It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease agreement with Display Systems, Inc. at the Bathgate Industrial Park and to enter into a brokerage agreement with R.B. Miller Organization, Inc., both agreements to be substantially in accordance with the terms set forth below. The term of the letting will commence upon execution of the lease and will expire approximately 20 years from the basic rental start date as provided in the lease. The premises will consist of approximately 35,000 square feet of enclosed space at Block 2920 at the Bathgate Industrial Park. Display Systems, Inc. will pay the Port Authority the following rentals: (1) an annual basic rental equivalent to a proportionate share of the PILOT amount the Port Authority pays to the New York City Public Development Corporation; (2) a second annual basic rental escalating in stages over the term of the letting from \$156,000 to \$313,000; (3) for every dollar the Port Authority provides for building finishes (the total amount provided not to exceed \$700,000), an annual rental based on factors increasing in stages from .0750 to .1504; (4) for every dollar the Port Authority provides for the purchase of machinery and equipment (such equipment purchases to be subject to a security interest in the Port Authority and the total amount provided not to exceed \$200,000), an equipment rental with a recovery factor based on the average of the "25 Revenue Bond Index" appearing in the "Bond Buyer" for the 26 weeks prior to the particular equipment payment by the Port Authority, plus 250 basis points; and (5) an annual operating and maintenance rental of \$26,250 which will escalate annually by the percentage increase in the Consumer Price Index set forth in the lease.

The Port Authority will pay R.B. Miller Organization, Inc. a brokerage commission of \$125,000 as provided in the brokerage agreement.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement of lease with Display Systems, Inc. and a brokerage agreement with R. B. Miller Organization, Inc., both agreements to be substantially in accordance with the above provisions and the form of the agreements shall be subject to the approval of General Counsel or his designated representative.

(Board - 5/14/87)

Newark Legal and Communications Center - Contract
LCC-705.005 - Excavation - Increase in Authorization for
Extra Work and for Payments Made under Supplemental
Agreement No. 1

At its meeting on December 12, 1985, the Committee on Construction delegated to the Executive Director the authority to award Contract LCC-705.005 for the excavation for the office tower at the Newark Legal and Communications Center ("NLCC") to the lowest qualified bidder. The contract was awarded to Mohawk Constructors, Inc. ("Mohawk") in the amount of \$685,000, exclusive of authorizations for extra work up to the amount of \$68,500 and in the amount of \$65,000 for an alternate excavation plan.

Subsequent to the award, constructibility issues arose with respect to the foundation system for the NLCC. Certain work, such as the removal of subterranean foundations, abandoned utilities and other materials not known to exist at the time of the award, was deleted from future contract plans and ordered to be performed by Mohawk.

Supplemental Agreement No. 1 (the "Supplement") to Contract LCC-705.005, which changed the scope of work and provided for payments to Mohawk in an amount not to exceed \$250,000, was authorized by the Director, World Trade Department, on September 3, 1986. Subject to Committee ratification at the time of contract completion, the Executive Director, on December 22, 1986, authorized an increase in expenditures under the Supplement to \$550,000 and an increase in the authorization for extra work under Contract LCC-705.005 from \$68,500 to \$200,000.

Work under Contract LCC-705.005 and the Supplement thereto has been completed. Actual expenditures pursuant to the Supplement are \$548,440. Actual extra work payments under the contract are \$187,400.

The following resolution was unanimously adopted:

RESOLVED, that the Board approve the action of the Executive Director in increasing the expenditures under Supplemental Agreement No. 1 to Contract LCC-705.005 from \$250,000 to \$548,440 and in authorizing an increased expenditure for extra work under Contract LCC-705.005 to \$187,400.

(Board - 5/14/87)

The World Trade Center - Contract WTC-499.91 - PATH Cleaning Services - Award

Authorization is requested for the Executive Director to award Contract WTC-499.91 covering the performance of general cleaning services at the PATH WTC Station to Nelson Maintenance Services, Inc. for a thirty-month period commencing on or about July 1, 1987 at its proposal price of \$1,702,107 exclusive of escalation and to extend the contract for one additional one-year period with the compensation due the contractor during the extension period being subject to adjustment based upon mutually agreed upon cost increases related to labor and materials required to perform the services to be provided during the extension period. The Board is further requested to ratify the action of the Executive Director authorizing Allied Maintenance, Inc. to provide for cleaning services in all areas of the PATH Terminal from January 1, 1987 to June 30, 1987 under Contract WTC-499.23, Building Cleaning Services at an approximate cost of \$360,000.

Bids were received on April 8, 1987. Bids were solicited only from certified minority firms. Nelson Maintenance Services, Inc., the lowest bidder, is qualified to perform the contract.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to award Contract WTC-499.91, PATH Station, Cleaning Services to Nelson Maintenance Services, Inc. for a thirty-month term commencing on or about July 1, 1987 at its proposal price of \$1,702,107 exclusive of escalation and in his discretion to extend the contract for one additional one-year period, the form of the Contract to be subject to the approval of General Counsel or his designated representative; and to order extra work; and ratify the action of the Executive Director authorizing Allied Maintenance, Inc. to provide for cleaning services in all areas of the PATH Terminal from January 1, 1987 to June 30, 1987 under Contract WTC-499.23, Building Cleaning Services at an approximate cost of \$360,000.

(Board - 5/14/87)

The World Trade Center - Contract WTC-134 - Electrical Systems - Operation, Maintenance and Alteration - Award

This contract is for the furnishing of all labor, supervision and management to maintain and operate the electrical systems servicing the World Trade Center and for electrical construction and modification work to be performed generally as a service to tenants. Approximately 30% of total contract dollars are recoverable through tenant reimbursements.

The present electrical maintenance contract expires on June 30, 1987. Contract WTC-134 is a three-year contract commencing on July 1, 1987 with the Port Authority having options to extend the contract for two additional three-year periods. The contract provides for escalation on classified items during the option periods based upon the changes in the applicable metal index and changes in the straight time hourly labor cost at the inception of each option period.

Contract WTC-134 requires mandatory Minority Business Enterprise (MBE) participation for all classified work. In addition, it is estimated that approximately 15% of all non-classified work (time and material work) will be assigned to MBEs. The total MBE participation is estimated to be 15.4% of the total contract.

Proposals were solicited by public advertisement and the following proposals were received on April 21, 1987 (See attached page).

Hatzel & Buehler, Inc. of New York, New York submitted the lowest proposal and the Director, World Trade and Economic Development has determined that they are qualified to perform the contract.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract WTC-134, Electrical Systems, Operation, Maintenance and Alteration to Hatzel & Buehler, Inc. at its proposal price of \$19,813,289; and it is further

RESOLVED, that the Executive Director is authorized in his discretion to exercise the Port Authority's options to extend the contract for two additional three-year periods at the same terms and conditions except for escalation to be applied to classified work in accordance with changes in the applicable Metal Index and changes in the Straight Time Hourly Labor Cost at the inception of each option period.

(Board - 5/14/87)

Contractors	Projected Maintenance and Supervision Staff Estimate	Management Fee (Provided by Bidder)	Classified Work (Provided by Bidder)	Projected Non-Classified Work Includes 15% O&P Staff Estimate	Projected Total Cost
Hatzel & Buehler Inc. New York, New York	\$11,000,000	\$ 264,000 (2.4%)	\$2,049,289	\$6,500,000**	\$19,813,289
Forest Electrical Corp. New York, New York	\$11,000,000	\$1,100,000 (10%)	\$1,511,901	\$6,500,000**	\$20,111,901
George Kleinknecht, Inc. New York, New York	\$11,000,000	\$1 ,320,000 (12%)	\$1,432,540*	\$6,500,000**	\$20,252,540

*Corrected Amount

**This amount for non-classified work includes 15% for overhead and profit. This portion of the contract differs from the maintenance in that the contractor provides construction labor to perform electrical construction work which requires higher personnel costs due to a higher rate of construction labor turnover, and non-reimbursable costs such as, mobilization, management staff time, materials inventory and the outfitting of his own construction office on-site.

(Board - 5/14/87)

**George Washington Bridge & George Washington Bridge Bus
Station General Cleaning - Emergency Contract**

Authorization is requested to release Allen Motley d/b/a Motley's Shampooing Company from his obligations to perform janitorial and general cleaning services at the George Washington Bridge and George Washington Bridge Bus Station under Contracts PSE-455-1 and PSE-452-1, respectively, and for the Executive Director to award an emergency contract covering such services to a bidder who he shall deem qualified and whose bid he shall deem reasonable for an initial term of six months with the Port Authority to have the option to extend the contract thereafter on a monthly basis for a period not to exceed three months with no increase in contract price.

Authorization is also requested for the Director, Tunnels, Bridges, & Terminals Department to extend the emergency contracts in accordance with their terms and to order extra work thereunder in an amount equivalent to approximately 10% of the estimated total contract price thereof.

Motley has advised that he is experiencing financial distress and staff review indicates that Motley's records support his claims of financial distress. Staff has concluded that as a result of its financial condition Motley is unable to meet his contractual commitments and that the best interests of the Port Authority would be served by releasing Motley from his obligations. In order to avoid serious financial consequences to this minority contractor, staff has agreed to release Motley from his obligations to continue to perform under the contract, on condition that Motley satisfy all outstanding obligations to his employees under his existing labor contracts, and to award an interim emergency contract pending preparation of a new contract for public advertisement.

It was therefore recommended that the Board authorize the Executive Director to release Allen Motley d/b/a Motley's Shampooing Company from his obligations under Contracts PSE-455-1 and PSE-452-1, respectively, to perform janitorial and general cleaning services at the George Washington Bridge and George Washington Bridge Bus Station on the terms and conditions outlined above and to award emergency contracts covering such services on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to release Allen Motley d/b/a Motley's Shampooing Company from his obligations under Contracts PSE-455-1 and PSE 452-1 to perform janitorial and general cleaning services at the George Washington Bridge and George Washington Bridge Bus Station, respectively, on the terms and conditions outlined above and to award emergency contracts covering such services to a bidder or bidders who he shall

(Board - 5/14/87)

deem qualified and whose bid price he shall deem reasonable for an initial term of six months with the Port Authority to have the option to extend each contract thereafter on a monthly basis for a period not to exceed three months at no increase in contract price and the Director, Tunnel, Bridges, & Terminals Department to extend each emergency contract in accordance with its terms and to order extra work thereunder in an amount equivalent to approximately 10% of the estimated total contract price, the form of the agreements to be subject to the approval of General Counsel or his designated representative.

Whereupon, the meeting was adjourned.

 Marvin E. Weiss, Director, Office of Minority Business Development

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of May 14, 1987. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey has expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on June 11, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on June 11, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on June 11, 1987, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on June 11, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 6/11/87)

Award of Contract and Establishment of Bank Accounts for the Processing of Port Authority Tunnel and Bridge Toll Receipts

It was reported to the Board that the current contract for the processing of tunnel and bridge toll receipts from the Holland Tunnel, Lincoln Tunnel, George Washington Bridge, Bayonne Bridge, Goethals Bridge, and Outerbridge Crossing expires June 30, 1987.

In order to provide for the pick-up at facilities, the transport to a counting facility, and the counting and deposit of tunnel and bridge toll receipts, bids on a new contract were solicited by public advertisement, with the result that First Fidelity Bank, N.A., Newark, New Jersey, established itself as the low bidder.

The contract will be for a period of three years, commencing July 1, 1987 and ending June 30, 1990. The contract was bid on the basis of unit price and accordingly its cost will vary based on the volume of Port Authority tunnel and bridge toll receipts. The estimated total contract cost is \$552,000. The contract provides for the transport of funds from Port Authority facilities to the counting facility by means of a subcontractor. The Port Authority will have the right to terminate the contract without cause at any time on 30 days' prior written notice.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to establish bank accounts as necessary with, and to award a contract to First Fidelity Bank, N.A., Newark, New Jersey, for the processing of toll receipts from the Holland Tunnel, Lincoln Tunnel, George Washington Bridge, Bayonne Bridge, Goethals Bridge, and Outerbridge Crossing on the basis of unit price bid for a three-year period commencing July 1, 1987 and ending June 30, 1990 subject to the Port Authority's rights of cancellation; the form of the agreement to be subject to the approval of General Counsel or his authorized representative.

The Fund for Regional Development - Retention of Independent Auditors for 1987

It was reported to the Board that under the agreement among the States of New York and New Jersey and the Port Authority creating the Fund for Regional Development, the Port Authority acts as agent for the Fund and, as such, negotiates and executes leases, manages the Fund's operations, and prepares quarterly and annual financial statements for the States. The Fund pays the Port Authority a management fee for these services.

The Fund's rapid growth during 1986 made it appropriate to have its books and accounts audited for the first time for the year ending December 31, 1986. Based on the Audit Committee's recommendation, the Board designated Mitchell/Titus & Co. as independent auditors of the Fund for the year ending December 31, 1986.

The revenue and transactions of the Fund for Regional Development are now such that an annual independent audit of the books and accounts of the Fund is appropriate. The Audit Committee has reviewed the performance of Mitchell/Titus, and has recommended that the Board retain them as independent auditors of the Fund for Regional Development for the year ending December 31, 1987.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that Mitchell/Titus & Co. be and it hereby is designated as independent auditors to audit the books and accounts of the Fund for the year ending December 31, 1987; and it is further

RESOLVED, that the matter of arranging for such auditing by the above designated auditors and for monitoring the auditors' performance be and it hereby is referred to the Audit Committee.

**George Washington Bridge Bus Station - McDonald's
Corporation - New Lease - LBF-56**

Authorization is requested to enter into a lease with McDonald's Corporation at the George Washington Bridge Bus Station for the operation of a fast food restaurant. The term of the lease would be for approximately ten years, four months, expiring on the day preceding the tenth anniversary of the date payment of rental commences. Rental is expected to commence no later than 120 days after the premises are delivered to the tenant. The Port Authority may terminate the lease at any time without cause, upon 30 days notice and in such event the tenant would be reimbursed for the unamortized portion of its initial space preparation costs initially limited to \$400,000. The lease provides for a basic rental at the annual rate of \$67,500 for five years plus an annual percentage rental equivalent to 8% of gross receipts over \$843,750. The basic rental and the exemption amount will be subject to escalation on the fifth anniversary of the date payment of rental commences in accordance with the Consumer Price Index. The tenant will pay for all utilities provided at standard rates subject to escalation over the term of the lease. The space will be delivered in its "as is" condition and the tenant will be responsible, at its sole cost, for all necessary construction to prepare the premises for its operations. The lease contains provisions requiring the tenant to make a good faith effort to contract with Minority and Women owned Business Enterprises for a portion of the tenant's construction work. It is expected that this restaurant will benefit both the station's commuting population and the local community.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, for and on behalf of the Port Authority, is hereby authorized to enter into a lease with McDonald's Corporation at the George Washington Bridge Bus Station substantially in accordance with the terms and conditions set forth above, the form of the agreement to be subject to the approval of the General Counsel or his designated representative.

**Brooklyn - Port Authority Marine Terminal - Express
Warehouse Corporation - Term Lease**

Authorization is requested to extend the letting of premises at the Brooklyn-Port Authority Marine Terminal now occupied by Express Warehouse Corporation under a short-term arrangement expiring June 30, 1987. Express Warehouse Corporation, a warehouseman, is a subsidiary corporation of Express Industries & Terminal Corp., a tenant at Pier 40, part of the New York City Passenger Ship Terminal. In the fall of 1984, as a result of a structural integrity survey the Port Authority reduced the maximum floor load on the Pier 40 main deck from 600 to 300 lbs. per square foot. As a result of this reduction in maximum floor load capacity the tenant leased the Pier 3 shed and Building 174 at the Brooklyn-Port Authority Marine Terminal for a term expiring June 30, 1987 to provide warehouse space for accounts that could no longer be served at Pier 40. Subsequently the Pier 2 shed was added to the premises under this lease. The existing lease is terminable by the Port Authority on 30 days' notice. An extension of this lease has been negotiated and staff has agreed to delete this right. The term of the proposed extension will commence on or about July 1, 1987 and will expire on May 31, 1992 unless sooner terminated. The tenant will pay a basic annual rental for all of the premises during the extended term at the rate of \$166,000 per year. Effective June 1, 1989, June 1, 1990, and June 1, 1991 the basic rental will be subject to escalation based on increases in the regional Consumer Price Index. The tenant will have the right to berth barges free of charge at Piers 2 and 3 for the sole purpose of loading and unloading warehouse commodities. The Port Authority will have the right to terminate the lease on 90 days' notice if the premises are required in connection with the development of the Brooklyn-Port Authority Marine Terminal for alternate uses or in connection with the berthing, loading or unloading of seagoing or other vessels. Also, the Port Authority will have the right to do work on portions of the premises in connection with any proposed development of the Brooklyn Piers.

The tenant will perform approximately \$25,000 worth of repair work in the Pier 2 shed. Upon satisfactory completion of this work, the tenant will receive a rental credit equal to the cost of repair work performed, up to a maximum of \$25,000, payable in equal monthly installments over a five-month period.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement extending the letting of the premises leased by Express Warehouse Corporation at the Brooklyn-Port Authority Marine Terminal substantially in accordance with the terms set forth above, the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 6/11/87)

**New York and New Jersey Marine Terminal - Fender System
Repairs - Contract MFP-166 - Award**

Contract MFP-166 requires the contractor to repair fender systems and related pier structures as needed on a call-in basis during an approximately year and a half period at various Port Authority Marine Terminal facilities. These facilities include the Brooklyn, Erie Basin, Columbia Street and Elizabeth - Port Authority Marine Terminals, Port Newark and the New York City Passenger Ship Terminal.

The contract also requires mobilization at other marine terminal facilities, repairs to floating fenders (camels), and furnishing and installing a vertical sheet pile fender system of Bongossi timber all on a net cost basis roughly estimated at \$140,000.

The contract was publicly advertised and bids were received on May 21, 1987. Macro Enterprises, Ltd. submitted the low bid and the Chief Engineer has determined that they are qualified to perform the contract.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract MFP-166, New York and New Jersey Marine Terminal Fender System Repairs, to Macro Enterprises, Ltd. in the estimated amount of \$1,679,415 and to order extra work up to the amount of \$170,000 and to order net cost work.

The World Trade Center - Contract WTC-131 - Agreement to Perform General Maintenance Services - Award

Contract WTC-131 provides for the performance of general maintenance and incidental construction work, including the furnishing of all labor and supervision required for such maintenance and construction, at the World Trade Center.

The present general maintenance contract expires on July 31, 1987. Contract WTC-131 is a three-year contract commencing on August 1, 1987 with the Port Authority having options to extend the contract for one additional period of three years and a second period of two years on the same terms and conditions.

Proposals were solicited by public advertisement and received on May 12, 1987. National Cleaning Contractors, Inc. submitted the lowest proposal and the Director of World Trade & Economic Development has determined that they are qualified to perform the contract. In addition, a proposal was received from International Service System, Inc. which was deemed non-responsive.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract WTC-131, Agreement to Perform General Maintenance Services to National Cleaning Contractors, Inc. at an estimated price of \$4,653,000; and it is further

RESOLVED, that the Executive Director is authorized, in his discretion, to exercise the Port Authority's options to extend the contract for one additional period of three years and a second period of two years on the same terms and conditions.

The World Trade Center - Contract WTC-133 - Agreement to Operate and Maintain the Mechanical Systems in The World Trade Center - Award

Contract WTC-133 requires the contractor to furnish all labor and supervision necessary to operate and maintain the mechanical systems at the World Trade Center.

The present contract to maintain and operate the World Trade Center mechanical system expires on July 31, 1987. Contract WTC-133 is a three-year contract commencing on August 1, 1987 with the Port Authority having options to extend the contract for one additional period of three years and a second additional period of two and one-half years on the same terms and conditions.

Proposals were solicited by public advertisement and were received on May 12, 1987. Ogden Allied Building and Airport Services, Inc. submitted the lowest proposal and the Director of World Trade & Economic Development has determined that they are qualified to perform the contract.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract WTC-133, Agreement to Operate and Maintain the Mechanical Systems in the World Trade Center, to Ogden Allied Building and Airport Services, Inc. at an estimated price of \$13,099,520; and it is further

RESOLVED, that the Executive Director is authorized in his discretion to exercise the Port Authority's options to extend the contract for one-additional period of three years and a second period of two and one-half years on the same terms and conditions.

(Board - 6/11/87)

Newark International Airport - Rehabilitation of Taxiways "I" and "O" and Installation of Taxiway Turn-Offs - Contract NIA-457 - Authorization to Award

Contract NIA-457 is the final phase of the replacement of the pavement wearing course for Taxiways "I" and "O" including centerline lighting. The contract also provides for modifications to exit connections from Runway 11-29 to Taxiways "P", "R" and "S".

The wearing course of Taxiways "I" and "O", originally installed in the early 1970's, is approaching the limits of its useful life under the increased aircraft traffic conditions at Newark International Airport. Plane movements have grown from approximately 197,000 in 1980 to approximately 400,000 in 1986, and are expected to reach approximately 420,000 by the late 1990's.

The growth of aircraft movements at Newark International Airport requires improvements to the runway/taxiway system. Enhanced exit connections from Runway 11-29 to Taxiways "P", "R" and "S" are required to decrease runway occupancy time by permitting aircraft to exit at higher speeds onto those taxiways.

The construction contract includes a provision for the removal and reinstallation of timber barricades and adding bitumen to recycled asphalt concrete aggregate on a net cost basis, roughly estimated at \$20,000.

The entire contract is eligible for Federal funds under the Airport Improvement Program, which allows funding at a 75% rate. The unreimbursed amounts will be recoverable through the flight fee.

The contract provides that the contractor will meet a goal for Minority Business Enterprises participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

Bids will be solicited by public advertisement and are presently scheduled to be received in late June 1987.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract NIA-457, Newark International Airport, Rehabilitation of Taxiways "I" and "O" and Installation of Taxiway Turn-Offs, to the lowest qualified bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the bid accepted and to order net cost work or to reject all bids.

**La Guardia Airport - Contract PSE-471 - General Cleaning -
Parking Lots**

Authorization is requested for the Executive Director to award Contract PSE-471, General Cleaning, Parking Lots at LaGuardia Airport to See Clear Maintenance Corp.. for a two-year term commencing on or about August 1, 1987 at its bid price of \$494,349 exclusive of a 10% extra work allowance, the Port Authority to have the right to extend the contract for two additional one-year periods with the contract price during each extension period being subject to adjustment based upon increases in the regional Consumer Price Index. The Board is further requested to authorize the ordering of extra work under the contract in accordance with its terms and to authorize the extension of the contract for two additional one-year periods in accordance with the terms of the contract without any further approval of the Board or any Committee.

Bids on this contract were solicited only from certified minority firms. See Clear Maintenance Corp., the lowest qualified bidder, has been determined to be technically and financially able to perform the work.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to award Contract PSE-471, LaGuardia Airport, General Cleaning, Parking Lots to See Clear Maintenance Corp. for a two-year period commencing on or about August 1, 1987 at its bid price of \$494,349 exclusive of a 10% extra work allowance and the Director of Aviation to order extra work under the contract during the two-year term thereof in accordance with its terms; and that the Board further authorize the Director of General Services to extend the contract for two additional one-year periods in accordance with the terms thereof without the further approval of the Board or any Committee and authorize the Director of Aviation to order extra work during each extension period in an amount not to exceed 10% of the contract price established for each such period, the form of the agreement to be subject to the approval of General Counsel or his designated representative.

**La Guardia Airport - Award of Contract PSE-472 - General
Cleaning - Central Terminal Building and West End
Building**

Authorization is requested for the Executive Director to award Contract PSE-472, General Cleaning, the Central Terminal Building and West End Buildings at LaGuardia Airport to See Clear Maintenance Corp. for a two-year term commencing on or about August 1, 1987 at its bid price of \$3,885,037, exclusive of a 10% extra work allowance, the Port Authority to have the right to extend the contract for two additional one year periods with the contract price during each extension period being subject to adjustment based upon increased in the regional Consumer Price Index. The Board is further requested to authorize the ordering of extra work under the contract in accordance with its terms and to authorize the extension of the contract for two additional one-year periods in accordance with the terms of the contract without any further approval of the Board or any Committee.

Bids on this contract were solicited by public advertisement. See Clear Maintenance Corp., the lowest qualified bidder, has been deemed financially and technically able to perform the contract.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to award Contract PSE-472, General Cleaning, Central Terminal Building and West End Building, LaGuardia Airport to See Clear Maintenance Corp. for a two-year period commencing on or about August 1, 1987 at its bid price of \$3,885,037 for the two-year term, exclusive of a 10% extra work allowance and the Director of Aviation to order extra work under the contract during the two-year term thereof in accordance with its terms; and that the Board further authorize the Director of General Services to extend the contract for two additional one-year periods in accordance with the terms thereof without the further approval of the Board or any Committee and authorize the Director of Aviation to order extra work during each extension period in an amount not to exceed 10% of the contract price established for each such period; the form of the contract to be subject to the approval of General Counsel or his designated representative.

(Board - 6/11/87)

**Newark International Airport - Relocation of the Runway 4L
Instrument Landing System Glide Slope Facility**

It was reported to the Board that the increase in aircraft operations at Newark International Airport has made airport capacity a critical element in the airport's ability to serve the public. Relocating the Instrument Landing System Glide Slope Facility (ILS/GS) will permit departing aircraft to move approximately 800 feet closer to the runway threshold when landing and take off operations are conducted on Runway 4L during Instrument Flight Rules (IFR) weather conditions. This will provide the airport with an operational advantage allowing aircraft to taxi and queue on the southerly portion of Taxiway D when Runway 4L is used for both arrivals and departures during IFR weather conditions. Aircraft may not occupy the southerly portion of the taxiway for this kind of operation at the present time since this section of the taxiway is in the ILS/GS critical area.

Accordingly, it is recommended that the Port Authority agree to reimburse the Federal Aviation Administration (FAA) for all costs associated with the relocating of the ILS/GS. The costs are in the estimated amount of:

Engineering	\$ 19,600
Construction & Flight Check	\$116,550
Overhead	\$ 16,338
Contingency	\$ 22,512

The total cost will be in the estimated amount of \$175,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into an agreement with the Federal Aviation Administration for relocation of the Runway 4L Instrument Landing System Glide Slope Facility.

(Board - 6/11/87)

Kennedy International Airport - Lease of Building No. 69 and Related Outside Areas to Hudson General Corporation

It was recommended that the Board amend its resolution of June 12, 1986 authorizing the Executive Director, for and on behalf of the Port Authority, to enter into a lease with Hudson General Corporation for Building No. 69 and related outside areas at Kennedy International Airport. As amended, the Executive Director would be authorized to enter into a lease with Hudson General Corporation for a term of approximately eighteen years commencing on or about July 1, 1987 with basic rentals to commence on the earlier of the completion of construction or February 1, 1988 at an approximate annual rental of \$197,000, increasing at periodic intervals throughout the term of the lease to an approximate annual rental of \$552,000; to make payments to Hudson General of up to \$2 million for renovation and asbestos removal work to Building No. 69 with Hudson General paying a monthly facility rental commencing on July 1, 1988 based upon a factor for a payment period of eighteen years of .010818 (which would be adjusted for other than an eighteen-year payment period) for each dollar paid by the Port Authority for the renovation and asbestos removal work including an amount computed monthly at a factor of .009167 on all sums prior to the commencement of facility rental; the Port Authority to be obligated to reimburse Hudson General for its unamortized investment on a straight line basis for the cost of the renovation and asbestos removal work up to \$2 million to the extent that Port Authority payments were not used, if the lease were terminated by either party after the termination of Hudson's permit covering activity on the premises by the Port Authority without cause. The Executive Director would also be authorized to permit Hudson General to remain in occupancy of Hangar No. 11, its present location at the airport, rent-free for a reasonable period after January 31, 1988 pending completion of the construction work to Building No. 69 and the relocation of Hudson General's operations from Hangar No. 11 to Building No. 69.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the resolution of the Board of Commissioners adopted at its meeting on June 12, 1986 authorizing the Executive Director to enter into a lease with Hudson General Corporation for Building No. 69 and related outside areas at Kennedy International Airport is hereby amended in accordance with the foregoing.

(Board - 6/11/87)

**Kennedy International Airport - Paving and Utilities to
North Cargo Area - Project Authorization and Award of
Contract JFK-110.062**

At its meeting on March 8, 1984, the Board authorized a lease with Halmar Construction Corp. and Halmar Contracting, Inc. for the construction and operation of a multi-tenant air cargo service facility at Kennedy International Airport. Further, the Board, at its meeting on August 8, 1985, authorized a lease with The King Interests, Corp. for the construction and operation of two multi-tenant air cargo buildings at Kennedy International Airport. Under the terms of these tenants' leases, the Port Authority is obliged to provide paving and utility services to these North Cargo Area ("NCA") structures.

Contract JFK-110.062, North Cargo Area, North Boundary Road Improvement, Paving and Utilities, provides for the construction of various roadway pavements and utilities for the NCA. The utilities include electric power, communications, water, storm drainage and sanitary sewers. The contract also provides for net cost payments for the removal and replacement of unsuitable material. Net cost payments are presently estimated at roughly \$20,000.

A portion of the contract is eligible for Federal funds in the anticipated amount of \$389,000 under the Airport Improvement Program. Contract JFK-110.062 requires Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

The contract was publicly advertised and bids were received on May 21, 1987.

Grace Contracting Corp. ("Grace") submitted the lowest bid. Subsequent to the opening of bids, Grace concluded that it had overstated its lump sum amount of \$4,468,000 by \$100,000. Accordingly, Grace submitted a revised proposal in the amount of \$4,368,000. The Chief Engineer has determined that they are qualified to perform the contract.

The following resolution was unanimously adopted:

RESOLVED, that the Board authorize a project at Kennedy International Airport to provide paving and utilities to serve cargo buildings located in the North Cargo Area ("NCA") at an expenditure presently estimated at \$5.2 million, including payments to contractors, allowances for extra work and net cost work, engineering, administrative and financing expenses; and it is further

RESOLVED, that the Board authorize the Executive Director to award Contract JFK-110.062, North Cargo Area, North Boundary Road Improvements, Paving and Utilities, to Grace Contracting Corp., the low bidder, in the amount of \$4,368,000, plus an authorization of \$450,000 for extra work and an authorization for net cost work.

(Board - 6/11/87)

Kennedy International Airport - Jamaica Bay Shore Erosion - Removal of Excess Fill

As a result of inspection by Port Authority staff of fill placed along the shoreline of Kennedy International Airport at Jamaica Bay, it was determined that fill material had been placed beyond previously authorized limits. As a result, the Port Authority voluntarily disclosed to the U.S. Army Corps of Engineers (COE) and the New York State Department of Environmental Conservation (DEC) that the material was placed and, subsequently, after an inspection, the COE formally advised the Port Authority that the placement of the fill without permits violated Federal law.

The fill was placed by parties not authorized by the Port Authority. In this connection, the Law Department has commenced suit against certain parties who may be responsible.

A corrective program was developed with the COE and the DEC which, among other matters, provides for the removal of approximately 65,000 cubic yards of material which was placed beyond the authorized limits and certain other refacing and restoration work along the shoreline. Additionally, the program will entail mitigation for former vegetated wetlands which were filled in the form of a Port Authority monetary donation to the National Park Service to be used solely for the enhancement or preservation of natural resources within Gateway National Park. Approximately three acres of formerly vegetated wetlands were covered and a mitigation ratio of 2:1 with a \$10,000 per acre mitigation figure (total \$60,000) has been arrived at with the governmental agencies.

Understandings and agreements with respect to the unauthorized fill and corrective program, which in some instances may take the form of consents to administrative orders, will be entered into, after review by General Counsel or his authorized representative, with various governmental agencies. Among other agreements, a right of entry onto Gateway National Park lands will be secured from the National Park Service for removal of certain material placed beyond the Kennedy International Airport property line.

The corrective program, required by the COE and DEC, also will entail:

- Removal of approximately 65,000 cubic yards of fill and rip-rap which will be redeposited at approved locations on Kennedy International Airport.
- Pulling back and refacing certain areas with an estimated removal of 3,000 cubic yards of material.
- Construction of a revetment at the 4L end of Runway 4L/22R in order to stabilize upland area and maintain existing wetlands.

(Board - 6/11/87)

In light of the concern that the corrective work be performed in an expeditious and satisfactory manner, bids on this contract will be solicited from a list of contractors, approved by the Chief Engineer, who are experienced and capable of performing the work; are known to have previously performed satisfactory work for the Port Authority; and can respond with sufficient labor, equipment and materials to perform the work on a timely basis. Compensation will be made on a unit price basis. It is anticipated that work will commence in the fall of 1987.

It was therefore, recommended that the Board adopt the following resolution.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a project in the estimated amount of \$1,760,000 be and it hereby is authorized involving, among other things, removal of excess fill deposited along the shoreline of Kennedy International Airport; and in connection therewith; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to: (1) enter into agreements and understandings with various governmental agencies, including, but not limited to, the United States Army Corps of Engineers, the New York State Department of Environmental Conservation and National Park Service of the United States Department of the Interior with regard to the removal of unauthorized fill placed adjacent to, and in, Jamaica Bay at Kennedy International Airport, and the making of a donation to mitigate the filling of formerly vegetated wetlands; (2) make a mitigation donation of \$60,000 to the National Park Service; and (3) award Contract JFK-110.073, Jamaica Bay Shore Erosion, Removal of Excess Fill, to the lowest qualified bidder on the basis of bids to be received, from contractors approved by the Chief Engineer, plus an allowance of up to 15% for extra work; and it is further

RESOLVED, that the form of contracts, agreements and other documents necessary or advisable to implement the foregoing be subject to the approval of General Counsel or his designated representative.

Whereupon, the meeting was adjourned.

 Joseph L. Vanacore, Assistant Executive Director/Capital Programs
 Kristina E. Weisenstein, Administrative Assistant to the Executive Director
 Marvin E. Weiss, Director, Office of Minority Business Development
 Robert Williams, Deputy Director of General Services

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of June 11, 1987. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey has expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on July 16, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on July 16, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on July 16, 1987, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on July 16, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 7/16/87)

New Jersey Transit Projects

New Jersey Transit (NJT) has announced that the Penn Station New York Access project is the centerpiece of NJT's plan to increase substantially the number of rail commuters who now reach midtown Manhattan Station New York and to improve the utility of that operation for its current markets. The Penn Station New York complex stretches from west of Newark Penn Station to Sunnyside Yards in Queens. By providing attractive, quick service into the Penn Station New York complex, these projects will divert automobiles from the George Washington Bridge and Lincoln Tunnel and ease the projected growth in bus traffic to the Port Authority Bus Terminal.

Currently, only the electrified Northeast Corridor line and the electrified portion of the North Jersey Coast Line can be served directly without a transfer into Penn Station. Some seventeen trains per peak hour from these services and Amtrak's intercity rail service use the rail tunnel under the Hudson River to Penn Station New York with capacity in place for 20 peak hour trains. Track structures, signal and storage improvements could expand that capacity to upwards of 30 trains. Were train capacity increased into the Penn Station complex from west of the Hudson River, existing services into midtown Manhattan could be expanded. In addition, major midtown markets carried on rail lines, either currently terminating at Hoboken and using PATH's uptown line to reach Midtown or not carrying passengers today, i.e., west shore, may also be accommodated at Penn Station New York. This can be accomplished through a combination of physical track connections in Kearny and Montclair and the creation of a transfer operation at Secaucus.

Funding will be used for design work for a new signal system, increasing the permissible train speed limit on the Northeast Corridor and extending into Penn Station New York, providing for adequate train storage capacity at Penn Station in Sunnyside Yard, improving the track connection west of Newark between the Raritan Valley Line and Northeast Corridor, and other related improvements resulting in an increased ability to handle trans-Hudson commuter trains into Penn Station New York.

Hoboken Terminal has been the terminus of service for several commuter rail lines and a major Hudson and Manhattan PATH passenger load point since almost the turn of this century. NJT has taken numerous steps to maintain and upgrade this terminal through which commuters pass as they transfer to and from PATH. NJT plans to further improve this terminal with the relocation of the dispatching center and installation of a consolidated dispatching system, developing a new communications room, installation of closed circuit televisions, and a variety of related facility improvements. These actions would complement the expenditures the Port Authority expects to make on the new trans-Hudson lower Manhattan ferry services and PATH to facilitate the handling of commuters through this gateway.

The New Jersey Governor's office has requested that the Port Authority provide funding for these items from funds made available for projects in the State of New Jersey pursuant to the Governors' Bi-State Agreement of June 1983.

(Board - 7/16/87)

The maximum amount of funds used for the planning and conceptual design for the Penn Station New York Access project would be \$13,788,049, and \$1,931,951 for the Hoboken Terminal Complex improvements. The proposed agreements will provide that NJT will be completely responsible for all aspects of the projects. The agreements would also specifically provide that the Port Authority will not have any responsibility for the improvements contracted by NJT at Penn Station New York or Hoboken Terminal.

The following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into agreements with New Jersey Transit to provide up to \$15,720,000 from funds made available for New Jersey projects pursuant to the Governors' 1983 Bi-State Agreement, said funds to be provided for: (1) the planning and conceptual design of Penn Station New York Access; and (2) certain physical plant improvements to the Hoboken Terminal Complex to increase its operational efficiency; this expenditure to exhaust the commitment of funds allocated to New Jersey; and it is further

RESOLVED, that the form of the agreements be subject to the approval of General Counsel or his authorized representative.

(Board - 7/16/87)

Rental Agreement for the Relocation of the PATH Pavonia Maintenance Shop

It was reported that the PATH Way, Power and Structures Division's Pavonia Shop is housed in a functionally obsolete space approximately 60 feet underground in a sealed-off platform area and passageway connecting the PATH Pavonia Station with an abandoned Erie Lackawanna Station. The poor working conditions, exacerbated by the construction of the Newport commercial development which impinges on the shop location, have made it difficult to continue occupying this area. The area has had continuous problems with interruption of plumbing and heating services, reduction of fresh air exchange, flooding during storms, and infestation of flying insects and rodents, all of which have contributed to the need for immediate relocation. The redesign of the Pavonia Station will not include space for the PATH shops.

In 1967, PATH transformed this area into a Way, Power and Structures shop and locker room location for over 100 construction and maintenance employees, including masons, carpenters, electricians, and track, structure and pump maintainers. The area is no longer adequate for the efficient operation of these shops.

During the past year, numerous locations along the PATH right-of-way were investigated and analyzed for the relocation of the Pavonia Shop. In the opinion of the Rail Transportation Department's planning staff, PATH Operations personnel, and staff of the General Services Department, the building at 777 Jersey Avenue best fulfills the functional criteria and space requirements of the Way, Power and Structures Division. In addition, this building is located directly across the street from the Port Authority Technical Center, whose cafeteria, medical and transportation services will be made available to Way, Power and Structures employees.

The building, built in 1972, is a one-story masonry and steel structure containing approximately 75,000 square feet of warehouse space and 5,000 square feet of office space. The Port Authority will rent approximately one-half of the warehouse space and all of the office space. It is located on the west side of Jersey Avenue, directly opposite the Port Authority Technical Center. The floors in the warehouse area are poured concrete, with a load capacity of 400 pounds per square foot. The ceiling clearance is approximately 17-1/2 feet. An enclosed loading dock for one vehicle is included in the premises. The building is sprinklered, equipped with a central station security alarm system, and is heated and air conditioned by natural gas. Approximately 80 parking spaces will be available for employee and facility vehicles at no additional cost.

The lease will commence on or about November 1, 1987 for an initial ten-year period with two five-year renewal options at the following fixed rental rates per rentable square foot:

YEAR	RATE
1 to 5	\$ 4.75/sq. ft.
6 to 10	6.57/sq. ft.
11 to 15	8.06/sq. ft.
16 to 20	10.28/sq. ft.

(Board - 7/16/87)

Building operations and maintenance costs are not included in the fixed rent, except for structural repairs which will be the landlord's responsibility. The Port Authority will pay its proportional share of audited expenses attributable to operations and maintenance. Taxes and expenses for the separately metered utilities will be billed to the Port Authority on a straight pass-through basis. It is estimated that all building expenses will add approximately \$3.75 per square foot to the fixed rental rate during the first year (\$2.55 for utilities and maintenance services, and \$1.20 for tax payments). The lease will also provide for an option to rent the remaining space in the premises.

Staff has prepared functional specifications, preliminary designs and work space layouts so that the owners can provide engineering, design, and construction services to modify the space to meet the specialized needs of the PATH shops. The Port Authority estimates that all such engineering and construction work will not exceed \$800,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to (a) execute a lease agreement with the Estate of Bernice Nova, Robert Nova, Rosalie Shore and Martin Finestein as conservator of Joseph Hirschman for approximately 42,000 rentable square feet of space at 777 Jersey Avenue, Jersey City, New Jersey, for a period of ten years commencing on or about November 1, 1987 with an option for two five-year extensions for occupancy by PATH's Way, Power and Structures Division at a rental during the term of \$4.75 per rentable square foot for years 1 through 5; \$6.57 per rentable square foot for years 6 through 10; \$8.06 per rentable square foot for years 11 through 15; and \$10.28 per rentable square foot for years 16 through 20; the Port Authority to make additional payments for its pro rata share of taxes on the building and to pay for building, operating and maintenance expenses on an annual basis as well as for separately metered utilities, it being estimated that all building expenses will add approximately \$3.75 per rentable square foot for the first year; (b) enter into a contract with the building owners to provide for the modification of the rented area to meet specialized needs of this PATH Division at a cost of approximately \$800,000; and (c) incur expenses of approximately \$350,000 for moving and relocation services, purchase of shop equipment and office furnishings and the provision of telephone services; and it is further

RESOLVED, that the form of the aforesaid agreement or agreements be subject to approval by the General Counsel or his duly authorized representative.

(Board - 7/16/87)

Contract for Financial Printing Services

To provide for the Authority's requirements for financial printing services of or related to the Authority's issuance of its bonds, notes and other obligations (excluding preparation of the definitive certificates evidencing such bonds, notes and other obligations), proposals were requested from qualified bidders. Potential bidders were qualified on the basis of an evaluation by staff upon past experience, interviews with vendor representatives and site inspections.

R. R. Donnelley & Sons Company ("Donnelley") submitted the low bid, among the four bids submitted (one of which was deemed not to be responsive) in connection with the Authority's request for proposals, based upon a comparison of unit prices multiplied by estimated quantities of work for each year of the two-year term specified in the proposal.

The proposal, which is in the form of an offer from Donnelley to provide all of the Authority's financial printing needs for two years, is before the Board at this meeting. Upon acceptance by the Authority, the proposal would constitute an agreement which, unless sooner terminated by the Authority, would be for a two-year term with three one-year optional extension periods in which unit price adjustments, if any, would not exceed the increases in the regional Consumer Price Index for a predetermined period. Additionally, the agreement would contain a provision for ordering additional items (items not covered by unit prices bid) at a total cost not in excess of 10% of the estimated total two-year proposal price bid.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, of the Authority is hereby authorized on behalf of the Authority to accept the offer of R. R. Donnelley & Sons Company, dated June 16, 1987, entitled "Contract for Processing Port Authority Legal and Financial Printing Services," to provide financial printing services to the Authority in accordance with the terms and conditions contained therein; and it is further

RESOLVED, that the Executive Director of the Authority is hereby authorized on behalf of the Authority to exercise the options to extend the term of the agreement with R. R. Donnelley & Sons Company for up to three additional one-year periods in accordance with the terms and conditions contained in such agreement; and it is further

RESOLVED, that the forms of such agreement and any extensions thereof be subject to the approval of the General Counsel or his authorized representative.

(Board - 7/16/87)

Port Newark - Witte Chase Corporation - Amendment to Lease

Authorization is requested to enter into an agreement extending the letting of Berth 36 and approximately 12.6 acres of upland area at Port Newark now occupied by Witte Chase Corporation for a period expiring June 30, 1988 at an annual rental of \$364,600. In addition to the basic rental the agreement provides for payment of one-half the wharfage charges which would be applicable pursuant to the Port Authority's tariff for all cargo handled at the berth which is in excess of 450,000 tons per year, and effective as of April 1, 1987 provides for payment of an additional rental for additional upland area occupied by Witte-Chase at a rate equivalent to \$0.05 per square foot per month.

The agreement will also settle mutual claims of the Port Authority and Witte-Chase arising out of the loss of Witte-Chase's property and the need to reconstruct the berth because of a serious structural defect. The Port Authority will waive a judgment in the amount of \$37,500 entered in its favor in an action entitled "The Port Authority of New York and New Jersey vs. Schiavone-Chase Corporation" and Witte Chase will release the Port Authority from any claims it may have against the Port Authority due to alleged vessel groundings and loss of property, and also from claims involving inconveniences resulting from reconstruction of the berth.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement extending the letting of premises leased by Witte-Chase Corporation at Port Newark substantially in accordance with the terms set forth above, the form of the agreement to be subject to the approval of General Counsel or his authorized representative.

(Board - 7/16/87)

**Elizabeth - Port Authority Marine Terminal - Atlantic
Container Lines, Ltd. - Amendment & Assignment of Lease
No. EP-144**

Authorization is requested to consent to the assignment of Lease No. EP-144 from Atlantic Container Lines, Ltd. to Atlantic Container Lines, B.V. and to enter into an amendment to the lease which covers a 102 acre terminal at the Elizabeth-Port Authority Marine Terminal. The amendment would extend the lease for a thirteen-year period commencing on or about October 1, 1987. During the first five years of the extended term, the tenant will perform general terminal improvement work, including crane modifications, renovation of crane rails, building demolition, utility rerouting, lighting and fencing to upgrade its terminal. The Port Authority will pay the tenant a minimum of \$2 million and a maximum amount not to exceed \$4 million for this work. In addition to the work to be performed by the tenant, the Port Authority has agreed to perform additional general terminal improvements and modernization at an estimated cost of \$1 million.

The Port Authority will have access, during the term of the extension, to public berths No. 74 and No. 76 for itself and its designees. The tenant shall have the right, during the first five years of the extended term, to include berth No. 74 in the premises for the remainder of the extended term of the lease.

The agreement provides for payment of the following rentals during the extended term of the letting:

1. a basic annual rental at a rate which will escalate annually from \$1.85 million in the first year of the extended term to \$4.525 million in the tenth year of the extended term. The annual basic rental in effect at the end of the tenth year of the extended term will remain in effect for the balance of the extended term, subject to annual escalation based upon 50% of the increase in the regional Consumer Price Index;

2. should the tenant exercise its right to include berth No. 74 in the premises the tenant will pay an additional basic rental during the first five years of the extended term at the following rates per year:

Year 1 - \$220,000
Year 2 - \$255,000
Year 3 - \$315,000
Year 4 - \$340,000
Year 5 - \$400,000

Rental at the applicable rate will commence when the tenant exercises its right to include berth No. 74 in the premises. Thereafter rental for the berth will be payable at a rate which will escalate annually from \$447,000 in the sixth year of the extended term to \$542,000 in the tenth year of the extended term. The annual basic rental for the berth in effect at the end of the tenth year of the extended term will remain in effect for the balance of the extended term subject to annual escalation based upon 50% of the increase in the in the regional Consumer Price Index; and

(Board - 7/16/87)

3. a facility rental payable during the extended term of the lease commencing after completion of the tenant's work in an amount sufficient to recover the amount paid by the Port Authority to the tenant for the construction of its general terminal improvements over a 20-year period.

So long as berth No. 74 remains a public berth vessels operated by the tenant and occupying this berth will be subject to dockage and wharfage charges as provided for in the applicable Port Authority tariff. However, wharfage charges will not be assessed when three or more vessels engaged in regular container liner service are docked at the premises simultaneously if one such vessel occupies Berth 74. It is estimated that the revenue from annual wharfage and dockage charges will be approximately \$300,000.

The tenant will have the right to terminate the extended term of the letting effective at the end of the fifth and tenth years of the extended term on eighteen months prior notice. In the event the tenant exercises this right, or upon expiration of the extended term, unless the lease is extended for a further period, the tenant will pay to the Port Authority a lump sum which will be derived by a formula set forth in the lease.

Staff has determined that assignment and extension of the lease will allow the tenant to continue providing services to this port while providing for the modernization of this first generation container terminal, and that the proposed agreement enables the Port Authority to achieve market rentals for this facility.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to consent to an assignment of the Port Authority's lease with Atlantic Container Lines, Ltd. to Atlantic Container Lines, B.V. and to enter into an amendment of the lease substantially in accordance with the terms and conditions set forth above, the form of the agreement to be subject to the approval of General Counsel or his authorized representative.

(Board - 7/16/87)

**Fishport - Reconstruction of Bulkhead at Building No. 300 -
Award of Contract EBP-110.016**

A 140-foot section of the seawall on the existing Building 300 Bulkhead collapsed before scheduled rehabilitation could be accomplished. This area is vital to the initial operations at the Fishport. Staff has recommended that the collapsed area, as well as some other areas of the bulkhead, be permanently replaced.

Therefore, Contract EBP-110.016 was prepared, which requires the contractor to install approximately 550 linear feet of steel sheet piling in front of the existing structure and provide lateral support by the installation of soil anchor tie backs, rehabilitate the remaining 350 linear feet of existing bulkhead, and install a timber fender system throughout the entire area. A list of five contractors recognized by staff to be capable of performing this type of work within tight time constraints was requested to submit proposals on July 15, 1987. The low proposal was submitted by Spearin, Preston & Burrows, New York, New York, in the amount of \$1,936,600. The Chief Engineer has determined that Spearin, Preston & Burrows is qualified to perform the contract.

Due to the critical timing of this work, the contractor will be directed to immediately order the steel sheet piling materials for an estimated cost of \$300,000 prior to the actual contract award, which is anticipated to be August 3, 1987.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract EBP-110.016, Fishport, Reconstruction of Bulkhead at Building No. 300, to Spearin, Preston & Burrows, Inc. at its proposal price in the amount of \$1,936,600 and to order extra work up to the amount of \$194,000.

(Board - 7/16/87)

**Kennedy International Airport - Taxiway Paving - Contract
JFK-478 - Increase in Project Authorization -
Supplemental Agreement No. 1**

The Board, at its meeting on September 11, 1986, authorized a project at Kennedy International Airport for the rehabilitation of portions of Taxiways "I", "O" and "H" at an expenditure estimated at \$5.5 million, and authorized the Executive Director to award Contract JFK-478, Taxiway Paving, Kennedy International Airport, to the lowest qualified bidder.

On October 2, 1986, the Executive Director authorized the award of Contract JFK-478 to Anthony Grace & Sons, Inc. and Edenwald Contracting Co., Inc., a joint venture, at its bid price in the estimated amount of \$3,493,000 and the ordering of extra work up to the amount of \$349,000. Contract JFK-478 provides for the rehabilitation of portions of Taxiways "I", "O" and "H".

As part of an effort to provide for increased aeronautical capacity, it is deemed prudent to expedite proposed improvements to Taxiways "KB" and "PA", the first phase of a three-phase program to improve aeronautical capacity. In order to accelerate the implementation of this phase, it is proposed to enter into a negotiated Supplemental Agreement No. 1 under Contract JFK-478 with Anthony Grace & Sons, Inc. and Edenwald Contracting Co. Inc., a joint venture. Grace/Edenwald is the only contractor presently working at the airport who has sufficient equipment and forces mobilized to commence the required construction immediately, thus assuring minimum operational disturbances and earliest availability of the completed work.

Costs associated with this project are fully recoverable under the Flight Fee Formula.

The following resolution was unanimously adopted:

RESOLVED, that the Board authorize:

1. an increase of \$1.8 million in the project authorization for the rehabilitation of Taxiways "I", "O" and "H" at Kennedy International Airport from \$5.5 million to a total project authorization of \$7.3 million in order to provide for increasing the scope of the project to include aeronautical capacity improvements under Supplemental Agreement No. 1 to Contract JFK-478, Taxiway paving, Kennedy International Airport; and

2. the Executive Director to enter into Supplemental Agreement No. 1 to Contract JFK-478 with Anthony Grace & Sons, Inc. and Edenwald Contracting Co., Inc., a joint venture, in a lump sum amount of \$1,402,483 plus an authorization of \$141,000 for extra work, the form of the agreement to be subject to the approval of General Counsel or his authorized representative.

(Board - 7/16/87)

**Kennedy International Airport - Replacement of Hot Water
Generators 1 and 4 - Central Heating and Refrigeration
Plant - Contract Award**

Contact JFK-340.025 provides for the installation of two hot water generators in the Central Heating and Refrigeration Plant (CH&RP) at Kennedy International Airport.

The CH&RP heating wing consists of six hot water generators. Approximately one year ago, one boiler was taken out of service as it had deteriorated beyond repair and was deemed no longer useable. A recent study recommended that the removed hot water generator be replaced to maintain sufficient heating capacity, and that the five remaining hot water generators be replaced because they are approaching the end of their useful service lives (they are approximately 25-30 years old). On March 4, 1987, one of the five remaining hot water generators exploded.

The loss of two generators has severely limited the CH&RP's capability to provide reliable peak heating capacity for the upcoming 1987-1988 heating season. Due to the long lead time for fabrication (up to seven months), immediate action was needed to meet that requirement. The present hot water generators are International Boiler Workers Company (IBWC) products which have performed satisfactorily, and IBWC has provided the Port Authority with excellent service over the years. Staff deemed it prudent to purchase the two new generators from IBWC since the generators meet the capacity and size constraints of the installation location. The Executive Director, by Memorandum of Justification dated April 3, 1987, authorized the negotiation and award of a purchase order contract to IBWC for two new hot water generators and associated appurtenances.

Provision is being made in the installation contract for the performance of certain modifications to the controls and appurtenances that may be required on a net cost basis, presently estimated at \$50,000.

Since the timing of the installation is critical in order to assure that sufficient plant capacity is available for the 1987-1988 heating season, bids will be solicited from a list of contractors who, as determined by the Chief Engineer, have the experience, capability and equipment available to perform the work in a timely manner.

The following resolution was unanimously adopted:

RESOLVED, that the Board approve the action of the Executive Director in authorizing the purchase of two hot water generators for the Central Heating and Refrigeration Plan (CH&RP) from International Boiler Works Company (IBWC) at a negotiated price still to be determined but presently estimated at \$1.2 million, and in authorizing \$200,000 for extra work; and it is further

(Board - 7/16/87)

RESOLVED, that the Board authorize the Executive Director to award Contract JFK-340.025, Installation of Hot Water Generators. CH&RP Kennedy International Airport, to the lowest bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable, and to order extra work up to 10% of the amount of the low bid and to order net cost work; or to reject all bids.

(Board - 7/16/87)

**Kennedy International Airport - Lease with New York
Perishables, Inc. for an Airborne Perishables Center**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease agreement with New York Perishables, Inc. for a site east of Hangar 7 of approximately 12.25 acres at Kennedy International Airport, upon which an Airborne Perishables Center would be constructed and authorize a project in connection with said lease for bringing paving and utilities to the site at a total cost presently estimated at \$5.2 million. An Airborne Perishables Center would establish a specialized air cargo facility for handling perishable items at Kennedy International Airport and would provide a specialized service for tenants and shippers on and off the airport requiring special equipment and expertise for operation.

Negotiations have been conducted and agreement has been reached for a lease with New York Perishables, Inc., the term of which lease will expire 25 years from the commencement date for the payment of basic rental which date will be no later than eighteen months from the commencement date of the lease. As presently conceived, the building will consist of approximately 90,000 square feet on the first floor, with an approximately 30,000 square foot second floor, and an approximately 14,000 square foot mezzanine for a total estimated at 134,000 square feet on a site of approximately 12.25 acres. The ground rentals that will apply over the 25-year term of the lease range from \$294,000 per year to \$613,000 per year. In addition to the annual ground rental, the lessee will pay a fee on all its gross receipts, ranging from 5% per year to 9% per year over the 25-year term of the lease. The Port Authority will be responsible for providing paving and utilities to the site at a project cost presently estimated at \$5.2 million, including payments to contractors, allowance for extra work, net cost work, facility force work and engineering, administrative and financial expenses. The lessee will have the right to mortgage its leasehold interest upon terms agreed upon by the Port Authority the lessee and its mortgagee.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into a lease agreement with New York Perishables, Inc. for a site east of Hangar 7 of approximately 12.25 acres at Kennedy International Airport, upon which an Airborne Perishables Center would be constructed substantially on the terms set forth above; the form of the lease agreement to be subject to the approval of General Counsel or his authorized representative; and it is further

RESOLVED, that the Board hereby authorizes a project in connection with said lease for bringing paving and utilities to the site at a total cost presently estimated at \$5.2 million.

(Board - 7/16/87)

La Guardia Airport - Noise Abatement Wall Along 81st Street

Over the past several years efforts by the Federal Aviation Administration (FAA) to reduce delays have resulted in an increased use of Runway 4 at LaGuardia Airport for both landings and takeoffs. At the same time, the need to disperse activities from the congested Central Terminal Area has added to the 24 hour activities already in place at the western end of the airport. While both of these changes have enhanced the airport's capacity to handle increased demand, it has resulted in increased complaints from the nearby residential community. In response to community concerns at LaGuardia Airport, the Port Authority commissioned Harris, Miller, Miller & Hanson, Inc. to conduct a noise abatement study along the western boundary of the airport.

A noise barrier at or near the western boundary property line was recommended as the only feasible noise abatement option which would provide a significant noise reduction for the local community. The study findings were presented to the community and the 81st Street residents favored a 20-foot high noise barrier along most of the approximately one-half mile long western boundary of the airport, set back from the property line, with suitable landscaping to mitigate the massiveness of the wall.

Based upon the consultant's measurements and analysis, noise levels in the community will be reduced by approximately ten decibels, which is normally perceived as a halving of the noise level. The noise barrier engineered by the Fanwall Corporation of Arlington, Virginia was selected by the community (from three alternative types of noise attenuating wall systems) because of its attractiveness and successful use in similar locations elsewhere in the country. It is anticipated that contract work for this project will start during October 1987 and the entire project will be completed by July 1988.

The proposed noise abatement wall contracts will be publicly advertised specifying the Fanwall barrier system, with the design, fabrication and installation costs for the wall and foundation being included in the contract proposals. A separate contract for landscaping to enhance the appearance of the barrier will also be publicly bid.

Each contract awarded for this project will include appropriate requirements for participation by Minority Business Enterprises and Women's Business Enterprises.

The following resolution was unanimously adopted:

RESOLVED, that the Board authorize:

1. a project for the installation of a noise abatement wall along 81st Street at LaGuardia Airport at the estimated cost of \$2.7 million including \$2 million in estimated construction contracts, an allowance of \$200,000 for extra work and \$500,000 for engineering, administrative and financing expenses; and

(Board - 7/16/87)

2. the Executive Director: (a) to take such action with respect to award of purchase or construction contracts for the foregoing project as he deems in the best interest of the Port Authority, including without limitation award to the lowest bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable, rejection of all bids, solicitation of new bids on revised or the same requirements, or negotiation with one or more bidders or other contractors; and (b) to execute contracts and supplemental agreements with such bidders or contractors as he deems in the best interest of the Port Authority and to order extra work up to 10% of the price of each contract including supplemental agreements thereto and to order net cost work; provided, however, that in no event shall the total amount of the contract payments under said contracts exceed the total amount of the contract payments included in the foregoing project; and it is further

RESOLVED, that the form of the foregoing agreements is subject to the approval of General Counsel or his authorized representative.

(Board - 7/16/87)

**La Guardia Airport -- New York Airlines, Inc. - Port
 Authority Construction Cost Payments for Improvements to
 Premises on Finger No. 2**

It as recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement supplementing the New York Airlines, Inc. month-to-month Airport Lease at LaGuardia Airport providing for additional payments to New York Airlines by the Port Authority. The Board at its meeting on May 13, 1982, authorized the Executive Director to enter into an agreement with New York Airlines, under which the Port Authority would pay to New York Airlines up to \$600,000 for construction of operations and holdroom space at Gates 11, 12 and 14 on Finger No. 2. To accommodate the increased demand and growth in the scheduled flights of New York Airlines and others, the Board at its meeting on July 11, 1985, authorized, among other things, the surrender by Republic Airlines, Inc. of its gates and related space on Finger No. 2 and construction of replacement space at Gates 22 and 23 on Finger No. 3 for Republic. As a result of this action, New York Airlines and USAir, Inc., as of June 19, 1986, each acquired an additional gate and related space on Finger No. 2. New York Airlines has filed plans and specifications for the expansion of its holdrooms serving Gates 14 and 15 and renovation of operations space serving Gates 12 and 14, with construction costs estimated to be \$1.4 million and completion scheduled for August 1987. New York Airlines has now requested up to \$800,000 in construction cost payments from the Port Authority in addition to previously authorized construction payments of \$600,000.

In addition to the basic rental and facility rental (based upon the initial \$600,000 payment as aforesaid) currently provided for in the existing month-to-month lease, New York Airlines will pay an additional monthly facility rental, including accruals during construction, over a fifteen-year period upon substantial completion of construction based upon the application of a factor of .01136597 to the additional \$800,000 construction payments so advanced by the Port Authority to New York Airlines.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into an agreement supplementing the New York Airlines, Inc. month-to-month Airport Lease at LaGuardia Airport providing for additional payments to New York Airlines by the Port Authority on the terms set forth above; the form of the agreement to be subject to the approval of General Counsel or his authorized representative.

(Board - 7/16/87)

**Newark International Airport - Terminal C - Parking Level
Frontage Roadway and Parking Area Modifications**

The pending completion of the construction of Terminal C at Newark International Airport and the occupancy of this terminal by the Texas Air Group is expected to result in high levels of passenger demand. This activity together with anticipated increases in international operations requires a project to increase the Terminal frontage capacity and to perform modifications to the Terminal C parking area.

This project will include the following improvements:

- New entrance and exit facilities to the Terminal C hourly and daily parking lots which will enable the conversion of the existing sidewalk and adjacent traffic lanes within the lot to public frontage roadway.
- Reconfiguration of the hourly and daily parking lots to reflect the projected passenger demands and improve flow.
- A new direct exit roadway from the lower frontage to the express roadway.
- Parking lot and signing modifications required to improve the flow of in-and-outbound traffic.

Each contract awarded for this project will include appropriate requirements for participation by Minority Business Enterprises and Women's Business Enterprises.

The following resolution was unanimously adopted:

RESOLVED, that the Board authorize:

1. a project for a parking level frontage roadway and associated parking lot modifications at Terminal C, at an estimated total project cost of approximately \$2.7 million including payments to contractors, estimated at \$1.8 million, and an allowance for extra work and administrative, engineering and financing expenses; and
2. the Executive Director to: (a) to take such action with respect to award of purchase or construction contracts for the foregoing project as he deems in the best interest of the Port Authority, including without limitation award to the lowest bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable, rejection of all bids, solicitation of new bids on revised or the same requirements, or negotiation with one or more bidders or other contractors; and (b) to execute contracts and supplemental agreements with such bidders or contractors as he deems in the best interest of the Port Authority and to order extra work up to 10% of the price of each contract including supplemental agreements thereto and to order net cost work; provided, however, that in no event shall the total payments under said contracts exceed the total amount of the contract payments included in the foregoing project at Newark International Airport; and it is further

RESOLVED, that the form of the foregoing agreements is subject to the approval of General Counsel or his authorized representative.

(Board - 7/16/87)

**Technical Services Contract with Kansai International
Airport Company**

In early May, the President of Kansai International Airport Company (KIAC) announced that KIAC would seek the advice of six international airport authorities in the conceptual design of its planned \$7 billion international airport being built in Osaka Bay. Specifically, KIAC has asked the Port Authority to use its experience in airport master planning and operations to conduct a review of three alternative conceptual airport master plans. The arrangements between KIAC and the Port Authority and KIAC and the other airport authorities was the result of more than one year of urging by the Reagan Administration and Congress for Japan to open its market to U.S. companies in the development of its major infrastructure projects, including ports and airports.

The Kansai project was singled out because of its size, dollar value, and importance to the Asian air transport market. Osaka is the second largest city in Japan and the airport is expected to handle 30 million passengers and 160,000 plane movements per year, operating on a twenty-four hour basis, and 1.4 million tons of cargo. Consequently, when Prime Minister Nakasone recently visited the U.S., KIAC was discussed with the Administration, and the President was advised that two U.S. airport authorities would be asked to assist in the project.

The project entails review of three alternative conceptual master plans for the development of Kansai International Airport. A Project Manager has been hired on a contractual basis and will direct the efforts of several Aviation Department staff members for an eight to ten week period ending on or about August 31, 1987. In all, approximately one half person year of aviation planning resources would be dedicated to the project. The project requires preparation of an interim and final report. Two trips to Japan are envisioned for the Project Manager and others. On June 23 the Project Manager and the Aviation Department's Supervisor of Master and Site Planning had a preliminary meeting with KIAC in Osaka. A final presentation meeting will be held in Japan at the end of August.

The Port Authority's agreement with KIAC is for a fixed fee of \$152,000 to be paid in U.S. dollars which will cover all costs and overheads. The fee includes, among other things, the cost of professional services, report preparation, travel, interpreters and drawing reproductions.

The Port Authority's participation in this agreement will create potential export opportunities for regional airport planning consultants, design, engineering and equipment suppliers.

The following resolution was unanimously adopted:

RESOLVED, that the Board ratifies the action taken by the Executive Director in authorizing the Director of Aviation to enter into an agreement with Kansai International Airport Company for the Aviation Department to review three alternative conceptual master plans for the development of Kansai Airport at a fixed fee compensation of \$152,000.

(Board - 7/16/87)

The World Trade Center - Supplement to Swiss Bank Corporation Lease No. WT-1107-SP-2, 3, 4, (C294) (672a)

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to amend the Port Authority's lease agreements with Swiss Bank Corporation and with John Hancock Mutual Life Insurance Company and the World Trade Center substantially in accordance with the following terms and conditions.

Swiss Bank Corporation currently leases approximately 179,000 rentable square feet of space in Four World Trade Center, consisting of office space (on the 3rd, 4th and 5th floors), two retail banking locations and a subgrade vault and office area. Swiss Bank would lease three additional parcels of office space totaling approximately 21,300 rentable square feet located on the fifth floor of Four World Trade Center. The letting of the first parcel of the additional premises would commence January 1987, the date said parcel of approximately 2,500 rentable square feet was turned over to Swiss Bank; the second and third parcels (approximately 18,800 square feet) would be let to Swiss Bank for construction in late 1987 when the spaces are vacated by the existing tenants. The term of the letting of the additional premises will expire on June 30, 1999, which is the present expiration date of the exiting premises. Swiss Bank would pay a basic rental for the additional premises escalating from \$29 per rentable square foot in the first year to \$36 per rentable square foot in the eleventh year. Swiss Bank would pay additional charges for cleaning, electricity and increases in operating costs and payments in lieu of taxes. Rent will commence for each parcel of space five months following the date the particular parcel is made available to Swiss Bank. At the request of Swiss Bank, a full brokerage commission, based on standard Port Authority commission rates, will be payable to Kenneth D. Laub & Co., Inc. on approximately 18,800 square feet to be repaid by Swiss Bank over the term of the lease in addition to the basic rent.

In order to make the key parcel of space (approximately 14,600 square feet) available for leasing to Swiss Bank, agreement has been reached with John Hancock Mutual Life Insurance Company for the relocation of its Four World Trade Center offices to approximately 9,200 square feet on the 38th floor of One World Trade Center and for the extension of John Hancock's lease for an additional three-year period from its present expiration date of October 31, 1994. John Hancock will pay the same rental rate per rentable square foot for the 38th floor space as it now pays in Four World Trade Center, and will pay \$32 per rentable square foot during the extension period. The Port Authority may provide finishing work monies to John Hancock which will be repaid over the term of the John Hancock lease as provided in the Port Authority lease with John Hancock. In addition, John Hancock will be permitted to sublease to Swiss Bank, at John Hancock's current rental rate, an area of approximately 5,000 rentable square feet of space until such time as John Hancock's relocation can be accomplished.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into a supplemental lease agreement with Swiss Bank Corporation and to enter into an appropriate agreement with John Hancock Mutual Life Insurance Company substantially in accordance with the above provisions and the form of the agreements shall be subject to approval of the General Counsel or his designated representative.

(Board - 7/16/87)

**Port Authority Industrial Park at Elizabeth - Radiation
Technology, Inc. - Surrender of Lease No. EIP-2**

It was reported that the Board, at its meeting on October 10, 1985, authorized the Executive Director to enter into a lease agreement with Radiation Technology, Inc. for 3.68 acres of land at the Port Authority Industrial Park at Elizabeth for the purpose of irradiating goods such as chemicals, food, and medical instruments. Radiation Technology, Inc. was initially obligated to construct an approximately 40,000 square foot building on the site within fifteen months from site availability date and thereafter to construct a 26,000 square foot expansion. The Port Authority was to provide up to \$3.5 million for the design, construction and equipping of this building but to date only \$62,750 in connection with the planning and design of the building has been provided. Upon lease signing on September 25, 1985, Radiation Technology, Inc. paid \$25,000 of the \$175,000 security deposit amount with the balance to be paid in specified installments. To date, Radiation Technology, Inc. has not paid any additional security deposit installments nor has it commenced construction of its irradiation facility. The surrender agreement will provide for the release of both parties from any and all obligations under the lease, including Radiation Technology, Inc.'s obligation to repay the said \$62,750 amount paid by the Port Authority.

In February 1986, the Port Authority was requested by Radiation Technology, Inc. to restructure the existing lease arrangement to provide more favorable terms to the lessee. The request was denied as it was not in the Port Authority's interest to restructure the lease. Radiation Technology, Inc. has undergone a major corporate restructuring and now believes that the project at the Elizabeth Industrial Park is no longer financially feasible. Accordingly, Radiation Technology, Inc. has requested the surrender of its lease. The surrender agreement with Radiation Technology, Inc. will provide for the Port Authority to retain the initial \$25,000 security deposit previously made by the lessee and for the release of both parties from any and all obligations under the lease.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into an agreement with Radiation Technology, Inc. to surrender its lease at the Port Authority Industrial Park at Elizabeth substantially in accordance with the above provisions and the form of the agreement shall be subject to the approval of the General Counsel or his designated representative.

(1)

(Board - 7/16/87)

The Board received the report of the General Counsel regarding the Court's decision in the case of **Lenz v The Port Authority of New York and New Jersey** and in the recommendation that, notwithstanding the appeal to be taken from the Court's decision, the Port Authority waive any rights it may have to \$4.7 million of the \$9.3 million in insurance proceedings presently held and that amount be paid over to the City of Hoboken. Such waiver shall be without prejudice to the Port Authority's appeal and to any claims regarding the balance of the money held.

Whereupon, the meeting was adjourned.

Secretary

MINUTES of special meeting of The Port Authority of New York and New Jersey held Thursday, July 30, 1987 at the Port Authority offices, One World Trade Center, City, County and State of New York.

PRESENT:

NEW JERSEY

Philip D. Kaltenbacher, Chairman
Jerry Fitzgerald English
Robert V. Van Fossan
William K. Hutchison
Henry F. Henderson, Jr.
Robert Van Buren

NEW YORK

Robert F. Wagner, Vice-Chairman
James G. Hellmuth
Howard Schulman
John G. McGoldrick
H. Carl McCall

Stephen Berger, Executive Director
Patrick J. Falvey, General Counsel/Assistant Executive Director
Doris E. Landre, Secretary
Robert J. Aaronson, Director of Aviation
Regina L. Bryde, Administrative Assistant to the Executive Director
Louis J. Gambaccini, Assistant Executive Director/Trans-Hudson Transportation
Charles L. Hirsch, Executive Assistant to the Executive Director
Richard R. Kelly, Director of Rail Transportation
Robert J. Kelly, Deputy Director, Tunnels Bridges and Terminals
James J. Kirk, Port Director
Phil LaRocco, Director of Economic Development and Director of World Trade
Lillian C. Liburdi, Acting Chief Financial Officer
Katharine B. MacKay, Assistant Executive Director/Administration
Mark Marchese, Assistant Director, Information Services, Public Affairs
Rino M. Monti, Director of Engineering/Chief Engineer
Hugh O'Neill, Assistant Executive Director/Policy Planning and Business Development
Joseph L. Vanacore, Assistant Executive Director/Capital Programs
Kristina E. Weisenstein, Administrative Assistant to the Executive Director

The meeting was called to order by the Chairman.

The Secretary reported that the meeting was duly called in accordance with the By-Laws.

(Board - 7/30/87)

**Newark International Airport - Airline Leases - People Express
Airlines, Inc. and - Continental Airlines, Inc., -
Terminal C-Eastern Air Lines, Inc. and New York Airlines,
Inc. - Terminal B**

People Express Airlines, Inc. is a wholly-owned subsidiary of People Express, Inc. which has been acquired by Continental Airlines, Inc., which in turn is a wholly-owned subsidiary of Texas Air Corporation. Under the terms of Lease ANA-170 with People Express Airlines, Inc. as previously authorized by the Board, the fixed term of the Terminal C Lease changed to a month-to-month status because of the occurrence of certain triggering events. Eastern Air Lines, Inc., a wholly-owned subsidiary of Texas Air Corporation, occupies sixteen aircraft gate positions and associated premises in and about Terminal B under Lease AN-541. New York Airlines, Inc., a wholly-owned subsidiary of Continental Airlines, Inc., occupies five aircraft gate positions and associated premises in and about Terminal B under Lease AN-543.

It was recalled to the Board that under the terms of the Terminal C lease with People Express Airlines, Inc., the carrier is constructing the finishes and other improvements of approximately two-thirds of Terminal C. The Port Authority is providing the cost of the finishes and improvements, including the cost of architectural and engineering services, up to a maximum of \$175 million. The Board, at its meeting on April 9, 1987, authorized an increase in the maximum amount of the funds that may be provided by the Port Authority for the construction of Terminal C from \$175 million to \$225 million.

It was also recalled to the Board that on September 17, 1968, the Board authorized a lease with Eastern Air Lines, Inc. covering operations and facilities at Redeveloped Newark Airport and leases with other scheduled airlines serving or desiring to serve Newark International Airport; and that on September 13, 1984 the Board authorized the assignment of Pan American World Airway's lease covering five aircraft gate positions in Terminal B to New York Airlines, Inc.

Port Authority staff have been renegotiating the terms of the Terminal C Lease with Continental Airlines, Inc., and tentative agreement has been reached whereby the Terminal C Lease will be assigned from People Express Airlines, Inc. to Continental Airlines, Inc. and concurrently supplemented to provide for the following changes.

The term of the Terminal C Lease shall be changed from a month-to-month tenancy to a fixed term and shall expire 25 years after rental starts, which may occur on either the completion of construction or January 1, 1988, or March 1, 1988 or April 1, 1988 as more fully explained below. The said term of the Lease would be subject to financial triggering events as specified in the Supplement. Continental would have the right to terminate the Terminal C lease effective the 101st month after rental starts or effective the 201st month after the rental starts. If Continental terminates the Terminal C lease effective at either date, it would be obligated to pay the Port Authority the sum of \$10 million in installments over an eighteen-month period. If Continental fails to pay an installment, the Port Authority would have the option to void the termination and return all paid installments with interest, if any, less Port Authority costs or expenses, or to hold Continental to the termination. The Port Authority would be obligated to keep the paid installments in an interest bearing account until the date of the last installment.

(Board - 7/30/87)

Under the proposed Terminal C Supplement, rent would start (the rental commencement date) on the earliest of completion of construction or January 1, 1988, or March 1, 1988, or April 1, 1988 if the Executive Director has extended the date for completion of construction to February 29, 1988 or March 31, 1988, respectively. However, the rental commencement date would be the earlier of the completion date or March 1, 1988 if the Executive Director extends the date for completion of construction to March 31, 1988 but Continental elects to commence payment of rental on March 1, 1988.

Beginning on the rental commencement date, Continental shall pay to the Port Authority an annual rental consisting of two factors, one a constant factor, and the other a variable factor. The constant factor consists of base rental amounts plus repayment of the full amount of Port Authority construction payments together with amounts based on other factors applied during the construction period and over the term of the Terminal C Lease. The constant factor beginning on the rental commencement date would be in the amount of \$20,000,000 annually and would be increased to \$30,016,000 annually effective the thirteenth month after the rental commencement date through the 100th month. The constant factor would begin at \$20,720,000 annually and increase to \$30,736,000 annually effective the thirteenth month after the rental commencement date through the 100th month if the Executive Director has extended the date for completion of construction to March 31, 1988, unless Continental elects to commence payment of rental on March 1, 1988, in which case the constant factor would remain \$20,000,000 annually for the first twelve months and increase to \$30,016,000 annually effective the thirteenth month after the rental commencement date through the 100th month. The said constant factor would be increased again to \$33,585,348 annually effective the 101st month after the rental commencement date and further increased to \$39,144,912 annually effective the 201st month after the rental commencement date.

In the event the Construction Advance Amount (the total of actual Port Authority advances) is less than \$225 million the said fixed amounts of the constant factor will be adjusted as provided in the Supplement to the Terminal C Lease, the variable factor (the Airport Services Factor) will be subject to the annual adjustment based upon the Airport Services Formula under the Master Leases at Newark International Airport.

In addition, the Supplement would contain the provisions previously authorized covering the increase in the maximum amount of the cost of construction of the finishes and improvements, including the cost of architectural and engineering services, to be provided by the Port Authority by \$50 million to a total of \$225 million. Further, Continental will be obligated to complete construction by December 31, 1987, subject to an extension to February 29, 1988 or March 31, 1988 at the discretion of the Executive Director. The security requirement now set at \$6.5 million for the fuel system expansion shall be deleted. The capital contribution by Continental Airlines, Inc. for the Terminal C premises shall be approximately \$30 million. However, Continental's plans for Newark International Airport include a cargo building at a minimum of 50,000 square feet and an in-flight catering facility estimated at \$12 million for the provision of support services at Newark International Airport. In the event that Continental, based on unforeseen circumstances, does not actually spend \$30 million on Terminal C, the shortfall of up to \$5 million of the said \$30 million contribution would be required to be spent elsewhere on the Airport if there are leases for the same (such leases would be subject to further negotiations and agreement and further authorization as required).

(Board - 7/30/87)

The Terminal C Supplement would also contain provisions for Continental's use and occupancy of portions of the construction work prior to the Completion Date subject to entering into an appropriate agreement covering that portion of the construction work.

Concurrently with the Terminal C Lease negotiations, tentative agreement has been reached with representatives of Texas Air Corporation reflecting the disposition of Eastern's and New York Air's facilities at Terminal B. Under the proposed Terminal B Lease Supplements, Eastern Air Lines, Inc., and New York Airlines, Inc., would be permitted and required to assign or sublease all or portions of the leasehold premises at Terminal B, now under separate lease agreements ("Terminal B Leases") to Eastern Air Lines, Inc. and New York Airlines, Inc., to other airlines in accordance with the terms of the supplements. These Terminal B Leases expire December 31, 1988 and cover a combined total of 21 aircraft gate positions and related facilities. Eastern and New York Air would have the right to retain no more than eight Terminal B aircraft gate positions and associated space. In addition, the Terminal B Leases would be updated to make them both consistent with the new provisions in the Terminal C Lease. In the event of an assignment or assignments by Eastern or New York Air to another airline or airlines of a portion or portions of their premises under the Terminal B Leases, the Terminal B Leases would be further supplemented to provide for the necessary changes in the obligations of the original Lessee and the new assignee lessee.

It was further recalled to the Board that by letter dated February 26, 1987 the Executive Director advised People Express Airlines, Inc. that until May 1, 1987 the Port Authority would not exercise its remedies, including its right to terminate the Terminal C Lease by notice issued and effective before May 1, 1987 based on the failure to pay rent before May 1, 1987 and/or the failure to complete the construction on or before May 1, 1987. By letters dated March 31, 1987 and May 27, 1987, the May 1, 1987 date was extended to July 1, 1987 and August 1, 1987, respectively. In view of the tentative agreement reached with Continental Airlines, Inc., the Executive Director, by letter dated July 2, 1987, has advised People Express Airlines that the Port Authority will not exercise the above stated remedies before September 1, 1987.

It was therefore recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to:

a. enter into an agreement for the Assignment of Lease ANA-170 from People Express Airlines, Inc. covering the Terminal C leasehold to Continental Airlines, Inc. and to enter into a Supplement to said Lease concurrently and in conjunction with the Assignment to provide for various revisions thereto substantially on the terms set forth above; and

b. enter into Supplements to the existing Leases with Eastern Air Lines, Inc. and New York Airlines, Inc., reflecting the disposition of their facilities at Terminal B and thereafter to enter into the appropriate Assignments of the Terminal B Leases and further Supplements to the said leases and to the leases of the assignees and to the Terminal C Lease substantially on the terms set forth above.

(Board - 7/30/87)

Whereupon, the following resolution was unanimously adopted, Commissioner McCall voted no:

RESOLVED, that the Executive Director, for and on behalf of the Port Authority, be and he hereby is authorized to enter into an agreement for the Assignment of Lease ANA-170 from People Express Airlines, Inc. covering the Terminal C leasehold at Newark International Airport to Continental Airlines, Inc., and to enter into a Supplement to said Lease concurrently and in conjunction with the Assignment to provide for various revisions thereto substantially on the terms set forth above, and to enter into supplements to the existing Leases with Eastern Air Lines, Inc., and New York Airlines, Inc., reflecting the disposition of their facilities at Terminal B at Newark International Airport and thereafter to enter into the appropriate Assignments of the Terminal B Leases and further Supplements to the said leases and to the leases of the assignees and to the Terminal C Lease substantially on the terms set forth above; the form of said agreements to be subject to the approval of General Counsel or his designated representative.

Whereupon, the meeting was adjourned.

The meeting was called to order by the Chairman.

Action on Minutes

(461)

The Secretary submitted for approval Minutes of the meeting of July 16, 1987. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey has expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on August 13, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on August 13, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on August 13, 1987, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on August 13, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 8/13/87)

Hunters Point Waterfront Development Project - Surrender Agreement with Norval, Inc.

It was reported that the Board, at its meeting on August 8, 1985, authorized the Executive Director, pursuant to the Pre-development Site Acquisition Program, to acquire the former Daily News property at Hunters Point, Queens, New York. The Port Authority purchased the site on September 23, 1985 and assumed existing leases with Norval, Inc. covering approximately 234,000 square feet of land and buildings. Norval, Inc. imports, stores and distributes Portland cement and employs approximately 70 people.

In order to proceed with the intended mixed-use development of the site, which represents approximately one quarter of the entire 92-acre legislatively designated waterfront development site, it is deemed essential that Norval vacate its leasehold.

Staff has now concluded a tentative agreement with Norval whereby it will surrender its leasehold and vacate the premises within two years. The terms of the surrender agreement would provide for the Port Authority to pay Norval \$9.8 million for its leasehold value and to waive Norval's rent payments to the Port Authority over the two-year period required by Norval to construct a new facility, the amount of such rental waiver being presently estimated at \$422,000. The payment of the \$9.8 million would be staggered over two years, according to the proposed following schedule:

Upon execution of the surrender agreement - \$200,000;

Six months after execution - \$3 million;

Twelve months after execution - \$2 million;

Eighteen months after execution - \$2 million; and

The balance of \$2.6 million would thereafter be due to Norval upon vacating the premises so long as surrender took place within the two year period.

The surrender agreement will include remedies and other provisions to address the possibility of Norval failing to vacate the premises within the 24-month period after the execution of the surrender agreement.

Proceeding with a surrender agreement at this time, eliminates a major hurdle to developing the Port Authority portion of the Waterfront Development Site. A suitable relocation site at the Brooklyn Navy Yard is currently available and Norval is in final lease negotiations with Brooklyn Navy Yard representatives. The proposed cost of the surrender agreement, \$9.8 million, together with the \$27.7 million of properties acquired or held within the Pre-development Site Acquisition Program, will not exceed the Program's authorized amount of \$75 million at any one time.

(Board - 8/13/87)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, be and hereby is authorized to enter into agreements with Norval, Inc. for the surrender to the Port Authority of Norval, Inc.'s leases on portions of the Port Authority owned former Daily News property, located at Hunters Point, Queens, New York for \$9.8 million to be paid to Norval, Inc. in installments and to relieve Norval, Inc. of its obligations to pay rent upon said leased property for a period not exceeding 24 months following the execution of the surrender agreement; and it is further

RESOLVED, that all documents and agreements necessary to effectuate the aforesaid be subject to approval as to form by the General Counsel or his duly designated representative.

**The Port Authority Industrial Park at Yonkers - Amendment to
Kawasaki & Nissho Iwai Partnership Lease No. YIP-1**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to amend the Port Authority's lease agreement with Kawasaki & Nissho Iwai Partnership at the Port Authority Industrial Park at Yonkers substantially in accordance with the following terms and conditions.

Kawasaki & Nissho Iwai partnership, in connection with the contract with PATH to manufacture and rehabilitate railcars in the Port District, has let from the Port Authority approximately 153,000 square feet in Building No. 9 at the Yonkers Industrial Park with adjacent truck docks and outside areas, and a locker room area of approximately 1,000 square feet at Building No. 4. The current ten-year lease is scheduled to expire December 31, 1995. The lease amendment will give the lessee the right to extend the lease term for two, five-year periods. Kawasaki & Nissho Iwai Partnership will pay the Port Authority for Building No. 9 and adjacent truck docks and outside areas an annual basic rental escalating at various stages during the renewal term from \$1,021,908 to \$1,360,080. In addition, Kawasaki & Nissho Iwai Partnership, with respect to the locker room area in Building No. 4, will pay the Port Authority an annual basic rental escalating at various stages during the renewal term from \$7,188 to \$8,880.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to amend the Port Authority's lease agreement with Kawasaki & Nissho Iwai Partnership at the Port Authority Industrial Park at Yonkers substantially in accordance with the above terms and conditions, the form of the amendment to be subject to the approval of the General Counsel or his designated representative.

**La Guardia Airport - East End Storm Surge Barrier
Replacement**

The dike at the East End of LaGuardia Airport, adjacent to Parking Lot No. 5, was breached during a storm in March of 1984, resulting in severe flooding. The facility repaired the dike on an emergency basis using sandbags. The initial method proposed by the Engineering Department for the repair of the dike on a permanent basis would have impinged on adjacent wetland and therefore required a permit issued by the New York State Department of Environmental Conservation (NYSDEC). In the course of an adjudication hearing conducted by an NYSDEC Administrative Law Judge, the Port Authority proposed a new design consisting of a sheet pile bulkhead which could be constructed without any impact on the tidal wetlands. The sheet pile bulkhead design has been approved by the NYSDEC.

The construction will consist of the installation of a new sheet pile bulkhead, 1,550 feet in length, all within the leasehold of LaGuardia Airport.

The Engineer Department has determined that because only one specialized trade (sheet piling) is involved, it is impractical to require Minority Business Enterprise and Women Business Enterprise participation in the project.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes a project for the construction of a sheet pile bulkhead replacement dike at the East End of LaGuardia Airport adjacent to Parking Lot No. 5 at a total project cost estimated at \$9.3 million including payments to contractors estimated at \$8.7 million including an allowance for extra work; and administrative, engineering and financing expenses; and it is further

RESOLVED, that the Executive Director is authorized: (a) to take such action with respect to award of purchase or construction contracts for the foregoing project as he deems in the best interest of the Port Authority, including without limitation award to the lowest bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable; rejection of all bids and solicitation of new bids on revised or the same requirements; or negotiation with one or more bidders or other contractors; and (b) to execute contracts and supplemental agreements with such bidders or contractors as he deems in the best interest of the Port Authority, and to order extra work up to 10% of the price of each contract and supplemental agreement and to order net cost work; provided, however, that in no event shall the total payments under said contracts exceed the total amount of the contract payments included in the foregoing project; and it is further

RESOLVED, that the form of all contracts and supplemental agreements prepared in connection with the foregoing project, is subject to the approval of General Counsel or his authorized representative.

**Kennedy International Airport - Rehabilitation of Taxiways
"I" and "O" - Contract JFK-523 - Authorization and Award**

Taxiways "I" and "O" are a vital part of the airport taxiway system which provides aircraft access to passenger terminals and cargo buildings, as well as access to the four major runways at Kennedy International Airport. In the past, via a program of periodic maintenance paving contracts, the useful life of the pavement has been extended. However, due to continued wear and tear caused by the ever increasing number of aircraft movements, the deterioration of the asphalt pavement has accelerated to the point where the pavement requires major work in order to assure its serviceability. Thus, rehabilitation of Taxiways "I" and "O" is needed to maintain the structural integrity and the proper contours of these taxiways. Without this work on these two vital taxiways, which represent the heart of the Kennedy International Airport taxiway system, there could be a limit on operations and capacity of the aeronautical areas. This project is expected to qualify for an estimated \$2.5 million in Federal aid. The remaining investment is recoverable under the flight fee formula.

Contract JFK-523, Kennedy International Airport, Rehabilitation of Taxiways "I" and "O", provides for rehabilitation and strengthening of Taxiways "I" and "O" including overlaying the pavement and adjusting drainage structures and light fixtures in the taxiway areas at Kennedy International Airport.

The contract provides for 10% Minority Business Enterprise and 1% Women Business Enterprise participation.

The contract was publicly advertised. Anthony Grace & Sons, Inc. and Grace Contracting, Corp., a joint venture submitted the low bid and the Chief Engineer has determined that it is qualified to perform the contract.

The following resolution was unanimously adopted:

RESOLVED, that the Board authorize:

1. a project at Kennedy International Airport to provide paving and utilities for the first of the three phase program to rehabilitate and strengthen Taxiways "I" and "O", to include miscellaneous improvements to other taxiways, at a total expenditure presently estimated at \$4,951,600 including payments to contractors, an allowance for extra work, engineering, administrative and financing expenses; and
2. the Executive Director to award Contract JFK-523, Kennedy International Airport, Rehabilitation of Taxiways "I" and "O", to Anthony Grace & Sons, Inc. and Grace Contracting Corp., a joint venture at its bid price in the amount of \$3,462,490 and to order extra work up to the amount of \$350,000.

**Kennedy International Airport - Construction of Taxiway "ZB"
and Modification of Taxiway "ZA" and Taxiway "KK" -
Project Authorization and Award - Contract JFK-220.063**

Port Authority staff, in discussion with air carriers and the Federal Aviation Administration, has developed a program for improvements to increase the airside capacity of Kennedy International Airport. Contract JFK-220.063 provides for the second phase of this construction program.

Contract JFK-220.063 will provide for the construction of taxiway pavement and associated utilities for a portion of new Taxiway "ZB", the extension of Taxiway "KK" to Runway 13R/31L and the realignment of Taxiway "ZA" for a high speed exit from Runway 13L/31R.

The contract will provide for 10% Minority Business Enterprise and 1% Women Business Enterprise participation.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize:

1. a project at Kennedy International Airport to provide paving and utilities for the construction of a portion of new Taxiway "ZB", extension of Taxiway "KK" and realignment of Taxiway "ZA" at a total expenditure of \$13.6 million, including payments to contractors and an allowance for extra work, engineering, administrative and financing expenses; and

2. the Executive Director to award Contract JFK-220.063 to the lowest qualified bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid the Executive Director deems reasonable, and to order extra work up to the amount of 10% of the bid accepted, or to reject all bids; the form of the contract to be subject to the approval of General Counsel or his authorized representative.

**Kennedy International Airport - Aeronautical Pavement
Repairs Contract JFK-532 - Award**

This contract is for the construction of new pavement surfaces and the repair of existing pavement in various locations of the aeronautical portions of the airport. This work is required to maintain the pavements' structural integrity and will result in a reduction of pavement maintenance, improved aircraft operations and increased public safety. A portion of the work will be performed during nighttime hours in order to minimize inconvenience to the public and interference with aeronautical operations.

The contract provides that the contractor will use every good faith effort to meet a goal for Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and Women Business Enterprise participation of 1% for firms owned and controlled by women.

The contract was publicly advertised. Grace Contracting Corp. and Anthony Grace & Sons, Inc., a joint venture, submitted the low bid and the Chief Engineer has determined that they are qualified to perform the contract.

The following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to award Contract JFK-532, Kennedy International Airport, Aeronautical Pavement Repairs, to Grace Contracting Corp. and Anthony Grace and Sons, Inc., a joint venture, the low bidder, in the estimated total amount of \$2,242,000 and to order extra work up to the amount of \$225,000.

Kennedy	International	Airport	-	International	Arrivals
Building	and Buildings	14, 80,	106,	141, 155,	252, 269
General Cleaning Contract - PSE-477					

It was recommended that the Board authorize the Executive Director to award Contract PSE-477 to provide general cleaning services in the International Arrivals Building and other buildings at Kennedy International Airport to Ogden Allied Aviation Service of New York, Inc., the lowest qualified bidder as determined by public bid at its bid price of \$7,754,955. The contract is for an initial term of two years commencing on or about September 9, 1987 and is subject to extension for two one-year periods as provided in the contract.

It was also recommended that the Director of General Services be authorized to extend the contract for two additional one year periods as provided in the contract and that the Director of Aviation be authorized to order extra work during the initial two-year period and during each extension period in an amount not to exceed 10% of the contract price for each such period.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to award contract PSE-477, General Cleaning, Kennedy International Airport, to Ogden Allied Aviation Service of New York, Inc. and that the Board authorize the Director of General Services in her discretion, to extend the contract for two additional one-year periods as provided in the contract, and the Director of Aviation to order extra work during the initial two-year period and during each extension period in an amount not to exceed 10% of the contract price for each such period, the form of the contract to be subject to the approval of General Counsel or his designated representative.

**Kennedy International Airport - Baggage Cart Rental Service
- Agreement with Smarte Carte, Inc.**

Authorization is requested for the Executive Director to enter into an agreement with Smarte Carte, Inc. at Kennedy International Airport covering the installation, operation and maintenance of a baggage cart rental service in the International Arrivals Building and in such Unit Terminals where lessee airlines have agreed to accept this service. The term of the agreement would be for five years with the Port Authority having the right to renew the term for an additional five-year period on the same terms and conditions. The Port Authority would have the right to terminate the agreement at any time, without cause, on 30 days notice and in such event Smarte Carte, Inc. would be reimbursed for the unamortized portion of its investment in the equipment required to conduct the operation to the extent that such investment does not initially exceed \$2 million. Smarte Carte, Inc. will pay a fee equivalent to 10% of its gross receipts which will not include refundable deposits. With respect to Unit Terminals, it is anticipated that the Port Authority will recover the cost of installing improvements at these Terminals to accommodate the carts prior to sharing the fee with the airlines. Due to the unique configuration of the Central Terminal Area, which may result in higher than normal cart loss, it has been agreed that Smarte Carte, Inc. will be responsible for the first 5% of lost carts based upon a monthly cart count while the Port Authority will replace the next 10% of lost carts. Smarte Carte, Inc. will be responsible for all losses thereafter but the Port Authority has agreed to discuss the implementation of such measures as may be agreed upon to try and stem the losses. Replacement costs will be limited to that amount not reimbursed by insurance coverage maintained by Smarte Carte, Inc. Liability for damaged carts will be assumed entirely by Smarte Carte, Inc.

Currently passengers arriving at the airport have only two choices - carrying their own luggage or use a Skycap to transport the luggage to a pickup area. Availability of rental carts provides a third alternative and is a major service enhancement which staff has been seeking to implement for some time.

It is presently anticipated that Smarte Carte Inc.'s personnel will be stationed in the Customs Areas to assist passengers and provide U.S. currency when needed. Smarte Carte, Inc. has agreed to establish an affirmative action program for its operation.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, for and on behalf of the Port Authority, is hereby authorized to enter into a permit agreement with Smarte Carte, Inc. for the installation, operation and maintenance of a baggage cart rental service at Kennedy International Airport and to enter into such agreements as may be appropriate with various airline lessees to cover the operation of a baggage cart service in their leased premises, all substantially in accordance with the terms set forth above, the form of the agreement to be subject to the approval of General Counsel or his designated representative.

**Heliports - Downtown Manhattan Heliport - Contract
DMH-110.004 Pier Reconstruction - Settlement of all
Claims**

The Board, at its meeting on March 14, 1985, authorized the Executive Director to award Contract DMH-110.004 and to order extra work up to the amount of 10% of the amount of the bid accepted. Thereafter, the Executive Director awarded such Contract DMH-110.004 to J.E. Brenneman Company (herein "Brenneman"), in the amount of \$2,927,410 million and authorized an extra work allowance of \$292,741. Subsequently, the Board at its meetings of December 12, 1985 and May 14, 1987 authorized an increase in the extra work allowance to \$650,000 and \$850,000, respectively.

Brenneman has submitted a claim to the Port Authority in the amount of \$2.7 million, alleging that additional costs incurred under Contract DMH-110.004 resulting from changes in the scope of work, delays, interference and changed conditions such as: (1) failure to issue timely notice to proceed and make available certain areas; (2) imposition of major changes under such Contract DMH-110.004 which affected the manner and sequence of work required to accommodate the new terminal building; and (3) discrepancies in such Contract DMH-110.004 drawings and unusual design and submittal approval delays. Brenneman's claims were incorporated into a four volume book prepared by their consultant, T.J. Trauner Associates.

During claim negotiations, Brenneman representatives determined that the absolute minimum they would accept in settlement of their claims against the Port Authority was \$970,000, although they indicated that their actual book loss was approximately \$1.5 million. Staff, after further review of actual additional work performed by Brenneman and for which change orders had not been issued and of the impact of delays in inefficiencies caused by changes not contemplated by the parties, concluded that the original \$2.7 million claim should be settled for \$650,000, including an amount of approximately \$150,000 for unreimbursed additional extra work performed under Contract DMH-110.004.

Brenneman's representatives have agreed to accept a payment in the amount of \$650,000 and to execute a general release to the Port Authority relating to all claims under Contract DMH-110.004. Staff deems this settlement to be equitable.

The following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to make a payment of \$650,000 to J.E. Brenneman Company in full settlement of all claims, including those for extra work, against the Port Authority under Contract DMH-110.004 and to enter into appropriate agreement(s) in effectuating such settlement of claims; and it is further

RESOLVED, that the form of any such agreement(s) in settlement of such claims be subject to approval by General Counsel or his authorized representative.

Newark International Airport - Facility Maintenance
Building - Project Authorization and Award

Since the demolition of Building 33 after the discovery of structural failure in its roof structure in late 1983, the major portion of Newark International Airport's maintenance forces has been housed in temporary quarters in existing Buildings 51 and 82 while temporary areas for materials and equipment have been established at various locations. In the last few years an increase in personnel, vehicles and equipment required to serve the needs of the airport has aggravated the inadequacy of the existing temporary facilities for maintenance and construction staff and equipment. Additionally, the scattering of staff, equipment and supplies has resulted in severe operational inefficiencies.

Contract NIA-110.035 will provide for the construction of maintenance facilities consisting of a main building combining offices, lockers, maintenance shops and the facility cafeteria, as well as a supplemental structure to be used for airport snow removal operations control and for the repair and storage of specialized maintenance vehicles and equipment.

The contract also provides for the purchase of kitchen and cafeteria equipment and for the supply and installation of a snow desk and supporting area, all on a net cost basis presently estimated at roughly \$565,000.

In order to accelerate project completion and reduce construction costs, a design/build contract approach was pursued. Qualified design/build firms were publicly solicited and a list of eight prequalified bidders was developed from the proposals received. The proposals of the design/build firms were required to contain a 20% participation in the management effort by a Minority Business Enterprise firm in a joint venture arrangement with the primary contractor. The contract provides, additionally, that the bidder will use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and Woman's Business Enterprise participation of 1% for firms owned and controlled by women.

The entire project is eligible for \$2.5 million in Federal aid.

Two bids were received and are presently under evaluation.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize a project for the design and construction of facilities to accommodate maintenance and construction staff and equipment at Newark International Airport at an expenditure presently estimated at \$21.3 million, including administrative, engineering and financing expenses, payments to contractors and allowances for extra work as net cost work; and it is further

RESOLVED, that the Committee on Construction is authorized to award Contract NIA-110.035 to the lowest qualified bidder.

(Board - 8/13/87)

**Newark International Airport - Federal Express Corporation -
Lease ANA-041 - Supplement to Lease**

It was recalled to the Board that on November 10, 1983, the Board authorized a 25-year lease with Federal Express Corporation covering approximately 27.8 acres on which Federal Express constructed and operates a package handling facility. Federal Express Corporation has been operating at Newark International Airport since 1976 and during this time Federal Express has become a leader in the overnight package air delivery industry. At Newark International Airport, Federal Express' volume of business has increased dramatically over the past few years and the carrier expects its level of activity to steadily increase throughout the next decade. It was further recalled to the Board that the airport lime-cement-flyash ("LCF") plant is currently located on a portion of the existing Federal Express leasehold with the remaining components of the LCF plant located on a leasehold which is now proposed to be added to the leasehold. The LCF plant is required for producing material necessary for airport aeronautical pavement construction.

To properly accommodate the tremendous growth in its Newark International Airport operations, Federal Express is seeking to expand its airport leasehold beyond the approximately 27.8 acres it now occupies in the southwest development area of the Airport and to construct an additional aircraft access to the leasehold. Under the proposed Supplement, Federal Express would lease additional land area of approximately 5.3 acres abutting the north side of the existing leasehold and approximately 10.1 acres abutting the south side of the existing leasehold. The said approximately 10.1 acres is to be leased to Federal Express after the surrender of the same to the Port Authority by Butler Aviation-Newark, Inc. Further, the said approximately 10.1 acre parcel shall be leased to Federal Express subject to a joint and mutual taxiway easement covering common use of the apron taxiway between the Federal Express expanded leasehold and the property immediately to the south (Taxiway PC), in order to facilitate aircraft access to and from the area, and subject to the right of Federal Express to recover from future adjacent tenant(s) the costs allocable to the future tenant(s)'s portion of the taxiway.

Under the existing terms of the lease, Federal Express pays an annual rental consisting of a constant factor and a variable factor for airport services. The constant factor consists of a per acre ground rental rate ranging from \$4,500 to \$7,500 per year over the 25-year term of the lease. The per acre ground rental on the additional land area to be leased under the supplement will range from \$7,500 to \$16,000 per year over the 25-year term of the lease, adjusted upwards every five years based on the Consumer Price Index. The variable rate for airport services is currently set at approximately \$24,500 per acre per year and is subject to adjustment based on the Airline Master Leases at the Airport.

Under the proposed supplement, Federal Express will surrender to the Port Authority approximately 900 square feet at the northeast corner of the existing premises, to enable Port Authority construction of a proposed restricted service road. Federal Express will also surrender to the Port Authority, temporarily, approximately 4.2 acres for the period effective as of September 1, 1985 to March 31, 1987; and, approximately 1.6 acres for the period effective as of April 1, 1987 to the date of removal of the LCF plant (i.e., subsequent to December 31, 1988 after which the Port Authority will be obligated to remove the LCF plant). These surrendered premises are required for Port Authority use of the LCF plant.

(Board - 8/13/87)

In addition, under the terms of the supplement, the Port Authority will have the option, to be exercised by the Executive Director, to recapture approximately 1.1 acres, if and when necessary, in connection with any future realignment of Taxiway "PA" which is adjacent to the east boundary of the leasehold, in order to eliminate operating restrictions on wide-body aircraft operating on the Taxiway. The Port Authority would be obligated to reimburse Federal Express for its unamortized investment as defined in the supplement in its construction associated with this recaptured portion of the leasehold up to an amount not to exceed \$500,000 should the Port Authority exercise its right to recapture the said approximately 1.1 acres. This reimbursement is eligible for recovery under the flight fee formula.

The supplement will provide for appropriate rental adjustments to be made upon recovery of the portions of the Federal Express leasehold by the Port Authority.

In addition, under the supplement, Federal Express would construct a second aircraft taxiway access serving the expanded leasehold. A portion of this taxiway access will be located off the leasehold premises. Federal Express would bear all costs of the portion of the additional taxiway access construction on the premises; the Port Authority would be obligated to reimburse Federal Express for its actual design and construction costs for the off-premises portion of the additional taxiway access, up to an amount not to exceed \$475,000. These costs are recoverable under the flight fee formula. In addition, the Port Authority may expend approximately \$100,000 as might be required or appropriate for additional work performed by the Port Authority or its contractors in connection with the off-premises portion of the additional taxiway access. This amount is also recoverable under the flight fee formula.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, for and on behalf of the Port Authority, be and he hereby is authorized to enter into an agreement with Federal Express Corporation at Newark International Airport amending and supplementing Lease ANA-041 substantially in accordance with the terms set forth above; and it is further

RESOLVED, that the Executive Director, for and on behalf of the Port Authority, be and he hereby is authorized to expend an approximate amount of \$100,000 for additional work as may be required or appropriate in connection with the construction by Federal Express Corporation at Newark International Airport of a taxiway access to its leasehold premises under Lease ANA-041; and it is further

RESOLVED, that the form of the said agreement be subject to the approval of General Counsel or his designated representative.

(Board - 8/13/87)

**Newark International Airport - Essex County Airport -
Agreement with Essex County Improvement Authority
Covering Operation of Essex County Airport**

It was reported that Essex County Airport is an important reliever airport for both Newark International and Teterboro Airports and is New Jersey's third most active general aviation airport. Because of limited revenue and certain limitations on its physical plant, Essex County Airport is presently unable to provide an acceptable level of service for general aviation aircraft and could ultimately cease operations. If the Essex County Airport were to close, or not be capable of providing increased capacity at an adequate level of service, the flight activity at the airport would have an adverse impact upon the local regional airports and have a negative effect upon the Port Authority's policy concerning general aviation activity at our airports. Accordingly, it was recommended that the Board authorize the Executive Director to enter into an agreement with the Essex County Improvement Authority (ECIA) and the County of Essex, New Jersey whereby the ECIA shall be committed to continue operation of and to develop the Essex County Airport for a term of at least fifteen years. In consideration thereof, the Port Authority will provide up to \$4 million in funds for the operation and further development of the airport. Up to \$2 million of the fund would be an interest free loan paid back over a fifteen-year period and \$2 million would be a payment without obligation to repay. In consideration of the Port Authority financial assistance, the ECIA will agree among other things that:

1. a. It will undertake specified improvement in both airport operations and plant facilities subject to Port Authority approval during the initial fifteen-year period; and

b. continue operation of the airport for this same fifteen-year period.

2. The interest free loan of up to \$2 million will be repaid in the following manner:

The ECIA shall make annual payments to liquidate the loan at not less than 5% of outstanding loan debt from ECIA net revenues not to exceed 50% of said revenues, and any outstanding balance will be paid in full at the end of the fifteen-year term.

3. To secure its payment, the Port Authority will have a lien against airport property subordinated only to the interest of the bondholders and the Federal Aviation Administration.

4. ECIA will agree not to sell or lease the airport during the initial fifteen-year period. Should the ECIA contemplate sale or lease of the airport after the initial fifteen-year period, the Port Authority will have the right of first refusal. In the event of sale or lease, to others for an additional fifteen-year period, within this 30-year period, ECIA will return to the Port Authority its \$2 million payment increased by 50% of the Consumer Price Index, but not to exceed 10% of the sale price.

(Board - 8/13/87)

5. Essex County will guarantee a payback of the amount above under this agreement upon default by the ECIA and will guarantee the ECIA's financial obligations to the Port Authority.

6. The ECIA will not incur additional long term debt or otherwise financially burden the airport without prior review by the Port Authority.

7. The Port Authority will have the opportunity to review all development plans, grant applications, leases and operating agreements plus the right to audit all accounts of the ECIA and County relating to the airport.

8. The ECIA will agree to initiate business-like practices for operation of the airport including appropriate flight fees and other revenue generating mechanisms.

9. The ECIA will be asked to agree to provide for Minority Business Enterprise and Women Business Enterprise participation on Port Authority funded projects.

10. The ECIA's agreement to continue the operation of the airport will be specifically enforceable.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority to enter into a service agreement with the Essex County Improvement Authority and with the County of Essex, New Jersey as Guarantor thereof substantially in accordance with the terms as set forth above, the form of the agreement to be subject to the approval of General Counsel or his designated representative.

**George Washington Bridge - Expressway Lighting under Bus
Station - Contract GWB-222 - Award**

Contract GWB-222 provides for the replacement of 372 existing wall and recessed ceiling mounted fluorescent lighting fixtures with 329 high pressure sodium fixtures.

Existing fluorescent lighting fixtures have been in place since 1969. They require frequent lamp replacement and, because some fixtures are ceiling mounted, it is necessary to close two adjacent Expressway lanes to perform the overhead maintenance. Because of the heavy volume of traffic using this expressway, there is a reluctance to shut down two lanes for the required relamping.

The replacement fixtures are a high pressure sodium type and represent a significant technological and economic improvement over the fluorescent fixtures. Sodium type fixtures are brighter, use less energy are easier to maintain and have a lamp life more than twice that of the fluorescent lights. The new fixtures will be supported by new structural steel beams supported by Bus Station columns.

A major portion of the work will be performed during nighttime hours and weekends in order to minimize inconvenience to the public and interference with traffic flow and essential facility operations. The construction contract includes a provision for maintenance of traffic and work area protection, to be performed on a net cost basis presently estimated at roughly \$300,000.

The contract provides that the contractor will meet a goal for Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and Women Owned Business Enterprise participation of 1% for firms owned and controlled by women.

The contract was publicly advertised. Expert Electric, Inc. submitted the low bid and the Chief Engineer has determined that they are qualified to perform the contract.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract GWB-222, George Washington Bridge, Expressway Lighting Under Bus Station, to Expert Electric, Inc. the low bidder, in the estimated amount of \$997,300, to order extra work up to the amount of \$100,000 and to order net cost work.

George Washington Bridge - Washbridge Apartments Soffit
Asbestos Removal and Refireproofing - Contract
GWB-110.090 - Authority to Award

In the early 1960's the four Washbridge Apartment Buildings were constructed in the "air rights" over the New York Expressway Approach to the George Washington Bridge. At that time, the girders above the soffits (concrete ceiling above the Expressway) were fireproofed with asbestos. These girders are located in the space known as the "Protective Zone" between the first floor of each apartment building and the soffit. Recent engineering investigations have determined that the concrete soffits on the undersides of the four apartment buildings are in a deteriorated condition and that all the soffits must be replaced. Removal of the asbestos on the interior girders and installation of non-asbestos fireproofing must take place before the soffits are replaced.

The agreement between the Port Authority and the City of New York dated August 25, 1960, in which the Port Authority quitclaimed the "air rights" of portions of the New York Expressway to the City, its successors and assignees and provided for the construction of four apartment buildings, includes a provision whereby the Port Authority is responsible to make repairs to the soffits.

Contract GWB-110.090 will require removal of the asbestos fireproofing from the girders within the "Protective Zone" between the soffit and first floor of the apartment buildings, disposal of the asbestos in accordance with governmental regulations and refireproofing of the girders. Bids will be solicited from a list of approximately ten contractors known to have the required qualifications to perform this work and any others deemed qualified by the Chief Engineer. The contract includes a provision that the contractor will use every good faith effort to meet a goal for Minority Business Enterprises participation of 10% for firms owned and controlled by minorities and Women Owned Business Enterprise participation of 1% for firms owned and controlled by women.

Approval of the owner of the apartment buildings with respect to the removal of the asbestos from the girders and refireproofing of the girders is required. Staff expects to receive this approval by mid-August 1987. A future contract presently scheduled to be advertised for bids in the spring of 1988 will provide for replacing the concrete soffits of the undersides of the four Washbridge Apartment Buildings. A project authorization for the entire program will be sought from the Board at that time.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorized the Executive Director either to award Contract GWB-110.090 to the lowest bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the amount of the bid accepted, or to reject all bids.

Port Newark - Regal Consolidating & Warehousing Service Corporation - Amendment of Lease

Authorization is requested for the Executive Director to enter into an agreement amending a lease with Regal Consolidating & Warehousing Service Corporation to add approximately 182,400 square feet of space in Building 135 and approximately 2,450 square feet of space in Building 150 plus an adjacent open area to the premises under the lease for a five-year term commencing on or about September 1, 1987 and expiring April 30, 1992 at an annual rental at the rate of \$547,200 per year for the space in Building 135 and at the rate of \$11,025 per year for the space in Building 150. The rental in each case would be subject to escalation on May 1, 1989 and May 1, 1991 based on 50% of the increase in the Regional Consumer Price Index with a minimum increase of 3% per year compounded annually.

The agreement will provide the Port Authority with the right to terminate the letting of the added space on six months prior written notice given at any time subsequent to September 1, 1990 if the space is required in connection with the berthing, loading or unloading of vessels or the storage of cargo in connection therewith.

Regal Consolidating & Warehousing Service Corporation is a public warehouseman. Regal has consolidated a portion of its operation in Building 135 and in Building 150 which will give Regal an increase in leased space of approximately 45,070 square feet for a total of approximately 400,000 square feet. Certain space now occupied by Regal will be surrendered and it is anticipated that such space will be leased at higher rates to provide an additional \$57,000 in revenue to the Port Authority. Regal is paying approximately \$181,000 per year more than the previous tenant for the space in Building 135 and Building 150.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement amending a lease with Regal Consolidating & Warehousing Service Corporation at Port Newark substantially in accordance with the terms set forth above, the form of the agreement to be subject to the approval of General Counsel or his designated representative.

**Brooklyn - Port Authority Marine Terminal - Continental
Terminals, Inc. - Term Lease Extension**

Authorization is requested to extend the letting of premises at Pier 6 at the Brooklyn-Port Authority Terminal now occupied by Continental Terminals, Inc. under a month-to-month lease. The premises are used for the storage of coffee for the Coffee, Cocoa & Sugar Exchange. The extension would be for a term commencing September 1, 1987 and expiring April 30, 1990. The tenant would pay a rental at the rate of \$376,100 per year plus an additional amount of \$16,700 for electricity. Effective May 1, 1989 the annual rental will be subject to escalation based on 50% of the increase in the Regional Consumer Price Index with a minimum increase of 3% per year compounded annually.

The agreement will provide the Port Authority and the tenant with the right to terminate the letting on 90 days' prior written notice at any time after May 1, 1988. In the event the lease is so terminated, then during the period from the date the notice of termination is received, until the effective date thereof in lieu of the basic rental provided for the tenant would pay a "phase-out rent" which equates to the full amount of the rent due for the first 30 days following the receipt of the notice, two-thirds of the rent due for the second 30-day period following receipt of the notice and one-third of the rent due for the last 30-day period following receipt of the notice.

Continental Terminals, Inc. is a major coffee warehouseman in the Port of New York.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement extending the letting of premises leased by Continental Terminals, Inc. at Brooklyn-Port Authority Marine Terminal substantially in accordance with the terms set forth above, the form of the agreement to be subject to the approval of the General Counsel or his designated representative.

**Imported Automobile Marine Terminal - Port Jersey - Contract
IA-110.001 - Wharf Construction - and - Contract IA-110.002
Paving and Utilities - Award**

Increases in the number of automobiles being imported through the Port Newark/Elizabeth Port Authority Marine Terminal facilities have indicated a need for a new facility to provide additional imported automobile unloading and preparation capacity.

At its meeting on December 11, 1986, the Board certified a new facility, the Imported Automobile Marine Terminal, and authorized a project for the construction of, among other things, a ship berth on the edge of the Port Jersey Channel and for paving approximately 80 acres of upland area adjacent to the berth.

Contract IA-110.001 provides for the construction of a ship berth, including mooring dolphins and dredging, and a pile supported concrete platform on the edge of the Port Jersey Channel, for unloading automobiles onto the Port Jersey Peninsula.

The contract also provides for releveling of the pipe sleeves for the tie roads and excavation and replacement of unsuitable materials from the fill stockpile, all on a net cost basis presently estimated at roughly \$38,000.

Additionally, the contract requires that there will be Minority Business Enterprise participation of 2% for firms owned and controlled by minorities.

Contract IA-110.020 provides for the paving of approximately 73 acres of upland area of the Port Jersey Peninsula and the furnishing and installation of utilities to service the upland and berthing areas. The contract also provides for the creation of a two-acre least tern nesting area and a one-acre public access and viewing area as required by the New Jersey Department of Environmental Protection.

The contract also provides for excavation and disposal of unsuitable material and backfilling and proofrolling with suitable material, removal of existing on-site abandoned pipe and automobile hulks, placement of on-site rip-rap, on-site perimeter slopes and loading, transporting and placement of excess suitable material, all on a net cost basis presently estimated at roughly \$210,000.

The contract also contains a provision requiring that there will be Minority Business Enterprise participation of 10% for firms owned and controlled by minorities.

Both contracts were publicly advertised. The low bidder on Contract IA-110.001, Pile Foundation Construction Company, Inc. was determined by the Chief Engineer to be qualified to perform the contract. The low bidder on Contract IA-110.002, M. Tomasella & Co., Inc., was determined by the Chief Engineer to be qualified to perform the contract.

The award of these contracts will be made subsequent to the receipt of any required permits and the reaffirmation of the Facility. Authority to award is being sought at this time in order to allow for award at the earliest possible date.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract IA-110.001, Imported Automobile Terminal, Port Jersey, Wharf construction, to Pile Foundation Construction Company, Inc. in the estimated total amount of \$5,678,000 to order extra work up to the amount of \$570,000 and to order net cost work; and it is further

RESOLVED, that the Executive Director is authorized to award Contract IA-110.002, Imported Automobile Marine Terminal, Port Jersey, Paving and Utilities to M. Tomasella & Co., Inc. the low bidder, in the amount of \$5,466,091, to order extra work up to the amount of \$547,000 and to order net cost work.

(Board - 8/13/87)

Newark Legal and Communications Center - Award of
Construction Contracts and Increase in Project
Authorization

In order to expedite the construction of the Newark Legal and Communications Center ("NLCC"), staff has determined that negotiation with and award to a general contractor is preferable. Accordingly, the World Trade and Economic Development Department has solicited proposals from two general contractors on Contract LCC-705.016 for the construction of the office tower portion of the NLCC including, the installation of suspended concrete slabs, exterior skin, vertical transportation, HVAC systems, plumbing, electrical and fire protection systems and fit-ups for lobby, cores and mechanical equipment areas. The contract is to include a requirement for 25% Minority Business Enterprise ("MBE") participation.

The proposals that have been submitted are based on a Guaranteed Maximum Price ("GMP") which includes an amount for the net cost of the work and a contractor's fee. The contract will provide for adjustments to be made to the GMP for, among others things, extra work. An incentive provision will also be included, whereby the Port Authority and the contractor will share in the difference, if any, between the estimate for net cost work stated as a component of the GMP and the actual net cost of the work performed under the contract. Any savings shall be apportioned at the rate of 75% to the Port Authority and 25% to the contractor.

Negotiations for LCC-705.016 are in progress. The foregoing contract terms are set forth in the contract document presently under negotiation and may be revised, in any way, in the course of such negotiations, if it is believed that such revisions will serve the public interest.

Separate contracts for Foundation Concrete, LCC-705.022, and Structural Steel, LCC-705.008, have been prepared, also. These contracts will either be awarded individually or the work under these contracts will be included in the General Construction contract. If LCC-705.022 and LCC-705.008 are awarded separately prior to the award of the General Construction contract, they may be assigned to the contractor who is awarded LCC-705.016.

The work to be performed under the Foundation Concrete contract includes the installation of all concrete footings, mat foundations, tie beams and grade beams, shoring and bracing as required, excavation and extensive dewatering.

The work to be performed under the Structural Steel contract includes detailing, fabricating, furnishing, delivering and installation of the structural steel, metal stairs and metal decking.

Further, the scope of work of Contract LCC-705.016 may be increased by additional work presently in the design stage, subject to negotiation of a mutually agreeable price. The additional work may include such items as a slurry wall, rotunda, plaza improvements and a truck ramp. Alternatively, a separate contract or contracts may be entered into for such work.

(Board - 8/13/87)

Following an agreement with the Governors of New York and New Jersey under which the Port Authority committed to participation in the revitalization of downtown Newark, the Board at its meeting on September 12, 1985, authorized the Acting Executive Director to proceed to implement a project for the development of the NLCC at an estimated total cost of \$44.2 million. An increase of \$7.5 million in this total project cost was authorized by the Board at its meeting on January 22, 1987, resulting in a total project cost of \$51.7 million. A further increase in the total project cost from \$51.7 million to \$73.8 million is being sought to provide funds for increased project costs due to foundation problems, delays, increased site dewatering, foundation and construction costs, increased project contingencies, allowances for a slurry wall and cased piles, and related architectural, construction management, engineering, financing, and administrative expenses.

The Board recognizes that the cost of this project has, for the aforementioned reasons, escalated beyond the range of normal cost overrun considerations. In light of this, we shall consider a request from the State of New York for an appropriate economic development investment, in accordance with the Port Authority's facility development criteria, of similar magnitude to this differential. The details of this investment shall be worked out with the state, subject to the approval of this Board.

The following resolution was adopted; Commissioner Hellmuth voted no:

RESOLVED, that an increase is authorized in the total project cost for the Newark Legal and Communications Center (NLCC) from \$51.7 million to \$73.8 million; and it is further

RESOLVED, that the Executive Director is authorized to negotiate and award Contract LCC-705.016, General Construction, to the contractor who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose price and MBE program the Executive Director deems reasonable; and to order work thereunder which is not presently included in Contract LCC-705.016 or to enter into a separate contract or contracts for all or a portion of such work with one or more qualified contractor, on the basis of competitive bids or direct negotiating and to order extra work under such contracts up to an amount of 10% of the amount of the contract price; and it is further

RESOLVED, that the Executive Director is authorized to negotiate and award Contract LCC-705.022, Foundation Concrete, to the contractor who submits the lowest proposal, or revised proposal following negotiations and who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price the Executive Director deems reasonable; and to order extra work up to an amount of 10% of the amount of the accepted proposal; and it is further

RESOLVED, that the Executive Director is authorized to negotiate and award Contract LCC-705.008, Structural Steel, based on negotiations with one or more contractors, to the contractor which he deems qualified by reason of responsibility, experience and capacity to perform the work under the contract and whose proposal price he deems reasonable; and to order extra work up to the amount of 10% of the negotiated contract price; and it is further

(Board - 8/13/87)

RESOLVED, that the Executive Director is authorized to assign Contract LCC-705.008 and/or Contract LCC-705.022 to the General Contractor responsible for the General Construction of the Newark Legal and Communications Center; and it is further

RESOLVED, that the form of agreements be subject to approval of General Counsel or his authorized representative.

Whereupon, the meeting was adjourned.

MINUTES of meeting of The Port Authority of New York and New Jersey held Thursday, September 10, 1987 at the Port Authority offices, One World Trade Center, City, County and State of New York.

PRESENT:

NEW JERSEY

Philip D. Kaltenbacher, Chairman
 Robert V. Van Fossan
 William K. Hutchison
 Henry F. Henderson, Jr.
 Robert Van Buren

NEW YORK

James G. Hellmuth
 Howard Schulman
 John G. McGoldrick
 H. Carl McCall

Stephen Berger, Executive Director
 Patrick J. Falvey, General Counsel/Assistant Executive Director
 Doris E. Landre, Secretary
 Robert J. Aaronson, Director of Aviation
 Anthony J. Barber, Director of Tunnels, Bridges and Terminals
 Regina L. Bryde, Administrative Assistant
 John J. Collura, Acting Director of Management and Budget
 Henry F. DeGeneste, Deputy Director of Public Safety
 Sidney Frigand, Assistant Executive Director/Government, Community & Public Affairs
 Louis J. Gambaccini, Assistant Executive Director/Trans Hudson Transportation
 Gene Gill, Director of General Services
 Francis A. Gorman, Comptroller
 John Hauptert, Treasurer
 Leon Katz, Supervising Information Officer, Public Affairs
 Richard R. Kelly, Director of Rail Transportation
 James J. Kirk, Port Director
 Phil LaRocco, Director of World Trade and Economic Development
 Donald R. Lee, Director of Audit
 Lillian C. Liburdi, Acting Chief Financial Officer
 Katharine B. MacKay, Assistant Executive Director/Administration
 Mark Marchese, Assistant Director, Information Services, Government, Community & Public Affairs
 Rino M. Monti, Director of Engineering/Chief Engineer
 Edward J. O'Malley, Director of Personnel
 Hugh O'Neill, Assistant Executive Director/Policy Planning and Business Development
 David Z. Plavin, Assistant Chief Financial Officer
 Martin E. Robins, Director of Planning and Development
 Victor T. Strom, Director of Public Safety
 Joseph L. Vanacore, Assistant Executive Director/Captial Programs

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meetings of July 30 and August 13, 1987. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey has expired.

Whereupon, the Board unanimously approved these Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on September 10, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meetings on September 10, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on September 10, 1987, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on September 10, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 9/10/87)

Redemption of Consolidated Bonds and Notes Prior to Mandatory Retirement

It was reported to the Board that a partial call of the bonds or notes of a series often costs more to publicize (consistent with the requirements of existing resolutions and the need to give notice to all holders) than a call of all of the bonds or notes of a series, because advertisements containing notices of redemption for less than all of the bonds or notes of a series must include individual bond numbers selected and listed for each call date. Such advertisements are larger and more expensive than those required for a single call of all bonds. By way of illustration, the possible savings accruing to the Authority by a single call for redemption now of all of the outstanding bonds of a series shortly to be called rather than two partial calls by lot of the bonds of this same series over the next year would approach \$18,000.

In order to minimize costs associated with bonded debt, it was recommended that the Board authorize, consistent with the Consolidated Bond Resolution and other agreements with the holders of Port Authority obligations, the Executive Director to retire or redeem by purchase, call, requests for tenders or exchange or otherwise, Consolidated Bonds (including Consolidated Notes) prior to the mandatory retirement or sinking fund payment dates provided for in the resolutions related to each series of bonds or notes when such early retirement provides a demonstrated net savings to the Authority.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, be and he hereby is authorized, consistent with the Consolidated Bond Resolution and other agreements with the holders of Port Authority obligations, to retire or redeem, by purchase, call, requests for tenders or exchange, or otherwise, Consolidated Bonds (including Consolidated Notes) prior to the mandatory retirement or sinking fund payment dates provided for in the resolutions related to each series of bonds or notes when such early retirement or redemption provides a demonstrated net savings to the Authority.

(Board - 9/10/87)

Settlement of Claim of Sandra Engel and Henry Engel v. The Port Authority of New York and New Jersey

It is reported that there is presently pending in the Supreme Court of the State of New York, County of New York, an action where Sandra Engel and Henry Engel seek to recover damages of \$12.5 million for personal injuries sustained when Mrs. Engel fell in a roadway at LaGuardia Airport on March 14, 1982.

At the time of the accident, Mrs. Engel, a 58-year old homemaker, was returning home from Florida. At approximately 7:30 p.m., while crossing the North Terminal Road in front of the Central Terminal Building at LaGuardia Airport, she tripped and fell on her left arm. She claims that the cause of her tripping was a pothole located in the roadway approximately two feet from the curb.

Mrs. Engel sustained a fracture of both bones of her left forearm. At Long Island Jewish Hospital, she underwent an operation on the left arm. The surgeons placed a plate and screws for both fractures with wires encircling the radius for added stability. The surgeons also operated on her right hip and removed bone material from her right pelvis and used it as a bone graft to aid in the healing process of the left forearm. In August of that year, Mrs. Engel was again operated upon. The wires encircling the radius were removed. The plates and screws on both the radius and ulnar were left in her forearm and remain to this day. After the first operation she remained in the hospital for almost two weeks.

The healing process was slow and she was required to wear an orthopedic brace on the forearm for more than two years after the fall. The cost of medical services received exceeded \$10,000.

A medical examination by the Port Authority through an orthopedic physician, Dr. Paul Post, confirmed the above fracture and treatment. Dr. Post noted a loss of range of motion of the left forearm and a deformity and a loss of range of motion of the wrist. He also found that the plaintiff sustained a partial disability of her left forearm and wrist with a loss of range of motion and disfigurement. The disability is permanent.

On July 1st, this case was tried before Justice Louis Grossman on the issue of liability only. After five days of trial, a jury verdict was rendered in favor of the plaintiffs finding the Port Authority 90% negligent and the plaintiff 10% contributorily negligent.

After several settlement conferences before Justice Grossman, the plaintiffs have agreed to accept a total of \$230,000 in full satisfaction of their claims against the Port Authority.

General Counsel requested that he be authorized to settle this action as outlined above and thereby avoid exposing the Port Authority to the probability of a higher award if the case is tried to a conclusion.

(Board - 9/10/87)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the General Counsel is authorized to settle the claim of **Sandra Engel and Henry Engel. v. The Port Authority of New York and New Jersey** by paying the sum of \$230,000 in full settlement of the action.

(Board - 9/10/87)

Regional Development Facility - Facility Certification

In June 1983, the Governors of the States of New York and New Jersey announced the results of their review and evaluation of various issues relating to the operations and finances of the Port Authority, with particular emphasis on the recommendations contained in the December 1982 report of the Governors' bi-State panel appointed in May 1982 to review financial and program issues. Among other items, the Governors announced their agreement concerning Trans-Hudson tolls and fare increases which would support various future capital programs to be undertaken by the Port Authority in the two States. In addition, the Governors' Program called for a series of actions by the Port Authority and the States of New York and New Jersey which, taken together, would permit the undertaking of a capital program in rail, highway and other infrastructure renewal projects to foster the revitalization of the commerce and economic development of the bi-State region. A bridge and tunnel tolls increase, which became effective January 1, 1984, was expected to make possible a capital program of approximately \$250,000,000. It was also expected that \$250,000,000 of capital funds would be made available for economic development and infrastructure renewal projects in the two States allocated on the basis of 55% for projects to be undertaken in the State of New Jersey and 45% for projects to be undertaken in the State of New York. Provision has been made in the Port Authority's capital plans for the availability of such amounts. In March 1987, the Governors announced agreement and recommendations with respect to certain programmatic elements essential, in their judgment, to the continued economic viability of the region, and reviewed the results of recommendations contained in their June 1983 announcement, recommending that the Port Authority continue its initiatives in many of these areas.

In order to enhance the Port Authority's ability to continue to make such expenditures at the request of either State, in each case subject to necessary and appropriate authorizations, in fulfillment of its commitment in connection with the Governors' Program of June 1983, it was recommended that the Board establish, as an additional facility of the Port Authority, the Regional Development Facility (the Facility). The Facility is to be a centralized program through which the Port Authority is to provide for certain of the economic development and infrastructure renewal projects in the State of New Jersey and the State of New York to be undertaken at the request of the respective Governor thereof, consistent with then-existing legislative authority, and subject to necessary and appropriate authorizations by the Board, funds for which are to be made available pursuant to the Governors' Program of June 1983.

To date certain projects (totaling \$177,171,000, as indicated in the accompanying table) have been authorized at the request of the Governor of New York or the Governor of New Jersey, pursuant to existing legislation and subject to necessary or appropriate certifications, if any; the funds for such projects have been allocated against the expected expenditures of \$250,000,000 of moneys made available pursuant to the Governors' Program of June 1983. It is now expected that authorized projects not associated with presently existing facilities, or others to be established subsequent to creation of the Facility, or other incidental expenses, to be provided from moneys made available pursuant to the Governors' Program of June 1983, would be part of the Facility upon appropriate authorization.

(Board - 9/10/87)

As noted above, the Facility will be an additional facility of the Port Authority and, therefore, at the time of issuance of the first Consolidated Bonds (which includes Consolidated Notes) for purposes which include capital expenditures in connection with the Facility, the Port Authority is required by covenants with holders of its Consolidated Bonds to make a certification relating to the financial effect upon the Port Authority of the effectuation of the Facility as an additional facility of the Port Authority. Thus, certification is necessary if any portion of the proceeds of such Consolidated Bonds is to be used for purposes of capital expenditures in connection with the Facility.

The issuance and sale of Consolidated Notes, Series MM, for purposes including capital expenditures in connection with the Facility is expected to be acted upon by the Committee on Finance today and, therefore, if such action is taken by the Committee, in view of the proximity of such action to the certification of the Facility as an additional facility of the Port Authority, no further action by the Committee with respect to the certification would be required. In the event such issuance does not occur as expected, consistent with prior practices, the Committee on Finance would be authorized to reaffirm the certification at the time of issuance of the first Consolidated Bonds (which includes Consolidated Notes) for purposes which include capital expenditures in connection with the Facility, provided that there is no substantial adverse change in the economic basis for said certification. Additionally, in the event that Consolidated Bonds for purposes which include capital expenditures in connection with the Facility are not issued by the Committee on Finance on September 10, 1987, in default of a reaffirmation of said certification by the Committee on Finance at the time of issuance of the first such Consolidated Bonds for such purposes, said certification shall not apply to the issuance of such Consolidated Bonds and the proceeds thereof shall be used for the stated purposes of such bonds or notes other than the Facility until such time as the Facility may be certified.

The Acting Chief Financial Officer had reviewed the projected overall financial standing and condition of the Port Authority and the economics of the Facility on the basis of the issuance of Consolidated Bonds (which includes Consolidated Notes) to provide for the total capital expenditures of or related to the Facility.

The Acting Chief Financial Officer had also reviewed with the Commissioners her formal opinion to them consistent with Section 7 of the resolutions establishing outstanding series of Consolidated Bonds (which includes Consolidated Notes), that the issuance today of Consolidated Notes, Series MM, for purposes which include capital expenditures for the Facility, or in the event said Consolidated Notes are not issued today, at the time of issuance of the first such Consolidated Bonds for purposes which include such capital expenditures (and subject to further opinion by the Chief Financial Officer at such time), the application of any portion of the proceeds of any such Consolidated Bonds in connection with the Facility will not, during the periods 1987 through 2022, reflecting the traditional 35-year term of long-term Consolidated Bonds, and 1987 through 1997, the immediately ensuing ten-year period associated with Consolidated Bonds with a maturity of less than ten years, in the light of the Port Authority's estimated expenditures in connection with the Facility and the total anticipated revenues and expenses of the Port Authority during those periods, materially impair the sound credit standing of the Port Authority or the investment status of Consolidated Bonds or the ability of the Port Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds.

(Board - 9/10/87)

In reaching this conclusion, the Acting Chief Financial Officer considered the covenant with holders of Port Authority Consolidated Bonds (which includes Consolidated Notes) to establish charges in connection with the Port Authority's facilities to the end that at least sufficient net revenues may be produced therefrom to provide for the debt service on all Consolidated Bonds, including those issued for purposes of capital expenditures in connection with the Facility. This conclusion was also based, in part, upon the judgment of the Acting Chief Financial Officer that the Port Authority's ability to continue to honor this covenant will necessitate increases from time to time in the Port Authority's tolls, fares, fees, rentals and other charges, or reductions in services and associated expenditures.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that a facility of the Port Authority to be known as the Regional Development Facility (the Facility), a centralized program through which the Port Authority is to provide for certain of the economic development and infrastructure renewal projects in the State of New Jersey and the State of New York to be undertaken at the request of the respective Governor thereof, be and it hereby is authorized, consistent with then-existing legislative authority and subject to necessary and appropriate authorizations by the Board of Commissioners, the funds for which are to be allocated from moneys made available pursuant to the Governors' Program of June 1983; and it is further

RESOLVED, that certification is hereby made that, in the opinion of the Port Authority at the time of issuance of the first Consolidated Bonds (which includes Consolidated Notes) for purposes which include capital expenditures in connection with the Facility, the issuance of such Consolidated Bonds will not, during the periods 1987 through 2022 and 1987 through 1997, in the light of the Port Authority's estimated expenditures in connection with the Facility and the total anticipated revenues and expenses of the Port Authority during those periods, materially impair the sound credit standing of the Port Authority or the investment status of Consolidated Bonds or the ability of the Port Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and it is further

RESOLVED, that, in the event that Consolidated Bonds (which includes Consolidated Notes) for purposes which include capital expenditures in connection with the Facility are not issued by the Committee on Finance on September 10, 1987, the Committee on Finance be and it hereby is authorized to reaffirm said certification on behalf of the Port Authority at the time of issuance of the first Consolidated Bonds for purposes which include capital expenditures in connection with the Facility, provided that there is no substantial change in the economic basis for said certification; and it is further

(Board - 9/10/87)

RESOLVED, that, in the event that Consolidated Bonds (which includes Consolidated Notes) for purposes which include capital expenditures in connection with the Facility are not issued by the Committee on Finance on September 10, 1987, in default of a reaffirmation of said certification by the Committee on Finance at the time of issuance of the first such Consolidated Bonds for such purposes, said certification shall not apply to the issuance of such Consolidated Bonds and the proceeds thereof shall be used for the stated purposes of such bonds or notes other than the Facility, until such time as the Facility may be certified.

(Board - 9/10/87)

**Elizabeth-Port Authority Marine Terminal - Design and
Construction of Modular Buildings on Property East of
McLester Street - Contract EP-110.044 - Project
Authorization and Authority to Award**

The Port Authority has 5.5 million square feet of warehouse distribution space at Port Newark/Elizabeth, all of which is currently leased to importers, exporters and public warehousemen. The smallest existing unit is 13,000 square feet, but recently demand for even smaller units has risen dramatically.

The Port Department has received numerous inquiries for these smaller sections, and staff has confirmed the strength of the demand in a survey of the New Jersey brokerage community. Buildings with 5,500 square foot sections (modular), consisting of approximately 1,200 square feet of office space and 4,300 square feet of warehouse/distribution space, would effectively satisfy the burgeoning demand and diversify industrial space at the Port. Small firms which lease modular space become prospects for larger standard warehouse buildings in the Port. Furthermore, the availability of the smaller units makes it possible to attract a broader segment of the market.

Modular buildings will be an important support service for the marine transportation of cargo. They are expected to attract new activity to the Port such as foreign firms starting U.S. operations and small domestic firms engaged in importing/exporting. Each modular unit can be activated with Foreign Trade Zone status, thereby further enhancing its attractiveness to potential tenants.

Based upon current projections, it is expected that the Port Authority investment will be recovered by charging competitive rentals for the modular building space.

Contract EP-110.044 was prepared for development of the Port Authority's site on McLester Street, and includes the design and construction of three 44,000 square foot buildings and associated landscaping, paving and utilities. The work is expected to be completed by early 1989. The first two buildings are expected to be ready for occupancy by September 1988. The contract provides for the removal of excess surcharge sandfill material to be performed on a net cost basis, the cost thereof being roughly estimated at \$560,000.

The contract requires that there be Minority Business Enterprises participation of 10% for firms owned and controlled by minorities and Women's Business Enterprises participation of 2% for firms owned and controlled by women.

A list of prequalified contractors was prepared through a response to a publicly advertised questionnaire, and bids were solicited from the prequalified contractors and received on August 20, 1987. The low bid was submitted by M. Gordon Construction Co. & Williams & Assoc., a joint venture, which was determined by the Chief Engineer to be qualified to perform the contract.

(Board - 9/10/87)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize: (1) a project to develop three modular buildings comprising approximately 130,000 square feet on a ten-acre site in the Elizabeth-Port Authority Marine Terminal, east of McLester Street, at an estimated project cost of \$10 million, including payments to contractors, allowances for extra work and net cost work, engineering, administrative and financing expenses; and (2) the Executive Director, to award Contract EP-110.044 to M. Gordon Construction Co. & Williams/Widmer & Assoc., a joint venture, at its low bid price of \$7,819,300, to order extra work up to the amount of \$780,000, and to order net cost work.

(Board - 9/10/87)

**Enlargement of Foreign Trade Zone 49 Through the
Establishment of a Subzone to Include the Agfa-Gevaert,
Inc./Peerless Photo Products Division Facility in West
Caldwell, New Jersey**

The Port Authority, as grantee of Foreign Trade Zone No. 49, has been requested by Agfa-Gevaert, Inc. to submit an application to the Foreign Trade Zone Board for the establishment of a subzone to include its Peerless Photo Products Division Facility in West Caldwell, New Jersey. Agfa-Gevaert is involved in the manufacture of high quality photographic paper. Subzone status for the West Caldwell facility would enable Agfa-Gevaert to reduce certain duty payments or, in the case of re-exports, to eliminate them all together. Potential benefits to the region would include the creation of 44 permanent jobs, the retention of 180 existing jobs, the retention of current exports of photographic paper, increased tonnage to the Port of New York and New Jersey, increased use of domestic photographic paper components and a more competitive source of photographic paper. It is anticipated that the establishment of this subzone would not result in any cost, expense or risk of loss to the Port Authority. Upon securing subzone status, Agfa-Gevaert has agreed to enter into an appropriate agreement with the Port Authority.

It was therefore recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority to file an application for the establishment of a subzone and to execute an appropriate agreement with Agfa-Gevaert, Inc./Peerless Photo Products Division in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to file an application with the Foreign Trade Zone Board of the United States Department of Commerce for the establishment of a subzone at the Agfa-Gevaert, Inc./Peerless Photo Products Division facility in West Caldwell, New Jersey and to execute an appropriate agreement with Agfa-Gevaert, Inc., the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 9/10/87)

**The World Trade Center - Relocation, Expansion and Extension
of Lease for Prescott, Ball & Turben, Inc. - Lease No.
WT-2301-A-56 (1578)**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement with Prescott, Ball & Turben, Inc. ("Prescott") providing for the letting of certain premises at the World Trade Center substantially in accordance with the following terms and conditions.

Prescott currently leases approximately 40,600 rentable square feet on the 56th floor of One World Trade Center under a lease which expires on May 31, 1992. The agreement would provide for the relocation of Prescott to space totaling approximately 52,900 rentable square feet consisting of the entire tenth floor and part of the eleventh floor of One World Trade Center at a basic rental escalating from \$25 per square foot to \$38 per square foot over an extended lease term expiring on May 31, 2002. The agreement will require Prescott to pay cleaning and electricity charges and additional basic rental to cover increases in operating costs and in payments in-lieu-of taxes. The space will be turned over to Prescott upon completion of asbestos removal and re-fireproofing. Prescott will receive a rent-free period not to exceed six months and an allowance of up to \$35 per rentable square foot to reconstruct the space. On Prescott's request, up to an additional \$35 per rentable square foot will be made available toward such reconstruction to be repaid over the extended term of the letting as provided in the agreement.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into an agreement with Prescott, Ball & Turben, Inc. providing for the letting of certain premises at the World Trade Center substantially in accordance with the above provisions and the form of such agreement shall be subject to approval of the General Counsel or his designated representative.

(Board - 9/10/87)

Bathgate Industrial Park - Lease Agreement with Avne Systems, Ltd.

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease agreement with Avne Systems, Ltd. (Avne) at the Bathgate Industrial Park and to enter into a brokerage agreement with Brian Lea, both agreements to be substantially in accordance with the terms set forth below. The premises will consist of an approximate 68,000 square foot industrial building on Block 2913 of the Bathgate Industrial Park. The term of the letting will commence upon execution of the lease and will expire approximately ten years from the rental start date, which will be the earlier of the 30 days after the Port Authority certifies the use of the premises or a fixed date as provided in the lease. The Port Authority will provide Avne with the shell building and up to \$22 per square foot for building finishes for which Avne will pay the Port Authority the following rentals: (1) an annual rental equivalent to the amount the Port Authority pays to the New York City Public Development Corporation for the site; (2) an annual basic rental of \$476,000 for years one through five and \$681,000 for the balance of the initial term, which amounts will be reduced by a factor in years one to five and a factor in years six to ten for every dollar below \$22 per square foot Avne does not expend for building finishes; and (3) beginning in year six, an operating and maintenance (O&M) rental based on Consumer Price Index increases and using the O&M base established in the lease at the start of year five. Effective at the end of the initial ten-year term Avne will have the right to renew the lease for a single five-year term at the higher of market or \$13 per square foot or have the Port Authority, subject to the approval of the Board at such time, relinquish its interest in the premises to the City in conjunction with the transfer of the City's fee interest to Avne, for which the Port Authority will receive \$10.6 million from Avne.

The Port Authority will pay Brian Lea, a licensed real estate broker, a brokerage commission of \$140,000 as provided in the brokerage agreement. An additional brokerage commission of \$88,500 will also be paid to Brian Lea if Avne exercises its renewal option, or \$200,000 if Avne pays the Port Authority \$10.6 million for relinquishing its interest to the City.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement of lease with Avne Systems, Ltd. and a brokerage agreement with Brian Lea, both agreements to be substantially in accordance with the above provisions and the form of the agreements shall be subject to the approval of General Counsel or his designated representative.

(Board - 9/10/87)

The Teleport - Teleport Associates Reimbursement Agreement

The Board is requested to ratify the Executive Director's payment to Teleport Associates of the sum of \$249,000 to reimburse Teleport Associates for work performed by it on behalf of the Port Authority and to authorize the Director, World Trade & Economic Development to enter into an agreement to reimburse Teleport Associates for the costs of performing certain additional work for the Port Authority at an estimated cost of approximately \$500,000.

The lease agreement between the Port Authority and Teleport Associates requires the Port Authority to deliver electrical power to Teleport Associates' leased premises which requires the Port Authority to install certain equipment and associated ducts and manholes to enable Teleport Associates to tie into the Teleport's electrical distribution system. In order to expedite the performance of the work and to minimize construction costs, staff agreed that Teleport Associates could perform the work and build one transformer vault and certain associated ducts and manholes.

In order to expedite payments to Teleport Associates, the Executive Director, on July 11, 1986, authorized payment of the sum of \$249,000 for the construction of the transformer vault. Teleport Associates has completed the balance of the work to be performed, including installation of conduits, manholes and related hardware, at an approximate cost of \$500,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board ratify the Executive Director's payment to Teleport Associates of the sum of \$249,000 to reimburse Teleport Associates for the costs of certain work performed by Teleport Associates on behalf of the Port Authority and authorize the Director, World Trade & Economic Development, to enter into an agreement to reimburse Teleport Associates for costs incurred by it for certain additional work performed on behalf of the Port Authority at an estimated cost of approximately \$500,000, the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 9/10/87)

**Port Authority Industrial Park at Elizabeth - Lease
Agreement with Capcow, Inc.**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease agreement with Capcow, Inc. (Capcow) to provide for the leasing of an approximately thirteen-acre site at the Port Authority Industrial Park at Elizabeth, and a brokerage agreement with Eli Cohen, both agreements to be substantially in accordance with the terms authorized by the Board at its meeting on December 11, 1986 as amended below. The site to be leased will increase from twelve acres to thirteen acres for which Capcow will pay an annual basic rental ranging from \$195,000 in the first year to \$476,500 in years 29-30; the Port Authority will provide up to \$6 million for construction instead of \$1.6 million for which Capcow will pay an interim construction rental and construction rental based upon a variable prime rate plus 150 basis points instead of 50 basis points, the construction rental to be payable over 30 years instead of fifteen years; and the lease to provide Capcow with an option to purchase the premises on the 30th month following the commencement date of the term of the letting in addition to other purchase options previously authorized.

As previously authorized the Port Authority will pay Eli Cohen, a licensed real estate broker, a brokerage commission not to exceed \$200,000 as provided in the brokerage agreement.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement of lease with Capcow, Inc. and a brokerage agreement with Eli Cohen, both agreements to be substantially in accordance with the above provisions and the form of the agreements shall be subject to the approval of General Counsel or his designated representative.

(Board - 9/10/87)

**Kennedy International Airport - Lease of Space in Building
No. 68 and Related Areas with Virgin Atlantic Airways,
Ltd.**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease with Virgin Atlantic Airways, Ltd. for warehouse and office space in Building No. 68 and related areas at Kennedy International Airport. The term of the lease shall commence on June 15, 1987 on a month-to-month basis until on or about September 1987 and shall continue thereafter for a fixed term to expire on June 30, 1990 at a rental at the annual rate of \$60,384.

Virgin Atlantic will be responsible for all maintenance of the premises except the roof, structural supporting frame and building exterior which along with property insurance will be the responsibility of the Port Authority. The Port Authority will have the right to terminate the lease without cause on 180 days' notice to Virgin Atlantic.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into a lease with Virgin Atlantic Airways, Ltd. for warehouse and office space in Building No. 68 and related areas at Kennedy International Airport substantially on the terms set forth above; the form of the lease to be subject to the approval of General Counsel or his authorized representative.

(Board - 9/10/87)

Newark International Airport - Award - PSE-476 - General
 Cleaning of Newark International Airport - North
 Terminal - Building No. 88

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to award Contract PSE-476, General Cleaning, North Terminal, Newark International Airport, to the lowest bidder from among those who have submitted proposals who he shall deem qualified for a two-year term with the Port Authority to have the right to extend the contract for two additional one-year periods with the contract price during each extension period being subject to adjustment based upon mutually agreed upon increases related to labor and materials required to perform the services to be provided during each extension period, as verified by audit. The Board is further requested to authorize the ordering of extra work under the contract during the installation in an amount not to exceed 10% of the contract price for such period and to authorize the extension of the contract for two additional one-year periods in accordance with the terms of the contract without further approval of the Board or any Committee.

It was therefore recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to award Contract PSE-476, General Cleaning, Newark International Airport, North Terminal on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to award Contract PSE-476, Newark International Airport, General Cleaning, North Terminal to the lowest bidder from among those who have submitted proposals whom he shall deem qualified for an initial term of two years commencing on or about October 1, 1987 and authorize the Director of Aviation to order extra work under the contract during the initial two-year period thereof in an amount not to exceed 10% of the contract price for such period and that the Board further authorize the Director of General Services to extend the contract for two additional one-year periods without the further approval of the Board or any Committee and authorize the Director of Aviation to order extra work during each extension period in an amount not to exceed 10% of the contract price agreed upon for each such period, the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 9/10/87)

**La Guardia Airport - Award of Lease for Newsstand Shops in
The Central Terminal Building Complex**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease with Hudson County News Company to provide for the operation of six newsstands in the Central Terminal Building Complex at LaGuardia Airport. The term of the lease would be for five years commencing on or about October 1, 1987. Hudson County News Company was selected based on its response to a request for proposals which indicated that the Port Authority would consider as the basis of its selection, among other criteria, the range of magazines, newspapers and periodicals and the proposed prices of all items to be sold in addition to the guaranteed annual rent offered. Based upon Hudson County News Company's proposal the lease will provide for an annual guaranteed rental at the rate of \$1,400,000 against an annual percentage rental equal to the sum of the following percentage of all gross receipts arising from the operation of the newsstands: 14% of all newsstand category item gross receipts not in excess of \$1,000,000 and 16% on all such gross receipts in excess of \$1,000,000 plus 28% of all other annual gross receipts not in excess of \$1,000,000 and 30% of all such gross receipts in excess of \$1,000,000. Newsstand category items consist of newspapers, magazines, candies, books, cigarettes, cigars and tobacco products, non-prescription drugs, postal and greeting cards, stationary supplies and other such items. It is anticipated that the two tier structure of the percentage rental arrangement will encourage the vendor to provide a greater range of available items at lower prices, which will result in a greater volume of sales and will maintain the level of gross receipts. The lease also requires Hudson County News Company to pay the Port Authority an amount not to exceed \$260,000 to reimburse the Port Authority for its payment to Aeroplex Stores, Inc., the incumbent operator, for the cost of constructing a sixth newsstand. The Lessee will be obligated to refurbish the other five newsstands at an estimated cost of approximately \$200,000. The Port Authority will have the right to terminate the lease at any time, without cause, on thirty days notice in which event the Lessee would be reimbursed for the unamortized portion for its space preparation costs in an amount initially limited to \$460,000. In addition the Port Authority will have the right to separately terminate the letting as to any one shop, at any time, without cause, on thirty days notice and in such event the Lessee would be reimbursed for the unamortized portion of its initial space preparation costs for such shop to the extent that such costs do not initially exceed \$260,000 for the sixth newsstand and an estimated \$40,000 for each of the other five shops. The Lessee will pay for all utilities provided at standard rates subject to escalation over the term of the lease.

It was therefore recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease with Hudson County News Company on the terms and conditions outlined above.

Whereupon the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into a lease with Hudson County News Company at LaGuardia Airport substantially in accordance with the terms and conditions set forth above and authorize the Executive Director, for and on behalf of the Port Authority, to reimburse Aeroplex Stores, Inc. the present lessee, the sum of \$260,000 for renovation work performed by Aeroplex Stores, Inc. to create a sixth newsstand shop in the West Wing of the Central Terminal Building, the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 9/10/87)

**La Guardia Airport - Direct Entrance to the Parking Garage
Project Authorization and Award Contract LGA-320.052**

To accommodate dramatic increases in passenger volume and associated vehicular traffic at the Central Terminal Building at LaGuardia Airport, it was determined that a major expansion of the Central Terminal roadways and of the arrivals level was required. It was also determined that congestion on the roadway in front of the Central Terminal Building could be relieved considerably by providing a direct entrance to the garage from the 94th Street Airport entrance, thus eliminating the need for vehicles to pass in front of the Terminal Building to enter the garage.

Contract LGA-320.052 will provide for the construction of a new entrance to the parking garage from the 94th Street entrance to LaGuardia Airport as well as the associated modifications to existing roadways.

The contract provides additionally, that the bidder will use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize a project for the construction of a new direct entrance to the parking garage from the 94th Street entrance at LaGuardia Airport, at a total expenditure presently estimated at \$5.2 million including payments to contractors, an allowance for extra work, and administrative, engineering and financing expenses; and it is further

RESOLVED, that the Executive Director is authorized to award Contract LGA-320.052, LaGuardia Airport, Direct Entrance to the Parking Garage, to the lowest qualified bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable and to order extra work up to 10% of the bid accepted, or to reject all bids.

(Board - 9/10/87)

**Kennedy International, La Guardia and Newark International
Airports - Supplemental Agreements with the Rental Car
Permittees**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into agreements supplementing Permits with Avis Rent-A-Car System, Inc., Budget Rent A Car Corporation, Dollar Rent A Car Systems, Inc., National Car Rental System, Inc. and The Hertz Corporation, (the Rental Car Permittees) which would defer the collection of certain fees from these Permittees. The proposed agreements would provide that for the years 1986, 1987 and 1988, the fees payable by each Rental Car Permittee would be limited to the amount of fees it paid in 1985 (before the application of construction credits) plus an annual Consumer Price Index increase of up to 6%, with payment of the balance of the fees, if any, being deferred. Commencing in 1990, Collision Damage Waiver (CDW) receipts, subject to a specified maximum, would become fee payable and this would be applied to the payment of deferred fees plus interest. Until the three years of deferred fees plus interest is recovered, a minimum annual fee payment for CDW would be imposed. After the deferred fees and interest are recovered CDW receipts would continue to be subject to fee payment, however, without a minimum payment requirement. If a Rental Car Permittee terminates its permit or it is revoked for cause by the Port Authority before the recovery of deferred fees and interest, the unpaid amount thereof would become immediately payable.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into agreements with Avis Rent-A-Car System, Inc., Budget Rent A Car Corporation, Dollar Rent A Car Systems, Inc., National Car Rental System, Inc. and The Hertz Corporation, or any of them, supplementing their permits at the airports substantially on the terms set forth above; the form of the agreements to be subject to the approval of General Counsel or his designated representative.

(Board - 9/10/87)

**All Airports - Aircraft Noise Abatement Project at Five
Selected Schools - 1987 Program**

The Board at its meeting on February 13, 1986, authorized the 1986 soundproofing program estimated at \$6 million and at its meeting on May 14, 1987, the Board approved increases in the combined authorizations for the 1983, 1984 and 1985 soundproofing programs from \$9,550,000 to \$10,305,000. The 1983-1986 programs included seventeen schools, nine in New York State and eight in the State of New Jersey. Federal participation for these programs, including the additional schools under this authorization, amounts to approximately \$14 million and about \$2.7 million represents the Port Authority share. The completed soundproofing work has resulted in a significant reduction in aircraft noise intrusion levels creating a better teaching environment in classrooms. The program continues to be received very favorably by local elected and school officials.

The bids received for a number of the school noise abatement contracts were substantially below the estimated amounts used for grant application purposes. In order to utilize the anticipated resultant grant underruns and proceed with a 1987 program, the Port Authority proposed, and the Federal Aviation Administration (FAA) has agreed, to amend the affected grants to include five additional schools. In a collaborative effort with school and elected governmental officials the Port Authority has selected the following schools:

John Marshall, Elizabeth, New Jersey
Ann Street School (Phase II), Newark, New Jersey
P.S. 183, Rockaway Beach, Queens, New York
P.S. 165, Flushing, New York
School No. 5, Cedarhurst, New York

The soundproofing work to be done at these schools includes replacing the existing windows with acoustically designed window units and panels providing mechanical ventilation, as required and other related work.

The Port Authority contribution for the 1987 program would total \$1.5 million with the FAA share being \$2.4 million. The proposed funding for \$3.9 million is based on very preliminary estimates. Definitive estimates will be provided by consultants to be retained by the respective Boards of Education after the preliminary design is completed. Recent information indicates potential asbestos removal work may be required in connection with the noise abatement program, the extent of which only can be determined by indepth investigations and analyses. In the event extensive asbestos removal work is indicated the Port Authority will substitute for those schools with other noise impacted schools, and the Board will be informed.

Normally the Airport Improvement Program allows Federal funding at a 80% rate for this type of construction. Based on the anticipated underruns for the grants covering the schools in proximity to LaGuardia Airport, there appears to be sufficient funds to allow full 80% funding of the work for P.S. 165. For the two schools near Kennedy International Airport, P.S. 183 and School No. 5, the anticipated underruns would be sufficient to provide only 68% funding so the Port Authority would be providing the remaining 32%. Similarly, at the two New Jersey schools the underruns would provide only 42% funding so the Port Authority would be providing the remaining 58%. The Port Authority investment will be recovered under the flight fee formula.

(Board - 9/10/87)

The following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into agreements with the governing bodies of five selected schools in proximity to Port Authority operated airports to permit joint Port Authority and Federal Aviation Administration funding in the estimated total amount of \$3.9 million, comprised of \$2.4 million Federal aid and \$1.5 million Port Authority funds for projects to reduce the impact of aircraft noise levels within these schools; and it is further

RESOLVED, that the form of the agreements be subject to the approval of General Counsel or his authorized representative.

(Board - 9/10/87)

**Port Authority Annual Diesel and Fuel Oil Requirements - All
Facilities - 1987/1988 - Award**

The current requirements contracts that provide diesel and fuel oil for Port Authority facilities expire on October 31, 1987.

Contract P&SS-87-20 provides for the supply of number two diesel fuel and number two fuel oil. Contract P&SS-87-21A provides for the supply of number two fuel oil. Contract P&SS-87-21B provides for the supply of number four oil and number six fuel oil. All three contracts are for a one-year term commencing November 1, 1987. The facilities for which diesel and fuel oil will be supplied are set forth in the Attachment hereto.

Bids for Contract P&SS-87-20 were solicited from 26 Port Authority certified minority suppliers. The low bidder was Beaty Fuel Oil Co., Inc.

Bids for Contracts P&SS-87-21A and P&SS-87-21B were solicited from 136 prospective bidders and publicly advertised. The low bidders were Belcher Company of New York, Inc., and Empire State Fuel Corporation, respectively.

Contract prices are based on a per gallon cost. Price adjustments are based on changes to the low posted "New York Tank Car Consumer" price published daily in the Journal of Commerce.

The estimated contract price for Contract P&SS-87-21 is \$250,000; for Contract P&SS-87-21A is \$773,000; and for Contract P&SS-87-21B \$1,477,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract P&SS-87-20 to Beaty Fuel Oil Co., Inc., the low bidder; Contract P&SS-87-21A to the Belcher Company of New York, Inc.; and Contract P&SS-87-21B to Empire State Fuel Corporation; and it is further

RESOLVED, that the Director, General Services Department is authorized to exercise at her discretion a one year renewal option under the same terms and conditions for each contract.

Whereupon, the meeting was adjourned.

Secretary

 David Z. Plavin, Director of Aviation Redevelopment Programs
 Martin E. Robins, Director of Planning and Development
 Morris Sloane, Director of Aviation Operations
 Victor T. Strom, Director of Public Safety
 Joseph L. Vanacore, Assistant Executive Director/Capital Programs
 Barry Weintrob, Chief Financial Officer
 Kristina E. Weisenstein, Administrative Assistant to the Executive Director
 Marvin E. Weiss, Director, Office of Minority Business Development

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of September 10, 1987. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey has expired.

The Secretary reported that in the September 10, 1987 Minutes Pages 494(a) and 494(b) should be inserted following Page 494.

Whereupon, the Board unanimously approved these Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on October 8, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meetings on October 8, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on October 8, 1987, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on October 8, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 10/8/87)

**Kennedy International Airport - Retention of Program
Management Support Services and Program Architect for
the JFK Redevelopment Program**

Over the past year, an interdepartmental group established by the Director of Aviation has made recommendations concerning the type of organization best suited to successfully undertake the JFK Redevelopment Program. It was assumed that large amounts of the work would be performed by outside services. The group recommended that the Port Authority maintain control and direction of the work through a nucleus of Port Authority staff. Currently this nucleus organizational framework is in place. It consists of a Program Director, an Assistant Program Director for Administration and three senior Assistant Program Directors (Planning, Design and Construction) to provide direction and management oversight to the total JFK Redevelopment Program effort. At this time it is envisioned that the nucleus team, with the assistance of several senior level Port Authority staff members and advice from other departments, will provide the necessary overall direction and broad management coordination required. Under the direction of the executive team, the routine general coordination and management of the major functional areas will be performed by the professional firms for which this authorization is sought and also other such firms as appropriate. In addition, it is anticipated that most professional services in connection with planning and design of the program and construction supervision will be provided by outside services.

To implement the project plan and to advance the project, it is necessary to retain the Program Management Support Services firm of O'Brien-Kreitzberg & Associates, Inc. and I.M. Pei and Partners now so that work in the management support and architectural areas, preceding development of contract documents and construction, can begin.

The Program Management Support Services firm will perform the services required to assure the timely completion of all aspects of the program. This will include identification and analysis of options and formulation of recommendations. The program management function will provide management and coordination of the planning, design, procurement and construction management of each of the required tasks. The Program Management Support Services firm, in concert with the Port Authority, will develop a program master plan which defines all time, cost and resource relationships, and a cost control system compatible with the Port Authority system. A Critical Path Method program schedule will be developed which identifies significant milestones, resources required and cost parameters.

The Program Architect, I.M. Pei and Partners, will perform professional services related to the development of the preliminary functional plan for all elements of the JFK Redevelopment Program, including review and approval of detailed functional plans and schematic design and review of the preliminary design. It is anticipated that one or more professional engineering firms will be retained separately to provide the engineering services required for the conceptual design and to prepare the preliminary and final design for the program. Pei will monitor the contract document development and construction for conformance to the architectural master plan and will develop a master security plan and monitor its implementation.

(Board - 10/8/87)

On various dates in July 1987, a notice of a request for qualifications for firms interested in providing program management support services was placed in regional newspapers and national technical magazines. On August 14, 1987, thirteen qualification statements were received. Based on this submission, four firms were selected by a multi-department review board to receive requests for proposals which were then received on September 28, 1987. After review of the proposals and interviews with the responders during the week of October 1, O'Brien-Kreitzberg & Associates, Inc. was selected to provide program management support services.

In October 1984, PRC Engineering, in association with I.M. Pei and Partners, the proposed Program Architect, was retained in accordance with the authorization of the Board at its meeting on September 13, 1984 to develop a conceptual plan for the reconstruction of the Central Terminal Area at JFK. The plan was completed in January 1986. During the fifteen months spent in developing the conceptual plan, I.M. Pei, who enjoys a world wide reputation for outstanding design, became familiar with the airport and its redevelopment needs. Pei, in association with PRC, developed a conceptual solution to the problem that was reviewed by an interdepartmental value planning analysis team and a "constructibility" consultant and was found to meet project objectives and to be buildable. The concept has received wide circulation and has been favorably received by most members of the airport community. To ensure successful implementation of this concept, staff has recommended that I.M. Pei and Partners be retained to complete development of the design concept that the firm had already begun and is familiar with, and to ensure the approved program concept is successfully executed.

Both contracts will provide for compensation based on actual salaries paid (time card), plus multiplier, plus out-of-pocket expenses and will contain an MBE participation requirement that each firm make every good faith effort to meet an overall total goal of at least 15% Minority Business Enterprise and Women's Business Enterprise participation of which at least 10% must be Minority Business Enterprises.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to:

1. enter into an agreement with O'Brien-Kreitzberg & Associates, Inc. to perform professional services in connection with Program Management Support Services for the JFK Redevelopment Program; and
2. enter into an agreement with I.M. Pei and Partners, New York, New York, to perform professional services as the Program Architect; and it is further

RESOLVED, that the form of the agreements shall be subject to the approval of General Counsel or his authorized representative.

La Guardia Airport - Central Terminal Building and Roadway Expansion and Modernization

The Central Terminal Building (CTB) was originally designed to handle eight million passengers whereas in 1986 over sixteen million passengers used this facility. The existing departure level roadway is experiencing severe congestion which is causing vehicles to back up to the Grand Central Parkway during rush hours. The arrivals level of the building has inadequate baggage claim area circulation space for passengers as well as inadequate counter spaces for ground transportation and related functions.

In order to accommodate current and projected passenger demands, and to provide a higher level of service, it was determined that a major expansion of the CTB roadway and expansion of the arrival level area were required. Several alternatives to accommodate the forecast demand were investigated by Aviation staff in conjunction with Tibbets, Abbett, McCarthy & Stratton (TAMS), and a decision was reached to expand the departure level roadway to double its present capacity, which in turn would allow lateral expansion of the arrivals level area of the building by approximately 55 feet. (At its meeting on December 11, 1986 the Board authorized the retention of TAMS to develop design documents for expansion and modernization of the CTB at a cost not to exceed \$2.3 million, of which \$500,000 was designated for the direct entrance to the parking garage). The project will require the relocation of the arrivals level roadway and of the existing underground utility lines to accommodate construction of the new departure level roadway.

The project provides for the construction of a new elevated three-lane departure level roadway parallel to the existing departure roadway, and construction of a new parallel curb frontage. The space created under this new departure frontage roadway will be used to expand the arrivals level of the terminal building. The 55-foot-wide expansion of the CTB will create additional space for passenger circulation and for the provision of service in the baggage make-up area, around the ground transportation counters and outside of the baggage claim area.

The expansion of the building would also require the relocation of the existing arrivals level roadways in a southerly direction and the relocation of the main electrical feeder systems and communication duct bank, as well as the gas main, sewer lines and small portions of the high and low pressure water lines. The relocation of the utility lines is required to permit construction of the new departures level roadway and the arrivals level building expansion.

Contracts awarded under this project will provide that awardees use every good faith effort to meet a goal of 10% participation by firms owned and controlled by minorities and 1% participation for firms owned and controlled by women.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize:

1. a project for the expansion and modernization of the LaGuardia Airport Central Terminal Area and Building (CTB) which includes the following components:

- (a) departures level roadway expansion;
- (b) arrivals level roadway relocation;
- (c) arrivals level building expansion; and
- (d) relocation of electrical and communication utility lines;

at a total project cost of \$73 million, including payments to contractors of \$50.4 million and an allowance for extra work, and project contingency, administrative, engineering, and financing expenses;

2. the Executive Director (a) to take such action with respect to award of purchase or construction contracts for the foregoing project as he deems in the best interest of the Port Authority, including without limitation award to the lowest bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable, rejection of all bids, solicitation of new bids on revised or the same requirements, or negotiation with one or more bidders or other contractors; and (b) to execute contracts and supplemental agreements with such bidders or contractors as he deems in the best interest of the Port Authority and to order extra work up to 10% of the price of each contract and supplemental agreement and to order net cost work; provided, however, that in no event shall the total of the contract payments under said contracts exceed the total amount of the contract payments and project contingency included in the foregoing project; the form of the contracts to be subject to the approval of General Counsel or his authorized representative; and

3. an increase in the maximum compensation to the professional engineering firm of Tibbetts, Abbett, McCarthy & Stratton (TAMS) for their portion of the design of the CTB modernization and improvement project, from \$1.8 million to \$3.0 million, to reflect substantial increases in project scope.

(Board - 10/8/87)

Newark International Airport - Taxi Dispatcher Service -
Contract Award

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to award the contract titled Taxi Dispatcher Service at Newark International Airport to Tri-Way Security & Escort Service, Inc., the lowest qualified bidder from a select list at its estimated total contract price of \$687,602 for an estimated 55,500 hours of taxi dispatcher service per year. The contract provides for a one-year term effective October 26, 1987 with provision to extend for three additional one-year periods, on mutual agreement of the parties, and to adjust the contract price for each extension year on the basis of changes in the Consumer Price Index. It was further recommended that the Board authorize the Director of Aviation, at his discretion, to order additional services by the contractor during the initial contract year and during each extension year, if any, up to 15% of the total estimated contract price for each year, based upon the aforesaid number of hours of service.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to award the contract titled Taxi Dispatcher Service at Newark International Airport to Tri-Way Security & Escort Service, Inc., substantially in accordance with the terms set forth above; and it is further

RESOLVED, that the Director of General Services is authorized, for and on behalf of the Port Authority, at her discretion, and subject to mutual agreement of the parties, to extend the contract for three additional one-year periods with price adjustments as provided in the contract; and it is further

RESOLVED, that the Director of Aviation is hereby authorized, for and on behalf of the Port Authority, to order additional services by the contractor up to 15% of the total estimated contract price in the initial contract year and for each extension period; and it is further

RESOLVED that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 10/8/87)

**Newark International Airport - Terminals A and B Host
Services of New York, Inc. - Revisions to Lease AN-684**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement amending Lease AN-684, which covers the operation of food and beverage facilities in Terminals A and B at Newark International Airport. The amendment would provide for the renovation and expansion of the food and beverage facilities in Terminals A and B at a cost of approximately \$3.93 million, including the conversion of the single line cafeterias in the Main Concourse to a concept of multiple serving stations providing different kinds of food and beverages at each station, and the rehabilitation of the food and beverage facilities in the satellites at Terminals A and B, which have not been improved since they were opened in 1973. The Port Authority will continue to have the right to terminate the letting at any time, without cause, on 30 days' written notice to the lessee, and in such event the lessee would be reimbursed for the unamortized portion of the cost incurred for the renovation and expansion of the food and beverage facilities in Terminals A and B to the extent such cost does not initially exceed \$3.93 million. Reimbursement obligations previously incurred by the Port Authority under the lease will not be affected by the agreement.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into an amendment to Lease AN-684 with Host Services of New York, Inc. substantially in accordance with the terms and conditions set forth above, the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 10/8/87)

**George Washington Bridge Bus Station - General Cleaning
Services - Contract PSE-482**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to award Contract PSE-482, George Washington Bridge Bus Station, General Cleaning, to Ogden Allied Building & Airport Services, Inc., the lowest qualified bidder as determined by public bid, for a two-year term commencing on or about December 15, 1987 at its bid price of \$1,250,881 with the Port Authority to have the right to extend the contract for one additional two-year period with the contract price during the extension period being subject to adjustment based upon mutually agreed upon increases related to labor and materials required to provide cleaning services during the extension period, as verified by audit.

It was also recommended that the Director of General Services be authorized to extend the contract for one additional two-year period as provided in the contract without further approval of the Board or any Committee, and that the Director of Tunnels, Bridges & Terminals be authorized to order extra work during the initial two-year period and during the extension period in an amount not to exceed 10% of the contract price for each such period.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, for and on behalf of the Port Authority, is hereby authorized to award Contract PSE-482, George Washington Bridge Bus Station, General Cleaning, to Ogden Allied Building & Airport Services, Inc. for an initial two-year term effective on or about December 15, 1987 at its bid price of \$1,250,881; the Director of Tunnels, Bridges & Terminals, at his discretion, is hereby authorized to order extra work under the contract during the initial two-year term thereof in an amount not to exceed 10% of the contract price for such period; the Director of General Services is hereby authorized to extend the contract for one additional two-year period, and the Director of Tunnels, Bridges & Terminals is hereby authorized to order extra work during the extension period in an amount not to exceed 10% of the contract price agreed upon for such extension period, the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 10/8/87)

**Regional Development Facility - The Columbia Biotechnology
Research Center - Port Authority Participation**

The New York Governor's Office has requested that the Port Authority undertake a regional development project in New York involving an amount not to exceed \$8.1 million of the construction of a building to house the Columbia University Biotechnology Research Center (the "regional development project"), with such amount to be allocated against moneys to be made available for such purposes in accordance with the June 1983 agreement of the Governor of the State of New York and the Governor of the State of New Jersey.

The Columbia University Biotechnical Research Center, in its first phase, is expected to consist of a research and development building for biotechnology uses and is to be approximately 110,000 square feet in size, with approximately 40% of the space expected to be dedicated to incubator use. The Center, which will be located on West 165th Street in Manhattan, New York, is to be constructed by Columbia University ("Columbia") pursuant to an arrangement with the New York State Urban Development Corporation ("UDC") and the New York City Public Development Corporation ("PDC"). The project is expected to cost \$22.1 million. Columbia will act as the developer while also adding to the financial participation of PDC, the City of New York (the "City") and the Port Authority (through UDC).

The regional development project would constitute a portion of the Regional Development Facility and, would, subject to any necessary or appropriate approvals or authorizations, be undertaken as a Port Authority industrial development project. As such, among other matters, an amendment to the master plan adopted on July 12, 1979, as amended, setting forth potential urban industrial park sites (the "Master Plan") to include the regional development project, and a municipal agreement with the City with respect to certain aspects of the regional development projects, including payments in lieu of taxes and applicability of local laws, would be required. Additionally, an agreement between the Port Authority and UDC (and other parties as necessary) will be required in connection with the Port Authority's undertaking of the regional development project. An amendment to the Master Plan, more fully describing the site and the project, therefore, is being prepared and will be submitted to the Committee on Port Planning for adoption.

With authorization of this regional development project, \$64,729,000 will remain available for regional development projects in the State of New York to be undertaken by the Port Authority from moneys to be made available in accordance with the Governors' June 1983 agreement.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Committee on Port Planning be and it hereby is authorized to: (1) adopt an amendment to the master plan adopted on July 12, 1979, as amended, setting forth potential urban industrial park sites, to include therein a site at West 165th Street, Manhattan, New York for the Columbia University Biotechnology Research Center (the "Center") and (2) authorize the Executive Director to enter into appropriate agreements with Columbia University, the New York State Urban Development Corporation, the City of New York, and the New York City Public Development Corporation or such other necessary or desirable parties in connection with Port Authority

(Board - 10/8/87)

effectuation of a regional development project, including provision, from funds to be made available for New York projects pursuant to the Governors' June 1983 agreement, for an amount not to exceed \$8.1 million of the construction of the Center, which shall constitute a portion of the Port Authority's Regional Development Facility, such agreements to include an agreement with the City of New York containing appropriate provisions with respect to payments in lieu of taxes and the applicability of any New York City laws, resolutions, ordinances, rules and regulations to this regional development project; and it is further

RESOLVED, that the form of each of such foregoing agreements shall be subject to approval of General Counsel or his designated representative.

(Board - 10/8/87)

Port Authority Industrial Park at Elizabeth - Contract of Sale with IKEA Property, Inc.

The Port Authority has received from IKEA Property, Inc. ("IKEA"), an offer to purchase an approximately 21.25 acre parcel shown as part of Tax Account No. 1-1440 on the Tax map of the City of Elizabeth, New Jersey and more particularly described and shown on a map designated EMT-S1-NJ, dated October 1, 1987. The Port Authority originally leased this property from the Central Railroad of New Jersey ("CNJ") during 1971 and 1972 and subsequently acquired it from Central Jersey Industries, Inc., successor to CNJ, pursuant to authorization of the Board at its meeting on February 14, 1980. No future use of the parcel for Port Authority use is contemplated and its sale as surplus property has been recommended by staff.

The proposed purchase price for the premises is \$3,718,750 and IKEA as purchaser will make a down payment to the Port Authority of 10% (\$371,875) upon signing of the contract of sale. IKEA will pay the balance of the purchase price, less a binder fee of \$50,000 previously paid to the Port Authority, at closing.

IKEA will be granted (and will pay to the Port Authority a fee or charge with respect to) an access easement between the property to be conveyed to IKEA and North Avenue East, a public street, and IKEA will be given the right to connect to utilities located on Port Authority property. The Port Authority will retain an access easement to enter upon and cross the property to be conveyed to IKEA to allow the Port Authority access to its drainage ditch, security fence and monitoring wells.

The Port Authority will be required, for a period not to exceed 20 years, to perform clean-up of existing site conditions as identified in all data generated and provided to New Jersey Department of Environmental Protection ("NJDEP") as of the date the property is conveyed to IKEA if so mandated by an appropriate regulatory agency or by court order up to a maximum cost of \$30 million. This responsibility would include performance of repairs by the Port Authority or reimbursement of costs incurred by IKEA due to damage to any improvement located on the property. The Port Authority's obligation will obtain only as long as IKEA retains ownership of the premises except that in case of initial third party financing, it shall extend to transferees of the lender (on foreclosure) so long as such transferees do not create any greater environmental risk on the premises. There will be no indemnification by the Port Authority of IKEA for its own or for third-party claims arising out of IKEA's occupancy of this site. Closing of title will be contingent upon the Port Authority's obtaining a letter of non-applicability from NJDEP with respect to the State's Environmental Cleanup Responsibility Act ("ECRA") and IKEA's securing of NJDEP's necessary permits.

IKEA is a subsidiary of IKEA Holding Overseas B.V., a 30-year-old firm with distribution outlets in seventeen countries throughout Europe and Canada. IKEA will be expected to construct a 275,000 square foot warehouse-type building on the premises to be used as its flagship distribution center and retail store for the metropolitan New York area. IKEA intends to operate this facility seven days a week with a staff of 250-300 employees commencing in the spring of 1989. The anticipated IKEA investment in this facility is approximately \$27 million. This project has the support of the City of Elizabeth and New Jersey Department of Commerce. The Port Department is currently working with IKEA on supplying three metropolitan area stores planned by IKEA through Port Elizabeth, which could generate 2,000-3,000 containers annually through the Port.

(Board - 10/8/87)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board

1. finds and determines that the parcel of real property hereafter described consisting of approximately 21.25 acres in the City of Elizabeth, County of Union and State of New Jersey, which was heretofore acquired by the Port Authority pursuant to its powers and authority, is no longer required for the purposes for which it was acquired;

All that lot, piece or parcel of land situated, lying and being in the City of Elizabeth, County of Union, State of New Jersey, which is bounded and described as follows:

Beginning at a point which is distant 1,618.04 feet measured northerly at right angles to the northerly line of North Avenue East (80 feet wide) and 121.00 feet measured easterly at right angles to the centerline of the Newark and Elizabeth Branch of the Central Railroad of New Jersey (now ConRail) and running:

1. N27°-29'-59"E 114.30 feet parallel with the aforesaid centerline of the Railroad to a point; thence

2. S62°-30'-01"E 5.00 feet parallel with the northerly line of North Avenue East to a point; thence

3. N27°-29'-59"E 2.00 feet parallel with the aforesaid centerline of the Railroad to a point; thence

4. N62°-30'-01"W 5.00 feet parallel with the northerly line of North Avenue East to a point; thence

5. N27°-29'-59"E 1568.00 feet parallel with the aforesaid centerline of the Railroad to a point; thence

6. S62°-30'-01"E 550.00 feet parallel with the northerly line of North Avenue East to a point; thence

7. S27°-29'-59"W 1,110.00 feet parallel with the centerline of the Railroad to a point; thence

8. N62°-30'-01"W 20.00 feet parallel with the northerly line of North Avenue East to a point; thence

9. S27°-29'-59"W 35.00 feet parallel with the centerline of the Railroad to a point; thence

10. S62°-30'-01"W 20.00 feet parallel with the northerly line of North Avenue East to a point; thence

11. S27°-29'-59"W 539.30 feet parallel with the centerline of the Railroad to a point; thence

12. N62°-30'-01"W 550.00 feet parallel with the northerly line of North Avenue East to the point and place of beginning.

(Board - 10/8/87)

All bearing set forth herein are in the New Jersey State Plane Coordinate System. Being part of a parcel of land acquired by The Port Authority of New York and New Jersey by Deed from Central Jersey Industries, Inc. dated March 4, 1980 and recorded on March 26, 1980 in the Office of the Union County Register in Book 3216, Page 412;

2. authorizes the Executive Director to enter into a contract to sell to IKEA Property, Inc., the above described parcel at the purchase price of \$3,718,750, together with and subject to continuing access easements between the parties and obligating the Port Authority to perform limited environmental clean-up on the site at a cost not to exceed \$30 million; and further authorizes the Executive Director to thereafter execute a deed of conveyance for said property;

3. authorizes that a map, designated EMT-S1-NJ, dated October 1, 1987, showing and describing the above described parcel be filed in the Office of the Secretary of the Port Authority, and directs the Chief Engineer of the Port Authority to execute a certificate to be annexed to said map stating the the real property shown on said map is no longer required for the purposes for which it was originally acquired; and

4. requires that all documents necessary to accomplish the aforesaid transaction be subject to approval as to form by General Counsel or his duly authorized representative.

(Board - 10/8/87)

**The World Trade Center - Contract WTC-399.01 - North and
South Tower Buildings and Below Grade Areas -
Maintenance Agreement - Elevators and Escalators -
Increase in Extra Work Authorization**

At its meeting on November 18, 1966, the Board authorized the award of Contract WTC-399.01, a five-year maintenance agreement, to Otis Elevator Company, a subsidiary of United Technologies, Inc., at an amount of \$665,000 exclusive of labor and material escalation. Subsequent Board, Committee and Executive Director authorizations extended the term of the agreement to fifteen years, from May 1978 until May 1993, and provided for extra work authorization in an amount equal to 10% of the annual escalated maintenance cost.

An increase in the extra work authorizations for 1986 and 1987 is necessary for the following reasons:

1. Increased repairs required due to vandalism to elevators and escalators.
2. In order to minimize inconvenience to tenants and patrons and to make more elevators available for service during regular business hours, more routine maintenance and repair work is being performed at the Port Authority's request during overtime hours. Under this arrangement, the Port Authority pays for this additional cost.
3. Participation by Otis in fire safety inspections not included in the maintenance agreement.
4. A major portion of the increase for 1987, \$80,000, is required to perform work for Dean Witter Reynolds, a major tenant in Two World Center. This amount, with appropriate overheads, is reimbursable from Dean Witter Reynolds.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that an increase in the extra work authorization under Contract WTC-399.01, Maintenance Agreement, Elevators and Escalators, from an amount of \$267,537 to an amount of \$307,537 for 1986 and from an amount of \$279,132 to an amount of \$415,132 for 1987 is authorized.

(Board - 10/8/87)

**The World Trade Center - Contract WTC-499.93 - Commodities
Exchange Center Ceiling - Award**

As a result of structural integrity surveys, it was determined that structural integrity enhancements are necessary in the Commodities Exchange Center in Four World Trade Center.

Contract WTC-499.93 provides for the furnishing and installation of hangers to re-support the existing Commodity Exchange Center's plaster ceiling over its trading floor.

Payment to the contractor under the contract will be on the basis of the actual material and labor costs, plus a fixed percentage for overhead and profit.

Proposals in relation to the fixed percentage for overhead and profit were solicited from a select list of six general contracting firms and are presently expected to be received on or about October 15, 1987.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract WTC-499.93, Commodities Exchange Center Ceiling to the lowest qualified contractor, who in his opinion is qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price the Executive Director deems reasonable, or to reject all proposals and negotiate with the lowest qualified contractor.

Whereupon, the meeting was adjourned.

The meeting was called to order by the Chairman.

The Secretary reported that the meeting was duly called in accordance with the By-Laws.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its special meeting on October 30, 1987, and the report was received.

(Board - 10/30/87)

**Imported Automobile Marine Terminal - Greenville - Lease
with BMW of North America, Inc.**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease with BMW of North America, Inc. at Greenville, Jersey City, New Jersey covering approximately 15.8 acres of vacant land for the construction and operation of a regional vehicle preparation center and a multi-level storage garage for an initial term commencing on the execution of the lease by the Port Authority and expiring on the day preceding the thirtieth anniversary of the date payment of rental commences. Rental is expected to commence no later than October 1, 1988, subject to postponement if at such time the Port Authority has not completed its obligation to construct the infrastructure which will enable the tenant to commence operations, including the construction of a berth, paved access from the berth to the premises, water, sewer, and storm drainage lines, and berth and channel dredging. The Port Authority will be required to maintain this infrastructure for the duration of the lease. The tenant will construct and install its own leasehold improvements and equipment. The Port Authority will pay an amount not to exceed \$15 million toward the cost of this work. The tenant will pay a land rental at the rate of approximately \$395,000 per year subject to escalation and will pay dockage and wharfage charges on at least 30,000 cars each year at the rate of \$7.25 per car subject to escalation. The tenant will be entitled to a credit against its land rental obligations in an amount not to exceed \$100,000 toward the cost of clearing the site of debris and vegetation. In addition the tenant will also be entitled to a credit against the dockage and wharfage rate for each car in excess of 40,000 vehicles discharged to the Facility and 50% for each car in excess of 45,000 vehicles discharged to the Facility. The tenant will also pay a facility rental over a 30-year period in an amount sufficient to recover the amount paid by the Port Authority to the tenant for improvements.

The lease will provide the tenant with the right of assignment so long as the assignee meets certain criteria as determined by the Port Authority including financial responsibility and integrity and will use the premises for an eligible marine terminal purpose. Upon such assignment the tenant will be relieved of its obligations under the lease. The tenant will also have the right to extend the term of the lease for an additional fifteen-year period at market rentals.

If the tenant shows the Port Authority prior to December 31, 1987 that environmental cleanup is required, the Port Authority will be obligated to perform environmental cleanup work on the site at a cost not to exceed \$750,000, an amount which, if expended, would not impair the financial integrity of the project. If the estimated cost of such cleanup exceeds that amount, the Port Authority may terminate the lease.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into a lease with BMW of North America, Inc. substantially in accordance with the terms and conditions set forth above, the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 10/30/87)

**Passenger Ship Terminal - Pier 40 - Repair of Piles -
Approval of Award of Contract PST-110.012 - and
Authorization of Supplemental Agreement No. 1**

The existing steel piles, which support Pier 40 at the Passenger Ship Terminal, have seriously deteriorated. Repairs are deemed critical by staff to prevent further deterioration of the pier and to protect public safety.

Pier 40 is approximately 640,000 square feet in area and was constructed by New York City around 1960; the Port Authority leased Pier 40 and additional piers for the Passenger Ship Terminal from the City in the early 1970's. The area occupied by Pier 40, except for the Port Authority's interest, was acquired by New York State in a condemnation proceeding in 1981. The structure consists generally of a concrete deck supported on roughly 3,600 steel piles. In 1984, the Port Authority retained Parsons, Brinckerhoff, Quade & Douglas (PBQ&D) to inspect Pier 40, whose findings were noted in PBQ&D's spring 1985 report. As a result of findings of corrosion of certain of the steel piles, the pier's allowable live load was downgraded from 600 pounds per square foot (original design) to 300 pounds per square foot. PBQ&D was again retained to perform a follow-up inspection in 1987. This inspection revealed considerable further corrosion of the steel piles, which resulted in a recommendation from PBQ&D that the pier be closed. Accordingly on August 29, 1987, Pier 40 was effectively closed. Since there was still the danger of possible collapse because of the continued corrosion of the piles, staff deemed it essential that repairs begin immediately.

On September 22, 1987, at the Policy Review meeting in preparation for the October Board Meeting, the Commissioners verbally approved proposed action to be taken by the Chief Engineer for the repair of piles at Pier 40. The Chief Engineer authorized award of a contract for pile repairs to Spearin, Preston & Burrows, Inc. (SPB). SPB has wide experience in this type of construction and had the necessary labor and equipment to begin construction immediately. Repair operations were commenced on September 28, 1987.

On October 8, 1987, at Executive Session for the October Board Meeting, the Commissioners were updated on the status of the pile repairs at Pier 40.

On October 28, 1987, the Executive Director approved the action of the Chief Engineer in awarding Contract PST-110.012 to SPB.

The contractor's compensation under Contract PST-110.012 consists of the net cost of labor, materials, equipment and related expenses required to perform the work, plus a fee as follows:

1. for work performed by the contractor - a fee of 20% (for overhead and profit);
- and
2. for work performed by a subcontractor - a fee of 7% (for the contractor's overhead and profit) plus a separate fee (for the subcontractor's overhead and profit) to be negotiated and subject to the approval of the Chief Engineer.

It is expected that repair of all 3,600 piles will be required. Staff presently estimates the cost of repairing all the piles at Pier 40 at roughly \$5.8 million.

(Board - 10/30/87)

In order to expedite the necessary repairs, various modifications to Contract PST-110.012 are being considered. Supplemental Agreement No. 1, to incorporate any such modifications, may provide for a bonus to the contractor for completion of the work earlier than provided in the contract, a guaranteed maximum price for the work, and a per pile unit price for the work. It is not expected at present that these modifications will increase the contractor's compensation under Contract PST-110.012.

It is presently anticipated that future contracts will be required to provide for restoration of the cathodic protection system and to provide a protective coating for the piles, for which appropriate authorization will be sought as required. Staff presently estimates that this work will cost roughly \$3 million.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the action of the Executive Director in authorizing the award of Contract PST-110.012, Repair of Piles, to Spearin, Preston & Burrows, Inc. is approved; and it is further

RESOLVED, that the Executive Director is authorized, in his discretion, to enter into Supplemental Agreement No. 1 to Contract PST-110.012; and it is further

RESOLVED, that the form of the aforementioned Supplemental Agreement is subject to the approval of General Counsel or his authorized representative.

Whereupon, the meeting was adjourned.

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of October 8, 1987. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey has expired.

Whereupon, the Board unanimously approved these Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on November 12, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on November 12, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on November 12, 1987, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on November 12, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Port Newark - Lease with Jaguar Cars, Inc.

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease with Jaguar Cars, Inc. at Port Newark, covering approximately 115,090 square feet in Building 139 and 148, 104 square feet of adjacent open area to be used for the preparation and storage of cars prior to dealer delivery. The term of the lease would be for approximately two years, commencing on or about January 1, 1988. The tenant would pay a rental at the rate of \$253,588 per year, and it is anticipated that the tenant will invest approximately \$60,000 in leasehold improvements.

Jaguar Cars, Inc. is an American subsidiary of Jaguar Company Ltd., a British luxury automobile manufacturer which imports approximately 26,000 cars to the United States annually. Recently Jaguar Cars, Inc. decided to process its vehicles through its own facility. The tenant will lease the subject space as an interim location while it is in the process of planning a new vehicle preparation center. Staff is currently working with Jaguar to identify a site within the Port District for its permanent location. The lease will provide the tenant with the right to terminate the letting on 90 days' prior written notice in the event an agreement for a permanent location within the Port District is reached with the Port Authority.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into a lease with Jaguar Cars, Inc. at Port Newark substantially in accordance with the terms outlined above, the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 11/12/87)

**Brooklyn - Port Authority Marine Terminal - Lease with All
Marine Surveys, Ltd.**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease with All Marine Surveys, Ltd., covering the berthing of ships assigned to the Joint Maritime Administration Naval Ready Reserve Force Program at Pier 6, Brooklyn-Port Authority Marine Terminal, for a term of approximately three years and three months commencing December 1, 1987. The tenant will pay a rental at the rate of \$400,000 per year, subject to annual escalation. The tenant will construct electrical improvements to the Facility at a cost of approximately \$200,000.

The lease will provide the Port Authority with the right to terminate the letting on each anniversary of the commencement date upon 90 days' prior written notice. The tenant will have the right to terminate the letting on each anniversary upon 30 days' prior written notice to the Port Authority.

All Marine Surveys, Ltd. is a civilian pier agent which successfully bid for a contract awarded by the Navy/Maritime Administration to locate and secure berths for the ships of the Ready Reserve Force. The Port Authority, by entering into this lease, will continue to provide berthing for the only ships of the Ready Reserve Force within the Port of New York/New Jersey, while achieving current rental rates for the leased berths.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, is hereby authorized for and on behalf of the Port Authority, to enter into a lease with All Marine Surveys, Ltd. at the Brooklyn-Port Authority Marine Terminal, substantially in accordance with the terms and conditions outlined above, the form of the agreement to be subject to the approval of the General Counsel or his designated representative.

**Freight Services Improvement Conference - Continuation of
Port Authority Participation - Agreement with the States
of New York and New Jersey**

The Board, at its meeting on March 12, 1981, authorized the Executive Director to enter into an agreement with New York and New Jersey which created the Freight Services Improvement Conference (FSIC). The FSIC is a public/private sector research, planning and advocacy organization for improved freight transportation in the New York/New Jersey region. The FSIC was mandated to identify problems experienced by the region's truck, rail, air and marine sectors and to advocate and organize support for alleviating those problems. It is jointly funded and staffed by its three sponsoring agencies and receives overall direction from a steering committee comprised of an Assistant Commissioner of Transportation from each state and the Director of Planning and Development of the Port Authority. The most recent in a series of Board authorizations to continue the Port Authority's participation occurred at the December 11, 1986 meeting when the Board authorized \$344,000 for FSIC expenses through June 30, 1987.

New York State and New Jersey will contribute \$87,500 and \$67,500 respectively for the period from July 1, 1987 through June 30, 1988. The Port Authority's share of the expenses is estimated at \$369,500, which will be used for personal services for a total of four full-time employees, and materials and services in support of the FSIC work program.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into a new agreement with the States of New York and New Jersey under which the Port Authority will continue its participation in the Freight Services Improvement Conference for the period July 1, 1987 to June 30, 1988 at a total estimated cost of \$369,500; and it is further

RESOLVED, that the Executive Director is authorized to enter into additional new agreements with the States of New York and New Jersey or to amend the new agreement to continue the Port Authority's participation in the Freight Services Improvement Conference at amounts to be provided in the annual budget; and it is further

RESOLVED, that the form of the foregoing agreements are subject to the approval of General Counsel or his authorized representative.

Port Authority Industrial Park at Yonkers - Award of Contracts

The Board has authorized a project for the development of an Industrial Park at Yonkers at a total estimated project cost of \$51 million. Following evaluation of the condition of buildings at the park site, improvements to the facility were recommended in order to provide code-conforming life, health and safety, and property protective measures, to upgrade the aged and poorly maintained systems and structures and to introduce a series of operational improvements which would make the Industrial Park more efficient and more marketable.

Contract YIP-240.022 provides for the replacement and upgrading of existing electrical distribution equipment and electrical cable which brings power from the Central Power Plant (Building 5) to Buildings 1, 2 and 4 and for related mechanical and general construction.

The contract also provides for upgrading the grounding system including providing additional ground rods and making additional connections to the buildings' structural steel, all on a net cost basis presently estimated at roughly \$10,000.

The contract requires 20% Minority Business Enterprise participation and 5% Women's Business Enterprise participation in the work of the contract.

Bids were solicited by public advertisement. The low bid was submitted by Cucinell Electric Co. Inc., which was determined to be qualified to perform the work by the Chief Engineer.

The remaining contracts for the project provide for the completion of the remaining improvements necessary to the development of the Industrial Park as authorized by the Board.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract YIP-240.022 to Cucinell Electric Co. Inc., the low bidder, in the amount of \$1,277,000, to order extra work up to the amount of \$130,000 and to order net cost work; and it is further

RESOLVED, that the Executive Director is authorized to take such action with respect to the award of the remaining purchase or construction contracts for the Port Authority Industrial Park at Yonkers project as he deems in the best interest of the Port Authority including without limitation; (a) award to the lowest bidder, who in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable; (b) rejection of all bids; (c) solicitation of new bids on the basis of revised requirements or the same requirements; and (d) negotiation with one or more bidders or other contractors; and to execute contracts and supplemental agreements with such bidders or contractors as he deems in the best interest of the Port Authority and to order extra work and net cost work; provided, however, that in no event shall the total amount of the contract payments under said contracts exceed the total amount of the contract payments included in the foregoing project; and it is further

RESOLVED, that the form of all contracts and supplemental agreements in connection with the foregoing project is subject to the approval of General Counsel or his authorized representative.

**The World Trade Center - One and Two World Trade Center
Lobbies/Mezzanines - Change in Limits of Counter
Occupancies**

A request has been received for permission to install three additional counters in the lobby of One World Trade Center, which would increase occupancy of counters to 5.8% of the net floor area. The existing counters in the lobby of One World Trade Center occupy 5% of the net floor area, consistent with the New York City Building Code, which limits such occupancies to 5% of the net floor area. The counters in Two World Trade Center occupy less than 5% of the net floor area.

In addition to satisfying the current request for the installation of additional counters in the lobby of One World Trade Center, an increase to 10% in the limit of lobby and mezzanine space that can be used for counter occupancy would permit optimum use of lobby space for services to building occupants as well as more productive use of mezzanine space.

Staff has performed a life safety analysis for the lobbies of One and Two World Trade Center and has concluded that the vast size of the lobbies in conjunction with existing safety conditions, facilities and procedures ensure that the present level of protection of egress will not be diminished by an increase of counter occupancies of up to 10% of the net floor area.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes an increase from 5% to 10% in the limit of the net floor area of each of the lobbies/mezzanines of One and Two World Trade Center that can be used for the installation of counters or similar occupancies.

The World Trade Center - Contract WTC-137 - Maintenance Painting - Award

Contract WTC-137 requires the contractor to furnish materials and labor to tape and spackle, paint, and install wall covering as required to interior walls, ceilings, doors, stairwells, etc., for the Port Authority and tenants for One and Two World Trade Center, the Northeast and Southeast Plaza Buildings and Below Grade area.

The term of the contract is two years commencing January 1, 1988, with Port Authority options to extend the term for two additional two-year periods. If the Port Authority elects to exercise its option(s) to extend this contract, escalation would be applied to Classified Work in accordance with the applicable Chemical and Allied Product Index and changes in the Straight Time Hourly Labor Cost pursuant to union agreement.

Staff solicited the interest and reviewed the qualifications of sixteen minority contractors identified from the Office of Minority Business Development's list of Minority Business Enterprise painting contractors. Fine Painting & Decorating Co., Inc. was determined to be the only contractor qualified by reason of responsibility, experience and capacity to perform this contract.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract WTC-137-Maintenance Painting to Fine Painting & Decorating Co., Inc., of Orange, New Jersey, a minority contractor, at its bid price in the estimated total amount of \$1,924,580 exclusive of escalation; and it is further

RESOLVED, that the Executive Director is authorized, in his discretion, to exercise the Port Authority's options to extend the term of the contract for two additional two-year periods; and it is further

RESOLVED, that the form of the foregoing exercise of option(s) is subject to the approval of General Counsel or his authorized representative.

The Teleport - Lease Agreement with Telehouse International Corporation of America

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into negotiations with TELEHOUSE International Corporation of America on a lease agreement initially covering approximately nine acres of land at the Teleport for an initial term of approximately 36 years for the construction and operation of a speculative data center/office building, containing approximately 160,000 square feet, with the Tenant to have the right during a period which will expire on or about October 31, 1990, to lease an additional approximately seven acres to expand the data center/office building by approximately 140,000 square feet; and that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease with TELEHOUSE International Corporation of America based on such negotiations.

The arrangement agreed to contemplates an annual site rental at the rate of approximately \$620,000 per year plus a basic operating expense rental at the rate of approximately \$310,000 per year. In addition, the Tenant will also pay additional operating expenses rental based upon its proportionate share of the actual increases of common Teleport operation and maintenance expenses. Unless additional capital investments are made by the Port Authority for Teleport infrastructure improvements, the site rental will be discontinued at the conclusion of the thirtieth anniversary of the lease. The Tenant will have the right to transfer, assign or sublet the premises to third parties and to mortgage the leasehold. Among the other matters to be included in the agreement will be the extent of the Port Authority's site preparation obligations, if any. Electricity will be provided at a rate equivalent to 115% of the Port Authority's direct expenses in connection with the purchase of such power.

The material terms of any arrangement finally agreed to would be subject to approval by the Mayor of the City of New York in accordance with the applicable provisions of the City's Lease with the Port Authority.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into negotiations with TELEHOUSE International Corporation of America on a lease agreement initially covering approximately nine acres of land at the Teleport, and to enter into a lease based thereon, substantially in accordance with the terms and conditions outlined above, the form of agreement finally agreed upon to be subject to the approval of General Counsel or his designated representative.

(Board - 11/12/87)

Kennedy International Airport - Central Heating and Refrigeration Plant - Replacement of Absorption Chillers - Project Authorization

In order to ensure that sufficient cooling capacity is available from the Central Heating and Refrigeration Plant, which supplies chilled water to buildings in the Central Terminal Area unit terminals at Kennedy International Airport, it is necessary to begin a program to replace the existing absorption chillers. The chillers are between 20 and 30 years old and are approaching the end of their useful lives. The earliest time that new units could come on line is the summer of 1989 cooling season, since a long lead time is required for fabrication of the units.

The Port Authority plans to purchase three electric driven centrifugal chillers for installation in the Central Heating and Refrigeration Plant at Kennedy International Airport.

Under separate contract(s), the existing sixteen absorption chillers will be removed, the building will be prepared for the installation of the three new units and associated controls and piping will be installed and substation modifications will be performed.

A portion of the work will include the removal of asbestos insulation. Provision is being made in the contract(s) for the performance of certain modifications that may be required to controls and appurtenances on a net cost basis, presently estimated at roughly \$100,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes: (1) a project at Kennedy International Airport to provide for the purchase and installation of three electric driven centrifugal chillers for the Central Heating and Refrigeration Plant at a total expenditure not to exceed \$6.7 million, including payments to contractors, allowances for extra work and net cost work, and engineering, administrative and financing expenses and a project contingency; and (2) the Executive Director to: (a) take such action with respect to award of purchase or construction contracts for the foregoing project as he deems in the best interest of the Port Authority, including without limitation award to the lowest bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable, rejection of all bids, solicitation of new bids on revised or the same requirements, or negotiation with one or more bidders or other contractors; and (b) execute contracts and supplemental agreements with such bidders or contractors as he deems in the best interest of the Port Authority and to order extra work and net cost work in connection with each contract, including supplemental agreements thereto; and it is further

RESOLVED, that the form of said contracts and agreements are to be subject to the approval of General Counsel or his authorized representative.

(Board - 11/12/87)

**Kennedy International Airport - International Arrivals
Building and Wing Buildings Canopies Rehabilitation
Contract JFK-457A - Award**

Contract JFK-457A provides for the rehabilitation of the structural steel members and decking and replacement of the existing roofing, soffits and trim at the International Arrivals Building (IAB) at Kennedy International Airport. It also includes related work involving repairs of canopy drains and replacement of light fixtures.

Contract JFK-457, for reroofing the canopies of the IAB, was bid in late 1984. One bid was received which was significantly higher than the Engineer's Estimate and staff deemed it prudent to reject the bid. The contract was rebid as Contract JFK-457A; but prior to the date for receipt of bids a vehicle struck the canopies, revealing previously hidden deterioration of the structure. Various repair alternates were considered in detail; and ultimately it was decided to perform a general rehabilitation of the canopies, including structural and other repairs in addition to the reroofing provided for originally in Contract JFK-457A.

Contract JFK-457A also provides for Minority Business Enterprise and Women's Business Enterprise good faith participation of 12% and 2% respectively.

In addition, the contract contains Net Cost Work presently estimated at roughly \$200,000 for maintenance of traffic and work area protection and removal and replacement of existing deteriorated steel decking and structural steel in addition to those areas shown.

The contract also provides that a portion of the work will be performed during nighttime hours in order to minimize inconvenience to the public and interference with essential facility operations.

Contract JFK-457A was publicly advertised and bids were received on October 27, 1987. The low bid was submitted by Kornas Construction Corp., which was determined by the Chief Engineer to be qualified to perform the contract.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract JFK-457A, International Arrivals Building, Canopies Rehabilitation to Kornas Construction Corp., the low bidder, at its bid price in the amount of \$1,292,000, to order extra work up to the amount of \$130,000 and to order net cost work.

(Board - 11/12/87)

Kennedy International Airport - Central Heating and Refrigeration Plant - Replacement of Hot Water Generators 2 and 3 - Project Authorization and Award of Purchase and Installation Contracts

As part of an overall program to ensure that sufficient heating and cooling capacity is available at Kennedy International Airport, a program for upgrading and replacement of key elements of the systems at the Central Heating and Refrigeration Plant (CH&RP) was developed. Presently, of the six hot water generators at the Plant, hot water generators 1 and 4 are being replaced and will be available for service in early 1988. Of the four remaining units, hot water generators 2 and 3 have been identified to require replacement in time for the 1988-89 heating season. Due to the long lead time for fabrication (up to seven months), immediate action is needed to ensure the units are available.

It was originally anticipated that an interim maintenance/ rehabilitation program would serve to assure the existing units' continued reliability. However, upon further review of the cost associated with this option, it was deemed by staff to be more cost effective to proceed with immediate replacement of the units.

Under separate contract(s), hot water generators 2 and 3 will be removed, the building will be prepared for installation of the two units and associated controls and piping will be installed. A portion of the work will include the removal of asbestos insulation. Provision is being made in the contract(s) for the performance of certain modifications to controls and appurtenances that may be required, on a net cost basis, presently estimated at roughly \$80,000.

Since the timing of the installation is critical in order to ensure that sufficient plant capacity is available for the 1988/89 heating season, bids for the installation contract will be solicited from a list of contractors who, as determined by the Chief Engineer, have the experience, capability and equipment available to perform the work in a timely manner. The Port Authority will purchase the two hot water generators to be installed.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize: (1) a project at Kennedy International Airport to provide for the purchase and installation of two hot water generators for the Central Heating and Refrigeration Plant (CH&RP) in the Central Terminal Area at a total expenditure not to exceed \$3.9 million, including payment to contractors, allowances for extra work and engineering, administrative and financing expenses and a project contingency; and (2) the Executive Director to: (a) take such action with respect to award of purchase or construction contracts for the foregoing project as he deems in the best interest of the Port Authority, including without limitation award to the lowest bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable, rejection of all bids, solicitation of new bids on revised or the same requirements, or negotiation with one or more bidders or other contractors; and (b) execute contracts and supplemental agreements with such bidders or contractors as he deems in the best interest of the Port Authority and to order extra work and net cost work in connection with each contract including supplemental agreements thereto; and it is further

RESOLVED, that the form of said contracts and agreements to be subject to the approval of General Counsel or his authorized representative.

**Kennedy International Airport - International Arrivals and
Airline Wing Buildings - Operation and Maintenance of
Loading Bridges and Plane Mates and Crew Bus Services -
Award of Contract AYB-856**

The term of the agreement with the current contractor, Servair Maintenance, Inc., for performance of operation and maintenance of Loading Bridges and Plane Mates and providing crew bus services at Kennedy International Airport, expires on January 31, 1988. By award of proposed new Contract AYB-856, continuity will be maintained for critical operation.

Based on experience with the current contract, technical expertise and quality of work performed was emphasized in the preparation of a Request for Proposals. This was done to ensure the availability of quality personnel to staff the maintenance, operations and supervisory functions at wage rates commensurate with those paid by others in the industry. The Request for Proposals was publicly advertised on July 29, August 1, and on August 10, 1987. Requests for Proposals were mailed to six contractors. Four proposals were received on September 25, 1987.

A two-phased evaluation process was used. Proposals were first evaluated on technical content which included the proposer's recommendations for staffing and quality assurance program. Proposed prices were then evaluated and the final contract negotiated. The evaluation team was comprised of members from Aviation, Finance, and General Services Departments, and the airlines were represented by the Director of the Kennedy International Airport Terminal Association (KIATA) who provided input to the process. The evaluation team selected Hudson General Corporation.

Contract AYB-856 will require the contractor to perform operations and maintenance on the passenger Loading Bridges and Plane Mates at the International Arrivals and Airline Wing Buildings and to provide crew bus service for airline crews departing from or arriving at remote aircraft gates. The contract will provide for a three-year term beginning on or about January 11, 1988, subject to termination by the Port Authority on 30 days written notice. The Port Authority will have options to renew the contract on the same terms and conditions for two one-year periods.

The estimated contract price for the initial term is \$10.7 million. Compensation for net cost work and additional services which may be required during this period is estimated at \$1.5 million and \$1.2 million respectively. The Contract also provides for escalation based upon increased costs of performance for the option periods.

At a future meeting of the Board, authorization will be requested to replace the existing Loading Bridges with new ones. The scope of the replacement contract will include a five-year maintenance obligation by the manufacturer of the new bridges. Contract AYB-856 provides for a potential decrease in scope and compensation which is compatible with the replacement of existing bridges with new ones. It is also anticipated that authorization will be requested at a future Board meeting to purchase an estimated three additional Plane Mates.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize: (1) the Executive Director to award Contract AYB-856. Operation and Maintenance of Loading Bridges and Plane Mates and Crew Bus Services to Hudson General Corporation for a three-year term at the estimated contract price of \$10.7 million, exclusive of an estimated \$1.5 million for net cost work, the form of the contract to be subject to the approval of General Counsel or his authorized representative; (2) the Director of Aviation to order additional services under Contract AYB-856 up to 10% of the total of the estimated contract price and estimated net cost work; and (3) the Director of General Services to extend Contract AYB-856 for two additional one-year terms, as provided in the contract, and the Director of Aviation to authorize the expenditure for additional service up to 10% of the total of the estimated contract price and the estimated net cost work for each extension period.

**Kennedy International Airport Retention of Design
Architectural/Engineering Services for the JFK
Redevelopment Program**

Over the past year, an interdepartmental group established by the Director of Aviation has made recommendations concerning the type of organization best suited to successfully undertake the JFK Redevelopment Program. It was assumed that large amounts of the work would be performed by outside services. The group recommended that the Port Authority maintain control and direction of the work through a nucleus of Port Authority staff. Currently this nucleus organizational framework is in place. It consists of a Program Director, an Assistant Program Director for Administration and three senior Assistant Program Directors (Planning, Design and Construction) to provide direction and management oversight to the total JFK Redevelopment Program effort. At this time it is envisioned that the nucleus team, with the assistance of several senior level Port Authority staff members and advice from other departments, will provide the necessary overall direction and broad management coordination required. Under the direction of the executive team, the routine general coordination management of the major functional areas will be performed by the professional firms for which this authorization is sought and also other such firms as appropriate.

To implement the project plan and to advance the project, it is necessary to retain the Design Architectural/Engineering Services firm of Tippetts-Abbett-McCarthy-Stratton/Seelye Stevenson Value and Knecht now so that the Program Architect can be supported with needed engineering expertise and incidental architectural services leading to the preparation of contract documents.

The Design Architect/Engineer will be responsible for providing engineering and incidental architectural support services to the Program Architect through the conceptual, schematic, and design development phases of the design process. He will be responsible for providing all services necessary for the production of contract documents and follow-up design services during the construction phase. He will direct production of the design documents and specific segments of the conceptual, schematic, and design development phases, to be determined by the Program Architect and the Assistant Program Director/Design. The Port Authority will reserve the right to assign specific parts of the work to others.

On September 18, 1987, a notice of a Request for Proposal for firms interested in providing Design Architect/Engineering Services was placed in regional newspapers and a national technical magazine. On October 19, 1987, ten proposals were received. After review of the proposals, an interdepartmental review board selected Tippetts-Abbett-McCarthy-Stratton/Seelye Stevenson Value and Knecht to provide design architectural/engineering services.

The contract will provide for compensation based on actual salaries paid (time card), plus multiplier, plus out-of-pocket expenses and will contain an Minority Business Enterprise participation requirement that the firm make every good faith effort to meet an overall goal of at least 15% Minority Business Enterprise and Women's Business Enterprise participation of which, at least 10% must be Minority Business Enterprises.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into an agreement with Tippets-Abbott-McCarthy-Stratton/Seelye Stevenson Value and Knecht to perform professional services in connection with Design Architectural/ Engineering Services; and it is further

RESOLVED, that the form of the agreement shall be subject to the approval of General Counsel or his authorized representative.

**Kennedy International Airport - Retention of Construction
Management Support Services for the JFK Redevelopment
Program**

Over the past year, an interdepartmental group established by the Director of Aviation has made recommendations concerning the type of organization best suited to successfully undertake the JFK Redevelopment Program. It was assumed that large amounts of the work would be performed through services performed by outside firms. The group recommended that the Port Authority maintain control and direction of the work through a nucleus of Port Authority staff. Currently this nucleus organizational framework is in place. It consists of a Program Director, an Assistant Program Director for Administration and three senior Assistant Program Directors (Planning, Design and Construction) to provide direction and management oversight to the total JFK Redevelopment Program effort. At this time it is envisioned that the nucleus team, with the assistance of several senior level Port Authority staff members and advice from other departments, will provide the necessary overall direction and broad management coordination required. Under the direction of the executive team, the routine general coordination management of the major functional areas will be performed by the professional firms as appropriate.

Authorization to retain a Program Architect and a Program Manager was provided by previous Board action. Authorization for retention of Design Architectural/Engineering Services is being sought under a separate authorization at the November Board meeting. In addition to this request for authorization to retain a Construction Manager, a request for authorization to retain a Planner will be forthcoming in the near future. Interim Planning Support Services are being provided on a call-in basis utilizing a previous authorization.

The Construction Manager will assist the Port Authority to achieve quality construction and timely completion in connection with all construction aspects of the Redevelopment Program. Among other duties the Construction Manager will be charged with monitoring of contractors' schedules and contract costs, assisting the Authority in coordinating all aspects of construction, and inspecting construction to assure conformance to the contract drawings and specifications.

On September 25, 1987, a notice of a Request for Proposals for firms interested in providing construction management support services was placed in regional newspapers and national technical magazines. On October 23, 1987, five proposals were received. After review of the proposals an interdepartmental review board selected Bechtel Civil, Inc. to provide construction management support services for the JFK Redevelopment Program. Bechtel Civil, Inc. intends to utilize the services of Tishman Construction Corporation of New York as a subconsultant.

The contract will provide for compensation based on actual salaries paid (time card), plus multiplier, plus out-of-pocket expenses and will contain a Minority Business Enterprise participation requirement that the contractor make every good faith effort to meet an overall goal of at least 15% Minority Business Enterprise and Women's Business Enterprise participation, of which at least 10% must be by Minority Business Enterprises.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, to enter into an agreement with Bechtel Civil, Inc. to perform construction management support services for the JFK Redevelopment Program; and it is further

RESOLVED, that the form of the agreement shall be subject to the approval of General Counsel or his authorized representative.

**Kennedy International Airport - Agreement with British Airways,
PLC - British Airways Unit Terminal - Architectural and
Engineering Design Costs**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement with British Airways, PLC whereby the Port Authority would be obligated to reimburse British Airways 50% of the cost of certain architectural and engineering work performed in connection with a planned \$75 million renovation and expansion of the British Airways' Unit Terminal at Kennedy International Airport, up to a maximum of \$2 million, in the event negotiations between British Airways and the Port Authority for a new lease covering occupancy of the British Airways' Unit Terminal at Kennedy International Airport after December 31, 1994, should fail.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized for, and on behalf of the Port Authority, to enter into an agreement with British Airways, PLC substantially on the terms set forth above; the form of such agreement to be subject to the approval of General Counsel or his designated representative.

Whereupon, the meeting was adjourned.

Martin E. Robins, Director of Planning and Development
Morris Sloane, Director of Aviation Operations
Victor T. Strom, Director of Public Safety
Joseph L. Vanacore, Assistant Executive Director/Capital Programs
Barry Weintrob, Chief Financial Officer
Marvin E. Weiss, Director, Office of Minority Business Development

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meetings of October 30 and November 12, 1987. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey has expired.

Whereupon, the Board unanimously approved these Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on December 10, 1987, in addition to matters filed with the Committee pursuant to Board action or separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on December 10, 1987, in addition to matters filed with the Committee pursuant to Board action or separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on December 10, 1987, in addition to matters filed with the Committee pursuant to Board action or separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

o

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on December 10, 1987, in addition to matters filed with the Committee pursuant to Board action or separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Authorization to Provide Partial Funding for a Staten Island Arterial Needs Study

In recognition of the need for coordinated regional planning, the Port Authority, with its interstate vehicular crossings and other interests, is vitally interested in addressing future roadway network needs in the region. New York State Department of Transportation (NYSDOT) intends to initiate a separate study of the transportation needs of Staten Island with the participation of other agencies. It has requested that the Port Authority fund a portion of this study in order to move the study along in a more timely fashion. Port Authority participation will be limited to providing partial funding and an advisory/review role during the study. Relevant technical information will be made available to NYSDOT. The study will address potential roadway, transit and ferry improvements which will be identified for future detailed study.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into an agreement with the New York State Department of Transportation (NYSDOT) to provide partial funding for a study that will determine and document current and projected needs on the Staten Island Arterial System, the total estimated cost of the NYSDOT study being \$350,000, of which the Port Authority will pay a share, the form of the agreement to be subject to the approval of General Counsel or his authorized representative.

**Imported Automobile Marine Terminal - Port Jersey Properties -
Payment In-Lieu-Of-Taxes - City of Bayonne**

The Board, at its meetings on February 11, 1982, November 10, 1982, April 14, 1983, May 10, 1984, July 11, 1985 and August 14, 1986, authorized the payment for each of the years 1982-1986 to the Cities of Bayonne and Jersey City, New Jersey, of the amounts representing the real estate taxes assessed on the Greenville and Port Jersey properties. At its meeting on December 11, 1986, the Board authorized a project for the development of an imported automobile marine terminal, construction of which has begun. While the development of these properties is in progress an in-lieu-of-tax agreement has been delayed until active negotiations are concluded. In the interim, it is recommended that payment be made to the City of Bayonne of an amount equal to the assessed real estate taxes against the Port Jersey properties for the year 1982, the year of purchase of these properties, in the amount of \$103,766.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board hereby authorizes the payment for the year 1987, to the City of Bayonne, New Jersey, in connection with the Port Jersey properties purchased from Harborland Corporation and Teachers Insurance and Annuity Association of America, in the amount of \$103,766, which is equal to the real estate taxes assessed on the properties for the year 1982, the year of purchase of these properties.

(Board - 12/10/87)

Establishment of Futures Program - Authorization of Futures Investment Contracts

In October 1986, the Board authorized a limited program that involved entering into futures transactions for the purpose of preserving the economic effect to the Port Authority of selected interest rates on an amount of up to \$50 million with respect to the then anticipated refunding of Consolidated Bonds, Forty-ninth Series, Due 2017. The program was implemented in January 1987 and closed out in June 1987 coincident with the issuance by the Committee on Finance of the refunding bonds, Consolidated Bonds, Fifty-eighth Series, Due 2017. A futures gain of \$2.8 million was used to reduce in part the overall economic effect to the Port Authority of the refunding. On October 1, 1987, the Forty-ninth Series Bonds were refunded.

In light of the success of this limited program, it is now deemed appropriate to establish a continuing program pursuant to which the Executive Director would be authorized on an ongoing basis to enter into the sale (and, for settlement purposes, purchase) on the Chicago Board of Trade of any combination of up to 1,300 Municipal Bond and United States Treasury Bond futures contracts (each contract is for a principal amount of \$100,000) at appropriate times, in order to preserve, on an economic basis to the Port Authority, selected interest rates on an amount of up to \$100 million in anticipation of future sales of Port Authority Consolidated Bonds or Notes.

The purpose of the program is to reduce to the extent practicable the economic effect of the risk of changes in the interest rate environment from the time such contracts are entered into to the date of the sale of Consolidated Bonds. The program is also intended to achieve greater efficiency in the timing and sale of Port Authority Consolidated Bonds effectively removing a volatile and, to some degree, unpredictable element, namely future interest rate movements, as a critical factor in the timing of bond sales. Thus, for example, the sale of futures contracts would allow an appropriate amount of capital expenditures to be accumulated under the Port Authority Commercial Paper Program without interest rate concerns impacting on the timing of the sale of a series of Port Authority Consolidated Bonds or Notes.

In addition to the ongoing program, the Executive Director would also be authorized on a one-time-only basis to enter into the sale, and thereafter, for settlement purposes, purchase of any combination of up to 1,300 Municipal Bond and United States Treasury Bond futures contracts, in order to preserve the economic effect to the Port Authority of selected long-term interest rates with respect to a possible refunding of the principal amount outstanding of Consolidated Bonds, Forty-second Series, Due 2011.

The Committee on Finance would be authorized to approve the selection (and, if subsequently necessary in the opinion of the Committee, replacement) of an investment firm or banking institution to provide all necessary or desirable services in connection with the futures transactions, including establishment and maintenance of a margin (or transaction) account.

Investments would be made in the Municipal Bond futures contracts or United States Treasury Bond futures contracts (or a combination of both), with flexibility to move between such type of contracts to avoid basis risk and to take advantage of favorable spread relationships. Each futures position would be finally closed out only when the series of bonds or notes to which such position pertains is sold or, without regard to the sale of such series, when a selected maximum interest rate at which such series of bonds or notes would be sold is reached.

(Board - 12/10/87)

In the case of the refunding of the outstanding principal amount of Consolidated Bonds, Forty-second Series, a futures position would be established when long-term interest rates are at 7% or below and more than 90 days remain until the next call date for the Forty-second Series Bonds; it is anticipated that the refunding bonds would be sold within 90 days prior to such call date.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized, for and on behalf of the Port Authority, to:

a. enter into the sale of any combination of United States Treasury Bond and Municipal Bond futures contracts on the Chicago Board of Trade (CBOT), in a total aggregate amount not to exceed 1,300 contracts (each contract for a principal amount of \$100,000) outstanding at any one time, for each of the following two purposes, such contracts and the delivery of any securities on behalf of the Port Authority by the investment firm or banking institution selected by the Committee on Finance pursuant to this resolution to meet applicable requirements of the CBOT:

1) up to 1,300 contracts for the ongoing purpose of preserving, from time to time, the economic effect to the Port Authority of selected interest rates in anticipation of future sales, of up to \$100 million of Consolidated Bonds; and

2) up to 1,300 contracts for the purpose of preserving the economic effect to the Port Authority of selected interest rates in anticipation of a possible future refunding of the then outstanding principal amount of Consolidated Bonds, Forty-second Series, Due 2011, if and when long-term interest rates fall to 7% or below;

b. enter into the purchase of United States Treasury Bond and Municipal Bond futures contracts on the CBOT to settle contracts entered into pursuant to paragraph (a) above, with such contracts and the receipt of any securities on behalf of the Port Authority by the investment firm or banking institution selected by the Committee on Finance pursuant to this resolution to meet applicable requirements of the CBOT;

c. enter into an agreement or agreements with the investment firm or banking institution selected by the Committee on Finance pursuant to this resolution to permit such firm or institution to sell and purchase on behalf of the Port Authority the futures contracts described in (a) and (b) above on the CBOT, in accordance with the applicable rules and regulations of the CBOT, such agreement or agreements to provide for the establishment and maintenance of a margin (or transaction) account with such selected entity and for the use of operating funds of the Port Authority in an amount sufficient to permit the sale or purchase, as the case may be, of the authorized amount of such futures contracts and the maintenance of outstanding futures contracts; and

(Board - 12/10/87)

d. take such other actions as may be necessary or desirable to effectuate the futures program and the sale and purchase of the above-described futures contracts in connection therewith; and it is further

RESOLVED, that the Committee on Finance be and it hereby is authorized to make the selection (and, if subsequently necessary in the opinion of the Committee, replacement) of an investment firm or banking institution to provide all necessary or desirable services in connection with the program authorized by this resolution, including without limitation establishment and maintenance of a margin (or transaction) account; and it is further

RESOLVED, that the form of all the aforementioned agreements be subject to the approval of General Counsel or his authorized representative.

(Board - 12/10/87)

**George Washington Bridge - Washbridge Apartments Soffit
Asbestos Removal and Refireproofing - Contract
GWB-110.090 - Award**

In the early 1960's the four Washbridge Apartment Buildings were constructed in the "air rights" over the New York Expressway approach to the George Washington Bridge. At that time, the girders above the soffits (the concrete ceiling above the Expressway) were fireproofed with asbestos. These girders are located in the space known as the "Protective Zone" between the first floor of each apartment building and the soffitt.

The agreement between the Port Authority and the City of New York, dated August 25, 1960, in which the Authority quitclaimed the "air rights" of portions of the New York Expressway to the City, and provided for the construction of four apartment buildings, includes a provision whereby the Port Authority is responsible to make repairs to the soffits.

Recent engineering investigations have determined that all the soffits must be replaced. Removal of the asbestos on the girders and installation of non-asbestos fireproofing must take place before the soffits are replaced.

Contract GWB-110.090 requires the removal of asbestos fireproofing from the girders within the "Protective Zone" between the soffit and first floor of the apartment buildings, proper disposal of the asbestos and refireproofing of the girders. The contract contains a provision requiring the contractor to make a good faith effort to meet the goals for Minority Business Enterprise/Women's Business Enterprise participation of 10% for MBE's and 1% for WBE's.

At its meeting on August 1987, the Board authorized the Executive Director to award Contract GWB-110.090 to the lowest bidder on the basis of bids to be received and to order extra work up to 10% of the amount of the bid accepted. On October 8, 1987, two bids were received, both of which were considerably higher than the engineer's estimate and it was deemed prudent to negotiate with both bidders.

Hesco Environmental Safety, Inc. offered the lowest price as a result of negotiations and is deemed qualified by the Chief Engineer to perform the work.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract GWB-110.090 to Hesco Environmental Safety Co., Inc. at its price of \$2,075,541 and to order extra work up to the amount of \$210,000.

(Board - 12/10/87)

**Commissioner Ronan - Twentieth Anniversary of Port Authority
Service**

Commissioner McGoldrick asked to address the Board and expressed his and his fellow Commissioners' pleasure at Commissioner Ronan's completing 20 years of service as a Commissioner of The Port Authority of New York and New Jersey on December 13, 1987. He expressed the Board's appreciation for Commissioner Ronan's dedication and splendid service as a Commissioner.

Commissioner McGoldrick offered on behalf of his fellow Commissioners, their hearty congratulations on this special anniversary and their good wishes for Commissioner Ronan's continued service on the Board.

Whereupon, the meeting was adjourned.

Appointment of Bond Counsel	24
1988 Budget	25

MINUTES of special meeting of The Port Authority of New York and New Jersey held Thursday, January 7, 1988 at the Port Authority offices, One World Trade Center, City, County and State of New York.

PRESENT:

NEW JERSEY

Philip D. Kaltenbacher, Chairman
Jerry Fitzgerald English
Robert V. Van Fossan
William K. Hutchison
Henry F. Henderson, Jr.
Robert Van Buren

NEW YORK

William J. Ronan
James G. Hellmuth
Howard Schulman
John G. McGoldrick
H. Carl McCall

Stephen Berger, Executive Director
Patrick J. Falvey, Deputy Executive Director/General Counsel
Doris E. Landre, Secretary
Sally Beneman, Administrative Assistant
Sidney J. Frigand, Assistant Executive Director/Government, Community & Public Affairs
Charles L. Hirsch, Executive Assistant to the Executive Director
Katharine B. MacKay, Assistant Executive Director/Administration
Hugh O'Neill, Assistant Executive Director/Policy Planning and Business Development
Joseph L. Vanacore, Assistant Executive Director/Capital Programs
Barry Weintrob, Chief Financial Officer

The meeting was called to order by the Chairman.

The Secretary reported that the meeting was duly called in accordance with the By-Laws.

**Port Authority Commercial Paper Program - Expansion and
Modification - Report**

The Port Authority Commercial Paper Program (the "Program"), an issue of special obligations of the Authority established in 1982, and subsequently amended and supplemented, presently provides for the sale of Port Authority Commercial Paper Notes in an unlimited aggregate principal amount, provided that the aggregate principal amount outstanding at any one time shall not exceed \$150,000,000 ("Notes"), and for certain banking arrangements involving an "up-front" line of credit to permit accumulation of capital expenditures to be provided for through the sale of Notes and a revolving credit facility to provide liquidity in the event Notes can not be refunded at their maturities due to market conditions. The Program is presently scheduled to expire December 31, 1990.

Since its inception, the Program has been an efficient means of providing for capital expenditures on an interim basis. The Program now enhances flexibility in the scheduling for the issuance of Consolidated Bonds which may be issued for purposes of refunding outstanding commercial paper obligations. In light of the success of the Program and in view of the fact that gross capital expenditures are anticipated to exceed more than \$2 billion over the next three years in connection with the Authority's plan of financing for its facilities, it is now appropriate to increase to \$300,000,000 the aggregate principal amount of commercial paper notes which may be outstanding at any one time and to provide specifically for the establishment and authorization of the issuance of two separate series of the issue of Authority commercial paper obligations, including commercial paper notes, an "up-front" line of credit and a revolving credit facility for each series. Each such series would be limited to a maximum aggregate principal amount outstanding at any one time of \$150,000,000. It continues to be expected that commercial paper obligations would ultimately be refunded with Consolidated Bonds issued for such purposes.

Proceeds of commercial paper obligations would be used, in a manner consistent with Section 103(a) of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and regulations related thereto, with respect to one series of commercial paper obligations, applicable to obligations the interest on which is treated as a preference item in calculating the alternative minimum tax imposed by such Code with respect to individuals and corporations, and with respect to the other series of commercial paper obligations, applicable to obligations the interest on which is not treated as a preference item in calculating the alternative minimum tax with respect to individuals and corporations, in each case in accordance with applicable law, regulations and contractual provisions, for purposes of capital expenditures in connection with one or more of the facilities of the Authority and for purposes of refunding

certain commercial paper obligations. It is not presently anticipated that proceeds of commercial paper obligations issued under either "up-front" line of credit would be used for purposes of refunding commercial paper obligations or that amounts under either revolving credit facility would be used to repay borrowings under either "up-front" line of credit.

Each Authority commercial paper note would have a maturity date no later than 270 days from its date of issue, but in no event later than December 31, 1990, the final permissible maturity date of all such notes; be issued in bearer form, in the minimum amount of \$100,000, unless required to be issued in registered form to comply with applicable Federal law or regulations; bear interest at rates fixed by an authorized officer of the Authority not in excess of 10% per annum with interest payable at maturity; and not be subject to redemption prior to maturity.

The principal of and interest on the commercial paper obligations of each series would be a special obligation of the Authority payable from the proceeds of the commercial paper notes of such series or other obligations of the Authority issued for such purposes, including Consolidated Bonds issued in whole or in part for such purposes, or from Net Revenues (as defined in the within Port Authority Commercial Paper Resolution) deposited to the Consolidated Bond Reserve Fund, and in the event such proceeds or Net Revenues are insufficient therefor, from other moneys of the Authority legally available for such payments when due.

The principal of and interest on the commercial paper obligations shall not be payable from the General Reserve Fund, and the payment thereof shall be subject in all respects to (i) the payment of debt service on Consolidated Bonds as required by the applicable provisions of the Consolidated Bond Resolution; and (ii) the payment into the General Reserve Fund of the amount necessary so as to maintain said Fund at the amount specified in the General Reserve Fund Statutes.

Additionally, so long as any commercial paper notes issued on or after the effective date provided for in the expansion and modification of the Program remain outstanding, the Authority would, at such time as it makes the computations called for by Section 3 of the Consolidated Bond Resolution, in connection with the issuance of new Consolidated Bonds for purposes other than solely the refunding of all or any portion of the principal amount of commercial paper notes then outstanding, and only for purposes of commercial paper obligations, consider the principal amount of Consolidated Bonds then outstanding to include a principal amount of such bonds (with certain specified characteristics) equal to the amount obtained by subtracting from \$100,000,000 (or \$50,000,000 in the event that commercial paper notes of only one series of commercial paper obligations are outstanding at such time of issuance), an amount equal to the principal amount of the commercial paper notes outstanding at such

time of issuance which are to be refunded by such new Consolidated Bonds. In the event that such new Consolidated Bonds are issued solely for purposes of refunding all or any portion of the principal amount of the commercial paper notes outstanding at such time of issuance, then the above-described computations shall not be required.

The Notes issued prior to the effective date of the expansion and modification of the Program would continue to be subject to the Port Authority Commercial Paper Resolution as adopted by the Authority on November 14, 1985.

It continues to be necessary, in order to sell tax-exempt commercial paper, for issuers to have a separate credit facility to ensure liquidity in the event such commercial paper cannot be refunded at maturity due to market conditions. This is accomplished through either a bank letter of credit or a line of credit. In view of the Authority's continued strong financial rating, a line of credit in the form of a stand-by credit facility continues to be sufficient.

The Program as expanded would include a stand-by revolving credit facility of up to \$150,000,000 as part of each series of commercial paper obligations. The revolving credit facility for one series would continue to be provided by Marine Midland Bank, N.A. ("Marine"), with the participation of other New York and New Jersey banks, without change in the financial arrangements presently in effect with Marine. A revolving credit facility for the other series would be provided by The Daiwa Bank, Limited ("Daiwa"). Daiwa was selected from a group of 16 banking institutions responding to a Request for Proposals sent to 25 banking institutions. The total estimated annual cost of Daiwa's proposal was more than \$70,000 less than the annual cost of the next lowest proposal.

Goldman, Sachs & Co. ("Goldman"), would continue to be an exclusive dealer for commercial paper notes of one series and Shearson Lehman Brothers Inc. ("Shearson") would be appointed an exclusive dealer for commercial paper notes of the other series. Morgan Guaranty Trust Company of New York ("Morgan") would continue to be an issuing and paying agent for the commercial paper notes of one series and The Chase Manhattan Bank, N.A. ("Chase"), would be an issuing and paying agent for commercial paper notes of the other series. Morgan and Goldman have been satisfactorily providing services under the Program as issuing and paying agent and exclusive dealer, respectively. Shearson and Chase were both selected after consideration of proposals from, and discussions with, other financial service companies and banking institutions.

Separate "up-front" lines of credit as part of each series of commercial paper obligations for funding of capital expenditures would continue to facilitate the Program as expanded by allowing accumulation of capital expenditures and permitting

commercial paper notes of each series to be issued in larger principal amounts to refund outstanding amounts under the respective lines of credit. Marine and Daiwa Bank Trust Company, a wholly-owned subsidiary of Daiwa organized under the laws of the State of New York, respectively, would provide the separate lines of credit under terms and conditions similar to those presently in effect. The principal amount of borrowings under each "up-front" line of credit outstanding at any one time would not be in excess of \$15,000,000. Similarly to the present arrangements, disbursement accounts under each of the "up-front" lines of credit would be utilized on a zero balance basis, with checks drawn on these accounts to be treated as demand loans to the Authority in payment of the capital expenditures represented by such checks.

The Board of Commissioners would provide that no part of the proceeds of the commercial paper obligations shall be invested directly or indirectly in such manner as to cause the interest on such commercial paper obligations to be includible, for Federal income tax purposes, in the gross income of the recipients thereof, under Section 103(a) of the Internal Revenue Code of 1986, as amended, or the applicable Treasury regulations related thereto.

In addition to the customary certifications, determinations, statements and other documents necessary or desirable in connection with the issuance of Authority obligations, an authorized officer of the Authority would be authorized expressly to certify on behalf of the Authority as to the need for issuance of commercial paper obligations, as to the status of the projects for which the proceeds of such commercial paper obligations are to be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized. Additionally, upon the recommendation of the Executive Director and the General Counsel, the law firm of Orrick, Herrington & Sutcliffe would be appointed to act as bond counsel for the Program, commencing with commercial paper obligations issued under the within Port Authority Commercial Paper Resolution.

The Committee on Finance would be authorized to take such actions in connection with the expansion and modification of the Program as in the opinion of the Committee on Finance may best serve the public interest, including the authorization and approval of the appointment of, and agreements with, one or more other or additional dealers or issuing and paying agents or both, and the authorization and approval of such other or additional revolving credit facilities and "up-front" lines of credit with such other or additional parties as may be necessary or desirable to effectuate the expansion and modification of the Program; provided, however, that any such agreements shall contain terms and conditions not inconsistent with the within Port Authority Commercial Paper Resolution.

**Port Authority Commercial Paper Program - Expansion and
Modification - Port Authority Commercial Paper Resolution**

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, The Port Authority of New York and New Jersey (hereinafter referred to as the "Authority") has been authorized and empowered to issue bonds, notes, securities or other obligations or evidences of indebtedness to provide capital funds for the financing of its facilities; and

WHEREAS, on September 9, 1982, the Authority established and authorized an issue of commercial paper obligations with an unlimited aggregate principal amount, provided that the aggregate principal amount thereof outstanding at any one time was not to exceed One Hundred Million Dollars (\$100,000,000); and

WHEREAS, on September 9, 1982, the Authority authorized the sale of commercial paper notes, subject to the foregoing, with the proceeds derived from the sale thereof, from time to time, to be used for financing for any and all purposes for which the Authority is or shall be authorized to issue bonds, notes, securities or other obligations or evidences of indebtedness (and in connection therewith amended such authorization on June 9, 1983), and provided that no such commercial paper notes would be outstanding subsequent to December 30, 1983; and

WHEREAS, on October 13, 1983, the Authority authorized an extension of the issue of commercial paper obligations (and in connection therewith amended such authorization on July 11, 1985) for the period commencing on December 30, 1983, and ending on December 31, 1985, with an unlimited aggregate principal amount during such period, provided that the aggregate principal amount thereof outstanding at any one time during such period would not exceed One Hundred Fifty Million Dollars (\$150,000,000); and

WHEREAS, on November 14, 1985, the Authority authorized a further extension of the issue of commercial paper obligations for the period commencing on December 31, 1985, and ending on December 31, 1990, with an unlimited aggregate principal amount during such period, provided that the aggregate principal amount thereof outstanding at any one time during such period would not exceed One Hundred Fifty Million Dollars (\$150,000,000); and

WHEREAS, the Authority has determined to authorize an increase in the maximum aggregate principal amount of commercial paper obligations outstanding at any one time from One Hundred Fifty Million Dollars (\$150,000,000) to Three Hundred Million Dollars (\$300,000,000) and to authorize the issuance of Port Authority Commercial Paper Obligations (such term and any

other terms of specific meaning shall have the meanings as set forth in Article I of this Resolution) in two separate series with unlimited aggregate principal amounts, provided that the aggregate principal amount of each such series outstanding at any one time shall not exceed One Hundred Fifty Million Dollars (\$150,000,000), with the proceeds thereof to be applied in accordance with the provisions of Section 2.04 of this Resolution; and

WHEREAS, Port Authority Commercial Paper Obligations shall be an issue of special obligations of the Authority payable from the sources of payment and to the extent provided in Section 2.03 of this Resolution; and

WHEREAS, except as provided in Section 2.03 of this Resolution, the moneys of the Authority would not be pledged to the payment of the interest on or the repayment of the principal of Port Authority Commercial Paper Obligations; and

WHEREAS, on September 9, 1982, as amended on October 13, 1983, and November 14, 1985, the Authority authorized the establishment and continuation of a stand-by revolving credit facility with Marine Midland Bank, N.A., in further support of the payment of any commercial paper notes at their maturity dates, if necessary, and an up-front line of credit for funding of capital expenditures in connection with the facilities of the Authority in anticipation of the issuance of commercial paper notes; and

WHEREAS, the Authority has determined to authorize a Revolving Credit Agreement and a Line of Credit Agreement in connection with each series of Port Authority Commercial Paper Obligations, each of such agreements to conform to the provisions of this Resolution;

NOW, THEREFORE, after due consideration had, be it resolved by the Authority that the resolution of September 9, 1982 (appearing at pages 263 et seq. of the Official Minutes of that date), as heretofore amended and supplemented by the resolutions of June 9, 1983 (appearing at pages 251 et seq. of the Official Minutes of that date), of October 13, 1983 (appearing at pages 395 et seq. of the Official Minutes of that date), of July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of that date), and of November 14, 1985 (appearing at pages 407 et seq. of the Official Minutes of that date), is hereby further amended and supplemented, with respect to the Port Authority Commercial Paper Obligations to be issued under this Resolution on and after the Effective Date, to read as follows:

ARTICLE I. DEFINITIONS.

As used in this Resolution and unless otherwise indicated or unless the context otherwise requires, the following terms shall have the following meanings (such meanings to be equally applicable to both the singular and plural forms of the defined terms). As used in this Resolution, any words or phrases not otherwise defined herein and specifically defined in the Consolidated Bond Resolution shall be read and construed in accordance with such specific definitions. All accounting terms not specifically defined in this Resolution shall be construed in accordance with generally accepted accounting principles consistently applied.

The term "Advance" shall mean an advance of moneys made to the Authority under a Revolving Credit Agreement in an amount requested by the Authority sufficient to prevent a Settlement Deficiency.

The term "Authorized Officer" shall mean any of the officers or employees of the Authority designated from time to time by the Chairman of the Authority; Vice-Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Deputy Executive Director; Assistant Executive Director; or Chief Financial Officer of the Authority to perform the act or sign the document referred to in this Resolution and listed on a certificate filed with respect thereto from time to time with an Issuing and Paying Agent.

The term "Bank Note" shall mean a promissory note or notes of the Authority, issued on the terms set forth in a Revolving Credit Agreement to evidence the cumulative amount of any Advances under such Revolving Credit Agreement and any repayment of the principal of such Advances.

The term "Code" shall mean the Internal Revenue Code of 1986, as amended.

The term "Consolidated Bond Reserve Fund" shall mean the special fund by that name established by Section 7 of the Consolidated Bond Resolution.

The term "Consolidated Bond Resolution" shall mean the resolution adopted by the Authority on October 9, 1952, establishing the issue of Consolidated Bonds.

The term "Consolidated Bonds" shall mean the Authority's Consolidated Bonds (including Consolidated Notes) issued under the Consolidated Bond Resolution.

The term "Dealer" shall mean any entity appointed in accordance with this Resolution for and in connection with the sale of Port Authority Commercial Paper Notes.

The term "Dealer Agreement" shall mean an agreement between the Authority and a Dealer.

The term "Demand Note" shall mean a promissory note or notes of the Authority issued on the terms set forth in a Line of Credit Agreement to evidence the cumulative amount of any Loans under such Line of Credit Agreement and any repayment of the principal of such Loans.

The term "Depository Agreement" shall mean an agreement between the Authority and an Issuing and Paying Agent.

The term "Effective Date" shall mean the first date on which both of the Revolving Credit Agreements authorized under Section 2.10 of this Resolution are effective according to their terms.

The term "Final Maturity Date" shall mean the date established by the Authority in Section 2.02 of this Resolution beyond which Port Authority Commercial Paper Notes are not authorized to be issued or outstanding.

The term "General Reserve Fund" shall mean the General Reserve Fund of the Authority authorized by the General Reserve Fund Statutes.

The term "General Reserve Fund Resolution" shall mean the resolution of the Authority adopted on March 9, 1931, as amended May 5, 1932, concerning the administration of the General Reserve Fund, as further amended by resolution adopted on October 9, 1952, to conform to the provisions of Section 6 of the Consolidated Bond Resolution.

The term "General Reserve Fund Statutes" shall mean Chapter 5 of the Laws of New Jersey of 1931, as amended, and Chapter 48 of the Laws of New York of 1931, as amended.

The term "Issuing and Paying Agent" shall mean any bank or trust company appointed in accordance with this Resolution for and in connection with the issuance, delivery and repayment of Port Authority Commercial Paper Notes.

The term "Line of Credit Agreement" shall mean an agreement concerning, inter alia, Loans and a Demand Note, authorized pursuant to Section 2.11 of this Resolution.

The term "Loan" shall mean any borrowing by the Authority under a Line of Credit Agreement.

The term "Maturity Date" shall mean the date on which the principal of and interest on any of the Port Authority Commercial Paper Obligations is due and owing to the holder thereof.

The term "Net Revenues", solely for the purpose of this Resolution, shall mean, with respect to any date of calculation, the revenues of the Authority pledged under the Consolidated Bond Resolution and remaining after (i) payment or provision for payment of debt service on Consolidated Bonds as required by the applicable provisions of the Consolidated Bond Resolution; (ii) payment into the General Reserve Fund of the amount necessary to maintain said Fund at the amount specified in the General Reserve Fund Statutes; and (iii) applications to purposes authorized in accordance with Section 7 of the Consolidated Bond Resolution.

The term "Port Authority Commercial Paper Obligations" shall mean the issue of special obligations of the Authority established and issued in such series as may be authorized in Section 2.01 and pursuant to and under this Resolution, including any Port Authority Commercial Paper Note, Demand Note or Bank Note.

The term "Port Authority Commercial Paper Note" or "Port Authority Commercial Paper Notes" shall mean any note or notes constituting all or a portion of the issue of obligations established and issued pursuant to Section 2.01 of this Resolution.

The term "Port Authority Commercial Paper Resolution" or "this Resolution" shall mean this resolution (appearing at pages 6 - 23 of the Official Minutes of the Authority of January 7, 1988), including any amendments, modifications or supplements hereto.

The term "Revolving Credit Agreement" shall mean an agreement concerning, inter alia, Advances and a Bank Note authorized pursuant to Section 2.10 of this Resolution.

The term "Settlement Account" shall mean any separate account established and maintained in accordance with Article III of this Resolution, with an Issuing and Paying Agent for the receipt and the disbursement of the proceeds from the sale of Port Authority Commercial Paper Notes and for the payment of the principal of and interest on Port Authority Commercial Paper Notes at their Maturity Dates.

The term "Settlement Deficiency" shall mean the amount by which the sum of the principal of and interest on any Port Authority Commercial Paper Notes payable on any Maturity Date exceeds the amount of moneys available in the Settlement Account for payment of such Port Authority Commercial Paper Notes on such Maturity Date.

ARTICLE II. ESTABLISHMENT, AUTHORIZATION, TERMS AND ISSUANCE.

Section 2.01. Establishment and Authorization of Issue of Commercial Paper Obligations. There is hereby established an issue of special obligations of the Authority to be known as "Port Authority Commercial Paper Obligations," and the issuance of such Port Authority Commercial Paper Obligations from time to time in two separate series, to be known as "Port Authority Commercial Paper Obligations, Series A", and "Port Authority Commercial Paper Obligations, Series B", respectively, in accordance with the provisions of this Resolution, is hereby authorized. Port Authority Commercial Paper Obligations of each series in an unlimited aggregate principal amount are hereby authorized to be issued for the purposes set forth in Section 2.04(a) and 2.04(b), respectively, of this Resolution; provided, that the aggregate principal amount of all Port Authority Commercial Paper Obligations outstanding at any one time shall not exceed Three Hundred Million Dollars (\$300,000,000), and, provided, further, that the aggregate principal amount of all Port Authority Commercial Paper Obligations, Series A, outstanding at any one time shall not exceed One Hundred Fifty Million Dollars (\$150,000,000) and that the aggregate principal amount of all Port Authority Commercial Paper Obligations, Series B, outstanding at any one time shall not exceed One Hundred Fifty Million Dollars (\$150,000,000). For purposes of determining such aggregate principal amounts, no Port Authority Commercial Paper Note shall be deemed to be outstanding on its Maturity Date and no Loan (or portion thereof) shall be deemed to be outstanding on any day to the extent that one or more Port Authority Commercial Paper Notes, the proceeds of which are to be used to refund such Port Authority Commercial Paper Note or such Loan (or portion thereof), have been sold on such day. Port Authority Commercial Paper Obligations shall otherwise be subject to the terms, conditions and limitations provided or referred to in this Resolution. Port Authority Commercial Paper Obligations shall be payable from the sources of payment and to the extent provided in Section 2.03 of this Resolution.

Section 2.02. General Terms of the Port Authority Commercial Paper Notes. The Port Authority Commercial Paper Notes authorized by this Resolution shall be issued in bearer form, not registrable as to either principal or interest; provided, however, that if at any time there shall be in effect a provision of the Code which provides that, for the interest on such Port Authority Commercial Paper Notes to be considered not includible, for Federal income tax purposes, in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such Port Authority Commercial Paper Notes must be in registered form, then such Port Authority Commercial Paper Notes shall be issued in registered form, registered as to both principal and interest, but not as to either alone. The Port Authority Commercial Paper Notes shall be issued in the denomination of \$100,000 or any larger denomination

(Board - 1/7/88)

that is an integral multiple of \$5,000 in excess thereof as determined by an Authorized Officer and shall be dated the dates of their delivery from time to time hereunder. The Port Authority Commercial Paper Notes constituting a portion of each series of Port Authority Commercial Paper Obligations shall bear an appropriate series designation and shall be numbered consecutively from 1 upwards in the order of their issuance and may bear such other identification as an Authorized Officer may deem appropriate. The Port Authority Commercial Paper Notes shall mature on such dates and in such years as shall be determined by an Authorized Officer; provided, however, that the term of any Port Authority Commercial Paper Note shall not exceed two hundred seventy (270) days; and provided further, however, that no Port Authority Commercial Paper Note shall be issued or outstanding subsequent to the Final Maturity Date, which is hereby established as December 31, 1990. The Port Authority Commercial Paper Notes constituting a portion of each series of Port Authority Commercial Paper Obligations shall be payable at the principal office in New York, New York, of the Issuing and Paying Agent for such Port Authority Commercial Paper Notes, in lawful money of the United States of America. No Port Authority Commercial Paper Note shall be subject to redemption prior to maturity.

Each Port Authority Commercial Paper Note shall be deemed to bear interest at a rate per annum equal to the product (converted to a percentage) of (a) a fraction, the numerator of which is the total interest payable on such Port Authority Commercial Paper Note during its term and the denominator of which is the par value or denomination of such Port Authority Commercial Paper Note and (b) a fraction, the numerator of which is the number of days (calculated on an actual calendar day basis) in the calendar year of the issuance of such Port Authority Commercial Paper Note and the denominator of which is the number of days (calculated on an actual calendar day basis) from the date of such Port Authority Commercial Paper Note to its Maturity Date.

Each Port Authority Commercial Paper Note shall bear interest at a rate to be set by an Authorized Officer; provided, however, that no Port Authority Commercial Paper Note shall bear interest in excess of ten per centum (10%) per annum.

Section 2.03. Sources of Payment. The principal of and interest on each of the Port Authority Commercial Paper Notes, Demand Notes and Bank Notes constituting a portion of each series of Port Authority Commercial Paper Obligations shall be a special obligation of the Authority payable from the proceeds of Port Authority Commercial Paper Notes of such series or other obligations of the Authority issued for such purposes, including Consolidated Bonds issued in whole or in part for such purposes, or from Net Revenues deposited to the Consolidated Bond Reserve Fund, and in the event such proceeds or Net Revenues are

insufficient therefor, from other moneys of the Authority legally available for such payments when due.

The principal of and interest on Port Authority Commercial Paper Obligations shall not be payable from the General Reserve Fund, and the payment thereof shall be subject in all respects to (i) the payment of debt service on Consolidated Bonds as required by the applicable provisions of the Consolidated Bond Resolution; and (ii) the payment into the General Reserve Fund of the amount necessary so as to maintain said Fund at the amount specified in the General Reserve Fund Statutes.

Section 2.04. Application of Proceeds.

- (a) The proceeds of Port Authority Commercial Paper Obligations, Series A, shall be used, in a manner consistent with provisions of Section 103(a) of the Code, or successor provisions of law, and the regulations related thereto, applicable to obligations the interest on which is treated as a preference item in calculating the alternative minimum tax imposed by the Code with respect to individuals and corporations, for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto and for purposes of refunding, in accordance with applicable law, regulations and contractual provisions, any commercial paper obligations issued and outstanding prior to the Effective Date and any Port Authority Commercial Paper Obligations, Series A, issued and outstanding.
- (b) The proceeds of Port Authority Commercial Paper Obligations, Series B, shall be used, in a manner consistent with provisions of Section 103(a) of the Code, or successor provisions of law, and the regulations related thereto, applicable to obligations the interest on which is not treated as a preference item in calculating the alternative minimum tax imposed by the Code with respect to individuals and corporations, for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto, and for purposes of refunding, in accordance with applicable law, regulations, and contractual provisions, any Port Authority Commercial Paper Obligations, Series B, issued and outstanding.
- (c) In the event an Authorized Officer determines that the needs of the Authority for capital funds or the public interest require allocation of all or any

(Board - 1/7/88)

portion of the proceeds of any of the obligations constituting a portion of either or both series of Port Authority Commercial Paper Obligations to purposes in connection with some but not all of the purposes authorized for such series, such Authorized Officer is hereby authorized, from time to time, to make such allocation in regard to the expenditure of the proceeds of such Port Authority Commercial Paper Obligations; provided, however, that no portion of the proceeds of any Port Authority Commercial Paper Obligations shall be allocated to purposes in connection with an additional facility of the Authority prior to the initial expenditure of proceeds of the first series of Consolidated Bonds issued for purposes of capital expenditures in connection with such additional facility.

Section 2.05. Issue and Sale of Port Authority Commercial Paper Notes. Port Authority Commercial Paper Notes may be issued, sold and delivered under the terms of this Resolution whenever an Authorized Officer shall prescribe the terms of such Port Authority Commercial Paper Notes (including the principal amount of, the purchase price for, the interest payable on, the issuance date of and the Maturity Date of such Port Authority Commercial Paper Notes) and deliver instructions therefor to the Issuing and Paying Agent for such Port Authority Commercial Paper Notes, all pursuant to Section 2.02 of this Resolution and to the Depositary Agreement with respect to such Port Authority Commercial Paper Notes. Such instructions prescribing the terms of the Port Authority Commercial Paper Notes may be given orally, but in such event an Authorized Officer shall deliver to the Issuing and Paying Agent for such Port Authority Commercial Paper Notes written confirmation of such prescribed terms within twenty-four (24) hours of such oral instructions (unless such instructions are transmitted by a time-sharing terminal or telex, in which event such time-sharing terminal message or telex shall be considered to be written instructions). An Authorized Officer is hereby authorized to instruct the Issuing and Paying Agent for Port Authority Commercial Paper Notes constituting a portion of a series of Port Authority Commercial Paper Obligations to countersign any of such Port Authority Commercial Paper Notes for the purposes of authentication only and to deliver such Port Authority Commercial Paper Notes to the purchasers thereof; provided, however, that such Port Authority Commercial Paper Notes shall not be valid or obligatory for any purpose unless and until so countersigned.

Section 2.06. Appointment of Issuing Agent and Paying Agents. Morgan Guaranty Trust Company is hereby appointed as an issuing and paying agent for and in connection with the Port Authority Commercial Paper Notes constituting a portion of Port Authority Commercial Paper Obligations, Series A. The Chase Manhattan Bank, N.A., is hereby appointed as an issuing and

(Board - 1/7/88)

paying agent for and in connection with the Port Authority Commercial Paper Notes constituting a portion of Port Authority Commercial Paper Obligations, Series B. An Authorized Officer is hereby authorized to enter into Depository Agreements, which may contain terms and conditions not inconsistent with this Resolution, with each of such Issuing and Paying Agents for and in connection with the issuance, delivery and repayment of Port Authority Commercial Paper Notes. An Authorized Officer is hereby authorized to establish and maintain non-interest bearing bank accounts in the name of and on behalf of the Authority with each of such Issuing and Paying Agents as partial compensation to each of such Issuing and Paying Agents; provided, however, that the moneys on deposit in such bank accounts shall not be in excess of Fifty Thousand Dollars (\$50,000) for each of such bank accounts (or such other amounts as may be approved by the Committee on Finance).

Section 2.07. Transfer of Notes. The Authority and any Issuing and Paying Agent for Port Authority Commercial Paper Notes constituting a portion of a series of Port Authority Commercial Paper Obligations may treat the holder of any Port Authority Commercial Paper Note constituting a portion of such series as the absolute owner of such Port Authority Commercial Paper Note for the purpose of receiving payment of the principal thereof and interest thereon and for all other purposes, and neither the Authority nor such Issuing and Paying Agent shall be affected by any notice or knowledge to the contrary, unless such Port Authority Commercial Paper Note shall be issued in registered form, in which case the Authority and such Issuing and Paying Agent may treat the registered holder of such Port Authority Commercial Paper Note as the absolute owner of such Port Authority Commercial Paper Note for the purpose of receiving payment of the principal thereof and interest thereon and for all other purposes, and neither the Authority nor such Issuing and Paying Agent shall be affected by any notice or knowledge to the contrary.

Section 2.08. Port Authority Commercial Paper Notes Mutilated, Lost or Destroyed. In case any Port Authority Commercial Paper Note shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and cause the Issuing and Paying Agent for such Port Authority Commercial Paper Notes, to countersign and deliver a new Port Authority Commercial Paper Note of the same series of Port Authority Commercial Paper Obligations, principal amount, interest amount and Maturity Date in exchange or substitution for and upon cancellation of such mutilated Port Authority Commercial Paper Note or in lieu of or in substitution for such destroyed or lost Port Authority Commercial Paper Note; or if such Port Authority Commercial Paper Note shall have matured, instead of issuing a substitute Port Authority Commercial Paper Note the Authority may instruct such Issuing and Paying Agent to pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute Port Authority Commercial Paper

(Board - 1/7/88)

Note shall furnish to the Authority evidence satisfactory to it of the destruction or loss of such Port Authority Commercial Paper Note and of the ownership thereof and also such security and indemnity as may be required by the Authority. Upon the issuance of any substitute Port Authority Commercial Paper Note, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new Port Authority Commercial Paper Note so issued in substitution. Any Port Authority Commercial Paper Note issued under the provisions of this Section 2.08 in lieu of any Port Authority Commercial Paper Note alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the Port Authority Commercial Paper Note so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this Resolution with all other Port Authority Commercial Paper Notes issued hereunder.

Section 2.09. Authorization of Sale and Distribution of Offering Statements. The Port Authority Commercial Paper Notes constituting a portion of each series of Port Authority Commercial Paper Obligations shall be sold to the purchasers thereof in accordance with the terms and conditions of the Depositary Agreement and the Dealer Agreement in effect for such Port Authority Commercial Paper Notes, and the Issuing and Paying Agent for such Port Authority Commercial Paper Notes is hereby authorized and instructed to deliver such Port Authority Commercial Paper Notes to the purchasers thereof upon the instructions of an Authorized Officer in accordance with the terms of such Depositary Agreement and Dealer Agreement. An Authorized Officer is hereby authorized to arrange for the preparation of a Commercial Paper Memorandum or other offering statement for Port Authority Commercial Paper Notes constituting a portion of each series of Port Authority Commercial Paper Obligations on behalf of the Authority, describing such Port Authority Commercial Paper Notes and the other Port Authority Commercial Paper Obligations, and the Authority and its financial condition; provided, however, that no such Commercial Paper Memoranda or other offering statements shall be issued without the express consent of an Authorized Officer. The Authority hereby approves the use of any such Commercial Paper Memorandum or other offering statement pertaining to Port Authority Commercial Paper Notes constituting a portion of a series of Port Authority Commercial Paper Obligations by the Dealer for such Port Authority Commercial Paper Notes.

Section 2.10. Authorization of Revolving Credit Agreements and Bank Notes. An Authorized Officer is hereby authorized (i) to enter into a Revolving Credit Agreement with each of Marine Midland Bank, N.A., with respect to the Port Authority Commercial Paper Notes constituting a portion of Port

(Board - 1/7/88)

Authority Commercial Paper Obligations, Series A, and The Daiwa Bank, Limited with respect to the Port Authority Commercial Paper Notes constituting a portion of Port Authority Commercial Paper Obligations, Series B, which may contain terms and conditions not inconsistent with this Resolution, for provision for the payment, if necessary, of Advances, in support of the payment of the principal of and interest on, at the Maturity Date of, any Port Authority Commercial Paper Note of the series to which such agreement pertains, and (ii) to execute and deliver a Bank Note pertaining to each such Revolving Credit Agreement.

Section 2.11. Authorization of Line of Credit Agreements and Demand Notes. An Authorized Officer is hereby authorized (i) to enter into a Line of Credit Agreement, which may contain terms and conditions not inconsistent with this Resolution, with each of Marine Midland Bank, N.A., to provide for those capital expenditures authorized as purposes for Port Authority Commercial Paper Obligations, Series A, and Daiwa Bank Trust Company to provide for those capital expenditures authorized as purposes for Port Authority Commercial Paper Obligations, Series B, with each line of credit in an unlimited aggregate principal amount, (ii) to execute and deliver a Demand Note pertaining to each such Line of Credit Agreement, and (iii) to establish and maintain zero balance bank accounts under each Line of Credit Agreement to permit borrowings under each line of credit for authorized purposes.

Section 2.12. Appointment of Dealers. Goldman, Sachs & Co., is hereby appointed an exclusive dealer with respect to the Port Authority Commercial Paper Notes constituting a portion of Port Authority Commercial Paper Obligations, Series A. Shearson Lehman Brothers Inc. is hereby appointed an exclusive dealer with respect to the Port Authority Commercial Paper Notes constituting a portion of Port Authority Commercial Paper Obligations, Series B. An Authorized Officer is hereby authorized to enter into Dealer Agreements which may contain such terms and conditions not inconsistent with this Resolution with each of such Dealers for and in connection with the sale of Port Authority Commercial Paper Notes.

ARTICLE III. SETTLEMENT ACCOUNTS.

Section 3.01. Establishment of Settlement Accounts. There is hereby established a Settlement Account for the Port Authority Commercial Paper Notes constituting a portion of each series of Port Authority Commercial Paper Obligations. Each Settlement Account shall be held and maintained by the Issuing and Paying Agent for the Port Authority Commercial Paper Notes to which such account pertains, for the account of the Authority in accordance with the terms of this Resolution.

Section 3.02. Deposits to and Disbursements from Settlement Accounts. There shall be deposited into a Settlement Account for Port Authority Commercial Paper Notes such portion of the proceeds of the sale of the Port Authority Commercial Paper Notes as an Authorized Officer shall direct, all Advances made under the Revolving Credit Agreement pertaining to such Port Authority Commercial Paper Notes and such amounts as the Authority may elect to deposit in such Settlement Account from funds (including proceeds of Consolidated Bonds) legally available for such deposit. Disbursements from each Settlement Account shall be made upon the instructions of an Authorized Officer.

IV. FORM AND EXECUTION OF NOTES.

Section 4.01. Form of Port Authority Commercial Paper Notes. The Port Authority Commercial Paper Notes shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed, manually or by facsimile signature, by an Authorized Officer and shall be manually countersigned by the Issuing and Paying Agent for such Port Authority Commercial Paper Notes. All Port Authority Commercial Paper Notes shall be in substantially the following form, the blank spaces being appropriately filled in:

(Form of Port Authority Commercial Paper Note)

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
 COMMERCIAL PAPER NOTE
 COMMERCIAL PAPER OBLIGATIONS, SERIES _____

Issue Date: Principal Amount:

Number _____

On _____, for value received, THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY ("Authority") promises to pay to the Bearer hereof the sum of _____ U.S. Dollars payable at _____.

This note is issued pursuant to the Port Authority Commercial Paper Resolution adopted by the Authority on January 7, 1988 ("Note Resolution"), and is a SPECIAL OBLIGATION payable solely from the sources of payment listed and to the extent provided in Section 2.03 of the Note Resolution. A copy of the Note Resolution, which is a contract between the Authority and the holder of this note, is on file with the Issuing and Paying Agent for Port Authority Commercial Paper Notes constituting a portion of Port Authority Commercial Paper Obligations, Series _____, at the above address.

This note shall not be entitled to any security, right or benefit pursuant to the Note Resolution or be valid or obligatory for any purpose unless duly countersigned by the Issuing and Paying Agent for Port Authority Commercial Paper Notes constituting a portion of Port Authority Commercial Paper Obligations, Series_____.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this note, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the Note Resolution, and that the amount of this note, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or Note Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal or facsimile thereof, to be affixed hereto or printed or impressed hereon, and this note to be dated as of its Issue Date.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

Authorized Officer

NOT VALID UNLESS COUNTERSIGNED

Authenticated on: _____

Issuing and Paying Agent

By _____

Authorized Signature

(End of Form of Port Authority Commercial Paper Note)

(Board - 1/7/88)

Section 4.02. Execution of Port Authority Commercial Paper Notes. In case an Authorized Officer who shall have signed any of the Port Authority Commercial Paper Notes shall cease to be such Authorized Officer before such Port Authority Commercial Paper Notes shall have been authenticated by an Issuing and Paying Agent, such Port Authority Commercial Paper Notes may nevertheless be issued as though the person who signed such Port Authority Commercial Paper Notes had not ceased to be such Authorized Officer.

Section 4.03. Registration. In the event that any Port Authority Commercial Paper Notes are required to be issued in registered form, then, in that event, an Authorized Officer is hereby authorized to modify the form of such Port Authority Commercial Paper Notes. The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication, transfer, cancellation, exchange and delivery of such registered Port Authority Commercial Paper Notes, including such fees as may be imposed by an Issuing and Paying Agent for such services in connection therewith.

ARTICLE V. COVENANTS.

The Authority hereby covenants and agrees with each holder of Port Authority Commercial Paper Notes as follows:

(a) The Authority shall duly and punctually pay or cause to be paid the principal of and interest on such Port Authority Commercial Paper Notes, as specified therein.

(b) Upon the date of issuance of such Port Authority Commercial Paper Notes, all conditions, acts and things required by the Constitution or statutes of the States of New York and New Jersey or of the United States of America, or this Resolution to exist, to have happened and to have been performed precedent to or in the issuance of such Port Authority Commercial Paper Notes shall exist, have happened and have been performed and such Port Authority Commercial Paper Notes, together with all other indebtedness of the Authority, shall be within every debt and other limit prescribed thereby.

(c) The Authority shall do and perform or cause to be done and performed all acts and things required to be done or performed by or on behalf of the Authority under the provisions of this Resolution in accordance with the terms of such provisions.

(Board - 1/7/88)

(d) So long as any Port Authority Commercial Paper Notes issued on or after the Effective Date remain outstanding, at such time or times as the Authority makes the computations called for by Section 3 of the Consolidated Bond Resolution, in connection with the issuance of new Consolidated Bonds for purposes other than solely the refunding of all or any portion of the principal amount of Port Authority Commercial Paper Notes then outstanding, and only for purposes of Port Authority Commercial Paper Obligations, the Authority shall consider the principal amount of Consolidated Bonds then outstanding to include a principal amount of such bonds (with the following characteristics: maturity - thirty (30) years from the time of issuance of the aforesaid new Consolidated Bonds; interest - at the rate to be estimated by the Authority to be the approximate rate of interest for an issue of such bonds at such time of issuance, payable semiannually beginning six (6) months from such time of issuance; amortization - in such annual amounts as would be required to retire the principal amount of such bonds by the thirtieth (30th) anniversary of such time of issuance if such annual retirement were effected at par at each anniversary of such time of issuance and if the annual debt service thereon would be equal for all years after such time of issuance until the thirtieth (30th) anniversary of such time of issuance) equal to the amount obtained by subtracting from One Hundred Million Dollars (\$100,000,000) (or Fifty Million Dollars (\$50,000,000) in the event that only Commercial Paper Notes constituting a portion of either Port Authority Commercial Paper Obligations, Series A or Port Authority Commercial Paper Obligations, Series B, are outstanding at such time of issuance), an amount equal to the principal amount of Port Authority Commercial Paper Notes outstanding at such time of issuance which are to be refunded by such new Consolidated Bonds. In the event that such new Consolidated Bonds are issued solely for purposes of refunding all or any portion of the principal amount of Port Authority Commercial Paper Notes outstanding at such time of issuance, then no computations hereunder shall be required.

(Board - 1/7/88)

ARTICLE VI. MISCELLANEOUS.

Section 6.01. Contract. The provisions of this Resolution shall constitute a contract with the holders of the Port Authority Commercial Paper Notes issued pursuant to this Resolution, and with each such holder.

Section 6.02. Amendments. The Authority may modify or amend this Resolution or any agreement authorized by this Resolution at any time by a supplemental resolution or agreement, as applicable, without notice to or the consent of any holder of the Port Authority Commercial Paper Notes, but only in regard to such provisions as shall not materially and adversely affect the interests of such holders of the Port Authority Commercial Paper Notes then outstanding.

Section 6.03. Liability. No Commissioner, officer, agent, representative, or employee of the Authority or Authorized Officer shall be held personally liable to any purchaser or holder of any of the Port Authority Commercial Paper Obligations under or upon such Port Authority Commercial Paper Obligations, or under or upon this Resolution or any resolution hereafter adopted relating to the Port Authority Commercial Paper Obligations, or because of the issuance or attempted issuance of any of the Port Authority Commercial Paper Obligations, or because of any act or omission in connection with the construction, acquisition, effectuation, operation or maintenance of any facility of the Authority, or because of any act or omission in connection with the investment or management of the revenues, funds or moneys of the Authority, or otherwise in connection with the management of its affairs, excepting solely for things wilfully done by such person with an intent to defraud or wilfully omitted to be done by such person with an intent to defraud.

Section 6.04. Investment of Proceeds. No part of the proceeds of any of the Port Authority Commercial Paper Obligations shall be invested directly or indirectly in such a manner as to cause the interest on the Port Authority Commercial Paper Obligations to be includible, for Federal income tax purposes, in the gross income of the recipients thereof under Section 103(a) of the Code or the applicable regulations related thereto.

Section 6.05. Certifications. An Authorized Officer is hereby authorized to certify on behalf of the Authority as to the need for the issuance of the Port Authority Commercial Paper Obligations for the purposes for which such Port Authority Commercial Paper Obligations are issued, as to the status of the projects for which the proceeds of the Port Authority Commercial Paper Obligations would be used, as to the Authority's intentions with respect to the application and investment of such proceeds, and as to such other related matters as may be authorized by this Resolution.

Section 6.06. Determinations. Whenever in this Resolution it is provided that any selection, designation, determination or estimate shall or may be made by an Authorized Officer duly authorized by this Resolution, or that any action may be taken or withheld by such Authorized Officer or that any action shall or may be taken or withheld at the option of or dependent upon the opinion, discretion or judgment of such Authorized Officer, then such Authorized Officer's selection, designation, determination, estimate, or action so made, taken or withheld shall be conclusive for the purposes of this Resolution, whether required to be made, taken or withheld as a condition precedent to the issuance of any of the Port Authority Commercial Paper Obligations or for the purpose of determining if all conditions precedent to the issuance of any such Port Authority Commercial Paper Obligations exist, or otherwise as in the opinion of such Authorized Officer will best serve the public interest, the Authority hereby adopting such selection, designation, determination, estimate or action so made, taken or withheld as its own.

Section 6.07. Committee on Finance. The Committee on Finance is hereby authorized to take such actions in connection with Port Authority Commercial Paper Obligations and the program relating thereto as in the opinion of the Committee on Finance may best serve the public interest, including the authorization and approval of the appointment of, and agreements with, one or more other or additional Dealers or Issuing and Paying Agents or both, and the authorization and approval of such other or additional Revolving Credit Agreements and Line of Credit Agreements with such other or additional parties as may be necessary or desirable to effectuate such program; provided, however, that any such agreements shall contain terms and conditions not inconsistent with this Resolution.

Section 6.08. Titles. Titles to the Articles and Sections of this Resolution are solely for convenience, and are not an aid in the interpretation of this Resolution or any part thereof.

(Finance - 1/7/88)

Appointment of Bond Counsel

RESOLVED, that the resolution of the Committee on Finance adopted on October 30, 1987, entitled "Appointment of Bond Counsel in Connection with Issuance of Port Authority Obligations" (appearing at Page 2 of the minutes of the Committee on Finance of such date) be and it is hereby rescinded and cancelled in its entirety; and it is further

RESOLVED, that the law firm of Orrick, Herrington & Sutcliffe be and it hereby is appointed to act as bond counsel in connection with the issuance of the Authority's commercial paper obligations, and in connection therewith General Counsel of the Authority be and he hereby is authorized to make all necessary and appropriate arrangements in connection with the provision of such bond counsel services.

The above resolution was adopted, Commissioners McGoldrick and Schulman voting "Nay" as to the first paragraph.

(Board - 1/7/88)

1988 Budget

It was reported that copies of the Budget for the year 1988 were presented to the Commissioners in October 1987. The 1988 Budget is a product of the Port Authority's internal planning process and represents the continuation of the capital plan endorsed by the Governors as well as the estimated expenditures necessary to achieve the organization's objectives. These objectives are: to strengthen the Port Authority's organizational capacity; to strengthen the competitive position of the Port of New York-New Jersey region; to provide a level of service that is responsive to current and projected changes in demand; and to expand the range of economic opportunities available to businesses in and residents of the region. The Budget is a financial planning tool which outlines the estimated expenditures for programs already authorized or to be considered by the Port Authority. Approval of these recommendations will enable the Port Authority to accomplish its mission.

The 1988 Budget for The Port Authority of New York and New Jersey, including the anticipated expenditures of subsidiary corporations, totals \$2.2 billion, as shown on page 28. It consists of approximately \$834 million in gross capital expenditures, \$1.1 billion of operating expenses, \$218 million of debt service charged to operations and reserves, \$39 million of expenditures for the Fund for Regional Development, and \$47 million of other expenditures, mostly related to future years (all exclusive of certain amounts which are reimbursable under the New York State Commuter Railroad Car Program).

The 1988 Budget includes a total of \$127 million for retention of professional, technical, or advisory services and \$117 million for maintenance and service, construction, and commodities (materials, equipment, and supplies) contracts, in addition to expenditures otherwise authorized, consisting of the following amounts:

- Maintenance & Services Contracts	\$31 million
- Construction Contracts	\$74 million
- Commodities Contracts	\$12 million

The Executive Director would be authorized to take action with respect to these expenditures in accordance with appropriate procedures filed with the Committees of the Board. A good faith effort will be utilized to obtain a goal of at least 10% Minority Business Enterprise and 1% Women's Business Enterprise participation or other Port Authority established goals on contracts so authorized. Reports will be made to the Commissioners on the goals, if any, to be sought in each contract and subsequently on the extent to which the goals are being met by contractors as well as by direct awards to MBEs and WBEs and by subcontracting.

The 1988 capital expenditures are for projects related to the Port Authority's Aviation, Interstate Transportation Network, Port, and World Trade and Economic Development facilities and include a provision of \$10 million for emergency repairs. The Budget also includes \$47 million for expenditures on projects identified by the States of New York and New Jersey from funds made available for regional economic development pursuant to the Governors' Agreement of June 1983, \$30 million for regional development projects identified by the Governors, and an allowance of \$40 million for projects under study and in development. Expenditures for construction contracts included in the 1988 Budget are shown on page 29.

(Board - 1/7/88)

In 1988, Aviation's activities will be devoted to the revitalization, renewal, and enhancement of the airports while maintaining ongoing operations and levels of service. Aviation's plan provides for the establishment of project teams and the initiation of significant planning activity associated with JFK 2000 and Newark 2000 and the LaGuardia Airport modernization and expansion. Also included are expenditures related to improvements at the International Arrivals Building, construction of an air cargo building and multi-tenant air cargo site, as well as roadway and parking lot improvements at Kennedy International Airport; school soundproofing at all three airports; realignment and widening of roadways at LaGuardia Airport; finishes for Terminal C, and roadway, taxiway and parking lot improvements at Newark International Airport.

For Interstate Transportation Network facilities, the 1988 Budget includes expenditures for increased system capacity to meet growing traffic demands and for the protection of the physical integrity of the facilities. The Budget provides for the start of major construction at the new PATH Car Maintenance Facility, the commencement of 8-car operations on PATH's Newark-World Trade Center service, completion of the Holland Tunnel ceiling replacement project, facility rehabilitation at the George Washington and Staten Island Bridges, additional improvements at the Port Authority Bus Terminal, and continued development of the Hoboken-lower Manhattan Ferry Service. The Budget also includes the planned purchase of buses for use in the States of New York and New Jersey under the Port Authority Bus Programs.

In order to ensure the competitive position of our port facilities and enhance the economic benefits to the region, the 1988 Budget includes expenditures for channel dredging, facility rehabilitation at the Brooklyn-Port Authority Marine Terminal, terminal improvements at the Elizabeth-Port Authority Marine Terminal, as well as the commencement of operations at the Fishport at Erie Basin and the Imported Automobile Marine Terminal at Port Jersey/Greenville.

The World Trade and Economic Development Department's program reflects expansion and renovation of the industrial parks, maintaining the safety and structural integrity of the World Trade Center, and continued construction of the Teleport and Newark Legal and Communications Center, as well as construction of the Essex County Resource Recovery Facility.

Circumstances have arisen during the year 1987 which were not foreseeable or determinable on April 9, 1987, when the Board adopted the 1987 Budget. These changes, totaling about \$3.2 million, are set forth on page 31, and, together with all other expenditures for the Port Authority for the year 1987, will not exceed the amount as set forth in the 1987 Budget.

As contemplated in the 1988 Budget, in light of recent staff studies, consultant studies, and similar studies conducted by private and public agencies, of salary, wage, and Consumer Price Index trends, and consistent with the Port Authority Labor Relations Instruction, effective December 27, 1987, provision for salary ranges and salaries for staff not represented for collective negotiations would be set or increased by 4 percent, and compensation programs, as revised, would continue to be administered on the basis of merit; provided, however, that no increase in salary will be given to Department Directors or Assistant Executive Directors, pending approval by Board resolution of a revised salary plan for such positions. In addition to provisions governing the salaries of incumbent Department Directors and Assistant Executive Directors, the revised plan will establish starting salary ranges for new appointees to such positions.

(Board - 1/7/88)

A provision of \$400 thousand is also included to reimburse the States of New York and New Jersey for expenses incurred by each State, including staff costs, in reviewing the Port Authority's annual Budget and any amendments thereto.

In connection with the adoption of the 1987 Budget on April 9, 1987, the Board authorized the appropriation by the Executive Director of funds paid into and available in the Consolidated Bond Reserve Fund for the purpose of capital expenditures in 1987 in a total amount not to exceed \$120 million, together with capital funds to be carried into 1987 and the proceeds of Consolidated Bonds and Commercial Paper Notes to be issued in 1987. As of October 31, 1987, approximately \$105 million had been appropriated from the Consolidated Bond Reserve Fund for direct investment in Port Authority facilities. Due to conditions in the financial markets and other circumstances not anticipated when the 1987 Budget was adopted, additional appropriated funds of approximately \$35 million may be needed during November and December 1987, based on total gross capital expenditures estimated at \$615 million for 1987. Furthermore, the 1988 Budget anticipates gross capital expenditures of approximately \$834 million. To provide sufficient funds to substantially complete the Port Authority's capital program for 1987 and 1988, together with capital funds to be carried into each year and the proceeds of Consolidated Bonds, Commercial Paper Notes, and other obligations to be issued, it is desirable at this time to authorize the appropriation for the purpose of capital expenditures to be made in each year of funds paid into and available in the Consolidated Bond Reserve Fund in a total aggregate amount not to exceed \$400 million in 1987 and 1988.

To continue the Port Authority's practice of annually setting aside amounts towards covering self-insured contingent losses, it is necessary in light of currently established accounting standards to authorize an appropriation from the Consolidated Bond Reserve Fund of a total amount, consistent with the Authority's financial commitments and policies, not to exceed \$10 million to a provision for self-insurance for the year 1988.

Consistent with the Port Authority's financial commitments and policies, the amounts so financed from the Consolidated Bond Reserve Fund would not exceed an amount which, when combined with any other amounts financed in 1987 and 1988, respectively, from such funds paid into and available in the Consolidated Bond Reserve Fund, would preclude the Port Authority from: (a) maintaining the General Reserve Fund at an amount equal to 10% of the par value of outstanding Port Authority bonds legal for investment (other than New York State Guaranteed Commuter Car Bonds); and (b) maintaining in all reserve funds an aggregate amount in excess of the next two years' debt service on outstanding Port Authority bonds secured by a pledge of the General Reserve Fund.

The Executive Director's authority, pending final adoption and approval of the annual Budget, to make operating expenditures and undertake contractual commitments for continuing operations and professional services, as contained in the financial plan presented to the Commissioners in October 1987, would also be confirmed.

Whereupon, to carry out the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the following Budget for The Port Authority of New York and New Jersey be and the same hereby is approved and adopted for the year 1988, including authority for the Executive Director to take action, in accordance with appropriate procedures, with respect to professional, technical, or advisory services, and with respect to maintenance and service, construction, and commodities contracts, and to implement the annual salary range adjustment, which is hereby recognized:

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
Including Subsidiary Port Authority Trans-Hudson Corporation

(Board - 1/7/88)

RESOLVED, that the following revisions to the Budget for the year 1987 be approved:

SCHEDULE OF REVISION TO CERTAIN 1987 BUDGET ITEMS

	TOTAL EXPENDITURES	PERSONAL SERVICES	MATERIALS & SERVICES	OTHER
<u>Port Department</u>				
Howland Hook				
Marine Terminal	\$ 802	\$(201)	\$1,003	
<u>Aviation Department</u>				
LaGuardia Airport	805	(792)	1,597	
JFK International Airport	1,226	79	1,147	
Office of Medical Service	346	(87)	433	

RESOLVED, that, based upon a requisition of the Governor of the State of New York or the Governor of the State of New Jersey, or the duly authorized designee of each, the Port Authority shall pay to the State of New York or the State of New Jersey, or both, upon receipt of an appropriate expenditure plan from said State, an amount not in excess of \$200,000 to each said State to reimburse said State or States for expenses incurred by said State or States, including staff costs, in reviewing the 1988 annual Budget of the Port Authority and any amendments thereto; and it is further

RESOLVED, that, in connection with the Port Authority's capital program, the financing by the Executive Director, by application of funds paid into and available in the Consolidated Bond Reserve Fund, including investment earnings attributable to the General Reserve Fund not required for the maintenance of that Fund, of capital expenditures during the years 1987 and 1988 in connection with the Port Authority's facilities in a total aggregate amount not to exceed \$400,000,000 in 1987 and 1988, be and the same hereby is authorized; provided, however, that the amount so financed shall not exceed an amount which, when combined with any other amounts financed in 1987 and 1988, respectively, from such funds paid into and available in the Consolidated Bond Reserve Fund, will preclude the Port Authority from: (a) maintaining the General Reserve Fund at an amount equal to 10% of the par value of outstanding Port Authority bonds legal for investment (other than New York State Guaranteed Commuter Car Bonds); and (b) maintaining in all reserve funds an aggregate amount in excess of the next two years' debt service on outstanding Port Authority bonds secured by a pledge of the General Reserve Fund; and that the application from time to time of funds as set forth herein is hereby approved and authorized; and it is further

(Board - 1/7/88)

RESOLVED, that, in connection with the Port Authority's self-insurance program, the application by the Executive Director of funds paid into and available in the Consolidated Bond Reserve Fund, including investment earnings attributable to the General Reserve Fund not required for the maintenance of that Fund, to a Provision for Self-Insurance in connection with the Port Authority's facilities in a total amount, consistent with the Port Authority's practice of self-insurance, not to exceed \$10 million in 1988, be and the same hereby is authorized; provided, however, that the amount so applied shall not exceed an amount which, when combined with any other amounts financed in 1988 from such funds paid into and available in the Consolidated Bond Reserve Fund, will preclude the Port Authority from: (a) maintaining the General Reserve Fund at an amount equal to 10% of the par value of outstanding Port Authority bonds legal for investment (other than New York State Guaranteed Commuter Car Bonds); and (b) maintaining in all reserve funds an aggregate amount in excess of the next two years' debt service on outstanding Port Authority bonds secured by a pledge of the General Reserve Fund; and that the application from time to time of funds as set forth herein is hereby approved and authorized.

Whereupon, the meeting was adjourned.

 Martin E. Robins, Director of Planning and Development
 Morris Sloane, Director of Aviation Operations
 Victor T. Strom, Director of Public Safety
 Joseph L. Vanacore, Assistant Executive Director/Capital Programs
 Barry Weintrob, Chief Financial Officer
 Marvin E. Weiss, Director, Office of Minority Business Development

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of December 10, 1987. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey has expired.

Whereupon, the Board unanimously approved these Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on January 14, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on January 14, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on January 14, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on January 14, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 1/14/88)

**Authorization to Study Alternatives to Meet Future
Transportation Needs Between Staten Island and New
Jersey**

The increasing integration of the metropolitan area economy across state lines has focused attention on the interstate roadway network and on the Port Authority's vehicular crossings which are key elements of that network. Projected growth in the economy and labor force of the region will cause significant traffic growth on the roadway network, including the Port Authority's crossings. In recognition of this, the Governors of New York and New Jersey earlier this year requested that the Port Authority expedite its analysis of the need for additional interstate transportation capacity, including, where necessary, the provision of additional capacity between Staten Island and New Jersey.

Port Authority studies have indicated that future volume growth along with the increasing use of wider trucks will lead to peak period congestion and delays at the Goethals Bridge and Outerbridge Crossings. Of the three crossings which connect Staten Island and New Jersey, the Goethals Bridge and Outerbridge Crossing have experienced significant growth in traffic volumes over the last several years. Staff forecasts that significant growth in traffic will occur over the next ten to twenty years at these bridges and on connecting highways. This will lead to delays and congestion as anticipated volumes will significantly exceed capacity at the Goethals Bridge and nearly reach capacity at the Outerbridge Crossing. Exacerbating this situation is the fact that the bridges, designed in the 1920's, have lanes that are narrow by comparison to the standards of the 1980's. This will reduce operational efficiency as new, wider standard trucks enter the traffic stream in greater numbers.

Pursuant to the two States' Bridge & Tunnel Unification Act, and in view of the future traffic problems which are anticipated at the Goethals Bridge and Outerbridge Crossing, it is appropriate that a study be undertaken to determine the most feasible plan for meeting future needs. The study will include, among other relevant concerns, environmental impact analyses. In connection with the study, staff will endeavor to negotiate rights of entry onto various properties for the purpose of surveys and other examinations, such as geotechnical and environmental studies, borings, test pits and samplings, etc. However, if necessary, the Port Authority's statutory rights of entry may be exercised. As part of the effort to assure coordinated regional planning members from several key transportation agencies, from both New York and New Jersey, have agreed to participate on an interagency working committee throughout the study period.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the conduct of a study on the necessity for and practicability of alternatives to meet future transportation needs between New Jersey and Staten Island pursuant to the legislative mandate of the Bridge and Tunnel Unification Act, the study to include, for planning purposes only, the obtaining of property surveys, title searches and negotiating or exercising statutory rights of entry.

(Board - 1/14/88)

**Port Authority Auto Marine Terminal - Greenville - Amendment
of Lease with BMW of North America, Inc.**

It was recommended that the Board authorize the Executive Director for, and on behalf of the Port Authority, to enter into an agreement amending the Port Authority's lease with BMW of North America, Inc. ("BMW") at the Port Authority's Auto Marine Terminal at Greenville, Jersey City, New Jersey, to allow BMW to assume responsibility for certain aspects of the development of the Auto Marine Terminal. The agreement would cover the performance by BMW of design and construction management services for certain paving, utilities, and related work at an estimated cost to the Port Authority of \$300,000 and the performance of this work by BMW at an estimated cost to the Port Authority of \$5 million.

The work to be covered by this agreement constitutes part of the \$31 million Port Authority Auto Marine Terminal project previously authorized by the Board, which the Port Authority is obligated to perform pursuant to its lease with BMW. Performance of the work by BMW would expedite certain aspects of the development of the project which must be in place for BMW to operate the Regional Vehicle Preparation Center and Multi-Level Storage Garage which it intends to build on its premises under the lease.

BMW's assumption of these obligations will render null and void the provisions of the lease providing for the postponement of the rent commencement date if the Port Authority does not complete construction of that portion of the paved access route from the Port Jersey berth to BMW's premises which is located between Port Jersey Boulevard and the premises, and does not bring water, sewer and storm damage connections to the premises. The rent commencement date would still be subject to postponement if the Port Authority does not complete construction of the other work which it agreed to perform pursuant to the lease.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized for, and on behalf of the Port Authority, to enter into an agreement with BMW of North America, Inc. amending the Port Authority's lease with BMW of North America, Inc. substantially in accordance with the terms and conditions set forth above, the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 1/14/88)

**Elizabeth-Port Authority Marine Terminal Amendment of Lease
(EP-144) with Atlantic Container Line BV - to Lease of
Paceco Portainer Crane No. 282**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement amending the Port Authority's terminal lease with Atlantic Container Line BV ("ACL") at the Elizabeth Port Authority Marine Terminal to cover the leasing to ACL of Paceco Portainer Crane No. 282 owned by the Port Authority for a term commencing on or about February 1, 1988 and continuing for the approximate thirteen year balance of the terminal lease at a rental at the rate of approximately \$252,586 per year. ACL will have the right to separately terminate the leasing of the crane effective as of September 30, 1992 or September 30, 1997 by giving eighteen months' prior written notice.

This arrangement will allow ACL to operate and maintain a Port Authority asset that will enhance ACL's operational flexibility and allow for an increase in tonnage moving through the Facility. ACL will be permitted to use a portion of its \$4 million commitment for terminal improvements for any necessary modifications to the crane.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized for and on behalf of the Port Authority, to enter into an agreement with Atlantic Container Line BV amending the Port Authority's lease with Atlantic Container Line BV substantially in accordance with the terms and conditions set forth above, the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 1/14/88)

**Expansion of Foreign-Trade Zone No. 49 to Include the Port
Jersey/Greenville Properties in Bayonne and Jersey City,
New Jersey**

Foreign-Trade Zone status for Port Jersey/Greenville would provide an effective marketing tool to attract potential automobile companies, manufacturers, and developers, who would benefit through the deferral, reduction, and/or elimination of U.S. Custom duties.

The total acreage involved is 195 acres. Of that, 145 acres will be developed as an imported automobile unloading and preparation center and the remaining 50 acres will be used for future development. Foreign-Trade Zone status of the imported automobile marine terminal would enable automobile importers and manufacturers to: defer U.S. Customs duty payments through the storage of parts and finished cars; reduce duty payments on imported car parts and accessories which are incorporated into a car; and eliminate duty payments altogether on cars re-exported from the Zone.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and hereby is authorized to file an application with the Foreign-Trade Zones Board of the United States Department of Commerce for the expansion of Foreign-Trade Zone No. 49, which consists of 2100 acres at the Port Newark/Elizabeth-Port Authority Marine Terminal, to include the Port Jersey/Greenville properties comprising 195 acres in Bayonne and Jersey City, New Jersey.

(Board - 1/14/88)

**Port Authority Bus Terminal - Improvements and Modernization
South Wing - Rehabilitation of 3rd and 4th Floor
Unloading Platforms - Contract BT-190.066 - Award**

In 1981, the Board authorized a project to improve and modernize the Port Authority Bus Terminal at a total estimated project cost of \$36.5 million.

Contract BT-190.066, the last contract to be awarded under this authorization, provides for the general rehabilitation of the 3rd and 4th floor unloading platforms in the South Wing of the Bus Terminal, including tiling floors and walls, ventilating the 3rd floor, new lighting and signing, new stairs between the 2nd and 3rd floors and new terrazzo flooring for portions of the 2nd floor (Suburban Concourse).

The contract also provides for the replacement of cracked brick masonry in stair and escalator enclosures on a net cost basis presently estimated at roughly \$20,000.

Additionally, the contract provides that the bidder will use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

The contract was publicly advertised and bids were received on January 5, 1988. Hercules Construction Corp. was the low bidder and was determined to be qualified to perform the contract by the Chief Engineer.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract BT-190.066 to Hercules Construction Corp., the low bidder, in the amount of \$2,222,000 to order extra work up to \$225,000 and to order net cost work.

The World Trade Center - Expansion of Condenser Water Systems Project Authorization

One of the World Trade Center's competitive advantages as rental property is its ability to provide tenants with air-conditioning on a 24-hour per day, seven days per week basis. Standard office air-conditioning is provided via the World Trade Center's chilled water system. The tenants' additional cooling for their proprietary equipment is provided via the condenser water systems. Tenants requiring condenser water presently pay a fee to the Port Authority of approximately \$1,000 per ton, per year based upon the rating of their connected air conditioning load.

The existing condenser water systems are currently operating at full capacity. Increased demands by new and existing tenants for more condenser water in both One and Two World Trade Center have made it necessary to expand the systems to meet current increased tonnage requirements and to have the ability to expand the systems in the future as the need arises.

It is estimated that this investment for the towers will allow us to meet tonnage requirements through year-end 1988 and will enable staff to accomplish modifications and/or expansion of the systems which are determined to be necessary to supply additional tonnage requirements needed to meet further tenant demands. Four condenser water systems, two in each tower, are presently capable of supplying 1,100 tons of condenser water in each tower. The planned expansion will enable the systems to supply an additional 550 tons of condenser water in each tower.

Swiss Bank Corporation International Securities, Inc. (SBCIS) the lessee of approximately 50,000 square feet of space in One World Trade Center, requires supplementary air-conditioning for half of their space. In order to accommodate them prior to completion of the expansion of the condenser water systems in November 1988, SBCIS has arranged to temporarily connect to base building chilled water. SBCIS will perform a portion of the construction of the condenser water expansion. As this construction work would have been performed at the cost and expense of the Port Authority, the Port Authority will grant SBCIS a credit in an amount not to exceed \$460,000 by providing additional base building chilled water to the lessee.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize: (1) a project at the World Trade Center to expand the existing condenser water systems at a total expenditure not to exceed \$10.0 million, including payments to contractors, allowances for extra work and net cost work, engineering, administrative and financing expenses and a project contingency; (2) the Executive Director to: (a) take such action with respect to purchase or construction contracts for the foregoing project as he deems in the best interest of the Port Authority, including without limitation award to the contractor submitting the lowest proposal, who in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose proposal price the Executive Director deems reasonable, rejection of all proposals, solicitation

of new proposals on revised or the same requirements, or negotiation with one or more contractors, and (b) execute contracts and supplemental agreements with such contractors as he deems in the best interest of the Port Authority and to order extra work and net cost work in connection with each contract, including supplemental agreements thereto; and (3) the Executive Director, for and on behalf of the Port Authority, to enter into an agreement with the lessee Swiss Bank Corporation International Securities Inc. whereby the lessee will perform construction work in connection with the condenser water expansion and the Port Authority will grant the lessee a credit in an amount not to exceed \$460,000 by providing additional base building chilled water to the lessee; the form of such agreement shall be subject to approval of the General Counsel or his designated representative.

(Board - 1/14/88)

**The World Trade Center and Port Authority Bus Terminal -
Revised Rules and Regulations**

The Board was requested to authorize revisions to the existing Rules and Regulations governing the use and occupancy of the World Trade Center and the Port Authority Bus Terminal.

The Revised Rules and Regulations will allow staff to operate these facilities in a safe and efficient manner and continue to provide optimum levels of service to the patrons and tenants. Together with the comprehensive program developed and implemented to respond to the homeless and the unique operational and maintenance problems associated with the conduct of some World Trade Center and Bus Terminal patrons, the revised Rules and Regulations will allow staff to more effectively supervise and coordinate facility operations and thereby provide the public with a safe, well-ordered Bus Terminal and World Trade Center.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board hereby adopts the "World Trade Center and Port Authority Bus Terminal, Revised Rules and Regulations" (attached hereto), for the safe and efficient operation thereof, effective January 14, 1988.

RULES AND REGULATIONS
FOR THE WORLD TRADE CENTER

1. **Permission granted to use World Trade Center conditional.** Permission granted by the Port Authority directly or indirectly, expressly or by implication, to any person or persons, to enter upon or use any part of the World Trade Center (including lessees and other persons occupying or using space at the World Trade Center, persons doing business with the Port Authority or with its lessees or permittees, and all other persons whatsoever whether or not of the type indicated), is conditioned upon compliance with the Port Authority rules and regulations as from time to time may be changed; and entry upon or into the World Trade Center by any person shall be deemed to constitute an agreement by such person to comply with said rules and regulations.
2. The Manager of the World Trade Center shall have authority to deny the use of the Center to any person violating the said Rules and Regulations or laws, ordinances or regulations of the United States, the State of New York, or the City of New York.
3. **Entry restrictions.** Persons shall use the common areas and facilities in the World Trade Center solely for purposes of ingress and egress, and no person shall cause any obstruction of or loiter in any such common area or facility. No person shall interfere with the safe, orderly flow of vehicular or passenger traffic. No person shall be permitted to sleep, lie down or sit on the floor, ledges, platforms, steps or escalators nor erect any unauthorized permanent or temporary structure at the World Trade Center without the express written permission of the Manager. In addition, no person shall spit, urinate or defecate on any part of the World Trade Center other than in a urinal or toilet intended for that purpose. No person shall enter upon any court or roof area or parking area unless specifically so authorized by lease, permit, license or other agreement with the Port Authority. The Port Authority may exclude from buildings at the World Trade Center, between the hours of 6 p.m. and 8 a.m. and at all hours on Saturdays, Sundays and legal holidays, all persons who do not present a pass to the World Trade Center. All such passes shall be in such form as the manager of the World Trade Center may prescribe from time to time and no person shall issue passes unless authorized in writing by the manager to do so. Any area barricaded, roped off or otherwise restricted, shall be presumed to be closed to the public and members of the public are prohibited from entering said areas without the express permission of the Manager or his designee. Furthermore, if the Port Authority deems it advisable for security reasons, occupants of space at the World Trade Center and persons frequently doing business there shall provide and their employees shall wear or carry badges or other suitable means of

identification which shall be subject to the prior approval of the Port Authority. Each person responsible for issuance of a pass or other means of identification to another person shall be liable to the Port Authority for all acts or omissions of such other persons.

4. No person shall gamble or conduct or engage in any game of chance at the World Trade Center unless such game of chance is permitted by local, state and federal law and has been approved by the Manager.

5. No person may for commercial use make drawings or take still photographs or motion pictures within the World Trade Center without permission of the manager.

6. No persons other than authorized persons or employees of the Port Authority in designated areas, shall bathe, shower, shave, launder or change clothes or remain undressed in any public restroom, sink, washroom on or within the World Trade Center.

7. Authorization required for commercial activity, entertainment or solicitation of funds. No person at the World Trade Center, unless duly authorized in writing by the Port Authority, shall

(a) sell, or offer for sale any articles of merchandise or carry on any other commercial activity; or

(b) solicit any business or trade, or perform or offer to perform any service, including without limitation thereto the carrying of baggage for hire, the shining of shoes or bootblacking; or

(c) entertain or offer to entertain any persons by any method including without limitation thereto by singing, dancing or playing any musical instrument; or

(d) canvass, peddle, or solicit funds for any purpose.

8. Alcoholic Beverage Restrictions - No person shall drink or carry any open alcoholic beverage on any part of the World Trade Center; provided, however, that this section shall not apply to those premises or areas wherein the consumption of alcoholic beverages is permitted pursuant to the provisions of a lease or other written agreement with the Port Authority.

9. Permission required for posting or distribution of printed matter, etc. No person shall post, distribute, exhibit, inscribe, paint or affix (nor shall any person cause, direct or order the posting, distributing, exhibiting, inscribing, painting or affixing of) signs, advertisements, circulars, notices, posters, or printed or written or pictorial matter or articles or

objects of any kind at, in, on or to any part of the common areas and facilities of the World Trade Center without the prior written consent of the manager of the World Trade Center. In the event of the violation of the foregoing, the Port Authority may remove the same without any liability, and may charge the expense and cost incurred for such removal to the person or persons violating this rule.

10. **Property Damage.** No person shall deface, mark, break or otherwise damage any part of the World Trade Center or any property thereat. No person shall remove, alter or deface any barricade, fence or sign at the World Trade Center.

11. All persons at the World Trade Center shall exercise the utmost care to avoid and prevent injury to persons and damage to property. Neither any inclusion in nor any omission from these Rules and Regulations shall be construed to relieve any person from exercising the utmost care to avoid and prevent injury to persons and damage to property.

12. **Lost articles to be turned over to Port Authority.** Persons finding lost articles at the World Trade Center shall turn them over to a Port Authority policeman or to the office of the manager. Articles which are not claimed by the owner within 90 days may be turned over to the finders thereof, unless found by Port Authority employees.

13. **Animals and pets, barred, exception.** No person except a police officer or other person authorized by the manager of the World Trade Center shall enter in or upon the World Trade Center with any animal or pet of any kind except a "seeing eye" dog or an animal properly confined for shipment.

14. **Requests for Port Authority employees to perform work or services to be directed to manager.** No person shall request any Port Authority employee to do any work or perform any service, but shall make all such requests to the manager of the World Trade Center, who may not comply with the request unless the person making the request is entitled to receive the service at the time the request is made, under written agreement with the Port Authority, and each person claiming to be so entitled shall make known such fact to the manager when the request is made.

15. **Smoking, operation of cutting torches and like devices restricted.** No person shall smoke or carry lighted cigars, cigarettes, pipes, matches or any naked flame in any place where smoking is specifically prohibited by signs, and no person shall operate at the World Trade Center an oxyacetylene torch, electric arc or similar flame or spark producing device, cook or light a fire or otherwise create a fire or life safety hazard on any part of the World Trade Center. No person shall tamper with or permit to be done anything which may interfere with the effectiveness or accessibility of any fire prevention, warning or extinguisher equipment at the World Trade Center nor use the same for any

purpose other than fire fighting or fire prevention. Tags showing date of last inspection attached to units of fire extinguishing and fire fighting equipment shall not be removed therefrom, except by authority.

16. Transportation, storage, etc. of certain materials and substances prohibited. No person shall store, keep, carry, handle, use, dispense or transport at, in or upon the World Trade Center, or bring into the World Trade Center for any purpose:

(a) any flammable, combustible, explosive, corrosive, oxidizing, poisonous, compressed or otherwise offensive fluid, gas, chemical substance or material, at such time or place or in such manner or condition as to endanger unreasonably or as to be likely to endanger unreasonably persons or property; or

(b) any firearms or any other weapons, except persons carrying firearms pursuant to and in compliance with law and all licenses, permits, etc. in connection therewith including such of the following as may be on official duty: authorized peace officers, post office, customs or express carrier employees or members of the armed forces of the United States; or

(c) the following radioactive materials:

(1) source material (as defined in Standards for Protection Against Radiation, promulgated by the Atomic Energy Commission, Title 10, Code of Federal Regulations, Part 20) including but not limited to uranium, thorium, or any combination thereof (but not including the "unimportant quantities of source material" set forth in 10 CFR 40.13);

(2) special nuclear material (as defined in Standards for Protection Against Radiation, promulgated by the Atomic Energy Commission, Title 10, Code of Federal Regulations, Part 20) including, but not limited to, plutonium, uranium, 233, uranium enriched in the isotope 233 or in the isotope 235, or any material artificially enriched by any of the foregoing;

(3) nuclear reactor fuel elements that are partially expended or irradiated;

(4) new nuclear reactor fuel elements;

(5) radioactive waste material; or

(6) any radioactive material moving under an Interstate Commerce Commission special permit or Atomic Energy Commission permit and escort.

17. Tampering with controls, equipment, etc. prohibited. No person shall tamper with or permit to be done anything which

may interfere with the effectiveness or accessibility of any World Trade Center controls, machinery or equipment including without limitation thereto thermostats, heater valves, sprinkler valves and devices, or blower motors, and no person shall turn on or off heating or air cooling controls in the World Trade Center or operate, adjust or otherwise handle or manipulate any of the aforesaid systems or portions thereof or operate any other equipment, machinery or other devices installed or located therein unless expressly authorized in writing by the Port Authority to do so.

18. Overloading of utility, mechanical, etc., systems prohibited. No person shall keep, maintain, place or install, use or connect at the World Trade Center any equipment or engage in any activity or operation at the World Trade Center which will cause or tend to cause an overloading of the capacity of any electrical circuit or system or portion of any other utility, mechanical, electrical communication or other systems serving the World Trade Center, nor do or permit to be done anything which may interfere with the effectiveness or accessibility of existing and future utility, mechanical, electrical, communication or other systems or portions thereof at the World Trade Center. No person shall in any common area plug a TV, radio or electrical device into any electrical outlet or connect any device to any utility at or in the World Trade Center without the express written approval of the Manager.

19. Obstruction of expansion or contraction joints prohibited. No person shall place any furniture, machine or equipment over any expansion or contraction joint unless one end of such furniture, machine or equipment is free to permit expansion or contraction.

20. Permission required for installations or operation of certain equipment. No person shall install or use at the World Trade Center except with the prior written consent of the manager of the World Trade Center, any air conditioning unit or equipment, refrigerator, heating or cooking apparatus or other power-activated equipment or any signal or call system or other communication systems or equipment or any device which connects to the power or other lines for signal or communications or other transmissions in any way whatsoever. No person shall install or operate at the World Trade Center any device which may in the Port Authority's opinion interfere with or impair any radio, television or telephone transmission or reception or any other communication service.

21. Permission required to lay floor covering. No person shall lay any linoleum, floor tile, carpeting or any other affixed floor covering at the World Trade Center without the prior written consent of the manager of the World Trade Center and if such consent is given such directions as the Port Authority may give as to methods and procedures to be used in the laying and installing of any such floor covering shall be followed.

22. **Locks and keys.** No person shall place any additional lock of any kind upon any window or interior or exterior door without the prior written consent of the manager and unless a key therefor is delivered to the Port Authority, nor make any change in any door or window lock or the mechanism thereof, except with the prior written consent of the manager. Upon the expiration or sooner termination of any agreement covering occupancy of space, the occupant shall surrender to the Port Authority any and all keys to interior and exterior doors or windows, whether said keys were furnished to or were otherwise procured by occupants and in the event of the loss of any keys furnished by the Port Authority the occupant shall pay to the Port Authority the Port Authority's cost of replacement thereof.

23. **Obstruction light, air, heat, etc. passage prohibited.** No person shall obstruct or permit the obstruction of light, air or passage in the World Trade Center, or cover or obstruct any elements of the heating, ventilating or air cooling systems therein. In addition no person shall place any window coverings including without limitation thereto, curtains, blinds, shades, draperies or screens on any exterior window, without the prior written consent of the manager of the World Trade Center, but all occupants of space shall provide and install, at their expense, such draperies as the Port Authority may in its discretion require or approve, and all occupants of space shall keep the draperies closed whenever the sun is shining on the windows.

24. **Approval required for certain service contracts.** No person shall purchase or contract for spring water, ice, waxing, rug shampooing, draperies, towels, cleaning, glass washing, furniture polishing, lamp servicing, cleaning or electric fixtures, removal of waste paper, rubbish and garbage, or other like services at the World Trade Center except from contractors, companies or persons approved by the Port Authority.

25. **Measures required to eliminate damaging vibrations.** All persons in their operations and use of space at the World Trade Center shall take all reasonable measures to eliminate vibrations tending to damage any part of the World Trade Center.

26. **Objectionable noise prohibited.** No person shall make, continue, cause or permit to be made or continued, any objectionable or disturbing noises or disturb or interfere with occupants of the World Trade Center or neighboring buildings or premises, whether by the use of any loudspeaker or other amplifying device, musical instrument, radio, talking machine, television, unmusical noise, whistling, singing, or in any other way. Nothing in this section shall affect the right of the Port Authority to authorize commercial activity, entertainment or solicitation of funds as provided in Section 1290.3.

27. **Acts or omissions resulting in filing of liens prohibited.** No person shall do or omit to do anything which may be ground for the filing of any mechanic's or other lien against the World Trade Center or any part thereof. Nothing herein shall be deemed to be a consent by the Port Authority to any such lien or the filing thereof or any implication that such lien would be valid or enforceable against the Port Authority or its property, but if such lien is filed, notwithstanding that it may be groundless or unenforceable, the Port Authority may take such steps as may be required to remove it including payment of any debts alleged to be owed by any person and such person shall pay the Port Authority the Port Authority's cost thereof upon demand.

28. **Names of persons to be notified in event of emergency to be filed.** Each occupant of space at the World Trade Center shall file with the Port Authority the name, address, and telephone number of at least two authorized representatives to be notified in the event of an emergency.

29. **Doors, windows to be locked and utility services turned off upon leaving.** All occupants of space at the World Trade Center shall before leaving the same at any time, close and lock all entrance doors therein and turn off all utility services controllable by the occupant.

30. **Use of premises for lodging, sleeping or immoral purposes prohibited.** No occupant of space at the World Trade Center shall use the same for lodgings or sleeping purposes or for any immoral purposes.

31. **Use of premises during other than normal business hours.** When an occupant of space at the World Trade Center intends to occupy the space during hours other than normal business hours, the occupant shall make a request in writing, for such of those services which the occupant is entitled to receive during normal business hours as the occupant may desire during hours other than normal business hours, each such request to be made by 4 p.m. of the last business day before each day during which the services are desired. Such services will be provided and paid for by the occupant in accordance with the schedule of rates established by the Port Authority from time to time and the occupant agrees that the Port Authority has made no representations or warranties that the premises will be habitable or usable by the occupant during other than normal business hours unless the aforesaid services are requested in advance by the occupant. An occupant of any space at the World Trade Center shall advise the manager of the World Trade Center one day in advance of any occasion when the space he occupies will not be occupied during normal business hours because of vacations or special holidays.

32. **Sidewalks, open areas, etc. to be kept free from snow, ice, dirt and rubbish.** All persons occupying at the World Trade Center any space which has an entrance or exit opening out on a

sidewalk or other open area, shall keep all sidewalks, open areas, curbs, lobbies, vestibules and steps adjacent to such space free from snow, ice, dirt and rubbish.

33. No person shall abandon any property at the World Trade Center. Nor shall any person for himself, herself or another store either temporarily or permanently any personal property at any part of the World Trade Center without the approval of the Manager of the facility. No person shall store bundles, paper, cloth, cardboard or any other material in solid, liquid or gas form that could in any way pose a fire or lifesafety hazard or obstruct or hinder passage without the express, written approval of the Manager.

34. Accumulation and disposal of garbage, debris, waste, etc. restricted. No person shall allow any garbage, debris, or other waste materials (whether solid or liquid) to collect or accumulate at the World Trade Center and each person shall be responsible for the removal from the World Trade Center of all garbage, debris and other waste materials (whether solid or liquid) arising out of that person's operations or occupancy or use of space at the World Trade Center. All persons shall use extreme care when effecting removal of all such waste and in no event shall any person use for such purpose any facilities of the Port Authority without the prior consent in writing of the manager of the World Trade Center. All persons shall effect such removal only during such hours and by such means as are prescribed by the manager of the World Trade Center. No person shall use the water closets, wash bowls or other plumbing fixtures for any purposes other than those for which they were designed, and no person shall throw therein any improper articles or substances (whether liquid or solid) including without limitation thereto garbage, refuse, sweepings, rubbish, rags, ashes, or litter. No person shall drop or throw anything out of the doors, windows or down the passageways or into any ventilating or elevator shaftway, stairwell or other openings. The cost of correcting any condition or repairing any damage resulting from misuse of fixtures or facilities or from other actions prohibited herein shall be borne by the persons who, or whose officers, employees, representatives, agents, contractors or invitees, have caused the same.

35. **Trash Removal.** All persons at the World Trade Center are responsible for providing for their own trash disposal to a compactor provided by the manager for this purpose. No other method of trash disposal is permitted without the express written consent of the manager.

36. **Movement of inventory, supplies, equipment, furnishings, etc. restricted.** No person shall move inventory, merchandise, supplies or materials, fixtures, equipment, furnishings, or bulky articles of any kind, including without limiting the generality thereof desks, chairs, tables, safes, cabinets, shelves, business machines, fans or floor coverings, to

or from any space at the World Trade Center except with the prior written consent of the manager of the World Trade Center and during such hours on such days as may be prescribed by the manager of the World Trade Center. In no event will consent be given unless the person employed or under contract to perform such moving is competent and responsible and at least 24 hours' notice of the person's desire to have such moving performed has been given in writing to the manager of the World Trade Center. No person shall use hand trucks in the passenger elevators or shall use the passenger elevators to transport freight or bulky packages of any type without the written consent of the manager of the World Trade Center.

37. Right reserved to inspect freight, articles, packages, etc. brought in or out. The Port Authority reserves the right to inspect all freight and other articles including hand-carried packages brought into or out of the World Trade Center and to exclude therefrom all articles which violate any of these rules and regulations, and to require the occupants of space and others regularly doing business at the World Trade Center to issue package passes (in such form as may be approved by the Port Authority) for packages being carried to or from, or from one location to another within the World Trade Center.

38. Elevator service. (a) Non-exclusive automatic passenger elevator service will be operated during normal business hours.

(b) Minimal passenger elevator service will be available at times other than normal business hours for persons who may have business in the World Trade Center during such times and whose presence in the center is duly authorized in the manner the Port Authority prescribes.

(c) Freight elevators and truck docks will be available for routine movements during normal business hours. Notice must be given within normal business hours to the manager of the World Trade Center at least 24 hours in advance in the event freight elevator service is desired which cannot be accommodated as a routine movement or during normal business hours. The person requesting the same will pay the cost for this extra freight elevator service in accordance with the schedule of rates established by the Port Authority from time to time. Persons for whose account property is being delivered or picked up at the truck docks shall arrange for such delivery or pick-up to be made only at such place or places as may be designated by the Port Authority for such purposes and shall arrange for the handling and movement of the property in such a way that it will be removed from the truck docks immediately upon its arrival there and such persons shall not allow any property to be placed or transported at any time in any common area or facility at the World Trade Center unless the area or facility is one which the manager has designated as a proper area or facility for that type of property or transportation or to remain therein for a longer

time than is necessary to transport it to its destination. The Port Authority will not be responsible for the custody, security, handling or movement of property while at the truck docks or on the freight elevators or while en route to or from either of the same and the person for whose account property is being delivered or picked up at the truck docks or is being transported on, to or from freight elevators shall make all arrangements for loading, unloading, handling and movement of the property and its security including keeping the property attended at all times. Property may be moved within the World Trade Center solely by suitable vehicles of the indoor industrial wheeler type with rubber tire and side guards and by way of such routes as the manager may designate from time to time.

39. Operation of elevators by persons other than Port Authority employees prohibited. No person other than employees of the Port Authority, or their designee, shall operate any freight elevator or passenger elevator (except for the operation in automatic passenger elevators of such controls as are designed for use by passengers) at the World Trade Center.

40. Use of elevators, escalators and loading docks restricted. (a) Passenger elevators and escalators may not be used to carry freight.

(b) The use of any escalator, elevator, private right-of-way or truck loading dock at the World Trade Center will be subject to the direct control of the manager.

(c) No unauthorized person shall cause an elevator or escalator to stop by means of any emergency stopping device unless continued operation would appear to result in probable injury to a person or persons. Any such stopping should be reported immediately to the manager.

41. Vehicular traffic restricted. No person shall (nor shall any occupant of space at the World Trade Center permit its officers, employees, agents, representatives of other persons who are connected with or are doing business with such occupant or who are at the World Trade Center for the purpose of visiting such space, to) operate any automotive or other vehicle (including skateboard, rollerskates or bicycle, scooter or any self propelled vehicle or device) in any area of the World Trade Center not designated for such use, or operate the same in any vehicular roadway, parking area, public area or street, in or adjacent to the World Trade Center, or park or allow any vehicle to stand in any such roadway, area or street except in accordance with such signs, speed limits, lights, signals, pavement markings, directions, laws, ordinances, rules and regulations (of the Port Authority or of such other agency, municipality or other governmental authority having jurisdiction) as may be in force from time to time. No person shall park vehicles except in those portions of the parking area designated for that purpose by the Port Authority and except upon payment of such parking fees and

charges as may from time to time be prescribed and if specific space is assigned to that person then only in the space so assigned. In the event that a person shall park in any space other than the specific space assigned to that person then that person shall pay to the Port Authority upon demand \$25 per day per car parked in any area other than those designated.

42. Disabled, abandoned or illegally parked vehicles subject to removal. The manager may remove from any area at the World Trade Center any vehicle which is disabled, abandoned, parked in violation of these rules and regulations, or which presents an operational problem to any area at the World Trade Center, at the operator's or owner's expense and without liability for damage which may result in the course of such moving.

43. Operation of motor vehicles. No person shall operate a vehicle at the World Trade Center in a careless or negligent manner or in disregard of the rights and safety of others, or without due caution or circumspection, or at a speed in excess of speed limits posted in the area where the vehicle is being operated, or in any event a speed in excess of fifteen (15) miles per hour, or at any speed or in a manner which endangers unreasonably or is likely to endanger unreasonably persons or property, or while the driver thereof is under the influence of intoxicating liquor, or any narcotic or habit-forming drug or if such vehicle is so constructed, equipped or loaded as to endanger unreasonably or be likely to endanger unreasonably persons or property, or unless (a) the driver thereof is duly authorized to operate such vehicle on State or municipal highways; and (b) such vehicle is registered in accordance with the provisions of law.

44. Duty of driver of vehicle involved in accidents. The driver of any vehicle involved in an accident at the World Trade Center which results in injury or death to any person or damage to any property shall immediately stop such vehicle at the scene of the accident, render such assistance as may be needed, and give his name, address, and operator's license and registration number to the person injured or to any officer or witnesses of the injury. The operator of such vehicle shall make a report of such accident in accordance with the law of the State.

45. Definitions. As used in these rules and regulations:

(a) Holidays or legal holidays shall mean and include the following days in each year: the first day of January, known as New Year's day; the eighteenth day of January, known as Martin Luther King, Jr. day; the twelfth day of February, known as Lincoln's birthday; the third Monday in February, known as Washington's birthday; the last Monday in May, known as Memorial day; the fourth day of July, known as Independence day; the first Monday in September, known as Labor day; the second Monday in October, known as Columbus day; the fourth Monday in October, known as Veteran's day; the fourth Thursday in November, known as

Thanksgiving day; and the twenty-fifth day of December, known as Christmas day; and if any of such days is Sunday, the next day thereafter; and each general election day in the State of New York; and such other or different days or dates as are declared "holidays" or "legal holidays" under the laws of the State of New York or as may hereafter be so declared.

(b) Normal business hours shall mean 8 a.m. to 6 p.m. Mondays to Fridays inclusive, legal holidays excepted.

(c) Person or persons shall mean and include natural persons, corporations and other legal entities, whether foreign or domestic, sovereign states and governments, governmental and quasi-governmental authorities, bureaus, agencies, boards and other units of governments, and partnerships, firms, companies, joint ventures and unincorporated associations. All persons shall be responsible for the acts or omissions of their officers, members, employees, agents, representatives, contractors, customers, guests, invitees, and those doing business with them.

(d) Manager or manager of the World Trade Center shall mean the person or persons from time to time designated by the Port Authority to exercise the powers and functions vested in the said manager by these rules and regulations and shall include a temporary or acting manager of the World Trade Center for the time being and his duly designated representative or representatives.

(e) Common areas and facilities shall mean and include without limiting the generality thereof, entrances, exits, lobbies, toilets, passages, halls, corridors, courts, plazas, vestibules, stairways and elevators, escalators and other areas and facilities for the movement of persons and property.

(a)

REVISED RULES AND REGULATIONS
FOR PORT AUTHORITY BUS TERMINAL

PURPOSE

1. Purpose. These rules are established by the Port Authority of New York and New Jersey to facilitate the proper use of the Port Authority Bus Terminal and to protect the terminal and its patrons.

DEFINITIONS

2. Definitions. As used herein:

(a) Bus shall mean a self-propelled highway vehicle designed and constructed for the carriage of passengers for hire, employing as a source of motive power (either directly or by electrical transmission) a reciprocating internal-combustion or a turbine engine (not including a jet-propulsion engine) utilizing as fuel gasoline, diesel oil, or any other substance utilized by highway vehicles for fuel and permitted both by the laws of New York and by those of New Jersey then in effect and also under the then existing rules and regulations governing the use of the Lincoln Tunnel (and then only in strict compliance with the requirements of such laws, rules and regulations), and having overall dimensions not in excess of the following: length, 60 feet; width, 102 inches; height, 11 feet six inches and having a maximum gross loaded weight not in excess of 42,000 (unladen weight) pounds avoirdupois, distributed to provide not more than

(b)

20,000 pounds per axle. Articulated buses up to 65 feet overall length shall, for the purposes of these regulations, be included in the definition.

(b) Carrier shall mean an operator of one or more vehicles for the transportation of passengers for hire.

(c) Driver shall mean the person who is in actual physical control of a vehicle.

(d) Express shall mean and include property other than baggage, mail, manifest baggage and newspapers, transported or to be transported by a carrier in accordance with its published tariffs, and shall be defined as defined in the published tariffs of any carrier, except that it shall not include acid, animals, articles packed in wet ice or water, dangerous articles, explosives, gases, inflammable materials, intoxicating beverages, jewelry, lottery tickets, materials having or capable of producing strong, offensive odors, meat, meat products, money, securities, watches, or wet batteries; provided, however, that by notice given within 60 days after the effective date of any reissue, revision or supplement of a tariff of any carrier, the Port Authority may exclude therefrom any article, material or thing listed therein for the first time; and provided, further,

(c)

that express shall not include any parcel or piece the overall dimensions of which are greater than 24 inches by 24 inches by 45 inches.

(e) Highway vehicle shall mean and include an automobile, a bus, a truck, a tractor equipped with rubber tires, a trailer, or a semi-trailer.

(f) I.C.C. regulations shall mean regulations of the Interstate Commerce Commission in effect on the effective date hereof issued under the authority of the Interstate Commerce Commission.

(g) Manifest baggage shall mean and include property checked through on the line of any carrier (or of a carrier connecting with any carrier) on a ticket or tickets for passenger transportation, in accordance with and as defined by local and joint baggage tariff 500-G of the Interstate Commerce Commission, issued June 15, 1949 and effective July 20, 1949, as the same may be hereafter supplemented or amended; provided, however, that by notice given to the carrier within 60 days of any supplement, revision or reissue of the tariff of such carrier, the Port Authority may exclude any article, material or thing therein listed for the first time.

(h) Parking shall mean the halting of a vehicle on a roadway or other area while not actually engaged in receiving or discharging passengers, except when halted in obedience to

(d)

traffic regulations, signs or signals, and without regard to the presence or absence of the driver.

(i) Permission shall mean permission granted by the manager except where otherwise specifically provided.

(j) Person shall mean any individual, firm, partnership, corporation, or incorporated or unincorporated association, and shall include any assignee, receiver, trustee, executor, administrator or similar representative appointed by a court, and shall mean the United States of America or any department of the government thereof, any state or political subdivision thereof, or any foreign government or political subdivision thereof, or the United Nations.

(k) Port Authority shall mean The Port Authority of New York and New Jersey.

(l) Port Authority rules and regulations shall mean the rules and regulations set forth in this Part and all amendments and supplements thereto.

(m) Published tariff; see tariff.

(n) Stand shall mean to halt a bus for the purpose of loading or unloading or for waiting in position for loading or unloading.

(o) Manager of the terminal or manager shall mean the person or persons from time to time designated by the Port Authority to exercise the powers and functions vested in the said

(e)

manager by these rules and regulations, and shall mean the manager or acting manager of the terminal for the time being or his duly designated representative or representatives.

(p) **Tariff or published tariff** shall mean the schedule of rates, terms and conditions of transportation under which a carrier conducts its operation and which has been approved by the Interstate Commerce Commission or by other governmental regulatory body having jurisdiction over the operations of the carrier.

(q) **Terminal** shall mean the two buildings that represent the North and South Wing of the bus facility which are connected above and below West 41st Street. The South Wing shall mean the building on the block bounded by West 40th Street, Ninth Avenue, West 41st Street and Eighth Avenue in the borough of Manhattan, in the City, County and State of New York. The North Wing shall mean the building on a portion of the block bounded by West 42nd Street, Eighth Avenue, West 41st Street and the east face of the building at 330 West 42nd Street in the borough of Manhattan, in the City, County and State of New York. The terminal also includes the overhead viaducts from the South Wing to the west side of 9th Avenue as well as the tunnel leading from the North Wing to Dyer Avenue.

(r) **Vehicle** shall mean and include automobiles, trucks, buses, tractors, trailers, semi-trailers, horse-drawn carts or

(f)

wagons and any other devices in or upon or by means of which any person or property is or may be transported, carried or drawn upon land only, except railroad rolling equipment or other devices designed to operate on stationary rails or tracks.

(s) Vehicular level shall mean and include any floor or story at the terminal designed for use by highway vehicles.

GENERAL

3. Permission to use terminal conditional. Any permission granted by the Port Authority directly or indirectly, expressly or by implication, to any person or persons to enter upon or use the terminal or any part thereof, is conditioned upon acceptance of and compliance with the Port Authority rules and regulations, as from time to time may be changed, and entry upon or into the terminal by any person shall be deemed to constitute an agreement by such person to comply with the said rules and regulations; provided, however, that such rules and regulations will not apply to premises or space occupied or used under the provisions of a written agreement made with the Port Authority unless provision is made therein for the application of the said rules and regulations.

4. Use of terminal may be denied persons violating law or rules. The manager of the terminal shall have authority to deny the use of the terminal to any individual violating Port Authority rules and regulations or laws, ordinances or

regulations of the United States government, the State of New York, or the City of New York.

5. Permission to enter certain areas of the building.

(a) Closed Areas - No person except person assigned to duty therein shall enter without permission any area of the terminal posted as being closed to public.

(b) Restricted Areas - No person shall enter without authorization any area of the terminal posted as restricted unless such person complies with such restriction.

(c) Persons entering the terminal when not fully open for business - During such days and hours as the terminal is partially closed such as late hours of the night and early hours of the morning, any person shall, when entering, remaining, or leaving the terminal, if requested by a Port Authority representative, exhibit such authorization as prescribed by the manager.

6. Abandonment of property prohibited. No person shall abandon any property at the terminal.

7. Permission required to carry on commercial activity. No person shall carry on any commercial activity at the terminal without permission.

(h)

8. Gambling prohibited. No person shall gamble or conduct or engage in any game of chance at the terminal unless such game of chance is permitted by local state and federal law and has been approved by the manager.

9. Permission required to solicit funds or contributions. No person shall solicit funds or contributions for any purpose at the terminal without permission.

10. Permission required to post or distribute commercial signs, advertisements, etc. No person shall post, distribute or display commercial signs, advertisements, circulars or printed or written material within the terminal without permission. The manager of the terminal reserves the right to set standards for the location, appearance, size and content of all signs, posters, notices, displays and advertisements and may prohibit installation of such or subsequent removal, if necessary.

11. Lost Articles. All persons finding lost articles at the terminal shall deliver them to the Parcel Check Room. Articles unclaimed by the owner or owners within three months after the finding thereof will be turned over to the finders, except when found by Port Authority employees on duty.

12. Trash, garbage, waste, etc. to be deposited in receptacles provided therefor. No persons shall throw, discharge or deposit trash, garbage, waste, oil or other petroleum products

(i)

or any other waste material into or upon any portion of the terminal except by depositing such material in receptacles provided therefor. All such receptacles shall be subject to the approval of the manager.

13. Defacing, damaging, etc. terminal or property therein prohibited. No person shall deface, mark, break, or otherwise damage any part of the terminal, or any property thereat.

14. Non-commercial distribution of leaflets, carrying of placards and holding of discussions restricted.

(a) The non-commercial distribution of leaflets, the setting up of card tables to aid in that distribution, the carrying of placards and the holding of discussions with terminal patrons shall be permitted in the following manner at the locations on the subway mezzanine passageway, main floor, second floor and fourth floor and not within 10 feet of an escalator or elevator as designated on a diagram of the terminal on display in the manager's office and on file in the secretary's office. All areas shall be unavailable during major holiday periods, i.e., the periods commencing on the day preceding major holidays (e.g. Friday before Labor Day, day before Thanksgiving, the day

before three-day weekends) through and including the concluding day of the holiday period. The manager may grant exception to this rule for holidays which do not give rise to three-day weekends and for which traffic forecasts indicate that traffic in the terminal shall not substantially exceed that which occurs on a normal day.

(1) Subway mezzanine passageway between North and South Wings. Five persons shall be permitted to distribute leaflets and/or carry placards and hold discussions in this area.

(2) Main Floor

(i) Area A. Six persons shall be permitted to distribute leaflets, carry placards and hold discussions. Additionally, these persons may set up two card tables at the location in this area designated on the diagram of the terminal on display in the manager's office and on file in the secretary's office.

(ii) Area B. This area shall be available to eight persons for the distribution of leaflets, the carrying of placards and the holding of discussions. Additionally, these

(k)

persons may set up two card tables in the location in this area designated on the diagram of the terminal displayed in the manager's office and on file in the secretary's office.

(3) Second Floor

(i) Area A. This area shall be available to six persons for the distribution of leaflets, the carrying of placards and the holding of discussions with patrons of the terminal at all times when the area is open to the general public, except when this area is being used as a passenger holding area.

(ii) Area B. Two persons may distribute leaflets and set up one card table to aid in this distribution in the location designated as area B on the diagram of the terminal displayed in the manager's office and on file in the secretary's office. Because of the small size of this area and its proximity to escalators, the area shall be unavailable to these persons for discussions with terminal patrons.

(iii) Area C

(a) This area shall be available to three persons for the distribution of leaflets, the carrying of placards and the holding of discussions with terminal patrons. Additionally, one card table may be set up for the distribution of leaflets at the specified location within area C shown on the diagram displayed in the manager's office and on file in the secretary's office.

(b) This area will be unavailable for these activities when being used as a passenger holding area.

4. Fourth Floor

(i) Area A. This area shall be available at all times to three persons for the distribution of leaflets, carrying of placards and the holding of discussions with terminal patrons. Additionally, one card table may be set up for the distribution of leaflets by these persons in the location designated on area A of the upper bus level shown on the

(m)

diagram of the terminal displayed in the manager's office and on file in the secretary's office.

(ii) Area B. This area shall be available at all times to two persons for the distribution of leaflets, the carrying of placards and the holding of discussions with terminal patrons.

(b) In addition to the above, a total of 10 persons shall be permitted to walk on the concourses and walkways within the terminal which are open to the public, for the purpose of distributing non-commercial leaflets at all times, provided that such activities shall be subject to the limitations described above.

(c) (1) Any person or group who wishes to conduct any of the above activities at the locations specified shall apply to the manager on forms provided by him for this purpose. Application shall be made not less than 36 hours nor more than one week before commencement of the activities. The application shall set forth the type of activities to be conducted, the time, location and duration of the activities, and the name, address and telephone number of the person making the application (in

(n)

case of a group it shall be sufficient to supply the name, address and telephone number of one person who can be contacted if problems arise concerning the grant of the application).

(2) The manager shall grant all such applications on a first come, first served basis so long as the number of persons, the activities and the time, duration and location applied for are in compliance with the provisions set forth in subdivision (a).

(3) The grant of the application by the manager shall be in the form of a permit which shall set forth the number of persons covered by the permit, the activities which are permitted, the permitted time and duration of those activities, and the location at which the activities may be conducted.

(4) The duration of each permit issued shall not be in excess of two weeks. Any person or group may renew a permit for successive two-week periods. Renewal applications shall be made on the same form as new applications and shall be processed as if they were new applications.

(d) No signs, placards or other material shall be affixed to the bus terminal. No leaflets or other

material shall be distributed by leaving them unattended throughout the terminal.

- (e) The manager may refuse the grant of any permit or suspend any permit already granted in the event of emergencies, such as snowstorms, traffic accidents, power failures, transportation strikes or other conditions which render the traffic flow in any of the areas covered by the permit such that conduct of the activities would create a dangerous condition or substantially interfere with traffic in the terminal.

15. Creation of obnoxious odors, noxious gases, smoke or fumes prohibited. No person shall create, or permit any vehicle or machine of which he is in charge to create, obnoxious odors, noxious gases, smoke or fumes in the terminal. The creation of internal-combustion engine exhaust-fumes by vehicles in the terminal, so long as such vehicles are maintained and are being operated in a proper manner, shall not be an infraction of this section. No person shall spit, urinate or defecate on any part of the terminal other than in a urinal or toilet intended for that purpose.

16. Vehicular use of terminal restricted. No person shall travel, or remain on, or shall permit any vehicle of which

he has charge to travel, or remain on, any portion of the terminal except upon the roadways, walks or other places or areas provided for the particular class of traffic. No person shall occupy or shall permit any vehicle of which he has charge to occupy the walks, roadways, entrances, exits, waiting rooms or other areas of the terminal in such a manner as to hinder or obstruct their use by others. Only parties authorized by the manager are permitted to operate vehicles on terminal premises; unauthorized vehicular operation on terminal premises may be considered trespass.

17. Loitering in or about terminal prohibited. No person shall loiter in or about the terminal or any part thereof.

18. Authorization required for sale of merchandise, solicitation of trade, entertainment of persons or solicitation of alms. No person, unless duly authorized by the Port Authority, shall, in or upon any area, platform, stairway, station, waiting room or any other appurtenance of the terminal:

- a) sell, offer for sale any article of merchandise; or
- b) solicit any business or trade, including the carrying of baggage for hire; the shining of shoes or bootblacking; or
- c) entertain any persons by singing, dancing or playing any musical instrument; or
- d) solicit alms

19. Persons unable to give satisfactory explanation of presence prohibited from loitering in terminal. No person, who is unable to give satisfactory explanation of his presence, shall

loiter in or about any toilet, area, station, station platform, waiting room or any other appurtenance of the terminal. No person shall bathe, shower, shave, launder or change clothes or remain undressed in any public restroom, sink, washroom or any other area within the terminal.

20. Animals barred from terminal. No person except a police officer or another person authorized by the manager shall enter in the terminal with any animal except a "seeing eye" dog or an animal properly confined for shipment.

21. Passage through loading gates restricted. No person shall pass through the loading gates on any vehicular level except:

- a) persons employed by or doing business with a carrier whose duties require such passage;
- b) authorized representatives of the Port Authority;
- c) persons having permission; and
- d) passengers immediately prior to boarding buses or immediately after leaving buses

(r)

22. Photography and filming in the terminal. No person may make drawings or take still photographs or motion pictures for commercial use within the terminal without permission from the manager.

23. Alcoholic beverages. No person shall drink or carry any open alcoholic beverage in any public part of the terminal.

SAFETY

24. Permission required to bring into or carry firearms or other weapons in terminal; exceptions. No persons, except authorized law-enforcement officers, post-office, customs and express employees, licensed armed guards, employees of a carrier, and members of the armed services of the United States or of any State thereof on official duty, shall bring into or carry in the terminal any firearms or other weapons, without permission.

25. Permission required to bring into or carry explosives, acids, inflammables, compressed gases, etc. in terminal; exceptions. No person shall bring into or carry in the terminal any explosives, acids, inflammables, compressed gases or articles or materials having or capable of producing strong offensive odors, or articles or materials likely to endanger persons or property, except with permission. No person shall

(s)

bring or cause to be brought into or kept in the terminal any signal flare or any container filled with or which has been emptied or partially emptied of oil, gas petroleum products, paint or varnish, except with permission. When permission is given to bring into or keep at the terminal any such articles or materials it shall be conditioned upon the use of appropriate receptacles in rooms or areas approved therefor by the manager. Bringing in or keeping at the terminal without special permission gasoline or other motor fuel contained in tanks permanently

attached to vehicles and not contained under pressure shall not be an infraction of this regulation. Bringing into and keeping in the terminal without special permission kerosene signal flares in good condition, of the type required or permitted by Interstate Commerce Commission regulations and properly stowed in buses, shall not be an infraction of this regulation.

26. Permission required to use inflammable liquids for cleaning at terminal. No person shall use inflammable liquids for cleaning at the terminal without permission.

27. Smoking or carrying lighted cigars, cigarettes, pipes, etc. in certain areas of terminal prohibited. No person

(t)

shall smoke or carry lighted cigars, cigarettes, pipes, matches or any naked flame in areas of the terminal where smoking is prohibited by the Port Authority.

28. Unauthorized interference with or use of terminal systems or equipment prohibited. No person shall do or permit to be done anything which may interfere with the effectiveness or accessibility of the fire protection system, sprinkler system, drainage system, alarm system, telephone system, public announcement and intercommunication system, plumbing system, air-conditioning system, ventilation system, fire hydrants, hoses, fire extinguishers, Port Authority towing equipment or other mechanical system, facility or equipment installed or located at the terminal including closed circuit television cameras and monitors, signs and notices; nor shall any person operate, adjust or otherwise handle or manipulate, without permission, any of the aforesaid systems or portions thereof, or any machinery, equipment or other devices installed or located at the terminal. Tags showing date of last inspection attached to units of fire extinguishing and fire fighting equipment shall not be removed therefrom. Nor shall any person plug a TV, radio or other electrical device into any outlet or connect any device to any utility at or in the terminal.

29. All persons required to exercise care to avoid or prevent injury to persons or damage to property. All persons at

the terminal shall exercise the utmost care to avoid or prevent injury to persons or damage to property. Neither any inclusion in nor any omission from these rules and regulations set forth in this Part shall be construed to relieve any person from exercising the utmost care to avoid or prevent injury to persons or damage to property.

30. Permission and accompaniment by Port Authority employee required for entry into all designated Port Authority areas. No person shall enter any Port Authority area at the terminal except with permission and then only when accompanied by an employee of the Port Authority. This includes emergency stairwells except when an emergency conditions exists.

31. No sleeping in terminal. No person on or in the facility shall sleep, doze, lie, or sit down on the floors, hallways, platforms, stairs, landings or other places where such activity may be hazardous to such person or to others, or may interfere with the operation of the terminal's transportation system, pedestrian flow or comfort of its users or tenants.

32. No skateboarding, rollerskating, or bicycle riding. No person shall skateboard, roller skate or ride a bicycle, scooter or any other self-propelled vehicle or device on or through any part of the terminal.

33. Noise. No person shall make, continue, cause or permit to be made or continued any unauthorized noise in the terminal.

34. Fire. No person shall cook, light a fire or otherwise create a fire in any part of the terminal.

35. Storage. No person shall store bundles, paper, cloth, cardboard or any other material in solid, liquid or gas form that could in any way pose a fire or life safety hazard or obstruct or hinder passage without the approval of the manager.

36. No sound reproduction devices. Except with prior permission, no person shall operate or use any personal radio, television, phonograph, tape recorder or other sound reproduction device in the terminal in such a manner that the sound emanating from such sound reproduction device is audible to another person.

37. Use of lighting or sound reproduction equipment. No person shall without specific authorization from the manager operate or use or cause to be operated or use any lighting or sound reproduction device for commercial or business advertising purposes or for the purpose of attracting attention to any performance, show, sale or display of merchandise, or any commercial or business enterprise, in front or outside of any building, place or premises in the terminal.

38. Inspection of freight, articles and packages. The manager reserves the right to inspect all freight and other

articles including hand-carried packages brought into or out of the Bus Terminal and to exclude therefrom all articles which violate any of these rules and regulations, and to require the occupants of space and others regularly doing business at the terminal to issue package passes (in such form as may be approved by the manager) for packages being carried to or from, or from one location to another within the terminal.

BAGGAGE AND EXPRESS

39. Leaking, loose, improperly packaged and marked baggage or express not accepted for handling. No piece of baggage or express will be accepted for handling at the terminal, if in a leaking or loose condition. No piece of express will be accepted for handling if it is not properly packaged and marked.

40. Express, baggage or manifest baggage producing or capable of producing offensive odor or likely to cause damage or injury to persons or property not accepted for handling and subject to removal from terminal. No piece of express, baggage or manifest baggage will be accepted for handling at the terminal if it has or is capable of producing an offensive odor or is likely to damage other express or baggage or to endanger persons or property or to make any portion of the terminal untenable; and the same shall be subject to immediate removal by the Port

Authority from the terminal or to another location or locations within the terminal, such removal to be at the risk and expense of the carrier involved.

41. Express, baggage and manifest baggage subject to I.C.C. regulations not handled unless in compliance with applicable provisions of such regulations. Express, baggage, and manifest baggage, subject to I.C.C. regulations, will not be handled at the terminal, unless it complies with the said regulations in every respect including without limiting the generality of such regulations proper condition for transportation, containers of adequate strength, packing, marking, labeling, description, certification, and quantity and loading limitations.

VEHICLES

42. Vehicles not maintained, operated and registered in accordance with Port Authority rules and applicable laws, ordinances or regulations may be denied access to or removed from terminal. The manager of the terminal shall have authority to deny access to the terminal for any bus or other vehicle not maintained, operated and registered in accordance with these regulations, or which is otherwise in violation of the Port Authority Bus Terminal rules and regulations or the laws, ordinances or regulations of the United States government, the State of New York, or City of New York; and shall have authority

(Y)

to require removal of any such vehicle from the terminal on five minutes' notice. In the event the vehicle is not so removed, the Port Authority may remove it under the provisions of section 59 herein.

43. Vehicles so loaded, constructed, operated, equipped or maintained as to endanger persons or property or obstruct traffic barred from terminal. No vehicle which is loaded in such a manner, or with such materials, or which is so constructed, operated, equipped or maintained as to endanger or to be likely to endanger persons or property, or to obstruct traffic, shall be permitted in or upon the terminal.

44. Vehicles having weights or dimensions in excess of described maxima or using prohibited fuels barred from terminal. No vehicle will be permitted in or upon the terminal which has a weight or dimensions larger than the maxima described herein for buses or which utilizes any fuel not permitted as a source of motive power for buses under the provisions of section 2 herein.

45. Vehicles lacking valid registration plate barred; exceptions. Except for vehicles owned by the government of the United States, and horse-drawn vehicles, no highway vehicle shall be permitted in the terminal unless a currently effective registration plate duly issued by appropriate governmental authority is attached thereto.

46. Persons driving highway vehicles within terminal required to be duly licensed to operate such vehicles. No person shall drive any highway vehicle (except a horse-drawn vehicle) in the terminal without a motor vehicle operator's or chauffeur's license issued by appropriate governmental authority permitting the driving by such person of the particular type of vehicle driven and valid within the State of New York.

47. Passenger boarding and discharge areas to be used so as to avoid blocking bus traffic. Except when standing a bus in space, the use of which has been licensed specifically to the operator of such bus by written agreement with the Port Authority, drivers shall stand vehicles in the terminal only at space designated for such vehicles by the manager or other Port Authority representative. Where space is used in common by the buses of more than one carrier, such as on the unloading platforms, the drivers will cause their buses to stand in the most forward portion of such space available upon arrival and will continually move their buses forward, toward, and to the most forward vacant portion of the space. No buses shall discharge passengers on any active roadways including the viaducts leading to and from the terminal unless specifically directed by a terminal representative.

48. Procedure to be followed by driver in event of accident involving his vehicle. The driver of any vehicle

involved in an accident resulting in injury or death to any person or damage to any property shall immediately stop such vehicle at the scene of the accident, render such assistance as may be needed, and give his name, address and driver's license, and the registration number of the vehicle to the person injured or to a Port Authority officer or representative. The driver, operator, or owner of such vehicle shall make a report of such accident in accordance with the law of the State of New York.

49. Unauthorized tampering, starting, movement or interference with vehicles prohibited. No unauthorized person shall tamper with any vehicle, start the motor thereof, move the vehicle, or otherwise interfere with the operation thereof at the terminal.

50. Permission required to fuel, defuel, lubricate, clean or repair vehicles within terminal. No person shall fuel, defuel, lubricate, clean or repair a vehicle or any part thereof, at the terminal, without permission.

51. Vehicles entering terminal required to extinguish headlights. Every driver of a vehicle entering the terminal shall extinguish the headlights thereof and shall not relight them until leaving the terminal.

52. Prolonged sounding of vehicle horns prohibited. Prolonged sounding of the horns of vehicles in the terminal is forbidden.

(bb)

53. Leaving vehicles unattended without turning off motor, locking vehicle and setting brakes prohibited. No person shall leave a vehicle unattended in the terminal without having first turned off its motor, locked all doors, and set its parking brakes.

54. Vehicles prohibited from remaining in terminal for more than 15 minutes. No vehicle shall remain in the terminal for longer than the time necessary for permitted operations in connection therewith, and, unless a shorter time limitation is elsewhere imposed, no vehicle shall remain in the terminal for longer than 15 minutes unless at a designated gate or parking space and so as not to obstruct the operation of the terminal. The manager shall have authority to require, by five minutes' notice, which may be given orally to the driver, the removal from the terminal of any vehicle which shall have been standing or parked at the terminal for so long as 15 minutes; in the event the vehicle is not so removed, the Port Authority may remove it under the provisions of section 59 herein.

55. Operation of vehicles within terminal regulated. No person shall operate a vehicle in the terminal in a careless and negligent manner or in disregard of the right or safety of others, or without due caution, or at a speed in excess of speed limits posted in the area where the vehicle is being operated, or in any event at a speed in excess of 5 miles per hour, or at any

(cc)

speed or in any manner which endangers or is likely to endanger persons or property, or while under the influence of intoxicating liquor or any narcotic or habit-forming drug.

56. Compliance with authorized traffic orders, signals, signs or directions required. Drivers of vehicles in the terminal must at all times comply with any traffic order, signal or direction, given by voice or by hand, of an authorized representative of the Port Authority. When traffic is controlled by traffic lights or signs or by mechanical or electrical signals, such lights, signs and signals shall be obeyed unless an authorized representative of the Port Authority directs otherwise.

57. Drivers required to report arrival and departure and pay fees. Unless other applicable provision for reports is made in an agreement with a carrier, each driver of a bus of any carrier shall report to the Port Authority representative immediately upon arrival at the terminal, shall pay all fees required shall give information of the expected time of departure, and shall, immediately before departure, check out as directed by the Port Authority representative.

58. Disabled vehicles subject to removal. Unless other provisions for the removal of disabled vehicles has been made by agreement, the Port Authority shall have the right to require, by five minutes' notice which may be given orally to the driver, the

(dd)

removal from the terminal (or to a different location in the terminal), of any vehicle which has become disabled in the terminal. In the event such vehicle is not so removed, the Port Authority may remove it under the provisions of section 59 herein.

59. Removal of vehicles from terminal to be at owner's or operator's risk and expense. In the event the Port Authority is empowered to remove any bus or other vehicle from the terminal by any provision of the rules and regulations set forth in this Part, such removal shall be at the risk of the owner or operator of such vehicle, and the cost thereof shall be for the account of such owner or operator and payable to the Port Authority on demand.

60. Time limit for engine idling. Every driver who causes a vehicle to park or stand in the terminal for three (3) or more minutes shall turn off its motor.

PARCEL CHECK ROOM

61. The Port Authority parcel check room will be operated as a public check room at which services will be provided to the public subject to regulations and fees established by the Executive Director or his representative.

PORTER SERVICE

62. The Port Authority of New York and New Jersey will furnish porter service to the public free of charge at the Port Authority bus terminal.

CHARTER BUS OPERATIONS

63. Use of terminal by charter buses permitted; restrictions; fees. Operators of charter bus transportation service between the City of New York and points outside the city who have not entered into agreements for space and services at the Port Authority bus terminal will be permitted to use the enclosed vehicular levels of the terminal, such use to be limited to one-way and through operations originating at points outside New York City, and to round-trip operations, the initial portions of which originate at points outside New York City, the charge for each bus arrival or departure with passengers to be \$12.50.

PUBLIC VEHICULAR PARKING

64. The Port Authority public vehicular parking area. The public vehicular parking area is operated and charges fees as established by the Executive Director of the Port Authority of New York and New Jersey or his designated representative.

ELEVATORS, ESCALATORS, AND LOADING DOCKS

65. Elevator Schedule. Elevators for passengers and freight handling service will be operated in accordance with a

schedule established by the manager, unless the arrangements are made with the manager for operation at other times.

66. Prohibition. Passenger elevators and escalators may not be used to carry freight.

67. Controls. The use of any escalator, elevator, private right-of-way or truck loading dock at the terminal will be subject to the direct control of the manager.

68. Causing an elevator or escalator to stop. No unauthorized person shall cause an elevator or escalator to stop by means of any emergency stopping device unless continued operation would appear to result in probable injury to a person or persons. Any such stopping should be reported immediately to a terminal representative.

69. Truck loading docks. Truck loading docks located in the terminal are designed to accomplish the immediate transfer of merchandise between the freight elevators and trucks. All person will confine their use of docks to such purpose as directed by the manager. No storage or holding of merchandise on the truck loading docks awaiting the arrival of trucks or awaiting transfer to premises or space at the terminal will be permitted.

International Market Research - Authorizations with Respect to a Grant from the United States Department of Commerce and Future Grants for International Trade and Related Technical Assistance

The United States Department of Commerce, Economic Development Administration has indicated its intention to award a grant in the amount of \$55,000 to the Port Authority subject to Board approval to produce a training program designed to introduce new companies to exporting. This computer-based program will be a single-user, self-paced learn how-to-export training simulation. The business user, either alone or with a small business counselor, is expected to build exporting skills by implementing strategies and making decisions resulting in a clear understanding of the impact that exports can have on a firm's growth. The Economic Development Administration has selected this program as a model for national dissemination upon its completion.

The Port Authority's scope of services related to this grant are to be to: (1) provide staff to compile and format the written text of the export program; (2) incorporate the course materials of the World Trade Institute seminars and the case histories of XPORT clients; (3) select a qualified designer of computer-based training modules to assemble the materials into a self-paced tutorial on the exporting process; and (4) provide marketing and distribution for the final product.

Upon Board approval, the Port Authority will select pursuant to a Request for Proposals a software contractor with expertise in developing a computer based training module for export development. The contractor will be responsible for developing appropriate software and will be paid from the grant funds; services by the contractor should be completed by July 1, 1988.

In addition to the acceptance of this Department of Commerce grant, it is also deemed appropriate and in the interest of efficiency to delegate to the Executive Director authority on behalf of the Port Authority hereinafter to apply for, as necessary, and to accept from the United States Department of Commerce or other federal, state or local governmental entities grants which in the opinion of the Executive Director would promote or enhance international trade for or through the Port District.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Director of the World Trade and Economic Development Department is hereby authorized on behalf of the Port Authority to accept a grant in the amount of \$55,000 from the United States Department of Commerce for the production of a training program designed to introduce new companies to exporting and to take such additional action, including entering into appropriate agreements for production of software and providing for appropriate services by the Port Authority, as is necessary or desirable to effectuate such grant; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized hereinafter to apply for, as necessary, and to accept from the United States Department of Commerce or other federal, state or other governmental entities grants which in the opinion of the Executive Director would promote or enhance international trade for or through the Port District; and it is further

RESOLVED, that the form of all applications, acceptances or agreements is subject to approval as to form by General Counsel or his authorized representative.

(Board - 1/14/88)

Bathgate Industrial Park - Contract with United States Postal Service - Leases with Alexis Trading Corporation and Nick Zoulis, Inc. - Authorization to Enter into Future Agreements for Space at the Business Assistance Center

It was recommended to the Board that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into the following agreements with respect to the Business Assistance Center at the Bathgate Industrial Park substantially in accordance with the terms and conditions set forth below: (1) a contract with the United States Postal Service for the operation of a Postal Station; (2) a lease agreement with Alexis Trading Corporation; (3) a lease agreement with Nick Zoulis, Inc.; and (4) future agreements for space at the Business Assistance Center.

The United States Postal Service (U.S.P.S.) will be closing its local station and has requested the Port Authority to establish a Contract Postal Station in the Business Assistance Center (BAC) at the Bathgate Industrial Park to serve the community. The Postal Station will be operated by Alexis Trading Corporation (Alexis) as the subcontractor of the Port Authority. The Alexis premises will consist of approximately 1,300 square feet and the lease will be for a term of approximately ten years from the completion of the finishing work by the Port Authority. The cost of such finishing work will be approximately \$173,000. Alexis will have a right to renew for a single ten-year period at market rates, but not less than the rental in year ten. For the initial term Alexis will pay a basic rental at the annual rate of \$18,850 for each of the first three years, \$20,735 for each of the fourth, fifth and sixth years, \$22,808 for each of the seventh, eighth and ninth years and \$25,088 for the tenth year. Alexis will also pay an annual operating and maintenance rental of \$2,600 which will escalate annually based upon increases in the Consumer Price Index (CPI) all Urban Consumers, New York and Northeastern New Jersey.

The agreement between the Port Authority and the U.S.P.S. will provide for payment to the Port Authority of approximately \$82,000 annually, which may increase subject to review, as provided in the agreement. The Port Authority will subcontract the operation of this Postal Station to Alexis for the same amount the Port Authority receives from the U.S.P.S. pursuant to the terms and conditions of the postal agreement. Alexis will be required to post a security deposit.

The lease term for Nick Zoulis, Inc. (Zoulis) will commence upon execution of the lease and expire 25 years from the initial rent payment date. Basic rent will commence on the tenth month of the term and will escalate over the term of the lease from an annual amount of \$23,521 to \$169,247. The Port Authority will provide up to \$300,000 for tenant finishes. In the event the Port Authority provides less than \$300,000, the basic rent will be reduced as specified in the lease. Commencing with the tenth month of the term, Zoulis will pay an operating and maintenance rental of \$10,938 which will escalate annually in accordance with the CPI. The Port Authority will provide up to \$100,000 for equipment and furnishings for the restaurant, and Zoulis will pay an equipment rental as provided in the lease. In the event that annual gross sales from the restaurant exceed \$375,000 in any year, Zoulis will pay an additional rental for that year of \$3,000, but the total amount of such additional rental will be limited to \$30,000 during the term of the lease. Zoulis will be required to post a security deposit.

(Board - 1/14/88)

Authorization is also requested hereunder for the Executive Director to enter into future agreements for space at the BAC provided the rental rate is not less than \$9 a square foot and provided further that all finishes and equipment monies are provided on a self-sustaining basis.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into the following agreements with respect to the Business Assistance Center at the Bathgate Industrial Park substantially in accordance with the terms and condition set forth above: (1) a contract with the United States Postal Service for the operation of a Postal Station; (2) a lease agreement with Alexis Trading Corporation; (3) a lease agreement with Nick Zoulis, Inc.; and (4) future agreements for space at the Business Assistance Center, the form of the agreements shall be subject to approval of the General Counsel or his designated representative.

(Board - 1/14/88)

**Kennedy International Airport - Improvements/Expansion of
Parking Lots Nos. 8 and 9 - Project Authorization and
Award of Contracts**

Staff has determined that present parking lot operations at Kennedy International Airport are not adequate to satisfy projected demand. Further, operational efficiency of existing lots can be enhanced by, among other things, the consolidation of Lots Nos. 8 and 9 now divided by an access roadway. Also, the relocation of employee parking to Lot No. 8 at the airport boundary would relieve roadway congestion near the central terminal area.

The project for improvements to, and the expansion of Lots Nos. 8 and 9 includes, but is not limited to, the paving of and providing utilities to existing Lot No. 8 and a major portion of an area north of Lot No. 9, which area is currently leased to the New York Racing Association, as well as paving and utilities for an extensive new area south of existing Lot No. 9. Funds for new revenue control equipment for this project will be requested under a separate authorization.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize: (1) a project at Kennedy International Airport to provide paving and utilities for improvements to Parking Lot No. 8 and expansion of Parking Lot No. 9 at a total expenditure not to exceed \$30.5 million including payments to contractors, allowances for extra work and net cost work, engineering, administrative and financing expenses and a project contingency; and (2) the Executive Director to: (a) take such action with respect to purchase or construction contracts for the foregoing project as he deems in the best interest of the Port Authority, including without limitation award to the lowest bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable, rejection of all bids, solicitation of new bids on revised or the same requirements, or negotiation with one or more bidders or other contractors; and (b) execute contracts and supplemental agreements with such bidders or order extra work and net cost work in connection with each contract, including supplemental agreements thereto.

(Board - 1/14/88)

**Kennedy International Airport - Lease with China Airlines,
Ltd. for an Air Cargo Facility**

It is recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease agreement with China Airlines, Ltd. for the construction and operation of an air cargo facility on a site of approximately eleven acres at Kennedy International Airport. The effective date of the lease would be on or about January 1, 1988 with rentals to commence upon start of construction approximately one year from the effective date; the lease would expire twenty five years after completion of construction, but no more than twenty seven years after the effective date. Rentals would commence at approximately \$275,000 per year and increase periodically over the term of the lease to approximately \$560,000 per year. The Port Authority would provide paving and utilities to the site at an estimated investment of \$700,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into a lease agreement with China Airlines, Ltd. at Kennedy International Airport pursuant to which an air cargo facility would be constructed substantially on the terms set forth above; the form of the lease agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 1/14/88)

**Kennedy International and La Guardia Airports, the New York
City Passenger Ship and Port Authority Bus Terminals -
Taxi Dispatcher Service - Contract Authorization**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a three year contract with the New York City Taxi Drivers Union, Local 3036, for taxi dispatching services at Kennedy International and LaGuardia Airports and the New York City Passenger Ship and Port Authority Bus Terminals. It was further recommended that the Director of General Services be authorized, at her discretion, to extend the contract for two additional one-year periods as provided in the contract and to adjust the wage rate for each extension year based on Consumer Price Index changes as provided in the contract. The estimated cost of the contract is \$8.3 million for the initial three year contract period and a total of \$7.1 million for the two one-year extension periods. In addition, as a part of the foregoing contract, a Port Authority claim against this contractor for overcharges under its prior agreement for taxi dispatching services would be settled in the amount of \$150,000 to be repaid over the five year contract period. In the event the contract is terminated or not extended for any reason, the unpaid balance of such amount would become immediately due and payable.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into a contract with the New York City Taxi Drivers Union, Local 3036, and the Director of General Services is hereby authorized, at her discretion, to extend such contract, all substantially on the terms set forth above; the form of such agreement to be subject to the approval of General Counsel or his designated representative.

Kennedy International, Newark International and La Guardia Airports - Revision to Schedule of Charges for Public Vehicular Parking Fees - Authorization of the Executive Director to Change Parking Rates, Lot Classifications and Means of Fee Collection

It was recommended that the Board authorize a revision to the schedule of charges for public vehicular parking fees and rate classifications of lots at Newark International Airport effective on February 2, 1988 and authorize the Executive Director, for and on behalf of the Port Authority during the period that redevelopment programs at Kennedy International, Newark International or La Guardia Airports are under way, to revise the parking fees, rate classifications of lots and methods of fee collection such as meters, precashiering, credit cards or other suitable means, all as necessary from time to time to manage parking demand and protect revenues.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the schedule of charges for public vehicular parking and rate classifications of lots at Newark International Airport be revised effective February 2, 1988 as follows:

- "Hourly" Rates: \$2 for first hour or part plus
\$2.00 per hour or part after
first hour to \$48 maximum
each 24 hours.
- "Hourly" Lots: Premium A, B and C
- "Daily" Rates: \$2 for first hour or part
\$1 per hour or part after first
hour to \$18 maximum to 24 hrs.
\$1 per hour or part after first
24 hours. to \$18 maximum each 24 hours.
- "Daily" Lots: Intermediate A, B, C & #1
- "Remote" Rates: \$3 for first 12 hours or part
\$1 per hour or part after first
12 hours to \$5 maximum to 24 hours
\$1 per hour or part after first
24 hours to \$5 maximum each 24 hours
- "Remote" Lots: Remote D, E and F

For disabled persons (those having mobility restrictions), a day rate equivalent to the lowest rate available at each airport, will be continued, as established in 1979; and it is further

RESOLVED, that the Executive Director is hereby authorized for, and on behalf of the Port Authority, during the period of airport redevelopment programs, at his discretion, to revise parking rates and rate classifications of lots and means of fee collection at Kennedy International, Newark International and LaGuardia Airports, from time to time, as necessary to manage parking demand and protect Port Authority revenues, all substantially on the terms set forth above.

(Board - 1/14/88)

Edna Goelz Falconer

The Chairman noted the death, on December 12, 1987, of Edna Goelz Falconer, Secretary of The Port of New York Authority, from 1944 to 1946. Mrs. Falconer, then Miss Goelz, began her Port Authority career in 1921 as Secretary to the Chief Engineer. Prior to that she had worked for the New York-New Jersey Port and Harbor Commission, the forerunner of the Port Authority. Mrs. Falconer was 92 years old and one of the last living members of the original staff who joined the Port Authority at its creation.

Whereupon, the meeting was adjourned.

Charles Meara, Special Assistant/Executive Branch Relations
Hugh O'Neill, Assistant Executive Director/Policy Planning and Business Development
Morris Sloane, Director of Aviation Operations
Joseph L. Vanacore, Assistant Executive Director/Capital Programs
Barry Weintrob, Chief Financial Officer

The meeting was called to order by the Chairman.

The Secretary reported that the meeting was duly called in accordance with the By-Laws.

Erie Basin Marine Terminal - Fishport Auction - Tenant/Broker Buyer Program

It was reported that the Fishport auction commenced operations on December 14, 1987 and sixteen companies, including Fishport tenants, are now qualified as buyers. Due to the uncertainty of product delivery from fishing boat operators, buying activity has been slow and those operators landing at the Fishport have not sold all of their catch. Fishing boat operators, especially sea scallopers fishing eight hours or less from New York, are willing to land their catch at the Fishport if the sale of all of their fish is guaranteed. The lease supplements and broker agreements offer a means to provide such a guarantee as follows:

The lease supplements will provide for participating Port Authority tenants to buy vessel-landed fish remaining at the end of the auction for the minimum auction price set by the Port Authority in consultation with the fishing boat operator. Subject to Port Authority audit, any verifiable net loss incurred by a tenant upon the resale of each species of fish purchased on a single day will be credited against that tenant's rental and other payments due under its lease. If participating tenants cannot purchase all fish remaining after the auction, the fish will be turned over to brokers for sale with the proceeds of all sales less commissions and other fees to be paid to the Port Authority within 30 days after each sale. The Port Authority will advance the agreed upon minimum purchase price to the fishing boat operators in all instances. Tenants will be required to pay for fish purchased under the program within fourteen days of purchase. Any Port Authority fees otherwise applicable to the purchase, sale or storage of fish at the Fishport will be waived by the Port Authority under the program. This Fishport promotional program will commence on February 15, 1988 and will end on August 15, 1988, with the Port Authority having the right to cancel the program on twenty-four hours' notice or extend the program for an additional six-month period. Credits against rental or other payments due under leases with Port Authority tenants, brokerage commissions and other fees and all other costs associated with this program will not exceed \$250,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into lease supplements with Port Authority tenants providing for their purchase of vessel-landed fish remaining unsold after Fishport auctions with further provision for the issuance of credits against rental and other payments due under a tenant's lease in an amount equal to the net loss incurred by that tenant upon its resale of each species of fish purchased on a single day under this program, and to enter into agreements with fish brokers for the sale of remaining unsold fish with the proceeds of all sales by brokers less commissions and other fees to be paid to the Port Authority, with the Port Authority to advance the agreed upon minimum purchase price to the fishing boat operators in all instances and with credits against rental or other payments due under leases with Port Authority tenants, brokerage commissions and other fees and all other costs associated with this program not to exceed \$250,000, all substantially on the terms set forth above; the form of the agreements to be subject to the approval of General Counsel or his designated representative.

(Board - 1/28/88)

Kennedy International Airport - New Unit Terminal Lease with British Airways, PLC

It is recommended that the Board authorize the Executive Director for and on behalf of the Port Authority to enter into agreements with British Airways, PLC ("British") and United Air Lines, Inc. ("United") at Kennedy International Airport which will include a new lease agreement with British for its Unit Terminal effective on January 1, 1995, after expiration of its present Unit Terminal lease, and expiring on November 30, 2015; and a Construction Agreement with British under which it would expand and renovate its present terminal at a minimum expenditure by British of \$60 million, with the Port Authority to be obligated to perform construction work consisting of the relocation of a service road adjacent to the terminal premises, estimated to cost \$1.2 million, with a contribution by British of 1/4 of such cost up to a maximum of \$300,000; and an agreement with British and United consenting to a long term sublease by United in the British Terminal under which, in the event the British lease were to be terminated, United would have the right to a new lease from the Port Authority for the portion of the premises then occupied by it. The new lease with United would be on substantially the same terms as the British lease and at the same rentals paid by British for the affected portion of the premises plus additional and amended provisions and charges as appropriate for obligations now borne by British under its lease such as maintenance, repair and insurance and for services provided by British as required by United for continued operation in the terminal and for any other services or facilities provided to United in connection with its operations in the terminal.

In addition to the foregoing, a short term agreement will be entered into with British making available to British the space freed by the roadway relocation work, which space becomes part of the new Unit Terminal Lease in 1995, and a supplement to the present United Unit Terminal Lease at the Airport will be entered into with United, extending the term for an appropriate period prior to United's occupancy in the expanded British Terminal at monthly rentals of \$390,807 from May 1, 1987 to September 30, 1987 and \$531,241, effective October 1, 1987, the latter rate being subject to increases based upon one-half the percentage increase in the Regional Consumer Price Index (CPI) over an appropriate base period in the event United continued in occupancy after September 30, 1989.

The new lease and the consent to sublease agreement can each be entered into independently of the other but would be contingent upon the completion of the terminal renovation and expansion work including the expenditure of a minimum of \$60 million. The total premises under the new lease will consist of approximately 31 acres of land and 334,000 square feet of interior space (to be expanded to an estimated 409,000 square feet after completion of construction). Rentals will commence on January 1, 1995 at annual rates of \$30,000 per acre of land and \$28 per square foot of interior area now in existence, both rates to be increased effective January 1, 1995 by one quarter of the annual percentage increase in the CPI for the period September to September immediately prior thereto and increased annually thereafter by one-half of the annual percentage increase in the CPI during each immediately preceding similar measuring period. After allowance of a 25-year amortization period rental would be payable for the new interior space created by the construction at the rate then in effect for interior space under the new lease.

(Board - 1/28/88)

British will be completely responsible for the operation and maintenance of the terminal, including insurance, and the new lease will contain the newly developed Passenger Terminal Lease provisions including but not limited to utilization clauses, requesting airlines provisions, and financial triggers and will also provide that should British fail to reach agreement with the Port Authority within a specified period of time regarding participation in and cost recovery for the JFK Redevelopment Project the lease will become a month-to-month lease which, if terminated by the Port Authority, would then obligate the Port Authority upon vacancy of the premises to buy out British's unamortized investment in the expansion and renovation work to a maximum of \$75 million, computed on a 25-year straight line basis commencing upon completion of construction but not later than September 30, 1989. This formula would apply to other Port Authority buy-out obligations under the lease as well.

Whereupon the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized for, and on behalf of the Port Authority, at Kennedy International Airport, to enter into agreements with British Airways, PLC and United Air Lines, Inc. substantially on the terms set forth above; the form of the aforesaid agreements to be subject to the approval of General Counsel or his designated representative.

Whereupon, the meeting was adjourned.

Action on Minutes

The Secretary submitted for approval Minutes of the meetings of January 7 and January 14, 1988. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey has expired.

Whereupon, the Board unanimously approved these Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on February 11, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on February 11, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on February 11, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on February 11, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 2/11/88)

Settlement of Fifteen Consolidated Claims Appearing Under the Name of Nan L. Presslaff and Meyer Presslaff, as Administrators of the Goods, Chattels and Credits of Ronald A. Presslaff, Deceased v. Port Authority, Trans World Airlines, Inc., Delta Air Lines, Eastern Air Lines, Inc. and American Locker Co., Inc.

There is presently pending in the Supreme Court of the State of New York, County of New York, fifteen consolidated cases seeking to recover damages in excess of \$30 million for various personal injuries and wrongful deaths sustained by plaintiffs arising out of the bomb explosion at LaGuardia Airport on December 29, 1975.

At approximately 6:30 p.m. on December 29, 1975, an explosion occurred in the Trans World Airlines ("TWA") baggage claim area ("BCA") at LaGuardia Airport resulting in the aforementioned deaths, injuries and total destruction of the area. Thirteen separate lawsuits based on diversity jurisdiction were commenced on behalf of the various plaintiffs in the United States District Court, Southern District of New York. After a fifteen-day consolidated trial in November 1978 before Judge Milton Pollack, the jury returned a unanimous verdict in favor of the defendants. Port Authority and TWA (the case against American Locker was dismissed before it went to the jury). An appeal taken by plaintiffs to the United States Second Circuit Court of Appeals in August 1979 affirmed the jury's unanimous decision in favor of the defendants.

The remaining fifteen lawsuits (which included four wrongful death actions and three cases of loss of limbs) pending in various state courts were consolidated for trial before Justice Edward Greenfield in Supreme Court, New York County. Judge Greenfield issued a stay of all proceedings until the Federal cases had been concluded. Judge Greenfield had directed all parties to prepare for a trial on January 4, 1988 after he had previously denied defendant's summary judgment motion to dismiss the plaintiffs' cases. Some months before trial, plaintiffs' lead counsel entered into settlement negotiations, taking into account the outcome in the Federal court and the possibility of a defendants' verdict in the state court. There is no doubt that the State court plaintiffs' chance of success is much better than the Federal court plaintiffs' as Judge Pollack had excluded various items of evidence, extremely favorable to the plaintiffs' case, on technical grounds. In conferences with Judge Greenfield, it was clear that he would not be bound by the Federal Court rulings and that he was inclined to allow the plaintiffs' cases to be decided by the jury. Certainly, plaintiffs' counsel having been involved in both the Federal and State cases were now in a better position to present the remaining cases to a state court jury, with a higher likelihood of success.

Plaintiffs' counsel finally agreed to settle all cases in the sum of \$2.7 million. The defendants responded affirmatively (subject to Board approval on behalf of the Port Authority) to the following terms: TWA to contribute \$1.3 million, the Port Authority to contribute \$500,000 (the amount of its then self-insured retention) with the \$800,000 balance to be paid by the Port Authority's excess carrier, Midland Insurance Company. Midland is in bankruptcy with its claims being handled by the New York State Liquidation Bureau. The Liquidation Bureau indicates agreement with the settlement as outlined above, subject to final approval in Albany.

American Locker Company which is nearly bankrupt and practically out of business has already offered its reserve of \$100,000.

(Board - 2/11/88)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that General Counsel be and he hereby is authorized to settle the fifteen pending consolidated lawsuits against the Port Authority entitled **Nan L. Presslaff and Meyer Presslaff, as administrators of the goods, chattels and credits of Ronald A. Presslaff, Deceased v. Port Authority, Trans World Airlines, Inc., Delta Air Lines, Eastern Air Lines, Inc. and American Locker Co., Inc.**, by paying to the plaintiffs and their attorneys the sum of \$500,000 (the amount of the applicable self-insurance retention), with The New York State Liquidation Bureau to pay an \$800,000 balance on behalf of the Port Authority's excess carrier, Midland Insurance, which is in bankruptcy, in full satisfaction of the claims.

(Board - 2/11/88)

Interim Contract for Stockroom Electrical Supplies - Jewel Electric Supply Company, Jersey City, New Jersey

A contract to provide electrical supplies to Port Authority stockrooms for the period August 1985 to August 1987, was awarded to Jewel Electric Supply Company, Jersey City, New Jersey, the low bidder after public advertisement, on August 12, 1985. However, the contract monies of \$900,000 were exhausted prior to August 1987, and the contract was terminated by mutual agreement. An interim contract was negotiated with Jewel Electric Supply Company to meet the Port Authority's needs for electrical supplies until a new contract could be awarded. This interim contract, for the period March 25, 1987 until August 25, 1987, was authorized by the Executive Director on March 26, 1987 for an estimated amount of \$250,000.

The purpose of the interim contract was to allow continued coverage of the Authority's electrical supply needs during the time it took to prepare, bid, and award a new contract. However, the estimate of interim usage was not accurate due to the lack of timely computer generated usage reports. This, combined with an increased inventory of critical items in order to reduce stockouts and meet unusual peak demand, resulted in continuing difficulty in estimating short term stockroom usage levels for these items. Therefore, an extension of the interim contract had to be negotiated to insure that critical electrical supplies were available until the new annual contract took effect, resulting in a \$160,000 expenditure over the previously authorized amount.

Both the interim contract and its extension were negotiated at the same unit prices and on the same terms and conditions as the previously competitively bid contract. These unit prices were based on fixed discounts from prices published in the "National Price Service" which is recognized as a standard for pricing in the electrical supplies industry. The contracts also provided for the purchase of less commonly required electrical supplies not listed in the "National Price Service" and for which the vendor is compensated at his acquisition cost plus a fixed percentage of 10%.

A special manual inventory system has now been implemented to improve the controls on these fast moving items. The implementation during 1988 of the new automated inventory control system for stockrooms is expected to significantly improve forecast accuracy.

On September 15, 1987, the Executive Director awarded the new competitively bid annual contract to Kelly and Hayes, Brooklyn, New York, in the estimated amount of \$975,000 for the period September 15, 1987 through September 14, 1988.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board approve the action by the Director, General Services Department, in expending an additional \$160,000 under the interim stockroom contract for electrical supplies.

(Board - 2/11/88)

The George Washington Bridge Bus Station - Revised Rules and Regulations

The Board was requested to authorize revisions to the existing Rules and Regulations governing the use and occupancy of the George Washington Bridge Bus Station.

The Revised Rules and Regulations will allow staff to operate these facilities in a safe and efficient manner and continue to provide optimum levels of service to the patrons and tenants. Together with the comprehensive program developed and implemented to respond to the homeless and the unique operational and maintenance problems associated with the conduct of some George Washington Bridge Bus Station patrons, the revised Rules and Regulations will allow staff to more effectively supervise and coordinate facility operations and thereby provide the public with a safe, well-ordered George Washington Bridge Bus Station.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board hereby adopts the "George Washington Bridge Bus Station, Revised Rules and Regulations" (attached hereto), for the safe and efficient operation thereof, effective February 11, 1988.

REVISED RULES AND REGULATIONS FOR GEORGE WASHINGTON BRIDGE BUS STATION

PURPOSE

1. Purpose. These rules are established by the Port Authority of New York and New Jersey to facilitate the proper use of the George Washington Bridge Bus Station and to protect the station and its patrons.

DEFINITIONS

2. Definitions. As used herein:

(a) "Bus" shall mean a self-propelled highway vehicle designed and constructed for the carriage of passengers for hire, employing as a source of motive power (either directly or by electrical transmission) a reciprocating internal-combustion or a turbine engine (not including a jet-propulsion engine) utilizing a fuel gasoline, diesel oil, or any other substance utilized by highway vehicles for fuel and permitted both by the laws of New York and by those of New Jersey then in effect and also under the then existing rules and regulations governing the use of the Lincoln Tunnel (and then only in strict compliance with the requirements of such laws, rules and regulations), and having overall dimensions not in excess of the following: length, 40

feet; width, 102 inches; height, 11 feet nine inches; and having a maximum gross loaded weight not in excess of 42,000 (unladen weight) pounds avoirdupois, distributed to provide not more than 20,000 pounds per axle; provided, however, that larger or heavier passenger carrying vehicles may be operated by mutual consent of the Port Authority and the Carrier, and each such shall be deemed, for the period of such consent, a "bus".

(b) "Carrier" shall mean an operator of one or more vehicles for the transportation of passengers for hire.

(c) "Driver" shall mean the person who is in actual physical control of a vehicle.

(d) "Express" shall mean and include property other than baggage, mail, manifest baggage and newspapers, transported or to be transported by a carrier in accordance with its published tariffs, and shall be defined as defined in the published tariffs of any carrier, except that it shall not include acid, animals, articles packed in wet ice or water, dangerous articles, explosives, gases, inflammable materials, intoxicating beverages, jewelry, lottery tickets, materials having or capable of producing strong, offensive odors, meat, meat products, money, securities, watches, or wet batteries; provided, however, that by notice given within 60 days after the effective date of any reissue, revision or supplement of a tariff of any carrier, the Port Authority may exclude therefrom any article, material or thing listed therein for the first time; and provided, further,

that express shall not include any parcel or piece the overall dimensions of which are greater than 24 inches by 24 inches by 45 inches.

(e) "Highway vehicle" shall mean and include an automobile, a bus, a truck, a tractor equipped with rubber tires, a trailer, or a semi-trailer.

(f) "I.C.C. regulations" shall mean regulations of the Interstate Commerce Commission in effect on the effective date hereof issued under the authority of the Interstate Commerce Commission.

(g) "Manifest baggage" shall mean and include property checked through on the line of any carrier (or of a carrier connecting with any carrier) on a ticket or tickets for passenger transportation, in accordance with and as defined by local and joint baggage tariff 500-G, of the Interstate Commerce Commission, issued June 15, 1949 and effective July 20, 1949, as the same may be hereafter supplemented or amended; provided, however, that by notice given to the carrier within 60 days of any supplement, revision or reissue of the tariff of such carrier, the Port Authority may exclude any article, material or thing therein listed for the first time.

(h) "Parking" shall mean the halting of a vehicle on a roadway or other area while not actually engaged in receiving or

discharging passengers, except when halted in obedience to traffic regulations, signs or signals, and without regard to the presence or absence of the driver.

(i) "Permission" shall mean permission granted by the manager except where otherwise specifically provided.

(j) "Person" shall mean any individual, firm, partnership, corporation, or incorporated or unincorporated association, and shall include any assignee, receiver, trustee, executor, administrator or similar representative appointed by a court, and shall mean the United States of America or any department of the government thereof, any state or political subdivision thereof, or any foreign government or political subdivision thereof, or the United Nations.

(k) "Port Authority" shall mean The Port Authority of New York and New Jersey.

(l) "Port Authority rules and regulations" shall mean the rules and regulations set forth in this Part and all amendments and supplements thereto.

(m) "Published tariff"; see tariff.

(n) "Stand" shall mean to halt a bus for the purpose of loading or unloading or for waiting in position for loading or

unloading.

(o) "Manager of the station" or "Manager" shall mean the person or persons from time to time designated by the Port Authority to exercise the powers and functions vested in the said Manager by these rules and regulations, and shall mean the Manager or Acting Manager of the station for the time being or his or her duly designated representative or representatives.

(p) "Tariff" or "published tariff" shall mean the schedule of rates, terms and conditions of transportation under which a carrier conducts its operation and which has been approved by the Interstate Commerce Commission or by other governmental regulatory body having jurisdiction over the operations of the carrier.

(q) "Station" shall mean the George Washington Bridge Bus Station, constructed, owned and operated by the Port Authority as an addition and improvement to the George Washington Bridge, and shall include the property, land and structure, owned by the Port Authority on the blocks bounded by Fort Washington Avenue, West 178th street, Wadsworth Avenue, and West 179th street, in the Borough of Manhattan, in the City, County and State of New York, together with structures, ramps and viaducts in the vicinity which are or may be used for Bus Station purposes, including in particular (without limitation thereto) the upper bus level structure as it exists, extending west of the east building line of Fort Washington Avenue to a vertical plane parallel to such building line and 159.114 feet west thereof.

(r) "Vehicle" shall mean and include automobiles, trucks, buses, tractors, trailers, semi-trailers, horse-drawn carts or wagons and any other devices in or upon or by means of which any person or property is or may be transported, carried or drawn upon land only, except railroad rolling equipment or other devices designed to operate on stationary rails or tracks.

(s) "Vehicular level" shall mean and include any floor or story at the station designed for use by highway vehicles.

GENERAL

3. Permission to use station is conditional. Any permission granted by the Port Authority directly or indirectly, expressly or by implication, to any person or persons to enter upon or use the station or any part thereof, is conditioned upon acceptance of and compliance with the Port Authority rules and regulations, as from time to time may be changed, and entry upon or into the station by any person shall be deemed to constitute an agreement by such person to comply with the said rules and regulations; provided, however, that such rules and regulations will not apply to premises or space occupied or used under the provisions of a written agreement made with the Port Authority unless provision is made therein for the application of the said rules and regulations.

4. Use of the station may be denied persons violating laws or rules. The Manager of the station or designee shall have authority to deny the use of the station to any individual violating Port Authority rules and regulations or laws, ordinances or regulations of the United States government, the State of New York, or the City of New York.

5. Permission to enter certain areas of the building.

(a) Closed Areas - No person except person assigned to duty therein shall enter without permission any area of the station posted as being closed to public.

(b) Restricted Areas - No person shall enter without authorization any area of the station posted as restricted unless such person complies with such restriction.

(c) Persons entering the station when not fully open for business - During such days and hours as the station is partially closed, such as late hours of the night and early hours of the morning, any person shall, when entering, remaining, or leaving the station, if requested by a Port Authority representative, exhibit such authorization as prescribed by the Manager or Manager's designee.

6. Abandonment of property prohibited. No person shall abandon any property at the station.

7. Permission required to carry on commercial activity. No person shall carry on any commercial activity at the station without permission from the Manager or designee.

8. Gambling prohibited. No person shall gamble or conduct or engage in any game of chance at the station unless such game of chance is permitted by local state and federal law and has been approved by the Manager or designee.

9. Permission required to solicit funds or contributions. No person shall solicit funds or contributions for any purpose at the station without permission.

10. Permission required to post or distribute commercial signs, advertisements, etc. No person shall post, distribute or display commercial signs, advertisements, circulars or printed or written material within the station without permission. The Manager or designee reserves the right to set standards for the location, appearance, size and content of all signs, posters, notices, displays and advertisements and may prohibit installation of such or subsequent removal, if necessary.

11. Lost Articles. All persons finding lost articles at the station shall deliver them to the Police personnel who will transport said articles to the Lost and Found area of the George Washington Bridge Bus Station Police Unit. Articles unclaimed by the owner or owners within three months after the finding thereof will be turned over to the finders, except when found by Port Authority employees.

12. Trash, garbage, waste, etc. to be deposited in receptacles provided therefor. No persons shall throw, discharge or deposit trash, garbage, waste, oil or other petroleum products or any other waste material into or upon any portion of the station except by depositing such material in receptacles provided therefor. All such receptacles shall be subject to the approval of the Manager.

13. Defacing, damaging, etc. station or property therein prohibited. No person shall deface, mark, break, or otherwise damage any part of the station, or any property thereat.

14. Non-commercial distribution of leaflets, carrying of placards is restricted.

(a) The non-commercial distribution of leaflets, the setting up of card tables to aid in that distribution, the carrying of placards shall be permitted in the following manner at the

and long haul bus level, and not within 10 feet of an escalator or elevator as designated on a diagram of the station on display in the Manager's Office and on file in the Secretary's Office. Designated areas shall be unavailable during major holiday periods, (i.e., the periods commencing on the day preceding major holidays, such as the Friday before Labor Day) through and including the concluding day of the holiday period. The Manager may grant exception to this rule for holidays which do not give rise to three-day weekends and for which traffic forecasts indicate that traffic in the station shall not substantially exceed that which occurs on a normal day.

- (b) Any person or group who wishes to conduct any of the above activities at the locations specified shall apply to the Manager or designee on permit forms provided by him or her for this purpose. Application may also be made for long term permits in the months of January and July annually, for permits which will be granted for a period of six (6) months. Renewal applications shall be made on the same form as new applications and shall be processed as if they were new applications.
- (c) No signs, placards or other material shall be affixed to the bus station. No leaflets or other

material shall be distributed by leaving them unattended throughout the station.

- (d) The Manager or designee may refuse the grant of any permit or suspend any permit already granted in the event of emergencies, such as snowstorms, traffic accidents, power failures, transportation strikes or other conditions which render the traffic flow in any of the areas covered by the permit such that conduct of the activities would create a dangerous condition or substantially interfere with traffic in the station.

15. Creation of obnoxious odors, noxious gases, smoke or fumes prohibited. No person shall create, or permit any vehicle or machine of which he or she is in charge to create obnoxious odors, noxious gases, smoke or fumes in the station. The creation of internal-combustion engine exhaust-fumes by vehicles in the station, so long as such vehicles are maintained and are being operated in a proper manner, shall not be an infraction of this section. No person shall spit, urinate or defecate on any part of the station other than in a urinal or toilet intended for that purpose.

16. Vehicular use of station is restricted. No person shall travel, or remain on, or shall permit any vehicle of which he has charge to travel, or remain on, any portion of the station except upon the roadways, walks or other places or areas

provided for the particular class of traffic. No person shall occupy or shall permit any vehicle of which he or she has charge to occupy the walks, roadways, entrances, exits, waiting rooms or other areas of the station in such a manner as to hinder or obstruct their use by others. Only parties authorized by the Manager are permitted to operate vehicles on station premises; unauthorized vehicular operation on station premises may be considered trespass.

17. Loitering in or about station prohibited. No person shall loiter in or about the station or any part thereof.

18. Authorization required for sale of merchandise, solicitation of trade, entertainment of persons or solicitation of alms. No person, unless duly authorized by the Port Authority, shall, in or upon any area, platform, stairway, station, waiting room or any other appurtenance of the station:

- a) sell, offer for sale any article of merchandise; or
- b) solicit any business or trade, including the carrying of baggage for hire; the shining of shoes or bootblacking; or
- c) entertain any persons by singing, dancing or playing any musical instrument; or

d) solicit alms.

19. Persons unable to give satisfactory explanation of presence prohibited from loitering in station. No person, who is unable to give satisfactory explanation of his or her presence, shall loiter in or about any toilet, area, station, station platform, waiting room or any other appurtenance of the station. No person shall bathe, shower, shave, launder or change clothes or remain undressed in any public restroom, sink, washroom or any other area within the station. Persons who are infested or carrying bundles or articles which are infested will be prohibited from using the station.

20. Animals barred from station. No person except a police officer or another person authorized by the Manager shall enter in the station with any animal except a "seeing eye" dog or an animal properly restrained for shipment.

21. Passage through loading gates restricted. No person shall pass through the loading gates on any vehicular level except:

- a) persons employed by or doing business with a carrier whose duties require such passage;
- b) authorized representatives of the Port Authority;

- c) persons having permission; and
- d) passengers immediately prior to boarding buses or immediately after leaving buses.

22. Photography and filming in the station. No person may make drawings or take still photographs or motion pictures for commercial use within the station without permission from the Manager or designee.

23. Alcoholic beverages. No person shall drink or carry any open alcoholic beverage in any public part of the station.

SAFETY

24. Permission is required to bring into or carry firearms or other weapons in station; exceptions. No persons, except authorized law-enforcement officers, post-office, customs employees, licensed armed guards, employees of a carrier, and members of the armed services of the United States or of any state thereof on official duty, shall bring into or carry in the station any firearms or other weapons, without permission.

25. Permission required to bring into or carry explosives, acids, inflammables, compressed gases, etc. in

station; exceptions. No person shall bring into or carry in the station any explosives, acids, inflammables, compressed gases or articles or materials having or capable of producing strong offensive odor, or articles or materials likely to endanger persons or property, except with permission. No person shall bring or cause to be brought into or kept in the station any signal flare or any container filled with or which has been emptied or partially emptied of oil, gas, petroleum products, paint or varnish, except with permission. When permission is given to bring into or keep at the station any such articles or it shall be conditioned upon the use of appropriate receptacles in rooms or areas approved therefor by the Manager or designee. Bringing in or keeping at the station without special permission gasoline or other motor fuel contained in tanks permanently attached to vehicles and not under pressure shall not be an infraction of this regulation. Bringing into and keeping in the station without special permission kerosene signal flares in good condition, of the type required or permitted by Interstate Commerce Commission regulations and properly stowed in buses, shall not be an infraction of this regulation.

26. Permission is required to use inflammable liquids for cleaning at station. No person shall use inflammable liquids for cleaning at the station without permission.

27. Smoking or carrying lighted cigars, cigarettes, pipes, etc. in certain areas of station prohibited. No person

shall smoke or carry lighted cigars, cigarettes, pipes, matches or any naked flame in areas of the station where smoking is prohibited by the Port Authority.

28. Unauthorized interference with or use of station systems or equipment prohibited. No person shall do or permit to be done anything which may interfere with the effectiveness, or accessibility of the fire protection system, sprinkler system, drainage system, alarm system, telephone system, public announcement and intercommunication system, plumbing system, air-conditioning system, ventilation system, fire hydrants, hoses, fire extinguishers, Port Authority towing equipment or other mechanical system, facility or equipment installed or located at station; including closed circuit television cameras and monitors, signs and notices; nor shall any person operate, adjust or otherwise handle or manipulate, without permission, any of the aforesaid systems or portions thereof, or any machinery, equipment or other devices installed or located at the station. Tags showing date of last inspection attached to units of fire extinguishing and fire fighting equipment shall not be removed therefrom. Nor shall any person plug a TV, radio or other electrical device into any outlet or connect any device to any utility at or in the station.

29. All persons required to exercise care to avoid or prevent injury to persons or damage to property. All persons at the station shall exercise the utmost care to avoid or prevent injury to persons or damage to property. Neither any inclusion

in nor any omission from these rules and regulations set forth in this Part shall be construed to relieve any person from exercising the utmost care to avoid or prevent injury to persons or damage to property.

30. Permission and accompaniment by Port Authority employee required for entry into all designated Port Authority areas. No person shall enter any Port Authority area at the station except with permission and then only when accompanied by an employee of the Port Authority.

31. No sleeping in station. No person on or in the facility shall sleep, doze, lie, or sit down on the floors, hallways, platforms, stairs, landings or other places where such activity may be hazardous to such person or to others, or may interfere with the operation of the station's transportation system, pedestrian flow or comfort of its users or tenants.

32. No skateboarding, rollerskating, or bicycle riding. No person shall skateboard, roller skate or ride a bicycle, scooter or any other self-propelled vehicle or device on or through any part of the station.

33. Noise. No person shall make, continue, cause or permit to be made or continued any unauthorized noise in the station.

34. Fire. No person shall cook, light a fire or otherwise create a fire in any part of the station.

35. Storage. No person shall store bundles, paper, cloth, cardboard or any other material in solid, liquid or gas form that could in any way pose a fire or life safety hazard or obstruct or hinder passage without the approval of the Manager or designee.

36. No sound reproduction devices. Except with prior permission, no person shall operate or use any personal radio, television, phonograph, tape recorder or other sound reproduction device in the station in such a manner that the sound emanating from such sound reproduction device is audible to another person.

37. Use of lighting or sound reproduction equipment. No person shall without specific authorization from the Manager or designee operate or use or cause to be operated or use any lighting or sound reproduction device for commercial or business advertising purposes or for the purpose of attracting attention to any performance, show, sale or display of merchandise, or any business enterprise, in front or outside of any building, place or premises in the station.

38. Inspection of freight, articles and packages. The Manager reserves the right to inspect all freight and other articles including hand-carried packages brought into or out of the Bus Station and to exclude therefore all articles which

violate any of these rules and regulations, and to require the occupants of space and others regularly doing business at the station to issue package passes (in such form as may be approved by the manager) for packages being carried to or from, or from one location to another within the station.

BAGGAGE AND EXPRESS

39. Leaking, loose, improperly packaged and marked baggage or express not accepted for handling. No piece of baggage or express will be accepted for handling at the station, if in a leaking or loose condition. No piece of express will be accepted for handling if it is not properly package and marked.

40. Express, baggage or manifest baggage producing or capable of producing offensive odor or likely to cause damage or injury to persons or property not accepted for handling and subject to removal from station. No piece of express, baggage or manifest baggage will be accepted for handling at the station if it has or is capable of producing an offensive odor or is likely to damage other express or baggage or to endanger persons or property or to make any portion of the station untenable; and the same shall be subject to immediate removal by the Port Authority from the station or to another location or locations within the station, such removal to be at the risk and expense of the carrier involved.

41. Express, baggage and manifest baggage subject to I.C.C. regulations not handled unless in compliance with applicable provisions of such regulations. Express, baggage, and manifest baggage, subject to I.C.C. regulations, will not be handled at the station, unless it complies with the said regulations in every respect including without limiting the generality of such regulations, proper condition for transportation, containers of adequate strength, packing, marking, labeling, description, certification, and quantity and loading limitation.

VEHICLES

42. Vehicles not maintained, operated and registered in accordance with Port Authority rules and applicable laws, ordinances or regulations may be denied access to or removed from station. The Manager of the station shall have authority to deny access to the station for any bus or other vehicle not maintained, operated and registered in accordance with these regulations, or which is otherwise in violation of the George Washington Bridge Bus Station rules and regulations or the laws, ordinances or regulations of the United States government, the State of New York, or City of New York; and shall have authority to require removal of any such vehicle from the station on five minutes' notice. In the event the vehicle is not so removed, the Port Authority may remove it under the provisions of section 59.

43. Vehicles so loaded, constructed, operated, equipped or maintained as to endanger persons or property or obstruct traffic barred from station. No vehicle which is loaded in such a manner, or with such materials, or which is so constructed, operated, equipped or maintained as to endanger or to be likely to endanger persons or property, or to obstruct traffic, shall be permitted in or upon the station.

44. Vehicles having weights or dimensions in excess of described maxima or using prohibited fuels barred from station. No vehicle will be permitted in or upon the station which has a weight or dimensions larger than the maxima described herein for buses or which utilizes any fuel not permitted as a source of motive power for buses under the provisions of section 2(a).

45. Vehicles lacking valid registration plate barred, exceptions. Except for vehicles owned by the government of the United States, and horse-drawn vehicles, no highway vehicle shall be permitted in the station unless a currently effective registration plate duly issued by appropriate governmental authority is attached thereto.

46. Persons driving highway vehicles within station required to be duly licensed to operate such vehicles. No person shall drive any highway vehicle (except a horse-drawn vehicle) in the station without a motor vehicle operator's or chauffeur's

license issued by appropriate governmental authority permitting the driving by such person of the particular type of vehicle driven and valid within the State of New York.

47. Passenger boarding and discharge areas to be used so as to avoid blocking bus traffic. Except when standing a bus in space, the use of which has been licensed specifically to the operator of such bus by written agreement with the Port Authority, drivers shall stand vehicles in the station only at space designated for such vehicles by the Manager or other Port Authority representative. Where space is used in common by the buses of more than one carrier, such as on the unloading platforms, the drivers will cause their buses to stand in the most forward portion of such space available upon arrival and will, continually move their buses forward, toward, and to the most forward vacant portion of the space. No buses shall discharge passengers on any active roadways including the viaducts leading to and from the station unless specifically directed by a station representative.

48. Procedure to be followed by driver in event of accident involving his or her vehicle. The driver of any vehicle involved in an accident resulting in injury or death to any person or damage to any property shall immediately stop such vehicle at the scene of the accident, render such assistance as may be needed, and give his or her name, address and driver's license, and the registration number of the vehicle to the person injured

or to a Port Authority officer or representative. The driver, operator, or owner of such vehicle shall make a report of such accident in accordance with the law of the State of New York.

49. Unauthorized tampering, starting, movement or interference with vehicles prohibited. No unauthorized person shall tamper with any vehicle, start the motor thereof, move the vehicle, or otherwise interfere with the operation thereof at the station.

50. Permission required to fuel, defuel, lubricate, clean or repair vehicles within station. No person shall fuel, defuel, lubricate, clean or repair a vehicle or any part thereof, at the station without permission.

51. Vehicles entering station required to extinguish headlights. Every driver of a vehicle entering the stations shall extinguish the headlights thereof and shall not relight them until leaving the station.

52. Prolonged sounding of vehicle horns prohibited. Prolonged sounding of the horns of vehicles in the station is forbidden.

53. Leaving vehicles unattended without turning off motor, locking vehicle and setting brakes prohibited. No person shall leave a vehicle unattended in the station without having

first turned off its motor, locked all doors, and set its parking brakes.

54. Vehicles prohibited from remaining in station for more than 15 minutes. No vehicle shall remain in the station for longer than the time necessary for permitted operations in connection therewith, and, unless a shorter time limitation is elsewhere imposed, no vehicle shall remain in the station for longer than 15 minutes unless at a designated gate or parking space and so as not to obstruct the operation of the station. The Manager shall have authority to require, by five minutes' notice, which may be given orally to the driver, the removal from the station of any vehicle which shall have been standing or parked at the station for so long as 15 minutes; in the event the vehicle is not so removed, the Port Authority may remove it under the provisions of section 59.

55. Operation of vehicles within station regulated. No person shall operate a vehicle in the station in a careless and negligent manner or in disregard of the right or safety of others, or without due caution, or at a speed in excess of speed limits posted in the area where the vehicle is being operated, or in any event at a speed in excess 5 miles per hour, or at any speed or in any manner which endangers or is likely to endanger persons or property, or while under the influence of intoxicating liquor or any narcotic or habit-forming drug.

56. Compliance with authorized traffic orders, signals, signs or directions required. Drivers of vehicles in the station must at all times comply with any traffic order, signal or direction, given by voice or by hand, of an authorized representative of the Port Authority. When traffic is controlled by traffic lights or signs or by mechanical or electrical signals, such lights, signs and signals shall be obeyed unless an authorized representative of the Port Authority directs otherwise.

57. Drivers required to report arrival and departure and pay fees. Unless other applicable provision for reports is made in an agreement with a carrier, each driver of a bus of any carrier shall report to the Port Authority representative upon arrival at the station, shall pay all fees required shall give information of the expected time of departure, and shall, immediately before departure, check out as directed by the Port Authority representative.

58. Disabled vehicles subject to removal. Unless other provisions for the removal of disabled vehicles has been made by agreement, the Port Authority shall have the right to require, by five minutes' notice which may be given orally to the driver, the removal from the station (or to a different location in the station), of any vehicle which has become disabled in the station. In the event such vehicle is not so removed, the Port Authority may remove it under the provisions of section 59.

59. Removal of vehicles from station to be at owner's or operator's risk and expense. In the event the Port Authority is empowered to remove any bus or other vehicle from the station by any provision of the rules and regulations set forth, such removal shall be at the risk of the owner or operator of such vehicle, and the cost thereof shall be for the account of such owner or operator and payable to the Port Authority on demand.

60. Time limit for engine idling. Every driver who causes a vehicle to park or stand in the station for three (3) or more minutes shall turn off its motor.

CHARTER BUS OPERATIONS

61. Use of the station by charter buses permitted; restrictions; fees. Operators of charter bus transportation service between the City of New York and points outside the city who have not entered into agreements for space and services at the George Washington Bridge Bus Station will be permitted to use the enclosed vehicular levels of the station, such use to be limited to one-way and through operations originating at points outside New York City, and to round-trip operations, the initial portions of which originate at points outside New York City, the charge for each bus arrival or departure with passengers to be \$12.50.

PUBLIC VEHICULAR PARKING

62. The Port Authority public vehicular parking area..

The public vehicular parking area is operated and charges fees as established by the Executive Director of the Port Authority of New York and New Jersey or his designated representative.

ELEVATORS, ESCALATORS, AND LOADING DOCKS

63. Elevator Schedule. Elevators for passengers and freight handling service will be operated in accordance with a schedule established by the Manager unless the arrangements are made with the Manager for operation at other times.

64. Prohibition. Passenger elevators and escalators may not be used to carry freight.

65. Controls. The use of any escalator, elevator, private right-of-way or truck loading dock at the station will be subject to the direct control of the Manager.

66. Causing an elevator or escalator to stop. No unauthorized person shall cause an elevator or escalator to stop by means of any emergency stopping device unless continued operation would appear to result in probable injury to a person or persons. Any such stoppage should be reported immediately to a station representative.

67. Truck loading docks. Truck loading docks located in the station

designed to accomplish the immediate transfer of merchandise between the freight elevators and trucks. All person will confine their use of docks to such purpose as directed by the Manager. No storage or holding of merchandise on the truck loading docks awaiting the arrival of trucks or awaiting transfer to premises or space at the station will be permitted.

(Board - 2/11/88)

**George Washington Bridge - Washington Ramp West - Installation
of Concrete Barriers**

This project provides for the construction, by Port Authority forces, of a continuous concrete footing and installation of approximately 300 feet of "Jersey" type concrete barriers at an area adjacent to the Washington Ramp West.

The Washington Ramp West carries vehicular traffic from the westbound Washington Bridge to the New York Expressway leading to the George Washington Bridge. For many years, the area adjacent to the ramp has served as a dump site for stolen vehicles, which have been stripped, fire damaged, or otherwise abandoned, and which, by their presence, present a hazard to motorists using the ramp. The necessary periodic removal of these vehicles by the City of New York Department of Transportation or Department of Sanitation results in further inconvenience to bridge patrons. Neither the City of New York, which owns the property, nor the State of New York, have plans or the funds available to install a barricade. In light of the fact that the Washington Ramp West ramp serves as one of the principal gateways to the George Washington Bridge, is adjacent to Port Authority property, and is often assumed to be the responsibility of the Port Authority, construction of a barricade and removal of the abandoned vehicles by the Port Authority should improve the appearance of the area and contribute positively to the safety of bridge users. Used barriers are available at the George Washington Bridge.

Management staff at the George Washington Bridge has discussed this subject with the Borough of Manhattan Community Planning Board 12, and has received its approval to have the Port Authority perform this work. The Planning Board, in turn, has received concurrence from the New York Department of Transportation. To the extent necessary, an appropriate agreement will be entered into with the City of New York to access the property.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to permit installation of concrete barriers on the Washington Ramp West access to the George Washington Bridge by using Port Authority construction forces to perform the work, at a cost of approximately \$50,000.

(Board - 2/11/88)

Holland Tunnel - Entrance Plaza Redevelopment - Project Authorization

The Holland Tunnel handles close to 40,000 eastbound vehicles daily, and approximately 27.8 million vehicles annually in both directions. The original Holland Tunnel plaza was opened in 1927. Six of the eight toll booths presently in operation were constructed in 1954, and two additional booths were added in 1975 and 1980 on an interim basis to accommodate increased traffic demand. Two lanes were equipped with surplus 23-year-old toll booths and equipment from the Bayonne Bridge. In 1979, the original tolls building was demolished because it was obsolete and the area it occupied was needed to widen the entrance to the south tube. Since that time, the tolls supervisory station and the related employee facilities have been housed in temporary trailers. The existing toll plaza facilities are functionally and physically obsolete. Most of the toll booths and related infrastructure have been in continuous service for approximately 33 years and require extensive maintenance to keep them in operating condition.

The proposed redevelopment will include: improvements at the south tunnel's portal, including widening of the approach roadway; a new tolls operations building to replace "temporary" trailer facilities installed in 1979; and nine new toll lanes (an increase of one over the present facilities) to replace the existing structures. Overall, the redevelopment will modernize the present facilities and infrastructure resulting in increased capacity and improved safety and environmental conditions for both customers and employees. Our customers will benefit most directly from increased plaza capacity afforded by the ninth toll lane; a wider merging area departing the toll booths; and a 50% larger holding area approaching the toll booths. In addition, an improved turnaway ramp will allow safer and more expeditious removal of off-route and prohibited vehicles, minimizing interference with the flow of traffic to the tunnel.

Jersey City has requested participation by the Port Authority in a sewer relocation project which is seen as beneficial for our project and required for the overall operation of the tunnel. Negotiations on this matter will begin immediately.

The property necessary for the project has been acquired from Newport Associates Development Company pursuant to Board authorization adopted in December 1986.

Construction is expected to begin in late 1988 and to be completed in 1992.

An overall goal of at least 10% Port Authority certified Minority Business Enterprise and 1% Women-owned Business Enterprise participants has been established for this project. Appropriate allocations will be assigned and monitored on a contract by contract basis.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize: (1) a project for the redevelopment of the entrance plaza at the Holland Tunnel in Jersey City at a total expenditure estimated at \$54 million including payments to contractors, allowances for extra work and net cost work, engineering, administrative and financing expenses, related agreements, and project contingency; (2) the Executive Director to: (a) take such action with respect to purchase and construction contracts, contracts for professional and advisory services and contracts for construction management services for the foregoing project as he deems in the best interest of the Port Authority, including without limitation award to the lowest bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and

(Board - 2/11/88)

whose bid price the Executive Director deems reasonable; rejection of all bids; solicitation of new bids on revised or the same requirements; or negotiation with one or more bidders or other contractors; and (b) execute contracts and supplemental agreements with such bidders or contractors as he deems in the best interest of the Port Authority and to order extra work and net cost work in connection with each contract including, supplemental agreements thereto; and (3) the Executive Director to negotiate and enter into agreements with State, municipal and other public or private entities as may be appropriate and required to carry out the project, including agreements relating to the installation and relocation of public and private utilities.

Greenville Property - Sale of Property to United States Packing and Shipping Co., Inc.

It was reported to the Board that at its meeting on September 10, 1981, the Board authorized the acquisition by purchase of waterfront property at Port Jersey and Greenville. This property, which totaled approximately 470 acres, was purchased in 1981 and 1982 to ensure the availability of the site while planning and studies continued on the possible construction and operation of a coal handling and transfer facility. That project was never advanced and these properties were subsequently incorporated into the Pre-development Site Acquisition Program in 1984. The Greenville portion, acquired on December 30, 1981 from the Penn Central Corporation, contains approximately 227 acres and is comprised of four tracts totaling approximately 132 acres of upland and 95 acres of land under water. The purchase price was \$6,010,000, based on per acre values of \$38,500 for upland area, and \$9,900 for land under water. Included in the upland area, although not contiguous with the other 120 acres, is the subject 12.2 acre parcel of vacant land, also known as Tract IV.

United States Packing and Shipping Co., Inc. (USP) is the abutting property owner to the east of Tract IV and desires to purchase an 11.6 acre portion of the parcel for a price of \$957,561 and utilize it to construct an expansion of its freight terminal. City officials have urged the Port Authority to sell Tract IV to USP to replace USP's condemned property so that the 150 jobs involved will remain in the City. USP has been leasing temporary quarters pending consummation of this sale.

The Port Authority will exclude from the sale of Tract IV approximately 0.6 acres to provide an access road to the westerly portion of the remainder of the Greenville property. The entire 12.2 acre Tract IV site was transferred from the Pre-development Site Acquisition Program on December 11, 1986 as part of the Auto Marine Terminal facility certification.

Sale of the parcel will not affect the development of the Auto Marine Terminal or the remainder of the Greenville property.

The Port Authority will apply for an Environmental Cleanup Responsibility Act determination of non-applicability from the New Jersey Department of Environmental Protection prior to closing. USP would accept the property "as is."

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board: (a) finds and determines that approximately 11.6 acres of a 12.2 acre parcel of vacant land at Greenville, Jersey City, New Jersey, known as Tract IV, comprising a portion of Lot 2Q in Block 1507 on the Tax Assessment Map of the City of Jersey City, and hereinafter described, is no longer required for marine terminal purposes:

BEGINNING at a point in the northerly line of Harbor Drive (80 feet wide) distant 656.21 feet measured northwesterly along the said line from a point formed by the intersection of the northerly line of Harbor Drive and the westerly line of Industrial Drive (80 feet wide) as shown on a map entitled "Amended Major Land Sub-Division for Port Jersey Industrial and Marine Center", dated August 15, 1975 and filed January 23, 1976 as Map No. 2807 in the Hudson County Register's Office. Said beginning point being further described as the southeast corner of a tract of land conveyed to The Port Authority of New York and New Jersey by deed from the Penn Central Corporation dated December 30, 1981 and recorded in the Hudson County Register's Office on December 31, 1981 in Deed Book 3339 at page 337, et seq.; extending from said beginning point the following nine courses and distances:

1. N.56°-11'-52"W., 638.93 feet along the northerly line of Harbor Drive to an angle point; thence

2. N.59°-19'-45"W., 303.42 feet still along the northerly line of Harbor Drive to a point of curvature of a non-tangent curve to which point a radial line bears S.55°-34'-04"W., thence

3. Along the arc of a circle concave to the east having a radius of 90.00 feet, a central angle of 101°-43'-52" and an arc length of 159.80 feet to a point of tangency; thence

4. N.67°-17'-56"E., 248.12 feet to a point of curvature; thence

5. Along the arc of a circle concave to the northwest having a radius of 475.00 feet, a central angle of 31°-57'-36" and an arc length of 264.96 feet to a point which a radial line bears S.54°-39'-40"E., thence

6. S.58°-20'-45"E., 294.75 feet to a point; thence

7. S.31°-39'-15"W., 24.04 feet to a point; thence

8. S.58°-20'-47"E., 472.93 feet to a point; thence

9. S.33°-48'-08"W., 577.76 feet to a point in the northerly line of Harbor Drive being the point and place of beginning.

All bearings are in the New Jersey State Plane Coordinate System; (b) authorizes the Executive Director to enter into a contract to sell to United States Packing and Shipping Co., Inc. the above-described parcel at the purchase price of \$957,561 and to execute all documents required in connection therewith; (c) authorizes that a map designated PA-AMT-S1-NJ, dated February 1, 1988, showing and describing the above-described parcel, be filed in the Office of the Secretary of the Port Authority and directs the Chief Engineer of the Port Authority to execute a certificate stating that the real property shown on said map is no longer required for the purposes for which it was originally acquired; and (d) requires that all documents necessary to accomplish the aforesaid transaction be subject to approval as to form by General Counsel or his duly authorized representative.

(Board - 2/11/88)

**Port Authority Auto Marine Terminal - Greenville and Port
Jersey Properties - Payment In-Lieu-of-Taxes - City of
Jersey City**

The Board, at its meetings on February 11, 1982, November 10, 1982, April 14, 1983, May 10, 1984, July 11, 1985 and August 14, 1986, authorized the payment for each of the years 1982-1986 to the Cities of Bayonne and Jersey City, New Jersey, and on December 10, 1987 to the City of Bayonne of the amounts representing the real estate taxes assessed on the Greenville and Port Jersey properties. At its meeting on December 11, 1986 the Board authorized a project for the development of an imported automobile marine terminal, construction of which has begun. While the development of these properties is in progress an in-lieu of tax agreement has been delayed until active negotiations are concluded. In the interim, it is recommended that payment be made to the City of Jersey City of an amount equal to the real estate taxes assessed against the Greenville and Port Jersey properties for the year 1981 and 1982, the year of purchase of these properties, respectively, in the approximate total amount of \$895,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board hereby authorize payment for the year 1987, to the City of Jersey City, New Jersey, in connection with the Greenville property purchased from Penn Central Corporation and the Port Jersey properties purchased from Harborland Corporation and Teachers Insurance and Annuity Association of America, in the approximate total amount of \$895,000, which is equal to the real estate taxes assessed on the properties for the year 1981 and 1982, the year of purchase of these properties, respectively.

(Board - 2/11/88)

**Elizabeth-Port Authority Marine Terminal - Development of
Area South of Bay Avenue - Project Authorization and
Award of Contract EP-110.046**

An area consisting of approximately 31 acres south of Bay Avenue on the northerly portion of the 130-acre Industrial Park at Elizabeth has not been scheduled for industrial development because of PCB contamination.

A project for the development of a marine cargo open storage area on this site has been proposed. The New Jersey Department of Environmental Protection has reviewed the construction methods to be employed on the project and has issued the necessary permit.

Contract EP-110.046, the only contract necessary under the project, provides for paving, installation of water mains for a fire hydrant system, peripheral drainage ditches, a passive methane gas venting system, a paved access road and related security provisions. Additionally, the contract provides for site clearing, grubbing and disposal of debris and excess excavated material, excavation and disposal of unsuitable material and replacement with suitable material all on a net cost basis presently estimated at roughly \$100,000.

The contract also provides that the contractor is required to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

The contract was publicly advertised and bids were received on December 22, 1987. Dell Contractors, Inc. was the low bidder and was determined to be qualified to perform the contract by the Chief Engineer.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize a project at the Elizabeth-Port Authority Marine Terminal to provide paving and utilities for a marine cargo open storage area at a total expenditure estimated at \$4.0 million, including payments to contractors, provision for extra work and net cost work, engineering, administrative and financing expenses; and it is further

RESOLVED, that the Executive Director is authorized to award Contract EP-110.046 to Dell Contractors, Inc., the low bidder, in the amount of \$2,939,000, to order extra work up to the amount of \$300,000 and to order net cost work.

Kennedy International Airport - Retention of Master Planning Support Services for the JFK Redevelopment Program

Over the past year, an interdepartmental group established by the Director of Aviation has made recommendations concerning the type of organization best suited to successfully undertake the JFK Redevelopment Program. It was assumed that large amounts of the work would be performed by outside services and authorization to retain a Program Architect, a Program Manager, a Design Architect/Engineer, and a Construction Manager was provided by previous Board action. The group recommended that the Authority maintain control and direction of the work through a nucleus of Port Authority staff. Currently this nucleus organizational framework is in place. It consists of a Program Director, an Assistant Program Director for Program Management and Administration and three Assistant Program Directors (Planning, Design and Construction) to provide direction and management oversight to the total JFK Redevelopment Program effort. It is envisioned that the nucleus team, with the assistance of several senior level Port Authority staff members and advice from other departments, will provide the necessary overall direction and broad management coordination required.

In October 1984, PRC Engineering (now known as Frederick R. Harris, Inc. after acquisition by Ashland Oil in January 1987), using I.M. Pei and Partners as a subconsultant, was retained to develop a conceptual plan for the reconstruction of the Central Terminal Area at JFK. The plan was completed in 1986. During the fifteen months spent in developing the conceptual plan, PRC became familiar with the airport and its redevelopment needs. PRC developed a conceptual plan for the redevelopment of Kennedy International Airport. This plan was reviewed by an interdepartmental value planning analysis team and a "constructibility" consultant and was found to meet project objectives and has been favorably received by most members of the airport community. To ensure successful implementation of this concept, staff has recommended that Frederic R. Harris, Inc. be retained to complete planning of the design concept for the program master plan which the firm has already begun and to ensure that the approved program concept is successfully executed.

Under the contract Frederic R. Harris, Inc., as Program Planner, will perform professional services related to the further development of and refinement to the program master plan for all elements of the JFK Redevelopment Program. They will also provide input to other professional engineering firms, as well as Port Authority staff on related studies involving the redevelopment effort. The product of this work will be integrated into the programming and design criteria required for the final design, contract documents and construction. Additionally, the contract will provide for compensation based on actual salaries paid (time card), plus a multiplier, plus out-of-pocket expenses within a cost presently estimated at \$6 million.

An overall goal of at least 15% Port Authority certified Minority Business Enterprise and Women's Business Enterprise participants has been established for the JFK Redevelopment Program, of which at least 10% must be Minority Business Enterprises.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, to enter into an agreement with Frederic R. Harris, Inc., New York, New York to perform professional services as the Program Planner for the JFK Redevelopment Program and that the form of such agreement be subject to the approval of General Counsel or his authorized representative.

(Board - 2/11/88)

**Newark and Kennedy International Airports - Settlement of
Audit Findings for Fees Owed by Ariston Airline Catering
and Supply, Inc.**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a settlement agreement with People Express Airlines, Inc. ("People Express") and Continental Airlines, Inc. ("Continental") as joint and several obligors, fixing at \$1,686,352 the amount owed by Ariston Airline Catering & Supply, Inc. ("Ariston") to the Port Authority based upon a Port Authority audit of Ariston's gross receipts for the period January 1, 1981 through January 31, 1987 arising from in-flight meals and ramp services furnished at Newark International Airport and providing for the release of Ariston from the payment of such audit amount; and to enter into a settlement agreement with Ariston fixing at \$357,000 the amount owed by Ariston based upon a Port Authority audit of Ariston's gross receipts for the period January 1, 1981 through January 31, 1987 arising from in-flight meals furnished to aircraft operators at Kennedy International Airport.

The settlement agreement to be entered into among the Port Authority, People Express and Continental provides that of the \$1,686,352 settlement amount \$1,072,526 would be paid in six equal monthly installments of principal and interest at the rate of 12.25% per year commencing on November 1, 1987 with the remaining amount of \$613,826 to be paid in nine equal monthly installments of principal and interest at the rate of 12.25% per year commencing upon, or on the first day of the calendar month following, the final execution of the settlement agreement. The settlement agreement to be entered into between the Port Authority and Ariston provides that of the \$375,000 settlement amount \$267,750 would be paid by Ariston upon execution of the settlement agreement and the balance of \$89,250 would be paid commencing upon, or on the first day of the calendar month following, the final execution of the settlement agreement in six equal monthly payments of principal and interest at a rate equal to the prime rate as of a date set forth in the agreement not to exceed, however, 8%.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into agreements with People Express Airlines, Inc. and Continental Airlines, Inc. and Ariston Airline Catering & Supply, Inc. substantially on the terms set forth above; the form of the aforesaid agreements to be subject to the approval of General Counsel or his designated representative.

Kennedy International Airport - Relocation of Very High Frequency Omni Range (VORTAC) Facility - Agreements to Reimburse Federal Aviation Administration

On August 13, 1987, the Board authorized a project for taxiway enhancements at Kennedy International Airport including a portion of new Taxiway "ZB" at a total cost of \$13.6 million. Project authorization for additional aeronautical capacity enhancements including the extension of Taxiway ZB will be presented at an upcoming meeting of the Board. The authorized project involves preparing contract documents, site preparation and relocation of the Kennedy International Airport VORTAC facility (a radio navigational aid) to a position 500 feet east, and 100 feet south of the existing site.

The increase in aircraft operations at Kennedy International Airport has made airport capacity a critical element in the airport's ability to serve the public. Relocating the VORTAC will permit the extension of Taxiway 'ZB'. The extension of this taxiway will allow for the storage of aircraft and multiple crossing points of Runway 4L-22R during peak activity. It will also provide the airport with an operational advantage by allowing increased flexibility for departures on Runway 31L. At present, Taxiway 'ZB' cannot be extended between Taxiways 'H' and 'J' due to Federal Aviation Administration (FAA) criteria which states that no activity can take place within 500 feet of the VORTAC facility.

It is therefore recommended that the Board authorize the Executive Director to enter into two agreements with the FAA. Under the initial agreement, the Port Authority will agree to reimburse the FAA for project engineering costs associated with the VORTAC relocation. Upon completion of the engineering plans and specifications, the Port Authority will enter into a second agreement to reimburse the FAA in the estimated amount of \$750,000 for the relocation of the VORTAC Facility.

The cost of the project will be recovered in the flight fee formula.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into two agreements to reimburse the Federal Aviation Administration for the cost of project engineering design services and for construction involved in the relocation of the Kennedy International Airport VORTAC Facility, the form of the agreements to be subject to the approval of General Counsel or his authorized representative.

(Board - 2/11/88)

The Teleport - Authority to Enter into a Lease with Teleport Associates

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into negotiations with Teleport Associates on an agreement for the leasing of approximately 5,000 square feet of office space, for the use of Port Authority staff, in Teleport I, a building constructed by Teleport Associates pursuant to a lease agreement with the Port Authority and to enter into a lease based on such negotiations.

Teleport's staff is currently located at the World Trade Center and in temporary field trailers at the Teleport. The leasing of this space from Teleport Associates would allow the Port Authority to consolidate staff in one location and to establish a permanent office for the facility's operations and maintenance staff. The proposed lease would allow the Port Authority to periodically surrender space to accommodate the Port Authority's diminishing staffing requirements as the Teleport construction project nears completion. Furthermore, the removal of the temporary field trailers now occupied by Teleport's staff would make an additional 2 1/2 acres of land available for revenue-producing purposes. The lease would provide for the payment of such rental, including operating expense rental, as the Executive Director deems reasonable, and would contain such other terms and conditions as the Executive Director deems reasonable.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into negotiations with Teleport Associates on a lease agreement covering approximately 5,000 square feet of office space in Teleport I, and to enter into a lease based thereon on such terms and conditions as the Executive Director deems reasonable, the form of the agreement finally agreed upon to be subject to the approval of General Counsel or his designated representative.

(Board - 2/11/88)

**Port Authority Bus Terminal Extension - Excavation and
Substructure - Contract BT-190.004 - Lincoln Tunnel
Approaches - 41st Street Underpass - East Section -
Contract LT-240.005 - Settlement of Claim**

On January 15, 1976, the Board authorized the award of Contract BT-190.004, Port Authority Bus Terminal Extension, Excavation and Substructure, and Contract LT-240.005, Lincoln Tunnel Approaches, 41st Street Underpass, East Section, to Leon D. DeMatteis & Sons, Inc., DeSimone Excavation & Foundation Corp., Coppola Construction Corporation, a joint venture (D.C.D.), the low bidder, at its bid price in the estimated amount of \$9,854,000, exclusive of an allowance for extra work and net cost work.

Subsequently, on March 10, 1977, the Board authorized an increase of \$550,000 in the authorized payments under Contract BT-190.004 and Contract LT-240.005 to \$10,404,000 for increased Classified Work quantities; and on September 8, 1977, the Board authorized the settlement of a claim by D.C.D. up to and including May 11, 1977. The contractor's claim amount of \$1,326,919 was settled for \$310,521.

On July 1, 1980, D.C.D. submitted a further claim in the amount of \$6,081,682 for additional costs stated to be generally because of lack of coordination by the Port Authority with various utilities, water conditions at the site, lack of access to the site, and various interferences.

Thorough staff review of the contractor's claim followed. Staff did not concur with many of the allegations and claimed damage amounts submitted by the contractor and various presentations, discussions and reviews by the parties ensued. Finally, after protracted negotiations, in December 1987 a tentative settlement was reached under which the Port Authority would pay the Contractor a total amount of \$1,938,411 as follows:

- | | |
|----------------|--------------------------------------------------------------------------------------------------------------------------|
| 1. \$ 737,003 | representing monies earned by the contractor under the terms of the contract but not yet paid by the Port Authority; and |
| 2. \$1,201,408 | representing payment for all claims by the contractor against the Port Authority. |

This settlement is considered fair and reasonable.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to make a total payment of \$1,938,411 to Leon D. DeMatteis & Sons, Inc., DeSimone Excavation & Foundation Corp., Coppola Construction Corporation, a joint venture in settlement of all claims under Contracts BT-190.004 and LT-240.005, to be payable upon execution of General Releases by the Port Authority and the contractor, the form of the Releases to be subject to the approval of General Counsel or his authorized representative.

(Board - 2/11/88)

Meritorious Service Award of Police Commendation Medal to Police Officer Warren A. Hodges

It was recommended that the Police Commendation Medal be awarded to Police Officer Warren A. Hodges.

The Police Commendation Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Police Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Police Officer Warren A. Hodges it is recommended that the Police Commendation Medal award be given on the following grounds:

On November 25, 1986, Police Officer Warren Hodges, assigned to the George Washington Bridge command, was working the 11:00 p.m. to 7:00 a.m., tour. At approximately 1:00 a.m, Officer Hodges received a radio message which stated that local police departments were pursuing a stolen vehicle traveling southbound in the northbound lanes of the Palisades Interstate Parkway. Realizing the extreme danger that was inherent in the situation, Officer Hodges immediately headed for the Palisades Interstate Parkway toll plaza.

Unknown to Officer Hodges at the time was that the suspect had been pursued in a different vehicle earlier by the Bergen County Police. The suspect and an accomplice had managed to elude several police departments by abandoning their vehicle and fleeing into the woods in Alpine, New Jersey. One of the suspects stole a vehicle from a private residence in Alpine and headed south on the Palisades Interstate Parkway. The Parkway police observed the stolen vehicle heading southbound at a high rate of speed against traffic and gave chase. A Fort Lee police unit notified Police Officer George DePanics, of the George Washington Bridge, who then relayed the information to the George Washington Bridge police units.

The suspect had just driven around and evaded a roadblock on the toll plaza when Officer Hodges approached the ramp to the Palisades Interstate Parkway. The suspect was now headed directly for Officer Hodges. Recognizing the threat to oncoming motorists, Officer Hodges immediately positioned his patrol vehicle to block the suspect's escape route. Upon seeing the patrol vehicle, the suspect drove over the curb, blowing a tire, and proceeded against traffic on the upper level of the bridge. Officer Hodges and an Alpine police unit followed the suspect onto the bridge in close pursuit.

(Board - 2/11/88)

Officer Hodges managed to maneuver his patrol vehicle in front of the suspect's vehicle. During those tense moments Officer Hodges was able to bring the fleeing vehicle to a halt halfway across the bridge. At this point the suspect exited the vehicle holding a large screwdriver and fled to the outer railing of the North walkway.

Waving the screwdriver at Officer Hodges and other police personnel at the scene, the suspect threatened to jump, stating that he wanted to kill himself. Officer Hodges continued to talk to the suspect and managed to maneuver him from the railing. Then, without warning, the suspect turned and moved towards the railing in an attempt to climb over it. Officer Hodges lunged at him, grabbing the suspect from behind. Other officers present then assisted Officer Hodges in disarming and subduing the suspect. During the violent struggle, an Englewood Cliffs sergeant was struck in the face with the screwdriver and required hospitalization.

With the suspect in the custody of Officer Hodges, the high threat to the safety and well being of the motoring public was removed.

Police Officer Warren Hodges displayed fine judgment and initiative in his actions to apprehend a fleeing suspect. Fully aware of the personal risk he was taking, Officer Hodges was instrumental in preventing this despondent individual from taking his own life.

For saving the life of another and placing his own life in danger, it is recommended that the Police Commendation Medal be awarded to Police Officer Warren A. Hodges.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Police Commendation Medal to Police Officer Warren A. Hodges.

(Board - 2/11/88)

Meritorious Service Award of Police Commendation Medal to Police Officer John C. Karkut

It was recommended that the Police Commendation Medal be awarded to Police Officer John C. Karkut.

The Police Commendation Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Police Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Police Officer John C. Karkut it is recommended that the Police Commendation Medal award be given on the following grounds:

On Wednesday, August 19, 1987, Police Officer John Karkut of the George Washington Bridge command was assigned to patrol the Bus Station on 178th Street in New York City. With Police Officer Karkut was Police Officer Patrick Early, who was recently transferred to the George Washington Bridge and was receiving facility familiarization training.

At approximately 4:00 p.m., the two officers were walking along the bus platforms when they observed a barefoot, disheveled man sitting on the upper steps of the stairway to the platform. Upon approaching the individual they observed him holding a prescription bottle while counting several white pills. When the officers questioned him about the pills, he didn't look at the officers, refusing to acknowledge their presence.

The officers became increasingly suspicious. Realizing that the commuters on the platform might be in danger, the officers asked the man to return to the police room for further investigation.

While being escorted down an escalator closest to the police room, the man suddenly turned and grabbed Officer Early's shirt, pulling him off balance. This action caused all three to tumble down the moving escalator. Officer Early fell onto his back with the suspect pulling on his service revolver. "He's grabbing for my gun" yelled Early as the three neared the bottom of the escalator.

(Board - 2/11/88)

Suddenly, Officer Karkut saw the suspect holding the revolver only inches away from Officer Early's chest. Without hesitation, Officer Karkut grabbed for the gun and with his left hand was able to force one of his fingers to the back of the trigger guard, and with his thumb he was able to hold the hammer from releasing. This swift and decisive action prevented the revolver from firing. "I'm going to kill him, I'm going to kill him" shouted the suspect as he continued to squeeze the trigger of the revolver.

Maintaining his composure, Officer Karkut kept his grip on the revolver and finally gained leverage to use his right hand to pull the revolver away from Officer Early's chest. Relying on his professional training, Karkut then disarmed the suspect. The struggle continued as the suspect violently resisted the officers.

After securing the revolver in his gun belt, Officer Karkut radioed for assistance, realizing they needed help to subdue the suspect. The struggle continued until Officer Karkut managed to get the suspect under control and then, together with responding units, placed handcuffs on him.

Throughout the incident, Police Officer Karkut demonstrated extraordinary bravery in the face of a life-threatening situation which could have resulted in grave consequences. Through his efforts, he remained in control of the situation, and was able to bring about a safe conclusion to a serious incident.

For his quick and decisive actions which saved the life of a fellow Police Officer, it is recommended that the Police Commendation Medal be awarded to Police Officer John C. Karkut.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Police Commendation Medal to Police Officer John C. Karkut.

**Meritorious Service Award of Police Commendation Medal to
Police Officer Bernard Grossman and Police Officer
Michael A. Scirrotto**

It was recommended that the Police Commendation Medal be awarded to Police Officer Bernard Grossman and Police Officer Michael A. Scirrotto.

The Police Commendation Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Police Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Police Officer Bernard Grossman and Police Officer Michael A. Scirrotto it is recommended that the Police Commendation Medal be given on the following grounds:

At 2:10 a.m. on July 1, 1987, Police Officer Bernard Grossman received a radio transmission from the Staten Island Bridges Communications Desk reporting that a female was walking in the roadway of the Bayonne Bridge.

Upon receiving the notification, Officer Grossman, who was assigned to the Bayonne Bridge, immediately drove onto the Bridge looking for the woman. Approaching the Bayonne end of the Bridge, the officer did not see anyone in the roadway. He decided to check the entrance road which led onto the Bridge from Avenue A in Bayonne. After reentering the Bridge driving towards Staten Island, Officer Grossman observed a female on the walkway. The woman was nearing the center span when the officer approached her.

Concerned for the woman's safety since she was alone, and considering the time of day, he activated his emergency lights and stopped the patrol vehicle. He stepped out of the vehicle and asked the woman what she was doing. Her reply led the officer to believe she was upset. The woman was legally permitted to use the walkway but Officer Grossman felt he should follow her across the Bridge. He then radioed the Communications Desk informing them of the situation.

Acting on Officer Grossman's radio message that the woman was walking towards Staten Island, Police Officer Michael Scirrotto arrived at the New York toll plaza. He then positioned his patrol vehicle to observe the walkway leading to the plaza.

Officer Grossman followed the woman to the middle of the Bridge where the walkway moves out and around the arches at mid-span. Without warning, the woman stopped, looked over the railing, and began to climb over it. "She went over the rail" was radioed by Officer Grossman as he backed his patrol vehicle along the roadway to a point where he could access the walkway. Upon receiving this message, Officer Scirrotto drove onto the bridge to lend assistance.

Once Officer Grossman reached the walkway he ran a distance of 300 feet to the woman who had lowered herself to the bottom of the railing. Seeing a pair of hands protruding through the railing, the officer unhesitatingly dropped to his knees and grabbed the woman's right arm. He tried to pull up the woman, who now was dangling in mid-air, onto the walkway. Realizing this was impossible, he decided to maintain his grip to prevent the woman from falling into the water below.

Arriving at the scene Officer Scirrotto parked in front of Grossman's vehicle. Officer Scirrotto was directed to the location by Officer Grossman's shouts since the darkness made it difficult to see on the walkway. Hearing Officer Grossman say he was losing his grip, Officer Scirrotto radioed for more assistance as he ran to help.

Reaching through the narrow railing, Scirrotto grabbed the woman's left arm. Both officers then attempted to lift the woman. Due to the woman's body weight and her position low and outside the railing, they could only hold onto her. Both officers strained to keep a secure hold.

During what seemed to be an eternity, the woman complained her arms hurt. The two officers calmed her and hoped additional help would soon arrive. Minutes seemed like hours before a Lieutenant, Police Officer and Maintenance Foreman arrived. Together they struggled to lift the woman from her precarious position. When the woman's shoulders reached the top of the railing, she began to vomit violently. Rather than lose their grip, the rescuers waited until the woman stopped vomiting and then lifted her over the railing to safety. An ambulance at the scene transported the despondent woman to Bayonne Hospital where she was held for observation.

For their heroic and selfless actions in saving the life of a despondent woman, it is recommended that the Police Commendation Medal be awarded to Police Officer Bernard Grossman and Police Officer Michael A. Scirrotto.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Police Commendation Medal to Police Officer Bernard Grossman and Police Officer Michael A. Scirrotto.

(Board - 2/11/88)

Meritorious Service Award of Police Commendation Medal to Police Officer Clive Madden

It was recommended that the Police Commendation Medal be awarded to Police Officer Clive Madden.

The Police Commendation Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Police Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Police Officer Clive Madden it is recommended that the Police Commendation Medal award be given on the following grounds:

On Saturday, May 23, 1987, at approximately 3:00 p.m., Police Officer Clive Madden was off duty in civilian attire at the corner of Farmers Boulevard and Everette Place, in St. Albans, Queens. He was about to meet with his accountant when the following intensely dangerous circumstances prevented that meeting.

The street was bustling with activity with numerous people patronizing the many stores and restaurants in the area. As Officer Madden walked along he observed a man holding a twelve gauge pump shotgun. Officer Madden quickly evaluated the situation and realized the danger to everyone on the street.

The Officer responded immediately, telling bystanders to take cover in a nearby restaurant. He then identified himself to the owner of the restaurant, instructing him to call the New York City Police and inform them of the danger. At that moment, the man with the shotgun fired into the air causing everyone on the street to run for cover. After hearing the shot, Officer Madden immediately ran to confront the subject, exposing himself to grave personal danger. The officer observed the subject raise the shotgun again, pointing it at an unknown person, and pulling the trigger. The shotgun failed to fire. The subject was then distracted for an instant as he began to reload his shotgun. Officer Madden took advantage of the moment to position himself close to the dangerous man. Now only a few feet away from the crazed man, Officer Madden ordered him to drop his weapon. The man refused.

Instead of using his own weapon, Officer Madden grabbed the shotgun and was able to disarm the man. A struggle ensued, and the officer managed to subdue the man and restrain him. Seconds later, units from the New York City Police arrived and assisted the officer with the arrest.

(Board - 2/11/88)

Police Officer Madden clearly demonstrated exceptionally good judgment and heroism in the face of imminent danger. Although he was within police guidelines to draw his weapon, Officer Madden, cognizant of the risk to innocent bystanders, elected to disarm the suspect. In so doing, a tragedy was avoided and the only injury sustained was by Officer Madden. His actions were in the highest traditions of police service and reflect favorably upon the Port Authority Police.

For using exceptionally good judgment, and for placing his own life in danger while off duty to protect innocent pedestrians, it is recommended that the Police Commendation Medal be awarded to Police Officer Clive Madden.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Police Commendation Medal to Police Officer Clive Madden.

Meritorious Service Award of Police Commendation Medal to Police Detective John G. Trotter

It was recommended that the Police Commendation Medal be awarded to Police Detective John G. Trotter.

The Police Commendation Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Police Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Police Detective John G. Trotter it is recommended that the Police Commendation Medal award be given on the following grounds:

During the month of August 1986, Port Authority Police Detective John G. Trotter was assigned to the ongoing Clipper Club Drug Investigation that culminated in the arrest of 56 drug traffickers, the confiscation of over \$1.1 million in seized assets, the destruction of a cocaine factory that produces 100 kilograms of cocaine per week, and the total destruction of a \$1.5 billion cocaine ring. This investigation was a joint effort between the Port Authority Police and the Drug Enforcement Administration (DEA).

Detective Trotter, was assigned to DEA Group 42 in August of 1986. During his assignment with the DEA, a formal investigation resulted in the identification of more than 40 drug traffickers, many of whom worked as Pan American Airways Passenger Services Representatives. Detective Trotter and his DEA partner, working in conjunction with Port Authority Detective Michael Molina, planned, organized and supervised effective drug investigations identifying procedures used to circumvent Customs' checkpoints at the airport. Detective Trotter not only played a major role in the tapping of phone conversations that led the police to contacts and informants, but he was also in constant danger as he bought and sold drugs in an undercover capacity. He coordinated with the United States Attorney's Office, Eastern District of New York, and managed to identify a principal in the drug ring known as "The Godfather."

Working in an undercover capacity with the DEA, in furtherance of the Clipper Club cocaine investigation, Detective Trotter voluntarily exposed himself to grave danger. While backup detectives and agents attempted to maintain visual contact with Detective Trotter as he infiltrated the ring in dangerous neighborhoods and areas, it was not always possible. On one occasion, Detective Trotter was involved in narcotics transactions on a boat docked in Howard Beach, New York, with absolutely no police backup. As a direct result of his observations, the conspirators were arrested and the boat was seized on March 10, 1987.

(Board - 2/11/88)

While working on the Clipper Club investigation, Detective Trotter also managed to develop an additional investigation into an organization of airline employees trafficking cocaine at both Kennedy International and LaGuardia Airports. Through the efforts of Detective Trotter, this group of drug traffickers was also effectively dismantled.

For working in an undercover capacity, for using exceptional judgment and undercover skills, for voluntarily facing grave danger and contributing to the successful termination of the \$1.5 billion Clipper Club drug ring, it is recommended that the Police Commendation Medal be awarded to Police Detective John G. Trotter.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Police Commendation Medal to Police Detective John G. Trotter.

(Board - 2/11/88)

Meritorious Service Award of Commendation Medal to Donald Amblo

It was recommended that the Commendation Medal be awarded to Donald Amblo.

The Commendation Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Donald Amblo it is recommended that the Commendation Medal award be given on the following grounds:

On August 3, 1987, Exercise Physiologist Donald Amblo responded to a call for assistance involving a contract employee who was found on the floor a short distance from the medical offices at the Port Authority Technical Center. This man had apparently suffered a heart attack and was in need of medical assistance. Mr. Amblo, a certified American Red Cross CPR Instructor, immediately began cardio-pulmonary resuscitation (CPR) and resuscitated the man three times before the Emergency Medical Team arrived at the Tech Center. From there, the stricken man was taken to the Jersey City Medical Center Emergency Room and subsequently transferred to the Intensive Care Unit where he was treated for coronary artery disease. On August 17, he was moved to St. Luke's-Roosevelt Hospital where he underwent coronary bypass surgery. Today, he is off all life support systems and is well on the way to recovery, thanks to Mr. Amblo's swift thinking and personal knowledge of CPR -- training which is not a requirement of his job as an exercise physiologist.

It is the professional opinion of the Director of the Office of Medical Services, Dr. Pilar Carbajal, that Mr. Amblo was responsible for saving this man's life. Mr. Amblo's ability to make a correct assessment of a difficult situation averted what could have been a catastrophe. By initiating cardio-pulmonary resuscitation he managed to keep the man alive until other Port Authority medical staff arrived to assist him.

For his quick thinking and decisive action to save the life of someone he did not know, and for his willingness to apply his personal knowledge and training in a situation beyond the scope of his work-related duties, it is recommended that the Commendation Medal be awarded to Donald Amblo.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Commendation Medal to Donald Amblo.

Meritorious Service Award of Commendation Medal to Fabian Munoz, Robert Murphy and Eduino Silva

It was recommended that the Commendation Medal be awarded to Fabian Munoz, Robert Murphy and Eduino Silva.

The Commendation Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Fabian Munoz, Robert Murphy and Eduino Silva it is recommended that the Commendation Medal award be given on the following grounds:

On Tuesday, August 4, 1987 at approximately 11:30 a.m., SEMAC vehicle 1303 was proceeding south in the far west lane of the Bayonne Bridge. The driver, Bridge painter Eduino Silva noticed a young woman standing on the riverside of the Bayonne Bridge handrail, looking as if she were going to jump from the bridge. Silva immediately stopped the vehicle and Bridge Painter Fabian Munoz raced from the vehicle, jumped over the roadway crashwall and handrail, landing on the floorbeam connecting both crashwall and sidewalk handrail.

Endangering his own life, Munoz grasped the woman. In doing so he was pulled over the handrail along with her as she struggled. Fortunately, Bridge painters Eduino Silva and Robert Murphy had also proceeded over the roadway handrail in time to grab Munoz, who continued his hold of the woman. Murphy and Silva managed to pull both Munoz and the eighteen-year old woman to safety. The three men put their own lives in danger by leaping over the handrail and holding onto the struggling woman in order to save her life.

Munoz, Murphy and Silva remained with the woman until she was taken into Port Authority Police custody and transported to Bayonne Hospital. Thanks to the three men, she is alive today.

For their sharp observations, quick action and exceptional judgment, while going far beyond the call of duty to save the life of a young woman, it is recommended that the Port Authority Commendation Medal be awarded to Fabian Munoz, Robert Murphy and Eduino Silva.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Commendation Medal to Fabian Munoz, Robert Murphy and Eduino Silva.

(Board - 2/11/88)

Award of Distinguished Service Medal to Thomas J. Charles

It was recommended that the Distinguished Service Medal be awarded to Thomas J. Charles.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Thomas J. Charles it is recommended that the Distinguished Service Medal award be given on the following grounds:

Thomas J. Charles joined the Port Authority in 1953 as a Traffic Officer. In 1955, he began his Aviation career with a two-year assignment as a Heliport Dispatcher. In 1958, he was promoted to Provisional Operations Supervisor I at Kennedy International Airport. In his 32 years at the airport, Mr. Charles has risen progressively from an entry-level supervisory position to Chief Operations Supervisor, the highest field supervisory position at the airport. As Chief Operations Supervisor, he oversees the scheduling and assignment of some 70 agents and supervisory personnel, who carry out the day-to-day responsibilities for aeronautical operations in compliance with FAA regulations, aeronautical construction coordination, noise abatement and bird control. During his career, he has actively participated in virtually every major aeronautical program and aircraft incident which has occurred at Kennedy, ranging from the 1964 Pan Am and 1975 ONA aircraft disasters, to the blizzards of 1979 and 1983 and the Van Wyck flood which closed the airport in 1984. By virtue of the leadership positions he has held during this period, he has played a significant role in planning, implementing and operating the many major new facilities and aeronautical services which have been introduced at Kennedy during his tenure.

Recognized early in his career as having outstanding potential, Mr. Charles was chosen by his managers to participate in the first inter-agency airport supervisory mobility program and he spent 30 days assessing London-Heathrow Airport's facilities and operating procedures and their relevance to Port Authority airport operations. During this assignment, he gained valuable information about Heathrow's pioneering chemical deicing programs which proved invaluable in the introduction and development of similar programs at Kennedy.

(Board - 2/11/88)

His Heathrow experience, together with numerous other inspection visits to airports around the country, his participation in a host of specialized training courses, ranging from bird hazard control to airport safety and certification requirements, and his many years of Kennedy International Airport experience, have enabled him to accrue exceptional knowledge of virtually every aspect of airport aeronautical operations. In recognition of Mr. Charles' expertise, managers, engineers, planners, and police hasten to review with him any proposed construction activity, new facility or procedure which may have impact on airport operations. More often than not, they come away with a significantly changed but substantially improved plan.

Throughout his career, Tom has established a consistent record for exceptional performance and for significantly contributing to the development and implementation of new airport programs. During the late 1960's, Tom was assigned to oversee the ramp busing program to increase IAB aircraft capacity. He developed procedures, schedules and cost controls for the program. These same techniques serve as the foundation for the current Plane-Mate operation. During the expansion of the International Arrivals Building (IAB) in the early 1970's despite massive construction throughout the IAB apron area, he and his staff skillfully and creatively scheduled available gates and apron areas to meet aircraft and passenger needs while enabling construction to proceed at the maximum possible rate. Following this assignment, Mr. Charles was assigned responsibility for developing procedures and techniques to ensure the effectiveness of the airport's Bird Hazard Reduction Program. His efforts on this assignment formed the basis for the airport's internationally acclaimed program.

Tom also has made important contributions to the development and training of aeronautical operations staff. He willingly and generously shares his extensive operating experience to ensure that new, or recently promoted, employees are thoroughly trained and properly acclimated to the airport. On numerous occasions, he has worked additional hours at odd times to personally ensure that a new staff member receives the special coaching or additional training he senses is needed to bring the individual's performance to the required standards. His efforts have produced highly trained and proficient staff who are motivated to provide exceptional performance levels.

For his 34 years of consistently exceptional work in which he always anticipated and exceeded the demands of his job, it is recommended that the Distinguished Service Medal be awarded to Thomas J. Charles.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Thomas J. Charles for the performance of outstanding service.

(Board - 2/11/88)

Award of Distinguished Service Medal to Frank DiCostanzo

It was recommended that the Distinguished Service Medal be awarded to Frank DiCostanzo.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Frank DiCostanzo it is recommended that the Distinguished Service Medal award be given on the following grounds:

Frank DiCostanzo began his 30-year Port Authority career as a police officer and then filled a series of automotive mechanic and foreman positions at John F. Kennedy International and LaGuardia Airports, where he spent almost a decade. In October 1970, in quest of more varied field experience, he took a mobility assignment as Maintenance Group Foreman at the Holland Tunnel and found his personal niche. A year later he moved to a permanent position at the Port Authority Bus Terminal.

Throughout his career, Mr. DiCostanzo has built a record of sustained outstanding performance and garnered a well-deserved reputation for dedication, exceptional technical skills, meticulous planning, innovative solutions and unruffled calm in the face of crises both potential and actual.

During his fifteen years at the Bus Terminal, he has proved himself an invaluable asset to the facility. He is personally credited with coordinating and implementing strategies that eased rush-hour commutation and long-haul transportation problems that erupted in the Bus Terminal during the six-month New York City elevator and escalator services strike in 1971. Similar situations cropped up during the 1980 PATH strike and the 1983 Greyhound strike, both of which were taken in stride by the facility thanks to Mr. DiCostanzo's meticulous attention to detail. In addition, he helped the facility mitigate the impact of two trash hauling strikes with ingenious methods and the use of out-of-the way routes.

(Board - 2/11/88)

Frank DiCostanzo is responsible for the administration of a \$14 million Maintenance budget, and coordinating the computerized functions of the facility's extensive mechanical equipment controlling the building's environmental functions. In addition, he has provided valuable assistance in reviewing the many plans for construction, thus ensuring that building systems, operations, and maintenance were not interrupted during almost a ten-year period. His affable nature is also invaluable in his role as liaison with more than twenty contractors, dozens of tenants and a myriad of construction personnel. Moreover, he has given expert testimony for the Law Department in civil and liability cases brought against the Port Authority. This broad range of work experiences and personal skills has made him a key member of the Bus Terminal staff.

For his sterling professional qualities and his distinguished service, it is recommended that the Distinguished Service Medal be awarded to Frank DiCostanzo.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Frank DiConstanzo for the performance of outstanding service.

(Board - 2/11/88)

Award of Distinguished Service Medal to William Ferrante

It was recommended that the Distinguished Service Medal be awarded to William Ferrante.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of William Ferrante it is recommended that the Distinguished Service Medal award be given on the following grounds:

Deputy Inspector William Ferrante entered Port Authority Police service in 1952. He was promoted to Sergeant in 1971, to Lieutenant in 1973, to Captain in 1982 and to Deputy Inspector in 1985. He is currently Police Commanding Officer at John F. Kennedy International Airport, a facility which has been his home for almost 30 years.

Inspector Ferrante has been responsible for many innovations at the airport, including the formulation of the police ambulance service and the training of police officers as certified emergency medical technicians. Kennedy International Airport now maintains two fully-equipped ambulances, staffed by Police Officers, who have responded to over 13,000 ambulance calls in the last twenty years.

He has also been instrumental in implementing many of the technological advances in crash/fire/rescue services in conjunction with the Port Authority's aircraft emergency procedures. His leadership in the area of airport disaster preparedness has had significant impact on the preeminent position enjoyed by the Port Authority in this vitally important field. His involvement in Kennedy's "Operation S.A.F.E." (Simulated Aircraft Fire Emergency), an annual disaster preparedness drill, has brought wide recognition to the Port Authority from public service agencies and the media as he annually brings together the resources of all the major fire, police, civil defense, ambulance, and hospital services in coordinated training exercises which have been the model adopted by many airports here and abroad.

Throughout the years, Bill has been on the scene participating directly in many real airport emergencies. He was the Tour Commander and on-scene commander at what is still ranked as one of our nation's worst air tragedies -- the crash of Eastern Airlines Flight 66 on Rockaway Boulevard just short of the runway at Kennedy International Airport in 1975. The Kennedy International Airport Police received commendations from all segments of the airline industry for their professional response and able performance in extinguishing the fire and effecting rescue operations.

Inspector Ferrante personally oversees the planning and implementation of all VIP movements at Kennedy International Airport. The United Nations 40th General Assembly session in the Fall of 1985 brought to New York City the largest gathering of world leaders in United Nations history. The sheer volume and unprecedented security requirements of the many dignitaries, given increased world tensions and heightened terrorist activity, posed great challenges to the Kennedy International Airport Police Unit. Inspector Ferrante assured that the world leaders and delegations from countries of every political persuasion were greeted and treated with appropriate dignity and protocol while attending to every detail of protective security. His task required skillful leadership, intricate planning, new and detailed security measures, and diligent manpower applications. In a six-week period, some 300 separate and distinct VIP movements through Kennedy International Airport were effected in a safe, incident free and efficient manner.

On a daily basis, the Deputy Inspector administers the security systems necessary to comply with Federal Air Regulations and to protect against hijackings, terrorist assaults, sabotage and crime. A sweeping change in the employee identification system -- the new Port Authority air operations area I.D. badge program -- is a tribute to the Deputy Inspector's innovativeness.

Inspector Ferrante works closely with the many government agencies present at the airport as well as the service agencies of New York City. He maintains a constant liaison with airline security representatives and fosters a spirit of cooperation in striving for maximum public safety and airport security. His cheerful demeanor and adherence to strict professional standards have earned him the respect of the officers under his command, airport and airline management, as well as the unions representing tens of thousands of airport workers.

For his many years of dedicated and outstanding service, and his many accomplishments, which have enhanced the reputation of the Port Authority, it is recommended that the Distinguished Service Medal be awarded to Deputy Inspector William Ferrante.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to William Ferrante for the performance of outstanding service.

(Board - 2/11/88)

Award of Distinguished Service Medal to Louis J. Gambaccini

It was recommended that the Distinguished Service Medal be awarded to Louis J. Gambaccini.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment or initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Louis J. Gambaccini it is recommended that the Distinguished Service Medal award be given on the following grounds:

Louis J. Gambaccini is a devoted public servant whose work in serving the region is of the highest order. For 31 years, from his start as a Management Analyst, to his current role as Assistant Executive Director/Trans-Hudson Transportation, he has contributed significantly to the Port Authority's transportation planning and operations.

In June 1956, Mr. Gambaccini arrived at the Port Authority Building with a Master's degree from the Maxwell School of Public Administration. So eager was he to learn about his new job that he worked late into the night before his first day studying information about the Port Authority. Lou's eagerness to learn has never waned. As he took on increasingly responsible positions in the Organization and Procedures Department, he approached each new role as an opportunity. He served for a year as Administrative Assistant to the Executive Director and, in 1961, took on the role of Executive Assistant in the Railroad Equipment Office. This was a critical time -- the Port Authority was acquiring the Hudson and Manhattan Railroad and he played a key role in setting up the management and operating structure. Mr. Gambaccini soon became known as a leader in the fields of public transit and public administration. In 1962, he was named Deputy Director of the newly-formed Rail Transportation Department. Four years later, he became Director, a position he held for the next twelve years.

During his years in Rail, Mr. Gambaccini was a guiding force behind the rehabilitation of the Hudson and Manhattan Railroad, changing it into the modern rail rapid transit system that is PATH today. He also played an active role, through the American Public Transit Association, in advocating transit capital funding and the first Federal transit operating subsidy program. His success as Director of Rail Transportation, his thorough knowledge of the industry and tireless efforts as an industry spokesman were only a few of the reasons that, in 1978, the Governor of New Jersey asked Mr. Gambaccini to serve as the State's Commissioner of Transportation.

(Board - 2/11/88)

As Commissioner, he substantially reorganized and redirected the Transportation Department and its priorities, broadening its focus to include the public transportation needs of a rapidly growing state. He played a major leadership role in policy and legislative matters affecting transportation in several national organizations. Perhaps most notably, he led the effort that resulted in legislation to create New Jersey Transit -- the state's first agency coordinating bus and rail operations -- and served as the agency's first chairman. The Port Authority and the Region are richer for his success as State Transportation Commissioner.

In 1981, Mr. Gambaccini returned to the Port Authority as Assistant Executive Director/Director of Administration. In this key role, he focused his talents on the day-to-day policy-making and strategic planning decisions, providing direction for many of the organization's new priorities. He was Chairman of the interdepartmental Trans-Hudson Task Force, directing staff work that analyzed employment, housing and other economic factors relating to interstate travel. As the work of the Trans-Hudson Task Force evolved from study and analysis to the project implementation stage, his role as chief of Trans-Hudson planning and operations was formalized. In October 1985, he was named Assistant Executive Director/Trans-Hudson Transportation. In this capacity he continued to set the agenda for all Trans-Hudson businesses and served as the focal point for the long-term planning and daily operations of interstate travel. His purview included the Hudson River crossings, the bus terminal, bus station, Staten Island Bridges, PATH, and the emerging Ferry operation.

Mr. Gambaccini also brought vision to the tasks and nurtured innovative concepts to fruition. Through his dedication and the efforts of many staff members who shared his vision, the Port Authority served as the catalyst for increased cooperation among the region's many transit planning and operating agencies. Two of the most visible results of his efforts are Transcom, the coordinating body which serves as a clearinghouse for information about daily operating conditions, and TransitCenter, the consortium linking public and private transit operators with the private sector for the benefit of the public. The strength of his convictions and his ability to persuade others to share his goals led to the success of these and other initiatives.

While Mr. Gambaccini's work in this organization has focused primarily on transportation issues, he is equally well known as a champion of the public service career. He has served in many national and international leadership roles, developing policy for public transportation and improved government management. He is a past president of the American Society for Public Administration. He is a founding member of the Center for Excellence in Government; is on the board of the American Public Transit Association; and is a member of the National Academy of Public Administration.

In January, two more honors were added to this impressive list: Mr. Gambaccini became Vice-Chairman of the Executive Committee of the Transportation Research Board, and he was chosen by a specially appointed academy to receive one of New Jersey's prestigious Governor's Pride Awards, the Charles Lindbergh Transportation Award.

For his 31 years of serving the Port Authority and the people of this region in the finest tradition of public service, working tirelessly to develop policies and programs for improved transportation systems, and providing a model for excellence in public management, it is recommended that the Distinguished Service Medal be awarded to Louis J. Gambaccini.

(Board - 2/11/88)

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Louis J. Gambaccini for the performance of outstanding service.

(Board - 2/11/88)

Award of Distinguished Service Medal to Derwood Hall

It was recommended that the Distinguished Service Medal be awarded to Derwood Hall.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Derwood Hall it is recommended that the Distinguished Service Medal award be given on the following grounds:

Derwood "Rud" Hall has participated in virtually every aspect of the Port Authority's marine terminals functions during his 30-year career in the Port Authority.

When Mr. Hall joined the Port Authority in 1956, he was immediately put to work in the planning division and was challenged by the outlandish notion of putting trucks on ships for the first time. From a 1987 vantage point, it is difficult to understand how implausible the containership concept sounded to terminal operators of the 1950's. With his experience in the United States Navy and the Merchant Marine, he participated directly in the initial planning and design work for the world's first container terminal. Following this, he served as Assistant Manager of Port Newark/Elizabeth during the period when that first container terminal was built and commenced operations. He thus played a pioneering role in this field.

At the same time that the Elizabeth container terminal was being developed, the Port Authority was also proceeding with the redevelopment of the former New York Dock Company Piers extending for more than a mile south of the Brooklyn Bridge. During this period, Mr. Hall played a principal role in the marine design of the Brooklyn facility. While not revolutionary in design, the Brooklyn Terminal itself was precedent setting as one of the first marine terminals designed to be served primarily by trucks rather than by rail.

Mr. Hall then returned to the main office and served in marine staff planning functions before returning to Port Newark/Elizabeth as its Manager for the next ten years. While Mr. Hall was Manager at Port Newark, he dealt with vessel fires, storms, strikes, blackouts, building collapses and other events of conceivably catastrophic proportions, always with efficiency and dispatch. In 1960, he was appointed General Manager, New York and New Jersey Marine Terminals.

(Board - 2/11/88)

Most recently, he has overseen key developments such as the construction and operation of the new Red Hook Container Terminal in Brooklyn, construction of two new juice facilities at Port Newark, as well as development of tremendously expanded facilities for handling imported automobiles, a business which grew to 534,000 in 1986. His excellent work continues with the Port Authority's recent opening of its first commercial fishing port at Brooklyn's Erie Basin. Once again, there were no models for operating systems particularly appropriate for Brooklyn, nor was there a history of relationship with labor to be called upon for guidance. Mr. Hall has skillfully developed both the operating systems and labor relationships so that Fishport has proceeded with the full cooperation and support of all involved.

Through his Port Authority career, Rud has gained a vast knowledge of marine cargo handling and marine industry practices and is regularly sought out for his expertise. He is known by his colleagues as a completely unflappable trouble shooter in crisis situations, absolutely reliable for managing problems skillfully, intelligently and with maximum sensitivity among all affected by the crises at hand.

For his dedicated service and his consistently high level of performance and achievement over a long and distinguished career, it is recommended that the Distinguished Service Medal be awarded to Derwood Hall.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Derwood Hall for the performance of outstanding service.

(Board - 2/11/88)

Award of Distinguished Service Medal to Robert J. Johnson

It was recommended that the Distinguished Service Medal be awarded to Robert J. Johnson.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Robert J. Johnson it is recommended that the Distinguished Service Medal award be given on the following grounds:

Robert Johnson began his career with the Port Authority in July 1955, as a Building Attendant at the Port Authority Building and that October became a Police Officer. Since November 1957, Mr. Johnson has been working at John F. Kennedy International Airport in the Aeronautical, Terminal, and Transportation Services Units where he has progressed through the ranks to his current position as General Operations Supervisor, the highest field supervisory position in the Transportation Services Unit.

Throughout his career, at Kennedy International Airport, Mr. Johnson has distinguished himself as an exceptionally capable and loyal employee. During a major snowstorm in 1969, Bob travelled nine hours from home to get to work, abandoning his car outside the airport and walking the rest of the way. He remained on duty almost four straight days, covering for others who couldn't make it in. He has received numerous commendations from within and outside the Port Authority that illustrate the dedication he has demonstrated throughout his 30 years at Kennedy International Airport. In addition to his dedicated day-to-day work, he has always excelled under pressure during emergencies. Among those most notable were a terminal lounge fire in 1968, a blizzard in 1983, the aircraft crash into Thurston Basin in 1984 and Hurricane Gloria in 1985. In each of these, he demonstrated a high level of expertise coupled with an unflinching willingness and ability to perform.

In his present position, Bob is an invaluable resource person who routinely gives his time and knowledge to assist in the planning and operation of the airport Transportation Services Unit. During a recent succession of changes in the management of the Transportation Services Unit, he has ensured that the continuity of the operation was maintained while orienting and briefing the new staff members to assure they were fully informed on the matters under his supervision.

(Board - 2/11/88)

Mr. Johnson has the unique ability to take a problem and turn it into an opportunity for improved service to our airport customers. His personal efforts have been particularly noted in improvements in the unit's public parking lot operation, which provides \$1.7 million in revenue. In one recent example, a Port Authority supervisor on overtime was replaced by a contractor's supervisor, which resulted in improved service.

He also made major contributions to the taxi dispatcher union negotiation process which led to an innovative three-year, two-tier, labor contract. Through constant monitoring and adjustment of bus and staffing schedules, ground transportation signing and construction activity, he has ensured that airport patrons have been provided with the highest level of service that has emphasized safety and efficiency.

Throughout his career, Mr. Johnson has earned the respect and loyalty of the people who work with him and for him. "Bunky", as he is called by his associates, has developed lasting relationships not only with Port Authority staff, but also with the airline and contract personnel with whom he has worked. No matter how stressful the situation, he always exhibits a cheerful, warm and controlled outlook which gives his co-workers a well deserved confidence in his exceptional capabilities.

For his more than 30 years of dedicated and professional service, it is recommended that the Distinguished Service Medal be awarded to Robert J. Johnson.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Robert J. Johnson for the performance of outstanding service.

Award of Distinguished Service Medal to Doris E. Landre

It was recommended that the Distinguished Service Medal be awarded to Doris E. Landre.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment or initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Doris E. Landre it is recommended that the Distinguished Service Medal award be given on the following grounds:

As Secretary of The Port Authority of New York and New Jersey, Doris Landre has been the keeper of the tradition, protocol and decorum of the public agency to whose image of excellence she has made a major contribution for more than 30 years.

Miss Landre joined the Port Authority in March 1955. Her first long-term assignment in Operations Standards gave her an opportunity to demonstrate her excellent analytical skills. Miss Landre soon became known for her sharp mind and organizational ability. She subsequently served as Administrative and then Executive Assistant to the Executive Director. In each of these roles, Miss Landre's complete loyalty and dedication to the Port Authority were clear. She selflessly dedicated herself to ensuring the accurate official functioning of the Port Authority. In 1968, she was asked to assume the corporate office of Secretary, a position she well earned.

As Secretary for nineteen years, Miss Landre has seen to the development of records retention systems, the growth of the Port Authority Library as a valuable repository of business information, the development of a new Freedom of Information policy to provide access to business records of the agency, and the preparation of Port Authority Board and Committee Minutes and review by the Governors in a manner which permits them to exercise their statutory role. She has vigorously mandated the consistency of administrative documents. She personally ensured the incisive review of agenda items and memoranda of justification for the exercise of the Executive Director's administrative powers. She has been directly responsible for the exemplary administration of the Port Authority's corporate front office, spanning the tenure of four executive directors and five chairmen. Miss Landre is an invaluable transitional resource about Port Authority history, and the functioning of its Board and Committees. She directly oversees the arrangements for the Board and Committee meetings consistent with the By-Laws, earning the respect and admiration of the Commissioners as well as her associates among Port Authority staff. Well known for her exacting standards, Doris Landre has taught, helped, and cajoled hundreds of her fellow employees to be more effective and to consistently produce work of the highest caliber.

(Board - 2/11/88)

Words written to Miss Landre on her 30th anniversary capture the essence of this remarkable person:

"It is a rare and wonderful thing in our society when an individual generates, displays, and sustains extraordinary dedication to public service and to a public organization. The Port Authority is special, and you have worked to make it so. The quality of your work, your values, and your devotion have been special, and they have left a special mark on the organization."

For her far-reaching contributions over a long and distinguished career, and her dedicated efforts to uphold the standard of excellence for which the Port Authority is reknowned, it is recommended that the Distinguished Service Medal be awarded to Doris E. Landre.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Doris E. Landre for the performance of outstanding service.

(Board - 2/11/88)

Award of Distinguished Service Medal to Joseph Lesser

It was recommended that the Distinguished Service Medal be awarded to Joseph Lesser.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Joseph Lesser it is recommended that the Distinguished Service Medal award be given on the following grounds:

For nearly four decades, Joseph Lesser, Esq. has served as resident scholar, sage, and intellectual epicenter of the Port Authority Law Department. Mr. Lesser joined the Law Department in March of 1948 upon his graduation from Columbia University School of Law. Since then, he has had but one client -- The Port Authority of New York and New Jersey, and that one client has kept him extremely busy.

Mr. Lesser's career began as a research assistant, and soon thereafter an attorney, in what was then Division "B", representing the Finance, Taxation, and Research sections of the Law Department. Since 1964 when he became head of the research section of Division "B" under the late Daniel Goldberg, and throughout the 1970's as Chief of the Opinions and Appeals Division, then as Deputy General Counsel and now as General Attorney, Mr. Lesser has been intimately involved in, and a major creative force behind, every major litigation which has arisen out of the development and operation of Port Authority facilities -- its airports, marine terminals, bridges, tunnels, bus and truck terminals, PATH system and The World Trade Center. Many, if not most, of those cases have involved intricate questions of public law including federal and state relations; sovereign immunity; public use and just compensation; rights of free speech under the first amendment; separation of church and state; utility relocation and real estate and tax matters. Those cases established the legal principles we now take for granted and by which the Port Authority operates today.

(Board - 2/11/88)

To note but three of the more recent cases from this long list of Joe's accomplishments:

- Agesen v. Catherwood, prepared by Mr. Lesser and his Opinions and Appeals Division and argued by Mr. Lesser in New York State's highest court, the Court of Appeals, established the principle of the Port Authority's immunity as a bi-state agency from control by legislation of either State acting alone.
- Automobile Club of New York v. Cox, argued by Mr. Lesser in the United States Court of Appeals for the Second Circuit, upheld the first Port Authority toll increase in 50 years as well as the power of the Port Authority's Board of Commissioners to set a bridge and tunnel toll structure which could consider the needs of the Trans-Hudson transportation network as a whole.
- Global International Airways v. Port Authority, again brilliantly argued by Mr. Lesser in the Second Circuit Court of Appeals, established the extent to which an airport proprietor, such as the Port Authority, could enact reasonable and nondiscriminatory regulations to deal with the problem of aircraft noise.

Beyond his work for the Port Authority, Mr. Lesser's scholarship on constitutional and public law issues has been recognized as a paradigm for the public sector of the profession. His Port Authority career has been paralleled by a more than 30-year involvement with the Urban, State and Local Government Law Section of the American Bar Association. A past chairman of the Section, editor of the Section newsletter, and once its representative to the Bar Association's House of Delegates, Mr. Lesser is considered one of the Section's premier constitutional scholars. He recently authored a major paper for the Section's Urban Lawyer, a nationally distributed quarterly on local government law, and for the Section's recent symposium on "Federalism in the Bi-Centennial Year of our Constitution".

Throughout his nonpareil career, Mr. Lesser has performed his tasks in unflinching good humor with consideration and respect for both his co-workers and his adversaries. He is ever the consummate gentleman in the finest sense of that term.

For his unparalleled accomplishments and professionalism, and for his being both teacher and source of inspiration for two generations of Port Authority attorneys, it is recommended that the Distinguished Service Medal to be awarded to Joseph Lesser.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Joseph Lesser for the performance of outstanding service.

(Board - 2/11/88)

Award of Distinguished Service Medal to Norman I. Lesser

It was recommended that the Distinguished Service Medal be awarded to Norman I. Lesser.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Norman I. Lesser it is recommended that the Distinguished Service Medal award be given on the following grounds:

Since the beginning of his career as a trainee in the Engineering Department in 1954, Norman I. Lesser has proven his engineering expertise, his initiative, and his willingness to assume responsibility. His professional judgment, logical approach to design problems, and communication skills have culminated in his present position as Senior Consulting Engineer. Never resting on his laurels, he has become an expert in specialized engineering fields such as central heating and refrigeration systems, tunnel and subway ventilation, smoke control, people movers, and baggage handling systems.

Norman Lesser has consistently demonstrated the courage of his convictions in trying new and unusual solutions to difficult engineering problems. His work is known by experts in the field who frequently seek his advice. For example, the Central Heating and Refrigeration plant at John F. Kennedy International Airport was one of the largest of its kind in the world when it was built. This installation, prominently displaying the mechanical equipment in the glass enclosed building, became not only a showcase installation, but a public tourist attraction as well.

The automated people mover and the mechanized baggage handling system are two basic elements in the proposed JFK 2000 project and Mr. Lesser actively participated in the evaluation of the master functional plan. By analyzing existing material conveyors and people mover systems, he provided valuable insights into the continuing development of both systems for the JFK Redevelopment. He is presently guiding new consultants who are working on these systems to assure appropriate application of these technologies.

(Board - 2/11/88)

Mr. Lesser's work on tunnel ventilation for fire emergencies has attracted international attention. The Engineering Department was given the assignment of designing emergency ventilation for the PATH system. Technology for subway ventilation is relatively new and further development in this field was needed to meet PATH's ventilation requirements. Mr. Lesser guided the development of the design, which was based upon complex air flow impedance computations. In addition, through close monitoring of fan technology applicable to such emergency systems, Mr. Lesser concluded that the current approach was inadequate. He procured fans that were made of a different material and constructed using a different method. In his typical way, Norm persevered through the development problems. Recent testing of the first installation has demonstrated proper fan operation and an exceptional correlation of actual airflow performance within the PATH tunnels with the computations.

Mr. Lesser's achievements are not limited to the Port Authority. He has been active in the American Society of Heating, Refrigerating and Air-Conditioning Engineers, the National Research Council, and has participated in research projects and the publication of the ASHRAE Guide -- considered a bible by heating, ventilation and air-conditioning engineers.

Beyond his professional achievements, Norman is respected and admired for his personal qualities. His professional enthusiasm is contagious and he has consistently helped his staff develop their professionalism, encouraging them to strive for and maintain the highest level of technical excellence in their engineering careers, to take special courses, join professional societies, and publish technical papers. His project review meetings have always been stimulating, filled with new approaches to staff assignments. He is always concerned about the welfare of his staff and ready to help those with problems. His high professional standards will have an impact on the Engineering Department for years to come.

For his dedicated service and his consistently high level of performance and achievement over a long and distinguished Port Authority career, it is recommended that the Distinguished Service Medal be awarded to Norman I. Lesser.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Norman I. Lesser for the performance of outstanding service.

Award of Distinguished Service Medal to Nicholas Paraggio

It was recommended that the Distinguished Service Medal be awarded to Nicholas Paraggio.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment or initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Nicholas Paraggio it is recommended that the Distinguished Service Medal award be given on the following grounds:

Nicholas Paraggio began his Port Authority career in 1956 as an Auditor I, applying experience he had gained in his previous positions with a public accounting firm and a major international airline. Through the years Mr. Paraggio assumed increased responsibilities in various divisions of the Comptroller's Department, consistently demonstrating his dedication, zeal and enthusiasm.

In April 1972, he joined the Accounting Division as Supervisor of the Revenue Accounting Section. During his tenure, many new facilities were constructed and put into operation, such as The World Trade Center, Journal Square Transportation Center, the Passenger Ship Terminal and the expansion of Newark International Airport. These new operations caused the straightforward agreements of the past to give way to complex leases which required a multitude of intricate calculations to determine escalations and net revenue amounts to be shared between the Port Authority and various partners. In addition, the last decade had seen annual revenues increase from \$500 million to over \$1 billion, the number of agreements grow from 1,500 to 3,700 and the number of bills issued per year increased from 40,000 to 76,000. Mr. Paraggio's keen knowledge of accounting, his leadership skills and his willingness to devote endless hours to the task at hand, have been instrumental in providing for the efficiencies to absorb this phenomenal growth, ensuring that the necessary internal controls were in place and providing the necessary training to enable staff to handle the increased complexities of the leases themselves. For example, he developed an automated billing system to handle World Trade Center tenants; automated the billing of itinerant aircraft operations; and established in-house training so that all jobs are backed up by existing staff. It was primarily through these efforts that the above mentioned challenges were met while holding the level of staffing constant.

It was due to this demonstrated leadership that in April 1983 Mr. Paraggio was promoted to general Accounting Supervisor in the Accounting Division, and served an integral role in assisting a new management team achieve a smooth transition after the retirement of the Manager and other key executive staff. Once again, his vast experience and knowledge of the accounting functions, as well as his ability to work well with staff, proved to be vital components.

In June 1985, the Revenue Accounting Unit was created with the purpose of providing better control and more focus on its various revenue streams. Mr. Paraggio once again met the challenge by quickly upgrading the Revenue systems, building strong working relationships with all line departments and incorporating the services of Revenue Accounting to assist departments in the early stages of the lease negotiation process.

For his dedicated service and consistently high level of performance and achievement over a long and productive Port Authority career, it is recommended that the Distinguished Service Medal be awarded to Nicholas Paraggio.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Nicholas Paraggio for the performance of outstanding service.

(Board - 2/11/88)

Award of Distinguished Service Medal to Edward S. Rehm

It was recommended that the Distinguished Service Medal be awarded to Edward S. Rehm.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment or initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Edward S. Rehm it is recommended that the Distinguished Service Medal award be given on the following grounds:

Edward S. Rehm began his combined Hudson & Manhattan and Port Authority Trans-Hudson Corporation career in 1962 as a gateman. His talents were recognized very early as he progressed rapidly to positions of increasing responsibility at PATH, rising through the ranks to Train Clerk, Towerman, Train Dispatcher, Assistant Trainmaster, Assistant to the Superintendent and to his present position as Trainmaster.

For the past eleven years, Mr. Rehm has served as Trainmaster on the morning tour, generally acknowledged to be the most critical. The morning Trainmaster must transition the railroad from, effectively, a series of "construction sites", with up to fourteen work trains and gangs scattered throughout the system on the midnight tour, to a rapid transit system with 38 trains running on headways as close as 90 seconds. To do this, he pulls trains from various yards and storage locations in precise order and schedules to "gear up" for the heavy commuter surges each morning.

Operating from the John F. Hoban Control center at Journal Square, Mr. Rehm monitors radio transmissions from train crews, intercoms from terminal dispatchers, televised pictures of station fare zones and platforms and direct line telephones to other connecting railroads. Utilizing the data gathered through these channels, he then makes the decisions necessary to ameliorate problem situations and maintain or restore effective railroad service.

(Board - 2/11/88)

Mr. Rehm's many accomplishments include the special PATH operation during the 1981 New York City Transit Authority strike, where he helped develop and then implement a service to accommodate extra riders. During that exhaustive ten-day period, he worked through both the morning and evening rush periods to ensure an effective and safe operation. He was a key contributor to the PATH Emergency Procedures Manual, and he also planned and implemented several emergency drills where a major rail accident was simulated with both in-house and outside emergency responses, including helicopter evacuations.

Due to Mr. Rehm's exceptional knowledge of train operations, he's frequently called upon to plan long-range operational improvements as well develop special operating plans to accommodate specific situations. He is also an invaluable resource for training and developing new Assistant Trainmasters and Trainmasters.

For his dedicated service and consistently high level of performance and achievement over a long and productive Port Authority career, it is recommended that the Distinguished Service Medal be awarded to Edward S. Rehm.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Edward S. Rehm for the performance of outstanding service.

(Board - 2/11/88)

Award of Distinguished Service Medal to Charlotte Remsbecker

It was recommended that the Distinguished Service Medal be awarded to Charlotte Remsbecker.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment or initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Charlotte Remsbecker it is recommended that the Distinguished Service Medal award be given on the following grounds:

Charlotte Remsbecker retired from the Port Authority in May 1987, leaving a legacy of substantial accomplishments spanning her exceptional career of 42 years of service.

Miss Remsbecker spent her early years in the Port Development Department developing statistics in support of the Port Authority's bid to operate LaGuardia and Newark Airports, then owned and operated by the cities of New York and Newark. She became an Aviation Department pioneer when both airports came under Port Authority operation in 1947.

Miss Remsbecker always contributed her considerable talents to Aviation Department needs with pride and a strong sense of responsibility. In particular, her contributions to the Aviation Department's periodic Inflight Survey Program, involving as many as 60 scheduled airlines, greatly enhanced the reliability and credibility of these vital resources through the accuracy and discipline that characterized her work. Her communication skills were an important factor in achieving a very high level of cooperation from the many airline headquarters and field personnel involved and the resultant critical high response rates from air passengers.

Among her most substantial contributions to the Aviation Department's success were those in the area of airport parking. Her extensive analyses of the Port Authority's airport parking system -- as it existed and was to develop -- significantly contributed to making parking one of the Aviation Department's greatest revenue generators.

(Board - 2/11/88)

Vincent Bonaventura, General Manager of Newark International Airport, recently cited Miss Remsbecker for her substantial assistance in working with Newark International Airport staff on the challenging move of Continental's People Express operations to Terminal B. In this, she applied her statistical resources in the most effective ways possible to develop alternates to assist the facility with the myriad problems associated with the move. Miss Remsbecker met yet another critical need by undertaking the role of Acting Supervisor of the Statistical Services Unit in the Aviation Department's Marketing and Economics Division.

During her years with the Port Authority, Miss Remsbecker conscientiously and dependably responded to every need that arose. Her warm, compassionate nature and her rigorous professional understanding of statistics earned her the respect and admiration of everyone. She leaves a career of distinguished service of which she and the Port Authority can be justifiably proud.

For her dedicated service and her consistently high level of performance and achievements, it is recommended that the Distinguished Service Medal be awarded to Charlotte Remsbecker.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Charlotte Remsbecker for the performance of outstanding service.

(Board - 2/11/88)

Award of Distinguished Service Medal to Victor T. Strom

It was recommended that the Distinguished Service Medal be awarded to Victor T. Strom.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Victor T. Strom it is recommended that the Distinguished Service Medal award be given on the following grounds:

Victor T. Strom is one of the most versatile Port Authority professionals, having served in line, staff and field positions in his 35-year career. His unique blend of technical prowess combined with compassion and a sincere concern for those with whom he worked have made him not only respected, but deeply admired throughout the organization. He was worn many hats here, and is one of the few individuals who has had such a diverse and successful career. When the Port Authority needed to fill a critical position, long or short term, Vic Strom always responded with enthusiasm and loyalty.

Mr. Strom joined the Port Authority as a Mechanical Engineer directly from active duty in the United States Navy in 1953. Within a year he became Assistant Superintendent of Central Maintenance Services where he oversaw such field maintenance forces as bridge painters, paving crews and electricians. From there he advanced to Assistant Manager and ultimately Manager of the Port Authority Building, the former Port Authority headquarters on 15th Street. This experience prepared him for his next assignment as General Manager of Operations in the then Terminals Department. There he was responsible for the operations, maintenance and security of not just the Port Authority Building, but the Bus Terminal and the Truck Terminals, while also overseeing the needs of the soon-to-be-opened George Washington Bridge Bus Station. When the sister department of Tunnels & Bridges needed a General Manager of Operations a few years later, he was the man for the job, this time overseeing two tunnels, four bridges and 1,200 employees.

In 1967, he returned to a staff assignment in a completely different field -- personnel administration. During the year he was Manager of the Administrative Division in Personnel, he was instrumental in initiating the COMPERS system, which converted all personnel transactions to computer. He then became Manager of the Operating Personnel Division where he was responsible for all personnel matters for non-management employees, about half the staff. His line experience proved to be extremely valuable in addressing the new challenges, which included labor relations in a climate unaccustomed to unions.

(Board - 2/11/88)

When someone was needed to plan and execute the relocation of the Port Authority's headquarters to The World Trade Center, no one was more qualified than Mr. Strom to handle this \$22 million project. When this mammoth task was completed, he was promoted to Assistant Chief Engineer. His deep humanity coupled with his technical skill did much to help the department function after the untimely death of the Chief Engineer.

One more line assignment awaited Mr. Strom, this time as Deputy Director of Rail Transportation, where he coordinated the activities for the PATH system. One year later, he switched hats again to serve as Deputy in the Management Services Department before becoming its Director in 1978. As the Director of the Port Authority's internal management consultant group, he kept the agency current in modern management methods, trends and developments.

In 1984 he became the first Director of the Public Safety Department where he supervises more than 10% of our employees including our Police force and other professionals responsible for insuring the safety of all Port Authority facilities.

For his 35 years of exemplary service, characterized by his inquiring mind, technical versatility, personal adaptability, extraordinary humanity, unrivalled loyalty, and uncommon integrity, it is recommended that the Distinguished Service Medal be awarded to Victor T. Strom.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Victor T. Strom for the performance of outstanding service.

Award of Distinguished Service Medal to Wilbert Taville

It was recommended that the Distinguished Service Medal be awarded to Wilbert Taville.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment or initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Wilbert Taville it is recommended that the Distinguished Service Medal award be given on the following grounds:

Throughout nineteen years of Port Authority service, Wilbert Taville's contributions to the Port Authority have been unique. As the Port Authority's Equal Employment Opportunity Coordinator for sixteen years, he has excelled as the champion of equality, opportunity and, above all, fairness for every member of this organization.

Mr. Taville joined the Port Authority in 1968, following a 25-year career with the United States Army, from which he retired as a Lieutenant Colonel. His Army experience in intelligence, logistics, transportation, personnel and training gave him a unique set of skills which he drew on initially as a management analyst in the former Organization and Procedures Department, evaluating a broad range of organizational systems, procedures and staffing issues.

Mr. Taville's next Port Authority roles were in the Personnel Department where he utilized his talents for managing and motivating people as a supervisor of recruitment and placement for operating staff and next as a personnel representative. In two short years he handled work in classification, compensation, personnel planning and administration. During this time he gained a reputation as an expert counselor for employees. He is well known for listening with a special understanding of an employee's point of view and for helping each individual arrive at his or her own best course of action. Because of his caring, fairmindedness and proven ability to balance the needs of the individual and the organization, Mr. Taville was selected to be the Equal Employment Opportunity (EEO) Coordinator, only three years after joining the Port Authority.

(Board - 2/11/88)

In an organization as large and complex as the Port Authority, the Equal Employment Opportunity Coordinator must be both advocate and defender. The list of responsibilities which Mr. Taville carries out is lengthy and varied. He is charged with representing the Port Authority on cases of alleged discrimination before the Equal Employment Opportunity Council and the United States Department of Labor. He coordinates with the Law Department on EEO Cases which are brought before the Federal Court. He serves as the Personnel Director's source for information on federal, state and local laws affecting equal opportunity. He works closely with the divisions responsible for recruitment and training to ensure increased opportunities for, and representation of, women and minorities in a variety of occupational areas throughout the Port Authority. He participates in the training of supervisors to ensure that the Port Authority has a diverse work force.

A major part of his role is to investigate problems brought to his attention by employees. His record in resolving these problems before they escalate is outstanding. In the case of more formal complaints, his evaluation of the situation and recommended action are always scrupulously objective and fair. Most of all, he is responsible for ensuring that full equal opportunity is provided to every member of the Port Authority. In all of the responsibilities described above, Mr. Taville has performed with unmatched intelligence, sensitivity and discretion every day of the past sixteen years.

Mr. Taville has literally heard and seen it all. He has elicited responsiveness from departments, provided EEO training to managers and supervisors; synchronized organizational and individual expectations for success; addressed misunderstandings with the skill of a highly-trained legal mediator; and, in even the most intractable situations, steered an unwavering course of fairness between opposing sides. Mr. Taville's expertise has been requested by staff at every level, including Department Directors, Assistant Executive Directors and the Executive Director. His opinion is valued and respected by all. In 1982, in recognition of his many accomplishments, he received the highly-respected "YMCA Black Achievers in Industry" Award.

For his years of guiding individual staff and an entire organization in the path of equality, for pioneering his role in an emerging field requiring an appreciation of law, government, organizational management and human need, and for his consistent caring and commitment to fairness, it is recommended that the Distinguished Service Medal be awarded to Wilbert Taville.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Wilbert Taville for the performance of outstanding service.

(Board - 2/11/88)

Award of Distinguished Service Medal to John J. Trapp

It was recommended that the Distinguished Service Medal be awarded to John J. Trapp.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of John J. Trapp it is recommended that the Distinguished Service Medal award be given on the following grounds:

During the past 37 years, John J. Trapp has loyally served the Port Authority with distinction. From his first job as a Messenger in 1951 up to his present position as Assistant Director of the Management and Budget Department, John has dedicated his professional career to a single objective -- ensuring that the Port Authority's interests are served best. To this end, he has been absolutely selfless in expressing his opinions and judgment. Clearly, his integrity, loyalty and dedication are exceptional.

In 1968, Mr. Trapp assumed one of the many key managerial responsibilities when he became Assistant General Auditor. In this capacity, he directly supervised all construction audit functions, and had responsibility for overseeing audits of all Port Authority financial systems. During this time, a continuous audit of the approximately \$1.6 million World Trade Center project was conducted. This effort included the careful scrutiny of hundreds of contracts involving every minute detail. Under Mr. Trapp's supervision, and with his uncanny knack for identifying audit issues, he led an effort which uncovered contract discrepancies, saving the Port Authority millions of dollars. As a result of his leadership and attention, many payments and duplicate claims were avoided.

(Board - 2/11/88)

Mr. Trapp's most significant contributions to the Port Authority were made as Assistant Manager of the then-Financial Planning and Analysis Division from 1972 to 1975, and especially from 1975 to 1985 when he served as Manager of this division. During that decade, he was a key player in every important Port Authority action. Relying upon his staff for detailed analyses, Mr. Trapp representing the Comptroller, Director of Finance and the Executive Director, managed the Port Authority's entire capital and operating resource allocation process. This was a most challenging period because it was an era of contraction and restraint. Mr. Trapp was the lead person responsible for annually negotiating budget submittals with each department, finalizing overall Port Authority programs and resources and ultimately receiving Commissioner and gubernatorial budget approvals. As Financial Planning and Analysis Division Manager, Mr. Trapp had a direct role in promulgating and authorizing budgets totaling \$9.56 billion. Even after each budget was "put to bed", he constantly monitored expenditure patterns to ensure that departmental expenditures were compatible with their plans. Then, as now, demands often exceeded supply. From 1985 to the present, John has served as Assistant Director of the Management and Budget Department. He has been, and continues to be, a significant player in the management and direction of the Department.

Mr. Trapp has been active in professional associations and has served a number of times in leadership roles. In particular, he has been active in the American Association of Port Authorities (AAPA) for many years and has served on the AAPA Finance Committee. During the period when changes in the tax laws raised serious financial concerns, he and other Port Authority staff active in the AAPA worked closely to formulate the Port Authority's position, as well as that of the AAPA. Mr. Trapp personally met with officials from various port authorities to resolve how changes in the tax laws affected them and how best to deal with their impact.

Mr. Trapp's insightfulness, his legendary memory and courageous attitude in expressing his opinion and judgment despite opposition at the highest levels have earned him the respect of everyone, including those who have disagreed with him, inside and outside the Port Authority. He has the intuitive ability to look at a situation, appraise it quickly and then raise key issues which are not readily apparent. This attribute has led him to challenge important issues, often saving the Port Authority millions of dollars. A most formidable opponent when arguing the merits of a particular position, he is also sensitive and compassionate, and consistently concerned with the well being of his fellow colleagues.

For his dedicated service and his consistently high level of performance and achievement over a long and productive Port Authority career, it is recommended that the Distinguished Service Medal be awarded to John J. Trapp.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to John J. Trapp for the performance of outstanding service.

(Board - 2/11/88)

Award of Distinguished Service Medal to Richard L. Twiss

It was recommended that the Distinguished Service Medal be awarded to Richard L. Twiss.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Richard L. Twiss it is recommended that the Distinguished Service Medal award be given on the following grounds:

As Supervisor of the Fire Protection Engineering Section, Richard L. Twiss has always carefully ensured that the required fire safety programs are properly administered.

Since first coming to work in the Inspection and Safety Division in August 1968, Mr. Twiss has demonstrated his ability to consistently exert the optimum effort in each of the several positions he has held. The unusual intensity which he brings to his job and his dedication to creating and maintaining a standard of excellence in all Port Authority Fire Safety programs has resulted in his deservedly rapid career advancement in the Port Authority.

Mr. Twiss was cited on several occasions for his outstanding contributions during the heavy construction period at The World Trade Center when he had the exclusive responsibility of maintaining fire safety (1969-1974). The constant threat of fire was decisively addressed by Mr. Twiss as he worked to develop a comprehensive safety program which included assuring that necessary fire-fighting equipment was always available. Mr. Twiss routinely worked long, arduous hours, and on several occasions took part in actual fire-fighting activities.

The lessons learned from Mr. Twiss' findings while investigating serious fires, including the Hoboken Marine Terminal Fire (1980), the PATH car fire (1985), and the Hackensack River Drawbridge fire (1985), have been invaluable. He evaluated the details of each of these fires and provided his analyses of probable causes, which were later found to be accurate although in several instances contrary to the findings of hired consultants. He has been called upon continually to utilize his expertise in conducting investigations at other facilities.

(Board - 2/11/88)

Mr. Twiss has proven his ability to establish and maintain an unusually good rapport with tenants and contractors on various projects for the Port Authority. His ability to address code requirements while maintaining full awareness of the benefits of meeting operational schedules has allowed hotels such as the Vista at The World Trade Center and the Marriott at Newark International Airport to open on time with all the necessary fire protection systems in place.

The Port Authority Specifications Governing the Flammability of Carpets were updated and revised by Mr. Twiss and, in 1984, were added to the New York City Building Code by amendments contained in Local Law No. 16. Mr. Twiss has diligently applied the Flammability Specifications covering carpeting and furnishings Port Authority wide and in so doing has assisted in dramatically lowering the fire loading at all structures. In great measure, Mr. Twiss' updating and modifying these Port Authority specifications have made them a recognized standard and benefited agencies and municipalities nationwide. As a result of his competence, Mr. Twiss was named President of the Society of Fire and Protection Engineers, New York and New Jersey Chapter.

In recognition of his outstanding work in the development, implementation and ongoing evaluation of the Port Authority Fire Protection Program, it is recommended that the Distinguished Service Medal be awarded to Richard L. Twiss.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Richard L. Twiss for the performance of outstanding service.

(Board - 2/11/88)

Award of Medal of Honor to Police Detective Michael Molina

It was recommended that the Medal of Honor be awarded to Police Detective Michael Molina.

The Port Authority medal of Honor, under Board Resolution of March 2, 1944, as amended, is to be awarded to an individual who, in performing a specific act, demonstrated extraordinary bravery in the face of circumstances which would surely have led to grave personal injury or his own death should the slightest miscalculation have occurred.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Port Authority Medal of Honor award was established, which is to be given to a Port Authority employee for the performance of outstanding service; and

WHEREAS, in the case of Police Detective Michael Molina it is recommended that the Port Authority Medal of Honor award be given on the following grounds:

During the month of July 1986, Port Authority Police Detective Michael Molina was assigned to the ongoing Clipper Club Drug Investigation. This investigation was a joint effort between the Port Authority Police and the Drug Enforcement Administration (DEA) which led to the arrest of 56 drug traffickers, the confiscation of over \$1.1 million in seized assets and the destruction of a \$1.5 billion cocaine ring.

Detective Molina volunteered for this assignment, knowing it would impact on his personal life, require great dedication, and expose him to constant danger. During the investigation, Detective Molina was able to intercept court approved wire transmissions, contribute to dangerous drug purchases and provide observations. His efforts greatly enhanced the United States Attorney's case against more than 40 Clipper Club conspirators. These facts alone merit recommendation for a Port Authority medal.

Although the investigation was a joint endeavor, a single accomplishment distinguishes Detective Michael Molina from his peers and colleagues. In December of 1986, he volunteered to act as an undercover agent on an extremely dangerous assignment, knowing he would be unarmed and sent to a South American Country. Detective Molina displayed outstanding courage -- the slightest mistake would have resulted in his serious injury or death at any moment without hope for protection from extremely dangerous criminals.

(Board - 2/11/88)

Detective Molina flew to Brazil and in less than 48 hours, he identified the number one criminal assistant in the Clipper Club Investigation. He and a DEA counterpart began surveillance of the subject during which a series of events occurred, placing them both in grave danger. On one or more occasions the subject appeared to "make" the investigators. In one such incident while observing the suspect in a restaurant, direct eye contact was sustained for a protracted period of time. When they realized they had been noticed by the suspect, in a hurried conference, the two investigators decided to "bluff it". They went to the subject's table and engaged him in a conversation which began with the fact that they overheard him speaking English with the waiter. Caught completely off guard, the suspect invited them for a drink. At that point the suspect befriended the two detectives. They convinced him that they were customs brokers also involved in drug traffic, and a three-week odyssey took place whereby the criminals almost never left the detectives' presence.

Through a series of skillful maneuverings, and using every bit of investigative skill at their disposal, Detective Molina and the DEA Agent held numerous meetings and prolonged discussions with the subject about the worldwide cocaine operations. The two investigators ate, drank, and partied with the subject, gaining his confidence. Invaluable information was elicited, which contributed greatly to the United States case. In the most dangerous incident, the two investigators even travelled into the jungles of Brazil, alone and unarmed, with drug traffickers discovering the whereabouts of the cocaine manufacturing plant. At any moment, both detectives could have been killed without a trace of the crime.

The information they obtained was relayed to the Brazilian Police, and one day after the wide-ranging Kennedy drug arrests, the plant was raided and smashed. This single cocaine factory produced 1,100 pounds of cocaine per week, with a value set conservatively at \$80,000 per pound.

On Tuesday, March 10, 1987, the eighteen-month long investigation ended with the arrest of 30 people on or near John F. Kennedy International Airport. Twenty-six more suspects have been arrested since that date. The successful conclusion to this investigation is in part attributed to Detective Michael Molina.

The sensitivity and hazardous nature of this assignment was such that for days at a time Detective Molina and his DEA counterpart were unable to make contact with their backup units. Operating alone, unarmed, and out of contact with those who could render assistance, was only a part of the danger that was inherent in the investigation. The slightest miscalculation or slip of the tongue could have resulted in death at any moment.

For extraordinary courage and selfless devotion to duty by volunteering as an undercover agent at the risk of his life amidst constant danger, and managing to show exceptional judgment, initiative and investigative skills, it is recommended that the Medal of Honor be awarded to Police Detective Michael Molina.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Commendation Medal to Police Detective Michael Molina.

(Board - 2/11/88)

1988 Howard S. Cullman Fellowship

It was reported that the Howard S. Cullman Fellowship was established by the the Board in April 1962 as a tribute to the Honorary Chairman for his contributions to the Port Authority. The purpose of this Fellowship is to afford a staff member or members the opportunity to undertake a unique project which benefits the Port Authority and contributes to the organization's public service responsibilities to the people of the Port District.

This year the Cullman Fellowship Review Committee was comprised of the nineteen members of The Advisory Group, representing a cross-section of Port Authority staff members at the junior and middle management levels. After careful consideration of all submitted proposals. The Advisory Group recommends that the 1988 Fellowship be awarded to Rita I. Schwartz.

The objective of this year's fellowship is to study the experience of transportation agencies in addressing the problem of the homeless and to identify effective model programs and strategies which have potential application to the Port Authority.

Ms. Schwartz's project will be for a duration of approximately six months. In addition to her salary during this period, it is anticipated that \$50,000 will be incurred for incidental expenses including travel, phone, clerical support, report preparation and duplicating expenses.

Recommendation was made that the Board authorize the award of the Howard S. Cullman Fellowship to Rita I. Schwartz.

Approved.

Whereupon, the meeting was adjourned.

 Joseph L. Vanacore, Assistant Executive Director/Capital Programs
 Barry Weintrob, Chief Financial Officer
 Marvin E. Weiss, Director, Office of Minority Business Development

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meetings of January 28 and February 11, 1988. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey has expired.

Whereupon, the Board unanimously approved these Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on March 10, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on March 10, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on March 10, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on March 10, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 3/10/88)

Port Authority Employment Relations Panel Appointment of New York and New Jersey Members

The revised Port Authority Labor Relations Instruction, adopted by the Board on September 29, 1976, and amended on December 9, 1983, among other things, provides for the establishment of an Employment Relations Panel with responsibility for resolving disputes arising from the designation of managerial and confidential and supervisory employees, assisting in resolving negotiating impasses, processing improper labor practice charges and processing petitions for certification or decertification of employee organizations as negotiating representatives of Port Authority employees.

The Labor Relations Instruction further provides for the members of the Panel to be appointed for overlapping three-year terms. The term of the current New York Member, Philip Ruffo, Esq., expired on December 31, 1987. The term of the current New Jersey Member, John J. Pearce, Jr., expired on December 31, 1986. In accordance with the Labor Relations Instruction, both continue to serve until their successors are appointed, but each has expressed his desire not to seek reappointment. The successor New York Member is to be appointed for a term to expire December 31, 1990, subject to the written recommendation of the Chairman of the New York Public Employment Relations Board (PERB). The successor New Jersey Member is to be appointed for a term to expire December 31, 1989, subject to the written recommendation of the New Jersey Public Employment Relations Commission (PERC).

On December 16, 1987, James W. Mastriani, Chairman of PERC, after consultation with the representatives of employee organizations, recommended that Joel M. Weisblatt, Esq., be appointed as New Jersey Member of the Panel for the three-year term expiring on December 31, 1989. On January 26, 1988, Harold R. Newman, Chairman of PERB, after consultation with the representatives of employee organizations, recommended that David C. Randles be appointed as New York Member of the Panel for the three-year term expiring on December 31, 1990. Mr. Weisblatt is an attorney and full-time labor arbitrator, mediator and factfinder. Mr. Randles, a former member of PERB, is also a labor arbitrator, mediator and factfinder, as well as an adjunct professor at the New York State School of Industrial and Labor Relations at Cornell University.

Members of the Panel, who are subject to removal or dismissal only upon charges and after a hearing before a hearing officer appointed jointly by the Chairmen of PERC and PERB, may also appoint hearing officers, mediators, factfinders, attorneys, or others, to assist them in their functions, and to provide for their reimbursement and compensation at rates set pursuant to the Labor Relations Instruction. The panel members themselves are also compensated for each day spent in attendance at meetings or consultation or in the preparation of reports or determinations and are reimbursed for expenses actually incurred by them in the performance of their duties.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board appoint David C. Randles as New York Member of the Port Authority Employment Relations Panel for a term expiring December 31, 1990, and Joel M. Weisblatt, Esq., as New Jersey Member of the Panel for a term expiring December 31, 1989, in accordance with the Port Authority Labor Relations Instruction.

(Board - 3/10/88)

Port Authority Policy for Minority and Women's Business Enterprise Programs

The Port Authority hereby reaffirms its longstanding commitment to maximize opportunities for businesses owned and controlled by minorities or women through contracting and procurement practices. This commitment flows directly from one of the central elements of the Port Authority mission, as presented in the agency's business plan: "to carry out our responsibilities in a manner that maximizes the creation of new economic opportunities for businesses in and residents of the region."

The Port Authority's efforts to assist minority and women-owned businesses (MBEs and WBEs) are an integral part of a broad and consistent program aimed at using Port Authority capital projects and purchasing power to help achieve the goal of affording everyone the opportunity to participate in the economic activity which results from Port Authority investments and activities. Past societal discriminatory practices have placed minorities and women in a disadvantaged position which has resulted in reduced opportunity for them to compete effectively for jobs and to form and control businesses, and for those engaged in businesses to win a meaningful share of the market. As a result, government programs have been used to encourage MBE and WBE firms to be brought into the mainstream of participation. The policies described herein reaffirm existing Port Authority policies dating back to 1978.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board hereby adopts a "Port Authority Policy for Minority and Women's Business Enterprise Programs" (attached hereto), to maximize opportunities for businesses owned and controlled by minorities and women.

(Board - 3/10/88)

PORT AUTHORITY POLICY FOR MINORITY AND WOMEN'S BUSINESS ENTERPRISE PROGRAMS

Purpose

It is the policy of the Port Authority to expand the range of entrepreneurial and employment opportunities available to minorities and women in the New York/New Jersey region and, in particular, to create such opportunities in conjunction with Port Authority investments and operations to the fullest extent consistent with the Authority's existing policy to secure an acceptable level of quality, generally at the lowest cost. The programs that implement this policy are organized around two objectives: (1) maximizing opportunities for Minority Business Enterprises (MBEs) and Women's Owned Business Enterprises (WBEs) to participate in the performance of all Port Authority contracts and continuing to increase such participation in its programs of construction, procurement and services in connection with all facilities; and (2) working with other appropriate public agencies and authorities in both states to seek to expand the number of MBEs and WBEs qualified to bid on contracts for the Port Authority and other organizations and to help them increase the scope and complexity of the services they are qualified to provide.

Definitions

"Minority-owned business" or "MBE" means a business entity which is at least 51 percent owned by one or more members of one or more minority groups, or, in the case of a publicly held corporation, at least 51 percent of the stock of which is owned by one or more members of one or more minority groups; and whose management and daily business operations are controlled by one or more such individuals who are citizens or permanent resident aliens.

"Women-owned business" or "WBE" means a business which is at least 51 percent owned by one or more women, or, in the case of a publicly held corporation, 51 percent of the stock of which is owned by one or more women; and whose management and daily business operations are controlled by one or more women who are citizens or permanent resident aliens.

To be certified by the Port Authority, and thus be eligible for contracting opportunities, such ownership interest must be shown to be real, substantial and continuing.

"Minority group" means any of the following racial or ethnic groups:

(1) Black persons having origins in any of the black African racial groups not of Hispanic origin;

(2) Hispanic persons of Puerto Rican, Mexican, Dominican, Cuban, Central, or South American culture or origin, regardless of race;

(3) Asian and Pacific Islander persons having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent or the Pacific Islands;

(4) American Indian or Alaskan Native persons having origins in any of the original peoples of North America and maintaining identifiable tribal affiliations through membership and participation or community identification.

Participation In Port Authority Contracts

The Port Authority's approach to increasing the participation of minority and women's business enterprises in its contracting and procurement programs centers on the establishment of specific percentage goals for the dollar value of work to be awarded to MBEs and WBEs, and the use of a variety of techniques to help Port Authority managers, tenants, major contractors, and MBEs and WBEs attain these goals.

The agency's overall goal will be to attain participation levels of 10% of Port Authority construction and service contracts for MBEs and 1% for WBEs. Higher or lower goals may be more appropriate in specific situations. The Board of Commissioners will annually review these overall goals during the budget review process. Quarterly reports will be provided to the Board concerning our progress in attaining overall goals.

Departmental goals will be determined through the business planning process, taking into account each department's projected contracting and procurement activities. With respect to individual projects, contracts and procurements, the Port Authority will continue to identify goals for participation that reflect overall agency and department goals, the nature of the work to be performed, and reasonable expectations about the availability of MBEs and WBEs qualified to perform such work.

Where it is feasible and appropriate to do so, the Port Authority will set aside selected contracts for competitive or negotiated bids by MBEs and WBEs. This is an especially effective means of expanding minority participation and the Port Authority is committed to increasing its use.

Other techniques to be employed in attaining MBE and WBE participation goals include:

- Inclusion in Port Authority contracts of provisions requiring contractors to make good faith efforts to achieve specified MBE and WBE participation goals.
- Whenever feasible, inclusion in selected Port Authority contracts of provisions mandating specified levels of MBE and WBE participation.
- An aggressive program of outreach to qualified and potentially qualified MBEs and WBEs.
- Providing training and technical assistance, including -- where appropriate -- contracting with outside entities to provide service to MBEs and WBEs participating in Port Authority contracting and procurement programs.
- Increased flexibility in the use of bonding requirements.
- Provision of public liability and workers' compensation insurance coverage.
- Monitoring of contractors' performance with respect to MBE and WBE participation, and undertaking enforcement measures when necessary.

In addition, the Port Authority will continue to use these programs to ensure participation by MBEs and WBEs in contracts funded with Federal financial assistance, as required by applicable Federal laws and regulations.

The Port Authority also will continue to require that its lessees and tenants carrying out major construction projects at its facilities seek meaningful minority and women's participation in those projects. As with its own projects, this requirement applies both to MBE and WBE participation as contractors and subcontractors, and to the composition of the labor force on such contracts. We will closely monitor compliance with this policy and enforce it with appropriate measures.

The Port Authority's Office of Minority Business Development provides overall supervision to the Port Authority's efforts to aggressively seek out and certify MBEs and WBEs, works with other departments to set goals for each contract and monitors which MBEs and WBEs are bidding on Port Authority contracts and their success rates. To be certified by the Port Authority Office of Minority Business Development, and thus be eligible for these contracting opportunities, minority or women's ownership interest must be shown to be real, substantial and continuing.

Any bidder who is found to have failed to meet MBE and WBE goals and to have failed to demonstrate that sufficient reasonable efforts to meet such goals were taken can be debarred from bidding on future contracts.

Development

An effective program for MBE and WBE involvement also depends upon increasing the number of firms that can compete and are capable of carrying out Port Authority contracts. The Port Authority, working with other interested agencies and authorities, will also seek to encourage the formation and growth of minority business enterprises capable of meeting the vast construction, procurement and service needs of the region. Means of achieving this end include support of training and education programs for minority and female entrepreneurs; fostering the development of joint ventures with majority firms; set-aside of selected contracts for the purpose of assisting the growth and development of MBEs and WBEs; assisting minority and women-owned businesses in obtaining needed financing from various public and private sources; and the development of other innovative techniques aimed at overcoming barriers to the formation and growth of such businesses.

(Board - 3/10/88)

**Brooklyn - Port Authority Marine Terminal - Red Hook Marine
Project Stage II - Contract BP-290.018 Pier 9A Area -
Reconstruction and Crane Rails - Settlement of Claims**

Contract BP-290.018 was awarded to Raymond International Builders, Inc. on September 7, 1984 at an estimated total amount of \$2,938,777 plus an authorization for extra work of \$293,800. It provides for the construction of a new wharf and crane rails on Pier 9A at the Brooklyn-Port Authority Marine Terminal incorporating portions of the existing wharf substructure and including alterations to existing structures.

On March 25, 1986, the contractor submitted a claim in the amount of \$1,534,085 against the Port Authority for additional costs alleged to have been incurred, stating that it had not been able to perform the work in the manner originally anticipated because of Port Authority imposed work area restrictions, insufficient design information and Port Authority delays in providing revised design information reflecting conditions encountered at the work site.

After a thorough review and evaluation, some of the contractor's claims were dismissed, but a portion of these claims were determined to be meritorious. After negotiations, a tentative settlement, subject to Board approval, has been reached with Raymond International Builders in the amount of \$510,000, of which \$65,142 constitutes payment for extra work. The contractor will execute a General Release running to the Port Authority before payment is made.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into an agreement for the settlement of a claim by Raymond International Builders, Inc., against the Port Authority arising out of Contract BP-290.018, Red Hook Marine Project Stage II, Pier 9A Area, Reconstruction and Crane Rails, and for payment by the Port Authority of the amount of \$444,858 in settlement of the claim, the form of the agreement to be subject to the approval of General Counsel or his authorized representative.

**Brooklyn - Port Authority Marine Terminal - Red Hook Marine
Project Stage II - Contract BP-290.016 - Paving and
Utilities - Settlement of Claim**

Contract BP-290.016 was awarded to L&T Contracting Co., Inc. (L&T) on August 30, 1984, at an estimated total amount of \$5,364,034 plus an authorization for extra work of \$536,000. It provides for the construction of paving and utilities in the area generally bounded by Hamilton Avenue, and Van Brunt and Sackett Streets and of three additional entry booths, all at the Brooklyn-Port Authority Marine Terminal.

On July 7, 1987, L&T commenced a lawsuit against the Port Authority, contending that the Port Authority's failure to give it adequate access to the site caused delays which were responsible for its expending an additional \$1,107,876 to perform its work.

Port Authority staff analyzed L&T's claim and concluded that the Port Authority was responsible for a portion of the delays. Staff then negotiated a settlement, subject to Board approval, in the amount of \$212,778. The Port Authority will receive a release of all claims L&T has against the Port Authority in connection with Contract BP-290.016 and a stipulation of discontinuance with prejudice terminating L&T's lawsuit. Staff considers the proposed settlement to be fair and equitable.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into an agreement for the settlement of a claim by L&T Contracting Co., Inc., against the Port Authority arising out of Contract BP-290.016, Red Hook Marine Project Stage II, Paving And Utilities, and for payment by the Port Authority of the amount of \$212,778 in settlement of said claim, the form of the agreement to be subject to the approval of General Counsel or his authorized representative.

(Board - 3/10/88)

**Elizabeth - Port Authority Marine Terminal - Public Service
Electric and Gas Company - Conveyance of Easement**

Public Service Electric and Gas Company (PSE&G) requested that the Port Authority convey a fifteen foot-wide subsurface easement to allow for the routing of a natural gas main through Port Authority property at the Elizabeth-Port Authority Marine Terminal (EPAMT). The main will deliver gas from PSE&G's existing system in Elizabeth and Newark to a proposed cogeneration facility in Bayonne. The main will also serve as an alternate source of gas supply to all of Bayonne and allow for future expansion of the system.

PSE&G will pay the Port Authority the sum of \$44,479 upon the conveyance of the easement which represents appropriate compensation for the rights granted PSE&G. The agreement will also provide that PSE&G shall relocate the pipeline, at its own expense, should it conflict with future Port Authority plans for the development of the property in which case PSE&G will have the option of relocating the pipeline to a non-Port Authority location or to another location approved by the Port Authority within the EPAMT.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and hereby is authorized to convey to the Public Service Electric and Gas Company a fifteen foot-wide subsurface easement for the installation, operation and maintenance of an underground natural gas main at an agreed upon location within the Elizabeth-Port Authority Marine Terminal for a total consideration of \$44,479 to be paid by the Public Service Electric and Gas Company to the Port Authority; and it is further

RESOLVED, that all documents and agreements to effectuate the aforesaid including the metes and bounds description of the easement area be subject to approval as to form by General Counsel or his duly authorized representative.

(Board - 3/10/88)

**Port Authority Auto Marine Terminal - Port Jersey Railroad -
Acquisition of Real Property**

The Port Jersey Railroad, a railroad located solely in the Port Jersey peninsula has tracks situated on property which separates the Port Jersey peninsula from the Greenville Yards. Acquisition of the property on which the railroad tracks are located is required to provide access for the movement of vehicles between the Port Jersey and Greenville portions of the Port Authority Auto Marine Terminal (PAAMT). A substantial portion of the railroad's tracks are no longer used or needed for railroad purposes and have been allowed to fall into a state of disrepair.

To complete construction and ensure access to the PAAMT the following are required for a public purpose:

1. several sub-surface easements for utilities;
2. the extension of Colony Road across the railroad for public access into the Greenville Yards; and
3. acquisition of property between Port Jersey Boulevard and Port Authority property for the development of an access road from the Port Jersey peninsula to the Greenville Yards.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that it is necessary for marine terminal purposes for the Port Authority Auto Marine Terminal (PAAMT), to acquire fee title and required lesser interests in four acres of real property described on Map No. PA-AMT-P1-N.J. which property is more particularly described as follows:

(Board - 3/10/88)

PARCEL 1

BEGINNING at a point in the easterly terminus of Port Jersey Boulevard (88 feet wide) said point being formed by the intersection of the northerly line of Port Jersey Boulevard with the easterly line of Port Jersey Boulevard and being further described as the southeast corner of a certain parcel of land designated as Parcel G in a deed from the Construction Investment Corporation to the Dos De Febrero, S.A., dated January 1, 1987 and recorded in the Hudson County Register's Office on November 18, 1987 in Deed Book 3836 at page 178 and running the following five courses and distances along the easterly and northerly lines of said Parcel G:

1. N29° -10'-05"E 32.00 feet to a point; thence
2. N60° -49'-55"W 2217.50 feet to a point; thence
3. S29° -10'-05"W 12.00 feet to a point; thence
4. N60° -49'-55"W 435.44 feet to a point; thence
5. N58° -09'-16"W 1598.29 feet to a point; thence
6. S31° -50'-44"W 20.00 feet across said Parcel G to a point in the northerly line of Port Jersey Boulevard; thence
7. S58° -09'-16"E 1598.76 feet along the northerly line of Port Jersey Boulevard to an angle point therein; thence
8. S60° -49'-55"E 2653.40 feet still along the northerly line of Port Jersey Boulevard to the point and place of beginning.

PARCEL 2

BEGINNING at a point formed by the intersection of the ninth and tenth courses in the description of a certain parcel of land designated as Parcel F in a deed from the Construction Investment Corporation to the Dos De Febrero, S.A., dated January 1, 1987 and recorded in the Hudson County Register's Office on November 18, 1987 in Deed Book 3836 at page 178 and running:

1. N37° -30'-35"W 1042.88 feet along the tenth course of said Parcel F to a point; thence
2. S31° -50'-44"W 111.56 feet to a point in the sixteenth course of said Parcel F and a point of curvature of a nontangent curve to which point a radial line bears N87° -09'-12"E; thence
3. Along the arc of a circle curving to the right having a radius of 450.00 feet, a central angle 34° -41'-32" and an arc length of 272.47 feet and partially along the sixteenth course and along the seventeenth course of said Parcel F to a point of tangency in the easterly line of Colony Road; thence
4. S58° -09'-16"E 20.00 feet to a point in the fifth course of said Parcel F; thence

5. N31° -50'-44"E 245.59 feet partially along the fifth course to the beginning point of the sixth course of said Parcel F; thence the following four courses and distances along the southerly and easterly lines of said Parcel F:

6. S58° -09'-16"E 120.00 feet to a point; thence

7. S37° -30'-35"E 787.33 feet to a point; thence

8. S58° -09'-16"E 19.14 feet to a point; thence

9. N31° -50'-44"E 32.00 feet to the point and place of beginning.

TOGETHER with all right, title and interest, if any, in and to the beds of any streets abutting the above described parcels.

SUBJECT to and excepting from the above-described parcels:

(a) All outstanding public and private rights to maintain surface and subsurface utilities, whether or not of record.

(b) All outstanding right, title and interest of the United States of America, the State of New Jersey, the County of Hudson and the City of Jersey City. The Executive Director be and is hereby authorized to acquire said real property by purchase, subject to the approval of the Committee on Construction as to the negotiated consideration, or by condemnation pursuant to Chapter 44 of the Laws of New Jersey, 1947, as amended, and to incur all expenses necessary or incidental to such purchase or condemnation; and it is further

RESOLVED, that the Executive Director and General Counsel be and hereby are authorized to arrange for the filing and maintenance of an action before the Interstate Commerce Commission (ICC) to have a portion of the Port Jersey Railroad (PJRR) declared abandoned and to participate in any other administrative or judicial proceeding with regard thereto.

**Agreements with The City of Jersey City Regarding Port
Jersey and Greenville Properties**

The Board at its meeting on December 11, 1986 authorized a project for the development of an imported automobile marine terminal to be located in the Cities of Bayonne and Jersey City, New Jersey. An agreement with the City of Jersey City regarding the construction of the Marine Terminal and the facilitation of the development of the remaining Greenville Yards property is now proposed.

Regarding the Auto Marine Terminal, the comprehensive agreement with the City would include an in-lieu-of-tax agreement for the Marine Terminal. Further, the Port Authority would participate in upgrading portions of the infrastructure located in the City which are necessary for the operations of the Marine Terminal and would be directly impacted by its activities at the facility. Jersey City would agree to a closing of a portion of Port Jersey Boulevard to provide an access roadway for the terminal, will provide all permits necessary to connect City utility systems with the terminal and will support and endorse the facility.

It was reported to the Board, in 1986, that because of the prohibitively high infrastructure costs associated with the development of the Greenville site an arrangement would be made for the sale of the property. Jersey City has expressed interest in acquiring the surplus property not needed for the Marine Terminal for industrial development. The agreement regarding the Greenville property would provide for among other things the conveyance to the City of the approximately 50-acre parcel of land and participation in the infrastructure development of that site. In consideration for the above the Port Authority would receive 50% of the net revenues from the subsequent development of the Greenville property conveyed to the City. In addition, the City has agreed to extend Colony Road, a public street, to the Port Authority property line to provide access to the Marine Terminal and to size the infrastructure on the 50-acre parcel to a sufficient capacity to meet any potential future infrastructure needs of the Marine Terminal. Further, the Port Authority will no longer pay approximately \$125,000 per year for in-lieu-of-tax payments on the property conveyed.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that, subject to the filing of an appropriate map in the office of the Port Authority with a certificate annexed thereto executed by the Chief Engineer, a parcel of approximately 50 acres of vacant land at Greenville, Jersey City, New Jersey should be and is hereby declared as surplus and no longer required for marine terminal purposes; and it is further

RESOLVED, that the Executive Director, consistent with the report to the Board in 1986 is authorized to arrange for the conveyance of a portion of the Greenville property given the infrastructure costs associated with development of the site, and the fact that concluding arrangements with the City of Jersey City would advance construction of the Auto Marine Terminal and facilitate development of the remaining Greenville Yard properties, and he is hereby authorized to enter into agreements with the City of Jersey City providing for:

(a) the payment in 1988 of in-lieu-of-taxes for 1988 and 1989 in the amount of \$1,665,000, for Greenville and Port Jersey, and approximately \$770,000 each year after 1989 for those properties included in the Auto Marine Terminal;

(b) the closing by Jersey City of a portion of Port Jersey Boulevard and arrangements for its temporary use for Auto Marine Terminal purposes;

(c) the provision of up to \$750,000 toward the upgrading of those portions of the City's infrastructure which are affected by activities at the Marine Terminal; and

(d) the conveyance of the 50 acre tract to the City or the Jersey City Economic Development Corporation with the condition that the property will revert to the Port Authority if development does not commence within two years, and to execute all deeds and other documents associated with the contemplated transactions, for a consideration of \$3.0 million which would be paid to the Port Authority out of the equal sharing of any net revenues that would be derived from the subsequent development of the property; in the event of such development the Port Authority would participate, *pari passu*, up to \$3 million toward the infrastructure costs which would also be subject to recovery from the sharing of net revenues derived from the property.

(Board - 3/10/88)

**La Guardia Airport - Additional Overnight Aircraft Parking -
Phases I and II - Project Authorization and Award of
Contract LGA-220.035**

Port Authority staff in discussion with the air carriers and the Federal Aviation Administration (FAA) has developed a program to improve and maximize the amount of overnight aircraft parking at LaGuardia Airport to meet the needs of airline operators. Originally conceived as a single phase project, it was decided to proceed in two phases so that work could begin while approvals from the FAA and National Weather Service in connection with the relocation of certain National Weather Service Equipment were being sought.

Authorization to award Contract LGA-220.034 entitled "Additional Overnight Aircraft Parking, Phase I", the only Phase I contract, was obtained from the Executive Director in October 1986. Phase I was operationally completed and beneficial occupancy occurred in June 1987.

Contract LGA-220.035, the only contract required under Phase II, provides for grading, drainage, electrical work and paving for overnight aircraft parking west of Runway 4-22, including the relocation of the National Weather Service's hydrothermometer and remote wind equipment and miscellaneous improvements to associated taxiways.

The contract provides additionally, that the bidder will use every good faith effort to meet a goal of 12% participation for firms owned and controlled by Minority Business Enterprises and 2% for firms owned and controlled by Women's Owned Business Enterprises.

The contract will be publicly advertised and will be awarded to the lowest bidder qualified by reason of responsibility, experience and capacity to perform the work and whose bid price is deemed reasonable.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize a two-phased project for the construction of additional overnight parking west of Runway 4-22 at LaGuardia Airport including the relocation of certain National Weather Service Equipment, at a total project cost presently estimated at \$6.4 million including payments to contractors, an allowance for extra work, administrative, engineering and financing expenses; and it is further

RESOLVED, that the Executive Director is authorized to award Contract LGA-220.035 entitled "Additional Overnight Aircraft Parking, Phase II" to the lowest bidder who is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable and to order extra work up to 10% of the amount of the accepted bid or to reject all bids.

(Board - 3/10/88)

**La Guardia Airport - Taxiway "BB" Extension - Project
Authorization and Award of Contract LGA-220.036**

Increased aircraft congestion and resultant delays in the vicinity of the Marine Air Terminal at LaGuardia Airport have necessitated the development of a project to remedy the situation. The project is comprised of the extension of Taxiway "BB" and the modification of Taxiways "C" and "G" at a total project cost presently estimated at \$3.3 million.

The project will be accomplished through the award of Contract LGA-220.036 entitled "Taxiway 'BB' Extension" which provides for grading, drainage, paving and electrical work for Taxiway "BB"; the modification of Taxiways "C" and "G" and the relocation of Federal Aviation Administration (FAA) - owned equipment (a transmissometer) by the FAA. The FAA will be reimbursed for performing the relocation.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a project is authorized at LaGuardia Airport for the extension of Taxiway "BB" between Taxiways "B" and "D", including the modification of Taxiways "C" and "G", at a total project cost presently estimated at \$3.3 million, including payments to contractors, allowance for extra work, administrative, engineering, financing expenses and a project contingency; and it is further

RESOLVED, that the Executive Director is authorized to award Contract LGA-220.036 entitled "Taxiway 'BB' Extension" to the lowest bidder who is qualified by reason of responsibility, experience and capacity and whose bid price the Executive Director deems reasonable and to order extra work up to 10% of the amount of the accepted bid, or to reject all bids; and it is further

RESOLVED, that the Executive Director is authorized to enter into an agreement to reimburse the Federal Aviation Administration for the relocation of their transmissometer equipment; the form of the agreement being subject to the approval of General Counsel or his authorized representative.

(Board - 3/10/88)

**The World Trade Center - Shuttle and Freight Elevator
Improvement Program - Planning Authorization**

The elevator system serving One and Two World Trade Center has been operational for nearly twenty years. The aging of the system has contributed to a less than satisfactory level of ride performance and reliability.

To alleviate these problems, staff recommends a project, the planning phase of which will include the construction and installation of various prototypes, their testing, and evaluation of the results achieved. Based on the planning phase results, a project authorization and an authorization to award all required contracts will be recommended for all work necessary to accomplish the elevator improvements, including vibration reduction, improvements to controls and operating systems, and reduction in cable sway caused by building sway.

Staff anticipates that approximately \$.9 million will be spent on program planning and design, and approximately \$1.6 million will be spent on the modification of existing equipment and/or the installation of new equipment on two elevators in Two World Trade Center.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize: (1) planning estimated at \$.9 million for a project to develop and implement improvements for the 52 shuttle and freight elevators in One and Two World Trade Center; and (2) the Executive Director to take such action with respect to entering into negotiated agreements for professional services and construction contracts in an estimated amount of \$1.6 million necessary to accomplish modification of existing equipment and/or the installation of new equipment on two elevators in Two World Trade Center to serve as prototypes; the form of such agreements and contracts to be subject to the approval of General Counsel or his authorized representative.

(Board - 3/10/88)

The World Trade Center - Kuo Hotel Corporation - Amendment to Lease

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement amending the Port Authority's lease with Kuo Hotel Corporation covering the operation of the Vista International Hotel at the Port Authority World Trade Center. The amendment would extend the term of the letting by Kuo of approximately 7,250 rentable square feet of space located in the lobby of One World Trade Center adjacent to the Hotel for a period of one year commencing April 1, 1988 at a rental at the rate of approximately \$270,000 per year, plus escalation for increases in operating and maintenance costs and payments in-lieu-of-taxes. In addition, revenues generated by the use of this space will be includable in the Hotel's gross revenues for the purpose of determining net cash flow. Pursuant to the Port Authority's lease with Kuo 50% of the Hotel's net cash flow is payable to the Port Authority.

On March 14, 1985, the Board authorized the letting of this space to Kuo for a period of approximately two and one-half years, at an annual rental of \$250,000, plus escalation for increases in operating and maintenance costs and payments in-lieu-of-taxes. It was contemplated that at the end of that term both Kuo and the Port Authority would evaluate the effect of the use of this additional space on revenues and that if both Kuo and the Port Authority agreed that this area should continue to be leased for hotel purposes the leasing arrangement would be extended, subject to the Board's approval. It is considered desirable to continue this interim leasing arrangement for a further one-year period, until a decision is reached on the long term use of this area. Further extension of this leasing arrangement would continue to be subject to the Board's approval.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into an agreement with Kuo Hotel Corporation amending the Port Authority's lease with Kuo Hotel Corporation substantially in accordance with the terms and conditions set forth above; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 3/10/88)

The World Trade Center/Port Authority Bus Terminal Drop-In Centers for the Homeless

Over the past few years the number of homeless individuals at Port Authority facilities has increased significantly. Today there are in any one day as many as 1,000 homeless persons at seven Port Authority facilities, with the largest concentrations at The Port Authority Bus Terminal and The World Trade Center. Despite increased Port Authority response to the situation, over the past few years (e.g., police training, social services outreach programs and more limited facility access during late night hours), this situation has been exacerbated by the lack of adequate available alternatives in proximity to both facilities.

The Port Authority recognizes that the tenants and patrons, as well as the homeless, would benefit from the establishment of drop-in centers and the outreach programs associated therewith near The World Trade Center and The Port Authority Bus Terminal. Homeless drop-in centers are temporary sites which provide medical treatment, psychological counseling, showers, food, processing and voluntary transfer to a dormitory facility.

The City of New York has committed to establishing a drop-in center for the homeless at 38-44 Beaver Street in Lower Manhattan (with an estimated capacity of 100-150 persons) to be operated by Trinity Church through Federal funding. The Port Authority would arrange and provide design and construction work for the center on condition that the center accept homeless persons from The World Trade Center and, as negotiated, from other Port Authority facilities. It is estimated that the cost to the Port Authority, in connection with the Beaver Street project, would be approximately \$600,000.

In view of the large numbers of homeless persons at The Port Authority Bus Terminal, the Port Authority would establish a drop-in center near this facility at a site previously occupied by Lamston's. The Executive Director has separately authorized Contract BT-180.058 with Koren DeResta Construction Company, Inc., in the amount of \$250,000, for work to be performed on this project. It is anticipated that the cost of completing construction of the drop-in center and relocating Project FIND, a senior citizens center currently in operation, would be approximately \$350,000.

Although there are no external funding commitments for operating assistance for the Bus Terminal drop-in center project, a variety of sources are being aggressively pursued. In the interim, a one year pilot program would be undertaken by the Port Authority. The operating budget for this year's operation of the 24-hour-a-day Lamston's site is anticipated to be between \$1.2 and \$1.5 million. The pilot program is expected to have a staff of between 35-40 serving approximately 250 persons daily. Two non-profit voluntary organizations have submitted proposals for operation of the program for the first year.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to:

- (1) enter into necessary agreements with the City of New York and others to rehabilitate 38-44 Beaver Street to serve as a drop-in center for the homeless, which will accept homeless persons from The World Trade Center and, as negotiated, from other Port Authority facilities, at an estimated amount of \$600,000;
- (2) enter into necessary agreements in the total estimated amount of \$350,000 to complete the construction of a drop-in center for the homeless and the relocation of Project FIND, a senior citizens center, at The Port Authority Bus Terminal; and
- (3) enter into agreements with other parties, if necessary, for the operation, during a one-year pilot program, of the drop-in center for the homeless at The Port Authority Bus Terminal-Lamston's site.

(Board - 3/10/88)

The Minute on Page 138 and Page 139 has been withdrawn.

(Board - 3/10/88)

Harlem International Trade Center - Port Authority Participation

The New York Governor's Office has requested that the Port Authority enter into a lease agreement, subject to the approval of the Committee on Operations, with the Harlem International Trade Center Corporation, a yet to be formed subsidiary of the Harlem Urban Development Corporation (HUDC), for the leasing of space for international trade and related activities at the Harlem International Trade Center (HITC). The rental payable by the Port Authority under the lease will not exceed in any event the lesser of one-third of the overall cost of the HITC, including a share of common costs, or \$48.5 million, on a present value basis as of the date of the lease commitment. It is presently expected that this arrangement will be effectuated by the Port Authority making an initial lump sum payment of the \$48.5 million either directly to the lessor or through an escrow or similar arrangement. Financing commitments covering the remaining two-thirds of the project cost of the HITC would have to be obtained prior to the Port Authority's agreement to lease space at the HITC. The rental payable by the Port Authority under the lease would be allocated against funds made available for regional development projects in the State of New York as a result of the Governors' Agreement of June 1983.

At the request of the New York Governor's Office, in connection with the Authority's proposed leasing of space at HITC, the Port Authority would provide the New York Urban Development Corporation (UDC) with \$1.5 million to allow UDC to fund the necessary planning (including required funding for the project planning team) by HITC Corporation. The \$1.5 million would also be allocated against funds made available for regional development projects in the State of New York as a result of the Governors' Agreement of June 1983.

The HITC is a proposed office/exhibition, hotel and retail complex to be located at 125th Street, west of Lenox Avenue in Harlem, the purpose of which is to promote international trade and trade relations for and with U.S. minority and small businesses and developing nations. The HITC is a core project for the economic revitalization of the 125th Street corridor and is being developed with support from the UDC, the HUDC, the City of New York and others, including Congressman Charles Rangel.

The lease agreement with the Harlem International Trade Center Corporation and any related agreements would specify that the space to be leased to the Port Authority would be for particular international trade activities including trade promotion, exhibit and educational purposes. The Port Authority would have no operational or maintenance responsibilities with respect to the HITC and would not pay any amounts for the leasing of space other than the agreed upon rental.

To date, exclusive of this authorization, \$47,771,000 has been allocated to projects in the State of New York from the \$112.5 million of funds made available for regional development projects in the State of New York as a result of the Governors' Agreement of June 1983. Following this authorization, there will be \$14,729,000 remaining for projects in the State of New York. This amount may increase if the lease agreement ultimately entered into provides for a maximum rental payable by the Port Authority of less than \$48.5 million. The amounts allocated for regional development projects in the State of New Jersey have been exhausted.

(Board - 3/10/88)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to enter into a lease agreement with the Harlem International Trade Center Corporation, and any other agreements necessary or desirable in connection therewith, the lease and any such other agreement to be subject to the approval of the Committee on Operations, for the leasing of space for international trade and related activities at the Harlem International Trade Center (HITC), the rental payable by the Port Authority under the lease for leasing such space and for the use of related support facilities not to exceed in any event the lesser of one-third of the overall cost of the HITC, including a share of common costs, or \$48.5 million, on a present value basis as of the date of the lease commitment and provided that financing commitments covering the remaining two-thirds of the project cost of the HITC have been obtained; such rental payable by the Port Authority under the lease to be allocated against funds made available for regional development projects in the State of New York as a result of the Governors' Agreement of June 1983; the space leased to the Port Authority to be for specified international trade activities including trade promotion, exhibit and educational purposes; the Port Authority to have no operational or maintenance responsibilities with respect to the HITC and not to pay any amounts for the leasing of space other than the agreed upon rental; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to enter into an agreement, in connection with the Authority's proposed leasing of space at HITC, with the New York Urban Development Corporation (UDC) to provide \$1.5 million to allow UDC to fund the necessary planning (including required funding for the project planning team) by HITC Corporation, such amount to be allocated against funds made available for regional development projects in the State of New York as a result of the Governors' Agreement of June 1983; and it is further

RESOLVED, that the form of each of such foregoing agreements shall be subject to approval of General Counsel or his authorized representative.

Whereupon, the meeting was adjourned.

Barry Weintrob, Chief Financial Officer
Jeffrey Breen, Partner, Touche Ross & Co.
David B. Jones, Senior Audit Manager, Touche Ross & Co.

The meeting was called to order by the Chairman.

Election of Officers

Chairman Philip D. Kaltenbacher announced that in accordance with the requirements of the By-Laws the annual election of officers was in order and requested Commissioner Hellmuth to take the chair as Acting Chairman.

The Chairman Hellmuth submitted the following report:

"On behalf of the Nominating Committee, I desire to report that at its meeting held earlier today, in accordance with the provisions of the By-Laws, the Committee, by unanimous action, submits the nominations for election to the office of Chairman of The Port Authority of New York and New Jersey of Commissioner Philip D. Kaltenbacher, and for the office of Vice-Chairman of The Port Authority of New York and New Jersey of Commissioner Robert F. Wagner.

"By unanimous action, the Committee also submits the nominations of Stephen Berger as Executive Director and of Patrick J. Falvey as General Counsel.

"By unanimous action, the Committee also submits the nominations of Barry Weintrob as Director of Finance, Francis A. Gorman as Comptroller, Doris E. Landre as Secretary, John E. Hauptert as Treasurer and Donald R. Lee as Director of the Audit Department."

Commissioner Schulman thereupon moved the adoption of the report of the Nominating Committee. The motion was seconded by Commissioner Van Buren and carried.

On motion of Commissioner Schulman seconded by Commissioner Van Buren it was voted that nominations be closed and that the Secretary be directed to cast one ballot for the election of Commissioner Philip D. Kaltenbacher as Chairman, Commissioner Robert F. Wagner as Vice-Chairman, Stephen Berger as Executive Director, Patrick J. Falvey as General Counsel, Barry Weintrob as Director of Finance, Francis A. Gorman as Comptroller, Doris E. Landre as Secretary, John E. Hauptert as Treasurer and Donald R. Lee as Director of the Audit Department.

The Secretary reported that the ballot had been cast, whereupon Commissioner Hellmuth announced the election of the following: Philip D. Kaltenbacher as Chairman, Robert F. Wager as Vice-Chairman, Stephen Berger as Executive Director, Patrick J. Falvey as General Counsel, Barry Weintrob as Director of Finance, Francis A. Gorman as Comptroller, Doris E. Landre as Secretary, John E. Hauptert as Treasurer and Donald R. Lee as Director of Audit Department.

(Board - 4/14/88)

Memorial to Vice-Chairman Hoyt Ammidon

The Chairman addressed the Board upon the death of Hoyt Ammidon. The following Minute was unanimously adopted by a rising vote:

The Commissioners of The Port Authority of New York and New Jersey note with deep sorrow the death of former Vice-Chairman Hoyt Ammidon on March 13, 1988 at Huntington Hospital on Long Island.

Hoyt Ammidon was appointed a Commissioner of the Port Authority in 1968 to succeed Commissioner and former Chairman S. Sloan Colt, who had resigned, by Governor Nelson A. Rockefeller and was reappointed by Governor Rockefeller in 1969. He served as a member of the Board until his resignation in May 1972. During this period he was elected Vice-Chairman of the Port Authority and also served as a member and Vice-Chairman of the Committee on Finance and as a member and Chairman of the Committee on Operations. Vice-Chairman Ammidon was also an active member of the Board's Committee on Art.

At the time of his appointment to the Board, Vice-Chairman Ammidon was Chairman of the Board and Chief Executive Officer of The United States Trust Company of New York. He was also on the Board of Directors of many corporations, including the American Express Company, the Commercial Credit Corporation, the General American Transportation Corporation, the Howard Johnson Company and the Perkin-Elmer Corporation, and also was a Trustee of the Greenwich Savings Bank.

Vice-Chairman Ammidon was a Director of Lincoln Center for two decades, beginning in the early 1960's. As Chairman of the consolidated Lincoln Center Fund from 1964 to 1970, he led the drive that raised the money to complete the center's principal halls. He was also chairman of the Music Theater of Lincoln Center. His philanthropic interests were wide. He was a Director of the Boys' Club of America, a trustee of the American Academy of Rome and of Cooper Union here, President of the American Friends of Canada, President of the Business Committee for the Arts, a Director of the American Red Cross of Greater New York and Chairman of its building fund, a Director of the Memorial Hospital for Cancer and Allied Diseases, and a board member of the English Speaking Union and of the American Cancer Society's New York division.

Throughout his service on the Board, Vice-Chairman Ammidon gave unstintingly of his time, his energy and his abilities to the formulation of the policies and programs of the Port Authority. His fellow Commissioners and the staff greatly valued his judgment and guidance because of his rich background of financial and business experience.

The Commissioners of the Port Authority, now, therefore, in expressing both personal and official regret upon the death of a dedicated and distinguished public servant, direct that this tribute shall be spread in full upon the proceedings of the Board, and that a copy shall be suitably engrossed and sent to the family of former Vice-Chairman Hoyt Ammidon.

(Board - 4/14/88)

Tribute to Honorable Jerry Fitzgerald English

The following resolution was unanimously adopted, expressing the appreciation of the Commissioners of The Port Authority of New York and New Jersey to the Honorable Jerry Fitzgerald English.

WHEREAS, during the years since her appointment as a Commissioner of The Port Authority of New York and New Jersey by Governor Brendan T. Byrne in 1979 and her reappointment by Governor Byrne in 1981, the Honorable Jerry Fitzgerald English has given unstintingly of her time, energy and abilities to her work as a Commissioner; and

WHEREAS, Commissioner English has served as Vice-Chairman and Chairman of the Committee on Construction, as a member and Vice-Chairman of the Committee on Port Planning and as a member of the Committee of Finance; and

WHEREAS, Commissioner English's public service has included service as Assistant Counsel to the New Jersey Senate, Legislative Counsel to the Governor of the State of New Jersey, Commissioner of the New Jersey Department of Environmental Protection, member of the Gateway National Recreation Area Advisory Commission, member of the Board of Directors of the Center for Molecular Medicine and Immunology of the University of Medicine and Dentistry of New Jersey, Honorary Trustee of the Passaic River Coalition and Trustee of the New Jersey Harvard Law School Association; and

WHEREAS, Commissioner English has given generously of her time and efforts to the work of the Port Authority both here and abroad;

NOW, THEREFORE, be it

RESOLVED, that the Commissioners of The Port Authority of New York and New Jersey do hereby express to Jerry Fitzgerald English their deep appreciation for her outstanding service to the Port Authority and their highest respect for her as a valued colleague; and be it further

RESOLVED, that the Commissioners do hereby direct that this resolution be suitably engraved and presented to Commissioner Jerry Fitzgerald English as a token of the high esteem and deep respect in which she is held by her fellow Commissioners and by the staff.

(Board - 4/14/88)

Tribute to Honorable Robert V. Van Fossan

The following resolution was unanimously adopted, expressing the appreciation of the Commissioners of The Port Authority of New York and New Jersey to the Honorable Robert V. Van Fossan.

WHEREAS, since his appointment as a Commissioner of The Port Authority of New York and New Jersey by Governor Brendan T. Byrne in June 1980, the Honorable Robert V. Van Fossan has been a loyal and valued member of the Board; and

WHEREAS, Commissioner Van Fossan has served as a member and Chairman of the Committee on Operations, as Vice-Chairman and Chairman of the Committee on Finance and as a member and Chairman of the Audit Committee; and

WHEREAS, Commissioner Van Fossan has brought to the deliberations of the Board the benefits of his broad experience and distinguished career in business as President and Chairman of the Board and Chief Executive Officer of The Mutual Benefit Life Insurance Company and as a Director of Amerada Hess Corporation, Mutual Benefit Life, MBL Life Assurance Corporation, Nova Pharmaceutical Corporation, Public Service Enterprise Group, Incorporated and the Squibb Corporation; and

WHEREAS, Commissioner Van Fossan's dedication to the public good is also evidenced by his service as Chairman of the Greater Newark Industry Capital Fund Campaign Committee, Trustee of the Newark Museum, Chairman of the Newark Performing Arts Corporation, Trustee of the New Jersey Historical Society, Chairman of the New Jersey Chamber of Commerce, Trustee of The Partnership for New Jersey, a Director of the Regional Plan Association, Chairman of Renaissance Newark, Inc., member of the Princeton University Council on New Jersey Affairs and as a member of the Advisory Board of the Community Foundation of New Jersey; and

WHEREAS, Commissioner Van Fossan has given to the Port Authority a full measure of his time, his talent and his effort;

NOW, THEREFORE, be it

RESOLVED, that the Commissioners of The Port Authority of New York and New Jersey do hereby express to Robert V. Van Fossan their deep appreciation for his outstanding service to the Port Authority and their warmest respect and affection for him as a friend and valued colleague; and be it further

RESOLVED, that the Commissioners hereby direct that this resolution be suitably engraved and presented to Commissioner Robert V. Van Fossan as a token of the high esteem and warm friendship in which he is held by his fellow Commissioners and by the staff.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of March 10, 1988. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey has expired.

The Secretary also reported that there was a typographical error in the February 11, 1988 Board Minutes. On page 68, second paragraph in the eighth line "\$375,000" should read "357,000".

Whereupon, the Board unanimously approved these Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on April 14, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on April 14, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on April 14, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on April 14, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Audit Committee

Commissioner John G. McGoldrick, Chairman of the Audit Committee, presented the report of the Audit Committee. The report which follows was ordered spread upon these Minutes of the Board.

Consistent with our By-Laws requirement that the Audit Committee report to the Board from time to time on the results of its supervisory, auditing and other activities, I am pleased to present this report with respect to fiscal year 1987.

During 1987 the Audit Committee held nine meetings.

The Committee reviewed in detail the Audit Department's quarterly reports on internal functions and external relationships, and the quarterly accounts receivable reports. We also reviewed, and continue to monitor, unresolved audit findings and recommendations -- to assure that the recommendations of the Audit Department are appropriately implemented in a timely manner.

During 1987 we met on three different occasions with representatives of Touche Ross & Co., the Authority's independent auditors. We also met on three occasions with Mitchell/Titus Co., the independent auditors for the Fund for Regional Development, which the Authority manages for the States of New Jersey and New York.

We had regular discussions with only the outside auditors present -- consistent with the policy that the outside auditors and the Audit Committee have direct and unrestricted access to each other. In addition, as Chair of the Audit Committee I periodically communicated with the outside auditors.

Similarly, there were frequent communications with Don Lee, Director of our internal Audit Department. Our Committee meets privately with Don, and he and I meet from time to time, and talk by telephone regularly. I mention this to highlight the relative autonomy of the Audit Department within the Authority. While functioning as an integral part of the Finance Department, the Audit Department must and does perform its important responsibilities independently, with both a perceived and a real independence, and with direct access to the Board, and accountability to the Audit Committee.

We have continued to monitor compliance with the Authority's financial disclosure filing requirements. Each spring the Committee reviews the individual filings of all senior management. We are concerned with both the completeness and the timeliness of the filings, as well as with the contents of the disclosure statements.

Our By-Laws also provide that the Audit Committee "shall keep informed regarding the management of the Port Authority" -- a mandate which extends the scope of the Committee's responsibilities beyond what might be considered the typical audit committee role.

Without going into detail, I would like to note some of the management related matters which the Audit Committee focused on during 1987:

- expenditures of the Board of Governors Fund of the Club at the World Trade Center;
- controls over improper payments to security guards to facilitate parking at entrances to the airport terminals;
- timeliness of the execution of contracts and amendments;
- use of outside law firms, and the fees paid for their services;
- the collateralization of the Authority's bank deposits;
- the interrelationship of the Port Authority and PATH retirement systems;
- the status of the development of the Authority's new electronic data processing general ledger system;
- the timeliness of our payment of bills to vendors;
- the use of personal computers off premises, and the adequacy of controls on access to our computer data;
- the information required on applications for employment;
- our policies with respect to outside employment, and concerning the retention of retired personnel as consultants; and
- Freedom of Information issues, focusing on the procedures established to assure that the public has appropriate access to information without hampering our ability responsibly to conduct the business of the agency.

The Audit Committee has taken a special interest in the Authority's programs for the development of minority and women-owned businesses, and in our internal and external Affirmative Action Programs. We continue to monitor the active implementation of these policies within the Authority and by those third parties who undertake affirmative action obligations in their contracts with us.

As Chair of the Audit Committee I review the expense reports of the Executive Director and of the Chairman and other Commissioners, as well as the use of vehicles by members of the Board. Also our Committee examines potential conflicts situations involving Board members and present or former employees.

We also review the use of certain privileges which are available to employees -- for example, passes and parking privileges, focusing on the proper use of these privileges which are legitimate benefits of employment.

(Board - 4/14/88)

Finally, because the Board has delegated to the Audit Committee the task of making an annual recommendation concerning the retention of auditors, the Committee focused on the level of performance and the degree of responsiveness of the independent auditors retained for fiscal year 1987 by the Authority and by the Fund for Regional Development.

As a result of our evaluation and recommendation, today's agenda includes, as action items, the retention for fiscal year 1988 of Touche Ross & Co. as independent auditors for the Authority, and of Mitchell/Titus Co. as independent auditors for the Fund.

I know I speak also for the other members of the Audit Committee -- Commissioners Henderson, Hutchison and Ronan -- when I thank the professional staff with whom we deal for their cooperation and responsiveness.

Finally, I want to commend what we discern as a general awareness within the Authority of the responsibility of each individual to conduct the business of the Authority solely in the public interest, and to maintain the Authority's reputation for ethical conduct and integrity.

(Board - 4/14/88)

Report of Independent Auditors

The Board received a report of Touche Ross & Co., Independent Auditors, as presented by Mr. Jeffrey R. Breen. The report which follows was ordered spread upon these Minutes of the Board.

We have completed our examination of the consolidated financial statements of The Port Authority of New York and New Jersey, and its subsidiary, Port Authority Trans-Hudson Corporation, for the year ended December 31, 1987. Our opinion dated February 26, 1988, appears on Page 33 of the Port Authority's 1987 Annual Report. Our examination was conducted in accordance with generally accepted auditing standards. Our opinion states that the Port Authority's financial statements are fairly presented in conformity with generally accepted accounting principles applied on a consistent basis. Our opinion also states that Schedules A, B and C are fairly presented in conformity with the requirements of law and the Port Authority's bond resolutions which have been applied on a basis consistent with that of the preceding year.

Concurrently with our examination of the annual financial statements, we also performed a study of the Port Authority's system of internal accounting control. Our opinion dated November 25, 1987, on the adequacy of the Port Authority's system of internal accounting control, appears on Page 32 of the Annual Report.

We also issued net revenue reports in accordance with the lease agreements between the Port Authority and the City of New York and the Port Authority and the City of Newark, reports of Federal assistance programs in accordance with OMB circular A-128 and a report on the UMTA Section 15.

During the year, we had unrestricted access to the Audit Committee and met with the Audit Committee to discuss our audit plan, comments and recommendations on internal control and the financial statements.

We received the complete cooperation of Port Authority management and employees. There were no restrictions placed on our approach or the scope of our examination. We were given access to all individuals, records, documents and other supporting data which we requested and our inquiries were satisfactorily answered.

We appreciate the opportunity to appear before you and would be pleased to answer any questions you may have pertaining to the financial statements, our approach to the 1987 audit and the reports which we issued.

(Board - 4/14/88)

Retention of Independent Auditors for 1988

Under the By-Laws, the Audit Committee has the responsibility to recommend retention of independent accountants for designation by the Board to audit the accounts and financial statements of the Port Authority. The Audit Committee monitors the independent auditing function and decides annually the question of which firm to recommend to the Board for retention by the Port Authority and for what period of time in light of then current circumstances.

Consistent with that policy and after a full review and discussion of the performance of Touche Ross & Co., the Audit Committee recommended that the Board designate Touche Ross & Co. as independent auditors to audit the accounts and financial statements of the Port Authority for the year ending December 31, 1988.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that Touche Ross & Co. be and it hereby is designated as independent auditors to audit the accounts and financial statements of the Port Authority for the year ending December 31, 1988; and it is further

RESOLVED, that Touche Ross & Co. be and it hereby is designated to perform an evaluation of the system of internal accounting controls, and to provide other audit services, including the review of financial and statistical data reports submitted to the Urban Mass Transportation Administration and of financial disclosures required under the Single Audit Act of 1984 for recipients of Federal financial assistance; and it is further

RESOLVED, that, in accordance with the By-Laws of the Port Authority, the matter of arranging for such auditing by the above designated auditors and for monitoring the auditors' performance be and it hereby is referred to the Audit Committee.

(Board - 4/14/88)

The Fund for Regional Development - Retention of Independent Auditors for 1988

Under the agreements among the States of New York and New Jersey and the Port Authority creating the Fund for Regional Development, the Port Authority acts as agent for the Fund and, as such, negotiates and executes leases, manages the Fund's operations, and prepares quarterly and annual financial statements for the States. The Fund pays the Port Authority a management fee for these services.

The Fund's rapid growth during 1986 made it appropriate to have its books and accounts audited for the first time for the year ending December 31, 1986. The revenue and transactions of the Fund for Regional Development are such that an annual independent audit of the accounts and financial statements of the Fund is appropriate. The Audit Committee has reviewed and discussed the performance of Mitchell/Titus & Co., a minority public accounting firm, since 1986 and recommended that the Board retain Mitchell/Titus as independent auditors of the Fund for Regional Development for the year ending December 31, 1988.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that Mitchell/Titus & Co. be and it hereby is designated, on behalf of the Fund for Regional Development, as independent auditors to audit the accounts and financial statements of the Fund for the year ending December 31, 1988; and it is further

RESOLVED, that Mitchell/Titus & Co. be and it hereby is designated, on behalf of the Fund for Regional Development, to perform an evaluation of the system of internal accounting controls of the Fund; and it is further

RESOLVED, that the matter of arranging for such auditing by the above designated auditors and for monitoring the auditors' performance be and it hereby is referred to the Audit Committee.

(Board - 4/14/88)

**New York City Passenger Ship Terminal - Pier 40 - Express
Industries & Terminal Corp. - Lease Amendments and
Brooklyn Port Authority Marine Terminal - Lease of
Pier 1**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into agreements amending leases with Express Industries & Terminal Corp., a warehouse tenant which occupies the main deck and portions of the second deck at Pier 40, part of the New York City Passenger Ship Terminal, in settlement of the Port Authority's claim against the tenant arising out of the tenant's subletting of space on the main deck without remitting to the Port Authority the payments called for under the lease in the event of such subletting, and in settlement of the tenant's claim for damages arising out of the closing of Pier 40. It is further recommended that as part of this settlement, the Board authorize the Executive Director for and on behalf of the Port Authority to enter into a lease agreement with Express Industries & Terminal Corp. at Pier 1, Brooklyn Port Authority Marine Terminal for a term expiring May 31, 1992.

Under the existing lease the tenant pays a rental to the Port Authority for the main deck at Pier 40 at the rate of approximately \$539,000 per year and a rental for the second deck at Pier 40 at the rate of approximately \$291,000 per year. Under the main deck lease the tenant also has exclusive berthing rights on Pier 40 on the north and west berths. The tenant states that because of a reduction in the maximum floor load on the main deck of Pier 40, which resulted in a significant reduction in the revenue available from the tenant's storage operations and increased expenses, because the tenant was required to lease space from the Port Authority elsewhere in order to make up for the loss of storage capacity at Pier 40, it sublet space to others without paying to the Port Authority the amounts called for under the Lease. The tenant also sublet portions of the space it occupies on the second deck of Pier 40. On August 29, 1987, pending resolution of the subletting dispute, the Port Authority closed Pier 40 because of structural problems, based on the recommendations of its consultant. Express filed suit against the Port Authority seeking damages as a result of its being deprived of the full use of its premises. To expedite the removal of cargo from Pier 40 in accordance with the evacuation plan recommended by the consultant, the Port Authority offered the tenant space at Pier 1 in Brooklyn as of September 1, 1987.

The proposed settlement provides that all current subleases would be consented to by the Port Authority and the tenant would have the right to sublease additional space on the main deck. Effective June 1, 1987 the tenant would pay rental for the main deck space at the rate of \$619,000 per year. Effective March 1, 1988 the rental rate would increase to \$669,758 per year. The Port Authority would become entitled to \$330,000 in settlement of its claim for retroactive rent based upon occupancy of the main deck by subtenants for the period prior to June 1, 1987. The tenant would also pay additional rent equivalent to \$2.10 per square foot per year for any space on the main deck in excess of 108,000 square feet that is sublet and would pay for electricity consumed above what is required for normal warehousing operations. All rentals will remain in effect whether or not any sublease terminates or expires or the Port Authority revokes its consent thereto as provided in the Consent Agreement. The tenant will surrender its exclusive berthing privileges but will retain the right to berth barges without charge. In return for a release of all claims arising out of the closing of Pier 40 the rental for the main deck will be abated to a rate of approximately \$132,000 per year for the period from September 1, 1987 to February 29, 1988 and the rental for the second deck would be abated in full for such period. Rental for the second deck would be payable at the rate of \$96,000 per year for the period from March 1, 1988 to July 31, 1988. Full rental for the second deck space will be payable effective August 1, 1988. In addition, the Port Authority will reimburse the tenant for the costs of moving its cargo from Pier 40 to Pier 1 and redistributing cargo within Pier 40 in the amount of \$474,849 and will credit the tenant approximately \$725,000 in payment for damages. The retroactive subtenant rental payable by the tenant to the Port Authority will be offset against this amount and the balance will be credited against the tenant's future rental obligations under the Pier 40 main deck lease.

The tenant will pay a rental for Pier 1 at the rate of \$429,524 per year effective December 1, 1987. This rental will be reduced by approximately 75% for September, 1987, 50% for October, 1987 and 25% for November, 1987. Effective as of March 1, 1988 the rent will increase to a rate of approximately \$475,820 per year, and would be subject to annual escalation. The Port Authority would reimburse the tenant for repairs to Pier 1 in the amount of \$76,834 which would be credited against the rental payable for the space. The Port Authority will have the right to terminate the letting on 90 days' notice if the Pier is needed for purposes other than warehousing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized, for and on behalf of the Port Authority, to enter into an amendment of the Port Authority's leases with Express Industries & Terminal Corp. at Pier 40 and to enter into a lease with Express Industries & Terminal Corp. at the Brooklyn Port Authority Marine Terminal substantially in accordance with the terms and conditions set forth above, the form of the agreements to be subject to the approval of General Counsel or his designated representative.

(Board - 4/14/88)

**The Teleport - Increase in Project Authorization - Authority
to Enter into Contracts and Authority to Enter into
Lease Agreements**

The Board at its meeting on May 12, 1983 authorized the development of The Teleport at a total project cost of \$57.5 million. In addition, the Board authorized the Executive Director to enter into the necessary project agreements with the City of New York, Merrill Lynch Telecommunication, Inc., New York City Public Development Corporation and Landauer Associates.

In June 1984, the Port Authority executed a lease with the City of New York for 100 acres of developable land on Staten Island for a term of 40 years.

The requested increase in project authorization is the result of overruns in costs due to the following.

1. Construction on the Telecenter Building and shield wall was performed by the Port Authority instead of others. This resulted in an increase in engineering costs which were not included in the original economics.
2. The decision to use less costly New York Power Authority energy instead of Con Edison energy resulted in the Port Authority's designing and constructing the on-site electrical distribution system.
3. A two-year delay in the project schedule as a result of delays in negotiations of final agreements with the City of New York and Teleport Communications.

This requested increase in project authorization will permit the original scope of the project to be completed. Board authorization would be sought for any further additions to the project.

With the closing of the Telehouse International Corporation of America land lease agreement, which was approved by the Board at its meeting on November 12, 1987, land under lease and option totals more than 75% of Teleport's projected 1.1 million square feet of building space, with leases accounting for 526,500 square feet and options accounting for 310,000 square feet.

Staff deems it to be appropriate now to establish a procedure for the approval of leases for the areas of The Teleport which remain to be leased to tenants. It is recommended that in addition to the existing authority of the Board and the Executive Director, the Executive Director be given authority to enter into long term leases on terms he deems reasonable so long as the land rental equals the greater of the then market rate or the full amortization of Port Authority capital investment and electricity, if provided, is paid for by the tenant at the Port Authority's cost of supply plus 15% and the leases are otherwise financially self-sustaining. The material terms of leases at The Teleport will continue to be subject to the approval of the Mayor of the City of New York. Brokerage payments, if any, will be made in accordance with the standard World Trade Center authorized brokerage commission rate schedule.

(Board - 4/14/88)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize:

1. an increase of \$16.0 million in the project authorization for The Teleport from \$57.5 million to a total project authorization of \$73.5 million;
2. the Executive Director to: (a) take such action with respect to award of remaining purchase or construction contracts, contracts for professional and advisory services and contracts for construction management services for The Teleport project as he deems in the best interest of the Port Authority, including without limitation, award to the contractor submitting the lowest proposal, who in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose proposal price the Executive Director deems reasonable, rejection of all proposals, solicitation of new proposals on revised or the same requirements, or negotiation with one or more contractors; and (b) to execute contracts and supplemental agreements with such contractors as he deems in the best interest of the Port Authority and to order extra work and net cost work in connection with each project contract, including supplemental agreements;
3. the Executive Director to negotiate and enter into agreements with State, municipal and other public or private entities as may be appropriate and required to carry out the remainder of the project, including agreements relating to the installation and relocation of public and private utilities; and
4. the Executive Director to enter into all future leases and any ancillary agreements in connection therewith, covering the leasing by the Port Authority to tenants of areas at The Teleport substantially in accordance with the terms and conditions set forth above; the form of such leases and ancillary agreements to be subject to the approval of General Counsel or his authorized representative.

(Board - 4/14/88)

**La Guardia Airport - Project Authorization - Central Terminal
Building - West Wing and Finger 1 Expansion and
Modernization; Including Reimbursement to American
Airlines**

It is recommended that the Board authorize a project for the westerly expansion of the LaGuardia Airport Central Terminal Building arrivals level and expansion and modernization of concessions and common use areas in the West Wing and Finger 1 of the Central Terminal Building at a currently estimated total project cost of approximately \$5.0 million, and amend the Board's prior resolution of October 8, 1987 to increase the maximum compensation to the professional engineering firm of Tibbetts, Abbett, McCarthy & Stratton, from \$3.0 million to \$3.3 million, to reflect design changes to accommodate the westerly expansion project; and authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement with American Airlines, Inc. supplemental to the lease covering its Central Terminal Building premises, to reimburse American in an amount not to exceed the foregoing project cost for construction work related to this project which will be performed by American for the Port Authority in conjunction with its modernization program of approximately \$27 million in which American will renovate its premises and related areas, and providing that in the event the Port Authority does not renew or extend American's lease, other than for cause, the Port Authority will pay American for its unamortized capital investment in said program based on a fifteen year amortization period in an amount not to exceed \$27 million.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize a project for the westerly expansion and modernization of the Central Terminal Building arrivals level, the West Wing and Finger 1 at LaGuardia Airport, and an increase in the maximum compensation to the professional engineering firm of Tibbetts, Abbett, McCarthy & Stratton from \$3.0 million to \$3.3 million, substantially on the terms set forth above; and it is further

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into a supplemental agreement with American Airlines, Inc. substantially on the terms set forth above, the form of the agreement to be subject to the approval of General Counsel or his designated representative.

Newark International Airport - Implementation of Satellite
Airport Ground Transportation Terminal - Ridgewood, New
Jersey

It is recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement with Air Brook Express, Inc. covering the establishment and operation of a Satellite Airport Ground Transportation Terminal in Ridgewood, New Jersey serving Newark International Airport and to enter into an agreement with El Dorado Motor Corporation for the purchase of eight mid-sized buses at a cost of approximately \$70,000 each. Under the agreement with Air Brook the Port Authority would make available the eight buses to Air Brook for use in performing ground transportation services between the Airport and the Satellite Terminal. In addition, the Port Authority would expend up to \$200,000 for marketing, advertising and promotional support of the Satellite Terminal during the first year of its operation. The cost of the buses would be partially recouped from Air Brook according to an escalating payment schedule based on agreed upon ridership or gross receipts levels. A ground transportation percentage fee permit to be issued in conjunction with the agreement with Air Brook would provide for the phased implementation of percentage fees to be paid to the Port Authority based on agreed upon ridership or gross receipts levels. Approximately 80 companies were sent requests to submit proposals regarding such Satellite Terminals in New Jersey. Six responses were received from which the Air Brook proposal was chosen as worthwhile with respect to the Central Bergen County area.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into an agreement for the purchase of eight mid-sized buses from El Dorado Motor Corporation, substantially on the terms set forth above; and it is further

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into an agreement with Air Brook Express, Inc. covering the establishment and operation of a Satellite Airport Ground Transportation Terminal in Ridgewood, New Jersey, substantially on the terms set forth above; and it is further

RESOLVED, that the form of both agreements shall be subject to the approval of General Counsel or his designated representative.

Commissioner Gluck and Commissioner Leone

Commissioner Kaltenbacher welcomed Commissioner Gluck and Commissioner Leone to their first Board meeting as Commissioners of the Port Authority and expressed the Board's pleasure in having Commissioner Gluck and Commissioner Leone participating in the work of the Board.

Whereupon, the meeting was adjourned.

MINUTES of meeting of The Port Authority of New York and New Jersey held Thursday, May 12, 1988 at the Port Authority offices, One World Trade Center, City, County and State of New York.

PRESENT:

NEW JERSEY

Philip D. Kaltenbacher, Chairman
 William K. Hutchison
 Henry F. Henderson, Jr.
 Robert Van Buren
 Hazel Frank Gluck
 Richard C. Leone

NEW YORK

Robert F. Wagner, Vice-Chairman
 Howard Schulman
 John G. McGoldrick
 H. Carl McCall

Stephen Berger, Executive Director
 Patrick J. Falvey, General Counsel/Deputy Executive Director
 Doris E. Landre, Secretary
 Anthony J. Barber, Director of Tunnels, Bridges and Terminals
 John J. Collura, Deputy Director of Management and Budget
 Henry I. DeGeneste, Director of Public Safety
 Sidney J. Frigand, Assistant Executive Director/Government, Community & Public Affairs
 John E. Hauptert, Treasurer
 Charles L. Hirsch, Executive Assistant to the Executive Director
 Leon Katz, Supervising Information Officer, Public Affairs
 Richard R. Kelly, Director of Rail Transportation
 James J. Kirk, Port Director
 Phil LaRocco, Director of World Trade and Economic Development
 Katharine B. MacKay, Assistant Executive Director/Administration
 Mark Marchese, Assistant Director, Information Services, Government, Community & Public Affairs
 Rino M. Monti, Director of Engineering/Chief Engineer
 John R. Moran, Assistant Director of Audit
 Edward J. O'Malley, Director of Personnel
 James J. O'Malley, Director of Management Information Services
 Hugh O'Neill, Assistant Executive Director/Policy Planning and Business Development
 David Z. Plavin, Director of Aviation Redevelopment Programs
 Richard T. Roberts, Acting Director, Office of Transportation Planning
 Alfred T. Robertson, Manager, Purchase and Supply Services Division, General Services
 Sally Sakin, Administrative Assistant
 Morris Sloane, Director of Aviation Operations
 Corrado Vasquez, Assistant Comptroller
 Barry Weintrob, Chief Financial Officer

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of April 14, 1988. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey has expired.

Whereupon, the Board unanimously approved these Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on May 12, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on May 12, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on May 12, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on May 12, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

**Port Jersey/Greenville - Port Authority Auto Marine Terminal
Lease with Carco, Inc. and Amendment of Project
Authorization - Elizabeth-Port Authority Marine Terminal
Surrender of Lease with Carco, Inc.**

The Board at its meeting on December 11, 1986 authorized the development of the Port Authority Auto Marine Terminal with a 600 linear foot berth, adequate to handle a single ship, at a total project cost of \$42 million. In October 1987 an agreement was reached with BMW of North America, Inc., covering the leasing of a portion of the Port Authority Auto Marine Terminal. At the time it entered into the BMW lease, the Port Authority contemplated that it would operate the berth on a public basis, and the BMW lease provides for payment to the Port Authority of dockage and wharfage charges on at least 30,000 cars at the rate of \$7.25 per car.

It is now recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease with Carco, Inc. to cover the leasing to Carco of the berthing facilities and the balance of the available land area at the Port Authority Auto Marine Terminal for a term ending fifteen years from the date rental first commences, but no later than May 31, 2004. Rental will commence no later than June 1, 1989. Carco will have the right to negotiate an extension of the term of the letting for an additional fifteen-year period on terms mutually acceptable to it and the Port Authority. In view of the proposed lease with Carco, staff has now determined that a need exists to expand the Port Authority Auto Marine Terminal's berthing facilities to 900 linear feet to accommodate more ships. The estimated cost of the berth expansion is \$5 million. It is anticipated that this increase in the scope of the project will not cause the project to exceed its original authorized project cost.

The proposed agreement with Carco will cover the berth, approximately 105 acres of upland area, and an additional area of approximately ten acres adjacent to the berthing facilities to be used for the temporary storage of vehicles off loaded from vessels. The land will be leased in stages and the entire premises will be included under the lease no later than nineteen months following the date rental first commences. The agreement will provide for the operation of the berth by Carco for the Port Authority which will result in operational efficiencies and cost savings to the Port Authority. Revenues in the form of dockage and wharfage charges for handling BMW's, as well as other cars, brought to the facility will now be payable to Carco, and the BMW lease will be amended accordingly. Carco will construct a vehicle-preparation center, including a decosmolining station and carwash, on a portion of its premises, and the Port Authority will pay an amount not to exceed \$4.5 million for the cost of realty improvements and an amount not to exceed \$750,000 for the cost of the specialized equipment needed to operate the facility. Carco will pay a land rental at an initial annual rate of \$1,797,721 which will increase to a maximum annual rental at the rate of \$4,020,152 over the term of the lease. The land rental is payable in stages as the various areas of the premises are included under the lease. Carco will pay a berth rental, initially at the rate of \$4.50 per car, which will vary in accordance with the number of cars handled and the amount of berth space available. The berth rental will be subject to escalation in proportion to increases in the Port Authority's wharfage tariff. Carco will also pay an additional rental based on the cost of the realty improvements in amounts sufficient to cover the amounts paid by the Port Authority towards the construction, including the Port Authority's costs during construction for engineering and administration overheads, over a 25-year period. Carco will also pay additional rental based on the cost of specialized equipment purchased by the Port Authority in an amount sufficient to cover the amounts spent by the Port Authority to purchase such equipment over a fifteen-year period.

At the request of the New Jersey Department of Environmental Protection, the Port Authority will retain a limited right to recapture a portion of the premises, consisting of upland area in the Greenville section, and both the Port Authority and Carco would have the right to terminate the letting of the berth should Carco not meet minimum utilization requirements.

As part of the arrangement, it is also recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement providing for the surrender of Carco's lease covering 22 acres of land at the Elizabeth-Port Authority Marine Terminal effective six months after the completion of the expansion of the berth at the Port Authority Auto Marine Terminal, with Carco to have the right to advance the agreed upon surrender date. The Port Authority will pay Carco an amount not to exceed \$275,000 to cover the relocation of equipment used by Carco in its car-processing operation at Elizabeth, as well as the cost of moving automobiles and automobile parts stored at its Elizabeth premises.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into a lease with Carco, Inc. at the Port Authority Auto Marine Terminal substantially in accordance with the terms and conditions set forth above, and to accept a surrender of the Port Authority's lease with Carco, Inc. covering approximately 22 acres at the Elizabeth-Port Authority Marine Terminal, substantially in accordance with the terms and conditions set forth above, the form of the agreements in each instance to be subject to the approval of General Counsel or his designated representative; and it is further

RESOLVED, that the Board authorize an amendment to the Auto Marine Terminal project approved by the Board on December 11, 1986 to provide for the expansion of the berthing facilities from 600 linear feet to 900 linear feet at an estimated cost of \$5 million.

**Lincoln Tunnel - New Jersey Plaza - Repair of Retaining
Walls - Contract LT-316 - Authority to Enter into
Agreements and Contract Award**

The upper portions of the peripheral retaining walls at the New Jersey Entrance and Exit Plaza of the Lincoln Tunnel adjacent to John F. Kennedy Boulevard East on the east and Park Avenue on the west, have deteriorated progressively over the years and require major rehabilitation.

The total length of the walls is roughly 1,800 feet, of which approximately 500 feet of the east wall along Kennedy Boulevard East belongs to the Township of Weehawken.

Contract LT-316 provides for the rehabilitation of the upper portions of the total length of the east and west retaining walls at the New Jersey Entrance and Exit Plaza of the Lincoln Tunnel including the approximately 500 feet of wall owned by Weehawken. The work under the contract will include the removal and replacement of deteriorated concrete, welded wire fabric and waterproofing membrane; the repointing of joints and steam cleaning of the surface of the granite block walls and the replacement of the sidewalks adjacent to the west wall, which must be removed in order to perform the work. The contract also provides for maintenance of traffic and work area protection and replacement and repair of existing deteriorated steel reinforcing bars to be performed on a net cost basis, at an amount roughly estimated at \$50,000.

The repair of Weehawken's portion of the wall is included in the contract because staff has determined that such repair is required to ensure the structural integrity of the entire wall and because the Mayor of Weehawken requested that the Port Authority repair Weehawken's portion of the wall since the township does not have funds to accomplish this work. The cost of this portion of the work under Contract LT-316 is estimated at \$95,000.

The contract also provides that the bidder will use every good faith effort to meet a goal of 10% participation for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

The contract was publicly advertised and bids were received on March 22, 1988. Simpson & Brown, Inc. was the low bidder and was determined to be qualified to perform the contract by the Chief Engineer.

The repairs may also affect properties owned by entities other than to Weehawken, such as the County of Hudson. Therefore, agreements between the Port Authority and the Township of Weehawken and any other jurisdiction affected by the performance of the contract are required.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to: (1) award Contract LT-316 to Simpson & Brown, Inc., the low bidder, in the estimated amount of \$288,750, to order extra work up to the amount of \$30,000 and to order net cost work; and (2) enter into agreements with the Township of Weehawken and any other jurisdiction which may be affected by the performance of Contract LT-316, the form of said agreements to be subject to the approval of General Counsel or his authorized representative.

John F. Kennedy International Airport - Purchase of New Mobile Lounges

Mobile lounges are used to transport passengers to and from aircraft located at remote gates. Demand for mobile lounge services is exceeding supply. Presently, at Kennedy International Airport there are eight new and two older mobile lounges which have been rehabilitated for continued service.

During the summer months, it is not uncommon for over 12-15 aircraft to arrive in a two-hour period at remote gates on the International Arrivals Building (IAB) ramp. Each wide-bodied aircraft movement requires a minimum of two mobile lounges. Accordingly, to quantify present and future requirements, staff reviewed demand for such services vis-a-vis capacity and based on this analysis of delays in 1987 and projections of passenger flows for the summer of 1988, staff recommends that the fleet be increased by three devices with an option for a fourth at Kennedy International Airport based on experience to be gained during the summer of 1988. (Further, future replacement of passenger loading bridges will temporarily reduce gate capacity at the IAB, placing additional demand on mobile lounge service.) In addition, Newark International Airport may require two mobile lounges to service flights at the International Arrival Facility.

Authorization is therefore requested to purchase three new mobile lounges, with options for three additional lounges which could be exercised several months after placement of order.

The Port Authority previously purchased eight mobile lounges from Airside Systems, Inc. based on its bid submitted on June 28, 1984. Of the two European firms which previously bid on mobile lounges in 1985, Trepel Airport Equipment of West Germany specifically cited unfavorable exchange rates which would not make them competitive. However, Sovam S.A. of France has indicated possible interest. Staff is not aware of any other mobile lounge manufacturer. Therefore, staff will negotiate this procurement with Airside Systems, Inc. and Sovam S.A. Delivery is presently expected between February and June of 1989, in time for the summer of 1989 travel peak.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into a negotiated agreement with either Airside Systems, Inc. or Sovam S.A. to purchase three new mobile lounges, with the Port Authority to have options to order up to three additional lounges.

**Kennedy International Airport - International Arrivals
Building Interim Improvement Program - Increase in
Project under Contract JFK-110.060A and Supplemental Agreements
Nos. 1, 2 and 3**

The Board at its meeting on January 9, 1986 authorized a proposal for an interline baggage conveyor system at the International Arrivals Building (IAB) at John F. Kennedy International Airport, and on April 10, 1986 authorized amendment of the project to include other elements of a program of interim improvement to the IAB at a total expenditure not to exceed \$24 million and authorized award of Contract JFK-110.060A for installation of the conveyor system and Supplemental Agreement No. 1 for the rehabilitation and reconfiguration of the West Immigration and Naturalization areas to W. J. Barney Corporation in amounts not to exceed \$3 million and \$3.4 million respectively.

Subsequently, on August 14, 1986 the Board authorized Supplemental Agreement No. 2 at a cost not to exceed \$275,000 for the construction of retail space to accommodate Bloomingdale's, Inc. at the IAB, and on March 12, 1987 the Board authorized Supplemental Agreement No. 3 at a cost not to exceed \$8 million for the rehabilitation and reconfiguration of the East Immigration and Naturalization area, the rehabilitation of the IAB lobby area, third floor corridor improvements and other associated alterations to facilities at the IAB.

Contract JFK-110.060A and Supplemental Agreements Nos. 1, 2 and 3 were prepared as part of a program to implement a series of improvements to the IAB to facilitate operations and provide a higher level of service to patrons. This program was planned as an interim step prior to the major improvements which will result from the Redevelopment Program. The primary focus of the work was to completely upgrade, expand and reconfigure the East and West Immigration and Naturalization areas, install a baggage conveyor system for transporting interline baggage from the Customs Hall to a transfer area and construct interline counters at the center of the Customs area. Additionally, numerous other improvements were identified in the project including installing a replacement lobby escalator enabling greater freedom of flow for exiting passengers from the Customs Area.

Additional monies are now required because of an increase in the general scope of work under Contract JFK-110.060A and Supplemental Agreements Nos. 1, 2 and 3. The increase in scope is due to the inclusion of additional work beyond what was originally envisioned and unforeseen field conditions relating to demolition, asbestos conditions and the need to perform major upgrades. The major upgrades included construction of a second deck in the West Immigration and Naturalization Hall to house expanded mechanical equipment and to create new retail space. In addition, operational improvements have been realized including modifications required by the installation and operation of the Smarte Carte Program at the facility. Work was also performed to create retail space in the East Wing Building Common Lounge Area for a Bloomingdale's boutique and for the relocation of certain utilities to service the Host International Cart Service relocation and expansion. Also of significance, new facilities were constructed for the U.S. Department of Agriculture (USDA) relieving cramped office and locker space restrictions, thus providing for increased operational capacity by the USDA serving the IAB. A new meeting room will be constructed in the IAB which will be made available for use by the airport congregations during the Redevelopment Program, necessitating relocation of the Press Room.

Under Contract JFK-110.060A and Supplemental Agreements Nos. 1, 2 and 3, compensation is currently computed at the net cost of the work, plus 3.75%, plus an additional 20% if the work is performed by a subcontractor. The contract provides that the contractor use every good faith effort to meet a goal of Minority Business Enterprise participation of 20% for firms owned and controlled by minorities and 2% for firms owned and controlled by women.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize: (1) an increase in the estimated total Project Authorization for the Kennedy International Airport IAB Interim Improvement Program from \$24 million to an estimated total amount of \$28.7 million and (2) an increase in compensation under Contract JFK-110.060A, Interline Baggage Conveyor System, Building Alterations and Supplemental Agreement Nos. 1, 2 and 3 in the aggregate from \$14.7 million to \$17.6 million, an increase of \$2.9 million.

**All Airports - Aircraft Noise Abatement Project at Five
Selected Schools - 1988 Program**

The Board at its meeting on September 10, 1987 authorized the 1987 soundproofing program estimated at \$3.9 million in part utilizing funds from the anticipated underruns in grants for school soundproofing projects authorized in previous years. That brought the total authorized program to 21 schools; twelve in New York State and nine in the State of New Jersey. The total project cost, including the amount requested in this authorization is \$23.1 million of which \$17.2 million is the Federal share and \$5.9 million is the Port Authority share. The soundproofing work is completed at nine schools and the results indicate a significant reduction in aircraft noise intrusion levels creating a better teaching environment in classrooms. The program continues to be received very favorably by local elected and school officials.

The reauthorized airport Federal aid program entitled the "Airport and Airways Safety and Capacity Expansion Act of 1987" enables the Port Authority to continue to apply for Federal funds for school soundproofing. In order to continue the benefit of the project the preparation of a 1988 School Soundproofing Program was initiated. In a collaborative effort with school and elected officials the following schools were selected for the 1988 Program:

St. Adalbert, Elizabeth, New Jersey
Our Lady of Sorrows, Kearny, New Jersey
Lawrence Middle School- Phase I, Lawrence, New York
P.S. 161, Bronx, New York
St. Rose of Lima, Rockaway, Queens, New York

The 1988 project cost of \$5 million is based on very preliminary estimates. Definitive estimates will be provided by consultants to be retained by the respective Boards of Education (and by the Port Authority in the case of the New York City public school) after the preliminary design is completed. If it is determined that the work at any school entails extensive asbestos removal work, the Port Authority will substitute for such school another noise impacted school, and the Board will be informed. In prior years the work performed included replacement of existing windows with acoustically designed window units and panels, providing mechanical ventilation, as required, and other related work.

Federal funds are available at an 80% funding rate for soundproofing of schools. The Port Authority will pay the 20% sponsor share with no cost to be paid by the schools. Accordingly, applications will be made for funding the above work, and grants must be received before the end of the current Federal fiscal year, which expires September 30, 1988. The soundproofing project work will be sponsored by the Port Authority subject to the availability of Federal funds. The Port Authority's investment will be recovered under the flight fee formula.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into agreements with the governing bodies of five selected schools in proximity to Port Authority - operated airports to permit joint Port Authority and Federal Aviation Administration funding in the total estimated amount of \$5 million comprised of \$4 million Federal aid and \$1 million Port Authority funds for projects to reduce the impact of aircraft noise levels within these schools. the form of the agreements to be subject to the approval of General Counsel or his authorized representative.

**All Airports - Consolidated Ground Transportation Counter
Program - Extension of Existing Contract**

It is recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement with the Council for Airport Opportunity extending the current contract for the staffing of the Consolidated Ground Transportation Counter Program at Kennedy International, Newark International and LaGuardia Airports. The agreement would be on a monthly basis, for a period of up to six months, at an estimated cost of approximately \$375,000 per month. The current contract expires on May 28, 1988, and this extension is being sought to provide for the continued operation of the Consolidated Ground Transportation Counter Program until a new contractor is selected.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into an agreement extending the contract with the Council for Airport Opportunity, substantially on the terms set forth above; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 5/12/88)

**Newark International Airport - Retention of Program
Management Support Services for the Newark Redevelopment
Program**

Over the past year an interdepartmental group established by the Director of Aviation has made recommendations concerning the type of organization best suited to successfully undertake the Newark Redevelopment Program. It was assumed that large amounts of the work would be performed by outside services firms. The group recommended that the Port Authority maintain control and direction of the work through a nucleus of Port Authority staff. Currently this nucleus organizational framework is in place. It consists of a Program Director and four Managers (Planning, Design, Construction, and Administration) who provide direction and management oversight to the total Newark Redevelopment Program effort. At this time it is envisioned that the nucleus team, with the assistance of several senior level Port Authority staff members and advice from other departments, will provide the necessary overall direction and board management coordination required. The Engineering Department is expected to provide primary support for all architectural and engineering services. Under the direction of the nucleus team, the routine general coordination and management of the major functional areas will be performed by the professional firm for which this authorization is sought and other such firms as appropriate. In addition, it is also anticipated that professional services in connection with construction supervision will also be provided by an outside service firm to be selected later this year.

The firm providing the program management support services will assure the timely completion of all aspects of the Newark Redevelopment Program. This will include identification and analysis of alternatives and formulation of recommendations. Such firm will coordinate the planning, design, procurement and construction management of each of the required tasks. In concert with Port Authority staff, such firm will develop a program master plan which defines all time, cost and resource relationships and a cost control compatible with the Port Authority system. A Critical Path Method (CPM) program schedule will be developed by the firm which will identify significant milestones, resources required and cost parameters. The agreement with such firm will provide for compensation based on actual salaries paid (time card), plus a multiplier and plus out-of-pocket expenses, presently estimated at \$23 million. In addition, an overall total goal of at least 15% Minority Business Enterprise/Women Business Enterprise participation of which at least 10% must be Minority Business Enterprise's on a good faith basis, will be provided in such agreement.

A notice of a Request For Proposals for firms interested in providing program management support services for the Newark Redevelopment Program was placed in regional newspapers. On February 18, 1988, a presubmission briefing was held and on March 11, 1988, ten proposals were received. Based on an evaluation of proposals received, staff recommends that an agreement be entered into with Schal Associates, Inc. and Louis Berger International Inc., a joint venture, to provide such program management support services.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be authorized to enter into an agreement with Schal Associates, Inc. and Louis Berger International, Inc., a joint venture, to provide professional services in connection with program management support services for the Newark Redevelopment Program and that such agreement be subject to approval as to form by General Counsel or his authorized representative.

**Teterboro Airport - Pan American World Airways, Inc. -
Agreements with PHH Aviation, Inc. and PHH Executive Air
Fleet Corporation**

It is recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement or agreements with Pan American World Airways, Inc., PHH Aviation, Inc. (PHH) and PHH Executive Air Fleet Corporation (EAF), respectively, under which the Port Authority would consent to new or extensions of existing subuse and occupancy and associated agreements between Pan American and PHH and EAF, respectively, for various periods of up to approximately 25 years and covering the use and occupancy of space, the construction of new hangars and aircraft parking and aircraft fueling and ramp management privileges under the Operating Agreement with Pan American at Teterboro Airport currently due to expire on December 31, 1999, said agreements between Pan American and PHH and EAF and the Port Authority's obligation to continue the same being variously conditioned upon the resolution of certain environmental issues by Pan American and EAF and the performance of certain construction work by PHH and EAF. The Port Authority would receive from Pan American a fee of 22-1/2% of all monies received under certain of said agreements and, with respect to the remaining agreements, Pan American would continue to pay the amount due under the Operating Agreement. The Port Authority would agree, in the event the Operating Agreement with Pan American should be terminated or expire, to enter into, or cause any successor Airport Operator to enter into, agreements with PHH and EAF on substantially the same terms and conditions as the said agreements for the balance of the period(s) covered by the said agreements, the Port Authority reserving the right to terminate the agreements with PHH and EAF at any time after the termination or expiration of the Operating Agreement with Pan American, on condition that Teterboro Airport is no longer to be operated as an airport, with the Port Authority in such event being obligated to reimburse PHH for its unamortized investment in the facilities thereunder to the extent that such investment does not initially exceed \$5 million and to reimburse EAF for its unamortized investment in the facilities thereunder to the extent that such investment does not initially exceed \$22 million.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into an agreement or agreements with Pan American World Airways, Inc. and PHH Aviation, Inc. and PHH Executive Air Fleet Corporation, respectively, substantially on the terms set forth above, the form of the agreement or agreements to be subject to the approval of General Counsel or his designated representative.

**Newark International Airport - Airline Lease Amendment -
ANA-170 - Continental Airlines, Inc. - Terminal C**

It was recalled to the Board that Terminal C Lease ANA-170 (the "Lease") was assigned from People Express Airlines, Inc. to Continental Airlines, Inc. with the consent of the Port Authority pursuant to an Assignment with Assumption and Consent Agreement effective as of August 15, 1987. Continental is constructing the finishes and other improvements of all of Terminal C except the C-3 International Area. The Port Authority is providing the cost of the finishes and improvements and certain other items up to a maximum of \$225 million. It was reported to the Board that Continental's planned operational date for Terminal C is mid May 1988. However, some construction work will remain to be completed, particularly as it relates to concession space to be subleased to Concession Air Corporation, the proposed overall concessions operator with whom Continental is now negotiating. Under the Lease, payment of rental commenced effective April 1, 1988. Continental has requested that the rental be changed and tentative agreement has been reached as set forth below. The term of the Lease will expire 25 years after rental starts (March 31, 2013). Continental has the right to terminate the Lease effective the 101st month after rental starts or effective the 201st month after the rental starts. If Continental terminates the Lease effective at either date, it is obligated to pay the Port Authority the sum of \$10 million in installments over an eighteen-month period. The term of the Lease is subject to financial triggering events.

Under the existing terms of the Lease, rent is scheduled to start as of April 1, 1988. The rental under the Lease consists of two components: (a) a constant factor representing basic gate and shell rental, and repayment to the Port Authority of its construction advances, and; (b) a variable factor (the Airport Services Factor) based upon the Airport Services formula under the Master Leases at Newark International Airport. The proposed supplement to the Lease would alter only the repayment schedule of the construction advances during the first 100 months of the rental payments. The constant factor of the rental payments by Continental would be reduced for the period April 1, 1988 to September 30, 1988 from the current amount of \$10,360,000 to the amount of \$1,597,002 and would be increased for the period October 1, 1988 to March 31, 1989 from the current amount of \$10,360,000 to the amount of \$16,297,002 and increased for the remaining months of the first 100 months from the current amount of \$225,397,333 to the amount of \$239,022,696 resulting in Continental's payment of additional rental of approximately \$11.0 million in exchange for this new payment schedule. The existing provisions of the Lease covering the increases in the rental effective on the 101st month and on the 201st month after rental starts and the existing provisions covering the adjustments to the constant factor will remain. The variable factor will remain subject to annual adjustment based upon the Airport Services Formula under the Master Leases at the Airport.

Under the Lease the Port Authority, as part of the construction work, has made payments to the Lessee through construction advances for 42 passenger loading bridges and for the baggage handling system. The bridges have been delivered to the Terminal C site and title has passed to the Port Authority. Due to a change in the operating plan for Terminal C, including greater utilization of wide-bodied aircraft, Continental has proposed the following since the initial planning by People Express Airlines:

(a) removal of three loading bridges and a portion of a fourth loading bridge and associated systems from the premises:

(b) the installation of a new and special type of loading bridge for a wide-bodied gate position at an estimated cost of \$350,000:

(c) special modifications to the baggage handling system not provided for in the People Express Airlines' design including removal of portions thereof;

(d) several other minor modifications to the original contemplated construction work; and

(e) the extension of the date for completion of construction by Continental to September 30, 1988.

The Supplement will contain provisions to accommodate these requested changes and will provide for full reimbursement to the Port Authority for construction advances originally provided by the Port Authority for the said construction items. Continental will pay for the cost of removing the loading bridges and associated systems. The new loading bridge purchase will be part of the construction work with Port Authority payment therefor as part of the construction advances subject to the original \$225 million authorization.

Continental has reached agreement in principle with Concession Air Corporation, the overall concessions operator, on the terms and conditions of a concessions lease for consumer services within Terminal C covering the operation of all proposed food, beverage, newsstand, general merchandise, duty free and employee cafeteria concessions, subject to the approval and consent of the Port Authority. The Port Authority's consent may be in the form of one or more permits. Under this proposed agreement there would be interim mobile carts for consumer services until the completion of all construction work. Their proposed agreement is for a fifteen year term, but the Port Authority will have the right, with Continental, during the term of Continental's Lease, to terminate Concession Air on 30 days' notice without cause. The requirement for Port Authority consent also extends to terms and conditions in subleases between Concession Air and individual concession operators under this agreement. Concession Air will be obligated to meet extensive requirements for participation by Minority Business Enterprises (MBE) and Women-owned Business Enterprises (WBE) firms in the provision of consumer services in Terminal C. In addition, in the event of termination of Continental's Lease whether with or without cause, the lease of the concession company would not automatically terminate, and Concession Air would have continued rights with respect to the operation of concessions in the Terminal for the balance of its fifteen year lease term unless its unamortized capital investment were bought out.

It was therefore recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to:

(a) enter into a Supplement to the Terminal C Lease with Continental Airlines, Inc. amending the rental provisions thereof and providing for modifications to the construction work and for various other revisions thereto substantially on the terms set forth above; and

(b) enter into agreements with Continental Airlines, Inc. and Concession Air Corporation covering the Port Authority's consent to the concessions arrangement between Continental and Concession Air for the operation of all proposed food, beverage, newsstand, general merchandise, duty free and employee cafeteria concessions in the Terminal C premises substantially on the terms set forth above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, for and on behalf of the Port Authority, be and he hereby is authorized to enter into agreements with Continental Airlines, Inc. amending and supplementing its existing Terminal C Lease ANA-170 to provide for various revisions thereto substantially on the terms set forth above, and to enter into agreements with Continental Airlines, Inc. and with Concession Air Corporation covering the consumer services arrangements in Terminal C substantially on the terms set forth above; the form of said agreements to be subject to the approval of General Counsel or his designated representative.

**Kennedy International Airport - Northwest Airlines, Inc. &
Delta Airlines, Inc. - Terminal Transfer and Relocation
of Space for Passenger Operations**

It is recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to expend an estimated amount not to exceed \$14 million for: (1) the cost of preparing portions of the United Air Lines, Inc. Unit Terminal at Kennedy International Airport for the use of Northwest Airlines, Inc. as its airport passenger terminal facility and Northwest's cost of moving from its present Unit Terminal to the United Unit Terminal and (2) the cost of preparing the space and moving Delta Air Lines, Inc. from its present location on the easterly side of the Northwest Terminal to the westerly side thereof; to the extent not otherwise recovered by the Port Authority the amount of such expenditure would be recovered from Pan American World Airways, Inc. as a condition to its occupancy and use of portions of the Northwest Terminal for expansion of its passenger terminal facilities at the airport. The foregoing expenditure may be set forth in such agreements with the above parties as the Executive Director shall determine are necessary or appropriate.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to expend up to the amount of \$14 million, substantially on the terms set forth above: the form of any agreements to be entered into in connection therewith to be subject to the approval of General Counsel or his designated representative.

Whereupon, the meeting was adjourned.

MINUTES of meeting of The Port Authority of New York and New Jersey held Thursday, June 9, 1988 at the Port Authority offices, One World Trade Center, City, County and State of New York.

PRESENT:

NEW JERSEY

Philip D. Kaltenbacher, Chairman
 William K. Hutchison
 Robert Van Buren
 Hazel Frank Gluck
 Richard C. Leone

NEW YORK

Robert F. Wagner, Vice-Chairman
 James G. Hellmuth
 Howard Schulman
 John G. McGoldrick

Stephen Berger, Executive Director
 Patrick J. Falvey, General Counsel/Deputy Executive Director
 Doris E. Landre, Secretary
 Anthony J. Barber, Director of Tunnels, Bridges and Terminals
 John J. Collura, Deputy Director of Management and Budget
 Henry I. DeGeneste, Director of Public Safety
 Sidney J. Frigand, Assistant Executive Director/Government, Community & Public Affairs
 Gene C. Gill, Director of General Services
 Francis A. Gorman, Comptroller
 John E. Hauptert, Treasurer
 Charles L. Hirsch, Executive Assistant to the Executive Director
 Leon Katz, Supervising Information Officer, Public Affairs
 Richard R. Kelly, Director of Rail Transportation
 Phil LaRocco, Director of World Trade and Economic Development
 Donald R. Lee, Director of Audit
 Lillian C. Liburdi, Director of Management and Budget
 Emily Lloyd, Director, Office of Business Planning and Development
 Katharine B. MacKay, Assistant Executive Director/Administration
 Mark Marchese, Assistant Director, Information Services, Government, Community & Public Affairs
 Rino M. Monti, Director of Engineering/Chief Engineer
 Edward J. O'Malley, Director of Personnel
 James J. O'Malley, Director of Management Information Services
 Hugh O'Neill, Assistant Executive Director/Policy Planning and Business Development
 Richard T. Roberts, Acting Director, Office of Transportation Planning
 Sally Sakin, Administrative Assistant
 Morris Sloane, Director of Aviation Operations
 Robert N. Steiner, Deputy Port Director
 Barry Weintrob, Chief Financial Officer

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of May 12, 1988. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey has expired.

Whereupon, the Board unanimously approved these Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on June 9, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on June 9, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on June 9, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on June 9, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Bathgate Industrial Park - Lease Amendment with Avne Systems, Ltd.

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement amending the Port Authority's lease with Avne Systems, Ltd. (Avne) covering the letting of an approximately 68,100 square foot building on Block 2913 at the Bathgate Industrial Park. Pursuant to the proposed amendment the Port Authority would provide Avne with up to an additional \$350,000 for the construction and finishing of an approximately 12,000 square foot mezzanine in the building for which Avne will pay a supplemental rental as provided in the agreement based on the Revenue Bond Index plus 300 basis points.

On September 10, 1987, the Board authorized the letting of the building to Avne, a contract packager of foods and other consumer products. The lease was executed in November 1987, and provides for the Port Authority to provide Avne with up to \$1,498,200 for finishing work. Due to an unanticipated rate of growth Avne now requires additional space. The proposed amendment would provide for the construction and finishing of such space which would also increase the value of the building.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized, for and on behalf of the Port Authority, to enter into an agreement with Avne Systems, Ltd. amending the Port Authority's lease with Avne Systems, Ltd. substantially in accordance with the terms and conditions set forth above; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 6/9/88)

**Hoboken Waterfront Development - Settlement of Insurance/
Leasehold Dispute**

It was reported that there is presently pending in the Superior Court of New Jersey, Hudson County an action instituted by the City of Hoboken and a group of private citizens seeking a judgment terminating the 1952 lease for the Port Authority Hoboken Marine Terminal and ordering the return to the City of the proceeds of fire insurance paid for the destruction by fire of Pier B at that facility. After lengthy litigation regarding the issues presented in the case and negotiations directed by the Court with a view toward resolving the differences among the parties, a tentative settlement has been reached which would provide for among other things: the termination of the September 24, 1952 lease of the facility, the payment of the balance of insurance proceeds to the City after a deduction therefrom of funds owed to the Port Authority and monies needed for the removal of Pier B and a joint submission of certain remaining disputes to the Center of Dispute Resolution.

Whereupon the following resolution was adopted, Commissioner Schulman abstaining:

RESOLVED, that the Executive Director and General Counsel be and they are hereby authorized to settle a suit presently pending in the Superior Court of New Jersey entitled **Kenneth R. Lenz, et al. and the City of Hoboken vs. The Port Authority of New York and New Jersey**, Docket No. L-62230-87E, and to execute any documents necessary to effectuate the settlement.

(Board - 6/9/88)

Port Newark - Aarhus Olie (USA), Inc. - Vegetable Oil Treatment Facility

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease with Aarhus Olie (USA), Inc., for a term of approximately 25 years commencing on or about July 1, 1988, covering approximately 3.5 acres of open area at Port Newark for the construction and operation of a vegetable oil treatment facility, including a building containing approximately 26,000 square feet. The lease provides for payment of a land rental, commencing September 1, 1988, at the annual rate of \$90,288, which will increase annually through the tenth year of the term. The lease further provides for payment of a rental for the building at the rate of \$1.00 per square foot, commencing July 1, 1989, subject to annual escalation through the tenth year of the term. The rental payable for the land and building for the balance of the term will be based upon the fair rental value of the land and building.

The tenant is expected to invest at least \$8 million to construct a vegetable oil treatment facility which will refine oil imported by ship for distribution throughout the United States. Initially, the tenant will utilize the services of an adjacent tenant for the receipt and storage of the oil. The Port Authority has granted the tenant a right, during the first three years of the term of the letting, to construct a pipeline from its premises to Berth 8, a public berth, to permit the transfer of bulk vegetable oil directly from ships to the proposed treatment facility. In addition to the rentals provided for in the lease, the tenant will pay a fee at the rate of \$15,000 per year for the right to construct this pipeline commencing July 1, 1989. If the pipeline is constructed, the fee will no longer be payable and wharfage charges will be assessed against vessels occupying the berth. If the tenant has not constructed the pipeline by July 30, 1991, the Port Authority may, but is under no obligation, to extend the period during which the tenant may perform such construction. The tenant will have the right to terminate the letting at the end of the sixth and tenth years of the term with prior notice to the Port Authority. If the tenant exercises this right at the end of the sixth year of the term, it will be obligated to pay to the Port Authority the sum of \$150,000. If this right is exercised at the end of the tenth year of the term, the tenant will be obligated to pay the sum of \$100,000.

It is anticipated that the operation of this facility will generate approximately twenty permanent jobs and an additional 25,000 tons of imported vegetable oil moving through the Port of New York and New Jersey.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he is hereby authorized, for and on behalf of the Port Authority, to enter into a lease with Aarhus Olie (USA), Inc., substantially in accordance with the terms and conditions outlined above, the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 6/9/88)

**Enlargement of Foreign-Trade Zone No. 49 through the
Establishment of a Subzone to include the E.R. Squibb &
Sons, Inc. Facility in New Brunswick, New Jersey**

The Port Authority, as grantee of Foreign-Trade Zone No. 49, has been requested by E.R. Squibb & Sons, Inc., to submit an application to the Foreign-Trade Zones Board of the United States Department of Commerce for the establishment of a subzone to include its facility in New Brunswick, New Jersey. E.R. Squibb & Sons, Inc., is a leading world-wide manufacturer and developer of pharmaceutical and health-care products. Subzone status for the New Brunswick facility would enable Squibb to reduce, defer and, in some cases, even eliminate duty payments. Potential benefits to the New York/New Jersey region would include the retention of jobs and the creation of approximately 40 new jobs, expansion of exports, increased tonnage to the Port of New York and New Jersey, and increased use of domestic materials. It is anticipated that the establishment of this subzone would not result in any cost, expense, or risk of loss to the Port Authority. Upon securing subzone status, E.R. Squibb & Sons, Inc. has agreed to enter into an appropriate agreement with the Port Authority which will provide for payment to the Port Authority of an annual fee.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized, for and on behalf of the Port Authority, to file an application with the Foreign-Trade Zones Board of the United States Department of Commerce for the establishment of a subzone at the E.R. Squibb & Sons, Inc. facility in New Brunswick, New Jersey, and to execute an appropriate agreement with E.R. Squibb & Sons, Inc., the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 6/9/88)

**John F. Kennedy International Airport Redevelopment Program
Miscellaneous Early Action Items - Project Authorization**

In preparation for the start of construction of the major elements of the JFK Redevelopment Program certain miscellaneous early action items, designed to clear the Central Terminal Area of operations and/or services, will be required.

The miscellaneous early action items include the following:

a. MISCELLANEOUS CTA RELOCATIONS

Construction of an upgraded/expanded electrical substation, central heating and refrigeration plant, and cooling towers, as well as the final JFK Redevelopment roadway program will require that the site now occupied by the on-airport bus operations (airline connections bus, employee parking bus and long-term parking bus) be relocated. These services are now being provided by the Hudson General Corporation and are vital to the airport operations. In addition, construction of a new roadway system will require the removal of an on-airport gas station and tow truck and related parking facility. The towing operation must be relocated and the current lease with the gas station operator will be terminated.

b. JFK REDEVELOPMENT PROGRAM OFFICE SPACE

Construction of consolidated office space to achieve optimum efficiency in the management and control of consultant staffs, of which there are five major ones, by Port Authority staff. Approximately 40,000 square feet of office space will be required to provide working space for about 250 professional design and engineering staff.

c. GENERAL CONSTRUCTION SERVICES

The furnishing of several generic work items which are customary in preparing for construction such as: provision of guard services and temporary security, labor for utility and land surveys, maintenance and protection of traffic, general site clean-up, transportation service, environmental mitigation, construction photo services, temporary communications, emergency utility repair, and provision of specialty trades. Such work would only be performed on an as-needed basis, as determined by Port Authority staff, and would primarily be in the form of labor services not included in the Program Professional and Advisory Services contracts.

Certain contracts relating to the miscellaneous early action items will be bid as minority set asides. All other contracts will require good faith efforts to meet goals of 15% Port Authority certified MBE/WBE participation of which at least 10% must be MBEs.

(Board - 6/9/88)

Whereupon the following resolution was unanimously adopted.

RESOLVED, that the Board authorizes: (1) a project covering miscellaneous early action items critical to an on-schedule start of construction for the JFK Redevelopment Program at a cost presently estimated at \$10.5 million including administrative, engineering, and financing expense and a project contingency; (2) the Executive Director to: (a) take such actions with respect to the award of purchase or construction contracts for the miscellaneous early action item as he deems in the best interest of the Port Authority including, without limitation, award to the lowest bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable, rejection of all bids, solicitation of new bids on revised or the same requirements, or negotiation with one or more bidders or other contractors; and (b) execute contracts and supplemental agreements with such bidders or contractors as he deems in the best interest of the Port Authority and to order extra work and net cost work in connection with each contract, including supplemental agreements thereto; and (c) negotiate and enter into agreements relating to the installation and relocation of public and private utilities; and it is further

RESOLVED, that the form of said agreements be subject to the approval of General Counsel or his authorized representative.

Whereupon, the meeting was adjourned.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on July 14, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 7/14/88)

Settlement of Claim of Angel Denis and Teresa Denis V. The Port Authority of New York and New Jersey

There is presently pending in the Superior Court of New Jersey, Law Division, Hudson County, an action instituted by Angel Denis and his wife, Teresa Denis, against The Port Authority of New York and New Jersey to recover money damages for personal injuries sustained by Mr. Denis on January 16, 1986.

Plaintiff Angel Denis was the driver of a taxicab on January 16, 1986 at approximately 10:00 p.m. when he was involved in an intersection collision with a Port Authority vehicle in the City of Hoboken operated by a then Port Authority employee. The employee had removed the Port Authority vehicle from the World Trade Center parking lot on January 8, 1986 without authorization. He used an Electronic Parking Permit which had been reported lost with the request that it be taken out of service. The card was used approximately seventeen times to gain access to automobiles in the three months between the time it was reported missing and the accident.

The liability issues in this action were tried before a Superior Court Judge and a jury. The jury found that the Port Authority was negligent for failing to prevent the unauthorized use of its automobile. The jury further found that the former employee had operated the Port Authority vehicle negligently.

The Port Authority vehicle struck the driver's side door of the taxicab being driven by plaintiff Angel Denis. It took approximately 35 minutes for the rescue crew to remove Mr. Denis from the automobile. He was admitted to St. Mary's Hospital in Hoboken for treatment of hip and pelvic fractures and a separation of his shoulder joint, among other injuries.

The plaintiff's injuries were confirmed by physicians selected by the Port Authority. Recent x-rays demonstrated calcification and arthritic changes in the left shoulder and left hip causally related to this accident. The doctors also confirmed a restricted range of motion of the shoulder and hip and rendered a prognosis that the plaintiff's condition remains guarded.

The plaintiff, who has been declared totally disabled by the Social Security Administration, walks with a limp, often uses a cane, and does not engage in activities inconsistent with his claimed injuries.

Plaintiff claimed a loss of \$35,000 per year for a total future wages of \$515,000.

As a result of several settlement conferences before a Superior Court Judge, the plaintiff has tentatively agreed to settle this claim for the sum of \$275,000.

In light of the jury verdict imposing liability on the Port Authority, the nature, severity, and permanence of the plaintiff's injuries, his loss of present and future wages, his significant pain and suffering and the likelihood that a jury verdict would be in excess of the settlement amount, General Counsel requested authorization to settle this action as outlined above.

(Board - 7/14/88)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that General Counsel be and he is hereby authorized to settle the pending claim against the Port Authority entitled **Angel Denis and Teresa Denis v. The Port Authority of New York and New Jersey** by paying to the plaintiffs and their attorneys the sum of \$275,000 in full satisfaction of all claims.

(Board - 7/14/88)

Port Authority Interest Rate Exchange Contracts

Authorization is sought for the Port Authority to enter into interest rate exchange contracts, as more fully described below, and for the use of operating funds of the Port Authority for any payments required to be made under such contracts, and for any fees, commissions or execution costs pertaining thereto.

Essentially, under each contract the Port Authority would agree to make periodic "interest" payments, at either a variable rate based on a predetermined variable rate index or at a fixed rate of interest, to the investment firm or banking institution counterparty based on a fixed dollar principal amount for an agreed term of up to ten years. Such counterparty would agree to make periodic "interest" payments to the Port Authority on such principal amount, for such term at either a fixed rate of interest (if the Port Authority is paying a variable rate) or a variable rate based on a predetermined variable rate index (if the Port Authority is paying a fixed rate). The net amount either due from or owing to the Port Authority on the "interest" payment date under each such contract would be the only payment actually made or received and in no event would any principal payments ever be made or be received.

In order to obtain the most favorable terms available, a competitive selection process would be conducted for each exchange contract among qualified potential counterparties. Since these arrangements require a quick response, interest rate exchange proposals would be requested over the telephone in order to obtain the rates and other terms, including fees for underwriting and legal and out-of-pocket expenses, which best meet the Port Authority's criteria. Stringent credit criteria relating to such matters as the counterparty's asset size and bond rating would be established by the Port Authority in order to lessen the risk of counterparty default.

Any interest rate exchange contracts entered into or closed out in the previous month will be reported on monthly to the Board.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, Deputy Executive Director, Assistant Executive Director, Chief Financial Officer, Treasurer or Assistant Treasurer of the Port Authority, or any one of them, is hereby authorized to enter into interest rate exchange contracts from time to time with counterparties who are investment firms or banking institutions providing for the Port Authority and the counterparty to agree to make periodic interest payments to the other based on predetermined fixed or variable rate indices; provided, that the aggregate principal amount on which such outstanding interest rate exchange contracts are based shall not exceed \$200 million at any one time; and provided further, that the term of any such contract shall not exceed ten years from its date; and it is further

(Board - 7/14/88)

RESOLVED, that operating funds of the Port Authority may be used for any payments required to be made under any such interest rate exchange contracts, and for any fees, commissions or execution costs pertaining thereto; and it is further

RESOLVED, that the form of all interest rate exchange contracts shall be subject to the approval of General Counsel or his authorized representative.

(Board - 7/14/88)

Port Newark - Ecuadorian Line, Inc. - Lease of Building No. 138 & Surrender of Building No. 140

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into agreements with Ecuadorian Line, Inc., to extend its lease for a five-year period from March 1, 1991 to February 29, 1996, to relocate its operations from Building 140 to Building 138 at Port Newark, and to undertake the rehabilitation of Building 138, and with Jaguar Cars Inc. to provide for the surrender of a portion of Jaguar's leasehold required for Ecuadorian Line's use. The basic rental under the Ecuadorian lease will continue at the present annual rate of \$327,594 per year until March 1, 1989, at which time the annual rate will become \$337,329 per year, subject to annual escalation. The tenant will also pay a charge of \$0.03 for each box of fruit loaded onto or discharged from vessels berthing at the premises with an exemption for one berthing per week for a vessel owned or operated by the tenant.

The proposed relocation of the tenant from Building 140 to Building 138, which is currently vacant, will enable the tenant to modernize its banana handling operations at Port Newark. The new premises under the lease will not vary significantly in area from the premises presently leased under the lease. The relocation will require that open area now under lease to Jaguar be surrendered by Jaguar and be added to the tenant's leasehold, with Jaguar to let alternative open area. The cost to the Port Authority of relocating a portion of Jaguar's leasehold is estimated at \$115,000. General improvement work to Building 138 will be performed by the tenant for the account of the Port Authority at an estimated cost of \$905,000. This work will include improvements to the truck platform area and the sprinkler system and repair of the cargo doors. In addition, the Port Authority will pay for special tenant improvement work to be performed by the tenant to the interior of Building 138 in an amount not to exceed \$285,000. The special tenant improvement work will include the development of approximately 5,000 square feet of office space. The tenant will pay additional rental based on the cost of special tenant improvement work in an amount sufficient for the Port Authority to recover this investment.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he is hereby authorized, for and on behalf of the Port Authority, to enter into agreements with Ecuadorian Line, Inc. and with Jaguar Cars Inc., substantially in accordance with the terms and conditions outlined above, the form of the agreement in each instance to be subject to the approval of General Counsel or his designated representative.

(Board - 7/14/88)

Newark International Airport - United States Postal Service -
Supplement to Lease No. AN-898 for Expansion of Postal
Service Facility

It is recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement with the United States Postal Service ("USPS") amending Lease No. AN-898 to provide for the letting to the USPS of approximately three additional acres of land adjacent to the existing Postal Service Facility at Newark International Airport for construction thereon by the USPS of a one-story extension of approximately 50,000 square feet to the existing facility to provide additional mail handling areas and to accommodate a retail postal outlet. A new parking lot would be constructed by the USPS on the south side of the additional acreage. The term of the letting and the payment of rentals for the additional acreage would commence when the USPS first enters the site to start construction or on or about December 1, 1988, whichever first occurs. The USPS would pay to the Port Authority an annual fixed ground rental (the Constant Factor) on the additional acreage commencing at \$7,500 per acre and increasing in steps to \$19,500 per acre. In addition, the USPS would pay to the Port Authority a variable annual rental (the Airport Services Factor which consists of certain costs at the Airport) for the entire premises, subject to annual adjustment in accordance with the established Airline Master Lease formula which is already a part of Lease No. AN-898.

The term of the lease for the entire premises would be extended an additional six years from November 1, 2007 to October 31, 2013. On November 1, 2007 the USPS would commence payment of rentals on the existing building in the annual amount of approximately \$805,420 based on a rate of \$22 per square foot per year for the period from November 1, 2007 through October 31, 2010, and in the annual amount of approximately \$878,640 based on a rate of \$24 per square foot per year for the period from November 1, 2010 to October 31, 2013. Effective November 1, 2007, the annual fixed ground rental on the existing premises would increase from \$4,500 per acre to \$16,000 per acre and would thereafter increase in accordance with the same schedule as for the additional acreage.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into an agreement with the United States Postal Service amending Lease No. AN-898 to provide for the letting of approximately three additional acres of land and the extension of the letting under the lease at Newark International Airport substantially on the terms set forth above; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 7/14/88)

Newark International Airport - Olympia Trails Bus Company,
Inc. - AN-962 - Increased Service Requirements

It was recommended that the Board authorize an increase in the contract authorization for Port Authority Agreement AN-962 with Olympia Trails Bus Company, Inc. which covers the intra-airport bus service at Newark International Airport by the amount of \$4,770,000 bringing the total authorized maximum cost under this contract to \$25,425,300 and further that the Board authorize the Director of Aviation to order an increase in the bus service hours by the contractor at an additional payment to the contractor of not more than 15% of the estimated annual contract cost.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the authorization under Port Authority Agreement AN-962 with Olympia Trails Bus Company, Inc. be increased and the Director of Aviation be authorized to order an increase in bus service hours thereunder, substantially on the terms set forth above.

(Board - 7/14/88)

**Kennedy International Airport - Northwest Terminal -
Agreements with Pan American World Airways, Inc.**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement or agreements with Pan American World Airways, Inc. at Kennedy International Airport which would provide for the reimbursement by Pan American to the Port Authority of funds expended for airline relocations to accommodate Pan American's move to the Northwest Terminal up to a maximum of \$14 million as authorized by the Board at its meeting on May 12, 1988 and, upon such reimbursement, to make payments to Pan American for terminal building improvements at the Northwest Terminal at Kennedy International Airport, including a connector between the Northwest and Pan American Unit Terminals at an amount up to the lesser of \$14 million or the amount reimbursed above. The agreements would include a lease with Pan American for a one-year period on a month-to-month basis for the Northwest Terminal at rentals based on annual rates of \$22 per square foot for interior space and \$25,000 per acre for ground area plus an additional rental based upon the aforesaid construction payments amortized over the life of the improvement but in no event beyond April 30, 1998, together with an amount to make the transaction financially self sustaining; such additional rental to be offset by adjustment for amounts received by the Port Authority, if any, for newly created space in the United Unit Terminal at Kennedy International Airport as a result of the recent new construction in that terminal. An agreement would also be entered into for the sale by the Port Authority, on a sole purchaser basis to Pan American, of two surplus mobile lounges for a total price of \$112,500.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized, for and on behalf of the Port Authority, to enter into an agreement or agreements with Pan American World Airways, Inc., all substantially on the terms set forth above; the form of such agreements to be subject to the approval of General Counsel or his designated representative.

 Donald R. Lee, Director of Audit
 Lillian C. Liburdi, Director of Port Department
 Emily C. Lloyd, Director, Office of Business Planning and Development
 Katharine B. MacKay, Assistant Executive Director/Administration
 Charles J. Maikish, Director, Office of Ferry Transportation
 Charles E. Meara, Special Assistant to the Executive Director
 Rino M. Monti, Director of Engineering/Chief Engineer
 Edward J. O'Malley, Director of Personnel
 James J. O'Malley, Director of Management Information Services
 Hugh O'Neill, Assistant Executive Director/Policy Planning and Business Development
 David Z. Plavin, Director of Aviation Redevelopment Programs
 Sally Sakin, Administrative Assistant
 Morris Sloane, Director of Aviation Operations
 Joseph L. Vanacore, Assistant Executive Director/Capital Programs
 Barry Weintrob, Chief Financial Officer
 Robert N. Williams, Deputy Director of General Services

The meeting was called to order by the Chairman.

Appointment of Secretary

The Executive Director's recommendation of the appointment of Karen S. Kellerhouse as Secretary of The Port Authority of New York and New Jersey, effective September 14, 1988, was unanimously approved.

Action on Minutes

The Acting Assistant Secretary submitted for approval Minutes of the meeting of July 14, 1988. He reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey has expired.

Whereupon, the Board unanimously approved these Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on August 25, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on August 25, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on August 25, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on August 25, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 8/25/88)

**Investment Management Agreement with Oppenheimer & Co., Inc.
and Authorization of Interest Rate Options Contracts**

Staff has been investigating ways of improving investment performance and has held discussions with several firms with respect to various investment management programs.

It was recommended that an investment management agreement be authorized with Oppenheimer & Co., Inc., under which Oppenheimer would provide advice on options strategies with respect to United States Treasury securities, as well as with respect to the acquisition and sale of United States Treasury securities on the basis that \$50 million of such securities would be managed to achieve a weighted average maturity which meets the Authority's objectives, with the longest maturity of any such security determined by the Authority. Such agreement would be a six month term, and provide for a fee of \$62,500 to Oppenheimer for such services. Oppenheimer's performance under the investment management agreement would be measured against the yield available for a United States Treasury security of the same weighted average maturity. Oppenheimer would not act as a broker or as a principal with respect to any purchases or sales of United States Treasury securities resulting from advice provided under the investment management agreement, and any such transactions would be executed by the Treasurer of the Authority, or on behalf of the Treasurer by Oppenheimer upon specific authorization of the Treasurer, with recognized and established securities dealers and commercial banks, conducted in the open market at competitive prices. All securities purchased would be held by the Authority's custodian, Citibank, N.A., and payment for all such securities would be on receipt of the securities.

It was also recommended that interest rate options contracts with primary dealers in United States Treasury securities be authorized subject to the following limits, and that the Operating Fund of the Port Authority be the sole source of any moneys to be made available for any payments to be made under such contracts in settlement thereof, to satisfy margin requirements (for which purpose margin accounts would be established in the Authority's name with such primary dealers), for the acquisition of any securities to be acquired by the Authority or to be delivered by the Authority as a result of the exercise of the options provided in such contracts, and for any fees, commissions or acquisition costs pertaining thereto. It is anticipated that if securities are required to be delivered by the Authority under such interest rate options contracts, such securities would be available in the Consolidated Bond Reserve Fund and, at the election of staff, could be transferred to the Operating Fund at their then current market price.

Interest rate options contracts would be entered into from time to time, subject to the following limitations as to amount:

1. Call options sold by the Authority would be limited to a maximum principal amount at any one time of \$50 million in underlying United States Treasury securities with respect to such call options.

(Board - 8/25/88)

2. Call options purchased by the Authority would be limited to the principal amount of underlying United States Treasury securities required to close outstanding call options sold, except as noted in item 5, below.

3. Put options sold by the Authority would not exceed available cash and short-term United States Treasury securities held by the Authority and in no event would the underlying United States Treasury securities with respect to such put options exceed \$50 million in principal amount.

4. Put options purchased would be limited to the principal amount of underlying United States Treasury securities required to close outstanding put options sold, except as noted in item 5, below.

5. In addition to the options which may be purchased within the above limits, other call and put options purchased by the Authority would be limited to a combined purchase cost therefor not in excess of the lesser of \$500,000 or the premiums received from the sale of any options.

All United States Treasury securities transactions and all interest rate options contracts entered into by the Authority would be reported separately in the monthly Investments and Deposits Report to the Committee on Finance.

Pursuant to the foregoing report the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, Deputy Executive Director, Assistant Executive Director, Chief Financial Officer, Treasurer or Assistant Treasurer of the Authority is hereby authorized to enter into an investment management agreement with Oppenheimer & Co., Inc., which agreement, among any other terms and conditions which shall be determined to be necessary or desirable in the sole discretion of any of such authorized officers, shall include terms and conditions substantially in accordance with the major provisions of the proposed investment management agreement, as recommended; and it is further

RESOLVED, that the Executive Director, Deputy Executive Director, Assistant Executive Director, Chief Financial Officer, Treasurer or Assistant Treasurer of the Authority is hereby authorized to enter into interest rate options contracts from time to time with primary dealers in United States Treasury securities within the limitations set forth in the foregoing report, which interest rate options contracts, among any other terms and conditions which shall be determined to be necessary or desirable in the sole discretion of any of such authorized officers, shall include terms and conditions substantially in accordance with the major provisions of the proposed interest rate options contracts, as recommended; and it is further

RESOLVED, that operating funds of the Authority may be used for any payments to be made (a) under any interest rate options contracts, (b) as a result of the exercise of the options provided for therein and (c) for purposes incidental to such interest rate options contracts; and it is further

RESOLVED, that the form of such investment management agreement and any such interest rate options contracts shall be subject to approval by General Counsel or his authorized representative.

(Board - 8/25/88)

**Port Authority Bus Terminal - Emergency Stairwells -
Authorization to Install Locking Devices**

The emergency stairwells at the Port Authority Bus Terminal were originally designed as sign-directed, unalarmed, unlocked areas. Because of the relative seclusion of and ease of access to these emergency stairwells, many individuals have been using them for dormitories and illegal activities. Neither the installation of a local stairwell door alarm system nor the addition of a designated police post has been effective in preventing entry into these stairwells for unlawful purposes, and it is now proposed to install special locking devices in the emergency stairwells.

The proposed emergency stairwell security system will be connected with the present computerized facility life safety system which is continually monitored by trained staff at a central location. The proposed system will also connect an electronically controlled locking system with the existing audible alarm complex creating a fail-safe system. This system meets the standard of the New York City Building Code which requires that the locks be equipped with electrical release devices for remote control in cases of emergency; however the approval of the New York City Commissioner of Buildings, which would be required if the Building Code applied to the Port Authority, will not be solicited.

An operational plan and an ongoing testing routine will be instituted to ensure that this system is fully functional at all times.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the installation of special locking devices in the Port Authority Bus Terminal emergency stairwells.

**Industrial Development Program - Metrotech - Center for
Advanced Technology in Telecommunications - Amendment to
The Industrial Development Master Plan - Authorization
of Municipal Agreement - Increase in Port Authority
Participation**

Authorization was sought to effectuate Port Authority participation in the construction of a building housing in part the Center for Advanced Technology in Telecommunications (CATT) at the Metropolitan Technology Center in Brooklyn, New York, and to increase the Port Authority's previously authorized commitment to the project from \$14 million to \$16.5 million. The CATT will constitute a port district industrial development project or facility under the bi-state legislation authorizing the effectuation of industrial development projects by the Port Authority and a municipal agreement is required as is an amendment (which is attached hereto) to the Port Authority's master plan which identifies various sites for potential industrial development.

The industrial development legislation provides that at least ten days prior to the authorization by the Port Authority of any agreement with respect to payments in-lieu-of taxes in connection with industrial development projects, the Port Authority shall notify the chief executive officer of each city in the Port District within which an industrial development project has been included in the Port Authority's master plan of the proposed authorization of such agreement, shall seek their comments and shall include with such authorization any comments received. Mayoral comments were solicited and none have been received to date.

The Metropolitan Technology Center, known as "Metrotech", is a sixteen-acre business/university redevelopment in downtown Brooklyn, New York, being undertaken by agreement among Polytechnic University (Polytechnic), Forest City Metrotech Associates, the New York City Public Development Corporation and the City of New York.

At its meeting on November 14, 1985, the Board authorized the commitment of up to \$14 million from funds made available for regional development projects in the State of New York by the Governors' Agreement of June 1983, for the construction of a building housing an approximately 100,000 square foot CATT with provision for repayment of the funds provided without interest over a 40 year period. Since that time, further project planning has taken place. The CATT is now to be located in a portion of a multi-use building also housing Polytechnic's library. The New York Governor's Office has requested that the Port Authority provide an additional \$2.5 million for construction of the CATT portion of the building from funds made available for regional development projects in the State of New York in accordance with the Governors' Agreement of June 1983. It is now anticipated that the \$16.5 million to be provided will only be sufficient to construct a CATT (including a pro-rata portion of the building's hallways, lobbies, and other common elements) which will not be larger than 83,000 square feet.

(Board - 8/25/88)

Tentative agreement has been reached with Polytechnic to create a condominium with the Port Authority owning the portion of the building housing the CATT and Polytechnic owning the portion housing the library. In order to assure the availability of monies to complete the building, it is anticipated that the Port Authority will deposit the sum of \$16.5 million, the presently estimated cost of construction of the CATT, and Polytechnic will deposit the estimated cost of construction of the library, with an escrow agent, in accordance with an agreed upon schedule, who will make appropriate disbursements from the respective funds toward the cost of construction of the CATT and library respectively. The Port Authority may advance up to \$1 million of the \$16.5 million directly to Polytechnic for preliminary architecture and design work on the CATT. Funds contributed by each of the parties in excess of the cost of their respective construction obligations will be returned to them. Polytechnic has agreed to bear the entire cost of completing the CATT portion of the building in the event the monies deposited with the escrow agent by the Port Authority are not sufficient. Upon completion of the construction, the CATT portion of the building will be leased on a net basis to Polytechnic, which will be responsible for the operation and maintenance of the CATT, with Polytechnic paying a rental to the Port Authority sufficient to repay the funds provided by the Port Authority, without interest, over a 40 year period with rental payments being heavily weighted towards the end of the 40 year lease term. The building may later be enlarged by Polytechnic without cost to the Port Authority.

Staff, pursuant to the requirements of the industrial development legislation, has negotiated a municipal agreement with the City of New York and among its key provisions are the following:

- o The City consents to the planning and construction of the CATT and agrees that the Port Authority's provision of funds for the CATT shall be subject to the terms and conditions of the "CATT arrangement" negotiated between the Port Authority and Polytechnic.

- o No payments in-lieu-of taxes or any real property taxes are to be paid by the Port Authority in connection with the CATT. Provision is made for payments to the City in lieu of taxes by occupants of the CATT in the event the CATT is used by the occupant for a purpose which would have rendered the CATT subject to real property taxes but for the Port Authority's interest in the CATT.

- o The City, at any time, shall have the right to purchase the Port Authority's interest in the property for an amount equal to the Port Authority's investment in the CATT less any amounts paid by Polytechnic under the CATT arrangement which reduce the outstanding amount owed by Polytechnic under such arrangement.

- o The City recognizes that amounts received by the Port Authority from Polytechnic in reimbursement of the \$16.5 million, or from the City, should the City elect to purchase the Port Authority's interest in the CATT, are to be included in funds to be made available for further regional development projects in New York State consistent with the Governors' Agreement of June 1983.

- o The project is to be subject to local laws set forth in the New York City Charter and New York City Administrative Code except as may be otherwise expressly agreed.

(Board - 8/25/88)

To date, exclusive of this authorization of an additional \$2.5 million \$97,771,000 has been allocated to projects in the State of New York from the \$112,500,000 made available for regional development projects in the State of New York as a result of the Governors' Agreement of June 1983. Following this authorization, there will be \$12,229,000 remaining for projects in the State of New York. The amounts allocated for regional development projects in the State of New Jersey have been exhausted.

Pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the master plan setting forth potential urban industrial park sites adopted by the Board on July 12, 1979, as amended, be and it hereby is further amended to add a site in the Borough of Brooklyn, City of New York, generally bounded on the north by Johnson Street, on the east by Lawrence Street, on the south by Myrtle Avenue, and on the west by Bridge Street; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to enter into appropriate agreements with the City of New York and the New York City Public Development Corporation with respect to the development of the Center for Advanced Technology in Telecommunications (CATT), such agreement to include but not be limited to provisions concerning payments in-lieu-of taxes and the applicability of local laws and any other agreements that may be necessary to effectuate the CATT; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to increase from \$14 million to \$16.5 million the commitment for the CATT of funds made available for projects, in the State of New York in accordance with the Governors' Agreement of June 1983, and, subject to any appropriate authorizations or certifications, to enter into appropriate agreements with Polytechnic University to provide up to \$16.5 million for construction of a portion of a building housing the CATT and to further provide for the repayment of such amount to the Port Authority; and it is further

RESOLVED, that the form of any agreements authorized pursuant to the foregoing be subject to approval by General Counsel or his authorized representative.

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
POTENTIAL INDUSTRIAL DEVELOPMENT SITES
AMENDMENT NO. 7

An amendment to the master plan adopted in accordance
with Chapter 651 of the Laws of New York (1978) and
Chapter 110 of the Laws of New Jersey (1978)

INTRODUCTION

This Amendment No. 7 amends and supplements the master plan adopted on July 12, 1979, as amended on March 12, 1981, August 12, 1982, January 12, 1984, March 8, 1984, November 8, 1984, and November 13, 1986. Except as otherwise amended herein, the provisions of that plan remain the same and apply to the Center for Advanced Technology in Telecommunications (CATT) in Brooklyn, New York, now being included in the master plan.

PREVIOUS MASTER PLAN SITES

Pursuant to the legislation providing for Port Authority participation in a program of industrial development, the Board at its meeting on July 12, 1979, adopted a master plan which identified the following sites for potential industrial development:

- Charleston, Staten Island, New York
- Doremus Avenue, Newark, New Jersey
- Greenville Yards/Claremont Terminal, Jersey City, New Jersey
- Hunts Point/Oak Point Yards Area, The Bronx, New York
- North Avenue, Elizabeth, New Jersey
- Spring Creek, Brooklyn, New York

At its meeting on August 12, 1982, the Committee on Port Planning, pursuant to authorization by the Board, amended the master plan to include the following additional site:

- Bathgate, The Bronx, New York
- Kapkowski Road, Elizabeth, New Jersey

At its meeting on March 12, 1981, the Committee on Port Planning, pursuant to authorization by the Board, amended the master plan to include the following additional site:

- Staten Island Industrial Park-East Side, Staten Island, New York

The Board, at its meeting on January 12, 1984, amended the master plan to include the following additional site:

- Portions of four additional blocks within the Bathgate Industrial Park

The Board, at its meeting on March 8, 1984, amended the master plan to include the following additional site:

- A site in the City of Newark, New Jersey, for development of a resource recovery facility

The Board, at its meeting on November 8, 1984, amended the master plan to include the following additional site:

- Yonkers Industrial Park, Yonkers, New York

The Board, at its meeting on November 13, 1986, amended the master plan to include the following additional site:

- Newark South Ward Industrial Park, Newark, New Jersey

The following is a status report on the previously authorized industrial development projects:

- On February 22, 1982, the Port Authority entered into an agreement with the City of New York and the New York City Public Development Corporation (PDC) for the redevelopment of at least three blocks of an original eight block site in the Bathgate area of the South Bronx. On January 12, 1984, the Board approved an amendment expanding the Bathgate project by four additional half blocks.
- The PDC constructed the first building at Bathgate on one of the original eight blocks. Today the Bathgate Industrial Park (BIP) has seven modern buildings housing manufacturing operations for: generic over-the-counter creams, ointments and prescription drugs; food product packaging; a printer; shoulder pads for the garment industry; hardware for the aircraft industry; mail order and museum quality picture frames. The park currently employs approximately 1,200 workers, 77% of whom are local residents.
- The Port Authority recently completed a two-story, 20,000 square foot Business Assistance Center office building. This building, located on one of the half-blocks, will provide "one-stop shopping" for business services. A full service restaurant, a postal facility, and word processing, secretarial and messenger services are planned for the building. The postal facility, business service center and restaurant are scheduled to begin operations in the Fall of 1988.

- The Port Authority and the City of Elizabeth, New Jersey, have entered into an agreement concerning the development of the Industrial Park at Elizabeth. One lease has been signed and negotiations regarding potential additional occupancies are currently underway. The Park has been added to the Elizabeth Enterprise Zone and has been designated as a Foreign Trade Zone.
- The Port Authority, Merrill Lynch Telecommunications, and the City of New York have executed agreements with respect to the development of The Teleport, and construction of infrastructure is virtually complete. Two buildings, totaling 165,000 square feet, have been completed and seven tenants are in residence. Three new buildings are now under construction and are to be completed in 1989. Sixteen earth stations are operational and 170 miles of fiber optic cable has been installed providing service to Princeton, Newark, Jersey City, Hoboken, Manhattan, Brooklyn, and Queens.
- In connection with the development of a site in the City of Newark for the Essex County Resource Recovery Facility, all necessary agreements have been executed with the City of Newark, the County of Essex and the system vendor, American Ref-Fuel, and all permits to enable commencement of construction of the Resource Recovery Plant have been issued. The Essex County Resource Recovery Facility was certified by the Board as an additional facility of the Port Authority at its meeting of May 9, 1985, and such certification was subsequently reaffirmed by the Committee on Finance. The project is currently in the fifth month of construction.
- The property for the Industrial Park in Yonkers was acquired in May 1985 from United Technologies Corporation, parent of the Otis Elevator Company. Since that time, contracts have been let to install improvements of a specific nature for Nissho Iwai American Corporation and Kawasaki Rolling Stock (USA). Other work has been initiated to upgrade the heating system, electrical system and parkwide life safety and code conformance improvements as steps to renovating certain of the older buildings for future tenancies.
- An agreement between the Port Authority and the City of Newark for the development of the Newark South Ward Industrial Park was signed. Subsequently, the City requested that the Port Authority put its development of the Park on hold pending City efforts to reach agreement with a private firm for development of the entire Park.

IN BROOKLYN, NEW YORK

LOCATION

The building housing the CATT will be located on a site not to exceed approximately one acre in the Borough of Brooklyn, City of New York, and includes the parcel generally bounded on the north by Johnson Street, on the east by Lawrence Street, on the south by Myrtle Avenue, and on the west by Bridge Street.

LAND USE

The site currently contains vacant land and residential dwellings which are to be demolished for the proposed CATT. The proposed CATT will not be more than approximately 83,000 square feet in a portion of a building which will also house Polytechnic University's library.

ZONING AND OWNERSHIP

The site is currently zoned for light industrial use and privately owned dwellings. It is proposed for zoning as a commercial district. The building housing the CATT is to be developed as a condominium with the Port Authority having an ownership interest in the CATT and Polytechnic University owning the library.

TRANSPORTATION

Public transportation to the site includes ten bus lines and four subway lines, all within one block of the site. The Brooklyn Queens Expressway is within one half mile for personal and commercial vehicular traffic.

UTILITIES

The site is currently adequately served by Brooklyn's water main system, and will be augmented by proposed construction to handle the needs of the CATT facility. The current sewer conditions remain.

Brooklyn Union Gas Company provides the natural gas to the site, and a proposed cogeneration plant will provide primary heating for the new facility. Electrical service is provided by Consolidated Edison Company of New York, and will be supplemented by the proposed cogeneration plant.

ENVIRONMENTAL

The PDC is undertaking preparation of a draft Environmental Impact Statement (EIS) pursuant to Executive Order 91. City Environmental Quality Review (CEQR), for the Metrotech development. The primary issues to be assessed in the EIS include: commercial/residential displacement caused by the project; traffic and air quality; and cumulative impacts of the project. This EIS has been provided to the CEQR co-lead agencies in preliminary form. The agencies will review the document and upon its revision to the satisfaction of the agencies, it will become a draft EIS.

LABOR

The project will generate approximately 175 construction jobs over the two year construction period and approximately 200 permanent jobs will be created.

ESTIMATED PROJECT COSTS

The estimated project cost for the CATT is approximately \$25.0 million, including the cost of equipping the CATT. The Port Authority's portion of these costs is limited to \$16.5 million for the construction of the CATT.

OTHER CONSIDERATIONS

The development of this project would be undertaken by the Port Authority subject to all necessary or appropriate authorizations and certifications.

GOVERNMENT & COMMUNITY CONSULTATIONS AND PARTICIPATION

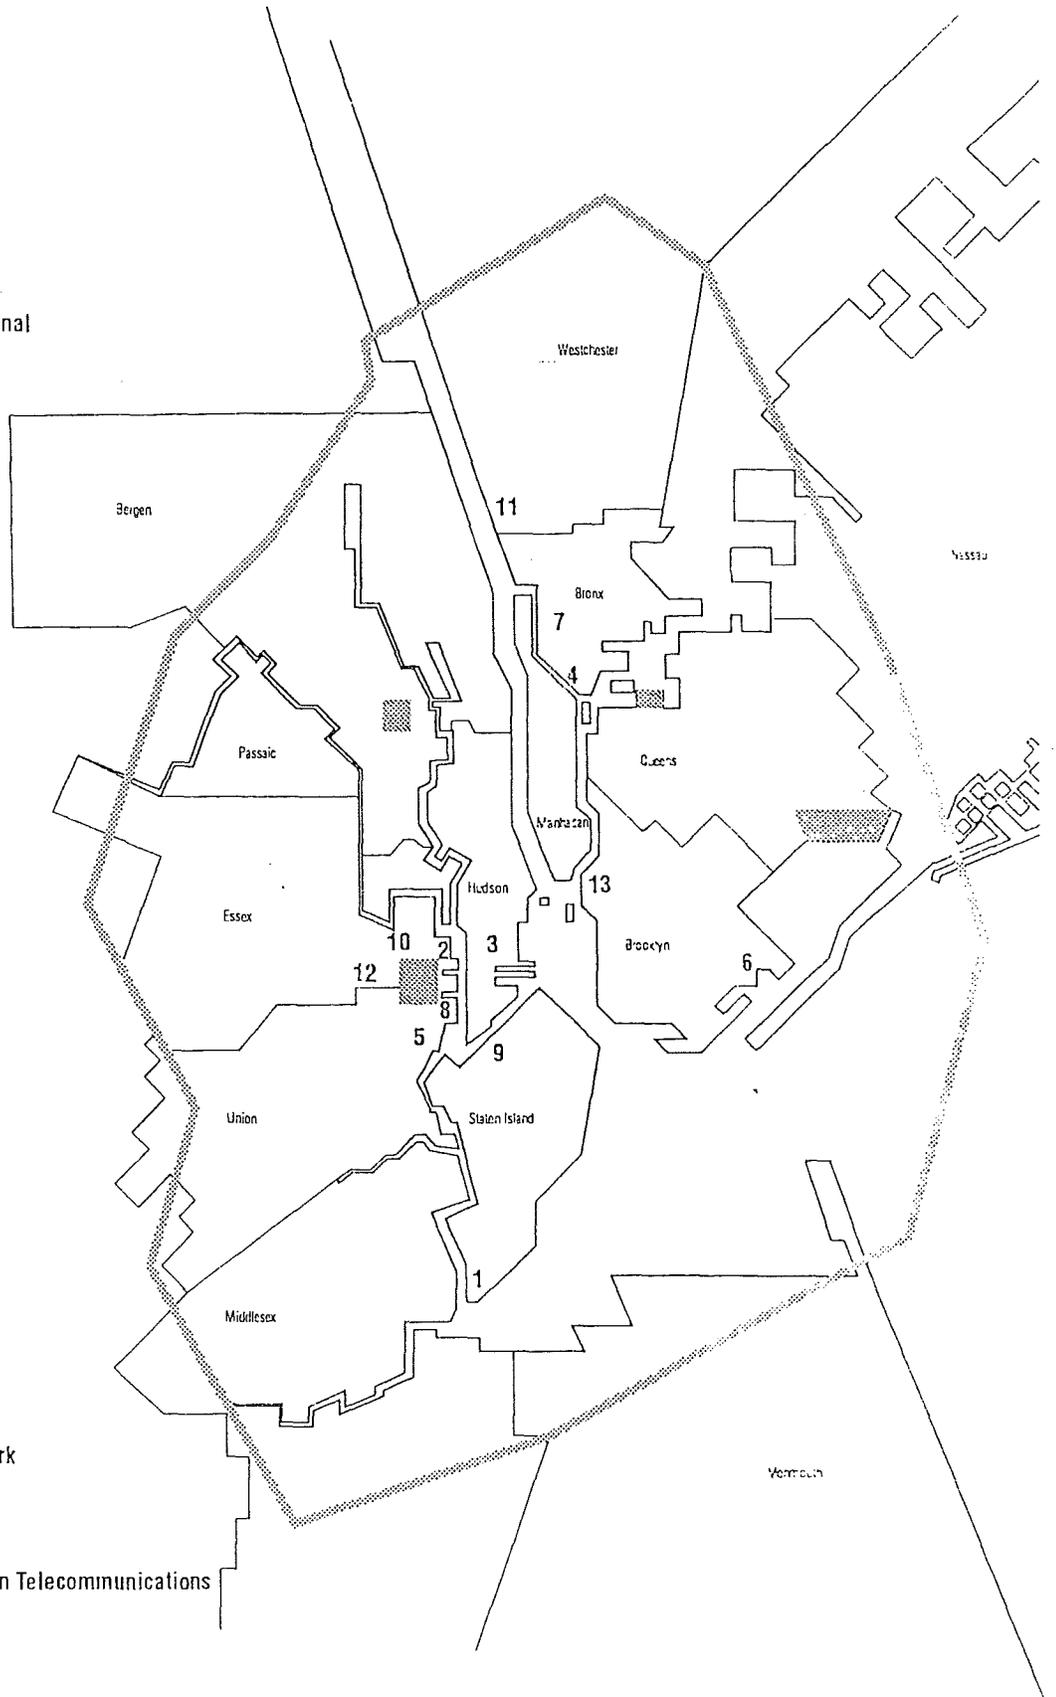

To assist the Port Authority in the preparation of the master plan, discussions and consultations were held with individuals and groups including:

The Governors of New York and New Jersey
Members of the New York State Legislature
Mayors of New York, Elizabeth, Yonkers, and Newark
Brooklyn Borough President
Chairman, Community Board No. 2
New York City Public Development Corporation
President, New York City Council

The World Trade Center - New Freight Elevator - Increase in Project Authorization and Award of Contract WTC-660.00

The Committee on Construction, at its meeting on September 13, 1984, authorized a project for the furnishing and installation of a new freight elevator between subgrade levels B-1 and B-4 in Two World Trade Center in the estimated amount of \$848,000. The construction contracts for this project are Contracts WTC-340.00, Freight Elevator FE-6, Two World Trade Center and WTC-660.00, General Construction for Freight Elevator FE-6, Two World Trade Center.

Contract WTC-340.00 for the fabrication and installation of the elevator was awarded to Otis Elevator Company on March 5, 1985 in the amount of \$136,500.

Contract WTC-660.00 requires the contractor to provide all labor and materials necessary for the general construction of the elevator shaft including structural reinforcements. The contract also provides for net cost work for the injection grouting and sealing of structural cracks in the shaftway roughly estimated at \$10,000. However, as design for this project commenced a number of problems surfaced regarding stress concentration in the area in which the elevator is to be installed. As a result, additional studies and a new design were required to redistribute the stresses in the concrete slabs and the contract was substantially delayed. Therefore, an increase in project authorization is necessary at this time due to the increased cost of the project and to enable the award of Contract WTC-660.00 which completes the project.

Contract WTC-660.00 also includes a provision requiring the contractor to meet mandatory Minority Business Enterprise/Women Business Enterprise goals of 15% participation for firms owned and controlled by Minority Business Enterprises and 1% for firms owned and controlled by Women Business Enterprises.

Proposals were solicited on Contract WTC-660.00 and on June 28, 1988, Dember Construction Corp. submitted the lowest proposal and was deemed qualified by the Director of World Trade and Economic Development to perform the work.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize an increase in the total project cost from \$848,000 to an estimated amount of \$2,350,000 for the furnishing and installation of a new freight elevator between subgrade levels B-1 and B-4 in Two World Trade Center; and it is further

RESOLVED, that the Board authorize the award of Contract WTC-660.00 for the general construction of the elevator shaft to Dember Construction Corp. of New York, New York in the amount of \$876,000, exclusive of extra work up to the amount of \$87,600, and the ordering of net cost work.

(Board - 8/25/88)

**John F. Kennedy International Airport Redevelopment Program -
New Airport Traffic Control Tower - Project Authorization
and Award of Contracts**

The existing control tower at John F. Kennedy (JFK) was constructed in 1952, at a time when the total number of aircraft being handled at JFK was approximately 105,000. By 1987, traffic levels had grown to over 286,000 total annual movements without radical change in the equipment or operation of the control tower. Over the same period, construction at the airport has affected controller visibility of the aeronautical operational areas. The existing control tower cab and administrative space are inadequate to accommodate the present or future air traffic control requirements. In answer to these problems, the Federal Aviation Administration (FAA) has included a project authorization to replace the tower in their Fiscal 1986 program.

The existing control tower is located adjacent to the parking lot in front of the International Arrivals Building (IAB) at JFK, in an area proposed for development as a Transportation Center under the JFK Redevelopment Program. The 1986 Master Plan for the redevelopment of JFK called for a new control tower to be located at the apex of the cone over the central rotunda where the Passenger Distribution System would terminate. The Master Plan concept would have been technically difficult and more expensive to construct. The new control tower will, therefore, be centered on the ramp adjacent to the IAB, facilitating implementation of the JFK Redevelopment Program. The new tower location is a site currently subject to a "right of common use" under a long-term lease to the Wing Building Lessees serving the IAB; the re-taking of the area needed for this project will be required and discussions with the affected airlines have commenced.

The new Air Traffic Control Tower at JFK will house the FAA's present and future air traffic control and administrative space requirements. The existing tower will be demolished once the new tower is operational. The new control tower will also house Port Authority operations directly related to ramp control at the IAB and to the monitoring of departures for compliance with the Port Authority's Aircraft Noise Policy. The new tower is one element of the JFK Redevelopment Program and its construction in the ramp area of the IAB will allow the early start of construction on the major portions of that Program. The project will also provide for the manufacture and installation of a new and enhanced baggage distribution system for the IAB.

Approximately \$5.8 million of the project cost may be reimbursed by the FAA. Port Authority costs for this project are fully recoverable through the flight fee and other lease arrangements.

All contracts will require, as a minimum, good faith efforts to meet goals of 15% Port Authority certified Minority Business Enterprise/Women Business Enterprise participation of which at least 10% must be MBE's.

(Board - 8/25/88)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize a project for a new Airport Traffic Control Tower at John F. Kennedy International Airport, including facilities for Port Authority staff functions involved with ramp control and sound monitoring activities, the demolition of the existing Airport Traffic Control Tower once the new tower is operational and manufacture and installation of a new and enhanced baggage distribution system in the International Arrival Building (IAB), at a cost estimated at \$55 million, including administrative, engineering and financial expense and a project contingency; and it is further

RESOLVED, that the Board authorize the Executive Director to:

- (a) award Contract JFK-320.004 for the construction of control tower foundations to the lowest qualified bidder; (b) take such action with respect to the award of purchase or construction contracts for the remainder of the foregoing project as he deems in the best interest of the Port Authority including, without limitation, award to the lowest bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable, rejection of all bids, solicitation of new bids on revised or the same requirements, or negotiation with one or more bidders or other contractors; (c) execute contracts and supplemental agreements with such bidders or contractors as he deems in the best interest of the Port Authority and to order extra work and net cost in connection with each contract; (d) enter into any necessary leases or other contractual agreements, relative to the new tower, with the Wing Building Lessees and the Federal Aviation Administration (FAA) as he deems in the best interest of the Port Authority; and (e) negotiate and enter into agreements relating to the installation and relocation of public and private utilities.

Kennedy International Airport - Supplement to Lease No.
AYB-688 with The King Interests Corp. - Air Cargo
Building

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a supplemental agreement to Lease No. AYB-688 with The King Interests Corp. (King) at Kennedy International Airport to provide for the tendering of a second site (Site II) to King for construction of a single or multi-occupancy air cargo building incorporating a renovated and refurbished Hangar 11 with ground rentals for such site to commence on the earlier to occur of the first occupancy by a subtenant, completion of construction, or eighteen months from the date the site is tendered. The lease term would be extended through and including November 30, 2015 for all premises under the lease and effective February 1, 2014 the lessee would pay a ground rental for all the premises and a building rental for the building on Site I at the then fair airport market rates. In addition the lessee would continue to pay a percentage rental equal to 10% of its gross receipts as defined in the lease in excess of ten times the annual ground rentals. Upon the lessee making a one-time-payment to the Port Authority in an appropriate amount the payment of Facility Rental under the lease would be abated. Upon execution of the supplemental agreement the lessee would become obligated to pay the Port Authority, in a manner to be specified therein, the amount of \$1.2 million.

The facility to be constructed on Site II would contain approximately 200,000 square feet and is estimated to cost approximately \$25 million. The supplement would provide that King could mortgage its leasehold interest in both Site I and Site II, in an agreed-upon amount, related to the estimated costs of construction of both buildings plus accrued interest, provided that the Port Authority would be able to deal with King substantially in the same manner as if no lender were involved.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he is, hereby authorized, for and on behalf of the Port Authority, to enter into an agreement supplemental to Lease No. AYB-688 with The King Interests Corp. at Kennedy International Airport covering the construction of an air cargo facility substantially upon the terms set forth above; the form of the agreement to be subject to the approval of the General Counsel or his designated representative.

(Board - 8/25/88)

New York City Passenger Ship Terminal - Pier 40 - Express
Industries and Terminal Corp. - Revisions to Lease
Amendments

It was recalled that at its meeting on April 14, 1988 the Board authorized the Executive Director to enter into agreements amending leases with Express Industries and Terminal Corp., a warehousing tenant which occupies the main deck and portions of the second deck at Pier 40, part of the New York City Passenger Ship Terminal, in settlement of claims by the Port Authority arising out of the tenant's unauthorized subletting activities and claims by the tenant arising out of the closing of Pier 40. Included among the amendments were provisions for abatement of rentals pending structural restoration of the Pier. The full rent on the main deck was to commence March 1, 1988 and full rent for the second deck was to commence August 1, 1988. Rental at a reduced rate was to be payable for the second deck for the period from March 1, 1988 to July 31, 1988. Unforeseen field conditions delayed the completion of the Pier restoration work making it necessary to defer the resumption of full rent on the main deck. In addition, Express refused to agree to the previously authorized amendments unless resumption of rental for the main deck was further delayed and the term of its main deck lease was extended. Subsequently, Express advised that resolution of the issues concerning the main deck lease was contingent upon Express being granted a similar arrangement for the second deck including further rental modifications and an extension of the lease term.

It was therefore recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement amending the Port Authority's lease with Express covering the main deck at Pier 40 to extend the term of the letting of the main deck for a period from September 1, 1992 through December 30, 1994 and to delay the effective date of payment by Express of full rent for the main deck from March 1, 1988 to September 1, 1988. The Port Authority will have the right to terminate the lease without cause on 120 days' notice any time after September 1, 1993. Effective September 1, 1992, rental for the main deck will be subject to escalation based on the percentage increase in the Consumer Price Index measured from August 1982. It was further recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement amending the Port Authority's lease with Express covering the second deck at Pier 40 to extend the term of the letting from September 1, 1989 to December 30, 1994 with the Port Authority retaining its right to terminate the lease without cause on 30 days' notice and to delay the effective date of payment by Express of full rent for the second deck from August 1, 1988 to March 1, 1989. In lieu of the reduced rent previously agreed to for the period from March 1, 1988 to July 31, 1988, Express will pay a reduced rental for the second deck at the rate of \$105,000 per year for the period from September 1, 1988 to December 31, 1988 and at the rate of \$210,000 per year for the period from January 1, 1989 to February 28, 1989. Effective September 1, 1989 rental for the second deck will be subject to escalation based on the percentage increase in the Consumer Price Index measured from August 1988.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized, for and on behalf of the Port Authority, to enter into agreements amending the Port Authority's leases with Express Industries and Terminal Corp. covering the main and second decks at Pier 40 substantially in accordance with the terms and conditions set forth above, the form of each agreement to be subject to the approval of General Counsel or his designated representative.

Incentive Program to Attract New Oceanborne Cargo

The Port Authority has been working with other maritime interests to develop a program to reduce the higher costs of shipping through this Port relative to other North Atlantic Ports. Currently, of 1.2 million containers handled through Port of New York and New Jersey facilities, only 82,000 move to and from points beyond 260 miles, and of these, approximately 20,000 move by rail.

The competitive position of the Port of New York and New Jersey has been challenged because among other things both the Virginia Port Authority and Maryland Port Authority heavily subsidize rail intermodal operations in order to attract Midwestern cargo to their Ports. Each of these Ports have established various practices to subsidize cargo moving by rail to the Midwest.

The New York Shipping Association, with the concurrence of the International Longshoremen's Association has agreed to reduce the fringe benefit (tonnage assessment) paid by steamship lines for containers moving more than 260 miles to and from this Port from approximately \$180 per container to approximately \$87 per container, a reduction of \$93 per box.

As the Port Authority's contribution to reducing costs in the Port, and in order to provide an incentive of route cargo through this Port, thus increasing the use of underutilized rail/water facilities, a \$25 per import container and \$50 per export container incentive for drayage between the point of rest in our local marine terminals and regional rail ramps is proposed. This payment would be offered to the steamship line or shipper who is responsible for routing the cargo. The actions announced by the New York Shipping Association and proposed by the Port Authority would make the Port of New York and New Jersey more competitive and affordable to steamship lines and shippers routing rail cargo to and from the Midwest.

The authorization for implementation of this incentive program and any agreements to be entered into would be for the period September 12, 1988 to December 31, 1989. At the end of six months, the program will be evaluated to determine its effectiveness and whether modifications should be recommended.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize an incentive payment to steamship lines and/or shippers of \$25 per import container and \$50 per export container for drayage between the point of rest in local marine terminals and regional rail ramps for cargo shipped by rail to and from points greater than 260 miles from the Port; and it is further

RESOLVED, that the Executive Director be and is hereby authorized to provide for the administration of the program and the procedures for making the authorized payments upon presentation of appropriate supporting documentation, as required by the Port Authority and to enter into any appropriate agreements in connection therewith.

(Board - 8/25/88)

**Hoboken to Battery Park City Ferry Service - Selection of
Private Operator - Authorization to Finalize
Negotiations with Arcorp/Hartz Ferry Transportation
Joint Venture**

Over the past ten years, passenger demand at existing Port Authority trans-Hudson facilities has grown steadily. The increasing passenger volumes, especially during the peak commuting hours, in some cases already exceed existing capacity. This growth is expected to continue through at least the 1990's. Staff has studied a number of alternatives for providing sufficient capacity to handle the growing demand at these facilities. Studies indicate that one of the major growth areas is in the Hoboken to lower Manhattan travel market, which is presently served by PATH's Hoboken to World Trade Center service. Growth in this market is attributable to growth in lower Manhattan jobs and development of the waterfront in Hudson County. In addition, New Jersey Transit's "Waterfront Connection", which would provide commuter rail access to Hoboken from Penn Station, Newark, promises to bring additional trans-Hudson passengers to Hoboken. New Jersey Transit (NJT) expects to phase in the Waterfront Connection between 1991 to 1992.

After evaluating the physical, operational and financial considerations associated with expanding PATH service on the Hoboken-World Trade Center line, it was determined that a ferry service would offer a timely, cost effective method of providing additional capacity for this key travel market.

Following identification of ferry service as a favorable alternative for providing additional capacity for the New Jersey to lower Manhattan travel market, staff explored methods for providing this service in the most cost effective manner. One method considered was the privatization of the service, in which the Port Authority would contract with a private entity to provide the ferry service. Believing substantial benefits could be realized from this approach, staff issued publicly advertised Request for Proposals (RFP) in October 1987, stating the Port Authority service requirements and soliciting proposals from potential operators. The proposals were to describe the routes, vessels and terminals to be used, as well as provide plans for operating and maintaining the service. In addition, proposers were to describe the nature of support, if any, they would require from the Port Authority in order to initiate service.

Fifteen proposals were received and evaluated. After evaluation of all proposals received and discussion of potential terms of agreement with selected finalists, the proposal from Arcorp/Hartz Ferry Transportation Joint Venture, a joint venture of Arcorp Properties, a wholly owned subsidiary of APA Truck Leasing Company and Hartz Mountain Industries, Inc., was judged to meet the Port Authority's service requirements for trans-Hudson ferry service in the most cost effective manner with the least financial risk to the agency. Under its proposal Arcorp/Hartz would design and construct the vessels and terminals needed for initial service as well as operate and maintain the service.

(Board - 8/25/88)

The ferry service proposed by Arcorp/Hartz, as refined through discussions with staff, is as follows:

Service Description:

A peak period commuter ferry service between Hoboken, New Jersey and Battery Park City in lower Manhattan, designed to relieve passenger demand on PATH's Hoboken to World Trade Center line. Arcorp/Hartz would provide service adjustments as needed to achieve this result, including provision of additional or larger vessels, fare adjustments, changes in headways, additional passenger amenities and additional routes. Under other stated conditions relating to market demand Arcorp/Hartz may institute additional service to other lower Manhattan sites. Demand in excess of 6,000 passengers in the peak hour at Battery Park City must be diverted to an alternate lower Manhattan terminal site.

Service Commencement:

Spring 1989.

Hours of Operation:

7-10 a.m., 4-7 p.m., Monday to Friday; some off peak service may be provided.

NJ Terminal:

South of the former Erie-Lackawanna Ferry Terminal in Hoboken, New Jersey, adjacent to New Jersey Transit's Rail and Bus Terminals.

NY Terminal:

North of the North Cove of Battery Park City in New York, New York, adjacent to the Hudson River bulkhead.

Fares:

Arcorp/Hartz would determine fares taking into consideration the mass transit nature of the service.

Passenger Capacity:

Start-up service designed to handle at least 2,100 passengers in the peak hour with headway of no more than 10 minutes; would be increased as warranted by demand, up to 6,000 passengers in the peak hour at Battery Park City.

Vessels:

Four vessels, including one spare, capable of carrying 350 passengers.

(Board - 8/25/88)

Initial Terminals:

Floating barges moored by pilings with enclosed waiting areas.

Operator Agreement Provisions:

(a) Arcorp/Hartz would be responsible for the design, construction, operation and maintenance of a ferry service between Hoboken and Battery Park City, including provision of vessels and initial terminal facilities.

(b) The Port Authority would make the terminal facility sites available but would not make any payments for capital or operating costs other than for permanent terminals and for landside access improvements at Hoboken and Battery Park City. Gross revenues collected by Arcorp/Hartz from the permanent terminals, including landing fees charged to other services, concessions and advertising, in excess of the terminal's operations and maintenance costs and a management fee of 8% of gross revenues, would be divided, with two thirds for the Port Authority and one third for Arcorp/Hartz.

(c) The term of the proposed agreement is twenty years, with an extension option premised upon major reinvestment by Arcorp/Hartz. Should Arcorp/Hartz be unable to meet the service requirements specified in the contract, the vessels, terminal facilities and ancillary equipment would be made available to the Port Authority.

(d) Arcorp/Hartz would place additional vessels into service as warranted by passenger demand at no cost to the Port Authority. Subject to approval by the Port Authority and to such limitations as the property owners of the terminal sites may impose, Arcorp/Hartz may use the vessels and terminal facilities for other revenue activities as long as commuter service is not affected.

(e) The Port Authority would provide permanent terminal facilities and make landside access improvements as required to serve increased passenger demand as well as all regulatory and environmental permits required for terminal siting and construction. The landside access improvements at Battery Park City include items such as the provision of escalators and revolving doors to accommodate the flow of ferry passengers between the World Financial Center and the World Trade Center. At Hoboken, these improvements will include items such as platform and track modifications to the south side of NJT's Hoboken Rail Terminal to improve access to the ferry terminal. Arcorp/Hartz would have the option to participate in the financing, design and construction of the terminal at Hoboken. The budget level estimate of the project cost for the terminals and landside access improvements excluding the access improvements in Hoboken is \$126 million. The Port Authority would monitor ferry operations and undertake structural maintenance of the terminal as well as provide assistance in the planning and marketing of the service.

(Board - 8/25/88)

(f) Unless ordered by the Executive Director, Arcorp/Hartz would not be obligated to proceed with vessel procurement and construction until the rights to terminal sites and permits have been secured. If ordered to proceed, the Port Authority would reimburse Arcorp/Hartz for any incremental expenses for vessel procurement and construction incurred due to delays or failure in acquiring necessary rights or permits.

(g) Arcorp/Hartz will make a good faith effort to meet a goal of 10 and 1% for participation by Minority Business Enterprises (MBE) and Women Business Enterprises (WBE), respectively, in operating and maintenance expenditures. The Port Authority and Arcorp/Hartz will make a joint good faith effort to meet a goal of 10% and 1% for participation by MBE's and WBE's, respectively, in the aggregate of all capital expenditures.

Staff has been negotiating with New Jersey Transit Corporation and the Battery Park City Authority (BPCA) to develop lease and/or license agreements for terminal sites and with the New York State Office of General Services (NYSOGS) for the riparian rights needed for the New York terminal. The agreement with Arcorp/Hartz will be contingent upon securing terminal sites. NJT, BPCA and NYSOGS have indicated an intent to grant interim operating licenses as needed to institute service pending completion of lease negotiations.

Arcorp Properties currently operates two trans-Hudson commuter ferry services from Weehawken, New Jersey one to 38th Street in Manhattan and one to South Ferry in Manhattan.

Whereupon, the following resolution was adopted, Chairman Kaltenbacher abstaining and Commissioner Hellmuth voting "no":

RESOLVED, that the Board adopt the Executive Director's recommendation that the Arcorp/Hartz Ferry Transportation Joint Venture (Arcorp/Hartz), a joint venture of Arcorp Properties, and wholly owned subsidiary of APA Truck Leasing Company, and Hartz Mountain Industries, Inc., be selected as the successful candidate for the design, construction, operation and maintenance of a trans-Hudson ferry service between Hoboken, New Jersey and Battery Park City in New York; and it is further

RESOLVED, that the Board authorize the Executive Director to finalize contract negotiations for an agreement with Arcorp/Hartz for implementing the Hoboken to Battery Park City ferry service, said agreement to indicate that its implementation is contingent upon further Board authorization of the contract, and any Board

(Board - 8/25/88

certifications and authorizations required for service and upon securing terminal sites and associated easements in Hoboken and Battery Park City as well as any required riparian rights from New York or New Jersey; the form of the agreement to be subject to the approval of General Counsel or his authorized representative.

Whereupon, the meeting was adjourned.

 Lloyd D. Schwalb, Supervisor, Media Promotions
 Morris Sloane, Director of Aviation Operations
 Barry Weintrob, Chief Financial Officer

The meeting was called to order by the Chairman.

Correction of February 11, 1988 Minutes

The Acting Assistant Secretary reported three corrections for the February 11, 1988 Minutes, in connection with the rules and regulations of the George Washington Bridge and Bus Station (appearing following page 59 of those Minutes). On page (i) of the rules and regulations, the words "locations on the subway mezzanine, main concourse," should be added as the last line. On page (o) of the rules and regulations, the word "materials" should be added at the end of the tenth line. On page (w) of the rules and regulations, the first word on line 3 of paragraph 51 should read "shall."

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on September 8, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on September 8, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on September 8, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on September 8, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

New York Passenger Ship Terminal - Pier 40 - Project
Authorization and Award of Contract PST-110.013 - Pier
40 Pile Repair - Phase II

Parsons, Brinckerhoff, Quade & Douglas, retained by the Port Authority in 1985 and 1987 to inspect Pier 40, found that there was considerable and continuing corrosion of the steel piles which support the Pier, and in 1987 recommended that the Pier be closed. On August 29, 1987 Pier 40 was effectively closed, and since there was still the danger of possible collapse because of the continued corrosion of the piles, staff deemed it essential that repairs begin immediately.

At the September 22, 1987 Policy Review meeting, the Commissioners verbally approved the proposed action to be taken by the Chief Engineer for the repair of piles at Pier 40. The Chief Engineer authorized award of Contract PST-110.012, Passenger Ship Terminal, Pier 40, Repair of Piles, to Spearin, Preston & Burrows, Inc. At its meeting on October 30, 1987, the Board approved the award by the Chief Engineer of Contract PST-110.012 to Spearin, Preston, & Burrows at a cost roughly estimated at that time at \$5.8 million and authorized the Executive Director, in his discretion, to enter into Supplemental Agreement No. 1 to that contract providing for certain modifications to the contract. The Board was advised that future contracts would be required to provide a protective coating for the piles, and to provide for restoration of the cathodic protection system to ensure the continued integrity of the repaired sections. The Board was advised at its meeting on March 10, 1988 that the project costs to complete the repairs under Contract PST-110.012 were estimated at \$10.14 million. Approximately 3,000 piles were repaired under Contract PST-110.012 which was completed on May 27, 1988 at a final cost of approximately \$10 million.

Phase II of the work, under Contract PST-110.013, will provide for repairs to piles not performed under Contract PST-110.012, the installation of a protective coating for piles, the construction of a new cathodic protection system for all piles and underwater inspection by a Professional Engineer of the work under the Contract to verify compliance with Contract PST-110.013.

Because a lease entered into in 1971 between the Port Authority and the City of New York provided that the City would be responsible for repairs to the substructure of Pier 40, which was found by a survey conducted later that year to have been in need of rehabilitation prior to New York State's takeover of the facility for purposes of the Westway project, staff intends to discuss with the City of New York and the State of New York the sharing of some of the costs of the pile repair at Pier 40.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize:

1. a project for repair of the existing steel piles, construction of a new cathodic pile protection system and provision of a protective coating for required piles, all in connection with the pile supports at Pier 40 in New York City, New York, at a total project cost presently estimated at \$21 million, including payments to contractors, an allowance for extra work and administrative, financing and engineering expenses, approximately \$11 million of which has been spent to complete work under Phase I; and

2. the Executive Director to award Contract PST-110.013, Pier 40 Pile Repair - Phase II, to the lowest bidder qualified by reason of responsibility, experience and capacity to perform the work and whose bid price is deemed reasonable and to order extra work up to 10% of the bid accepted or to reject all bids.

**Howland Hook Marine Terminal Rehabilitation - Project
Authorization and Award of Contracts**

The Howland Hook Marine Terminal is owned by the City of New York and was leased to the Port Authority for a term of 38 years under an agreement, approved by the Board in May 1985, between the Port Authority, the City and United States Lines (the then-existing tenant). The Board also approved a project which provided for improvements to the Terminal, at an estimated cost of approximately \$86 million, of which \$18 million was spent. Subsequently, U.S. Lines filed for bankruptcy on November 24, 1986.

The Terminal has not been used since March 1987. Recently Sea Terminals Inc., a newly formed terminal operating company, has been allowed to operate a small portion of the Terminal under a permit. It has been successful in attracting Independent Caribbean Lines which provides a weekly service between Howland Hook and Puerto Rico. In order to restore the Terminal to an acceptable operating condition to make it more marketable, it is necessary to rehabilitate the high voltage electrical distribution system, wharf, crane rail, cranes, pavement and utilities systems and other miscellaneous items. Necessary wharf repairs are the responsibility of the City of New York as the wharf was excepted at the time of the letting pending a survey. The survey has been performed and has disclosed the need for extensive repairs.

The Port Authority is currently engaged in discussions with the City of New York concerning future operations at the Howland Hook Marine Terminal. The decision to proceed with any part of the proposed project will be at the discretion of the Executive Director pending the outcome of those negotiations.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize:

1. a project for the rehabilitation of the Howland Hook Marine Terminal, at a total expenditure presently estimated at \$25 million including payments to contractors, allowances for extra work and net cost work, engineering, administrative and financing expenses, related agreements and project contingency; and

2. the Executive Director to: (a) take such action with respect to purchase and construction contracts, contracts for professional and advisory services for the foregoing project as he deems in the best interest of the Port Authority, including without limitation award to the lowest bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable; rejection of all bids; solicitation of new bids on revised or the same requirements or negotiation with one or more bidders or contractors; solicitation from a select list for critical or specialty work; (b) execute contracts and supplemental agreements with such contractors as he deems in the best interest of the Port Authority and to order extra work and net cost work in connection with each contract including supplemental agreements thereto; and (c) negotiate and enter into agreements relating to the installation and relocation of public and private utilities.

All Airports - Consolidated Ground Transportation Counter
Program - Contract Award

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement with Hudson General Corporation ("Hudson General") to manage and operate the Consolidated Ground Transportation Counter Program ("the Counter Program") at all three Airports and to staff the "Air-Ride" telephone information service at the World Trade Center at an estimated cost of \$12.6 million, inclusive of 15% for extra service but exclusive of annual escalation. The Counter Program was developed to provide the public with an effective, organized and unbiased means to obtain ground transportation information and make reservations with Port Authority ground transportation permittees. The agreement would be for a term of three years, with the right to extend the agreement for two additional two-year terms subject to the approval of the Committee on Operations. Hudson General would have the right not to continue the agreement for any renewal term by giving twelve months prior written notice to the Port Authority. Hudson General was selected on the basis of its response to a Request for Proposals by the Port Authority.

Hudson General would subcontract a portion of the work under the agreement to Robinson Bus Service, Inc. of Evanston, Illinois, a minority business enterprise certified by the Port Authority Office of Business and Job Opportunity.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he is hereby authorized, for and on behalf of the Port Authority, to enter into an agreement with Hudson General Corporation for the management and operation of the Consolidated Ground Transportation Counter Program and the staffing of the "Air-Ride" telephone information service, substantially on the terms set forth above and, subject to the approval of the Committee on Operations, the agreement may be extended for two additional two-year terms; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 9/8/88)

John	F.	Kennedy	International	Airport	International	Arrivals
Building	-	Phase	II	Program	-	Customs
Capacity		Improvements		-	Project	Hall/Lobby
Authority to Award Contracts						Authorization

The International Arrivals Building Improvement Program, which focused on renovations to the Immigration and Naturalization areas, the interline baggage system and lobby, has significantly enhanced the ability to provide a satisfactory level of service to arriving international passengers using the facility. Unfortunately, heavy congestion is still experienced in the baggage claim area of the Customs Hall. The baggage belts are the prime contributor to this congestion, due to a lack of capacity to adequately store and deliver the bags for pickup causing excessive floor storage and long waiting lines. With the anticipated increases in passenger traffic, the existing baggage system will be unable to provide an acceptable level of passenger service.

Further, much congestion is experienced in the lobby area due to a lack of adequate "meeter and greeter" space. It is proposed that this problem be addressed by expanding the lobby area onto what is now frontage curb thus creating approximately 5,600 square feet, an increase of roughly one-third in new usable space, including a more comfortable and secure ground transportation area, which will enable facility staff to exert greater control over unauthorized ground transportation solicitation.

The existing belts in the Federal Inspection Services (FIS) area require substantial maintenance in order to minimize downtime. The belts which were installed in 1965/1967 and modified in 1978 do not have sufficient capacity to handle the baggage from a fully loaded 747, thus resulting in a need to continually remove bags from the belt and store them on the floor to permit subsequent flights to be processed. The proposed replacement belts will nearly double the overall linear footage of the total baggage belt system and be able to hold the baggage from a fully loaded 747 flight. Additional queuing space will be created by moving the counters forward, thus improving the movement through the hall. Associated ceiling modifications, lighting, and other finishes will enhance the environment for both patrons and workers in the area.

The contracts and purchase orders under the project will include all necessary modifications in the FIS Hall to install eight continuous loop flat plate baggage belts. The work will consist of removing the existing belts, modifying door openings onto the apron, installing new electrical power, canopies, control devices and relocating a surge suppresser on the apron. A new ceiling will be installed, Customs counters relocated, upgraded signing provided. Federal agency security areas will be expanded, and modifications made to the air return ducts to improve the heating and air-conditioning in the area. The glass wall at the outside of the lobby will be relocated to provide for a substantially increased area and doorways relocated to improve passenger movement through the lobby. Additionally, the scope of work includes alterations to provide for a separate controlled ground transportation area.

(Board - 9/8/88)

The Board at its meeting on August 25, 1988, authorized a separate \$3.5 million for the manufacture and installation of the enhanced baggage distribution system for the International Arrivals Building (IAB) in connection with its authorization of the construction of a New Control Tower. Contract JFK 410.142 falls within this authorization.

The contracts for the work will provide that the contractor will use every good faith effort to meet a goal for Minority Business Enterprise participation of 12% for firms owned and controlled by minorities and 2% for firms owned and controlled by women. A portion of the work may be performed during nighttime hours in order to minimize inconvenience to the public and interference with airport operations.

Because of the nature of the work, bids on certain of the contracts will be solicited from a list of contractors approved by the Chief Engineer who are experienced and capable of performing the work; are known to have previously performed satisfactory work for the Port Authority; and can respond with sufficient labor, equipment and materials to perform the work on a timely basis.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize:

1. a project at Kennedy International Airport for modifications and alterations to the International Arrivals Building (IAB) Customs Hall Area and expansion of the lobby at the IAB at an expenditure presently estimated at \$15 million, including payments to contractors, an allowance for extra work, engineering, administrative and financing expenses and a project contingency;

2. the Executive Director to award the following contracts to the contractor who submits the lowest bid, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable;

a. Contract JFK-410.142 - IAB Baggage Belt System - for the fabrication and installation of a replacement baggage claim system and for certain minor building modifications to accommodate the system;

b. Contract JFK-410.141 - IAB Federal Inspection Services (FIS) Area Miscellaneous Building Alterations - for the renovations and alterations to the Customs Hall;

c. Contract JFK-410.144 - IAB Lobby Renovations - for increasing the size of the lobby meeter and greeter area; and to order extra work up to 10% of the bid accepted, or to reject all bids; and

3. the Executive Director to: (a) take such action with respect to award of other purchase and construction contracts for the foregoing project as he deems in the best interest of the Port Authority including, without limitation, award to the lowest bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable, rejection of all bids, solicitation of new bids on revised or the same requirements, or negotiation with one or more bidders or other contractors; and (b) execute contracts and supplemental agreements with such bidders or contractors as he deems in the best interest of the Port Authority and to order extra work and net cost work in connection with each contract, including supplemental agreements thereto.

**John F. Kennedy International Airport - Relocation of the
Western Taxiways "I" and "O" - Planning Authorization**

The Board, at its meeting on September 8, 1966, authorized the start of a multi-phase project for the relocation of Taxiways "I" and "O" which referred to a Master Plan for the relocation of these taxiways in their entirety. Subsequently, in a series of construction contracts, these taxiways were relocated to a location which provided for maximum passenger terminal site expansion, with the exception of the portion of the taxiways opposite the United and American Airlines Terminals (between the Van Wyck and J.F. Kennedy Expressways).

A determination has now been made that additional passenger terminal facilities are required to handle forecasted future growth and that it will be necessary to implement the final phase of the original program to relocate the taxiways. In order to provide an additional 43 acres of land for the construction of larger aircraft parking and/or terminal facilities, it is necessary to relocate Taxiways "I" and "O" in the areas serving the existing United and American passenger Terminals.

The work under the proposed project will include paving and utilities for new taxiways, restricted service roads, electrical, storm drainage and other incidental work in the areas opposite the American and United passenger terminals. In addition, the work will include the demolition of Cargo Building 82 and a portion of Cargo Building 81.

In addition, this proposed project will require the use of existing Employee Parking Lot No. 7. Therefore the Board, at its meeting on January 14, 1988 authorized a project for modifications to existing Parking Lot No. 8 to provide for the necessary replacement of employee parking space.

The cost of the proposed project is currently estimated at \$68 million including payments to contractors, allowance for extra work and net cost work engineering, administration, financial expense and a project contingency.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize staff to develop studies, surveys, field investigations, plans, specifications, cost estimates and other ancillary data for a project at John F. Kennedy International Airport to provide paving and utilities and incidental systems for the relocation and modification of the western portion of Taxiways "I" and "O" in the vicinity of the American and United Unit Terminals.

(Board - 9/8/88)

**La Guardia Airport - West End Substation and Relocation of
27KV Feeders - Project Authorization and Award of
Contract**

In light of the proposed major capital improvements at LaGuardia Airport, including the Central Terminal Building (CTB) modernization and expansion, the Engineering Department undertook a study of the existing electrical distribution system at the facility. The study concluded that the existing system does not provide sufficient contingency and the airport may soon face the risk of potential power shortages. A new Master Plan was developed for the airport electrical distribution system. Under the plan, power to facilities west of the CTB will be provided from the new west end substation instead of from the existing central substation which is operating at full capacity. Construction of the substation is critical to the orderly and timely implementation of the CTB Expansion and Modernization Project and related relocation of utilities.

The total load on the existing central sub-station serving LaGuardia Airport is now exceeding the allowable capacity. In July and August of 1986, the facility used 12.3 MVA which is just below the the maximum 12.5 MVA capacity. Subsequently, a number of Port Authority and tenant projects such as The Pan Am Shuttle Terminal, plus a number of tenant modernization and expansion projects were completed which increased that demand. The standard policy concerning power interruption at all Port Authority airports requires that two of the four 27KV feeders and transformers and associated equipment have the capacity to meet the power demands for the operation of the facility.

The existing 27KV feeders currently serving the central substation run from the western airport property line at 81st Street to the existing central substation, are located in front of the CTB, and will be affected by the expansion and modernization project authorized by the Board in September 1987. Negotiations with Con Ed resulted in agreement on a new routing for the 27KV feeders to the existing sub-station from a location directly south of the Grand Central Parkway in the vicinity of the existing flyover.

The proposed project provides for the design and construction of a new substation with 27KV/5KV transformers and associated switchgears and duct banks to interface with the existing electrical system. It will also provide for the future elimination of the 27KV feeders serving the existing central substation from the west end of the airport and the construction of new 27KV feeders from south of the flyover to the existing central substation. This project is required to provide LaGuardia Airport with an electrical distribution system capable of meeting the present and projected forecast demand, and is part of the phased implementation of the LaGuardia electrical Master Plan.

It is important to complete the relocation of the 27KV feeders from in front of the CTB at the earliest possible time which will allow the CTB Expansion and Modernization Project to be constructed without adversely impacting its schedule and budget. It is anticipated that the construction work will begin by January 1989. The relocation of the 27KV feeders will be completed in fall of 1989 and the construction of the new west end substation will be completed by the year end of 1990.

(Board - 9/8/88)

The contracts for the project, to be publicly advertised, will provide that the bidder will use every good faith effort to meet a goal of Minority Business Enterprise participation of 12% for firms owned and controlled by minorities and of 2% for firms owned and controlled by women.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize:

1. a project for the construction of a new west end electrical substation at LaGuardia Airport and the relocation of 27KV feeders supplying the existing central substation at an estimated total project cost of \$11.8 million including payments to contractors, pre-purchasing of cables and equipment and an allowance for extra work, administrative, engineering and financing expenses and a project contingency; and

2. the Executive Director to award contracts LGA-110.060 entitled "West End electrical SubStation" and LGA-110.074 entitled "Relocation of 27KV Feeders", each to the lowest bidder who is qualified by reason of responsibility, experience, and capacity and whose bid price the Executive Director deems reasonable and to order extra work up to 10% of each bid accepted, or to reject all bids on the contract.

La Guardia Airport - Lease Covering Construction and
Construction Payments for New East End Terminal with
Continental Airlines, Inc. and Eastern Air Lines, Inc.

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease agreement with Eastern Air Lines, Inc. and Continental Airlines, Inc. acting jointly and severally (the "Airlines") for an approximately sixteen acre site in the east end of La Guardia Airport for construction of a new passenger terminal intended to have at least nine gates with approximately 250,000 square feet of interior space. The building will be physically connected to the existing Eastern Shuttle Terminal. The Airlines will construct all necessary paving and utilities, including any upper level roadway and associated roadways work and a replacement electrical substation to serve all three terminals in the east end of the airport, with the Port Authority to reimburse or credit the Airlines for the appropriate share of the cost allocated to the Delta Terminal. The Airlines will also demolish the two existing hangars which they currently occupy on the site.

The new terminal lease will have a fixed term with respect to the construction period and thereafter will be for one year on a month-to-month basis. The Airlines will pay under the new lease not less than the rentals for the hangars and associated land received today and as scheduled to be paid through August 31, 2006 (the expiration date of the Eastern Shuttle lease). New rentals will then be developed by the Port Authority beyond that date. There will be a two year deferral of rent for Hangar 8 which must be demolished for construction of the new terminal and a six months' deferral of rent for Hangar 6 which will be demolished later in the project to allow completion of the aircraft parking area. These rental deferrals will be paid from the opening of the terminal but no later than January 1, 1993 through August 31, 2006. Port Authority construction payments will be the basis for an additional monthly rental at an appropriate payment factor (based on a 25 year or lesser period) for each dollar so paid by the Port Authority plus accruals during construction. Payment of this additional monthly rental will commence on the completion of construction but not later than January 1, 1991. Payment will be completed (assuming uninterrupted annual renewals) no later than December 31, 2015.

Port Authority construction payments will be made for the costs of the construction of the new terminal and related facilities including associated roadway and infrastructure costs. Construction payments on the project will in no event exceed \$162 million plus unutilized funds from construction by the Airlines of the in-flight kitchen at LaGuardia Airport as set forth in a separate board authorization. The Airlines will be obligated to provide additional investment of at least 13% of the total cost of construction of the new terminal and related facilities.

The lease will also provide for a single payment by the Port Authority to the Airlines of \$10 million plus their unamortized investment as defined in the lease, upon the obtaining of possession of the premises by the Port Authority in the event the Port Authority terminates or does not renew the month-to-month tenancy other than for cause. Similarly, the Airlines will be obligated to make a single payment of \$10 million to the Port Authority in the event they terminate the month-to-month tenancy or do not renew it other than for cause. Under the terms of the lease the Airlines will be responsible for operations, maintenance and insurance within the premises. The Airline will also be responsible for bringing utilities to the premises, and consumption will be metered and paid for.

It was further recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an amendment to the Eastern Air Lines Shuttle Terminal lease to provide for the surrender of a ramp area, leasing of additional premises, construction and rental amendments as appropriate; and to enter into agreements with Eastern Air Lines, Inc. and Continental Airlines, Inc. (New York Airlines, Inc.) to provide for the surrender of space and gates under their Central Terminal Leases.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, for and on behalf of the Port Authority, be and he hereby is authorized to simultaneously enter into a new lease with Continental Airlines, Inc. and Eastern Air Lines, Inc. for a new passenger terminal substantially on the terms set forth above. an agreement with Eastern Air Lines, Inc. amending its Shuttle Terminal lease substantially as set forth above. and agreements with Eastern Air Lines, Inc. and Continental Airlines, Inc. (New York Airlines, Inc.) with respect to their Central Terminal leases substantially as set forth above; the form of said agreements to be subject to the approval of General Counsel or his designated representative.

La Guardia Airport - Lease Covering Construction and
Construction Payments for New Flight Kitchen with
Continental Airlines, Inc. and Eastern Air Lines, Inc.

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease agreement with Continental Airlines, Inc. and Eastern Air Lines, Inc. ("the Airlines") for a site of approximately three acres at LaGuardia Airport for the construction and operation of an approximately 40,000 square foot flight kitchen facility and related vehicular parking and access roads. The lease would have a fixed term with respect to the construction period and thereafter will be for one year on a month-to-month basis. The lease will also provide for a single payment by the Port Authority to the Airlines of \$500,000 upon the obtaining of possession of the premises by the Port Authority in the event the Port Authority terminates or does not renew the month-to-month tenancy other than for cause. Similarly, the Airlines will be obligated to make a single payment of \$500,000 to the Port Authority in the event they terminate the month-to-month tenancy or do not renew it other than for cause. The Port Authority would make construction payments to the Airlines for the aforesaid construction up to a maximum of \$10 million. Monthly rentals would commence after completion of construction but no later than November 1, 1989 and consist of a ground rental at an annual rate equal to a prorated part of \$62,900 per acre if and to the extent the Airlines' costs of preparing the site for construction of the facility, which involves the removal of substantial excess material, are less than \$2.5 million with no ground rental being payable if such costs exceed \$2.5 million. The Airlines will pay a facility rental at an appropriate monthly payment factor (based on a 25 year or lesser period) for each dollar of such construction payments plus accruals during such construction. The Airlines would be responsible for bringing utilities and access roadways to the premises and for the operation and maintenance of the premises.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, be and he hereby is authorized, for and on behalf of the Port Authority, to enter into a lease agreement with Continental Airlines, Inc. and Eastern Air Lines, Inc. at LaGuardia Airport, substantially on the terms set forth above; the form of the agreement to be subject to the approval of the General Counsel or his designated representative.

SEMI-ANNUAL REPORT OF 1988 BUDGET RESOLUTION

AUTHORIZATIONS

Jan. 1 - June 30, 1988

(Dollars in Millions)

	Amount Provided Under 1988 Resolution	<u>Contracts Authorized thru 6/30/88</u>	
		Total Amount Authorized	Estimated Amount To Be Spent in 1988
Professional, Technical and Advisory Services:			
A&E	\$ 97.9	\$ 15.5	\$ 44.2
Job Shoppers	10.6	14.9	9.1
Advertising	6.2	7.4	1.7
Consultants	19.0	20.4	14.4
Professional, Technical & Advisory Services Total	\$133.7 (1)	\$ 58.2	\$ 69.4 (1)
Purchase of Commodities	12.0	6.0	6.0
Maintenance & Services	31.1	60.9 (2)	23.0
Capital Construction	74.3	35.3	29.7
TOTAL	\$251.1	\$160.4	\$128.1

Notes:

(1) Professional, Technical and Advisory Services

Approximately \$42 million is included in the Budget Resolution amount for Kennedy and Newark 2000 projects, however contracts for this work have been authorized through separate Board authorizations in 1988 rather than via the 1988 Budget Resolution. The amount estimated to be spent in 1988 is \$32 million and is included in the above summary.

(2) Maintenance and Services

The total amount authorized for maintenance and service contracts includes \$45.9 million for the EWR Fuel Farm maintenance contract which was not anticipated at the time of the Budget Resolution. This contract was renegotiated in 1988. The amount estimated to be spent in 1988 under this contract is \$14 million; the cost of this work is included in the 1988 Budget, and is shown in the estimated amount to be spent.

Whereupon, the meeting was adjourned.

David Z. Plavin, Director of Aviation Redevelopment Programs
Sally Sakin, Administrative Assistant
Morris Sloane, Director of Aviation Operations
Joseph L. Vanacore, Assistant Executive Director/Capital Programs
Barry Weintrob, Chief Financial Officer

The meeting was called to order by Acting Chairman Ronan.

Action on Minutes

The Secretary submitted for approval Minutes of the meetings of August 25 and September 8, 1988. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey has expired.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on October 13, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on October 13, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on October 13, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on October 13, 1988, in addition to matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 10/13/88)

**Port Authority Operating Equipment-Lease Financing Program:
Expansion and Modification**

The Board, at its meeting on April 11, 1985, authorized the establishment of the Port Authority Operating Equipment-Lease Financing Program (the "Program") which permitted the Port Authority to enter into lease-financing transactions in an aggregate principal amount not to exceed \$10 million at any one time. This maximum aggregate was increased to \$25 million by the Board at its meeting of April 10, 1986, and to \$50 million at its meeting of April 9, 1987, at which time the period for entering into lease-financing transactions was extended from June 30, 1988, to June 30, 1990.

It is now appropriate to expand and modify the Program to increase the principal amount of lease-financing transactions which may be outstanding at any one time under the Program from \$50 million to \$75 million; to extend the period during which lease-financing transactions may be entered into under the Program from June 30, 1990 to December 31, 1993; to allow for use of interest rates for lease-financing transactions that are different from the rate structure currently in effect; and to provide for payment of certain financial, legal and administrative charges for services rendered by third-persons to the Port Authority or others in connection with the proposed expansion and modification of the Program and the administration of such expanded Program.

The Program has enabled the Port Authority to purchase operating equipment, including automotive vehicles, telephone, radio and computer equipment, and office furnishings, through cost efficient lease-financing transactions. A Master Financing Lease with the initial lessor-investor under the Program, Daily Tax Free Income Fund, Inc., covers up to \$25 million of operating equipment and is being fully utilized. Substantially more equipment is expected to be eligible for lease in the future. The proposed expansion and modification of the Program is necessary to allow the Port Authority to fully utilize the benefits of the Program on terms substantially more favorable than the terms in effect with the initial lessor-investor.

In this connection, staff recently solicited proposals from thirteen leasing and investment firms to determine their interest in the Program.

Of nine proposals received, the proposal of Wellfleet Capital Company ("Wellfleet"), one of the parties to the existing agreement with the initial lessor-investor, and Ehrlich Bober & Co., Inc. ("Ehrlich Bober"), would take advantage of the lower rates associated with a variable rate demand structure with the lease financing obligations being placed with a limited number of as yet undetermined investors. Each investor will have the right to terminate at any time all or a portion of lease-financing transactions in which it is involved and Wellfleet and Ehrlich Bober will attempt to place the obligation with another investor in such event. The restricted investor format of the Wellfleet/Ehrlich Bober proposal has the advantage of continuing to isolate the Program from any current or future market for Port Authority securities, and thus would not create confusion in the marketplace.

(Board - 10/13/88)

Rental obligations under the Program would continue to be an operating expense of the Port Authority payable in the same manner and out of the same revenues as all other such expenses.

WHEREAS, The Port Authority of New York and New Jersey (hereinafter referred to as the "Authority") has been authorized and empowered to issue bonds, notes, securities or other obligations or evidences of indebtedness to provide funds for the financing of capital or other expenditures in connection with its facilities; and

WHEREAS, on April 11, 1985, the Authority, inter alia, authorized the Executive Director to enter into lease-financing transactions (hereinafter referred to as the "Port Authority Operating Equipment-Lease Financing Program" or the "Lease Financing Program") no earlier than May 1, 1985, and no later than June 30, 1988, to facilitate the purchase of portions of the Authority's operating equipment in an aggregate principal amount of lease-financing transactions not to exceed \$10 million at any one time; and

WHEREAS, on July 11, 1985, the Authority clarified the list of facilities of the Authority for which operating equipment could be purchased under the Lease-Financing Program; and

WHEREAS, on April 10, 1986, the Authority, inter alia, authorized an increase in the aggregate principal amount of lease-financing transactions to be outstanding under the Lease Financing Program at any one time from up to \$10 million to up to \$25 million; and

WHEREAS, on April 9, 1987, the Authority, inter alia, authorized an increase in the aggregate principal amount of lease-financing transactions to be outstanding at any one time under the Lease Financing Program from up to \$25 million to up to \$50 million and extended the period during which lease-financing transactions may be entered into under the Lease Financing Program from June 30, 1988, to June 30, 1990; and

WHEREAS, the Authority has determined to further increase the aggregate principal amount of lease-financing transactions to be outstanding at any one time under the Lease Financing Program from up to \$50 million to up to \$75 million; to extend the period during which lease-financing transactions may be entered into under the Lease Financing Program from June 30, 1990, to December 31, 1993; and to provide for certain changes in the maximum interest rate and fees payable under the Lease Financing Program;

(Board - 10/13/88)

NOW, THEREFORE, after due consideration had, it is

RESOLVED, that the resolution of April 11, 1985 (appearing at pages 150 et seq. of the Official Minutes of that date) entitled "Port Authority Operating Equipment - Lease Financing Program," as heretofore amended by resolutions of the Authority adopted July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of that date), entitled inter alia, "Report on Public Hearing - Lease Financing Program - Amendments", April 10, 1986 (appearing at pages 213 et seq. of the Official Minutes of that date) entitled "Port Authority Operating Equipment - Lease Financing Program - Amendment" and April 9, 1987 (appearing at pages 371 et seq. of the Official Minutes of that date) also entitled "Port Authority Operating Equipment - Lease Financing Program - Amendment" is hereby further amended and supplemented to read as follows:

RESOLVED, that the Executive Director; Deputy Executive Director; Assistant Executive Director; Chief Financial Officer; or Treasurer of the Authority is hereby authorized on behalf of the Authority to enter into lease-financing transactions on and prior to December 31, 1993, to facilitate the purchase of portions of the Authority's operating equipment including, but not limited to: automotive vehicles, telephone, radio and computer equipment and office furnishings, all of which vehicles, equipment and furnishings may be purchased for use by the Authority or others at any of its facilities (including facilities of the Authority certified or to be certified after the date hereof) in an aggregate principal amount not to exceed \$75 million of lease-financing transactions at any one time outstanding; with interest payable under the Lease Financing Program by the Authority to the lessor-investor or investors at a rate of interest not to exceed 60% of Bank of America's variable reference rate of interest, publicly announced as such, for the agreement with the initial lessor-investor, and in the case of lessor-investors other than the initial lessor-investor or in the event of a significant change in market conditions as determined by the Executive Director (which in each case the Executive Director is hereby authorized to fix and determine), at a rate of interest to be fixed and determined by the Executive Director not to exceed the greater of 85% of Bank of America's variable reference rate, publicly announced as such, or 100% of Ehrlich Bober's published variable tax-exempt rate; with the term of each letting of equipment not to exceed the useful life of the equipment included in such letting; and with the rental obligation for each letting of equipment to be divided into components of principal and interest and to be an operating expense of the Authority, payable in the same manner and out of the same revenues as all other such expenses of the Authority; and it is further

(Board - 10/13/88)

RESOLVED, that the Executive Director; Deputy Executive Director; Assistant Executive Director; Chief Financial Officer; or Treasurer of the Authority is hereby authorized on behalf of the Authority to enter into agreements with BankAmerica Trust Company of New York, Wellfleet Capital Company, Ehrlich Bober & Co., Inc., or other financial services entities, and with the initial lessor-investor or other lessor-investors or investors, to effectuate the purchases and lease-financings (and to take or authorize such other action or actions as may be necessary or desirable in connection with such purchases and lease-financings, including preparation and issuance of an offering memorandum or other offering statement as may be appropriate) of the above described operating equipment; to provide for a placement fee of up to 1% of the principal amount of equipment financed by the Lease Financing Program to Wellfleet Capital Company, or other financial services entities, to be paid as funds are periodically received from the lessor-investor or investors; to provide for the payment by the Authority of an annual administrative fee or fees to BankAmerica Trust Company of New York, or other financial services entities, not in excess of a total amount of \$40,000 per year during the term of the Lease-Financing Program; to provide for the payment of one-time only legal, financial and administrative charges not in excess of a total of \$50,000 in connection with the establishment of a Master Financing Lease arrangement with other than the initial lessor-investor and the payment of such other reasonable legal and administrative charges as are approved by the Executive Director that may arise from time-to-time in connection with the Lease Financing Program, the continuing agreement with BankAmerica Trust Company of New York or any supplement thereto not to provide for any other payments, by the Authority of legal, financial or administrative charges of BankAmerica Trust Company of New York or any supplement thereto in connection with the establishment of a lease financing program with the initial lessor-investor in excess of the \$20,000 payment previously made; and it is further

RESOLVED, that no part of the payments by the lessor-investor or investors to the Authority shall be invested directly or indirectly in such a manner as will cause the interest payable by the Authority to the lessor-investor or investors under the Lease Financing Program to be includible in the gross income of the recipients thereof under Section 103(a) of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the regulations thereunder, by operation of Section 148, as amended, or successor provisions of law, and the regulations thereunder; and it is further

RESOLVED, that the Chairman of the Authority; Vice-Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Deputy Executive Director; Assistant Executive Director; Chief Financial Officer; or Treasurer of the Authority is hereby authorized, in connection with the Lease Financing Program, to take any action which may be necessary or desirable to assure that the lease-financing transactions included in the Lease Financing Program are in conformity with the provisions of Section 103(a) of the Internal Revenue Code of 1986, as amended (hereafter referred to as the "Code"), or successor or prior provisions of law to the extent applicable, and regulations thereunder, and that the interest payable by the Authority under the Lease Financing Program to the lessor-investor or investors is not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, and regulations thereunder, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Deputy Executive Director; Assistant Executive Director; Chief Financial Officer; Comptroller; or Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the lease-financing transactions included in the Lease Financing Program for the purposes for which such lease financing transactions are entered into, as to the status of any projects for which the proceeds of the lease-financing transactions included in the Lease Financing Program would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee on Finance and any such actions taken in connection therewith are hereby ratified; and it is further

RESOLVED, that the form of the agreements hereby authorized be subject to the approval of General Counsel or his authorized representative.

(Board - 10/13/88)

**New York Airports - Carey Transportation, Inc. - Bankruptcy
Reorganization - Approval of Agreements**

It is recommended that the Board authorize the Executive Director to enter into agreements settling the obligations of Carey Transportation, Inc. ("Carey") to the Port Authority in connection with Carey's Chapter 11 Plan of Reorganization ("the Plan") as approved by its creditors and the Bankruptcy Court. Carey filed for protection under Chapter 11 of the Bankruptcy Code while continuing to operate its ground transportation service between Manhattan and each of the New York Airports ("the Airports") and between the Airports. The Port Authority was a principal creditor of Carey's in the bankruptcy proceeding with a claim of approximately \$1.5 million.

Carey has irrevocably offered to enter into an agreement ("the Payment Agreement") providing for the payment to the Port Authority of \$1.1 million, the portion of the debt representing ground transportation permit fees, in ten equal annual payments without interest with the first payment due on August 1, 1989. Connecticut Limousine Service, Inc. ("Connecticut"), a corporate affiliate of Carey, has irrevocably offered to enter into an agreement ("the Guaranty Agreement") guaranteeing the payment to the Port Authority of approximately \$165,000 of Carey's debt under the Payment Agreement if Carey is in default thereunder, unless the Port Authority has denied Carey the right to operate at the Airports with permittee status for a reason other than Carey's failure to pay fees or for one of the other reasons provided for in the Guaranty Agreement.

Under the terms of a proposed agreement ("the Motor Coach Agreement"), Carey would continue its use of twenty Port Authority owned MCI-9 motor coaches. The proposed agreement would have a five-year term commencing as of July 1, 1988. The monthly payments of \$1.374 per motor coach would include Carey's unpaid pre-petition obligation with respect to the motor coaches net of its prior payment of 15% of said obligation as described below. The payments are computed based on the expectation that a typical MCI-9 motor coach of the age of these motor coaches would have a residual value of \$60,000 at the end of the term of the Motor Coach Agreement. At the end of the term of the Motor Coach Agreement, Carey and the Port Authority would attempt to negotiate a sale of the motor coaches to Carey at their then market value. In the event those negotiations are not successful, the Port Authority would regain possession of the motor coaches from Carey. In such event, an arbitration or appraisal process would then determine the market value of a typical MCI-9 motor coach of the age of these motor coaches as well as the market value of each motor coach; if the market value of a particular motor coach exceeds the typical market value, the Port Authority would pay the difference to Carey; if the market value of a particular motor coach is less than the typical market value, Carey would be obligated to pay the difference to the Port Authority.

The Motor Coach Agreement would authorize Carey to use the motor coaches for charter trips having either an origin or destination in the Port District, provided such charter service would not affect Carey's Airport ground transportation service.

(Board - 10/13/88)

Carey has paid the Port Authority "fifteen cents on the dollar" upon the Plan becoming effective with respect to the \$426,000 comprising its pre-petition obligations not covered by the Payment Agreement, the same amount as is payable to its general creditors under the Plan. Except for approximately \$146,000 that would be paid pursuant to the terms of the Motor Coach Agreement, the remaining 85% of this amount will not be recovered.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he is hereby authorized, for and on behalf of the Port Authority, to enter into an agreement with Carey Transportation, Inc. providing for the partial payment to the Port Authority of monies due the Port Authority for ground transportation permit fees, substantially on the terms set forth above; and it is further

RESOLVED, that the Executive Director be and he is hereby authorized, for and on behalf of the Port Authority, to enter into an agreement with Connecticut Limousine Service, Inc. providing for the guaranty of a portion of the monies due the Port Authority by Carey Transportation Inc., substantially on the terms set forth above; and it is further

RESOLVED, that the Executive Director be and he is hereby authorized, for and on behalf of the Port Authority, to enter into an agreement with Carey Transportation, Inc. providing for Carey's continued use of twenty Port Authority-owned motor coaches substantially on the terms set forth above; and it is further

RESOLVED, that the form of the agreements shall be subject to the approval of General Counsel or his designated representative.

**George Washington Bridge - Adjustment of Wages and Benefits
for T.U.C.S. Cleaning Service, Inc.**

It was recommended that the Board ratify the action of the Executive Director in authorizing an increase in the compensation payable to T.U.C.S. Cleaning Service, Inc. ("T.U.C.S."), a minority cleaning contractor at the George Washington Bridge, under Contract PSE-483, covering the performance of general cleaning services at the George Washington Bridge, and that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement amending the contract to continue payment of such increased compensation for the remainder of the term of the contract. The contract was awarded to T.U.C.S., the lowest bidder, by the Executive Director for a two-year term commencing December 1, 1987, after public advertisement. Since the commencement of the contract, T.U.C.S. has had difficulty retaining employees on staff and the Facility has experienced serious problems because of the high turnover rate. Because of T.U.C.S.' inability to meet its contractual obligations, liquidated damages were assessed against the contractor pursuant to the provisions of the contract. Payment of damages, and operational problems resulting from the unusual turnover rate, were causing T.U.C.S. to consider default. Discussions with T.U.C.S. indicated that the high turnover rate was directly related to the contract's wage structure. Staff therefor negotiated an increase in compensation due under the contract of approximately \$2,000 per month for a total of \$39,960 for the remainder of the term of the contract. It was anticipated that this increase would allow the contractor to pay higher wages and benefits to its employees. A downward adjustment to T.U.C.S.' profit margin was also negotiated. The adjustment, together with the concessions made by T.U.C.S., would permit a wage increase of \$1.25 per hour bringing the average hourly rate paid by T.U.C.S. up from \$4.50 per hour to \$5.75 per hour. The Executive Director authorized the payment of this increase effective April 15, 1987, premised on the immediate need to eliminate the Facility's critical operational problems. It is anticipated that continued payment of the higher wages and benefits will permit the contractor to complete performance of the contract.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board does hereby ratify the Executive Director's authorization of an increase in the compensation payable to T.U.C.S. Cleaning Service, Inc., a minority cleaning contractor at the George Washington Bridge, under Contract PSE-483 and that the Executive Director be and he hereby is authorized, for and on behalf of the Port Authority, to enter into an agreement amending Contract PSE-483, substantially in accordance with the terms and conditions set forth above, the form of the agreement to be subject to the approval of General Counsel or his designated representative.

**Lincoln Tunnel - North Tube Rehabilitation - Project
Authorization**

The Lincoln Tunnel handles close to 60,000 eastbound vehicles daily and approximately 41 million vehicles annually in both directions. The North Tube which carries westbound traffic was opened in 1945. Although the original brick wearing surface was removed and replaced with asphalt in 1967, the tube has never undergone a major reconstruction. Expensive temporary repairs to the roadway have been performed out of necessity. Accelerated deterioration has occurred in recent years, largely due to a delamination plane in the concrete slab that exists throughout 60% of the roadway. In view of the deteriorated condition of other elements and the need for structural repairs, a simultaneous rehabilitation of the tube's roadway, structural elements, Galvin Plaza at the New York entrance and other elements would ensure its immediate and long term structural integrity and reduce the number of tunnel closings in the future for both rehabilitation and maintenance purposes.

The proposed project provides for the rehabilitation of the roadway slab, manholes and curb drains, and resurfacing of the roadway. In addition, emergency and utility niche doors and personnel doors will be replaced as well as the catwalk hand rail. The catwalk car rail will be rehabilitated. As part of the project the ceiling and fresh air duct will be repaired while damaged and missing wall and ceiling tile will be replaced. The deteriorated terra cotta concrete baffle wall will be demolished and replaced with a smooth concrete finish wall. Finally, the slabs of Galvin Plaza, the New York entrance, will be rehabilitated.

To minimize inconvenience to our customers and reduce interference with traffic flow and essential facility operations, performance of this project will be restricted to off-peak nighttime hours. The minimal inconvenience is more than offset by the anticipated substantial reduction in the future number of tunnel closings for pavement and other maintenance.

The contracts for the project will provide for a mandatory participation of at least 10% Port Authority Certified Minority Business Enterprises and Women's Business Enterprises.

Whereupon the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes:

1. a project for the rehabilitation of the Lincoln Tunnel North Tube and Galvin Plaza roadways at a cost presently estimated at \$57 million, including payments to contractors, allowances for extra work and net cost work, engineering, administrative and financing expenses and a project contingency, and

2. the Executive Director to: a) take such action with respect to purchase and construction contracts, contracts for professional and advisory services and contracts for construction management services for the foregoing project as he deems in the best interest of the Port Authority, including without limitation award to the lowest bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable; rejection of all bids; solicitation of new bids on revised or the same requirements or negotiation with one or more bidders or contractors; and b) execute contracts and supplemental agreements with such contractors as he deems in the best interest of the Port Authority and to order extra work and net cost work in connection with each contract including supplemental agreements thereto; and it is further

RESOLVED, that the form of said agreements be subject to the approval of General Counsel or his authorized representative.

**The Teleport - Contract TP-110.013 - The Telecenter Building
- Settlement of Claim and Additional Extra Work**

The Board, at its meeting on October 11, 1984, authorized the Executive Director to award Contract TP-110.013, Telecenter Building, the Teleport, to the qualified contractor submitting the lowest proposal based on proposals to be received. Subsequently, the Executive Director on January 30, 1985 authorized the award of Contract TP-110.013 to Anthony Marino Construction Corporation (AMCC) at its proposal price of \$10,881,000, exclusive of an allowance for extra work in the amount of \$1.1 million and net cost work estimated at \$250,000. Various subsequent authorizations by the Executive Director and the Director, World Trade Department, increased extra work expenditures to the amount of \$1,350,000.

Contract TP-110.013 provided for the erection of a two-story building of approximately 56,000 square feet and for certain work associated with the completion of the Radio Frequency Interference Shield Wall and related site work at the Teleport. The contract completion date was February 1986. Beneficial occupancy was obtained in September 1986, but work was not completed by the contractor until August 1987.

In May 1988, AMCC submitted a claim against the Port Authority in the amount of \$4,253,320 for the following: \$3,009,122 for delay costs incurred by AMCC and its electrical subcontractor; \$844,609 for additional extra work; and \$399,589 for interest costs related to unpaid base and extra work contract amounts and for extended general conditions and main office costs. The basis of the delay claim was for additional costs alleged to have been incurred by the contractor as a result of delays due to design changes made by the Port Authority and its partners in the Teleport project to the structural steel, electrical distribution system, the communication ductwork and distribution system, and to the material used for the curtain wall.

After various presentations by AMCC and after a thorough review and evaluation by staff of the World Trade and Economic Development, Law and Audit Departments, a tentative settlement, subject to Board approval, has been reached with AMCC in the amount of \$1,013,360, of which \$563,360 is for additional extra work. The additional extra work consists of the following: approximately \$143,360 for miscellaneous structural, architectural, electrical and site changes; approximately \$260,000 for changes in the fabrication of the exterior curtain wall; approximately \$35,000 for an increase in the sprinkler system pressure; approximately \$65,000 for Teleport Communications' changes; and approximately \$60,000 for protection from winter conditions.

Upon settlement of the claim, the Port Authority will seek reimbursement from Teleport Communications for costs, in addition to the already-agreed upon \$619,000 for previously authorized extra work, associated with changes requested by them.

AMCC has signed a release of all claims under the contract to become effective upon Board approval of the settlement.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, is hereby authorized to enter into an agreement for the settlement of all claims by Anthony Marino Construction Corporation (AMCC) against the Port Authority arising out of Contract TP-110.013. The Teleport Telecenter Building, in the amount of \$1,013,360; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his authorized representative.

**Bathgate Industrial Park - Lease Surrender Agreement with
Protocom Devices, Inc.**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a surrender agreement with Protocom Devices, Inc. (Protocom) covering its premises on Block 2920 at the Bathgate Industrial Park. Pursuant to the proposed agreement Protocom would repay its existing obligations for equipment purchases plus arrearages aggregating approximately \$2.1 million (after retention and application by the Port Authority of \$40,000 of the \$75,000 cash security deposited by Protocom) on a financially self-sustaining basis over a nine-year period. In exchange for improvements valued at \$142,000 paid for by Protocom, the Port Authority would credit Protocom with approximately \$65,000, which is the amount of its basic rental arrearage.

Protocom, a start-up telecommunications firm, has occupied approximately 40,400 square feet at the Bathgate Industrial Park since July 1986. As part of the lease arrangement, the Port Authority provided Protocom with \$1.7 million for the purchase of equipment subject to a security interest in the Port Authority. Several months after moving into their facility Protocom experienced financial difficulties, was unable to generate the sales and revenues anticipated, and a new management team was put in place. In August 1987, the Port Authority gave its consent to Protocom to sublet approximately 30,000 square feet to Avne Systems, Ltd., which subletting generated sufficient rental income to pay Protocom's current basic rental obligations and to reduce its basic rental arrearage.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized, for and on behalf of the Port Authority, to enter into an agreement with Protocom Devices, Inc. covering the surrender of its premises at the Bathgate Industrial Park and the repayment of its existing obligations for equipment purchases substantially in accordance with the terms and conditions set forth above; and it is further

RESOLVED, that the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 10/13/88)

Newark South Ward Industrial Park - Amendment to Municipal Agreement

Toward the end of 1987, the Mayor of the City of Newark (the "City") requested that the Port Authority temporarily place on hold its plans for the development of the Newark South Ward Industrial Park (the "Park") while the City negotiated for the development of the entire site by a private developer. Subsequently, the City advised the Port Authority that it had reached agreement with Morris Companies ("Morris"), a major developer of industrial properties, for the development of the Park site.

The development of the Park as an industrial development project or facility under the bi-state legislation authorizing the Port Authority to effectuate industrial development projects or facilities was originally authorized by the Board at its meeting on November 13, 1986. Subsequently, pursuant to such authorization, on July 7, 1987, the Port Authority entered into a Municipal Agreement with the City that, among other things, provided for a \$15 million Port Authority investment (\$5 million from funds made available for projects in the State of New Jersey under the Governors' Agreement of June 1983, \$1 million which the City would commit from its Community Development Fund monies which are provided by the Port Authority as part of the Newark Marine and Air Terminals Lease and \$9 million from other Port Authority funds) which was to be used for acquisition, relocation, demolition, site preparation, and the construction of one industrial building on the six-building, 500,000 square foot site. The Port Authority was to own the site, make payments in-lieu-of taxes, share net revenues with the City, and seek private developers for the other five buildings.

It is proposed that the Municipal Agreement between the City and the Port Authority would be amended to provide substantially for the following:

1. Morris will construct an approximately 400,000 square foot industrial building on the project site consistent with the requirements of the bi-state legislation authorizing the Port Authority to effectuate industrial development projects or facilities. Morris will pay to the City \$2 million toward the acquisition of the project site and the relocation of present occupants.

2. The City will commit for such acquisition and relocation \$1 million of its Community Development Fund monies which are made available by the Port Authority as part of the Newark Marine and Air Terminals Lease.

3. Following the expenditure of the \$2 million provided by Morris and the \$1 million made available from the Community Development Fund, the Port Authority will make available to the City for such acquisition and relocation up to \$3.5 million from funds made available for projects in the State of New Jersey under the Governors' Agreement of June 1983. Under no circumstances will the Port Authority be required to provide more than the foregoing \$3.5 million for this project. In the event that more than \$6.5 million is required to effectuate the acquisition of the project site and relocation of present occupants, it will be the sole responsibility of the City to secure the additional funds. The City will provide for the return of

the \$3.5 million in the event of a default by Morris or other circumstances which result in the proposed project not being effectuated. Should the total cost of acquisition and relocation be less than \$6.5 million, the difference between the total cost of acquisition and relocation and \$6.5 million will be used to offset the approximately \$1.1 million that the Port Authority has expended on the project thus far.

4. The City will own the project site and lease it to the Port Authority, the Port Authority will lease the project site back to the City, and the City will then lease it to Morris. The consideration for the City/Port Authority leases will be identical nominal amounts and all leases will be for identical five-year terms commencing upon a date to be agreed upon. The Port Authority will subordinate its leasehold rights in order to allow Morris to obtain financing for its building improvements. Morris would be required to complete the industrial building within the five-year lease period.

5. There will be no taxes, payments in-lieu-of taxes, or assessments of any kind due from the Port Authority. The Port Authority will have no responsibility for the effectuation or operation of the project or for the acquisition of the project site.

The Port Authority has previously allocated all of the \$137.5 million made available for regional development projects in the State of New Jersey as a result of the Governors' Agreement of June 1983. With this revised basis for participation in the allocation for the Newark South Ward Industrial Park, \$1.5 million will be available for projects in the State of New Jersey.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to enter into an amendment of the Municipal Agreement and any further agreements or leases contemplated thereby with the City of Newark concerning the Port Authority's participation in the development of the Newark South Ward Industrial Park to provide for a Port Authority role limited to the provision of funds substantially in accordance with the provisions described above; and it is further

RESOLVED, that the form of the amendment of the Municipal Agreement with the City of Newark hereby authorized, and any further agreements or leases contemplated thereby, be subject to the approval of General Counsel or his authorized representative.

(Board - 10/13/88)

**Hoboken to Battery Park City Ferry Service - Selection of
Private Operator - Agreement with Arcorp/Hartz Ferry
Transportation Joint Venture**

At its meeting on August 25, 1988, the Board adopted the Executive Director's recommendation to select Arcorp/Hartz Ferry Transportation Joint Venture ("Arcorp/Hartz") as the private operator for the Hoboken, New Jersey to Battery Park City, New York ferry service and authorized completion of negotiations for an agreement with this firm. The agreement with Arcorp/Hartz is needed to implement a ferry service between Hoboken, New Jersey and Battery Park City, New York. This service will increase trans-Hudson public transit capacity for the growing New Jersey to lower Manhattan travel market.

The service will be a peak period commuter ferry service between Hoboken, New Jersey, and Battery Park City in lower Manhattan, designed to relieve passenger demand on PATH's Hoboken to World Trade Center Line. The operator will provide service adjustments as needed to achieve this result, including provision of additional or larger vessels, fare adjustments, changes in headways, additional passenger amenities, and additional routes. Under other stated conditions relating to market demand the operator may institute additional service to other lower Manhattan sites. The principal attributes of the service will be as follows:

- Service Commencement:** Spring 1989.
- Hours of Operations:** 7-10 a.m., 4-7 p.m., Monday to Friday; some off-peak service may be provided.
- New Jersey Terminal:** South of the former Erie-Lackawanna Terminal in Hoboken, New Jersey, adjacent to New Jersey Transit's Rail and Bus Terminals.
- New York Terminal:** North of the North Cove of Battery Park City in New York, New York, adjacent to the Hudson River bulkhead.
- Fares:** Operator will determine fares, taking into consideration the mass transit nature of the service.
- Passenger Capacity:** Start-up service designed to handle at least 2,100 passengers in the peak hour with headway of no more than 10 minutes; will be increased as warranted by demand, up to 6,000 passengers in the peak hour at Battery Park City. A second service from Hoboken to another lower Manhattan site will be instituted if required.

(Board - 10/13/88)

- Vessels:** Four vessels, including one spare, capable of carrying 350 passengers, as an initial requirement.
- Initial Terminals:** Floating barges moored by pilings with enclosed waiting areas.

Under the proposed Operator Agreement, Arcorp/Hartz will be responsible for the design, construction, operation and maintenance of the ferry service between Hoboken and Battery Park City, including provision of vessels and initial terminal facilities.

The Port Authority will make the terminal facility sites available but will not make any payments for capital or operating costs other than for permanent terminals and for landside access improvements at Hoboken and Battery Park City. Gross revenues collected by Arcorp/Hartz from the permanent terminals, including landing fees charged to other services, concessions and advertising, in excess of the terminals' operations and maintenance costs and a management fee of 8% of gross revenues, will be divided, with two-thirds for the Port Authority and one-third for Arcorp/Hartz.

The term of the agreement is for twenty years, with an extension option premised upon major reinvestment by Arcorp/Hartz. Should Arcorp/Hartz be unable to meet the service requirements specified in the contract, the vessels, terminal facilities and ancillary equipment would be made available to the Port Authority.

Further, the principals of the Arcorp/Hartz joint venture will annually submit certified financial statements detailing the financial capability of the contracting entities to guarantee the financial commitments of the Arcorp/Hartz joint venture under the contract. The contracting entities will provide a performance bond should their financial capabilities be deemed insufficient.

Arcorp/Hartz will place additional vessels and/or larger replacement vessels into service as warranted by passenger demand at no cost to the Port Authority. Subject to approval by the Port Authority and to such limitations as the property owners of the terminal sites may impose, Arcorp/Hartz may use the vessels and terminal facilities for other revenue activities as long as commuter service is not affected.

The Port Authority will provide sites and permanent terminal facilities and make landside access improvements as required to serve increased passenger demand as well as provide all regulatory and environmental permits required for terminal siting and construction. Arcorp/Hartz will have an option to participate in the financing, design and construction of permanent facilities at Hoboken.

The Agreement will be subject to the Port Authority acquiring the necessary property rights and the Board granting the necessary certification and project authorization. Unless ordered by the Executive Director, Arcorp/Hartz will not be obligated to proceed with vessel procurement and construction until the rights to terminal sites and permits have been secured. If ordered to proceed, the Port Authority will reimburse Arcorp/Hartz for any incremental expenses for vessel procurement and construction incurred due to delays or Port Authority failure in acquiring necessary rights or permits.

Arcorp/Hartz will commence service under a three year license agreement between the Port Authority and Battery Park City Authority and a five year initial lease between the Port Authority and New Jersey Transit for the necessary terminal sites. The Port Authority will agree to reimburse Arcorp/Hartz for the remaining unamortized value of its investment (including up to \$3 million in accumulated operating losses for the first three years of service) if long term rights cannot be secured for the terminal sites in Hoboken or Battery Park City and suitable alternative sites cannot be procured by the Port Authority to allow for continuation of service and/or in event Board certification and project authorization are not obtained. Upon such payment, all vessels, interim terminals and equipment will become the property of the Port Authority.

Arcorp/Hartz will make a good faith effort to meet a goal of 10% and 1% for participation by Minority Business Enterprises (MBE) and Women's Business Enterprises (WBE), respectively, in operating and maintenance expenditures. The Port Authority and Arcorp/Hartz will make a joint good faith effort to meet a goal of 10% and 1% for participation of MBE's and WBE's, respectively, in the aggregate of all capital expenditures.

Arcorp Properties currently operates two trans-Hudson commuter ferry services from Weehawken, New Jersey, one to 38th Street in Manhattan and one to South Ferry in Manhattan.

Whereupon, pursuant to the foregoing report, the following resolution was adopted, Commissioners Gluck and Schulman not voting:

RESOLVED, that the Executive Director is hereby authorized to enter into an agreement with Arcorp/Hartz Ferry Transportation Joint Venture (Arcorp/Hartz), a joint venture of the APA Truck Leasing Corp., APA Transport Corp., Remus Realty DBA "Arcorp Properties", and Hartz Mountain Industries, Inc., for the design, construction, operation and maintenance of a trans-Hudson ferry service between Hoboken, New Jersey and Battery Park City in New York; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his authorized representative.

(Board - 10/13/88)

Agreement with New Jersey Transit for Cost Sharing and Reimbursement for Structural Investigation of Hoboken Terminal

At its meeting on June 13, 1985, the Board authorized staff to undertake the planning and design of a Hoboken, New Jersey to lower Manhattan, New York ferry service. Exploratory engineering inspections and tests are now required to determine the substructural/structural conditions of the area for the planned Initial and Hoboken Interim Ferry Facilities including adjacent structures and potential access ways, as well as of the Erie-Lackawanna Railroad and Ferry Terminal and its environs. This work is required to complete Stage I and II designs for the planned Hoboken Interim Ferry Facility. New Jersey Transit (NJT), which owns the terminal areas subject to the study, has concurred with the need for the structural integrity review and has requested that the studies include its Hoboken Rail terminal which also is located within the Erie-Lackawanna Terminal complex. NJT has concurred in a proposed cost sharing formula. The effort is expected to be completed by mid-1989.

The agreement for cost sharing with NJT will permit a comprehensive, integrated structural integrity and existing conditions review of the Erie-Lackawanna terminal and related areas. This work is needed to assure adequate and safe facilities for the initial ferry terminal, to complete Stage I and II designs of the interim Hoboken ferry planned by the Port Authority and to determine the potential feasibility of utilizing the old ferry terminal for service expansion.

Under the proposed agreement with NJT, the Port Authority will be responsible for completing the work scope, including the management and administration of any required professional advisory or technical services. NJT will reimburse the Port Authority for the study work on the following basis:

- NJT Rail Terminal - 100% of the costs associated with this area will be reimbursed by NJT.
- Erie-Lackawanna Ferry Terminal - 50% of the costs associated with this area will be reimbursed by NJT.
- Hoboken Initial and Interim Terminals - 50% of the costs associated with this area will be reimbursed by NJT.

The Port Authority's net cost for this work, including internal staff expenses, will be limited to \$800,000.

Whereupon, the following resolution was adopted, Commissioners Gluck and Schulman not voting:

RESOLVED, that the Executive Director is hereby authorized to enter into an agreement with New Jersey Transit (NJT) for cost sharing and reimbursement of Port Authority costs on the above basis incurred for substructural/structural integrity studies of the Erie-Lackawanna Railroad and Ferry Terminal and its environs in Hoboken, New Jersey, including the rail and ferry terminal portions of the structure as well as the site for Hoboken Initial and Interim Terminal Facilities for the Port Authority's Hoboken to Battery Park City Ferry Service; and it is further

RESOLVED, that the Executive Director is hereby authorized to enter into agreements for professional, advisory and technical services in an amount not to exceed \$1.6 million including staff costs to assist in performing the above-described studies; and it is further

RESOLVED, that the form of the said agreements are subject to the approval of General Counsel or his authorized representative.

(Board - 10/13/88)

**Hoboken to Battery Park City Ferry Service - Hoboken
Terminal Site - Initial Lease Agreement with New Jersey
Transit Corporation**

Over the past ten years, demand at Port Authority trans-Hudson facilities has grown steadily and in some cases these peak-period passenger volumes exceed existing capacity. Similar growth is expected to continue at least through the 1990's. Marketing studies indicate that one of the major growth corridors is the Hoboken, New Jersey to lower Manhattan, New York route which is currently served by PATH. Therefore a terminal close to the Hoboken PATH entrance would make the ferry an attractive option for PATH commuters and thereby accommodate excess demand on the Hoboken to World Trade Center line.

As indicated in a companion item for a Manhattan location, the Port Authority has been negotiating sites at Hoboken, New Jersey and Battery Park City, New York for over a year and is completing contract negotiations with Arcorp/Hartz to operate the service. Arcorp/Hartz will install the terminal facilities required at Hoboken for the initial service.

The general terms and conditions relating to acquisition of the site in Hoboken from the New Jersey Transit Corporation (NJT) are as follows:

The Port Authority would obtain a lease to locate an initial terminal at a site just south of the Erie-Lackawanna Terminal and obtain from NJT rights of access for construction. This agreement has an initial term of five years with an option to renew for three successive five-year periods. During the initial lease term, the consideration will be a nominal rental of \$1 per year. An appropriate rental rate will be negotiated if the renewal options are exercised.

Under the initial lease, the Port Authority has the option to lease the Pullman and Immigrant Building, the Mail Pier and Pier 1 in an "as is" condition. If the Port Authority chooses to lease any or all of these parcels, Arcorp/Hartz as the Port Authority's operator will be responsible for their maintenance and repair with the exception of heavy structural maintenance to pier or pier areas which would continue to be performed by the Port Authority.

Following execution of the initial lease, the Port Authority will negotiate with NJT for a long-term lease of the property needed for a more permanent ferry terminal. The contemplated long-term arrangement provides for a term of twenty years with three ten year options to renew. The Port Authority and NJT agree to negotiate the detailed terms of the long-term lease and consideration thereof including Port Authority funding for track and platform improvements required by NJT at the Hoboken Terminal to accommodate its waterfront rail connection which is designed to feed the ferry service.

Under the initial lease terms, the Port Authority is to provide general liability and other insurance against liability for bodily injury, death and property damage. New Jersey Transit and the Port Authority will indemnify each other as appropriate. The Port Authority will pass on these responsibilities where appropriate to Arcorp/Hartz as the ferry operator.

(Board - 10/13/88)

While the Port Authority is obligated to NJT to pay for all utilities and services necessary for operation and use of the site, the Port Authority will pass on these responsibilities to Arcorp/Hartz as the ferry operator. New Jersey Transit will have the right to review and approve all plans and specifications for any construction as well as the right to inspect work during construction and on completion to assure compliance with approved plans.

Whereupon, the following resolution was adopted, Commissioners Gluck and Schulman not voting:

RESOLVED, that the Executive Director be and he hereby is authorized to enter into a lease agreement with New Jersey Transit Corporation for an initial ferry terminal site in Hoboken, New Jersey for a five-year renewable term and exercise, at his discretion, options to lease additional specified property which may be required for the initial ferry service; and it is further

RESOLVED, that the agreements and all other documents required to consummate the aforesaid transactions be subject to approval of General Counsel or his designated representative.

(Board - 10/13/88)

**Hoboken to Battery Park City Ferry Service - Battery Park
City Terminal Site - License Agreement with Battery Park
City Authority - Acquisition of Riparian Rights -
Agreement with New York State Office of General Services**

Over the past ten years, demand at Port Authority trans-Hudson facilities has grown steadily and in some cases these peak-period passenger volumes exceed existing capacity. Similar growth is expected to continue at least through the 1990's. Marketing studies indicate that one of the major growth corridors is the Hoboken, New Jersey to lower Manhattan, New York route which is currently served by PATH. Therefore a terminus at Battery Park City, New York would make the ferry an attractive option for PATH commuters and accommodate excess demand from the Hoboken to World Trade Center line.

The Port Authority has been negotiating for sites at Hoboken, New Jersey and Battery Park City, New York for over a year and is completing contract negotiations with Arcorp/Hartz to operate the service. Arcorp/Hartz will install and maintain the initial terminal facilities at Battery Park City required for initial service.

The general terms and conditions of the Battery Park agreement are as follows:

The Port Authority would obtain an interim license from Battery Park City Authority (BPCA) to site a temporary terminal located outboard of the Hudson river bulkhead, just north of the North Cove. The terms of this agreement would be for three years, automatically renewable for successive one year terms, unless terminated upon six months written notice by either the Port Authority or BPCA after such initial three-year period. The consideration would be a nominal payment of \$10.

Any increase in costs to BPCA or its tenants for the maintenance and operation of the Winter Garden, the Common Areas of the World Financial Center and the Civic facilities of BPC due solely to the operation of the ferry terminal during the time the license agreement is in effect would be paid by the Port Authority. These costs will be determined at the end of each year of the license and, if disputed, will be determined through arbitration.

The license specifically anticipates negotiation of a long-term agreement, which would extend to 2069. These negotiations will include discussion of upland improvements and modifications to the Winter Garden and North Bridge to accommodate pedestrian flow, payments for increased operation and maintenance costs for common areas within the World Financial Center and an ultimate capacity limit on ferry passengers using the Battery Park City terminal of 6,000 per hour in the primary direction.

The ferry service will be operated only during the hours of 7:00 a.m. to 10:00 a.m. and 4:00 p.m. to 7:00 p.m., Monday through Friday, unless prior written consent is obtained from BPCA.

For the duration of the license agreement, it is agreed that not more than 3,000 passengers shall use the terminal in the primary direction during the peak hours of each business day. This limitation may be raised by an increment of 500 passengers annually after the first year of service to a maximum not to exceed 4,500 per hour. Approval of any such increase shall be conditioned upon the Port Authority mitigating the adverse impacts, if any, from such increased flows on the World Financial Center common areas or the Winter Garden. Compliance with these limits would be determined by passenger counts conducted jointly by the Port Authority and BPCA. Under the long term agreement, the limitation will be increased to permit 6,000 persons per hour when the permanent facility comes on line.

No commercial or retail uses will be permitted in the Temporary facility except for offices of the operator and one newsstand.

The Port Authority, and in turn, Arcorp/Hartz, as the Port Authority's ferry operator, is to provide general liability or other insurance against liability for bodily injury, death and property damage as BPCA may reasonably require as well as indemnify and hold harmless BPCA and its assignees as appropriate.

In addition to the foregoing arrangements, the Port Authority is negotiating an agreement with New York State Office of General Services (NYSOGS) under which NYSOGS will grant an easement for the riparian rights (lands underwater claimed by the State of New York) required for the Battery Park City Terminal for an expected term of up to 30 years at an estimated one time payment of \$6,200.

Whereupon, the following resolution was adopted. Commissioners Gluck and Schulman not voting:

RESOLVED, that the Executive Director be and he hereby is authorized to enter into an agreement with the Battery Park City Authority (BPCA), for a license to install and operate a temporary passenger ferry terminal north of the North Cove at Battery Park City as required to institute a ferry service between Hoboken, New Jersey and Battery Park City, New York, New York, which includes payment of incremental operations and maintenance costs associated with ferry operations at Battery Park City; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to enter into an arrangement with the New York State Office of General Services (NYSOGS) for an easement or license for the riparian rights required for the Battery Park City ferry terminal, for a term of up to thirty years and at an estimated one-time fee of \$6,200; and it is further

RESOLVED, that the agreements and all other documents required to consummate the aforesaid transactions be subject to approval by General Counsel or his designated representative.

Whereupon, the meeting was adjourned.

Lloyd E. Thompson, Manager of Management Planning and Budgeting, Management and Budget
Joseph L. Vanacore, Assistant Executive Director/Capital Programs
Barry Weintrob, Chief Financial Officer

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of November 10, 1988. She reported that copies of these Minutes were sent to all of the Commissioners and to the Governors of New York and New Jersey. She reported further that the time for action by the Governors of New York and New Jersey has expired.

Whereupon, the Board of Commissioners unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on December 8, 1988, in addition to matters filed with the Committee pursuant to Board action or separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on December 8, 1988, in addition to matters filed with the Committee pursuant to Board action or separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on December 8, 1988, in addition to matters filed with the Committee pursuant to Board action or separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on December 8, 1988, in addition to matters filed with the Committee pursuant to Board action or separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 12/8/88)

Board of Commissioners - Update of Ethics Policy

The following minute was unanimously adopted as an expression of the continuing tradition of excellence in public service of The Port Authority of New York and New Jersey.

As the governing body of The Port Authority of New York and New Jersey, we want to express our continuing belief that it is essential that the conduct of the Commissioners and employees of the Port Authority hold the respect and confidence of the peoples of the States of New York and New Jersey and that the public know that no conflict exists between private interests and official duties.

It is the policy of the Port Authority that the Commissioners and employees reflect the highest standards of integrity in the public service.

To this end, we authorized promulgation of rules and regulations constituting a Code of Ethics to provide a clear statement of the principles governing the conduct of Port Authority employees and those doing business with the Port Authority. In addition, the Board on April 14, 1983 reaffirmed its commitment to the highest principles of ethical conduct.

We wish at this time to express our continued commitment to those principles of conduct and to bring current our policy, as a Board, that each Commissioner shall conform to the conflict of interest laws presently applicable to unsalaried officers of our respective States. Furthermore, for these purposes we shall continue to furnish General Counsel with a list of our private financial interests, similar to the list we have furnished to him as Counsel to Port Authority Trans-Hudson Corporation (PATH) in connection with our service as Directors of PATH for purposes of the Clayton Anti-Trust Act.

(Board - 12/8/88)

John F. Kennedy International Airport - Sale of Mobile Lounge Papa to United Airlines, Inc.

United Airlines does not have federal inspection services (FIS) at their terminal building. As a result, United had a handling arrangement with Pan American World Airways for FIS processing of their Tokyo flight. Pan American's recent expansion activities have created operational problems for both airlines in terms of level of service provided and received. Accordingly, United, in need of more viable arrangements for FIS processing, has been seeking an interim solution until their scheduled relocation to the British Terminal in two years.

British Airways has agreed to handle United's Tokyo flight, but only at a hardstand (remote aircraft parking site), during the interim period. This is because of a schedule conflict and current major construction activity. The use of the hardstand will require United to provide mobile lounge service to its patrons. United will begin its operation at the British Terminal on December 15, 1988 in time for the peak holiday season, and is in need of two mobile lounges to shuttle passengers from their Tokyo flight to FIS at the British Terminal.

"Papa", the first unit recommended for sale to United from Kennedy Airport's excess fleet was inactive for three years prior to being placed in operation for the summer of 1988, and will not be required for Port Authority service for the peak season in summer of 1989 when four new mobile lounges will be available to complement the existing fleet. A second mobile lounge, "Uniform", is being sold to United Airlines on an expedited basis under the Executive Director's authority. "Uniform" had been inactive for four years and will require extensive rehabilitation.

The negotiated sale price of \$104,000 for "Papa" required formal Board approval for the sale to be consummated. However, the Board would not be able to take action prior to December 8, 1988 which precluded delivery of "Papa" in time for United's December 15, 1988 start up date. Therefore, the Executive Director, in response to the need of a major airport tenant, facilitated the process by authorizing the sale subject to Board approval.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board approve the action of the Executive Director in authorizing the sale of surplus mobile lounge "Papa" to United Airlines, Inc. for a negotiated sale price of \$104,000.

(Board - 12/8/88)

**The World Trade Center - Contract WTC-499.23 - Building
Cleaning Services - Amendment and Exercise of Option to
Extend**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement with Ogden Allied Maintenance Corp. extending Contract WTC-499.23 covering the performance of general cleaning services at the World Trade Center, for a two-year period commencing January 1, 1989 at a cost of approximately \$55.1 million, exclusive of escalation, and amending the contract. The proposed amendments would:

i) allow the contractor to solicit extra cleaning sales directly from World Trade Center tenants, with the Port Authority having the right to establish maximum rates to be charged for extra cleaning sales. The Port Authority would be paid a fee of not less than 10% of the gross revenues generated from the sale of extra cleaning services to new tenants and tenants who renew their current leases and not less than 15% of the gross revenues generated from the sale of extra cleaning services to tenants under existing leases;

ii) increase the compensation due the contractor during the term of the extension at a cost of approximately \$200,000 per year, allowing the contractor to pay increased vacation, holiday, sick day, and medical benefits to supervisory employees. It is anticipated these benefits will increase by approximately 25% per supervisor, and that this increase in supervisory benefits will enable the contractor to attract and retain a higher caliber of personnel and reduce the current high turn-over rate, thus providing improved supervision and cleaning service to the World Trade Center; and

iii) provide for a payment to the contractor of an amount not to exceed \$135,000 to settle a potential claim arising out of increased costs allegedly incurred by the contractor for the additional manhours required by it to develop and implement a computerized work scheduling and billing system. These additional manhours were allegedly incurred because the Port Authority changed the original specifications for the system. No payment will be made to the contractor until the computerized system is operational and the Management Information Services and Audit Departments have established criteria for reimbursement.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he is hereby authorized, for and on behalf of the Port Authority, to enter into an agreement with Ogden Allied Maintenance Corp. extending and amending Contract WTC-499.23 substantially in accordance with the terms and conditions set forth above, the form of the agreement to be subject to the approval of General Counsel or his authorized representative.

(Board - 12/8/88)

**Elizabeth-Port Authority Marine Terminal - Amendment of
Lease - (EP-148) with Maher Terminals, Inc. to Surrender
Container Cranes and Sale or Lease of Port Authority
Owned Container Cranes**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement with Maher Terminals, Inc. (Maher) permitting Maher to terminate the letting of four Port Authority owned container cranes designated, respectively, as Star Cranes Numbers 4021 and 4022 and Paceco Portainer Cranes Numbers 247 and 258, which Maher currently leases, prior to the date the letting with respect thereto would otherwise expire or terminate pursuant to the lease, contingent upon the sale or re-letting thereof by the Port Authority. It was further recommended that Board authorize the Executive Director, for and on behalf of the Port Authority, to lease one or more of these cranes to a third party on such terms as the Executive Director deems reasonable, or to negotiate the sale thereof, subject either to the receipt of a minimum price, representing the current value of the cranes as established by an outside consultant, or to the receipt of a price approved by the Committee on Operations. The minimum value of these cranes, as established by the consultant, is \$700,000 each for the Star Cranes and \$100,000 each for the Paceco Cranes. The cranes will be sold on an "as is" basis with the buyer responsible for removal and transportation. Maher's lease permits it to terminate the letting of these cranes and Maher has exercised this right with respect to the Paceco Cranes effective as of March 14, 1989. Maher will continue to lease each of the cranes until the effective date of termination of the letting thereof or until the effective date of an earlier sale or lease thereof.

Maher is in the process of erecting five new cranes at its Elizabeth Terminal and upon the completion of this construction will have no further need for these existing Port Authority-owned cranes. The Port Authority is actively involved in preliminary discussions with parties interested in purchasing or leasing the cranes. The parties who have expressed interest in the cranes require the cranes in the very near future. If the cranes are sold, the direct negotiation method will be utilized to expedite the negotiation process and to control the final destination of these cranes.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized, for and on behalf of the Port Authority, to enter into an agreement with Maher Terminals, Inc. permitting Maher Terminals, Inc. to terminate the letting of four Port Authority-owned cranes designated, respectively, as Star Cranes Numbers 4021 and 4022 and Paceco Portainer Cranes Numbers 247 and 258 prior to the date the letting with respect thereto would otherwise expire or terminate, contingent upon the sale or lease thereof to another party and that the Executive Director be and he hereby is authorized for and on behalf of the Port Authority to negotiate the sale of one or more of these cranes to a qualified buyer substantially in accordance with the terms and conditions set forth above or to lease one or more of these cranes on such terms as he deems reasonable, the form of all of the agreements to be subject to the approval of General Counsel or his authorized representative.

(Board - 12/8/88)

1989 Budget

It was reported that copies of the Budget for the year 1989 were presented to the Commissioners in October 1988. The 1989 Budget is a product of the Port Authority's internal planning process and provides for the continuation of the capital plan endorsed by the Governors of New York and New Jersey as well as other expenditures necessary to achieve the Port Authority's objectives. These objectives are: to strengthen the competitive position of the Port of New York-New Jersey region; to provide a level of service that is responsive to current and projected changes in demand; and to expand the range of economic opportunities available to businesses in and residents of the region. The Budget is a financial planning tool which outlines the estimated expenditures for programs already authorized or to be considered by the Port Authority. Approval of these recommendations will enable the Port Authority to accomplish its mission.

The 1989 Budget for The Port Authority of New York and New Jersey, including the anticipated expenditures of subsidiary corporations, totals \$2.2 billion. It consists of approximately \$695 million in gross capital expenditures, \$1.2 billion of operating expenses, \$217 million of debt service net of capitalized interest, \$17 million of expenditures for the Fund for Regional Development, and \$52 million of other expenditures, mostly related to future years (all exclusive of certain amounts which are reimbursable under the New York State Commuter Railroad Car Program).

The 1989 capital expenditures are primarily for projects related to the Port Authority's Aviation, Interstate Transportation Network, Port, and World Trade and Economic Development facilities, including a provision of \$10 million for emergency repairs. The Budget also includes \$21 million for expenditures for projects identified by the States from funds made available pursuant to the Governors' Agreement of June 1983, \$5 million for regional development projects to be identified by the Governors, and an allowance of \$15 million for projects under study and development. Expenditures for construction contracts included in the 1989 Budget are shown on Exhibit A-2.

In 1989, Aviation's activities will continue to be devoted to the revitalization, renewal, and enhancement of the airports while maintaining ongoing operations and levels of service. Aviation's plan provides for the initiation of major construction for JFK 2000, detailed planning for Newark 2000, and continued construction for the LaGuardia Central Terminal Building modernization and expansion. Also included are expenditures related to the improvement of the Customs Hall and main lobby of the International Arrivals Building as well as taxiway, roadway, and parking lot improvements at Kennedy International Airport; school soundproofing at all three airports; construction of a new east end terminal and roadway improvements at LaGuardia Airport; and a new international facility, completion of a new facility maintenance building, and runway and taxiway improvements at Newark International Airport.

(Board - 12/8/88)

For Interstate Transportation Network facilities, the 1989 Budget includes expenditures to maintain service levels and for the protection of the physical integrity of the facilities. The Budget provides for completion of improvements to PATH's Pavonia/Newport station, continued construction at the new PATH Car Maintenance Facility, new stairs and escalators at the World Trade Center station, and elderly and disabled access to PATH terminals; facility rehabilitation at the tunnels and bridges including rehabilitation of the North Tube of the Lincoln Tunnel and initial construction for the redevelopment of the Holland Tunnel tolls plaza; and improvements to provide for the initiation of the Hoboken, New Jersey to lower Manhattan, New York ferry service. The Budget also includes the planned purchase of buses under the Port Authority Bus Programs.

In order to ensure the competitive position of our port facilities and enhance the economic benefits to the region, the 1989 Budget includes expenditures for channel dredging and berth deepening, facility rehabilitation at the Port Authority's New York and New Jersey marine terminals, warehouse improvements at Port Newark, and the construction of a third modular warehouse building at the Elizabeth-Port Authority Marine Terminal, as well as the completion of construction at the Port Authority Auto Marine Terminal.

The World Trade and Economic Development Department's program reflects continued construction of the Teleport and Newark Legal Center as well as construction of the Essex County Resource Recovery Facility; facility and systems improvements to maintain the safety, structural integrity, and competitive position of the World Trade Center; and expansion and renovation of the industrial parks.

The 1989 Budget includes \$76.1 million for retention of professional, technical, or advisory services; \$71.4 million for maintenance and services contracts; \$111.2 million for construction contracts; and \$9.3 million for commodities (materials, equipment, and supplies) contracts, in addition to amounts otherwise authorized. The Executive Director would be authorized to take action with respect to the retention of professional, technical, or advisory services; contracts for maintenance and services, construction, commodities (materials, equipment, and supplies) purchases, and the purchase of insurance; and the settlement of certain claims, all as provided for in the Budget and in accordance with appropriate procedures filed with the Committees of the Board.

Circumstances have arisen during the year 1988 which were not foreseeable or determinable on January 7, 1988, when the Board adopted the 1988 Budget. These changes, totaling about \$20 million, are set forth on Exhibit B, and, together with all other expenditures for the Port Authority for the year 1988, will not exceed the amount as set forth in the 1988 Budget.

A provision of \$400,000 is also included to reimburse the States of New York and New Jersey for expenses incurred by each State, including staff costs in reviewing the Port Authority's 1989 Budget and any amendments thereto.

(Board - 12/8/88)

As contemplated in the 1989 Budget, in light of recent staff, consultant, and similar studies by other public and private agencies, of salary, wage, and Consumer Price Index trends, provision for salary ranges and salaries for staff not represented for purposes of collective negotiations would be set or increased effective December 25, 1988, by 4% and, as appropriate, in response to developments affecting organized subordinate employee groups, while all existing or modified compensation programs, and individual salary increases for professional, managerial, technical, supervisory and clerical and administrative staff within the new ranges, would continue to be administered on the basis of merit. Salary ranges and levels would continue to reflect the ongoing implementation of the Hay classification system. The Service A compensation plan is not included in this authorization.

In order to provide sufficient funds in connection with the Port Authority's capital program, together with capital funds to be carried into each year as well as Port Authority obligations to be issued in each year, it is desirable at this time to authorize the application, for the purpose of capital expenditures to be made in 1989, of funds paid into and available in the Consolidated Bond Reserve Fund in a total aggregate amount of up to \$250 million, consistent with applicable bond covenants and financial policies.

The Executive Director's authority, pending final adoption and approval of the annual Budget, to make operating expenditures and undertake contractual commitments for continuing operations and services as contained in the financial plan presented to the Commissioners, would also be confirmed.

Whereupon, to carry out the foregoing report, the following resolution was unanimously adopted:

(Board - 12/8/88)

RESOLVED, that the 1989 Budget of The Port Authority of New York and New Jersey as set forth below be and the same hereby is approved and adopted, including authority for the Executive Director to: (a) take action, in accordance with appropriate procedures, with respect to retention of professional, technical, or advisory services and to contracts for maintenance and services, construction, commodities purchases, and the purchase of insurance, and to the settlement of claims; (b) implement the annual salary range adjustments; and (c) pending final adoption of the annual Budget, make operating expenditures and undertake contractual commitments for continuing operations and services:

RESOLVED, that, based upon requisition of the Governor of the State of New York or the Governor of the State of New Jersey, or the duly authorized designee of each, the Port Authority shall pay to the State of New York or the State of New Jersey, or both, upon receipt of an appropriate expenditure plan from said State, an amount not in excess of \$200,000 to each said State to reimburse said State or States for expenses incurred by said State or States, including staff costs, in reviewing the 1989 Budget of the Port Authority and any amendments thereto; and it is further

RESOLVED, that, the financing by the Executive Director of portions of the Port Authority's capital program, by application of funds paid into and available in the Consolidated Bond Reserve Fund, including investment earnings attributable to the General Reserve Fund not required for the maintenance of that Fund, to capital expenditures during 1989 in a total aggregate amount not to exceed \$250 million be and the same hereby is authorized; provided, however, that the amount so financed or applied shall not exceed an amount which, when combined with any other amounts financed or applied in such year from such funds paid into and available in the Consolidated Bond Reserve Fund, will preclude the Port Authority from: (a) maintaining the General Reserve Fund at an amount equal to 10% of the par value of outstanding Port Authority bonds legal for investment (other than New York State Guaranteed Commuter Car Bonds); and (b) maintaining in all reserve funds an aggregate amount in excess of the next two years' debt service on outstanding Port Authority bonds secured by a pledge of the General Reserve Fund; and that the application, from time to time, of funds as set forth herein is hereby authorized and approved.

Whereupon, the meeting was adjourned.

Secretary
