
 - d. Cycling Over Crack at -10 degrees F - ASTM C836: No effect 100 cycles.
 - e. Puncture Resistance - ASTM E154: 180 pounds minimum
 - f. Permeance - ASTM E 96 method B: 0.01 perms maximum
 - g. Water Absorption - ASTM D570: 0.5 percent maximum
 - h. Total Membrane Thickness - ASTM D3767, Method A: 56 mils nominal
 - j. Peel Adhesion to Concrete - ASTM D903 Modified: 5 lb/in.
 - k. Resistance to Hydrostatic Head - ASTM D5385 Modified: 231 ft of water
2. Material shall be Preprufe 300R by Grace Construction Products.

C. Slab Sheet Membrane Waterproofing

Cold-applied membrane consisting of butyl rubber.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Physical Properties

- a. Flexibility - ASTM D1970 (180 degrees bend over one-inch mandrel at -10 degrees F): Unaffected.
- b. Tensile Strength, film - ASTM D882: 1200 lb/in²
- c. Elongation (Rubberized Asphalt) - ASTM D 412 (Die C) modified: 300 percent minimum.
- d. Cycling Over Crack at -10 degrees F - ASTM C836: No effect 100 cycles.
- e. Puncture Resistance - ASTM E154: 180 pounds minimum
- f. Permeance - ASTM E 96 method B: 0.01 perms maximum
- g. Water Absorption - ASTM D570: 0.5 percent maximum
- h. Total Membrane Thickness - ASTM D3767, Method A: 120 mils nominal
- j. Peel Adhesion to Concrete - ASTM D903 Modified: 5 lb/in.
- k. Resistance to Hydrostatic Head - ASTM D5385 Modified: 231 ft of water

2. Material shall be .120 Butyl by Carlisle Coatings and Waterproofing.

D. Related Products

Provide the following component accessories to the waterproofing system:

1. Manufacturer's Liquid Membrane
2. Bituthene Preprufe Tape where required for Grace products.
3. Bitustik Tape where required for Grace products.

- 4. Manufacturer's Concrete Primer
- 5. .120 Butyl accessories where required by Carlisle Coatings and Waterproofing.

E. Prefabricated Drainage Panels

1. General

a. Prefabricated drainage panel shall be a composite system consisting of a non-woven geotextile drainage fabric bonded to a three-dimensional, highly impact resistant plastic core with high strength backing film.

b. Material shall be as acceptable to the membrane manufacturer and meet the following characteristics.

- 1) Hydroduct 2 Drainage Composite by Grace Construction Products.
- 2) Miradrain 6000/6200 by MiraDri Moisture Protection Products.
- 3) Sure-Drain V-2 by Carlisle Coatings and Waterproofing.

2. Plastic Core

The core shall have the following minimum physical properties:

- a. Compressive strength (ASTM D1621)....15000 psf
- b. Flow (gradient 0.1,37.9 Kpa - D4716).....15 gpm/ft of width
- c. Thickness (ASTM D1777).....3/8"
- d. Weight (ASTM D3776).....2.9 oz/ft²
- e. Overlaps: shall be capable of mechanical interlocking so as to prevent separation of the overlaps during backfill.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

3. Filter Fabric: The filter fabric shall be a nonwoven geotextile fabric having the following physical characteristics:
 - a. Equivalent opening size COE
CW02215.....70-100
 - b. Burst strength (ASTM D3786).....270 psi
 - c. Permeativity (ASTM D4491).....140
gpm/ft²
 - d. Puncture strength (ASTM D4833).....65 lbs
 - e. Weight (ASTM D3776).....4.0 oz/yd²

The fabric shall be uniformly bonded to the core, so as to resist being pushed into the flow channels of the core during backfilling. The fabric to core bond shall use pressure sensitive adhesive, and the fabric shall extend beyond the edge of the core, so that the fabric can be adhered in the field across all core overlaps.

F. Protection Board

Asphaltic hardboard that will not react with solvent based material. Product shall be acceptable to membrane manufacturer.

2.03 PRE-WATERPROOFING CONFERENCE

- A. At least 35 days prior to the start of the waterproofing construction schedule, the contractor shall conduct a meeting to review the proposed waterproofing design and to discuss the required methods and procedures to achieve the required quality and waterproofing integrity. The contractor shall send a pre-waterproofing conference agenda to all attendees 20 days prior to the scheduled date of the conference.

PART 3 - EXECUTION

3.01 EXECUTION PROCEDURES

- A. The preparation and application procedures in Art. 3.02 and Art. 3.03 are general; follow the membrane manufacturer's recommendations as required to obtain

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

the five (5) year warranty and the five (5) year guarantee.

3.02 INSPECTION AND PREPARATION

- A. Do not begin application of membrane waterproofing until all cracks, honeycombs, loose aggregate, sharp protrusions, tie holes, etc. have been repaired, fins removed, and the surface is free of contaminants such as oil, grease, dust, and other foreign materials. Refer to Section 03300.
- B. Concrete substrate shall be cured a minimum of 7 days for rubberized asphalt membrane or longer if required by membrane manufacturer.
- C. Apply additional 8" wide strip of membrane over construction joints, cold joints, control joints, and expansion joints.
- D. Apply double plies of sheet membrane around drains, pipes, and other penetrations; extend 6" horizontally in all directions. Seal terminations thoroughly.

3.03 MEMBRANE APPLICATION

- A. Polyethylene (Preprufe) Membrane Slab Application
 - 1. Preprufe membrane can be placed directly on grade. Grade is to have no sharp objects and shall be acceptable to the membrane manufacturer. Membrane shall be supported on footing formwork at sides. It is also to be used for blind side vertical applications where lagging or formwork is not to be removed. Follow manufacturers recommended lap details. At end lap, provide 3" lap and preprufe tape centered over the end lap. Cut laps to be sealed with liquid membrane covered with tape.
 - 2. Follow all manufacturer's recommendations for slab penetrations. Apply liquid membrane waterproofing, lapping material with the Preprufe membrane and around all penetrations. Install Preprufe tape as per manufacturer's recommendations.
 - 3. Reinforcing chairs and other items supporting reinforcement shall be flat or have flat runners

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

so as not to puncture the membrane. Verify suitability or material with membrane manufacturer.

B. Rubberized Asphalt Membrane Slab Application.

1. Material is to be placed on working slab and supported on footing formwork at sides. Follow manufacturers recommended lap details. At end lap, provide 3" lap. Cut laps to be sealed with liquid membrane.
2. Follow all manufacturer's recommendations for slab penetrations. Apply liquid membrane waterproofing, lapping material with the membrane. Apply additional flashings if required.
3. Install protection board upon approval of the membrane installation and prior to placement of reinforcement. Do not allow membrane to be punctured.

C. Walls

1. After concrete walls are poured and have cured a minimum of 7 days, apply primer to the substrate at the rate recommended by the membrane manufacturer; apply primer only to areas which can be covered that same day. All joints are to be done first by applying primer only at the joints and installing the coverstrips.
2. After primer is tack free, apply rubberized asphalt membrane, lapping edge seams a minimum of 3", and end seams a minimum of 4"; apply wall membrane to form lap with slab membrane and up walls to elevation indicated. Seal ends with liquid membrane waterproofing up adjoining walls. Stagger lap ends.
3. Seal all membrane edges, terminations, and pipe penetrations thoroughly with liquid membrane.

- D. Waterstops shall be adhered to the membrane waterproofing with manufacturer's recommended adhesive. Refer to Section 03300 for waterstop materials.

3.04 PREFABRICATED DRAINAGE PANEL

A. General

1. Position the panel with the filter fabric toward the soil. Use manufacturer's recommended adhesive.
2. Install panel as shown on Drawings. Panel shall run form one foot below grade to bottom of footings, providing complete protection of wall membrane waterproofing.

B. Overlaps

Peel the fabric back from the attached panel to expose 3" of core. Overlap the core of the next panel by 2" and interlock. Re-attach the fabric to completely cover the core overlap. Shingle each course, overlapping both the core and the fabric in the direction of water flow.

C. Terminal Connections and Protrusions

Cover all terminal edges with the integral fabric flap by cutting the core back approximately 4" and tucking the fabric around the edge of the core and secure it. At protrusions, cut the core around the protrusion, cut an "X" in the fabric, and tape the fabric around the protrusion. Dirt, plastic, and concrete must not be allowed to infiltrate the core.

D. Backfilling

Place backfill as specified in Section 02200 within 7 days. Avoid damaging the panels with the compactor's hoe, exhaust, or tamper foot. Replace any damaged fabric or panels.

3.05 FIELD QUALITY CONTROL

- A. Notify the manufacturer of the waterproofing materials in sufficient time, but not less than 3 days, prior to start of work to allow inspection of substrates and supervision of the application of the waterproofing membrane by the manufacturer's authorized representative.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- B. All work to be performed under the direct and continuous supervision of the manufacturer. Contractor shall pay for all services by the manufacturer. Inspections shall be on a regular basis and all joints thoroughly inspected prior to concrete placement or the product being covered with other materials. Work shall be done to the manufacturer's and the Authority's satisfaction.

3.06 PROTECTION

- A. Provide protection for membrane as recommended by the manufacturer, before and during placement of concrete over membrane.

3.07 REMEDICATION

- A. Contractor is responsible for providing a watertight structure. Provide any required remediation for any leakage that may occur with products and methods acceptable to the Authority.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 07211
PERIMETER FOUNDATION INSULATION

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Furnish and install foundation insulation against foundation walls as shown on Drawings.

1.02 RELATED SECTIONS

- A. Earthwork Section 02200
- B. Cast-in-Place Concrete Section 03300

1.03 SUBMITTALS

- A. Product Data

Provide manufacturer's information on material and installation instructions.

- B. Samples

- 1. Submit 12" x 12" sample of insulation.
- 2. Sample shall clearly indicate manufacturer's label and material designation.

- C. Certificate

Furnish BSA or MEA resolution of approval of material.

1.04 REGULATORY REQUIREMENTS

- A. NYC Board of Standards and Appeals (BSA) approvals or,
- B. NYC Materials and Equipment Acceptance (MEA) approvals.

1.05 DELIVERY, STORAGE, AND HANDLING

- A. Materials shall be properly identified with manufacturer's name and BSA or MEA approval number.
- B. Store materials on the site in a dry area protected from the weather.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- C. Protect with white polyethylene film or light colored covering. Do not leave exposed to direct sunlight.
- D. Do not leave exposed in areas where traffic might cause mechanical damage to foam.

PART 2 - PRODUCTS

2.01 MANUFACTURER

- A. Dow Chemical U.S.A., Midland, Michigan 48640
- B. UC Industries, Inc., Parsippany, N.J. 07054

2.02 MATERIAL

- A. Extruded polystyrene foam, with a high density, smooth, extruded-skin surface and square (butt) edges.
 - 1. "Styrofoam" by Dow Chemical Company.
 - 2. Formular 250 by UC Industries, Inc.
- B. Thickness shall be in accordance with Drawings, and insulation shall meet physical property requirements given in ASTM 578 and Federal Specifications HH1524C for Type IV materials.
- C. Product shall not be produced with or contain any of the U.S. EPA regulated CFC compounds which are listed in the Montreal Protocol.

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Verify that concrete surfaces are free of defects or protrusions and ready to receive insulation. Do not begin installation until defects are remedied.

3.02 INSTALLATION

- A. Install foam board horizontally against foundation wall as shown on Drawings and in accordance with manufacturer's instructions.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- B. Foam board shall be tightly butted.
- C. Shape foam board around obstructions by means of saw, knife, or other sharp tool.

3.03 PROTECTION

- A. Protect foam board from sunlight until board is backfilled against.
- B. Backfill against foam board carefully in order to prevent displacement and mechanical damage.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 07212
MISCELLANEOUS BUILDING INSULATION

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide all miscellaneous insulation (batt or otherwise) not specified in other Sections herein, as indicated on the Drawings and as specified in this Section.

1.02 RELATED SECTIONS

- A. Aluminum Projected and Casement Windows.. Section 08524

1.03 SUBMITTALS

- A. Samples
 - 1. Submit in triplicate 12" x 12" sample of each type of insulation.
 - 2. Sample shall clearly indicate manufacturer's label and material designation.
- B. Certificate
 - Furnish BSA or MEA resolution of approval of material.

1.04 QUALITY ASSURANCE

- A. Regulatory Requirements
 - 1. New York City Board of Standards and Appeals (BSA) approvals or,
 - 2. New York City Materials and Equipment Acceptance (MEA) approvals.
- B. Manufacturer: Minimum of Five years successful manufacture of type of product specified.

1.05 DELIVERY, STORAGE, AND HANDLING

- A. Materials shall be properly identified with manufacturer's name and BSA or MEA approval number.
- B. Store materials on the site in a dry area protected from the weather.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- C. Protect with white polyethylene film or light colored covering. Do not leave exposed to direct sunlight.
- D. Do not leave exposed in areas where traffic might cause mechanical damage to product.

PART 2 - PRODUCTS

2.01 MANUFACTURER

- A. Dow Chemical U.S.A., Midland, Michigan 48640
- B. UC Industries, Inc., Parsippany, N.J. 07054
- C. United States Gypsum Co. or approved equal

2.02 MATERIAL

- A. Batt Insulation
 - 1. Un-backed insulation: Type II, Class A.

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Verify that surfaces are free of defects or protrusions and ready to receive insulation. Do not begin installation until defects are remedied.

3.02 INSTALLATION

- A. Install insulation as shown on Drawings or specified in other Sections herein and in accordance with manufacturer's instructions.
- B. Butt units tightly.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 07270
FIRESTOPPING

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide firestopping at all penetrations and juncture joints of fire-rated walls, floors and ceilings in accordance with the requirements of the Building Code of the City of New York and MEA Standards.

1.02 RELATED SECTIONS

- A. Unit Masonry..... Sections 04200
- B. Mechanical/Electrical.....Divisions 15 & 16

1.03 REFERENCES

- A. American Society for Testing and Materials (ASTM)
- B. Underwriter Laboratories, Inc. (UL)
- C. National Fire Protection Association (NFPA)

1.04 SUBMITTALS

- A. Submit manufacturer's instructions for installing firestopping.
- B. Submit manufacturer's certifications that materials and systems meet or exceed the specified requirements.
- C. Submit certification stating that firestopping has been completed in full accordance with requirements of this Section and of the Building Code of New York City.
- D. Submit two copies of certified test reports of:
 - 1. Fire test reports of firestopping system application to substrate materials similar to project conditions.
 - 2. Reports from reputable independent testing agencies of product proposed for use, which indicate conformance to ASTM E-814 (Fire Tests of Through-Penetration Firestops).

1.05 QUALITY ASSURANCE

- A. All firestopping Work shall be performed by a single Subcontractor, who will be acceptable to the firestopping manufacturer in the application of its products and systems.
- B. Manufacturer

Minimum of 5 years successful experience in manufacture of firestopping material.
- C. Regulatory Requirements

Conform to U.L. requirements and to requirements of the Building Code of the City of New York and Materials and Equipment Acceptance (MEA) Standards. Provide MEA approval certification for systems and materials.
- D. Comply with the following:
 - 1. ASTM E-84 - Surface Burning Characteristics of Building Materials.
 - 2. ASTM E-814 - Fire Tests of Through Penetration Firestops.
 - 3. U.L.-1479 - Fire Tests of Through-penetration Firestops.
 - 4. U.L.- Building Materials Directory; Through-Penetration Firestop Systems (XHEZ).
 - 5. U. L. 723 - Standard Test Method for Surface Burning Characteristics of Building Materials.

1.06 CONTROLLED INSPECTIONS

- A. Provide controlled inspection for all firestopping in accordance with Art. 1.02, Section 01400 of the Specifications.

1.07 SYSTEM DESCRIPTION

A. Technical Requirements

1. Firestopping materials shall be UL Classified as "Fill, Void or Cavity Material" for use in Through-Penetration Firestop Systems.
2. Firestop Systems shall provide a fire resistance rating at least equal to the hourly resistance rating of the fire-rated barrier.
3. Firestop Systems shall have been tested in accordance with ASTM E-814 or UL 1479 under a minimum positive pressure of 0.01 in. of water.

B. General Considerations

1. Firestop Systems do not re-establish the structural integrity of load bearing partitions. Contractor consult the MMMHS Representative prior to penetrating any load bearing assembly.
2. Firestop systems are not intended to support live loads or traffic. Contractor shall consult the MMMHS Representative if there is reason to believe these limitations may be violated.
3. When more than one firestop system design is applicable, individual characteristics should be evaluated for secondary benefits in performance, e.g. water/air sealing, ease of installation/-modification, or building movement.

1.08 DEFINITIONS

- A. Penetration: Any opening or foreign material passing through or into a fire-rated barrier.
- B. Fire-Rated: Have the ability to withstand the effects of a standard fire exposure for a specified time period, as determined by qualified testing.
- C. Fire-Rated Barrier: A floor, wall, partition or floor-ceiling assembly able to withstand a standard fire and hose stream test without failure.
- D. Fire resistance rating: The ability of a structure to act as a barrier to the spread of fire and to confine it to the area of origin. Ratings are expressed in hours

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

and apply to beams, columns, floors, ceilings, roofs, walls and partitions.

- E. Firestopping: A means of sealing openings in fire-rated barriers to preserve or restore the fire resistance rating.
- F. Firestop System: A material, or combination of materials, installed to retain the integrity of fire-rated construction by maintaining an effective barrier against the spread of flame, smoke or gases through penetrations in fire-rated barriers. It shall be used in specific locations as follows:
 - 1. Penetrations for the passage of duct, cable, cable tray, conduit, piping and electrical busways and raceways through fire-rated vertical barriers (walls and partitions), horizontal barriers (floor slabs and floor/ceiling assemblies), and vertical service shafts.
 - 2. Locations shown specifically on the Drawings or where specified in other Sections of the Specifications (refer to Sections noted in 1.02 RELATED SECTIONS).

PART 2 - PRODUCTS

2.01 MANUFACTURERS

- A. Hilti Construction Chemicals, Inc., Tulsa, OK.
- B. The Carborundum Company, Niagara Falls, NY.
- C. 3M Fire Protection Products, St. Paul, MN.
- D. Bio Fireshield, Inc., Concord, MA
- E. Tremco Sealant Division, Tremco LTD, Toronto, Ontario, Canada or approved equal

2.02 MATERIALS

- A. Grout and sealant systems shall meet or exceed requirements as specified in Part 1 of this Section and shall be acceptable to the MMMHS Representative.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- B. Firestopping systems shall meet the requirements of ASTM E-814, which include, but are not limited to, the following:
 - 1. Prevent flame pass-through.
 - 2. Restrict temperature to not exceed 325 degrees F over ambient on side of assembly opposite flames.
 - 3. Provide a positive smoke seal.
 - 4. Withstand hose stream test.
- C. Firestopping materials shall be asbestos-free, emit no toxic or combustible fumes and be capable of maintaining an effective barrier against flame, smoke, gas, and water in compliance with requirements of this Section.
- D. Firestopping materials/systems shall be flexible to allow for normal movement of building structure and penetrating items(s) without affecting the adhesion or integrity of the system.
- E. Firestopping materials shall not require hazardous waste disposal of used containers/packages.
- F. On insulated pipe, the fire-rating classification must not require the removal of the insulation.
- G. Firestopping materials shall be free of solvents and shall not experience shrinkage while curing.

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Examine and confirm the compatibility of surfaces to receive firestopping materials. Verify that surfaces are sound, clean and dry and are ready to receive the firestopping.
- B. Verify that penetration elements are properly located and securely fixed, with the proper space between the penetration element and surfaces of the opening.

3.02 PREPARATION

- A. Protect adjacent surfaces and equipment from damage.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- B. Clean surfaces of opening.

3.03 INSTALLATION

- A. Install firestopping system in strict accordance with the manufacturer's instructions to obtain the fire-rating required at the specific location.
- B. Provide escutcheons for piping at each side of penetration.

3.04 FIELD QUALITY CONTROL

- A. Inspect all installations to ensure that all work meets the requirements specified.

3.05 CLEANING

- A. Remove excess materials, droppings, and debris; remove excess materials from adjacent surfaces.

3.06 PROTECTION

- A. Protect firestopping installations from damage until completion of all Project Work.

END OF SECTION

1.04 SUBMITTALS

A. Submittals Package

Submit the Shop Drawings, Product Data, Samples, and Quality Control Submittals specified below at the same time as a package. All submittal packages must be submitted prior to the Pre-Installation conference.

B. Shop Drawings

1. When there is a proposed deviation from the Contract Documents, submit the revised detail labeled as such for approval. The revised detail shall show existing conditions and shall be referenced directly to the related details on the Contract Drawings.
2. Submit an accurate layout of the wood nailers showing their required locations, and required spacing between nailers. Show the direction of the felt run in relation to the slope of the deck and the wood nailers.
3. Grade Survey
 - a. Contractor shall engage a New York State Licensed Surveyor to control accurately the thickness and slope of the concrete fill, screed coat and drain elevations. The cost of the Surveyor's services shall be included in Contractor's bid price. Submit all grade Drawings required hereinafter with Surveyor's seal and signature to Project Architect/Engineer for an approval.
 - b. The elevations shall be taken at the perimeter of roofs, at all drains, and on the edges of square grid not exceeding 25'-0".
 - c. All Drawings shall be done at the scale of 1/8" = 1'-0". All elevations shown on the Drawings shall be referred to a convenient

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

datum accessible at all times regardless of the stage of Work, and not altered by the Work.

- d. Submit grade Drawings indicating all existing and proposed grade elevations required to establish a minimum slope of 1/8" per foot prior to removal of existing roofing system.

C. Product Data

Catalog sheets, Specifications and installation instructions for each material specified.

1. Revise the membrane manufacturer's product data as necessary to suit the requirements of the Contract Documents. Manufacturer's details are not to be used for the Work of this Contract.
2. Manufacturer's Warranty: Sample copy of the membrane manufacturer's 10 year warranty covering workmanship and materials.

D. Samples

1. Roofing Membrane: 13 in. by width of roll, each type.
2. Base Flashing: 13 in. by width of roll, each type.
3. Vent Base Sheet: 13 in. by width of roll, each type.
4. Insulation: One 6" sq. piece, each type.
5. Aggregate Surfacing: 1 pound.
6. Fasteners: 6, each type.

E. Quality Control Submittals

1. Fire Hazard Certification: Written certification that the roof system, including the specific insulation, has been tested in conjunction with the type of structural roof deck and roof slope applicable to the project and has achieved an

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Underwriters Laboratories Class A or B external fire resistance rating.

- a. Acceptable Certification: Letter from Underwriters Laboratories, or a copy of the Underwriters Laboratories classification listing for the roofing system.
2. Material Certification: Letter from the roofing membrane manufacturer certifying that the insulation is approved for use with the roofing system.
3. Membrane Manufacturers Certifications:
 - a. Submit a letter certifying that the manufacturer has been actively marketing the submitted system for a minimum of five years.
 - b. Submit the names and addresses of ten previous roofing projects. Include the type and size of each project and name and telephone number of a contact person at the project location.
4. Applicator's Certification:
 - a. Letter from the membrane manufacturer certifying that the applicator is licensed or approved to install the roof system.
 - b. Names, address, and telephone numbers of three buildings where the applicator has installed built-up roofing systems which have the manufacturer's warranty issued. Include the types of built-up roofing systems installed, the manufacturer's name, and the warranty numbers.
 - c. Letter certifying that the job foreman or crew chief and at least one other member of the roofing crew have installed at least three built-up roofing systems and are thoroughly familiar with all aspects of the installation.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

5. Submit prior to installation: A signed statement for moisture testing of roof deck.

F. Contract Closeout Submittals:

Guaranty and Warranty: As specified.

1.05 QUALITY ASSURANCE

A. Membrane Manufacturer's Qualifications:

1. The manufacturer shall have the technical expertise and qualified technical representatives to quickly resolve questions or problems which may arise both during and after the Work is completed.
2. The manufacturer shall have been actively marketing a built-up roof system in the United States for a minimum of five years.
3. The manufacturer shall provide the names, addresses, and telephone numbers of at least ten previous projects of comparable size, scope, and complexity as the Work of this Section.
4. The manufacturer must require that the roof system be installed by a licensed or approved applicator.

B. Roofing Installation Qualifications

1. Roofing Firm Qualifications

- a. Installation of a minimum of ten built-up roofing systems of 3-ply (or greater) membranes, or of roofing system specified in the Contract Documents, including all related sheet metal work.

(List last five such jobs, including address, type of system and number of plies, if applicable, square footage, date installed and owner/agent with whom contracted).

- b. In continuous operation of installing such roofing systems for five years or more.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- c. Certified installer for nationally recognized roofing materials manufacturer.

2. Project Foreman Qualifications

(Note: For field foremen to be assigned to this Project, identify and substantiate).

- a. Installation of a minimum of five built-up roofing systems of 3-ply (or greater) membrane, or of roofing system specified in the Contract Documents, for which this individual served as field foreman in direct responsible charge of all roofing work crews.

(Note: List last five such jobs, including address, type of system and number of plies, if applicable, square footage, date installed and owner/agent with whom contracted, and name of roofing firm with which employed).

- b. Successful completion of a formal instructional and training program for the installation of the specified roofing systems, as evidenced by:

1. A certificate of journeyman roofer as issued under a union apprenticeship-journeyman training program duly registered with the New York State Department of Labor (or other State Labor Department); or
2. A certificate or diploma issued by a vocational training school or national roofing manufacturer attesting to successful completion of an equivalent formal training program, (Submit copy of certificate for above); or
3. A minimum of five years of practical experience in the installation of all aspects and details of the specified roofing system(s) including related sheet metal work as determined from a pre-qualification interview conducted by

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School
the Authority's Facilities Inspection
Division.

- c. Must be able to read and communicate in English and be able to read construction drawings and specifications.

C. Fire Department Regulations

Equipment and fuel shall meet the requirements of the New York City Fire Department.

D. Fire Hazard Classification

The built-up roof system shall have an Underwriters Laboratories Class A or B External Fire Resistance rating; as determined by tests conducted in conformity with UL-790 (ASTM E 108).

- 1. The roof system, which includes a specific generic type of insulation and in some instances a specific name brand insulation, shall have been tested in conjunction with the type of structural roof deck and roof slope applicable to the project.

E. Pre-Installation Conference

Before the roofing Work is scheduled to commence, a conference will be called by the Authority's Representative at the site for the purpose of reviewing the Drawings and the Specifications and discussing requirements for the Work. The conference shall be attended by the Contractor, the authorized roofing applicator, the Company Field Advisor, the Architect and the Authority's Roofing Specialist.

F. Company Field Advisor

Secure the services of a Company Field Advisor of the membrane manufacturer for a minimum of 16 working hours. The Field Advisor shall be certified in writing by the manufacturer to be technically qualified in design, installation, and servicing of the required products. Personnel involved solely in sales do not qualify. The Field Advisor shall be present at the

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

beginning of the actual membrane installation for the purpose of:

1. Rendering technical assistance to the Contractor regarding installation procedures of the system.
2. Familiarizing the Authority's Representative with all aspects of the system including inspection techniques.
3. Answering all questions which might arise.

1.06 DELIVERY, STORAGE, AND HANDLING

A. Delivery:

1. Roofing materials shall be delivered to the site in the manufacturer's unbroken containers and shall bear the manufacturer's printed labels.
2. a. All bitumen delivered in cartons must have the following printed on the carton:

Manufacturer
Type (ASTM)
SP (Softening Point)
FP (Flash Point)
FBT (Finished Blowing Temperature)
EVT (Equiviscous Temperature)

- b. All bitumen delivered in tanker trucks shall be accompanied by the manufacturer's certification stating: manufacturer's name, type, softening point range, flash point, and compliance with ASTM Specifications.

1. Certification for Asphalt Bitumen shall also state the equiviscous temperature range and the finished blowing temperature range.

B. Storage and Handling:

1. Store materials a minimum of 6" off the ground, in a dry, well ventilated place protected from the weather. Enclosed trailers are recommended.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Do not stock pile aggregate surfacing materials on unsurfaced felt which are in place on the roof.
3. Mark for identification all materials which become wet. Remove such materials for the site.
4. Handle roll goods with care; store on end. Do not use roll goods which have been damaged.

1.07 PROJECT CONDITIONS

A. Do not execute the Work of this section unless the Authority's Representative is present, or unless the Representative directs that the Work be performed during the Representative's absence.

B. Temperature

Do not apply built-up roofing when the deck or air temperature is below 40° F.

C. Do not execute the Work of this Section unless the substrate is dry, and free from debris and dust.

D. Moisture Protection

1. Cover, seal, and otherwise protect the roof and all flashings so that water cannot accumulate or flow under the completed portions. When and where required, provide temporary water cut-offs in accordance with the roofing manufacturer's written Specifications.

2. For existing roof: Limit the removal of existing materials to areas that can be completely re-roofed or temporarily protected within the same day.

1.08 GUARANTEE AND WARRANTY

A. Contractor's Guarantee

Two year written guarantee covering defects in materials and workmanship. Performance Bond shall be for the entire two year period.

B. Manufacturer's Warranty

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

In addition to the Contractor's guarantee, furnish the membrane manufacturer's printed 10-year warranty for the Work of this Section. The warranty shall include but not be limited to, repair of leakage caused by defects in materials or workmanship. The monetary value of the warranty shall be at least equal to the original cost of the installation.

PART 2 - PRODUCTS

2.01 MANUFACTURERS:

A. Asphalt Primer and Asphalt:

1. GAF Building Materials Corp., South Bound Brook, NJ.
2. Manville Sales Corp., Denver, CO.
3. Tamko Asphalt Products, Joplin, MO.

B. Base Sheet:

1. GAF GAFGLAS #75.
2. Manville GlasBase.
3. Tamko Glass-Base.

C. Vent Base Sheet:

1. GAF GAFGLAS Stratavent.
2. GAF GAFGLAS Stratavent Perforated.
3. Manville Ventsulation.
4. Tamko Vapor-Chan.

D. Roofing Membrane, Vapor Barrier and Cover Strip:

1. GAF GAFGLAS Ply 6.
2. Manville GlasPly Premier.
3. Tamko TamGlas Premium.

E. Insulation:

1. Single Layer:

- a. GAF GAFTEMP Composite Board Insulation
- b. Manville Fesco Foam Isocyanurate.
- c. AC Foam II with 1/2" perlite on top, by Atlas Energy Products, Atlanta, GA.

2. Two Layer:

a. Base Layer

- 1. GAFTEMP Isotherm R by GAF.
- 2. Ultragard Gold Isocyanurate by Manville.
- 3. AC Foam II by Atlas Energy Products, Atlanta GA.

b. Top Layer:

- 1. 1/2" High density fiber board by GAF.
- 2. 1/2" Retro-fit Board by Manville.
- 3. 1/2" Perlite Board by Atlas.

F. Base Flashing:

1. Two base plies:

- a. GAF GAFGLAS Ply 6.
- b. Manville GLasPly Premier.
- c. Tamko TamGlass Premium.

2. One ply cap sheet:

- a. GAF RUBEROID MOP FR.
- b. Manville Dynaflex.

- c. Tamko Awaplan Premium.
- G. Mineral Surfaced Asphalt Membrane:
 - 1. GAF GAFGLAS mineral surfaced cap sheet.
 - 2. Manville GlasKap.
 - 3. Tamko Tam-cap.
- H. Emulsion and Aluminized Coating:
 - 1. GAF
 - 2. Manville
 - 3. Tamko
- I. Flashing Cement:
 - 1. Manville MBR two-part Flashing Cement or Type III Steep Asphalt (or equivalent by GAF or Tamko).
- J. Walkway Pads/Splash Pads/Protection Pads:
 - 1. Celotex Corp. "Carey-tred".
 - 2. W.R. Meadows Inc. "Sealtight Whitewalk".
 - 3. Termastic Construction Materials "Roof Walk".
- K. Elastomeric Cement:
 - 1. Tremco Manufacturing Co. "Poly roof".
 - 2. Durok Bldg. Materials "Durok Rubber Cement".
 - 3. Karnak Chemical Corp. "AR Elastomeric".
- L. Perlite Cant Strip:
 - 1. GAF
 - 2. Manville
 - 3. Atlas

2.02 MATERIALS FOR VAPOR BARRIER

- A. Repair of Existing Vapor Barrier:
1. For asphalt vapor barriers:
 - a. Primer: Asphalt primer; ASTM D41.
 - b. Steep Asphalt: ASTM D312, Type III.
 2. Asphalt Fiberglass Felt: Asphalt impregnated glass mat, ASTM D 2178, Type VI. UL Classified.
- B. Asphalt Vapor Barrier Over Concrete Deck or Existing Asphalt Vapor Barrier, and concrete fill/screed.
1. Primer: Asphalt primer, ASTM D41.
 2. Steep Asphalt: ASTM D 312, Type III.
 3. Asphalt Fiberglass Felt: Asphalt impregnated glass mat, ASTM D 2178, type VI. UL Classified.
- C. Asphalt Vapor Barrier Over Existing Coal Tar Vapor Barrier:
1. Steep Asphalt: ASTM D312, Type III.
 2. Asphalt Fiberglass Base Sheet: Glass fiber mat heavily coated with weathering grade asphalt, non-porous. UL Classified.

2.03 MATERIALS FOR BUILT-UP MEMBRANE

- A. Gravel Surfaced Asphalt Membrane:
1. Steep Asphalt: 190°, Type III. (Slopes 0" to 3" per Foot).
 2. Asphalt Fiberglass Felt: Asphalt impregnated glass mat, ASTM D 2178, Type VI. UL Classified.
 3. Crushed stone or gravel: Crushed stone or water-worn gravel, ASTM D 1863. Crushed stone or gravel shall be washed and well graded between 3/16" and

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

5/8" such that all will pass a 3/4" screen and not more than 5% will pass 1/4" screen.

B. Smooth Surfaced Asphalt Membrane:

1. Steep Asphalt (Slopes 0" to 3" per Foot): 190°, Type III.
2. Special Steep Asphalt: 220°, Type IV, (Slopes 3" to 6" per Foot).
3. Asphalt Fiberglass Felt: Asphalt impregnated glass mat, ASTM D 2178, Type VI. UL Classified.
4. Asphalt Emulsion: Fibrated emulsion coating, ASTM D 1227, Type IV. UL Classified.
5. Aluminized Coating: Fibrated, bituminous aluminized coating, ASTM D 2824, Type III. UL Classified.

C. Mineral Surfaced Asphalt Membrane:

1. Steep Asphalt (Slopes 1/2" to 3" per Foot): 190°, Type III.
2. Special Steep Asphalt: 220°, Type IV (slopes 3" to 6" per Foot).
3. Asphalt Fiberglass Felt: Asphalt impregnated glass mat, ASTM D 2178, Type VI. UL Classified.
4. Mineral Surfaced Cap Sheet: Asphalt coated mineral surfaced fiberglass cap sheet, ASTM D3909. UL Classified.

2.04 COMPOSITION FLASHINGS

A. Built-Up Base Flashing:

1. Asphalt Fiberglass Felt: Asphalt impregnated glass mat, ASTM D 2178, Type VI. UL Classified.
2. Reinforced Modified Cap Sheet: Reinforced modified Bitumen flashing that incorporates the properties of both a strong fiberglass or polyester mat with an elastermeric base material

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

consisting of modified bitumen material and fire retardant additives: ASTM D412; UL Classified.

3. Steep Asphalt: 190°, ASTM D312 Type III.
4. Modified Flashing Cement.

B. Coverstrips:

1. Asphalt Fiberglass Felt: Asphalt impregnated glass mat, ASTM D 2178, Type VI. UL Classified.
2. Plastic Cement: Flashing grade, fibrated asphalt roofing cement, ASTM D 4586. UL Classified.

2.05 INSULATION

A. The specified insulation thickness is nominal, allowing for differences in insulating properties of various name brands. Minor variation in thickness is acceptable, provided the specified thermal value and all other requirements of this Contract are met.

B. Approval of insulation is contingent upon approval by the membrane manufacturer for use with specified roof system.

1. Provide type of insulation as required by the Drawings, maximum of 3.3" thick and minimum aged R value = 20.0. as indicated on Drawings or specified herein.

2. Types

- a. Isocyanurate - FS-HH-I-1972

- b. Perlite - ASTM C 728

- c. Fiberboard - ASTM C 208

3. All insulation: Factory Mutual, Class 1 or U.L. Class A.

C. Rigid Insulation

1. Two Layers of Insulation:

Two layers of insulation consisting of base layer of isocyanurate insulation, and top layer of fiberboard or perlite insulation.

a. Base Layer Insulation: Closed cell isocyanurate foam core skinned on both sides with factory applied facers of the generic type recommended by the membrane manufacturer. FS HH-I-1972, Class 2. UL Classified.

1) For steel decks: Factory Mutual Class 1 approved for direct application on steel decks.

2) Aged R value determined in accordance with TIMA Technical Bulletin No. 281-1.

b. Top layer: 1/2" Perlite board insulation complying with Federal Specification HH1529b, ASTM C-728 and UL Classified.

2. Composite Insulation Board: Consists of a base layer of isocyanurate foam integrally bonded to a layer of perlite or wood fiberboard on one side and a nonasphaltic fiberglass mat on the other.

2.06 FASTENERS

A. Fasteners For Securing Built-Up Base Flashing:

1. Masonry Surfaces: Hardened, masonry nail or drive pin, thru one inch dia. sheet metal disk.

2.07 MISCELLANEOUS MATERIALS

A. Cant Strips (For built-up base Flashings)

Preformed fiberboard, ASTM C 208.

B. Tapered Edgestrips (around drains and at other areas where insulation must be feathered down)

Preformed fiberboard, ASTM C 208.

C. Materials For Pitch Pockets:

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Mortar: ASTM C 270, Type S.
2. Elastomeric Cement: Non-sag, cold applied, trowel grade, single component rubber elastomer. Minimum elongation 400 percent.

PART 3 - EXECUTION

3.01 VERIFICATIONS OF CONDITIONS

A. Testing Existing Roof Drains and Conductor Pipes

Before commencing with the Work, water test all existing drains and conductor pipes, submit a written report to the Authority's Representative, indicating which drains or conductors, if any, are not functioning properly.

1. If repairs or other corrective Work are required, the Authority may, at its option, initiate a change order for such Work.

3.02 REMOVALS

- A. Remove all existing roofing, including, but not limited to, felts, asphalt, coal tar, and vapor barrier, down to sound, clean screed coat.

3.03 EXAMINATION

- A. Verify that Work of other trades which penetrates the roof deck or requires personnel and equipment to traverse the roof deck has been completed.
- B. Examine surfaces for inadequate anchorage, foreign material, moisture, and unevenness which would prevent the execution, and quality of application, of the built-up roofing system as specified.
- C. Do not proceed with application of built-up roofing system until defects are corrected.

3.04 PREPARATION

- A. Repair of fill/screed as per Section 03300.

B. Repair of Existing Vapor Barrier:

1. Remove all deteriorated (loss, wet, blistered, torn) portions of the existing vapor barrier so that only sound, firmly bonded felts remain.
2. For asphalt vapor barriers, repair defective areas with 2 plies of asphalt fiberglass felt embedded in and coated with hot steep asphalt. Lap the felts a minimum of 6" beyond the defect.
3. For coal tar vapor barriers, repair defective areas with 2 plies of asphalt fiberglass felt embedded in and coated with hot steep asphalt. Lap the felts a minimum of 6" beyond the defect.

E. Moisture Testing for Roof Deck

1. All roof decks where new roofing is to be installed shall be thoroughly dried out and free of moisture before installing new membrane. There shall be two (2) test areas for every 2500 square feet of area to be roofed.

The Authority's Representative shall be present at these tests and shall submit a signed statement that the tests have been performed and list the test results for each area.

a. Roof Deck Dryness Test (NRCA Approved Method)

1. Use approximately one pint of bitumen that is specified for use in the roof membrane, heated to a temperature that will ensure an application temperature of 400° F. See Built-up Roofing, Section IV-B, (Equiviscous Temperature) NRCA roofing and waterproofing manual.
2. Pour the bitumen on the surface of the deck. If the bitumen foams, the deck is NOT dry enough to roof.
3. After the bitumen has cooled, an attempt should be made to strip the bitumen from the deck surface. If the bitumen strips

January 10, 2005

**Soundproofing of
Monsignor McClancy Memorial High School**

clean from the deck, the deck is NOT dry enough to roof.

4. If the tests prove the deck is damp, it shall be allowed to dry and be retested until dry enough for the roofing to be installed.

F. Priming (for concrete decks)

Prior to application of vapor barrier, and after the deck has passed the dryness test, apply asphalt primer to concrete deck surface at the rate of one gallon per square.

G. Asphalt vapor barrier over existing asphalt vapor barrier:

Prior to application of vapor barrier, and after the deck has passed the dryness test, apply asphalt primer to existing vapor barrier at the rate of one gallon per square.

3.05 HEATING BITUMEN

A. Preparation:

1. Use separate kettles or tankers for heating different types of asphalt.
2. The heating process shall be strictly regulated by means of an automatic thermostatic control of an approved type for positive temperature control. Kettles or tankers shall be the immersion tube type, fire by Liquid LP gas, and shall have 100% safety shutoff.
3. Equip each kettle or tanker with a recording thermometer that will graphically indicate and record on a chart the maximum and minimum temperatures to which materials have been heated. Recording thermometers shall be capable of accurately recording temperatures as high as 600 degrees F. and as low as 0 degrees F. The thermometers shall be properly maintained at all times. Kettles or tankers without recording thermometers in good working condition shall not

be used. At the end of each working day, turn the chart from the thermometer on each kettle or tanker over to the Authority's Representative. If any bitumen is overheated, remove it from the site in the presence of the Authority's Representative.

If any underheated or overheated bitumen has been applied on the roof, remove that portion of the roof.

4. On multi-storied buildings, when directed, locate the heating kettles on the roof. Place kettle on a heavy sheet metal tray on dunnage. Metal tray shall extend 18" beyond the sides and ends of the kettle and be turned up 1" at all edges.
 - a. Only one gas cylinder shall be on the roof at any one time. Locate the cylinder at least four feet away from the kettle. Vertically brace the cylinder and shade it from the sun.
 - b. Provide fire extinguishers on the roof in the vicinity of the kettles as required to ensure the safety of the roof.

B. Heating Asphalt Bitumen:

1. Heat the bitumen in accordance with the Equiviscous Temperature information furnished by the bitumen manufacturer for that specific run of bitumen.
 - a. In no case shall be asphalt be heated to or above the actual COC Flash Point (ANSI/ASTM D-92); or the finished blowing temperature for more than 4 hours.
 - b. Maintain the temperature of the bitumen at the point of application within the Equiviscous Temperature Range. Use insulated pipes, buckets, luggers, and other insulated roofers equipment as required by the field conditions.

Contractor must have at least one hand held thermometer for each crew installing hot

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

asphalt in order to ensure compliance with
EVT.

2. Application temperature: The accepted application temperature range for asphalt is the equiviscous temperature, (EVT) $\pm 25^{\circ}\text{F}$. All felt installation must occur in this range to be acceptable.

3.06 INSTALLING VENT BASE SHEET: (NON-NAILBLE DECK)

- A. Install one ply of vent base sheet. Vent sheets shall be butted.
- B. Using vent base sheet, start at the low edge of the roof. Install vent base sheet by spot mopping. The spot mopping shall be applied by machine at the rate of approximately 7 lbs. per square. The spots shall be approximately 12" in diameter and 24" o.c. Each row shall be staggered.
- C. Run vent base sheet up the perimeter or parapet walls to the height of the counter flashing, spot adhering as required. This will allow for proper perimeter venting detail.

3.07 INSTALLING VENT BASE SHEET (NAILBLE DECK)

- A. Install vent base sheet, starting at the low edge of the roof. Vent sheets shall be butted.
- B. Nail along the lap of the base ply at intervals not to exceed 9" and stagger-nail down 11" apart with nails spaced at approximately 18" o.c. stagger.

3.08 INSTALLING VAPOR BARRIER

- A. Installing Vapor Barrier Over Concrete Deck, Existing Vapor Barrier or Light Weight Fill/Screed:
 1. Install 2 plies of asphalt fiberglass felt shingle fashion. Lap plies 19" over each preceding ply.
 2. Embed each ply in a solid mopping of hot steep asphalt applied at the rate of 20 lbs per square. Broom in each ply for complete embedment.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- B. Installing Asphalt Vapor Barrier Over Existing Coal Tar Vapor Barrier:
1. For repair of existing coal tar vapor barrier: Embed each ply in a solid mopping of hot steep asphalt applied at the rate of 30 lbs per square. Broom in each ply for complete embedment.
 2. Install one ply of asphalt fiberglass base sheet. Lap plies 2" over each preceding ply.
 3. Embed the base sheet in a solid mopping of hot steep asphalt applied at the rate of 30 lbs per square. Broom in the base sheet for complete embedment.
- C. Extend the vapor barrier beyond all edges and openings of the roof so that it can be turned up over the insulation a minimum of 6".
1. If vapor barrier is punctured, repair immediately with fiberglass felt embedded in hot bitumen.
 2. Install the insulation and roofing membrane immediately (same day) as the vapor barrier is installed. Where not possible, protect the vapor barrier with a glaze coat of hot bitumen applied at the rate of 15 lbs per square.

3.09 INSTALLING INSULATION

- A. Installing Single Layer Insulation: Install the insulation with the long joints running in a continuous straight line perpendicular to the direction of the roof membrane. Stagger end joints. Butt edges and ends snugly. "Occasional" joint widths up to 1/8" will be allowed.
1. Set the insulation in a full hot mopping of Type III steep asphalt applied at the rate of 30 lbs per square. Press the insulation into the bitumen to a firm and uniform bearing.
- B. Installing Double Layer Insulation: Install the insulation in 2 separate layers with the long joints of each layer running in the same direction in a continuous straight line perpendicular to the

direction of the roof membrane. Stagger end joints. Install the top layer of insulation with joints staggered from the joints of the base layer.

1. Set each layer of insulation in a full hot mopping of Type III steep asphalt applied at the rate of 30 lbs per square. Press the insulation into the bitumen to a firm and uniform bearing.
- C. Keep insulation absolutely dry at all times. Discard insulation that contains moisture.
1. Install only as much insulation as can be covered with roofing membrane the same day.
 2. Discard all units with broken corners or similar defects.
 3. At roof drains, terminate the insulation with tapered edge strips so that all flashing and coverstrip joint laps can be made within the tapered portion.
 4. Set all cant strips in a solid application of hot bitumen so they are firmly anchored to the deck and the vertical surface.
- E. Installation of insulation shall be in strict compliance with the Manufacturer's recommendations.

3.10 INSTALLING BUILT-UP ROOF

- A. Before application of roof membrane, turn vapor barrier over insulation at all edges and openings and embed in a full hot application of bitumen. At round openings, seal the edges of the insulation with a trowel coat of plastic roof cement.
- B. Installing Built-Up Roof Membrane:
2. For asphalt built-up roofs, install built-up roof membrane consisting of 4 plies of asphalt fiberglass felt. Embed each ply in solid mopping of hot asphalt applied at the rate of 25 lbs per square.

3. For mineral surfaced built-up roofs, install built-up roof membrane consisting of 3 plies of asphalt fiberglass felt and one ply of mineral surface cap sheet. Embed each ply in solid moppings of hot asphalt applied at the rate of 25 lbs per square.

C. Requirements For Back Nailing Felts (if slopes 1/2" per foot and greater):

1. Back Nailing: On roof slopes 1/2" per foot or more, back nailing of the felts may be required by the roofing membrane manufacturer.

- a. Back nail the felts when required by the manufacturer.

- b. Back nail the felts in strict accordance with the manufacturer's Specification for nailing pattern, and nail spacing.

2. For Insulated Decks:

Wood Nailers: Nominal 4" wide wood nailers, the same thickness as the insulation, are required on all slopes requiring back nailing.

- a. Install the wood nailers at and parallel to, ridges, hips, and eaves. Between ridges and eaves, install nailers perpendicular or parallel to the roof slope, as required by the manufacturer.

- b. Space the nailers in strict accordance with the manufacturer's Specifications.

D. Laying Felt:

1. Start laying felts, using split sheets as necessary to secure the required number of plies and laps. Provide 10" minimum end laps. Roll all roofing felt not more than 5'-0" behind the mop as it spreads the bitumen, brooming and pressing the felts into the bitumen from the center outward to the edges so as to ensure thorough sticking and a smooth, firm surface, free of blisters, wrinkles, or buckles.

2. Use three persons for the application of roofing felt as follows; one person to spread bitumen in front of the roll, one person to roll out the felt and one person to smooth out the felt with a stiff street broom or squeegee. The roofing may be installed with an approved applicating machine and broomed or squeegeed smooth producing an equivalent result. In no case shall the felt be rolled out dry and then laid in the bitumen.
3. Direction of Felt Run (on Slopes of 1/2" per foot and greater):
 - a. For all Decks except Uninsulated Wood Decks: If back nailing is required by the membrane manufacturer, install the felts perpendicular to the wood nailers.
 - b. For Insulated Wood Decks: If back nailing is required by the membrane manufacturer, install the felts perpendicular or parallel to the roof slopes, as required by the manufacturer.
4. Where gravel stops are required, install felt pitch dam as follows: At the parallel edge to the felt runs, extend the bottom felt 4" beyond the roof edge. Across the end of the felt runs, install a 12" wide continuous starter strip, extended 4" past the roof edge. After all ply felts are installed and edge trimmed, fold the 4" extension back over the roof surface. Adhere with hot bitumen and broom smooth, leaving the exposed top surface dry.
5. Where built-up flashings are required, extend the mopped roofing felts 2" beyond the top edge of the cant.
6. Where sheet metal base flashings are required, turn up mopped roofing felts a minimum of 4" on all vertical surfaces or apply additional felt plies.
7. Where cant type gravel stops (fascia) are required, carry all membrane plies past the edge

of the water dam member and cut off flush with the face of the cant.

8. For Partial Roof Replacement: Connection to Existing Membrane: Spud off the existing gravel a min. of 2'-6" down to bare felt surfaces. Lap the first ply of the roofing membrane over the existing adjacent membrane a minimum of 6". Lap all other plies over the preceding a minimum of 6".
9. Any protection ply or temporary ply shall not be deemed a part of the 4-ply system.

E. Phasing of Roofing Membrane Installation:

1. Phasing of ply felt application will not be allowed in any case.
2. Where necessitated by job conditions and with approval of the Authority's Representative, a protective glaze coating may be applied as follows:
 - a. Apply protective glaze coatings in addition to all other coatings or moppings specified in this Section. Reduction or omission of specified prime coats, mopped bitumen, flood coats or finish coats in lieu of glaze coatings is not permitted.
 - b. Gravel Surfaced Roofs: If aggregate is not applied the same day, apply glaze coating of hot bitumen at the rate of 15 lbs per square to the completed membrane.
 - c. Smooth Surface Roofs: If permitted under the manufacturer's Specifications, apply glaze coating of hot bitumen at the rate of 15 lbs per square, unless asphalt emulsion is applied the same day.
3. All exposed felts, regardless of type, must be protected with specified surfacing or glaze coating by the end of each working day.

4. Continue the installation of roofing materials on the following work day (weather permitting). Glaze coated surfaces must be clean and dry to ensure complete bonding of felts or coatings.

F. Temporary Flashings

Provide a temporary waterproof seal at all membrane edges, penetrations, drains, etc. Unless complete flashings are installed immediately (same working day) following the membrane application.

G. Installing Built-Up Flashings:

1. Apply asphalt primer to all vertical surfaces before application of built-up flashings.
2. Install built-up flashing consisting of 2 plies of asphalt fiberglass felt, topped with one ply of modified bitumen flashing membrane.
3. Cut all felts into strips not longer than 12 feet. Provide 3" minimum end laps. Stagger all end laps. Cut modified bitumen flashing membrane the width of the roll.
4. Install all plies in hot steep asphalt or if desired install felt in plastic cement, and modified flashing in MBR adhesive.
5. Fasten the top edge of the built-up flashings 8" oc.
6. Seal top edge of flashing with a trowel coat of plastic cement and fabric. If roof system is vented do not seal the top edge.

H. Installing Metal Flashings and Coverstrips:

1. Asphalt Roofs: Plastic Asphalt Cement.
2. Prime metal surfaces and embed portions of all metal flashing which extend over the roof surface in plastic cement.
3. Completely cover all portions of metal flashings which extend over the roof surface with two

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

asphalt fiberglass felt coverstrips, each set in plastic cement. Provide strips that are at least 8" and 12" wide respectively. In all cases, carry the strips past the edge of the metal flange and beyond the edge of the preceding felt 4" min. Seal junction of metal and coverstrip with plastic cement.

Coat and surface the top ply to match the adjacent roofing membrane.

4. At roof drains, install cover strips within the slope to the drain so that they do not impede the flow of water from the roof.
5. For Gravel Surfaced Roofs: At cant type gravel stops coat the top ply of the built-up roofing membrane that extends up the cant with aluminized coating applied at the rate of 1-1/2 gal per square.

I. Filling Pitch Pockets:

Fill bottom half of pitch pocket with cement mortar. Fill remaining half of pitch pocket with elastomeric cement. Slope surface to shed water.

J. Applying Flood Coat and Aggregate Surfacing (For Gravel Roofs):

1. Embed the surfacing aggregate in a poured flood coating of hot bitumen.
 - a. Apply asphalt at the rate of 65 lbs per square.
2. Apply gravel or crushed stone at the rate of 600 lbs. per square or as required to completely cover all asphalt, whichever quantity is greater.

3.11 FLOOD TESTING

- A. After completion of roofing work specified above, all drains shall be plugged and all roofs of above locations of Work shall be flooded with a minimum of 1" of water above the high points. Water shall remain for a minimum of 24 hours. If leaks occur, Contractor

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

shall do all necessary work to correct them and flood testing shall be repeated until no leaks occur.

3.12 FIELD QUALITY CONTROL

A. Field Samples

Draw a quart sample from each load of bitumen arriving at the job site in the presence of the Authority's Representative, who will take it for laboratory analysis.

B. Test Strip (if requested by the Authority)

1. When and where directed by the Authority's Representative, and before surfacing is applied to the completed membrane, cut a strip 3" wide by 40" long thru all plies of the built-up roofing. Number of such test strips may be as required by the Representative. After removal of the strip, immediately repair the area by applying the same number of plies of the same kind of felt and bitumen to fill the hole level. Repeat the same number of plies of the same kind of felt and bitumen over the filled strip with the first ply lapping each edge 12" and each succeeding ply lapping the preceding ply by at least 3" on all edges. Apply surfacing material to match the adjoining roof. Turn the test strips over to the Authority's Representative for examination.
2. If the test strips indicate the roofing system complies with the Specifications, the Authority will bear the cost of the test strip Work.
3. If the strips indicate the roofing system does not comply with the Specifications, the Contractor shall bear the cost of the test strip Work, and shall repair or replace all roofing Work as required to comply with the Specifications, at the Contractor's expense.

C. Non Compliance

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Failure of the bitumen samples or the test strip samples to meet the Specification requirements will be cause for rejection of the Work.

3.13 INSPECTION

- A. After all roofing system Work is completed, an inspection shall be made by the roofing system manufacturer's representative. The representative shall certify that roofing system has been installed according to the Specifications.

3.14 CLEANING

- A. Remove bitumen from surfaces other than those requiring bituminous coatings.
- B. Remove all debris from roof area.

END OF SECTION

SECTION 07550

HOT POLYMERIC FLUID APPLIED WATERPROOFING [ITEM 1]

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide all hot polymeric fluid applied waterproofing roofing work including metal flashing, roof drain inserts, insulation and ballast as indicated on the Contract Drawings and as specified in this Section.

1.02 RELATED SECTIONS

- A. Rough Carpentry Section 06100
- B. Flashing and Sheet Metal Section 07600
- B. Joint Sealers Section 07900
- C. Flashing and Equipment Curbs at Roof . . . Division 15

1.03 REFERENCES

- A. American Society for Testing and Materials (ASTM).
- B. Underwriters Laboratories, Inc. (UL).

1.04 SUBMITTALS

- A. Submittals Package

Submit the Shop Drawings, Product Data, Samples, and Quality Control Submittals specified below at the same time as a package.
- B. Shop Drawings
 - 1. When there is a proposed deviation from the Contract Documents, submit the revised detail labeled as such for approval. The revised detail shall show existing conditions and shall be referenced directly to the related details on the Contract Drawings.
 - 2. Submit an accurate layout of the insulation showing the slopes to the drains and tapered sections if any.

C. Product Data

Catalog sheets, Specifications and installation instructions for each material specified.

1. Revise the membrane manufacturer's product data as necessary to suit the requirements of the Contract Documents. Manufacturer's details are not to be used for the Work of this Contract.
2. Manufacturer's Warranty: Sample copy of the membrane manufacturer's 15 year warranty covering workmanship and materials.

D. Samples

1. Membrane: Two 6" sq. Pieces.
2. Flashing Sheet: Two 6" sq. Pieces.
3. Protection Board: Two 6" sq. Pieces.
4. Fasteners: Six, each type.
5. Insulation: Two 6" sq. Pieces.
6. Stone Ballast: Five pounds.
7. Filter Fabric: Two 6" sq. Pieces.

F. Quality Control Submittals

1. Fire Hazard Certification: Written certification that the roof system, including the specific insulation, has been tested in conjunction with the type of structural roof deck and roof slope applicable to the project and has achieved an Underwriters Laboratories Class A external fire resistance rating.
 - a. Acceptable Certification: Letter from Underwriters Laboratories, or a copy of the Underwriters Laboratories classification listing for the roofing system.
2. Material Certification: Letter from the roofing membrane manufacturer certifying that the insulation is approved for use with the roofing system.
3. Membrane Manufacturers Certifications:
 - a. Submit a letter certifying that the manufacturer has been actively producing and marketing the submitted system within the United States for a minimum of ten years.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- b. Submit the names and addresses of ten previous roofing projects. Include the type and size of each project and name and telephone number of a contact person at the project location.
4. Applicator's Certification:
 - a. Letter from the membrane manufacturer certifying that the applicator is licensed or approved to install the roof system.
 - b. Names, address, and telephone numbers of five buildings where the applicator has installed hot polymeric fluid applied waterproof roofing systems which have the manufacturer's warranty issued. Include the types of hot polymeric fluid applied waterproof roofing systems installed, the manufacturer's name, and the warranty numbers.
 - c. Letter certifying that the job foreman or crew chief and at least one other member of the roofing crew have installed at least five hot polymeric fluid applied waterproof roofing systems and are thoroughly familiar with all aspects of the installation.
- G. Contract Closeout Submittals:
- Guaranty and Warranty: As specified.

1.05 QUALITY ASSURANCE

- A. Membrane Manufacturer's Qualifications:
1. The manufacturer shall have the technical expertise and qualified technical representatives to quickly resolve questions or problems which may arise both during and after the Work is completed.
 2. The manufacturer shall have been actively marketing hot polymeric fluid applied waterproof roofing systems in the United States for a minimum of ten years.
 3. The manufacturer shall provide the names, addresses, and telephone numbers of at least ten previous projects of comparable size, scope, and complexity as the Work of this Section.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

4. The manufacturer must require that the roof system be installed by a licensed or approved applicator.

B. Roofing Installation Qualifications

1. Roofing Firm Qualifications

- a. Installation of a minimum of ten hot polymeric fluid applied waterproof roofing systems of double membranes including all related flashing work (List last five such jobs, including address, type of system and number of membranes, square footage, date installed and owner/agent with whom contracted).
- b. In continuous operation of installing such roofing systems for eight years or more.
- c. Certified installer for nationally recognized roofing materials manufacturer.

2. Protect Foreman Qualifications

(Note: For field foreman to be assigned to this project, identify and substantiate)

- a. Installation of a minimum of five hot polymeric fluid applied waterproof roofing systems of double membranes for which this individual served as field foreman in direct responsible charge of all roofing work crews.

(Note: List last five such jobs, including address, type of system and number of membranes, square footage, date installed and owner/agent with whom contracted, and name of roofing firm with which employed)

- b. Successful completion of a formal instructional and training program for the installation of the specified roofing systems, as evidenced by:

1. A certificate of journeyman roofer as issued under a union apprenticeship-journeyman training program duly registered with the New York State Department of Labor (or other State Labor Department); or

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. A certificate or diploma issued by a vocational training school or national roofing manufacturer attesting to successful completion of an equivalent formal training program (submit copy of certificate for above); or
3. A minimum of five years of practical experience in the installation of all aspects and details of the specified roofing system including related flashing work as determined from a pre-qualification interview conducted by the MMMHS Representative and roofing manufacturer's representative.

c. Must be able to read and communicate in English and be able to read construction drawings and specifications.

C. Fire Department Regulations

Equipment and fuel shall meet the requirements of the New York City Fire Department.

D. Fire Hazard Classification

The hot polymeric fluid applied waterproof roof system shall have an Underwriters Laboratories Class A External Fire Resistance rating; as determined by tests conducted in conformity with UL-790 (ASTM E 108).

1. The roof system, which includes a specific generic type of insulation and in some instances a specific name brand insulation, shall have been tested in conjunction with the type of structural roof deck and roof slope applicable to the project.

E. Pre-Installation Conference

Before the roofing Work is scheduled to commence, a conference will be called by the MMMHS Representative at the site for the purpose of reviewing the Contract Drawings and Specifications and discussing requirements for the Work. The conference shall be attended by the Contractor, the authorized roofing applicator, and the Company Field Advisor.

- F. Secure the services of a Company Field Advisor of the membrane manufacturer for a minimum of 32 working hours. The Field Advisor shall be certified in writing by the

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

manufacturer to be technically qualified in design, installation, and servicing of the required products. Personnel involved solely in sales do not qualify. The Field Advisor shall be present at the beginning of and during the actual membrane installation for the purpose of:

1. Rendering technical assistance to the Contractor regarding installation procedures of the system.
2. Familiarizing the MMMHS Representative with all aspects of the system including inspection techniques.
3. Answering all questions which might arise and resolving problem areas of work.

1.06 DELIVERY, STORAGE, AND HANDLING

A. Delivery:

1. Roofing materials shall be delivered to the site in the manufacturer's unbroken containers and shall bear the manufacturer's printed labels.
2. All polymeric waterproofing delivered in containers shall be accompanied by the manufacturer's certification stating: manufacturer's name, type, softening point range, flash point, and compliance with ASTM Specifications.
 - a. Certification for polymeric waterproofing shall also state the equiviscous temperature range and the finished blowing temperature range.

B. Storage and Handling:

1. Store materials a minimum of 6" off the ground, in a dry, well ventilated place protected from the weather. Enclosed trailers shall be required.
2. Do not stock pile aggregate surfacing materials on unsurfaced felt which are in place on the roof.
3. Mark for identification all materials which become wet. Remove such materials for the site.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

4. Handle roll goods with care; store on end. Do not use roll goods which have been damaged.

1.07 PROJECT CONDITIONS

A. Do not begin the Work of this Section unless the MMMHS Representative is present.

B. Temperature

Do not apply hot polymeric fluid applied waterproof roofing when the deck or air temperature is below manufacturer's recommended temperature.

C. Do not execute the Work of this Section unless the substrate is dry, and free from debris and dust.

D. Moisture Protection

1. Cover, seal, and otherwise protect the roof and all flashings so that water cannot accumulate or flow under the completed portions. When and where required, provide temporary water cut-offs in accordance with the roofing manufacturer's written Specifications.

2. The existing main roof, the bulkhead roofs, and parapet wall membranes and insulation/protection boards shall be removed down to the concrete slabs and masonry walls by an asbestos removal contractor under a separate contract. The Contractor shall be responsible for directing and coordinating the removal work of the asbestos removal contractor in regard to when, where and how much existing roofing shall be removed in any one day. The Contractor shall not allow the asbestos removal contractor to remove any more of the existing roof membrane than the Contractor can replace or protect from the weather in one day. The Contractor shall be responsible for all temporary water cut-offs, tarps, weather coverings, etc. and be held liable for any water damage to the existing school building due to the roofing removal and reroofing work.

1.08 GUARANTEE AND WARRANTY

A. Contractor's Guarantee

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Two year written guarantee covering defects in materials and workmanship. A Performance Bond shall be issued for the entire two year period.

B. Manufacturer's Warranty

In addition to the Contractor's guarantee, furnish the membrane manufacturer's printed 15-year warranty for the Work of this Section. The warranty shall be for the entire roof system including but not limit to the membrane, metal and fabric flashing, sealants, wood blocking, roof drain inserts, polystyrene insulation, filter fabric, and ballast and shall include but not be limited to repair of leakage caused by defects in materials or workmanship, and shall include the removal and reinstallation of ballast, filter fabric, insulation boards and protection boards. The monetary value of the warranty shall be at least equal to the original cost of the installation.

PART 2 - PRODUCTS

2.01 MANUFACTURER

A. Hot polymeric fluid applied waterproofing - double membrane system:

1. Barrett Company, Millington NJ 07946 or comparable system (meeting all requirements of this Section) manufactured by:
2. American Hydro Tech, Chicago IL.
3. Tremco, Cleveland, OH.

B. Insulation

1. Insulation manufacturer that is acceptable to the membrane manufacturer.

2.02 MATERIAL FOR ROOF MEMBRANE

A. Waterproofing Reinforcing Membrane:

1. Ply Sheet: Poly FELT 125VP spunbond polyester with high temp resin binder meeting the following minimum specifications:

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Color		Grey
Weight, oz/yd	ASTM-D-3776	1.5 oz/sq yd
Thickness	ASTM-D-1777	9.5 mils
Grab Tensile	ASTM-D-4830	32 lbs. CMD, MD
Elongation	ASTM-D-4830	37 lbs. CMD, MD
Tear Strength	ASTM-D-4830	12 lbs. CMD, MD
Fatigue Life	ASTM-D-8B	>10,000 cycles

2. Hot Polymeric Waterproofing: RAM TOUGH 250 DM system complying with the following minimum specifications:

Color	Vis. Specif.	
Softening Point	ASTM-D-36	
Solids Content	CGSB-37-GP-50	100%
Ration of toughness to peak load	CGSB-37-GP-50	Min 0.040
Temperature crack bridg'g capability	CGSB-37-GP-50	No cracking No adhesion loss No splitting
Toughness, J	CGSB-37-GP-50	Min 5.5
Penetration	CGSB-37-GP-50	Max 110 @ 25C (77 F) Max 200 @ 50C (122 F)
Flow, mm	CGSB-37-GP-50	Max 3 @ 60 C (140 F)
Flash Point	CGSB-37-GP-50	Min 260 C (500 F)
Water resistance	CGSB-37-GP-50	No delamination No blistering No emulsification No deterioration No pinholes
0 C for 4 days		
Adhesion	CGSB-37-GP-50	Min 1
Viscosity	CGSB-37-GP-50	Min 2, Max 15
Water vapor permeability	CGSB-37-GP-50	Max 1.7
Water absorption	CGSB-37-GP-50	Min 0.18
Low temperature flexibility and adhesion	CGSB-37-GP-50	No cracking No delamination No adhesion loss
Heat stability	CGSB-37-GP-50	Aged samples no change in viscosity, Penetration, flow or low temp flexibility

3. Neoprene Flashing Sheet: RAM FLASH 327 HDR complying with the following minimum specifications:

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Installed Widths: Minimum 6 inches total, minimum 4 1/2 inches in any single direction, minimum 12 inches on each side of expansion joints.

Length: Longest possible length to minimize field joints

Thickness: 60 mils +/- .02 mil

Press Cure: 120 min @ 340 F

Tensile strength, ASTM-D-412-80 1800 PSI min

Elongation: ASTM-D-412-80 300% min

Tear: ASTM-D-624-81 Die C 20 PLI min

Tensile strength, min 70 hrs @ 212 F: ASTM-D-573-81 1500 PSI

Elongation min 70 hrs @ 212 F: ASTM-D-573-81 200%

Ozone resistance (168 hrs/100 ppm 104 F 20% EXT) ASTM-D-1149 No cracks @ 7X magnification

Water absorption 168 hrs @ 158 F ASTM-D-471 + 15.0% max

Brittleness @ 30 F ASTM-D-2137 Pass 180 bend, no cracks

Pipe, stack and all premoulded corner base flashings: Neoprene, closed boot and/or premoulded, supplied by membrane manufacturer, and installed in accordance with published flashing details. Neoprene sheet is not acceptable in corners or at pipe and stack flashing.

4. ELASTOMERIC FLASHING SHEET: RAM FLASH M-358 shall comply with the following minimum specifications:

Weight: ASTM-D-751 0.29 lbs., sf

Breaking Strength ASTM-D-751 225 lbf

Tear Strength ASTM-D-751 90 blf

Lo Temp Bend, 1/8" mandrel ASTM-D-2136 Pass -40 degrees

Shore A Hardness ASTM-D-2240 80 +/- 5

Hydrostatic Resistance ASTM-D-751, A 300 PSI

Dimensional Stability ASTM-D-1204 0.1% +/-

24 hrs. @ 130 deg., no change

Puncture FTMS 101C 215 lbs. min.

Resistance (method 2031)

Elongation ASTM-D-412 300%

Vapor Transmission ASTM-D-96 0.049 perms (Procedure B)

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

5. WATERPROOF MEMBRANE FOR VERTICAL SURFACES: Ram 400PS, 40 Mil SBS Poly Reinforced Double Sided Peel and Stick Membrane.
6. SURFACE CONDITIONER: shall be Ram Tough surface conditioner/primer conforming to ASTM-D-41-70.
7. MASTIC: shall be Ram Mastic - SBS Rubber Modified Cold Applied Mastic for patching, stripping and flashing where Hot Applied Ram Tough 250 cannot be used.
8. PROTECTION COURSE: shall be "Course 203" asphaltic Ram Tough Protection Board.
9. Sealant: shall be Ram Hypalon sealant.
10. NAILS: as specified by the fastener manufacturer and approved for use for the specific application by the membrane manufacturer.

2.03 MATERIALS FOR INSULATION

- A. Roof insulation shall provide a thermal resistance "R" factor of 5.0 per inch of thickness.
 1. Roof insulation shall be Extruded Polystyrene insulation, 2ft. Width, 4ft. Length with rain channels and a minimum 60 PSI impact resistance.
 2. Filter Fabric shall be a non-woven polymeric fabric as approved by the manufacturer for application of this system, Phillips Ribers Corporation "Rufon*" non-woven polypropylene fabric, or approved equal.
 3. Stone Ballast for roof application shall be clean large white spar meeting ASTM specification #5, minimum of 5 lbs/sq ft for each inch of insulation thickness.

2.04 MATERIALS FOR ROOF DRAINS

- A. Retrofit all existing roof drains on the main roof of the school building with roof drain inserts designed for reroofing projects.
 1. Proliner Drain for reroofing projects as manufactured by Marathon Roofing Products Inc. or manufacturer acceptable to the membrane

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

manufacturer. Use type and style of drains suitable to roof system being used and of a size required by each existing roof drain.

PART 3 - EXECUTION

3.01 EXISTING ROOF REMOVAL

- A. As previously discussed in paragraph 1.07, D.2. of this Section, an asbestos removal contractor under separate contract shall be removing all existing roofing down to the concrete roof slabs and down to the masonry of the parapet walls. The following work shall be performed by the Contractor for all areas of roofing after the existing roofing is removed by the asbestos removal contractor:

3.02 EXAMINATION

- A. Verify that Work of other trades which penetrates the roof deck or requires personnel and equipment to traverse the roof deck has been completed or coordinated with the schedule of the roof Work.
- B. Examine surfaces for inadequate anchorage, foreign material, moisture, and unevenness which would prevent the execution, and quality of application, of the hot polymeric fluid applied waterproof roof system as specified.
- C. Do not proceed with application of membrane roofing system until defects are corrected.

3.03 VERIFICATION OF CONDITIONS

- A. Testing Existing Roof Drains and Conductor Pipes

Before commencing with the Work, water test all existing drains and conductor pipes, submit a written report to the MMMHS Representative, indicating which drains or conductors, if any, are not functioning properly.

- 1. If repairs or other corrective Work are required, the MMMHS Representative may, at his option, initiate a change order for such Work.

3.04 PREPARATION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- A. Remove trash, debris, grease, oil, water, spalled surfaces, moisture and other contaminants from the deck and parapet walls which may affect bond of bitumen to the concrete and masonry surfaces.
- B. Remove all existing lighting supports and conduits below existing coping of parapet walls prior to roof installation and reinstall with compressible gaskets and sealant over waterproof flashing once roof installation is complete.
- C. Remove existing antenna mast from support brackets prior to roof installation and reset on precast concrete paver block resting on filter fabric and insulation. Resecure mast to support brackets as required.
- D. Prepare other surfaces according to respective manufacturer's published instructions.
- E. Provide cleaning materials and methods necessary to render an acceptable surface, including scarifiers for scarifying all surfaces, oil free filtered compressed air or high speed power blowers.
- F. Provide compatible materials to patch all voids, spalled surfaces and joints so finished deck and parapet wall surfaces will be reasonably smooth.
- G. Protect adjacent areas from damage with tarpaulin or other durable materials.
- H. Protect Poly-Felt reinforcement from moisture and the elements prior to installation. No protection from weather is necessary for Ram Tough 250, but temporary protection to installed membrane is required to prevent damage to membrane by mechanical gouging, scraping, spilling of oil or solvents or excessive heat.

3.05 INSTALLATION

- A. **SURFACE CONDITIONER:** Each day, prior to application of membrane, apply surface conditioner as a fine spray, evenly, at a rate of approximately one gallon per 400-600 square feet. Allow to dry completely tack free. Do not allow primed surface to be contaminated with construction debris or dust.
- B. **APPLICATION:** Units of membrane shall be melted in an approved double-jacket oil bath melter under continuous agitation until the material can be drawn free-flowing

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

and lump-free at a temperature of approximately 350 F. Membrane shall be applied evenly at a rate to provide a continuous coating not less than 90 mils thick. As soon as possible, while membrane is still warm, install Poly-Felt fabric, in built-up roofing fashion, starting at the drains and low points. Install in shingle fashion with four inch side laps and twelve inch head laps. Insure that all lap joints have interply coat of Ram Tough 250. In no location shall Poly-Felt reinforcement touch Poly-Felt reinforcement. Broom or squeegee in place, insuring complete adhesion. Carry up all vertical wall surfaces as indicated on the Contract Drawings.

- C. Install second application of Ram Tough 250 evenly at a rate to provide a continuous coating not less than 125 mils thick (1/8 inch). All Poly-Felt reinforcement shall be coated each day. Leave no exposed Poly-Felt at end of day's work.

3.06 ROOF DRAIN INSERTS

- A. After roof slab preparation and water testing of existing roof drains as described in 3.03, A.1. of this Section and prior to membrane installation, remove existing roof drain grating and discard, clean drain body and interior portion of leader and subsequent to membrane application install roof drain inserts as indicated in the manufacturer's printed instruction and acceptable to the membrane manufacture.

3.07 FLASHING

- A. Carry hot applied roof membrane and reinforcement up all junctions of horizontal deck and vertical surfaces and changes of plane as indicated on the Contract Drawings. For parapets, curbs, penetrations, drains, roof edges, etc. install Ram-Flash 327 HDR 60 mil neoprene flashing with Flexible Ram Membrane, or in the case of parapet walls Ram-Flash M-358, as shown on the Contract Drawings, extending to the top of flashing and mechanically fastened with 1/8 inch flat bar stock termination bar.

3.08 CRACK TREATMENT

- A. At all cracks and construction joints, apply Flexible RAM Membrane 1/8 inch thick, then center a 6 inch wide strip of Ram-Flash 327 HDR neoprene flashing over the joint or crack and embed into the warm Flexible Membrane. Avoid air pockets. Allow assembly to cool. Flashing should be

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

installed before the continuous, unbroken thick film of membrane is applied over the entire roof surface and flashing areas in accordance with 3.05 of this Section.

3.09 EXPANSION JOINTS

- A. Over expansion joints up to 2 inches in width with a designed total movement of 50% or less, Ram Tough 327 HDR neoprene flashing shall be placed over the joint and embedded into a coating of membrane (min 1/8 inch thickness). The sheet shall be looped into the joint 1½ times the joint width at the maximum opening width and extend at least 12 inches onto the deck on each side of the joint. The sheet shall be covered and the loop filled solid and flush with Ram 250 Membrane.

3.10 WATER TEST

- A. Each contiguous area shall be water tested with two inches of standing water for a 24 hour period. Provisions for overflow in event of rain shall be provided. Any area not passing water test shall be repaired and retested until watertight.

3.11 PROTECTION BOARD

- A. After water test is completed, using Ram 250 as adhesive, apply protection boards, lapping the joints slightly to insure complete coverage.

3.12 INSULATION APPLICATION

- A. Lay insulation panels abutted tight with direction of rain channels toward drains as shown on the shop drawings. No more than 1/4 inch space shall exist between any panel. Cover installed insulation as soon as practical with final layer of filter fabric covering and ballast in weights specified to protect insulation from exposure to ultraviolet rays and wind movement.

3.13 FIELD QUALITY CONTROL

- A. Adhesion Test and Thickness Tests shall be monitored by applicator every hour throughout the application process.
- B. Test Cuts:
 - 1. Remove one 12" x 12" unsurfaced cut per 100 squares of deck area.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Follow field audit criteria outlined by Barrett.
 3. Send roof cuts to Barrett Company for laboratory examinations.
 4. Repair sampled areas by filling in the cut-out areas.
- C. Correct deficiencies in deck (determined by deck cut analysis and) as prescribed by Barrett or the MMMHS Representative.

3.14 CLEANING

- A. Remove trash, debris, equipment and parts from jobsite.
- B. Repair damage and remove stains caused by construction work.

3.15 PROTECTION

- A. Contractor shall protect finished deck areas from damage during the entire construction period.

3.16 INSPECTION

- A. After all roofing system work is completed, an inspection shall be made by the roofing system manufacturer's representative. The representative shall certify in writing that the roofing system has been installed according to the Contract Documents.

END OF SECTION

SECTION 07600
FLASHING AND SHEET METAL

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide all flashing, trim and sheet metal Work as indicated on the Drawings, as required for the completed Work, and as specified herein. The Work shall include, but shall not be limited to, the following:
 - 1. Roof membrane flashings
 - 2. Shop-formed facias at roof bulkheads
 - 3. Cladding of portions of existing roof bulkheads walls

1.02 RELATED SECTIONS

- A. Rough Carpentry Section 06100
- B. Hot Polymeric Fluid Applied Waterproofing...Section 07510
- C. Joint SealersSection 07900

1.03 REFERENCES

- A. Sheet Metal and Air Conditioning Contractors National Association (SMACNA).
- B. Copper Development Association (CDA).
- C. American Society for Testing and Materials (ASTM).
- D. Federal Specifications (FS).

1.04 SUBMITTALS

- A. Shop Drawings

Show the manner of forming, jointing, and securing the metal flashings and trim. Include expansion joint connections, and the method of forming waterproof connections to adjoining construction.
- B. Product Data

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Catalog sheets, specifications, installation instructions for each item specified except for shop or job formed items, solder, flux, and bituminous coating.

C. Samples

1. Materials for Flashings: Three 6" sq piece, for each type material specified.
2. Anchors: Three, each type required.
3. Flashings: Three, full section each profile, 6" long.
4. Facia: Three, full section, 6" long.

D. Guarantee

1.05 QUALITY ASSURANCE

A. Except as otherwise shown or specified, comply with applicable recommendations, details, and standards of CDA and SMACNA.

B. All metal Work shall ink-stamped at intervals, identifying

Manufacturer, type metal, and gage or thickness.

C. Manufacturer's Recommendations

For factory fabricated items, follow the manufacturer's recommendations and installation instructions unless specifically shown or specified otherwise.

1.06 DELIVERY, STORAGE, AND HANDLING

A. Deliver, store, and handle products of this Section in such manner to protect them from damage.

1.07 PROJECT CONDITIONS

A. Do not execute the Work of this Section unless the MMMHS Representative is present, unless otherwise directed.

B. Make the roof and all uncompleted flashings watertight at the end of each work day.

1.08 GUARANTEE

- A. The Contractor shall provide a three (3) year written guarantee, covering the cladding of the existing roof bulkheads for materials and workmanship. Should any defects occur during the stated period, they shall be corrected immediately, and all damage caused by such defects shall be corrected; all corrective Work shall be at the Contractor's expense.
- B. Roof membrane flashing and fascia shall be covered under the Guarantee and Warranty required by Section 07550 - Hot Polymeric Fluid Applied Waterproofing.

PART 2 - PRODUCTS

2.01 MATERIALS FOR FLASHING AND CLADDING FABRICATION

- A. Plain Copper Sheet
Cold rolled copper, ASTM B 370.

2.02 FASTENERS

- A. Nails
"Stronghold" type large flat head roofing nail.
 - 1. For Copper: Hardened copper.
- B. Screws, Bolts, and other Fastening Accessories
 - 1. For Copper: Copper or brass.
- C. Anchors

Provide one of the following types:

- 1. Hammer driven anchors, consisting of a stainless steel drive pin and a corrosion resistant metal expansion shield inserted thru a stainless steel disc with an EPDM sealing washer.
- 2. Self-tapping, corrosion resistant, concrete and masonry screw inserted thru a stainless steel disc with an EPDM sealing washer.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2.03 MISCELLANEOUS MATERIALS

A. Solder

Composition of block tin/pig lead of proportion recommended by the metal manufacturer, stamped either 50/50 or 60/40 "Warranted".

B. Flux

Paste or acid type as recommended by the metal manufacturer.

C. Bituminous Coating (for separating dissimilar metals):
FS TT-C494.

2.03 FABRICATION

A. Where practicable, form and fabricate sheet metal Work in the factory or shop. Produce bends and profiles accurately to the indicated shapes. Where not indicated or specified, follow the applicable requirements of the reference standards listed in PART 1.

B. Flashing (one-piece)

1. Copper: 16 oz.

C. Facia at Bulkhead

1. Copper: 20 oz.

D. Cladding for Bulkhead Walls

1. Copper: 20 oz.

PART 3 - EXECUTION

3.01 EXAMINATION

A. Coordinate the work of this Section with other Work for the correct sequencing of items which make up the entire system of weatherproofing or waterproofing.

3.02 PREPARATION

A. Do not install the Work of this Section unless all necessary nailers, blocking and other supporting components have been provided.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- B. Do not install the Work of this Section unless all substrates are clean and dry.

3.03 INSTALLATION

A. Isolation

Separate dissimilar metals from each other with bituminous coating.

B. Tinning and Soldering

1. Use soldering irons (heavy coppers) as Industry Standard. Torch soldering is not acceptable.
2. Clean, flux and tin all surfaces to be soldered.
3. Sweat solder thoroughly into seams, completely filling the seam for the full width.
4. Upon completion of soldering, remove all traces of flux residue, and if required, apply a neutralizing wash followed by a clean water wash.

C. Installing Cladding at Bulkhead Walls

1. Provide standing seam installation to match existing cladding to remain.
2. Interlock new and existing cladding to remain at newly created standing seam joint.

D. Installing Flashing

1. Form and install the flashing to provide a slight gap between the flashing and the membrane to allow moisture to escape. Lap all end joints a minimum of 3". Extend the flashing continuously around corners or provide lock seams. Install waterstop flashing at expansion joints.
2. Flashing for Installation In Reglets:
 - a. Extend the built-in portion of the flashing 2" into the reglet. Form the edge of the built in portion with a 1/4" hook dam.
 - b. Secure the flashing with lead wedges 8" oc. Install backer rod and fill joint completely

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

with sealant specified in Section 07550 and
tool to a slightly concave surface.

3. Pre-tin and solder with soldering irons (heavy
coppers) all inside and outside corners.

END OF SECTION

SECTION 07900
JOINT SEALERS

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide all joint sealer Work as indicated on the Drawings, as required for the completed Work, and as specified herein. The Work shall include, but shall not be limited to, the following:
 - 1. Interior hollow metal door frames.
 - 2. Exterior hollow metal door frames [ITEM 1].
 - 3. Exterior frames at aluminum windows, metal louvers, and at other junctures of different materials.

1.02 RELATED SECTIONS

- A. Steel Doors and Frames..... Section 08110
- B. Aluminum Projected and Casement Windows.. Section 08524
- C. Stationary Metal Wall Louvers..... Section 10214

1.03 REFERENCES

- A. American Society for Testing and Materials (ASTM)

1.04 SUBMITTALS

- A. Product Data
Catalog sheets, specifications, and installation instructions for each product specified including custom color charts.
- B. Samples (one each)
 - 1. Sealants: Three standard tubes.
 - 2. Joint Primer/Sealer/Conditioners: One pint.
 - 3. Backer Rods: 24" long full section.
 - 4. Bond Breaker Tape: 24" long full section.

C. Quality Control Submittals

1. Installer's Qualifications Data: Affidavit required under Quality Assurance Article.
2. Company Field Advisor Data: Name, business address, and telephone number of Company Field Advisor.

1.05 QUALITY ASSURANCE

A. Installer's Qualifications

The persons installing the sealants and their supervisor shall be personally experienced in the installation of sealants and shall have been regularly employed by a company engaged in the installation of sealants for a minimum of five years.

1. Furnish to the MMMHS Representative the names and addresses of five similar projects which the foregoing people have worked on during the past five years.
2. Furnish a letter from the sealant manufacturer, stating that the foregoing people are authorized to install the manufacturer's sealant materials and that the manufacturer's specifications are applicable to the requirements of this Project.

B. Container Labels

Include manufacturer's name, trade name of product, kind of material, federal specification number (if applicable), expiration date (if applicable), and packaging date or batch number.

1.06 DELIVERY, STORAGE, AND HANDLING

- A. Deliver, store, and handle joint sealer materials as recommended by the Manufacturer, to protect from damage.

1.07 PROJECT CONDITIONS

A. Environmental Requirements

1. Temperature: Unless otherwise approved or recommended in writing by the sealant manufacturer, do not install sealants at temperatures below 40 degrees F or above 85 degrees F.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Humidity and Moisture: Do not install the Work of this Section under conditions that are detrimental to the application, curing, and performance of the materials.
3. Ventilation: Provide sufficient ventilation wherever sealants, primers, and other similar materials are installed in enclosed spaces. Follow manufacturer's recommendations.

B. Protection

1. Protect all surfaces adjacent to sealants with non-staining removable tape or other approved covering to prevent soiling or staining.
2. Protect all other surfaces in the Work area with tarps, plastic sheets, or other approved covering to prevent defacement from droppings.

C. Installation

1. Since the window sealant is an integral component of the replacement window system and its ability to prevent outside noise from entering interior spaces, window sealant shall only be installed by the approved window installer, who shall exercise extreme care in the sealant installation.

PART 2 - PRODUCTS

2.01 SEALANTS

- A. Type 1 Sealant - For general use around windows, door frames, louvers and other junctures.

Two-part polyurethane sealant: Pecora Dynatrol II or approved equal.

- B. Type 2 Sealant - For concealed bedding under window sills.

One-part butyl rubber sealant; Pecora's BC-158, PTI's 707 or Woodmont's Chem-Calk 300.

- C. Sealant Colors

For exposed materials, provide color as selected by the MMMHS Representative from manufacturer's custom colors.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

For concealed materials, provide the natural color which has the best overall performance characteristics.

2.02 MISCELLANEOUS MATERIALS

A. Joint Primer/Sealer/Conditioner

As recommended by the sealant manufacturer for the particular joint surface materials and conditions.

B. Backer Rod

Compressible rod stock of closed cell, expanded, extruded polyethylene.

C. Bond Breaker Tape

Polyethylene or other plastic tape as recommended by the sealant manufacturer; non-bonding to sealant; self-adhesive where applicable.

D. Cleaning Solvents

Oil free solvents as recommended by the sealant manufacturer. Do not use reclaimed solvents.

E. Masking Tape

Removable paper or fiber tape, self-adhesive, non-staining.

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Examine all joint surfaces for conditions that may be detrimental to the performance of the completed Work. Do not proceed until satisfactory corrections have been made.

3.02 PREPARATION

- A. Clean joint surfaces immediately before installation of sealant and other materials specified in this Section.
1. Remove all loose materials, dirt, dust, rust, oils and other foreign matter that will impair the

performance of materials installed under this Section.

2. Remove lacquers, protective coatings and similar materials from joint faces with manufacturer's recommended solvents.
3. Do not limit cleaning of joint surfaces to solvent wiping. Use methods such as grinding, acid etching or other approved and manufacturer's recommended means, if required, to clean the joint surfaces, assuring that the sealant materials will obtain positive and permanent adhesion.

3.03 JOINT BACKING INSTALLATION

- A. Install bond breaker tape in relaxed condition as it comes off the roll. Do not stretch the tape. Lap individual lengths.
- B. Install backer rod of sufficient size to fill the joint width at all points in a compressed state. Compress backer rod at the widest part of the joint by a minimum of 25 percent. Do not cut or puncture the surface skin of the rod.

3.04 SEALANT INSTALLATION

- A. Except as shown or specified otherwise, install sealants in accordance with the manufacturer's printed instructions.
- B. Install sealants with ratchet hand gun or other approved mechanical gun.
- C. Finishing

Tool all vertical, non-sag sealants so as to compress the sealant, eliminating all air voids and providing a neat smoothly finished joint. Provide slightly concave joint surface, unless otherwise indicated or recommended by the manufacturer.

1. Use tool wetting agents as recommended by the sealant manufacturer.

3.05 CLEANING

- A. Immediately remove misapplied sealant and droppings from metal surfaces with solvents and wiping cloths. On other

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

materials, remove misapplied sealant and droppings by methods and materials recommended in writing by the manufacturer of the sealant material.

- B. After sealants are applied and before skin begins to form on sealant, remove all masking and other protection and clean up remaining defacement caused by the Work.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 08110
STEEL DOORS AND FRAMES

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

A. Provide hollow metal steel doors and frames as indicated on Drawings and specified herein. Roof bulkhead doors are part of ITEM 1.

1.02 RELATED SECTIONS

- A. Metal Fabrications Section 05500
- B. Flashing and Sheet Metal..... Section 07600
- C. Hardware Section 08710
- D. Painting Section 09900

1.03 REFERENCES

- A. Underwriters' Laboratories, Inc. (UL)
- B. American Society for Testing and Materials (ASTM)
- C. National Fire Protection Association (NFPA)
- D. Steel Door Institute (SDI)
- E. Hollow Metal Manufacturers Association (HMMA)

1.04 SUBMITTALS

- A. Product Data
Manufacturer's catalog sheets, specifications, and installation instructions.

B. Shop Drawings

Show details of each frame type, elevation and construction for each door type, conditions at openings, location and construction for each door type, conditions at openings, location and installation requirements for finish hardware (including cutouts and reinforcements), details of connections, and anchorage and accessory items.

1. Include a schedule of doors and frames using the same reference numbers for details and openings as those on the Contract Drawings.

1.05 QUALITY ASSURANCE

A. Fire Rated Assemblies

Wherever fire resistance classification is shown or scheduled for steel doors and frames, provide fire rated units that have been tested as fire door assemblies and comply with National Fire Protection Association (NFPA) Standard No. 80 and these Specifications. Identify each door and frame with metal MEA labels indicating the applicable fire class of the unit. Rivet or weld labels on the hinge edge of door and jamb rabbet of frame.

1. Oversize Assemblies: Whenever fire rated assemblies are larger than size limitations established by NFPA, provide manufacturer's certification that they have been constructed with materials and methods equivalent to requirements for labeled construction.
2. See Door Schedule in the Drawings for fire resistance requirements for respective openings.

B. Regulatory Requirements

NYC Materials Equipment Acceptance (MEA). Provide labels required.

1.06 DELIVERY, STORAGE, AND HANDLING

- A. Store doors and frames on raised platforms in vertical position with blocking between units to allow air circulation.

1.07 GAGE STANDARDS

- A. Gages specified are based on U.S Standard Gauge for hot rolled and cold rolled steel sheets.
- B. The allowable tolerances for steel sheet thicknesses shall be in accordance with HMMA Standards.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

- A. L.I. Fireproof Door, Inc., Whitestone, NY 11357, or approved equal.

2.02 MATERIALS

- A. Hot-Rolled Steel Sheets and Strip

Commercial quality carbon steel, pickled and oiled, complying with ASTM A 569 and ASTM A 568.

- B. Cold-Rolled Steel Sheets

Commercial Quality carbon steel complying with ASTM A 366 and ASTM A 568.

- C. Galvanized Steel Sheets

Carbon steel sheets of commercial quality complying with ASTM A 526. Doors and frames shall have A 60 zinc coating for exterior doors and A 20 zinc coating for interior doors, mill phosphatized, complying with ASTM A 525.

- D. Anchors and Supports

Fabricate of gages indicated on the Drawings, and of not less than 16 gage sheet steel, unless otherwise indicated.

- 1. Galvanized Units: Galvanized anchors and supports used with galvanized frames, complying with ASTM A 153, Class B.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

E. Anchorage Devices, Bolts, and other Fasteners

Manufacturer's standard units unless otherwise indicated on the Drawings.

1. Galvanized Units: Galvanized items used with galvanized frames complying with ASTM A 153, Class C or D as applicable.

2.03 FABRICATION

- A. Fabricate hollow metal work accurately and assemble neatly to ensure work smooth and free from dents, tool marks, visible waves, warp, buckles and conspicuous joints.
- B. Align lines straight and true with arises and angles as sharp as practicable. Miter corners in true alignment and join similar abutting profiles accurately.
- C. Assemble all joints to form imperceptible intersections when finished.
- D. Form each member, such as jamb and head, from a single piece of metal, unless otherwise shown or approved.
- E. Fasten all members together to provide rigid construction in assembled work. Weld all connections.
- F. Continuously weld and dress smooth and flush joints on exposed faces.
- G. Clearances

Fabricate doors for their respective frames within the following clearances:

1. Jambs and Head: $3/32$ " to $1/8$ " maximum.
 2. Bottom: $1/4$ ", maximum.
- H. Work showing defects or blemishes will be rejected, and rejected work shall be replaced with satisfactory work.

2.04 DOORS

A. General

1. Design and Thickness: Flush design doors, seamless, hollow construction, 1-3/4" thick.
2. Door Edges: Bevel lock stile edge of single acting hinged doors 1/8" in 2".
3. Provide surface sheet reinforcement for surface sheet, edge, hardware, stops, and other provisions, as indicated on approved Shop Drawings or otherwise required.

B. Interior Doors

1. Fabricate interior doors with 2 outer stretcher-leveled, cold-rolled steel sheets of 16 gage unless indicated otherwise on the Drawings. Construct doors with smooth, flush surfaces without visible joints or seams on exposed faces and stile edges. Vertical edges shall be continuously MIG or ARC welded and ground smooth.
2. Provide top and bottom channels and closures.

C. Exterior Doors [ITEM 1]

1. Fabricate exterior doors with 2 outer stretcher-leveled, cold-rolled steel sheets of 16 gage unless indicated otherwise on the Drawings. Construct doors with smooth, flush surfaces without visible joints or seams on exposed faces and stile edges. Vertical edges shall be continuously MIG or ARC welded and ground smooth. Fabricate door as required to receive specified weatherstripping. Insulate interior of door.
2. Provide top and bottom channels and closures.

2.05 FRAMES

A. General

1. Provide steel frames for doors of size and profile as indicated on Drawings.
2. Construction: Full-welded unit construction, with corners mitered and continuously welded full depth

and width of frame, unless otherwise indicated. Knock-down type frames will not be accepted.

a. Fixed Stops: Integral 5/8" stop unless otherwise indicated. Construct jambs and heads from one piece of metal each; rabbeted and flanged as required for the various types of openings, and neatly mitered or interlocked and welded together. Provide channel, angle and bent plate reinforcing as indicated on approved Shop Drawings or otherwise required. Provide reinforcing in the heads of frames where required.

3. Frame Material

a. Interior Frames: 14 gage Cold-rolled steel sheet unless indicated otherwise on Drawings.

4. Provide frames for masonry openings with adjustable Underwriter's type masonry anchors, or other approved type to suit conditions of installation, using not less than four (4) at each jamb.

5. At butts, cut back jamb the thickness of one leaf of butt.

6. Drill and tap reinforcement to template.

7. Provide reinforcement for hardware as indicated on the approved Shop Drawings and as required for proper hardware installation.

2.06 SHOP PAINTING

A. Chemically wash, rinse, and dry exposed and concealed surfaces of fabricated units.

B. Apply one coat of rust-inhibiting primer to exposed surfaces and oven-bake units.

C. Units shall pass the following tests:

1. Salt Spray Test complying with ASTM B 117 for 120 continuous hours.

2. Water fog Test Complying with ASTM D 1735 for 240 continuous hours

PART 3 - EXECUTION

3.01 EXAMINATION

A. Verification of Conditions

Examine substrate and conditions, under which the frames are to be installed, for defects which will adversely affect the execution and quality of the Work. Do not proceed until unsatisfactory conditions are corrected.

3.02 INSTALLATION

A. Install steel doors, frames, and accessories in accordance with the Drawing Details, approved Shop Drawings, and the manufacturers's printed instructions, except as otherwise indicated.

B. Frame Installations

Place frames accurately in position; plumb, align, and leaving surfaces smooth and undamaged.

1. At in-place concrete and in-place masonry construction, place frames and secure in place with anchorage devices. Set anchorage devices opposite each anchor location, in accordance with details on approved Shop Drawings and anchorage device manufacturer's instructions. Leave drilled holes rough, not reamed, and free from dust and debris.

a. Anchor frames as detailed on the Drawings.

2. Place fire rated frames in accordance with NFPA Standard No. 80.

C. Door Installation

1. Install doors accurately in their respective frames within the clearance specified in Part 2.

2. Place fire rated doors with clearances as specified in NFPA standard No. 80.

D. Drill and tap doors and frames to receive surface applied hardware.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

3.03 ADJUSTING

A. Prime Coat Touch-up

Immediately after installation, sand smooth and clean rusted and damaged areas of shop prime coat and apply touch-up of compatible air-drying primer.

B. Final Adjustments

Check and adjust operating finish hardware items prior to final inspection. Leave work in complete and proper operating condition.

3.04 CLEANING

- A. Clean doors, frames, and accessories, leaving free of dirt and other foreign material after completion of installation.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 08305
ACCESS DOORS

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide all access doors and frames located in non-masonry walls, ceilings and soffits, complete with accessories, as indicated on the Drawings or required by the ventilation system and as specified herein.

1.02 RELATED SECTIONS

- A. Hardware Section 08710
- B. Gypsum Board Section 09250
- C. Gypsum Board - Int. Ceilings & Soffits . Section 09253

1.04 SUBMITTALS

- A. Product Data
Catalog sheets, specifications, and installation instructions.
- B. Shop Drawings
Schedule of locations, details of construction and installation.

1.05 QUALITY ASSURANCE

- A. All access doors shall be of a design to provide concealed frames and hinges and shall be of a color to match adjacent wall/ceiling finishes.

1.06 DELIVERY, STORAGE, AND HANDLING

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- A. Deliver, store, and handle access doors and frames as recommended by the Manufacturer, to protect from damage.

PART 2 - PRODUCTS

2.01 ACCEPTABLE MANUFACTURERS

- A. Karp Associates, Inc., Maspeth, NY 11378
- B. Milcor, Inc., Lima, OH 45804

2.02 NON-FIRE RATED ACCESS DOORS

- A. Frames

Minimum 16 gage steel.

- 1. Gypsum Board Application: Integral exposed spackle bead flange not less than 3/4" wide around the perimeter.

- B. Flush Type Door Panel

Minimum 14 gage steel.

- 1. Hinges: Concealed spring type set to open to approximately 175°; sufficient number to support the door size, or continuous type hinge.
- 2. Finish: Factory-applied rust inhibitive baked enamel primer over phosphate treated steel.

- C. Cam Locks (for doors located in ceilings)

Flush, screwdriver operated; sufficient number to hold door panel in flush, smooth plane when closed.

- D. Cam Locks (for doors located in walls)

Flush, screwdriver and key operated; sufficient number to hold door panel in flush, smooth plane when closed.

- 1. One lock on each door panel shall be key operated, pin tumbler type. The remaining locks, if any, shall be screwdriver operated type.

2.03 KEYING FOR NON-FIRE RATED ACCESS DOORS FOR WALLS

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- A. Key all locks and latches alike. Furnish 6 keys total to Director of Buildings and Grounds.

2.06 FABRICATION AND MANUFACTURE

- A. Manufacture access door assemblies as integral units complete with all parts and ready for installation. Fabricate units of continuous welded steel construction unless otherwise indicated or specified. Grind welds smooth and flush with adjacent surfaces. Attachment devices shall be of size and type required to secure access doors to types of supports indicated on the Drawings.
 - 1. Allowable Size Variations: Manufacturer's standard size units which vary slightly from the sizes indicated may be acceptable, subject to the approval of the MMMHS Representative.

PART 3 - EXECUTION

3.01 INSTALLATION

- A. Install the access doors in accordance with the manufacturer's printed installation instructions, except as shown or specified otherwise.
- B. Coordinate access door installation with installation of supporting construction.
- C. Set units accurately in position and securely attach to support with face panel plumb or level in relation to adjoining finish surface.

3.02 ADJUSTMENT

- A. Adjust hardware and doors for proper operation.

END OF SECTION

SECTION 08341
ACOUSTIC METAL DOORS AND FRAMES

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide acoustic metal doors and frames as indicated on Drawings and specified herein.

1.02 RELATED SECTIONS

- A. Unit Masonry Section 04200
- B. Steel Doors and Frames..... Section 08100
- C. Finish HardwareSection 08710
- D. Glass and GlazingSection 08800
- E. Plaster Section 09210
- F. PaintingSection 09900
- G. Security SystemSection 16770

1.03 REFERENCES

- A. Underwriters' Laboratories, Inc. (UL)
- B. American Society for Testing and Materials (ASTM)
- C. National Fire Protection Association (NFPA)
- D. Steel Door Institute (SDI)
- E. Hollow Metal Manufacturers Association (HMMA)

1.04 SUBMITTALS

- A. Before delivery of the door, Contractor shall submit for approval of the architect and acoustical consultant, the following:
 - 1. Shop drawings of the door, frame, hardware and seals showing major operating dimensions and cross sections of doors and seals.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Include schedules, listing the qualities of each kind and type of buck, trim and door, size of doors and frames, clearances, undercuts, location and label requirements.
 - a. If sound seals are a propriety item purchased from a weatherstripping company, the sound seal manufacturer and model number shall be identified.
3. Submit manufacturer's product literature for propriety, sound seals and propriety sound insulation and/or sound deadening material.
4. Samples:
 - a. Sound seals-section of all perimeter sound seals used for the specified doors.
 - b. Acoustical Doors-section of typical door, of sufficient size to show edge, top and bottom construction, insulation and/or sound deadening material, hinge reinforcement, face stiffening.
5. Certified test reports for the 1 3/4" thick Acoustical Door and Frame shall indicate that the acoustical performance of the operating door and frame meets the Sound Transmission Class (STC) performance called out in the schedule. Test data shall be produced from an accredited independent acoustical laboratory. Reports should indicate that the test was performed on the doors and frames of the type to be supplied in conformance of the requirements of test method ASTM E90. Test data shall indicate type of hardware and sound seals used on the door. Manufacturer shall indicate whether additional treatment of the door frame, by the insertion of grout or high density glass/mineral fiber in the cavity between frame and wall, shall be necessary to meet acoustical requirements of this specification, if not indicated in the report Test reports more than ten years old are unacceptable.
6. Manufacturer's certification that assembly meets the required STC rating with the finish hardware indicated in the door schedule hardware set.

7. Written guarantee that door is constructed in accordance with the laboratory tested door and free of defects in material and workmanship for a period of one year after installation.
8. Certification of fire rated assemblies: Apply fire rating tables to doors, frames and transom panels as evidence of ratings. Labels to be by Underwriters Laboratories or other nationally recognized agency having a factory inspection service.

1.05 QUALITY ASSURANCE

A. Fire Rated Assemblies

Wherever fire resistance classification is shown or scheduled for steel doors and frames, provide fire rated units that have been tested as fire door assemblies and comply with National Fire Protection Association (NFPA) Standard No. 80 and these Specifications. Identify each door and frame with metal MEA labels indicating the applicable fire class of the unit. Rivet or weld labels on the hinge edge of door and jamb rabbet of frame.

1. Oversize Assemblies: Whenever fire rated assemblies are larger than size limitations established by NFPA, provide manufacturer's certification that they have been constructed with materials and methods equivalent to requirements for labeled construction.
2. See Door Schedule in the Drawings for fire resistance requirements for respective openings.

1.06 DELIVERY, STORAGE, AND HANDLING

- A. Deliver acoustical metal door and frame assembly with furnished hardware cartoned or crated to provide protection during transit and job storage. Finish hardware may be shipped loose to protect it from damage.
- B. Inspect Acoustical Metal Doors and Frames upon delivery for damage. Minor damages may be repaired provided refinished items are equal in all respects to new work and acceptable to Architect, otherwise, remove and replace damaged items as directed.
- C. Store doors and frames at the building site under cover. Place units on minimum 4" high wood blocking. Avoid use

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

of non-vented plastic or canvas shelters which could create a humidity chamber. If cardboard wrapped on doors becomes wet, remove carton immediately. Provide space between stacked doors to provide air circulation. Blocking between stacked doors shall be positioned so as not to damage door and shall be large enough so stacked doors do not come into contact with each other.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

- A. Manufacturer: Subject to compliance with requirements, provide acoustical doors and frames by one of the following or an approved equal:
1. Industrial Acoustics Company, Inc., Bronx, NY
 2. Krieger Steel Products Company, Pico Rivera, CA
 3. Overly Manufacturing Company, Greenburg, PA
 4. Pioneer Industries, Division of Core Industries Inc. Carlstadt, NJ
 5. Jamison Door Company, Hagerstown, MD
 6. Ambico Limited, Ottawa, Ontario

2.02 GLAZING

- A. See door schedule and specification section 08800 Glass and Glazing for glass types and descriptions. Glass is provided under this section.

2.03 TYPICAL DOOR CONSTRUCTION

- A. Doors shall be made of commercial quality, level, cold rolled steel conforming to ASTM A336-68 and free of scale, pitting or other surface defects.
- B. All doors shall be 1 3/4" thick custom made, of the types and sizes shown on the approved shop drawings, and shall be fully welded seamless construction with no visible seams or joints on their faces or vertical surfaces.
- C. Doors noted to be galvanized, shall be hot dipped galvanized.
- D. All doors shall be strong, rigid and neat in appearance, free from warpage or buckle. Corner beads shall be true and straight and of minimum radius for the gauge of metal used.
- E. Face sheets shall be stiffened by continuous vertical formed steel sections spanning the full thickness of the interior space between door faces. These stiffeners shall be not less than 22 gauge spaced not more than 6" apart

and accurately attached to face sheets by spot welds not more than 5" o.c. Spaces between stiffeners shall be filled with sound deadening thermal insulation the full height of the door with an inorganic non-combustible batt type material. Honeycomb, polystyrene or other rigid type insulation is not acceptable.

- F. Door faces shall be joined at their vertical edges by a continuous weld extending the full height of the door. All such welds shall be ground, filled and dressed smooth to make them invisible and provide a smooth flush surface.
- G. Top and bottom edges of all doors shall be closed with a continuous recessed steel channel not less than 16ga. Extending the full width of the door and spot welded to both faces.
- H. Edge profiles shall be provided on both vertical edges of doors-beveled 1/8" in 2".
- I. Hardware reinforcements:
 - 1. Doors shall be mortised, reinforced, drilled and tapped at the factory for fully templated mortised hardware only, in accordance with approved hardware schedule and templates provided by the hardware supplier. Where surface mounted hardware is to be applied, frames shall have reinforced plates.
 - 2. Minimum thickness of hardware reinforcing plates shall be as follows:
 - a. Hinge and pivot reinforcements-7ga.

2.04 VISION PANELS

- A. Vision panels shall be made of the same materials and constructed and finished in the same way as specified for hollow metal doors (except 3/4" thick) including acoustically and/or fire rated doors where rating is required. Panel shall be constructed as part of door assembly to meet fire ratings and/or acoustical ratings as required and match profile as shown on drawings.
- B. If any door, frame, or panel specified by the Architect to be acoustically rated cannot qualify for appropriate labeling because of its design, size, hardware or any other reason, the Architect shall be so advised before fabricating work on that item is started.

2.05 TYPICAL FRAME CONSTRUCTION

- A. Frames shall commercial grade cold rolled steel conforming to ASTM A336. Metal thickness shall be not less than 16 ga. For frames in openings 4'-0" or less in width; not less than 14 ga. For frames in openings over 4'-0".
- B. Frames shall be custom made welded units to sizes and shapes indicated on the drawings and shall have full welded unit-type construction at corners and other joints. Knock-down frames are not acceptable.
- C. All finished work shall be strong and rigid, neat in appearance, square, true and free of defects, warp or buckle. Molded members shall be clean cut, straight and of uniform profile throughout their lengths. Steel frame members shall be pre-straightened, free of wind or twist, frame shall be factory-aligned to a diagonal tolerance of 1/16".
- D. Jamb depths, trim, profile and backbends shall be shown on drawings.
- E. Corner joints shall have all contact edges closed tight, with trim faces mitered and continuously welded. The use of gussets will not be permitted. Welds on corners and exposed surfaces shall be pressed flush and smooth.
- F. Depth of stops shall be 1/2" minimum and 1 1/8" maximum. Width shall be as shown on drawings.
- G. Hardware Reinforcements:
 - 1. Frames shall be mortised, reinforced, drilled and tapped at the factory for fully templated mortise hardware only. In accordance with approved hardware schedule and templates provided by the hardware supplier. Where surface mounted hardware is to be applied, frames shall have reinforcing plates.
 - 2. Minimum thickness of hardware reinforcing plates shall be as follows:
 - a. Hinge and pivot reinforcements-7 ga., 1 1/4"x10" min. size.
 - b. Strike reinforcements-12 ga.
 - c. Flush bolt reinforcements-12 ga.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- d. Reinforcements for surface mounted hardware-12 ga.
- H. Floor Anchors:
 - 1. Floor anchors shall be securely welded inside each jamb.
 - 2. Minimum thickness of floor anchors shall be 14 ga.
 - 3. Shim to align top of frame to contractor's established datum for each level.
- I. Jamb Anchors:
 - 1. Frames for installation in masonry walls shall be provided with (4) adjustable jamb anchors of the T-strap or stirrup-and strap type. Anchors shall be not less than 16 ga. Or .156" dia. Steel wire. Stirrup straps shall not be less than 2"x10" in size, corrugated and/or perforated.
 - 2. Frames for installation in stud partitions shall be provided with (4) steel anchors of suitable design, not less than 18 ga. Thickness, securely welded inside each jamb.
 - 3. Frames to be anchored to previously placed concrete or masonry shall be provided with min. 3/8" concealed bolts set into expansion shields or inserts at 6" from top and bottom and 24" o.c. Reinforce frames at anchor locations with 16 ga. Sheet steel stiffeners welded to frame at each anchor.
- J. Frames for installation in masonry wall openings more than 4'-0" in width shall have an angle or channel welded into the head. Such stiffeners shall not be less than 12 ga. Steel and not longer than the opening width, and shall not be used as lintels or load bearing members.
- K. Dust cover boxes (or mortar guards) not thinner than 26 ga. Steel shall be provided at all hardware mortises on frames to be set in masonry or plaster partitions.
- L. All frames shall be provided with steel spreader temporarily attached the feet of both jambs to serve as a brace during shipping and handling.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- M. Provide wireway to receive security devices including but not limited to magnetic contacts. See electrical drawings for quantities and locations of security devices.
- N. Frames shall be site filled with mortar (all three sides) then after the mortar has set, shall be grouted into place in the wall.

2.06 1 3/4" ACOUSTICAL DOORS

- A. Doors shall be 1-3/4" thick flush design of cold rolled steel construction, 16 gauge min. thickness. The core shall be acoustically non-coupling and shall be non-combustible. Vision panels shall comprise two panes of glass with frames and seals that maintain the specified acoustical performance.
- B. Hinges shall of flush design, surface strap hinges are not acceptable.
- C. Where a vision panel is required, that panel shall provide acoustical performance at least as good as the door STC rating.
- D. Prepare acoustical doors to receive security devices and security related hardware. Preparation shall include, but not be limited to, provision of wireway thru door for indicated electronic mortise locksets and preparation for magnetic contacts. See Security System Drawings for quantities and locations of security devices.

2.09 FINISH HARDWARE

- A. Prepare doors and frames to receive mortised and a concealed finish hardware in accordance with hardware manufacturer's recommendations and templates and in compliance with applicable requirements of ANSI A115 series specifications for door and frame preparation for hardware.
- B. Hardware specified herein shall be selected and installed based on the acoustical door manufacturer's recommendations and on the hardware used on the door in the laboratory acoustical test. Reinforce doors and frames to receive both concealed and surface applied hardware. Drilling, tapping and application of surface applied finish hardware shall be done at the factory.
- C. Hardware supplied per section 08700:

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Prepare doors and frames to receive hardware in accordance with the finish hardware schedule and templates provided by the hardware supplier, except where such hardware would degrade the acoustical and operating performance of the door. Acoustical door manufacturer shall advise the contractor of any specified hardware being in conflict on the door in the acoustical laboratory test.
 2. Hardware supplier shall furnish door manufacturer approved hardware schedule, hardware templates and samples of physical hardware where necessary to insure correct fitting and installation.
 3. Preparation includes sinkages and cut-outs for mortise and concealed hardware.
 4. Provide reinforcements for both concealed and surface applied hardware. Drill and tap mortise reinforcements at factory using templates. Install reinforcements with concealed connections designed to develop full strength of reinforcements.
- E. Prior to shipment, doors and frames shall be hung, operated and adjusted at the factory to insure proper operating and acoustical integrity.
- F. Locate finish hardware as indicated on final shop drawings or if not indicated, in accordance with "Recommended Locations for Builder's Hardware" published by Door and Hardware Institute.

2.10 FINISH

- A. Doors, frames and applicable hardware shall be factory prime finished with a rust inhibiting primer.
- B. Clean, treat and paint exposed surfaces of steel door and frame units and applicable hardware, including galvanized surfaces.
- C. Clean steel surfaces of mill scale, rust, oil, grease, dirt and other foreign materials before application of paint.
- D. Apply shop coat of prime paint of even consistence to provide a uniformly finished surface ready to receive finish paint.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- E. Field finish painting is included in section 09900 of the specifications.

2.11 REJECTION

- A. Doors and frames which are defective, have hardware cut outs of improper size or location, or which prevent proper insulation of doors, hardware or work of other trades, shall be removed and replaced with new product at no cost to the Owner.

PART 3 - EXECUTION

3.01 INSTALLATION

A. General

1. Acoustical metal doors and frames shall be installed by Architectural Improvements Contractor under the supervision of the manufacturer's factory trained representatives or personnel.
2. Install all acoustical doors and accessories in accordance with the final shop drawings, manufacturer's recommendations and as herein specified.

B. Placing Frames

1. Comply with provisions with SDI-105 "Recommended Erection Instructions for Steel Frames", unless otherwise indicated.
2. See section 2.05.14 regarding mortar filling and mortar placing of frames.
3. Except for frames located at in-place concrete or masonry and at drywall installations, place frames prior to construction of enclosing walls and ceilings. Set frames accurately in position, plumbed, aligned and braced securely until permanent anchors are set only after wall construction is completed, remove temporary braces and spreaders leaving surfaces smooth and undamaged.
4. In masonry construction, locate three (3) wall anchors per jamb at hinge and strike levels.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

5. At in place concrete or masonry construction, set frames and secure to adjacent construction with machine screws and masonry anchorage devices.
6. Building in of anchors and grouting of frames is included in section 04200 of the specifications.
7. In metal stud partitions, install at least three (3) wall anchors per jamb at hinge and strike levels. In open steel stud partitions, place studs in wall anchor notches and wire tie. In closed steel stud partitions, attach wall anchors to studs with tapping screws.
8. Install fire rated frames in accordance with NFPA Std. No. 80.

C. Door Installation

1. Fit acoustical metal doors accurately in frames, within clearances specified in SDI-100 and as herein specified.
2. Adjust all automatic and adjustable perimeter and drop seals to insure a tight fit per manufacturer's recommendations.
3. Place fire rated assemblies with clearances as specified in NFPA Std. No. 80.

D. Glass Installation

1. Glass as required to meet overall acoustical performance of door and frame, shall be installed into openings.
2. Use manufacturer's approved seals and gaskets to insure maintenance of acoustical performance of window.

3.02 ADJUST AND CLEAN

- A. Prime Coat Touch-up: Immediately after erection, sand smooth any rusted or damaged areas of prime coat and apply touch-up of compatible air-drying primer.
- B. Final Adjustments: Check and readjust operating finish hardware items and acoustical seals, leaving steel doors and frames undamaged and in complete and proper operating condition. Check for any air, light (and sound) gaps at door jambs, head and sill and adjust seals as necessary.
- C. Field Testing Verification for Acoustic Assemblies: The project acoustical consultant will conduct an acoustical survey at the designated door locations where noise transmission is suspected of being below the set criteria. The survey shall consist of a Field Sound Transmission Class (FSTC) test per ASTM E336. If such results indicate non-conformance with the established FSTC requirements, it shall be the responsibility of the manufacturer to correct, at his own expense, such deficiencies by methods that shall be approved by the Architect and Acoustical Consultant prior to incorporation. Acoustical tests shall be repeated and corrective measures devised and incorporated until the set criteria and performance standards are met.

END OF SECTION

SECTION 08524
ALUMINUM PROJECTED AND CASEMENT WINDOWS

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide extruded aluminum projected and casement (project-in) windows, complete with between glass blinds and required accessories, as shown on Drawings and as specified herein.

1.02 RELATED SECTIONS

- A. Selective Removals & Demolition Section 02070
- B. Removal, Storage and Reinstallation Section 02072

1.04 DESIGN AND PERFORMANCE REQUIREMENTS

- A. Design Criteria: Replacement window information and details, shown on the Contract Drawings and specified herein, indicate the configuration and minimum requirements for acoustic windows to be used on the project. Windows fully complying with all requirements are acceptable upon review and approval of the Architect and at his sole discretion, in accordance with the Specifications, subject to full compliance with all Contract Document requirements and conditions as set forth in paragraph 2.01 B. of this Section. The successful bidder shall not be entitled, during the construction phase, to any additional remuneration due to the bidder's use of windows which will require altering construction details and methods shown on the Contract Drawings.
- B. Thermal-Break Construction: Fabricate aluminum window units with an integrally concealed low conductance thermal barrier, located between exterior materials and window members exposed on interior, in a manner which eliminates direct metal to metal contact. Provide thermal-break in accordance with 2.02 B of this section and which has been in use on manufacturer's window units for a period of not less than ten (10) years and has been tested to demonstrate resistance to thermal conductance and condensation, and has been tested to show adequate strength and security of glass retention.
- C. Window Size: All existing masonry window openings shall

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

be field measured at the project site. Replacement windows shall be custom fabricated for each individual masonry window opening size so that window frames, mullions and trim site lines shall be identical at all windows. Averaging of replacement windows shall not be allowed. Window frame, mullion and trim site lines (width, depth and profiles) shall be in strict accordance with 2.02 of this Section and the Contract Drawings.

1.05 SUBMITTALS

The Contractor shall submit all of the following information for proposed window and window manufacturers for prequalification. The successful bidder shall not be entitled, during the construction phase, to any additional remuneration due the bidders use of windows which will require altering construction details and methods shown on contract drawings.

A. Product Data

Submit manufacturer's specifications, technical product data, recommendations and standard details for aluminum window units and blinds as necessary to show compliance with requirements including but not limited to the following information:

1. Materials
2. Fabrication methods
3. Finishing
4. Hardware
5. Accessories

B. Test Data

Submit certified test Laboratory reports to show compliance with requirements of 1.07 H and 1.07 I herein. Certified Test Laboratory Report must have been performed within (3) three years of the date of this bid.

C. Submit required standards, material tolerances, performance and test reports as specified herein in part 1.07 A thru 1.07 G.

D. Typical Detail Drawings

Submit Drawings for typical details specific to this

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

project, including typical plans and exterior elevations showing a typical window opening, typical unit elevations at 3/4" scale, full size detail sections of typical units showing every composite member including adjacent materials of general construction. Show sealant, anchors, hardware, operators and all other components and accessories. Indicate all glazing details and standards.

1. Indicate daylight glazed opening dimensions on Drawings for typical windows.

E. Samples

1. Submit one (1) operable reduced size sample window unit with mini blind of proposed window for the Architect's approval and pick up sample after a determination by the Architect has been made. Corner samples are not acceptable for review.

F. Shop Drawings

Submit Complete Shop Drawings, including location plans and exterior elevations showing all window openings, typical and atypical unit elevations at 3/4" scale, full size detail sections of typical and atypical units showing every composite member including adjacent materials of general construction and window schedule. Show sealant, anchors, hardware, operators and all other components and accessories. Indicate all glazing details and standards.

1. Indicate daylight glazed opening dimensions on Shop Drawings for all types of windows.
2. Tolerance: Daylight glazed openings as actually fabricated shall not vary more than 1/16" plus or minus from dimensions indicated on Shop Drawings.

G. Samples

1. Submit one (1) full size sample of window with mini blinds of selected colors/finishes for approval prior to fabrication of the remaining units. Do not proceed with Work until approval of sample has been approved.
2. Approved window sample may be used on job for actual installation.

H. Finish

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Durannar XL - Coat System by PPG Industries for window frames, sashes and components. Color shall be PPG DURANAR XL EXOTIC UC52179 XL BRONZE.
2. Color of painted coat system for the mini blinds shall be Antique White 274.
3. Submit three (3) samples of each color for Architect's approval before proceeding with production; provide actual production sections large enough so that good comparisons can be made to establish allowable color range.
4. Manufacturer shall use these approved color samples for comparison purposes during production finishing.

E. Warranty

1. As specified in Art. 1.09.

1.06 QUALITY ASSURANCE

A. Standards

Except as otherwise indicated, requirements for aluminum windows, terminology and standards of performance, and fabrication workmanship shall be as specified in ANSI/AAMA 101-93 and applicable general recommendations published by AAMA and AA.

- B. Single Source Responsibility: Provide windows, hardware, blinds and accessories from a single manufacturer capable of showing prior production of units similar to those required.
- C. The aluminum windows shall be of the operable type with thermal break. The unit types and approximate sizes shall be as shown on the Drawings. Window shapes, accessories and frame/mullion sizes and profiles as specified and detailed shall establish the type of unit and materials to be used in order to provide the desired functional and aesthetic requirements of this project.
- D. The window manufacturer for this project must have been regularly engaged in the domestic manufacturing of commercial and architectural aluminum projected and casement windows and between glass blinds for at least ten (10) years and who is acceptable to the DDC Representative.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- E. Erector Qualifications: Not less than seven (7) years successful experience in the installation of commercial and architectural aluminum projected and casement windows and between glass blinds and who is acceptable to the Architect.
- F. Window installer submitted for DDC Representative's approval shall furnish names, addresses and phone numbers of at least eight (8) comparable aluminum window installations which have been in successful operation for a period of at least six (6) years. Installer to submit project foeman's qualifications to the satisfaction of the DDC Representative.
- G. Material Tolerances:
1. Solid Extrusions: Minimum nominal metal thickness of 0.125 inches, +/- 0.007 inches. Minimum nominal metal thickness of 0.050 inches, +/- 0.003 inches.
 2. Hollow Extrusions: Minimum nominal metal thickness of 0.125 inches, +/- 0.009 inches.
 3. Window Size Tolerances: Dimensions within +/- 1/16 inch.
- H. Performance and Testing

Except as otherwise indicated, comply with air infiltration tests, water resistance tests and applicable load tests specified in ANSI/AAMA 101-93 for type and classification of window units required in each case.

1. Testing: Where manufacturer's standard window units comply with requirements and have been tested in accordance with specified tests, provide certification by manufacturer showing compliance with such tests, otherwise, perform required tests through recognized testing laboratory or agency, approved by the DDC Representative and provide certified test results.
2. Testing for this Project will allow that air, water and structural load testing be on the same report. The design pressure test and water level test are not related to one another as is generally the practice with AAMA certified 101-93. Each test is independent to measure the true highest level of each criteria.
3. Sample submitted for tests shall be of

manufacturer's standard construction with ventilator minimum size in compliance with AAMA requirements. Sequence of test is optional between manufacturer and testing laboratory except that in all cases, air infiltration test shall be performed before water resistance test.

4. To evaluate testing and measure product performance, testing shall be conducted on manufacturer's standard product glazed with type of glazing specified herein.
5. Specific Performance Requirements: Windows shall conform to specified ANSI/AAMA standards and the following, whichever more stringent:
 - a. Air Infiltration Test: With operable units in closed and locked position, window shall be subjected to air infiltration test in accordance with ASTM E 283. Air infiltration shall not exceed 0.10 cubic feet per minute per foot of crack length, when tested at a pressure of 6.24 psf.
 - b. Water Resistance Test: Glazed unit shall be mounted in its vertical position continuously supported around perimeter with operable units in fully closed and locked position. Window unit shall be subjected to water resistance test in accordance with ASTM E 331 and E 547. When static pressure of 10.0 pounds per square foot has been stabilized, five gallons of water per square foot of window area shall be applied to exterior face of unit for 15 minutes. No water shall pass interior face of window frame and there shall be no leakage as defined in test method.
 - c. Uniform Load Deflection Test: With window operable units closed and locked, test unit in accordance with ASTM E 330 with static air pressure difference of 95 psf positive pressure and 95 psf negative pressure. There shall be no deflection of any unsupported span in excess of $L/175$.
 - d. Uniform Load Structural Test: Unit shall be tested at 1.5 x design wind pressure, both positive and negative, acting normal to plane of wall in accord with ASTM E330.

Soundproofing of
Monsignor McClancy Memorial High School

- e. Condensation Resistance Factor: Window shall be tested in accordance with AAMA 1502.7 standards and tests of thermal performance and shall have condensation resistance factor of not less than 62. Data from calculations, test results on units of different sized operable unit arrangements are not acceptable.
- f. Thermal Test: Window shall be tested in accordance with ASTM C 236. Combined area of window, including glass and aluminum, shall have a thermal transmittance of no more than 0.58 BTU/hr/ft²/F° @ 15 mph wind. Data from calculations, test results on units of different sized operable unit arrangements are not acceptable.
- g. Vertical Deflection Test: Deflection at unrestricted corner shall not exceed 0.062 inches when tested per AAMA structural standards.
- h. Operable Unit Torsion Test: Deflection at unrestrained corner shall not exceed 0.1875A inches (where A is the area in square feet of operable unit tested) when tested per AAMA structural standards.
- I. Thermal Barrier Tests: Test three 12 inch long typical urethane filled aluminum window sections with standard painted finish for each type test and average results. Three sections averaged shall not vary in excess of 33% of highest figure. Test in accord with test procedure 83-20519 as established by the Pittsburgh Testing Laboratory/Chicago office. Minimum results at 180 degrees shall be as follows:
 - 1. Shear Test: No loss of bond or failure of urethane material at 3500 lbs.
 - 2. Tension Test: No loss of bond or failure of urethane material at 5000 lbs.
 - 3. Torsion Test: No loss of bond or failure of urethane material at 3500 lbs.

At conclusion of all the above tests, there shall be no glass breakage, permanent damage of fasteners, hardware parts, support arms,

actuating mechanisms, or any other damage causing window to be inoperable. There shall be no permanent deformation of any main frame or operable unit member in excess of 0.2 percent of its span.

I. Acoustical Testing

1. Windows shall conform to or exceed performance criteria of ANSI Standard DH-A3-HP.
2. Sound Transmission Loss Test
 - a. Windows shall be carefully installed so that the field performance approaches the acoustical laboratory rating.
 - b. Prior to shop drawing approval, a complete window assembly (including frame, operable units and glazing) for each window type and configuration shall be submitted to an independent Acoustical Laboratory acceptable to the DDC Representative for testing of actual configuration. When tested in accordance with ASTM E90, the test assemblies shall show sound transmission loss data such that either:
 - 1) The summation of the one-third octave band Sound Transmission Loss values for the 400, 500, 630, 800, 1000, 1250, 1600, 2000, and 2500 Hz one-third octave bands shall equal or exceed 396, or
 - 2) The summation of the octave band Sound Transmission Loss values for the 500, 1000, and 2000 Hz octave bands shall equal or exceed 132.
 - c. Test data from a laboratory test performed in accordance with ASTM E90 by a recognized independent Acoustical Laboratory and obtained within (3) three years of the bid date for the identical window system.

J. Field Testing

1. If the SMS Representative requires, conduct on-site tests for noise reduction, air and water infiltration with the window manufacturer's representative present. The SMS Representative

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

will select units to be tested. Tests not meeting specified requirements and units having similar deficiencies shall be corrected at no cost to SMS. Testing shall be performed by an accredited testing agency selected by the SMS Representative and paid for by the Contractor.

2. Air Infiltration Tests: Conduct tests in accordance with the requirements of ASTM E783. Allowable infiltration shall not exceed 1.5 times the amount indicated.
3. Water Resistance Tests: Conduct tests in accordance with the requirements of AAMA 501.3. No water leakage is permitted.
4. Notification by the SMS Representative to the Contractor that the Work does not meet with specified requirements shall be deemed sufficient notice to the Contractor that he is proceeding with any further installation at his own risk until he has corrected all problems which may have caused the substandard performance.
5. The SMS Representative may test any completed room for compliance with acoustical requirements. The General contractor shall cooperate fully with acoustic engineer and provide lift equipment or other staging as may be required for the tests.

1.07 PRODUCT DELIVERY, STORAGE AND HANDLING

- A. Store and handle windows, mullions, hardware and appurtenant items in strict compliance with manufacturer's instructions.
- B. Store units in locked, weatherproof enclosure such as cargo shipping container or construction shanty and protect units during and after installation.

1.09 SPECIAL PROJECT WARRANTY:

- A. Manufacturer's and Contractor Warranties

Submit written warranties from window manufacturer and Contractor for the following in a form acceptable to the Authority:

1. Provide a written warranty, in a form acceptable to the SMS Representative, for repair or replacement

of aluminum window units which fail in materials or workmanship within the specified warranty period. Failures include, but are not necessarily limited to, structural failures including excessive deflection, excessive leakage or air infiltration, faulty operation of operable units and hardware, faulty operation of interior glass frame access panels, faulty operation of between glass blind units, faulty operation of casement operators, and deterioration of metals, glazing, weatherstripping, sealants, paint finishes and other materials beyond normal weathering. This warranty shall be extended to include all glazing. This warranty shall be in addition to and not a limitation of other rights the Owner may have against the Contractor under the Contract Documents.

2. Warranty period for aluminum windows is ten (10) years after the date of substantial completion.
3. Maintenance Bond: Provide a Manufacturer's maintenance bond for a period of not less than five (5) years for an amount of not less than 10% of the delivered price.

PART 2 - PRODUCTS

2.01 MANUFACTURER

- A. Manufacturers: Subject to compliance with Contract Document requirements. Provide all windows, hardware, blinds and accessories from a single manufacturer.
- B. Please note that the following manufacturers do not manufacture equal products with equal accessories. The inclusion of these manufacturers indicates that the manufacturers product listed and configured as noted in 2.02 below have shown evidence and test data that they are capable of manufacturing a window product that conforms to all of the performance criteria required by these specifications including acoustical requirements necessary to successfully achieve the soundproofing goals of the project:
 1. Wausau Metals Corporation - P.O. Box 1746 Wausau Wisconsin 54402-1746 Tele: 715-846-3339
 2. Graham Architectural Products - 1551 Mt. Rose Avenue, York Pennsylvania 17403-2909 Tele: 717-849-8100

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- C. Should the Contractor intend to request approval of an aluminum window manufacturer other than that listed above, certified test reports and manufacturer's specifications, technical product data, and standard details for the specific substitute window (submitted information shall include all data required by this Section - Part 1.05 "Submittals" paragraphs A. through E.) indicating full compliance with all requirements of the Contract Documents shall be submitted by the Contractor to the Architect of Record a minimum of fifteen (15) full days, not including weekends or holidays, prior to the bid date. Any request for window substitution made after this time will be denied. Submission of said test data and other materials at this time shall not relieve the Contractor of meeting all the requirements of the Contract Documents, including formal submittal requirements of this Section or obtaining the SMS Representative's approval.
- D. The contractor shall provide the manufacturer's name and product upon which the bid is based in the bid package and certify that he will comply with all requirements of this section for the selected product. This form shall also bear the Manufacturer's Certification of compliance with the requirements of this section. Failure to include an approved manufacturer's window certification in the Bid Package shall result in rejection of the bid as non responsive to contract requirements. A copy of this form is included in this Section.

2.02 PRODUCTS

- A. Wausau 3250 Series Visuline Project-In and Casement Windows with integral between the glass blinds for locations and full hinged inner glazed lite. (See Schedule on Contract Drawings)
1. All units shall be 3 1/4" in depth, operable units with split glazing. Inner and outer Glazing Lites to be 1/4" fully tempered glass.
 2. All performance criteria conforming to the performance specification and indicated on the contract drawings and details which have been based upon this product.
 3. Provide Custom Extruded Trim as indicated on Contract Drawings. Cost of additional dies, if required, shall be included in contract price.
- B. Graham Architectural Products Corp. 6300 Series Project-In and Casement Windows with integral between the glass blinds and full hinged inner glazed lite. With custom features indicated herein. (See Schedule on Contract Drawings)
1. All units shall be 3 1/4" in depth, operable units with split glazing. Inner and outer Glazing Lites to be 1/4" fully tempered glass.
 2. All performance criteria conforming to this specification and indicated on the contract drawings. All accessories to be equal to specification as indicated and required herein.
 3. Provide Custom Extruded Trim as indicated on Contract Drawings. Cost of additional dies, if required, shall be included in contract price.
 4. Contractor shall note difference in window frame installation requirements to meet acoustic test requirements and shall make all adjustments to trim details and sill finishes necessary or required to trim interior face of frame in conformance with the intent of the contract details. All additional general construction costs associated with the frame dimension or construction including all additional labor and materials required shall be considered included in all bid prices listing this window. No additional cost for adjustment to

contract details required by the selection of this manufacturer's product shall be paid by the SMS.

5. Window features and accessories indicated in the specifications such as hinged inner glazing sash are standard equipment for Wausau Visuline series. This or similar maintenance feature is required by the SMS for all manufacturers products. Removable lites increase maintenance cost over that of hinged lites by a minimum factor of 10 and require heavy lifting of large pieces of 1/4" tempered glass located 6 feet or more above the floor by School maintenance staff. Based upon this, Graham shall provide an equally safe and reliable alternative for glazing maintenance to SMS for approval. This may include provision of custodial lifting handles keyed to the removable window sash, custom made tools, special lightweight portable ladders, mechanical lifts or a combination of all of the above. The cost of providing these items shall be deemed included in the Bid Price.
- C. Use of the above window manufacturer's windows does not relieve the contractor from providing all required submittals or meeting all minimum performance criteria required by this specification.
- D. Any product submitted for approval as equal to the above products in accordance with 2.01 D. above for pre bid approval shall include all custom accessories required or necessary to maintain equal or commensurate features to the standard set and included in all parts of this specification. The owner shall determine whether the proposed custom accessories including but not limited to those indicated in 2.02.B.4 and 2.02.B.5 above, if any are required, to compensate for any feature (except noise reduction standard) required by these specifications which cannot be provided by proposed substitution of manufacturer or products.

2.03 MATERIALS

- A. Aluminum Windows and Components
 1. Windows shall be blinded and non-blinded projected (project-in) and casement (project-in) windows.
 2. Window sections shall be 3 1/4 inches in overall depth.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

3. Siteline (width) of horizontal mullion and all frames shall not exceed dimensions indicated on the Drawings.
4. Siteline (width) at vertical mullion shall not exceed dimensions indicated on the Drawings.
5. Upper and lower operable unit areas of window shall be indistinguishable in siteline from each other when viewed from the exterior with the operable units in the closed position.
6. All extruded aluminum members shall be extruded from 6063 T5 prime billet.
7. Principle window members and custom extruded jamb and head trim shall have a minimum wall thickness of 0.125 inches.
8. Operable unit sashes shall be tubular in design.
9. Custom extruded mullion trim shall have a minimum wall thickness of 0.050 inches.
10. Custom extruded sills shall have a minimum wall thickness of 0.125 inches.

B. Thermal Barrier

1. Thermal barrier sections shall incorporate a thermal barrier cavity which provides a minimum separation between aluminum sections of 3/8 inch.
2. The two-part chemically curing polyurethane thermal barrier material shall be poured-in-place into pre-treated cavities. Thermal barrier material which is poured-in-place prior to painting will not be acceptable.
3. Thermal barrier material shall be provided by and poured-in-place at the window manufacturer's plant to assure proper quality control.

C. Hardware/Windows & Blinds

1. General
 - a. All steel components shall be 300 series stainless steel (except as noted herein).
 - b. All aluminum components shall be 6063 T5 (T6)

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

or 6105 T6.

- c. Hardware members bridging frame or vent thermal barrier to be nylon or suitable low-conductivity, non-metallic material.

2. Hinges

- a. Provide two stainless steel concealed four-bar friction hinges meeting AAMA 904.1 for all windows except as indicated below or noted on the Drawings. All hinges shall be capable of opening 70 degrees for operable unit of projected (project-in) windows and 90 degrees for operable unit of casement (project-in) windows. Provide semi-concealed surface mounted butt hinges painted the same color and finish as the window frame for all Multi-Purpose Room and Cafeteria casement (project-in) windows in the 1890s building and all Gymnasium casement (project-in) windows in the 1959 building. Provide 2 butt hinges on hinged side up to 3'-11" in height or width and one additional hinge for each additional increment over 3'-11" maximum.

3. Locks for Projected Units

- a. Stainless steel construction slim line cam handle project-in locks for all lower operable units, stainless steel construction concealed flush mount (tamper resistant) cam locks for custodial keys for all upper operable units, strikes and keepers for manual operation to secure operable units in closed position. Provide ten (10) custodial keys for operable unit's concealed cam locks.
- b. Provide a minimum of two locks for operable units exceeding 2'-11" in width.
- c. Locking hardware shall be provided with a stainless steel strike backed up with extruded aluminum leg minimum of 0.125 inch thick.
- d. All interior glazed access door frames shall be secured with concealed locking mechanism manually operated by custodial key. Provide ten (10) keys for glazed access panels.

4. Locks/Operators for Multi-purpose Room, Cafeteria,

and Gymnasium Casement Windows

- a. Provide single point multi-lock mechanism for lower casement (project-in) units.
- b. Window manufacturer to provide "Clearline" Chainflex Operators and accessories for each upper casement (project-in) unit; two per sash for the Cafeteria windows (1890s building) and three per sash for the Multi-Purpose Room windows (1890s building) and Gymnasium windows (1959 building).
- c. All exposed portions of the above locks, operators and cable conduit shall be painted the same color and finish as the window frames and sashes.

5. Limited Opening Mechanism

- a. All lower operable units of projected windows shall be factory equipped with concealed Limited Opening Mechanisms. Limiters shall be factory preset at 10" for all corridor and stairwell windows and 18" for all other windows (measured at top of lower project-in unit, from interior face of operable frame to interior face of fixed frame), with the exception of Multi-Purpose Room and Cafeteria casement windows (1890s building) and Gymnasium casement window (1959 building). Limiters for projection windows shall be capable of being key released to open to the full 70 degrees. Provide ten (10) keys for mechanisms.

6. Blinded Project-In Windows

- a. Both upper and lower units of blinded windows shall be provided with between glass custom metal mini blinds.
- b. Blind slats shall be 1" in width. Blind slats and components shall have a painted finish and color as specified in paragraph 1.06, D.2. of this specification Section. Blind slats shall be held as close as possible to the operable unit's jamb and sill frames to prevent daylight from entering the room.
- c. Blinds shall be held in place to the operable

frame by snap-in clips at the head of blind unit and hold down pins and black plastic hold down brackets at the sillrail end caps of blind unit to prevent lateral movement.

- d. Blind units shall be provided with black extruded plastic vertical control rod cover and black slim-line pinched tilt control knob. Control knob shall be located six (6) inches and four (4) above bottom tip of sash for lower and upper units respectively.

D. Riser Blocks

1. Each operable unit shall be equipped with a nylon riser block at the sill.

E. Sealants/Backer Rods

1. Sealants used between components and moving and perimeter joints shall be Pecora's Dynatrol II, or approved equal, custom color as selected by the Architect and backer rods shall be compressible rod stock of closed cell, expanded, extruded polyethylene.

F. Weatherstrip

1. Closed cell extruded sponge neoprene meeting ASTM C509 with molded corners mounted to exterior frame leg perimeter contacting exterior face of operable unit glass.
2. Ball-type neoprene meeting ASTM C509 at interior perimeter between operable unit and interior frame leg and between access panel and operable unit.

G. Glass and Glazing

1. Provide glass sizes as indicated on the Contract Drawings. Glazing pocket design must be in accord with the FGMA Glazing Manual.
2. Access Panel Glazing: Set glass against pre-shim butyl tape at exterior. Interior glazing bead with dense EPDM neoprene wedge and silicone cap.
3. Structural Glazing of Operable Unit: All operating units shall be glazed with glass set against a silicone rubber gasket with a structural silicone joint on the inboard side. Ventilator to close

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

against a closed-cell neoprene gasket meeting ASTM C509 with molded corners.

4. Glazing Types

a. Outer and Inner Lite Glazing

- 1) Fully tempered clear float glass; ASTM C1048, Kind FT, Condition A, Type I, Class 1, tempered by glass manufacturer's standard process (after cutting to final size).
- 2) Thickness: 1/4 inch.

5. Obscure Glass

Provide tempered obscure glazing material of pattern selected by Architect at locations indicated on the Drawings. Obscure surface shall be located on glass face 3.

H. Fasteners

Aluminum, non-magnetic stainless steel, or other materials warranted by manufacturer to be non-corrosive and compatible with aluminum window members, trim, hardware, anchors and other components of window units.

1. Reinforcement: Where fasteners screw-anchor into aluminum less than 0.125" thick, reinforce interior with aluminum or non-magnetic stainless steel to receive screw or provide standard non-corrosive pressed-in spliced grommet nuts.
2. Do not use exposed fasteners on exterior except where unavoidable for application of hardware. Match finish of adjoining metal.
3. Provide non-magnetic stainless steel Phillips flat-head machine screws for exposed fasteners, where required, or special tamper-proof fasteners.
4. Locate fasteners not to disturb thermal break construction of windows.

- I. Anchors, clips and window accessories: Depending on strength and corrosion-inhibiting requirements, fabricate units of aluminum, non-magnetic stainless steel or hot-dip zinc-coated steel or iron complying with ASTM A 386.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- J. Window poles shall be provided for all operable window cams more than 6'-0" above finished floor when remote operators are not indicated poles shall not be long enough to achieve a 45 degree angle from window hardware to a point 5'-0" above finished floor.

2.03 FABRICATION

A. General

1. Window units shall be factory fabricated including all sealing and installation of hardware.
2. Window units shall be factory glazed.
3. Units shall have a finish range between adjacent members matching the approved samples.
4. Fasteners which penetrate the perimeter frame shall be completely sealed with an approved sealant.

B. Main Frame Members

1. Miter all corners and weld, then seal weathertight. Joinery methods must not discolor finish or be unsightly as determined by the Architect. All frame sealants must be concealed.

C. Operable Units

1. Miter all corners and mechanically stake over solid aluminum corner block minimum 3/8 inch thick, set and sealed in epoxy leaving hairline joinery, then seal weathertight. Joinery methods must not discolor finish or be unsightly as determined by the Architect. All sealants must be concealed.
2. Sealants applied to portions of the operable sash and frame visible when sash is open shall also be neatly and minimally applied. All excess sealants applied in these areas shall be removed prior to delivery.

D. Access Panels

1. Miter all corners and mechanically stake over solid aluminum corner block minimum 1/4 inch thick, set and sealed in epoxy leaving hairline joinery, then seal weathertight. Joinery methods must not discolor finish or be unsightly as determined by

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

the Architect. All sealants must be concealed.

E. Weatherstripping

1. Each operating unit shall be double weatherstripped with fin-type continuous extruded neoprene weatherstripping meeting ASTM C864.
2. Weatherstripping shall be installed in extruded races and shall be continuous at all corners. Weatherstrip splice shall occur at the window head only.

F. Glazing and Procedure

1. Glaze fixed lites against exterior sponge neoprene gasket, install anti-walk blocks as required and apply interior dense neoprene wedge.
2. To glaze operating unit, install exterior sponge neoprene weatherstrip gasket to frame, apply silicone rubber spacer in vent and install glass with proper glass blockage. After closing and locking vent, clean and/or prime aluminum surfaces per sealant manufacturer's recommendations and apply structural silicone joint allowing proper setting time (reglazing must be possible without removal of operating unit).

G. Glass Drainage

1. Provisions shall be made to insure that water will not accumulate and remain in contact with the perimeter areas of sealed glass units.

H. Air Vents

1. Provide minimum of four nylon air vents (two top, two bottom) filtered and vented to exterior or wall cavity air located in space between glass.

I. Finish

1. Organic (General): Finish of all exposed areas of aluminum windows and components shall be in accord with AAMA Voluntary Guide Specification 605.2.
2. Extrusions shall be finished on lineals prior to fabrication. Manufacturer's quality control shall provide close control on acceptable color

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

variations between adjacent members as determined by the Architect.

3. Finish to be applied prior to pouring and debridging of thermobreak.

PART 3 - EXECUTION

3.01 INSPECTION

- A. Inspect openings before beginning installation. Verify that rough or masonry opening is correct and the sill plate is level.
- B. Masonry surfaces shall be visibly dry and free of excess mortar, sand and other construction debris.
- C. Metal surfaces shall be dry, clean, free of grease, oil, dirt, rust and corrosion, and welding slag, without sharp edges or offsets at joints.

3.02 REMOVALS AND REPAIRS

- A. Do not remove existing windows until new replacement windows are on Site and ready for installation. Do not leave any openings unprotected at end of work day or during periods of excessive cold weather or precipitation.
- B. Removal of existing windows must be coordinated with the Asbestos Removal Contractor. Protection of the window openings is the responsibility of the General Contractor.
- C. Remove existing windows and accessories as indicated on Drawings and as specified herein.
- D. Remove existing windows and debris from Site.

3.03 INSTALLATION

- A. Installation of window units shall be the responsibility of the window manufacturer, or his authorized representative.
- B. Comply with manufacturer's specifications and recommendations for installation of window units, hardware, operators and other components of the Work. In no case shall attachment to structure or to components of window system be through or affect thermal barriers of windows.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- C. Carefully remove existing windows without causing damage to adjacent materials and surfaces. Install new windows as detailed on Drawings, as specified herein, and as recommended by manufacturer.
- D. Frames shall be firmly anchored to structure with steel anchors, as recommended by the manufacturer.
- E. Windows shall be properly anchored, plumb and level.
- F. Provide protection for window finish to prevent damage during the course of construction operations and remove finish protection before final inspection of windows.

3.04 SETTING AND ANCHORING

- A. Anchor windows frames at jambs, head, and sill as detailed on Drawings and as recommended by window manufacturer. Comply with NYC Building Code.
- B. Set units plumb, level and true to line, without warp or rack of frames or ventilator. Provide proper support and anchor securely in place.
- C. Separate aluminum and other corrodible surfaces from sources of corrosion or electrolytic action at points of contact with other materials by complying with requirements specified under paragraph "Dissimilar Materials" in the Appendix to AAMA 101-88.
- D. Set sill members and other members in a bed of sealant and gaskets to provide weathertight construction. Refer to Section 07900 for bed sealant to be installed concurrently with window units.
 - 1. Perimeter sealant to be installed after installation of window units. Since the window sealant is an integral part of the soundproofing capacity of the window unit, sealant shall only be installed by the window installer. Refer to 2.03.E.1 for sealant to be used for window perimeter.

3.05 ADJUST AND CLEAN

- A. Adjust operating ventilators and hardware to provide tight fit at contact points and at weatherstripping, for smooth operation and weathertight closure.
- B. Clean painted aluminum surfaces promptly after installation of windows. Exercise care to avoid damage

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

to protective coatings and finishes. Remove excess glazing and sealant compounds, dirt and other substances. Lubricate hardware and other moving parts.

- C. Clean glass of units promptly after installation of windows; comply with requirements of the "Glass and Glazing" Section and Maintenance.
- D. Initiate and maintain protection and other precautions required through the remainder of the construction period, to ensure that, except for normal weathering, window units will be free of damage or deterioration at the time of substantial completion.
- E. The window manufacturer's representative shall instruct the custodial staff in the maintenance and cleaning of the windows and glazing and shall provide four (4) bound maintenance manuals to the Authority's Representative.

END OF SECTION

Window Manufacturer Certification Form

**Representation and Warranty
submitted with the bid of**

(Name of Bidder)

Monsignor McClancy Memorial High School Solicitation

The undersigned represents and warrants the following:

- 1. This document is part of a bid submitted on the captioned MMMHS solicitation, which is related to the manufacturer and installation of windows which will minimize within a classroom the noise generated from a source outside of a classroom;
- 2. The specifications and drawings of the captioned MMMHS solicitation have been reviewed by the undersigned or one under the supervision of the undersigned;
- C. The undersigned operates a business which can and, if the bidder named above is awarded the contract, will manufacture the window described in the captioned MMMHS solicitation; and
- D. The undersigned submits this document because it expects the MMMHS to rely upon its contents in determining the responsiveness of the bid of the bidder whose name appears

SECTION 08710
FINISH HARDWARE

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide finish hardware as indicated on Drawings, as specified herein, and as needed for complete hardware requirements. Roof bulkhead door hardware is part of ITEM 1.

1.02 RELATED SECTIONS

- A. Steel Doors and Frames..... Section 08110
- B. Access Doors..... Section 08305

1.03 REFERENCES

- A. Federal Specifications (FS).
- B. American National Standards Institute (ANSI).
- C. National Fire Protection Association (NFPA).
- D. Door and Hardware Institute (DHI).
- E. Underwriters Laboratories (UL).

1.04 SUBMITTALS

- A. Manufacturer's Technical Product Data: Submit for each hardware item type, including cuts, specifications and characteristics, instructions for installation, operation, and maintenance.
- B. Samples: Submit with Hardware Schedule one sample for each type of hardware. Approved samples may be installed in Work. Hardware installed shall correspond in particulars to approved sample of respective type.
- C. Hardware Schedule

NOTE: Provide Schedule for entire Project in one submittal, unless otherwise directed. Submit Hardware Schedule in book form (8-1/2" x 11" pages), indicating the following for each item. No continuous computer printout permitted.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Locations of hardware, with cross-reference to schedules and other indications on Drawings.
2. Name, manufacturer, type, style, size, function, and finish.
3. Information for fastenings.
4. Mounting Locations.
5. Materials and sizes of doors and frames.
6. Explanation of abbreviations and symbols.

D. Templates

At time of submittal of Hardware Schedule, furnish hardware templates to fabricators of other factory-prepared work necessary for installation of hardware.

E. Key Schedule

1. Submit Hardware Key Schedule, prepared by hardware supplier, to the MMMHS Representative within forty-five (45) days after starting date of Contract.
2. Stamp top face of each key with letter and number starting with A1 to Z1 and continuing the series of letters and numbers to the maximum number of keys furnished. Tag each series of keys.
3. Stamp face of each cylinder with the same corresponding letters and numbers.
4. Locks shall be made up on combinations as specified.
5. Furnish schedule of keys in quadruple indicating letter and number of each key and number of doors, and access doors for which the keys are intended. Submit schedule for approval before making keys.

1.05 QUALITY ASSURANCE

A. Hardware Supplier

Reputable, minimum of five (5) year experience, with experienced hardware consultant on staff.

B. Manufacturer

January 10, 2005

Soundproofing of

Monsignor McClancy Memorial High School

Obtain each hardware type from a single manufacturer.

C. Minimum Quality Requirements

Hardware items shall be of quality specified herein, and shall meet or exceed requirements of ANSI A156 series standards.

D. Fire-rated Openings

Provide hardware in compliance with NFPA Standard No. 80 and NYC Building Code requirements, tested and listed by UL for types and sizes of doors, and in compliance with requirements of door frame and door labels.

1.06 SHIPPING, STORAGE, AND HANDLING

A. Package and ship hardware to prevent damage. Properly identify and tag each item. Sort, package and mark hardware with set numbers.

B. Inventory hardware immediately upon delivery.

C. Provide secure storage area for hardware until installed.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

A. Butts

1. Stanley or approved equal.

B. Mortise Locksets

1. Best or approved equal.

C. Cabinet Locks (for access doors)

1. Best or approved equal.

D. Door Closers

1. LCN or approved equal.

E. Weatherstripping

1. Pemco or approved equal.

2.02 MATERIALS AND FABRICATION

A. General

1. Hardware: Heavy duty cast or forged (.080 min.) stainless steel with U.S. 32D finish, except otherwise specified.
2. Door closers: As specified herein.
3. Butts: Stainless steel with U.S. 32D finish.
4. Surfaces of castings shall be true, smooth and free from burrs. Lock mechanism and accessory components in contact with or bear upon other parts shall be dressed to a true, smooth surface.
5. Whenever weight is specified, it shall mean actual weight of casting without screws, washers and accessories.
6. Do not use products with manufacturer's name in an exposed location, except name on rim of lock cylinders.
7. Backset: 2-3/4" for locksets unless indicated otherwise.

B. Screws

1. Secure hardware with suitable screws and bolts of same material and finish as hardware items. Screws for strike and face plates, and hinges shall be flat-headed counter-sunk screws. Screws for other exposed hardware shall be oval-headed. Screws for butts for exterior aluminum doors shall be stainless steel. Screws for closers shall be machine screws. Screws shall be countersunk unless expressly specified otherwise.
2. Hardware for metal frames and doors shall be secured with suitable tap-screws, mill screws and bolts.

2.03 GENERAL HARDWARE REQUIREMENTS

- A. Hardware Schedule is intended to guide Contractor in preparing the Schedule for Work of this Section. It shall not relieve Contractor from the necessity of examining Specifications, Drawings and Details, and providing everything necessary to properly complete hardware

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School
installation.

- B. Hardware used on steel doors shall be made to templates and packed with machine screws.
- C. Hardware items not described shall be equal in grade, workmanship, and other particulars to similar items of hardware described.

2.04 FINISHES

- A. Hardware finishes shall comply with requirements of U.S. Bureau of Standards for the following:

U.S. - DESCRIPTION

USP - Primed for Painting
US1D - Dull Black
US2C - Zinc Plated, Commercial
US3 - Bright Brass
US4 - Dull Brass
US5 - Dull Brass, Oxidized
US7 - Brass, Nickel oxidized, Bright Relieved
US9 - Bright Bronze
US10 - Dull Bronze
US10A - Antique Bronze, lacquered
US10B - Antique Bronze, oiled
US11 - Dull Bronze, oxidized
US14 - Bright Nickel Plated
US15 - Dull Nickel Plated
US15A - Nickel Oxidized Relieved
US17A - Half Polished Iron, Smooth
US20 - Statuary Bronze, Light
US20A - Statuary Bronze, Dark
US26 - Bright Chromium
US26D - Dull Chromium
US32 - Polished Stainless Steel
US32D - Dull Stainless Steel

In addition, the following finish symbols are used for door closers:

AL - Manufacturer's standard aluminum lacquer

2.05 HARDWARE TYPE REQUIREMENTS:

- A. Locks and Latches

1. Interior (Elec Service/Water Meter Rm) & Exterior doors (Roof Bulkheads):

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- a. Type: mortise lockset.
- b. Case: 6 1/8" high, 4 1/4" deep, 1" wide.
- c. Backset: 2-3/4"
- d. Latchbolt: 3/4" throw, solid brass with satin chrome finish.
- e. Strike: lip strike 4 7/8" x 1 1/4" x 3/32".
- f. Operation: latchbolt by key/lever from outside and level from inside for interior and exterior doors.
- g. Secure locksets to doors with Phillips Head screws.

2. Cylinders:

Cylinders of locks shall be of proper length to fit doors for which they are intended. Cylinders shall be cast bronze with common standard diameter cast bronze rotating plug. The keyway shall be paracentric type of single section with seven pins or multiple (four or more) sections with six pins capable of being keyed alike.

3. Strikes: Strikes for latches shall project sufficiently to properly protect trim. Slots in strike plates shall not be more than 1/4" longer than bolts. Metal between slots for latch and bolt shall not be less than 1/4". Strikes used with hollow metal jambs shall be of box type with closed back.

B. Door Closers

1. Door Closers:

Door closers shall have cast iron or aluminum cases treated to overcome porosity, arms of forged steel, and connecting rods of high carbon steel. Brackets for door closers, where required, shall be of forged steel.

2. Door closers shall be fully hydraulic rack and pinion action with high strength cast iron cylinders and one piece forged steel pistons of approved manufacture, guaranteed to properly operate door, free from mechanical defects for two

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

years from date of final acceptance of Work. Closers fail to meet specified requirements shall be replaced or repaired and made to operate properly by Contractor without additional expense to the MMMHS. Closers shall be equipped with clock key valve.

3. Closer described in B.1 shall be provided on all steel doors and frames.
4. Closers on steel doors shall be on interior/push side of doors.

C. Butts and Hinges

1. Extra Heavy Stainless Steel: Ball bearing, self-lubricating butts, with inner edges of leaves beveled, three to each door unless otherwise specified. Non-removable pin butts shall have stainless steel pins, stainless steel set screw in barrel, stainless steel balls and raceways. Butts shall have flat button tips stamped with classification number and trade name or trade mark of manufacturer.

2. Non-Removable Pin Butts:

Non-removable pin stainless steel butts shall be 4 1/2" x 4 1/2", 1.134 gage. Doors 5'-0" or over in height shall have 3 butts to each door.

D. Weatherstripping at Roof Bulkhead Doors [ITEM 1]

1. Cushion ("V" type) .008 gauge hemmed spring bronze weatherstripping.
2. Fasten at 3" on center to all four sides of door frame.

PART 3 - EXECUTION

3.01 INSTALLATION

- A. Provide complete installation of finish hardware items as indicated on Drawings and as specified herein.
- B. Mount hardware as recommended by respective manufacturer.
- C. Mount door hardware items at heights and locations on doors and frames in accordance with "Recommended

January 10, 2005

**Soundproofing of
Monsignor McClancy Memorial High School**

Locations for Builders Hardware for Standard Steel Doors and Frames" by Door and Hardware Institute, except where specifically indicated otherwise.

- D. Set hardware items plumb and level and secure with proper fasteners.

3.02 APPLYING HARDWARE

- A. Hardware specified in this Section shall be fitted, installed and adjusted.
- B. Secure hardware with suitable screws, bolts, or other fasteners, as required. At completion of Project, leave hardware in perfect conditions, free from stains, varnish, scratches and mars.

3.03 CLEANING AND ADJUSTING

- A. Clean hardware items thoroughly and adjust for proper operation.

3.04 KEY OPERATION AND INSPECTION

- A. Upon completion of the Work and after locks have been secured in proper positions, keys belonging thereto shall be fitted and made to work freely in respective locks in the presence of the MMMHS Representative. The required number of keys for each lock, properly marked, shall be delivered to the MMMHS Representative, who will give a receipt therefor.

3.05 EXISTING BUILDING MODIFICATION

- A. Removals
 - 1. Where doors are designated to be removed as part of Contract, locksets, knobs, closers, butts and other hardware shall be removed from the doors and shall be turned over to the Director of Buildings & Grounds.

PART 4 - SCHEDULES

4.01 FINISH HARDWARE SCHEDULE

- A. Provide hardware for each item of Work in compliance with "Hardware Set Numbers" indicated in Hardware Schedule on Drawings, and as listed below:

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

<u>Item</u>	<u>Quantity</u>	<u>Mfr. & Cat. No.</u>
<u>SET 1</u>		
<u>Exterior Doors (Entrance) Each Door:</u>		
1. Butts	1-1/2 Pair 6"x5" NRP	McKinney T4B3386
2. Exit Device	1	Precision 1103 x 17 (with rim cylinder)
3. Surface mounted or concealed Door Closer	1	LCN 4040 mounted with Extra Duty Arm 4040-3077EDA or LCN 2016 (concealed)
4. Overhead Stop with Holder	1	Glynn-Johnson 80 Series HD

6. Card Holder 1 Quality 1821

SET 4

Exterior Door - Mechanical Room

Each Door:

1. Butts 1-1/2 pair 6"x5" NRP McKinney T4B3386
2. Lockset 1 Sargent 8237 LW1B
3. Overhead Stop 1 Glynn Johnson
with Holder 80 Series

SET 5

Mechanical Rm. & Electrical Rm.

Each Door:

1. Butts 1-1/2 Pair 4-1/2"x4-1/2" McKinney TB2314
2. Lockset 1 Sargent 8204 LW1B
3. Surface Mounted 1 LCN 4010
Door Closer
4. Overhead Stop 1 Glynn Johnson
with Holder 80 Series HD
5. Silencers 3 Glynn Johnson 64

SET 6

Access Door from Stage to Classroom (Double Doors)

Each Pair of Doors:

1. Butts 3 Pairs 4-1/2" x 4-1/2" McKinney TB2314
2. Pulls 2 Rockwood 130
(one each door)
3. Surface Bolts 2 Ives 143-12
(top and bottom
of inactive door)
4. Silencers 4 Glynn Johnson 64
(2 each at
door head)

(active leaf)

Yale 197 Vertical
Boltlock

6. Overhead Stop 2
with Holder
(One each door)

Glynn Johnson
80 Series HD

SET 7

Access Doors

Each Access Door:

1. Cabinet Lock 1

Best 5E6 Series
US32D

4.02 KEYING

A. General Keying Requirements

1. Incorporate keying for new locks into existing keying system. Coordinate all keying requirements with MMMHS prior to fabrication.

B. Keying Schedule

1. Interior Mechanical Room & Electrical Room doors shall be keyed alike.
2. Exterior acoustical metal entrance doors shall be keyed alike.
3. Exterior egress doors shall be keyed alike.
4. Classroom doors shall be keyed alike.
5. Access doors shall be keyed alike.
6. Furnish five (5) keys of each type of lock.

END OF SECTION

SECTION 08730
THRESHOLDS, WEATHERSTRIPPING AND SEALS

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide thresholds, saddles, weatherstripping and seals as shown on Drawings and as specified herein.

1.02 RELATED SECTIONS

- A. Selective Removals & Demolition..... Section 02070
- B. Steel Doors and Frames..... Section 08110
- C. Painting..... Section 09900

1.03 REFERENCES

- A. American National Standards Institute (ANSI).
- B. American Society for Testing and Materials (ASTM).
- C. Builders Hardware Manufacturers Association (BHMA).
- D. American Architectural Manufacturers Association (AAMA).

1.04 SUBMITTALS

- A. Product Data
Catalog sheets, specifications, installation and maintenance instructions for each item and type.
- B. Samples
 - 1. 6" long section, each item and type.
 - 2. Fasteners: Each type.
 - 3. Color Samples:
 - a. Painted Aluminum: To match color of door.
 - b. Bronze: Manufacturer's standard colors.

1.05 QUALITY ASSURANCE

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- A. Use resilient or flexible stripping and seals that are easily replaceable and available during anticipated life of building.

1.06 DELIVERY, STORAGE, AND HANDLING

- A. Deliver, store, and handle products of this Section as recommended by manufacturer to protect from damage.
- B. Inventory products immediately upon delivery.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

- A. Zero International, Inc., Bronx, NY.
- B. Accurate Metal Weatherstripping Co., Mt. Vernon, NY.
- C. Pemco, Ventura, CA
- D. Reese Enterprises, Inc., Huntington Beach, CA.
- E. Safe-T-Metal Co., Inc., Garden City Park, NY.
- F. National Guard, Memphis, TN.

2.02 MATERIALS

- A. Metals
 - 1. Extruded Aluminum: Alloy 6063, hardness T5 or T6.
 - 2. Extruded Architectural Bronze: Brass Alloy 385.
- B. Neoprene
 - Minimum chlorine content 12 percent.
 - 1. Solid Neoprene: Mil R6855, Class II, Grade 40.
 - 2. Closed Cell Neoprene: Mil R6130B, Type II, Grade A, B, C.
- C. Polypropylene
 - American Architectural Manufacturer's Association 701.1 Standards.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

D. Fasteners

Builders Hardware Manufacturers Association Standard
1001, unless otherwise specified.

2.03 EXTRUDED THRESHOLDS

A. Types

1. Type 1: Single piece saddle.
2. Type 2: Adjustable width saddle.
 - a. Adjustable Construction: 3 piece interlocking. Width: Minimum 5" and less than 7".
 - b. Adjustable Construction: 5 pieces interlocking. Width: Minimum 7" or greater.
3. Type 3: Rabbeted with stop strip.
 - a. Thermal Barrier: Hollow neoprene bulb.
 - b. Thermal Barrier: Closed cell sponge neoprene.
 - c. Thermal Barrier: Pile insert.

B. Metal

Extruded bronze.

C. Surface Pattern

Abrasive tread.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

D. Fasteners

Bronze Thresholds: Solid brass Phillips flathead wood screws, or flathead machine screws as anchors, appropriate for substrate.

2.04 THRESHOLD FABRICATION

- A. Fabricate thresholds of length required for tight fit against door frames. Cope to provide fitting around obstructions. Leave edges free from burrs.
- B. Factory miter corners and fit with end returns to close exposed ends of thresholds not covered by door frame.
- C. Drill holes 3" from each end of threshold and intermediate holes 12" maximum oc for required fasteners. Prepare holes for countersunk fasteners.

2.05 DOORS BOTTOM PROTECTION

A. Sweep Type

- 1. Mounting: Surface.
- 2. Housing: Extruded aluminum, main walls and flanges, minimum 0.062" thick.
- 3. Finish: Paint to match color of door.
- 4. Seal: Solid neoprene.
- 5. Fasteners: Manufacturer's standard or recommended fasteners in compatible material and matching finish, unless otherwise specified.

2.06 DRIP CAPS

- A. Provide drip caps for exterior doors not protected from precipitation.
- B. Types
 - 1. Sill Protection.
 - 2. Top Protection: Extended rain drip cap.
- C. Metal

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Extruded aluminum.

D. Finish

Paint to match color of door.

E. Fasteners

Manufacturer's standard or recommended fasteners in compatible material and matching finish, unless otherwise specified.

2.07 HEAD AND JAMB WEATHERSTRIPPING AND SEALS

A. Spring Metal Type

1. Mounting: Surface.

2. Metal:

a. Spring bronze, minimum 0.006" thick.

3. Finish: Mill.

4. Fasteners: Manufacturer's standard or recommended fasteners in compatible material and matching finish, unless otherwise specified.

PART 3 - EXECUTION

3.01 INSTALLATION

A. Install Work in accordance with manufacturer's printed instructions, except as shown or specified otherwise.

NOTE: Refer to Section 07900 for sealant types.

B. Level and align thresholds with frames and doors. Where required, use non-corrosive shims.

1. Exterior Doors: Set threshold in a solid bed of Type 3 sealant.

2. Secure thresholds to substrate with countersunk fasteners.

C. Mount sweep type door bottom protection/drip caps on exterior side of doors.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Before mounting apply Type 2 sealant on the back side of bearing surface. Secure to door with required fasteners.

D. Weatherstripping and Seals

1. Starting at head, install continuous stripping at each opening without unnecessary interruptions at door corners and hardware.
2. Secure fasteners for stripping and seals so they will not work loose during door operation. Exposed heads of fasteners shall be free of sharp edges.
3. Coordinate meeting seals with hardware before installation.
4. Install units plumb and level at optimum location to maintain a permanent effective seal.

3.02 ADJUSTING AND CLEANING

- A. Adjust stripping and seals, if necessary, to achieve an effective seal for proper operation of doors and hardware.
- B. Clean exposed surfaces by methods recommended by manufacturer.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 08800
GLAZING

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

A. Provide glass glazing Work as indicated on Drawings and as specified herein, including, but not limited to the following:

1. Float Glass (tempered)
2. Wired Glass
3. Laminated Glass
4. Insulating Glass

1.02 WORK PROVIDED IN OTHER SECTIONS

- | | |
|--|---------------|
| A. Aluminum Proj. and Casement Windows | Section 08524 |
| B. Acoustical Metal Doors and Frames .. | Section 08341 |
| C. Steel Doors, Frames, & Hollow
Metal Work | Section 08110 |

1.03 RELATED SECTIONS

- | | |
|--|---------------|
| A. Aluminum Proj. and Casement Windows | Section 08524 |
| B. Acoustical Metal Doors and Frames | Section 08341 |
| C. Steel Doors, Frames, & Hollow
Metal Work | Section 08110 |

1.04 REFERENCES

- A. Flat Glass Marketing Association (FGMA).
- B. Underwriters Laboratories, Inc. (UL).
- C. American National Standards Institute (ANSI).
- D. Insulating Glass Certification Council (IGCC).

1.05 SUBMITTALS

A. Product Data

Manufacturer's specifications and installation instructions for each type of glass specified herein:

1. Spacers.
2. Compressible filler rod.

B. Samples

1. Glass: 12" x 12" pieces for each type of glass specified herein.
 - a. Insulating glass samples need not be hermetically sealed, but include edge construction materials.
2. Setting blocks, full size.

C. Quality Control Submittals

1. Test Reports: Certified test data to sufficiently substantiate glass or glass assembly compliance with requirements specified.
2. Certificates:
 - a. Affidavit required under Quality Assurance Article.
 - b. Wired Glass: Affidavit required under Quality Assurance Article.

1.06 QUALITY ASSURANCE

A. Compatibility of Materials

Components of glazing system shall be manufactured or recommended by one manufacturer to assure compatibility of materials.

- B. Comply with recommendations in "Glazing Manual" and "Glazing Sealing Systems Manual" of Flat Glass Marketing Association except as shown or specified

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

otherwise, and specifically recommended otherwise by manufacturers of glass and glazing materials.

C. Safety Glazing Material

Type indicated, meeting requirements of ANSI Z97.1 with label on each piece.

D. Certification

1. Affidavit by material supplier, certifying type and quality of glass furnished.
2. Wired Glass: Affidavit by material supplier, certified as bearing Underwriter's Laboratories (UL) classification marking for fire resistance.

1.07 DELIVERY, STORAGE, AND HANDLING

- A. Protect glass from edge damage during handling, storage, and installation.

1.08 PROJECT CONDITIONS

A. Environmental Requirements

Comply with glazing materials manufacturer's written recommendations regarding environmental conditions under which glazing materials shall be installed.

- B. Glazing channel dimensions shown are intended to provide for necessary minimum bite on glass, minimum edge clearance and adequate glazing material thickness, with reasonable tolerances. Provide correct glass size for each opening, within acceptable tolerance and necessary dimensions.

PART 2 - PRODUCTS

2.01 GLASS

A. Type A Glass

Tempered Float Glass; ASTM C 1048, Kind FT, Condition A, Type I, Class 1, tempered by manufacturer's standard process (after cutting to final size).

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Thickness: 1/4"

B. Type B Glass

Clear Wired Glass; ASTM C 1036, Type II, Class 1, Form 1, quality q8.

1. Thickness: 1/4".

2. Wire Mesh: Diamond, welded, approximate 7/8" by 1 1/8" diamonds.

C. Type C Glass

Laminated Glass, three sheets of 1/4" thick double-strength clear sheet glass; ASTM C 1036, Type I, Class 1, quality q3; permanently laminated together with minimum 0.060" thick sheet of clear plasticized polyvinyl butyral produced specifically for laminating glass.

D. Type D Glass

Organically Sealed Insulating Glass Units: ASTM C 1036, applicable Type and Class for glass indicated below, quality 13 for Type I glass; manufacturer's standard edge construction of spacers and sealants permanently bonded to glass surfaces and hermetically sealed to provide a dehydrated air space 2 1/2" thick with -60 degrees F. dew point; fabricated of the following glass.

Insulating glass shall be Certified Class CBA by (IGCC).

1. Exterior Glass: Laminated Glass.

2. Interior Glass: Laminated glass.

2.04 GLAZING MATERIALS

A. For exterior glazing, except do not use in deep channels:

Dow Corning 999-A; GE Silglaze N2500; Rhone-Poulenc's Rhodorsil 3B.

Type 1 Glazing Material: Silicone Rubber Glazing Sealant; silicone rubber one-part elastomeric sealant; FS TT-S-001543, Class A; acid-type for non-porous channel surfaces, and non-acid type where channel surfaces are porous.

B. For exterior glazing

Use in deep channel glazing; paintable.

Products: W.R. Meadows Dualthane and CM-60 two-part; Pecora's GC-5 Synthacalk; Sonneborn's Sonolastic two-part.

Type 2 Glazing Material: Polysulfide Glazing Sealant; polysulfide two-part elastomeric sealant; FS TT-S-00227, Type II,, Class A, compounded by manufacturer specifically for glazing.

C. For Channel glazing and for small lights:

Products: W.R. Meadows Solaply; Pecora's 60+ Unicrylic Acrylic; Tremco's Mono.

Type 3 Glazing Material: Acrylic Glazing Sealant; solvent-based, acrylic terpolymer, thermoplastic sealant; FS TT-S-00230, Type II, Class B, 95 percent of solids acrylic; compounded specifically for glazing.

D. Setting Blocks

Neoprene, 70-90 durometer hardness, proven to be compatible with sealants used.

E. Spacers

Neoprene, 40-50 durometer hardness, proven to be compatible with glazing materials used.

F. Compressible Filler Rod

Closed-cell or waterproof-jacketed rod stock of synthetic rubber or plastic foam, proven to be compatible with glazing materials used, flexible and resilient, with 5-10 psi compression strength for 25 percent deflection.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

G. Cleaners, Primers and Sealers

Type recommended by glazing material manufacturer.

2.06 LOCATIONS FOR GLASS INSTALLATIONS, GENERALLY

A. Float Glass (Tempered)

1. At aluminum projection and casement windows.

B. Wired Glass (Polished)

1. In interior glazed metal doors.

C. Insulated Glass and Laminated Glass

1. At transoms above acoustic metal doors

PART 3 - EXECUTION

3.01 PREPARATION

- A. Clean glazing channel, or other framing members to receive glass, immediately before glazing. Remove coatings not firmly bonded to substrate. Remove lacquer from metal surfaces wherever elastomeric sealants are used.
- B. Inspect each piece of glass immediately before installation, and eliminate pieces with damage or face imperfections.
- C. Apply primer or sealer to joint surfaces wherever recommended by sealant manufacturer.

3.02 INSTALLATION

- A. Each installation shall withstand normal temperature changes, wind loading, and impact loading (for operating sash and doors) without failure of any kind including loss or breakage of glass, failure of sealants or gaskets to remain watertight and airtight, deterioration of glazing materials and other defects.
- B. Install glass in accordance with standards detailed in "Glazing Manual" and "Glazing Sealing Systems Manual" of Flat Glass Marketing Association except as shown

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

and specified otherwise, and where specifically recommended otherwise by manufacturers of glass and glazing materials.

- C. Unify appearance of each series of lights by setting each piece to match others as closely as possible. Inspect each piece and set with pattern, draw and bow oriented in same direction as other process.
- D. Install glazing materials in accordance with manufacturer's printed instructions.

3.03 GLAZING

- A. Install setting blocks of proper size at quarter points of sill rabbet. If required to keep in place, set blocks in thin course of heel-bead compound.
- B. Provide spacers inside and out, of proper size and spacing, for glass sizes larger than 50 united inches, except where gaskets are used for glazing. Provide 1/8" minimum bite of spacers on glass and use thickness equal to sealant width, except with sealant tape use thickness slightly less than final compressed thickness of tape.
- C. Voids and Filler Rods

Prevent exudation of sealant or compound by forming voids or installing filler rods in channel at heel of jambs and head (do not leave voids in sill channels) except as otherwise indicated, depending on light sizes, thickness and type of glass, and complying with manufacturer's recommendations.
- D. Do not cut, seam, nip, or abrade glass which is tempered, heat strengthened, or coated.
- E. Force glazing materials into channel to eliminate voids and to ensure complete "wetting" or bond of glazing material to glass and channel surfaces.
- F. Tool exposed surfaces of glazing sealants and compounds to provide a substantial "wash" away from glass. Install pressurized tapes and gaskets to protrude slightly out of channel to eliminate dirt and moisture pockets.

3.04 CURE, PROTECTION AND CLEANING

- A. Cure glazing materials in accordance with manufacturer's printed instructions and recommendations, to obtain high early bond strength, internal cohesive strength, and surface durability.
- B. Mark glazed openings immediately upon installation of glass by attaching crossed streamers to framing. Do not apply markers of any type to surfaces of glass.
- C. Replace glass which is broken, or otherwise damaged, from the time Work is started at Site until the date of physical completion.
- D. Maintain glass in reasonably clean condition until date of physical completion.

Clean and trim excess glazing material from glass and stops or frames promptly after installation.

- E. When directed, or just before the Project is turned over to the Authority, remove dirt and other foreign material and wash and polish glass included in the Work on both sides.

END OF SECTION

SECTION 09100
NON-LOAD BEARING STEEL STUDS

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide materials, labor, equipment and services necessary to install metal studs, runners and fasteners to receive screw-attached gypsum wallboard in non-load bearing interior construction assemblies.

1.02 RELATED SECTIONS

- A. Access Doors Section 08305
- B. Gypsum Drywall Section 09250
- C. Mechanical/Electrical..... Division 15 & 16

1.03 REFERENCES

- A. American Society for Testing and Materials (ASTM), latest editions.

 - C 646 Steel Drill Screws for the Application of Gypsum Sheet Material to Light Gage Steel Studs.
 - C 754 Installation of Steel Framing Members to Receive Screw-Attached Gypsum Wallboard. Backing Board, or Water-Resistant Backing Board.

- B. United States Gypsum Co.

Gypsum Construction Handbook

1.04 SUBMITTALS

- A. Product Data

Submit manufacturers' specifications for the products specified; metal studs and fasteners.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

B. Shop Drawings

Submit for approval showing Work fully dimensioned.

C. Samples

1. Submit three sample of stud and runner in minimum 12" lengths for approval before any Work is commenced.

2. Submit Fasteners: 3 each type.

D. Material Certificates

Submit certificates from the manufacturers of the specified materials stating compliance with the applicable requirements set forth for all materials specified in this Section.

1.05 QUALITY ASSURANCE

A. Qualifications

Installer is to be a firm with not less than five years of successful experience in the installation of specified materials.

B. Regulatory Requirements

1. Building Code: Work of this Section shall conform to all requirements of the N.Y.C. Building Code and all applicable regulations of other governmental authorities.

2. New York City Board of Standards and Appeals (BSA),
or

3. New York City Materials Equipment Acceptance (MEA)

C. Single Source Responsibility

Obtain all steel studs and accessories from a single manufacturer.

1.06 DELIVERY, STORAGE, AND HANDLING

A. Deliver materials in original packages, containers or bundles bearing brand name and identification of manufacturer.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- B. Store all materials inside under cover in a manner to keep them dry, protected from weather, surface contamination, corrosion and damage from construction traffic and other causes.
- C. Handle studs and runners in a manner to prevent from being bent or mangled.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

- A. Provide C-Shape system from one of the following manufacturers:
 - 1. Gold Bond Building Products Division; National Gypsum Co.
 - 2. Milcor Division; Inryco Inc.
 - 3. United States Gypsum Co.
- B. Provide fastening system from the following manufacturer:
 - 1. Hilti Corp. or approved equal.

2.02 MATERIALS

A. Steel Studs

In compliance with ASTM C 645, provide galvanized steel, C-shaped members as specified and indicated on the Drawings.

B. Runners

In compliance with ASTM C 645, provide galvanized steel runners to match applicable assembly specified and as indicated on Drawings.

C. Fasteners

Provide fasteners of type, size, style, grade and class required for secure installation of framing and runners. Galvanize all fasteners and accessories.

- 1. Fasteners as indicated on the Drawings.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Self-Drilling Fasteners: No. 12-14 x 3/4 inch, hex washer head, self drilling fastener with pilot point.

PART 3 - EXECUTION

3.01 INSPECTION

- A. Examine all Work prepared by others to receive Work of this Section and report any defects affecting installation to the Representative for correction. Commencement of Work will be construed as complete acceptance of preparatory Work by others.

3.02 INSTALLATION

A. General

Comply with ASTM C 754 and manufacturers specified installation instructions for all non-load bearing steel stud installations.

1. Extend all partitions minimum six inches above the installed ceiling height.

B. Steel Stud Installation

1. Align runners accurately at floor and top of wall. Secure runners as recommended by the framing manufacturer for the upper and lower construction involved, except, do not exceed 24" on center spacing for power driven fasteners. Provide fasteners approximately 2" from corners and ends of runners.

3. Position studs vertically and engage both floor and upper runners. Space studs 16" on center unless otherwise indicated on the Drawings. Fasten studs to runners flanges with screws.

a. Use full length studs between runners.

b. Provide additional studs to support inside corners at partition intersections.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

3.03 ADJUSTING

A. Tolerances

Do not exceed 1/8" in 8 feet variation from plumb or level in any exposed line or surface, except at joints between planes or abutting edges or ends. Shim as required to comply with specified tolerances.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 09205
FURRING AND LATHING

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Furnish and erect all metal furring and lathing including accessories and trim, as required by Drawings. Lathing is intended to receive plaster. Furring is intended to receive any finish Work other than heavy masonry, concrete, etc.

1.02 RELATED SECTIONS

- A. Support System for Suspended Ceilings.....Section 05170
- B. Access Doors.....Section 08305
- C. Non-Load Bearing Framing Systems.....Section 09100
- D. Plaster.....Section 09210
- E. Mechanical/ElectricalDivision 15 & 16

1.03 REFERENCES

- A. American Society of Testing and Materials (ASTM), latest editions.
 - C 37 Standard Specification for Gypsum Lath.
 - C 841 Installation of Interior Lathing and Furring.

1.04 DEFINITIONS

- A. Gages
 - 1. Sheet Steel: U S Standard
 - 2. Steel Wire: U S Steel Wire Gage
- B. Galvanizing
 - Hot-dip process, unless otherwise indicated.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1.05 SUBMITTALS

A. Product Data

Submit manufacturers specifications and installation instructions for the following products: Lath, furring channels and accessories.

B. Samples

1. Submit three (3) samples of the following for approval prior to delivery to job site;
 - a. Lathing - coated and uncoated - 12 inches square.
 - b. Wire - 8 inches long min.
 - c. Furring Channels - 8 inches long min.
 - d. Corner Beads - 8 inches long min.
 - e. Casing Beads - 8 inches long min.

1.06 QUALITY ASSURANCE

A. Qualifications

Installer is to be a firm with not less than (5) years of successful experience in the installation of specified materials.

B. Regulatory Requirements

1. Building Code: Work of this Section shall conform to all requirements of the NYC Building Code and all applicable regulations of other governmental authorities.
2. N.Y.C. Materials Equipment Acceptance (MEA) approval.

1.07 DELIVERY, STORAGE, AND HANDLING

A. Delivery

Deliver materials in original packages, containers or bundles with identification of product and manufacturer's names clearly visible.

B. Storage

Store materials inside, under cover and keep them dry and protected from contamination, aging, corrosion and damage.

C. Handling

1. Protect metal corner beads and trim from being bent or damaged.
2. All furring and lathing showing signs of rust will be rejected. All rejected Work is to be removed from the premises and replaced with new.

1.08 PROJECT CONDITIONS

A. Coordination of Work.

1. Coordinate layout and installation of furring and lathing with installation of Support System for Suspended Ceilings and Soffits specified in Section 05170 of this Specification in conformance with N.Y.C. Building Code Reference Standard 5-16 and all other regulatory agency requirements.
2. All Work by other trades, above, supported by or penetrating walls, ceilings and soffits including electrical, heating and ventilation and plumbing and drainage Work is to be coordinated with the lath and plaster installation.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

PART 2 - PRODUCTS

2.01 MANUFACTURERS

- A. Subject to compliance with requirements, provide products of one of the specified manufacturers
1. Gold Bond Building Products Division; National Gypsum Co.
 2. Milicor Division; Inryco Inc.
 3. United States Gypsum Co.

2.02 MATERIALS

A. Furring Channels

3/4" deep x 7/16" wide flanges, 16 gage, cold-rolled channels, 300 lbs. per 1000 ft. painted, 316 lbs. per 1000 ft. galvanized. $S(\text{in}^3) = 0.02$; $I(\text{in}^4) = 0.0075$.

B. Metal Lath

1. Diamond Mesh Metal Lath: Galvanized steel expanded diamond mesh. Weight not less than 3.4 lbs. per sq. yd. Where self-furring lath is specified mesh shall have indentations or dimples that will hold lath not less than 3/8" from backing. Indentations spaced not more than 2" o.c. each way.

C. Metal Corner Beads

Type as indicated below of zinc coated (galvanized) steel, #22 gage minimum:

1. Small nose with expanded flanges, not less than 2 1/2" wide, each side.

D. Casing Beads

Metal bead, expanded flange type fabricated of not less than 24 gage galvanized steel, 3" wide minimum.

1. Square edge, or quarter round edge at perimeter of openings.
2. Modified or semi-square edge where plaster abuts dissimilar material.

- E. Wire for Furring Channels and Ties
 - 1. 18-gage, U.S.S. 18-8, Dead soft stainless steel wire.
 - 2. 18-gage soft temper cold drawn monel metal wire, suitable for twisting.
 - 3. Use .0475" diameter for tying lath and not less than .062" diameter for all other tying.

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Verification of Conditions
 - 1. Structural support of mechanical equipment and ductwork, electrical lighting and equipment and plumbing and drainage piping in the suspended ceilings and walls will be furnished and installed in the Section of this Specification relating to the specific installation.
 - 2. Openings in wall or ceilings required by the Work of other trades will have to be coordinated with the Contractor in order that he may properly place anchors, hangers and carrying bars, if necessary, to avoid such ducts, pipes conducts, etc. Any changes required to be made in the locations of anchors, hangers and carrying bars by reason of the Contractor's failure to observe this requirement shall be made by the Contractor without additional cost to the MMMHS.
 - 3. Where the above Work or any other Work of the various trades makes necessary a departure from the standard form of furring and lathing as specified or shown, obtain MMMHS Representative's approval before installing such Work and execute such Work in the manner determined or approved by the MMMHS Representative without additional cost to the MMMHS.

3.02 INSTALLATION

- A. General

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Install Work of this Section in accordance with the provisions of ASTM C 841, except as otherwise indicated.

B. Openings

Frame openings with extra furring members of same size and weight as runner bars unless otherwise indicated.

1. Suspended Ceilings: Frame openings for registers, grilles, access doors, recessed electric fixtures and other items with rigid frames of furring channels or angles, bolted to runner bars.

C. Furring

Erect furring to form a true plane and securely fasten in place. Space furring channels not to exceed 12 inches on center. Set furring at right angles to runner bars, and with webs at right angles to surface of plaster. Except as otherwise indicated, secure furring to runner bars or supporting structure with tie wires, clips, bolts or screws as applicable. Reinforce system at corners with extra furring members.

1. Splicing Furring Materials: Overlap spliced materials minimum 8", then join materials by wire tying, screwing or bolting together.
2. Wire-tying Furring Channels to Runner Bars: Tie with eight strands of wire at each intersection of furring channel with runner bar, two strands to each corner of the intersection crossing diagonally on top of runner bar and twisted at top of runner bar.
3. Clipping Furring Channels to Runner Bars: Clinch clips over top of runner bars.

D. Lathing

Apply lath to form true surfaces, free from sags and buckles, and secure to furring or directly to supporting structure as indicated. Apply lath with the long dimension of sheets at right angles to the direction of bearing.

1. Metal Lath:
 - a. Laps: Lap sides of sheets not less than 1/4 inch, nesting ribs if any. Lap ends of sheets

not less than one inch, and locate end laps over bearings.

- b. Reinforcement for Internal Corners: Reinforce internal angles of lathed surfaces and intersections of lathed surfaces with masonry (to be plastered) with continuous corner reinforcing except at junctions of load bearing and non-load bearing elements.
- c. Fastening: Secure metal lath to each furring channel with lacing wire, on not exceeding 6 inch centers. Fasten side laps together with lacing wire midway between bearing, and fasten terminating side edge. Secure reinforcement to other lathing with lacing wire, and to masonry with galvanized nails, on not exceeding 6 inch centers. Twist ends of wire ties together, cut off $\frac{1}{2}$ inch from twist, and bend ends back against the lath.

E. Suspended Ceilings

- 1. Form suspended ceilings with hangers, runner bars, and furring channels, as specified in Section 05170, (in compliance with N.Y.C. Building Code RS-5-16).
- 2. Attach hangers to supporting construction, spaced within span limit of runner bars and within 6" of ends of runner bars.
- 3. Space runner bars within span limit of furring channels and within 6" of parallel walls. Leave a clearance of not less than one inch between ends of runner bars and abutting masonry and concrete construction. Bolt or saddle-tie runner bars to hangers.
- 4. Space furring channels 12" on center, and secure to runner bars with tie wire or clips.
- 5. Do not permit any part of suspension grillage to be in contact with walls or partitions.

F. Furred Ceilings

Form furred ceilings with furring channels and diamond mesh metal lath unless otherwise indicated. Space furring 12" on center, and secure to supporting

January 10, 2005

Soundproofing of

Monsignor McClancy Memorial High School

construction with clips, expansion bolts, or by other approved equal method.

G. Furring Channel Walls

1. Secure 3/4 inch furring channels set vertically on 12 inch centers, to floor and ceiling plates. If pieces of bars shorter than height of partition are used, splice pieces by lapping not less than 8 inches with flanges interlocked and securely wired together. Use at least one full length between spliced channels.
2. Cover furring channels with diamond mesh metal lath.

H. Miscellaneous Furring and Lathing

1. On areas to be plastered, lath over metal in masonry surfaces, reinforce joints between dissimilar materials and install other furring and lathing as required to complete the plastering. Install reinforcement where indicated.
2. Use diamond mesh or rib mesh metal lath. The span between supports shall not exceed 12" for diamond mesh metal lath; install furring as required to provide such support. Lap lath 6" beyond each side of items being covered.

I. Accessories

1. General: Set accessories in designed location, flush with finished plaster line, true to line and level or plumb. Align joints with concealed splices and tie plates. Use shims where necessary. Securely fasten in place without dependence upon the plastering. Beads and screeds shall be in one piece where height or length of straight run does not exceed 10 feet.
2. Corner Beads: Install continuous corner beads at all external corners of plaster, except where corners are rounded or covered by trim. Space fasteners not more than 12" on center on both sides of bead.
3. Casing Beads: Unless otherwise indicated, install continuous casing beads to terminate plaster at head and jambs of doors and windows, around the perimeter of suspended ceilings, at each side of

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

expansion joints and at internal corner junctions
of load bearing and non-load bearing elements.
Space fasteners not more than 9" on center.

3.03 FURRING APPLICATION

- A. Furnish and install hung or furred ceilings in all locations indicated on Drawings.
- B. Furnish and erect all hangers, running bars, furring channels, stiffeners, and other furring members required to support the lathing for furred and hung ceilings together with all clips, knees, clamps, bolts, etc. required to secure the various members together and to the structural Work. Drill all holes required for this Work.
- C. Include all furring angles, braces and clips required by Drawings at windows, and all other furring indicated on Drawings.
- D. All furring shall be done with vertical members plumb, horizontal members level and all true and even, so that the proper thickness shall be provided for the lathing and plastering. Where required, furring shall conform to shapes of arches, cornices, pilasters, ceiling beams, etc.

3.04 LATHING APPLICATION

- A. Furnish approved metal lathing as required for all furred and hung ceilings, enclosures for sheet-metal ducts, window heads, sills and jambs, and at all other places where required, to properly provide for the plastering, and secure same to the furring at the location indicated on Drawings and as hereinafter specified.
- B. Lath sheets shall be at right angles to the furring bars. Lath shall be securely tied to each furring bar at intervals of 6", with wire specified.
- C. All wire used by the lathing sub-contractor at the job shall be of one type. Wherever wire is required for tying splices or channels to running bars, it shall be the same wire as is used for tying lath to channels. The only other acceptable means of fastening is by means of approved clips or bolts.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

3.05 CORNER BEADS AND PLASTER STOPS - APPLICATION

A. Corner Beads

1. For the full height of all vertical salient angles in plastered walls.
2. For the full length of all horizontal salient angles in plastered surfaces which occurs 8'-0" or less above finished floor.
3. For the full length of all horizontal salient angles in plastered surfaces which may occur above the 8'-0" level as follows:

B. Casing Beads

At all locations where plaster terminates or abuts dissimilar materials except where covered by trim.

END OF SECTION

January 10, 2005 .

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 09210
PLASTER

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide materials, labor, equipment and services necessary to complete all plastering required.

1.02 RELATED SECTIONS

- A. Aluminum Projected and Casement Windows.....Section 08524
- B. Furring and Lathing.....Section 09205
- C. Painting.....Section 09900

1.03 REFERENCES

- A. American Society for Testing and Materials (ASTM), latest editions.
 - C 28 Gypsum Plasters
 - C 35 Sand
 - C 206 Finishing Hydrated Lime
 - C 841 Installation of Interior Lathing and Furring
 - C 842 Application of Interior Gypsum Plaster
- B. American National Specifications Institute (ANSI), latest edition.
 - A 42.1 Portland Cement Lime Plastering Exterior and Interior

1.04 SUBMITTALS

A. Product Data

Provide manufacturers' specifications and application instructions for each type of material specified, including the following:

1. Plaster
2. Plaster Accessories

B. Samples

Submit samples of the following materials, prior to installation, in clearly labeled containers, as required by the MMMHS Representative:

1. Gypsum Plaster
2. Hydrated Lime
3. Sand

C. Quality Control Submittals

1. Certificates: Provide material certificates from Manufacturers, Material supplier, and Contractor certifying that each material complies with, or exceeds the specified requirements.

1.05 QUALITY ASSURANCE

A. Qualifications

Company specializing in plaster installation having more than five years experience with the application of specified materials and experience on at least three projects of similar scope to project specified.

B. Regulatory Requirements

1. Building Code: Work of this Section to conform to all requirements of the New York City Building Code and all applicable regulations of other governmental authorities.

C. Single Source Responsibility

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Obtain materials from a single source for each type of material required to assure consistency in quality of performance and appearance.

D. Plaster Mock-up Samples.

1. Before commencing plaster work, submit the following mock-up samples to the MMMHS Representative for approval:
 - a. 12"x12" metal lath with a three-coat system of plaster (scratch, brown, finish), stepped to show construction and thickness of each coat. Provide sample for each type of plaster to be used on project.

E. Field Samples.

1. At the commencing of plaster work, Contractor is to provide a completed plastering of replacement window area, including an inside and outside corner and an area of plaster ceiling designated by the MMMHS Representative.
2. Do not proceed until the plastering work on the sample areas has been approved in writing by the MMMHS Representative.
3. All subsequent plastering work to conform in workmanship and appearance to that of the sample replacement window areas.

1.06 DELIVERY, STORAGE, AND HANDLING

- A. Deliver manufactured materials in original sealed container, with manufacturer's label intact and legible.
- B. Store all cement, gypsum and lime off ground, under cover and in a dry area.
- C. Protect contiguous Work from soiling, spattering, moisture, deterioration and other harmful effects which might result from plastering.

1.07 PROJECT CONDITIONS

- A. Environmental Requirements

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Do not use frozen materials in plaster mixes.
2. Do not apply plaster to surfaces that are frozen or contain frost.
3. Do not apply plaster when ambient temperature is less than 50°F.
4. Maintain required temperatures for a minimum of 24 hours prior to application, during application and until plaster has cured.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

A. Gypsum Plaster

Subject to compliance with requirements, provide products from the following manufacturer or approved equal, conforming to ASTM C 28:

1. United State Gypsum Co.; Architectural Products Division, Chicago, IL or approved equal
 - a. Gypsum Neat Plaster / Basecoat Plaster:
"Red-Top Gypsum Plaster".
 - b. Gypsum Gauging Plaster:
"Champion Gauging Plaster"
"Star White Gauging Plaster"

B. Finishing Hydrated Lime

Subject to compliance with requirements, provide products from the following manufacturers conforming to ASTM C 206, Type S or Type N.

1. United States Gypsum Co. or approved equal
 - a. "Ivory Finish Lime" - Type S
 - b. "Red Top Finish Lime" - Type N

2.02 MATERIALS

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

A. Aggregates for Base Coat Plaster; ASTM C 35. Type as listed below:

1. Sand aggregate, conforming to ASTM C 897

B. Water

Potable, free of substances capable of affecting plaster set or of damaging plaster, lath or accessories.

2.03 MIXES

A. Gypsum Plaster Base Coat Compositions

Comply with ASTM C 842 and manufacturer's directions for gypsum plaster base coat proportions which correspond to application methods and plaster bases indicated below:

1. Three-Coat Work Over Metal Lath:

a. Scratch Coat: 1 part Gypsum neat plaster with 2 parts sand.

b. Brown Coat: 1 part Gypsum neat plaster with 3 parts sand.

c. Finish Coat: as in B below.

B. Gypsum Troweled Finish Coat

Comply with ASTM C 842 and manufacturer's directions and proportion materials in parts by dry weight for finish coat as follows:

1. Gypsum Gauging Plaster: 1 part plaster to 2 parts lime.

a. Mechanically mix aggregate materials for plaster to comply with referenced application standard and with recommendations of plaster manufacturer.

2.04 MECHANICAL MIXING

A. Mechanically mix cementitious and aggregate materials for plasters to comply with applicable reference standard and with recommendations of plaster manufacturers.

PART 3 - EXECUTION

3.01 EXAMINATION OF SURFACES

- A. Examine surfaces to receive Work of this Section, preparatory Work performed by other trades, and conditions at the building. Report any defects or unsatisfactory conditions for correction to the MMMHS Representative.
- B. Starting of Work will be construed as acceptance of all surfaces and conditions as satisfactory.
- C. Corners, beads, lathing, etc., shall be in place, straight and plumb, before beginning plastering, and if any of the Work is found to be imperfect notify the MMMHS Representative to rectify it.
- D. Do not start plastering until all exterior openings have been properly closed.
- E. Do not apply finish plastering unless the permanent glazed windows have been installed.
- F. Mixing of scratch and brown coats of plaster inside of any part of the building is prohibited. Mixing finish white coat of plaster is permitted inside of the building in locations approved by the MMMHS Representative.
- G. The use of a machine made lime mortar mixed at the building or an approved gypsum plaster for all surfaces required to be plastered, except surfaces as are specified to have other finishes, shall be an option.

3.02 PREPARATION

- A. Protection
 - 1. Provide sheet metal protection for radiators and convectors in rooms to be plastered.
 - 2. Protect the Work of other trades from soiling or spattering using cover cloths or other approved means of protection. Should soiling or spattering occur, it can be removed by cleaning with wet sponges or brushes before the plaster or mortar sets, in a manner to avoid scratching, staining or other damage.

3.03 PLASTER APPLICATION, GENERAL

- A. Apply gypsum plaster materials, composition, mixes and finishes indicated to comply with ASTM C 842.
- B. Allow each coat of gypsum mortar to dry out in accordance with the manufacturer's directions prior to application of the following coat. After coat has dried out, thoroughly dampen surface prior to application of the following coat.
- C. Bring first coat of plaster to a plane by screeding horizontally or other approved method. Float to an even, straight and true surface. Trowel finish coat to a compact, hard, very smooth, polished surface. Soft, porous or unpolished surfaces and surfaces that show brush marks will not be accepted and such rejected white finish plastering will have to be removed down to the brown coat and properly re-plastered.
- D. No imperfect angles or corners will be allowed under any circumstances and any imperfect Work will call for re-plastering of all portions condemned.
- E. Do all patching required to complete the general construction Work of this Contract, leaving the Work clean and perfect in every particular at completion of the building.
- F. Finished surfaces to be plumb and level. Intersections of walls and ceilings and all intersections of walls and other surfaces to be finished square. Do not deviate more than 1/8" in 10'-0" from a true plane in finished plaster surfaces, as measured by a 10'-0" straight edge placed at any location on surface.
- G. Sand smooth-troweled finishes lightly to remove travel marks and arises.

3.04 PATCHING AND PROTECTING

- A. Repair, point up and patch plaster surfaces after work of other trades is in place and at such times as directed by the MMMHS Representative.
- B. Point up around fixtures, outlet boxes, switches, plates, fittings, piping, conduit, frames and other items abutting or extending through the plaster.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- C. Just before painting is started, thoroughly examine all plaster surfaces. Cut out and repair all imperfect portions, cracks and other defects and leave all plaster in a sound, unblemished, clean and satisfactory condition.
- D. Protect finished plaster surfaces against damages, soiling and defacement.
- E. Protect plaster work against freezing and premature drying.

3.05 CLEANING

- A. Remove temporary protection and enclosure of other Work. Promptly remove plaster from door frames, windows, and other surfaces which have been stained, marred or otherwise damaged during plastering. When plastering is completed, remove unused materials, containers and equipment and clean floors of plaster debris.
- B. Provide final protection and maintain conditions in a manner suitable to the MMMHS Representative which ensures plaster work being without damage or deterioration at time of issuance of the Certificate of Final Completion.

GA-216 Recommended Specifications for the Application
and Finishing of Gypsum Board

GA-505 Gypsum Board Products - Glossary of
Terminology

C. United States Gypsum Co.,

Gypsum Construction Handbook

1.04 SUBMITTALS

A. Product Data

Submit manufacturers' specifications for the following products: gypsum board, joint compound and insulation.

B. Samples

Submit samples of the following materials, prior to installation:

1. Gypsum Board: One, 12 inches square, each type specified.
2. Fasteners: Three , each type.
3. Corner, J and L beads: Three, 12 inch lengths, each type specified.

C. Materials Certificates

Submit certificates from the manufacturers of the specified materials stating compliance with the applicable requirements set forth for all materials specified in this Section.

D. Shop Drawings

Submit for approval showing partitions fully dimensioned.

1.05 QUALITY ASSURANCE

A. Qualifications

Installer is to be a firm with not less than (5) years of experience in the installation of specified materials.

B. Regulatory Requirements

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Building Code: Work of this sections shall conform to all requirements of N.Y.C. Building Code.
2. New York City Board of Standards and Appeals (BSA) approval, or
3. New York City Materials Equipment Acceptance (MEA)
4. Industry Standard: Comply with applicable requirements of GA-216 "Application and Finishing of Gypsum Board" by the Gypsum Association, except where more detailed or more stringent requirements are indicated, including the recommendations of the manufacturer.

C. Single Source Responsibility

Gypsum board materials shall be obtained from one of the acceptable manufacturers. Materials from more than (1) manufacturer may not be used in a system or assembly.

D. Field Samples

The MMMHS Representative will review of the first completed gypsum board installation for inspection of taping and spackling work. This installation, when approved by the MMMHS Representative, will become the benchmark for workmanship for the rest of the installation.

1.06 DELIVERY, STORAGE, AND HANDLING

- A. Deliver materials in original packages, containers or bundles bearing brand name and identification of manufacturer.
- B. Store all materials inside, under cover, in a manner to keep them dry, protected from weather, direct sunlight, surface contamination, corrosion and damage from construction traffic and other causes. Neatly stack gypsum boards flat to prevent sagging.
- C. Handle gypsum boards to prevent damage to edges, ends or surfaces. Protect metal beads and trim from being bent or damaged.

1.07 ENVIRONMENTAL REQUIREMENTS

- A. General

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Comply with requirements of all referenced gypsum board application standards and manufacturers recommendations for environmental conditions before, during and after gypsum board application.

B. Cold Weather Protection

When ambient outdoor temperatures are below 55°F, maintain continuous uniform building temperatures of not less than 55°F for a minimum of 48 hours prior to, during and following application of gypsum board and joint treatment materials and until joint and finishing compounds have dried.

C. Ventilation

Ventilate building spaces as required to remove water in excess of that required for drying of joint treatment material immediately after its application. Avoid drafts during dry hot weather to prevent too rapid drying.

D. Drying Time

Provide a minimum drying time of 24 hours between coats with additional drying time in poorly ventilated areas.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

Subject to compliance with requirements, provide products of one of the specified manufacturers conforming to ASTM C 36, C 442 and C 630:

A. Gypsum Board and Related Products

1. Georgia - Pacific Corp.
2. Gold Bond Building Products Div., National Gypsum Co.
3. United States Gypsum Co. or approved equal

B. Metal Support Materials

1. W.P. Hickman Co.
2. Milcor Division; Inryco Inc.
3. United States Gypsum Co. or approved equal

2.02 MATERIALS

A. Gypsum Board

1. General: Comply with ASTM C 36 and Fed. Spec SS-L-30, type III, class 1, style 3, taper-edged and of the grade and form specified below, in 48" widths and in such lengths as will result in the minimum number of joints.
2. Regular: Grade R, form A, 5/8" thick for single ply applications.

B. Metal Accessories

1. General: Comply with ASTM C 1047; standard accessories as recommended by manufacturers, formed of galvanized steel, beaded for concealment of flanges in joint compound. Provide corner beads, J-type and L-type edge trim beads.
2. All beads and trim shall be spackle type.

C. Joint Treatment Materials

1. Jointing System-Typical: Comply with ASTM C 475; type recommended by the manufacturer for the application shown.
 - a. Jointing system shall include reinforcing tape (plain or perforated) and compound designed as a system to be used together. Compound may be used for finishing if so recommended by the manufacturer. Jointing compound shall be asbestos free.

D. Miscellaneous Materials

1. General: Provide auxiliary materials for gypsum board work of the type and grade recommended by the gypsum board manufacturer
2. Gypsum Board Screws: Comply with ASTM C 1002.
 - a. For fastening the gypsum board in place, use flathead screws, shouldered, specially designed for use with power-driven tools, of length indicated but not less than 1" long, with self-tapping threads and self-drilling

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

points. Screws shall be steel with rust inhibited coating.

PART 3 - EXECUTION

3.01 EXAMINATION

A. Inspection

1. Prior to installation of the Work of this Section, carefully inspect the installed Work of all other trades and verify that all such Work is complete to the point where this installation may properly commence.
2. Installation is to comply with all pertinent codes regulations, and manufacturer's recommendations as approved by the MMMHS Representative.

B. Discrepancies

1. Immediately notify the MMMHS Representative.
2. Do not install gypsum board until all unsatisfactory conditions have been corrected.

C. Construction Tolerances.

Do not exceed 1/8 inch in 10 feet variation from plumb or level in any exposed line or surface except at joints between boards. Do not exceed 1/16 inch variation between planes or abutting edges or ends. Shim as required to comply with specified tolerances.

3.02 INSTALLATION

A. General

Comply with ASTM C 840 and manufacturers specified installation instructions for all gypsum board application and finishing.

B. Walls

1. Install the gypsum board to studs at right angles to the framing members. Make end joints, where required, over framing members. Position boards so that like edges abut, with tapered edges against tapered edges and mill-cut or field-cut ends

against mill-cut or field-cut ends. Do not place tapered edges against cut edges or ends. Stagger vertical joints over different studs.

C. Fasteners

Drive the specified screws with clutch-controlled power screwdrivers, spacing the screws (1¹/₄") at 12" o.c. at ceilings and screws (1") at 16" o.c. at walls.

3.03 JOINT TREATMENT

A. General

1. Inspect all areas to be joint treated, ascertaining that the gypsum board fits snugly against supporting framework.
2. Apply the joint treatment and finishing compound by machine or hand tool.

B. Embedding Compound

1. Apply to gypsum board joints in a thin uniform layer. Spread the compound not less than 3" wide at joints, center the reinforcing tape in the joint, and embed the tape in the compound. Then spread a thin layer of compound over the tape.
2. After this treatment has dried, apply a second coat of embedding compound to joints and fastener heads, spreading in a thin uniform coat to not less than 6" wide at joints, and feather edged. When thoroughly dry, sandpaper to eliminate ridges and high points.

C. Finishing

1. After embedding compound is thoroughly dry and has been completely sanded, apply a coat of finishing compound to all joints and fastener heads. Feather the finishing compound to not less than 12" wide. When thoroughly dry, sandpaper to obtain uniformly smooth surfaces, taking all necessary care to not scuff the paper surface of the gypsum board.

3.04 CORNER TREATMENT

A. Internal Corners

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Treat as specified for joints, except that the reinforcing tape shall be folded lengthwise through the middle and fitted neatly into corner.

B. External Corners

1. Install a corner bead fitting neatly over the corner and secured with the same type fasteners used for applying the gypsum board, spacing the fasteners approximately 6" o.c. and driving through the gypsum board into the framing and furring member.
2. After the cornerpiece has been secured into position, treat the corner with joint compound and reinforcing tape as specified for joints, feathering the joint compound out from 8" to 10" on each side of the corner.

3.05 OTHER METAL TRIM

A. General

The Drawings do not purport to show all locations and all requirements for metal trim in connection with the Work of this Section. Carefully study the Drawings and the installation; provide in place all metal trim normally recommended by the manufacturer of the gypsum board used.

B. Installation

Install the spackle type metal trim in strict accordance with the manufacturer's recommended methods of installation, providing not less embedment and finishing than specified above for corner treatment.

3.06 CLEAN UP

- A. In addition to the requirements of these Specifications, use all necessary care during execution of this portion of the Work to prevent scattering of gypsum board scraps and dust and to prevent tracking of joint and finishing compound onto floor surfaces. At completion of each segment of installation in a room or space, promptly pick up and remove from the working area all scraps, debris and surplus material of this Section.

Gypsum Construction Handbook

1.04 SUBMITTALS

A. Product Data

Submit manufacturers' specifications for the following products: Gypsum board, joint compound, metal furring channels, metal studs and runners.

B. Samples

Submit samples of the following materials, prior to installation, as required by the MMMHS Representative :

1. Gypsum board: One, 12 inch square, each type.
2. Furring channels: Three, 12 inch length, each type.
3. Metal studs: Three, 12 inch length, each type.
4. Submit fasteners: Three, each type.
5. Corner, J and L beads: Three, 12 inch lengths, each type specified.

C. Material Certificates

Submit certificates from the manufacturers of the specified materials stating compliance with the applicable requirements set forth for all materials specified in this Section.

D. Shop Drawings

Submit Reflected Ceiling Plans, prepared for installation purposes, at 1/4" inch = 1 foot scale. Drawings are to be coordinated with all related mechanical, electrical, and other Work above, penetrating or connected to ceiling or soffit. Show method of anchorage to building structure and framing for supported items.

1.05 QUALITY ASSURANCE

A. Qualifications

Installer is to be a firm with not less than five years

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

of successful experience in the installation of specified materials.

B. Regulatory Requirements

1. Building Code: Work of this Section shall conform to all requirements of the N.Y.C. Building Code and all applicable regulations of other governmental authorities.
2. New York City Board of Standards and Appeals (BSA) approvals or,
3. New York City Materials Equipment Acceptance (MEA) approvals
4. Gypsum Board Terminology Standard: GA-505 by Gypsum Association.

C. Single Source Responsibility

Obtain gypsum board from a single manufacturer. Obtain all furring channels, metal studs, runners and ancillary materials from a single manufacturer.

1.06 DELIVERY, STORAGE, AND HANDLING

- A. Deliver materials in original packages or bundles bearing brand name and identification of manufacturer.
- B. Store all materials inside, under cover in a manner to keep them dry, protected from weather, direct sunlight, surface contamination, corrosion and damage from construction traffic and other causes. Neatly stack gypsum boards flat to prevent sagging.
- C. Handle gypsum boards to prevent damage to edges, ends or surfaces. Protect metal furring channels from being bent or damaged.

1.07 ENVIRONMENTAL REQUIREMENTS

A. General

Comply with requirements of all referenced gypsum board application standards and manufacturers recommendations for environmental conditions before, during and after gypsum board application.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

B. Cold Weather Protection

When ambient outdoor temperatures are below 55°F. maintain continuous uniform building temperature of not less than 55°F for a minimum of 48 hours prior to, during, and following application of gypsum board and joint treatment materials, until joint and finishing compounds have dried.

C. Ventilation

Ventilate building spaces as required to remove water in excess of that required for drying of joint treatment material immediately after its application. Avoid drafts during dry, hot weather to prevent too rapid drying.

D. Drying Time

Provide a minimum drying time of 24 hours between coats with additional drying time in poorly ventilated areas.

2.01 MATERIALS

A. Furring Members

In compliance with ASTM C 645, provide galvanized cold rolled steel, thickness of base metal as indicated on Drawings, 7/8" depth, screw type hat shaped channels.

B. Furring Anchorages

In compliance with ASTM A 641, manufacturers standard wire-type clips, bolts, nails or screws as recommended by furring manufacturer.

C. Metal Studs

In compliance with ASTM C 645, provide galvanized steel, C-shaped members as indicated on Drawings.

D. Runners

In compliance with ASTM C 645, provide galvanized steel runners to match applicable assembly specified, thickness of base metal as shown on Drawings.

E. Fasteners

Provide fasteners of type, size, style, grade and class required for secure installation of framing and runners. Galvanize all fasteners and accessories.

1. Fasteners as shown on Drawings.
2. Self-Drilling Fasteners: No. 12-14 x 3/4 inch, hex washer head, self drilling fastener with pilot point.

F. Gypsum Board

In compliance with ASTM C 26; of types, edge configuration and thickness indicated below, in 48" widths by maximum length available to minimize end to end butt joints.

1. Type
 - a. Regular, unless otherwise shown on Contract Documents.
2. Edge: Taper-edged
3. Thickness: 5/8" as specified on Drawings.

G. Metal Accessories

1. General

Comply with ASTM C 1047; standard accessories as recommended by manufacturer, formed of galvanized steel, beaded for concealment of flanges in joint compound. Provide corner beads and L-type edge trim beads.
2. All beads and trim shall be spackle type.

H. Joint Treatment Material

1. General

Comply with ASTM C 475; type recommended by the manufacturer for the applications shown.
2. Jointing System

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- a. Jointing system shall include reinforcing tape and compound designed as a system to be used together and shall be only used as recommended by manufacturer of gypsum wallboard.

I. Miscellaneous Materials

1. General: Provide auxiliary materials for gypsum board work of the type and grade recommended by the manufacturer of the gypsum board.
2. Gypsum Board Screws: Comply with ASTM C 1002.
 - a. For fastening the gypsum board in place, use flathead screws, shouldered, specially designed for use with power-driven tools, of length indicated but not less than 1" long, with self-tapping threads and self-drilling points. Screws shall be steel with rust inhibited coating.

PART 3 - EXECUTION

3.01 EXAMINATION

A. Coordination of Work

Coordinate Work of this Section with the following installations:

1. Heating, Ventilation and Electrical Work required to be installed as part of Sections 15 and 16 of this Specification.

B. Verification of Conditions

1. Start of Work constitutes acceptance of existing conditions, therefore, contractor is advised to bring any discrepancies to the attention of the MMMHS Representative prior to start of Work.

3.02 INSTALLATION

- A. Metal Furring and Metal Studs for Ceilings and Soffits
1. Install metal furring channels and metal studs to existing structure at right angles. Secure members in accordance with the Drawings and manufacturer's printed installation instructions.
 2. Space furring and metal studs at 12 inches o.c. or as shown on Drawings.
 3. Install auxiliary framing at openings for light fixtures, ductwork grilles, access doors as required. Where necessary, install additional cross-reinforcing to restore lateral stability.
 4. Attach perimeter wall trim wherever gypsum board meets vertical surfaces as shown on Drawings. Mechanically join support members to each other and butt-cut to fit into perimeter trim piece.
- B. Gypsum Board Installation for Ceilings and Soffits
1. Comply with gypsum board application and finishing standards outlined in ASTM C 840, and GA 216.
 2. Install gypsum board to furring channels and metal studs at right angles to the members; make end joints over the framing members. Fasten gypsum wallboard ceilings and soffits with screws.
 3. Locate exposed end-butt joints as far from center of walls and ceilings as possible, and stagger not less than 1 foot in alternate courses of board.
 4. Install ceiling boards in the direction and manner which shall minimize the number of end-butt joints.
 5. Install exposed gypsum board with face side out. Do not install imperfect, damaged or damp boards. Butt boards together for a light contact at edges and ends with not more than 1/16 inch open space between boards. Do not force into place.
 6. Locate either edge or end joints over supports or where intermediate supports or gypsum board back-blocking is provided behind end joints. Position boards so that like edges abut, with tapered edges

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

against tapered edges and mill-cut or field-cut ends against mill-cut or field-cut ends.

7. Attach gypsum board to supplementary framing and blocking provided for additional support at openings and cutouts.

C. Trim Installation

1. General: Use the same fasteners to anchor trim accessory flanges as required to fasten gypsum board to the supports.
2. Install metal corner beads at external corners of drywall work.
3. Install spackle type metal edge trim whenever edge of gypsum board would otherwise be exposed or semi-exposed. Provide type with face flange to receive joint compound. Install L-type trim where work is tightly abutted to other work.

D. Finishing

1. Apply compound treatment at gypsum board joints (both directions), flanges of trim accessories, penetrations, fastener heads, surface defects and elsewhere, as required to prepare Work for finishing.
 - a. Apply joint tape at joints between gypsum boards using bedding joint compound.
 - b. Apply topping joint compound in three coats (not including prefill of openings in base), and sand between last two coats and after last coat.
2. Refer to Division 9 Sections on painting, and coating for finishes to be applied to drywall work.

3.03 PROTECTION

- A. Provide protection and maintain conditions until final acceptance so that Work will remain without damage or deterioration at time of issuance of Certificate of Final Completion.

END OF SECTION

SECTION 09310

CERAMIC TILE

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide all ceramic tile work indicated on the Drawings and as specified herein, including, but not limited to: glazed ceramic tile, ceramic mosaic tile, all trim units, grout, setting materials and marble saddles.

1.02 RELATED SECTIONS

- A. Cast-in-Place Concrete Section 03300
- B. Unit Masonry Section 04200
- C. Sheet Membrane Waterproofing Section 07110
- D. Joint Sealers Section 07900

1.03 REFERENCES

- A. Tile Manufacturing Standard

Comply with requirements of ANSI A137.1 "American National Standard Specifications for Ceramic Tile".
- B. Tile Installation Standard

Comply with the requirements of the Tile Council of America's Handbook for Ceramic Tile Installation, 32nd Edition-1994.

1.04 SUBMITTALS

- A. Product Data

Submit manufacturers' specifications and installation instructions for the following:
 - 1. Each type of tile and trim units specified.
 - 2. Setting materials specified .
 - 3. Grouting materials specified.

B. Shop Drawings

Submit Drawings indicating tile patterns and locations and width of control and expansion joints in tile surfaces.

C. Samples

1. Initial Selection: Submit manufacturer's color charts consisting of actual tiles or sections of tile showing full range of colors, textures, and patterns available for each type of tile indicated. Include grout manufacturers standard range of colors for each grout type required.

2. Verification Samples:

a. Samples of each type of tile, color and pattern specified, 12" x 12" sample with tile mounted on plywood or hardboard panels and grouted.

b. Trim units: 2, each type, color and shape specified.

D. Quality Control Submittals

1. Master Grade Certificate

a. Before setting any tiles, furnish to the Authority (for each shipment and type of tile) a certificate of grade, properly filled in on a Master Grade Certificate of the form recommended by the Department of Commerce.

b. Certificate shall be signed by the manufacturer of the tiles and by the subcontractor for the Work, stating the grade, kind and full quantities of tiles; and give identification marks for all packages of tiles furnished under this Contract.

c. Brand packages with corresponding identification marks.

1.05 QUALITY ASSURANCE

A. Manufacturer

1. Furnish tile of the same manufacturer and from the same origin for each tile type and color.
2. Furnish setting and grouting materials of the same manufacturer and from the same origin for each tile type and method of installation, unless otherwise specified.

B. Qualifications

Installer is to be a firm who has a minimum of five years experience with the installation of specified materials.

1.06 DELIVERY , STORAGE, AND HANDLING

A. Delivery and Storage

1. Deliver all materials of this Section to the job site in their original unopened containers with grade seals unbroken and labels intact and legible.
2. Store all materials under cover in a manner to prevent damage and contamination by water, freezing, foreign matter or other causes. Store only the specified materials at the job site in location designated by the Authority's Representative.

B. Protection

Use all means necessary to protect ceramic tile materials before, during, and after installation and to protect the installed Work and materials of all other trades.

C. Replacements

In the event of damage, immediately make all repairs and replacements necessary to the approval of the Project Architect and at no additional cost to the Authority.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1.07 PROJECT CONDITIONS

- A. Maintain environmental conditions and protect Work during and after installation to comply with referenced standards and manufacturer's printed recommendations.
- B. Vent temporary heaters to exterior to prevent injury to persons or damage to tile work from carbon dioxide or carbon monoxide buildup.
- C. Maintain temperatures at not less than 50°F. (10°C) in tiled areas during installation and for 7 days after completion, unless higher temperatures are required by referenced installation standard or manufacturer's instructions.

1.08 MAINTENANCE MATERIALS

A. General

Deliver stock of maintenance materials to Authority's Representative (to be transferred to the custodian). Furnish maintenance materials from same manufactured lot as materials installed and enclosed in protective packaging with appropriate identifying labels.

- 1. Tile: Furnish not less than one box for each 25 boxes or fraction thereof, for each type, color, pattern and size installed.
- 2. Wall Base: Furnish not less than 40 linear feet of each type, color, and size installed.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

A. General

- 1. Furnish tile by the same manufacturer and from the same origin for each tile type.

B. Ceramic Tile

- 1. American-Olean Tile Co., Lansdale, Pennsylvania 19446.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Dal-Tile Corporation, Dallas, Texas 75217.
3. U.S. Ceramic Tile Co., E. Sparta, Ohio 44626.

D. Mortars, Adhesives and Grout

1. American Olean Tile Co., Lansdale, Pennsylvania 19446.
2. Boiardi Products Corp., Little Falls, New Jersey 07424.
3. Bostik, Middleton, Massachusetts 01949.
4. Dal-Tile Corporation, Dallas, Texas 75217.
5. Dap Inc., Dayton, Ohio 45401.
6. Laticrete International, Inc., Bethany, Connecticut 06524-3498.
7. Summitville Tiles, Inc., Summitville, Ohio 43962.
8. Tec an H.B. Fuller Co., Palatine, Illinois 60067.

2.02 MATERIALS

A. Tile Products

1. Unglazed Ceramic Mosaic Tile complying with Section 5.1 ANSI A137.1; Standard Grade.
 - a. Standard sizes: 1" x 1" x 1/4" , 1" x 2" x 1/4", 2" x 2" x 1/4" .
 - b. Colors: shall be selected by Project Architect from clear and/or textured porcelain tile. Floor and base tile of same colors.
 - c. Factory mounted.
 - d. Edges: Smooth, all purpose edge.
 - e. Average absorption: not to exceed 1/2 of 1%.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Glazed ceramic tile complying with Section 6.1 ANSI A137.1; Standard Grade.
 - a. Standard size: 4 1/4" x 4 1/4" x 5/16" - unless otherwise specified.
 - b. Colors: shall be selected by Project Architect.
 - c. Edges: square, cushion edged.
3. Trim units including cap, bullnose, cove, external & internal corners to match characteristics of adjoining flat tile in size and color.
 - a. Cove Base: 6" x 6" with 3/4 inch to 1 inch maximum radius sanitary cove.
 - b. Shapes: Provide manufacturers standard special shapes to suit installation. Provide bullnosed units at external corners and wainscot. Provide square corners at internal corners.
4. Inscriptions: There shall be one 4 1/4 by 8 1/2 inch glazed wall tile in locations where indicated, bearing the inscription "Wash your hands before leaving this room" as shown on the Standard Details. The lettering of this inscription shall be beneath the final glazing of the tile. This applies to pupils' toilets only.

B. Setting Materials

1. Portland Cement Mortar: Complying with ANSI A108.1
 - a. Portland Cement - ASTM C-150 Type 1
 - b. Sand - ASTM C-144
 - c. Hydrated Lime - ASTM C-206 or ASTM C-207 Type S
 - d. Water - Clean and potable.

- e. Follow recommendations outlined in TCA Handbook for Ceramic Tile Installation for mortar mix proportions.
2. Latex Portland Cement Mortar: Thin-setting bed - complying with ANSI A118.4.
 - a. Prepackaged dry mortar mix incorporating dry polymer additive in the form of a re-emulsifiable powder to which only water is added at job site, or latex additive, serving as a replacement for part or all of gauging water, added at job site to dry mortar mix. Comply with mixing directions of latex additive manufacturer and mortar manufacturer.
 - b. Follow recommendations outlined in TCA Handbook for Ceramic Tile Installation.

C. Grouting Materials

1. Commercial Portland Cement Grout: compound of Portland cement and additives, factory blended to decrease shrinkage and increase moisture resistance, and complying with ANSI A118.6.
2. Commercial Sanded Portland Cement Grout: provide acid resistant grout complying with ANSI A118.6.
 - a. Dap Durabond AR-20 Grout.
 - b. Boiardi Elastiment AR Grout.

Mix latex additive to above grouts for thin set method of floor tile installation. Comply with manufacturer's specifications for mixing.

3. Latex Portland Cement Grout: compound of Portland Cement grout with latex additive, complying with ANSI A118.6.
4. Epoxy Grout: Two component mix consisting of specially graded silica aggregate (#7 on M.O.H. Scale of Hardness), color fast pigments, a special blend of activating hardeners and liquid epoxy resin. Mixture to be free of water and organic

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

solvents and formulated for high temperature and chemical resistance, water cleanable before setting and complying with ANSI A118.3 and TCA Formula AARII-HT.

- a. American Olean AO-6000 Epoxy Mortar and Grout.
 - b. Summitville S-400 Setting and Grouting Epoxy.
5. Colors: Unless otherwise indicated, wall type grout shall be white and floor type grout shall be grey.

D. Miscellaneous Materials

1. Tile Cleaner: Product acceptable to tile and grout manufacturers and as recommended by Ceramic Tile Institute.

2.03 MIXES

- A. Mix mortars, grouts and additives to comply with referenced standards and manufacturers recommendations. Accurately proportion materials for mixing to produce mortars and grouts of uniform quality with optimum performance characteristics.

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Surfaces to receive tile shall be clean, firm and smooth.
- B. Inspect all surfaces prepared by others before starting tile work and report all unsatisfactory conditions to the Authority. Verify that wall surfaces are level, plumb and square and that floor fill slopes to drains 1/8" per foot. Starting tile work shall be considered acceptance of Work of others and existing substrate.
- C. Before proceeding with any tile work, verify:
 1. Prior to application of thick set tile flooring systems, that sheet membrane waterproofing has been installed over prepared substrate and tested

January 10, 2005.

Soundproofing of
Monsignor McClancy Memorial High School

for leakage as part of Work of Section 07110 -
Sheet Membrane Waterproofing.

2. That plumbing contractor has installed all sleeves, drains, flashings and piping and that all piping systems have been run and tested for leakage.

3.02 PREPARATION

- A. Prepare floors, walls and base substrates for tile installation in accordance with Tile Council of America's and product manufacturer's recommendations and requirements for wall and floor systems specified.

3.03 INSTALLATION, GENERAL

- A. ANSI Tile Installation Standard

Comply with applicable parts of ANSI 108 series of tile installation standards included under American National Standard Specifications for Installation of Ceramic Tile.

- B. TCA Installation Guidelines

Comply with Tile Council of America installation methods specified.

- C. All wall tile shall be laid up with vertical joints not over 1/16" thick or in alignment with existing joint lines, continuous and unbroken in perfect alignment. For tile mounted in sheets, make joints between tile sheets same width as joints within sheets so extent of each sheet is not apparent in finish Work.

- D. Tile shall be set to the required levels and planes with true lines and angles. Layout tile work and center tile fields in both directions in each space and on each wall area unless otherwise indicated on Drawings. Adjust to minimize tile cutting.

- E. Cut edges of tile shall be carefully ground and jointed. Do all cutting and drilling required for setting and as may be required by other contractors in a neat manner without marring the surface. Fit tile closely to electrical outlets, piping, fixtures and other penetrations so that plates, collars, or covers overlap tile.

- F. The tile setter shall cut holes in the base tile of toilet rooms where bronze tubing extends through the partitions into the adjoining pipe spaces.
- G. Set rings for floor type water closets, as specified in Division 15 of this Specification.

3.04 FLOOR TILE INSTALLATION METHODS

A. Ceramic Mosaic Tile

Install tile to comply with requirements indicated below for setting bed methods, TCA installation methods related to types of subfloor construction, and grout types:

- 1. Thick set method, reinforced, on interior concrete subfloors: mortar bed of 1 1/4" to 2" thick, comply with TCA F121-94.
 - a. Commercial Portland Cement Mortar Bed: ANSI A108.1
 - b. Grout: Commercial Sanded Portland Cement type grout - acid resistant.
 - c. Waterproof membrane: Provided as part of Work of Section 07110 - SHEET MEMBRANE WATERPROOFING.
 - d. Expansion joints mandatory. Provide in accordance with TCA Method EJ171-94.
 - e. Mortar bed to be uniform depth within range specified above. Slope to be in fill installed as part of work of Section 03300 - CAST IN PLACE CONCRETE.
- 2. Thin set method, interior concrete subfloors: mortar bed of 3/32" to 1/8", comply with TCA F122-94.
 - a. Latex Portland Cement Mortar Bed: ANSI A118.4
 - b. Grout: Commercial Sanded Portland Cement type grout - acid resistant with latex additive.
 - c. Waterproof membrane: Cold applied liquid rubber provided as part of Work of this

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Section. Prepare slab and install membrane as per membrane manufacturer's recommendations and specifications.

- d. Expansion joints: follow waterproof membrane manufacturer's directions and recommendations.

3.05 WALL TILE INSTALLATION METHODS

A. General

Install wall tile and base to comply with requirements indicated below for setting bed methods, TCA installation methods related to subsurface wall conditions and grout types.

1. Thick set method, interior plaster, cement, and masonry: mortar bed of 3/4" to 1 1/2" thick comply with TCA W221-94.

- a. Commercial Portland Cement Mortar Bed: ANSI A108.1
- b. Scratch Coat: Portland cement mortar proportioned as per TCA W221.
- c. Bond Coat: Portland cement paste on workable mortar bed.
- d. Grout: Commercial Portland Cement.
- e. Metal Lath: Galvanized expanded metal.
- f. 4 mil polyethylene membrane.
- g. Expansion joints mandatory. Provide in accordance with TCA Method EJ171-94.

2. Thick set method, interior plaster, cement, and masonry: mortar bed of 3/8" to 3/4" thick comply with TCA W222-94.

- a. Commercial Portland Cement Mortar Bed: ANSI A108.1
- b. Bond Coat: Portland cement paste on workable mortar bed.

- c. Metal Lath: Galvanized expanded metal.
- d. Grout: Commercial Portland Cement.
- e. 4 mil polyethylene membrane.
- f. Expansion joints mandatory. Provide in accordance with TCA Method EJ171-94.

3.06 GROUT APPLICATION

- A. Where possible, tile should not be grouted sooner than 48 hours after setting, to permit complete evaporation of solvents in the adhesive.
- B. Clean all joints of dust, dirt, and excessive adhesive. Adhesive may be removed with a sharp knife or solvent.
- C. When grouting wall tile thoroughly soak all joints with clean water. This is important as grout will not cure properly unless thoroughly soaked.
- D. Mix grout with clean water to a consistency of thick cream. Completely fill all joints and allow to set for a few minutes. Remove the surplus grout and finish flush and true. As soon as the grout has reached its initial set, thoroughly wash with a sponge and clean water. Polish with clean, dry cloths.

3.07 CLEANING

- A. Upon completion of all ceramic tile installation and grouting, thoroughly clean the exposed surfaces of all ceramic tiles so they are free of foreign matter including grout.
- B. Unglazed tile may be cleaned with acid solutions only when permitted by tile and grout manufacturer's printed instructions, but not sooner than 14 days after installation. Protect metal and vitreous plumbing fixtures from effects of acid cleaning. Flush surface with clean water before and after cleaning.

3.08 PROTECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- A. As soon as the tile work in each space has been grouted and cleaned, it shall be covered with either reinforced kraft paper (sisal kraft) or other heavy covering. Floor covering shall be kept and maintained until completion of the Work of all trades or as otherwise directed by the Authority, when it shall be removed without damage to tile or adjoining Work.

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 09510
ACOUSTICAL CEILINGS

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide acoustical ceiling Work as indicated on Drawings and as specified herein, including the following:
 - 1. Acoustical Mineral Fiber Tile and Panel Ceilings.
 - a. Concealed spline installation
 - b. Lay-in panel installation - (exposed-grid)
 - c. Direct (adhesive) installation
 - 2. Acoustical Wood Fiber Panel Ceilings.
 - Lay-in panel installation - (exposed-grid)
 - 3. Aluminum Metal Pan Ceilings.
 - Concealed spline installation metal snap-in panels.

1.02 RELATED SECTIONS

- A. Support System for Suspended Ceilings.....Section 05170
- B. Access Doors.....Section 08305
- C. Gypsum Drywall - Interior Ceilings and Soffits.....Section 09253
- D. Divisions 15 and 16 Sections for related Mechanical and Electrical Work installed in ceilings.

1.03 REFERENCES

- A. American Society for Testing and Materials (ASTM), latest edition.

 - C 635 Metal Suspension System for Acoustical Tile and Lay-In Panel Ceilings.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

C 636 Installation of Metal Ceiling Suspension
Systems for Acoustical Tile and Lay-In Panels.

Certifications

Furnish manufacturers certification from an independent testing laboratory acceptable to authorities having E 84 Surface Burning Characteristics of Building Materials.

E 119 Method for Fire Tests of Building Construction and Materials.

E 1264 Standard Classification for Acoustical Ceiling Products.

D 1779 Specification for Adhesion for Acoustical Materials

E 413 Determination of Sound Transmission Class

B. AMA -1-II Ceiling Sound Transmission Test By Two-Room Method

C. Underwriters Laboratories Inc. (UL)

Fire Resistance Directory.

D. Acoustical and Insulation Materials Association, "Job Conditions".

1.04 DEFINITIONS

A. Direct Suspension System

Directly fastened to floor or roof construction above, installed as part of the Work of Section 05170.

B. Indirect Suspension System

Installed as part of the Work of this Section, as specified by ceiling system manufacturer to be attached to direct suspension system.

1.05 SUBMITTALS

A. Product Data

Submit manufacturer's product specifications and installation instructions for acoustical ceiling materials, indicating compliance with applicable regulations.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

B. Shop Drawings

Submit shop drawing details of reflected ceiling plans indicating mechanical, electrical and other Work above, penetrating or connected to acoustical ceiling. Indicate framing and support details for Work supported by the suspension system.

1. Scale: 1/4"=1'-0" required on Reflected Ceiling Plans.

C. Samples

1. Submit samples of the following materials, prior to installation;
 - a. Acoustical panels: 12"x12" samples of each type, pattern and color.
 - b. Metal Pan Ceiling units: Full size sample of each type and finish.
 - c. Exposed runners and moldings: 12" long samples of each color and system type required.
 - d. Concealed suspension members: 1 set of each assembly specified.
 - e. Adhesive: 1 pint of adhesive used for direct attachment of acoustical panels to substrate.
2. Forward each approved sample type to Mechanical Installer for purpose of matching diffusers.

D. Certificates

Submit certificates from manufacturer of acoustical ceiling units and suspension systems attesting that their products comply with specified requirements.

1.06 QUALITY ASSURANCE

A. Qualifications

Installer is to be a firm with not less than five years of successful experience in the installation of specified materials.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

B. Regulatory Requirements

1. Building Code: Work of this Section shall conform to all requirements of the N.Y.C. Building Code and all applicable regulations of other governmental authorities.
2. New York City Board of Standards and Appeals (BSA) approvals.
3. New York City Materials Equipment Acceptance (MEA) approvals.
4. Acoustical and Insulating Materials Association

C. Certifications

Furnish manufacturers certification from an independent testing laboratory acceptable to authorities having jurisdiction, that acoustical tile units comply with fire test performance characteristics, including FS-S-SS-S118B.

D. Fire Performance Characteristics

Provide acoustical ceiling components that are identical to those tested for the following fire performance characteristics, according to ASTM test method indicated, by UL or other testing and inspecting agency acceptable to authorities having jurisdiction. Identify acoustical ceiling components with appropriate marking of applicable testing and inspecting agency.

Surface Burning Characteristics: Tested per ASTM E84

1. Flame Spread: 25 or less.
2. Smoke Developed: 25 or less.

E. Fire Resistance Ratings

As shown by reference to design designation in UL "Fire Resistance Directory" for floor, roof, or beam assemblies in which acoustical ceilings function as a fire protected membrane; tested per ASTM E 119. Provide protection materials for lighting fixtures and air ducts to comply with requirements of rated assembly shown on Drawings.

F. Coordination of Work

Coordinate layout and installation of acoustical ceiling units and suspension system components with other work supported by, or penetrating through ceilings, including light fixtures, HVAC equipment, fire-suppression systems and partitions. Resolve all discrepancies and conflicts prior to start of Work.

G. Pre-installation Conference

Prior to start of Work, installer of acoustical system and representatives of trades involved are to have a conference at the job site, in the presence of the Authority representative, to discuss coordination of ceiling system installation and resolve all discrepancies.

1.07 DELIVERY, STORAGE, AND HANDLING

A. Delivery

Deliver all acoustical units in manufacturer's original, unopened packages fully identified with type, finish, performance data and compliance labeling.

B. Storage

1. Store materials where they will be protected against damage from moisture, direct sunlight, surface contamination or other causes.
2. Open ends of tile containers 24 hours prior to installation to stabilize moisture content and temperature.

C. Handling

Handle acoustical ceiling units carefully to avoid chipping edges or damaging units in any way.

1.08 PROJECT CONDITIONS

A. Space Enclosure

Do not install interior acoustical ceilings until space is enclosed and weatherproof, wet work in space is completed and nominally dry, work above ceilings is completed, and until air temperature and humidity will be maintained at values near those indicated for final occupancy.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1.09 GUARANTEE

- A. Work showing any of the following defects within the one year guarantee period specified in the Contract shall be corrected as directed by the Authority.
1. Loose tiles or tiles improperly secured
 2. Tiles showing discoloration or cracking.

1.10 EXTRA MATERIALS

- A. Deliver extra materials to the Authority's Representative (to be transferred to the custodian). Furnish extra materials, described below, matching products installed, packaged with protective covering for storage and identified with appropriate labels.
1. Acoustical Ceiling Units: Furnish _____ square feet of full size units.
 2. Metal Pan Ceiling Units: Furnish _____ square feet of full size units.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

- A. Acoustical Tile
1. Mineral Composition Tile
 - a. Armstrong World Industries - "Travertone"
 - b. The Celotex Corp. - "Celotone"
 - c. USG Acoustical Products Co. - "Acoustone"
- B. Acoustical Panels
1. Mineral Composition Panels (24" x 24" x 5/8" and 24" x 48" x 5/8")
 - a. Armstrong World Industries - "Minaboard"
 - b. The Celotex Corp. - "Hytone"
 - c. USG Acoustical Products Co. - "Auratone"

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Wood Fiber Composition Panels: Tectum, Inc., Newark, Ohio - "Tectum Acousti-Tough"
3. Aluminum Metal Pan Ceiling Units
 - a. Steel Ceilings, Coshocton, Ohio.
 - b. Chicago Metallic Corp., Baltimore, MD 21227
- C. Indirect Metal Suspension Systems
 1. Chicago Metallic Corporation
 2. Donn Corporation; Division of United States Gypsum Interiors, Inc.
 3. W.A.V.E. (Worthington Armstrong Venture Enterprises)

2.02 MATERIALS - ACOUSTICAL TILES AND PANELS

A. Mineral Fiber Tile and Panels

Provide Form 1 units per ASTM E1264; of designation, style, finish, color, STC range, edge detail and size as indicated below:

1. Direct (Adhesive) Installation on Gypsum Drywall, Plaster, or Concrete (Cast in Place):

Style:	Fissured
Size:	12" x 12" x 3/4"
Edge Profile:	Beveled
Weight:	1.33 lbs./sq. ft.
NRC:	.65 - .75
CSTC Range:	30-34
Color:	White
Finish:	Vinyl Latex Paint

2. Suspended (Concealed Spline) Installation

Style:	Fissured
Size:	12" x 12" x 3/4"
Edge Profile:	Square - K4C4
Weight:	1.33 lbs./sq. ft.
NRC:	.65 - .75
CSTC Range:	30-34
Color:	White
Finish:	Vinyl Latex Paint

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

3. Suspended (Exposed grid, lay-in) Installation

Style: Non-Directional Fissured
Size: 24" x 24" x 5/8", 24" x
48" x 5/8", or as
specified.
Edge Profile: Square, or as specified.
Weight: 0.63 lbs./sq. ft.
NRC: Min. .50 - .60
STC Range: Min. 30-34
Color: White
Finish: Vinyl Latex Paint
Relative Humidity Resistance to 90% R. H./90° F.

B. Wood Fiber Composition Panels

Provide units to meet ASTM E1264 and to meet specifications outlined below:

1. Suspended (Exposed-Grid) Installation

Style: Tectum "Acousti-tough"
Size: 24" x 24" x 1" up to
8' lengths or as specified.
Edge Profile: Square
Weight: 1.63 lbs./sq. ft.
NRC: .45.
Color: White
Finish: Factory painted white

C. Aluminum Metal Pan Ceiling Units

In compliance with ASTM C 423, provide units as described below:

1. Suspended (Concealed Spline) Installation

Style: Unperforated, metal-pan,
lock-in type w/snap bar.
Size: 12" x 12" units, 12" x
24" or as specified.
Edge Profile: Square, flush panel
NRC: .81 minimum
Color: Aluminum or Baked white
enamel.
Finish: Lacquered Mill Finish for
aluminum color material
Thickness: Aluminum Alloy 3003-H14,
.032" thickness.

- D. Provide UL fire-rated ceiling systems as indicated on the Drawings, using tile or panels as specified, and with ratings as stipulated.

2.03 MATERIALS - METAL SUSPENSION SYSTEMS - INDIRECT HUNG

A. Concealed Spline Suspension System

Manufacturer's standard system; with face width, design and finish as selected by the Architect.

1. Structural Classification: Heavy-Duty System - ASTM C 635.
2. Selected System: Non-Fire Rated, Single Web, Indirect Hung, "Concealed Z System" as manufactured by Chicago Metallic Corporation, or accepted equal, including but not limited to the following:
 - a. Main Runners: Conform to ASTM C 635 - heavy duty classification; install to direct suspension system.
 - b. Main runners, cross tees, spacer bars, variable placement tees, grid adapters, splines and access components shall be of cold rolled steel with a protective coating.
 - c. Wall angle moldings and channel moldings shall be of cold rolled steel with a protective coating and a standard (white) factory applied paint finish, unless otherwise indicated, scheduled or selected by Architect.
 - d. Accessories: Couplings, clips, splines and miscellaneous accessories required for complete installation.
 - e. Access: MFG standard downward access system with units in any location removable by inserting a special hooktool between tiles into slot at end of cross member and disengaging cross member from main member.

B. Concealed Mechanical Suspension System (Indirect Hung) for Metal Pan Units

Manufacturer's standard system complete with all required utility angles, snap bars and slip molds, formed of not less than 20 gage galvanized steel, or tee suspension runners. Include the required framing and support for

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

light fixtures and other items occurring in or on the ceiling with maximum deflection not to exceed 1/360 of the span. Include the following items:

1. Secondary (Indirect Hung) suspension system.
2. Metal wall moldings.
3. Provide accessible tile system, w/pull down knobs.

C. Exposed Grid Suspension System

Manufacturer's standard system, with face width, design and finish as selected by the Project Architect.

1. Structural Classification: Heavy-duty system in accordance with ASTM C 635.
2. Face width: 15/16" face or as otherwise specified.
3. Main runners: Install to direct suspension system. Conform to ASTM C 635 for heavy-duty classification.
4. Hold-Down Clips for Non-Fire-Rated Ceilings: For interior ceilings composed of lay-in panels, provide hold-down clips spaced 2'-0" o.c. on all cross tees.
5. Impact Clips: Where specified for use in high impact areas, such as corridors and gymnasiums, provide manufacturer's standard impact clip or "keep clip" system designed to absorb impact forces against lay-in panels. Provide a minimum of 2 clips per panel.

2.04 MISCELLANEOUS MATERIALS

A. Tile Adhesive

Comply with ASTM D 1779 or FS-MMM-A-00150, factory made product recommended by manufacturer, bearing UL label for Class 0-25 flame spread.

B. Primer

In accordance with manufacturer of acoustical tile adhesive, substrate shall be primed with one of the following products prior to application of adhesive to remove any residual which would prevent proper attachment of tile:

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

1. Chemical Wash
 2. Sizing
 3. Adhesive base or primer
- C. Edge Moldings and Trim Pieces
- Provide manufacturer's standard molding for edges and penetrations of ceiling units which fit with type of edge detail and suspension system indicated.
- D. Tile Fasteners
- Cadmium plated, type recommended by tile manufacturer, but for not less than ¼" penetration of substrate.
- E. Acoustical Sealant
- Resilient, non-staining, non-shrinking, non-skinning, non-drying, non-sag sealant intended for interior sealing of concealed construction joints:
1. Products: Subject to compliance with requirements, provide one of the following:
 - a. BA-98; Pecora Corp.
 - b. Tremco Acoustical Sealant; Tremco.
- F. Drop Clips
- 18 gage galvanized steel with key hole slot.
- G. Wedges
- Furnish and install wedges fabricated of 26 gage galvanized steel, size and dimensions indicated on Drawings.

PART 3 - EXECUTION

3.01 EXAMINATION

- A. Examine the building before beginning Work to determine that it is properly enclosed and the structure is in proper condition to receive acoustical materials and suspension system. Area shall be broom cleaned and uninterrupted for free movement of rolling scaffold. Do not proceed until satisfactory conditions prevail.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- B. Verify that direct suspension system has been installed properly, that main runners are spaced evenly and have been leveled to a tolerance of 1/8" in 12' measured both lengthwise on each runner and transversely between parallel runners so that indirect suspension system installation may proceed accurately.
- C. Start of Work constitutes acceptance of existing conditions, therefore, contractor is advised to bring any discrepancies to the attention of the Authority prior to start of Work.

3.02 PREPARATION

A. Coordination

Provide and coordinate the locations of inserts, clips, or other supports for support of acoustical ceilings.

- B. Measure each ceiling area and establish layout of acoustical units to balance border widths at opposite edges of each ceiling. Avoid use of less than half width units at borders and comply with approved shop drawings of reflected ceiling plans.

C. Adhesive Tile Installations

1. Before installing adhesively-applied tile on wet-placed substrate such as cast in place concrete or plaster, test and verify that moisture level is below tile manufacturer's recommended limits.
2. Surface Preparation: Remove dirt, dust, oil, grease, and other foreign matter that may impair proper bonding of the tile adhesive. Clean and prepare substrate in accordance with the adhesive manufacturer's instructions and as specified.
 - a. Existing Painted Surfaces: Remove loose, peeling, and blistered coatings. Sand glossy surfaces to a dull finish.
 - b. Concrete Surfaces: Remove laitance, fins, and other defects that may impair bonding of the tile adhesive or may prevent alignment of tiles in a uniform plane.

3.03 INSTALLATION - GENERAL

- A. Install materials in accordance with manufacturer's printed instructions and in compliance with ASTM C 636,

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

governing regulations, fire resistance rating requirements, as indicated and

1. Coordinate requirements for Work of other trades to be built into ceiling system. Provide supplementary framing as required.
- B. Arrange directionally-patterned units (if any) in manner shown by reflected ceiling plans, or as approved by the Project Architect. Install in patterns indicated, (balanced borders all sided) symmetrical or centered about center line or corridors, panels, fixtures, beam haunches, rooms, spaces.
- C. Cut as required for installation of electric fixtures, air diffusers, grilles, access doors, provided under other contracts. (Verify sizes and locations with other trades).
- D. On completion, the acoustic ceilings shall present a uniform plane surface, free from blemishes and imperfections.
- E. Install edge moldings of type indicated at perimeter of acoustical ceiling area and at locations where necessary to conceal edges of acoustical units.
 1. Sealant Bed: Apply continuous ribbon of acoustical sealant, concealed on back of vertical leg before installing moldings.
 2. Screw-attach moldings to substrate at intervals not over 16" o.c. and not more than 3" from ends, leveling with ceiling suspension system to tolerance of 1/8" in 12'-0". Miter corners accurately and connect securely.
- F. Install acoustical panels in coordination with suspension system with suspension members concealed by support of tile units. Scribe and cut panels to fit accurately at borders and penetrations.

3.04 DIRECT (ADHESIVE) TILE INSTALLATION

- A. Apply primer as specified herein to all concrete surfaces prior to cementing tiles in place.
- B. Remove loose dust from backs of tiles by brushing and then priming them with thin coat of adhesive.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- C. Cement acoustic tile directly to concrete ceiling slab, between beam haunches and to plaster or gypsum board ceiling with (4) spots of adhesive to each square foot of tile. Each spot of adhesive shall produce a surface of not less than (2) inches in diameter after tile has been pressed in place.
- D. Fit adjoining tiles to form neat and uniform hairline joints that are straight and parallel to the room axis in both directions. Install directionally patterned or textured tiles in a checkerboard pattern unless otherwise indicated.
- E. Scribe and cut tile to fit accurately at ceiling edges and penetrations. Install molding at ceiling perimeter, openings, cut-outs and where otherwise indicated.

3.05 ALUMINUM METAL PAN CEILING INSTALLATION

- A. Provide complete installation in accordance with ceiling manufacturer's recommendations.
- B. Running or snap bars spaced as determined and supported by hanger assembly from anchorage devices spaced 4'-0" o.c. maximum secured to structure.
- C. Provide additional running or snap bar arrangements at mechanical installations, support with hangers secured to structure. Space hangers as required by running or snap bar installation.
- D. Provide two (2) aluminum pulls at each pan when required for loudspeakers, valves, dampers, access doors, etc.
- E. After installation, clean metal pans of all soil marks in a manner and with materials recommended by the manufacturer.
- F. Furnish and install a minimum of four (4) hangers at all light fixture locations in accordance with manufacturer's standards.
- G. Install the frames supplied by Electrical, Heating and Ventilation and Plumbing installers for their respective diffusers, grilles, access doors or electrical lighting fixtures.

3.06 WOOD FIBER PANEL INSTALLATION

- A. Installation shall be in accordance with manufacturers latest printed specifications and instructions.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- B. Wood fiber panels shall be installed with an exposed-tee suspension system classified "Heavy-duty" complying with ASTM C 635 - Standard Specification for Metal Suspension Systems for Acoustical Tile and Lay-in Panel Ceilings.
- C. Suspension system shall be sufficiently rigid to support ceiling mounted lighting fixtures; provide for necessary cut-outs or supports for mechanical ventilation.
- D. Where impact ceiling system is required to be installed, such as in gymnasiums or play areas, provide manufacturer's standard "keep clips" minimum 2 per panel, following all requirements listed below.

3.07 IMPACTION CEILING SYSTEM INSTALLATION

- A. Must absorb 30 g's of energy.
- B. Must accept a force such as a basketball striking the ceiling plane with sufficient velocity to cause the panel to accelerate at a rate of 20" per second. The panel must also be capable of accepting the decelerating force required to rebound it back into proper position on the grid, then shall not break, crack, or fall out as a result of this or equivalent abuse.
- C. All acoustical material must be accessible and removable for access into the plenum at any location.
- D. Impaction Deceleration Clip or "keep clip" shall be formed of spring steel to absorb impact, snapping panels back in place.
- E. The exposed suspension components shall ensure proper operation and rebound of the Impaction Deceleration Clip. The suspension components shall be Underwriters Laboratories labeled for two hour fire resistance rating.
- F. Installation shall be in full accordance with manufacturer's instruction booklet in addition, recommendations outlined in ASTM Specification C 636, and the current Bulletin of the Acoustical and Insulation Materials Association, consistent with U.L. requirements shall govern installation.
- G. Impaction Deceleration Clip shall be positioned and installed according to the manufacturer's instructions. These clips must provide access to the plenum at any location.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

3.08 CLEANING

- A. Clean exposed surfaces of acoustical ceilings, including trim, edge moldings, and suspension members; comply with manufacturer's instructions for cleaning and touch-up of minor finish damage.
- B. Remove and replace Work which cannot be successfully cleaned and repaired to permanently eliminate evidence of damage.
- C. Remove and replace Work that is damaged or soiled by other trades as directed by Authority's Representative.

END OF SECTION

LIST OF SUBMITTALS

<u>SUBMITTAL</u>	<u>DATE SUBMITTED</u>	<u>DATE APPROVED</u>
Product Data:	_____	_____
1. Manufacturer's specifications and installation instructions.		
Shop Drawings:	_____	_____
1. Reflected ceiling plans and details.		
Samples:	_____	_____
1. Acoustical panels: 12"x12" samples of each type, pattern and color.		
2. Metal Pan Ceiling units: Full size sample of each type and finish.		
3. Exposed runners and moldings: 12" long samples of each color and system type required.		
4. Concealed suspension members: 1 set of each assembly specified.		
5. Adhesive: 1 pint of adhesive used for direct attachment of acoustical panels to substrate.		
6. Forward each approved sample type to Mechanical Installer for purpose of matching diffusers.		
Manufacturer's Certificate:	_____	_____
1. Certificate from manufacturer attesting that their products comply with specified requirements.		

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Quality Assurance: _____

1. Certificate attesting that installer has minimum five years of successful experience in the installation of specified materials.
2. MEA and/or BSA approval numbers.
3. Manufacturers certification from an independent testing laboratory that acoustical tile units comply with fire test performance characteristics.

Project Closeout: _____

1. Guarantee.
2. Extra materials:

Acoustical Ceiling Units:
Furnish _____ square
feet of full size units.

Metal Pan Ceiling Units:
Furnish _____ square
feet of full size units.

SECTION 09650
RESILIENT FLOORING

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

A. Provide all vinyl composition tile, solid vinyl sheet flooring, non-slip vinyl sheet flooring, vinyl base, rubber stair treads, risers, and stringers; and interior detectable warning surfaces.

1.02 RELATED SECTIONS

- A. Cast-in-Place Concrete Section 03300
- B. Unit Masonry Section 04200
- C. Rough Carpentry Section 06100

1.03 REFERENCES

- A. American Society for Testing and Materials (ASTM), latest editions.
 - E 84 Test Method for Surface Burning Characteristics of Building Materials.
 - E 648 Test Method for Critical Radiant Flux of Floor Covering Systems Using a Radiant Heat Energy Source.
 - E 662 Test Method for Specific Optical Density of Smoke Generated by Solid Materials.
 - F 710 Standard Practice for Preparing Concrete Floors To Receive Resilient Flooring
 - F 1303 Standard Specification for Sheet Vinyl Floor Covering with Backing
 - F 1066 Vinyl Composition Floor Tile, Comp.1
 - F 1869 Standard Test Method for Measuring Moisture Vapor Emission Rate of Concrete Subfloor Using Anhydrous Calcium Chloride.

B. Federal Specifications (FS)

SS-W040 Wall Base: Rubber and Vinyl Plastic.

SS-T-312 Tile, Floor: Asphalt, Rubber, Vinyl, Vinyl Composition.

C. National Fire Protection Association (NFPA)

Standard 253 Method of Test for Critical Radiant Flux of Floor Covering Systems Using a Radiant Heat Energy Source.

1.04 SUBMITTALS

A. Product Data

Manufacturers' specifications, installation instructions, surface preparation requirements and maintenance manuals for each material specified.

B. Samples

1. For Initial Selection: Submit actual sections of resilient flooring materials, showing full range of colors and patterns available, for each type of resilient flooring required.
2. For Verification, prior to installation, submit the following:
 - a. Resilient tile: Full size, each type, size and color specified.
 - b. Adhesives: One pint, each type, labeled to indicate location of use and type of surface to receive product.
 - c. Floor Finish: One pint.
 - d. Color samples: One sample of each color match along with a sample of the existing tile.

1.05 QUALITY ASSURANCE

A. Qualifications

1. Manufacturer: Provide resilient flooring products of a single manufacturer.
2. Installer: A firm with not less than 5 years of successful experience in the installation of specified materials.

B. Certifications

1. Furnish manufacturer's certification from an independent testing laboratory acceptable to authorities having jurisdiction that resilient flooring complies with fire test performance requirements.
2. Furnish certification from flooring installer that the substrate surfaces have been examined and are acceptable for installation of the Work of this Section.

C. Fire Test Performance

Provide resilient flooring, treads and risers which comply with the following performance criteria as determined by an independent testing laboratory acceptable to authorities having jurisdiction.

1. Critical Radiant Flux (CRF): Not less than 0.45 watts per sq. cm. as per ASTM E 648.
2. Flame Spread: Not more than 75 as per ASTM E84.
3. Smoke Density: Not more than 450 as per ASTM E 662.

1.06 DELIVERY, STORAGE, AND HANDLING

A. Delivery

Deliver material in good condition to the site in manufacturer's original unopened containers with label information clearly marked thereon.

B. Storage

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Store materials (resilient flooring, base and adhesives) in location protected from the weather and having a minimum temperature of 68°F for at least 24 hours prior to start of laying of flooring.

1.07 PROJECT CONDITIONS

A. Environmental Requirements

Continuously heat spaces to receive flooring to a temperature of 68°F for at least 48 hours prior to flooring installation, and for 48 hours after installation. Maintain a minimum temperature of 55 deg. thereafter. Do not install products until they are at the same temperature as the spaces in which they are installed.

B. Install resilient flooring and accessories after other finishing operations, including painting, have been completed. Do not install resilient flooring over concrete slabs until the latter has been cured and is sufficiently dry to achieve bond with adhesive as determined by manufacturer's recommended bond and moisture test. The Contractor shall allow sufficient time for the slab to dry out before installation of resilient flooring is started.

1.08 MAINTENANCE

A. Extra Materials

1. Furnish additional floor covering materials for replacement and maintenance to the Authority's Representative (to be transferred to the custodian), including manufacturer maintenance information.
2. Furnish materials of each size, color pattern, and type of material included in the Work. All materials must be new, clean, undamaged and in original containers.
3. Furnish materials at the rate of one (1) carton for each 1000-1500 sq. ft of material installed.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

A. Vinyl Composition Tile

1. Amtico Flooring Division, Domco, Florence AL
2. Armstrong World Industries, Inc.: "Imperial Texture/Excelon Supreme".
3. Azrock Floor Products Div., Domco, Florence AL: "Cortina/Premier".
4. Kentile, Inc., Chicago, IL
5. Tarkett, Inc.: "Expressions/Signal"

B. Moisture Test Kits:

1. Vinyl Plastics, Inc. Sheboygan, WI 53082
2. Sealflex Industries Costa Mesa, CA
3. Floor Seal Technology, Inc. San Jose, CA 95112

2.02 MATERIALS

A. Vinyl Composition Tile (VCT)

Provide VCT product, of domestic manufacture, in compliance with Fed. Spec SS-T-312, Type IV, Composition I, and ASTM F 1066, Comp. 1 Class 2 through pattern, asbestos free, complying with the following requirements:

1. Size: 12" x 12" x 1/8" gage
2. Color: Match existing adjacent tile.

2.03 ACCESSORIES

A. Adhesives

1. Type as recommended by manufacturer for particular resilient flooring and base.

2. Adhesive suitable for adhesion to plaster, concrete, masonry, metal or wood, waterproof after drying to resist action of water.

B. Concrete Slab Primer

Tile adhesive manufacturer's recommended primer for preparation of porous or dusty concrete, non-staining type.

C. Leveling and Patching Compound

Portland cement based latex cement type underlayment: Armstrong S-194 Latex Underlayment or Ardex K-15, as recommended by flooring manufacturer.

D. Floor Polish

Fed. Spec. P-F-430, heavy traffic water emulsion floor wax, as recommended by flooring manufacturer.

PART 3 - EXECUTION

3.01 EXAMINATION

A. Concrete Subfloor

1. Installer shall inspect subfloor surfaces to determine that they are satisfactory. A satisfactory subfloor surface is one that is clean, dry, flat, smooth, level and free from cracks, holes, ridges, coatings preventing adhesion, and other defects impairing performance or appearance. Notify the Authority of conditions, which will adversely affect flooring installation. Do not proceed with installation until conditions have been corrected.
2. Perform bond and moisture tests on concrete subfloors to determine if surfaces are sufficiently cured and dry as well as to ascertain presence of curing, sealing, hardening or any other compounds.
 - a. Bond Tests shall be in accordance with Manufacturer's Installation Manual.

- b. Moisture vapor transmission shall not exceed 5 pounds per 1,000 square feet in 24 hours. Tests shall be in accordance with ASTM F 1869.

B. Wood Subfloor

1. Verify that wood subflooring complies with the requirements specified in Section 06100 - Rough Carpentry.
 2. Verify that underlayment surface is free of irregularities and substances that may interfere with adhesive bond, show through surface or stain flooring.
- C. Do not allow resilient flooring Work to proceed until subfloor surfaces are satisfactory.

3.02 SURFACE PREPARATION

- A. Unless otherwise specified, follow the materials manufacturers' written instructions.
- B. Remove dirt, grease, oil, paint, varnish, wax, sealers, curing or hardening compounds and contaminants which may impair the full bonding of the materials to the substrate. Avoid organic solvents. Remove residual adhesives as recommended by the flooring manufacturer.
- C. Concrete Subfloor
 1. Remove trowel marks or other projections by grinding or sanding.
 2. Level uneven surfaces with smooth troweling of mastic underlayment. Follow underlayment manufacturer's application and curing instructions.
 3. In spaces where existing resilient flooring has been removed, install a self-leveling coat of Ardex K-15 Underlayment with an average depth of a minimum of 1/8". Install in accordance with the manufacturers recommendations.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

4. Provide a substrate surface with not more than 1/8 inch in 10'-0" variation from level or plane of required slope.
5. Treat porous and dusty concrete with primer after vacuum cleaning the surface. Apply primer at the rate recommended by the primer manufacturer.
6. Broom or vacuum clean subfloor prior to installation of flooring.

3.03 INSTALLATION - GENERAL

- A. Install resilient flooring materials in compliance with manufacturer's latest printed instructions.
- B. Scribe cut and fit resilient flooring to permanent fixtures, pipe trench covers, built-in cabinets, pipes, outlets columns, walls and partitions.
- C. Tightly cement resilient flooring to subbase without open cracks, voids, raising and puckering at joints, tele-graphing of adhesive spreader marks or other surface imperfections.
- D. Hand roll flooring at perimeter of each covered area to assure adhesion.
- E. Spaces and areas where flooring is being installed shall be closed to traffic and other trades until flooring has set.
- F. Protect finished installation at all times. Contractor will be held responsible for all damage to flooring until Final Acceptance.

3.04 INSTALLATION OF TILE FLOORS

- A. Lay tile from center marks established with principal walls, discounting minor offsets, so that tile at opposite edges of room area are of equal width. Adjust as necessary to avoid use of cut widths less than 1/2 tile at room perimeters. Lay tile square to room axis.
- B. Match tiles for color and pattern by using tile from cartons in same sequence as manufactured and packaged

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

if so numbered. Cut tile neatly around all fixtures. Broken, cracked, chipped, or deformed tiles are not acceptable.

1. Lay tile in patterns indicated and as directed by the Project Architect.
 2. Lay adjacent tile with direction of texture opposite adjoining tiles.
- C. Adhere tile flooring to substrates using full spread of adhesive to edge of covered area, applied as directed by tile manufacturer.
- D. Cut tiles using equipment and methods recommended by respective tile manufacturer. Provide smooth cut edges tightly fit to adjacent work.

3.10 CLEANING

- A. Remove any excess adhesive and other surface soiling from face of installed materials with cleaning agents recommended by the manufacturer of the material being cleaned.
- B. Do not wash floor until time period recommended by resilient flooring manufacturer has elapsed to allow resilient flooring to become well set in adhesive.

3.11 PROTECTION

- A. Protect resilient flooring against damage by covering with kraft building paper or in accordance with manufacturers recommendations until final completion

END OF SECTION

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

SECTION 09900
PAINTING

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide all painting work and related Work as indicated on the Drawings and specified herein.
- B. Painting of HVAC and electrical items is part of Work of this Section. See Sections and Divisions listed in Art. 1.02.
- C. When removing existing paint from surfaces, assume that all paint contains lead. Take necessary precautions to protect workers. Provide measures to separate paint removal work areas from occupied areas.

1.02 RELATED SECTIONS AND WORK

- A. Metal Fabrications.....Section 05500
- B. Steel Doors and Frames.....Section 08110
- C. PlasterSection 09900
- D. Gypsum Board Section 09250
- E. Gyp Bd - Interior Ceilings and Soffits... Section 09253
- F. Mechanical/Electrical..... Division 15 & 16

1.03 REFERENCES

- A. Federal Specifications (FS)
- B. American Society of Testing and Materials (ASTM)
- C. N.Y.S. Department of Environmental Conservation
- D. U.S. Department of Labor
- E. Occupational Safety and Health Administration (OSHA)
- F. Department of Defense (DOD)

1.04 DEFINITIONS

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- A. The term "Painting" as used in this Section, means the application of all coatings such as paint, primer, etc. as listed in the Painting Schedules of this Section.
- B. The term "Painting" also includes preparation of surfaces for such applications, and the clean-up as hereinafter specified.
- C. The term "Walls" means all surfaces from floor, or top of base to ceiling or hung ceiling.
 - 1. Include pilasters, breaks, jambs, reveals, returns.
- D. The term "Ceilings" means the general overhead horizontal surfaces.
 - 1. Include soffits.
 - 5. Include side faces of hung or furred ceiling.
- E. Touching-up bare spots specified for previously primed or painted surfaces is in addition to the coats specified for the paint system.

1.05 SUBMITTALS

A. Product Data

Provide manufacturers' product literature for all materials specified and material manufacturer's printed directions and recommendations for environmental conditions, surface preparation, priming, mixing, reduction, spreading rate, application, and storage, as applicable for each of the materials specified.

B. Samples

1. Initial Selection

Submit manufacturer's custom color charts for each type of finish for approval by the MMMHS Representative. Verify colors specified with manufacturers' color charts for availability and notify the MMMHS Representative if any discrepancies should occur.

2. Verification prior to installation

- a. When required by MMMHS Representative, submit two samples of each color and material on 12" x 12" hard-board.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

3. All samples shall be labeled; and include the following information:
 - a. Manufacturer's name
 - b. Type of paint
 - c. Manufacturer's stock number
 - d. Color: name and number
 - e. Instructions for inducing, where applicable
 - f. Federal Specification number, as specified
 - g. Federal regulations for amount of lead in paint.
 - h. VOC content

1.06 QUALITY ASSURANCE

A. General

1. All painting materials shall arrive at the job ready-mixed.
2. Remove all rejected materials from the premises immediately.
3. All thinning and tinting materials shall be as recommended by the manufacturer. Generally, all paints shall not require additional thinning.
4. Verify that the specified shop prime paint for each applicable item in this Project is compatible with the total coating system, prior to finish painting.
5. Materials selected for each system type shall be products of a single manufacturer.

B. Qualifications

Work of this Section shall be performed by personnel with a minimum of three years experience in performing this type of Work.

C. Regulatory Requirements

1. N.Y.C. Building Code, latest edition

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. N.Y.S. Department of Environmental Conservation - Part 205 on "Architectural Surface Coatings" - for (VOC) Volatile Organic Compounds.
3. U.S. Department of Labor, Occupational Safety and Health Administration, Construction Industry Standards (29 CFR 1926/1910) Revised 10/1/79, Washington, D.C.

D. Certifications

Federal Specifications: When materials are specified to comply with Federal Specifications, products will be accepted which meet or exceed the performance requirements of such Federal Specifications and comply with all regulations currently in effect.

1. Indicate that material complies with Federal Specifications by including the Federal Specifications number on the container label or on the product literature, or submit a statement with the Product Data stating that material meets or exceeds the performance requirements of the Federal Specifications.

E. Field Samples

1. Provide samples of each color and finish, under natural lighting conditions, in a location where each finish is to be applied.
2. MMMHS Representative will request review of first completed room, space or item of each color scheme required by the MMMHS Representative for color, texture and workmanship.
3. First acceptable space or item will be used as project standard for each color scheme, or finish.
4. Primer coat is to be inspected and approved in all locations before any subsequent finish coats are applied.
5. In existing building locations; repair of existing base surface is to be approved prior to commencement of painting.

1.07 DELIVERY, STORAGE, AND HANDLING

A. Delivery

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

Deliver materials to the site in original, unopened containers bearing manufacturers name and label containing the following information:

1. Product name or title of material
2. Manufacturer's stock number and date of manufacture
3. Manufacturer's name
4. Federal Specification number, if applicable.
5. Federal regulations for amount of lead in paint (less the 0.06% lead in non-volatile ingredients)
6. Contents by volume for major pigment and vehicle constitutions
7. Thinning instructions
8. Application instructions
9. Color name and number

B. Storage

1. MMMHS Representative will designate space on premises for storage of materials. Contractor shall restrict storage in this area to paint materials and related equipment, and provide the following:
 - a. Provide one (1) approved chemical dry fire extinguisher equal to 20 lb. CO₂ rating in all assigned rooms or locations where painting materials are stored. Fire extinguisher shall bear the label of the National Board of Fire Underwriters and tag of most recent inspection.
 - b. Provide three (3) standard size red fire pails with clean sand in above locations. At the completion of project, fire extinguishers and pails shall become property of Contractor.
2. Maintain storage area in clean condition, store materials not in use in tightly covered containers. Remove oily rags, waste and empty containers from site each night.
3. Provide MMMHS's Representative with one key for

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

each space if spaces are to be kept locked when not in use.

1.08 PROJECT CONDITIONS

A. Environmental Requirements

1. Comply with manufacturer's recommendations as to environmental conditions under which coatings and coating systems can be applied.
2. Do not apply finish in areas where dust is being generated or will be generated while the material is drying.
3. Provide paint and coating products to comply with applicable environmental regulations, VOC requirements and local authorities.
4. In all areas and spaces being painted, the Contractor shall ensure that there is adequate ventilation to ensure proper paint drying, along with minimizing paint odors.

1.09 GUARANTEES

A. Adherence of workmanship and materials to Specifications requirements shall be maintained for the one year Contract guarantee period. These requirements shall include the following:

1. There shall be no evidence of blistering, peeling, crazing, alligatoring, streaking, staining, or chalking.
2. Dirt shall be removed without blemishing the finish by washing with mild soap and water.
3. Colors of surfaces shall remain free from serious fading; the variation, if any, shall be uniform.

B. Correct all defects, appearing within the guarantee period, by removal of the defective work and replacement as directed.

C. All corrective measures shall be the Contractor's responsibility, and shall be made at no extra cost to the MMMHS.

1.10 MAINTENANCE

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

A. Extra materials

At completion of Work, furnish to the MMMHS's Representative five (5) gallons of each type and color of paint used in the Work (to be transferred to the custodian). Furnish Paint in manufacturer's original sealed containers marked with color names and/or numbers specified herein.

PART 2 - PRODUCTS

2.01 MANUFACTURERS

A. Subject to compliance with requirements, provide products of one of the following manufacturers:

1. Benjamin Moore and Co.
2. The Sherwin-Williams Co.
3. Glidden Coatings and Resins.

2.02 MATERIALS

- A. Provide products which meet all N.Y.S. Part 205-VOC requirements for applications outlined herein.
- B. Provide products which meet all Federal regulations for amount of lead in paint (less than 0.06% lead in non-volatile ingredients).
- C. Provide best quality grade of various types of coatings as regularly manufactured by the paint materials manufacturers. Materials not displaying manufacturers' identification as a standard, best-grade product will not be acceptable.
- D. Use only thinners approved by paint manufacturers for applications intended and use only within recommended limits.

2.03 REFERENCE STANDARDS

A. Paint materials shall meet or exceed the requirements of the following standards:

Federal Specifications

1. Primers, Sealers, Undercoats

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

- a. Metal Primer (Zinc Dust, Zinc Oxide) for Galvanized surfaces: FS TT-P-641G
 - b. Metal Primer Aluminum or Steel surfaces: FS TT-P-57B
 - c. Primer Sealer, Latex Base: FS TT-P-650C
 - d. Odorless Alkyd Enamel Interior Undercoat: FS TT-E-545D
 - e. Alkyd Primer (Corrosion Inhibiting) FS TT-P664C Lead and Chromate Free, VOC Complying
2. Finish Paints
- a. Interior Latex, Flat: FS TT-P-29J, Type I
 - b. Latex Interior Semi-Gloss Enamel: FS TT-P-1511A, Type I
 - c. Alkyd Oderless Interior, Flat FS TT-P-1511A, Type I
 - d. Alkyd Odorless Semi-Gloss Enamel: FS TT-E-509C for white and tints; FS TT-E-529 Class A for deep colors.
3. Miscellaneous Materials:
- a. Mineral Spirits (Petroleum Paint Thinner): FS TT-T-291
 - b. Color Pigments: Pure, non-fading, finely ground pigments, at least 99 percent passing a 325 mesh sieve. Color pigments that are to be used on plaster shall be lime proof - FS-TT-P-381.
 - c. Surface Sealer: Pigmented Oil for Plaster & Wallboard - FS-TT-S-179.
- B. Miscellaneous Standards and Requirements
1. Turpentine: ASTM D13.
 2. Cleaning Solvents: Low toxicity; flash point in excess of 100°F.
 3. Spackling Compound: ASTM C475.

2.04 COLORS

A. Selection

1. Custom paint colors, surface treatments and finishes as selected by MMMHS Representative.
2. Color Schedule will be issued to the Contractor after award of the Contract.
 - a. Prior to start of Work, Contractor shall furnish custom color chips for surfaces to be painted.
 - b. Final acceptance of colors will be from actual job applications.

2.05 PAINTING SCHEDULE

A. Surfaces Not to be Painted

1. Polished or bright metals: Aluminum, bronze, brass, chrome, nickel, stainless steel, copper.
2. Exterior: Brick, Stone, Masonry, Concrete, Cement
3. Glass
4. Ceramic Materials
5. Clear Finished Woodwork.
6. Resilient Flooring Materials; Wood Floors.
7. Terrazzo; Marble; Bluestone
8. Acoustical Tile
9. Chalk Boards; Cork Boards; Bulletin Boards; Plastic Laminate
10. Mechanical Equipment, Steel Shelving, and Cabinets, which are factory finished.
11. General Construction Items with factory applied final finish.
12. Factory Finished Lighting Fixtures.
13. Pipe and Duct Spaces
14. Concealed Ducts, Pipes and Conduit.

B. Interior Finish Schedule - Standard

Finish coat in locations outlined below will be standard. First or Prime coats shall vary with substrates and are outlined in Article 2.07 - Interior Paint Systems.

<u>Location</u>	<u>Type</u>
1. Class Rooms, Kindergartens, Guidance Rooms, Offices, Coat Closets, Library, Computer Room, Auditorium.....	Flat (or to match adjacent existing paint surface)
2. Corridors, Teacher's Lunch Room, Stair Wells, Supply Rooms, Storage Rooms, Mech/Elec Rooms.....	Semi Gloss (or to match adjacent existing paint surface)

2.06 EXTERIOR PAINT SYSTEMS

A. Zinc Coated Metal

Galvanized steel lintels

1st Coat - Zinc dust-zinc oxide primer	--	2.0 Mils DFT
2nd Coat - High gloss alkyd enamel	--	2.0 Mils DFT
3rd Coat - High gloss alkyd enamel	--	2.0 Mils DFT

2.07 INTERIOR PAINT SYSTEMS - NEW SURFACES

Note: All interior finish paint coats: Odorless type if manufactured.

A. Gypsum Drywall Systems

1. Flat Finish:

1st Coat - Latex Primer Sealer	--	1.1 Mils DFT
2nd and 3rd Coats Alkyd Flat Paint	--	2.0 Mils DFT each coat

2. Semi-Gloss Finish:

1st Coat - Latex Primer Sealer	--	1.1 Mils DFT
2nd Coat - Alkyd Semi-Gloss		

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

	Enamel	--	1.8 Mils DFT
	3rd Coat - Alkyd Semi-Gloss Enamel	--	1.8 Mils DFT
3.	Gloss Finish:		
	1st Coat-Latex Primer Sealer	--	1.1 Mils DFT
	2nd & 3rd Coats-Alkyd Gloss Enamel	--	1.6 Mils DFT each coat
B.	Plaster		
1.	Flat Finish:		
	1st Coat - Alkyd Primer	--	2.0 Mils DFT
	2nd and 3rd Coats Alkyd Flat Paint	--	2.0 Mils DFT each coat
2.	Semi-Gloss Finish:		
	1st Coat - Alkyd Primer	--	2.0 Mils DFT
	2nd Coat - Alkyd Semi-Gloss Enamel	--	1.8 Mils DFT
	3rd Coat - Alkyd Semi-Gloss Enamel	--	1.8 Mils DFT
3.	Gloss Finish:		
	1st Coat - Alkyd Primer	--	2.0 Mils DFT
	2nd & 3rd Coats-Alkyd Gloss Enamel	--	1.6 Mils DFT each coat
C.	Ferrous Metal		
1.	Flat Finish:		
	1st Coat - Touch-up with Tnemec 10-99		
	2nd Coat - Alkyd Flat Paint	--	2.0 Mils DFT
	3rd Coat - Alkyd Flat Paint	--	2.0 Mils DFT
2.	Semi-Gloss Finish:		
	1st Coat - Touch-up with Tnemec 10-99		
	2nd Coat - Enamel Undercoat	--	1.7 Mils DFT

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

3rd Coat - Alkyd Semi-Gloss
Enamel -- 1.7 Mils DFT

3. Gloss Finish:

1st Coat - Touch-up with Tnemec 10-99

2nd Coat - Enamel Undercoat -- 1.7 Mils DFT

3rd Coat - Alkyd Gloss
Enamel -- 1.5 Mils DFT

First coat not required on shop primed items.

D. Zinc-Coated Metal

1. Flat Finish:

1st Coat-Zinc dust-zinc oxide primer--2.5 Mils DFT

2nd Coat - Alkyd Flat Paint -- 2.0 Mils DFT

3rd Coat - Alkyd Flat Paint -- 2.0 Mils DFT

2. Semi-Gloss Finish:

1st Coat-Zinc dust-zinc oxide primer--2.5 Mils DFT

2nd Coat - Enamel Undercoater - 1.7 Mills DFT

3rd Coat - Alkyd semi-gloss enamel --1.7 Mills DFT

3. Gloss Finish:

1st Coat-Zinc dust-zinc oxide primer--2.5 Mils DFT

2nd Coat - Enamel Undercoater - 1.7 Mills DFT

3rd Coat - Alkyd semi-gloss enamel --1.5 Mills DFT

PART 3 - EXECUTION

3.01 EXAMINATION

A. Verification of Conditions

1. The application of painter's finish to any surface shall be taken to indicate that the Contractor considers such surfaces suitable for a first-class finish.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2. Do not apply painter's finish in any locations until the Work of other Contractors which might damage the new finish, are completed.
3. Notify the MMMHS Representative in writing regarding Work by others which does not provide a suitable surface for the new finish.
4. In case of dispute regarding the suitability of any surface, the MMMHS Representative's decision shall be final and conclusive upon all concerned.
5. Contractor check the compatibility of previously painted surface with the new coating by applying a test panel 4 wide x wall height. Allow to dry thoroughly; verify proper adhesion before proceeding with painting Work.

3.02 PREPARATION AND APPLICATION - EXISTING BUILDING

A. Protection

In each area to be painted, cover and protect furniture, equipment and floors from damage with clean cloths, heavy building paper or clean plastic covering secured in place. All protection is to be carefully removed, cleaned or discarded after painting is complete.

B. Removal of Existing Work

1. Remove and paint behind pictures, signs, shades, drapes, furniture, cabinets, lockers and similar items which are not secured to walls.
2. Unless otherwise specified, radiators, convectors, univents need not be removed providing all visible surfaces of these items and visible surfaces behind them are properly painted.
3. Carefully mark removed work for identification and replace in the original location unless otherwise directed.

C. Surface Preparation

1. Remove all loose paint with scraper and putty knife.
2. Remove dust by washing with water, using damp sponge or cloth.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

3. If necessary, after washing, spot prime grease and water stains; magic markers, crayon, lipstick marks, etc; with a quick-drying alcohol base primer sealer.
4. Apply an alkyd-based underbody for better adhesion of semi-gloss finish coats. Tint underbody to match color of finish coat.
5. Existing paint that was not removed with scraper and which appears to be sound shall receive spackling compound around perimeter high spots and feathered out so that surface is smooth. Repair gouges created by the scraping process and other imperfections in the existing surface with spackling compound to provide a smooth, even finished surface.
6. Apply alkyd-based underbody on all spackled areas.
7. Apply one finish coat, or as many as may be necessary to obtain the proper finish, of alkyd flat, alkyd semi-gloss, or alkyd gloss paint on all surfaces as indicated in Interior Paint Schedule.

Note: Manufacturers who do not manufacture VOC compliant flat paint and semi-gloss paint may substitute VOC compliant egg-shell finish paint in lieu of flat and satin finish paint in lieu of semi-gloss, respectively.

8. Finish coats shall be "First Line" or "Top Quality" paints as listed in the following:
 - a. Benjamin Moore & Co.: Alkyd Sani-Flat (flat); Alkyd Dulamel (Semi-Gloss).
 - b. Sherwin Williams Co.: Pro-Mar Alkyd Flat (flat) B32 WZ 1101 Series, Pro-Mar Alkyd Semi-Gloss B34 WZ 1100 Series.
 - c. Glidden Paints: Ultra Hide Alkyd flat; Spread Lustre Semi-Gloss.
 - d. For surfaces requiring gloss paint finish as indicated in Painting Schedule, provide finish coats of "top quality" alkyd gloss enamel as manufactured by manufacturers listed in a., b., c., d., above.

3.03 PREPARATION - NEW WORK

A. Protection

Cover or otherwise protect finished Work of other trades and surfaces not to be painted concurrently or not to be painted.

B. Surface Preparation

1. Perform preparation and cleaning procedures in accordance with the paint manufacturer's instructions and as specified.

a. Previously Painted Surfaces: Remove loose, peeling and blistered coatings by scraping, sanding or chipping. Sand bare spots and abraded areas of previously painted and shop primed surfaces. Where paint is missing or removed, sand surrounding edges of sound paint film so edges of existing paint do not show through the finished system.

b. Sand existing glossy coatings to a uniform dull surface.

c. Clean surfaces to be painted before applying paint or surface treatments. Remove oil and grease with clean cloths and cleaning solvents prior to other cleaning procedures. Program the cleaning and painting so that dust and other contaminants from the cleaning process will not fall on wet, newly painted surfaces.

d. Touch-up bare spots on previously painted surfaces with primer.

2. Ferrous Metals

a. Remove dirt and grease with cleaning solvents which will not affect shop prime coat. Wipe off with clean cloths.

b. Remove rust, mill scale and defective paint down to bare metal, using scraper, sandpaper, or wire brush. Grind if necessary to remove shoulders at edge of sound paint to prevent flaws from photographing finish coats.

3. Plaster

a. Scrape and sand plaster nibs smooth. Spackle, smooth, and seal cracks, holes and other

defects to provide an even, smooth surface.

- b. Do not apply sealer or paint coatings until the moisture content is less than 8 percent as determined with an Electronic Moisture Meter. Furnish Moisture Meter and make it available for use by the Authority's Representative upon request.
 - c. Cement Plaster: Coat surfaces to be patched with an approved bonding agent. Patch with an approved mortar patching mix and finish to match texture of adjacent surfaces.
4. Gypsum Board: Fill cracks and other blemishes with spackling or patching compound and sand smooth.

C. Materials Preparation

- 1. Mix and prepare painting materials in accordance with the manufacturer's directions.
- 2. Stir materials before and during application to produce and maintain a mixture of uniform density. Do not stir any film which may form on the surface of materials into the material; remove the film and strain the material before using.
- 3. Thinning: Use only thinners recommended by the paint manufacturer and use only within the recommended or specified limits.

D. Moisture Meter Test

- 1. Do not apply initial coating until moisture content of surface is within limitations recommended by paint manufacturer.
- 2. Reading shall be approximately 8% on meter.
- 3. Test surfaces with moisture meter at various areas e.g.: Top, bottom and middle of wall, especially where piping occurs and at exterior walls, in the presence of the MMMHS Representative.
- 4. Moisture content shall be approved by the MMMHS Representative before any Work is started.

3.04 APPLICATION

A. General

1. No Work shall be performed where plaster is being applied or is in the process of drying.
2. No Work shall be performed in spaces which are not broom clean and free of dust and waste.
3. Apply paint materials to produce smooth finished surfaces, free of brush or roller marks, drops, runs, or sags.
4. Paint materials shall be kept at a proper and uniform consistency.
5. Thin only when necessary to achieve best results.
6. Thinners shall be turpentine, mineral spirits or material recommended by manufacturer of paint, and in quantity as recommended.
7. Excessive use of thinner as indicated by variation in absorption, lack of "hide", thickness of dry film, mottled or streaky coat, shall be cause for rejection. Correct as directed.
8. Apply all coats with brush or roller (spraying will not be permitted) varying slightly the color of succeeding coats.
9. Brush out or roll on first or prime coat; work well into surface.
10. Each coat shall be inspected, approved and dry before proceeding with additional coats.
11. Allow at least 48 hrs. for enamels and exterior oil paint to dry.
12. Painting is not required on walls or ceilings in concealed and inaccessible areas.
13. Moving parts of operating units will not require finish painting unless otherwise required.
14. Do not paint over any code-required labels, such as Underwriter's Laboratories and Factory Mutual, or any equipment identification, performance rating, name or nomenclature plate.

3.05 CLEANING

A. General

Contractor shall clean-up behind each paint crew such that painting and clean-up will be a continuous uninterrupted operation. The practice of one general clean-up after completion of all painting will be strictly prohibited. This clean-up will include, but not be limited to the following:

1. Remove spots or defacement resulting from Work of this Section.
2. Retouch all damaged surfaces to leave Work in perfect finished condition.
3. If spots or defacement cannot be satisfactorily removed and retouched, re-finish the surfaces as directed.
4. Free all operating units of painted materials and leave them clean and in proper working order.
5. Remove from premises all surplus paint materials, debris and any other rubbish resulting from the Work.
6. Leave storage space clean and in condition required for equivalent spaces in project.

3.06 PROTECTION

- A. Provide "Wet Paint" signs to protect newly-painted finishes. Remove temporary protective wrappings provided by others for protection of their Work after completion of painting operations.
- B. At the completion of Work of other trades, touch-up and restore all damaged or defaced painted surfaces as directed by the MMMHS Representative.

SECTION 10214
STATIONARY METAL WALL LOUVERS

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

- A. Provide stationary metal wall louvers as indicated on Drawings and as specified herein.

1.02 RELATED SECTIONS

- A. Metal Fabrications..... Section 05500
- B. Joint Sealers Section 07900
- C. Mechanical.....Division 15000

1.03 REFERENCES

- A. Air Movement and Control Association (AMA)
- B. National Association of Architectural Metal Manufacturers (NAAMM)

1.04 SUBMITTALS

- A. Shop Drawings
Show fabrication details and connections to adjacent Work.
- B. Product Data
Catalog cuts, specifications, and installation instructions for louver type specified.

1.05 QUALITY ASSURANCE

- A. Louvers shall be rated by AMCA (Air Movement and Control Assoc.).

1.06 DELIVERY, STORAGE, AND HANDLING

- A. Deliver, store, and handle products of this Section as recommended by manufacturer to protect from damage.

PART 2 - PRODUCTS

2.01 ALUMINUM LOUVERS

A. Type

Stationary extruded louvers, 4" deep unless indicated otherwise, with extrusions not less than 1/8" thick, of 6063T5 aluminum alloy.

B. Fabrication

Form frames with mitered or coped members and welded or joints. Form ends of blades flat against frame jamb and weld to frame at each end to ensure watertight joints. Reinforce units with concealed plates, angles, tees or other shapes to form rigid unit. Fabricate louvers with horizontal and vertical mullions where louver openings exceed 60" in any direction. Allow for expansion and contraction.

C. Finishes

Comply with Metal Finishes Manual of National Assoc. of Architectural Metal Manufacturers, except as otherwise indicated.

1. Finish louver and frame with factory paint finish as follows:

- a. Durannar XL - Coat System by PPG Industries or approved equal. Color shall be UC52188 XL Dark Green Metallic.

D. Sills

Same material and finish as louvers.

2.02 LOUVER SCREENS

A. General

Fabricate removable screen frames of same metal and finish as louvers. Locate screens on inside face of louvers, unless otherwise indicated. Secure screens to louver frames with machine screws at each corner and spaced 12" oc along frame perimeter.

B. Bird Screens

Black anodized 0.064 aluminum wire, 1/2" mesh.

January 10, 2005

Soundproofing of
Monsignor McClancy Memorial High School

2.03 FASTENERS AND ANCHORS

- A. Bolts, Nuts, Lags, Washers, Screws and Anchors

Same material as items being installed unless otherwise indicated. Types, gages and lengths to suit unit installation conditions. Stainless steel for exterior locations or for items anchored to exterior walls.

PART 3 EXECUTION

3.01 INSTALLATION

- A. Install Work of this Section in accordance with manufacturer's printed instructions, except as shown otherwise on Drawings.
- B. Install units plumb, level and in proper alignment with adjacent construction.
- C. Form tight joints with exposed connections accurately fit together.
- D. Provide concealed anchorages wherever possible. Provide brass or lead washers fitted to screws where required to protect metal surfaces and to form weathertight connection.
- E. Clean louvers after installation. Remove dirt, dust, and grime.

SECTION 15100
GENERAL PROVISIONS FOR PLUMBING WORK

PART 1 - GENERAL**1.01 DESCRIPTION**

- A. This Section is coordinated with and complementary to the General Conditions and Special Conditions of the Work wherever applicable to Mechanical and Electrical Work.
- B. Section 15000 - Special Requirements for Mechanical and Electrical Work shall apply.

1.02 SCOPE OF WORK

- A. Except as otherwise specified under "Related Work Not Included", the work of this Contract consists of furnishing all labor, materials, equipment and appliances necessary and required to completely do all Plumbing Work as indicated on the Drawings or described or referred to in the Specifications, including, but not limited to the following:
 - 1. Interior alteration work, removals, relocations, etc. to the existing plumbing systems in all renovated areas as indicated on the Drawings.
 - 2. Partial interior storm water drainage systems with leaders, roof and area drains, and piping system conveying storm water drainage to site storm drainage system.
 - 3. Partial interior sanitary, soil, waste and vent piping systems, including all required connections to all plumbing accessories and equipment, house sewer, and connections to the existing interior piping.
 - 4. Partial interior domestic cold water system including connections to existing interior piping system, and connection to all equipment requiring cold water.
 - 5. Natural gas piping system with all connections to equipment requiring gas.
 - 6. Excavation and backfill for all work herein specified.

10/31/03

Soundproofing of Msgr. McClancy Mem. H.S.

7. Hose bibbs.
8. Sleeves, hangers and supports.
9. Insulation for piping and equipment.
10. Apply for, obtain and pay for all permits, certificates, inspections and approvals required in connection with all Plumbing Work.
11. Shop drawings, samples and instructional manuals, tests and adjustments.
12. All interlocking control wiring and conduit.
13. Color coding and stenciling of all piping systems.
14. Cutting and rough patching.
15. Cap flashing and prime painting.
16. Tests for all systems provided under this Section of the Specifications.
17. Where due to Union regulations or trade agreements, if any of the work shown on the Drawings or specified herein is not considered Plumber's Work, this Contractor shall sub-contract the work in question, but this Contractor shall be held responsible for the complete installation.
18. It is not the intention of these Specifications to describe, nor the Contract Drawings to show in detail, all the various pieces of apparatus and appurtenances and their connections. This Contractor shall, as part of the Contract, furnish and install all incidentals, such as piping, fittings, valves, etc., required to complete the installation of the equipment. This Contractor shall refer to Architectural Drawings and Plumbing Drawings for exact location of fixtures including type and quantities. This Contractor shall be responsible for providing and connecting all fixtures and equipment.
19. All work described in these Specifications and not shown on the Drawings, or vice versa, shall be installed in a manner similar to the work shown or described.

1.03 RELATED WORK NOT INCLUDED

- A. The following principal items of work shall be provided under other Sections:
1. Finish painting.
 2. Base flashing for roof drains, and piping passing through roofs.
 3. Drainage piping from HVAC equipment to and spilling over floor drain, mop sink, sump or roof, except as noted.
 4. Finish patching.

1.04 LIST OF SHOP DRAWINGS

- A. Submit shop drawings prior to installation covering the following items:
1. Plumbing fixtures, equipment, plumbing fixture trimmings, shut-off valves, faucets, supports, accessories and traps.
 2. Valve tags, color coding and valve charts.
 3. Vacuum breaker, backflow preventors and shock absorbers.
 4. Insulation for piping and equipment.
 5. All drains including floor, funnel, roof and area drains.
 6. Hose bibbs.
 7. Sleeves, escutcheons, hangers and inserts.
 8. Motors, starters and wiring diagrams and equipment.
 9. All types of piping, fittings, valves, etc.
 10. Detailed plumbing piping layout, coordinated with all other trades.
 11. Detailed coordinated sleeves and insert drawings for approval by Structural Engineer. In addition,

the Contractor shall indicate all piping sleeved through beams.

- B. The above listed items are to be considered major equipment and do not limit the Contractor's responsibility from submitting shop drawings for all equipment and accessories which are to be provided under this Section of the Contract.

1.05 VISITING THE PREMISES

- A. This Contractor, before submitting his bid on the work, shall visit the site and familiarize himself with all visible existing conditions. As a result of having visited the premises, this Contractor shall be responsible for the installation of the work as it relates to such visible existing conditions.
- B. The submission of a bid will be considered an acknowledgment on the part of the bidder of his visitation to the site.

1.06 QUALITY ASSURANCE

- A. Manufacturer's Instructions: In addition to the requirements of these Specifications, comply with the manufacturer's instructions and recommendations for all phases of the work.
- B. Standards and Codes
 - New York City Building Code.
 - National Fire Codes (N.F.P.A.)
 - Local Gas Utility Rules and Regulations.
 - Local Municipal Rules and Regulations.
 - Local Fire Department Requirements.
 - Local Water Company Rules and Regulations.
 - Other State and Local Authorities having Jurisdiction.
 - F.M. Regulations.
- C. All work and material not specifically described, but required for a complete and proper installation of the work of this Section, shall be provided by the Contractor and shall be new, first quality of their respective kinds, and subject to approval of the Architect.
- D. All water supply connections to plumbing fixtures and other equipment to be installed under this Division shall be in accordance with the rules relative to submerged

10/31/03

Soundproofing of Msgr. McClancy Mem. H.S.

inlets and protective methods to be applied to prevent contamination of water as required by Local and State Regulations.

1.07 ALTERATION WORK

- A. All equipment, piping, plumbing fixtures, etc. to be removed shall be disposed of, turned over to the Owner or salvaged as directed by the Owner. They shall not be removed from the premises without the Owner's approval.
- B. All piping to be removed shall be properly plugged or capped so that upon completion of all new work, all abandoned piping shall be concealed in finished areas.
- C. No dead ends shall be left on any piping upon completion of job.
- D. Existing exposed piping not to be reused and not specifically noted or shown on Drawings to be abandoned shall be completely removed.
- E. The existing system shall be left in perfect working order upon completion of all new work.
- F. Locations and sizes of existing piping are approximate. Exact sizes and locations of all existing piping shall be verified at the site.
- G. No removed existing piping, etc. shall be reused.
- H. All existing exposed, unnecessary piping related to work being done shall be completely removed.
- I. This Contractor shall not interrupt any of the services of the existing facility, nor interfere with the services in any way without the express permission of the Owner. Such interruptions and interferences shall be made as brief as possible and only at the time stated by the Owner.
- J. Under no circumstances shall this Contractor or his workmen be permitted to use any part of the facility as a shop, except parts designated by the Hospital for such purposes.
- K. Reroute or remove all existing piping where necessary to avoid new equipment, structural or masonry work as required by the proposed alteration.

1.08 CONCRETE WORK

- A. All concrete provided under the work of this Section shall be in accordance with that specified under another Division or Sections of these Specifications.

1.09 REPLACEMENT OF SURFACING

- A. Where required by operations under this Section, the Contractor shall remove and replace all street pavements, curbs, sidewalks, walkways, grassed areas and landscaped areas which are to remain, in a manner equal to their original condition when new, including sub-bases.
- B. In those cases where final surfaces cannot be placed immediately, a temporary surfacing of two inches of bituminous concrete shall be placed and maintained. This shall be removed before placement of final surfacing.

1.10 COOPERATION WITH OTHERS

- A. The Plumbing Contractor shall cooperate with other trades whose work is to be correlated with his work in order to avoid field interference, improper elevations, or inaccessibility to equipment. Any extra expense occasioned by lack of cooperation by this Contractor shall be borne by him.

END OF SECTION 15100

SECTION 15110
PIPE, TUBE AND FITTINGS FOR PLUMBING WORK

PART 1 - GENERAL**1.01 DESCRIPTION**

- A. This Section is coordinated with and complementary to the General Conditions and Special Conditions of the Work wherever applicable to Mechanical and Electrical Work.
- B. Section 15000 - Special Requirements for Mechanical and Electrical Work shall apply.
- C. Section 15100 - General Provisions for Plumbing and Fire Protection Work shall apply.

1.02 SCOPE OF WORK

- A. The work of this Contract includes the providing of all labor, materials, accessories, services and tests necessary to install, complete and make ready for operation by the Owner, all work as shown on the Drawings and as specified herein.

1.03 SPECIFIC REQUIREMENTS

- A. Pipe and fittings shall conform to the latest USASI, ASTM, ANSI and/or F.S. Standards, and/or Cast Iron Soil Pipe Institute Standards No. 301 and 310.
- B. All pipes, fittings, traps, materials and/or other devices used in the plumbing system shall have cast, stamped, or indelibly marked on it the maker's name or mark, weight, and quality of the product when such marking is required by the approved standard.

PART 2 - PRODUCTS**2.01 INTERIOR PIPING MATERIAL**

- A. Underground interior soil, waste, vent and storm piping shall be service weight cast iron soil pipe, and bell and spigot fittings, with oakum packing and caulked molten lead in one continuous pour. Fittings for cast iron soil pipe below grade shall be service weight cast iron bell and spigot, and shall be as manufactured by Tyler or Charlotte Foundry Company, or approved equal.

- B. Interior above ground soil and waste piping in stacks and 4" and over soil and waste piping in chases shall be service weight cast iron soil pipe and bell and spigot fittings, with oakum packing and caulked molten lead in one continuous pour.
- C. Interior, above ground, soil and waste piping, 3" and smaller in chases, storm vent and leader piping shall be no-hub, standard weight, cast iron soil pipe and fittings or galvanized steel screw pipe with galvanized cast iron recessed drainage fittings with galvanized malleable beaded fittings for vent piping.
- D. Interior above-ground domestic water piping shall be seamless drawn or extruded hard temper Type "L" copper tubing, ASTM B-88, with solder joint fittings. Fittings shall be copper. Joints shall be made with a solder alloy (95/5) consisting of tin-antimony and shall conform to ASTM Specification B-32.
- E. Natural gas piping shall meet local Gas Company guidelines or shall be as follows:
 - 1. Black steel, Schedule 40.
 - 2. Steel pipe shall be Schedule 40 steel pipe with maker's name rolled in the metal. Pipe three inches in diameter and larger shall be seamless.
 - 3. Interior gas steel piping three inches and larger shall be welded. For pipe 2½" and smaller, use 150 pound malleable iron screwed fittings.
 - 4. All shoulder nipples shall be made of extra heavy pipe, no close nipples shall be accepted.

2.02 STERILIZATION

- A. The entire domestic water piping system shall be thoroughly sterilized with chlorine before acceptance for domestic operation.
- B. The amount of chlorine applied shall be such as to provide a dosage of not less than 50 parts per million. The chlorinating material shall be either liquid chlorine or sodium hypochlorite solution and shall be introduced into the system and drawn to all points of the system. All lines shall be thoroughly flushed before introduction of the chlorinating material. After a contact period of

not less than eight (8) hours, the system shall be flushed with clean water until the residual content is not greater than 0.2 parts per million. All valves in the lines being sterilized shall be opened and closed several times during the contact period.

- C. Sterilization and tests for purity of water in the entire piping system shall be performed by the Contractor through an approved independent testing laboratory and a certificate shall be furnished to the Architect certifying the quality of purity.

PART 3 - EXECUTION

3.01 INSTALLATION NOTES FOR INTERIOR PIPING SYSTEMS

- A. It is the intent that each part of the plumbing systems shall be complete in all details and all lines provided with all control valves as indicated on Drawings, or as may be required for the proper control of the pipe lines under this Section so that any fixture, line or piece of apparatus may be cut out for repair without interference or interruption of the service to the rest of the building.
- B. The size of storm, soil, waste, water, and vent piping shall be as determined by the local rules and regulations for plumbing and drainage, except where specifically noted to be larger by the Specifications or plans; and all fixed rules of installation as set forth in the Rules and Regulations shall be followed as part of the Specifications.
- C. The Contractor shall examine carefully the architectural plans and details and familiarize himself with all conditions relative to the installation of piping, particularly where same is concealed behind furring or in hung ceilings.
- D. In no case shall the Contractor permit his pipes to be exposed beyond finished plaster lines unless specifically shown on Drawings. He shall consult with the other trades in the building and install his piping in such a way as to least interfere with the installation of other trades.
- E. Water piping shall be installed to drain, and branches shall not be trapped, but shall have continuous pitch. Where necessary to raise or lower mains, the same shall

be provided with a drip and shall be properly valved and capped.

- F. Piping shall be installed, whether indicated or not, so as to rise and/or drop to clear any and all conduits larger than 1", lighting fixtures, ductwork and heating mains, to maintain the desired clear heights. The Contractor shall consult with the other trades and facilitate the erection of the equipment and piping.
- G. Run piping straight and as direct as possible. In general, form right angles with or parallel to walls or other piping. Risers shall be erected plumb and true.
- H. After cutting, all pipes shall be reamed out to full bore and before erection the inside of all pipes shall be thoroughly cleaned.
- I. No piping or work shall be concealed or insulated until all required tests have been satisfactorily completed and work has been approved by the Architect and all other authorities having jurisdiction.
- J. Branch connections of the drainage systems shall be made with "Wye" and long "Tee-Wye" fittings, short $\frac{1}{4}$ " bends, common offsets and double hubs will not be permitted. Short "Tee-Wye" fittings are to be used in vertical piping only.
- K. Cleanouts shall be provided at foot of all stacks, all changes of directions, at the ends of branch runs where shown, every 50'-0" and as required by Code, and shall be furnished as described under cleanouts.
- L. The house drains must be run at a minimum grade of $\frac{1}{8}$ " per foot downward in the direction of flow. Wherever possible, a $\frac{1}{4}$ " per foot pitch shall be maintained. Branch connections to stacks from fixtures shall pitch $\frac{1}{4}$ " per foot where possible. Attention is again called to the necessity of maintaining the ceiling heights established.
- M. Connection to roof drains shall be installed in conjunction with the roofing called for under another Division or Section of these Specifications and at such times as designated by this Contractor, so that the building is adequately protected during construction from damage by storm water. All piping shall be adequately

and properly supported, and all joints shall be made up as hereinafter specified.

- N. Furnish and install complete systems of ventilating pipes from the various plumbing fixtures and other equipment to which drainage connections are made. Ventilating pipes shall be connected within 2'-0" of the discharge of each trap and shall be individually piped to point above the ultimate overflow level of the fixture before connecting with any other vent pipe (in general, this will be approximately 3'-6" above the finished floor). Branches shall be arranged to pitch back to fixtures.
- O. The individual vent pipes shall be collected together in branch vent lines and connected to vent stacks. Wherever possible, vent stack offsets shall be made with 45 degree fittings. The heels of vent stacks shall be connected to adjacent soil stacks for purpose of draining condensation where possible. The waste of one fixture shall be connected to the base of each vent stack for the purpose of washing out any scales or dirt which may accumulate, or the soil stack shall be used to wash out the heel of the vent.
- P. The tops of all soil and waste stacks shall be extended as additional ventilating pipes. The tops of all ventilating stacks shall run independently through the roof. Pipes smaller than 4" size shall be increased to 4" by means of approved increasers before passing through the roof slab.
- Q. All piping installed in finished areas shall be completely concealed within hung ceilings, furrings, soffits, pipe spaces, etc.
- R. Where complete concealment is impossible because of obstructions such as beams, ducts, lights, piping, etc., the Contractor shall not install any work before first consulting with the Architect and his instructions (written or revised Drawings) shall be followed.

END OF SECTION 15110

SECTION 15120
VALVES FOR PLUMBING WORK

PART 1 - GENERAL**1.01 DESCRIPTION**

- A. This Section is coordinated with and complementary to the General Conditions and Special Conditions of the Work wherever applicable to Mechanical and Electrical Work.
- B. Section 15000 - Special Requirements for Mechanical and Electrical Work shall apply.
- C. Section 15100 - General Provisions for Plumbing Work shall apply.

1.02 SCOPE OF WORK

- A. The Work of this Contract includes providing all labor, materials, accessories, services and tests necessary to install complete and make ready for operation by the Owner, all work as shown on Drawings and as specified hereinafter.

1.03 SPECIAL REQUIREMENTS

- A. Furnish all valves as indicated on the plans, or as may be required for the proper control of the pipe lines installed under these Specifications, so that any fixture, line or piece of apparatus may be cut out for repair without interference or interruption of the service to the rest of the building. All water valves shall have a minimum working pressure of 125 psi, and shall be water rated unless otherwise noted on the Drawings or specified herein. All valves shall be of one manufacturer.
- B. All gate valves within the building shall be wedge gate valves with painted iron wheel handles. They shall have gland followers in stuffing boxes, and shall be constructed so that they may be repacked while open and under pressure. All valves shall have the name of the manufacturer and working pressure cast or stamped on them.
- C. All gate valves shall be all bronze with brazed or screwed joint ends as required by the piping system in which they are installed.

- D. Globe valves shall be of all bronze with composition disc, threaded or brazed joint ends as required by piping system in which they are installed.
- E. At the high point of the hot water piping system provide a ½" automatic IBBM air relief valve, 125 PSI, WOG Class. Pipe drain to spill over adjacent floor drain or service sink.
- F. All valves shall have the trademark of the manufacturer and the guaranteed working pressure cast or stamped on the body of the valve. All gates or globes, etc., shall be of one manufacturer.
- G. The exterior valves shall conform to all applicable requirements of American Water Works Association C500-61 Standard for Gate Valves for Fire Water Work Service.
- H. All valves for laboratory gases shall be U.L. listed and N.F.P.A. approved.

PART 2 - PRODUCTS

2.01 INTERIOR PIPING SYSTEM VALVES

- A. Domestic water valves tabulated herein have been selected from the catalog of the Milwaukee Valve Co. Approved equals of NIBCO Co., Crane Co. and Walworth Co. will be reviewed.

Gate Valves	3" & smaller	threaded	105
		solder ends	115
Globe Valves	3" & smaller	soldered ends	590
Angle Valves	3" & smaller	threaded	595
Ball valves	2" & smaller	threaded	BA100
	2" & smaller	solder end	BA150

- B. Ball valves as listed herein may be used for domestic water piping as an alternate for gate valves 2" and smaller. If used, provided extended stems.

- C. Gate valves 3" & smaller.

Bronze body with solder ends and all bronze stem and wedge, non-asbestos packing, malleable iron handwheel with brass wheel nut, 125 lbs. WSP, 200 lbs. WOG. Specification conforms to MSS SP-80 type 1 Class 125, ASTM B162 and CA 360.

D. Globe Valves 3" & Smaller

All bronze body and trim with soldered ends 150 lbs. WSP 300 lbs. WOG with non-asbestos packing, malleable iron handwheel, bronze handwheel nut and bronze packing nut. Specification conforms to ASTM-B62, ASTM-B16 and MSS SP-80 Type 2.

E. Ball Valves

2 piece unit with bronze body, soldered ends 316 stainless steel ball and stem, glass filled teflon seals seats and washers, zinc plated steel handle with vinyl hand grip 150 lbs. WSP-600 lbs. WOG. Specification conform to ASTM-B584, ASTM-B16, ASTM-B276 and ASTM-B633.

F. Low pressure natural gas valves shall be AGA standard bronze gas cocks. Up to 1" size tee head equal to Walworth No. 594. Up to 2" size square head equal to Walworth No. 590. 2½" and over, flanged, iron body lubricated plug type 175 psi WOG equal to Walworth No. 1796. Provide operating wrenches with each valve.

PART 3 - EXECUTION**3.01 INSTALLATION REQUIREMENTS**

- A. The entire plumbing system shall be supplied with valves so located, arranged and operated as to give a complete regulating control to all fixtures and apparatus.
- B. Shut-off valves shall be provided on all risers, branch lines and at each piece of equipment.
- C. Valves, where exposed and used in connection with finished piping, shall have the same finish as the pipe.
- D. Install valves where required for proper operation of piping and equipment, including valves in branch lines necessary to isolate sections of piping. Locate valves so as to be accessible.
- E. Install valves with stems pointed up, in vertical position where possible, but in no case with stems pointed downward unless unavoidable. Install valve drains with hose-end adapter for each valve that must be installed with stem below horizontal plane.

10/31/03

Soundproofing of Msgr. McClancy Mem. H.S.
