FOI Administrator

October 5, 2012

Mr. Wilfredo Lassalle

Re: Freedom of Information Reference No. 13096

Dear Mr. Lassalle:

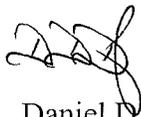

This is a response to your April 3, 2012 request, which has been processed under the Port Authority's Freedom of Information Code (the "Code", copy attached) for copies of records related to Job Request No. 13213 - Sr. Microsoft Designer posted and filled in 2011.

Material responsive to your request and available under the Code can be found on the Port Authority's website at <http://www.panynj.gov/corporate-information/foi/13096-O.pdf>. Paper copies of the available records are available upon request.

Certain material responsive to your request is exempt from disclosure pursuant to Exemptions (2.b.), (5) and (6) of the Code.

Please refer to the above FOI reference number in any future correspondence relating to your request.

Very truly yours,

Daniel D. Duffy  
FOI Administrator

## SENIOR SYSTEMS ENGINEER

CHFI • ECSA • EMCISA • CCA • MCP • MCTS • CompTIA A+ • NEC FT & Express Cluster • CNA • VCP • IBM System Specialist

---

Highly credentialed senior IT professional offering 10+ years of experience building, administering, optimizing, and managing large, multi-platform enterprise Active Directory, VMWare ESX, Novell, UNIX, and Linux server environments.

- Recognized as a Subject Matter Expert (SME) for MS Windows and VMWare ESX servers; and Quest Active Roles Server, Quick Connect, Group Policy Administrator and Reporter tools.
  - Extensive expertise in evaluating, recommending, and implementing new tools, processes, and best practices to reduce costs, enhance uptime, and ensure optimal performance of applications, databases, and services.
  - Praised for technical expertise and ability to work effectively individually or lead a team, ensuring all projects run smoothly and efficiently to meet or exceed specifications.
  - Excellent communication, customer service, team work, and relationship building skills. Liaisons effectively with clients, users, and team members to analyze needs and issues, and implement value-driven solutions.
  - Outstanding analytical and troubleshooting capabilities with a strong sense of urgency and thoroughness in the successful completion of complex, difficult tasks.
  - Organized, take-charge professional with exceptional follow-through abilities; skilled in planning, tracking, and ensuring on-time delivery of projects. Proven ability to adapt quickly to challenges and changing environments.
- 

## PROFESSIONAL EXPERIENCE

### Port Authority, New York & New Jersey

#### Senior Windows Architect

2007 – Present

*Retained through Pomeroy IT Solutions into newly established team based on MS Windows expertise to manage, enhance, and optimize performance of large Windows, Novell, UNIX, and Linux environments comprised of 300 servers supporting over 5,000 users across 30 locations.*

Hold responsibility for administering, supporting, and monitoring Windows and Novell environments, encompassing file structure, directory services, software distribution and updates, and Level II troubleshooting support. Build, upgrade, and maintain servers; install and configure RAID, IBM Director, McAfee anti-virus, HIDS, Netvision, and FDR Upstream software; apply security patches; verify backups; evaluate system performance; and free disk space. Monitor physical and virtual resources for 300+ Windows and Novell servers leveraging IBM Director. Deploy updates and patches utilizing Zen Works Patchlink; and provide real-time monitoring utilizing NetVision NVMonitor. Analyze logs for firewalls and intrusion detection systems; and perform scheduled vulnerability assessment scans. Manage 16 SANS averaging 20 Arrays each leveraging IBM Storage Manager. Plan and implement the rollout of new hardware and software; architect and build new environments; and assist with platform migration efforts.

- Recognized as a SME for Windows, VMWare ESX, and Quest technologies. Developed client and server best practices for engineering, development, and operations teams. Mentor teams on tools and platforms.
- Redesigned Windows domain from Active Directory 2000 to Active Directory 2003; and currently planning and defining architecture for the build out of Windows Active Directory 2008 to replace Novell file / print servers.
- Defined architecture and framework to build 2 virtual center environments. Liaised with external partner to implement 20 ESX servers supporting VMWare infrastructure environments.
- Collaborated in implementing Quest Group Policy Administrator and Reporter tools to enhance the management of Windows environments; and currently planning on rolling out Quest Active Roles and QuickConnect tools.
- Obtained Microsoft's SCCM and SCOM training and currently defining strategy to implement System Center Configuration Manager and System Center Operations Manager tools into the environments to automatically assess, deploy, and update servers, computers, and devices across physical, virtual, and distributed environments.
- Project Lead for the rollout of NEC ExpressCluster software onto virtual environments to increase data protection and achieve 99.999% uptime of security applications across 4 airports, World Trade Center, and seaport.
- Pivotal role implementing security policies that affect the infrastructure on multiple levels. Key participant in conducting application reviews to ensure adherence to standard security guidelines and practices.
- Chosen to oversee all aspects of Active Directory user accounts creation, modification and deletion. Monitor group memberships; and provide reports/alerts following membership and domain GPO changes.
- Obtained Security Clearance Credentials for access to high-security sites including major airports, shipping ports, bridges, and tunnels.

**Almond Diamonds Ltd. / Diamonds International, New York, NY**

2002 - 2007

## **Systems & Network Manager**

Full hands-on accountability for the design and delivery of IT services covering network infrastructure, messaging, remote connectivity, POS and HO systems, VoIP, Help Desk and desktop support, to more than 900 users for this global retail firm with more than 100 locations throughout 16 countries. Collaborated extensively with management to analyze business needs and implement appropriate technical and operating infrastructure to integrate and enhance delivery of services to regional, national and global users. Evaluated and facilitated the deployment of new hardware and software into environment to increase capability and reduce downtime. Led teams of up to 25 professionals.

- Collaborated with AT&T, Cisco, Sonic Wall and Motorola to build out new global VoIP and VPN infrastructure, slashing monthly telephone costs 50% or \$175K with yearly savings of \$2.1M.
- Managed project to introduce VoIP and VPN to 15 islands throughout the Caribbean using SonicWall and Cisco Call Manager Unity. Noted for setting up 75 VPN tunnels and meeting all timelines.
- Led the design and build out of satellite office in Miami to allow marketing team to access corporate network and applications via VPN solution.
- Led the development of global Intranet incorporating SharePoint Services 3.0 to share policies, procedures and best practices. Introduced new global contact database over the Intranet to support 5,000 employees. Interfaced with business leaders in HR, Customer Service, Inventory Control and Merchandising to define web content.
- Designed and implemented high-performance technical infrastructure to integrate core business operations between Miami, New York, Mexico and Caribbean locations. Interconnected islands to 1 central hub to allow a single VPN to corporate headquarters, resulting in improved reliability and reduced costs. Introduced domain controllers and new Exchange 2003 email servers.
- Implemented SharePoint to allow General Managers in 100 stores to upload sales information.
- Orchestrated a complete upgrade of technical infrastructure to increase security and uptime. Deployed 15 new Windows 2000/2003 servers and migration of 5 Windows NT servers to new Active Directory structure and subsequently led additional migration to Windows 2003 environment.

**DST Output, City Melville, NY**

2001 - 2002

## **Network / Communications Engineer**

*Recruited to administer, optimize and enhance company's network infrastructure to appropriately support 200 users throughout 2 locations.*

Managed, configured and supported MS Windows 2000, IIS and MS Exchange servers, including back-up, security, mailboxes, patches/fixes and updates. Set-up and supported network backbone and T1/ISDN circuits, including routers, switches and firewalls. Designed and implemented back-up/recovery, desktop imaging, remote connectivity, security, Email & Internet, anti-virus and broadband solutions. Planned, tracked and monitored all aspects of deployment, upgrade and troubleshooting projects. Troubleshoot and advised on technical problems to achieve maximum utilization. Documented technical environments, including processes, procedures and standards.

**Russell Reynolds Associates, New York, NY**

2001 - 2001

## **Network Consultant**

*Retained as a member of global team accountable for rolling out VPN solution to replace Frame Relay network.*

Effectively built, configured and installed MS Proxy 2.0 servers for each location, including DNS, routing, Winsock Proxy and desktops. Managed and monitored all user accounts for Windows NT/2000 and MS Exchange 5.5/2000 environments, utilizing Terminal Server, PC Anywhere and Shiva Net Manager. Controlled email content, utilizing MIME Sweeper. Planned and configured Windows 2000 desktops for the New York office, including installation of operating system, software and user/group profiles.

**RealtyIQ Corporation, New York, NY**

1999 - 2001

## **Desktop Support Technician**

Installed and configured NT Workstation 4.0 and applied NT Service Packs. Utilized DHCP, WINS, and DNS for fast network connectivity and name resolution, and configured Remote Access Services (RAS) for offsite and traveling employees. Entered and enabled static IP addresses on Cisco Routers using Cisco Pix Firewall software, also performed basic hardware installation, configuration, maintenance and troubleshooting of servers, routers, switches, and patch panels.

**Pioneer Future, New York, NY**

1997 - 1999

**Commodities Clerk**

Duties included: checking statements for previous day's crude oil and option trades, verifying current trades for accuracy, data entry of existing trades, and calculating value and overall performance. In addition, provided daily reports on the oil market and contributed 100% to the trader's position in the market. Extensively used: Microsoft Excel, Word, Outlook, PowerPoint, Internet Explorer, On-line investment information services such as Dow Jones, Charles Schwab, and Yahoo.

**Boston Group Investment Bankers, New York, NY**

1996 - 1997

**Stock Broker Assistant**

Assisted in all aspects of stock purchases and sales such as Initial Public Offerings (IPOs) and Options. In addition, recruited potential investors for the Group via cold calls.

**GEMsoft Computer Systems, New York, NY**

1994 - 1996

**PC and Network Support**

Was responsible for configuring and maintaining company laptops and desktops for Internet access, e-mail, network printing and Remote Access configurations. Supported all desktop software, including Microsoft and Outlook. Installed and troubleshot Right Fax Software and all graphical software such as: Photoshop and Illustrator Performed new installs utilizing Symantec Ghost, and provided software and hardware upgrades and troubleshooting.
