It was reported that the Kill Van Kull and Newark Bay Channels comprise a Federally-improved and maintained 35-foot deep waterway between the Anchorage Channel in Upper New York Bay and Port Newark and the Elizabeth-Port Authority Marine Terminal. At the request of the Port Authority, the Congress in 1972 directed the Corps to study the need for a deepening and selective widening of these channels to accommodate the anticipated future growth of deep-draft containerships. This study has been completed and the Fiscal Year 1985 Supplemental Appropriation Act (Public Law 99-88) authorizes Corps construction of a new channel depth of 45 feet with selective widenings.

Under Section 221 of Public Law 91-611, such a project "shall not be commenced until each non-Federal interest (the Port Authority in this case) has entered into a written agreement with the Secretary of the Army to furnish its required cooperation for the project." The "Non-Federal cooperation" contemplated consists of the furnishing of necessary property rights, underwater utility relocations, dredged material disposal areas if needed for maintenance after construction and the acceptance of liability beyond Corps fault or negligence, if and when required by the Corps. The Agreement does not require the Port Authority to provide dredge disposal areas during construction, but rather requires Corps and Port Authority agreement on alternatives should ocean disposal of dredged material be denied during construction, and further requires the Corps to consider the cost of alternatives should this occur during the maintenance period that follows the completion of construction. At this time, no other property rights or utility relocations are expected to be required by the Corps.

A requirement for local cost-sharing totalling 35% of project costs has been added to the Agreement at the insistence of the Administration. Legislation currently pending before Congress would impose a cost-sharing requirement ranging from 25 to 35% depending upon which of the two alternatives is selected. Arrears in Port Authority payments required to be made are subject to interest. Failure of the Corps to receive annual appropriations in amounts sufficient to meet expenditures for the then current fiscal year would permit termination of the Agreement or suspension of work at the option of either party without penalty.

The Port Authority objective is to obtain an initial channel depth of 40 feet within two years after the Corps' start of construction, which is scheduled to begin early in Fiscal Year 1987 (October 1986 to September 1987). This depth should satisfy the current and immediately foreseeable needs of shipping serving Port Newark-Elizabeth, while reserving the total deepening to 45 feet to some future date as the need arises.

At a depth of 40 feet, the total cost of deepening and widening is presently estimated by the Corps at \$145.4 million. The Port Authority share of this cost would be approximately \$36.3 million (25%) payable during the period of construction, possibly followed by repayment of another \$14.5 million (10%) upon completion of construction, or \$14.5 million with interest over 30 years thereafter, for a total of \$50.8 million (plus interest). The actual percent and final conditions will be determined by the enactment of currently pending legislation. The Corps has

(Board - 5/8/86)

insisted that the initiation of construction be contingent upon the enactment of legislation imposing a nationwide Federal port use charge, revenues from which will be applied to the Government cost of harbor maintenance. The period and cost of construction is under the control of the Corps and is heavily dependent upon Federal appropriations for the Federal share of the total cost. The Department of the Treasury is empowered to set interest rates every five years. It is, therefore, possible that based on the return of contract bids, project delays, or interest rates, actual costs could be higher. Should this happen and the award of any contract result in obligations and expenditures exceeding \$153 million, the award of that contract and subsequent contracts will be deferred until such time as both parties agree to resume construction.

Payment by the Port Authority will either be in the form of a Corps drawdown of Port Authority deposits made into an interest-bearing escrow account, letter of credit account, or by some other form of commitment acceptable to the Corps. The Corps is empowered by the Agreement to demand additional deposits if project costs exceed estimates, and obligated to return excesses (with interest) if project costs fall below estimates. All or a portion of the Port Authority's share possibly could depending on the language finally incorporated in the new Federal legislation and other policy considerations, be recovered through user fees.

The Fiscal Year 1985 Supplemental Appropriations Act limits approval of Agreements to projects authorized for construction by the Assistant Secretary of the Army for Civil Works no later than June 30, 1986. To enable the Assistant Secretary to process the Agreement for signature by that date, it is essential that an Agreement signed by the Port Authority be delivered to the New York District, Corps of Engineers, by no later than May 31, 1986.

The deepening of the Arthur Kill Channel, which connects the Port Authority's Howland Hook Marine Terminal with the Kill Van Kull Channel, is in the final stages of Corps study. Upon authorization of construction by Congress, either the proposed Agreement will be amended or a separate Agreement of Local Cooperation will be entered into for this project.

It was therefore recommended that the Board authorize the Executive Director to:

1. enter into an Agreement of Local Cooperation with the United States Government (Assistant Secretary of the Army for Civil Works) in accordance with Section 211 of Public Law 91-611 and Chapter IV, Public Law 99-88 for the Army Corps of Engineers to commence the deepening to 40 feet and selective widening of the Kill Van Kull and Newark Bay Channels as authorized by Congress at an estimated cost of \$145.4 million;
2. pay the United States Government the local share of such construction costs to be required by Federal port legislation now pending in Congress, presently estimated to be \$50.8 million plus interest; and
3. enter into an interest-bearing escrow, letter of credit or similar funding assurance with the United States Government as required to fulfill this funding obligation.

(Board - 5/8/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized to: (1) enter into an Agreement of Local Cooperation with the United States Government (Assistant Secretary of the Army for Civil Works) in accordance with Section 221 of Public Law 91-611 and Chapter IV, Public Law 99-88 for the Army Corps of Engineers to commence the deepening to 40 feet and selective widening of the Kill Van Kull and Newark Bay Channels as authorized by Congress at an estimated cost of \$145.4 million; (2) pay the United States Government the local share of such construction costs to be required by Federal port legislation now pending in Congress, presently estimated to be \$50.8 million plus interest and (3) enter into an interest-bearing escrow, letter of credit or similar funding assurance with the United States Government as required to fulfill this funding obligation.

(Board - 5/8/86)

All Airports - Consolidated Ground Transportation Counter Program

It was reported that as part of the Aviation Department's efforts to improve ground transportation services for airport patrons, a consolidated ground transportation counter program was instituted for trial periods at each of the three airports. At their meetings on April 12, 1984 and November 8, 1984 the Board and Committee on Operations, respectively, authorized permanent establishment of a consolidated counter program at LaGuardia Airport at an estimated cost of \$1,757,500 and at Newark International Airport at an estimated cost of \$1,225,000. On December 10, 1984 the Executive Director authorized a six-month test of the consolidated counter concept in the International Arrivals Building at Kennedy International Airport at an estimated cost of \$242,000. At its July 11, 1985 meeting, the Board authorized an additional expenditure of \$1,671,500 to fund the operation of the counters both at LaGuardia Airport and the International Arrivals Building at Kennedy International Airport through May 28, 1986.

To staff the counters at each airport, agreements were entered into with the Council for Airport Opportunity (CAO). The CAO is a local agency with offices in Queens, New York and Newark, New Jersey which promotes minority employment opportunities in the New York/New Jersey metropolitan area. The agreements for Kennedy and LaGuardia Airports expire by their terms on May 28, 1986. The present Newark agreement, which runs until December 16, 1986, will be terminated on May 28, 1986. The new CAO contract will provide for administrative, training, supervisory and staffing services for the operation of the consolidated counters at all three airports for a period of one year.

The Consolidated Counter program has also been of assistance to staff in auditing fees. Furthermore, the ability to stop representing the permittees at the counters has proven to be an effective tool in ensuring that required fees are paid.

In January 1986, staff began testing a modified counter at the TWA arrivals level at LaGuardia Airport. The modified system combines staffed information/reservation booths with adjacent direct line telephones under Port Authority control. This arrangement retains many of the service benefits of the original program and yet allows patrons to communicate directly with the ground transportation permittees, thereby expediting air travelers' transportation arrangements. This system may be as much as 30% less costly to operate than the original concept because the agents do not need to book reservations for all ground transportation users.

Staff observations indicate that the counters are functioning effectively, and patron surveys indicate a high degree of satisfaction. The modified counter seems to satisfy permittee and patron interest in having the regular customer communicate directly with the transportation operator.

Approximately ninety agents are being employed at the counters that are now in operation at the three airports. Over the next year, staff will be negotiating with the unit terminal airlines to install consolidated counters in most of the terminals at both Kennedy International and Newark International Airports. In extending Consolidated Counters to the airline unit terminals, staff will continue to test refinements to the program that will ensure a high level of service to airport patrons at the lowest possible cost. It is anticipated that these refinements will enable the Port Authority to expand the program to as many as seven additional airport locations at about the same level of funding that has been previously authorized.

(Board - 5/8/86)

Approximately \$1,362,000 will be required for the construction and installation of new consolidated ground transportation counters and for support services including Port Authority supervision, maintenance and computer hardware and services required to operate the counters for a one-year period.

It was therefore recommended that the Board authorize:

1. a project for the operation of consolidated ground transportation counters at Kennedy International Airport, Newark International Airport and LaGuardia Airport and the establishment of additional counters at airline unit passenger terminals at Kennedy International and Newark International Airports over a one-year period at an expenditure presently being estimated at \$3,712,000, including payments to the Council for Airport Opportunity (CAO), payments to contractors and administrative, general and financing expenses;

2. the Executive Director to terminate the existing agreement with the Council for Airport Opportunity (CAO) for the staffing and operation of consolidated ground transportation counters at Newark International Airport; and

3. the Executive Director to enter into a one-year agreement with the Council for Airport Opportunity (CAO) for administrative, training, supervisory and staffing services for the operation of consolidated ground transportation counters at Kennedy International Airport, Newark International Airport and LaGuardia Airport in the amount of \$2,350,000, and to order extra work up to the amount of \$352,500.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a project for the operation of consolidated ground transportation counters at Kennedy International Airport, Newark International Airport and LaGuardia Airport and the establishment of additional counters at airlines unit passenger terminals at Kennedy International and Newark International Airports over a one-year period at an expenditure presently being estimated at \$3,712,000, including payments to the Council for Airport Opportunity (CAO), payments to contractors and administrative, general and financing expenses, is authorized; and it is further

RESOLVED, that the Executive Director is authorized to terminate the existing agreement with the Council for Airport Opportunity (CAO) for the staffing and operation of consolidated ground transportation counters at Newark International Airport; and it is further

RESOLVED, that the Executive Director is authorized to enter into a one-year agreement with the Council for Airport Opportunity (CAO) for administrative, training, supervisory and staffing services for the operation of consolidated ground transportation counters at Kennedy International Airport, Newark International Airport and LaGuardia Airport in the amount of \$2,350,000, and to order extra work up to the amount of \$352,000, such agreement to be subject to approval as to form by General Counsel or his designated representative.

(Board - 5/8/86)

Bathgate Industrial Park - Amendment to Agreement with Clay-Park Labs, Inc.

It was reported that the Board, at its meeting on January 12, 1984, authorized the Executive Director to enter into an agreement with Clay-Park Labs, Inc. for the letting of the entire industrial building (approximately 83,000 square feet) and adjacent parking and truck dock areas on Block 2921 at the Bathgate Industrial Park for an initial term of approximately 25 years.

The Executive Director executed the lease with Clay-Park on May 14, 1984. The lease agreement provides, among other things, that the Port Authority would provide to Clay-Park up to a cumulative total of \$800,000 for finishing work and for the purchase, renovation, transportation and installation of equipment with such amounts to be repaid over fifteen years at 200 basis points above the Bond Buyer Revenue Bond Index. As of October 1985, the entire \$800,000 was provided to Clay-Park. The lease also provides for an annual percentage rental of 1% to 3% on Adjusted Gross Sales in excess of \$12 million.

In September 1985, Clay-Park began operations at the Port Authority Bathgate Industrial Park. At the time of its move to Bathgate, Clay-Park employed approximately 160 workers in the manufacture of generic drug products. It currently employs about 240 workers and plans to purchase two additional pieces of equipment which will further expand the operation. Clay-Park estimates that it will add between 25 and 40 new employees as a direct result of the expansion.

Staff has reviewed this request and determined that it is in the Port Authority's interest to amend the lease with Clay-Park so that the Port Authority can provide additional amounts up to a cumulative total of \$366,000 to Clay-Park for the purchase of equipment. Clay-Park's ownership of said equipment will be subject to a security interest in the Port Authority until the equipment monies provided by the Port Authority are repaid. It is anticipated that the purchase of this equipment will enable Clay-Park to increase its sales volume and therefore pay a larger amount of percentage rental. The additional amounts of up to a cumulative total of \$366,000 would be repaid at 225 basis points above the then current Bond Buyer Revenue Bond Index over fifteen years with Clay-Park having the option of prepayment without penalty.

It was therefore recommended that the Board authorize the Executive Director to amend the existing lease agreement with Clay-Park Labs, Inc. in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to amend the existing lease agreement with Clay-Park Labs, Inc. to provide that the Port Authority provide to Clay-Park an additional sum not to exceed \$366,000 for the purchase of equipment in the industrial building on Block 2921 at the Port Authority Bathgate Industrial Park, with such additional amount to be repaid as additional rental over a fifteen-year period; the amendment of the existing lease agreement to be in accordance with the foregoing, and the form of the said amendment to be subject to the approval of General Counsel or his designated representative.

(Board - 5/8/86)

Bathgate Industrial Park - Industrial Building on Block 2920 - Protocom Devices, Inc. - Increase in Authorization

It was reported that the Board, at its meeting on May 10, 1984, authorized the Executive Director to enter into a lease with Protocom Devices, Inc. (Protocom) for a portion of an industrial building on Block 2920 at the Bathgate Industrial Park and to provide to Protocom, as part of the lease agreement, up to \$1.7 million for the purchase of certain equipment and additional building finishing work. The lease with Protocom was signed on September 6, 1984 and the company is currently moving into its portion of the building.

At its May 10, 1984 meeting, the Board also authorized the Executive Director to award Contract BIP-110.014 for the construction of a shell industrial building of approximately 60,000 square feet of ground space and approximately 20,000 feet of mezzanine space on Block 2920 and to award a contract for the performance of finishing work for Protocom in a portion of the shell building on Block 2920. The authorization provided that the total cost of the building shell contract and the finishing work contract was not to exceed \$4.5 million.

On November 26, 1984, Contract BIP-110.014, Industrial Building on Block 2920, Bathgate Industrial Park, was awarded to E.K. Construction Co., Inc. at its bid price in the lump sum amount of \$3,059,918 plus an allowance of \$306,000 for extra work and a provision for net cost work. The total final expenditure for the building shell contract, including the net cost work, will not exceed \$3,330,000.

In September 1985, Contract BIP-110.020 for the construction of the finishing work for Protocom's space was awarded, pursuant to a Memorandum of Justification dated August 12, 1985, to Tsapakis Construction Corp. at a bid price in the lump sum amount of \$1,143,000 plus an allowance of \$115,000 for extra work. Purchase orders in the amount of \$146,473 were separately awarded for air-conditioning units, light fixtures, exhaust fans and electric switchgear to be installed under Contract BIP-110.020. The Memorandum of Justification recommended award of the contract to Tsapakis but indicated that the total of Contracts BIP-110.014 and BIP-110.020 and related purchase orders would exceed the authorized \$4.5 million. It also indicated that the Board would be asked to approve the action of the Executive Director in authorizing the award of Contract BIP-110.020 at a future meeting.

It is anticipated that the final total additional costs for all of the above, which reflects an increased allowance for extra work, will not exceed \$375,000 and it is recommended that the authorized amount be increased from \$4.5 to \$4.875 million. This increase is attributable primarily to an increase in the finishing requirements of Protocom for its manufacturing and office facility that were not foreseen at the time the original amount was authorized. The additional costs for finishes will be recovered from Protocom under the provisions of the executed lease agreement.

(Board - 5/8/86)

It was therefore recommended that the Board:

1. approve the action of the Executive Director in awarding Contract BIP-110.020, Bathgate Industrial Park, Industrial Building on Block 2920, Interior Finishes on North Half of Building, to Tsapakis Construction Corp. in the amount of \$1,143,000 with authorization to order extra work up to the amount of \$115,000; and

2. increase the authorization for the total costs of the shell industrial building and the finishing work for Protocom Devices, Inc. on Block 2920 at the Bathgate Industrial Park from \$4.5 million to \$4.875 million.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the action of the Executive Director in awarding Contract BIP-110.020, Bathgate Industrial Park, Industrial Building on Block 2920, Interior Finishes on North Half of Building, to Tsapakis Construction Corp. in the amount of \$1,143,000 with authorization to order extra work up to the amount of \$115,000 is approved; and it is further

RESOLVED, that an increase in the authorization for the total costs of the shell industrial building and the finishing work for Protocom Devices, Inc. on Block 2920 at the Bathgate Industrial Park from \$4.5 million to \$4.875 million is authorized.

(Board - 5/8/86)

Kennedy International and LaGuardia Airports - Extension of Motor Coach Permit Agreement with Carey Transportation, Inc.

It was recalled that the Port Authority is involved in a comprehensive and continuing program to increase the role of public transportation in airport access, with special emphasis being placed on high occupancy modes. To both advance this program and to ensure the availability of high quality motor coach service for passengers traveling between the New York airports and Manhattan, the Board, at its meeting on June 14, 1984, authorized the purchase of 20 new motor coaches from Motor Coach Industries, Inc. at a cost of approximately \$3.36 million. The motor coaches were provided to Carey Transportation, Inc. (Carey), the carrier franchised by the City of New York to operate between the New York airports and midtown Manhattan, under a permit agreement whereby Carey was obligated to pay the Port Authority \$2,800 per coach per month. Authorization is being sought to extend this original agreement for two years and five months at that rate.

As the Port Authority's contribution toward the institution of service between both Kennedy International and LaGuardia Airports and the Air TransCenter in the Port Authority Bus Terminal, Carey received a credit against the fees due for ten motor coaches for the period August 1, 1984 to July 31, 1985. Carey was obligated under the permit agreement to make payments to the Port Authority towards this credit if its passenger revenues from the demonstration exceeded its direct operating costs. This one-year demonstration ended on July 31, 1985 and since that date, Carey has been operating the service without any such Port Authority fee credit and paying the full \$56,000 per month due under the permit agreement.

At the time the motor coaches were purchased, the Board was informed that staff planned to undertake a study which would assess high occupancy vehicle demand in the Manhattan market. This study, which was performed by Charles River Associates, Inc., concluded that greater market penetration by motor coach service could be obtained if additional routes were instituted. Based on that report and its own business judgment, Carey is considering the expansion of its routes so as to include the Jacob Javits Convention Center, Rockefeller Center and the upper East and West Sides of Manhattan. To support the institution of service to the Convention Center and Rockefeller Center areas, authorization is being sought for a fee credit that would be applicable to ten motor coaches. As with the Air TransCenter demonstration, the permit agreement would include a provision for additional fee payment to the Port Authority toward this credit if revenues exceed Carey's direct operating costs. The permit agreement would be terminable by either party on 30 days notice.

In April 1985 Carey Transportation filed a petition for reorganization under Chapter 11 of the United States Bankruptcy Code and, as of this date, has not yet submitted a reorganization plan. Since the bankruptcy filing, Carey has been rendering timely payments to the Port Authority in regard to its post-petition financial obligations. Carey's pre-petition debt to the Port Authority is approximately \$1.4 million. The motor coaches have been well maintained and the standard of service provided to air travelers has remained at a satisfactory level.

(Board - 5/8/86)

It was therefore recommended that the Executive Director be authorized for and on behalf of the Port Authority to enter into an extension of the permit agreement with Carey at Kennedy International and LaGuardia Airports in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to extend the permit agreement with Carey Transportation, Inc. for the use of 20 motor coaches from August 1, 1985 through December 31, 1987, the permit agreement to afford monthly fee credits to Carey Transportation, Inc. for up to ten of the coaches from June 1, 1986 to May 31, 1987, as the Port Authority's contribution toward a demonstration of service to and from the New York airports and the Jacob Javits Convention Center and Rockefeller Center in Manhattan; and it is further

RESOLVED, that the form of the extension of the permit agreement be subject to the approval of General Counsel or his designated representative.

(Board - 5/8/86)

Texas Air Corporation - U.S. Department of Transportation Investigation into the Acquisition of Eastern Air Lines - Intervention by the Port Authority

It was reported to the Board that on April 9, 1986, the United States Department of Transportation by Order No. 86-4-24 instituted an investigation, the Texas Air-Eastern Acquisition Case, to decide whether approval should be granted authorizing a merger agreement under which Eastern Air Lines will become a wholly-owned subsidiary of Texas Air. Due to concerns that the acquisition may reduce competition in the Northeast Corridor the case's principal focus will be air service between and among New York/Newark, Boston Logan International and Metropolitan Washington Airports. The order also directed that all additional requests to intervene be filed not later than April 14, 1986. The Port Authority has heretofore intervened in this proceeding taking no position on the issues. Staff has requested authority to state a Port Authority position.

Staff supports Department of Transportation approval of Texas Air's acquisition of Eastern. Staff shares some of the concern expressed by many other intervenors in the case, including the Attorney General of the State of New York, about the possible competitive impact on the Boston and Washington "shuttle" markets. However, staff believes that concerns about the future outweigh the concerns over competition in the "shuttle" markets.

U.S. Department of Transportation (DOT) statistics for the year ending June 30, 1985 indicate that New York/Newark-Boston and New York/Newark-Washington were the first and third largest, respectively, air transportation markets in the United States. DOT statistics also indicate that Eastern carried 37% of air passengers in the New York/Newark-Boston market, People Express 32% and New York Air 16%. In the New York/Newark-Washington market, Eastern carried 35% of the air passengers and New York Air 30% and People Express carried 24%.

Staff concerns arose because LaGuardia and Washington National are designated High Density Airports by the Federal Aviation Administration and hourly aircraft movements are limited. Although carriers wishing to compete in the shuttle markets may use their existing slots to do so or purchase additional slots to enter these markets, the lack of adequate slot capacity at LaGuardia can be viewed as a barrier to easy entry. However, the deregulated environment has increased Eastern's financial exposure and there is concern that Eastern may fail which could adversely impact Port Authority revenues and regional employment. Eastern provides over 5,000 jobs in the region. Eastern's financial viability must be strengthened to assure air travellers adequate service levels and continued benefits to the regional economy. It is in the interest of the region that employment and levels of service presently being provided at our three regional airports be maintained and wherever possible expanded. Staff believes that existing and potential competition at our airports and other regional airports as well as intermodal competition greatly reduces the potential of anti-competitive behavior in the market by Texas Air. No other viable alternative that would assure Eastern's continued financial soundness has been presented. Should such an alternative emerge before a final U.S. DOT decision in this matter, staff would evaluate such a proposal and advise the Board so that the Board could amend or modify the Port Authority's position. Therefore, in view of the current absence of any reasonable alternatives to strengthen Eastern's financial viability, staff supports approval of the acquisition agreement.

(Board - 5/8/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director and General Counsel to arrange for further participation on behalf of the Port Authority in the proceeding now pending before the U.S. Department of Transportation on Order No. 86-4-24 and in any other administrative or judicial proceeding arising therefrom or in connection therewith such participation generally to support the acquisition of Eastern Air Lines, Inc. by Texas Air Corp. in the absence of any current alternative in order to support continued employment in and levels of service to and from the New York/New Jersey region.

(Board - 5/8/86)

Retention of Financial Advisor

It was reported that at its meeting on November 14, 1985, the Board authorized the Executive Director to enter into an agreement with Mr. Edward M. Kresky, a recognized expert in municipal finance, to act as an advisor to the Port Authority to study the organizational structure of the financial departments for a period ending December 31, 1985, at a fee not to exceed \$20,000. In view of the financial challenges facing the Port Authority in the months ahead as plans to fund the Port Authority's capital plan are developed, as well as the need to maximize the opportunity to take advantage of innovative financing mechanisms, staff recommends the retention of Mr. Kresky to act as an advisor to the Port Authority on financial matters. It is proposed that Mr. Kresky be retained for an additional period of nine months at a cost not to exceed \$30,000.

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement with Mr. Edward M. Kresky, dated as of May 1, 1986, to provide for him to act as an advisor to the Port Authority on financial matters for a nine-month period at a cost not to exceed \$30,000.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to enter into an agreement with Mr. Edward M. Kresky, dated as of May 1, 1986, to provide for him to act as an advisor to the Port Authority on financial matters for a nine-month period at a cost not to exceed \$30,000; and it is further

RESOLVED, that the form of the agreement be subject to approval by General Counsel or his authorized representative.

(Board - 5/8/86)

New York State Railroad Car Program - New York State Guaranteed Commuter Car Bonds, Eighth Series - Amendments

It was reported that on March 13, 1986, the Board established and authorized the issuance of an Eighth Series of New York State Guaranteed Commuter Car Bonds, and authorized the sale thereof by the Committee on Finance, in a principal amount not to exceed \$12,435,000. At that time, it was anticipated that the bonds would be sold prior to June 1, 1986, and \$12,435,000 represented the maximum principal amount which could be sold under the Commuter Car Program. It is now contemplated that the Bonds of the Eighth Series will be sold by the Committee on Finance on June 12, 1986.

An additional \$3,590,000 aggregate principal amount from the Fourth, Fifth and Seventh Series of Commuter Car Bonds matures June 1, 1986. The Metropolitan Transportation Authority (MTA) requests that this additional capacity be made available for the Eighth Series.

Additionally, the MTA, subsequent to March 13, 1986, requested that the Bonds of the Eighth Series not be subject to call. Discussions prior to that time, as reflected in the minutes of March 13, 1986, contemplated that the Bonds of the Eighth Series would be subject to redemption, at 100 percent of their face value, at the option of the Port Authority, in whole or in part, commencing in 1991. In light of the fact that the Bonds of the Eighth Series will mature serially commencing December 1, 1986, with the longest outstanding maturity to be through December 1, 1996, and the additional fact that payment of the debt service on the Bonds will be made by the MTA through its rental payments under the Port Authority's lease of commuter railroad cars to the MTA, it is appropriate to agree to the MTA's request.

Accordingly, the aforesaid resolutions of March 13, 1986, should be appropriately amended to increase the principal and to make clear that the Committee on Finance, consistent with customary limitations on its power, is authorized to revise the redemption and call provisions for the Bonds of the Eighth Series; but that, in any event, it need not provide for the Bonds of the Eighth Series to be subject to call prior to maturity.

It was therefore recommended that the resolutions of March 13, 1986, establishing and authorizing the issuance and sale of New York State Guaranteed Commuter Car Bonds, Eighth Series, be appropriately amended for sale after June 1, 1986.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted, Commissioner McGoldrick abstaining:

RESOLVED, that Section 2 of the resolution of March 13, 1986 (appearing at pages 164 et seq. of the Official Minutes of that date) establishing and authorizing the issuance of New York State Guaranteed Commuter Car Bonds, Eighth Series, be amended to read as follows:

"SECTION 2. There is hereby established a series of Car Bonds, designated as the "Eighth Series" and to be issued in conformity with the Car Bond Resolution, which Car Bonds are hereinafter called "bonds of the Eighth Series" and the issuance of up to Sixteen Million Twenty-five Thousand Dollars (\$16,025,000) in principal amount of such bonds of the Eighth Series is hereby authorized. Such principal amount is hereby determined to be necessary to accomplish the purposes for which the bonds of the Eighth Series are to be issued."

and it is further

RESOLVED, that Section 9 of the resolution of March 13, 1986 (appearing at pages 164 et seq. of the Official Minutes of that date) establishing and authorizing the issuance of New York State Guaranteed Commuter Car Bonds, Eighth Series be amended to read as follows:

"SECTION 9. The Committee on Finance of the Authority is hereby authorized prior to the issuance of the bonds of the Eighth Series (i) to change or adjust the date as of which such bonds are to be dated to any date on or before December 15, 1986; (ii) to change or adjust the date or dates on which semi-annual interest on such bonds would be payable; (iii) to change or adjust the redemption or call provisions of such bonds; provided, that the Committee may not change any redemption, retirement or call provision of such bonds to impose a call premium; and (iv) to fix the date or dates at which any of the bonds are to mature; provided, that said date or dates of maturity shall not be later than December 1, 1996."

and it is further

RESOLVED that Section 1 of the resolution of March 13, 1986 (appearing at pages 173 et seq. of the Official Minutes of that date) authorizing the sale of New York State Guaranteed Commuter Car Bonds, Eighth Series be amended to read as follows:

"SECTION 1. The Committee on Finance is hereby authorized to sell all or any part of Sixteen Million Twenty-five Thousand Dollars (\$16,025,000) in principal

amount of New York State Guaranteed Commuter Car Bonds, Eighth Series (hereinafter called "bonds of the Eighth Series"), for the accomplishment of the purposes for which the issuance of said bonds of the Eighth Series is authorized and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, at any time in 1986 subsequent to June 1, 1986; provided, that the manner and time of sale shall have been approved by the Comptroller of the State of New York; and the Executive Director is hereby authorized to apply the proceeds of such sale to the accomplishment of said purposes."

(Board - 5/8/86)

Kennedy International, Newark International and LaGuardia Airports - Various Agreements with Flagship International, Inc. to be Renamed Sky Chefs, Inc. - In-Flight Meal Kitchens

It was reported that Flagship International, Inc., owned by American Airlines, Inc., has served American Airlines at its in-flight meal kitchens at the Port Authority's airports for over the past two decades. The kitchen at Newark International Airport is leased to Flagship under a lease which expires on June 30, 1989. The kitchens utilized by Flagship at Kennedy International and LaGuardia Airports are part of premises leased to American Airlines, which in the case of Kennedy International Airport, is for a term expiring on January 31, 1999 and in the case of LaGuardia Airport is on a month to month basis. Under the terms of the arrangement that has existed, in-flight meals were not sold to other airlines and there was no percentage fee or percentage rental payable to the Port Authority on the in-flight meals provided to American.

The Port Authority has been advised that American Airlines is selling or has sold all of its shares of Flagship to a subsidiary of Onex Capital Corporation of Toronto, Canada. As a result of the sale of stock and merger of subsidiaries, Flagship International, Inc. will survive but its name will be changed to Sky Chefs, Inc. Sky Chefs has requested that its in-flight meal arrangements at the three airports be changed from one in which it served only American to one in which it would serve other airlines as well. Accordingly, the lease it holds at Newark International Airport would be amended to reflect this right and Sky Chefs would pay in addition to the rental therein provided, a percentage rental of 6% of gross receipts. The existing guaranty of the lease by American Airlines will be deleted. At Kennedy International Airport, Sky Chefs will occupy its kitchen under a sublease from American Airlines. Under an agreement to be entered into with the Port Authority extending throughout the term of the sublease, the Port Authority would consent to the sublease and Sky Chefs would be authorized to operate its in-flight catering service at that airport for American and other airlines. The percentage fee, including appropriate exemption amounts, payable by Sky Chefs to the Port Authority at Kennedy International Airport would be similar to those charged the existing caterers at Kennedy International Airport, namely Marriott Corporation, Air La Carte, Inc. and Odgen Food Travel Services, Inc. as set forth in the Resolution the Board adopted at its meeting on March 13, 1986. The lease with American Airlines which covers the kitchen would be amended to reflect this utilization of this portion of its premises. At LaGuardia Airport, Sky Chefs would use a portion of American's premises under its month to month lease and Sky Chefs would enter into an agreement with the Port Authority on a month to month basis whereby it would pay the Port Authority a percentage fee of 8% of gross receipts, with an appropriate exemption amount comparable to that of the existing on airport caterer. The changes proposed should result in a substantial increase of revenue to the Port Authority based upon the in-flight catering operations of Sky Chefs. The Treasurer will determine what security, if any, is required.

There are a number of existing permits at LaGuardia and Kennedy International Airports under which Flagship, now to be Sky Chefs, has operated various services, such as TWA's Ambassador Club and American's Ambassador Club at LaGuardia Airport and food and restaurant operations at TWA's and American's terminals at Kennedy International Airport and a gift shop at American's terminal at Kennedy International Airport, which will continue in effect either under the existing agreements or under new agreements with basically the same terms.

(Board - 5/8/86)

It was therefore recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into agreements with Flagship International, Inc. and American Airlines, Inc. at Kennedy International, Newark International and LaGuardia Airports, as applicable, in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into appropriate agreements with Flagship International, Inc. to be renamed Sky Chefs, Inc., amending its existing lease at Newark International Airport authorizing a general in-flight catering operation and providing for an additional percentage rental of 6% of gross receipts and entering into appropriate agreements at Kennedy International and LaGuardia Airports authorizing general in-flight catering operations, for a fixed term at Kennedy International Airport at percentage fees and exemption amounts comparable to those of other in-flight caterers at the airport, and at a month to month basis at LaGuardia Airport with a percentage fee of 8% of gross receipts and an exemption amount comparable to that of the other in-flight caterer at that airport and with American Airlines, Inc. amending its lease which expires on January 31, 1999 at Kennedy International Airport to reflect Sky Chefs' new in-flight catering operations, all in accordance with the foregoing; the form of the agreements to be subject to the approval of General Counsel or his designated representative.

(Board - 5/8/86)

World Trade Center Security - Retention of Professional Services

It was reported that the Public Safety Department is involved in an overall review of general security at The World Trade Center complex. To assist the department in meeting the objectives of this comprehensive review program, staff is requesting the assistance of a professional security organization with expertise in security of multi-use office complexes.

The Executive Director, with the assistance of the Public Safety Department, will identify the firm deemed best qualified to provide the required expert services. Contacts will be made with professional organizations such as the American Society for Industrial Security and the Building Owners and Managers Association International as well as other experts in the security field. Port Authority staff will then conduct an intensive reference check of former and present clients. After an appropriate number of qualified firms are identified, such factors as previous experience, quality of staff to be assigned, scope of work and compensation will be evaluated.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to negotiate and enter into an agreement with a professional security firm to provide professional advisory services in a comprehensive security evaluation of The World Trade Center at a compensation not to exceed \$300,000; the form of the agreement to be subject to the approval of General Counsel or his authorized representative.

Whereupon, the meeting was adjourned.

 Edward J. O'Malley, Director of Personnel
 James J. O'Malley, Director of Management Information Services
 Theresa A. Potente, Assistant Secretary
 Martin E. Robins, Director of Planning and Development
 Morris Sloane, Deputy Director of Aviation
 Robert N. Steiner, Deputy Port Director
 Victor T. Strom, Director of Public Safety
 Guy F. Tozzoli, Director of World Trade
 Joseph L. Vanacore, Assistant Executive Director/Capital Programs
 Barry Weintrob, Chief Financial Officer and Director, Finance Department
 Marshal L. Wilcox, Jr., Assistant Chief Financial Officer

The meeting was called to order by the Chairman.

Commissioner James G. Hellmuth

Chairman Kaltenbacher noted that Commissioner James G. Hellmuth had been reappointed by Governor Mario M. Cuomo and expressed the pleasure of his fellow Commissioners that he would continue to serve with them in the work of the Port Authority.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of May 8, 1986. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on June 12, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meetings on June 12, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on June 12, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on June 12, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 6/12/86)

Kennedy International Airport - Nassau Expressway - Authorization of Increase in Financial Participation and Entry into Agreements with the State of New York and City of New York

It was reported that the Board, at its meeting on November 10, 1982, authorized a project at Kennedy International Airport for the Port Authority's financial participation, in an amount not to exceed \$33 million, in the State of New York's project for construction of the Nassau Expressway and approved certain roadway connections at Kennedy International Airport with the Nassau Expressway and Southern Parkway. (This authorization provides funding for Port Authority participation in New York State's Nassau Expressway Section B work). The Port Authority's participation includes various airport connections and roads which would increase or facilitate airport traffic handling capacity. The project was and is deemed vital to meet future access capacity needs.

Under agreements entered into with the State, construction is in progress on two of the five contracts for Section B of the Nassau Expressway with Port Authority financial participation already in place for certain roads within the present airport boundaries. It is expected that the remaining three contracts, two of which the Port Authority will be partially funding, will be awarded between August of this year and the middle of next year.

One of these contracts will construct the new JFK (Airport) Expressway connection with the Southern Parkway. This connection will be the second major entrance to the airport primarily serving traffic from Eastern Long Island. The design of the connection from the parkway, however, as originally approved, is limited in capacity. The original authorized project was estimated to be capable of meeting an annual access capacity of 35.5 million annual air passengers. This demand is now expected to be reached by the year 1991, and during the ensuing decade, the demand is expected to reach approximately 45 million annual air passengers. As part of an overall plan to accommodate an off-airport access capacity of 45 million air passengers, the proposed over-pass connection from the Southern Parkway must be widened. The revised over-pass connection will be widened from two lanes to three lanes thus allowing for one access lane of traffic from North Conduit Boulevard and two access lanes in lieu of one from the Southern Parkway. It is advisable to make this change at this time to avoid excessive costs in the future, including rebuilding existing structures and disrupting traffic to do this work. The recommended increase in project authorization includes the estimated added costs for design, construction and inspection for this work.

To proceed with the project, agreements must be reached with the State for the Port Authority's revised cost participation, and for design, construction and future roadway maintenance. In addition, under existing bi-state legislation pertaining to the airports, the Port Authority's financial participation is limited to roads within the Air Terminal's premises. Based upon negotiations, agreements will be entered into with the City of New York and the State of New York wherein the Port Authority will obtain necessary property interests within roadway areas to be funded. The agreements will additionally involve readjustments of the airport leasehold premises including but not limited to right-of-way easements for the Nassau Expressway and Southern Parkway connections which will become part of the Air Terminal premises as well as for certain ramps which the City has requested the Port Authority to maintain as properly related to airport traffic.

(Board - 6/12/86)

It is expected that a major portion of the work to be performed will be eligible for Federal Airport Improvement Program funding and, it is also expected that a portion of the expenditures not covered by Federal funding would be reimbursed by the airlines through the airline lease formula.

At the present time, staff is studying the installation of a comprehensive traffic surveillance and information system both on and off the airport to enhance the level of service for Port Authority patrons and the public. Components would include changeable message signs, traffic detection, surveillance and control systems. Upon completion of the study, future authorization may be sought for the installation of major components of the system by the State of New York as part of the overall Nassau Expressway Project.

It was therefore recommended that the Board adopt the following resolution.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that an increase in the project authorization for Port Authority participation (to the extent eligible under applicable legislation) in the financing of roadway connections at Kennedy International Airport with the Nassau Expressway and Southern Parkway is hereby authorized from \$33 million, to an expenditure presently estimated at \$38 million, including payments to the State of New York for the Port Authority's financial participation in the State's Nassau Expressway Project, and administrative and general expenses; and it is further

RESOLVED, that the Executive Director, in his discretion, be and he hereby is authorized to enter into agreements with the State of New York and the City of New York associated with the Port Authority's authorized financial participation in certain Nassau Expressway work, including in such Agreements, among other things, the acquisition and conveyance of property interests in certain roadway areas, certain maintenance responsibilities with respect thereto, and the amendment of the Kennedy International Airport Air Terminal premises; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to designate certain roadway areas as Air Terminal Highways, at such time as property interests in such roadway areas become part of the Kennedy International Airport demised premises; and it is further

RESOLVED, that the form of Agreements and other documents necessary or advisable to implement the foregoing be subject to the approval of General Counsel or his designated representative.

(Board - 6/12/86)

Kennedy International Airport - Lease Extension with British Airways PLC and Lease of Building No. 69 and Related Outside Areas to Hudson General Corporation

It was reported that British Airways constructed and occupied Cargo Building No. 66 and Building No. 69 under a 20-year lease which expired on September 23, 1985. British Airways requested an extension as to Building No. 66 but not as to Building No. 69. Negotiations have been substantially completed with British Airways for its continuing occupancy of Building No. 66 for an additional five years at an increase in rental from approximately \$197,000 per year for Buildings No. 66 and No. 69 to \$1,089,588 per year for only Building No. 66.

Hudson General currently occupies a portion of Hangar No. 11 and related outside areas and that hangar as part of The King Interests cargo buildings development, as approved by the Board, at its meeting on August 8, 1985, will be demolished. Hudson General has been served a notice of termination for its Hangar No. 11 space, effective September 30, 1986.

Negotiations have been substantially completed with Hudson General for a lease of Building No. 69 and related outside areas, vacated by British Airways, for a twelve-year term commencing on or about October 1, 1986. Hudson General will be given three months without rental prior to the commencement date of the lease for the purpose of renovating the premises. The rentals for the lease term are based on the following rates and approximate areas. The rental rates for the first two years are the same as Hudson General would have been paying had it remained in Hangar No. 11 until the end of its lease term, August 31, 1988:

Hudson General

	Approximate Annual Building Rentals (Bldg. 69)	Approximate Annual Land Rentals	Approximate Total Annual Rentals
10/1/86 to 8/31/88	\$122,000 30,654 sq. ft. & \$4.00 per sq. ft.	\$53,000 3.48 acres \$15,250 per acre	\$175,000
9/1/88 to 9/30/93	\$166,000 \$5.50 per sq. ft.	\$76,000 \$22,000 per acre	\$242,000
10/1/93 to 9/30/96	\$196,000 \$6.50 per sq. ft.	\$90,000 \$26,000 per acre	\$286,000
10/1/96 to 9/30/98	\$229,000 \$7.50 per sq. ft.	\$108,000 \$31,000 per acre	\$337,000

(Board - 6/12/86)

The rentals for British Airways are as follows:

British Airways Building No. 66			
	Approximate Annual Building Rentals	Approximate Annual Land Rentals	Approximate Total Annual Rentals
9/24/85 to	\$840,000	\$249,588	\$1,089,588
9/23/90	112,000 sq. ft. at \$7.50 per sq. ft.	11.3 acres \$22,000 per acre	

As was the case in respect to Hangar No. 11, Hudson General will use Building No. 69 for its airport operations under its separate permit with the Port Authority covering services it provides to aircraft operators. The use of the premises will include the maintenance, repair and rental of vehicles, automotive equipment, cargo equipment and aircraft ground support equipment. The permit provides that certain of Hudson's operations are subject to a fee of 5% on gross receipts and the permit may be canceled by either party on 30 days' notice without cause. In the event the permit is terminated for any reason, the Port Authority would have the right to terminate the lease. If the permit were terminated without cause by the Port Authority, either party would have the right to terminate the lease and the Port Authority would be obligated to reimburse Hudson for its unamortized investment, on a straight line basis, for the cost of renovating the premises up to \$250,000.

Under the terms of the lease, the Port Authority will provide, and Hudson will pay, for electricity and water on a metered basis. In addition, Hudson will be responsible for all maintenance and repairs within the site.

It was therefore recommended that the Board authorize the Executive Director for and on behalf of the Port Authority to enter into a five year lease extension with British Airways PLC for Cargo Building Co. 66 and related outside areas and to enter into a twelve-year lease with the Hudson General Corporation for Building No. 69 and related outside areas, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a five-year lease extension, commencing on September 24, 1985 with British Airways PLC for Cargo Building No. 66 and related outside areas at a rental of \$1,089,588 per year and to enter into a twelve-year lease commencing on or about October 1, 1986 with the Hudson General Corporation for Building No. 69 and related outside areas at Kennedy International Airport at an approximate annual rental commencing at \$175,000 and escalating to \$337,000 per year over the term of the lease; the form of the agreements to be subject to approval of the General Counsel or his designated representative.

(Board - 6/12/86)

Kennedy International Airport - Lease of Hangar No. 4 and Related Outside Areas to United Airlines, Inc.

It was reported that Hangar No. 4 is part of a complex of Hangars No. 3, 4 and 5 which were constructed by the Port Authority in 1950 and subsequently rented to various airline tenants on a multi-occupancy basis since their completion. At its meeting of March 14, 1985, the Board approved a lease of Hangar No. 4 and related outside areas to British Airways Board. Over the past year, British Airways Board has experienced a substantial change in management and has re-evaluated its facility needs at major airports. They recently informed the Port Authority of their decision not to enter into a lease for Hangar No. 4 as previously expected. With this decision by British Airways Board staff was free to speak with United Airlines for the leasing of Hangar No. 4.

Negotiations have been substantially completed with United Airlines, Inc. for a ten-year lease for the entire Hangar No. 4 facility and related outside areas at an initial approximate annual rental of \$654,920 and escalating to \$883,525 per year. This annual rental is based on the following rental rates and approximate areas and is consistent with the rates recently negotiated for comparable properties:

	Approximate Annual Building Rentals	Approximate Annual Land Rentals	Approximate Total Annual Rentals
5/1/86 to 4/30/89	\$504,920 (91,803 sq. ft. at \$5.50 per sq. ft.)	\$150,000 (7.5 acres at \$20,000 per acre)	\$654,920
5/1/89 to 4/30/93	\$596,720 (91,803 sq. ft. at \$6.50 per sq. ft.)	\$172,500 (7.5 acres at \$23,000 per acre)	\$769,220
5/1/93 to 4/30/96	\$688,525 (91,803 sq. ft. at \$7.50 per sq. ft.)	\$195,000 (7.5 acres at \$26,000 per acre)	\$883,525

Recent acquisition by United of Pan American's far eastern routes has created an additional need for hangar space to service United's long haul 747SP aircraft. United intends to use the facility to service this aircraft as well as providing service for others.

Under the terms of the lease, the Port Authority will provide, and United will pay, for electricity and domestic water on a metered basis. United will also reimburse to the Port Authority their prorated share of operating the boiler room serving the Hangars No. 3, 4 and 5 complex. The Port Authority will retain responsibility for certain items including insurance, structural integrity, roof repairs, and maintenance of specific components of the fire protection system serving Hangars No. 3 and 4.

It was therefore recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement of lease with United Airlines, Inc. for Hangar No. 4 and related outside areas at Kennedy International Airport, all in accordance with the foregoing.

(Board - 6/12/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a ten-year lease with United Airlines, Inc. commencing on or about May 1, 1986 for Hangar No. 4 and related outside areas at Kennedy International Airport at an approximate annual rental of \$654,920 and escalating to \$883,525 per year over the term of the lease, all in accordance with the foregoing; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 6/12/86)

Kennedy International Airport - Hangar No. 5 and Related Outside Areas - Lease with Air Express International Corp.

It was reported that the Board at its meeting of November 8, 1984 authorized the Executive Director to enter into an agreement with TMA providing for the surrender of TMA's lease for Hangar No. 5 and related outside areas at Kennedy International Airport effective on or about December 31, 1984, and to pay to TMA a sum of \$600,000 for its investment for improvements and equipment at the leased premises. At the same meeting the Board also authorized the Executive Director to enter into a ten-year lease agreement, effective on or about January 1, 1985, with Air Express International (AEI) for the same premises at an annual rental of approximately \$584,928 during the first five years of the lease and \$725,268 during the second five years of the lease, plus facility rental of \$112,792 per year to amortize the payment made to TMA for its capital investment in the facility.

Due to the purchase of a new AEI stock issue by Pittson Industries and the resulting change in AEI's management, AEI was unable to execute the lease prior to the January 1985 date. In addition, there was the possibility that the Port Authority might require the entire second floor lean-to area of Hangar No. 5, which was to be included as part of the leased premises, in order to install the computer system for the Port Authority's Air Cargo Fast Flow system. Negotiations continued with TMA and AEI's new management to conclude arrangements and the Board, by resolution of August 8, 1985, amended the effective date of TMA's surrender to be on or about October 31, 1985 and further amended the AEI lease commencement date, among other things, to be on or about November 1, 1985.

In September 1985, as the surrender and lease agreements were being finalized, The Port Authority was advised that the Government of Lebanon had sequestered TMA and appointed new management. The Port Authority was, therefore, precluded from entering into an agreement with TMA until it was decided who in fact could execute such a surrender agreement for the Hangar No. 5 premises. Subsequently, the Port Authority brought suit against TMA in the Civil Court of the City of New York. TMA brought counter claims against the Port Authority seeking \$2.6 million less amounts due and owing to the Port Authority for rent and related charges. A negotiated out of court settlement in the amount of \$275,000 was agreed upon. By Memorandum of Justification dated February 18, 1986, authorization was received from the Executive Director to pay this amount to TMA.

Due to the above mentioned litigation with TMA, lease negotiations with AEI were held in abeyance. Negotiations have now been substantially completed with AEI to enter into a ten-year lease for Hangar No. 5, excluding the second floor, commencing on or about June 15, 1986 at the following rentals:

(Board - 6/12/86)

Approximate Annual Rentals

		Eff. 6/15/86 - 6/14/91		Eff. 6/15/91 - 6/14/96	
		Annual Sq. Ft. Rate	Yearly Rental	Annual Sq. Ft. Rate	Yearly Rental
Cargo Area	66,515 sq. ft.	\$5.00	\$332,575	\$6.25	\$415,718
First Floor	13,355 sq. ft.	5.00	66,775	6.25	83,468
A/C Ramp	102,192 sq. ft.	.50	51,096	.60	61,315
Truck Pkg	133,380 sq. ft.	.50	66,690	.60	80,028
Total Building & Land Rental			\$517,140	\$640,530	

In addition, AEI will pay the aforementioned facility rental of \$112,792 per year and the Port Authority, if requested by AEI, will reimburse AEI a sum not to exceed \$400,000 for improvements to the premises with AEI obligated to repay the amount, as extra facility rental, over the remaining term of the lease at a monthly factor of .015824 for each dollar of Port Authority payment including an amount imputed monthly at a factor of .010208 on all payments made prior to the commencement of the payment of extra facility rental. The monthly facility rental factor, as aforesaid, is based on an 8½-year extra facility rental payment period and would be subject to adjustment for any different payment period.

A security deposit in the amount of \$165,000 or an appropriate letter of credit in lieu thereof, will be required. Should AEI request the Port Authority to fund their improvements, an additional security deposit will be required equal to 5% of such funding.

It was therefore recommended that the Executive Director be authorized for and on behalf of the Port Authority to enter into an agreement of lease with Air Express International Corporation at Kennedy International Airport, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the resolutions adopted by the Board at its meetings on November 8, 1984 and August 8, 1985 authorizing the Executive Director to enter into a ten-year lease agreement with Air Express International Corporation (AEI) for Hangar No. 5 and related outside areas at Kennedy International Airport be amended in accordance with the foregoing; the form of the agreement to be subject to the approval of general counsel or his designated representative.

(Board - 6/12/86)

Newark International Airport - General Cleaning - Contract PSE-447

It was reported that the Board, at its meeting on May 10, 1984, authorized the award of Contract PSE-396, General Cleaning at Newark International Airport to Control Building Services, Inc., the lowest qualified bidder, and authorized the Executive Director, at his discretion, to extend the contract for two additional two-year periods in accordance with the terms of the contract. This contract included cleaning of the Central Tolls Plaza, the Facility Administration/Police Garage Building, and the newly operational Federal Inspection Service's (FIS) area in Terminal C.

The initial two-year term of Contract PSE-396 will expire on May 31, 1986. The scope of work has changed significantly since the contract was first prepared and bid in May 1984, as a result of the activation of additional offices, the mezzanine level and the departure level in Terminal C and the addition of supervision to all tours.

Contract PSE-447, which reflects these changes in scope, was publicly advertised and bids were solicited from 173 vendors. On March 17, 1986, the following bids were received:

*Triangle Maintenance Corp. New York, New York	\$1,092,356
**Motley's Shampooing Co. Bloomfield, New Jersey	1,133,104
Porterhouse Cleaning & Maintenance Service Co., Inc. Edison, New Jersey	1,161,173
Ebon Services International, Inc. Newark, New Jersey	1,210,596

STAFF ESTIMATE	\$1,292,000

Porterhouse Cleaning & Maintenance Service Co., Inc., a minority contractor, has been determined to meet all of the contractual requirements and is qualified to perform the work. Porterhouse Cleaning & Maintenance Service Co., Inc. has performed satisfactorily on other Port Authority janitorial services contracts. Staff therefore recommends that the Board award Contract PSE-447, Newark International Airport, General Cleaning, to Porterhouse Cleaning & Maintenance Service Co., Inc. in the estimated amount of \$1,161,173.

It was therefore recommended that the Executive Director be authorized for and on behalf of the Port Authority to award Contract PSE-447 for general cleaning at Newark International Airport to Porterhouse Cleaning & Maintenance Service Co., Inc., all in accordance with the foregoing.

*These bids noted above were deemed non-responsive in that they were not in accordance with the provisions of the contract providing for payment of at least the average wages and supplemental benefits specified therein.

**This bid was deemed non-responsive in that Motley's Shampooing Co. did not meet the prerequisite for the contract of having the required number of full-time employees.

(Board - 6/12/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to: (1) award Contract PSE-447, Newark International Airport, General Cleaning, covering the cleaning of the Central Tolls Plaza, the Facility Administration/Police Garage Building and the operational areas in Terminal C, including the Federal Inspection Service (FIS), office areas, mezzanine and departure levels at Newark International Airport, to Porterhouse Cleaning & Maintenance Service Co., Inc., the lowest responsive bidder, at its bid price of \$1,161,173, exclusive of a 10% extra work allowance, for a two-year term effective June 1, 1986 and (2) authorize the Executive Director to exercise, at his discretion, two additional one-year extensions to the contract, with the compensation due the contractor to be adjusted at the commencement of each renewal period based upon the contractor's actual cost for labor, applicable taxes, insurance required by law and supplemental benefits during the prior year of the contract as determined by audit and the projected costs for the same during the extension period, exclusive of a 10% allowance for extra work; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 6/12/86)

All Airports and Heliports - Revision to Schedule of Charges for Air Terminal - Free Use of Air Terminal

It was reported that on March 4, 1954, the Committee on Operations adopted a revision extending the free use of the air terminals to aircraft operated by agencies of local governments located within the Port District and other local government agencies with whom the Port Authority may enter into reciprocal fee waiver agreements.

The New Hampshire State Police requested a waiver of aircraft landing fees on October 30, 1985 in a letter to the Director of Aviation, which was denied on December 3, 1985. The request was denied as the State of New Hampshire did not conform to any of the current exempt categories. On January 30, 1986, New Hampshire again requested an exemption in a letter to the Chairman which was accompanied by endorsements from the Superintendents of the New York and New Jersey State Police. The endorsements cited the close working relationships among the respective State Police units and the mutual benefits to be derived from the grant of the exemption not only with regard to criminal investigations but other official missions.

Upon staff discussion, it was determined that the merits of New Hampshire State Police's request as well as future requests by similarly situated agencies outweigh the de minimis loss of revenue. Furthermore, granting such an exemption at the discretion of the Director of Aviation eliminates the possible need of further administrative approval by the Board.

It is therefore recommended that the Board approve amendments to existing categories and the inclusion of an additional category eligible for the free use of the public landing area by: amending categories 1b. "the State of New York" and 1c. "The State of New Jersey" by inserting the phrase "and their agencies;" and adding a new category "States other than New York and New Jersey and their agencies with whom the Port Authority may enter into reciprocal fee-waiver agreements wherever practical at the discretion of the Director of Aviation." This new category is to be inserted in the Schedule of Charges - Free Use of Public Landing Area after "The State of New Jersey" and designated 1.d. Existing classifications 1.d. and 1.e. will be reclassified as 1.e. and 1.f.

It was therefore recommended that the Schedule of Charges at Kennedy International, LaGuardia, Newark International and Teterboro Airports and the Port Authority West 30th Street and Downtown Heliports be revised in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board adopt a revision to the Schedule of Charges at Kennedy International, LaGuardia, Newark International and Teterboro Airports and Port Authority West 30th Street and Downtown Heliports relating to the free use of air terminals. The revision would amend the current classes of aircraft permitted free use of the air terminal to include aircraft owned, leased or chartered by the agencies of the States of New York and New Jersey and all other States and their agencies with whom the Port Authority may enter into reciprocal fee-waiver agreements wherever practical, at the discretion of the Director of Aviation.

(Board - 6/12/86)

The World Trade Department - Newark Legal and Communications Center - Contract LCC-705.006 - Foundations - Award

It was reported that Contract LCC-705.006 requires the contractor to furnish and install the foundation system for the Newark Legal and Communications Center Office Building. Specifically, the contractor will be responsible for the furnishing and placement of augered cast piles, the associated excavation as required for the piles, load testing of the piles, pile-caps, grade beams, pit slabs and walls, waterproofing of the finished installation as required and site dewatering.

Additionally, the contract will include the installation of a segment of the foundation wall of the garage for the Center. Although this portion of the construction is not a part of the office building, the placement is required at this time so that utility relocation can proceed without delay. The NEDC Riverfront Corporation is responsible for the construction of the garage and for reimbursement of the cost of the garage foundation wall.

Mueser Rutledge Consulting Engineers (foundation advisor for the Newark Legal and Communications Center project) has recommended that foundation piles for the Newark Legal and Communications Center be of the augered cast-in-place type so as to minimize any possible impact on the Passaic Valley sewer directly adjacent to the Newark Legal and Communications Center site.

Due to the specialized expertise required to install augered cast piles, staff recommends that the bidding be restricted to those few firms which possess the specialized skills necessary to perform the requirements of the contract. To date, staff has identified only three firms which may possess the necessary skills, and is investigating their qualifications to perform the specialized construction required in order that proposals for the contract may be solicited.

Staff had determined that in order for the Newark Legal and Communications Center to be ready for occupancy by mid-1987, it is crucial to proceed with this phase of construction at this time so that it may be coordinated with the completion of the excavation work, previously awarded under Contract LCC-705.005.

It was therefore recommended that the Board authorize:

1. the solicitation of proposals from a limited number of qualified foundation contractors on Contract LCC-705.006, Newark Legal and Communications Center, Foundations; and

2. the Committee on Construction to authorize the Executive Director, in his discretion: (a) to award the contract to the contractor who submits the lowest proposal, and who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price the Executive Director deems reasonable, and to order extra work up to an amount of 10% of the amount of the proposal accepted; (b) to reject all proposals or (c) to negotiate with one or more of the contractors who submit proposals, or who may subsequently be identified as qualified to do the work, and to enter into a contract for performance of the work with that contractor which he deems qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price he deems reasonable, and to order extra work up to the amount of 10% of the amount of the negotiated contract price.

(Board - 6/12/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the solicitation of proposals from a limited number of qualified foundation contractors on Contract LCC-705.006, Newark Legal and Communications Center, Foundations, is authorized; and it is further

RESOLVED, that the Committee on Construction is authorized to authorize the Executive Director, in his discretion: (a) to award the contract to the contractor who submits the lowest proposal, and who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price the Executive Director deems reasonable, and to order extra work up to an amount of 10% of the amount of the proposal accepted; (b) to reject all proposals; or (c) to negotiate with one or more of the contractors who submit proposals, or who may subsequently be identified as qualified to do the work, and to enter into a contract for performance of the work with that contractor which he deems qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price he deems reasonable, and to order extra work up to the amount of 10% of the amount of the negotiated contract price.

(Board - 6/12/86)

The World Trade Department - The Teleport - Naming of Interior Roadways

It was reported that in order to forward the process of obtaining a unique postal zip code and permanent mailing address for tenants at The Teleport, it has become necessary to officially name The Teleport's primary interior roadway, tentatively named Teleport Drive. The roadway was constructed under Contracts TP-110.002, "Paving & Utilities 1A" and TP-110.006, "Paving & Utilities Phase 1B" and is nearing completion.

It was therefore recommended that the Board authorize the naming of the interior roadway of The Teleport as Teleport Drive.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the primary interior roadway of The Teleport be and it hereby is named Teleport Drive.

(Board - 6/12/86)

Engineering Department Structural Integrity Program - Authorization to Award "Call-In" Contracts

It was reported that during the fall of 1984 the Infrastructure Design Division was created to insure that the Structural Integrity Program is fully implemented at all Port Authority and PATH facilities. To date, as immediate structural integrity problems have been identified, they have been corrected by ordering extra work to existing contracts, by entering into supplemental agreements under existing contracts and by preparing new contracts. It is staff's opinion that these vehicles are time consuming and costly in responding to the structural integrity problems which require a quick response to insure public safety and/or to maintain essential facility operations. Accordingly, staff recommends that "call-in" contracts be entered into for handling all immediate structural integrity problems of all line departments when SEMAC forces are not available or do not have the proper expertise to perform the work.

These contracts will also provide necessary support to Engineering Department staff or professional advisory service firms retained by the Engineering Department during the performance of the structural integrity inspections at all Port Authority/PATH facilities, by providing construction services such as rigging, scaffolding, shoring and removal and restoration of building finishes for inspection access. Each contract will also contain separate fee schedules for assistance in scheduled structural integrity inspections and for making the required repairs on an immediate response basis, if required. These different fee schedules are required in order to reflect non-premium and premium rates for the different response time.

Because of the nature of the work, bids on these contracts will be solicited from New York and New Jersey contractors who are experienced and capable of performing the work; are known to have previously performed satisfactory work for the Port Authority and can respond with sufficient labor, equipment and materials to perform the work on a timely basis. Where possible, bids will be solicited from Minority Business Enterprises.

"Call-In" contracts will be prepared for every facility or group of facilities based upon the location and type of facility, and the ease of contract administration.

The successful bidder on each contract will be compensated at an amount equal to the net cost of the work plus a sliding fee based on the amount of the net cost of the work. Proposals will be compared, based on a weighted average fee to be computed using the sliding fee percentage inserted by the bidders in a fee schedule based on various amounts of net cost.

Since the contract provides for an immediate action response within 24 hours of an immediate action request, work under this contract may be performed during nighttime and weekend hours.

It was therefore recommended that the Board authorize the Chief Engineer to award "call-in" contracts for structural integrity work at various facilities, each not to exceed \$1 million, unless approved by the Executive Director, and, in any case, the total aggregate amount of all contracts not to exceed \$7 million.

(Board - 6/12/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Chief Engineer is authorized to award "call-in" contracts for structural integrity work at various facilities, each not to exceed \$1 million, unless approved by the Executive Director, and, in any case the total aggregate amount of all contracts not to exceed \$7 million; and it is further

RESOLVED, that the form of such contracts be subject to the approval of General Counsel or his designated representative.

Whereupon, the meeting was adjourned.

Kristina Weisenstein, Administrative Assistant
Marshal L. Wilcox, Jr., Assistant Chief Financial Officer

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of June 12, 1986. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on July 10, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on July 10, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on July 10, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on July 10, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 7/10/86)

1986 Budget - January 1 through September 30, 1986

It was reported that the Board, at its meeting on December 12, 1985, acted to confirm the authority of the Executive Director through January 31, 1986, to make expenditures in an amount not to exceed \$200 million and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1986 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation). On January 9, 1986, the Board acted to confirm the authority of the Executive Director through February 28, 1986, to make expenditures at a rate not to exceed \$200 million per month and to authorize the Executive Director to implement the annual salary range adjustment. On February 13, 1986, March 13, 1986, April 10, 1986, and May 8, 1986, the Board's confirmation of the Executive Director's authority was extended, most recently through July 31, 1986. These actions were taken when it became apparent that, in connection with the items constituting the proposed 1986 Budget being considered by the Board, the Governors' staffs might not complete their review of preliminary Budget materials prior to adoption of the 1986 Budget. That process is continuing and has not yet been concluded.

It is therefore appropriate to confirm the authority of the Executive Director to continue to make payments for expenses and to undertake contractual commitments, in accordance with the By-Laws, for continuing operations and professional services, all as contemplated in the proposed 1986 Budget presented to the Board on December 6, 1985. It is expected that such payments will not exceed \$200 million per month through September 30, 1986.

It was therefore recommended that the Board confirm that the Executive Director is authorized through September 30, 1986, to make expenditures at a rate not to exceed \$200 million per month, including but not limited to personnel, materials and services, equipment, supplies, utilities, cleaning services and insurance, and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1986 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation) presented to the Board on December 6, 1985.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that it is hereby confirmed that the Executive Director is authorized through September 30, 1986, to make expenditures at a rate not to exceed \$200 million per month, including but not limited to personnel, materials and services, equipment, supplies, utilities, cleaning services and insurance, and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1986 Budget for The Port Authority of New York and New Jersey (including Port Authority Trans-Hudson Corporation) presented to the Board on December 6, 1985.

(Board - 7/10/86)

Port Authority World Trade Center Offices - 1986 Modular Workstation and Office Furniture Purchases

The purchase of approximately 700 workstations is required during the remainder of 1986 for among other reasons, the replacement of rented furniture, and that portion of the existing workstations which have been rendered unserviceable due to ordinary "wear and tear". At the same time, these purchases will facilitate the implementation of the downsizing of the Port Authority's World Trade Center offices in order to maximize the number of staff that can be accommodated. In light of the actual and projected increases in the number of staff located or to be located at The World Trade Center, the amount of space allocated to individual offices will be reduced from 170 square feet to 128 square feet for executive level staff (levels B-8 and above) and, from 100 square feet to 64 square feet for all other management and clerical staff. This downsizing of individual space standards will result in an average increase of 10 to 12% in the staffing capacity of each floor by adding approximately 20 workstations per floor.

The purchase of new space-saving modular workstations is integral to the implementation of the downsizing program. These modular units increase the efficient use of a given workspace because overhead files can be suspended from, and lateral files and work surfaces buttressed against, workstation panels. Experience with test modular workstations located in the Economic Development, General Services and World Trade Departments has confirmed the utility of this feature.

At present, the Port Authority's floors at The World Trade Center are in an "open office" configuration utilizing freestanding wall panels. The existing panels, which require supporting feet that protrude into the aiseways, are highly inefficient in that they cannot support shelves and other work surfaces. Also, the current freestanding desks and file storage units cannot physically fit into the new space standards of 128 and 64 square feet. Therefore, new workstations will have to be purchased.

The existing workstation panels and office furniture were purchased when Port Authority headquarters moved to The World Trade Center in 1973 and many units are in need of complete repair or replacement. Furthermore, the original manufacturer is no longer producing the existing panels so parts or replacements are not readily available. As new workstations are acquired, usable old partitions and freestanding furnishings will be distributed to other Port Authority offices where possible and appropriate, or they will be sold as surplus.

A committee of Port Authority staff experts headed by the Senior Consultant Architect was convened to evaluate a variety of modular workstation units. The office systems produced by sixteen different manufacturers were reviewed for their strength of construction, ease of maintenance, flexibility for varied configuration and aesthetics. In order to identify which of these products would meet the Port Authority's revised needs due to downsizing, during the past two years, staff conducted an evaluation through showroom and factory inspections, visits to other offices using various modular systems, and on-premises tests of selected brand-name workstations.

(Board - 7/10/86)

As a result of this evaluation, the committee has identified three manufacturers with acceptable product lines: All Steel, Corry-Jamestown Co. and Knoll-Zapf. The Port Authority will limit the solicitation of bids for the purchase of workstations to the authorized distributors of these manufacturers' workstations and such other manufacturers whose workstations are deemed acceptable by the selection panel or its successor in function.

The estimated cost of the purchase of the approximately 700 workstations required in 1986 is approximately \$4.6 million. Funds remain in the 1986 Budget to pay for these purchases. Further, the Port Authority will use its best efforts to see to it that MBEs and WBEs participate in the purchase program. A goal of 10% of the total purchase cost will be sought for MBE/WBE participation.

Approximately \$1.5 million has been expended since January 1986 for the purchase of 200 modular workstations for the Economic Development and Engineering Departments, as well as additional furnishings for reception areas and conference rooms. These purchases fell within expenditure levels which permitted authorization by the Executive Director and were undertaken to meet the need for workstations for new headquarters staff. The workstations which will be purchased over the remainder of 1986 will be used to downsize and refurbish four full floors in The World Trade Center (approximately 650 workstations) to relocate the Personnel Department's Operations Division and to create a Port Authority reception area for personnel applicants and other official visitors on the 44th floor sky lobby (approximately 50 workstations).

It was therefore recommended that the Board authorize the Executive Director to either award contracts during 1986 for the purchase and installation of approximately 700 modular workstations and additional conference room and reception area furnishings for Port Authority offices at The World Trade Center to, in the case of each contract, the lowest bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, and to order extra work up to the amount of 10% of the bid accepted, or to reject all bids, at a total estimated expenditure of \$4.6 million.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized, in his discretion, to either award contracts during 1986 for the purchase and installation of approximately 700 modular workstations and additional conference room and reception area furnishings for Port Authority offices at The World Trade Center to, in the case of each contract, the lowest bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, and to order extra work up to the amount of 10% of the bid accepted, or to reject all bids, at a total estimated expenditure of \$4.6 million; and it is further

RESOLVED, that the form of the agreements be subject to the approval of General Counsel or his designated representative.

(Board - 7/10/86)

Purchase of Owner Controlled Insurance Program - Workers' Compensation and Public Liability Insurance - All Port Authority and PATH Construction and Maintenance Contracts

It was reported that the current crisis in the world insurance marketplace has impacted heavily on the construction and maintenance industry such that contractors are experiencing both severe increases in premiums, which are generally passed through to owners in the overall costs of contracts, and, in some cases, an unavailability of the insurance required to bid for construction and maintenance contracts. These factors eliminate otherwise qualified contractors from consideration by project owners and developers and, in the Port Authority's case, may imperil its ability to meet its commitment to carry out the long-range Capital Program.

To address these problems, an interdepartmental task force was created to evaluate the potential of establishing an overall construction and maintenance insurance program. Recognizing that the Port Authority provided insurance for contractors as early as 1952 at the Lincoln Tunnel Third Tube Project, and that the Port Authority subsequently purchased similar insurance programs for the Rehabilitation Projects for LaGuardia and Newark International Airports, the initial World Trade Center Project, the Journal Square Transportation Center, the Consolidated Passenger Ship Terminal and the initial Bus Terminal Extension and subsequent Bus Terminal Extension and Modernization Projects, the task force concluded that the concept of an Owner Controlled Insurance Program was appropriate. Staff of EBASCO Risk Management Consultants, Inc. have indicated that they believe that this type of program is appropriate for the Port Authority.

Under the Owner Controlled Insurance Program, the Port Authority will purchase both public liability insurance, in total limits of \$75 million per occurrence, and statutory workers' compensation insurance on behalf of contractors, subcontractors and inspection firms engaged in work under all Port Authority and PATH construction, maintenance and inspection contracts advertised for bid or negotiated on or after July 1, 1986. Underwriters have indicated that coverage may be made available to an individual contractor, subcontractor or inspection firm engaged in work under a contract executed prior to July 1, 1986 in the event such contractor, subcontractor or inspection firm cannot complete work under the contract solely due to its inability to continue to obtain the insurance required by the contract.

The Owner Controlled Insurance Program permits underwriters to provide the appropriate coverages in substantial limits based on the large volume of aggregate premium generated by the construction and maintenance work under the Port Authority's Capital Program and due to the Port Authority's outstanding loss record achieved through its extensive safety and risk control programs. In addition, staff expects the Owner Controlled Insurance Program to generate substantial premium savings over contractor-provided insurance, even if it were available. It is conservatively estimated that, based on representative rates currently being paid by individual contractors and on the published rates of the rating organizations, that savings equivalent to 1.5% of payments to contractors can be realized, which is equivalent to approximately \$5 million annually, resulting from insurance mass purchasing, a centrally coordinated safety program, reductions in administrative costs and the elimination of litigation between contractors.

(Board - 7/10/86)

The Owner Controlled Insurance Program will also provide insurance protection under substantially more favorable terms and conditions than would be possible under contractor-provided insurance policies, where carriers have imposed far more restrictive terms, including shorter notice of cancellation provisions, the exclusion of previously covered perils, narrower definitions of covered events and limitations on the time available for filing claims. The Owner Controlled Insurance Program will be written on an occurrence basis, whereby the coverages will respond to losses occurring during the policy period without restriction as to the time a claim is filed, as opposed to the increasing amount of insurance contractors must purchase on a "claims-made" basis, which provides coverage only for losses occurring during and reported in the policy period, a restriction which could substantially increase the potential for an uncovered claim. In contrast, the insurers underwriting the Owner Controlled Insurance Program will provide coverage under a policy with terms and conditions tailored to the Port Authority's needs.

With the approval of the Executive Director, staff worked with broker, Hamond & Regine, Inc., who with broker, C.E. Heath & Co., Ltd. in London, has negotiated with various insurance carriers to secure firm proposals for the required coverages. As a result, the National Union Fire Insurance Company of Pittsburgh, Pennsylvania (National Union) has provided a firm proposal for statutory workers' compensation insurance, effective July 1, 1986 for an indefinite term (subject to rights of cancellation), with premium based on standard New York and New Jersey Workers' Compensation Manual Rules and Rates in effect during the initial eighteen-month period, to be paid at a rate for the initial eighteen months of the program of up to \$2 per \$100 of contract payments actually made during the eighteen-month period, subject to an annual retrospective rating adjustment which could reduce the premium rate based on favorable loss experience. An initial deposit premium of \$1,666,667 is required, as well as quarterly deposit premiums thereafter, based on projected contract payments in each ensuing quarter. Staff estimates that, based on projected contract payments during the first eighteen months of coverage, the premium for the eighteen-month period will not exceed \$8.7 million.

National Union will also provide primary public liability insurance, in a limit of \$1 million per occurrence each insured, subject to an aggregate limit of \$5 million per occurrence all insureds combined, effective July 1, 1986 for an indefinite term (subject to rights of cancellation), at a premium rate for the initial eighteen months of the program of up to \$1.11 per \$100 of contract payments actually made during the eighteen-month period, subject to an annual retrospective rating adjustment which could reduce the rate based on favorable loss experience. An initial deposit premium of \$775,000 is required, as well as quarterly deposit premiums thereafter, based on projected contractor payments in each ensuing quarter. Staff estimates that, based on projected contract payments during the first eighteen months of coverage, the premium for the eighteen-month period will not exceed \$4.9 million.

Both the workers' compensation and primary public liability rates proposed by National Union for the Owner Controlled Insurance Program compare favorably with the rates currently being charged for similar coverages under The World Trade Center-Bus Terminal Expansion projects, which are \$1.72 for workers' compensation and \$1.918 for primary public liability, respectively.

(Board - 7/10/86)

In addition to statutory workers' compensation and primary public liability insurance, National Union has also provided a firm proposal for public liability insurance in limits of \$3 million per occurrence, aggregate for all insureds combined, in excess of \$1 million of primary coverage, effective July 1, 1986 for an indefinite term (subject to rights of cancellation), at a premium cost for the initial year of the program of \$1.5 million. The premium cost for this coverage will be reviewed annually in light of the exposures identified in, and the volume of, the construction, maintenance and inspection contracts to be let in each ensuing year and in light of the loss experience developed to that point.

National Union is a member of the American International Group (AIG) and has been providing coverage for construction activities at The World Trade Center and Bus Terminal projects since January 1, 1982. In addition, AIG companies have provided Port Authority purchased insurance programs for the initial World Trade Center-Hudson Tubes project and for the Journal Square Transportation Center project. AIG companies hold a policyholders' rating of A+ (Excellent) and a financial size category of XV (on a scale of I to XV) in the 1985 Best's Insurance Reports (Property-Casualty edition).

Finally, Hamond & Regine, Inc. and C.E. Heath & Co., Ltd. have also provided a firm proposal from Lloyd's Underwriters and other London insurers to provide public liability insurance in limits of \$71 million per occurrence, aggregate for all insureds combined, in excess of \$4 million of underlying coverage, effective July 1, 1986 for an indefinite term (subject to rights of cancellation), at a premium rate for the initial eighteen months of the program of \$1.76 per \$100 of contract payments actually made during the eighteen-month period, subject to deposit premiums of \$700,000, \$2,750,000 and \$2,750,000 for the six-month periods beginning July 1, 1986, January 1, 1987 and July 1, 1987, respectively, and which results in an aggregate minimum premium for the eighteen-month period of \$6.2 million. Staff estimates that, based on projected contract payments for the initial eighteen months of coverage, the premium for the eighteen-month period will not exceed \$7.5 million. This premium rate will be reviewed at the end of the initial eighteen-month period in light of the exposures identified in, and the volume of, the construction, maintenance and inspection contracts to be let in the ensuing period and in light of loss experience developed to that point.

The workers' compensation and public liability insurance coverages provided by National Union provide for cancellation by either the Port Authority or the insurers upon 120 days' written notice of cancellation. The \$71 million of excess public liability insurance provided by Lloyd's Underwriters and other London insurers is also subject to cancellation on 120 days' written notice by either the Port Authority or the insurers; however, these insurers have agreed that coverage provided to any contractor, subcontractor or inspection firm prior to the issuance of any notice of cancellation would continue in force until the completion of that contractor's, subcontractor's or inspection firm's work regardless of the effective date of the cancellation stated in the notice. This provision assures that the Port Authority's obligation to provide insurance under executed contracts would be fulfilled even in the event that \$71 million of excess public liability coverage under the Owner Controlled Insurance Program might be cancelled.

(Board - 7/10/86)

Recommendation was made that the Board authorize the purchase of workers' compensation and public liability insurance, under an Owner Controlled Insurance Program, on behalf of contractors, subcontractors and inspection firms engaged in work under all Port Authority and PATH construction and maintenance and inspection contracts, where insurance is normally required, through brokers, Hamond & Regine, Inc. and C.E. Heath & Co., Ltd., as follows:

1. Workers' Compensation Insurance covering contractors and subcontractors engaged in work under construction, maintenance and inspection contracts from National Union Fire Insurance Co. of Pittsburgh, Pennsylvania (National Union), effective July 1, 1986 for an indefinite term (subject to rights of cancellation), with premium based on standard New York and New Jersey Workers' Compensation Manual Rules and Rates in effect during the initial eighteen-month period, to be paid at a rate of up to \$2 per \$100 of contract payments actually made during the eighteen-month period, at a total cost for the initial eighteen months of coverage in the total estimated amount of \$8.7 million;

2. Public Liability Insurance providing primary coverage in a limit of \$1 million per occurrence each insured, subject to an aggregate limit of \$5 million per occurrence for all insureds combined, from National Union, effective July 1, 1986 for an indefinite term (subject to rights of cancellation), at a premium rate for the initial eighteen months of coverage of up to \$1.11 per \$100 of contract payments actually made during the eighteen-month period, at a total cost for the initial eighteen months of coverage in the total estimated amount of \$4.9 million;

3. Public Liability Insurance providing coverage in a limit of \$3 million per occurrence, aggregate for all insureds combined, in excess of \$1 million primary coverage, from National Union, effective July 1, 1986 for an indefinite term (subject to rights of cancellation), at a premium cost for the initial year of coverage of \$1.5 million; and

4. Public Liability Insurance providing coverage in a limit of \$71 million per occurrence, aggregate for all insureds combined, in excess of \$4 million of underlying coverage, from Lloyd's Underwriters and other London insurers, effective July 1, 1986 for an indefinite term (subject to rights of cancellation), at a premium rate for the initial eighteen months of coverage of \$1.76 per \$100 of contract payments actually made during the eighteen-month period, at a total cost for the initial eighteen months of coverage in the total estimated amount of \$7.5 million.

Approved.

(Board - 7/10/86)

**Kennedy International Airport - Buckeye Pipe Line Company Extension of License Agreement
AY-280 and Lease AYA-196**

It was reported that on September 9, 1965, the Board authorized the Executive Director to enter into a nine-year license agreement with the Buckeye Pipe Line Company ("Buckeye") granting it permission to construct and operate two pipelines at Kennedy International Airport. Both twelve-inch pipelines originate in Linden, New Jersey, and extend across Staten Island and Brooklyn to the bulk fuel farm at the airport where they now terminate. One of the pipelines carries virtually all the jet aircraft fuel coming into the airport; with a small amount arriving by barges. The license agreement would have permitted Buckeye to extend the other pipeline, which has not been used, through the airport along its northern boundary and into Nassau County. Buckeye has never exercised this right. This license agreement has been extended once since 1965 and now expires on December 31, 1987. Buckeye now wishes to extend the other pipeline through the airport, following a routing along the shoreline of Bergen Basin and the airport's undeveloped southern and eastern boundaries and into Nassau County. Buckeye expects to invest approximately \$11 million in the pipeline extension and use it for the transportation of gasoline, diesel fuel and domestic heating oil.

For a 20-year extension of the license, the fee would be increased on January 1, 1988 from the current \$121,656 per year to \$325,000 per year for five years with fee adjustments for three subsequent five-year periods thereafter in proportion to the change in the Consumer Price Index for All Urban Consumers (All Items - seasonally unadjusted) ("CPI").

On September 9, 1965, the Board also authorized the lease to Buckeye of a site at the airport consisting of 0.588 of an acre on which it constructed Building No. 157 used in connection with the pipeline operation and Building No. 154 used for sample testing. The current lease rental of \$14,940 per year would be increased to an annual ground rental of \$15,876 and an annual building rental of \$10,452 on January 1, 1988 for five years with adjustments for three subsequent five-year periods thereafter in proportion to changes in the CPI.

In addition to the foregoing rental and fee, Buckeye would pay the Port Authority an annual through-put fee of \$.02 per barrel of fuel passing through the airport into Nassau County. This fee would be adjusted every five years in proportion to the change in the CPI. Buckeye expects to average 9,782,000 barrels of fuel through-put annually during the first five years of operation. The annual through-put fee on this volume would be \$195,640. For the second five years Buckeye forecasts an annual through-put of 12,775,000 barrels, which would realize the Port Authority an annual through-put fee of \$255,500 (before the CPI adjustment). In the tenth year and thereafter Buckeye forecasts an annual through-put of up to 18,200,000 barrels, on which an annual through-put fee of \$364,000 would be due to the Port Authority (before the CPI adjustment).

If Buckeye does not commence construction of the extension before December 31, 1988, the license and lease agreements would terminate on December 31, 1992. Amendments of the license and lease may be accomplished by preparing them in restated form.

It was therefore recommended that the Executive Director be authorized, for and on behalf of the Port Authority, to enter into agreements with the Buckeye Pipe Line Company.

(Board - 7/10/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into agreements at Kennedy International Airport with the Buckeye Pipe Line Company amending License Agreement No. AY-280 and extending its term from its current expiration date of December 31, 1987 to December 31, 2007 and amending Lease No. AYA-196 and extending its term from its current expiration date of December 31, 1987 to December 31, 2007, all on the terms set forth above; and it is further

RESOLVED, that the form of agreements be subject to the approval of General Counsel or his designated representative.

(Board - 7/10/86)

LaGuardia Airport - Taxiway CC - Paving and Utilities - Contract LGA-220.031 - Award

It was reported that the Board, at its meeting on March 13, 1986, authorized a project at LaGuardia Airport for the construction of Taxiway CC at an amount estimated at \$3.6 million, including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses. The award of Contract LGA-220.031 falls within the scope of this authorization.

Contract LGA-220.031 includes the construction of pavement, taxiway lighting, drainage and guidance signs, and the removal and relocation of FAA Aircraft regulators and associated equipment and New York Telephone ducts. The telephone work is not relocation of which the contractor would bear the cost but installation of new and removal of existing ducts for the convenience of the Authority for which the Authority has traditionally paid.

The contract also provides for the excavation, removal and replacement of unsuitable material on a net cost basis estimated at roughly \$100,000.

A portion of the work will be performed during two 48-hour weekend shutdowns of Taxiways "E" and "G".

The contract includes a provision that the bidder use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

The entire contract is eligible for Federal funds under the Airport Improvement Program (AIP).

The contract was publicly advertised and the following bids were received on May 22, 1986:

	Lump Sum Amount
Willets Point Contracting Corp. Flushing, New York	\$2,492,000
Anthony Grace & Sons, Inc. Whitestone, New York	2,572,000
The Briar Contracting Corporation Peekskill, New York	2,872,318
Acme Skillman Construction Co., Inc. Maspeth, New York	3,423,000
ENGINEER'S ESTIMATE	\$2,600,000

(Board - 7/10/86)

Willetts Point Contracting Corp. submitted the lowest bid and was determined by the Chief Engineer to be qualified to perform the contract.

It was therefore recommended that the Board authorize the Executive Director to award Contract LGA-220.031, Taxiway CC, Paving and Utilities, LaGuardia Airport to Willetts Point Contracting Corp., the low bidder, at its bid price in the amount of \$2,492,000 plus an authorization of \$249,000 for extra work and a provision for net cost work.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract LGA-220.031, Taxiway CC, Paving and Utilities, LaGuardia Airport to Willetts Point Contracting Corp., the low bidder, at its bid price in the amount of \$2,492,000 plus an authorization of \$249,000 for extra work and a provision for net cost work.

(Board - 7/10/86)

Newark International Airport - United Parcel Service Co. - Lease for Parcel Distribution Air Facility

It was reported that United Parcel Service Co. (UPS) has been operating at Newark International Airport since 1982. UPS does not have a leasehold of its own and is being handled by Butler Aviation-Newark, Inc. at the north end of the airport. The UPS operation has grown steadily to the point where UPS estimates it will handle 60,000 tons of cargo at Newark International Airport in 1986. UPS has expressed a desire for an airport site for the development of a parcel distribution air facility to meet this increasing activity.

Negotiations have been substantially completed with UPS for a lease of a site of approximately 28 acres in the south development area of the airport where it would develop, construct and operate a parcel distribution air facility. UPS has estimated that it will take approximately six months to complete construction of said facility representing a construction investment of approximately \$11 million and the lease would so require, but the Executive Director, in his discretion, would be authorized to extend the outside date of the completion of construction for a period of up to six months. The term of the lease would expire 25 years after completion of construction or December 31, 2011, whichever date first occurs, subject to the aforesaid extension of up to six months at the discretion of the Executive Director.

Effective when UPS first uses the premises, but no later than January 1, 1987 or July 1, 1987 if the Executive Director has extended the date for completion of construction as aforesaid, UPS will pay an initial annual ground rental of approximately \$852,935 consisting of a fixed amount of \$210,000 (the constant factor) and a variable amount of \$642,935 (the Airport Services factor). The constant factor of the annual ground rental is initially based on \$7,500 per acre and will be increased approximately 20% every five years after ground rental commences. Accordingly, during the second five-year period the constant factor will be increased to \$252,000 based on \$9,000 an acre; during the third five-year period it will be increased to \$308,004 based on \$11,000 an acre; during the fourth five-year period it will be increased to \$363,996 based on \$13,000 an acre; and during the final five-year period it will be increased to \$447,996 based on \$16,000 an acre. The aforesaid annual ground rentals are based on approximately 28 acres and will be adjusted based on actual measurement of the site. The Airport Services factor, which is subject to annual adjustment, is based on the Airline Master Lease adjustment which for the calendar year 1985 amounts to approximately \$23,000 per acre. In addition, UPS will pay flight fees and fuel gallonage fees in accordance with the Airline Master Lease formulas.

Since these Master Leases expire on December 31, 1998 and UPS's lease goes beyond that date, provision is made to negotiate new flight fees and fuel gallonage fees and, failing agreement, for payment based on the Port Authority's Schedule of Charges. UPS will have complete responsibility for the operation, maintenance and repair of the premises and provide property insurance.

Pursuant to the resolution of the Board, adopted at its meeting on November 8, 1984, the UPS lease will also contain provisions covering Affirmative Action/Equal Employment Opportunity and the use of Minority Business Enterprises and Women Owned Business Enterprises.

(Board - 7/10/86)

UPS will be required to procure and maintain throughout the term of the letting under the lease a contract of guaranty from United Parcel Service of America, Inc., the parent of UPS, wherein United Parcel Service of America, Inc., will guarantee the performance by UPS of all terms and conditions of the lease.

The Port Authority will provide paving and utilities to the perimeter of the site, including an access road and taxiway, underground utility systems for water, sanitary and storm drainage, and underground duct systems for electrical power distribution and communications. In order to meet UPS's expedited construction schedule, UPS will perform the foregoing work and the Port Authority will reimburse UPS for its costs as defined. The Port Authority expects to provide approximately 20,000 tons of lime-cement-flyash (LCF) under current Contract NIA-110.025 to UPS to accomplish the taxiway work.

An overflow auto parking area, restricted service road and various utility lines are located within the proposed site. In order to accomplish its development of the site, UPS would relocate the parking lot and restricted service road at its expense to other locations on the airport and pay for the relocation of the utility lines by the appropriate utility companies.

It was therefore recommended that the Executive Director be authorized, for and on behalf of the Port Authority, to enter into an agreement of lease with United Parcel Service Co. (UPS) covering approximately 28 acres of land at Newark International Airport, all in accordance with the terms set forth above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board hereby authorizes the Executive Director, for and on behalf of the Port Authority, to enter into an agreement of lease with United Parcel Service Co. (UPS) covering approximately 28 acres of land at Newark International Airport on which United Parcel Service Co. would construct and operate a parcel distribution air facility on the terms set forth above; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 7/10/86)

Newark International Airport - Butler Aviation-Newark, Inc. - Aircraft Service Center - Surrender of Lease AN-998 - New Lease ANA-273 for Hangar 12

It was reported that the Board, at its meeting on December 9, 1982, authorized the Executive Director to enter into an agreement of lease with Butler Aviation-Newark, Inc., (hereinafter called "Butler") covering the letting of a site of approximately 37 acres of land at Newark International Airport on which Butler would design, construct and operate a major Aircraft Service Center (ASC), and under which the Port Authority would make payments of up to \$40 million for Butler's and approved subcontractor's construction, with revisions authorized by the Board, at its meeting of February 14, 1985.

Butler Aviation-Newark, Inc., a wholly-owned subsidiary of Butler Aviation International, Inc., is a fixed-base operator at Newark International Airport and provides full maintenance and repair of general aviation aircraft and aircraft parking and storage at Hangar 12 at the airport under Lease AN-267 now held on a month-to-month basis. The ASC was predicated on the economic environment at Newark International Airport as envisioned in 1981 when negotiations initially commenced, which included the established general aviation customer base at the Hangar 12 premises as well as reasonably expected future growth for corporate aviation at the airport.

Since the execution of Lease AN-998 in November 1983, Newark International Airport has experienced a spectacular growth of airline traffic. The heightened pace of activity has worsened flight delays at Newark International Airport. The Operations Committee, at its meeting on December 13, 1984, authorized the institution of a peak period flight fee surcharge effective February 1, 1985. The latest Port Authority ten-year projection of general aviation activity predicts a flat 35 thousand movements annually, which would represent a containment of general aviation at its 1982 levels. Butler feels the ASC project is no longer economically viable and tentative agreement has been reached for a surrender of Lease AN-998, and staff has agreed to accept said surrender.

Under terms of the proposed surrender agreement, Butler will not be reimbursed by the Port Authority for any costs associated with the design of the ASC, and it will lease the site preparation work in place. In addition, Butler has advised that its executed sublease agreement with Exxon Corporation will be surrendered by agreement between Butler and Exxon. The surrender would be effective as of January 1, 1986 and Butler would be relieved of its rental obligations under the lease retroactive to September 1, 1985. The annual ground rental consisted of a fixed amount of \$166,452 based on \$4,500 per acre (the constant factor) and a variable amount of \$849,351 (based on the final 1984 Airport Services factor).

Negotiations have been substantially completed with Butler for the surrender of the existing Hangar 12 Lease AN-267 and for a new lease (ANA-273) for the Hangar 12 site comprising approximately 11.413 acres of land at Newark International Airport commencing January 1, 1986 and expiring August 31, 2014, subject to termination by the Port Authority after January 1, 1991. Under the new lease Butler will pay an initial annual ground rental of \$324,266 consisting of a constant factor based on \$5,000 per acre and a variable amount which is subject to annual adjustment based on the Airport Services formula under the Airline Master Leases at the airport. The constant factor of the annual rental will be increased effective January 1, 1996 to \$7,000 per acre and increased again effective January 1, 2006 to \$8,500 per acre.

(Board - 7/10/86)

In addition to the annual ground rental, Butler will pay a percentage rental starting at 5% of specified gross receipts from its general aviation activities and escalating over the term of the lease to 15% for the last five years (2010-2014) of the lease. Butler will also pay fuel gallonage fees and aircraft lubricant fees escalated as set forth in the lease. Butler will be issued a separate privilege permit granting it permission to perform certain services for air carriers other than general aviation. The permit, which will be subject to mutual termination on 30 days' notice, will require Butler to pay a fee of 5% of gross receipts to the Port Authority.

Hangar 12 is one of the oldest structures at the airport and the new lease will provide for Butler's demolition of Hangar 12 and related facilities and construction of a new general aviation hangar on the site at an estimated construction cost of \$6.0 million. Butler will occupy Hangar 12 and provide fixed based operator services at that facility until the new hangar is constructed. It is contemplated that the new hangar will be a versatile structure that would meet the needs of Butler's fixed base operator activities at the airport but which could be converted by the Port Authority in the future upon termination or expiration of Butler's new lease into a commuter air terminal, cargo building, or other appropriate use. Under terms of the new lease, in the event the Port Authority exercises its right to terminate the lease after January 1, 1991, the Port Authority will reimburse Butler for the unamortized balance of the cost of the construction work up to \$6.0 million amortized on a straight line basis over the term of the lease from the earlier of completion of construction or January 1, 1989.

Pursuant to the resolution of the Board, adopted at its meeting on November 8, 1984, the lease will also contain provisions covering Affirmative Action/Equal Employment Opportunity and the use of Minority Business Enterprises and Women Owned Business Enterprises.

Butler will have sole and complete responsibility for the operation, maintenance and repair of the premises and provide property insurance.

Butler Aviation-Newark, Inc. will be required to procure and maintain throughout the term of the letting under the lease a contract of guaranty from Butler International, Inc., the company which wholly-owns Butler Aviation International, Inc., (the parent of Butler Aviation-Newark, Inc.) wherein Butler International, Inc., will guarantee the performance by the lessee of all terms and conditions of the lease. In the event there is a change in the said relationships of these three companies at any time during the term of the letting, the Port Authority may require substitution of other forms of security.

It was therefore recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into agreements with Butler Aviation-Newark, Inc., all in accordance with the foregoing.

(Board - 7/10/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director for and on behalf of the Port Authority be and he hereby is authorized to enter into a surrender of Lease AN-998 effective January 1, 1986 with Butler Aviation-Newark, Inc., which lease covers the letting of a site of approximately 37 acres of land at Newark International Airport upon which an Aircraft Service Center was to have been built, and to enter into a new Lease ANA-273 with Butler Aviation-Newark, Inc., for the Hangar 12 site comprising approximately 11,413 acres of land including Hangar 12 at Newark International Airport on which Butler will construct and operate a new general aviation hangar and to enter into a surrender agreement with Butler for the existing Hangar 12 Lease AN-267, with the terms and provisions of the foregoing to be as outlined below; the form of said agreements to be subject to the approval of General Counsel or his designated representative.

(Board - 7/10/86)

Kennedy International Airport - Pan American World Airways, Inc. - New Hangar Leases

It was reported that at its meetings on June 14 and July 12, 1984, the Board authorized the Executive Director to enter into a lease with Pan American World Airways, Inc., covering Hangars 14, 16 and 17 and related ancillary buildings and site areas at Kennedy International Airport. Said lease has not been executed although Pan American has continued in occupancy and negotiations on the specific terms and form of that lease have continued on a regular basis since then and were recently concluded. A revised agreement has been arrived at as follows.

The prior authorization was for a fixed two-year term effective July 1, 1984 with a right in Pan American to renew for two years effective July 1, 1986. This would now be a fixed four-year term from July 1, 1984 through June 30, 1988. As before, the rental is \$5.5 million per year (\$458,333 per month) with \$228,333 per month deferred during the first two years of the term to be repaid during the last two years with deferrals to accrue and be repaid at the Citibank prime interest rate in effect on July 1, 1984. As of June 1986 the deferred rentals, which have accrued interest at the annual rate of 13%, amount to \$6,247,166. These monies are to be paid monthly, effective July 1, 1986, in the amount of \$291,917, including interest at the annual rate of 13% which would become additional rental payable under Pan American's Major Maintenance Base lease at the Airport through June 30, 1988.

As with the prior authorization, Pan American will have the right during the last two years of the term to surrender designated portions of the property. They have, in fact, already advised of their intention to surrender Hangar 14 and its related site area effective July 31, 1986. This surrender, when effective, will reduce the monthly basic rental by approximately \$210,000.

The prior authorization provided that the Port Authority would do a study of the utilization of the property and determine the best future use and, if that use were for an airline purpose, Pan American would have had the right to negotiate a new lease with a minimum term of 25 years if the use were for passenger terminal purposes and ten years for hangar purposes. The Aviation Department has determined that the property will be used for hangar and cargo purposes for at least the next ten years. Pan American would have the right to negotiate a new lease or leases for all or part of the premises for its own use for hangar and cargo purposes, said lease or leases to be effective July 1, 1988 for a minimum term of ten years. In order to exercise this right, Pan American must continue in occupancy of at least one of the three hangars forming a part of the premises through June 30, 1988 instead of the two out of three hangars or major portion requirements heretofore imposed and must not be in breach of a substantial obligation of any of its major agreements (as defined in the lease), instead of any of its agreements, as formerly imposed, with the Port Authority at any of our airports. If Pan American exercised this right to negotiate, the parties agree to negotiate in good faith as to all the terms thereof and any such new lease would be subject to the approval of the Board.

The prior authorization provided that, should the parties agree to all the terms and conditions of any new lease except financial terms, Pan American would have had the right for up to five years after the close of negotiations to match the financial terms agreed to with any other airline or tenant if said financial terms yield less to the Port Authority than had been required from Pan American, which provisions would be continued.

(Board - 7/10/86).

This matching right would now extend to December 31, 1993. Any portion of the premises surrendered by Pan American during the last two years of the term of the lease now being authorized could not be leased to another tenant for a firm term extending beyond July 31, 1988 while Pan American had negotiating or matching rights. In lieu of provisions regarding control, ownership and corporate changes of Pan American previously contemplated, each party would have the right to terminate the lease or the matching right should Pan American's available passenger seats at Kennedy International, LaGuardia and Newark International Airports in any calendar year after 1986 decline to less than 50% of an agreed upon number representing an average of available seats for the three airports for certain preceding calendar years and not be rectified.

It was therefore recommended that the Executive Director be authorized for and on behalf of the Port Authority to enter into an agreement of lease with Pan American World Airways, Inc., at Kennedy International Airport, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted, Commissioner Schulman abstaining:

RESOLVED, that the Board authorize the Executive Director for and on behalf of the Port Authority to enter into a lease with Pan American World Airways, Inc., for Hangars 14, 16 and 17 and related ancillary buildings and site areas at Kennedy International Airport on the terms hereinafter set forth including the following: (1) a four-year lease term from July 1, 1984 through June 30, 1988 at an annual rental of \$5,500,000; (2) a right in Pan American to surrender designated portions of the premises during the two-year period July 1, 1986 through June 30, 1988; (3) a right in Pan American to negotiate a new longer term lease or leases effective July 1, 1988 for the use of all or part of the premises for hangar and cargo use, said lease or leases to be subject to the approval of the Board and (4) a right in Pan American through December 31, 1993, in the event agreement is reached on all of the terms and conditions of the new lease or leases except financial provisions, to match the financial terms agreed to with any other tenant, if said financial terms yield less to the Port Authority than what was required from Pan American; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 7/10/86)

Employees' Savings Plan

It was reported that on December 13, 1984, the Board adopted the New York State Deferred Compensation Plan for employees of the Port Authority and of the Port Authority Trans-Hudson Corporation and participation by employees began in October 1985. This plan was established in conformance with Section 457 of the Internal Revenue Code of 1954, as amended (the Code). Preliminary steps have also been taken to qualify the Plan in accordance with Section 401(k) and related sections of the Code. On February 14, 1986, an application was filed with the Internal Revenue Service (the IRS) for a determination of the initial qualification of the Plan. The Plan's content is based on similar governmental plans that have been approved by the IRS and on discussions with several of these governmental agencies (such as the New York State Power Authority and the City of New York).

Under either a Section 457 plan or a Section 401(k) plan, compensation deferred and all earnings thereon are not subject to Federal income tax, enabling employees to reduce taxable income during peak earning years and to set aside these monies in a savings plan. However, under current law, Section 401(k) plans have several distinct advantages over Section 457 plans which make them a more suitable vehicle for deferral of compensation. These currently include more favorable tax treatment of plan disbursements (withdrawals, rollover provisions and ten-year forward averaging), loan provisions, possible employer contributions and a higher maximum annual amount that may be deferred. Accordingly, a Section 401(k) plan offers employees an important benefit as an element of an employee savings plan.

The House of Representatives, in its tax reform bill known as H.R. 3838, would limit Section 401(k) plans in the public sector to those plans submitted to the IRS by November 6, 1985. The recently announced Senate Finance Committee tax reform measure would limit formation of new governmental Section 401(k) plans to those adopted before March 1, 1986. It is, of course, possible that, if these dates are not changed, the Port Authority would be precluded from offering the Plan to its employees. In addition, the Plan will not be implemented until a favorable determination of the qualification of the Plan under Section 401(k) and related sections of the Code is made by the IRS.

After adoption of the Plan by the Board, and after approval of the Plan by the IRS, any eligible employee could voluntarily choose to participate in the Plan or, thereafter, to cease participation for future compensation. All employees would be eligible to participate except those employees who are represented for purposes of collective negotiations.

The Plan provides for appointment of a Plan Committee of not less than three persons who would be responsible for general administration of the Plan and carrying out its provisions. Such members will be employees of the Port Authority. They would serve without additional compensation for such services. Members would serve two-year terms and be subject to removal for cause. In carrying out its responsibilities, the Plan Committee is to establish rules for the administration of the Plan. The Committee may retain such services as it may require to carry out the Plan and may allocate among the members or delegate to others all or a portion of its duties. Such members of the Committee and such other persons to whom such duties are delegated shall be indemnified from the funds of the Plan, to the extent they are not otherwise indemnified as employees of the Port Authority, for expenses and liabilities arising out of the Plan except due to the individual's own fraud or bad faith.

(Board - 7/10/86)

All amounts contributed in accordance with the Plan are to be transferred to the trustee to be held, managed, invested and reinvested in accordance with the provisions of a trust agreement. The trustee would be responsible for administration of the funds transferred by the Port Authority and payments of benefits under the Plan, and would provide investment options, and recordkeeping, administrative and reporting services.

A staff evaluation committee reviewed submissions from 24 firms which expressed interest in acting as trustee for the Plan. On the basis of criteria used for an initial screening, such as the size of the company, experience with Section 401(k) plans and recordkeeping, administrative and marketing services provided, the following seven companies were considered for final selection as the trustee:

The Dreyfus Trust Company, New York, New York
Fidelity Investment Institutional Services, Boston, Massachusetts
I.D.S. Trust Company, Minneapolis, Minnesota
T. Rowe Price Investment Services, Inc., Baltimore, Maryland
Putnam Financial Services, Inc., Boston, Massachusetts
Scudder Fund Distributors, Inc., Boston, Massachusetts
The Vanguard Group of Investment Companies, Valley Forge, Pennsylvania

On the basis of a review of final proposals and meetings with five of these companies, it is recommended that The Dreyfus Trust Company be appointed as the trustee. The selection of The Dreyfus Trust Company was based largely on the system capabilities provided by the Martin E. Segal Company, a firm with extensive experience in the employee benefits field that Dreyfus uses to handle the recordkeeping, administrative and reporting services for the Plan. While the fees charged are somewhat higher than the other finalists, the Port Authority believes that the capabilities afforded by the Martin E. Segal Company system, as well as the flexibility of being able to use their system with any investment vehicle or family of funds, justifies the added cost. Dreyfus also offers a suitable choice of funds, with good performance records.

The Port Authority will pay for the administrative costs of the Plan, which are initially estimated at between \$35,000 and \$45,000 annually. This is based on an estimated initial enrollment of 2,000 participating employees of the 4,500 employees who would be eligible to join the Plan.

It was therefore recommended that the Board:

1. adopt The Port Authority of New York and New Jersey Employees' Savings Plan for participation by employees of The Port Authority of New York and New Jersey and of Port Authority Trans-Hudson Corporation;
2. appoint The Dreyfus Trust Company as trustee for the Plan, with duties to include providing investment options, and recordkeeping, administrative and reporting services, with the Port Authority to pay the fees for these services, presently estimated at between \$35,000 and \$45,000 annually; and

(Board - 7/10/86)

3. authorize the Executive Director to take all action necessary and desirable on behalf of the Port Authority and PATH to implement the Plan, including appointment of a Plan Committee subject to the approval of the Chairman of the Committee on Operations; the form of any agreement related to the implementation of the Plan to be subject to the approval of General Counsel or his authorized representative.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that The Port Authority of New York and New Jersey Employees' Savings Plan be and it hereby is adopted for participation by employees of The Port Authority of New York and New Jersey and Port Authority Trans-Hudson Corporation; and it is further

RESOLVED, that The Dreyfus Trust Company be and it hereby is appointed as trustee for the Plan, with duties to include providing investment options, and recordkeeping, administrative and reporting services, with the Port Authority to pay the fees for these services presently estimated at between \$35,000 and \$45,000 annually; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to take all action necessary and desirable on behalf of the Port Authority and PATH to implement the Plan, including appointment of a Plan Committee subject to the approval of the Chairman of the Committee on Operations; the form of any agreement related to the implementation of the Plan to be subject to the approval of General Counsel or his designated representative.

Lincoln Tunnel - New York Approach - Rehabilitation of Bridges over the New York Expressway and Dyer Avenue - Contract LT-268

It was reported that this contract provides for the rehabilitation of the bridges at 34th Street, 35th Street, 37th Street and 38th Street that cross over the New York Expressway and the bridges at 37th Street, 38th Street and 39th Street that cross over Dyer Avenue. The bridges were constructed by the Port Authority as part of the work of building the New York Expressway and Dyer Avenue connections to the Lincoln Tunnel. The seven bridges to be rehabilitated serve the purpose of carrying the local city street traffic above and across the depressed New York Expressway and Dyer Avenue, Lincoln Tunnel connections. Maintenance of the structure of these bridges is the Port Authority's responsibility. The rehabilitation work includes replacement of roadway bridge slabs on both the Expressway and Dyer Avenue bridges and replacement of sidewalks, approach slabs and some piers, abutments and backwalls on the Expressway bridges.

In order to minimize interference with vehicular and pedestrian traffic on city streets as well as vehicular traffic on the New York Expressway and Dyer Avenue, the contract provides that work may be performed during nighttime hours.

The contract provides for the following items of work to be performed on a net cost basis at an amount roughly estimated at \$325,000: the removal of loose concrete in areas outside of the limits shown on the contract drawings, repairs to water lines, injection sealing of cracks in concrete, temporary support of existing utilities and provision of communication ducts.

The contract includes a provision that the contractor will meet a goal for Minority Business Enterprise participation of 5% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

Bids were solicited from contractors who, in response to a publicly advertised notice of solicitation for prequalification, submitted prequalification information and were found prequalified. The following bids were received on June 24, 1986:

	Estimated Total Amount
DeFoe Corp. Mt. Vernon, New York	\$ 8,989,615
Karl Koch Erecting Co., Inc. Carteret, New Jersey	10,158,495
Perini Corporation Hastings-on-Hudson, New York	10,256,678
Slattery Associates, Inc. Maspeth, New York	12,178,480
Petracca and Sons, Inc. Jamaica, New York	14,478,550
Bellezza Company, Inc. South Kearny, New Jersey	16,385,850
ENGINEER'S ESTIMATE	\$12,000,000

(Board - 7/10/86)

DeFoe Corp. submitted the lowest bid and was determined by the Chief Engineer to be qualified to perform the contract.

It was therefore recommended that the Board authorize:

1. a project to repair the bridges over the New York Expressway and Dyer Avenue approaches to the Lincoln Tunnel at an expenditure presently estimated at \$17.5 million, including payments to contractors, allowances for extra work and net cost work, engineering, administrative and financing expenses; and

2. the Executive Director to award Contract LT-268, Repair to Bridges over the New York Expressway and Dyer Avenue, New York Approach, Lincoln Tunnel, to DeFoe Corp., the low bidder, in the total estimated amount of \$8,989,615, to order extra work up to the amount of \$900,000, and to order net cost work.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes: (1) a project to repair the bridges over the New York Expressway and Dyer Avenue approaches to the Lincoln Tunnel at an expenditure presently estimated at \$17.5 million, including payments to contractors, allowances for extra work and net cost work, engineering, administrative and financing expenses and (2) the Executive Director to award Contract LT-268, Repair to Bridges over the New York Expressway and Dyer Avenue, New York Approach, Lincoln Tunnel, to DeFoe Corp., the low bidder, in the total estimated amount of \$8,989,615, to order extra work up to the amount of \$900,000, and to order net cost work.

(Board - 7/10/86)

The World Trade Department - The Teleport - Lease with Nomura Securities International, Inc.

It was reported that tentative agreement has been reached, subject to Board approval, with Nomura Securities International, Inc., a New York based securities broker for the leasing of approximately 22,000 rentable square feet on the second floor of the Telecenter Building for an initial ten-year term at a basic rent of \$23 per square foot for an approximate annual rent of \$505,000 during the first five years of the term and a basic rent of \$28 per square foot for an approximate annual rent of \$615,000 during the second five years of such term. Nomura will also pay a proportionate share of all increases in common Teleport operating and maintenance costs. Nomura will pay for electricity and for chilled water. The space will be used as a data processing center and for support offices.

The term of the letting of the lease may be extended for up to two successive five-year periods at the then fair market rent. The lease will grant Nomura the right to add to the leased premises a small area outside of the Telecenter Building for the installation of an auxiliary diesel generator at a fair market rental. The tenant will also have the right to lease space on the first floor of the Telecenter Building should it become available and to lease a site at The Teleport on a long-term basis for the construction of its own building should a site be available, in each case at fair market rentals.

The tenant will have a limited right to assign the lease and to sublet portions of the premises. The Port Authority will grant the tenant a rent credit equivalent to the cost of demolishing the interior of the premises to be let and, in addition, will grant the tenant a rent credit equivalent to the lesser of the cost of modifying the existing HVAC system serving the premises or the sum of \$15,000. The Port Authority will pay The Lansco Corporation a brokerage commission in connection with the transaction at current market rates.

It was therefore recommended that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into a lease agreement with Nomura Securities International, Inc., on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into a lease with Nomura Securities International, Inc., for approximately 22,000 rentable square feet of office space in the Telecenter Building at The Teleport for an initial ten-year term with options to extend such term for two successive five-year periods; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 7/10/86)

The World Trade Center - Fund for Regional Development - Lease with Lasser Marshall, Inc.

It was reported that subject to approval by the Board, staff has reached agreement with Lasser Marshall, Inc., a British-owned currency exchange broker dealing in foreign and domestic currencies, principally on behalf of American and foreign financial institutions, for the leasing of approximately 40,000 rentable square feet of office space comprising the entire 34th floor of Two World Trade Center, vacated by the State of New York.

It is anticipated that the term will commence on August 1, 1986. The rent for years one-two would be at the rate of \$28 per rentable square foot per year; for years three-five, at the rate of \$30 per rentable square foot per year; for years six-ten, at the rate of \$34 per rentable square foot per year; and for years eleven-fifteen, at the rate of \$37 per rentable square foot per year. Payment of rent would commence nine months after the commencement date. This period includes time for the tenant to reconstruct the space. Lasser Marshall would also pay additional charges for cleaning and electricity and additional rent to cover increases in operating costs and payments in-lieu-of taxes. If The World Trade Center is sold, the tenant would be protected from major initial real estate tax increases resulting from the sale.

The space would be delivered in its "as is" condition. Lasser Marshall would receive an allowance of \$22 per rentable square foot toward the cost of reconstructing the space and installing a sprinkler system. Lasser Marshall will have the right to sublease portions of the space with a 50/50 sharing with the Fund for Regional Development of any sub-rent profits resulting therefrom.

Lasser Marshall has just advised that they need up to an additional 40,000 rentable square feet of space. The precise unit of space has not yet been determined but, if included in the lease from the Fund for Regional Development, such space will be leased on the same rental terms and schedule, although the commencement date may be later than the commencement date for the 34th floor space. If the additional space turns out to be other than Fund for Regional Development space such additional space will be covered by a lease from the Port Authority on substantially the same terms and conditions as the proposed lease from the Fund for Regional Development.

There will be a real estate brokerage commission payable to Cushman & Wakefield, Inc. on this transaction in an amount not to exceed the rates approved by the Board at its meeting of August 11, 1977.

It was therefore recommended that the Board authorize the Executive Director, for and on behalf of the Fund for Regional Development, to enter into a lease with Lasser Marshall, Inc. upon the terms set forth above.

(Board - 7/10/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Fund for Regional Development, to enter into a fifteen-year lease with Lasser Marshall, Inc. for approximately 40,000 rentable square feet of office space vacated by the State of New York in Two World Trade Center and possibly for up to an additional 40,000 rentable square feet of Fund for Regional Development space, and if the aforesaid 40,000 rentable square feet of space are not part of the lease from the Fund for Regional Development, to enter into a lease on behalf of the Port Authority, upon the terms set forth above; and it is further

RESOLVED, that the form of the agreements be subject to the approval of General Counsel or his designated representative.

(Board - 7/10/86)

The World Trade Department - Authorizations with Respect to Lease with Seven World Trade Company

It was reported that the Board, at its meeting on May 8, 1980, authorized the Executive Director to negotiate and enter into a lease agreement with Silverstein Properties, Inc., for the leasing of the air rights above the Con Edison electrical sub-station (the Ground Lease). The Ground Lease provides for Seven World Trade Company, a limited partnership with Silverstein Development Corp. as a general partner, to finance, design and construct a first class office building, designated as 7 World Trade Center, of no less than one million square feet for which Seven World Trade Company was to pay the Port Authority \$150,000 upon execution of the Ground Lease, and an annual rental during the development and construction period of \$150,000. After occupancy, Seven World Trade Company's annual rental would be equal to the greater of \$150,000 or \$6.75 per occupied rentable square foot (the operating period rent). In addition, Seven World Trade Company's rental would include 40% of the net cash flow after deducting an amount equal to the operating period rent.

Subsequently, on December 10, 1981, the Board authorized, among other things, General Counsel to acquire, by condemnation, with the consent of The City of New York, fee title to and easements in certain property necessary for public use for the construction of the proposed 7 World Trade Center building and for overhead pedestrian connections to facilitate pedestrian traffic in and about The World Trade Center area, including an easement within Vesey Street to permit the construction of a bridge across Vesey Street that would connect the site of the 7 World Trade Center building to The World Trade Center, as well as an easement within Washington Street to accommodate the landing of a bridge across Barclay Street to connect the site of the Irving Trust Building to the 7 World Trade Center site.

The Board, on March 10, 1983, authorized the Executive Director to execute on behalf of the Port Authority an amendment to the Ground Lease, among other things, to provide that the Port Authority's right to terminate for failure to commence construction be postponed until July 1, 1984, that the lessee may commence construction subsequent to the Port Authority's approval of the lessee's plans and specifications which were to be submitted in stages, for paving and maintenance by the lessee of a strip of property for use as a public pedestrian easement, and to provide additional easement areas on Vesey, Washington and Barclay Streets. The resolution also directed that the Executive Director or General Counsel do all things necessary to acquire either privately, by condemnation or eminent domain, the rights to air space and an area for supporting columns for the deck within Vesey Street and air space and an easement within Washington and Barclay Streets for supporting columns for the pedestrian bridge.

Negotiations between Seven World Trade Company and Drexel Burnham Lambert Group, Inc. (DBL) have been substantially completed and they expect to enter into an agreement (the Agreement) shortly, subject to Port Authority approval, primarily for the subletting by DBL of the entire building known as 7 World Trade Center on a net basis, i.e., DBL will be responsible for the arrangement of all financing and payment of all debt service as well as the payment of all costs of operating and maintaining the building plus Ground Lease payments to the Port Authority, payments to cover increases in the payments in-lieu-of taxes, and net rental payments to Seven World Trade Company. The Agreement contemplates a sublease between Seven World Trade Company and DBL to be prepared and executed by the parties in the next several months (the Sublease). Port Authority approval of the Sublease would be in the form of a Consent to Sublease Agreement to be executed by Seven World Trade Company, DBL and the Port Authority.

As a condition of moving forward on this arrangement, Seven World Trade Company and DBL have requested the Port Authority to approve the Agreement and to agree to approve the Sublease provided that in the opinion of the Executive Director, it conforms in substance to the approved principles of the Agreement and its material terms conform to and are consistent with the Ground Lease. The Ground Lease would be amended to provide that the lessee will be permitted to secure temporary and permanent financing of the building from sources other than domestic institutional lenders with such financing limited to a gross amount of \$600 million. In addition, there may be a number of other appropriate amendments to the Ground Lease, primarily in connection with the leasehold financing.

DBL or a controlled subsidiary or affiliate has the option to purchase a major equity interest in Seven World Trade Company. The Port Authority has no objection to this arrangement and would be approving it. If the financing contemplated is securitized all prospectus, placement memoranda and other such documentation would be submitted to the Port Authority for its review to determine if the references therein to the Port Authority and the Ground Lease are accurate.

It was therefore recommended that the Board authorize the Committee on Finance to authorize the Executive Director, on behalf of the Port Authority, to enter into such agreements and consents, give the appropriate approvals and exercise the appropriate reviews, all in accordance with the foregoing.

Whereupon, the following resolution was adopted, Commissioner English voting "no":

RESOLVED, that the Board authorize the Committee on Finance to authorize the Executive Director, for and on behalf of the Port Authority to:

- (1) approve the Agreement between Seven World Trade Company and Drexel Burnham Lambert Group, Inc. which would cover some of the general principles of a formal sublease agreement (the Sublease) to be prepared and executed by the parties at a later date, under which Drexel Burnham Lambert Group, Inc. would sublease the entire building now known as 7 World Trade Center;
- (2) execute one or more appropriate amendments to the lease between the Port Authority and Seven World Trade Company (the Ground Lease) to permit the lessee to finance 7 World Trade Center through sources other than institutional lenders, both domestic and foreign, and to make other modifications in the Ground Lease so as to accommodate to the Sublease and the financing;
- (3) enter into a Consent to Sublease Agreement with Seven World Trade Company and Drexel Burnham Lambert Group, Inc. provided, in the opinion of the Executive Director, the Sublease conforms in substance with the approved principles described in the Agreement and its material terms conform to and are consistent with the Ground Lease;
- (4) approve the Option Agreement (the Option Agreement) between Seven World Trade Company and Drexel Burnham Lambert Group, Inc. for the acquisition of a major equity interest in Seven World Trade Company and
- (5) review the final offering documents submitted in connection with any syndication or securitization involving the financing of 7 World Trade Center to determine if the references therein to the Port Authority and the Ground Lease are accurate; and it is further

RESOLVED, that the form of all agreements entered into by the Executive Director and approvals granted by the Executive Director be subject to the approval of General Counsel or his designated representative.

(Board - 7/10/86)

Enlarge Foreign-Trade Zone No. 49 by Expansion or the Establishment of a Subzone to Include the Northville Industries Corporation Facility in Linden, New Jersey

It was reported that Northville Industries is involved in the transport, storage, blending and sale of refined liquid petroleum products and crude oil. It has one facility in Linden, New Jersey; five facilities in Long Island, New York and is a shareholder in oil terminals on the Caribbean island of Bonaire and in Panama. The total capacity of its domestic and international facilities is over 23.6 million barrels.

The Northville Linden, New Jersey facility with a current capacity of 1.8 million barrels handles home heating oil, residual fuel oil, motor gasoline, kerosene, diesel fuel and jet fuel. It serves markets which include commercial airline companies, public utilities, major trading companies, wholesalers, gasoline distributors and home heating oil dealers.

One of the current activities at Linden involves gasoline blending which would be greatly expanded under zone status. Gasoline blending involves the mixing of imported and domestic components to produce finished gasoline which then is marketed in the New York/New Jersey metropolitan region and New England under various independent brands. Under Foreign-Trade Zone status, duty payments on the foreign components could be paid at the lower duty rate available to importers of finished gasoline. This would lower duty payments and promote higher utilization of domestic components through the substitution of blended gasoline for imported finished gasoline. Without zone status, the incentive for gasoline blending at Linden would be diminished and much of this activity would likely be handled at off-shore facilities, thereby jeopardizing existing jobs.

In addition, Foreign-Trade Zone status would enable Northville and its customers to defer duty on imported petroleum products and eliminate duty on re-exported products which would create a totally new export market. Potential export destinations may include Canada, Panama, South America and Europe.

Potential regional benefits of zone status include: increased tonnage to the Port due to the potential construction of a new, privately financed \$8.5 million facility with a 700,000 barrel capacity; increased use of domestic gasoline components; creation of a minimum of four permanent jobs and 85 temporary construction jobs; retention of 20 existing jobs; less costly blended jet fuel piped directly from the Linden facility to regional airports and provision of a more competitive source of fuel.

Under Foreign-Trade Zones Board regulations, the Port Authority, as grantee of Foreign-Trade Zone No. 49, is the only party authorized to apply for expansion of the Zone. Therefore, Northville has requested that the Port Authority submit an application for zone expansion or subzone establishment on its behalf. Applicable regulations permit the enlargement of the existing zone either by expansion or the establishment of a subzone. Presently the interpretation of the regulations leaves unclear which alternative is appropriate, hence authority is being requested for either. As grantee, the Port Authority does have ultimate responsibility to U.S. Customs for all zone facilities.

Northville has agreed to enter into an appropriate agreement with the Port Authority which will insure that the site will be operated by it without cost, expense, or risk of loss to the Port Authority.

(Board - 7/10/86)

The Board approved a similar recommendation for the Carteret, New Jersey, facility owned by GATX Terminals Corporation at its May 9, 1985 meeting.

It was therefore recommended that the Board authorize the Executive Director to file an application with the Foreign-Trade Zones Board of the United States Department of Commerce for the expansion of Foreign-Trade Zone No. 49, which consists of 2,100 acres at the Port Newark/Elizabeth-Port Authority Marine Terminal, to include the Northville Industries facility in Linden, New Jersey or in the alternative to establish that facility as a subzone.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized to file an application with the Foreign-Trade Zones Board of the United States Department of Commerce for the expansion of Foreign-Trade Zone No. 49, which consists of 2,100 acres at the Port Newark/Elizabeth-Port Authority Marine Terminal, to include the Northville Industries facility in Linden, New Jersey or in the alternative to establish that facility as a subzone.

Whereupon, the meeting was adjourned.

 Charles L. Hirsch, Executive Assistant to the Executive Director
 Lillian C. Liburdi, Director of Management and Budget
 Katharine B. MacKay, Assistant Executive Director/Administration
 Mark Marchese, Assistant Director, Information Services, Public Affairs
 James H. Mullen, Administrative Assistant
 James J. O'Malley, Director of Management Information Services
 Hugh O'Neill, Assistant Executive Director/Policy Planning and Business Development
 Martin E. Robins, Director of Planning and Development
 Joseph L. Vanacore, Assistant Executive Director/Capital Programs
 Barry Weintrob, Chief Financial Officer and Director, Finance Department
 Kristina Weisenstein, Administrative Assistant
 George Giardelli, Project Manager, Walsh, Lowe and Associates, Inc.

The meeting was called to order by the Chairman.

The Secretary reported that the meeting was duly called in accordance with the By-Laws.

(Board - 7/30/86)

Digital Microwave Network among Kennedy International, Newark International and LaGuardia Airports and The World Trade Center

It was reported that the Port Authority, as previously reported to the Committee on Operations, at its meeting on January 9, 1986, is operating with outdated and inefficient technology and limited capacity with its existing telecommunications equipment and transmission systems especially at the Port Authority's three airports. The existing airport telecommunications system limits the Port Authority's ability to satisfy the current voice and data communications needs of Port Authority facilities. The Port Authority now holds licenses from the Federal Communications Commission (FCC) to operate microwave radio stations (the "Network") at each of the three airports and The World Trade Center in a hub configuration. Walsh, Lowe and Associates, Inc., the telecommunications professional services firm retained by the Port Authority to perform an assessment of the Port Authority's overall telecommunications needs, is of the opinion that the proposed Network would provide early benefits and enhancements to the Port Authority's telecommunications network. Further, the Network can be rapidly implemented and can operate independently, but would become an integral part of the new Port Authority network to be recommended by the consultant. In addition, the Air Cargo Fast Flow ("ACFF") system approved by the Board, at its meeting on February 13, 1986, would utilize the Network to provide primary ACFF transmission services for data communications. This service would enhance the marketability of the ACFF system to potential users. It would also provide a level of security and redundancy in case of the failure of the telephone landlines serving one of the Port Authority's airports.

FCC regulations permit the Port Authority to offer capacity on the Network to other eligible users, which include most airport tenants, on a "for profit" basis, in addition to using the Network for the communications needs of the Port Authority. The FCC requires the Network to be in operation by March 30, 1987, or the licenses will be automatically cancelled by the FCC.

In November 1985, a Request for Proposal (RFP), to engineer, furnish, install, test, operate, maintain and market the Network was sent to seventeen firms, six of whom responded. A multi-department evaluation committee reviewed the proposals and interviewed three of the six companies. The evaluation committee determined at the conclusion of this process that none of the proposals were sufficiently responsive to the RFP.

Subsequently, Aeronautical Radio, Inc. ("ARINC") and TDX Systems, Inc. were contacted to determine if each would be interested in submitting a proposal. ARINC was the only firm that responded. ARINC is the only firm that is willing to perform all the technical and marketing services sought under the RFP.

Staff has negotiated an arrangement with ARINC, headquartered in Maryland, under which ARINC would engineer, furnish, install and test the Network at a cost not to exceed \$2.1 million plus an additional annual cost for ARINC's operation, maintenance and marketing of the Network. Such costs with respect to the first year of the term are now estimated to be \$380,000 and could range up to \$500,000 annually. The agreement would have a term of five years.

(Board - 7/30/86)

It was therefore recommended that the Board adopt the following resolution.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize a project providing microwave service among Kennedy International, Newark International and LaGuardia Airports and The World Trade Center using a microwave network system under authorized Federal Communications Commission (FCC) licenses and authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement with Aeronautical Radio, Inc. for a five-year period, for among other things, the engineering, furnishing, installation, testing, operation, maintenance and marketing of such microwave network on the terms generally set forth above, at an initial expenditure not to exceed \$2.1 million plus yearly recurrent expenditures for operation, maintenance and marketing now estimated to range from \$380,000 to \$500,000 annually over the period, a portion of which expenditures would be offset by reductions in current and future Port Authority expenditures as well as sums that may be received from charges for the use of excess network capacity by others; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

Whereupon, the meeting was adjourned.

MINUTES of meeting of The Port Authority of New York and New Jersey held Thursday, August 14, 1986, at the Port Authority offices, One World Trade Center, City, County and State of New York.

PRESENT:

NEW JERSEY

Philip D. Kaltenbacher, Chairman
 Jerry Fitzgerald English
 William K. Hutchison
 Henry F. Henderson, Jr.
 Robert Van Buren

NEW YORK

William J. Ronan
 James G. Hellmuth
 John G. McGoldrick

Stephen Berger, Executive Director
 Patrick J. Falvey, General Counsel/Assistant Executive Director
 Doris E. Landre, Secretary
 Robert J. Aaronson, Director of Aviation
 Anthony J. Barber, Director of Tunnels, Bridges and Terminals
 Henry DeGeneste, Superintendent of Police, Public Safety
 Gene Gill, Director of General Services
 Francis A. Gorman, Comptroller
 John Hauptert, Acting Treasurer
 Charles L. Hirsch, Executive Assistant to the Executive Director
 Richard R. Kelly, Director of Rail Transportation
 James J. Kirk, Port Director
 Phillip LaRocco, Director, Economic Development
 Lillian C. Liburdi, Director of Management and Budget
 Cornelius J. Lynch, Deputy Director of World Trade
 Mark Marchese, Assistant Director, Information Services, Public Affairs
 Rino M. Monti, Director of Engineering/Chief Engineer
 John R. Moran, Assistant Director of Audit
 Edward J. O'Malley, Director of Personnel
 James J. O'Malley, Director of Management Information Services
 Hugh O'Neill, Assistant Executive Director/Policy Planning and Business Development
 Theresa A. Potente, Assistant Secretary
 Lloyd D. Schwalb, Principal Information Officer, Public Affairs
 Victor T. Strom, Director of Public Safety
 Joseph L. Vanacore, Assistant Executive Director/Capital Programs
 Barry Weintrob, Chief Financial Officer and Director, Finance Department
 Kristina E. Weisenstein, Administrative Assistant
 Marvin Weiss, Director, Office of Minority Business Development
 Marshal L. Wilcox, Jr., Assistant Chief Financial Officer

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of July 10, 1986. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on August 14, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meetings on July 18, 1986 and August 14, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on August 14, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on August 14, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 8/14/86)

Port Jersey Properties - Payment In-Lieu-Of Taxes - Cities of Bayonne and Jersey City

It was reported that the Board, at its meetings on February 11, 1982, November 10, 1982, April 14, 1983, May 10, 1984 and July 11, 1985, authorized the payment, for each of the years 1982-1985, to the Cities of Bayonne and Jersey City, New Jersey, of the amounts representing the real estate taxes assessed on the Greenville and Port Jersey properties. The development of these properties is being pursued and an in-lieu-of tax agreement has been deferred. In the interim, it is recommended that payment be made to the Cities of Bayonne and Jersey City of an amount equal to the assessed real estate taxes against the Port Jersey properties for the year 1982, the year of purchase of these properties, in the approximate amount of \$104,000 and \$406,000, respectively.

It was therefore recommended that the Board authorize payment for the year 1986 to the Cities of Bayonne and Jersey City, New Jersey, in connection with the Port Jersey properties purchased from Harborland Corporation and Teachers Insurance and Annuity Association of America, in the approximate amounts of \$104,000 and \$406,000, respectively, which are equal to the real estate taxes assessed on the properties for the year 1982.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to make payment for the year 1986 to the Cities of Jersey City and Bayonne in connection with Port Jersey properties purchased from Harborland Corporation and Teachers Insurance and Annuity Association of America of an amount representing the real estate taxes due for the year 1982.

(Board - 8/14/86)

Greenville Property - Payment In-Lieu-Of Taxes - City of Jersey City

It was reported that the Board, at its meetings on January 14, 1982, November 10, 1982, April 14, 1983, May 10, 1984 and July 11, 1985, authorized the payment, for each of the years 1981-1985, to the Cities of Jersey City and Bayonne, New Jersey, of the amounts representing the real estate taxes assessed on the Greenville and Port Jersey properties, respectively. Pending the ultimate disposition of the Greenville property, an in-lieu-of tax agreement has been deferred. In the interim, it is recommended that payment be made to the City of Jersey City for the year 1986 of an amount equal to the real estate taxes assessed against the Greenville property for the year 1981, the year of purchase of this property, in the approximate amount of \$489,000.

It was therefore recommended that the Board authorize the payment for the year 1986 to the City of Jersey City, New Jersey, in connection with the Greenville property acquired from the Penn Central Corporation in the approximate amount of \$489,000, which is equal to the real estate taxes assessed on the properties for the year 1981.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to make payment for the year 1986 to the City of Jersey City in connection with the Greenville properties acquired from the Penn Central Corporation of an amount representing the real estate taxes due for the year 1981.

(Board - 8/14/86)

New Jersey ConRail Relocation Project - Northern Branch Improvements-Port Authority Participation

It was reported that with the creation of the Hudson River Waterfront Development Committee in 1983, Governor Kean directed the New Jersey Department of Transportation (NJDOT) to undertake a transportation study of the waterfront under the overall direction of this Committee. In November 1985, NJDOT completed a Draft Transportation Plan that addresses many of the waterfront's transportation problems, including congestion on the trans-Hudson facilities. Specifically, the plan called for the development of a bus and light-rail transitway and a land service road in a general north-south direction along the waterfront, using in part the right-of-way of the ConRail River Route and the Weehawken Tunnel.

To implement this plan the State must acquire the ConRail River Route and the Weehawken Tunnel now used by ConRail in its freight operations. Further, to relocate ConRail's freight operations from the waterfront to west of the Palisades, the state must upgrade the Northern Branch, which will require the acquisition of certain properties to provide for the relocation. Improvements to the Branch are required to accommodate the added freight train traffic resulting from the relocation (from four to ten daily, two-way trains) and to connect the line to the complex ConRail yards it will serve (Croxtan, North Bergen, Oak Island, Portside and South Kearny). NJDOT estimates that the relocation and related projects will cost approximately \$70 million. To finance part of this cost, New Jersey Transit submitted a grant application for \$20 million in Section 3 discretionary funds to the Federal Urban Mass Transportation Administration on May 30, 1986. The expected \$20 million grant will be used to acquire the River Route and Weehawken Tunnel rights-of-way.

To fund the remainder of the project's costs, the New Jersey Governor's Office has requested that the Port Authority provide up to \$50 million in connection with the relocation for improvements to be made to ConRail's Northern Branch rail freight line between North Bergen Yard and Marion Junction. Major elements of the Branch improvement project consist of: new connections to North Bergen Yard; the elimination of two, or possibly three grade crossings; improved connections to Croxtan Yard and a new westbound connection to ConRail's Passaic and Harsimus Branch at Marion Junction which will provide improved access to ConRail's South Kearny Yard.

The Northern Branch project will provide benefits to this port with more direct routing to Croxtan and South Kearny Yards and the provision of a second high clearance route to Buffalo and the Midwest for "double-stack" container rail cars and auto-rack cars. Marine carriers have established major double-stack terminals at Croxtan and South Kearny yards, both of which will be served by the improved Northern Branch. The new efficient double-stack technology is important to maintain this port's competitive position as a "load center" for large container movements. In addition, the grade crossing eliminations north of Croxtan Yard, as a part of the project, will assure safer, uninterrupted operations for all train movements to that yard, South Kearny, and the Oak Island and Portside yards near the seaports in Newark and Elizabeth.

(Board - 8/14/86)

The project also has the potential for improving regional passenger transportation. The implementation of the waterfront transitway plan by NJDOT will provide improved public transit access to the major waterfront development sites along the Hudson. In addition, the movement of trans-Hudson commuters may potentially be improved by routing commuter buses onto the transitway from the north through the Weehawken Tunnel to the Lincoln Tunnel and to Hoboken Terminal. These bus operations would improve trans-Hudson bus service for certain markets in eastern Bergen and northern Hudson counties.

NJDOT, in consultation with ConRail engineers and retained professionals, estimates the total cost of the project will be \$70 million. Estimates for various elements of the project are not complete since final designs are still being developed. Under the proposed agreement, the Port Authority, subject to any necessary certifications, would provide funds made available for New Jersey projects by the 1984 tolls increase, an amount not to exceed \$50 million for design, engineering, environmental analysis, construction contract and engineering costs. NJDOT will be responsible for the design and execution of the improvements, as well as for obtaining any additional funds required to complete the project including funds for real estate acquisition. The agreement would also provide that the Port Authority not have responsibility for the maintenance or operation of the project.

New Jersey's share of funds made available by the 1984 tolls increase is \$137.5 million. Of this, the Board authorized \$27 million in September 1985 for the Route 169-Bayonne Bridge Connection, \$1.9 million for the New Jersey Transit Park-Ride Lots in January 1986, \$2.5 million for the rehabilitation of the Doremus Avenue Bridge in February 1986 and \$2 million for the Route 495 Resurfacing and Safety Improvements in March 1986. With up to \$50 million authorized for Northern Branch improvements, \$54.1 million remains available for other New Jersey projects.

It was therefore recommended that the Board authorize the following, subject to the ability of the Port Authority to make necessary certifications including those necessary prior to the issuance of Port Authority Consolidated Bonds:

1. a project for the design, engineering, environmental analysis and construction phases to improve the Northern Branch line from North Bergen Yard to Marion Junction for ConRail freight operations at a total cost to the Port Authority not to exceed \$50 million; and
2. the Executive Director to enter into an agreement with the New Jersey Department of Transportation (NJDOT) to undertake the project at a total cost to the Port Authority not to exceed \$50 million from the funds made available for New Jersey projects by the 1984 tolls increase.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that, subject to the ability of the Port Authority to make necessary certifications including those necessary prior to the issuance of Port Authority Consolidated Bonds, a project for the design, engineering, environmental analysis and construction phases to improve the Northern Branch line from North Bergen Yard to Marion Junction for ConRail freight operations at a total cost to the Port Authority not to exceed \$50 million is authorized; and it is further

(Board - 8/14/86)

RESOLVED, that, subject to the ability of the Port Authority to make necessary certifications including those necessary prior to the issuance of Port Authority Consolidated Bonds, the Executive Director is authorized to enter into an agreement with the New Jersey Department of Transportation (NJDOT) to undertake said project at a total cost to the Port Authority not to exceed \$50 million from the funds made available for New Jersey projects by the 1984 tolls increase; and it is further

RESOLVED, that the form of the foregoing agreement with NJDOT be subject to the approval of General Counsel or his designated representative.

(Board - 8/14/86)

LaGuardia, Kennedy International and Newark International Airports - Agreement with Aviation Development Council - Funding for New York and New Jersey Air Services Programs

It was reported that funding for a pilot project aimed at stimulating local purchasing and associated job development by the aviation industry at LaGuardia and Kennedy International Airports was first approved by the Executive Director in November 1983 and renewed in September 1985. The Port Authority contracted with the Queens County Overall Economic Development Corporation (QCOEDC) to establish the Air Services Development Office. Two agreements to fund the Office were made covering the periods from May 1984 through April 1985 and May 1985 through June 1986 for \$187,212 and \$146,798, respectively. The current contract expired on July 1, 1986.

The idea for an office dedicated to this purpose grew out of the experience of Port Authority staff during the construction of the Delta terminal at LaGuardia Airport, when full-time staff was assigned to assure that purchases and hiring related to the project took place in Queens to the maximum extent possible.

The mandate of the Air Services Development Office was to make the aviation industry more aware of the broad range of goods and services of interest to them available in Queens and to familiarize Queens business people with the opportunities and methods for selling their products to the aviation industry. The work of the Air Services Development Office is guided by an advisory committee made up of representatives of the aviation industry, the Port Authority and the Queens business and civic communities. The particular focus was the small business person with much to offer, but without the resources to pursue what might appear to be "long shot" opportunities. By working with the airlines and local business people, staff hoped to expand the number of people who had a real chance to benefit from the economic activity at the airports, and thus develop a real stake in the continued economic vitality of the airports.

The program has had significant achievements. In June 1985 the Office published the **Passport to Productivity and Profitability** which listed over 1,100 Queens businesses indexed by the type of product they sell. Last month an expanded **Passport** directory was published with over 1,700 Queens businesses listed. Meetings and seminars have received strong support from the airlines and have attracted hundreds of Queens business people. Over the past year the Air Services Development Office has been involved in more than 30 contracts awarded to Queens companies totalling over \$3 million, many of them small contracts to first-time bidders. In addition, the process has stimulated a greatly increased participation by Queens businesses in the Port Authority bidding procedures; Port Authority contracts awarded to Queens businesses in 1985 rose from \$2.8 million in 1984 to \$5.8 million in 1985.

Based on the accomplishment of the pilot project in Queens, staff recommends that the Queens project be extended for three years as a major focus of the Port Authority's efforts to expand economic ties between airport and community. In addition, staff is recommending that a similar program be established for communities around Newark International Airport, using the Queens project as a model. With plans to undertake major capital improvements at all three airports over the next few years, staff feels that these programs will broaden the base of community support for necessary improvements. The cost of the program will not exceed \$250,000 per year.

(Board - 8/14/86)

Staff is proposing that the program be administered through the Aviation Development Council. Over the years, the Aviation Development Council has been an active partner with the Port Authority in building constructive relationships between the airports, their airline tenants and the surrounding communities. A direct link with the Aviation Development Council would serve to enhance the Air Services Development Office's relationship with the New York aviation community and provide an excellent resource toward the implementation of a similar program in New Jersey. QCOEDC will continue to provide the service for LaGuardia and Kennedy International Airports. A suitable New Jersey-based group will be designated to serve Newark International Airport.

It was therefore recommended that the Board authorize:

1. the continuation of a program in New York and the development of a program in New Jersey to expand access to economic opportunities among Kennedy International, Newark International and LaGuardia Airports, the aviation industry and businesses located in the communities in the vicinity of the airports, at a cost not to exceed \$250,000 per year; and
2. the Executive Director to enter into an agreement with the Aviation Development Council to oversee and administer these programs over this three-year period.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes: (1) the continuation of a program in New York and the development of a program in New Jersey to expand access to economic opportunities among Kennedy International, Newark International and LaGuardia Airports, the aviation industry and businesses located in the communities in the vicinity of the airports, at a cost not to exceed \$250,000 per year and (2) the Executive Director to enter into an agreement with the Aviation Development Council to oversee and administer these programs over this three-year period; the form of the agreement to be subject to the approval of General Counsel or his authorized representative.

LaGuardia Airport - Pan American World Airways, Inc. - Lease Covering Premises in the Marine Air Terminal and Construction of Extension Thereto

It was reported that Pan American World Airways, Inc. recently agreed to acquire, pending approval by the Federal government, certain slots and other rights of New York Airlines, Inc. at LaGuardia Airport and desires to operate a shuttle service to and from the airport. In discussions with Pan American, Aviation staff originally suggested that the Port Authority would accept a surrender from New York Airlines of two of its four gate positions at Finger No. 2 and related facilities and then lease the same to Pan American under a month-to-month Airport Lease substantially similar to the nine such leases in effect with the Basic Lessee Airlines at LaGuardia Airport.

Pan American has now advised, however, that since the two gate positions at Finger No. 2 it proposed to lease can only accommodate narrow-bodied jet aircraft, the said gate positions cannot be used by Pan American for the shuttle service. Pan American desires instead to locate its entire shuttle service at the Marine Air Terminal, while maintaining its four non-shuttle daily flights from Port Authority gate positions at Finger No. 3 pursuant to its Use Agreement. Therefore, Aviation staff now recommends that the Port Authority enter into a month-to-month Airport Lease with Pan American whereby Pan American would lease a minimum of approximately 4,000 square feet of available passenger handling facilities and office space in the Marine Air Terminal, a multi-occupancy building, at an annual rental of approximately \$72,000, which facilities and space Pan American, at its own expense, would renovate. The said annual rental for premises in the Marine Air Terminal would be subject to adjustment from time to time in relation to Port Authority costs for such expenses as janitorial services, maintenance and utilities related to the common areas in the Marine Air Terminal.

The lease would also cover the letting of approximately 7½ acres of existing paved area adjacent to the Marine Air Terminal upon which Pan American, at its own expense, would construct two wide-body and two narrow-body gate positions, a taxiway, a blast fence and a passenger terminal extension to the Marine Air Terminal for its exclusive occupancy consisting of related hold rooms, passenger loading and baggage handling facilities. Pan American would pay an initial rent for the four gate positions of approximately \$330,000 per year at the Airport Lease rate of \$2 per square foot per year which rate would escalate on August 1, 1988 to \$2.20. In the event the aforesaid taxiway of approximately 118,000 square feet is leased to Pan American for its exclusive use, Pan American would pay rent therefor of approximately \$59,000 per year at the Airport Lease rate of \$0.50 per square foot per year which rate would escalate on August 1, 1988 to \$0.75. In the event the said taxiway is not leased to Pan American for its exclusive use and the Port Authority designates said taxiway as part of the public aircraft facilities, the Port Authority would reimburse Pan American for the construction thereof in an amount not to exceed \$1.2 million. The passenger terminal extension would be built on approximately 44,000 square feet of existing paved area and Pan American would pay rental therefor of approximately \$22,000 at the Airport Lease rate of \$0.50 per square foot per year. Pan American would, therefore, pay a total rental of approximately \$483,000 per year subject to finalization based upon actual measurement of the premises and a determination to lease said taxiway for Pan American's exclusive use. Pan American would have an initial rent-free period of up to 75 days but not to extend beyond November 15, 1986 for construction purposes.

In recognition of Pan American's substantial investment in an area of the airport that the Port Authority is anxious to develop, as well as the risk to Pan American associated with the start up of service at this location, the Port Authority will give Pan American an incentive rental

credit for a period of up to three years. The annual rental credit would be \$200,000 subject to a downward adjustment in the second and third rental years of \$50,000 per year for every 250,000 passengers carried by Pan American from this location, in the respective years, in excess of 1.5 million. After three years Pan American would pay the full rentals in effect at that time.

Pan American would also perform certain frontage roadway and parking lot realignment work, as defined, in connection therewith for which the Port Authority would reimburse Pan American in an amount of approximately \$1 million. In addition, the Port Authority would expend approximately \$1 million on certain roadway and parking lot modifications to accommodate such operations at the Marine Air Terminal and the extension thereto, as well as to provide alternate access to the employee parking lot, fuel storage facility and consolidated cargo facility. Authorization for said Port Authority work would be sought as appropriate. Approximately 75% of such roadway work would be recoverable through the flight fee formula.

Pan American would have complete responsibility for the operation, maintenance and repair of the extension, gate positions, ramp, taxiway (if leased exclusively) and blast fence, as well as its exclusive areas in the Marine Air Terminal, excepting the maintenance of the supporting structural frame, roof and exterior of the exterior walls in said Terminal, which the Port Authority would maintain along with the common areas in the Marine Air Terminal. Pan American, at its sole cost, would furnish and install all needed equipment to bring utilities to and for use in the extension and pay for metered usage both in the extension and the Marine Air Terminal. If Pan American uses hot water from the boiler servicing Hangar No. 7 to heat the extension, Pan American would pay a separate charge for such use based on consumption and the Port Authority's cost of furnishing hot water. Alternatively, Pan American would heat the extension by electricity and pay the metered charges therefor.

The capital construction work to be performed by Pan American would require an estimated investment of approximately \$9 million. In certain events, including the Port Authority terminating the lease or not offering to extend the term of the lease other than for cause, the Port Authority would pay Pan American for its then unamortized capital investment (not including any personal property of Pan American), as said investment is defined in the lease, which in no event would exceed \$9 million or \$7.8 million if the Port Authority reimburses Pan American for the taxiway as aforesaid, on a straight-line basis without interest based on amortization periods commencing upon the completion date, as defined, of the aforesaid Pan American construction work as follows: (i) with respect to the extension, an amortization period of 20 years and (ii) with respect to the gate positions, ramp, taxiway (if leased exclusively) and blast fence, an amortization period of fifteen years. There would be no such obligation in the event Pan American terminates the lease or does not agree to extend the term of the letting under the lease. The Port Authority would be responsible for property insurance on the multi-occupancy Marine Air Terminal while Pan American would be responsible for property insurance on its exclusive premises in the extension.

In connection with the proposed lease with Pan American, it is anticipated that for operation convenience Butler Aviation-LaGuardia, Inc., the fixed-base operator, would relocate from a significant portion of the Marine Air Terminal ramp and the aircraft parking and storage areas to ramp area south of Pan American's proposed premises for Butler's scheduled commuter operations and to remote paved area for its general aviation corporate operations and its parking and storage of aircraft. Authorization, if required, would be sought from the Board for any revisions to Butler's lease necessitated by the foregoing. It is now anticipated that any loss of revenue to the Port Authority under this Butler agreement would be offset in part by an increase in revenue due to locating Pan American in the Marine Air Terminal.

(Board - 8/14/86)

It was therefore recommended that the Executive Director be authorized, for and on behalf of the Port Authority, to enter into an agreement of lease with Pan American World Airways, Inc. covering certain premises in the Marine Air Terminal and adjacent paved land at LaGuardia Airport, all in accordance with the terms set forth above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board hereby authorizes the Executive Director, for and on behalf of the Port Authority, to enter into a month-to-month airport lease with Pan American World Airways, Inc. covering certain premises in the Marine Air Terminal at LaGuardia Airport and adjacent paved land upon which Pan American will construct a passenger terminal extension and related facilities, the lease to provide for buying out Pan American's unamortized capital investment, as defined, in certain circumstances; all of the foregoing on the terms set forth above; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 8/14/86)

Kennedy International Airport - Building No. 88 - Central Examination Facility for Bonded Container Shipments - Lease with Hudson General Corporation

It was reported that pursuant to Board authorization in October 1961, Emery Air Freight Corporation constructed Air Cargo Service Building No. 88 and related facilities on a site of approximately 2.075 acres at Kennedy International Airport and their lease has expired. With the designation of Kennedy International Airport as a Foreign Trade Zone, Building No. 88 had been set aside for possible use by a Foreign Trade Zone operator. It has been used on occasion for storage of Port Authority property and was rented temporarily in 1985 to an in-flight caterer of in-bond liquor supplies.

The continued increase in volume experienced by bonded container station operators and the number of such operators located off-airport has resulted in inefficient assignment of personnel and increased cost for U.S. Customs in providing inspectors at these off-airport facilities. As part of a national policy of centralizing examination facilities for bonded container shipments, Customs has requested that the Port Authority lease an on-airport facility (Building No. 88) to an operator who would handle these shipments for Customs' examination. The off-airport bonded container companies would be able to truck cargo to Building No. 88 for inspection by Customs thereby substantially reducing the need for off-airport Customs' inspections.

Letters were sent in April to the Port Authority's six cargo handling permittees: Allied, American World Aviation, AMR Services, Hudson General, Servair and Triangle Aviation soliciting those interested to submit certain information including proposed staffing, company qualifications, method of imposing user charges and the amount of such charges, and an estimate of required capital investment, which would be evaluated by Port Authority staff to select a prospective lessee for the Building No. 88 facility. Responses were received from all but American World Aviation. A committee consisting of Port Authority staff members with input from U.S. Customs evaluated the material submitted and selected Hudson General. Negotiations have been substantially completed with Hudson General Corporation for an eighteen month lease for Building No. 88 effective on or about September 15, 1986 at the following rentals:

Approximate Annual Rentals

	Ground Rental (Approximately 2.075 acres)	Building Rental (Approximately 25,919 sq. ft.)	Total Approximate Annual Rental
Months 1 - 3*	\$22,825 (\$11,000 per acre)	\$97,196 (\$3.75 per sq. ft.)	\$120,021
Months 4 - 18	\$45,650 (\$22,000 per acre)	\$194,393 (\$7.50 per sq. ft.)	\$240,043

*Rentals reduced to reflect three-month start-up period.

(Board - 8/14/86)

In addition to the above, Hudson General will pay a fee of 5% of gross receipts arising after January 1, 1987.

Hudson General Corporation may be required to make certain modifications to the premises to prepare it for its intended use at an estimated investment of no more than \$350,000. In such event, the Port Authority would be obligated to pay to Hudson General its unamortized actual cost of construction written off over a seven year period upon expiration or earlier termination of the lease without cause. Any such payment will be recouped from successor tenants of the Building No. 88 facility.

Hudson General Corporation will have complete responsibility for the operation and maintenance of the building, including utilities as well as responsibility to insure the premises in accordance with the terms of the lease.

Since this centralized bonded container facility is a new concept for an on-airport operation, it was decided to proceed on an eighteen-month experimental basis during which time the daily operations, user fees and other aspects of the project could be properly evaluated and a plan developed for the future leasing and operation of the facility. Customs representatives have advised that Building No. 88 could simultaneously be used as a Foreign Trade Zone facility should the need arise.

It was therefore recommended that the Executive Director be authorized, for and on behalf of the Port Authority, to enter into an agreement with Hudson General Corporation at Kennedy International Airport, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease agreement with Hudson General Corporation at Kennedy International Airport effective on or about September 15, 1986, for Building No. 88 and associated ground area for an eighteen month period to operate a central facility for the on-airport examination by U.S. Customs of bonded container shipments all in accordance with the foregoing; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 8/14/86)

**Kennedy International Airport - Agreements with the Wing Building Lessees and Bloomingdale's,
(Federated Department Stores, Inc.) - East Wing Building Common Lounge Area**

It was reported that negotiations are substantially complete with the Wing Building lessees and Bloomingdale's, (Federated Department Stores, Inc.) the New York based department store, to operate a 1,100-square foot boutique and sell, at retail, its signature items (products which bear the Bloomingdale's name). The boutique will be constructed by the Port Authority at its expense and will be located on the second floor of the East Wing Building in the common lounge area covered by the Wing Building leases and will continue for a period of approximately one year. This venture will serve as a test for consumer service opportunities, for the type of items involved, for the Kennedy Central Terminal Area Redevelopment project. Also, as part of the test, an estimated four kiosks of approximately 700 square feet may be constructed by the Port Authority contiguous to the Bloomingdale's area, and each would continue in operation for a period of approximately one year, to determine the viability of small high quality consumer service operations at Kennedy International Airport.

Bloomingdale's, at its cost, has agreed to provide concept and design work for the Bloomingdale's space and kiosks and will submit said plans to the Port Authority for construction. The Port Authority will be obligated to construct the required improvements for Bloomingdale's at an estimated project cost of \$350,000 and may be required to construct the kiosks at an estimated project cost of \$160,000 including construction contracts, engineering, administrative and financial expenses. Bloomingdale's staff will also assist the Port Authority with technical advice for the identification of appropriate consumer service tenants for the kiosks and for merchandising and marketing of its type of consumer service products in the airport environment.

Bloomingdale's has expressed a desire to have its store operational prior to the winter holiday season and has accelerated its design for development of the space. Accordingly, in order to meet their target schedule, staff deems it prudent to negotiate and enter into a supplemental agreement for the work hereunder with W.J. Barney Corporation who is presently performing similar work under Contract JFK-110.060A, Interline Baggage Conveyor System, Miscellaneous Building Alterations.

The following arrangement including percentage fees against annual gross receipts has been negotiated with Bloomingdale's:

- 13% of gross receipts on the first \$400,000
- 14% of gross receipts from \$400,000 to \$600,000
- 15% of gross receipts from \$600,000 to \$800,000
- 16% of gross receipts from \$800,000 to \$1 million
- 17% of gross receipts from \$1 million to \$1.5 million
- 18% of gross receipts from \$1.5 million to \$2 million
- 18.5% of gross receipts from \$2 million to \$3 million
- 19% of gross receipts over \$3 million

(Board - 8/14/86)

During the test period the space used by Bloomingdale's and the kiosks will continue to be part of the common area under the Wing Building leases and the Wing Building lessees will continue to pay the fees and charges associated therewith under the Wing Building leases, except for certain cleaning charges. The Wing Building lessees will have continuing approval over this operation and use of the common lounge area during the test period. If the Port Authority and the Wing Building lessees and Bloomingdale's or other concessionaires agree to continue this operation after the initial test period, it is anticipated that the Port Authority will be entering into long-term arrangements with the Wing Building lessees which would include a fee sharing or other similar arrangement and which would be covered by appropriate agreements with the Wing Building lessees.

It was therefore recommended that the Executive Director be authorized, for and on behalf of the Port Authority, to enter into agreements with Bloomingdale's, (Federated Department Stores, Inc.) the Wing Building lessees and W.J. Barney Corporation at Kennedy International Airport, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board hereby authorizes the Executive Director to:

- (1) enter into agreements with the Wing Building lessees, Bloomingdale's, (Federated Department Stores, Inc.) and other operators for the operation of an approximate 1,100-square foot boutique selling, at retail, Bloomingdale's signature items in the East Wing Building common lounge area and an estimated four additional kiosks with other operators for a test period of approximately one year with the Port Authority to be obligated to construct the required improvements for Bloomingdale's and may be obligated to construct the kiosks for other concessionaires, at an estimated project cost of \$510,000 and
- (2) negotiate and enter into a Supplemental Agreement with W.J. Barney Corporation under Contract JFK-110.060A, International Arrivals Building Interline Baggage Conveyor System, Miscellaneous Building Alterations, for the construction of retail sales space to accommodate Bloomingdale's, Inc., at a cost not to exceed \$275,000; and it is further

RESOLVED, that the form of the foregoing agreements be subject to the approval of General Counsel or his designated representative.

(Board - 8/14/86)

Newark International Airport - Payment to Delta Air Lines, Inc.

It was reported that Delta Air Lines, Inc. ("Delta") leases four of the nine aircraft gate positions in Flight Station 3 of Terminal B at Newark International Airport under Lease AN-542. Under the lease, Delta is jointly and severally obligated, with its co-lessee of the remaining five gates in Flight Station 3, to maintain, replace and repair the non-exclusive areas of the Flight Station and the Connector leading to the Flight Station. When it became necessary to replace badly worn carpeting in the Flight Station and the Connector, Delta was unable to obtain a firm commitment from its co-lessee to share in the cost of the work.

In the interest of getting the worn and unsafe carpeting replaced, Delta was encouraged by Port Authority staff to proceed with the re-carpeting and was further told that the Port Authority would assume responsibility to pay Delta for 5/9's of the cost if Delta was unable to obtain payment from its then co-lessee, Pan American World Airways, Inc. Delta subsequently replaced the carpeting but was unable to obtain payment from said co-lessee for its *pro rata* share of the cost.

The Board, at its meeting on September 13, 1984, among other things, authorized the Executive Director to enter into various agreements involving the same Flight Station in Passenger Terminal B, it being deemed beneficial to the Port Authority at the time to concur in the departure of Pan American World Airways, Inc. from the airport and to arrange for the presence of New York Airlines, Inc. in the Pan American space in Terminal B. The aforesaid *pro rata* share of the cost of replacing the carpeting in the Flight Station was not included in the various financial arrangements which took place in the settlement with Pan American and New York Airlines, and staff does not deem it appropriate at this time to seek reimbursement for the said share of the cost from Delta's current co-lessee in Terminal B. Accordingly, with the aforesaid assurance having been made to Delta, authorization is requested for payment by the Port Authority to Delta in the amount of \$90,434 as a share of the cost Delta incurred in replacing the Flight Station and Connector carpeting.

It was therefore recommended that the Executive Director be authorized, for and on behalf of the Port Authority, to pay Delta Air Lines, Inc. the sum of \$90,434, in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board hereby authorizes the Executive Director, for and on behalf of the Port Authority, to pay Delta Air Lines, Inc. the sum of \$90,434.

(Board - 8/14/86)

Kennedy International Airport - Baggage Cart Rental Service - Authority to Perform Improvements

It was reported that baggage cart rental services are provided at 33 U.S. airports. Some European airports have cart rental services as well. Negotiations are substantially complete with a baggage cart rental service company to permit it to install its baggage cart rental service in the International Arrivals Building after completion of the Improvement Program and in such other terminals where the lessee airline has agreed with the company to accept this service. Eastern and TWA are currently disposed not to accept the baggage cart rental service operation while the other Central Terminal Area unit terminal airlines have indicated their acceptance.

As part of the program, the Port Authority is willing to construct certain necessary improvements to the unit terminal frontage to allow for the movement of the carts from the terminal to the parking lots. These improvements will be limited to those airline unit terminals where the lessee airline has agreed to accept the baggage cart rental service during the first year of operation, otherwise, the lessee airline will be required to perform its own terminal frontage improvement if it elects to join the program after the first year. The improvements are also beneficial to handicapped persons using these unit terminals.

It is currently estimated that the cost of these improvements will be \$1.1 million, including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses. Although negotiations with the baggage cart rental service company are substantially complete, authority to enter into an agreement is being held in abeyance until such time as certain labor relations matters concerning Port Authority employees represented by an employee organization have been clarified. It is felt that the required improvements, however, should proceed in order to minimize delay in implementation of the program when appropriate.

It was therefore recommended that the Board authorize a project for performing improvements as needed and requested by the unit terminal airlines in the Central Terminal Area at Kennedy International Airport for future baggage cart rental operations at an estimated total project cost of approximately \$1.1 million, including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a project for performing improvements as needed and requested by the unit terminal airlines in the Central Terminal Area at Kennedy International Airport for future baggage cart rental operations at an estimated total project cost of approximately \$1.1 million, including payments to contractors, an allowance for extra work and engineering, administrative and financing expenses is authorized.

(Board - 8/14/86)

All Vehicular Crossings - New Tolls Registration System - Project Authorization and Authority to Purchase and Install Equipment

It was reported that the tolls registration equipment presently in use at the three Staten Island Bridges and the Holland and the Lincoln Tunnels has been in operation since the 1930's. The sole source supplier of this electro-mechanical equipment, Taller-Cooper, is no longer in business and replacement parts, when needed, must be custom fabricated or salvaged from equipment remaining from the conversion to one-way tolls in 1970. It is projected that within three to five years, replacement parts will be unavailable. The tolls equipment at the George Washington Bridge was installed in 1962 and it also has become difficult and costly to maintain.

The present system also requires that data first be sent to Management Information Services Department for data conversion and processing and then audited manually by the Finance Department. The entire tolls audit process typically takes about four weeks to complete.

Due to the age, technical obsolescence and lack of replacement parts for the existing tolls equipment, staff determined that a new tolls registration system for use at all Port Authority vehicular crossings is required. The new system will provide state of the art methods of toll collection, revenue control and deviation analyses, statistical traffic data gathering and management of the Port Authority's toll barrier operations. It will also provide an interface for direct data transmission to the Port Authority's data processing staff at The World Trade Center, and support future expansion, accommodating other interrelated systems such as Automatic Vehicle Identification (AVI).

The new system will improve the accuracy and speed of the auditing process. Instant audits at the toll lane and plaza levels will be available based on the real time information.

The existing system has a remaining useful life of no more than five years. Staff estimates that investing in new equipment now as opposed to five years hence will result in present value savings of about \$2 million due to reduced staffing, operating and maintenance costs.

Therefore, a Request for Proposals (RFP) was prepared and publicly advertised, with four responses received on March 13, 1986, ranging in price from \$2.8 million to \$12.7 million.

Another proposal was received and was deemed non-responsive. Subsequently, one of the proposals was eliminated as a result of failure to meet pre-determined criteria established by staff.

The following proposals were evaluated:

Vendor	Location	Price	Monthly Maintenance Price*
1. AGS Computers, Inc.	Jericho, Long Island New York	\$2,859,636	\$10,216
2. Cubic Western Data	San Diego, California	\$3,534,524	\$14,200

*1986 Dollars

(Board - 8/14/86)

Vendor	Location	Price	Monthly Maintenance Price*
3. TDC Electronics (Compagnie de signaux et d'entreprises electriques)	New York, New York (Paris)	\$6,614,749	\$19,516
STAFF ESTIMATE		\$8,400,000	\$24,000

*1986 Dollars

An interdepartmental evaluation committee, composed of representatives from the Engineering, Management Information Services, General Services, and Tunnels, Bridges and Terminals Departments, was established to intensively analyze and evaluate the proposals in the following categories: (a) technical ability to design and provide the system; (b) price; (c) quality of equipment; (d) ease of access to the vendor's production facility and availability on a day-to-day basis of the vendor's engineering and support personnel for this project; (e) proven performance of the equipment proposed and of prior systems of similar scope and complexity; (f) compliance with the terms, conditions, and other provisions of the RFP; and (g) the vendor's ability to, in a timely manner, furnish the system described in the RFP. Further, as part of the evaluation process, the evaluation committee interviewed the vendors and visited their facilities.

Based on Cubic Western Data's demonstrated ability to provide the system which best meets the aforementioned criteria and the Port Authority's needs well into the future, the Evaluation Committee recommended the tolls registration system proposed by Cubic Western Data.

Cubic Western Data has over fifteen years of experience in computerized revenue collection systems. They have installed computer based fare collection systems for such agencies as the Bay Area Rapid Transit (BART), Oakland, California and Metropolitan Atlanta Rapid Transit Authority (MARTA), Atlanta, Georgia. The Evaluation Committee inspected, at Cubic Western Data's facilities, similar tolls registration systems currently being installed on both the Ohio and Massachusetts Turnpikes. Finally, Cubic Western Data already maintains a Port District regional maintenance facility.

It was therefore recommended that the Board authorize:

1. a project to furnish and install new, modernized tolls registration systems at six vehicular crossing facilities: Bayonne Bridge, Goethals Bridge, Outerbridge Crossing, Holland Tunnel, Lincoln Tunnel, and George Washington Bridge at a total project cost not to exceed \$9.3 million, consisting of up to \$4.0 million for equipment purchase, an estimated \$3.5 million for installation, and an estimated \$1.8 million for associated engineering, staff, and financial costs;

(Board - 8/14/86)

2. the Executive Director to enter into an agreement with Cubic Western Data to furnish tolls registration systems for all six vehicular crossing facilities, at a compensation not to exceed \$3.6 million for equipment purchase, exclusive of an authorization of \$400,000 for extra work;

3. the Executive Director to negotiate with and award to Cubic Western Data, or to publicly advertise and award contracts to the lowest qualified bidder(s) or to reject all bids and employ staff for site preparation and installation of the system at all six vehicular crossings at an estimated cost not to exceed \$3.2 million, exclusive of an authorization of \$320,000 for extra work; and

4. the Executive Director to enter into an agreement with Cubic Western Data to perform nine years of maintenance commencing one year after the final acceptance of each facility's tolls registration system at a monthly compensation not to exceed \$14,200 per month for all facilities, not including escalation, exclusive of an authorization of \$150,000 for extra work over the life of the contract.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes: (1) a project to furnish and install new, modernized tolls registration systems at six vehicular crossing facilities: Bayonne Bridge, Goethals Bridge, Outerbridge Crossing, Holland Tunnel, Lincoln Tunnel, and George Washington Bridge at a total project cost not to exceed \$9.3 million, consisting of up to \$4.0 million for equipment purchase, an estimated \$3.5 million for installation, and an estimated \$1.8 million for associated engineering, staff, and financial costs; (2) the Executive Director to enter into an agreement with Cubic Western Data to furnish tolls registration systems for all six vehicular crossing facilities, at a compensation not to exceed \$3.6 million for equipment purchase, exclusive of an authorization of \$400,000 for extra work; (3) the Executive Director to negotiate with and award to Cubic Western Data, or to publicly advertise and award contracts to the lowest qualified bidder(s) or to reject all bids and employ staff for site preparation and installation of the system at all six vehicular crossings at an estimated cost not to exceed \$3.2 million, exclusive of an authorization of \$320,000 for extra work and (4) the Executive Director to enter into an agreement with Cubic Western Data to perform nine years of maintenance commencing one year after the final acceptance of each facility's tolls registration system at a monthly compensation not to exceed \$14,200 per month for all facilities, not including escalation, exclusive of an authorization of \$150,000 for extra work over the life of the contract; and it is further

RESOLVED, that the form of the foregoing agreements be subject to the approval of General Counsel or his authorized representative.

(Board - 8/14/86)

TRANSCOM - Agreement with the Departments of Transportation for the States of New York and New Jersey and the City of New York

It was reported that an important finding of the Planning and Development Department's Trans-Hudson task force was that the region's transportation congestion problems would be further aggravated by \$7 billion of planned transportation construction during the next five years and that the operational response to this reduction in service levels was complicated by the fragmented network of agencies responsible for management of the transportation network. Clearly, what was required was a quantum increase in coordination, communication and advanced operational planning among the historically independent jurisdictions. Consequently, the Port Authority called together the heads of the major transportation entities in the region in December 1984, including both highway and transit agencies. This meeting led to the formation of the Transportation Operations Coordinating Committee (TRANSCOM) – an informal consortium of sixteen transportation agencies in the New York/New Jersey metropolitan region.

Since inception TRANSCOM has embarked upon a series of projects to demonstrate the impact of improved coordination and communication of the region's traffic management. The agreement will permit the establishment of four projects:

- **Alpha-Numeric Paging System** – permits real-time information concerning conditions affecting traffic in the region to be communicated simultaneously to all entities on the system;
- **Special Coordinated Operation Plans** – pre-establishment of diversionary, alternate route operating plans for each major regional road segment or transportation facility so as to expedite and improve the quality of response to incidents;
- **Highway Construction Coordination** – creation of computerized data bank of all major highway construction and maintenance in the region, thereby permitting planners and operators of the respective agencies to avoid simultaneous activities on parallel or intersecting road segments; and
- **TRANSCOM Center** – a facility to receive, transmit and process real-time information through advanced technological means.

Further, with appropriate funding and support, TRANSCOM's evolution can be accelerated to incorporate more advanced technology to manage the region's traffic management problems, as is done in such metropolitan areas as Los Angeles, Chicago, London and Tokyo.

The TRANSCOM Center has played an important role in recent special events such as traffic coordination of the New Jersey Waterfront Marathon and the Liberty Weekend activities, as well as in many day-to-day traffic situations. These TRANSCOM activities have been enthusiastically embraced not only by the participating agencies, but by regional private and non-profit transportation related entities, the press, and Federal officials, including the Federal Highway Administration. It is noteworthy that not only have the participating agencies been actively involved in TRANSCOM's planning, but five of those agencies (the New Jersey Department of Transportation (NJDOT), the New York Department of Transportation (NYSDOT), the New York City Department of Transportation (NYCDOT), New Jersey Transit and the New Jersey State Police, in addition to the Port Authority) have donated or committed staff to support TRANSCOM operations.

(Board - 8/14/86)

In consideration of the enthusiasm and the apparent need for the TRANSCOM concept and program, the four agencies primarily responsible for highway transportation in the region, i.e., NJDOT, NYCDOT, NYSDOT and the Port Authority have agreed to enter into an agreement that would formally establish TRANSCOM and provide for a distribution of TRANSCOM's cost among the signatory agencies.

In support of TRANSCOM's first year, the two State Departments of Transportation have committed to provide project funds in the amount of \$157,000 each, made available through the New Jersey Transportation Coordinating Council and the New York Metropolitan Transportation Council, from Federal Highway Administration funds. Additionally, as part of their contributions, NYSDOT, NJDOT and NYCDOT will provide at least one staff member each to TRANSCOM. When staff contributions from two other participating agencies are included, the non-Port Authority contributions in the first year are estimated to be at least \$625,000.

While the first year Port Authority share is to be authorized at \$900,000, \$400,000 of that amount represents anticipated contributions from additional non-DOT agencies that are expected to become signatories to the agreement during the first year. As those agencies become signatories and make contributions to TRANSCOM, the Port Authority's contribution will be reduced accordingly. For subsequent years, the agreement would provide for each signatory agency to review the TRANSCOM effort and to make contributions based on that review.

By the end of the three-year period, it is expected that TRANSCOM will become a permanent regional institution based on the benefits to be derived during this demonstration period and will be able to attract increases in support from all parties for continued expansion of its operating programs.

It was therefore recommended that the Board authorize the Executive Director to:

1. enter into an agreement with the Departments of Transportation of the States of New York (NYSDOT) and New Jersey (NJDOT) and the City of New York (NYCDOT), which will formally establish the Transportation Operations Coordinating Committee ("TRANSCOM"), for a term of three years, the Port Authority's share of TRANSCOM costs not to exceed \$900,000 in the first year, \$600,000 in the second year and \$700,000 in the third year; and

2. execute amendments to the agreement as appropriate to include additional transportation agencies as signatories.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes the Executive Director to: (1) enter into an agreement with the Departments of Transportation of the States of New York (NYSDOT) and New Jersey (NJDOT) and the City of New York (NYCDOT), which will formally establish the Transportation Operations Coordinating Committee ("TRANSCOM"), for a term of three years, the Port Authority's share of TRANSCOM costs not to exceed \$900,000 in the first year, \$600,000 in the second year and \$700,000 in the third year and (2) execute amendments to the agreement to include additional transportation agencies as signatories; the form of the agreement and amendments to be subject to the approval of General Counsel or his authorized representative.

(Board - 8/14/86)

George Washington Bridge - Rehabilitation of Bridges over the Trans-Manhattan Expressway - Broadway and Wadsworth Avenue Bridges - Project Authorization and Award of Contract GWB-208

It was reported that the Board, at its meeting on November 8, 1984, authorized the Executive Director to award Contract GWB-207. Contract GWB-207 was the first of several contracts to provide for repair of the Broadway and Wadsworth Avenue Bridges. The work under Contract GWB-207 in the approximate amount of \$2.5 million has been completed.

The second contract, Contract GWB-208, provides for the resupport of utilities to brackets installed under Contract GWB-207, removal of remaining deteriorated soffit slabs, replacement of sidewalks on the bridges, fireproofing of utilities, and for new roadway lighting for the Trans-Manhattan Expressway under the Broadway and Wadsworth Avenue bridges.

In addition, Contract GWB-208 provides for the removal of loose concrete from the underside of the Broadway, Wadsworth Avenue, St. Nicholas Avenue and Audubon Avenue bridges, the patching of the spalled areas at the Broadway and Wadsworth Avenue bridges, and the closing of traffic lanes, to permit such work to be done, all on a net cost basis presently estimated at roughly \$80,000.

A portion of the work under this contract will be performed during nighttime weekday and weekend hours so as to minimize interference with traffic flow and essential facility operations.

A portion of the cost for resupporting the utilities will be reimbursed by the utility companies.

Contract GWB-208 was publicly advertised and the following bids were received on July 8, 1986:

	Classified Work	Unclassified Work	Estimated Total Amount
Beaver Concrete Breaking Co., Inc. Corona, New York	\$1,181,254	\$2,705,700	\$3,886,954
A.J. Pegno Construction Corp. College Point, New York	825,030	3,107,484	3,932,514
Bellezza Company, Inc. South Kearny, New Jersey	662,958	3,292,210	3,955,168
Jana Construction Co., Inc. Scarsdale, New York	1,337,460	2,850,000	4,187,460

(Board - 8/14/86)

	Classified Work	Unclassified Work	Estimated Total Amount
Karl Koch Erecting Co., Inc. Carteret, New Jersey	\$1,329,297	\$3,049,609	\$4,378,906
Acme Skillman Construction Co., Inc. Maspeth, New York	2,442,998	3,407,002	5,850,000
ENGINEER'S ESTIMATE			\$4,750,000

Beaver Concrete Breaking Co., Inc. submitted the lowest bid and was determined by the Chief Engineer to be qualified to perform the contract.

It was therefore recommended that the Board authorize:

1. a project to rehabilitate the bridges over the Trans-Manhattan Expressway at Broadway and Wadsworth Avenue at an expenditure presently estimated at \$13.6 million, including payments to contractors, allowances for extra work and net cost work, and engineering, administrative and financing expenses; and

2. the Executive Director to award Contract GWB-208, George Washington Bridge, Bridges over the Trans-Manhattan Expressway, Broadway and Wadsworth Avenue Bridges Repairs to Beaver Concrete Breaking Co., Inc., the low bidder, in the estimated total amount of \$3,886,954, plus an authorization of \$388,000 for extra work and a provision for net cost work.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a project to rehabilitate the bridges over the Trans-Manhattan Expressway at Broadway and Wadsworth Avenue at an expenditure presently being estimated at \$13.6 million, including payments to contractors, allowances for extra work and net cost and engineering, administrative and financing expenses, is authorized; and it is further

RESOLVED, that the Executive Director is authorized to award Contract GWB-208, George Washington Bridge, Bridges over the Trans-Manhattan Expressway, Broadway and Wadsworth Avenue Bridges Repairs to Beaver Concrete Breaking Co., Inc., the low bidder, at its bid price in the estimated total amount of \$3,886,954 plus an authorization of \$388,000 for extra work and a provision for net cost work.

(Board - 8/14/86)

The World Trade Department - The Teleport - Contract TP-110.014 - Radio Frequency Interference Shield and Antenna Infield - Settlement of Claims and Additional Extra Work

It was reported that the Board, at its meeting on May 10, 1984, authorized the Executive Director to award Contract TP-110.014, Radio Frequency Interference Shield and Antennae Infield to the qualified contractor submitting the lowest proposal. The Executive Director, on June 13, 1984, authorized award of Contract TP-110.014 to D'Annunzio Constructors Corporation (now known as D'Annunzio Brothers, Inc.) at its proposal price of \$4,255,000, exclusive of an authorization for extra work up to the amount of \$430,000 and exclusive of net cost work. On November 27, 1984, the Executive Director delegated to the Director, World Trade Department, the authority to order all authorized extra work under the contract.

Subsequently, the Board, at its meeting on December 13, 1984, authorized the Executive Director to enter into Supplemental Agreement No. 1 under Contract TP-110.014 in the estimated amount of \$600,000 which required the contractor to remove from the site unsuitable materials excavated from the antennae infield at The Teleport. In addition, on June 13, 1985 the Director, World Trade Department, authorized an increase in extra work under Contract TP-110.014 from \$430,000 to \$680,000 for various items of work required by the Port Authority's ongoing structural integrity program and for additional grading of the antennae infield and rock excavation.

Contract TP-110.014 required the contractor to construct the antenna shield wall and perform other site work, including installation of storm drainage, and provision of access roadways at The Teleport.

On August 5, 1985, D'Annunzio Constructors Corporation (now known as D'Annunzio Brothers, Inc.) submitted a claim against the Port Authority in the approximate amount of \$1 million. The basis of the claim was for additional costs alleged to have been incurred by the contractor as a result of deficiencies in the contract design relating to metal siding and precast concrete panels, disruptions to the progress of the work caused by unsuitable materials and the ordering of items of work by the Port Authority which were considered to be extra work by the contractor. After a thorough review and evaluation some of the contractor's claims were dismissed, but a portion of these claims was determined to be valid, and after negotiations, a tentative settlement, subject to Board approval, has been reached with D'Annunzio Brothers, Inc. in the amount of \$389,122, of which \$189,185 constitutes payment for extra work. An additional \$40,878 in payment for extra work not within the contractor's claim, is required to be authorized for miscellaneous field changes.

To date, approximately \$5,273,000, has been expended under Contract TP-110.014. The work required by the contractor has been substantially completed and only punch list items and the submission of as-built drawings is required.

The Executive Director, on July 29, 1986, authorized the Director, World Trade Department, to pay D'Annunzio Brothers, Inc., \$217,750 out of a total of \$242,750, which was allocable to work already performed but not payable until final payment under Contract TP-110.014. D'Annunzio Brothers, Inc. signed a claims release of all claims under the contract prior to payment of the \$217,750, which was conditioned upon the Board's approval of the proposed settlement.

(Board - 8/14/86)

It was therefore recommended that the Board authorize:

1. the Executive Director to enter into an agreement for the settlement of all claims by D'Annunzio Brothers, Inc., against the Port Authority arising out of Contract TP-110.014, Radio Frequency Interference Shield and Antenna Infield and for payment to D'Annunzio Brothers, Inc., of a total of \$389,122 in settlement of all such claims, of which \$189,185 constitutes payment for extra work; and
2. additional compensation for extra work in the amount of \$40,878 under Contract TP-110.014.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes: (1) the Executive Director to enter into an agreement for the settlement of all claims by D'Annunzio Brothers, Inc., against the Port Authority arising out of Contract TP-110.014, Radio Frequency Interference Shield and Antenna Infield and for payment to D'Annunzio Brothers, Inc., of a total of \$389,122 in settlement of all such claims, of which \$189,185 constitutes payment for extra work, the form of the agreement to be subject to the approval of General Counsel or his authorized representative and (2) additional compensation for extra work in the amount of \$40,878 under Contract TP-110.014.

(Board - 8/14/86)

George Washington Bridge Bus Station - General Cleaning - Contract PSE-452-1

It was recalled that the Board, at its meeting on June 10, 1982, authorized award of Contract PSE-362 to Motley's Shampooing Company, the lowest bidder, at its bid price of \$915,600, exclusive of a 20% allowance for extra work. The contract contained provision for two one-year renewal options; said options were exercised by the Director, Tunnels, Bridges and Terminals, in June 1984 and June 1985.

Contract PSE-362 expired on June 30, 1986. Due to changes in the bid documents, the bid opening was postponed until June 20, 1986. An interim agreement was reached with Motley's Shampooing Company to extend the current contract for three months, under the same terms and conditions, to provide uninterrupted service until a new contract is awarded.

Contract PSE-452-1 was publicly advertised and bids were solicited from 43 vendors. On June 20, 1986, the following bids were received:

Vendor Name	Price
Motley's Shampooing Company Newark, New Jersey	\$1,057,868
Dunn & Sons Maintenance Corp. Plainfield, New Jersey	1,239,764
Urban Cleaning Contractors, Inc. Pelham Manor, New York	1,274,251
See Clear Maintenance Corp. New York, New York	1,407,370
Hispanic Maintenance Services, Inc. White Plains, New York	1,436,678
Control Building Services, Inc. Secaucus, New Jersey	1,449,481
Ebon Services International, Inc. Newark, New Jersey	1,692,201
Nelson Maintenance Services, Inc. Yonkers, New York	1,723,961
LeRoy & Sons International Co., Inc. Hollis, New York	1,961,566
STAFF ESTIMATE	\$1,430,000

(Board - 8/14/86)

It has been determined that Motley's Shampooing Company, a minority contractor, meets all of the contractual requirements and is qualified to perform the work. Motley's Shampooing Company has performed satisfactorily on other Port Authority janitorial services contracts. Staff therefore recommends that the Board award Contract PSE-452-1, George Washington Bridge Bus Station, General Cleaning, to Motley's Shampooing Company, in the estimated amount of \$1,057,868, exclusive of a 10% extra work allowance.

The contract is subject to extension for one two-year period. The contract price during the extension period is subject to adjustment based on mutually agreed to cost increases related to labor and materials subject to Audit verification. The price adjustments for non-labor costs will be established as of the beginning of the extension period for the entire term and will be computed based on changes in the Consumer Price Index for the costs of such services. Labor costs are subject to annual escalation based on the increase for the cost of such services contained in the Local 32BJ union agreement in effect on January 1 of each year.

It was therefore recommended that the Board authorize the Executive Director to award Contract PSE-452-1 to Motley's Shampooing Company on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize: (1) the Executive Director, for and on behalf of the Port Authority, to award Contract PSE-452-1, George Washington Bridge Bus Station, General Cleaning, to Motley's Shampooing Company, a minority contractor, the lowest bidder, at its total estimated bid price of \$1,057,868, exclusive of a 10% extra work allowance, for a two-year term commencing October 1, 1986 and (2) the Executive Director to extend the contract, at his discretion, for one additional two-year period. The compensation due to the contractor for non-labor related costs will be adjusted at the commencement of the renewal period based upon changes in the Consumer Price Index for the costs of providing such services; labor-related costs are subject to annual escalation based upon the costs of such services contained in the agreement with Local 32BJ in effect on January 1 of each year; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 8/14/86)

**George Washington Bridge - Upper Level Rehabilitation - Main Span Expansion Joints - Contract
GWB-110.078A - Increase In Extra Work Authorization**

It was reported that on May 10, 1984, the Committee on Construction authorized the award of Contract GWB-110.078A to Dynamic Painting Corp., the low bidder, at its bid price in the total estimated amount of \$1,151,913, plus an authorization of \$120,000 for extra work. The contract provides for the rehabilitation of the finger-type expansion joints and associated drainage systems of the upper level roadway at the New York and New Jersey towers of the George Washington Bridge.

As part of the contractor's operations at the site, the contractor was required to remove the existing finger-type expansion joints and install temporary roadway plates. The expansion joints could then be inspected, repaired or replaced as required. A number of problems developed resulting in increased cost and extra work. The first was that the facility experienced operating problems with the roadway plates in place while the finger joints were being repaired or replaced. Traffic would brake before crossing the plates which slowed traffic and caused unacceptable delays. The contractor was directed to remove the roadway plates and install temporary expansion joints. This resulted in extra work estimated at \$265,000.

Also, as the rivets which held a supporting angle for the expansion joints in place were removed, it became apparent that unforeseeable differential stresses had distorted the rivets and made the rivets extremely difficult to remove. In addition, when the rivets were removed the holes were found to be distorted making it impossible to install the new high strength bolts to hold the new supporting angle for the new or rehabilitated expansion joints without reaming the holes and installing larger high strength bolts. This resulted in extra work estimated at \$226,000.

Also nine other miscellaneous changes resulted in extra work estimated at \$146,000.

Based on limited field observations of the expansion joints prior to bids being received, the contract anticipated that 20% of the expansion joints would be replaced under the contract and 80% would be rehabilitated. It was not possible to determine the amount of deterioration of the expansion joints without removal and inspection of the joints. When the joints were removed, it was determined that they could not be rehabilitated and would require 100% replacement instead of the 20% originally anticipated. Since this was a major change in scope and it was not economical or efficient to continue work as originally planned it was decided to cancel the remainder of the contract and pay the contractor the estimated amount of \$193,000 for the expansion joints, drainage piping, and supporting angles already fabricated but not installed. A new contract will be prepared which will provide for the replacement of the expansion joints where feasible utilizing the material purchased under Contract GWB 110.078A.

The cancellation of Contract GWB-110.078A will result in reduction in the original estimated expenditure under Contract GWB-110.078A, for other than extra work from \$1,151,913 to an estimated total amount of \$545,534, as well as the requested increase in the extra work authorization from \$120,000 to \$830,000.

It was therefore recommended that the Board authorize an increase in the authorization for extra work under Contract GWB-110.078A, Upper Level Rehabilitation, Main Span Expansion Joints, with Dynamic Painting Corp., from \$120,000 to \$830,000, an increase of \$710,000.

(Board - 8/14/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize an increase in the authorization for extra work under Contract GWB-110.078A, Upper Level Rehabilitation, Main Span Expansion Joints, with Dynamic Painting Corp., from \$120,000 to \$830,000, an increase of \$710,000.

(Board - 8/14/86)

The World Trade Center - Leases with New York Shipping Association, Inc. and NYSA-ILA Fringe Benefits Escrow Fund and Extension of Lease with Insurance Services Office

It was reported that, subject to approval by the Board, staff has reached agreement with New York Shipping Association (Shipping Association), an association for negotiating, underwriting and implementing collective bargaining agreements among various labor organizations on behalf of steamship carriers and other waterfront employers and with the NYSA-ILA Fringe Benefits Escrow Fund (Escrow Fund), a joint labor/management trust fund which manages and administers the collection and investment of employer contributions paid by steamship carriers in the Port of New York, for employee benefits provided by the Longshore Collective Bargaining agreements for the Port of New York, for the leasing of a total of approximately 80,000 rentable square feet of office space comprising the 19th floor (to be leased to the Escrow Fund) and the 20th floor (to be leased to the Shipping Association) of Two World Trade Center. Mr. Anthony J. Tozzoli, former director of the Port Department, is currently the president of the New York Shipping Association, Inc., and has informed General Counsel that he has not been involved in the negotiation of these leases.

The lease with the Escrow Fund will provide that this tenant will occupy approximately 30,000 rentable square feet of space during the initial 5-7 years of the term, after which the balance of 10,000 square feet will be added to the leased space for the balance of the term at the rental rates then payable under the Escrow Fund lease.

Both leases provide that the rent for the five-year period following the rent commencement date will be at the rate of \$27 per rentable square foot per year; for the following five years, at the rate of \$33 per rentable square foot per year; for the following five years at the rate of \$36 per rentable square foot per year. The tenants would also pay additional charges for cleaning and electricity and additional rent to cover increases in operating costs and payments in-lieu-of taxes. Both leases will commence on February 1, 1987 and the rent commencement date will be on the earlier of five months after the lease commencement date or the date on which the tenants commence business operations in the space which includes time for the tenants to reconstruct their respective spaces. The leases would provide the tenants with the right, exercisable jointly, to extend their leases for an additional five-year period at fair market rental. The spaces would be delivered "as is" with an allowance equal to \$30 per rentable square foot payable toward the combined cost of the reconstruction performed on both floors. If the Port Authority fails to make the spaces available to the tenants on February 1, 1987 and as a result the tenants are required to extend their current leases which expire on April 30, 1987, the Port Authority will be responsible for the difference between the rentals payable by the tenants during an extension period of not more than one year and the rentals the tenants would pay in The World Trade Center for a similar period following the rent commencement date.

The leases will provide each tenant with the right to sublease portions of their respective spaces and may further provide for up to a 50/50 sharing of any sub-rent profits resulting therefrom.

(Board - 8/14/86)

The current occupant of the space to be covered by the two leases, Insurance Services Office (I.S.O.), has a substantial computer installation on the 20th floor which includes raised floors, special air conditioning, and a number of other items. Since the Shipping Association intends to also install a major computer operation on this floor, I.S.O. has agreed to leave in the premises most of its computer-related installation which will be usable by the Shipping Association. This was a major consideration in the Shipping Association's determination to move to the Trade Center. In consideration of I.S.O. leaving its computer-related installation in the space, it has been agreed that I.S.O. will be relieved of its obligation to restore its premises. Staff has also agreed that if I.S.O. is required to remain in its premises beyond January 31, 1987, the expiration date of its lease, I.S.O. will pay basic rent at the rate of \$23 per rentable square foot per year for the first two months of such period, at the rate of \$30 per rentable square foot per year for the third month, and at the rate of \$70 per rentable square foot per year thereafter. In addition, I.S.O. would pay additional rent to cover increases in operating costs (with a base date of January 1, 1987) and payments in-lieu-of taxes (with a tax base equal to the annual per rentable square foot factor for the tax year commencing July 1, 1987). Authorization is therefore requested to supplement the I.S.O. lease to provide for a six-month extension of the lease upon the foregoing rental arrangements and to relieve I.S.O. of its obligation to restore its premises.

There will be a real estate brokerage commission payable to Kenneth D. Laub & Co., Inc. on the Shipping Association and Escrow Fund leases not to exceed the rates approved by the Board at its meeting of August 11, 1977. Payment of the commission may be deferred for a period not to exceed 36 months at which time it would be paid together with simple interest at a fixed rate equal to the annual discount yield rate of the thirteen week Treasury Bill.

It was therefore recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a lease with the New York Shipping Association, Inc., and to enter into a lease with the NYSA-ILA Fringe Benefits Escrow Fund and to enter into an agreement with Insurance Services Office extending its lease at The World Trade Center, upon the terms set forth above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into leases with the New York Shipping Association, Inc., and the NYSA-ILA Fringe Benefits Escrow Fund, each for approximately 40,000 rentable square feet of office space in Two World Trade Center, for a term of approximately fifteen years and five months with an option to extend for an additional five-year period upon the terms set forth above; and it is further

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement extending the lease with Insurance Services Office, the current lessee of the space, for a six-month period, upon the terms set forth above; and it is further

RESOLVED, that the form of the agreements be subject to the approval of General Counsel or his designated representative.

(Board - 8/14/86)

Agreement with Hofstra University to Provide Engineers from China

It was reported that at the request of the People's Republic of China, through the China Association of Science and Technology, Hofstra University has sponsored a program for placing senior Chinese engineers in programs with high technology firms to provide these engineers with experience in American group research and design techniques. Because the People's Republic of China has established as one of its priorities the development of its seaport and airport facilities, it has requested placement of two highly qualified senior engineers with the Port Authority so that they may obtain valuable training and experience which they will be able to utilize in the modernization and expansion of seaport and airport facilities in the People's Republic of China.

These engineers would be provided with an individual intern program within the Engineering Department so that they will be able to gain as much experience in the design and construction of port facilities as possible within the one-year period. The program would include work in engineering design, project management, construction management and materials quality assurance.

Since the engineers are senior engineers with considerable experience in engineering, it is anticipated that they will make a valuable contribution to Port Authority projects.

It was therefore recommended that the Board authorize the Chief Engineer to enter into an agreement with Hofstra University to provide two senior engineers from the People's Republic of China, through the China Association of Science and Technology, to participate in a one-year intern program in the Engineering Department, in an amount not to exceed \$57,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Chief Engineer is authorized to enter into an agreement with Hofstra University to provide two senior engineers from the People's Republic of China, through the China Association of Science and Technology, to participate in a one-year intern program in the Engineering Department, in an amount not to exceed \$57,000; said agreement to be subject to approval as to form by General Counsel or his designated representative.

Whereupon, the meeting was adjourned.

Secretary

Aviation Department - Newark International Airport - People Express Airlines, Inc. - Authorization to Amend Leases	371

MINUTES of special meeting of The Port Authority of New York and New Jersey held Thursday, September 24, 1986, at the Port Authority offices, One World Trade Center, City, County and State of New York.

PRESENT:

NEW JERSEY

Philip D. Kaltenbacher, Chairman
Jerry Fitzgerald English
Robert V. Van Fossan
William K. Hutchison
Henry F. Henderson, Jr.
Robert Van Buren

NEW YORK

Robert F. Wagner, Vice-Chairman
William J. Ronan
Howard Schulman
John G. McGoldrick
H. Carl McCall

Stephen Berger, Executive Director
Patrick J. Falvey, General Counsel/Assistant Executive Director
Doris E. Landre, Secretary
Sidney Frigand, Assistant Executive Director/Government, Community & Public Affairs
Louis J. Gambaccini, Assistant Executive Director/Trans-Hudson Transportation
Katharine B. MacKay, Assistant Executive Director/Administration
Mark Marchese, Assistant Director, Information Services, Public Affairs
Hugh O'Neill, Assistant Executive Director/Policy Planning and Business Development
David Z. Plavin, Assistant Chief Financial Officer
Morris Sloane, Deputy Director of Aviation
Joseph L. Vanacore, Assistant Executive Director/Capital Programs
Barry Weintrob, Chief Financial Officer and Director, Finance Department
Kristina E. Weisenstein, Administrative Assistant

The meeting was called to order by the Chairman.

The Secretary reported that the meeting was duly called in accordance with the By-Laws.

(Board - 9/24/86)

**Aviation Department - Newark International Airport - People Express Airlines, Inc. -
Authorization to Amend Leases**

It was reported that People Express Airlines, Inc. is constructing a passenger terminal facility at Newark International Airport pursuant to an agreement of lease authorized by the Board at its meeting on March 15, 1984 with the final details being given approval by the Committee on Finance at its meeting on January 10, 1985. It was further reported that the Port Authority entered into another lease with People Express Airlines, Inc. covering the construction of an annex building at the North Passenger Terminal at the Airport pursuant to a lease dated as of May 1, 1986. This lease did not require authorization of the Board or Committee because the annex was constructed by People Express at its own expense and the annual rental was within the authority of the Executive Director under the By-Laws.

People Express in view of its financial difficulties stemming in large part from the purchase of Frontier Airlines by its parent has asked the Port Authority for certain changes in both leases. It is recommended that certain items such as loading bridges and personal property items involving heating and power at the gate positions, which under the terms of the Terminal C lease were to be provided at People's expense and remain People's property but could be purchased by the Port Authority at the expiration of the term, would now become part of the construction work for which funds are provided by the Port Authority subject to the \$175 million limitation of the Terminal C lease. These items are estimated to cost approximately \$8.85 million and would immediately become Port Authority property. In addition, People Express has advised that it did not anticipate the large cost of Terminal C liability insurance which is part of the costs paid for by the Port Authority subject to the \$175 million limitation of the Terminal C lease, the estimated amount over their budget being approximately \$2 million. It is further recognized that the roof of Terminal C, including the portion not leased to People Express, requires repairs the cost of which is estimated not to exceed \$2.5 million and it would be reasonable, in the opinion of staff, that all of said cost shall be borne by the Port Authority. This lease requires People Express to furnish security in the amount of \$9,500,000 to support its obligation to indemnify the Port Authority on its termination or in case of a challenge with respect to the arrangement whereby the Port Authority will be placing into the flight fee and fuel fee cost centers at the Airport certain expansions of the fuel system and the public aircraft facilities required to serve People's Terminal C facility. The amount of these costs has now been determined as \$6,500,000 and it is proposed that the security requirement be reduced accordingly.

It is also recommended that the Port Authority pay People Express the cost of construction of the annex to the North Terminal of approximately \$3,500,000. Originally People Express had intended to stage its Terminal C construction so that its transcontinental flights could operate out of Terminal C during construction, which operation was performed for a time under a separate lease of interim facilities at Terminal C. This turned out to be an undesirable plan for completing Terminal C and the annex was built to handle these flights. The cost of construction of the annex would become part of the cost of the construction work under the Terminal C lease

(Board - 9/24/86)

and subject to its \$175 million limitation. The term of the annex lease would be month-to-month as long as People Express was the tenant under the Terminal C lease and under the lease covering the North Passenger Terminal dated January 1, 1983 at which People Express is presently operating and which expires on April 30, 1991. In any event the annex lease would terminate within ninety days after completion of the construction work under the Terminal C lease and the Port Authority would not have the right to terminate the annex lease prior to said date, except for default of People Express. If People Express terminates its month-to-month annex lease or upon its termination as provided above and the Port Authority actually leases or permits another or others to use the annex, all or part of the net rental for the annex building can be credited to the amount payable by People under the Terminal C lease which is attributable to the cost of the construction of the annex.

The foregoing changes are proposed to help complete the Terminal C construction. They would also have a beneficial effect on People's current cash situation.

It was therefore recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into agreements supplementing the leases with People Express Airlines, Inc. at Newark International Airport on the terms set forth above.

Whereupon the following resolution was adopted, Commissioner Schulman voting "no":

RESOLVED, that the Board authorize the Executive Director for and on behalf of the Port Authority to enter into agreements supplementing the lease with People Express Airlines, Inc. covering Terminal C at Newark International Airport and the lease with People Express covering the annex at the North Passenger Terminal at Newark International Airport, on the terms set forth above; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

Whereupon, the meeting was adjourned.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of September 11, 1986. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on October 16, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on October 16, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on October 16, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on October 16, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 10/16/86)

**Newark International Airport - Central Terminal Area Roads - Interim Improvements -
Amendment to Project Authorization and Award of Contract NIA-110.030**

It was reported that the Board at its meeting on December 12, 1985, authorized a project for the construction of interim roadway improvements within the Central Terminal Area at Newark International Airport at a total project cost estimated at \$3.6 million and authorized the Executive Director to award Contract NIA-110.030 to the lowest qualified bidder subject to the approval of the Committee on Construction. Subsequently, detailed contract design and in-depth analyses of field conditions resulted in significant required increases in certain areas of construction; additional signing was required and added to the project scope; and additional premium time cost required to maintain an extremely tight completion schedule so as to complete in time for anticipated 1987 traffic demands was included in the project. Based on low bids received for Contract NIA-110.030 and the estimated cost of probable follow-on work, the project authorization required amendment from the previous value of \$3.6 million to \$5.6 million.

Contract NIA-110.030 provides for the construction of an additional express lane in the Central Terminal Area and other related modifications to provide additional capacity to the roadway system. The contract also provides for removal of unsuitable materials to be performed on a net cost basis presently estimated at roughly \$40,000.

The contract includes a provision that the bidder use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

The entire contract is eligible for Federal funds under the Airport Improvement Program.

This contract was publicly advertised and the following bids were received on October 10, 1986:

	Classified Work	Unclassified Work	Estimated Total Amount
Bellezza Company, Inc. South Kearny, New Jersey	\$ 48,512	\$3,509,629	\$3,558,141
Crisdel Group, Inc. South Plainfield, New Jersey	\$ 41,184	\$4,252,488	\$4,293,672
Palmer Constructing, Inc. Jersey City, New Jersey	\$119,730	\$4,500,000	\$4,619,730
Onorato Construction, Inc. Orange, New Jersey	\$ 39,630	\$4,855,191	\$4,894,821
Schiavone Construction Co. Secaucus, New Jersey	\$ 60,900	\$4,892,000	\$4,952,900
Engineer's Estimate			\$4,200,000

(Board - 10/16/86)

Bellezza Company, Inc. submitted the lowest bid and was determined by the Chief Engineer to be qualified to perform the contract.

It is anticipated that an additional contract(s) at an estimated cost of \$300,000 may be required for the installation of traffic signals and related improvements at several intersections. This work was initially expected to be included in Contract NIA-110.030 but was removed in order to maintain the project schedule and its later schedule will not jeopardize the effectiveness of the improvements to be constructed under that contract.

The Board, at its meeting on January 10, 1985, authorized the Chief Engineer to retain professional firms to prepare contract documents and perform post-award contract work for Port Authority projects. Pursuant to this authorization, on February 21, 1986 the Chief Engineer entered into an agreement with VEP Associates, Inc., to prepare Contract NIA-110.030 at a compensation estimated at \$216,000. Under this authorization, payments were subsequently increased by the Chief Engineer to \$235,000 on March 19, 1986, to \$250,000 on August 11, 1986 and to \$286,000 on August 14, 1986 to provide for the required changes in the construction and project scope. To provide for additional changes in project scope and for increased involvement during the construction phase, it is recommended that compensation payable to VEP Associates, Inc., be increased from \$286,000 to an amount not to exceed \$400,000.

It was therefore recommended that the Board authorize:

1. a. an amendment to the project authorization for the construction of interim roadway improvements within the Central Terminal Area at Newark International Airport which increases the project authorization from a total project cost estimated at approximately \$3.6 million to approximately \$5.6 million including payments to contractors, an allowance for extra work, and engineering, administrative and financing expenses;

2. b. the award of Contract NIA-110.030 to Bellezza Company, Inc., the low bidder, at its bid price in the amount of \$3,558,141 exclusive of an authorization for extra work in the amount of \$360,000 and a provision for net cost work;

3. c. the Executive Director to award additional publicly advertised contract(s) for work complementary to that under Contract NIA-110.030 to the lowest qualified bidder(s), who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the bid(s) accepted, or to reject all bids; and

2. an increase in authorized payments to VEP Associates, Inc., from \$286,000 to an amount not to exceed \$400,000.

(Board - 10/16/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes an amendment to the project authorization for the construction of interim roadway improvements within the Central Terminal Area at Newark International Airport which increases the project authorization from a total project cost estimated at approximately \$3.6 million to approximately \$5.6 million including payments to contractors, an allowance for extra work, and engineering, administrative and financing expenses; the Executive Director to award Contract NIA-110.030 to Bellezza Company, Inc., the low bidder, at its bid price in the amount of \$3,558,141, exclusive of an authorization for extra work in the amount of \$360,000 and a provision for net cost work; the Executive Director in addition to any powers he may have with respect to such contract(s) under the By-Laws, to award additional publicly advertised contract(s) for work complementary to that under Contract NIA-110.030 to the lowest qualified bidder(s), who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the bid(s) accepted, or to reject all bids; and the form of said contract(s) to be subject to the approval of General Counsel or his authorized representative; and an increase in authorized payments to VEP Associates, Inc., from \$286,000 to an amount not to exceed \$400,000.

(Board - 10/16/86)

Port Newark - Naporano Iron and Metal Co. - New Lease

It was reported that Naporano Iron and Metal Co. is primarily a processor and exporter of scrap metal and has been a tenant at Port Newark since 1983. Presently, it has a work force of 300, of which 73% are minorities. The company is currently leasing approximately 5½ acres at three locations at Port Newark and pays approximately \$90,000 per year for its leased areas. Naporano has been expanding its capability to process scrap for export at its plant in the City of Newark. Additional acreage at Port Newark will allow Naporano to consolidate its export activities for a more efficient operation.

It is proposed that the Port Authority enter into a lease with Naporano for approximately nine upland acres adjacent to Berths 10 and 12 for a term of 20 years beginning on or about December 1, 1986 at an annual rental of \$196,695 plus an additional rent based on the amount of scrap metal discharged to or from Port Newark per year. The base rental will escalate every 2½ years by one-half of the increase in the Consumer Price Index, with each increase being no less than 5% and no more than 10%. Naporano will have a preferential right to berth one vessel at Berths 10 and 12 and will have the right and obligation to perform certain construction improvements to the upland including paving, utility and other related improvements necessary, with a lump-sum reimbursement by the Port Authority of up to \$150,000.

The lease will provide the Port Authority and Naporano each with a conditional right to terminate the letting at the end of the fifth, tenth and fifteenth years. The Port Authority can terminate the lease if Naporano does not accept the Port Authority's offer to relocate Naporano to alternative comparable space. If Naporano is relocated, the Port Authority must pay Naporano up to \$50,000 for making improvements. Naporano can terminate the lease upon payment of \$150,000, \$125,000 and \$100,000 at the end of the fifth, tenth, and fifteenth years, respectively.

The lease also provides that if the passage of an Export Control Regulation limits the tonnage exported by the lessee, the Port Authority will discuss possible surrender of a portion of the premises subject to future Board approval.

It was therefore recommended that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into a lease with Naporano Iron and Metal Co. on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into a lease with Naporano Iron and Metal Co. at Port Newark for approximately nine acres of upland adjacent to Berths 10 and 12 and a preferential right to berth one vessel at Berths 10 and 12 on the terms and conditions set forth above; and it is further

RESOLVED, that the form of the lease be subject to the approval of the General Counsel or his designated representative.

(Board - 10/16/86)

Air Cargo Fast Flow - Extension of the Operation of the Automated Cargo Clearance Enforcement Processing Technique System (ACCEPT); Extension of Pan American Airways Professional Services

It was reported that the Automated Cargo Clearance Enforcement Processing Technique (ACCEPT), a regional system intended to expedite the flow of import cargo by identifying low-risk shipments that may be released without physical examination, was authorized for design, implementation and operation by the August 9, 1984 Committee on Operations, and the September 13, 1984 Board, at an estimated total expenditure of \$1,513,000. ACCEPT was to operate for approximately eighteen months after actual start-up (which occurred in the Spring of 1985), and be phased out with the implementation of the larger, more comprehensive automated cargo clearance and release system known as Air Cargo Fast Flow (ACFF), with its link to the national Automated Commercial System (ACS) under development by U.S. Customs.

At this point both ACFF and ACS are projected to become operational during 1987. Therefore, at a recent meeting with U.S. Customs Commissioner vonRaab, he requested that the Port Authority extend the operation of regional ACCEPT to ensure smooth transition to the national ACS and the Port Authority's ACFF system.

In addition, via two separate authorizations, one on August 1, 1983 by the Executive Director, and the second on March 8, 1984 by the Committee on Operations, the Port Authority entered into an agreement with Pan American World Airways to obtain the services of Pan Am technical experts to assist the Port Authority in various elements related to the development of ACFF functional requirements specifications, preparation of the associated ACFF Request for Proposals, and other technical support, for a total compensation estimated at \$35,000. Said funds are now nearly expended. Continued involvement of Pan American staff expertise in the review of the highly technical design documents being prepared by our consultant for ACFF, Arthur Andersen & Co., is deemed essential by staff.

Therefore, authorization is requested to extend the operational period of regional ACCEPT for up to 24 months within previously authorized expenditures and to make additional payments of up to approximately \$50,000 under the aforementioned agreement with Pan American to provide technical support.

It was therefore recommended that the Board authorize:

1. the extension of the operations period for up to 24 months for the Automated Cargo Clearance Enforcement Processing Technique (ACCEPT), and the Executive Director to extend all associated contracts and agreements required to support ACCEPT, all within the previously authorized funds for ACCEPT; and
2. additional payment under an agreement between Pan American World Airways and the Port Authority of up to approximately \$50,000 for Pan American to continue providing technical support during the design of Air Cargo Fast Flow (ACFF), funds for said payments having been included within the previously authorized expenditures for ACFF.

(Board - 10/16/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes: (1) the extension of the operations period of up to 24 months for the Automated Cargo Clearance Enforcement Processing Technique (ACCEPT), and the Executive Director to extend all associated contracts and agreements required to support ACCEPT, all within the previously authorized funds for ACCEPT; and (2) additional payment under an existing agreement between Pan American World Airways and the Port Authority of up to approximately \$50,000 for Pan American to continue providing technical support during the design of Air Cargo Fast Flow (ACFF), funds for said payments having been included within the previously authorized expenditures for ACFF.

(Board - 10/16/86)

Port Authority Bus Terminal - Federal Express Corporation - New Lease

It was reported that Federal Express Corporation is a major provider of world-wide delivery services. Tentative agreement has been reached with Federal Express for the leasing of premises in the Port Authority Bus Terminal for the operation of a document and package express delivery service facility. The premises to be leased consist of 1,200 square feet of space on the second floor of the South Wing that the tenant will receive in its "as is" condition. The tenant will undertake, at its sole cost, all space preparation work necessary to prepare the premises for its operations, which includes but is not limited to new flooring, wall surfaces, ceiling, duct work, lighting, identification signing, HVAC and a smoke purge system. The letting will be for a term expiring on the day preceding the tenth anniversary of the day payment of rental commences.

Payment of rental will commence no later than 120 days after the space has been made available to the lessee for space preparation work. The tenant will pay an annual basic rental at the rate of \$72,000 for the first five years and at the rate of \$80,000 thereafter. In addition, the tenant will pay for chilled water for air conditioning purposes at a rate of \$3.17 per square foot, subject to annual escalation in accordance with the Consumer Price Index. The tenant will also pay separately for metered electricity.

The Port Authority shall have the right to terminate the letting without cause on six months' prior written notice in which event the Port Authority would reimburse the tenant for the unamortized portion of the space preparation costs described herein, subject to a limitation on such costs in the amount of \$100,000. A security deposit will not be required.

This office will accept both documents and packages. The tenant has the right to place an antenna on the roof of the Bus Terminal if, in the future, it elects to offer electronic facsimile transmission services. This service is expected to benefit both the terminal's commuting population and the business community in the area.

It was therefore recommended that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into a lease agreement with Federal Express Corporation on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorized the Executive Director, for and on behalf of the Port Authority, to enter into a ten-year lease with Federal Express Corporation at the Port Authority Bus Terminal for the operation of a document and package express delivery service, on the terms and conditions set forth herein; and be it further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 10/16/86)

New York City Passenger Ship Terminal - Piers 40, 88, 90, 92 and 94 - Award of Operating, Cleaning and Maintenance Contract

It was reported that the Board, at its meeting on May 13, 1971, approved the terms and conditions under which the Port Authority would participate in the construction and operation of a passenger ship terminal under an agreement with the City of New York. The agreement authorized the expenditure of funds by the Port Authority for the operation, cleaning and maintenance of the terminal. Proposals for the furnishing of the supervision, labor, equipment and certain materials and supplies necessary to operate, clean and maintain the New York City Passenger Ship Terminal were publicly advertised and on August 28, 1986 the following bids were received:

Temco Service Industries, Inc., New York, New York	\$4,220,134
Hispanic Maintenance Svcs., Inc., White Plains, New York	\$4,689,218
International Service System, Inc., New York, New York	\$4,994,265
STAFF ESTIMATE	\$4,263,102

Urban Cleaning Contractors, Inc., Pelham Manor, New York, submitted an incomplete bid which was deemed unresponsive.

The low bidder, Temco Service Industries, Inc., is qualified to carry out the requirements of this contract. Temco was awarded a similar contract for the New York City Passenger Ship Terminal in 1974, when the facility opened, and again in 1981. Each time, the contract was competitively bid.

It was therefore recommended that the Board authorize the Executive Director to award a contract for the operating, cleaning and maintenance of Piers 40, 88, 90, 92 and 94 to Temco Service Industries, Inc. on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to: (1) award a three-year contract, effective November 1, 1986, for the operating, cleaning and maintenance of Piers 40, 88, 90, 92 and 94 at the New York City Passenger Ship Terminal to Temco Service Industries, Inc., the lowest bidder, at its total estimated bid price of \$4,220,134, exclusive of an extra work allowance of \$422,013, subject to annual escalation; and (2) extend the contract for one additional two-year period under the same terms and conditions; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 10/16/86)

Port Authority Bus Terminal - Improvement and Modernization - South Wing - Operations and Maintenance Facility - Contract BT-190.056 - Award

It was reported that the Board, at its meeting on August 13, 1981, authorized a new project for additional items of work to improve and modernize the Port Authority Bus Terminal, at an estimated cost of \$36.5 million. The award of Contract BT-190.056 falls within the scope of this authorization.

Contract BT-190.056 provides for the modernization and renovation of approximately 50,000 square feet of basement area of the South Wing of the Port Authority Bus Terminal. The basement was originally constructed primarily as a storage and mechanical equipment room area; however, over the years, office, locker, kitchen and employee work areas were constructed along with associated mechanical support systems to serve these areas. The modernization and rehabilitation of the basement area is intended to create a more comfortable working environment for tenant and Port Authority employees, as well as to upgrade the storage and mechanical support functions. The contract also provides for repairs and adjustments to certain existing sprinkler fire protection piping systems to be performed on a net cost basis, presently estimated at roughly \$15,000.

The contract includes a provision that the contractor will meet a goal of Minority Business Enterprises participation of 4% for firms owned and controlled by minorities.

The contract was publicly advertised and bids were received on September 23, 1986. Subsequent to the receipt of bids, staff was advised by insurance underwriters that the insurance to be provided by the Port Authority under the contract pursuant to the newly placed Owner Controlled Insurance Program does not include coverage for certain risks. It may be necessary, therefore, for the contractor to obtain coverage for such risks. Pending a determination of the best method for resolving the problem and the bidding of a revised contract, if necessary, authorization to award is being requested at this time, so as not to unduly delay performance of the work.

It was therefore recommended that the Board authorize the Executive Director, in addition to any powers he may have with respect to such contract under the By-Laws, either to award Contract BT-190.056, the Port Authority Bus Terminal, Improvement and Modernization, South Wing, Operations and Maintenance Facility, or a revised version of Contract BT-190.056, in the case of either contract to the lowest bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, to order extra work up to an amount of 10% of the bid accepted and to order net cost work; or to reject all bids on either or both contracts.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, in addition to any powers he may have with respect to such contract under the By-Laws, either to award Contract BT-190.056, the Port Authority Bus Terminal, Improvement and Modernization, South Wing, Operations and Maintenance Facility, or a revised version of Contract BT-190.056, in the case of either contract to the lowest bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable, to order extra work up to an amount of 10% of the bid accepted and to order net cost work; or to reject all bids on either or both contracts.

(Board - 10/16/86)

George Washington Bridge - Rehabilitation of LX Ramps - Contract GWB-217 - Award

It was reported that Contract GWB-217 provides for the installation of three additional steel girders underneath each span of Ramps LX1 and LX2. The LX Ramps, constructed around 1960, connect the lower level of the George Washington Bridge with the Trans-Manhattan Expressway in New York. The girders will strengthen the decks of the ramps and will make it possible, under a future contract presently scheduled to start in the spring of 1988, to replace the concrete deck slab one lane at a time, thereby permitting traffic to be maintained in one lane of each two-lane ramp. Without the additional girders the ramps would have to be completely closed to traffic for a period of up to two years to permit replacement of the concrete decks. Appropriate authorization, as required, will be sought for the contract to replace the concrete decks of the LX Ramps. In addition, Contract GWB-217 provides for maintenance of traffic and work area protection to be performed on a net cost basis presently estimated at roughly \$200,000.

A portion of the work under this contract will be performed during nighttime hours so as to minimize interference with traffic and essential facility operations.

The contract was publicly advertised and the following bids were received on September 23, 1986:

	Lump Sum Amount
USX Corporation Iselin, New Jersey	\$2,059,000
Karl Koch Erecting Co., Inc. Carteret, New Jersey	2,148,000
A.J. Pegno Construction Corp. College Point, New York	2,150,350
B & B Welding, Inc. College Point, New York	2,800,000
Bellezza Company, Inc. South Kearny, New Jersey	2,849,876
The Hallen Construction Co., Inc. Island Park, New York	2,864,000
Jana Construction Co., Inc. and Car-Mar Construction Corp. a joint venture Scarsdale, New York	3,233,000
ENGINEER'S ESTIMATE	\$2,500,000

(Board - 10/16/86)

USX Corporation submitted the lowest bid and was determined by the Chief Engineer to be qualified to perform the contract.

It was therefore recommended that the Board authorize the Executive Director to award Contract GWB-217, George Washington Bridge, Repairs to LX Ramps, to USX Corporation (formerly United States Steel Corporation), the low bidder, at its bid price in the amount of \$2,059,000, to order extra work up to the amount of \$210,000 and to order net cost work.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract GWB-217, George Washington Bridge, Repairs to LX Ramps, to USX Corporation (formerly United States Steel Corporation), the low bidder, at its bid price in the amount of \$2,059,000, to order extra work up to the amount of \$210,000 and to order net cost work.

(Board - 10/16/86)

The World Trade Department - International Trade Program - Authorization to Accept a Grant for Investment and Export Promotion Services from the Investment Promotion Council - Government of the Dominican Republic

It was reported that in June 1986 the Port Authority conducted a trade mission to the Dominican Republic in conjunction with the Greater Newark Chamber of Commerce. The Chamber, subsequent to participation in the trade mission, suggested that the Port Authority consider applying for a grant offered by the Investment Promotion Council (IPC) of the Government of the Dominican Republic to develop programs to promote investment and export opportunities. The IPC has received a grant from the United States Agency for International Development to strengthen the capacity of the Dominican Republic to compete in the international economy.

The International Market Research Division, through its International Business Development Group (IBDG), provides customized market development assistance to business and governments. The Port Authority would provide IPC with technical assistance in four major areas: improvements in the business climate, data collection, export development services, and investment promotion and investor services. Services under the grant will be provided by existing Port Authority staff and through agreements with associated firms which include Checci & Co., Inc., specialist in international development; IDEA, Inc., a specialist in non-traditional manufacturing and service sector export and investment promotion; the Greater Newark Chamber of Commerce, which has experience in promoting investments in the Dominican Republic; and COPADESA, a Dominican firm that will assist in the area of regulatory reform.

Staff has determined that acceptance of this grant from the IPC would help to further the goals of the International Trade Program and its activities. The grant would pay for the cost of providing assistance plus a fee to the Port Authority for its services.

It was therefore recommended that the Board authorize the Executive Director to accept a grant in the amount of approximately \$2 million from the Investment Promotion Council for the provision by the Port Authority, through the International Market Research Division, of technical assistance for the development of investment and export promotion services and to enter into appropriate agreements with third parties in connection with such grant.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to accept a grant in the amount of approximately \$2 million from the Investment Promotion Council for the provision by the Port Authority, through the International Market Research Division, of technical assistance for the development of investment and export promotion services and to enter into appropriate agreements with third parties in connection with such grant; and it is further

RESOLVED, that the form of said agreement be subject to approval by General Counsel or his authorized representative.

(Board - 10/16/86)

The World Trade Department - International Trade Program - Authorization to Accept a Grant from The New York State Department of Agriculture and Markets Under the Agricultural Research and Development Grants Program

It was reported that the New York State Department of Agriculture and Markets requested XPORT, the Port Authority Trading Company, to develop an agribusiness export initiative to assist New York State companies in expanding their markets, diversifying production and improving their competitive position. XPORT was invited to submit a grant application under the Agricultural Research and Development Grants Program to financially assist in this effort. One of the five sectors targeted for export development by XPORT is food and agricultural products. The New York State agribusiness export initiative is consistent with XPORT's current strategy of fortifying its export expansion program.

XPORT will assist New York State in demonstrating the feasibility of export expansion throughout New York's agribusiness industries by using improved marketing techniques, new product development and innovative organizational arrangements and services. XPORT is committed to encouraging export of regional foods. XPORT has sold New York/New Jersey agricultural products in Japan, Europe, Hong Kong, Singapore, the Caribbean and other regions. It is anticipated that this grant will result in additional market promotion and development in Japan, the Middle East, the Caribbean and other regions identified as strong markets for these products. The New York Agricultural Research and Development grant would allow XPORT to substantially expand its work on behalf of New York State food and agricultural producers.

It was therefore recommended that the Board authorize the Executive Director to accept a grant in the amount of \$25,000 from the New York State Department of Agriculture and Markets under its Agricultural Research and Development Grants Program.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to accept a grant in the amount of \$25,000 from the New York State Department of Agriculture and Markets under its Agricultural Research and Development Grants Program.

(Board - 10/16/86)

Public Safety Department - Retention of Professional Management Services - Kirkwood Consulting Associates, Inc.

It was reported that, in order to establish better working relationships and to permit more effective communications, both members of the uniformed police force and senior police management staff must join together and build upon areas of common concern to create mutually beneficial solutions to identified problems.

In light of the current labor-management climate within police ranks, staff has re-examined traditional approaches to solving workplace problems. It is felt that a participative labor-management approach, which has proven to be very successful in other areas, would foster better working relationships and serve to improve the quality of work life within the police ranks. Utilizing a neutral third party to introduce such change should assure that a mutually agreeable process is established. The recommended approach has been reviewed with each of the four police unions.

For the past several months, staff of the Public Safety Department, assisted by the Personnel Department, have interviewed seven outside professional management service firms, seeking to identify that firm which has demonstrated competency in this field and has the right combination of labor relations/organization development/conflict management experience and skills.

Of these, Kirkwood Consulting Associates, Inc., Pittsburgh, Pennsylvania, has been selected as the best qualified firm to undertake this assignment. Mr. John Kirkwood, President, has an excellent background in labor-management relations, as demonstrated by his relevant industrial experience. An examination of his references reveals an expertise, exceptional experience and a history of successful resolution of labor-management problems.

The first phase of this initiative consisted of a \$10,000 authorization approved by the Executive Director on July 14, 1986, to engage Kirkwood Consulting Associates, Inc., to assess the feasibility of establishing a labor-management participative program between members of the uniformed police force and senior police managerial staff. This phase has now been completed.

As a result of this assessment, the Public Safety Department has determined that a full-scale cooperative effort directed by Kirkwood will help minimize barriers that now adversely affect attitudes and relationships between members of the uniformed police force and senior police managerial staff.

Under the proposed authorization, Kirkwood Consulting Associates, Inc., will create voluntary teams comprised of members of the uniformed police force and senior police managerial staff who will be trained in problem-solving. The first series of workshops will be held at Newark International Airport where three to four teams will train for one to three days. The selection of manageable problem areas, investigation of possible solutions, monitoring of results and planning of additional follow-up activity will complete this phase of the program. This process is based on

(Board - 10/16/86)

the concept that involving employees in problem identification and solution will impact positively on the quality of work life and attitudes toward the organization. It is estimated that this second phase will require approximately nine weeks to implement. Kirkwood's compensation will be approximately \$75,000, with additional reimbursement for Kirkwood and members of his staff of about \$25,000 for necessary out-of-pocket expenses.

The third phase will involve monitoring of team activity, presentation of recommended solutions to Port Authority management, and the development of appropriate in-house expertise to enable Port Authority personnel to expand the process to other facilities. It is estimated that this third phase will require approximately four weeks to implement. Kirkwood's compensation will be approximately \$35,000 with additional reimbursement for Kirkwood and members of his staff of about \$15,000 for necessary out-of-pocket expenses.

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement with Kirkwood Consulting Associates, Inc., on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into an agreement with Kirkwood Consulting Associates, Inc., for the performance of professional management services to implement a Comprehensive Labor Management Participative Program between the members of the uniformed police force and senior police managerial staff in an amount not to exceed \$150,000; and it is further

RESOLVED, that the form of said agreement be subject to approval by General Counsel or his authorized representative.

Finance Department - Authorization of Investment Contracts

It was reported that to assist in the Port Authority's debt management, staff recommended that the Board authorize the Executive Director, from time to time, to use operating funds of the Port Authority in transactions involving United States Treasury and other, municipal securities. This program would be undertaken with the assistance of Prudential-Bache Securities Inc., within the amounts recommended, with the intention of using the gain, if any, on futures contract transactions on the Chicago Board of Trade (CBOT) as a revenue enhancement reducing the financial effect of refunding, if appropriate, at a price of 103%, the \$100 million Consolidated Bonds, Forty-ninth Series, Due 2017, 10 $\frac{1}{4}$ %, at October 1, 1987, the first call date for such Bonds. Similarly, losses, if any, on such futures contract transactions would in effect increase the refunding costs, but would most likely be more than offset by the effect of lower interest rates at the time of sale of the refunding bonds.

The program, which would be the subject of monthly status reports to the Committee on Finance, is to be limited to futures contracts for the sale or purchase of United States Treasury securities and of municipal securities (municipal bond futures contracts based on a municipal bond index maintained by the CBOT), in a total principal amount of such contracts not to exceed 650 contracts (each contract is for a principal amount of \$100,000) outstanding at any one time, for sales and the same for purchases.

In essence, these transactions seek to lock in, to the extent practical, current interest rates for refunding the Forty-ninth Series, in effect reducing the interest rate risk applicable to the bonds to be issued to refund the Forty-ninth Series during the period between the date of inception of these transactions and the first date on which the Port Authority may sell, consistent with provisions of Federal income tax law, bonds to refund Consolidated Bonds, Forty-ninth Series.

The vast majority of futures contracts transactions take place on the CBOT, and are subject to its rules and regulations. The standardization of the contracts and the magnitude of trading on the CBOT will facilitate the transactions contemplated by the program.

In order to accomplish this program, and consistent with the rules of the CBOT, a margin (or transaction) account would be established with Prudential-Bache in the initial amount of approximately \$2 million, utilizing operating funds cash and/or United States Treasury Bills attributable thereto; earnings on such amounts would also accrue to the Port Authority. While futures contracts are in place, there may be a daily cash payment (which would be held in the account for periodic distribution to the Port Authority upon its request) or collection to reflect losses or gains in value (as if the contracts were closed out daily) on a "mark-to-market" basis. While the daily call amount is limited by CBOT rules, there is no limitation on the aggregate amounts which may be required to be paid or collected while futures contracts are outstanding.

Given the complexity and sophistication of these techniques, it is essential that any investment banking firm which assists the Port Authority in this effort should have substantial expertise. Prudential-Bache Securities Inc. is a member of the Chicago Board of Trade and will serve as agent and will provide market information and trading recommendations for these transactions with a unit within its Public Finance Department serving public clients (in other firms, transactions are generally undertaken through the commodities departments). Prudential-Bache is currently working with municipalities in Illinois, Georgia and California to develop similar programs. Prudential-Bache's compensation for each futures contract transaction is considered reasonable and will be monitored by staff.

(Board - 10/16/86)

It was therefore recommended that the Board authorize the Executive Director to:

1. enter into futures contracts for the sale of United States Treasury and other, municipal securities on the Chicago Board of Trade (CBOT) in a total aggregate amount not to exceed 650 contracts (each contract is for a principal amount of \$100,000) outstanding at any one time, with such contracts and the delivery of any such securities by Prudential-Bache Securities Inc. on behalf of the Port Authority meeting the requirements of the CBOT;

2. enter into futures contracts for the purchase of United States Treasury and other, municipal securities on the CBOT in a total aggregate amount not to exceed 650 contracts (each contract is for a principal amount of \$100,000) outstanding at any one time, with such contracts and the receipt of any such securities by Prudential-Bache Securities Inc. on behalf of the Port Authority meeting the requirements of the CBOT;

3. enter into an agreement or agreements with Prudential-Bache Securities Inc. to permit Prudential-Bache to sell or to purchase such futures contracts on the CBOT, in accordance with the rules and regulations of the CBOT, on behalf of the Port Authority, such agreement or agreements to provide for the establishment and maintenance of a margin (or transaction) account with Prudential-Bache and for the use of operating funds of the Port Authority in an amount sufficient to permit the sale or purchase of the authorized amount of such futures contracts and the maintenance of outstanding futures contracts; and

4. take such other actions as may be necessary or desirable to effectuate the program described to the Board.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, be and he hereby is authorized for and on behalf of the Port Authority, to enter into futures contracts for the sale of United States Treasury and other, municipal, securities on the Chicago Board of Trade (CBOT) in a total aggregate amount not to exceed 650 contracts (each contract is for a principal amount of \$100,000) outstanding at any one time, with such contracts and the delivery of any such securities by Prudential-Bache Securities Inc. on behalf of the Port Authority meeting the requirements of the CBOT; and it is further

RESOLVED, that the Executive Director, be and he hereby is authorized for and on behalf of the Port Authority, to enter into futures contracts for the purchase of United States Treasury and other, municipal, securities on the CBOT in a total aggregate amount not to exceed 650 contracts (each contract is for a principal amount of \$100,000) outstanding at any one time, with such contracts and the receipt of any such securities by Prudential-Bache Securities Inc. on behalf of the Port Authority meeting the requirements of the CBOT; and it is further

(Board - 10/16/86)

RESOLVED, that the Executive Director, be and he hereby is authorized for and on behalf of the Port Authority, to enter into an agreement or agreements with Prudential-Bache Securities Inc. to permit Prudential-Bache to sell or to purchase such futures contracts on the CBOT, in accordance with the rules and regulations of the CBOT, on behalf of the Port Authority, such agreement or agreements to provide for the establishment and maintenance of a margin (or transaction) account with Prudential-Bache and for the use of operating funds of the Port Authority in an amount sufficient to permit the sale or purchase of the authorized amount of such futures contracts and the maintenance of outstanding futures contracts; and it is further

RESOLVED, that the Executive Director, be and he hereby is authorized for and on behalf of the Port Authority, to take such other actions as may be necessary or desirable to effectuate the program described to the Board; and it is further

RESOLVED, that the form of any such contracts or agreements be subject to the approval of General Counsel or his authorized representative.

(Board - 10/16/86)

Kennedy International Airport - Knott Hotels Corporation - Hotel Lease Extension and Renovation

It was reported to the Board that in March 1976 the Knott Hotel chain, the operator of the International Hotel at Kennedy International Airport, was purchased by Trusthouse Forte, a British company representing one of the largest hotel chains in the world. In 1984 the hotel's name was changed to the Viscount International reflecting that it had joined the lessee's Viscount Division comprised of upscale North American hotels. In early 1985 the lessee requested a lease extension and renegotiation of its rental arrangement on a net revenue-sharing rather than gross receipts basis in return for which the lessee proposed to invest \$6 million in substantial capital improvements to upgrade the airport hotel. Concerns were raised not only about a net revenue approach but about past occupancy figures and failure to market the hotel properly and on a cost-efficient basis. While staff analyzed the hotel's financial statements and expenditures, alternatives other than the lessee's proposal were also explored. After a review of all of the Port Authority's options, it was decided that the lessee has shown its commitment to improve the situation by putting a new management team in place. Considerable progress has been made in improving its overall operation, including the hotel's occupancy figures. Accordingly, staff began to negotiate with the lessee in April 1986 and negotiations are now substantially complete.

The original 320-room hotel was built in 1958 and expanded to 520 rooms in 1961. Consequently, the age of the physical plant requires that a considerable amount of additional capital be spent on the hotel to renovate and upgrade the premises. In light of the Port Authority's commitment to improving airport services and ensuring that it maintains its position as the premier aerial gateway to the United States, such construction is essential. Moreover, it is projected that the investment is essential to enable the Viscount to compete effectively with the other off-airport hotels as well as new hotels in New York City and Long Island.

Trusthouse Forte has agreed to make a good faith effort to use Minority Business Enterprises (MBE) and Women-owned Business Enterprises (WBE) and to employ women and minorities in construction.

Under the new agreement, the term of the letting would be extended for 20 years from completion of the construction or to October 31, 2008, whichever first occurs. The lessee will be obligated to spend a minimum of \$11 million for a major upgrading and renovating of the hotel. It is anticipated that the investment will represent a number of improvements necessary to extend the productive life of this Port Authority facility and will provide the Port Authority with a revenue stream appreciably in excess of what would be engendered if this investment were not to be made. The Port Authority will give the lessee an annual credit against its percentage rental obligation if the amount of percentage rental payable by the lessee (before application of the credit) meets the targeted percentage rental amount for each annual period to be set forth in the lease. In no event will the credit exceed \$500,000 or reduce the basic rent payment to the Port Authority. As an incentive, the credit is to be proportionately increased if said percentage rental amount payable by the lessee (before application of the credit) exceeds the targeted amount. Conversely the credit amount will be proportionately decreased if the percentage rental amount

(Board - 10/16/86)

falls below the said targeted amount. The lessee will not be entitled to carry over any part of the said credit not used in a prior annual period. The Port Authority is in effect allowing approximately one-half of the lessee's annual debt service on the capital portion of the improvements to be eligible for the percentage rental credits. Until November 1, 1995 the rental terms remain the same as under the current lease with an annual rental consisting of a basic rental of \$660,000 against a percentage rental of 15% on rooms, 10% on liquor, 5% on food and non-alcoholic beverages and 6% on banquets. The basic rental on November 1, 1995 will increase to \$1.4 million, on November 1, 2000 it will increase to \$1.7 million, and on November 1, 2005 the basic rental will be \$2.25 million.

The Port Authority will have the right to terminate the agreement commencing in 1991 and at five-year intervals thereafter as provided in the lease if the average room occupancy level at the hotel for the three years prior to any termination date is below 65%. Any such termination would obligate the Port Authority to pay the lessee the straight-line unamortized portion of the lessee's capital investment in the hotel, which investment amount cannot exceed \$8 million for purposes of the buy-out calculation.

It was therefore recommended that the Executive Director be authorized, for and on behalf of the Port Authority, to enter into an agreement amending the lease with Knott Hotels Corporation at Kennedy International Airport on the terms set forth above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into an agreement with Knott Hotels Corporation providing for an extension of the existing lease agreement at Kennedy International Airport with a minimum investment by the lessee of \$11 million to renovate and upgrade the hotel and for an annual credit to the lessee against its percentage rental obligations on the terms set forth above; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 10/16/86)

Household Travel Survey - New Jersey Hudson River Corridor

It was reported that in the past ten years, Hudson County has experienced significant changes in economic, population, housing, land use and travel patterns. These comprehensive and interlocking changes have greatly affected the trans-Hudson transportation facilities and regional planning for port and economic development.

The Port Authority's trans-Hudson monitoring, for example, has detected significant growth in trans-Hudson travel from Hudson County. Jersey City neighborhoods in the vicinity of PATH showed a 60% increase in PATH traffic to New York City between 1980 and 1983. Hoboken has generated about 1,000 new bus trips to the Port Authority Bus Terminal since 1980, a 300% increase. All of this appears to be occurring with little or no population increase.

The proximity of Hudson County to the Manhattan job market and impending waterfront development adds to the likelihood that these trends will continue and Hudson County could begin to approach the New York City outer boroughs' affinity to the Central Business District (CBD) as a work place. Historically, about 15% of Hudson County's labor force has worked in the Manhattan CBD. This compares to the outer boroughs of New York City where 40% of the labor force works in the CBD.

The Planning and Development Department is frequently asked by other Port Authority departments and divisions to develop estimates of transportation facility usage, or to assess the impacts of specific projects and developments in Hudson County. The Department currently lacks reliable measures of current and emerging travel patterns in this critical part of the trans-Hudson market. For these reasons, the changes in travel behavior and the underlying economic and land use factors within Hudson County are a subject of continuing significant interest for the Port Authority and the Department has focused a portion of its research on this area. Funds have been set aside for professional services to assist in that effort.

An opportunity exists to obtain detailed survey data regarding the daily travel patterns of Hudson County residents through a NJDOT project. Barton-Aschman, which has done nearly all comparable recent data collections, is currently under contract to NJDOT to conduct a detailed household travel survey of about 1,500 households in the eleven northern New Jersey counties during the fall of 1986. About 10% of the basic northern New Jersey sample (or 150 households) will be Hudson County residents.

The Port Authority supplemental survey would be a "piggy-back" to the basic NJDOT survey. That survey is a "one-day travel diary" survey, administered with a combination of mail-out and telephone interviewing techniques. The information collected will be rich in detail, and the rigorous methods used to collect it will ensure a high degree of accuracy. A complete, one-day "travel diary" will be obtained for each member of households surveyed. The supplemental effort would:

expand the number of Hudson County households surveyed to about 800 in order to obtain a more statistically reliable representative sample, as well as to focus on special

(Board - 10/16/86)

population groups and residential neighborhoods; and

add questions to the basic survey for certain information relevant to the study of Hudson County residential and travel pattern changes.

The daily travel pattern information collected will be analyzed to obtain a timely understanding of the number of trips generated by households of different types, their origin-destination patterns, transportation mode usage and comparability to other northern New Jersey data. Differences between new and old population groups, among different neighborhoods in Hudson County, as well as between Hudson and other counties in northern New Jersey, will be examined. The transportation impacts of changing demographics, residential development trends, and transportation proposals can then be much better understood.

The Port Authority's market research staff cannot do this survey because it is a unique and specialized type of survey. It involves compiling a lengthy diary of each household member sampled, and to do that lengthy telephone interviews have to be conducted with each member of a family. It would take staff an inordinate amount of time to become proficient with the survey, which would result in a prolonged and more costly survey. Also, no other professional service firm has the extensive experience with this form of data collection as does Barton-Aschman. By "piggy-backing" on the NJDOT survey, approximately \$30,000 would be saved over an alternative, independent survey conducted by the Port Authority at some later date.

A detailed scope of work, cost estimate and letter agreement for the supplemental work to be performed by NJDOT's consultant have been developed by the staffs of the two agencies. The agreement would provide for co-management of the consultant's work and the sharing of all data collected in the entire study.

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement with the NJDOT to purchase travel survey data to be collected in Hudson County during October-November 1986, through a supplemental component of NJDOT's Northern New Jersey Household Travel Survey, at an amount not to exceed \$60,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into an agreement with the New Jersey Department of Transportation (NJDOT) to purchase travel survey data to be collected in Hudson County during October-November 1986, through a supplemental component of NJDOT's Northern New Jersey Household Travel Survey, at an amount not to exceed \$60,000, the form of the agreement to be subject to the approval of General Counsel or his authorized representative.

(Board - 10/16/86)

Port Authority Bus Terminal - Downes of Manhattan, Inc. - Lease L-BT-216 - Proposed Amendment of Lease

It was reported that Downes of Manhattan, Inc. has been operating a luggage store on the Main Concourse of the South Wing of the Port Authority Bus Terminal under a lease entered into in 1958. At its meeting on April 12, 1984 the Board authorized the Port Authority to enter into an agreement with Downes of Manhattan, Inc. covering the letting of additional space on the Main Concourse of the Port Authority Bus Terminal adjacent to its original space, the letting of such additional space to commence not later than 120 days after the delivery of the space to the tenant for space preparation work therein, and an extension of the term of the letting of all of the space under the lease for a period ending on the tenth anniversary of the commencement of the letting of the additional space, with the tenant to pay a basic rental for all of the space under the lease at the rate of \$49,500 per year for the first five years following the commencement of the letting of the additional space and at the rate of \$56,740 per year thereafter against a percentage rental equivalent to 10% of all annual gross receipts arising from the tenant's operations in the combined space.

The planned expansion involved the removal of a party wall separating the original space from the additional space and the complete renovation of the additional space including replacement of the HVAC system and installation of a smoke purge system, with the Port Authority to contribute an amount not to exceed \$29,000 towards the cost of the renovation.

Downes submitted a tenant alteration application with plans for the expansion showing the removal of the party wall between the original space and the additional space. These plans were reviewed and approved by the Port Authority and construction was begun in mid-January 1986. The work schedule called for substantial completion of all of the renovations in the additional space, including the fabrication of fixtures for the combined space, before removal of the party wall. All of this work had been completed when it was discovered that, because of structural requirements, the party wall could not be removed or penetrated and the two spaces cannot be combined as planned.

Downes has invested considerable time, effort and funds in the design of the combined space, all of which will be a total loss if the expansion is abandoned. Preliminary loss estimates submitted by Downes exceed \$500,000.

In order to settle Downes' potential claim and to permit Downes to continue its operations in the terminal during the extended term of the letting, staff has proposed that a new storefront be constructed to permit circulation of customers between the original space and the additional space. This will increase the total square footage under the lease from 2,837 to 2,987. Downes has accepted this proposal and has agreed to redesign the additional space and the original space and to construct the new storefront as well as to redesign and refixture the interior of the combined spaces. The Port Authority will contribute \$150,000 towards the cost of these improvements.

(Board - 10/16/86)

Downes will commence operations in the additional space on November 1, 1986 with temporary fixtures while the new storefront and interior are being designed. Payment of the increased rentals will be postponed until November 1, 1986 to allow the temporary refixturing of the additional space. Basic rental will be abated for any areas in either the original space or the additional space which must be closed during the construction.

A rental credit in the amount of \$50,000 against the tenant's basic and percentage rental obligations will be granted to the tenant to compensate the tenant for its initial investment in the design and construction of the combined premises that is now no longer feasible, lost sales, and the cost of designing and constructing temporary interiors and fixtures.

The addition of non-prescription drug and pharmaceutical items, cosmetics and personal comfort items to the lines of merchandise now carried in the store will permit two distinct lines in each area. This will allow seasonal adjustments emphasizing one line over another in both the original space and the additional space.

It was therefore recommended that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into an amendment to the Port Authority's lease agreement with Downes of Manhattan, Inc. on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to amend an existing lease with Downes of Manhattan, Inc. covering premises at the Port Authority Bus Terminal to provide for: (a) Port Authority payment of \$150,000 towards the cost of redesigning and constructing the premises; (b) the tenant to receive a rent credit in the amount of \$50,000 against its basic and percentage rental obligations; (c) postponement of the date payment of increased rentals will commence to November 1, 1986; and (d) the addition of non-prescription drug and pharmaceutical items, cosmetics and personal comfort items to the items which the tenant is permitted to sell in the premises, on the terms and conditions set forth herein; and be it further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 10/16/86)

La Guardia Airport - Butler Aviation-La Guardia, Inc. - Revision and Extension of Fixed Base Operator Agreement and Reimbursement by the Port Authority of Construction Cost of Replacement General Aviation and Commuter Terminal

It was reported that the Board, at its August 14, 1986 meeting, authorized the Executive Director, on behalf of the Port Authority, to enter into a month-to-month Airport Lease with Pan American World Airways, Inc. covering certain premises in the Marine Air Terminal at LaGuardia Airport for the ticketing and handling of its passengers and for related gates and ramp area on which Pan American will construct a wing extension to the Marine Air Terminal.

As was described in the Information Item presented to the Board at its meeting on September 11, 1986, Pan American's operations at the Marine Air Terminal make it necessary to relocate, to remote areas, general aviation operations and aircraft parking and storage; to relocate commuter operations on the Marine Air Terminal Ramp to the south of Pan American's new gates and to relocate the airport fixed base operator's activities in a new terminal of some 4,000 square feet, which must be erected and ready on Pan American's opening date in the Marine Air Terminal, in October 1986. To meet that critical date, Butler Aviation agreed to immediately purchase and commence construction of a building of modular design if the Port Authority would agree to reimburse Butler for an amount originally estimated at \$600,000. Subsequently, Butler informed the Port Authority that due to rates required by the local labor market, contractor proposals have increased the project cost to \$700,000 including a 10% allowance for extra work, architectural and engineering fees and a 15% liquidated amount for administrative overheads. The Port Authority then agreed to reimburse Butler up to the \$700,000 project cost including all allowances and charges as noted above, with all costs to be recovered from the Fixed Base Operator (FBO) as indicated below. Approval is now requested for the Executive Director's action in having authorized this work.

Upon completion of the construction of the new terminal by Butler, Butler will vacate and surrender to the Port Authority certain of the space it now occupies in the Marine Air Terminal and the new terminal will be included under Butler's Fixed Base Operator Agreement at the airport at a rental rate based upon amortization of the payments made by the Port Authority to Butler for the construction of the terminal, including interest at an annual rate of 12¼%, over a fifteen-year period. Butler would have complete responsibility for operating, maintaining and insuring the new terminal.

Negotiations with Butler are now complete for an extension of the term of Butler's FBO Agreement for three years beyond its present expiration date of February 28, 1987, plus two one-year options to renew subject to mutual agreement of the parties. The Agreement would continue to be terminable by the Port Authority on 30 days' notice without cause. The extension of Butler's Agreement is deemed advisable because of a number of uncertainties affecting fixed base operations at the airport for the next several years, including the extent of the potential losses of fixed base operator business that is expected to occur due to the relocation and construction of general aviation and commuter activities.

(Board - 10/16/86)

Butler's relocated operations will now require the transporting of general aviation passengers to a remote aircraft parking area. This transportation service, which commenced on or about September 1, 1986, is estimated to cost approximately \$225,000 annually. Butler will be compensated by the Port Authority for its actual expense for this service from September 1, 1986 through the current agreement term which expires on February 28, 1987, by a monthly credit equal to its cost of operating this ground transportation service, not to exceed \$21,000.

Commencing March 1, 1987 and during the extension period, including the two option years, the percentage of gross receipts which Butler is obligated to pay to the Port Authority under the FBO Agreement, including monies from the sale and dispensing of fuel and oil but excluding fees and charges collected by Butler on behalf of the Port Authority, will be revised from 13.72% to 7.0%. This reduction reflects Butler's added expense of the aforesaid ground transportation service in lieu of the monthly credit, and also reflects the expected reduction in Butler's revenues due to a decrease in business activity. However, in recognition of the uncertainty of the future fixed base operator business activity at the airport, the revised percentage and gallonage fee will be subject to increases or decreases of up to 10% based upon fluctuations of Butler's gross receipts as compared to a base year ending June 30, 1986.

It was therefore recommended that the Executive Director be authorized, for and on behalf of the Port Authority, to enter into agreements with Butler Aviation-LaGuardia, Inc. at LaGuardia Airport, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board ratify the action of the Executive Director in agreeing to pay up to \$700,000 to Butler Aviation-LaGuardia, Inc. for the cost of constructing for LaGuardia Airport a new general aviation terminal as herein before set forth; and it is further

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement amending and extending the fixed base operator agreement with Butler Aviation-LaGuardia, Inc. at LaGuardia Airport, as herein before set forth; and it is further

RESOLVED, that the form of the foregoing agreements be subject to the approval of General Counsel or his designated representative.

Whereupon, the meeting was adjourned.

Secretary

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meetings of September 24 and October 16, 1986. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on November 13, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on November 13, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on November 13, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on November 13, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 11/13/86)

Industrial Development Program - Newark South Ward Industrial Park - Amendment to the Industrial Development Master Plan, Project Authorization, Municipal Agreement and Related Actions

It was reported that the bi-state legislation authorizing the effectuation of industrial development projects by the Port Authority provides that the Port Authority may modify or change any part of its master plan in the same form and manner provided for the adoption of the original plan. Preparation of the original master plan included a process of consultation with public and private persons and organizations including the governing body of each municipality in which industrial projects were proposed to be located, community planning boards and private real estate developers.

The original master plan also contained, among other things, the location of potential projects and facilities proposed to be developed, including to the maximum extent practicable, a general description thereof, the land use requirements necessary thereof, and estimates of the project costs, of project employment potential, of a schedule for commencement of each project, of the revenues to be derived by municipalities from each project or facility, and of a description of any proposed additional arrangements with municipalities.

An amendment to the master plan has been prepared and is attached hereto. It contains information similar to the foregoing with respect to a site in the South Ward of Newark, New Jersey, which is considered suitable for potential development.

The proposed Newark South Ward Industrial Park would be located on six blocks (Nos. 2705, 2706, 2707, 2712, 2713 and 2714) in the Clinton Hill section of the South Ward, City of Newark, New Jersey. This site is generally bounded by Bergen Street, Hawthorne Avenue, West Bigelow Street and Jelliff Street. Highway I-78 abuts its southeastern boundary and the site is one mile west of Newark International Airport. The site is currently a mixed-use area composed of occupied buildings, abandoned derelict buildings and vacant lots.

A 1985 market analysis prepared for the Port Authority by the Fantus Company states that "the shortage of quality industrial space and vacant industrial land in the Newark market has generated interest from industrial realtors and would also attract private developers of industrial space to the Newark South Ward Industrial Park." Also, Port Authority staff will work closely on the marketing efforts with the New Jersey Department of Commerce and Economic Development, National Association of Industrial and Office Parks and the New Jersey Economic Development Authority.

The Newark Economic Development Corporation, on behalf of the City of Newark, and the Port Authority have signed a Memorandum of Understanding (MOU) dated May 28, 1986 which, together with information in this Board item, will be the basis for the final agreement to be entered into for the development by the parties of the South Ward Industrial Park (Project Site). The major provisions of the MOU are:

— The Port Authority would advance project funds, as needed, for the necessary property acquisition, demolition of the existing structures, relocation of existing tenants by the City and site preparation of the Project Site and the construction and finishing of the first industrial building on the Project Site.

(Board - 11/13/86)

– The City would convey to the Port Authority marketable title to the Project Site for the consideration of \$1. The Port Authority would construct, or cause to be constructed, a minimum of 500,000 square feet of industrial building space on the Project Site.

– The Port Authority would construct the first building and would arrange through private developers or others for the construction of the other buildings on the Project Site all on an agreed-to schedule. If all six blocks were not developed within ten years of conveyance, the City would have the right to purchase the undeveloped blocks from the Port Authority.

– The Port Authority would be responsible for providing a private security force for the Project Site and an on-site employment office.

– Each block within the Project Site will be tax-exempt, however, the Port Authority would pay the City in lieu of taxes an amount equal to 10% of the assessed land value as of January 1, 1986 of each Port Authority-owned block, including those blocks leased to others. Upon completion and leasing of each Port Authority-owned industrial building, the Port Authority would cease paying such 10% of assessed land value and instead would pay 15% of the annual rent revenues (exclusive of payment for equipment and finishes financing provided by the Port Authority) for such building. Such payments by the Port Authority would constitute full payment in lieu of taxes or assessments by the Port Authority and its tenants.

– Prior to conveyance of the Project Site by the City to the Port Authority, the City would be responsible for acquisition of all privately owned parcels on the Project Site, for the relocation of all existing residents and businesses on the Project Site and for demolition of all existing structures on the Project Site, all with funds provided by the Port Authority. Should the City not convey the Project Site to the Port Authority, the City would reimburse the Port Authority for such acquisition, relocation and demolition funds provided by the Port Authority including interest on any amount reimbursed.

– If prior to the beginning of the blight proceedings, it became apparent to the Port Authority that the project would exceed \$11 million (current actual figure is \$15 million) or if the other public sector funds were not committed, the Port Authority would have the right to terminate its participation in the development of the project site. If Port Authority or other public sector funds were not committed, the City would have the right not to begin the blight proceedings for the project site.

– Port Authority net annual revenues from the Park would be shared equally by the City and Port Authority.

– No local law, enactment, ordinance, rule or regulation would apply to any part of the Project Site or improvements thereon constructed or operated by the Port Authority or improvements constructed by it or on its behalf or by its tenants.

– The City would be responsible for paving and maintaining the streets, maintaining the utilities in and adjacent to the Project Site, and providing normal City services to the Project Site.

(Board - 11/13/86)

Although there is no specific requirement in the industrial development legislation that an environmental impact statement be prepared or adopted, staff consistent with current Port Authority policy will conduct preliminary environmental investigations and studies to allow the consideration of environmental as well as other factors to be incorporated at the earliest possible time. No acquisition or construction funds will be committed by the Port Authority until any necessary Environmental Cleanup Responsibility Act clearances have been obtained. Furthermore, consistent with the industrial development legislation, the Port Authority will advise the Governor of the State of New Jersey that the construction and operation of the project would conform with applicable environmental and solid waste disposal standards in New Jersey State and any State and County plans therefor.

The total cost associated with the Port Authority's planned activities at the Industrial Park is estimated at \$15 million which would include \$5 million from the funds made available for New Jersey projects by the 1984 tolls increase. Authorization is sought so that project net revenues can be used to replenish such funds for New Jersey redevelopment projects up to the aforesaid \$5 million.

New Jersey's share of funds made available by the 1984 tolls increase is \$137.5 million. Of this, the Board authorized \$27 million in September 1985 for the Route 169-Bayonne Bridge Connection, \$1.9 million for the New Jersey Transit Park-Ride Lots in January 1986, \$2.5 million for the rehabilitation of the Doremus Avenue Bridge in February 1986, \$2 million for the Route 495 Resurfacing and Safety Improvements in March 1986, up to \$50 million for Northern Branch improvements in August 1986, and \$1 million for the Essex County Resource Recovery Facility in October 1986. \$48.1 million would remain available for other New Jersey projects. Originally, the project economics and, therefore, the MOU, contemplated an \$11 million project. Changes to the project scope are self-supporting and the final agreement with the City will reflect the Port Authority's right to terminate its participation if, among other things, the projects exceeds \$15 million. In addition to the above, \$1 million has been committed by the City of Newark from the community development monies provided by the Port Authority as part of the airport-seaport lease. Finally, the City of Newark and the Port Authority are requesting a \$1 million U.S. Economic Development Administration grant to support the economic viability of the project. This grant may be subject to terms and conditions affecting the project. It is anticipated that public sector money will leverage approximately \$25 million of building construction by the private sector.

A primary object of the City of Newark and the Port Authority will be to achieve, in all construction contracts, at least 25% participation by businesses owned and controlled by minorities.

Currently, the unemployment rate in Newark is 11.2%, with the area within which the industrial park is to be located often experiencing a higher rate of unemployment. It is anticipated that the Port Authority would construct or cause to be constructed approximately 600,000 square feet of industrial space at the site. This development is expected to generate approximately 800 construction jobs and approximately 500 to 600 permanent jobs. Of the total number of jobs created in the completed project, it is further anticipated that upwards of 25% will be filled by persons from the large group of chronically underemployed found throughout the site area and the metropolitan Newark community, most of whom are from the black and Hispanic communities.

(Board - 11/13/86)

The industrial development legislation provides that at least ten days prior to the authorization by the Port Authority of any agreement with respect to payments in-lieu-of taxes in connection with industrial development projects, the Port Authority shall notify the Chief Executive Officer of each city in the Port District within which an industrial development project has been included in the Port Authority's master plan of the proposed authorization of such agreement, shall seek their comments and shall include with such authorization any comments received. Mayoral comments were solicited and no comments were received.

It was therefore recommended, in accordance with the foregoing, that: the master plan setting forth urban industrial park sites be amended to add the aforementioned site in the City of Newark; the Executive Director be authorized to enter into the aforementioned agreements and to accept financial assistance in connection with the Newark South Ward Industrial Park; Newark South Ward Industrial Park be developed as an industrial development project at an estimated financial participation by the Port Authority of \$15 million with \$5 million of such amount to be allocated against the amounts to be made available for regional development projects in the State of New Jersey; that an amount up to said \$5 million be made available from project revenues for replenishment of such funds made available for regional development projects in the State of New Jersey; and that the acquisition of fee title to real property within the project site be found and determined to be required for public use and the Executive Director be authorized to acquire such property interest.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the master plan setting forth potential urban industrial park sites adopted by the Board on July 12, 1979, as amended, be and hereby is further amended to add a site in the City of Newark, New Jersey, bounded generally by Bergen Street, Hawthorne Avenue, West Bigelow Street and Jeliff Street; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to enter into an agreement or agreements with the City of Newark and the Newark Economic Development Corporation, and any other governmental agency or other entity necessary for the development of the site, such agreement(s) to include but not be limited to provisions concerning payments in-lieu-of taxes, the applicability of local laws and ordinances, street closings and acquisitions and conveyances of property interests which may be required for such development, and responsibility for the cost and expenses related to such acquisitions and conveyances; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to accept financial assistance from the U.S. Economic Development Administration or other non-Port Authority funding source for use in the development of the Newark South Ward Industrial Park and to enter into appropriate agreements in connection therewith; and it is further

(Board - 11/13/86)

RESOLVED, that the development of the Newark South Ward Industrial Park as an industrial development project, be and hereby is authorized, subject to the foregoing and to the Port Authority's making appropriate certifications including those necessary for the issuance of Port Authority Consolidated Bonds, at an estimated financial participation by the Port Authority of \$15 million, including payments to contractors, provisions for extra work, and engineering, administrative and financial expenses, with \$5 million of such amount to be allocated against the amounts to be made available for regional development projects in the State of New Jersey as a result of the 1984 increase in the Port Authority's bridge and tunnel tolls pursuant to the agreement of June 1983 of the Governor of the State of New York and the Governor of the State of New Jersey; and it is further

RESOLVED, that an amount up to the aforesaid \$5 million be made available from project net revenues for replenishment of such funds made available for regional development projects in the State of New Jersey; and it is further

RESOLVED, that it is hereby found and determined that acquisition of fee title to and required lesser interests in the real property within the Project Site is required for public use for the aforesaid purposes and that the Executive Director, subject to the approval of the Committee on Construction, be and hereby is authorized to acquire, by voluntary acquisition, such property interests for such consideration as may be deemed reasonable and proper, and to incur such expenses as may be necessary to consummate such property transactions; and it is further

RESOLVED, that the form of any agreements authorized pursuant to the foregoing be subject to approval by General Counsel or his authorized representative.

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY

POTENTIAL INDUSTRIAL DEVELOPMENT SITES

AMENDMENT NO. 6

An amendment to the master plan adopted in accordance with Chapter 651 of the Laws of New York (1978) and Chapter 110 of the Laws of New Jersey (1978).

INTRODUCTION

The following pages are amendatory of and supplemental to the master plan adopted on July 12, 1979, and amended on March 12, 1981, August 12, 1982, January 12, 1984, March 8, 1984, and November 8, 1984. Except as otherwise amended herein, the provisions of that plan remain the same and apply to the South Ward Industrial Park in Newark, New Jersey, now being included in the master plan.

PREVIOUS MASTER PLAN SITES

Pursuant to the legislation providing for Port Authority participation in a program of industrial development, the Board at its meeting on July 12, 1979, adopted a master plan which identified the following sites for potential industrial development:

- Charleston, Staten Island, New York
- Doremus Avenue, Newark, New Jersey
- Greenville Yards/Claremont Terminal, Jersey City, New Jersey
- Hunts Point/Oak Point Yards Area, The Bronx, New York
- North Avenue, Elizabeth, New Jersey
- Spring Creek, Brooklyn, New York

At its meeting on March 12, 1981, the Board amended the master plan to include the following additional sites:

- Bathgate, The Bronx, New York
- Kapkowski Road, Elizabeth, New Jersey

At its meeting on August 12, 1982, the Committee on Port Planning, pursuant to authorization by the Board,

amended the master plan to include the following additional site:

- Staten Island Industrial Park-East Side, Staten Island, New York

The Board, at its meeting on January 12, 1984, amended the master plan to include the following additional site:

- Portions of four additional blocks within the Bathgate Industrial Park.

The Board, at its meeting on March 8, 1984, amended the master plan to include the following additional site:

- A site in the City of Newark, New Jersey, for development of a resource recovery facility.

The Board, at its meeting on November 8, 1984, amended the master plan to include the following additional site:

- Yonkers Industrial Park, Yonkers, New York.

The following is a status report on the previously authorized industrial development projects:

- On February 22, 1982, the Port Authority entered into an agreement with New York City and the New York City Public Development Corporation (PDC) concerning Port Authority development of at least three blocks of the original eight block site at Bathgate, the Bronx. On January 12, 1984, the

board approved an amendment expanding the Bathgate project by four additional half blocks. Currently, there are seven manufacturing companies at Bathgate operating in six industrial buildings on six of the original eight blocks including PDC tenants. A 68,000 square foot building is under construction with completion anticipated for the Fall of 1987. Marketing efforts for the building are underway. A Business Assistance Center is being constructed by the Port Authority on one of the four half blocks.

- The Port Authority and the City of Elizabeth, New Jersey, have entered into an agreement concerning the development of Elizabeth Industrial Park. One lease has been signed and negotiations regarding potential additional tenant occupancies are currently underway.
- The Port Authority, Merrill Lynch Telecommunications, Western Union Communications Systems and the City of New York have executed agreements with respect to the development of The Teleport and construction is currently underway.
- In connection with the development of a site in the City of Newark for the Essex County Resource Recovery Facility, all necessary agreements have been executed with the City of Newark, the County of Essex and the system vendor, American Ref-Fuel, and all permits have been issued. The Essex County Resource Recovery Facility was certified by the Board as an additional facility of the Port Authority at its meeting of May 9, 1985, subject to reaffirmation of such certification by the Committee on Finance. Such reaffirmation has not yet been made.

- The property for the Industrial Park in Yonkers was acquired in May, 1985 from United Technologies Corporation, parent of the Otis Elevator Company. Since that time, contracts have been let to install improvements of a specific nature for Nissho Iwai American Corporation and Kawasaki Rolling Stock (USA). Other work has been initiated to upgrade the heating system and some life safety improvements as initial steps to renovating certain of the older buildings for future tenancies.

NEWARK SOUTH WARD INDUSTRIAL PARK IN
THE CITY OF NEWARK, NEW JERSEY

LOCATION

The South Ward Industrial Park would be located in the Clinton Hill section of the South Ward, City of Newark, New Jersey. The site is generally bounded by Bergen Street, Hawthorne Avenue, West Bigelow Street and Jeliff Street. Highway I-78 abuts its southeastern boundary and the site is one mile west of Newark International Airport. (See attached site map).

LAND USE

Currently, the site is a mixed use area composed of occupied buidings, abandoned derelict buildings, and vacant lots.

ZONING AND OWNERSHIP

The site is currently zoned for industrial and commercial-residentia use. Most of the site is now owned by the City of Newark but some privately owned lots must be purchased

by the City. After the entire site has been acquired by the City, and it has completed the necessary relocations, the City will convey marketable title for the site to the Port Authority.

TRANSPORTATION

The project site is ideally located near the hub of local air, rail, sea and road networks which have sufficient capacity to handle any expected traffic, particularly truck traffic, involved in the site's development. Due to the low traffic, low density, and the industrial character of the area, no significant impact upon traffic patterns external to the six block project site is expected.

UTILITIES

Both the Newark sewer system and the Passaic Valley Sewer Commission regional waste water treatment plant have sufficient capacity to accept flow from the site.

All utilities in and around the site, including natural gas and electricity, will be provided by the City of Newark.

ENVIRONMENTAL

Although there is no specific requirement in the industrial development legislation that an environmental impact statement be prepared or adopted, staff consistent with current Port Authority policy will conduct preliminary environmental investigations and studies to allow the

consideration of environmental as well as other factors to be incorporated at the earliest possible time. Furthermore, consistent with the enabling legislation, the Port Authority will advise the Governor of the State of New Jersey that the construction and operation of the project would conform with applicable environmental and solid waste disposal standards in New Jersey State and State and County plans therefor.

LABOR

A primary objective of the City of Newark and the Port Authority will be to achieve in all construction contracts, at least a 25% participation by businesses owned and controlled by minorities.

Currently, the unemployment rate in Newark is 11.2% with the area, within which the industrial park is to be located, often experiencing a higher rate of unemployment. It is anticipated that the Port Authority would construct or cause to be constructed approximately 600,000 square feet of industrial space at the site over a ten year period. This construction is expected to generate approximately 800 construction jobs and approximately 500-600 permanent jobs. Of the total number of jobs created in the completed project, it is further anticipated that upwards of 25% will be filled by persons from the large group of chronically underemployed found throughout the site area and the metropolitan Newark community, most of whom are from the black and hispanic communities.

Further, it is anticipated that the Port Authority will reach agreement with the Newark Private Industry Council to use Job Training Partnership Act (JTPA) funds for this project.

ESTIMATED PROJECT COSTS

The total cost associated with the Port Authority's planned activities at the South Ward Industrial Park is estimated at \$15 million which includes \$5 million from the funds made available for New Jersey projects by the 1984 tolls increase and \$1 million from the City of Newark's community development monies provided by the Port Authority as part of the airport-seaport lease. The major portion of the \$15 million will be used for acquisition, relocation, site preparation on six blocks, and the construction of one industrial building. It is estimated that the public sector investment will leverage approximately \$25 million from the private sector.

FEDERAL FINANCIAL ASSISTANCE

The City of Newark and the Port Authority have jointly applied for U.S. Economic Development Administration grant in the amount of \$1 million to assist the funding of the initial phase of development at the South Ward Industrial Park. The awarding of this grant will enhance both the initial phase of development and the subsequent development of the Park as a whole. Efforts are underway to finalize a successful outcome of this grant application.

OTHER CONSIDERATIONS

The development of this project would be undertaken by the Port Authority subject to the appropriate authorization and certifications including those necessary prior to the issuance of Consolidated Bonds.

GOVERNMENT AND COMMUNITY CONSULTATIONS AND PARTICIPATION

To assist the Port Authority in the preparation of the master plan, discussions and consultations were held with individuals and groups including:

- The Governors of New York and New Jersey
- The New York and New Jersey Legislatures
- The Mayor of the City of Newark
- Members of the Newark Municipal Council
- Essex County Board of Chosen Freeholders
- County Executive of Essex County
- The Mayors of New York, Elizabeth, Jersey City, and Yonkers
- The Greater Newark Chamber of Commerce
- South Ward Community Leaders
- New Jersey Bell
- Northeastern Industrial Developers Association
- President, N.J. Chapter - National Association of Industrial and Office Parks

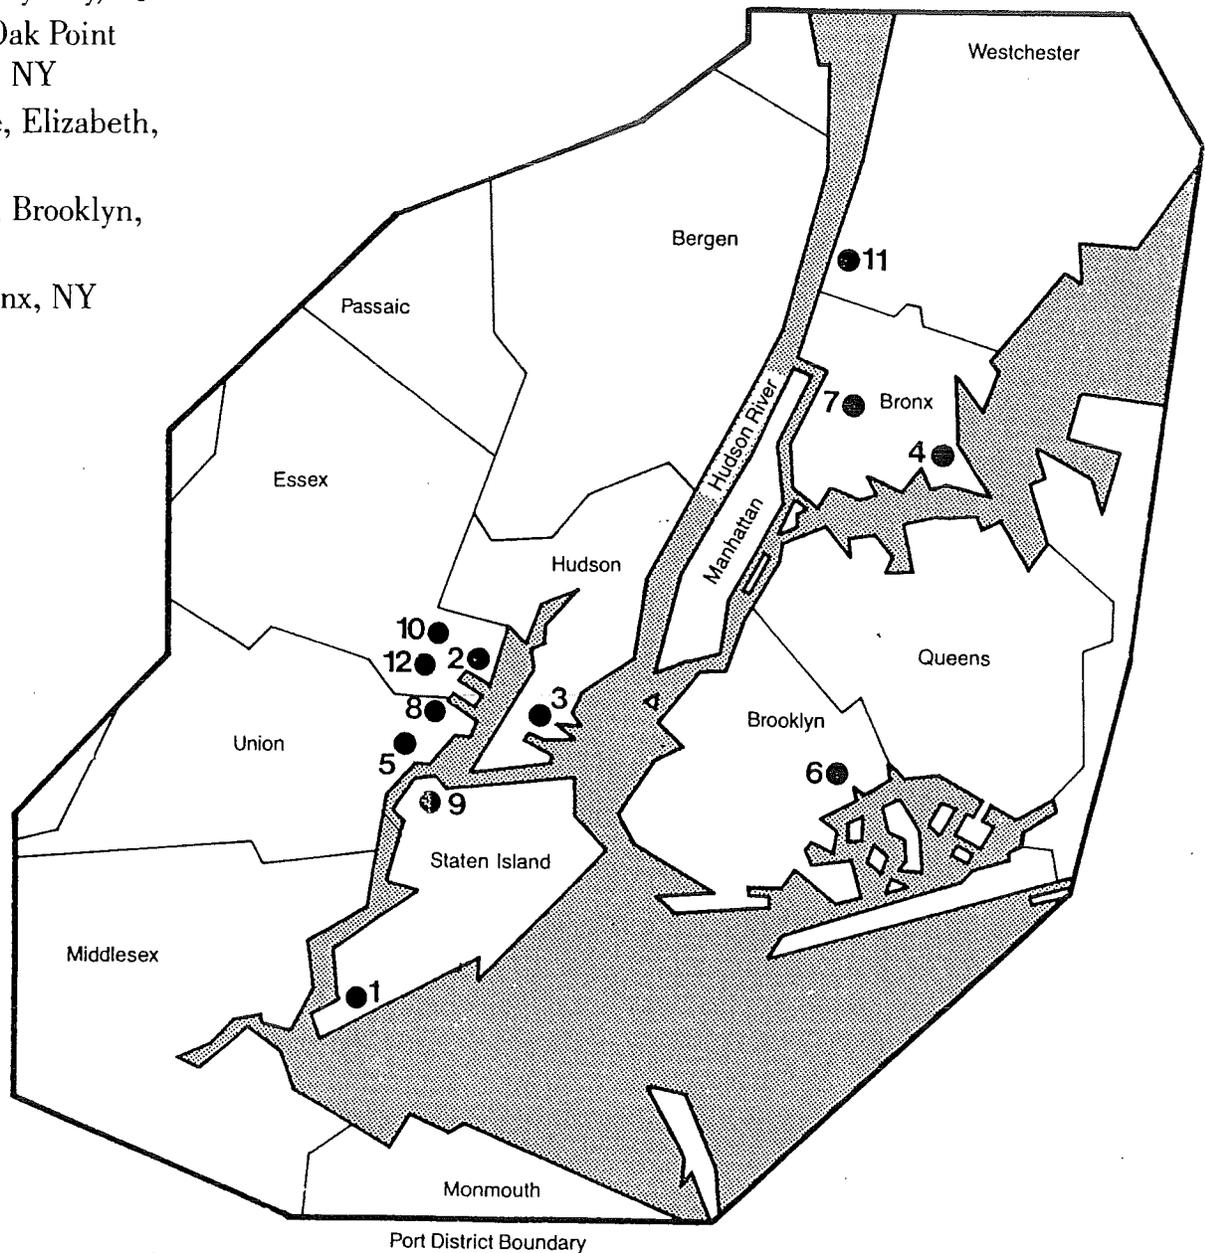

No substantial objections were received and many groups and individuals gave strong support to development,

by the Port Authority, of the Newark South Ward Industrial
Park.

Newark South Ward Industrial Park

Master Plan

Newark South Ward Industrial Park

NEWARK SOUTH WARD INDUSTRIAL PARK
DEVELOPMENT PLAN

(Board - 11/13/86)

The Fund For Regional Development - Retention of Independent Auditors for 1986

It was reported that the Fund for Regional Development was created by agreement among the States of New York and New Jersey and the Port Authority following the decision of the State of New York to relocate from the World Trade Center. Under the agreement, as the State of New York vacates space, the space is leased to the Fund. The Fund's gross revenues result from the subleasing of that space to tenants at market rates; net revenues are the difference between the market rents paid by new tenants of the space and payments which would have been made by the State for its space after deduction of certain other costs.

Under the agreement, the Port Authority acts as agent for the Fund, and as such negotiates and executes leases for the former New York State space. In addition, the Port Authority has undertaken the responsibilities for managing the Fund's day-to-day operations, including all aspects of financial analysis, reporting and management, the issuance of financial statements on a quarterly basis to the States, management of the Fund's accounts and disbursement of Fund revenues in accordance with the agreement. The Port Authority is paid a fee by the Fund for these management services.

The Fund's financial statements have been unaudited to date. However, given the Fund's rapid growth, it would now be appropriate to have an independent auditor examine the books. First, the Fund has experienced considerable financial growth in the past year; it currently has assets of \$139 million and liabilities of \$137 million. An audit would certify that the Fund accounting is in accordance with generally accepted accounting principles.

Staff requested and considered proposals from three minority-owned accounting firms. Mitchell/Titus & Co., Certified Public Accountants, is the largest minority-owned CPA firm in the United States, with a professional staff of 75 and offices in New York City and Washington, D.C. The firm has a diverse clientele and a professional staff with outstanding achievements and credentials. Mitchell/Titus has had considerable experience in performing audits of governmental and not-for-profit agencies, and for Fortune 500 company pension funds. Based upon its professional qualifications, Mitchell/Titus was determined to be capable to perform the audit of the Fund.

The Audit Committee therefore recommended that the Board designate Mitchell/Titus & Co., as independent auditors to audit the books and accounts of the Fund for Regional Development for the year ending December 31, 1986; and refer to the Audit Committee, in accordance with the By-Laws of the Port Authority, the matter of arranging for such auditing by the above-designated auditors and for monitoring the auditors' performance.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that Mitchell/Titus Co., is hereby designated, on behalf of the Fund for Regional Development, as independent auditors to audit the books and accounts of the Fund for Regional Development for the year ending December 31, 1986; and it is further

RESOLVED, that the Board refer to the Audit Committee, in accordance with the By-Laws of the Port Authority, the matter of arranging for such auditing by the above-designated auditors and for monitoring the auditors' performance.

(Board - 11/13/86)

Retention of Financial Advisor

It was reported that on November 14, 1985, the Board authorized the Executive Director to enter into an agreement with Lazard Freres & Company to provide for Mr. John Tamagni, a partner at Lazard Freres, to act as a financial advisor to the Port Authority at a fee of approximately \$25,000 for each successive three-month period. Mr. Tamagni's services have proven very beneficial to the Port Authority during the past year. In order to continue to benefit from these services, especially in view of rapidly evolving non-traditional financial instruments being utilized in the municipal finance market, it is recommended that Mr. Tamagni be retained for a one-year period commencing November 15, 1986 at a fee not to exceed \$100,000 plus out-of-pocket expenses. The new agreement would contain an option to extend for a period of one year under the same terms.

While performing services in connection with the agreement with Lazard Freres that the Board authorized on November 14, 1985, Lazard Freres has incurred \$773 in out-of-pocket expenses for which they have requested and received reimbursement.

It was therefore recommended that the Executive Director be and he hereby is authorized to enter into an agreement with Lazard Freres & Company to provide for Mr. John Tamagni to act as a financial advisor to the Port Authority for a one-year period, commencing November 15, 1986, at a fee not to exceed \$100,000 plus out-of-pocket expenses, with an option to extend the agreement for a period of one year.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to enter into an agreement with Lazard Freres & Company to provide for Mr. John Tamagni to act as a financial advisor to the Port Authority for a one-year period, commencing November 15, 1986, at a fee not to exceed \$100,000 plus out-of-pocket expenses, with an option to extend the agreement for a period of one year; and it is further

RESOLVED, that the form of said agreement be subject to approval by General Counsel or his authorized representative.

(Board - 11/13/86)

Work Uniform Services - Port Authority Facilities Contract P&SS - 1-86

It was reported that the Board, at its meeting on November 8, 1984, authorized the Executive Director to award Contract P&SS - 1-84 for work uniform laundering, cleaning, and related services to Sketchley Services Inc., Mount Laurel, New Jersey for an initial two-year period ending December 31, 1986. While Contract P&SS - 1-84 contains provisions for extending the initial two-year term for three additional one-year periods, services performed to date by Sketchley Services Inc. (and Coyne Textile Services, which Sketchley acquired in June 1986) have not been satisfactory, and therefore a new contract was competitively bid.

Contract P&SS - 1-86 provides for the laundering, dry cleaning, sorting, repair, storage, route assembly, pick up and delivery of employee work and dress uniforms for approximately 6,000 Port Authority and PATH employees.

The contract documents provided that prospective bidders meet qualification requirements relating to experience, equipment, storage space, plant capacity and location, computer capability and financial ability. In addition to publicly advertising Contract P&SS - 1-86, staff solicited bids from 28 commercial laundry firms in the Port District. On September 19, 1986, the following bids were received:

Name of Vendor	Total Estimated Cost (three years)
Morey-LaRue Laundry, Co. Linden, New Jersey	\$1,240,375
Consolidated Laundries Inc. Jersey City, New Jersey	\$1,476,331
Aratex Services Inc. Newark, New Jersey	\$1,721,244

Two other proposals were also received but were considered non-responsive to the qualification requirements.

Contract P&SS - 1-86 contains options for the Port Authority to renew the contract on the same terms and conditions for two one-year periods, subject to escalation based upon a specified Consumer Price Index.

While Morey-LaRue Laundry, Co. has not recently performed garment laundering and cleaning services for the Port Authority, staff has reviewed its physical plant and references and has found the firm qualified to perform this contract.

(Board - 11/13/86)

It was therefore recommended that the Board authorize the Executive Director:

a) to award Contract P&SS - 1-86 for work uniform laundering, cleaning and related services to Morey-LaRue Laundry, Co. for an initial three-year period commencing January 1, 1987 in the total estimated amount of \$1,240,375 and to order extra work up to the amount of \$186,056; and

b) to exercise the Port Authority's option to renew Contract P&SS - 1-86 on the same terms and conditions for up to two additional one-year periods subject to escalation based upon a specified Consumer Price Index.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director: a) to award Contract P&SS - 1-86 for work uniform laundering, cleaning and related services to Morey-LaRue Laundry, Co. for an initial three-year period commencing January 1, 1987 in the total estimated amount of \$1,240,375 and to order extra work up to the amount of \$186,056; and b) to exercise the Port Authority's option to renew Contract P&SS - 1-86 on the same terms and conditions for up to two additional one-year periods subject to escalation based upon a specified Consumer Price Index.

(Board - 11/13/86)

Red Hook Container Terminal - Ratification of Executive Director's Execution of an Agreement Establishing Interim Rentals for use of Pier 9A and Portions of the Expanded Red Hook Container Terminal - Agreement with Universal Maritime Service Corporation

It was reported that the Board at its meeting on September 14, 1978, authorized an agreement with the City of New York and the State of New York for the construction of the Red Hook Container Terminal; and, at its meeting on March 26, 1980, the Board authorized a lease with Universal Maritime Service Corporation covering the operation of the Terminal until the year 1998. At its meeting on January 15, 1981, the Board authorized a lease agreement under which Universal would be reimbursed up to \$3,100,000 for the construction of a container crane and would pay an estimated annual rental of \$419,000 for that crane.

In December 1983, the Board authorized a project to expand the Terminal, creating an additional berth to support a crane operation on Pier 9A; and, at its meeting on April 12, 1984, the Board authorized a second lease amendment with Universal for the leasing of the additional portions of the Terminal and the construction of a second crane on Pier 9A with reimbursement by the Port Authority for the cost thereof up to \$3,100,000. This new lease amendment included a revised rental for both cranes which was to become effective "upon completion" of the second crane on Pier 9A. Although this crane was completed on August 31, 1985, the expansion of the Terminal was not completed until August 28, 1986.

Accordingly, an Interim Agreement was negotiated with Universal so that the second crane, Pier 9A and other portions of the expanded Terminal that had been completed could be utilized, pending the completion of the rest of the expansion. Rental under the Interim Agreement was fixed as follows:

1. a terminal usage rental of \$20 per container;
2. a terminal usage rental of \$2.60 per revenue ton on breakbulk cargo, including less-than-container load cargo stuffed and stripped at the Terminal; and
3. a crane usage rental of \$20 per container.

The Interim Agreement, in effect from December 16, 1985 to August 31, 1986, provided that upon completion of all of the Terminal expansion work, the Interim Agreement would expire and the affected areas would then become a part of the premises under Universal's lease for the Terminal. Rental for the two cranes would then become payable in accordance with that lease.

It was therefore recommended to the Board that the Board ratify the execution by the Executive Director of the Interim Agreement with Universal Maritime Service Corporation for the use of Pier 9A, together with a crane located thereon, and certain other completed portions of the expanded Red Hook Container Terminal by Universal Maritime Service Corporation on the terms and conditions outlined above.

(Board - 11/13/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board ratify the Executive Director's execution of an Interim Agreement with Universal Maritime Service Corporation of the use of Pier 9A, together with a crane located thereon, and portions of the expanded Red Hook Container Terminal by Universal Maritime Service Corporation pending completion of the expansion of the Terminal; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 11/13/86)

The World Trade Center - Agreement with D.W. Sargent Broadcast Service

It was reported that while the construction of the broadcast facilities in One World Trade Center is essentially complete, electro-magnetic radiation testing and evaluations will continue to be needed. The testing and evaluations will focus on the effect on electro-magnetic radiation levels resulting from the addition of other FM stations on the main antenna and the increase in the number of whip antennas installed on the roof for private broadcasting. Evaluations will also be needed from time to time to alleviate concerns about radiation expressed by tenants in other areas of the World Trade Center, to continually monitor the operation of the broadcasters to assure a safe environment for the public, and to be in a position to adhere to anticipated revisions of the Federal Communications Commission guidelines as more government studies of electro-magnetic radiation are completed.

D.W. Sargent Broadcast Service has been identified as a leading computer specialist in the field of radio frequency transmission. D.W. Sargent's development of a new technique for measuring FM and TV antennae systems using a computer-controlled network analyzer enables them to produce highly accurate measurements and reports in an easily understood format within minutes. Previous measurements by other specialists were labor intensive, costlier and required weeks to produce a final report.

D.W. Sargent will be required by the terms of this agreement to measure, evaluate and document non-ionizing electro-magnetic radio frequency radiation emitted from the various broadcast facilities located throughout the World Trade Center utilizing computer equipment specifically programmed for World Trade Center use. D.W. Sargent will monitor radio frequencies for alleged hazards and to insure compliance with Environmental Protection Agency and Federal Communications Commission standards. In addition, D.W. Sargent will design, fabricate and install monitoring antennas and other electronic sensing devices, as needed, to perform the required evaluations.

The Director, World Trade Department, has determined that D.W. Sargent is highly qualified to perform the requirements of this agreement in that D.W. Sargent has the capability of expanding the area in which narrow-band measurements are taken to areas that were previously inaccessible at the World Trade Center, is thoroughly familiar with the broadcast facilities having performed work for the Harris Corporation under Contract WTC-650.01 Telecommunications Facilities for WNYC-TV and WNYC-FM Broadcasting Systems, Television and FM Transmission Equipment, 110th Floor, Tower A and has provided technical services for numerous TV/FM broadcast stations, including RCA Corporation.

D.W. Sargent's expertise will enable staff to diminish the use of other technical advisors previously retained to provide similar analysis and staff anticipates that \$70,000 of the requested authorization of \$85,000 is expected to be offset by the discontinuation of such other services.

(Board - 11/13/86)

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement with D.W. Sargent Broadcast Service of Cherry Hill, New Jersey, in an amount not to exceed \$85,000 for the provision of various technical services in connection with the broadcast facilities located atop Tower One of the World Trade Center.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into an agreement with D.W. Sargent Broadcast Service of Cherry Hill, New Jersey, in an amount not to exceed \$85,000 for the provision of various technical services in connection with the broadcast facilities located atop Tower One of the World Trade Center.

(Board - 11/13/86)

The World Trade Department - Contract WTC-499.83 - Security Guard Services - The World Trade Center - Award

It was reported that Contract WTC-499.83 provides for the furnishing of unarmed guard personnel for coverage in Buildings 1, 2, 4 and 5 and the Concourse and Plaza areas of the World Trade Center. The contract is for a two-year period commencing on or about January 1, 1987 subject to revocation by the Port Authority without cause on 30 days' written notice. The Port Authority, with the concurrence of the contractor, may extend the term of the agreement for one additional period of two years upon the same terms and conditions except for annual compensation which may be adjusted during the original and extension periods based upon changes in wage rates, supplemental benefits and associated costs mandated by agreements with Local 32b-32j of the Service Employees International Union, AFL-CIO. Proposals were solicited by public advertisements for contractors who were required to meet certain prerequisites in order to submit bids, including: a) the bidder must have been in the guard service business for at least the three previous years; b) the bidder must currently have over \$2,500,000 in annual gross income from guard service; and c) the bidder shall have had a minimum of 6,000 hours of guard service during a consecutive seven-day period during a specified period prior to bid opening.

On October 24, 1986 the following proposals were received:

McRoberts Protective Agency New York, New York	\$5,415,497
Spartan Security Services, Inc. Jamaica, New York	\$5,545,172
Cosmopolitan Guard Service, Inc. New York, New York	\$5,662,582
Lance Investigation Service, Inc. Bronx, New York	\$5,842,377
Halbey Security & Protective Corp. New York, New York	\$5,937,448
City/Wide Security Services, Inc. Brooklyn, New York	\$5,959,771
Professional Security Bureau, Inc. Nutley, New York	\$6,790,716
EAR Private Investigation & Security, Inc. New York, New York	\$7,030,201

In addition, another bid was received from ISS International Service System, Inc. in the amount of \$5,408,916. However, since this bidder does not meet the prerequisites specified in the Contract, its bid is not considered.

(Board - 11/13/86)

The Director, World Trade Department has determined that the lowest bidder, McRoberts Protective Agency, Inc., is qualified to perform the requirements of Contract WTC-499.83.

It was therefore recommended that the Executive Director be authorized, for and on behalf of the Port Authority, to award Contract WTC-499.83 for security guard service at the World Trade Center to McRoberts Protective Agency, Inc., all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized, for and on behalf of the Port Authority to award Contract WTC-499.83 for a two year period to McRoberts Protective Agency, Inc., the lowest bidder, at the total estimated cost of \$5,415,497 and to order extra work in an amount not to exceed 10% of the total estimated cost and, in his discretion, to extend the term of Contract WTC-499.83 for one additional two year period upon the same terms and conditions including the provision to adjust costs for the original and extension periods based upon changes in applicable union agreements; the form of the contract to be subject to the approval of General Counsel or designated representative.

(Board - 11/13/86)

The World Trade Department - The Teleport - Contract TP-110.019 - Switching Station Supplemental Agreement No. 1

It was reported that the Committee on Construction, at its meeting on February 14, 1985, authorized the Executive Director to award Contract TP-110.019 to the qualified vendor submitting the lowest proposal and to order extra work up to the amount of 10% of the proposal accepted, or to reject all proposals. Subsequently, on June 17, 1985 the Executive Director authorized the award of Contract TP-110.019 to Pacs Industries, Inc., of Great Neck, New York at its bid price of \$957,478, exclusive of an allowance for extra work in the estimated amount of \$95,750.

Unlike the three switchgears supplied under Contract WTC-110.019, the fourth electrical switchgear will require that the equipment be separately assembled, tested at the factory in Ohio, dismantled and shipped to the Teleport site before it can be installed in the Teleport Switching Station. Consequently, the unit cost is substantially higher than for the first three switchgears which were manufactured simultaneously.

Contract TP-110.019 requires the vendor to furnish and deliver to the Teleport site switching equipment necessary for three electrical switchgears in the Teleport electrical switching station that are required to meter and distribute electrical power received through Con Edison primary feeders. The contract also provided that the switching station contain an area capable of accepting the equipment necessary for a fourth switchgear when staff determined that the electrical demand at the site necessitated the installation.

The Board is also considering a request to authorize the Director of the World Trade Department to enter into an agreement with Con Edison for the installation of the third and fourth feeders to provide second contingency power at the Teleport site. The fourth feeder would be available for connection by July 1987. The fabrication of the fourth switchgear requires a seven-month lead time, and in order to be available when Con Edison provides the fourth feeder, the furnishing of the fourth switchgear requires Board approval now.

For reasons of operational expediency, ease of maintenance, spare parts availability, economics, ability to meet time restraint, and the fact that Pacs Industries designed the original switchgear equipment specifically for the Teleport site, the Director of the World Trade Department recommends that it would be in the Port Authority's interest to enter into Supplemental Agreement No. 1 under Contract TP-110.019 as described above.

It was therefore recommended that the Board authorize the Director, World Trade Department, to enter into Supplemental Agreement No. 1 under Contract TP-110.019, Switching Station Equipment, with Pacs Industries, Inc. in an estimated amount of \$425,000, exclusive of extra work in an amount of up to \$43,000, for the furnishing of a fourth electrical switchgear for the main Teleport Switching Station.

(Board - 11/13/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Director, World Trade Department, to enter into Supplemental Agreement No. 1 under Contract TP-110.019, Switching Station Equipment, with Pacs Industries, Inc. in an estimated amount of \$425,000, exclusive of extra work in an amount of up to \$43,000, for the furnishing of a fourth electrical switchgear for the main Teleport Switching Station, the form of the Agreement to be subject to the approval of General Counsel or his authorized representative.

(Board - 11/13/86)

The World Trade Department - The Teleport - Agreement with Consolidated Edison Company of New York, Inc.

It was reported that the Teleport's electrical distribution system currently consists of two 33KV feeders that feed electrical power into the Teleport switching station. The first and second feeders were constructed and installed by Consolidated Edison Company of New York (Con Edison) at its cost, meeting Con Edison's responsibility to supply first contingency power at the site which is now less than fifteen megawatts.

Staff anticipates that by July 1987 the electrical load requirement will increase the demand to an amount greater than the working capacity of the installed feeders. This necessitates the installation of the third and fourth feeders to continue to guarantee first contingency power and add second contingency power. Second contingency power is considered a key marketing tool and has had a significant effect on existing and prospective lease negotiations.

Con Edison is not responsible for the cost of this new installation until the demand exceeds fifteen megawatts for three consecutive months at any time during the five years following installation. If the three-month fifteen megawatt requirement is reached during the specified time, Con Edison will refund \$302,433 the amount paid for the third feeder.

It was therefore recommended that the Board authorize the Director, World Trade Department, to enter into an agreement with Consolidated Edison Company of New York, Inc. to furnish, install and maintain third and fourth primary feeder cables for second contingency electrical power at the Teleport in the estimated amount of \$750,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Director, World Trade Department is authorized to enter into an agreement with Consolidated Edison Company of New York, Inc. to furnish, install and maintain third and fourth primary feeder cables for second contingency electrical power at the Teleport in the estimated amount of \$750,000; and it is further

RESOLVED, that the form of such agreement is subject to the approval of General Counsel or his designated representative.

(Board - 11/13/86)

The World Trade Department - The World Trade Center - Lease with First Boston Corporation
Surrender of Lease with Seapac Services, Inc.; Fund for Regional Development Lease with
Seapac Services, Inc.

It was reported that the First Boston Corporation (First Boston) a major international investment banking firm, is presently the lessee of approximately 150,000 square feet of office space in Five World Trade Center and is interested in expanding its activities in that building and the leasing of additional space. First Boston occupies the entire 7th floor and approximately 50% of the 8th floor of Five World Trade Center. Staff has reached agreement with First Boston for the leasing of approximately 50,000 rentable square feet, which is the balance of the 8th floor; and approximately 32,000 rentable square feet of the space occupied by Seapac Services, Inc. (Seapac) on the 9th floor. The 50,000 square feet on the 8th floor will be vacated in early 1988 by Dean Witter Reynolds in accordance with the arrangements agreed to in connection with the leasing to Dean Witter last year of the 24 New York State floors. In addition, First Boston would also lease the approximately 20,000 rentable square feet of office space remaining on the 9th floor of Five World Trade Center if the present lessees agree to be relocated. The leasing agreement with First Boston would provide that no rental would be payable as to each space for the six-month period after such space is turned over to First Boston and would provide for a basic rental thereafter of \$31 per rentable square foot for the first ten years of the letting of such space and thereafter at the rate of \$35 per rentable square foot per year through July 31, 2000, the expiration date of the existing First Boston lease covering its space in Five World Trade Center. In addition, First Boston would pay additional rent to cover increases in operating costs and payments in lieu of taxes and additional charges for cleaning and electricity.

The Seapac space would be turned over to First Boston, probably in the second quarter of 1987. The additional 20,000 rentable square feet of space on the 9th floor would be turned over to First Boston if an agreement to relocate can be negotiated with the three other tenants. First Boston would take all of the space in its "as is" condition and reconstruct it at its own expense.

Seapac Services, Inc. occupies its 32,000 rentable square feet pursuant to a lease signed in 1970 and is willing to relocate to approximately 28,500 rentable square feet of space to be vacated by the State of New York on the 33rd floor of Two World Trade Center, provided that its rental obligations per square foot will remain the same as in its existing lease through August 14, 1991. Since Seapac will receive an allowance to reconstruct the 33rd floor space to meet its needs, it has agreed to a lease extension until August 31, 1996. The lease with Seapac for the 33rd floor space will provide that Seapac will pay the Fund a basic rental of \$31 per rentable square foot per year for the entire term. However, in order that Seapac's actual rental is maintained at the same rate as provided by its existing 9th floor lease until it expires in 1991 and at an average basic rental rate of \$25 per rentable square foot per year thereafter, through August 31, 1996, the Port Authority will, in consideration of the surrender of the 9th floor space by Seapac, reimburse Seapac to the extent that the \$31 basic rental paid by Seapac for the 33rd floor space exceeds these rates. It is anticipated that the rate differential until 1991 will be approximately \$17 to \$19 per rentable square foot per year; during the extended term the rate differential would be approximately \$12 per rentable square foot in the first year, \$9 per rentable square foot in the

(Board - 11/13/86)

second year, \$6 per rentable square foot in the third year, \$3 per rentable square foot in the fourth year and no reimbursement in the fifth year. Through August 14, 1991 Seapac would pay operating escalation and payments in lieu of taxes pursuant to the terms of its existing lease; commencing on August 15, 1991 Seapac would pay operating escalation based on the current World Trade Center formula, with a January 1, 1991 basic wage rate date and would make payments in lieu of taxes on the basis of a tax base equivalent to the annual per rentable square foot factor for the tax year beginning July 1, 1991. Seapac would also pay additional charges for cleaning and electricity. Seapac would take the space in its "as is" condition after it is vacated by New York State, would have up to 4½ months to reconstruct the space, during which time no rental will be payable, and would receive an allowance of \$25 per rentable square foot toward the cost of constructing the space, including the installation of sprinklers, and for other costs involved in the relocation including moving costs and telephone installation.

It was therefore recommended that the Board authorize the Executive Director, for and on behalf of The Fund for Regional Development, to enter into a lease with Seapac Services, Inc., and for and on behalf of the Port Authority to enter into an agreement with The First Boston Corporation; and an agreement with Seapac Services, Inc., providing for the surrender of its lease; all of the foregoing to be upon the terms set forth above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Fund for Regional Development, to enter into a lease with Seapac Services, Inc., for approximately 28,500 rentable square feet of office space to be vacated by the State of New York in Two World Trade Center, for approximately a ten-year term upon the terms set forth above, and it is further

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement with The First Boston Corporation covering the leasing of up to 100,000 rentable square feet of space in Five World Trade Center, upon the terms set forth above, and it is further

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement providing for the surrender by Seapac Services, Inc. of its lease covering approximately 32,000 rentable square feet of space on the 9th floor of Five World Trade Center and for the payment to Seapac Services, Inc. of certain sums by the Port Authority in consideration of such surrender, upon the terms set forth above, and it is further

RESOLVED, that the form of the agreements to be subject to the approval of General Counsel or his designated representative.

(Board - 11/13/86)

Kennedy International Airport - Lease of Space in Cargo Building No. 82 and Related Outside Areas to Evergreen International Airlines, Inc.

It was reported that on July 1, 1985, Evergreen International Airlines was offered space in Cargo Building No. 82 at Kennedy International Airport on a month-to-month basis until it could be confirmed whether Evergreen's activity justified offering them a longer fixed-term lease at this location. Evergreen operates two B-727s in and out of the airport five nights per week in addition to occasional international weekend charters. For the first six months of 1985, Evergreen moved over 4 million pounds of freight in and out of the airport, principally to the West Coast. Based on a recent analysis of Evergreen's activity, it has been determined that Evergreen's cargo and aircraft activity does warrant offering them a fixed-term lease. Negotiations have now been substantially completed with Evergreen International Airlines, Inc. for approximately 16,965 square feet of space in Building No. 82 and 27,311 square feet of related outside areas for a term which would consist of the month-to-month tenancy from July 1, 1985 to November 30, 1986 and thereafter a fixed term expiring on June 30, 1988 at the following approximate annual rentals:

Lease Period	Bldg. Area	Outside Area	Total Approximate Annual Rental
first 24 months	\$101,790 (16,965 sq. ft. @ \$6 per sq. ft.)	\$15,021 (27,311 sq. ft. @ \$.55 per sq. ft.)	\$116,808
last 12 months	\$110,273 (16,965 sq. ft. @ \$6.50 per sq. ft.)	\$16,387 (27,311 sq. ft. @ \$.60 per sq. ft.)	\$126,660

Evergreen International Airlines will be responsible for any alterations to the premises which may be required to physically separate the area to be leased from adjoining areas in the building. These alterations would include installation of any fire separation that may be required and/or segregation of utility lines.

Under the terms of the proposed lease between the Port Authority and Evergreen International Airlines, Inc. Evergreen will assume responsibility for all maintenance and operation of the premises with the exception of property insurance, structural integrity and the maintenance of the roof which will be retained by the Port Authority. The Port Authority will provide electricity and water to the premises on a metered basis to be paid for by Evergreen.

It was therefore recommended that the Executive Director be authorized, for and on behalf of the Port Authority, to enter into an agreement with Evergreen International Airlines, Inc. at Kennedy International Airport, all in accordance with the foregoing.

(Board - 11/13/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be authorized to enter into an agreement of lease for three years with Evergreen International Airlines, Inc. for space in Cargo Building No. 82 and related outside areas at Kennedy International Airport commencing on or about July 1, 1985 at approximate annual rentals of \$116,808 for the period July 1, 1985 to June 30, 1987 and \$126,660 for the period July 1, 1987 to June 30, 1988, all in accordance with the foregoing; the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 11/13/86)

Newark International Airport - Runway 11 - Microwave Landing System Environmental Impact Statement - Increased Authorization

It was reported that at its meeting on January 9, 1986, the Board authorized the Executive Director to enter into an agreement between the Port Authority and the Federal Aviation Administration (FAA) to equally share the cost for the preparation of an Environmental Impact Statement (EIS) for the proposed installation of a Microwave Landing System on Runway 11 at Newark International Airport. The FAA estimated the cost of the study to be \$100,000, and thus the Port Authority's share was authorized for \$50,000.

Subsequently, the FAA received qualification statements from seventeen consulting firms and selected six firms to present proposals to a joint Port Authority/FAA selection committee which recommends award to the firm of CH2M Hill.

CH2M Hill's cost proposal for the study is approximately \$150,000, exceeding FAA's original estimate of \$100,000 and thereby increasing the Port Authority's equal share from \$50,000 to approximately \$75,000. An additional \$25,000 is requested to cover the Port Authority's share of costs for any additional work which may be required for the EIS.

It is beneficial to the Port Authority to participate in this program because the joint funding enables the FAA to proceed more quickly with the preparation of an EIS which is a prerequisite to installation of a Microwave Landing System. The installation of the landing system would permit the use of Runway 11 under some instrument flight rule conditions and under periods of heavy air traffic demand resulting in an increase in airside capacity at Newark International Airport where considerable air traffic delays are already being experienced.

It was therefore recommended that the Board authorize the Executive Director to increase the Port Authority participation from \$50,000 to an estimated \$100,000 for the agreement between the Port Authority and the Federal Aviation Administration (FAA) whereby the Port Authority and FAA will equally share the cost for the preparation of an Environmental Impact Statement (EIS) for the proposed installation of a Microwave Landing System on Runway 11 at Newark International Airport, the Port Authority's share of the cost for the preparation of the EIS to be recovered through Newark's Public Aircraft Facility formula.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorizes the Executive Director to increase the Port Authority participation from \$50,000 to an estimated \$100,000 for the agreement between the Port Authority and the FAA whereby the Port Authority and FAA will equally share the cost for the preparation of an Environmental Impact Statement (EIS) for the proposed installation of a Microwave Landing System on Runway 11 at Newark International Airport, the Port Authority's share of the cost for the preparation of the EIS to be recovered through Newark's Public Aircraft Facility formula.

(Board - 11/13/86)

Kennedy International Airport - Inter-Terminal Bus Service - Extension of the Elimination of Service Charge to Airlines for Affinity Bus Service

It was reported that Hudson General Corporation, as contractor for the Port Authority, provides four separate and distinct ground transportation services which consist of a Central Terminal Area (CTA) inter-terminal service, an Autolink service, an Affinity service and a bus service to and from the Long Term Parking Lots.

The CTA inter-terminal connecting bus service provides coach service among all the airline terminals within the central terminal area at no cost to the passengers. Under an agreement with the airlines, 50% of the cost of this service is paid for by the airlines as part of the flight fee and 50% is absorbed by the Port Authority.

Autolink uses a specially-designed wheelchair van for handicapped patrons and station wagons for V.I.P's and quick connection needs. The airlines requesting this custom service pay \$3 per passenger. Any costs that are not covered by this charge are recovered through the flight fee.

The Long Term Parking Lot service provides a free bus that transfers patrons between the unit terminals and long-term parking lots No. 8 and No. 9. This service is funded by revenues from the long-term parking lot operation.

The Affinity service is an exclusive bus service that the airlines may request when there is a need to transport a large group of passengers (minimum of fifteen) between terminals. Prior to June 1, 1985, airlines utilizing this service paid \$45 per movement with any additional expenditures over and above this amount absorbed by the Port Authority.

At its meeting on November 12, 1981, the Board authorized the Executive Director to eliminate the passenger fare on the inter-terminal bus at Kennedy International Airport effective December 13, 1981. This was done in the interest of improving public service and as a means of enhancing Kennedy International Airport's reputation and competitive position. Although this policy proved successful in achieving these two basic goals, it has also made increasingly clear the strong inter-relationship between the Affinity Bus Service program and the CTA bus service. Since the airlines were paying \$45 for each Affinity Bus movement they requested, there was a trend to reduce operating costs whereby airline agents were steering Affinity groups to curbside where they congregated waiting for the no-fare CTA bus connection service. This action reduces airline operating costs, but works against Port Authority goals of improving transfer connection times for customers and reducing congestion on the curb frontages.

At its meeting on May 9, 1985, the Board authorized the Executive Director to temporarily eliminate the aforementioned charge to the airlines for the Affinity Bus for an experimental period of from twelve to eighteen months commencing on June 1, 1985. The experimental period ends on November 30, 1986.

(Board - 11/13/86)

Under this arrangement, the airlines are not charged a fee for each Affinity movement, but rather pay 50% of the cost thereof, as defined, as part of the flight fee. The other 50% is absorbed by the Port Authority on the same basis as the existing agreement with the airlines relevant to the cost-sharing formula for the CTA Bus Service. The total cost of the Affinity Bus Service program for the prior contract period June 1, 1985 to May 31, 1986 was approximately \$236,000. Based on the continued elimination of the Affinity Bus charge it was estimated that the total cost for the current contract period, June 1, 1986 to May 31, 1987, will be approximately \$214,000.

Staff negotiated the aforementioned Affinity service cost-sharing formula with the Dewey Lessee Airlines in an effort to restore a better balance between the Affinity and the CTA Bus Services. Staff emphasized to these airlines the benefits that restoring a proper relationship between these two services would promote, namely a substantially improved level of service for inter-line connection service; reduced bus and patron congestion on roadways and curb frontage, and a potential increase in Kennedy International Airport's volume of airline tour groups which presently use competing gateway airports for inter-line international connections.

During this experimental period, the Port Authority and airlines were to evaluate the program to determine the value of making it permanent. Unfortunately, due to the increase of terrorism and airline strikes in the past eighteen months, there has been a significant decrease of group movements. For these reasons, Port Authority staff and the airlines are in agreement that this particular time frame provided a poor test period. As a result, the Dewey Lessee airlines have indicated their willingness to engage in a further six- to twelve-month test to determine the effectiveness of this policy.

Accordingly staff recommends that effective December 1, 1986, the current policy of eliminating the Affinity charge of \$45 be continued for the aforementioned six- to twelve-month period with the Port Authority and the airlines sharing the cost of the Affinity service on the same 50/50 basis currently used to cover the CTA Bus Service cost. Further, if the results of the test indicate that the elimination of the direct charge to the airlines is beneficial, the Executive Director would be authorized, at his discretion, to have this charge permanently eliminated with the continuation of the aforementioned cost-sharing agreement on such terms as he deems appropriate.

It was therefore recommended that the Board's Resolution of May 5, 1985 be amended and the Executive Director be authorized, for and on behalf of the Port Authority, to continue the elimination of the charge to the airlines for the Affinity Bus Service at Kennedy International Airport for a further temporary period and at the end of such temporary period, at his discretion, to make the elimination of the charge permanent and to enter into agreements with the Dewey Lessees and other appropriate airlines amending the agreements concerning ground transportation within the Central Terminal Area to effectuate the same, all in accordance with the foregoing.

(Board - 11/13/86)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that as set forth above the Executive Director is authorized to:
(1) extend the temporary elimination of the charge to airlines for the Affinity Bus serving the various airline terminal buildings at Kennedy International Airport, effective December 1, 1986, for an additional experimental period of from six- to twelve-months; (2) continue the agreement with the Dewey Lessees and other appropriate airlines at Kennedy International Airport whereby the airlines and the Port Authority share the cost of the Affinity Bus Service on a 50/50 basis similar to the existing arrangement with the airlines on the related Central Terminal Area Bus service; and (3) permanently eliminate, at his discretion, the Affinity Bus charge to the airlines at the end of the test period, with the airlines and the Port Authority to continue to share the cost of the service on such terms as he deems appropriate; and it is further

RESOLVED, that the form of the foregoing agreements be subject to the approval of General Counsel or his designated representative.

(Board - 11/13/86)

Establishment of an Alternate Computer Facility and Purchase and/or Lease and Installation of Additional Computer Capacity and Associated Computer Equipment

It was reported that the Board, at its meeting on March 13, 1986, authorized the Executive Director to enter into an agreement for the purchase and installation of a mainframe computer system upgrade, additional direct access storage devices and associated control units to be located at the World Trade Center. At that time, the Board was also advised of the strategy to acquire additional computer capacity annually, based on staff Computer Resource Management projections for the following year. This strategy was adopted because the per unit cost of computing capacity, millions of instructions per second, (MIPS) is decreasing each year and because it is difficult to forecast computer capacity requirements precisely beyond one year. Computer Resource Management staff currently projects the Port Authority's computer mainframe requirements to be approximately 39 MIPS by June 1987. As the current capacity of the World Trade Center complex is 27 MIPS a deficit of 12 MIPS is forecast unless further capacity is acquired and suitable space is made available by the middle of next year.

The Board was also advised of the plan to locate the next needed increment of computer capacity outside of the World Trade Center so it could also serve as a limited capacity back-up facility in the event of a disaster or extended outage at the central site. Moreover, both equipment and site costs are substantially less for locating the next increment of capacity outside of the World Trade Center. During normal operations, the data processing workload would be distributed between the primary and alternate locations.

Currently, the Port Authority contracts with vendors to provide limited data processing capacity in the event of a major disaster and for the off-site storage and archiving of critical data storage. Even so, during their 1985 audit of the Port Authority's Management Information Services function, Touche Ross & Co. indicated concern with regard to the Port Authority's ability to provide long-term data processing services in a disaster situation. The recommended alternate site will eliminate the need for these vendor services, resulting in an annual savings of approximately \$150,000.

As a result of the decision to locate the next increment of computer capacity outside of the World Trade Center, staff of the Management Information Services Department, in conjunction with the staff of the Finance and General Services Departments, evaluated several potential sites using criteria which included: cost, location, site availability, communications capability and security. These locations were the Port Authority Technical Center and the Journal Square Transportation Center in Jersey City, New Jersey and the Telecenter and Teleport I buildings in Staten Island, New York. This analysis indicates that the Teleport I site best meets the above criteria. In addition, although the estimated costs are not substantially different among the potential sites, Teleport I does have the lowest present value cost for construction, space rental, janitorial services and electricity over a ten-year period.

Electrical power at the Teleport is supplied by the Power Authority of the State of New York on a separate grid from that which supplies the World Trade Center. Locating the alternate computer facility at Teleport I will also support the World Trade Department's efforts to market the Teleport as a preferred location for computer facilities.

The Teleport site will also provide for expansion to provide for future potential needs. Accordingly, it is proposed to enter into an agreement with Teleport Associates for the leasing to the Port Authority of approximately 11,700 rentable square feet of space on the second floor of Teleport I for an initial ten-year term. The space will be delivered to the Port Authority on the execution of the lease on which date the term would commence. The lease will provide for a rental at an annual rate equivalent to \$24 per rentable square foot per year exclusive of electricity and any supplemental cleaning charges. In addition, the Port Authority would pay additional rental to cover increases in operating costs and in lieu of tax payments, if any. The Port Authority would have the right to lease an additional 10,000 rentable square feet of space contiguous to the premises at the same rental. The space will be delivered "as is" and the Port Authority will be responsible for preparing the space for its occupancy at a cost of approximately \$1,220,000. The Port Authority would also have the right to extend the term of the letting for an additional ten-year period at the rate of \$30 per rentable square foot per year or to extend the term for two additional five-year periods at the rate of \$30 per rentable square foot per year for the first five-year period and at the rate of \$36 per rentable square foot per year for the second five-year period.

Tentative agreement has also been reached with Teleport Communications, the exclusive provide of communication services at the Teleport, for the leasing of fiber optic cable required for communications between the Teleport and the World Trade Center and to provide for the Port Authority's communications needs within the premises at an approximate cost of \$30,000 per year.

Computer capacity at the alternate computer site will include a mainframe computer complex, direct access storage devices, cartridge tape drives, communication controllers, multiplexers, and other associated computer equipment at a total estimated cost of \$2,820,000. In addition, it is recommended that currently rented communication controllers be purchased and obsolete tape drives be replaced with more efficient and reliable cartridge tape drives at the World Trade Center computer site at a total estimated cost of \$990,000.

Where practicable, all equipment will be purchased through a competitive process, Request for Proposal or leased should that be a preferred method.

This recommendation does not provide for the maintenance of equipment. A separate recommendation is also being submitted for IBM maintenance of existing equipment, and equipment to be purchased as well as other necessary support functions.

It was therefore recommended that the Board authorize the Executive Director to enter into agreements with:

1. a contractor(s) to be selected for the construction of a computer center at Teleport I at an estimated cost of \$1,220,000;

2. Teleport Associates for the leasing to the Port Authority of approximately 11,700 square feet of space for an initial ten-year term with options to extend the term for a further period not to exceed ten years and with a further option to lease an additional 10,000 square feet of space; and

3. a vendor(s) to be selected for the purchase and/or lease and installation of computer capacity at Teleport I, and associated computer and communications equipment at both Teleport I and the primary computer site at the World Trade Center at an estimated cost of \$3,810,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to enter into agreements with: 1) a contractor(s) to be selected for the construction of a computer center at Teleport I at an estimated cost of \$1,220,000; 2) Teleport Associates for the leasing to the Port Authority of approximately 11,700 square feet of space for an initial ten-year term with options to extend the term for a further period not to exceed ten years and with a further option to lease an additional 10,000 square feet of space; and 3) a vendor(s) to be selected for the purchase and/or lease and installation of computer capacity at Teleport I, and associated computer and communications equipment at both Teleport I and the primary computer site at the World Trade Center at an estimated cost of \$3,810,000; and it is further

RESOLVED, that the form of such agreements be subject to the approval of General Counsel or his authorized representative.

(Board - 11/13/86)

Extension of Agreement for Data Processing Equipment and Services

It was reported that the Port Authority initially installed electronic data processing equipment in 1955. At present the Port Authority owns and is utilizing an IBM 3084-Q96 computer system, the purchase of which was authorized by the Board at its meeting on March 13, 1986. This requested authorization provides for continuation of services necessary to support the Port Authority's computer complex.

The current agreement with IBM was authorized by the Board at its meeting on December 8, 1983 for the three-year period from January 1, 1984 through December 31, 1986. The recommended extension of services provided under this agreement has been changed to a one-year period so that the planned services will be in accordance with future computer requirements included as part of the annual computer resource acquisition strategy presented to the Board at its meeting on March 13, 1986.

The current three-year agreement was authorized at a cost of \$4,413,000 although the Management Information Services Department projects that actual expenditures will total \$3,340,000. This underrun is primarily attributed to savings resulting from the delayed rental of additional equipment especially communication controllers, and underruns for originally anticipated maintenance requirements and other services. Authorization amounts for the one-year extension of the agreement incorporate a projected 10% increase in rental and maintenance rates; the expansion and replacement of computer equipment to meet growing Port Authority requirements; and an estimated \$488,000 for costs associated with contract services for the proposed alternate computer site which is recommended to the Board separately at this meeting.

Major components of these service agreements include:

Equipment Rental

In general, the Port Authority purchases required computer equipment. However, equipment that is subject to rapid obsolescence or requires frequent maintenance and repair is usually rented. The recommended agreement with the IBM Corporation provides for the rental of certain computer terminals, control units and other miscellaneous items at a one-year cost of approximately \$261,000.

Equipment Maintenance

The majority of computer equipment owned by the Port Authority is manufactured by the IBM Corporation. The decision to contract with the IBM Corporation for the maintenance and repair of this equipment ensures a degree of continuity and a superior level of service necessary to maintain a 24-hour computer operation. Third-party vendors will not provide maintenance for the mainframe computer model currently installed. The cost of maintaining the Port Authority-owned equipment is projected to increase in 1987 to \$699,000 due to increased maintenance rates, the upgrade and expansion of the Port Authority's central computer complex at the World Trade Center and the proposed development of the alternate computer site.

(Board - 11/13/86)

Other Services

The rental of software from the IBM Corporation is estimated at a cost of \$936,000 in 1987. This estimated cost incorporates the expansion of software products to increase monitoring capabilities and the overall efficiency of the computer system, as well as the additional software charges associated with the anticipated expansion of computer capacity.

Additionally, the recommended agreement with the IBM Corporation includes \$15,000 for systems engineering services and \$42,000 for the purchase of technical reference manuals necessary for Port Authority staff to support IBM computer equipment and software products.

The Port Authority uses the IBM Corporation as a primary source for educational services and training classes related to equipment and services provided by IBM. Since authorization of the current agreement in 1983, IBM's educational arm, Science Research Associates, Inc., has become a wholly-owned subsidiary necessitating a separate agreement. It is projected that IBM education costs in 1987 will be approximately \$110,000.

All payments will be made based on service or rental rates that are identical to the rates furnished the United States General Services Administration and have been confirmed by IBM to be their lowest rates available.

It was therefore recommended that the Board authorize for a one-year period effective January 1, 1987, the extension of services provided by:

1. the IBM Corporation for the rental, repair and maintenance of Port Authority data processing equipment, and the acquisition of other related services, including the rental of software, to support the Port Authority's central computer complex at the World Trade Center and at the proposed alternate, back-up computer site, at an estimated price of \$1,953,000; and
2. the IBM Corporation and its wholly-owned subsidiary, Science Research Associates, Inc., for the acquisition of IBM educational services for Port Authority staff, including training classes, at an estimated price of \$110,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize for a one-year period effective January 1, 1987, the extension of services provided by: (1) the IBM Corporation for the rental, repair and maintenance of Port Authority data processing equipment, and the acquisition of other related services, including the rental of software, to support the Port Authority's central computer complex at the World Trade Center and at the proposed alternate, back-up computer site, at an estimated price of \$1,953,000; and (2) the IBM Corporation and its wholly-owned subsidiary, Science Research Associates, Inc., for the acquisition of IBM educational services for Port Authority staff, including training classes, at an estimated price of \$110,000; the form of the extensions to be subject to the approval of General Counsel or his authorized representative.

(Board - 11/13/86)

Port Authority Industrial Park at Elizabeth - Authorization of Payment for a Riparian Grant from the State of New Jersey and Acceptance of Title to Property

It was reported that the Board, at its meeting on March 12, 1981, authorized an industrial development project in Elizabeth, New Jersey at an approximate 133-acre site located at the southern end of the Port Newark/Elizabeth facility, involving an estimated financial participation by the Port Authority of \$16.8 million, including payments to contractors, an allowance for extra work, any acquisition and related costs, and engineering, administrative and financial expenses. Subsequently, on November 18, 1981, the Port Authority and the City of Elizabeth executed an agreement setting forth the arrangements to develop the industrial park site.

At its meeting on June 14, 1984, the Board certified the Elizabeth Industrial Park as an additional facility of the Port Authority and approved the award of contracts providing for the installation of systems for the mitigation of the PCB contamination and for paving and utility construction at the site.

Approximately 12.86 acres of property inside the boundaries of the Elizabeth Industrial Park site are claimed by the State as being formerly tide-flowed. The Port Authority filed an application with the New Jersey Department of Environmental Project (NJDEP) for a Riparian Grant for this property in June of 1984. After prolonged negotiations between the Port Authority and the Attorney General's office (which plays the key role in developing recommendations to the Tidelands Resource Council which approves all grants), an amount of \$370,000 was agreed to. This amount was based on the Port Authority's original purchase price pro-rated over the area in question, with a reduction for a portion of the monies expended on site remediation. Although this amount was not anticipated in the original project authorization, adequate funds are available within the project economics to cover this expense.

A formal offering of the agreed-upon amount, contingent upon the approval of the Port Authority's Board of Commissioners, was submitted to NJDEP on July 18, 1986 and approved by the Tidelands Resource Council on September 10, 1986. The minutes of that meeting have been approved by the Commissioner of NJDEP and a formal grant offering for \$370,000 is being prepared for submission to the Port Authority. Upon Port Authority acceptance of this offering, the State will prepare a deed for Port Authority review and, subsequent to Port Authority approval, will forward the deed to the Governor for his signature.

It was therefore recommended that the Board find and determine that 12.86 acres of lands within the boundaries of the Port Authority Industrial Park at Elizabeth which the State of New Jersey claims to have been formerly flowed by mean high tide and are, therefore, owned by the State are required for public use and authorize the Executive Director to acquire title thereto from the State for a consideration in the amount of \$370,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he is hereby authorized to pay \$370,000 to the State of New Jersey for the conveyance of 12.86 acres of lands which were formerly flowed by mean high tide (Riparian Grant) within the boundaries of the Port Authority Industrial Park at Elizabeth, and to accept title to such lands; and it is further

(Board - 11/13/86)

RESOLVED, that all documents required to consummate the aforesaid transaction be subject to approval as to form by General Counsel or his authorized representative.

(Board - 11/13/86)

Port Authority Industrial Park at Yonkers - Increase in Project Authorization

It was reported that the Board at its meeting on November 8, 1984, and the Committee on Operations at its meeting on December 13, 1984 authorized the purchase of the former Otis Elevator Company Plant in Yonkers, New York and authorized staff to proceed with the development of the site as the Port Authority Industrial Park at Yonkers within a project authorization of \$24 million. \$7.5 million of the \$24 million authorized was allocated from the funds made available for projects in the State of New York by the 1984 tolls increase pursuant to the Governors' Bi-State Agreement of June 1983. The plant was acquired on May 8, 1985 for \$16.5 million.

The Board at its meeting on December 13, 1984 authorized a lease with Nissho Iwai American Corporation (NIAC) for Building No. 9 and other premises within the Industrial Park for the purpose of assembling and manufacturing rail cars for the PATH system. At its meeting on April 10, 1986, the Board authorized an increase of \$1.3 million in the project authorization in conjunction with a lease of Building No. 2 to Tri-Omni, Inc. The Board at that meeting also authorized the Executive Director to enter into a lease with American Standard, Inc. for a portion of Building No. 7.

At the time the site was acquired there were eight major buildings in the complex, built at several different stages. Building Nos. 3 and 4 are turn-of-the-century structures; Building Nos. 1, 2 and 5 were built in the 1920's (Building No. 6 was demolished by Otis Elevator some years ago); Building Nos. 7 and 9 were constructed in the mid-1970's and were the major asset in the Park to undertake the heavy manufacturing associated with NIAC's rail cars. Building No. 8 will be demolished since the costs of systems and roof repairs to make it marketable could not be recovered by projected rentals.

Prior to the Board's November 1984 authorization to acquire the site, staff assessed the basic integrity of the structures and also rated the capacity of the electrical system which was updated in the 1970's as a companion effort to the construction of Building Nos. 7 and 9. Those features were judged basically sound and project authorization assumptions included monies principally for new roofs on the older structures and funds for upgrading infrastructure and common areas. Staff has now received from several consultants an in-depth analysis of the condition of the heating plant and steam distribution system. Their combined findings available in early 1986 indicated serious deterioration of the 60-year-old central heating plant not previously evident and a total replacement is deemed necessary. At the same time, staff inventoried and evaluated the complex central power plant; though modified in the mid-1970's to accommodate the additional electrical load required by Building Nos. 7 and 9, the electrical plant requires modernization to meet safety requirements.

Conversion of the park from a single-owner, single-purpose Otis manufacturing plant with over 130 years of "grandfathered" practices to a multi-user industrial park was a second major focus during 1985. A consultant has evaluated the condition of the buildings, particularly the older ones, in view of the goal of converting them to multi-tenant, multi-function structures. Structural consultants confirmed early readings that with several exceptions, building integrity throughout was sound.

(Board - 11/13/86)

The combined consultant and staff reports were examined and reviewed in depth earlier this year and a series of critical improvements to the Facility have been recommended to: 1) provide code conforming life, health and safety, and property protective measures; 2) upgrade the aged and poorly maintained systems and structures; and 3) introduce a series of operational improvements which would make the Park more efficient and more marketable.

Following is a summary of the work already completed, underway or planned as part of the \$8.8 million provided through prior authorizations discussed above (\$7.5 million in November 1984 plus \$1.3 million in April 1986) as well as the work which will be undertaken under the \$25.7 million increased authorization recommended herein:

1) Health and Life Safety

There is health and life safety work such as the creation of fire corridors and exits, upgrading of sprinkler systems and providing of sanitary facilities totaling \$11.2 million to make the active buildings safe for their multi-tenant occupancy and to transform them from former use. Demolition of selected small buildings must also be undertaken.

2) Mechanical/Electrical Systems

\$8.9 million is needed in order to upgrade systems, particularly the replacement of the 60-year old heating plant, and to meet safety requirements in the central power plant including asbestos removal; also included in this amount is the test track committed to NIAC as part of the Port Authority's lease obligation to them.

3) Operations/Energy Improvements

\$11 million is being requested to improve traffic flow, parking arrangements, and security as well as to make energy related improvements through the replacement of windows within the park. It is anticipated that these measures will aid in the marketability of the space and result in expected higher rental rates for the combination of industrial and office space that will emerge. Financial expense to carry these improvements amounts to \$3.4 million. To determine the potential of the uncommitted and underutilized space, a consultant, Buckhurst, Fish, Hutton and Katz, was retained to assess real estate market trends and conditions in the Yonkers and Westchester area; their report received at the end of 1985 stated that industrial uses have the greatest potential, given the existing character of the complex and its surroundings, together with the nature of the users already within the complex. Based on their recommendations and staff judgments, 490,000 square feet of available space will be devoted to manufacturing purposes; an additional 60,000 square feet that already exists as office space will be marketed as such.

One of the structures, Building No. 3, a 150,000 square foot, five-story, turn-of-the-century vintage building will be excepted from any improvements during this phase of development work. Due to the high cost of recommended code conformance work, improvements to Building No. 3 will be deferred until market conditions warrant upgrading the building for lease or sale for a higher and better use than the existing industrial uses.

(Board - 11/13/86)

Alternatively, the Port Authority may choose to sell or lease the Building to others in its current condition in order to recover its prior investment in the acquisition and a share of parkwide improvements. On a periodic basis, market trends and conditions will be reassessed to determine the timing of upgrading or disposition of Building No. 3 and advancing necessary improvements. Any future action related to this building would be subject to a Board action.

Based on the current and projected revenue potential for the industrial and office space, parkwide economics indicate an anticipated revenue shortfall of \$5.1 million in coverage of the \$25.7 million increased authorization. The \$5.1 million is to be provided from funds made available for projects in New York State by the 1984 tolls increase pursuant to the agreement of June 1983 of the Governor of the State of New York and the Governor of the State of New Jersey. New York's share of funds made available by the 1984 tolls increase is \$112.5 million. Of this, the Board has previously authorized \$7.5 million for Yonkers Industrial Park, \$21,000 for the Inner Ring Transportation Study, \$12.5 million for the Oak Point Rail Freight Link, \$14 million for Metrotech, \$200,000 for the World Trade Council and up to \$350,000 authorized for the retention of professional services for the West Side Development Task Force. With up to \$5.1 million authorized for the Port Authority Industrial Park at Yonkers, \$72.829 million remains available for other New York projects.

It was therefore recommended that the Board authorize:

a) an increase of \$25.7 million in the project authorization for the Industrial Park at Yonkers from \$25.3 million to a total project authorization of \$51 million, with \$5.1 million of such increase to be allocated against the amounts to be made available for regional development projects in the State of New York as a result of the 1984 increase in the Port Authority's bridge and tunnel tolls pursuant to the agreement of June 1983 of the Governor of the State of New York and the Governor of the State of New Jersey; and

b) the availability of up to an additional \$5.1 million from project net revenue to be included in funds to be made available for regional development projects in the State of New York as a result of the Port Authority's 1984 bridge and tunnel tolls increase.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize: a) an increase of \$25.7 million in the project authorization for the Industrial Park at Yonkers from \$25.3 million to a total project authorization of \$51 million, with \$5.1 million of such increase to be allocated against the amounts to be made available for regional development projects in the State of New York as a result of the 1984 increase in the Port Authority's bridge and tunnel tolls pursuant to the agreement of June 1983 of the Governor of the State of New York and the Governor of the State of New Jersey; and b) the availability of an additional \$5.1 million over a 25-year period, in accordance with an agreed upon schedule, to be included in funds to be made available for regional development projects in the State of New York as a result of the Port Authority's 1984 bridge and tunnel tolls increase.

(Board - 11/13/86)

Port Authority Technical Center - Rental of Additional Space and Construction of Port Authority Police Firing Range and Other Technical Support Facilities

It was reported that the Board at its meetings on August 9, 1984, October 11, 1984 and September 12, 1985, authorized the Executive Director to enter into lease agreements with Trends Urban Renewal Association, Limited, for a total of 188,500 square feet of space in the Jersey Plaza Building (now referred to as the Port Authority Technical Center) plus an additional 9,155 square feet of rent-free space obtained by making a one-time construction payment of \$238,000. The building consolidated a variety of field units located primarily in New Jersey and relocated a unit of the Engineering Department from the World Trade Center. It was reported that a total of 430 staff would be, and are now, housed at the Port Authority Technical Center.

The Board also authorized agreements with the owners for modifications of rented areas for the lab, shop and office space needs of units being relocated to the building. Additionally, a cafeteria and medical clinic were approved and have been constructed. The approved Teleconference Center is planned to be in operation by 1987.

The Port Authority plans, with Board approval, to occupy an additional 108,000 square feet of space, commencing on or about January 1, 1987. This lease agreement amendment would be based on the same terms and conditions as stipulated in the original lease agreement. The leasing of this new space will be for approximately thirteen years so as to terminate at the time of the original lease agreement (fifteen years), plus a Port Authority option for two ten-year extensions, bringing the total maximum lease amendment period to 33 years. The basic annual rental for the additional space would increase from the \$7.30 per square foot in the 1984 lease, to \$9.50 per square foot, subject to the prevailing agreed-to escalation formula, plus additional charges initially set at \$1.44 per square foot for tax payments, and an estimated \$2 per square foot for utilities, bringing the total first-year occupancy costs to \$1,398,000. The lease amendment would include provisions for the building owner to perform agreed-upon alterations and maintenance at the Port Authority Technical Center. The impact of additional Port Authority staff on the levels of previously agreed-upon transportation services will require a change in the existing lease provision dealing with such services. The rental of these additional spaces would bring the total Port Authority occupancy for the Port Authority Technical Center, when combined with the 188,500 square feet currently leased, to 296,500 square feet, excluding the rent-free space. Thus, the Port Authority would be the sole occupant of this building. The space released by the World Trade Center-based units that would be relocated to the Tech Center is estimated to be worth approximately \$600,000 in annual gross rental to the World Trade Center.

Police Firing Range

A police firing range consisting of ten shooting positions, constructed in 1976, is currently located on the B-6 level of One World Trade Center. As the police force is expanding, there is a need to increase the capability to train police personnel on standardized and specialized weapons, and to provide them with the most up-to-date equipment and facilities to accommodate all of the Port Authority's firearms training programs.

(Board - 11/13/86)

Currently there are serious problems in utilizing the existing World Trade Center firing range. Due to significant environmental problems and down range column configurations, not all of the existing range firing positions can be used. Consideration has been given to expanding the range to meet the growing need, but the construction cost to accomplish this would be prohibitive. Firing range manufacturers have indicated that construction of ranges below grade poses serious problems, specifically in the area of ventilation.

In an effort to meet current training requirements in all firearm programs, which includes high power specialized weapons training, the Public Safety Department has had to arrange for the use of firing ranges in Mahwah, New Jersey and Peekskill, New York. The availability of these ranges in the future is being sharply curtailed since the State of New Jersey requires all law enforcement officers to qualify twice a year and similar legislation is pending in New York.

In order to meet police force needs for firearms training, plans have been developed to construct a firing range at the Port Authority Technical Center. The proposed eighteen position firing range will accommodate the annual firing qualification requirement for the entire Port Authority police force shooting standard pistol, shotgun and sophisticated high powered weapons and eliminate the need for non-Port Authority facilities. The estimated cost of construction for the new firing range at the Tech Center is \$4,342,000.

Technical Support Facilities

Several General Services Department units are currently located on various subgrade levels in the World Trade Center and at the New York Truck Terminal. In addition to addressing expansion needs and resolving environmental problems the relocation of these units to the Port Authority Technical Center would consolidate them with other GSD units already there, simplifying management overview.

The Reproduction Shop is now located on the B-3 level of the World Trade Center. Serious environmental problems have developed as additional equipment needed to meet the unit's increased workload demands has been added in the existing, limited shop area. To resolve these problems, it is proposed to relocate the Reproduction Shop to the Port Authority Technical Center at an estimated cost of \$1,203,000.

The Port Authority's Records Center currently occupies space on the B-5 level. To optimize downsized offices in tower office space, excess records must be relocated to the Records Center storage area. However, the Records Center is at capacity and there is no available adjacent space for expansion. It is therefore proposed to relocate the Records Center to the Port Authority Technical Center at an estimated cost of \$688,000.

The Display Services Unit and the Central Automotive Division's administrative offices are now located at the New York Truck Terminal. The potential relocation of staff from the New York Truck Terminal has accelerated plans for consolidation of these units with other GSD technical support functions currently at the Port Authority Technical Center. Also, existing problems in working conditions in the Display Services unit would be resolved by its relocation. The estimated costs for relocation of the Display Services and CAD units are \$474,000 and \$823,000, respectively.

(Board - 11/13/86)

Remaining leased space would be used for a general meeting room, a building manager's office, a small art storage area and reserve space for occupancy by units at an estimated cost of \$1,010,000.

It was therefore recommended that the Board authorize the Executive Director to enter into a lease amendment with Trends Urban Renewal Association, Limited, for the additional premises described above, and enter into other agreements with Trends Urban Renewal and others for construction and finishing work in the premises and for purchase and installation of equipment and furnishings therefor, all on the terms set forth above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to: (a) execute a lease amendment with Trends Urban Renewal Association, Limited, owners of the building now referred to as the Port Authority Technical Center (formerly Jersey Plaza Building) at 241 Erie Street, Jersey City, New Jersey, to lease the balance of the building (approximately 108,000 rentable square feet) for a period of approximately thirteen years, commencing approximately January 1, 1987, with two additional ten-year options to make it co-terminous with the existing September 1984 lease; the space to be occupied by the Police Division's firing range and offices and shops for various General Services Department technical support units, and serve as Port Authority reserve space; the base annual rental for the additional space to be \$9.50 per rentable square foot, subject to the existing escalation which is based on a factor of 50% of the increase in the Consumer Price Index (CPI) for the New York/Northeast New Jersey Metropolitan Area for All Wage Earners during the previous five-year term of the lease, with each increase limited to not more than 12½%, or 50% of the CPI, whichever is less, plus additional annual charges (initially set at \$1.44 per square foot) for tax payments which the owner will make, and an estimated \$2 per square foot for utilities, bringing total first year occupancy costs to approximately \$1,398,000; (b) enter into contract with the owner, Trends Urban Renewal Association Limited, or with contractors, for the construction of a police firing range, offices and shops for various General Services Department technical support facilities, and building exterior refurbishing including signage at an estimated cost of \$7,815,000; (c) enter into agreements for the purchase and installation of necessary equipment and furnishings and the provision of telecommunication services for the newly constructed facilities, and any relocation services at a total estimated cost of \$726,000; and it is further

(Board - 11/13/86)

RESOLVED, that the form of the aforesaid agreement or agreements be subject to approval as to form by the General Counsel or his duly designated representative.

Whereupon, the meeting was adjourned.

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of November 13, 1986. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on December 11, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on December 11, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on December 11, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on December 11, 1986, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 12/11/86)

Purchase of Property Parasol Insurance - The Port Authority of New York and New Jersey and Port Authority Trans-Hudson Corporation

It was reported that at its meeting on November 14, 1985, the Board authorized the purchase of Property Parasol Insurance in limits of \$200 million per occurrence in excess of the existing underlying Port Authority and PATH All Risk Property Damage and Loss of Revenue Insurance and Bridge and Tunnel Property Damage and Loss of Revenue Insurance, effective October 27, 1985, for a one-year term at a total premium cost of \$520,000.

After extensive negotiations with Lloyd's and other London insurers, underwriters have agreed to renew coverage for \$200 million per occurrence of Property Parasol Insurance for a period of slightly over fifteen months, effective October 27, 1986, at a modest premium increase of 10%. The total premium will be \$724,010, which is equal to an annualized premium of \$572,000.

The extension of the Property Parasol Insurance termination date to February 1, 1988 will bring it into conformance with the Bridge and Tunnel Property Damage and Loss of Revenue Insurance policy anniversary, thus providing concurrency in coverage for these major facilities.

Recommendation was made that the Board authorize the purchase of a Property Parasol Insurance Program in a limit of \$200 million per occurrence in excess of the existing underlying Port Authority and PATH \$200 million All Risk Property Damage and Loss of Revenue Insurance and \$300 million Bridge and Tunnel Property Damage and Loss of Revenue Insurance, from Lloyd's Underwriters and other London insurers, for the period October 27, 1986 to February 1, 1988, at a total premium of \$724,010, through the brokers Hamond & Regine, Inc. and C.E. Heath & Co., Ltd.

Approved.

(Board - 12/11/86)

Purchase of Public Liability Insurance - The Port Authority of New York and New Jersey and Port Authority Trans-Hudson Corporation

It was reported that significant underwriting losses incurred by the world insurance market since 1979 coupled with depressed premium pricing in the early 1980's resulted in a severe tightening of insurance markets in 1984. As a consequence, by 1985 the Port Authority's Public Liability Insurance Program had been significantly impacted, chiefly by cancellations due to capacity contraction and repricing demands.

At its meeting on November 14, 1985, the Board, in recognizing these pressures, authorized a restructuring of the Public Liability Insurance Program, including the extension of up to 60% of the \$30 million excess of a \$2 million self-insured retention layer of combined airport and non-airport liability insurance to October 27, 1988, at an increase in annual premium.

At the same meeting, the Board also authorized the purchase of:

1. Railroad Liability Insurance, for a one-year term, in limits of \$12 million part of \$30 million excess of a \$2 million or \$5 million self-insured retention, depending on the particular insurer, and \$95 million excess of \$30 million of coverage, for a total of \$125 million of insurance;
2. General Liability Insurance, for a one-year term, in limits of \$12 million part of \$30 million excess of a \$2 million self-insured retention, and \$95 million excess of \$30 million of coverage, for a total of \$125 million of insurance, and
3. Aviation Liability Insurance, for a one-year term, in limits of \$12 million part of \$30 million excess of a \$2 million self-insured retention, and \$370 million excess of \$30 million of coverage, for a total of \$400 million of insurance.

The total annual premium cost of the restructured Public Liability Insurance Program was authorized not to exceed \$5,630,000. During the ensuing year, however, market conditions continued to exert pressure on the program, such that additional cancellations were received as capacity continued to contract and reinsurance arrangements compelled insurers to limit policy conditions and to seek further premium increases.

Now, however, after extensive discussions with insurers, and as a result of the excellent relationship that the Port Authority has maintained with London insurers, staff has been able to negotiate a more favorable, on balance, Public Liability Insurance Program. Under the new program, the former General and Railroad Liability Insurance coverages have been combined into a non-airport program and limits of coverage have been increased from \$125 million to slightly over \$239 million. In addition, staff has arranged for the purchase of additional airport liability insurance, raising the total limit of this coverage from \$400 million to \$440 million.

(Board - 12/11/86)

With respect to all Port Authority and PATH non-airport operations, the revised program provides slightly over \$239 million of liability insurance, consisting of 57.333% of \$30 million excess of a \$2 million self-insured retention, effective October 27, 1986 for a one-year term and renewable for an additional one-year term thereafter, as previously authorized by the Board at its meeting on November 14, 1985, and the following non-airport liability insurance that is now recommended for authorization:

1. from Lloyd's underwriters and other London insurers, effective October 27, 1986:
 - a. 42.667% of \$28 million excess of a \$4 million self-insured retention, for a three-year term;
 - b. \$25 million excess of \$28 million, of which approximately 80% is for a three-year term and approximately 20% is for a one-year term;
 - c. \$45 million excess of \$53 million, of which approximately 90% is for a three-year term and approximately 10% is for a one-year term; and

2. from American Casualty Excess Insurance Co., Ltd., effective December 1, 1986 for an indefinite term (subject to rights of cancellation), \$140 million excess of approximately \$99 million, subject to an annual aggregate policy loss limit of \$140 million.

All non-airport liability insurance now recommended for authorization will be written on a claims-made basis, which, in the absence of the discovery periods described below, would provide coverage only for losses which both occur and are reported during the policy term. Because of heavy underwriting losses, underwriters are increasingly attempting to limit their responsibility for losses by writing coverage under the "claims-made" form (as distinguished from "occurrence" based insurance). While staff attempted to obtain coverage on an occurrence basis during recent negotiations, underwriters would only offer coverage under the claims-made form.

Although the claims-made form provides for continuous claims acceptance so long as coverage is maintained with the insurer, this protection was deemed inadequate given the possibility of changes in insurers. Staff, therefore, negotiated with underwriters extended post-termination claims discovery periods, as follows:

Layer	Term	Discovery
42.667% part of \$28mm	3 years	5 years
80% part of \$25mm excess of \$28mm	3 years	5 years
10% part of \$25mm excess of \$28mm	1 year	5 years
10% part of \$25mm excess of \$28mm	1 year	2 years
90% part of \$45mm excess of \$53mm	3 years	5 years
10% part of \$45mm excess of \$53mm	1 year	5 years

These discovery periods will allow the Port Authority to present claims for occurrences happening within the term of the policy during the discovery periods.

(Board - 12/11/86)

The American Casualty Excess Insurance, Co., Ltd., which is providing both \$140 million excess of approximately \$99 million on non-airport liability insurance and \$140 million excess of \$300 million of airport liability insurance, also writes its policies on a claims-made basis providing for claims acceptance so long as coverage is maintained with said insurer. In addition, American Casualty Excess provides, at the insured's option, for purchase of a discovery period in the event of policy termination, for a length to be determined by the insured, for an additional premium payable at termination, determined in accordance with the length of the discovery period chosen.

Staff is also negotiating non-cancellation provisions with the Lloyd's underwriters and other London insurers of the slightly better than \$99 million of non-airport liability insurance. These provide that neither the insurers nor the Port Authority may cancel the coverage unless total claims exceed an agreed amount. Staff and underwriters are presently discussing \$1 million above self-insured amounts (i.e total losses in excess of \$5 million) as the appropriate amount.

With respect to all Port Authority airport operations, the revised program provides \$440 million of airport liability insurance, consisting of 57.333% of \$30 million excess of a \$2 million self-insured retention previously authorized by the Board; 42.667% of \$30 million excess of a \$2 million self-insured retention and \$270 million excess of said \$30 million on an occurrence basis, effective October 27, 1986 for a one-year term, from Lloyd's underwriters; and \$140 million excess of \$300 million on a claims-made basis, subject to an annual aggregate policy loss limit of \$140 million, effective December 1, 1986 for an indefinite term (subject to rights of cancellation), from American Casualty Excess Insurance Co., Ltd.

The first year annual premium cost of the non-airport and airport coverage being provided by American Casualty Excess is \$750,000, with premiums for succeeding annual periods determined immediately prior to each anniversary date. It is not anticipated that premiums will increase significantly in the foreseeable future if favorable loss experience continues. In addition to the first year premium, American Casualty Excess requires a one-time payment of a \$750,000 reserve premium deposit, which is applied against the second through fifth year annual premiums, as determined, on the basis of \$75,000, \$150,000, \$225,000 and \$300,000 on December 1, 1987, 1988, 1989 and 1990, respectively. While in the event of cancellation by either party, annual premiums are returned on a pro-rata basis, in the event the Port Authority elects to cancel prior to the end of the fifth year, all remaining reserve premium deposit is forfeited. Should the insurer elect to cancel, however, the reserve premium deposit will be refunded pro-rata.

It is anticipated that the premium for the purchase of the Public Liability Program when full placement of all coverage is completed will be \$7,401,000 on an annualized basis, which includes previously authorized amounts. Despite the increase in premium and certain policy form concessions, the revised program is recommended because of its increased limits, recombined coverages, anticipated elimination of gaps in coverage and its non-cancellation and discovery provisions.

(Board - 12/11/86)

Recommendation was made that the Board authorize the purchase, by the Port Authority, of:

1. 42.667% of \$28 million excess of a \$4 million self-insured retention, and \$70 million excess of said \$28 million of non-airport liability insurance covering all non-airport operations of the Port Authority and PATH, from Lloyd's underwriters and other London insurers through brokers Hamond & Regine, Inc. and C.E. Heath & Co., Ltd., effective October 27, 1986, for a one- or three-year term, varying with the particular insurer, at an annual premium cost not to exceed \$3,034,000;

2. 42.667% of \$30 million excess of a \$2 million self-insured retention, and \$270 million excess of said \$30 million of airport liability insurance covering all Port Authority airport operations, from Lloyd's underwriters through brokers Hamond & Regine, Inc. and C.E. Heath and Co., Ltd., effective October 27, 1986, for a one-year term, at an annual premium cost not to exceed \$2,757,000; and

3. \$140 million excess of approximately \$99 million of non-airport liability insurance, and \$140 million excess of \$300 million of airport liability insurance covering all operations of the Port Authority and PATH, from American Casualty Excess Insurance Co., Ltd. through brokers Hamond & Regine, Inc. and Atlantic Security, Ltd., effective December 1, 1986, for an indefinite term, at a premium cost for the first year of coverage of \$750,000, plus a reserve premium deposit of an additional \$750,000, which will be applied against premiums for the second through the fifth policy years.

Approved.

(Board - 12/11/86)

1987 Budget - January 1 through March 31, 1987

It was reported that in connection with the items constituting the proposed 1987 Budget being considered by the Board, since neither of the States has completed a review of the 1987 Budget it will not be ready for adoption before the December 1986 meeting of the Board. It is appropriate therefore to confirm the authority of the Executive Director to continue to make payments for expenses and to undertake contractual commitments, in accordance with the By-Laws, for continuing operations and professional services, all as contemplated in the proposed 1987 Budget presented to the Commissioners on October 29, 1986. It is expected that such payments will not exceed \$200 million per month through March 31, 1987.

As contemplated in the proposed 1987 Budget, in light of recent staff studies, and similar studies conducted by private and public agencies, of salary, wage, and consumer price index trends, and consistent with the Port Authority Labor Relations Instruction, effective December 28, 1986, salary ranges for staff not represented for collective negotiations would be increased by no more than 4.9%. Minor revisions in benefit programs would be implemented as of January 1, 1987 and compensation programs for affected individuals, as revised, would continue to be administered on the basis of merit.

Further, as reported to the Commissioners at the December 6, 1985 Board Meeting at which the 1986 Budget was presented, approval was also to have been sought for the Executive Director to authorize the appropriation for the purpose of capital expenditures to be made in 1986 of funds paid into and available in the Consolidated Bond Reserve Fund in a total amount not to exceed \$100 million, together with capital funds to be carried into 1986 and the proceeds of Consolidated Bonds and Commercial Paper Notes to be issued in 1986. To provide sufficient funds to substantially complete the Port Authority's capital program for 1986, it was considered desirable by the Executive Director to authorize, pending Board approval, the Chief Financial Officer to appropriate necessary amounts on a monthly basis from the Consolidated Bond Reserve Fund for application to capital construction to cover current capital outlays. As of October 31, 1986, approximately \$52 million had been appropriated from the Consolidated Bond Reserve Fund for direct investment in Port Authority facilities. It is anticipated that additional appropriated funds of approximately \$48 million will be needed during November and December 1986, based on total gross capital expenditures estimated at \$511 million for 1986.

The 1987 Budget anticipates gross capital expenditures of approximately \$761 million. To provide sufficient funds to substantially complete the Port Authority's capital program for 1987, together with capital funds to be carried into 1987 and the proceeds of Consolidated Bonds, Commercial Paper Notes and other obligations to be issued in 1987, it is desirable at this time to authorize the appropriation for the purpose of capital expenditures to be made in 1987 of funds paid into and available in the Consolidated Bond Reserve Fund in a total amount not to exceed \$120 million.

(Board - 12/11/86)

To continue the Port Authority practice of annually setting aside amounts towards covering self-insured contingent losses, it is necessary in light of currently established accounting standards to authorize an appropriation from the Consolidated Bond Reserve Fund of a total amount, consistent with the Port Authority's financial commitments and policies, not to exceed \$7 million to a Provision for Self-Insurance for each of the years 1986 and 1987.

Consistent with the Port Authority's financial commitments and policies, the amounts so financed would not exceed an amount which when combined with any other amounts financed in 1986 and 1987 from such funds paid into and available in the Consolidated Bond Reserve Fund, would preclude the Port Authority from: (a) maintaining the General Reserve Fund at an amount equal to 10% of the par value of outstanding Port Authority bonds legal for investment (other than New York State Guaranteed Commuter Car Bonds); and (b) maintaining in all debt reserve funds an aggregate amount in excess of the next two years' debt service on outstanding Port Authority bonds secured by a pledge of the General Reserve Fund.

The 1987 Budget is a financial planning tool which outlines the estimated expenditures for programs already authorized or to be considered by the Commissioners.

It was therefore recommended that the Board:

1. confirm that the Executive Director is authorized through March 31, 1987 to make expenditures at a rate not to exceed \$200 million per month, including but not limited to personnel, materials and services, equipment, supplies, utilities, cleaning services and insurance, and to undertake contractual commitments, in accordance with the By-Laws, and that the Executive Director is authorized to implement the annual salary range adjustment, all as contemplated in the proposed 1987 Budget for The Port Authority of New York and New Jersey (including the anticipated expenditures of subsidiary corporations) presented to the Commissioners on October 29, 1986;

2. in connection with the Port Authority's capital program, approve and authorize financing by the Executive Director by application of funds paid into and available in the Consolidated Bond Reserve Fund, including investment earnings attributable to the General Reserve Fund not required for the maintenance of that Fund, to capital expenditures during the year 1986 and during the year 1987 in connection with the Port Authority's facilities in a total amount not to exceed \$100 million in 1986 and \$120 million in 1987; provided, however, that the amount so financed would not exceed an amount which, when combined with any other amounts financed in 1986 and 1987 from such funds paid into and available in the Consolidated Bond Reserve Fund, would preclude the Port Authority from: (a) maintaining the General Reserve Fund at an amount equal to 10% of the par value of outstanding Port Authority bonds legal for investment (other than New York State Guaranteed Commuter Car Bonds); and (b) maintaining in all debt reserve funds an aggregate amount in excess of the next two years' debt service on outstanding Port Authority bonds secured by a pledge of the General Reserve Fund; and

3. in connection with the Port Authority's self-insurance program, approve and authorize the application by the Executive Director of funds paid into and available in the Consolidated Bond Reserve Fund, including investment earnings attributable to the General Reserve Fund not required for the maintenance of that Fund, to a Provision for Self-Insurance in connection with the Port Authority's facilities in a total amount, consistent with the Port Authority's practice of self-insurance and to be applied from time to time, not to exceed \$7 million each year in 1986 and 1987; provided, however, that the amount so applied would not

(Board - 12/11/86)

exceed an amount which, when combined with any other amounts financed in 1986 and 1987 from such funds paid into and available in the Consolidated Bond Reserve Fund, would preclude the Port Authority from: (a) maintaining the General Reserve Fund at an amount equal to 10% of the par value of outstanding Port Authority bonds legal for investment (other than New York State Guaranteed Commuter Car Bonds); and (b) maintaining in all debt reserve funds an aggregate amount in excess of the next two years' debt service on outstanding Port Authority bonds secured by a pledge of the General Reserve Fund.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that it is hereby confirmed that the Executive Director is authorized through March 31, 1987, to make expenditures at a rate not to exceed \$200 million per month, including but not limited to personnel, materials, utilities, cleaning services and insurance, and to undertake contractual commitments, in accordance with the By-Laws, and the Executive Director is authorized to implement the annual salary range adjustment, all as contemplated in the proposed 1987 Budget for The Port Authority of New York and New Jersey (including the anticipated expenditures of subsidiary corporations) presented to the Commissioners on October 29, 1986; and it is further

RESOLVED, that, in connection with the Port Authority's capital program, the financing by the Executive Director by application of funds paid into and available in the Consolidated Bond Reserve Fund, including investment earnings attributable to the General Reserve Fund not required for the maintenance of that Fund, of capital expenditures during the year 1986 and during the year 1987 in connection with the Port Authority's facility in a total amount not to exceed \$100 million in 1986 and \$120 million in 1987 be and the same hereby is approved and authorized; provided, however, that the amount so financed shall not exceed an amount which, when combined with any other amounts financed in 1986 and 1987 from such funds paid into and available in the Consolidated Bond Reserve Fund, will preclude the Port Authority from: (a) maintaining the General Reserve Fund at an amount equal to 10% of the par value of outstanding Port Authority bonds legal for investment (other than New York State Guaranteed Commuter Car Bonds); and (b) maintaining in all debt reserve funds an aggregate amount in excess of the next two years' debt service on outstanding Port Authority bonds secured by a pledge of the General Reserve Fund; and that the application from time to time of funds as set forth herein is hereby approved and authorized; and it is further

(Board - 12/11/86)

RESOLVED, that, in connection with the Port Authority's self-insurance program, the application by the Executive Director of funds paid into and available in the Consolidated Bond Reserve Fund, including investment earnings attributable to the General Reserve Fund not required for the maintenance of the Fund, to a Provision for Self-Insurance in connection with the Port Authority's facilities in a total amount, consistent with the Port Authority's practice of self-insurance and to be applied from time to time, not to exceed \$7 million each year in 1986 and 1987, be and the same hereby is approved and authorized; provided, however, that the amount so applied shall not exceed an amount which, when combined with any other amounts financed in 1986 and 1987 from such funds paid into and available in the Consolidated Bond Reserve Fund, will preclude the Port Authority from: (a) maintaining the General Reserve Fund at an amount equal to 10% of the par value of outstanding Port Authority bonds legal for investment (other than New York State Guaranteed Commuter Car Bonds); and (b) maintaining in all debt reserve funds an aggregate amount in excess of the next two years' debt service on outstanding Port Authority bonds secured by a pledge of the General Reserve Fund; and that the application from time to time of funds as set forth herein is hereby approved and authorized.

(Board - 12/11/86)

VIA - Request for External Advertising Sales Solicitation

It was reported that major policy decisions have been made by the Port Department to undertake new programs to market the Port of New York and New Jersey and to secure additional revenue for the Port Authority. The retention of a representative to solicit advertising for VIA one of the Port Department's primary marketing tools, is consistent with these efforts and will serve to complement the activities of the Department.

VIA, first published in February 1949, has become an integral part of the Port Authority's port, world trade and airport international trade development programs. Recently awarded the "Award of Excellence" by the American Association of Port Authorities, VIA is a major communication vehicle which brings news of shipping and transportation services available in the Port of New York and New Jersey. Published by the Port Department monthly, approximately 30,000 issues are circulated worldwide to exporters, importers, steamship and airline carriers, transportation representatives and other decision makers in the routing of international cargoes.

The present method of advertising solicitation for VIA is to send flyers announcing editorial themes, space availability and advertising rates to industry representatives. Potential accounts are then pursued by telephone contact if time permits. It has been determined that with a concentrated emphasis on personal contact revenues from this activity could be increased above the present average of \$100,000 annually. An evaluation of the best method to achieve this result included analyzing three alternative approaches: an additional permanent employee, a project employee or an external professional advertising sales specialist compensated on a commission basis. The latter alternative was chosen by the Port Department because it would result in no risk or bottom line cost to the Authority.

Accordingly, staff interviewed seven candidates with expertise in such advertising sales and selected Gerard C. Ekedal, doing business as Viking Sales and Marketing, as the candidate most qualified to meet VIA's needs. Mr. Ekedal has sold advertising to the transportation and shipping industries as an advertising representative for **The Journal of Commerce** for 40 years. During that time Mr. Ekedal amassed an extensive, high-quality client list and became a highly respected representative of the industry. Since he plans to retire from **The Journal of Commerce** at the end of 1986, these advantages can be put to work for VIA. The selection of Mr. Ekedal was reviewed and concurred in by Public Affairs and Port Department management.

Mr. Ekedal, doing business as Viking Sales and Marketing, will receive 20% of the net advertising revenue received as a result of Viking's solicitation and procurement of advertising. This activity will include the securing of all copy, cuts, listings and other data necessary to enable the Port Authority to produce the advertising in accordance with its usual practice. All travel and selling expenses of Viking Sales and Marketing incurred in the course of soliciting and procuring advertising for VIA will be Viking's sole responsibility and no other charges relating to the sale of advertising will be billable to the Port Authority.

(Board - 12/11/86)

Board approval is requested for the Executive Director to enter into an agreement with Gerard C. Ekedal, doing business as Viking Sales and Marketing, to begin on or about January 1, 1987 and to remain in effect until December 31, 1989. The agreement will provide that the Port Authority have an option to renew the agreement for a three-year period. The agreement is to be self-supporting; all funds to be paid to Viking will be generated from the sales activity.

It was therefore recommended that the Board authorize:

1. the Executive Director to enter into an agreement with Gerard C. Ekedal, doing business as Viking Sales and Marketing, to solicit print advertising for VIA at the standard commission of 20% of the net advertising revenue received from and directly attributable to Viking's efforts, for a period of three years, with an option to renew the agreement for an additional three-year period, on the same terms and conditions; and
2. the Director of the Port Department, in his discretion, to exercise such option to renew the agreement.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into an agreement with Gerard C. Ekedal, doing business as Viking Sales and Marketing, to solicit print advertising for VIA at the standard commission of 20% of the net advertising revenue received from and directly attributable to Viking's efforts, for a period of three years, with an option to renew the agreement for an additional three-year period, on the same terms and conditions and; it is further

RESOLVED, that the Director of the Port Department, is authorized in his discretion, to exercise such option to renew the agreement; and it is further

RESOLVED, that the form of the agreement be subject to approval of General Counsel or his authorized representative.

(Board - 12/11/86)

Elizabeth - Port Authority Marine Terminal - Expansion of Maher Terminals, Inc. Fleet Street Leasehold - Surrender of Puerto Rico Maritime Shipping Authority Leasehold

It was reported that Maher Terminals, Inc. (Maher) is a major terminal operator at both Port Newark and the Elizabeth-Port Authority Marine Terminal (EPAMT), operating four separate facilities. In Port Newark, Maher operates a 40-acre lumber terminal and an adjacent 25-acre general purpose terminal for imported steel, paper and other cargo. In the EPAMT, Maher operates the 230-acre Tripoli Street Container Terminal and the 80-acre Fleet Street Container Terminal. The execution of the lease for the Fleet Street Container Terminal, bearing Port Authority Lease No. EP-148, for a term expiring February 28, 1989, was authorized by the Board at its February 9, 1983 meeting. Maher has experienced significant increases in business volume at the Fleet Street Container Terminal and in order to better serve its customers at the terminal, requires additional acreage and berths so that it may provide dedicated terminal areas for larger customers while continuing to provide premier general purpose terminal services for the smaller container customers which are important to the Port of New York and New Jersey.

Adjacent to the Fleet Street Container Terminal is the 110-acre terminal leased by the Puerto Rico Maritime Shipping Authority (PRMSA) pursuant to a lease for an initial term expiring in the year 1991, with PRMSA having the option to extend the term through the year 2001, which was authorized by the Board at its August 27, 1985 meeting. As a result of changes in the services provided by PRMSA, competition, and changing corporate policies, PRMSA no longer requires the exclusive use of this facility.

In order to accommodate Maher's desire to expand its Fleet Street Container Terminal, it is proposed that the Port Authority accept a surrender of the premises leased by PRMSA and simultaneously enter into an agreement with Maher to add those premises, plus additional acreage, to the premises currently leased by Maher under Lease No. EP-148. As part of this transaction, the Port Authority would pay PRMSA the sum of \$4 million. PRMSA has agreed that it would continue to utilize Port Authority Marine Terminal Facilities either as a customer of Maher or in some other capacity for a period of at least five years.

The proposed agreement with Maher would cover 4,200 feet of berth, approximately 200 acres of upland, miscellaneous buildings and existing improvements, and four Port Authority-owned cranes presently on the premises. The agreement would extend the term of the Maher lease for a term of 25 years commencing January 1, 1987.

During the first five years of the extended term, Maher will perform general improvement work, including demolition of certain unused buildings, miscellaneous paving and lighting, and construction of and improvements to terminal buildings, gate complexes, fencing, reefer outlets and dolly pads. Maher has also agreed to replace a minimum of 2,000 feet of crane rail. The Port Authority will pay Maher an amount not to exceed \$14 million for the general improvement and crane rail replacement work. Maher will also purchase and install three new container cranes during this period and perform other improvements and general terminal updating work. It is expected that Maher will spend approximately \$15 million on this work in excess of the amounts paid to it by the Port Authority.

(Board - 12/11/86)

In addition to the work to be performed by Maher, the Port Authority has agreed to deepen 2,000 feet of Maher's berth from its current 35 feet to 40 feet at the face of the wharf. Maher shall have the right to request berth deepening for the remaining length of its berth to 37 feet at 15 feet from the face of the wharf. The Port Authority may request that Maher perform certain portions of this work. The estimated cost of the berth deepening work is approximately \$5 million. The Port Authority has also agreed to perform or pay for additional terminal improvement work including but not limited to paving, burying of utilities, and curb removal at an estimated cost of \$6 million.

The Port Authority will have access, during the term of the extension, to 675 feet of berth and 50 feet of adjacent land which abut the premises for itself and its designees.

During the extended term of the letting, Maher would pay the following rentals:

1. a basic rental for all of the premises, including the use of the berth, and the use of the existing crane rail and buildings, at the following rates per year:

Year 1 - \$4.21 million
Year 2 - \$4.71 million
Year 3 - \$5.21 million
Year 4 - \$6.41 million
Year 5 - \$7.41 million
Year 6 through 25 - \$9.01 million

The basic rental is subject to escalation on January 1, 1996 and every three years thereafter at the rate of 3% per year compounded annually. Following replacement of the crane rail, the basic rent will be proportionately abated based upon a crane rail rental rate of \$250 per lineal foot. The proportionate share of the basic rental attributable to the crane rail will be derived by a formula set forth in the lease. As the annual rent increases the proportionate share will increase. Maher's basic rent shall be further abated by various amounts as set forth in the lease for the annual rental value of buildings which have been demolished. Abatement of basic rental on account of crane rail shall begin upon completion of the construction of the replacement crane rail. Abatement of basic rental on account of buildings demolished during the first four years of the extended term shall commence in the fifth year of the extended term, and abatement of basic rental on account of buildings demolished in the fifth year of the extended term shall commence in the following year.

2. An additional rental for the use of the berth in an amount equivalent to 130% of the Port Authority's cost for deepening of the berth, if the work is performed by the Port Authority, or 105% of the amount paid by the Port Authority for deepening the berth if the work is performed by the lessee, multiplied in either case by a variable monthly factor as set forth in the lease.

(Board - 12/11/86)

3. A facility rental in an amount equivalent to 105% of the amount paid by the Port Authority towards the construction of leasehold improvements, including crane rail, multiplied by a variable monthly factor as set forth in the lease.

4. A crane usage rental at the rate of \$711,000 per year for the four existing cranes. This rental is subject to escalation in proportion to the escalation of the basic rent. Maher has the right to terminate the letting of any or all of these cranes.

The effectuation of this transaction presents an opportunity to the Port Authority for revenue enhancement and modernization of first generation container terminals necessary to accommodate the current 3,000 - 4,000 TEU, Deep Draft, Load-Center Oriented Containerships.

Considering all of the factors associated with the letting, including the PRMSA buyout and the necessary Port Authority investment, staff has determined that this arrangement will provide revenues adjudged fully compensatory to the Port Authority.

It was therefore recommended to the Board that the Board authorize the Executive Director on behalf of the Port Authority to accept a surrender from Puerto Rico Maritime Shipping Authority of its premises at Elizabeth Port Authority Marine Terminal and to enter into an agreement amending the Port Authority's lease agreement with Maher Terminals, Inc. covering such premises on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that on the terms and conditions set forth herein the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into agreements with: (1) Puerto Rico Maritime Shipping Authority (PRMSA) providing for the surrender of the 110-acre terminal and exclusive berth space at Elizabeth Port Authority Marine Terminal (EPAMT) leased to PRMSA under Port Authority Lease No. EP-111; and (2) Maher Terminals, Inc. (Maher) to add the premises and berth space currently leased by PRMSA plus additional acreage to the premises currently leased by Maher under Port Authority Lease No. EP-148 and to extend the term of the letting under that lease for a 25-year period commencing January 1, 1987; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 12/11/86)

Imported Automobile Marine Terminal - Facility Certification - Project Authorization

It was reported that imported automotive vehicles are an important source of jobs and income in the New York/New Jersey port region and a significant source of revenue for the Port of New York and New Jersey. The port's ability to provide adequate facilities for current and new importers is threatened by a shortage of unloading and preparation facilities at Port Newark and the Elizabeth-Port Authority Marine Terminal (EPAMT). Imported vehicles, a growth industry, offer the potential of increased revenue through the expansion of existing import accounts and the attraction of new imports to the Port of New York and New Jersey. To retain the existing imports and secure new ones for the port, additional unloading and preparation facilities must be provided. The development of an imported automotive vehicle unloading and preparation center at Port Jersey/Greenville will enable the Port Authority to meet the demands of this industry. Currently, the imported automobile industry contributes \$515 million a year to the region's Gross Regional Product (GRP), a measure analagous to the Gross National Product (GNP). The new facility is expected to add \$205 million to the GRP as well as 560 local jobs by 1990.

Presently, the Port Authority provides approximately 190 acres at Port Newark/EPAMT for the storage of various imports, including Toyota, Nissan, BMW and Hyundai. In 1985, these facilities handled 375,000 imports. For the first half of 1986, imported vehicles totaled 251,000 units. At present, additional areas at Port Newark/EPAMT are not available to handle the expansion of existing volumes, or to provide for future imports such as the Korean KIA, Daewoo and Samsung, and the Greek Desta. Based on industry projections, the Port of New York and New Jersey will handle up to 600,000 imports in 1995 if it maintains its 15% market share. To achieve this goal, additional storage facilities are needed.

In 1981 and 1982, the Port Authority purchased approximately 470 acres, including land under water, at Greenville and Port Jersey in Bayonne and Jersey City, New Jersey at a cost of approximately \$12.2 million for the development of a coal transshipment facility but that project was never advanced. Subsequently, in 1984, these properties were incorporated into the Pre-development Site Acquisition Program.

The Port Jersey/Greenville sites, among the last available for marine development in the harbor, comprise an ideal location for the development of an imported automotive vehicle unloading and preparation center. Located on the upper bay, the area is proximate to the harbor entrance for ship unloading. The New Jersey Turnpike, which is adjacent to the site, facilitates land distribution of the imports.

The expenditure of an estimated \$31 million for the project will provide for a ship berth on the edge of the Port Jersey channel with paving and utilities for approximately 80 acres of upland adjacent to the berth in the Port Jersey peninsula and an additional 65 acres for further automobile storage on the nearby Greenville site, including an access road linking the two sites. The project has been evaluated on the basis of an investment of \$42.6 million, including \$11.6 million for current land value. In addition, rail access will be available at one of the sites, depending on the ensuing operation of the facility.

(Board - 12/11/86)

Based on current projections, the investment in the project will be recovered by charging competitive land rentals and dockage and wharfage charges. Also, as an additional marketing tool to attract manufacturers and processors to the proposed facility, it is anticipated that the Port Authority would seek Foreign Trade Zone designation for the Facility in order to achieve United States Customs duty savings for importers involved in vehicle preparation.

Throughout the planning process, the municipalities of Bayonne and Jersey City have been advised of the Port Authority's plans to develop Port Jersey and a portion of the Greenville site as an imported automobile facility. Environmental concerns remain to be resolved through the necessary Federal and State permit processes. Also, discussions have been held with the two municipalities affected to advise them of the nature of the proposed use and the significant employment that it would generate. It is anticipated that the Port Authority would continue to make the \$1.0 million per year payments in-lieu-of taxes on the entire Port Jersey and Greenville properties as it has since the purchase of these properties in 1981 and 1982. Discussions with the municipalities are continuing.

Staff recommends that a project be authorized for the development of an imported automobile unloading and preparation center at this combined site (the Facility). This new facility, to be completed by the end of 1988, will be administered by the existing New Jersey Marine Terminals Office located at Port Newark.

The remaining 50-acre portion of the Greenville site has been repeatedly examined by the Port Authority as a possible industrial development location, but its prohibitively high infrastructure costs rule this out. Staff is, therefore, working to arrange a sale of the property.

In accordance with the provisions of the resolution creating the Pre-development Site Acquisition Program, the real property (and associated costs) necessary for the development of the Facility would be transferred from that Program in connection with the certification discussed below, at which time the amount available through the Program would be replenished by \$11.6 million. Such transfer requires the certification discussed below. As a result of this replenishment, the total cost of properties acquired or held within the Program is \$16 million (including \$600,000 for the remaining Greenville property and \$15 million for property acquired in connection with the Hunters Point waterfront and development site), and \$58.9 million remains available for additional real property acquisition.

The imported automobile marine terminal will be an additional facility of the Port Authority, and therefore, at the time of the first issuance of any Consolidated Bonds (or Consolidated Notes) for purposes which include capital expenditures in connection with the Facility, the Port Authority is required by covenants with its bondholders to make a certification relating to the financial effect upon the Port Authority of the effectuation of the Facility as an additional facility of the Port Authority. Thus, certification is necessary if any portion of the proceeds of such Consolidated Bonds or Consolidated Notes, the issuance of which in connection with this Facility is expected in the near future, is to be used for purposes of capital expenditures in connection with the Facility.

(Board - 12/11/86)

The Committee on Finance would be authorized to reaffirm the certification at the time such Bonds or Notes are issued. In default of said reaffirmation said certification shall not apply to the issuance of such Consolidated Bonds or Consolidated Notes and the proceeds thereof shall be used for the stated purposes of such bonds or notes other than the Facility until such time as the Facility is certified.

The Chief Financial Officer has reviewed the projected overall financial standing and condition of the Port Authority and the economics of the Facility on the basis of the issuance of Consolidated Bonds (including Consolidated Notes) to provide the total capital expenditures of or related to the Facility.

The Chief Financial Officer has also reviewed with the Commissioners his formal opinion to them consistent with Section 7 of the resolutions establishing outstanding series of Consolidated Bonds (including Consolidated Notes) that in connection with the first issuance of Consolidated Bonds or Consolidated Notes for purposes which include capital expenditures for the Facility, the application of any portion of the proceeds of any such Consolidated Bonds or Consolidated Notes will not, during the periods 1987 through 2022, reflecting the traditional 35-year term of Consolidated Bonds, and 1987 through 1997, the immediately ensuing ten-year period associated with Consolidated Bonds or Notes with a maturity of less than ten years, in the light of the Port Authority's estimated expenditures in connection with the Facility and the total anticipated revenues and expenses of the Port Authority materially impair the sound credit standing of the Port Authority or the investment status of Consolidated Bonds or the ability of the Port Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds.

In reaching this conclusion, the Chief Financial Officer considered the covenant with holders of Port Authority Consolidated Bonds (including Consolidated Notes) to establish charges in connection with the Port Authority's facilities to the end that at least sufficient net revenues may be produced therefrom to provide for the debt service on all Consolidated Bonds (including Consolidated Notes), including those issued for purposes of capital expenditures in connection with the Facility. This conclusion was also based, in part, upon the judgment of the Chief Financial Officer that the Port Authority's ability to continue to honor this covenant will necessitate increases from time to time in the Port Authority's tolls, fares, fees, rentals and other charges, or reductions in services and associated expenditures.

It was therefore recommended that the Board:

1. authorize a project to construct a vessel berth in the Port Jersey channel and to provide paving and utilities on an 80-acre site on the eastern end of the Port Jersey peninsula located partially in the City of Bayonne and partially in Jersey City, New Jersey, and a 65-acre site on the eastern end of the Greenville Yards in Jersey City, New Jersey, at an estimated project cost of \$31 million including payments to contractors, provisions for extra work, and engineering, administrative and financial expenses, exclusive of \$11.6 million for current land value, and subject to appropriate authorizations for associated future contracts and agreements;

(Board - 12/11/86)

2. certify that, in the opinion of the Port Authority in connection with the first issuance of Consolidated Bonds or Consolidated Notes for purposes which include capital expenditures in connection with this project (the Facility), the issuance of such Consolidated Bonds or Consolidated Notes will not, during the periods 1987 through 2022 and 1987 through 1997, in the light of the Port Authority's estimated expenditures in connection with the Facility and the total anticipated revenues and expenses of the Port Authority, materially impair the sound credit standing of the Port Authority or the investment status of Consolidated Bonds or the ability of the Port Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds;

3. authorize the Committee on Finance to reaffirm said certification on behalf of the Port Authority at such time as such Consolidated Bonds or Consolidated Notes are issued, provided that there is no substantial adverse change in the economic basis for said certification; and

4. provide that, in default of a reaffirmation of said certification by the Committee on Finance, said certification shall not apply to the issuance of such Consolidated Bonds or Consolidated Notes and the proceeds thereof shall be used for the stated purposes of such bonds or notes other than the Facility, until such time as the Facility may be certified.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that a project to construct a vessel berth in the Port Jersey channel and to provide paving and utilities on an 80-acre site on the eastern end of the Port Jersey peninsula located partially in the City of Bayonne and partially in Jersey City, New Jersey, and a 65-acre site on the eastern end of the Greenville Yards in Jersey City, New Jersey, be and it hereby is authorized at an estimated project cost of \$31 million including payments to contractors, provisions for extra work, and engineering, administrative and financial expenses, exclusive of \$11.6 million for current land value, and subject to appropriate authorizations for associated future contracts and agreements; and it is further

RESOLVED, that the form of any agreements authorized pursuant to the foregoing be subject to approval by General Counsel or his authorized representative; and it is further

RESOLVED, that certification is hereby made that, in the opinion of the Port Authority in connection with the first issuance of Consolidated Bonds or Consolidated Notes for purposes which include capital expenditures in connection with this project (the Facility), the issuance of such Consolidated Bonds or Consolidated Notes will not, during the periods 1987 through 2022 and 1987 through 1997, in the light of the Port Authority's estimated expenditures in connection with the Facility and the total anticipated revenues and expenses of the Port Authority, materially impair the sound credit standing of the Port Authority or the investment status of Consolidated Bonds or the ability of the Port Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and it is further

(Board - 12/11/86)

RESOLVED, that, in default of a reaffirmation of said certification by the Committee on Finance, said certification shall not apply to the issuance of such Consolidated Bonds or Consolidated Notes and the proceeds thereof shall be used for the stated purposes of such bonds or notes other than the Facility, until such time as the Facility may be certified.

(Board - 12/11/86)

Engineering Department - Retention of Professional and Technical Services on an As-Needed Basis for the 1987 Calendar Year - Various Departments - Retention of Temporary Help Firms for the 1987 Calendar Year

It was reported that since 1977, the Engineering Department has accomplished its workload through the use of permanent staff and professional and advisory service firms, technical service and temporary help (job shop) firms.

As was done in previous years, staff recommends that the Chief Engineer be authorized to enter into agreements for the performance of architectural and engineering and related services on an as-needed basis. The same request for proposal, selection, review and management procedures that were used during 1986, including amendment limitations, will be used for the 1987 program. In addition, as was done last year, payments under any one agreement will not exceed \$500,000. The agreements will contain provisions requiring the service firms to make a good faith effort to attain goals of 10% participation by Minority Business Enterprises and 1% for participation by Women Business Enterprises, and some projects may also be set aside for Minority Business Enterprises.

The second part of the request for authority for the Chief Engineer deals with the retention of various technical service firms to furnish professional and technical personnel on an as-needed basis. As has been done for the last few years, the Chief Engineer will order personnel and work from technical service firms which have been selected on the basis of qualifications, capability, price and availability. However, for 1987 the limitation on payments to any one technical service firm, per project, will be increased from \$250,000 to \$500,000.

The third part of the request for authority for the Chief Engineer deals with the retention of temporary help firms. In general, the types of personnel that would be made available from these firms are: architects, engineers, designers, draftsmen, project aides, technical data input personnel and any other personnel deemed necessary by the Chief Engineer.

The second portion of this authorization deals with the retention of temporary help firms to provide professional and technical personnel for various other departments. Although the Engineering Department will continue to establish the lists of firms to be retained and prepare agreements for use by all departments, each department will be responsible for recruiting, administering and managing its own temporary help during 1987. It is requested that \$7.0 million be provided in the 1987 authorization to hire temporary help to satisfy these estimated needs as follows: Aviation Department (\$2.0 million); Economic Development Department (\$650,000); General Services Department (\$400,000); Planning and Development Department (\$300,000); Port Department (\$200,000); Public Safety Department (\$950,000); Rail Transportation Department (\$1.5 million); Tunnels, Bridges and Terminals Department (\$400,000); and World Trade Department (\$600,000).

(Board - 12/11/86)

It was therefore recommended that the Board authorize:

1. the Chief Engineer to retain:

- (a) various professional and advisory service firms on an as-needed basis for projects initiated during 1987 at an aggregate amount presently estimated at \$17.0 million;
- (b) various technical service firms on an as-needed basis for the 1987 calendar year, at an aggregate amount presently estimated at \$2.0 million;
- (c) various temporary help firms on an as-needed basis for the Engineering Department for the 1987 calendar year at an aggregate amount presently estimated at \$4.5 million; and

2. the Directors of Aviation, Economic Development, General Services, Ports, Public Safety, Planning and Development, Rail Transportation, Tunnels, Bridges and Terminals and World Trade to retain various temporary help firms on an as-needed basis for the 1987 calendar year at an aggregate amount presently estimated at \$7.0 million.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Chief Engineer is authorized to retain: (a) various professional and advisory service firms on an as-needed basis for projects initiated during 1987 at an aggregate amount presently estimated at \$17.0 million; (b) various technical service firms on an as-needed basis for the 1987 calendar year, at an aggregate amount presently estimated at \$2.0 million and (c) various temporary help firms on an as-needed basis for the Engineering Department for the 1987 calendar year at an aggregate amount presently estimated at \$4.5 million; and it is further

RESOLVED, that the Directors of Aviation, Economic Development, General Services, Ports, Public Safety, Planning and Development, Rail Transportation, Tunnels, Bridges and Terminals and World Trade are authorized to retain various temporary help firms on an as-needed basis for the 1987 calendar year at an aggregate amount presently estimated at \$7.0 million; and it is further

RESOLVED, that form of the agreements be subject to the approval of General Counsel or his authorized representative.

(Board - 12/11/86)

La Guardia Airport - Authorization of an Agreement for Professional Services to Tippetts-Abbett-McCarthy-Stratton for the Central Terminal Building Landside Expansion and Modernization

It was reported that it has previously been reported to the Board that the expansion and modernization of the Central Terminal Building and the adjacent roadways at LaGuardia Airport has been identified as a requirement to meet present and forecasted needs. A presentation concerning the proposed modernization and expansion of LaGuardia Airport was made to the Board on December 13, 1984, and further information on this work was presented to the Board in connection with the authorization of the supplemental agreement to the United Airlines, Inc. lease of West Wing Terminal premises at the Board meeting on January 9, 1986. Funds for the design of the landside expansion and modernization for the Central Terminal Building were provided in the 1985 Budget, but were not expended.

The Central Terminal roadways at LaGuardia Airport must be relocated, reconfigured and expanded to improve traffic flow in the area of the Central Terminal Building. The current plan includes the relocation and reconfiguration of the Central Terminal Building's arrivals level roadways and the widening of the elevated departures level roadway. The conceptual plan for the Landside Expansion and Modernization Program for the Central Terminal Building also includes providing a direct entrance to the parking garage from the 94th Street airport entrance to reduce congestion in front of the Central Terminal Building.

In addition, the arrivals level frontage area of the Central Terminal Building must be expanded and modernized by moving outward of the arrivals level window wall to provide more interior space for circulation and ground transportation services to meet the current and projected airlines and patron needs.

Because of the immediate need and extensive professional work required to refine this plan and the unavailability of in-house staff to perform this work due to current workload requirements, staff requested that the following firms submit a proposal for the required professional services:

- * Tippetts-Abbett-McCarthy-Stratton, (TAMS), New York, New York
- * Howard Needles Tammen and Bergendoff, Fairfield, New Jersey
- * Parson, Brinckerhoff, Quade & Douglas, Inc., New York, New York
- * STV/Seelye, Stevenson, Value & Knecht, New York, New York
- * Knight Associates, Inc., New York, New York

A selection board appointed by the Chief Engineer consisting of an Aviation Department staff member and two Engineering Department staff members reviewed and evaluated the proposals received. The proposals were evaluated on their merit, using criteria such as quality of staff to be assigned, ability to meet the schedule, experience specifically related to the project, manpower analysis, technical approach and price. The required professional services consist of field verification of existing conditions, the preparation of preliminary design documents, including the study of alternates and preparing Stage II estimates, the preparation of final contract documents, final construction cost estimates and the review and approval of shop drawings. The selection board's recommendation of the proposal submitted by TAMS was approved by the Chief Engineer.

(Board - 12/11/86)

The agreement includes a provision that TAMS will use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

The agreement provides for the performance of the professional services required for the landside expansion and modernization for the Central Terminal Building, all at an estimated compensation of \$1,744,000. An allowance is also required in order to provide for contingencies and project changes since the agreement is based on preliminary conceptual planning, to assure that the final plan is economical and efficient. Therefore, it is recommended that the Board authorize an agreement with TAMS at a compensation not to exceed \$2.3 million.

It was therefore recommended that the Board authorize the Chief Engineer to enter into an agreement with Tippetts-Abbett-McCarthy-Stratton (TAMS) of New York, New York for professional services in connection with the proposed landside expansion and modernization for the Central Terminal Building at LaGuardia Airport at a compensation not to exceed \$2.3 million.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Chief Engineer is authorized to enter into an agreement with Tippetts-Abbett-McCarthy-Stratton (TAMS) of New York, New York for professional services in connection with the proposed landside expansion and modernization for the Central Terminal Building at LaGuardia Airport at a compensation not to exceed \$2.3 million; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his authorized representative.

(Board - 12/11/86)

Kennedy International Airport - Extension of Fuel Farm Maintenance Agreement with Ogden Allied New York Services, Inc.

It was reported that the Kennedy International Airport Basic Airline Leases ("Dewey Leases") obligate the Port Authority to provide fuel storage capacity and a system for the receipt, storage and distribution of aviation fuel. Under the terms of the Dewey Leases, the Port Authority may elect to operate the system itself or may select an independent contractor to do so. Should the airlines object to the rates charged for the service by the Port Authority or its independent contractor and be upheld in arbitration, or in the event the Port Authority elects not to operate the system itself or not to designate a contractor, the airlines have the right to select their own independent contractor.

Ogden Allied New York Services, Inc., (formerly known as Allied New York Services, Inc.), with airline concurrence, has been the Port Authority's contractor operating the receipt, storage and distribution system since 1953, pursuant to an operating agreement with the Port Authority. In recent years, this operating agreement, as revised, has been extended annually as Ogden Allied, the Port Authority and the airlines, represented by the Airline Fuel Committee, reached agreement on the new fueling charges payable by the airlines for said year. Specific Board authorizations have not been requested for these extensions, since the Port Authority makes no payments to Ogden Allied under the system operating agreement. The Airline Fuel Committee has requested the continuation of Ogden Allied as the Port Authority's independent contractor for another year. Airline payments to be made to Ogden Allied under the operating agreement through the fueling rates for 1987 are estimated at \$30,800,000.

In accordance with authorization by the Committee on Operations at its meeting on June 3, 1954, the Port Authority entered into a separate agreement ("the maintenance agreement") with Ogden Allied to perform routine and preventive maintenance on the fuel storage facilities. The maintenance agreement, as revised, also has been extended on a year-to-year basis on terms which were modified in accordance with authorization by the Committee on Operations at its meetings on August 5, 1971 and March 25, 1981. At its meeting on January 12, 1984, the Board authorized a one-year extension through 1984 and authorized the Executive Director, at his discretion, to enter into two additional one-year extensions through 1986, should Ogden Allied continue as the Port Authority's operator of the system and the Executive Director deem such extensions appropriate at the time.

Under this maintenance agreement the Port Authority pays Ogden Allied 100% of its operating costs, including the costs of materials, supplies and required outside contractors (subject to prior Port Authority approval of each purchase or contract in excess of \$150) and a fee of 5½% of Ogden Allied's total operating costs, as defined. This agreement also requires Ogden Allied to maintain a sufficient complement of full-time employees for certain functions, with the agreement specifying a minimum number of hours of work per month. Port Authority payments to Ogden Allied for maintenance under this agreement were \$298,000 in 1985 and are estimated at \$220,000 for 1986 and \$240,000 for 1987. In addition, Ogden Allied in 1986 completed the construction of a closed sumping system in the Satellite Fuel Farm at a cost of \$582,759, pursuant to authorization by the Board at its meeting on August 9, 1984. All Port Authority costs for providing and fully maintaining the storage facilities are covered by a storage fee paid by those storing aircraft fuel at the airport.

(Board - 12/11/86)

Extensions to both the operating agreement and maintenance agreement, authorized by the Executive Director for 1985 and 1986, contained provisions for participation by Minority Business Enterprises and Women-owned Business Enterprises in payments for subcontracting and purchasing under these agreements. Staff believes Ogden Allied is making an excellent effort to achieve the objectives of these provisions. If continued as the Port Authority's contractor for 1987, these agreements will continue to require Ogden Allied to provide for the participation of women-owned business enterprises and minority-owned business enterprises in connection with its operations under these agreements.

Staff is convinced that it continues to be most efficient and practical to have the maintenance function performed by the contractor who also operates the fueling system. The continuation of a single contractor preserves labor compatibility and maximizes not only operational efficiency but also accountability for maintenance practices and system security for an annual fuel inventory of over 1.1 billion gallons.

It was therefore recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement with Ogden Allied New York Services, Inc. at Kennedy International Airport on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, for and behalf of the Port Authority, be and he hereby is authorized to enter into an agreement with Ogden Allied New York Services, Inc. supplemental to and extending the present maintenance agreement with Ogden Allied New York Services, Inc. for the performance by Ogden Allied of routine and preventive maintenance on the Aviation Fuel Storage Facilities at Kennedy International Airport for an additional year ending December 31, 1987, and for the payment of the cost thereof, in accordance with the maintenance agreement; and further, at his discretion, to enter into two additional one-year extensions through 1988 and 1989 should Ogden Allied continue as the Port Authority's operator of the fuel storage and distribution system at the airport and the Executive Director deem such actions appropriate at such times without further Committee or Board action; all on the terms set forth above; the form of said agreements to be subject to the approval of General Counsel or his designated representative.

(Board - 12/11/86)

The World Trade Department - The Teleport - Teleport Communications - Amendment of Lease - Sublease to IDB Communications Group Ltd.

It was reported that at its meeting on May 12, 1983 the Board authorized a revised project for the development of the Teleport, a satellite communications center located within New York City's Staten Island Industrial Park, and further authorized the Executive Director, for and on behalf of the Port Authority, to enter into a series of agreements with the City of New York, Merrill Lynch Telecommunications Incorporated ("MLT"), and others for the effectuation of the project. The lease with Teleport Communications, a partnership of MLT and Western Union Communications Systems, Incorporated, provides for the leasing of approximately 21 acres of land to be used in part for the construction of satellite earth stations and in part for the construction of a building to be used to house the technical equipment and staff necessary to operate the earth stations. Pursuant to the lease the Port Authority paid for the construction of certain on-site infrastructure improvements, including a berm to shield the earth stations from the balance of the facility. The lease provides that Teleport Communications will pay an annual site rental for each earth station located on the site at the rate of \$45,320 per year plus an additional site rental for each such earth station equal to 1/36th of the costs for the construction of the infrastructure improvements which are in excess of \$3.1 million. The lease covers an initial term of twenty years with Teleport Communications having the right to extend the term for up to a maximum of two ten-year periods. Teleport Communications also pays a percentage rental equal to 5% of Teleport Communications' gross revenues and a net return rental equal to 25% of its net revenues as defined in the lease, if any.

Teleport Communications has reached tentative agreement with IDB Communications Group Ltd. ("IDB"), a California-based satellite distribution company, for the subleasing of five earth station sites at the Teleport. Negotiations with respect to a sixth site are continuing. It is anticipated that IDB will commence operation of three of the earth stations within one year of the execution of its sublease and will commence operations of two earth stations during the second year of the term of its sublease. IDB is best known for its Sports Satellite Interconnect, which consists of transmit/receive earth stations that IDB currently owns and operates in 27 cities around the country. It is anticipated that IDB will also use the fiber-optic network operated by Teleport Communications to provide accessibility to its clients in both radio and video transmissions. The earth stations to be constructed by IDB at the Teleport will be in fixed positions and physically clustered in an area that will otherwise only accommodate two earth stations. IDB would also be permitted to install two smaller receive-only earth stations that will enable IDB to capture additional turnaround business.

In order to accommodate this arrangement, the Port Authority has tentatively agreed to amend its lease with Teleport Communications so that in lieu of the site rental and additional site rental set forth in the lease, Teleport Communications would pay an annual site rental at the rate of \$30,000 per year for each earth station location subleased to IDB, plus a monthly amount for each earth station equivalent to the sum of 4% of all of IDB's monthly gross receipts arising from the operation of such earth station which are not in excess of \$62,500 and 3% of such monthly gross receipts which are in excess of \$62,500. In addition, Teleport Communications would continue to pay percentage rental and net return on revenues it receives from IDB.

(Board - 12/11/86)

The initial term of the sublease will commence upon the execution thereof and will expire on the date preceding the fifth anniversary of the commencement date. The sublease also grants IDB the right to extend the term thereof for a single five-year period. Teleport Communications would pay the Port Authority an annual site rental for each location at the rate of \$42,000 per year during the first three years of the extended term and at the rate of \$54,000 per year thereafter. Teleport Communications would continue to pay a monthly amount equivalent to the sum of 4% of IDB's monthly gross receipts arising from the operation of each earth station which are not in excess of \$62,500 plus 3% of such monthly gross receipts in excess of \$62,500 during the entire extension period.

Considering all of the factors associated with the subletting, staff has concluded that this arrangement will provide comparable revenues to the arrangement that the Port Authority currently has with Teleport Communications.

It was therefore recommended that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into an agreement amending the Port Authority's lease agreement with Teleport Communications on the terms and conditions outlined above.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement amending the Port Authority's existing lease with Teleport Communications, on the terms and conditions set forth herein; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 12/11/86)

Economic Development Department - Port Authority Industrial Park at Elizabeth - Lease with Capcow, Inc. for Lustrelon, Inc.

It was reported that the Board, at its meeting on March 12, 1981, authorized an industrial development project in Elizabeth, New Jersey, on approximately 125 acres at the southern end of the Port Newark/Elizabeth facility, involving an estimated financial participation by the Port Authority of \$16.8 million.

Staff has substantially completed negotiations with Capcow, Inc. for the letting, with options to purchase, of approximately 12 acres located at the Port Authority Industrial Park at Elizabeth. Capcow, Inc., a Sub-Chapter S. Corporation, will construct a 200,000 square foot building on the site and lease the entire premises to Lustrelon, Inc. Lustrelon, a nineteen year old firm with such major accounts as J.C. Penny, Sears Roebuck, and K-Mart, will utilize the premises for the manufacture and shipping of lamps and lampshades and other related manufacturing operations.

Lustrelon has occupied 200,000 square feet of inefficient space in Edgewater, New Jersey for the past fourteen years. The company has grown rapidly during the past few years and space needs have become critical. Before the Elizabeth Industrial Park was brought to the attention of company officials, they had selected a location in northern Mississippi for the construction of a new facility.

The initial lease term with Capcow, Inc. will expire 30 years from the Basic Rental Start Date with an option to renew for an additional 30 years at fair market rental.

Commencing on the basic rental start date, which date will be no later than eighteen months from the commencement date of the lease, the lessee will pay an annual basic rental according to the following schedule:

Year 1	\$180,000
Years 2, 3	200,000
Years 4, 5	220,000
Years 6, 7	240,000
Years 8, 9	260,000
Years 10, 11	290,000
Years 12, 13	310,000
Years 14, 15	330,000
Years 16 to 19	350,000
Years 20 to 22	370,000
Years 23 to 25	390,000
Years 26 to 28	420,000
Years 29 to 30	440,000

In order to offset the cost of piling the building, the lessee will be entitled to a rental credit in the total sum of \$200,000.

Commencing on the basic rental start date, the lessee will pay an additional rental equal to its pro-rata share of in-lieu-of tax payments that the Port Authority is required to pay under its agreement with the City of Elizabeth.

(Board - 12/11/86)

Commencing on the basic rental start date and for each annual period thereafter, the lessee will also pay its annual pro-rata share of general operating and maintenance costs incurred by the Port Authority to operate the Park as set forth in the lease. These costs will not exceed \$3,000 per acre, per year for the first year, which \$3,000 amount will escalate each year by the amount of the increase in the Consumer Price Index.

The Port Authority would provide up to \$1.6 million for construction of the building. It is estimated that the total construction cost, including equipment, will be approximately \$8 million. The lessee will pay an interim construction rental and a construction rental based upon a variable prime rate plus 50 basis points. The construction rental will be paid over fifteen years with a final payment at the end thereof.

The lessee would have the option to purchase the premises on the fifth, tenth, fifteenth, twentieth and thirtieth anniversaries of the commencement date on the terms and conditions set forth in the lease.

Design plans, construction drawings, materials, building schedules, contractors and subcontractors used by the lessee shall be subject to Port Authority approval. The lessee will also make every good faith effort to achieve a Minority Business Enterprise (MBE) and Women Business Enterprise (WBE) participation during construction of 20% and 5% respectively.

The Port Authority will not specifically indemnify the lessee for hazardous waste liability to third parties, and the lessee will indemnify the Port Authority for liability for claims arising from the lessee's negligence, defaults under the lease, or failure to comply with laws or Port Authority directives.

The Port Authority will have responsibility for cleanup and removal of hazardous waste existing on the site on the commencement date of the letting if so mandated by regulatory agencies and if such cleanup and removal did not result from the lessee's negligence, defaults under the lease or failure to comply with Port Authority directives. The Port Authority, however, will have the option to terminate the lease if this or other responsibilities in environmental matters are imposed on the Port Authority. Such termination will require that the Port Authority purchase the lessee's improvements for a purchase price as set forth in the lease.

The Port Authority will indemnify the lessee for riparian rights claims of the State of New Jersey.

The lessee will be responsible for managing, operating and maintaining its premises and making all repairs, structural and non-structural.

(Board - 12/11/86)

The lessee will have the right to mortgage its leasehold interest and the Port Authority and the lessee will each have the right to terminate the lease if a leasehold mortgage is not obtained by the outside date set forth in the lease. If there is a default under the leasehold mortgage and the leasehold mortgagee becomes the lessee or the leasehold mortgagee sells the lessee's leasehold interest, then the construction rental obligation under the lease may be limited based upon monies received by the leasehold mortgagee as lessee or seller, as the case may be. The leasehold mortgagee would also have the right on foreclosure to sell the entire premises in which case the proceeds of sale shall be shared by the Port Authority and the leasehold mortgagee as provided in the lease.

The lessee was introduced to the Port Authority by Eli Cohen of Eli Cohen Real Estate located at 350 Continental Avenue, Paramus, New Jersey. Staff has completed negotiations with Eli Cohen for a brokerage commission in the amount of \$200,000 payable on terms and conditions to be set forth in the brokerage agreement.

The lessee will be required to maintain property and liability insurance in coverages and amounts to be determined by Risk Management.

A security deposit by the lessee will be required in an amount to be determined by the Port Authority.

Funds will be provided in the 1987 Budget.

It was therefore recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority to enter into a lease agreement with Capcow, Inc. and a brokerage agreement with Eli Cohen in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into an agreement with Capcow, Inc. to provide for the leasing of approximately twelve acres of land at the Elizabeth Industrial Park, a consent to sublease agreement with Capcow, Inc. and Lustrelon, Inc., and a brokerage agreement with Eli Cohen of Eli Cohen Real Estate, all on the terms set forth above; the form of the agreements to be subject to the approval of General Counsel or his designated representative.

(Board - 12/11/86)

Freight Services Improvement Conference - Continuation of Port Authority Participation -
Agreement with States of New York and New Jersey

It was reported that the Board, at its meeting on March 12, 1981, authorized the Executive Director to enter into the initial agreement with the States of New York and New Jersey for the Port Authority to participate in the Freight Services Improvement Conference (FSIC) and to provide funding for the Port Authority's share of the joint effort. The most recent in a series of Board authorizations to continue that initial participation occurred at the October 10, 1985 meeting when, after a presentation by the FSIC, the Board voted to extend Port Authority support for the FSIC through June 30, 1986.

Establishment of the FSIC resulted from a recognition by the two states and the Port Authority that increased public attention to the region's freight transportation industry was essential to protecting the region's competitive position. The FSIC has a mandate to identify problems experienced by the region's truck, rail, air and steamship industries and to develop support for addressing these problems. The group is jointly funded and staffed by the New Jersey and New York State Departments of Transportation and the Port Authority. Since the freight industry is almost exclusively in the private sector, the FSIC has worked closely with the business community in virtually all of its initiatives. To that end, the FSIC is guided by its Advisory Board, comprised of lead shippers and transportation company executives. Overall direction is provided by a Steering Committee comprised of an Assistant Commissioner of Transportation from each state and the Director of Planning and Development of the Port Authority.

Since its inception, the FSIC has earned acceptance as an effective liaison between private sector freight carriers and shippers on one hand and public sector transportation agencies on the other. Recent achievements of the FSIC include:

Development of the Bi-State Harbor Carriers Conference, a coalition of motor carriers serving the Port District's marine terminals. This has become a pioneering effort through which truckers, terminal operators, steamship lines and government officials are cooperating to resolve a wide range of mutual problems. In the past year, this group has increased the detention fee paid to truckers by the New York Terminal Conference, developed a program to improve tire safety standards for chassis and made operational improvements at certain terminals. The Port Department has been an active and welcome participant in the Harbor Carriers Conference.

A continuing leadership role in preparing the region's public and private sector constituencies for the impacts of the recent Federal law that authorized the nationwide use of larger trucking equipment. The FSIC's work with the Port Authority helped persuade New York City to permit access for 102-inch wide trucks to Kennedy International Airport because of the heavy dependence of air cargo operations on these wider vehicles. As always, the solutions the FSIC has encouraged are designed to promote the use of these more productive vehicles only in places where safety is not compromised.

(Board - 12/11/86)

Organization and management of the Trans-Brooklyn Freight Movement Study, jointly funded by the New York State Department of Transportation, for which the Board has previously authorized \$150,000, as the Port Authority's one-half share. This major effort, due for completion in early 1987, is evaluating the problems affecting freight movements into, out of and within Brooklyn and identifying the effects of such problems on the borough's and the region's economy.

Initiation this year of a comprehensive program on truck safety which, in cooperation with a broad array of government and trucking industry participants, will address various aspects of the issue, including inspection and enforcement, operations and public awareness. Given the trust it has developed with both business and government, the FSIC is in a unique position to address the problem in a non-adversarial manner.

Assorted urban goods movement initiatives, including a communications experiment involving the TRANSCOM operations center and two major trucking companies; a proposed automatic vehicle identification experiment involving trucks at the Goethals Bridge; and advocacy of several operational and capital improvements facilitating truck mobility throughout the region.

Continuing assistance to both states and to regional motor carriers in the clarification of complex truck tax and user fee issues.

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement with the States of New York and New Jersey, or their designees, under which the Port Authority will continue its participation in the Freight Services Improvement Conference (FSIC), a public/private sector research, planning and advocacy organization for improved freight transportation in the New York/New Jersey region, for the period July 1, 1986 to June 30, 1987, at a total estimated cost of \$344,000, consistent with the Port Authority's level of funding in support of the FSIC program in recent years.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into an agreement with the States of New York and New Jersey, or their designees, under which the Port Authority will continue its participation in the Freight Services Improvement Conference (FSIC), a public/private sector research, planning and advocacy organization for improved freight transportation in the New York/New Jersey region, for the period July 1, 1986 to June 30, 1987, at a total estimated cost of \$344,000; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his authorized representative.

(Board - 12/11/86)

George Washington Bridge Bus Station - Carter's Value Center, Inc. - Extension of Lease LBF-53

It was reported that Carter's Value Center, Inc. has operated a store since 1968 on the street level of the Bus Station at Broadway and 178th Street, selling men's, women's and children's apparel, costume jewelry and health and beauty aids.

Under the terms of the extended lease, the tenant will undertake, at its sole cost, all work necessary to refurbish the premises for its operations including but not limited to new flooring, wall surfaces, ceiling, duct work, lighting and HVAC.

The extension will commence on January 1, 1987 and expire on December 31, 1996. The tenant will pay an annual basic rental of \$80,280 for 4,460 square feet of retail area, plus 10% of gross receipts over \$802,800, and \$11,262 per year for 1,877 square feet of storage area. Both basic rentals are to be escalated on the fifth anniversary in accordance with increases in the Consumer Price Index.

Lessee will be provided with and shall pay the Port Authority for chilled water for air conditioning, domestic hot water, domestic cold water and electricity.

The Port Authority shall have the right to terminate the letting without cause on 30 days' prior notice in which event the Port Authority shall reimburse the tenant the unamortized portion of the space preparation costs described herein, not to exceed \$100,000.

It was therefore recommended that the Board authorize the Executive Director to extend the existing lease agreement with Carter's Value Center, Inc. in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a ten-year lease extension with Carter's Value Center, Inc. at the George Washington Bridge Bus Station for the operation of a discount apparel and accessories store, at the terms and conditions set forth above; the form of agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 12/11/86)

Holland Tunnel - Acquisition of Real Property - New Jersey Plaza Redevelopment

It was reported that it is necessary to acquire certain real property interests in the vicinity of the Holland Tunnel in Jersey City, New Jersey for tolls plaza redevelopment. While discussions with the owner of the property, Newport City Development Company, relating to the Port Authority's property requirements have been in progress for over two years and while a working agreement relating to property boundaries has been reached, there is no agreement upon the terms under which the required property interest would be conveyed to the Port Authority.

Although negotiations with Newport City involving these and a number of other property matters are expected to continue, it is highly unlikely that an acceptable agreement can be reached within an acceptable time frame. The Stage II design for Plaza Redevelopment is underway. Staff anticipates requesting project authorization in early 1987. Further delays in resolving this property issue can only adversely impact the schedule of this key regional facility. Authority is therefore requested for the Executive Director to proceed to acquire the said property by voluntary acquisition or condemnation and to incur all expenses necessary or incidental to such acquisition.

It was therefore recommended that the Board:

1. find and determine that it is necessary for public use for Holland Tunnel purposes to acquire fee title to and lesser property interests in real property described generally on Drawing Number HTP-32 dated November 18, 1986; and

2. authorize the Executive Director to acquire said property interests, by voluntary acquisition or by condemnation pursuant to Chapter 47 of the Laws of New York 1931, and Chapter 4 of the Laws of New Jersey 1931 and to incur all expenses necessary or incidental to such acquisitions.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that it be and is hereby found and determined that it is necessary for public use for Holland Tunnel purposes to acquire fee title to real property described generally on a Drawing Number HTP-32 dated November 18, 1986, more particularly described as follows:

Parcel 1

Beginning at a point in the easterly line of Luis Munoz Marin Boulevard (formerly Henderson Street) where the same is intersected by the southerly line of the lands of the State of New Jersey, said beginning point being further described as the southwesterly corner of a parcel of land conveyed to the State of New Jersey by deed from the Carscallen and Cassidy Corporation, dated January 8, 1923 and recorded in the Office of the Hudson County Register on February 26, 1923 in Book 1465 at page 540 et seq. and running:

1. S83°-48'-58"E 460.65 feet along the southerly line of the above described parcel of land and along the southerly line of lands conveyed to the State of New Jersey by deed from the Erie Land and Improvement Company, dated February 5, 1923 and recorded in the Office of the Hudson County Register on April 24, 1923 in Book 1475 at page 353 et seq. to a point in the easterly line of Provost Street, said point being also in the westerly line of lands conveyed to The Port Authority of New York and New Jersey by deed from the Trustees of the Erie Lackawanna Railway Company, dated April 6, 1979 and recorded in the Office of the Hudson County Register on April 17, 1979 in Book 3274 at page 964 et seq.; thence
2. S6°-15'-42"W 9.06 feet along said westerly line of lands of The Port Authority of New York and New Jersey to a point; thence
3. S80°-47'-35"W 152.75 feet to a point of curvature; thence
4. Along the arc of a circle concave to the north, having a radius of 290.00 feet, a central angle of 15°-23'-27" and an arc length of 77.90 feet to a point of tangency; thence
5. N83°-48'-58"W 75.69 feet to a point of curvature; thence
6. Along the arc of a circle concave to the southeast, having a radius of 157.00 feet, a central angle of 51°-50'-29" and an arc length of 142.05 feet to a point; thence
7. N83°-48'-58"W 37.42 feet to a point in the easterly line of Luis Munoz Marin Boulevard; thence
8. N6°-15'-42"E 120.00 feet along the easterly line of

Luis Munoz Marin Boulevard to the point and place of beginning.

Being shown and designated as part of Lot C in Block 17 on the Tax Assessment Map of the City of Jersey City.

References to named streets in the above description are for descriptive purposes only and shall not be construed as nor are same intended to be an offer to dedicate any property to public use.

Parcel 2

Beginning at a point in the easterly line of Provost Street where the same is intersected by the southerly line of the lands of The Port Authority of New York and New Jersey said point being further described as the southwesterly corner of lands conveyed to The Port Authority of New York and New Jersey by deed from the Trustees of the Erie Lackawanna Railway Company, dated April 6, 1979 and recorded in the office of the Hudson County Register on April 17, 1979 in Book 3274 at page 964 et seq. and running:

1. Along the arc of a circle concave to the northwest, having a radius of 170.00 feet, a central angle of $19^{\circ}-06'-56''$ and an arc length of 56.72 feet and along the southerly boundary of the above described parcel of land conveyed to The Port Authority of New York and New Jersey to a point of tangency; thence
2. $N59^{\circ}-16'-24''E$ 54.04 feet still along said southerly boundary to a point of curvature; thence
3. Along the arc of a circle concave to the southeast, having a radius of 210.00 feet, a central angle of $37^{\circ}-01'-54''$ and an arc length of 135.73 feet still along said southerly boundary to a point of tangency; thence
4. $S83^{\circ}-41'-42''E$ 165.23 feet still along said southerly boundary to the southeasterly corner of said parcel of land conveyed to The Port Authority of New York and New Jersey; thence
5. $N6^{\circ}-15'-42''E$ 2.50 Feet along the easterly line of said parcel to a point in the southerly line of a certain Parcel 1 conveyed to the State of New Jersey by deed from The Long Dock Company et al., dated February 5, 1923 and recorded in the Office of the register of Hudson County on April 24, 1923 in Book 1475 at page 357 et seq.; thence
6. $S77^{\circ}-42'-12''E$ 136.09 feet along the southerly line of Parcel 1 to the southeasterly corner of parcel 1;

thence

7. N16°-06'-02"E 44.00 feet along the easterly line of Parcel 1 to its northeasterly corner; thence

8. N73°-53'-58"W 44.01 feet along the northerly line of Parcel 1 to a point in the centerline of Twelfth Street and the southerly line of lands conveyed to the State of New Jersey by deed from The Morris and Essex Railroad Company, dated July 1, 1922 and recorded in the Office of the Hudson County Register on February 26, 1923 in Book 1465 at page 542 et seq.; thence

9. S83°-48'-58"E 121.52 feet along said southerly line and the centerline of Twelfth Street to a point; thence

10. S6°-11'-02"W 65.92 feet to a point; thence

11. N83°-48'-58"W 160.95 feet to a point of curvature; thence

12. Along the arc of a circle concave to the south having a radius of 1552.00 feet, a central angle of 5°-25'-24" and an arc length of 146.90 feet to a point of compound curvature; thence

13. Along the arc of a circle concave to the south, having a radius of 1022.00 feet, a central angle of 9°-58'-03" and an arc length of 177.80 feet to a point of tangency; thence

14. S80°-47'-35"W 128.54 feet to the point and place of beginning.

Being shown and designated as part of Lot C in Block 17 on the Tax Assessment Map of the City of Jersey City.

References to named streets in the above description are for descriptive purposes only and shall not be construed as nor are same intended to be an offer to dedicate any property to public use.

and it is further

RESOLVED, that the Executive Director, be and he is hereby authorized to acquire said property interests by voluntary acquisition subject to the approval of the Committee on Construction as to the negotiated consideration, or by condemnation pursuant to Chapter 47 of the Laws of New York 1931 and Chapter 4 of the Laws of New Jersey 1931; and it is further

RESOLVED, that any condemnation hereby authorized and all steps pertaining thereto shall be conducted under the supervision and direction of General Counsel, and he shall be and is hereby empowered to take all necessary steps for and incur all expenses necessary or incidental to the conduct of such proceedings.

Whereupon, the meeting was adjourned.

 Kristina E. Weisenstein, Administrative Assistant
 Marvin Weiss, Director, Office of Minority Business Development

The meeting was called to order by the Chairman.

(Board - 1/22/87)

Memorial to Honorable Philip B. Hofmann

The Chairman addressed the Board upon the death of the Honorable Philip B. Hofmann. The following Minute was unanimously adopted by a rising vote.

The Commissioners of The Port Authority of New York and New Jersey note with deep sorrow the death of former Commissioner Philip B. Hofmann on December 30, 1986.

Philip B. Hofmann was appointed a Commissioner of the Port Authority by Governor William T. Cahill in 1971 to fill the unexpired term of Commissioner Charles Engelhard. In June 1973, Governor Cahill reappointed him to a full six-year term. He resigned from the Board in April 1974.

As a Commissioner, Philip Hofmann served as Vice-Chairman and as a member of the Committee on Port Planning. He also was Vice-Chairman of the Committee on Construction and a member of the Committee on Finance.

Philip Hofmann was Chairman of the Board and Chief Executive Officer of Johnson & Johnson when he joined the Port Authority. His forty-odd years in both the parent company and in its many divisions and subsidiaries in the United States and abroad gave him a unique background of business, finance, and management experience that made him a valued member of the Port Authority Board. Philip Hofmann gave generously of his time and his experience in his work as a Commissioner. When he resigned from the Port Authority, the Executive Director wrote in the Weekly Report, "Despite his unfortunately short tenure, his unequivocal integrity and dedication to the fulfillment of the Port Authority role made him an outstanding Commissioner, and a friend."

Philip Hofmann's dedication to the public good was evidenced also by his service as Chairman of the New Jersey Alliance of Businessmen and as associate trustee of the University of Pennsylvania as well as by the many awards bestowed upon him: Wharton School Alumni Society's Gold Medal in 1972, New Jersey Industrialist of the Year and B'nai B'rith Humanitarian Award in 1968, B'nai B'rith President's Award in 1969, and the Martin Luther King Jr. Award of the Black Fathers Association, the Round Table Award of the Raritan Valley Hospital and the Distinguished Eagle Scout Award of the Thomas A. Edison Council of the Boy Scouts of America. He received honorary doctorates from the University of Pennsylvania, Rider College in Lawrenceville, Monmouth College in Long Branch and the Philadelphia College of Pharmacy and Science.

A skilled driver of four-in-hand teams, Philip Hofmann was one of the world's most distinguished whips and had been presented with a silver whip last May by Queen Elizabeth II for his contributions to horse sports. He was one of the founding fathers of the sport of combined driving, staging the first such event in the United States at Johnson Park in Piscataway in 1969. He was a director of both the U.S. Equestrian Team and the American Horse Shows Association and a founder of the U.S. Combined Training Association.

(Board - 1/22/87)

The Commissioners of The Port Authority of New York and New Jersey, now, therefore, in expressing both personal and official regret upon the death of a dedicated and distinguished public servant direct that this tribute shall be spread in full upon the proceedings of the Board and that a copy shall be suitably engrossed and sent to the family of former Commissioner Philip A. Hofmann.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of December 11, 1986. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

The Secretary reported that in the December 11, 1986 Minutes on page 460, the following paragraph should be inserted before the paragraph which appears on that page.

“RESOLVED, that the Committee on Finance be and it hereby is authorized to reaffirm said certification on behalf of the Port Authority at such time as such Consolidated Bonds or Consolidated Notes are issued, provided that there is no substantial adverse change in the economic basis for said certification; and it is further”

She further reported that in the November 13, 1986 Minutes on page 435C, paragraph 5, line 10 the word “and” should be deleted.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on January 22, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on January 22, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on January 22, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on January 22, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 1/22/87)

The World Trade Department - Newark Legal and Communications Center - Increase in Project Authorization

It was reported that at its meeting on September 12, 1985, the Board authorized the Acting Executive Director to proceed to implement a project for the development of an office building to be known as the Newark Legal and Communications Center (NLCC), and its related infrastructure, on lands situated in the City of Newark, New Jersey, adjacent to Pennsylvania Station and the PATH terminus at an estimated total cost of \$44.2 million for construction of the office building, including approximately \$4.2 million to provide for initial office finishes.

As a result of recent marketing efforts, staff has reached agreement in principle with the law firm of Sills, Beck, Cummis, Zuckerman, Radin, Tischman & Epstein (Sills Beck) for a 25-year lease in the NLCC whereby Sills Beck will occupy three floors with expansion to a fourth floor in the eleventh year of the term of the lease.

Furthermore, staff has been engaged in ongoing discussions with several other firms whose space requirements exceed the total available space in the building, as currently authorized.

Therefore, subject to Board approval, staff has determined that it would be cost-effective with minimal disruption to the present completion schedule to expand the building by three additional floors. It is anticipated that this modification will result in a two-month delay in completion. The additional three floors will result in an increase in the total net rentable square feet available for sale or lease in the building to approximately 72,750 square feet.

The Board, at its meeting on March 13, 1986, authorized the Executive Director, with the concurrence of the Committee on Construction, to enter into an agreement with a construction management firm to provide for the performance of construction management services and general conditions work during the design and construction phases of the NLCC project. Subsequently, on April 9, 1986, the Executive Director authorized the retention of Thacker Organization for a two-year period, effective May 1986. As a result of the extra time needed to design three additional floors, staff deems it necessary to retain Thacker Organization for a period of time longer than the two years originally authorized.

The Board, at its meeting on May 10, 1984, previously authorized the Executive Director to enter into an agreement with The Grad Partnership of Newark, New Jersey for architectural and engineering services related to the construction of an office building and its related infrastructure and a pedestrian walkway in Newark, New Jersey in the vicinity of Pennsylvania Station/PATH terminus, at an estimated cost of \$2.5 million. The addition of three floors to the NLCC project will require that The Grad Partnership perform additional architectural and engineering services in connection with the design and preparation of contract drawings and specifications for the additional floors, as well as for other modifications to the building systems necessitated by the addition of these floors. The estimated cost of the additional work is approximately \$300,000.

(Board - 1/22/87)

At its meeting on September 11, 1986, the Board authorized the Executive Director to enter into an installment contract of sale with the firm of Podvey, Sachs, Meanor & Catenacci (Podvey Sachs) for the purchase of approximately 29,400 usable square feet of space in the NLCC, together with an option for the purchase of approximately 9,800 additional usable square feet. In addition, the Board authorized the Executive Director to make payments to Podvey Sachs of an amount equal to one-half the difference between Podvey Sachs' rent at its present location and the rent for a one-year extension on approximately 6,300 rentable square feet, said payment not to exceed \$5 per rentable square foot. As a result of the increased time needed for the design and construction of three additional floors, it will be necessary for Podvey Sachs to negotiate an additional extension for its space at Gateway I in Newark beyond the one year originally contemplated. It is expected that this additional time will be approximately two to three months and the maximum financial exposure to the Port Authority will be approximately \$8,000.

It was therefore recommended that the Board authorize:

1. an increase in the total project cost for the Newark Legal and Communications Center (NLCC) for the construction of three additional floors at an expenditure presently estimated at \$7.5 million, inclusive of architectural, construction management, engineering, financing and administrative expenses;

2. the Executive Director to extend the present two-year agreement with Thacker Organization for construction management services and to make additional payments totalling \$116,000 (included in the increase of \$7.5 million referred to in Recommendation 1) to Thacker for services rendered during the extension period;

3. an increase in payments to The Grad Partnership to provide for architectural and engineering services in connection with the design and preparation of contract drawings and specifications for the three additional floors as well as other necessary modifications to the building systems necessitated by the addition of the three floors at an amount presently estimated at \$300,000 (included in the increase of \$7.5 million referred to in Recommendation 1); and

4. payment to Podvey, Sachs, Meanor & Catenacci (Podvey Sachs) of an amount (included in the increase of \$7.5 million referred to in Recommendation 1) equal to one-half the difference between Podvey Sachs' rent at its present location and rent for one year, or longer, if required, on approximately 6,300 rentable square feet, at an amount presently estimated at \$8,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, an increase in the total project cost for the Newark Legal and Communications Center (NLCC) for the construction of three additional floors at an expenditure presently estimated at \$7.5 million, inclusive of architectural, construction management, engineering, financing and administrative expenses; and it is further

RESOLVED, the Executive Director is authorized to extend the present two-year agreement with Thacker Organization for construction management services and to make additional payments totalling \$116,000 (included in the increase of \$7.5 million referred to in Recommendation 1) to Thacker for services rendered during the extension period; and it is further

RESOLVED, an increase is authorized in payments to The Grad Partnership to provide for architectural and engineering services in connection with the design and preparation of contract drawings and specifications for the three additional floors as well as other necessary modifications to the building systems necessitated by the additional of the three floors at an amount presently estimated at \$300,000 (included in the increase of \$7.5 million referred to in Recommendation 1); and it is further

RESOLVED, payments to Podvey, Sachs, Meanor & Catenacci (Podvey Sachs) is authorized of an amount (included in the increase of \$7.5 million referred to in Recommendation 1) equal to one-half the difference between Podvey Sachs' rent at its present location and rent for one year, or longer, if required on approximately 6,300 rentable square feet, at an amount presently estimated at \$8,000.

(Board - 1/22/87)

Kennedy International Airport - Unarmed, Uniformed Guard Service - Authority to Award Contract No. AYB-807

It was reported that the present contract covering the unarmed, uniformed guard service at Kennedy International Airport, under which the contractor provides security guard service for certain aeronautical area access points, the International Arrivals Building and select public and employee lots, expires on March 31, 1987.

It is recalled, that as set forth in the report presented to the Committee on Operations on August 14, 1986 in response to the concerns about the level of security at airports around the world, staff had studied the effectiveness of contract security guard services at Kennedy International, Newark International and LaGuardia Airports. The study resulted in recommendations to implement certain changes in order to substantially upgrade the standards of the overall airport security program and specifically improve the quality and calibre of the guards providing the service. The changes to be implemented include increased compensation, better qualification of guards, increased levels of training, more stringent background investigations, as well as improvements in vehicles used in the guard service, communication enhancements and standardized uniforms.

Certain items of these recommendations have been phased in as part of the negotiations to extend the contract with the current contractor, International Total Services, Inc., to March 31, 1987.

The contract hereunder, which provides for an initial two-year period commencing on April 1, 1987 and three one-year extensions exercisable at the option of the Port Authority, includes all the study group recommendations as previously mentioned. Although these enhancements will result in increased costs, a majority of which are recoverable under current arrangements with users of the airport, it is believed they will result in a better security service in the Port Authority areas of responsibility at the airport.

Potential bidders were notified that they would have to meet certain prerequisites to be able to submit a bid which generally consist of the following:

1. the bidder must have at least five years of experience in the actual operation of a contract guard service;
2. the bidder must recently have had an annual gross income from the operation of its guard service of at least \$3 million; and
3. the bidder must have provided a minimum of 10,000 straight time hours of industrial or commercial guard or watchman service in a week during a specified period prior to the bid opening.

Bids were solicited on the basis of: (a) 182,040 estimated hours of post coverage per year; (b) provision for nine vehicles to be used exclusively in providing guard service; (c) provision for a full-time Management Representative; and (d) provision for 8,750 Assistant Management Representative hours, per year.

It was therefore recommended that the Executive Director be authorized for, and on behalf of the Port Authority, to award Contract AYB-807 for uniformed guard service at Kennedy International Airport to the lowest qualified bidder, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board hereby: (1) authorizes the Executive Director, for and on behalf of the Port Authority, to award a two-year contract commencing on or about April 1, 1987 to the lowest qualified bidder for providing unarmed, uniformed guard service at Kennedy International Airport which includes coverage for certain aeronautical access points, the International Arrivals Building and select public and employee parking lots, all in accordance with the foregoing; (2) authorizes the Director of Aviation, at his discretion to exercise three one-year extensions of the contract at the option of the Port Authority, subject to escalation of prices as provided for in the contract; all in accordance with the foregoing; and (3) authorizes the Director of Aviation to order extra work to be provided by the contractor during the term of the contract including option years, with additional payments for said extra work not to exceed 15% of the total contract price, all in accordance with the foregoing; and it is further

RESOLVED, that the form of the contract be subject to the approval of General Counsel or his designated representative.

(Board - 1/22/87)

La Guardia Airport - Unarmed, Uniformed Guard Service - Authority to Award Contract
No. AGA-102

It was reported that the present contract covering the unarmed, uniformed guard service at LaGuardia Airport, under which the contractor provides security guard service for aeronautical area access points has been in place as a adjunct operation of the Kennedy International Airport Security guard contract and expires on March 31, 1987.

It is recalled that, as set forth in the report presented to the Committee on Operations on August 14, 1986 in response to the concerns about the level of security at airports around the world, staff had studied the effectiveness of contract security guard services at Kennedy International, Newark International and LaGuardia Airports. The study resulted in recommendations to implement certain changes in order to substantially upgrade the standards of the overall airport security program and specifically improve the quality and calibre of the guards providing the service. The changes to be implemented include increased compensation, better qualification of guards, increased levels of training, more stringent background investigations, as well as improvements in vehicles used in the guard service, communication enhancements and standardized uniforms.

Certain items of these recommendations have been phased in as part of the negotiations to extend the contract with the current contractor, International Total Services, Inc., to March 31, 1987.

The contract hereunder, which provides for an initial two-year period commencing on April 1, 1987 and three one-year extensions exercisable at the option of the Port Authority, includes all the study group recommendations as previously mentioned. Although these enhancements will result in increased costs, a majority of which are recoverable under current arrangements with users of the airport, it is believed they will result in a better security service in the Port Authority areas of responsibility at the airport.

Bids are being solicited from a list of qualified minority vendors developed by the General Services Department and the Office of Minority Business Development based on: (a) 29,200 estimated hours of post coverage; (b) provision for one vehicle to be used exclusively in providing guard service; and (c) provision for 8,750 Assistant Management Representative hours, per year.

During the extension period, if any, prices will be adjusted based upon changes in the Consumer Price Index. Any adjustment of the prices during the extension period will also result in appropriate changes in the minimum wage and minimum supplemental benefit requirements for the contractor's employees set forth in the contract.

It was therefore recommended that the Executive Director be authorized, for and on behalf of the Port Authority, to award Contract AGA-102 for uniformed guard service at LaGuardia Airport to the lowest qualified bidder, all in accordance with the foregoing.

(Board -1/22/87)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board hereby authorizes: (1) the Executive Director, for and on behalf of the Port Authority, to award a two-year contract commencing on or about April 1, 1987 to the lowest qualified bidder for providing unarmed, uniformed guard service at LaGuardia Airport which includes coverage for aeronautical access points, all in accordance with the foregoing; (2) the Director of Aviation, at his discretion, to exercise three one-year extensions of the contract at the option of the Port Authority, subject to escalation of prices as provided for in the contract, all in accordance with the foregoing; and (3) the Director of Aviation to order extra work to be provided by the contractor during the term of the contract including option years, with additional payments for said extra work not to exceed 15% of the total contract price, all in accordance with the foregoing; and it is further

RESOLVED, that the form of the contract be subject to the approval of General Counsel or his designated representative.

(Board - 1/22/87)

Newark International Airport - Unarmed, Uniformed Guard Service - Authority to Award Contract No. A-4004

It was reported that the present contract covering the unarmed, uniformed guard service at Newark International Airport, under which the contractor provides security guard service for aeronautical and non-restricted area access points, expires on March 31, 1987.

It is recalled, that as set forth in the report presented to the Committee on Operations on August 14, 1986 in response to the concerns about the level of security at airports around the world, staff had studied the effectiveness of contract security guard services at Kennedy International, Newark International and LaGuardia Airports. The study resulted in recommendations to implement certain changes in order to substantially upgrade the standards of the overall airport security program and specifically improve the quality and calibre of the guards providing the service. The changes to be implemented include increased compensation, better qualification of guards, increased levels of training, more stringent background investigations, as well as improvements in vehicles used in the guard service, communication enhancements and standardized uniforms.

Certain items of these recommendations have been phased in as part of the negotiations to extend the contract with the current contractor, Lansdell Protective Agency, Inc., to March 31, 1987.

The contract hereunder, which provides for an initial two-year period commencing on April 1, 1987 and three one-year extensions exercisable at the option of the Port Authority, includes all the study group recommendations as previously mentioned. Although these enhancements will result in increased costs, a majority of which are recoverable under current arrangements with users of the airport it is believed they will result in a better security service in the Port Authority areas of responsibility at the airport.

Potential bidders were notified that they would have to meet certain prerequisites to be able to submit a bid which generally consist of the following:

1. the bidder must have at least five years of experience in the actual operation of a contract guard service;
2. the bidder must recently have had an annual gross income from the operation of its guard service of at least \$2.5 million; and
3. the bidder must have provided a minimum of 6,500 straight time hours of industrial or commercial guard or watchman service during a week in a specified period prior to the bid opening.

Bids were solicited on the basis of:(a) 118,660 estimated hours of post coverage; (b) provision for four vehicles to be used in providing guard service; (c) provision for a full-time Management Representative; and (d) provision for 8,750 Assistant Management Representative hours per year.

During the extension period, if any, prices will be adjusted based upon changes in the Consumer Price Index. Any adjustment of prices during the extension period will result in appropriate changes in the minimum wage and minimum supplemental benefit requirements for the contractor's employees set forth in the contract.

(Board - 1/22/87)

It was therefore recommended that the Executive Director be authorized, for and on behalf of the Port Authority, to award Contract No. A-4004 for uniformed guard service at Newark International Airport to the lowest qualified bidder, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board hereby authorizes: (1) the Executive Director, for and on behalf of the Port Authority, to award a two-year contract commencing on or about April 1, 1987 to the lowest qualified bidder for providing unarmed, uniformed guard service at Newark International Airport which includes coverage of aeronautical and non-restricted area access points, all in accordance with the foregoing; (2) the Director of Aviation, at his discretion to exercise three one-year extensions of the contract at the option of the Port Authority, subject to escalation of prices as provided for in the contract, all in accordance with the foregoing; and (3) the Director of Aviation to order extra work to be provided by the contractor during the term of the contract including option years, with additional payments for said extra work not to exceed 15% of the total contract price, all in accordance with the foregoing; and it is further

RESOLVED, that the form of the contract be subject to the approval of General Counsel or his designated representative.

(Board - 1/22/87)

Kennedy International Airport - International Arrivals and Wing Buildings - Surrender of Lease AYA-465 By Societe Anonyme Belge D'Exploitation De La Navigation Aerienne and New Agreements with other Airlines

It is recalled that in the early 1970's the Board authorized an expansion program by the Port Authority for the East and West Wing Buildings and the International Arrivals Building at Kennedy International Airport; and new 25-year Wing Building Leases to expire on May 16, 1996 for space in the expanded facility. These new leases included Societe Anonyme Belge D'Exploitation de la Navigation Aerienne (SABENA's) Wing Building Lease, AYA-465, for its terminal facility in the West Wing Building.

In the early 1980's SABENA was faced with serious financial problems and the prospect of ceasing operations at Kennedy International Airport unless it could negotiate satisfactory arrangements with its employees' unions and thereafter be handled by another airline. SABENA was successful in the objective and, with the concurrence of the Port Authority, moved its passenger operations to the American Airlines unit terminal in May 1983. Also with the concurrence of the Port Authority it subleased its terminal facility in the West Wing Building initially to Transamerica Airlines, and later also to Dominicana de Aviacion C por A. As of September 30, 1986, Transamerica ceased operations at Kennedy International Airport leaving Dominicana as the sole operator in the SABENA space.

A number of airlines have expressed interest to the Port Authority in operating their own terminal facilities in the SABENA space including Pakistan International Airlines Corp., Nigeria Airways Limited and Saudi Arabian Airlines Corp. Staff believes that this space would be utilized for the maximum benefit of airport operations if the Port Authority now regains direct control thereof and is able to make direct arrangements with airlines for its use.

Thus, the Port Authority has offered to accept from SABENA a surrender of its Wing Building Lease and to pay to SABENA the amount of \$1.3 million in consideration of its unamortized investment in its exclusive West Wing Building terminal space.

Pakistan International Airlines Corp. and Nigeria Airways Limited have operated at the Wing Building at Kennedy International Airport for many years, being handled by other airlines. Both have expressed the desire to conduct their own terminal operations in the Wing Buildings, and staff has concluded that upon the surrender by SABENA, short-term arrangements of approximately one year covering their occupancy and operations in the former SABENA space should be entered into while discussions continue pertaining to more permanent arrangements for use of the space, including modifications to the exclusive premises which may be required to upgrade the facility and to provide for use by more than one airline. The rental called for under the arrangements with Nigeria and Pakistan would at least equal the rental which would have been paid by SABENA, plus an additional amount representing an appropriate amortization of the payment made to SABENA by the Port Authority for its improvements.

It was therefore recommended that the Executive Director be authorized, for and on behalf of the Port Authority, to enter into agreements with Societe Anonyme Belge D'Exploitation de la Navigation Aerienne (SABENA), Nigeria Airways Limited and Pakistan International Airlines Corp. at Kennedy International Airport, all in accordance with the foregoing.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board hereby authorizes the Executive Director, for and on behalf of the Port Authority, all in accordance with the foregoing, to: (1) enter into an agreement accepting from Societe Anonyme Belge D'Exploitation de la Navigation Aerienne (SABENA) a surrender of its Wing Building Lease AYA-465 covering exclusive space in the West Wing Building and the use of associated common areas and facilities in the East and West Wing Buildings and International Arrivals Building at Kennedy International Airport, and providing for a payment to SABENA of an amount not to exceed \$1.3 million in consideration of SABENA's unamortized investment in its exclusive space; and (2) enter into agreements with Pakistan International Airlines Corp. and/or Nigeria Airways Limited for a period of approximately one year for the space surrendered by SABENA at rates at least equal to those to have been paid by SABENA, plus an additional payment to the Port Authority covering an appropriate amortization of the Port Authority's payment to SABENA for its unamortized investment.

RESOLVED, that the form of the foregoing agreements to be subject to the approval of General Counsel or his designated representative.

(Board - 1/22/87)

Kennedy International and Newark International Airports - Purchase of Sixty Replacement Aircraft Fueling Hydrant Carts and Ten Additional Aircraft Fueling Hydrant Carts

It was reported that the function of a hydrant cart is to transfer fuel from an in-ground distribution system to an aircraft by reducing fuel pressure from the hydrant to allowable aircraft limits, by starting and stopping the fuel flow, and by metering and filtering the fuel.

Within the current hydrant cart fleet, which services both Kennedy International and Newark International Airports, a total of 151 carts, there exist 60 300-series carts which have been in service since 1973. These carts have reached the end of their useful service life and require replacement or extensive rehabilitation. The remaining 91 are 800-series carts, which were rehabilitated in 1981.

Based on several factors including cost, rehabilitation feasibility, suitability for future mission and the impact on cart availability while rehabilitation would take place, staff recommends the replacement option. Concurrence with this program has been received from the Airline Fuel Committees of both Kennedy International and Newark International Airports. The replacement program is scheduled to commence in the Summer of 1987, to proceed at an anticipated rate of four units per month, and to conclude with total replacement by the Fall of 1988. Thirty-one of the replacement carts are to be utilized at Newark International Airport and 29 are to be utilized at Kennedy International Airport.

In addition, ten new hydrant carts should be purchased for Newark International Airport, in anticipation of fueling demands for Terminal C. The current Newark fleet size of 35 will be expanded by a need for 22 carts at Terminal C, the amount stipulated in the lease, and an additional three carts for increased demands in Terminals A and B and Federal Express. These carts are to be delivered by October 1987.

In the event that the total Newark demands do not meet current projections, fewer carts would be ordered.

The contracts for the 70 cab/chassis and fueling systems will be publicly advertised and bids are expected in late January 1987. In order to meet the required delivery dates, it is recommended that the Executive Director be authorized to award the contracts.

It was therefore recommended that the Board authorize the Executive Director:

1. in addition to any powers he may have with respect to such contract under the By-Laws, either to award a publicly advertised contract for the manufacture and furnishing of 70 cab/chassis for 750 GPM hydrant carts to the lowest bidder who, in his opinion is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the bid accepted or to reject all bids; and

(Board - 1/22/87)

2. in addition to any powers he may have with respect to such contract under the By-Laws, either to award a publicly advertised contract for the manufacture and furnishing of 70 fueling systems for 750 GPM hydrant carts to the lowest bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the bid accepted, or to reject all bids; all in connection with the acquisition of 70 aircraft fueling hydrant carts for Newark International and Kennedy International Airports.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized in addition to any powers he may have with respect to such contract under the By-Laws, either to award a publicly advertised contract for the manufacture and furnishing of 70 cab/chassis for 750 GPM hydrant carts to the lowest bidder who, in his opinion is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the bid accepted or to reject all bids; and it is further

RESOLVED, that the Executive Director is authorized in addition to any powers he may have with respect to such contract under the By-Laws, either to award a publicly advertised contract for the manufacture and furnishing of 70 fueling systems for 750 GPM hydrant carts to the lowest bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the bid accepted, or to reject all bids; all in connection with the acquisition of 70 aircraft fueling hydrant carts for Newark International and Kennedy International Airports; and it is further

RESOLVED, that the form of the contracts be subject to the approval of General Counsel or his authorized representative.

(Board -1/22/87)

Purchase of Replacement Helicopter

It was reported that in 1987 the Port Authority's MBB BO-105 CBS helicopter will be five years old and will have reached the cyclical replacement point staff have found to be both cost and maintenance effective for this type of helicopter. The proposed 1987 budget includes a replacement cost figure of \$1.8 million. Staff estimates that the existing BO-105 would realize a selling price in the range of approximately \$400,000 when put out for bid, which will partially offset the replacement cost of the helicopter.

Aviation staff have reviewed the manufacturer's data and made actual flight evaluations of all available comparable helicopters to choose the best possible replacement. Taking into account such variables as price, passenger and pilot comfort, and all weather capability, staff have concluded that another Bell 222 type would best suit the agency's needs. A used 1983 model Bell 222B helicopter priced at \$1.4 million has been identified. This helicopter is fully equipped with many desirable features that would complement the helicopter operation. Among the major features are a fully certified Instrument Flight Rule (IFR) capability with weather radar, six passenger seating, dual Sperry auto pilots, retractable landing gear with pop-out floats, and the ability to carry litters to fulfill med-evac emergency missions. If this aircraft is purchased from Bell the price will include detailed inspection by Bell, painting in Port Authority colors to Port Authority specifications and a warranty from Bell covering the helicopter for the earlier of 500 flight hours or six months. A new, comparably equipped Bell 222B would cost approximately \$2.3 million.

The helicopter proposed for purchase was used by Anheuser Busch Corporation, a well established corporate helicopter user whose operating, maintenance and safety record is comparable to that of the Port Authority. Life expectancy projections for this generation helicopter is approximately nine to ten years of comparable Port Authority use. Staff have reviewed the maintenance and flight logs for this helicopter and have verified that Anheuser Busch flew the craft approximately one-half the number of annual flight hours as is typical for Port Authority helicopters. This fact, coupled with the standard of care and maintenance the aircraft appears to have received, leads staff to evaluate its previous service as equivalent to two years of Port Authority use. Therefore, the remaining service life for this helicopter is estimated at seven to eight years.

Because of its unusually attractive ownership history and condition, other helicopter operators have also shown an interest in purchasing this particular aircraft. In order to secure it for the Port Authority, a \$20,000 non-refundable payment, which served as consideration for the extension of a 45-day exclusive option to purchase, was authorized by the Executive Director. The \$20,000 will be credited to the purchase price of the helicopter.

It was therefore recommended that the Board authorize:

1. the purchase of a used Bell 222B type eight-place, six passenger helicopter, at a total price of \$1.4 million from Bell Helicopter Textron, Inc., Fort Worth, Texas, to replace the existing MBB BO-105 CBS Boelkow helicopter (N9380A); and

(Board - 1/22/87)

2. disposition of Port Authority MB BO-105 CBS Boelkow helicopter for sale by bid to the high bidder with a bid price of approximately \$400,000 at a minimum.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize: (1) the purchase of a used Bell 222B type eight-place, six-passenger helicopter, at a total price of \$1.4 million from Bell Helicopter Textron, Inc., Fort Worth, Texas, to replace the existing MBB BO-105 CBS Boelkow helicopter (N9380A); and (2) disposition of Port Authority MB BO-105 CBS Boelkow helicopter for sale by bid to the high bidder with a bid price of approximately \$400,000 at a minimum; and it is further

RESOLVED, that the form of the agreements for purchase and sale be subject to the approval of General Counsel or his authorized representative.

(Board - 1/22/87)

Settlement of Claim - Garsite Products - Airport Crash/Fire/Rescue Vehicle

It was reported that in September 1982, the Executive Director authorized the award of a purchase contract for an airport crash/fire/rescue (C/F/R) vehicle to replace a damaged vehicle, to the low bidder, Garsite Products, Inc., of Deer Park, Long Island, New York, at its bid price of \$295,870.

The functional specifications for this new vehicle prepared by the Port Authority included numerous automotive design and fire-fighting technological improvements over the previous generation of C/F/R vehicles. These improvements, among others, required the ability to vary independently the speed of the vehicle and the fire-fighting pump while using only a single engine, and the utilization of a smaller, more maneuverable truck made possible by a new type of fire-fighting foam. In addition to completing the Port Authority fleet of C/F/Rs, staff also wanted a pilot vehicle to evaluate these improved operational features in anticipation of a full scale replacement program for all C/F/R vehicles. The C/F/R vehicle, which was designed and manufactured by Garsite to meet Port Authority performance requirements, was delivered in June 1984.

During field testing, a variety of deficiencies surfaced. These included the inability to accurately and consistently proportion the fire-fighting foam, pneumatic and electrical systems faults, and failures in the power steering pump, power divider main shaft, and engine thrust bearings.

Garsite made numerous repairs and modifications at its own expense, which resulted in the vehicle meeting the requirements of the functional specifications. The Port Authority therefore was able to conduct a number of the planned evaluations. Despite Garsite's best efforts, other failures occurred until January 1986, when a major engine fire rendered the vehicle useless. Following the fire, the cause of which could not be fully determined, staff determined that the vehicle should not be repaired since staff was not confident that the vehicle would properly operate when needed for an emergency, although the vehicle was capable of being repaired to an operational condition.

Staff and Garsite thereupon began a joint analysis of the history and experience of the vehicle. It was staff's position that the vehicle had not initially met the contractual requirements and never achieved the reliability required for a vehicle of this type. Garsite contends that although there were initial design and manufacturing problems, these problems have been solved, that the engine fire was due to a Port Authority modification, and that the vehicle should have been returned to service.

Following negotiations over several months, it was tentatively agreed that in light of the fact that the Port Authority did receive substantial benefits during the vehicle's testing and evaluation, a settlement which would require Garsite to pay the Port Authority \$175,000 in return for the damaged vehicle, would be fair and reasonable.

(Board - 1/22/87)

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement with Garsite Products, Inc., for the settlement of a claim against Garsite Products, Inc., by the Port Authority in connection with the purchase and subsequent failure of an Airport Crash/Fire/Rescue Vehicle, such agreement to provide for:

1. a payment of \$175,000 to the Port Authority in return for the failed vehicle; and
2. a release of Garsite Products, Inc., from all further liability to the Port Authority in connection with the vehicle.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into an agreement with Garsite Products, Inc., for the settlement of a claim against Garsite Products, Inc., by the Port Authority in connection with the purchase and subsequent failure of an Airport Crash/Fire/Rescue Vehicle, such agreement to provide for: (1) a payment of \$175,000 to the Port Authority in return for the failed vehicle; and (2) a release of Garsite Products, Inc., from all further liability to the Port Authority in connection with the vehicle; and it is further

RESOLVED, that the form of the agreement be subject to the approval of General Counsel or his authorized representative.

(Board - 1/22/87)

Furnishing General Office Supply Requirements

It was reported that Contracts PSS-86-30 and PSS-86-31A provide for the furnishing of office stationery and supply products and delivery of these items to the World Trade Center and other Port Authority facilities. Compensation is based on the unit price bid for each of 224 specific items and on the bid discount from list price for the balance of the vendor's stationery and supply catalog.

These contracts permit Port Authority staff to acquire needed office or stationery products within minimal lead times without the costs associated with repetitive bidding and inventory carrying and redistribution costs. The process also eliminates the need for substantial increases in storage space at both the World Trade Center and the Central Stockroom at Port Elizabeth. Overall savings in annual costs for stockroom space, inventory carrying cost and redistribution are approximately \$500,000 per year. This stockless supply contract concept was first introduced into the Port Authority in 1973 and with improvements incorporated in early 1986 has been operating successfully since that time.

In August of this year as preparation of contract specifications was underway a detailed user survey was distributed to all Port Authority staff who order office and stationery products under the contract. The survey results indicate that staff were satisfied with the improvements in delivery times which had been made during 1986. Their satisfaction is further evidenced by increases in use of the contract vendor from an average \$34,811 per month to \$46,536 per month during the year.

Bids for Contract PSS-86-30 were publicly advertised and solicited from 66 suppliers. On December 2, 1986, the following bids were received:

	Total Estimated Cost (One Year)
LOPC Division of Joyce International Great Neck, New York	\$ 967,625
Manhattan Stationery New York, New York	1,112,335

In addition, seven incomplete proposals were received. Bids were solicited based on a unit price for 224 specific high usage items and on a discount from list price in the current United Stationers Catalog for other stationery and supply items.

(Board -1/22/87)

Bids for Contract PSS-86-31, a minority set aside representing 20% of the total Port Authority requirement, were solicited from three prequalified Port Authority certified minority suppliers, and on December 2, 1986, three incomplete proposals were received. Rama Office Products, Inc., submitted the lowest overall proposal but significantly underpriced many of their unit items. After review of its pricing, Rama Office Products, Inc., asked for and was granted permission to withdraw. J. Cherry Corporation submitted the second lowest proposal but seriously imbalanced pricing on many of the specified items. The company's available financial data indicated an inability to sustain any significant losses that might result from such price imbalancing. Proftech Corporation submitted prices which were significantly higher than those of LOPC, and their prices were considered excessive. Therefore, all proposals were rejected.

Based on these proposals and ensuing discussions with all the vendors, staff determined that a potentially satisfactory contract could be negotiated with Proftech Corporation. After these discussions, Proftech was able to restructure its proposal and offer more favorable pricing for specified items and a higher discount on the balance of its catalog items. Contract PSS-86-31A reflects these revisions and it is estimated to cost \$274,000 in the first year.

Both contracts permit escalation for the 224 specified items on each contract anniversary date based upon the percentage changes for individual items contained in the Office Products Pocket Pricing Guide published by United Stationers. Pricing for all other items for the second and all succeeding years, including any extension thereof, is based upon the list prices in each subsequent year's United Stationers' Catalog less the bid discount. Both contracts have a three-year term and provide that the Port Authority may extend the contracts for two additional one-year periods.

LOPC Division of Joyce International (formerly Litton Office Products Centers, Division of Litton Business System, Inc.) has satisfactorily provided these services to the Port Authority for the past fourteen years and is the present contractor.

Proftech Corporation has not previously performed similar work for the Port Authority. Its capability and references have been reviewed, and it is considered qualified to meet the requirements of Contract PSS-86-31A. Proftech Corporation has been certified as a minority vendor by the Port Authority's Office of Minority Business Development.

It was therefore recommended that the Board authorize:

1. the award of Contract PSS-86-30, Furnishing General Office Supplies, World Trade Center and Select Facilities, to the low bidder, LOPC Division of Joyce International, Great Neck, New York, for a three-year period beginning March 1, 1987;
2. the award of negotiated Contract PSS-86-31A, Furnishing General Office Supplies, Select Facilities, to Proftech Corporation, Tarrytown, New York, a minority business enterprise, for a three-year period beginning March 1, 1987; and

(Board -1/22/87)

3. the Executive Director, in his discretion, to authorize the exercise of the Port Authority's options to extend each contract for up to two additional one-year periods.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the award of Contract PSS-86-30, Furnishing General Office Supplies, World Trade Center and Select Facilities, to the low bidder, LOPC Division of Joyce International, Great Neck, New York, for a three-year period beginning March 1, 1987, be and it hereby is authorized; and it is further

RESOLVED, that the award of negotiated Contract PSS-86-31A, Furnishing General Office Supplies, Select Facilities, to Proftech Corporation, Tarrytown, New York, a minority business enterprise, for a three-year period beginning March 1, 1987, be and it hereby is authorized; and it is further

RESOLVED, that the Executive Director is authorized, in his discretion, to exercise the Port Authority's options to extend each contract for up to two additional one-year periods.

Chairman Kaltenbacher announced the appointment of John E. Hauptert as Treasurer.

Whereupon, the meeting was adjourned.

 Kristina E. Weisenstein, Administrative Assistant
 Marvin Weiss, Director, Office of Minority Business Development
 Stanely R. Kramer, Bond Counsel, Hawkins, Delafield & Wood
 Donald J. Robinson, Bond Counsel, Hawkins, Delafield & Wood

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of January 22, 1987. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on February 12, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on February 12, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on February 12, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on February 12, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 2/12/87)

The Port Authority Industrial Park at Yonkers - Surrender Agreement with J.F. Macri, Inc.

It was recommended that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into a surrender agreement with J.F. Macri, Inc. for its premises at the Port Authority Industrial Park at Yonkers substantially in accordance with the following terms and conditions. J.F. Macri, Inc. would surrender both of its leases (one in Building No. 8 on or about February 15, 1987 and one in Building No. 3 on or about April 1, 1987) at the Port Authority Industrial Park at Yonkers and the Port Authority will pay J.F. Macri, Inc. approximately \$388,000 for the surrender and moving expenses. The surrender will enable the Port Authority to demolish Building No. 8 which is in a deteriorated condition. J.F. Macri, Inc. would not agree to surrender Building No. 8 unless it could surrender its premises at Building No. 3 as well.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized, on behalf of the Port Authority, to enter into the surrender agreement with J.F. Macri, Inc. described above; the form of the surrender agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 2/12/87)

The World Trade Center - Port Authority Offices - Modular Workstations Purchase

At its meeting on July 10, 1986, the Board authorized the award, during 1986, of contracts for the purchase and installation of approximately 700 modular workstations and related conference room and reception area furnishings for Port Authority offices at The World Trade Center to the lowest bidder from among the authorized distributors of three manufacturers. The use of this purchase for economic development impact purposes necessitates a new authorization.

Manufacturers and distributors of modular workstations will be invited by public advertisement to submit proposals. Responsive proposals will first be evaluated for conformance to technical specifications and design acceptability. Those proposals which qualify will be further evaluated based on purchase price and, for proposal comparison only, in keeping with the business development component of the Port Authority's economic development strategy, a negotiable credit (up to a stated maximum) based on economic development impact factors will be given to firms expanding their operations in either state or establishing a new facility in the Port District. Should none of the economic development proposals be satisfactory, the order would be awarded without reference to economic impact to that firm which is otherwise qualified and which submits the lowest reasonable proposal price.

This will be a unit price contract providing for a stated discount from the manufacturer's catalogue. If the contract is awarded to a firm receiving an economic development impact credit, that firm would receive a comparable credit on any additional World Trade Center modular workstation orders within the next five years. Certain payments under the contract would be withheld until the firm submits a signed lease or other executed document as evidence of having fulfilled its economic development commitment. Other incentives, such as funding of on-the-job training through a private industry council, may also be included. Subject to additional authorization, as may be appropriate, partial advances for plant and equipment may be offered if the firm locates a new facility at a Port Authority industrial park.

This equipment may be eligible for inclusion in the Port Authority Operating Equipment Lease Financing Program, presently authorized at a maximum principal amount outstanding at any one time of \$25 million.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized, in his discretion, (a) to award a contract for the purchase and installation of approximately 700 modular workstations for Port Authority offices at the World Trade Center to that firm whose products meet the technical specifications and whose design is acceptable, which is qualified by reason of responsibility, experience and capacity to perform the contract and whose proposal price (which may or may not include an economic development impact credit, which may be negotiated) is deemed reasonable, and to order extra work up to the amount of 10% of the proposal accepted; or (b) to reject all proposals, and it is further,

RESOLVED, that the form of the contract be subject to the approval of General Counsel or his authorized representative.

(Board - 2/12/87)

Enlargement of Foreign-Trade Zone No. 49 through Expansion or the Establishment of a Subzone to include the IMTT-Bayonne Facility in Bayonne, New Jersey

It was reported that IMTT-Bayonne has requested that the Port Authority submit an application for zone expansion or subzone establishment on its behalf. Foreign-Trade Zone status of the IMTT-Bayonne facility would ensure that it would remain competitive with other Foreign-Trade Zone operators involved in liquid bulk terminal operations. Furthermore, such status would create economic benefits for IMTT-Bayonne, its customers and the region at large. Lack of status would erode a substantial portion of its existing business, and result in the elimination of some 25 permanent jobs.

Current interpretation of Foreign-Trade Zone regulations leaves unclear whether expansion or the establishment of a subzone is more appropriate; hence, authority was requested for either.

IMTT-Bayonne is involved in the transport, storage, and blending of refined liquid petroleum products and crude oil, and the storage of other bulk liquids such as chemicals and vegetable oils. It currently employs 125 people. IMTT-Bayonne is owned by International Matex Tank Terminal, Inc.

Gasoline blending involves the mixing of foreign and domestic chemical components to produce finished gasoline. Under Foreign-Trade Zone status, the applicable duty on foreign components could be lowered to the applicable duty rate for imported finished gasoline. This would reduce duty payments and provide an incentive for the utilization of domestic components through the substitution of blended gasoline for imported finished gasoline. IMTT-Bayonne has all the necessary environmental permits to conduct these activities.

In addition, Foreign-Trade Zone status would enable IMTT-Bayonne's customers to defer duty on imported petroleum products and eliminate duty on re-exported products which could create a totally new export market.

Upon securing zone status IMTT-Bayonne has agreed to enter into an appropriate agreement with the Port Authority which will insure that the site will be operated by it without cost, expense, or risk of loss to the Port Authority.

Potential regional benefits of zone status include: increased tonnage of the Port; private capital investment of \$10 million for the construction of one million barrels of storage; and incentive for the increased use of domestic gasoline components; creation of a minimum of 25 permanent jobs and 20 construction jobs; retention of 125 existing jobs; and provision of a more competitive source of fuel.

(Board - 2/12/87)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director to file an application with the Foreign-Trade Zones Board of the United States Department of Commerce for the expansion of Foreign-Trade Zone No. 49, which consists of 2,100 acres at the Port Newark/Elizabeth-Port Authority Marine Terminal, to include the IMTT-Bayonne facility in Bayonne, New Jersey or in the alternative to establish that facility as a subzone.

(Board - 2/12/87)

The World Trade Center - Continuation of Architectural and Engineering Services

The Board has to date authorized approximately \$39.1 million, including its last authorization of approximately \$1 million on January 10, 1985, for architectural and engineering design services for the World Trade Center.

In the early stages of the development of the World Trade Center complex it was decided to utilize the services of architectural and engineering firms for design services. The principal firms currently providing a majority of these services to the Port Authority are Leslie E. Robertson Associates, Joseph R. Loring & Associates, Inc. and Leo Kornblath Associates, P.C. Other firms continue to provide services to a lesser extent, including: Minoru Yamasaki & Associates, Arcop Associates, and Glenn Monigle & Associates, Inc.

The major programs that are expected to require the services of these firms include architectural, electrical, mechanical and structural designs for miscellaneous tenant alterations; feasibility studies; modifications to various World Trade Center systems, including river water and condenser water; interface with 7 World Trade Center and the World Financial Center; elimination of the stack effect problem; upgrading the aesthetics of the complex; and an additional entrance to 5 World Trade Center at Vesey Street.

An increase in authorized expenditures of approximately \$1,125,000 for architectural and engineering design services for the World Trade Center assures the continuity of these professional services, which safeguards the integrity of World Trade Center building systems, maintains the firms' responsibilities as architects and engineers of record and avoids the substantial financial outlay that would be necessary if other firms, which would require extensive preparation and research time, were hired.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to expend approximately \$1,125,000 beyond that previously authorized for architectural and engineering services in connection with the design and construction of the World Trade Center.

(Board - 2/12/87)

Signature of Checks and Depository Service Agreements

On January 10, 1985, the Board adopted a resolution (revoking prior resolutions) entitled "Signature of Checks, Safe Deposit Boxes and Depository Service Agreements" concerning, in part, persons authorized to sign contracts and other documents in the absence of the Executive Director; persons authorized to sign, countersign, delegate the authority to sign or be delegated the authority to sign checks, drafts and transfer warrants; persons authorized to endorse for collection or deposit, in the name of the Authority, checks, drafts, certificates of deposit and other negotiable and non-negotiable paper; persons authorized to provide facsimile signatures for use on certain checks and; authorizations in connection with safe deposit boxes, night deposit agreements and special service agreements with depositories.

It is desirable to amend, in part, the authorizations contained in the above-mentioned resolution of the Board to reflect staffing changes of the Port Authority by deleting references to obsolete Port Authority titles and by designating other officers of the Port Authority with authority to perform such functions.

It is also desirable to reflect current practices by deleting references to persons authorized to rent, discontinue rental and have access to safe deposit boxes in the said resolution of January 10, 1985.

The following resolution was unanimously adopted:

RESOLVED, that the resolution of January 10, 1985, (appearing at pages 29 et seq. of the Official Minutes of that date), relating to signature of contracts and other documents in the absence of the Executive Director and the signature of checks, safe deposit boxes, and depository service agreements be and it hereby is revoked and rescinded in its entirety; and it is further

RESOLVED, that in all cases where the Executive Director has been or shall hereafter be authorized to sign contracts, agreements, instruments, documents or other papers on behalf of The Port Authority of New York and New Jersey (other than checks, drafts or commercial papers), and the Executive Director is unable to act because of absence or disability, then the Deputy Executive Director or the Assistant Executive Directors, or their successors in office or duties, shall be authorized to sign, and in all cases where any such contracts, agreements, instruments, documents or papers are signed by the Deputy Executive Director or the Assistant Executive Directors, or their successors in office or duties, all persons whatsoever shall be entitled to rely thereon without proof of the Executive Director's absence or disability; and it is further

(Board - 2/12/87)

RESOLVED, that checks and drafts drawn on behalf of The Port Authority of New York and New Jersey upon any and all banks, trust companies and other banking institutions in which any funds may at any time stand to the credit of The Port Authority of New York and New Jersey shall be signed as follows:

(1) Transfer Warrants, being checks or drafts bearing upon their face substantially the following phraseology, "Transfer Warrants - This check is issued only for the purposes of transferring funds from one depository of The Port Authority of New York and New Jersey to another", may be signed by the Chief Financial Officer, the Deputy Chief Financial Officer, the Comptroller, the Assistant Comptroller, the Treasurer, the Assistant Treasurer, the Manager, Cash, Capital and Debt Management, the Senior Financial Analyst in Treasury, the Staff Financial Analyst in Treasury, the Financial Analyst in Treasury, the Associate Financial Analyst in Treasury, or the Assistant Financial Analyst in Treasury, without co-signature and without limitations as to amount.

(2) Any check or draft (other than a Transfer Warrant), the amount of which shall be in excess of \$50,000, shall be signed by either the Executive Director, the Deputy Executive Director, the Assistant Executive Director, the Chief Financial Officer, the Treasurer or the Assistant Treasurer, and shall be countersigned by the Executive Director, the Assistant Executive Director, the Chief Financial Officer (if they shall not have signed same), the Deputy Chief Financial Officer, the Comptroller, the Deputy Comptroller or the Assistant Comptroller; provided, however, that the Executive Director, the Treasurer and the Comptroller, respectively, as appropriate, may delegate such authority to sign such checks or drafts in his absence to the Assistant Executive Director/Administration, the Manager, Cash, Capital and Debt Management, the Senior Financial Analyst in Treasury or the Staff Financial Analyst in Treasury and the Manager of General Accounting or the Manager of Financial Accounting, respectively.

(3) Any check or draft, the amount of which shall be \$10,000 or less and which is issued only for the purpose of making payroll expenditures, shall be signed by either the Comptroller, the Deputy Comptroller, the Assistant Comptroller, the Manager of General Accounting or the Manager of Financial Accounting, without co-signature.

(4) Any check or draft (other than a Transfer Warrant or check or draft issued only for the purpose of making payroll expenditures), the amount of which shall be \$50,000 or less, shall be signed either by the Chief Financial Officer, the Treasurer, the Assistant Treasurer, the Manager, Cash, Capital and Debt Management, the Senior Financial Analyst in Treasury, the Staff Financial Analyst in Treasury, the Financial Analyst in Treasury, the Associate Financial Analyst in

(Board - 2/12/87)

in Treasury or the Assistant Financial Analyst in Treasury, or (but only if drawn on the bank with which there is on deposit the petty cash fund of a particular Port Authority trade development office, regional sales office or the Port Authority's Washington Office) by the Manager or the Assistant Manager of such trade development office, regional sales office and for the Washington Office, by the Port Authority's Washington Representative, without co-signature; and it is further

RESOLVED, that any depository designated by the Committee on Finance with which The Port Authority of New York and New Jersey shall have established a "Payroll Account" be and it hereby is requested, authorized and directed to honor all checks drawn in the name of The Port Authority of New York and New Jersey on said bank (including those drawn to the individual order of any person or persons whose names appear thereon as signer or signers thereof) in the amount of \$5,000 or less, when bearing the phrase "Payroll Account" and when bearing or purporting to bear the facsimile signature of any one or more of the following: the Comptroller, the Deputy Comptroller, the Assistant Comptroller, the Manager of General Accounting or the Manager of Financial Accounting; and such depository shall be entitled to honor and to charge The Port Authority of New York and New Jersey for all such checks, regardless of by whom or by what means the actual or purported facsimile signature or signatures thereon may have been affixed thereto, if such facsimile signature or signatures resemble the facsimile specimens from time to time filed with the bank by the Secretary or other officer of The Port Authority of New York and New Jersey; and it is further

RESOLVED, that any depository designated by the Committee on Finance with which The Port Authority of New York and New Jersey shall have established an account be and it hereby is requested, authorized and directed to honor all checks drawn in the name of The Port Authority of New York and New Jersey on said bank in the amount of \$5,000 or less, when not drawn on a Payroll Account and when bearing or purporting to bear the facsimile signature of any one or more of the following: the Manager, Cash, Capital and Debt Management, the Senior Financial Analyst in Treasury, the Staff Financial Analyst in Treasury, the Financial Analyst in Treasury, the Associate Financial Analyst in Treasury, or the Assistant Financial Analyst in Treasury; and such depository shall be entitled to honor and to charge The Port Authority of New York and New Jersey for all such checks, regardless of by whom or by what means the actual or purported facsimile signature or signatures thereon may have been affixed thereto, if such facsimile signature or signatures resemble the facsimile specimens from time to time filed with the bank by the Secretary or other officer of The Port Authority of New York and New Jersey; and it is further

(Board - 2/12/87)

RESOLVED, that any and all banks, trust companies and other banking institutions in which funds may at any time stand to the credit of The Port Authority of New York and New Jersey be and they hereby are authorized to honor all checks and drafts signed on behalf of The Port Authority of New York and New Jersey in accordance with the terms of this resolution; and it is further

RESOLVED, that the Treasurer, the Assistant Treasurer, the Manager, Cash, Capital and Debt Management, the Senior Financial Analyst in Treasury, the Staff Financial Analyst in Treasury, the Financial Analyst in Treasury, the Associate Financial Analyst in Treasury, the Assistant Financial Analyst in Treasury, and the Senior Cashier in Treasury be and each of them hereby is separately authorized to endorse for collection or deposit to the credit of The Port Authority of New York and New Jersey any and all checks, drafts, certificates of deposit and other negotiable and non-negotiable commercial paper to be credited to the account of The Port Authority of New York and New Jersey in any bank, trust company or other banking institution; and it is further

RESOLVED, that the Chief Financial Officer, the Deputy Chief Financial Officer, the Comptroller, the Assistant Comptroller, the Treasurer, and the Assistant Treasurer be and each of them hereby is separately authorized to enter into night deposit agreements and other such special service agreements with any depository designated by the Committee on Finance; and it is further

RESOLVED, that the foregoing authority shall be granted to the successors in office or duties of all of the positions named herein.

(Board - 2/12/87)

1987 Vehicular Equipment Purchase Program

The Port Authority's fleet of trucks, construction and snow removal equipment, emergency vehicles, passenger vehicles, and other miscellaneous vehicular equipment is reviewed annually to determine which units should be replaced, as well as how many additional units will be required to meet day-to-day organization needs.

The 1987 program is anticipated to total 428 units. \$9.83 million will be for the replacement of 329 existing vehicles, and \$3.94 million will be for the purchase of 99 additional units requested by various departments. Trucks and emergency construction and special snow equipment represent 72% of the anticipated total cost of the 1987 Vehicular Equipment Purchase Program. Three additional orders will be for passenger vehicles that will not be used for police or field operations and maintenance functions. Since many of the heavy duty emergency and specialty vehicles to be purchased require long lead times for delivery, actual expenditures for the 1987 Vehicular Equipment Purchase Program will be approximately \$4 million in 1987, \$5.8 million in 1988 and \$4 million in 1989.

The vehicular equipment will be acquired by:

1. receiving bids on a series of contracts, each not to exceed a term of three years, for the purchase of vehicular equipment for all Port Authority facilities and departments and in the case of each such contract either entering into said contract with the lowest qualified bidder thereon or rejecting all bids, the bids on passenger vehicles, however, to be limited to equivalent models of selected vehicle manufacturers;
2. exercising options for the purchase of such equipment under existing contracts authorized by the Board in connection with previous vehicular equipment purchase programs; and
3. negotiating and entering into contracts, or participating in New York or New Jersey state or city contracts, in order to advance the Port Authority's Minority Business Development Program or to take advantage of discounts realized as a result of bulk purchases, and negotiating and entering into contracts with sole source suppliers for the purchasing of vehicular equipment.

The decision to solicit new bids, exercise existing options, negotiate, or participate in state or city contracts for vehicular equipment will be based primarily on an economic assessment at the time of vehicle procurement.

Approximately 10% of the 1987 Vehicular Equipment Purchase Program will be set aside for minority vendor participation. The set-aside portion will consist of light operational vehicles, such as station wagons, pickup trucks, vans and pool sedans, the category of vehicles where minority firms' pricing has traditionally been very competitive.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized under the 1987 purchase program, in addition to any powers he may have under the By-Laws with respect to such contracts, to purchase vehicular equipment over a three-year period at a total expenditure not to exceed \$13,773,500, the vehicular equipment to be

(Board - 2/12/87)

acquired by: (1) receiving bids on a series of contracts, each not to exceed a term of three years, for the purchase of vehicular equipment for all Port Authority facilities and departments and in the case of each such contract either entering into said contract with the lowest qualified bidder thereon or rejecting all bids, the bids on passenger vehicles, however, to be limited to equivalent models of selected vehicle manufacturers; (2) exercising options for the purchase of such equipment under existing contracts authorized by the Board in connection with previous vehicular equipment purchase programs; and (3) negotiating and entering into contracts, or participating in New York or New Jersey state or city contracts, in order to advance the Port Authority's Minority Business Development Program or to take advantage of discounts realized as a result of bulk purchases, and negotiating and entering into contracts with sole source suppliers for the purchasing of vehicular equipment; and it is further

RESOLVED, that the form of the contracts be subject to the approval of General Counsel or his authorized representative.

(Board - 2/12/87)

Personnel Department - Retention of Professional Services for Human Resource Management Programs on an As-Needed Basis for 1987

On January 9, 1986, the Board extended the authority originally granted to the Personnel Director by the Board on April 11, 1985, to retain various professional services and employment agencies on an as-needed basis. On March 14, 1985, and on February 13, 1986, the Board authorized the Personnel Director to retain professional and instructor services to assist in the design and delivery of a variety of human resource programs including, but not restricted to, Executive Development, Affirmative Action Awareness and Sensitivity Training, Supervisory Development, Performance Appraisal and Succession Planning.

It is anticipated that in 1987 there will be a need to fill executive and specialized positions in highly competitive fields resulting from the Port Authority's capital program and other major program initiatives. Executive search firms and employment agencies will be required to augment staff's efforts in recruiting for critical positions in highly competitive fields, such as management information systems and engineering.

In addition, for 1987 a major part of anticipated expenditures in the area of professional and instructor services is targeted in the areas of executive development, affirmative action, training, and junior and middle management development. Professional and instructor services are needed to continue Executive Development Program activities, which will include distinguished lecturers, workshops, seminars, staff assessment, and residency programs in areas such as leadership and teambuilding, problem solving and decision making, public communications, business presentations, information processing, finance, and project management. An Equal Opportunity Affirmative Action Program started in 1985 for field supervisors will be continued in 1987. Professional services will continue to provide staff members with a better understanding of the critical issues involved in managing a diverse work force.

In 1987, staff also plans to undertake a comprehensive junior and middle management development program. Instructor services will be needed to supplement in-house staff services in areas such as writing, business presentations, and instructor training workshops. In addition, it is anticipated that professional services will be needed in areas such as succession planning and testing.

The Personnel Department will select firms to provide these services, taking into consideration their experience and record of accomplishment. Minority and women business enterprises specializing in these fields have been identified, and a good faith effort will be made to meet a participation goal of 10% for firms owned and controlled by minorities and 2% for firms owned and controlled by women.

The following resolution was unanimously adopted:

RESOLVED, that the Personnel Director is authorized to retain various professional and instructor services, employment agencies and search firms on an as-needed basis to assist the Personnel Department in its recruitment, training and development of key human resources at an aggregate amount not to exceed \$550,000 for 1987, the form of the retention agreements to be subject to the approval of General Counsel or his authorized representative.

(Board - 2/12/87)

Port Newark - Norse Terminal Corporation - Amendment to Lease

It was recommended that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into an agreement amending the Port Authority's lease agreement with Norse Terminal Corporation for 5.1 acres of open area at Port Newark covering the construction of a rail bottom dump pit and equipment to handle export coal and other bulk commodities, except cement, and the preferential right to berth one vessel at Berth No. 30 substantially in accordance with the terms hereafter set forth. The amendment will provide the Port Authority with the right to terminate the letting effective either on May 1, 1987 or on May 1, 1988 on 60 days' prior notice without cause on payment to Norse of \$80,000. In order to expedite construction the Port Authority entered into a three-year lease with Norse commencing May 1, 1986 which was unconditionally terminable on 30 days' notice. Staff agreed to seek authorization to delete this right. The lease provides for an annual rent of \$111,122.50. This annual rent will escalate each May 1st by an amount equivalent to the increase in the Consumer Price Index over the prior twelve months. Additionally, Norse will pay annually wharfage charges on a minimum of 225,000 tons of coal or other bulk commodities, except cement, at prevailing tariff charges.

Norse has invested an estimated \$1 million.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into the agreement described above amending the lease with Norse Terminal Corporation at Port Newark, the form of the agreement be subject to the approval of General Counsel or his designated representative.

(Board - 2/12/87)

**New York City Passenger Ship Terminal - Port Newark - Elizabeth and Brooklyn-Port Authority
Marine Terminals - Maintenance Dredging - Contract MFP-167 - Authority to Award**

Contract MFP-167 requires the contractor to remove and dispose of approximately 550,000 cubic yards of accumulated siltage material at the New York City Passenger Ship Terminal, Port Newark and the Elizabeth and Brooklyn-Port Authority Marine Terminals. The contract also requires the contractor to perform cleaning of intake flume on a net cost basis, roughly estimated at \$85,000.

Bids will be solicited by public advertisement and are presently scheduled to be received on February 19, 1987.

Prompt award of the contract is necessary in order to provide sufficient depths for continued shipping operations.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized, in addition to any powers he may have with respect to such contract under the By-Laws, either to award Contract MFP-167, New York City Passenger Ship Terminal, Port Newark and Elizabeth and Brooklyn-Port Authority Marine Terminals, Maintenance Dredging, to the lowest qualified bidder, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contract and whose bid price the Executive Director deems reasonable and to order extra work up to the amount of 10% of the bid accepted and to order net cost work, or to reject all bids.

(Board - 2/12/87)

Kennedy International Airport - Employee Parking Lot No. 7 Bus Service - Contract Award

It was recommended that the Board authorize the Executive Director to award Contract AYB-800 to provide shuttle bus service between Employee Parking Lot No. 7 and various locations in the Central Terminal Area at Kennedy International Airport to Greenway Transportation, Inc. and its parent corporation, Caravan Transportation, Inc., acting jointly and severally, the lowest qualified bidder as determined by public bidding. Greenway's bid provides for a charge per bus hour of \$18.93 yielding an estimated annual contract cost of \$864,438 based upon 45,665 estimated hours of bus service per year. The contract is for an initial term of two years with two two-year Port Authority options to extend at a charge subject to adjustment based upon changes in specified consumer and producer price indexes.

It was also recommended that the Director of Aviation be authorized, in his discretion, to exercise the two extension options of the contract and to order extra work under the contract in an amount not to exceed 10% of the estimated total contract cost.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized to award Contract No. AYB-800 to Greenway Transportation, Inc. and its parent corporation, Caravan Transportation, Inc., jointly and severally; and it is further

RESOLVED, that the Director of Aviation is hereby authorized, in his discretion, to exercise the two extension options of such contract and to order extra work under the contract up to 10% of the estimated total contract cost; and it is further

RESOLVED, that the form of the contract be subject to the approval of General Counsel or his designated representative.

(Board - 2/12/87)

Goethals Bridge and Outerbridge Crossing - Rivet Replacement - Contract MFB-110.009 - Award

This contract is the first stage of a program to replace missing and deteriorated rivets at all Port Authority bridges. Contract MFB-110.009 provides for replacing missing and deteriorated rivets at the Goethals Bridge and Outerbridge Crossing with high strength bolts. It also includes replacement of deteriorated portions of the bridges' structural members.

The contract also provides for removal and replacement of concrete and pavement and removal and reinstallation, or replacement, of storm drain piping to provide access for the replacement of rivets and disconnection and adjustment of steelwork; all to be performed on a net cost basis presently estimated at roughly \$400,000.

A portion of the work will be performed during non-peak hours to minimize interference with traffic operations. Minority business enterprise participation is not anticipated.

The contract was publicly advertised and on January 27, 1987 the following bids were received:

	Classified Work	Unclassified Work	Estimated Total Amount
Karl Koch Erecting Co., Inc. Carteret, New Jersey	\$1,557,100	\$ 922,900	\$2,480,000
B & B Welding, Inc. College Point, New York	1,617,300	903,000	2,520,300
USX Corporation Iselin, New Jersey	1,267,000	2,047,000	3,314,000
E. Daskal Corp. Suffern, New York	1,918,700	1,456,875	3,375,575
The Hallen Construction Co., Inc. Island Park, New York	1,787,450	2,519,000	4,306,450
Industrial Engineering Works Trenton, New Jersey	3,484,750	2,293,000	5,777,750
Bellezza Company, Inc. South Kearny, New Jersey	8,465,100	1,315,500	9,780,600

Karl Koch Erecting Co., Inc. submitted the lowest bid and was determined by the Chief Engineer to be qualified to perform the contract.

(Board - 2/12/87)

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized, to award Contract MFB-110.009, Goethals Bridge and Outerbridge Crossing, Rivet Replacement to Karl Koch Erecting Co., Inc., at its low bid price of \$2,480,000 to order extra work up to the amount of \$248,000 and to order net cost work; and it is further

RESOLVED, that the form of the contract be subject to the approval of General Counsel or his authorized representative.

(Board - 2/12/87)

Meritorious Service Award of Police Commendation Medal to Police Officer William A. Curran and Police Officer Frank E. Jacobs

It was recommended that the Police Commendation Medal be awarded to Police Officer William A. Curran and Police Officer Frank E. Jacobs.

The Police Commendation Medal under Board Resolution on March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 12, 1944, as amended, a Police Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Police Officer William A. Curran and Police Officer Frank E. Jacobs it is recommended that the Police Commendation Medal award be given on the following grounds:

At 11:00 p.m., on June 30, 1986, Police Officer William Curran and Police Officer Frank Jacobs were ending their shift and were returning to the police desk in New Jersey from the George Washington Bridge Bus Terminal. While driving across the Upper Level of the bridge, the officers received a radio transmission reporting that a woman was poised outside the railing on the North Walkway near the New Jersey Tower.

Because they were already travelling toward the North Walkway, Officer Curran and Officer Jacobs arrived in seconds. At the scene the officers' professional training helped them realize immediately the precariousness of the situation. They observed a young woman (later identified as 17-year old Carmen Roa) perched on a narrow 3-inch ledge outside the walkway railing. Several men were trying to talk to her. The two police officers sensed the woman was distraught and had lost her emotional control. This was confirmed by an eyewitness, Michael Kramer, one of the pedestrians strolling across the bridge on that summer evening. Mr. Kramer stopped when he noticed the woman standing outside the handrail of the bridge. The desperate woman asked him to help her. "I told her I would help her in any way I could", said Mr. Kramer. "Then she asked me to push her. I told her if she needed my help to jump, then she really did not want to jump. Three other men arrived and we all tried talking to her, but it did not seem to help."

(Board - 2/12/87)

Both officers climbed onto the walkway as traffic sped by their patrol vehicle. They had to act quickly and carefully to help the frantic woman. Officer Jacobs immediately began talking to the men to determine if they knew the young woman. Simultaneously, Officer Curran slowly began moving towards the woman while formulating a way to thwart her attempt at suicide. Suddenly, without further word or sign, the woman turned away from the civilians and the officers, faced the river below and screamed, "I'm jumping!" Then she let go of her handhold on the railing.

Instantly, Officer Curran lunged at the woman and successfully grabbed her clothing and arm. In his selfless and unhesitating attempt to save her, his forward motion over the four foot high railing continued, and Officer Curran found that he was still sliding dangerously over the smoothly rounded surface of the railing. In that instant, both he and the woman could have fallen 250 feet to their deaths. During those tense moments Officer Jacobs quickly snatched hold of Officer Curran's gun belt, and began helping everyone back to safety. Both officers then combined their efforts to bring the fiercely struggling woman onto the walkway and out of danger.

For their heroic and selfless actions in putting aside their own safety in order to save the life of a despondent woman, it is recommended that the Police Commendation Medal be awarded to Police Officer William A. Curran and Police Officer Frank E. Jacobs.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Police Commendation Medal to Police Officer William A. Curran and Police Officer Frank E. Jacobs.

(Board - 2/12/87)

Meritorious Service Award of Police Commendation Medal to Police Officer William Luongo

It was recommended that the Police Commendation Medal be awarded to Police Officer William Luongo.

The Police Commendation Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Police Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Police Officer William Luongo it is recommended that the Police Commendation Medal award be given on the following grounds:

On November 24, 1986, at 4:15 a.m., Police Officers William Luongo, Wilfred Barriere and William Moran were returning to Queens Central Booking after dropping off evidence at the New York City Police Laboratory. The officers decided to stop for coffee at the Sage Diner, 80-30 Queens Boulevard in Elmhurst. Unknown to the officers at that time, an armed robbery was taking place at the diner.

After parking their vehicle, Officers Luongo and Moran walked up the steps into the diner. Officer Barriere walked to the side of the diner to investigate an unattended vehicle whose motor was left running.

Entering the diner, Officer Luongo followed Moran into the vestibule. When Officer Moran pushed open the second set of doors, he and Luongo were viciously attacked by two armed suspects who were waiting for the officers to enter. When the gunfire erupted, Officer Luongo quickly evaluated the situation. He was unable to return fire because Officer Moran was between himself and the suspects. Once Moran began shooting as he backed out the diner, Officer Luongo decided to take cover outside the diner and engage the suspects. Officer Luongo turned to exit and, while doing so, was shot in the back of his right shoulder. Officer Moran was struck twice.

(Board - 2/12/87)

Although wounded, Officer Luongo remained calm and approached Officer Barriere, telling him they had been shot. Officer Moran, following Luongo outside, headed for cover behind the police vehicle. Behind Moran one of the suspects emerged and fired at Moran. Officer Barriere then engaged the suspect in a gun battle wounding him. Suddenly there was a loud crash to the right of Officer Luongo and Officer Barriere as the second suspect broke a window to get out of the diner.

Seeing the suspect with gun in hand, Officer Luongo fired at him as did Barriere. The officers drove the suspect back into the diner. Then, Officer Luongo covered Barriere who handcuffed the suspect.

Assured that Officer Barriere was back and behind cover, Officer Luongo entered the police vehicle. Both Officer Luongo and Officer Moran then proceeded to Jamaica Hospital for much-needed medical attention.

For demonstrating an exceptional degree of good judgment and for incurring personal risk to protect others, it is recommended that the Police Commendation Medal be awarded to Police Officer William Luongo.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Police Commendation Medal to Police Officer William Luongo.

(Board - 2/12/87)

Meritorious Service Award of Police Commendation Medal to Police Officer Joseph J. Rullo

It was recommended that the Police Commendation Medal be awarded to Police Officer Joseph J. Rullo.

The Police Commendation Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Police Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Police Officer Joseph J. Rullo it is recommended that the Police Commendation Medal award be given on the following grounds:

On patrol on the afternoon of July 9, 1986, Police Officer Joseph Rullo and Police Officer Benjamin Gallo were riding in their patrol vehicle at LaGuardia Airport. At 4:30 p.m., a radio transmission came over the car radio stating that a boat had capsized and the occupants were in the water. Officer Rullo and Officer Gallo quickly responded to the end of Runway 31 where Flushing Bay borders the airport.

As they arrived at the scene, the officers observed the overturned boat with two men trying to stay afloat in Flushing Bay. They realized that the noise and the tremendous force of the jetblasts from departing aircraft were a contributing factor to the boating accident. Police Officer Rullo quickly assessed the situation and realized that things would get worse for the floundering men unless quick and decisive action was taken. He shed his gun belt and uniform shirt, handed them to his partner for safekeeping, and then plunged into the turbulent and fuel-contaminated water.

Braving the choppy waters and continued jet blasts, Officer Rullo swam approximately 75 yards to the boat. As he neared the craft, he heard the two men yelling loudly that they were drowning. Relying on his professional training in water rescue, he knew the dangers to both himself and the two men. Officer Rullo reached the overturned boat and quickly took charge.

(Board - 2/12/87)

Assuring the two men that they would not drown and that help was on the way. Officer Rullo calmed their fears. He was now able to execute his rescue plan. By placing each individual on either side of the boat they could maintain a handhold and keep their heads above the choppy water. This maneuver stabilized the small boat. Officer Rullo then swam to the rear of the boat where he could watch and make sure that both men were still hanging on. Despite his exhaustion from the long swim out to the boat, Officer Rullo began to swim and push the boat in front of him towards the dike which lined the shore by Runway 31.

By this time, personnel on the shore had contacted the New York City Harbor Patrol and asked the Control tower to halt the departing flights over the rescue area. When the air traffic was stopped on Runway 31, Officer Rullo's attempt to reach the shoreline became more of a reality. Now only the strong tide stood in his way, dragging the boat and its two bedraggled victims northward away from the shoreline. After several grueling minutes of pushing the men and boat towards the shore, a New York City Patrol boat reached the small craft and completed the rescue. Officer Rullo and the two men were pulled onto the larger boat.

The exhausting swim and mouthfuls of oily, polluted water caused Officer Rullo to begin vomiting once he was onboard the rescue boat. Oxygen had to be administered to Rullo and he was transported to Booth Memorial Hospital for treatment.

For his heroic and unselfish actions in saving the lives of two men who were struggling to stay alive after their boat overturned in Flushing Bay, it is recommended that the Police Commendation Medal be awarded to Police Officer Joseph Rullo.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Police Commendation Medal to Police Officer Joseph J. Rullo.

(Board - 2/12/87)

Meritorious Service Award of Police Commendation Medal to Police Officer Edward Werfelman

It was recommended that the Police Commendation Medal be awarded to Police Officer Edward Werfelman.

The Police Commendation Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Police Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Police Officer Edward Werfelman it is recommended that the Police Commendation Medal award be given on the following grounds.

At approximately 25 minutes past midnight on Tuesday, June 10, 1986, Police Officer Edward Werfelman was on routine foot patrol at the Port Authority Bus Terminal. While patrolling around the perimeter of the terminal, Officer Werfelman's attention was drawn to the east side of Eighth Avenue where he observed two men engaged in a struggle. Upon hearing one man's pleas for help, he realized this was not a routine fight between individuals but an assault in progress. Officer Werfelman immediately responded by dodging traffic to cross Eighth Avenue and calling for backup on his portable radio.

As the officer drew closer, he observed one man wielding two knives and stabbing the other man. A crowd which had gathered on the sidewalk watched in horror. Officer Werfelman repeatedly called to the suspect to stop his actions as he ran towards the scene. Intent on stabbing his victim, the suspect completely ignored the officer. Although Officer Werfelman was legally within proper police procedure to fire at the assailant, he recognized the threat of serious injury to both the victim and the close crowd of onlookers. Instead the officer tackled the armed assailant as he stood over the victim continuing his attack on the fallen man.

Police Officer Werfelman and the husky 5'11" assailant then engaged in a violent struggle on the ground. During this struggle, the officer managed to knock one of the knives from the assailant's hand. Police backup units arrived on the scene at this time and helped Officer Werfelman subdue the struggling aggressor. The assailant was isolated from the victim and crowd. Finally, the assailant was persuaded to drop the remaining knife in his hand and submit to arrest. He kept yelling "I want to kill that (expletive deleted); he should be dead."

(Board - 2/12/87)

Suffering from multiple stab wounds to his chest, back, hand and feet, the 56-year old victim was transported to Bellevue Hospital. Emergency surgery was performed and eventually the victim did recover from his wounds.

The suspect was taken into custody with less force than was justified to effect the arrest. Officer Werfelman later testified before the New York County Grand Jury. An indictment was secured for attempted murder and assault in the first degree.

For his prompt and decisive actions without regard for his own life and his valiant restraint in the use of deadly force, it is recommended that the Police Commendation Medal be awarded to Police Officer Edward Werfelman.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Police Commendation Medal to Police Officer Edward Werfelman.

(Board - 2/12/87)

Meritorious Service Award of Commendation Medal to Timothy Gunnell and Daniel DiSanzo.

It was recommended that the Commendation Medal be awarded to Timothy Gunnell and Daniel DiSanzo.

The Commendation Medal under the Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Timothy Gunnell and Daniel DiSanzo it is recommended that the Commendation Medal award be given on the following grounds:

On Saturday, January 4, 1986 at 3:30 p.m., Motorman Daniel DiSanzo, operating a 33rd Street to Hoboken train, was informed by his Conductor that a passenger on board was brandishing a knife and threatening other passengers on the train.

Motorman DiSanzo contacted the PATH Trainmaster by radio to request police assistance upon arrival on Track 2 at the PATH Hoboken Terminal. He indicated that the disturbance was in the fourth car. Motorman Timothy Gunnell, sitting in his train cab at the Hoboken Station, overheard the call for assistance on the train/wayside radio, left his train, and positioned himself in the vicinity of the four car marker.

When the train pulled into the station, Motorman DiSanzo, in accordance with PATH Standard Operating Procedures, platformed the train but did not open the car doors and awaited the arrival of PATH police. DiSanzo left his cab and proceeded toward the area of the fourth car. Motorman Gunnell, from his position on the platform, observed a dangerous man threatening passengers with a knife. Realizing he was trapped, the individual shattered the window with his knife and burst through the window of the car to take flight. Motorman Gunnell attempted to coax the man into dropping the knife by talking to him in a soothing manner. But the man lunged violently at him with the knife, and Gunnell, moving quickly to the side, managed to seize the man's hand and wrestle him down to the platform. Fortunately, at this time, Motorman DiSanzo arrived at the scene and assisted Gunnell in restraining the dangerous man. Without concern for their personal safety, Motormen DiSanzo and Gunnell succeeded in disarming the knife-wielding man, thus preventing any injuries as a result of this incident.

(Board - 2/12/87)

The prompt, selfless action taken by DiSanzo and Gunnell was clearly appreciated by our passengers. One patron present at the incident wrote to express the following praise. "I must say this was the most distressing and frightening experience I have ever had. When the train pulled into Hoboken, this deranged man broke through the window with the knife and was still threatening. The motorman... retrieved the knife from this maniac and in my opinion, as well as the opinion of many other passengers, saved many lives. I, therefore, wish to commend this motorman for his outstanding performance as a human being who literally put his own life on the line and, again, in my opinion went well beyond his line of duty."

For their decisive actions, without regard to their own safety, to prevent harm to PATH patrons, it is recommended that the Commendation Medal be awarded to Motorman Timothy Gunnell and Motorman Daniel DiSanzo.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Commendation Medal to Timothy Gunnell and Daniel DiSanzo.

(Board - 2/12/87)

Meritorious Service Award of Commendation Medal to Aurora Insernia, William Hoare, Anthony Pullara and George Schmitt

It was recommended that the Commendation Medal be awarded to Aurora Insernia, William Hoare, Anthony Pullara and George Schmitt.

The Commendation Medal under Board Resolution of March 2, 1944, as amended, is to be award to an employee only in those cases where the employee has performed outstanding service or has shown exceptionally meritorious performance in the duty assigned to him.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Commendation Medal is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Aurora Insernia, William Hoare, Anthony Pullara and George Schmitt it is recommended that the Commendation Medal award be given on the following grounds:

At 11:10 p.m., on June 11, 1986, Aurora Insernia was assigned to relief duties for the Patron Aide in the assistance booth on the main floor of the North Wing of the Port Authority Bus Terminal near the Eight Avenue entrance. She happened to glance up toward the second floor balcony and spied a man hoisting himself up onto the 5 foot glass partition that tops the brass railing running around the perimeter of the hugh lobby well. It was evident to her that he was intent on jumping off the balcony guard rail to the diamond hard terrazzo floor of the Terminal more than two stories below, and committing suicide.

Ms. Insernia, concerned for the man's safety, left her booth and called up to him from the floor below, exchanging names with him to get his attention. As they chatted, he climbed down from his precarious perch and agreed to allow her to approach him. Ms. Insernia first signaled nearby workers for assistance, and while she quickly ascended the nearby escalator, three SEMAC Structural Mechanics, William Hoare, Anthony Pullara and George Schmitt, who were at work on scaffolding nearby and who saw this drama unfolding, approached the man from behind. At the same time, other employees on the scene notified Bus Terminal police officers of the problem.

When the would-be suicide caught sight of the SEMAC team headed his way, and could no longer see Ms. Insernia, he panicked and tried to climb back over the balcony partition. Dashing back into his line of sight, Ms. Insernia assured him that the SEMAC team were "good guys", "OK" and begged him to allow them to approach. She promised that she was on her way to him, would be there in seconds -- if only he would hold tight. Once again reassured by her voice and presence, the man relaxed, subsided and climbed docilely back down.

(Board - 2/12/87)

Ms. Insernia dashed back to the escalator and tore up to the balcony. But, just as she rounded the bend at a dead run, Port Authority Bus Terminal Police, accompanied by a canine member of their team, were approaching from the other end of the Terminal. Agitated by the sight of Ms. Insernia running at full tilt along the suburban concourse, the dog burst into a loud, roaring bark, the sound of which echoed painfully off the enclosed terrazzo, bronze and glass interior of the Terminal. Terrified by the sudden sound of the barking dog and the sight of unknown and possibly threatening assailants advancing on him, the would-be suicide victim launched himself for the top of the glass partition and started climbing over it to secure himself out of reach of danger – or of assistance.

The three SEMAC crewmen threw themselves at the man, forcing him down from the rail, grappling furiously with his maddened strength and, finally, sitting on him, quieted him on the floor. The arriving police put restraints on him and, after a brief struggle of their own, succeeded in subduing him and taking him away. Later investigation revealed that this had been the victim's third suicide attempt in as many months and that he was, in fact, only very recently released from psychiatric observation in one of the city's hospitals.

In an age where compassion and concern for one's fellow man are all too often virtues which are out of fashion, these four people went beyond the call of duty to save the life of another human being. Had he been successful in his attempt, he would no doubt have achieved his final goal – for the more than 30-foot fall from the balcony to the hard terrazzo below would likely not only have killed him but might well have injured or killed unsuspecting patrons below.

For their alertness, presence of mind, rare ability to act effectively when well intended others might have failed, and for action clearly beyond the limits of official duty, it is recommended that the Commendation Medal be awarded to Aurora Insernia, William Hoare, Anthony Pullara and George Schmitt.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Commendation Medal to Aurora Insernia, William Hoare, Anthony Pullara and George Schmitt.

Award of Distinguished Service Medal to George Azrak

It was recommended that the Distinguished Service Medal be awarded to George Azrak.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of George Azrak it is recommended that the Distinguished Service Medal award be given on the following grounds:

George Azrak began his career with the Port Authority in 1958 as an Assistant Engineer-Civil in the Planning Division of the Marine Terminals Department. Since that time, he has earned assignments at increasing levels of responsibility in the Engineering Department, with the Maintenance Engineering Design Division and with Staff Engineering Maintenance and Construction (SEMAC). He is presently a Senior Engineer with the Aviation Department's Construction Unit at Newark International Airport.

Mr. Azrak was primarily involved with the supervision of contracts for construction and rehabilitation of paved areas and utility facilities at a number of facilities during the first ten years of his service and for the past eighteen years solely at Newark International Airport.

In his assignment at Newark International Airport, George Azrak has supervised a staff of field engineers and inspectors in heavy construction projects. He has supervised the construction or rehabilitation of most of the aeronautical and vehicular pavements in use at the airport and, more recently, bridge construction and building construction. In addition, he has been instrumental in the coordination and resolution of potential problems in matters relating to paving and utility facilities at Newark International Airport. His years of experience, particularly with regard to the changing state-of-the-art of pavement construction, have been of great value to the Port Authority. He has provided technical expertise in the development of construction procedures that are now utilized in pavements consisting of a Lime-Cement-Flyash base and fibrous concrete.

(Board - 2/12/87)

George Azrak has proved to be the focal point of a number of principal activities at the facility. In addition to his supervisory functions, he prepares the Long-Range Forecast of projects that are required to maintain the structural integrity of Newark International Airport pavements. He sets priorities and schedules for the rehabilitation projects, taking into account the urgency and extent of repairs, operational considerations and economics.

Also, the rapid growth being experienced at Newark International Airport has required that modifications to existing facilities and on-going construction be effected in minimal time. He has reacted to time constraint demands in a positive manner. Recently, he suggested and prepared the plans for a number of changes related to the site preparation for Long-Term Parking Lots E and F. These changes involved field adjustments to the basic design criteria, were confirmed by the Engineering Department and then incorporated into the plans and specifications. As a result, savings will be realized in the approximate aggregate amount of \$100,000.

George Azrak's review of the plan for the replacement of structural roadway pavement convinced him that complete replacement might not be necessary. He proceeded to establish a program and sequence of investigatory work to allow for a full-depth evaluation of the condition. He was correct in his assumptions, and revised the scope of work necessary to assure the integrity of the roadway surface. This particular incident, which is only one of many that exemplify his value to the Port Authority, resulted in a cost savings of approximately \$60,000.

Because of his technical proficiency and supervisory capability, George has earned and maintained the respect of his fellow employees and of the contractors engaged in work under his supervision. His rapport with his fellow employees and contractors has resulted in the Port Authority's obtaining a higher than usual degree of cooperation and competence in the performance of the contracts he supervises.

For his dedicated service and his consistently high level of performance and achievement over a long and productive Port Authority career, it is recommended that the Distinguished Service Medal be awarded to George Azrak.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to George Azrak for the performance of outstanding service.

(Board - 2/12/87)

Award of Distinguished Service Medal to Seymour M. Burg

It was recommended that the Distinguished Service Medal be awarded to Seymour M. Burg.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Seymour M. Burg it is recommended that the Distinguished Service Medal award be given on the following grounds:

For over three decades, Seymour Burg, Chief of the Law Department's Leases and Operating Agreements Division, has brought to his work as a lawyer for the Port Authority outstanding professional ability, a keen intellect and an exemplary devotion to public service. Virtually all of the Aviation Department's leases and concession agreements are the result of his masterful handiwork.

Mr. Burg began his Port Authority service in 1953 as an attorney in the old Leases and Concessions Division of the Law Department. In 1982, he became Chief of the renamed Leases and Operating Agreements Division where he continued to perform with marked distinction. All Port Authority revenues, except for tolls, fares and interest income, come through the medium of agreements drafted by his division. In 1985, more than 70% of the Port Authority's one billion dollars of gross operating revenues were covered by agreements prepared or reviewed by Mr. Burg and his staff.

While he has contributed his impressive drafting, practical negotiating and counseling skills to numerous Port Authority projects, his work in the field of air terminal leases and concession arrangements has been truly outstanding. With rare professional skill, he has negotiated and drafted every possible sort of airport agreement. Those with air carriers relating to air terminal tenancies, most of which included complex construction and financing arrangements, hangar occupancies and use of common airport areas; those with cleaning, parking, ramps, and other types of service contractors; and those with ground transportation operators, rent-a-car companies, oil companies and hotel operators.

(Board - 2/12/87)

As Chief of the Law Department division with the largest number of attorneys, Mr. Burg has major supervisory responsibilities which he performs in his usual exemplary fashion. Indeed, the administration of his division reflects his never-flagging zeal in protecting the Port Authority's legal interests as well as his unrivaled knowledge of Port Authority business affairs. A realistic benchmark by which to judge his contribution to the Port Authority is the almost complete lack of litigation or dispute with respect to the literally thousands of agreements he has prepared or for which he has been responsible over a period of more than 30 years.

Throughout his career, Mr. Burg has met with remarkable good humor every conceivable deadline with which he has been confronted. He has received numerous accolades over the years from fellow members of the bar and Port Authority department directors have commended him for his efforts in seeing to it that detailed and complex agreements were hammered out in a timely and professional manner.

For his professionalism and expert lawyering exercised on behalf of the Port Authority over a long and distinguished career, it is recommended that the Distinguished Service Medal be awarded to Seymour M. Burg.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Seymour M. Burg for the performance of outstanding service.

(Board - 2/12/87)

Award of Distinguished Service Medal to James Browne

It was recommended that the Distinguished Service Medal be awarded to James Browne.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of James Browne it is recommended that the Distinguished Service Medal award be given on the following grounds:

Since joining the Port Authority in 1962, James Browne has been a leader in the application of operations research methods to improve Port Authority operations and plans.

In his early years, Mr. Browne used computer simulation, based on mathematical models he developed, to produce the first train schedules for the Port Authority's newly acquired PATH system, to analyze and improve the design of The World Trade Center elevator system and to determine the operating requirements for an expanded international arrivals building at Kennedy International Airport to accommodate a new generation of aircraft and baggage handling systems. The World Trade Center elevator simulation was the first successful simulation of a modern elevator system and was the forerunner of a new method adopted by major elevator companies around the nation for evaluating potential control system design changes.

Over his almost 25 years in the Operations Standards Division and the Management Engineering and Analysis Division, he has been involved in a multitude of studies of Port Authority operations resulting in numerous service improvements for Port Authority patrons and tenants. These ranged from improving passenger handling at the Port Authority Bus Terminal and scheduling Toll Collectors to operations planning studies on traffic patterns, parking facilities design and rail systems evaluations. Other applications of operations analysis dealt with internal systems such as automated inventory control and external programs such as the staggered work hours experiment, in which over 100,000 people in lower Manhattan changed their work schedules. In the late seventies, he pioneered the use of computer simulation in the financial analysis of major Port Authority investments, leading to new and improved analysis procedures that are still being used today.

(Board - 2/12/87)

Besides his reputation at the Port Authority for excellence in operations analysis, Mr. Browne has made a lasting mark in the wider professional and academic world. He was instrumental in developing new employee scheduling methods that are treated at length in the standard text on Operations Management. He has more than twenty technical publications to his credit in journals such as Industrial Engineering, Transportation Science, Management Science and Traffic Engineering as well as several chapters in books on computer applications, financial modeling and the use of management science in government.

In 1981, Mr. Browne was awarded the Port Authority's Cullman Fellowship so that he could write the book, "Management and Analysis of Service Operations," which was subsequently published in 1984. A review in the *Journal of Industrial Engineering* called this book one of the few serious books on how to manage service operations and one that should be required reading for anyone involved in the management of innovation in the corporate world.

Mr. Browne has been active in teaching operations research and management science methods not only to Management Engineering staff on-the-job, but also has twenty years experience in teaching evening courses in management science, operations research and related courses at the New Jersey Institute of Technology, Steven's Institute, Rutgers University in New Jersey, and at St. John's, Fordham and Pace Universities in New York. He has also developed and taught three systems analysis courses for Port Authority staff within the Career Development Program, in cooperation with the Personnel Department.

In his career Mr. Browne has been selected to work as a member of numerous task forces and interdepartmental project teams involved in major Port Authority decisions. These included: the Kennedy Airport Access Project, the Direct Rail Access Project (Penn Station, N.Y.), Federal Highway Administrator [Tolls Pricing], the Aldene Plan Scheduling, the Transportation Task Force (Committee on the Future), the Electronic Technology Task Force, the Central Terminal Area (Kennedy) Master Plan Evaluation, The World Trade Center Sale, and the Value Analysis of Rail-Ferry Alternatives.

For his excellent and sustained performance in the creative application of operations research to improve the operations of the Port Authority over a long, distinguished and varied career, it is recommended that the Distinguished Service Medal be awarded to James Browne.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to James Browne for the performance of outstanding service.

(Board - 2/12/87)

Award of Distinguished Service Medal to John Dragonette

It was recommended that the Distinguished Service Medal be awarded to John Dragonette.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of John Dragonette it is recommended that the Distinguished Service Medal award be given on the following grounds:

John Dragonette first joined the Port Authority in 1956 as a Planning Technician in the Comprehensive Planning Division of the Port Development Department. In that position, he participated in studies on the need for new marine terminals, studied Port Authority terminals and transportation projects, and supervised field survey teams in the collection of origin and destination data.

Shortly thereafter, Mr. Dragonette began what was to be the beginning of a career which spans 30 years of involvement with just about every aspect of the development of The World Trade Center. He put his background in architecture and city planning to good use when he was asked to undertake the task of studying the feasibility of a World Trade Center in lower Manhattan. Being a land planner and understanding the vast problems involved in relocating tenants, traffic and streets, he sat down and independently came up with a site, which later became the site for The World Trade Center.

John Dragonette worked for the Port Development Department until 1962 when he was promoted to the position of Urban Renewal Specialist in the Director's Office of the then newly-formed World Trade Department. As an Urban Renewal Specialist, he researched the complex urban renewal implications of The World Trade Center and developed a schedule for obtaining urban renewal assistance. His expertise in street and traffic planning, zoning matters, real estate taxes and tenant relocation payments contributed significantly to the early stages of The World Trade Center project. His meticulous analyses helped to formulate a real estate tax formula that was amenable to both The City of New York and the Port Authority.

(Board - 2/12/87)

In 1965, Malcolm Levy, who was developing and recruiting staff for The World Trade Center project, asked John to work for him as a Project Administrative Planner in the World Trade Department. Mr. Dragonette performed liaison duties between management and The World Trade Center architectural and engineering consultants and reviewed and approved all expenditures charged against these projects by the consultants. He assumed the responsibility of participating in the negotiating and of writing and administering over \$50 million in architectural, engineering and specialty consulting agreements. In this capacity, he maintained a delicate balance between the requirements of consultant and owner for almost 20 years without a mishap.

In addition to being responsible for writing, administering and controlling all of the major consulting agreements dealing with construction and operations of The World Trade Center, in 1971 he was also named the Secretary of the Claims Committee which includes members from the Law and Finance Departments. In this capacity, he has been responsible for evaluating and determining the value of claims amounting to hundreds of millions of dollars and for the development and implementation of individual and overall claim procedures. He has held this post as Secretary of the Claims Committee for the last fifteen years.

In 1973 Mr. Dragonette was promoted to his present position as World Trade Center Project Administrator. In this capacity, he deals constantly with many outside people, including government officials, contractors, architects, lawyers, and principals of various organizations that are connected with The World Trade Center project. He has the prime responsibility for the administration and control of design consultants' costs and develops and implements cost control guidelines. Because of his expertise on The World Trade Center project, in late 1975 he was asked to be part of a three-member team that ventured to Egypt to present a report to the Arab International Bank on the feasibility of a Cairo World Trade Center. As a result of this presentation, construction began on a World Trade Center project in Cairo.

For his outstanding efforts, abilities and achievements and for consistently contributing key ideas and recommendations that have greatly benefited the development of The World Trade Center complex, it is recommended that the Distinguished Service Medal be awarded to John Dragonette.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to John Dragonette for the performance of outstanding service.

(Board - 2/12/87)

Award of Distinguished Service Medal to John P. Faldetta

It was recommended that the Distinguished Service Medal be awarded to John P. Faldetta.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of John P. Faldetta it is recommended that the Distinguished Service Medal award be given on the following grounds:

John P. Faldetta began his career with the Port Authority 36 years ago as a Lobby Information Agent at the Port Authority Bus Terminal, where he served for ten years, attaining the level of Chief Dispatcher. In 1960, he left the Bus Terminal and joined the Kennedy International Airport staff as a Terminal Services Agent. Since then, he has served continuously in the airport's Terminal Services Unit and has progressed steadily through the ranks to his current position of Assistant Chief Terminal Services Supervisor, the highest field supervisory position in the Terminal Services Unit.

Throughout his career and especially during his eight years as Assistant Chief Terminal Services Supervisor, Mr. Faldetta has distinguished himself as an exceptionally valuable employee and particularly as an effective Supervisor who not only manifests genuine concern for his staff but also for the patrons he is responsible for serving. Quality service is a hallmark of his career and as he passes through the arrivals buildings he is constantly critiquing the operation to ensure the highest level of service is maintained. His suggestions for a broader smile, greater attentiveness and better ways to serve passengers have contributed immeasurably to maintaining the highest possible service standards at the International Arrivals Building.

During the past several years, there has been a succession of changes in the management of the Terminal Services Unit, and Mr. Faldetta has given unselfishly of himself on these occasions to ensure that the continuity of operation is maintained among administrators and that new administrators are afforded the necessary orientation and briefing to ensure their successful assumption of duties. To accomplish this, and still carrying out his own heavy burden of responsibilities, he has voluntarily worked long overtime hours.

(Board - 2/12/87)

During his long career, Mr. Faldetta has compiled such a basis of operational experience that he is the first person consulted anytime a change is made in the International Arrivals Building that could impact on its operation. He can be counted on to swiftly appraise the impacting factors and formulate an operations plan that is not only efficient from a staffing standpoint but ensures the maintenance of highest service standards of the Port Authority.

Mr. Faldetta has also proven himself to be an able and sensitive leader and, through the years, has forged an efficient and properly trained team. He is acutely perceptive of the strengths and weaknesses of his staff and can be counted on to give them carefully meted-out instructional support, wise counsel and, when needed, appropriate disciplinary actions. Despite the fact that he is ultimately responsible for a staff that numbers over 200 people during the summer peak season, he greets and indoctrinates virtually every employee who joins the unit and, in short order, is able to recall their names so he can relate with them in a warm and effective way. This sensitivity and personalization have earned him the respect and loyalty of his peers and subordinates.

For his long and dedicated service to the Port Authority, marked by a constant concern for the maintenance of the highest standards of service to the traveling public, it is recommended that the Distinguished Service Medal be awarded to John P. Faldetta.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to John P. Faldetta for the performance of outstanding service.

(Board - 2/12/87)

Award of Distinguished Service Medal to William F. Forman

It was recommended that the Distinguished Service Medal be awarded to William F. Forman.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal award was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of William F. Forman it is recommended that the Distinguished Service Medal award be given on the following grounds:

William F. Forman began his combined Hudson & Manhattan and PATH Career in August of 1955 as a Signal Helper and entered the Signal Apprentice Program in May 1956. Due to his exceptional ability to assimilate the complexities of the railroad's signal system and related equipment, he was soon promoted to the position of Signal Repairman I in July 1958. With the creation of PATH in 1962, he played an active role during the often difficult transition period. His skill and knowledge of the signal system helped keep PATH running and proved invaluable in making many needed improvements.

As a Signal Repairman I, Mr. Forman has consistently displayed excellent judgment in the performance of his duties. Due to his years of experience, his acquired knowledge and his desire to perform the Signal Repairman responsibilities to the best of this ability, he has earned the well deserved reputation as the expert in his field of endeavor. This reputation casts him as a role model for the younger members of the Signal Section, and his leadership-by-example style is a quality that each and every employee of the division, including Supervisors, peers and lower level signal employees, admire and seek to emulate.

(Board - 2/12/87)

Due to the nature of his expertise, he frequently responds to emergency situations – many of which occur during severe weather periods when the compressed air lines for PATH signal system can freeze and become damaged. Mr. Forman commonly performs complex signal equipment repairs and modifications in the midst of adverse weather conditions including sub-zero temperatures and extraordinary wind chill factors. On February 15, 1979, he responded to a major service disruption caused by a signal malfunction at the Hackensack River Bridge during a period of extremely cold weather. His knowledge and initiative proved to be a key factor in the timely restoration of service. During another disruption at the same bridge on December 23, 1983, his outstanding efforts, again in severe cold, resulted in the prompt restoration of service. In responding to so many of these emergencies, Mr. Forman has consistently displayed an incredible innate sense of urgency, and knows by instinct where all the priorities lie in most any critical situation that could arise within his area of responsibility.

Throughout his 31 year career, he has performed frequently as a group leader and at times as Acting Signal Foreman. In these positions, he has consistently displayed exceptional leadership qualities and the ability and expertise to direct his co-workers to the completion of complex and, many times, difficult projects. His initiative and determination on these occasions allow his supervisors the luxury of concentrating their attention on other areas, recognizing the fact that Mr. Forman's area is in capable hands. He demonstrates enthusiasm dedication and loyalty to the PATH Corporation, and his pride and confidence in his abilities are qualities well known and respected by all.

For his long and dedicated career, in which he has demonstrated exceptional ability to respond to emergency repairs of the railroad's signal system, and for his excellent judgment in the performance of his duties, it is recommended that the Distinguished Service Medal be awarded to William F. Forman.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to William F. Forman for the performance of outstanding service.

(Board - 2/12/87)

Award of Distinguished Service Medal to Alfred Hammon

It was recommended that the Distinguished Service Medal be awarded to Alfred Hammon.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Alfred Hammon it is recommended that the Distinguished Service Medal award be given on the following grounds:

Beginning with his graduation from the U.S. Merchant Marine Academy and his early service as an officer on American commercial vessels, Alfred Hammon has had a broad and meritorious career in the maritime field. During part of his 30 year Port Authority career, he worked in the Planning and Development Department and made a significant contribution toward meeting the key navigational needs of the Port of New York and New Jersey. Coordinating Federal channel maintenance, channel and other marine improvements studies and enhancing navigational aids, were his early and continuing efforts.

He was one of the key innovators of the Federal Waterfront Cleanup Project an effort which has become a key ingredient in many of the public and private waterfront development projects in both New Jersey and New York. He was awarded the Executive Director's Award of Achievement in 1977 for his efforts in the Waterfront Cleanup Project.

Both planning and channel dredging became infinitely more complicated in the late 1970's, as environmental concerns resulted in a myriad of Federal and State laws and regulations. Mr. Hammon was the pioneer both for the Port of New York and New Jersey as well as for the national port system in addressing these environmental concerns while working to ensure that projects progressed and were completed. Through his work for the North Atlantic Ports Association, where he served in many capacities, including President, and for his work for the American Association of Port Authorities, where he served as a Committee Chairman, Mr. Hammon has become a nationally recognized authority on dredging matters. He was also closely associated with the entire Federal Coastal Zone Management Program from its inception and served as a member of the early Federal Advisory Commission that addressed that issue.

(Board - 2/12/87)

He has been the prime mover in the local industry organization, "Save Our Port," and has continued to service on the Coordinating Committee for the eminently successful Waterfront Cleanup Program. Throughout his career, he has been a most articulate spokesman for the port and has vigorously and successfully championed its growth and development in countless public hearings, meetings, dinners and Congressional hearing rooms. If the Port could be said to have a "voice," Alfred Hammon would arguably meet the term more than any single individual of the last decade.

Mr. Hammon's latest and perhaps most important contribution to the port, the Port Authority and the maritime industry is the leading role he played in shepherding the negotiations with the U.S. Army Corps of Engineers on critical channel improvement projects. Despite sometimes overwhelming obstacles, he has insured "his port" and the entire port industry a viable channel improvement program. In this respect, over his long career, he has secured millions of dollars worth of Federal support for improvements to the Port of New York and New Jersey.

For his dedicated service to the Port Authority and to the region at large, marked by 30 years of distinguished accomplishments and excellent judgment, it is recommended that the Distinguished Service Medal be awarded to Alfred Hammon.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Alfred Hammon for the performance of outstanding service.

(Board - 2/12/87)

Award of Distinguished Service Medal to Leo M. Halley

It was recommended that the Distinguished Service Medal be awarded to Leo M. Halley.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Leo M. Halley it is recommended that the Distinguished Service Medal award be given on the following grounds:

Leo M. Halley started his career in the Engineering Department as an Engineering Designer II in July, 1960 and rose to the position of Engineer of Design for the Maintenance Engineering Design Division. In January 1985, he joined the Rail Transportation Department as the Assistant Director for Capital and Operations Planning. He has consistently displayed sound, professional judgment, initiative and competence throughout his career and these characteristics strengthened his ability to assume increasingly difficult and responsible positions in the Engineering and Rail Transportation Departments.

His extraordinary talents and dedication were recognized early in his career and, as a result, he was rewarded by being assigned to a number of the Port Authority's most challenging assignments and projects. The World Trade Center design team, when faced with the unique problems attendant to designing and building the foundations and slurry retaining walls for two 110-story buildings, called on Leo's technical expertise. That portion of the project is still acclaimed as a tremendous engineering feat. Mr. Halley was then promoted to Engineer of Design for Railroads, a position he held from 1973 to 1980. In this role, he led the engineering team in designing and building the Journal Square Transportation Center. Again, innovative and sound design and construction concepts were his hallmark.

At that point in his career, it seemed that whenever the Port Authority had a different and particularly challenging engineering task to manage, Mr. Halley's talents were needed and, as such, he was assigned to lead the Port Authority Bus Terminal expansion job as its Project Manager. In leading the Bus Terminal project, he effectively used his communications skills to deal with community groups, private entities, and public agencies affected by this major construction program. He skillfully secured their cooperation, which led to the timely completion of this project. He also had the opportunity to provide engineering expertise to the LaGuardia Airport Runway Extension — again, an unusual engineering problem which extended the runways.

(Board - 2/12/87)

As the Port Authority's facilities began to age and maintenance became a significantly more important element in the Engineering Department's scope of work, Mr. Halley was assigned as the Engineer of Design for Maintenance. During this period, and under his leadership, the Maintenance Engineering Design Division designed and implemented a computerized contract status reporting system to efficiently monitor the ever increasing number of maintenance contracts managed by his team. Further, he served on the Maintenance Improvement Council and assisted in the development of the Design Division's Project Management System. During his tenure as Engineer of Design for Maintenance Engineering, the number and value of the contracts handled by this division increased significantly. Leo's ability to motivate staff, coupled with his concern for fostering excellence in their performance, led in great measure to the overall success of this program.

In 1985, Mr. Halley joined the Rail Transportation Department as Assistant Director for Capital Programs with the responsibility to oversee the \$800 Million Capital Improvement Program. He has effectively managed the very sensitive coordination of Capital Project elements with other departments in the Port Authority and has interfaced Capital Program needs with the daily operation of the PATH system. His extraordinary knowledge of the Port Authority, its engineering and project administration processes, and his knowledge of the agency's project management system, have contributed to the Rail Transportation Department's successfully implementing the program, particularly the PATH New Car and Car Rehabilitation Programs. His skills have also been invaluable in accomplishing other facets of the PATH CIP, particularly the PATH Safety and the PATH Station programs.

For his extraordinary engineering talents and his achievements in many of the Port Authority's most major construction programs. It is recommended that the Distinguished Service Medal be awarded to Leo M. Halley.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Leo M. Halley for the performance of outstanding service.

(Board - 2/12/87)

Award of Distinguished Service Medal to James J. Nachstein

It was recommended that the Distinguished Service Medal be awarded to James J. Nachstein.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of James J. Nachstein it is recommended that the Distinguished Service Medal award be given on the following grounds:

Chief Inspector James J. Nachstein has been a member of the Police Division since 1956. He was promoted to Sergeant in 1962, to Lieutenant in 1970, to Captain in 1973, to Deputy Inspector in 1976, to Full Inspector in 1982 and to Assistant Superintendent of Police and Chief Inspector in 1984.

During his career, Inspector Nachstein has worked at most Port Authority facilities and in areas that cover the full range of responsibilities of the Port Authority Police, including the Emergency Garages at both the Hudson River Crossings and the Port Authority airports. While still a police officer, he served as an Assistant to the Instructors in the Police Academy, specializing in the areas of fire fighting and emergency services.

In December of 1964, he assumed responsibilities as the Police Division's Personnel Sergeant, administering the Central Police Pool. While working in that capacity on the night of November 9, 1965, during New York City's first major blackout, then Sergeant Nachstein mobilized the Port Authority's resources to deal with that emergency. In 1970, as a Lieutenant, he developed and implemented the Port Authority's response plans to counter the burgeoning aircraft hijack threat that was endangering the lives of air passengers. Thanks to his leadership and skill, the FAA's program for preflight screening of passengers was implemented at LaGuardia Airport on a professional and cost-effective basis.

(Board - 2/12/87)

With his promotion to Captain in 1973, Inspector Nachstein assumed responsibility for the Port Authority Police Academy, the Central Police Pool and the Central Police Desk. During that time, working together with Lieutenant Joseph Verga (deceased), the entire training program of the Police Academy was revised and upgraded to enable all Port Authority Police Recruits to receive college credit for the Recruit Program upon graduation. This advanced standing influenced many Port Authority Police officers to continue their college educations. Today, through his efforts, working with the Personnel Department and the Police Division, who all worked together to encourage self-development through continuing education, the majority of Port Authority police officers now have college degrees.

In December of 1975, while a Captain and Commanding Officer of the Police Unit at LaGuardia Airport, he took command of an emergency that even today is still the most devastating terrorist incident to take place at a United States airport; the detonation of an explosive device at the TWA passenger terminal. That blast killed eleven and injured fifty persons, caused substantial damage to the terminal building and required unusual skills on his part in mobilizing resources and coordinating the efforts of the many agencies responding to, and assisting in, the emergency.

His promotion in 1975 to Deputy Inspector placed him in a position of responsibility for all police operations at all Port Authority field commands. This was followed by an assignment in the Police Planning Administration for contract negotiations labor relations, and grievance resolution until his promotion to Inspector in 1982.

Through the variety of responsibilities both in the field and in the Police Division, Inspector Nachstein developed unparalleled skills in leadership, planning, and allocation of resources. These skills were most recently demonstrated in the mobilization which was effected for the 1986 Liberty Weekend celebration, which stretched our resources to the limits, and in mobilizing the response to the violence which accompanied the first ILA strike to hit the Port of New York in fifteen years — a mobilization of resources that stabilized that dangerous condition with dispatch.

Inspector Nachstein's sensitivity to organizational goals as well as the personal and institutional needs of subordinate staff sets him apart as a leader in his field. Throughout his 30 years of service in the Police Division, he has consistently and effectively demonstrated an extraordinary dedication and loyalty to the highest traditions of police service and the Port Authority.

For his dedicated service and outstanding leadership to the Police Division of the Port Authority, it is recommended that the Distinguished Service Medal be awarded to Assistant Superintendent of Police/Chief Inspector James J. Nachstein.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Assistant Superintendent of Police/Chief Inspector James J. Nachstein.

(Board - 2/12/87)

Award of Distinguished Service Medal to Alden L. West

It was recommended that the Distinguished Service Medal be awarded to Alden L. West.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Alden L. West it is recommended that the Distinguished Service Medal award be given on the following grounds:

Alden West began his career as a Civil Engineer in the old Central Maintenance Engineering Division in 1952. His diligence, devotion, and technical expertise soon established him as an outstanding expert in the field of tunnel and bridge roadway maintenance paving, which demands a combination of superb field and design skills in order to successfully implement engineering plans. This is an especially complex discipline since highly traveled facilities, such as the Port Authority bridges and tunnels, cannot be closed for extensive periods of time without severely impacting on the economic life of the Port District. However, Al quickly demonstrated his mastery of these skills by bringing in nearly every project with which he was involved within budget and on time, and by having a perfect safety record on every project that he has supervised for twenty years.

In addition to his demonstrated field supervisory skills, Al introduced the use of latex concrete for Port Authority tunnels and bridges in order to cut down on curing time and thus enabling a more rapid startup of traffic on these structures. A further benefit of utilizing latex concrete for paving is an improved ability to seal out ponded water and relieve stress from daily traffic that otherwise might decrease the pavement's service life, thereby postponing future rehabilitation work and the inconvenience that periodic repaving would cause to patrons of our facilities.

Due to the nature of the job, Al has worked on holidays, weeknights, and double shifts in order to ensure the operation of Port Authority facilities.

In his present position as Assistant Engineer of Design, he supervises in a year 400 to 500 major works projects that vitally affect operations at all Port Authority facilities. These include the runway and taxiway paving and rehabilitation projects at Port Authority airports in New York² and New Jersey, which are recognized throughout the world for their state-of-the-art quality.

(Board - 2/12/87)

In addition to his demonstrated technical expertise, his supervisory and tutorial skills are revealed by the many trainees and young engineers who have begun their Port Authority careers under Al's wing and have developed into Port Authority executive level staff.

For his outstanding technical expertise and diligent efforts in all of his project undertakings during 34 years of dedicated service to the Port Authority it is recommended that the Distinguished Service Medal be awarded to Alden L. West.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Alden L. West for the performance of outstanding service.

(Board - 2/12/87)

Award of Distinguished Service Medal to Joseph P. Zitelli

It was recommended that the Distinguished Service Medal be awarded to Joseph P. Zitelli.

The Distinguished Service Medal under Board Resolution of March 2, 1944, as amended, is to be awarded to an employee only in those cases where the employee has performed unusually efficient or distinguished service involving exceptionally good conduct, judgment and initiative.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a Distinguished Service Medal was established, which award is to be given to an employee for the performance of outstanding service; and

WHEREAS, in the case of Joseph P. Zitelli it is recommended that the Distinguished Service Medal award be given on the following grounds:

Joseph P. Zitelli is currently the Manager of Project Engineering Services in the Tunnels, Bridges & Terminals Department, having risen to that position through a series of career advances that included a facility management role, where he served as Assistant Manager of the Holland Tunnel. As project Engineering head, he is responsible for the implementation phases of a capital construction budget that will approach \$100 million annually over the next five years and an annual maintenance budget of an additional \$25 million. These figures reflect a primary focus on capital re-investment in the Tunnels, Bridges & Terminals physical plant to assure the structural integrity and optimum operating capability for the long term. The size, scope and age of the facilities under his jurisdiction are especially important to the region's ground transportation network and include the George Washington Bridge, Lincoln Tunnel, Holland Tunnel, New York Truck Terminal, the three Staten Island Bridges, the Port Authority Bus Terminal and the George Washington Bridge Bus Station.

Mr. Zitelli joined the Port Authority in 1953 with a background in civil engineering and has participated in almost every major project affecting our tunnels and bridges since that time. Early in his career, he was involved in coordinating and expediting such projects as the Lincoln Tunnel Third Tube, new tolls facilities and administrative buildings at the Holland Tunnel, roadway interchanges between the George Washington Bridge and the Palisades Interstate Parkway and, perhaps most noteworthy, the George Washington Bridge Lower Level project, which was completed in 1962, for which he was awarded the Executive Director's Award of Achievement.

(Board - 2/12/87)

In more recent years, he has been responsible for the line department's technical planning oversight in progressing the George Washington Bridge Upper Deck replacement (1977-1978) in which a novel construction and design approach was worked out with the Engineering Department in the form of an orthotropic deck. He was the recipient of the Executive Director's Unit Citation for his efforts in connection with the Upper Deck replacement projects. Other major projects in which he was very heavily involved included the recently completed \$12 million Center Tube Roadway replacement at the Lincoln Tunnel and the current \$17 million roadway rehabilitation at the Outerbridge Crossing and the on going \$100 million replacement of the ceiling, curbs and drainage systems at the Holland Tunnel. Along with specialists in the Engineering Department, he has been instrumental in establishing and maintaining the very comprehensive inspection programs that assure the structural integrity of the Authority's bridges and tunnels.

Mr. Zitelli is regularly called upon by other agencies for advice and consultation on bridge and roadway projects and he has been the Chairman of the Engineering and Design Committee of the International Bridge, Tunnel and Turnpike Association for more than a decade, as well as serving as a member of its Research Committee.

For his consistently excellent performance throughout his long and distinguished career, it is recommended that the Distinguished Service Medal be awarded to Joseph P. Zitelli.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Distinguished Service Medal to Joseph P. Zitelli for the performance of outstanding service.

(Board - 2/12/87)

Award of Medal of Honor to Police Officer Wilfred Barriere

It was recommended that the Medal of Honor be awarded to Police Officer Wilfred Barriere.

The Port Authority Medal of Honor, under Board Resolution of March 2, 1944, as amended, is to be awarded to an individual who, in performing a specific act, demonstrated extraordinary bravery in the face of circumstances which would surely have led to grave personal injury or his own death should the slightest miscalculation have occurred.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a the Port Authority Medal of Honor award was established, which award is to be given to a Port Authority employee for the performance of outstanding service; and

WHEREAS, in the case of Police Officer Wilfred Barriere it is recommended that the Port Authority Medal of Honor award be given on the following grounds:

On November 24, 1986, at 4:15 a.m., Police Officers Wilfred Barriere, William Luongo and William Moran were returning to Queens Central Booking after dropping off evidence at the New York City Police Laboratory. The Officers decided to stop for coffee at the Sage Diner on Queens Boulevard. Although the diner appeared quiet enough from the outside, the patrons and employees were terrified. Two men, both armed with handguns had just pistol whipped one employee and robbed the others.

As the Officers approached the front steps of the diner, Officer Barriere noticed a vehicle parked on the side of the diner with no license plates on it. The vehicle was also unoccupied and its motor was running. Officer Barriere sensed that something was wrong and walked over to the car to investigate. Police Officers Luongo and Moran went up the steps into the diner.

As Officer Barriere cautiously approached the vehicle the unmistakable sound of gunfire pierced the air. He turned around and quickly moved to the front of the diner. Upon reaching the front of the diner he saw Officer Luongo running towards him saying he had been shot. Officer Moran was moving in the opposite direction towards the police vehicle. Behind Officer Moran was a gunman who fired at Moran. Realizing the extreme danger to the other officer and ignoring the danger to himself, Officer Barriere shouted at the gunman to distract and get the gunman to turn toward him. He turned and leveled his gun at Officer Barriere, who opened fire, dropping the gunman. Officer Barriere reloaded his revolver and took cover with Officer Luongo at the side of the diner. Suddenly there was a crash and glass littered the parking lot as the second gunman tried to go through the window. When the second gunman fired through that window, both Officer Barriere and Officer Luongo returned fire, driving him back into the diner to head for the back exit.

(Board - 2/12/87)

Disregarding his own safety Officer Barriere then approached the wounded suspect, handcuffed him and secured his weapon.

Officer Barriere realized the seriousness of the wounds inflicted on both fellow officers. Officer Luongo had taken a bullet in the right shoulder, which traveled downward and rested close to the officer's spine. Officer Moran had been shot twice, one in the abdomen and once in the leg. He was bleeding profusely. Officer Barriere directed both officers to take the sector car and head for the hospital. Officer Barriere remained at the scene guarding the prisoner and protecting the scene until assistance arrived.

If it were not for Officer Barriere's quick thinking, extraordinary courage and selflessness in drawing fire from one of the gunmen, his fellow officers might not have survived that gun battle.

For his extraordinary bravery and selfless actions in the face of grave danger, it is recommended that the Medal of Honor be awarded to Police Officer Wilfred Barriere.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Medal of Honor to Police Officer Wilfred Barriere for the performance of outstanding service.

(Board - 2/12/87)

Award of Medal of Honor to Police Officer William Moran

It was recommended that the Medal of Honor be awarded to Police Officer William Moran.

The Port Authority Medal of Honor, under Board Resolution of March 2, 1944, as amended, is to be awarded to an individual who, in performing a specific act, demonstrated extraordinary bravery in the face of circumstances which would surely have led to grave personal injury or his own death should the slightest miscalculation have occurred.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944, as amended, a the Port Authority Medal of Honor award was established, which award is to be given to a Port Authority employee for the performance of outstanding service; and

WHEREAS, in the case of Police Officer William Moran it is recommended that the Port Authority Medal of Honor award be given on the following grounds:

On November 24, 1986, at 4:15 a.m., Police Officers William Moran, Wilfred Barriere and William Luongo were returning to Queens Central Booking after dropping off evidence at the New York City Police Laboratory. The Officers decided to stop for coffee at the Sage Diner, 80-30 Queens Boulevard in Elmhurst. Unknown to the Officers at that time, an armed robbery was taking place at the diner.

After parking their vehicle, Officer Moran and Officer Luongo walked up the steps to enter the diner. Officer Barriere walked to the side of the diner to investigate an unattended vehicle whose motor was left running.

Officer Moran was in front of Officer Luongo as they reached the second set of doors to enter the diner. As Moran walked inside he came face to face with two armed gunmen. A fraction of a second later the two suspects unleashed a barrage of bullets at the officers. Both officers were hit. Officer Luongo was hit in the right shoulder and Officer Moran was hit both in the abdomen and in the right leg. Officer Moran, although hit twice, drew his revolver and returned fire. This decisive action on Officer Moran's part enabled Officer Luongo to exit and Officer Moran to drag himself out. Officer Moran, with his gun now empty, took cover behind the police vehicle parked at the curb and began to reload. A short distance behind Officer Moran, one of the gunmen followed him out onto the sidewalk and fired, narrowly missing him. At this time Officer Barriere drew the gunman's fire, wounding him.

(Board - 2/12/87)

Although bleeding heavily from wounds to his right leg and abdomen, Officer Moran managed to enter the police vehicle and radio detailed information to the police desk at Kennedy International Airport requesting assistance. He then picked up Officer Luongo and drove both of them to the emergency room of Jamaica Hospital. As he was driving he was losing consciousness, but he kept up radio communication with the police desk at Kennedy Airport, informing the desk of the shooting and the location of the diner and his own location as he headed toward the hospital. Both officers were in critical condition.

If it had not been for Officer Moran's courage in returning fire and providing protection for his partner as well as his extraordinary ability and determination to get his partner and himself to the hospital, despite the fact that he had two bullets in him, the outcome of that encounter might have been far worse.

For his extraordinary bravery in facing grave personal danger and for his selfless actions, it is recommended that the Medal of Honor be awarded to Police Officer William Moran.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Medal of Honor to Police Officer William Moran for the performance of outstanding service.

(Board - 2/12/87)

Award of Medal of Honor to Police Officer John E. Trommelen

It was recommended that the Medal of Honor be awarded to Police Officer John E. Trommelen.

The Port Authority Medal of Honor, under Board Resolution of March 2, 1944, as amended, is to be awarded to an individual who, in performing a specific act, demonstrated extraordinary bravery in the face of circumstances which would surely to have led to grave personal injury or his own death should the slightest miscalculation have occurred.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 2, 1944 as amended, the Port Authority Medal of Honor award was established, which award is to be given to a Port Authority employee for the performance of outstanding service; and

WHEREAS, in the case of Police Officer John E. Trommelen, it is recommended that the Port Authority Medal of Honor be given on the following grounds:

On August 6, 1986 at 11:50 a.m., Police Officer John E. Trommelen, while off duty, was driving on Temple Street in Paterson, New Jersey. He observed a fire in a three-story residence at 169 Temple Street. He stopped his vehicle and ran towards the building. Upon questioning some onlookers, he was told there were people still inside the burning building. Observing the heavy smoke and flames coming from the second story of the frame house, Officer Trommelen concluded that those people were in extreme danger. He knew he had to act quickly because the fire was rapidly spreading. Without regard for his own personal safety, the officer entered the burning building and made his way to the second floor. Upon reaching this level, dense smoke forced him to remain low, crawling on his hands and knees. Relying on his professional training, Officer Trommelen began a systematic search for any occupants. The first victim he found was Mr. Hugo Perona, who was the owner of the home. Although Mr. Perona was burned over 50% of his body, he was still conscious. The officer calmed him and helped carry out the injured man with the assistance of John State, another passerby.

Upon assuring the safety and well being of Mr. Perona, Officer Trommelen was advised that there was still another person in the house. At that point a police unit, not a fire unit arrived. Trommelen, along with a Paterson police officer, Patrolman Kevin Hancock, and Mr. State, went to the rear of the house where the fire originated on the second floor. With the aid of a step ladder, the rescuers climbed onto a porch roof to gain access to a second victim, Mrs. Perona. Unfortunately, Mrs. Perona sustained burns over 90% of her body. In a semiconscious state,

(Board - 2/12/87)

Mrs. Perona told them that there was a baby on the third floor where the bedrooms were located. While the Paterson police officer and civilian took Mrs. Perona off the roof, Officer Trommelen decided to enter the build for the third time— this time alone, fully aware of the risk he was taking. Realizing that the intense flames and heat posed a threat to his personal safety, he soaked himself with water from a garden hose which neighbors threw up to help him. There was no sign of the Fire Department and despite the heavy smoke and flames, the officer went in again to search for the baby. Once inside, Officer Trommelen located the stairs to the third floor. Upon reaching the third floor, he encountered the most life-threatening conditions. Thick smoke and intense heat were building up on the upper floor. Driven by his intense concern for human life, he began a search of the bedrooms.

After frantically searching the rooms and finding no one, the officer realized then that the smoke and high temperature were affecting his breathing capability. Unable to remain on the third floor, he removed a blanket from one of the beds and covered his head as a shield from the intense smoke. With the aid of the blanket the officer made his way back to the stairs. He started to descend the stairs when a fierce explosion shook the second floor, and hurled Officer Trommelen down the flight of stairs to the second floor. He was then assisted onto the porch roof by the Paterson police officer and a civilian. Paterson firemen, who were now on the scene, assisted him down a ladder from the roof. Unknown to Officer Trommelen at that time was the fact that the baby had been taken to safety by her 13-year old sister, Rosa, at the onset of the fire.

Earlier, the two children, Rosa and Jackie, 5, had been eating lunch in the dining room when they heard their mother screaming. Thinking that her mother was yelling at her father, Rosa opened the door to the kitchen, saw the room in flames and shut the door to the kitchen. She grabbed her younger sister and fled the apartment.

Officer Trommelen was having difficulty breathing and was given oxygen at the scene. He was then transported to St. Joseph's Hospital in Paterson, New Jersey, where he was treated for smoke inhalation, minor cuts and bruises and x-rayed for a possible knee injury. Officer Trommelen was later released from the hospital.

One month after the fire, Mrs. Perona died from her injuries. Mr. Perona, although on the critical list, did leave the hospital after several operations.

For saving two lives in a critical life-threatening situation by acting without regard for his own life, in the finest tradition of Port Authority Police Service, it is recommended that the Medal of Honor be awarded to Police Officer John E. Trommelen.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Executive Director be and he hereby is authorized to award the Medal of Honor to Police Officer John E. Trommelen for the performance of outstanding service.

(Board - 2/12/87)

Award of Howard S. Cullman Distinguished Service Medal to Guy F. Tozzoli

It was recommended that the Howard S. Cullman Distinguished Service Medal be awarded to Guy F. Tozzoli for his creativity, unerring instincts and superb managerial abilities in conceiving and achieving bold public projects in a lifetime of service to the Port Authority and the Region.

The Howard S. Cullman Distinguished Service Medal, under Board Resolution of March 14, 1957, is to be awarded to a Port Authority employee who has performed the most outstanding service among those who qualify.

Whereupon, the following resolution was unanimously adopted:

WHEREAS, by resolution adopted by the Board on March 14, 1957, the Howard S. Cullman Distinguished Service Medal was established, which award is to be given to a Port Authority employee who has performed the most outstanding service; and

WHEREAS, in the case of Guy F. Tozzoli is recommended that the Howard S. Cullman Distinguished Service Medal award be given on the following grounds:

For over 40 years, Guy F. Tozzoli, Director of the World Trade Department, has served the Port Authority with exceptional imagination, enthusiasm and achievement. With his unusually inventive mind, superior managerial talents and widely recognized persuasive abilities, he has produced spectacular results while playing key roles on a blue-ribbon list of Port Authority projects and programs.

Guy Tozzoli served in the United States Navy in two wars – in World War II before coming to the Port Authority and in the Korean War when he was recalled to active duty. Trained as a physicist, he joined the Port Authority as a Junior Engineer in 1946 and quickly began to develop his skills as a highly effective problem-solver and achiever. As Project Engineer for what is now the North Terminal at Newark International Airport, he supervised the engineering and construction of the first modern airport passenger terminal to be constructed by the Port Authority.

His promotion in 1955 to Manager of the Marine Planning and Construction Division made him responsible for the planning and supervision of construction of Port Authority marine terminal facilities at Brooklyn, Port Newark and the Elizabeth-Port Authority Marine Terminal. It was during his term in this position that most of the reconstruction of the Brooklyn Piers was completed. On this project, he successfully spear-headed the effort to produce innovative, functional and economic facilities – creating design concepts that were later used in the development of Port Elizabeth and Port Newark. Guy Tozzoli's superior negotiating skills flourished in his next assignment, as Director of the Transportation Section of the 1964-65 New York World's Fair. During this time, he also supervised the planning, construction and operation of the Port Authority Exhibit Building at the Fair. Mr. Tozzoli made the Transportation Section the most successful of the entire Fair.

(Board - 2/12/87)

When Austin Tobin needed someone in 1962 to direct the planning, construction and operation of The World Trade Center, he selected Guy Tozzoli, who since then has provided dynamic leadership for every phase of the project. The challenges were massive: excavation around and under an operating PATH System; bringing steel bids \$30 million over forecast within budget; incredible construction feats; major negotiations with Customs, New York State, television broadcasters and others; a top-level restaurant that the professionals feared to risk; the first hotel in lower Manhattan in 100 years and the full rental of the Center's 10 million square feet of office space.

The results have been no less than magnificent. Over the years, the Trade Center's highly successful facilities and programs have become the model for many other cities worldwide, generating broad international respect for the Port Authority and the Region. Guy Tozzoli's leadership in creating the World Trade Institute and Xport Trading Company, among other programs, has assured the fulfillment of the Trade Center's legislative purpose. Under his stewardship, The World Trade Center — itself a significant success financially — sparked a burgeoning of development activity in lower Manhattan.

Guy Tozzoli was a founder of the World Trade Centers Association in 1968 and has been repeatedly elected president of that group since then. In 1973, he was awarded the Distinguished Service Medal in recognition of his remarkable accomplishments. Guy Tozzoli conceived and oversaw the implementation of The Teleport, a major pioneering venture dedicated last year as a space-age facility to handle the Region's rapidly expanding international communications needs. As other areas of the world began to create teleports of their own, following this Region's lead, Guy Tozzoli founded the World Teleport Association and served as its first president. In 1983, he was asked to take on responsibility for a new office building in Newark and quickly created the Newark Legal and Communications Center. The project has made great strides and is destined to serve as a powerful stimulus for the revitalization of downtown Newark.

Guy Tozzoli's career has been truly extraordinary. He is, without question, a visionary, consistently proposing great public works. But he is also an inspired builder. With the strong entrepreneurial talents that he brings to every public service assignment, he transforms these visions into practical facilities and programs that are highly successful both functionally and financially. Time and again, his determination and resilience in coping with setbacks have produced enthusiasm from despair, breakthroughs from stalemate, triumphs from losses.

For his creativity, unerring instincts and superb managerial abilities in conceiving and achieving bold public projects in a lifetime of service to the Port Authority and the Region, it is recommended that the Howard S. Cullman Distinguished Medal be awarded to Guy F. Tozzoli.

NOW, THEREFORE, after due deliberation had, it is

RESOLVED, that the Howard S. Cullman Distinguished Service Medal be awarded to Guy F. Tozzoli for the performance of outstanding service.

**Consolidated Bonds, Series Fifty E and Fifty-One E - Report on Public Hearing -
Supplemental Coupon Exchange Program - Consolidated Bonds, Fiftieth and Fifty-
First Series**

At the present time, \$100,000,000 in principal amount of Consolidated Bonds, Fiftieth Series, Due 2017, 10-1/8%, and \$100,000,000 in principal amount of Consolidated Bonds, Fifty-first Series, Due 2019, 11%, are outstanding. In order to provide flexibility to reduce debt service costs, it would be desirable to include within the Port Authority's overall plan of financing, the establishment and authorization of the issuance and the sale of Consolidated Bonds, Series Fifty E, Due 2017, and Consolidated Bonds, Series Fifty-one E, Due 2019, in aggregate principal amounts of up to \$100,000,000 each, for purposes in connection with the refunding, as appropriate, of Consolidated Bonds, Fiftieth Series and Consolidated Bonds, Fifty-first Series, respectively.

The Board would provide for a supplemental coupon exchange program in which the Port Authority would request offers from the holders of Consolidated Bonds, Fiftieth Series, and Consolidated Bonds, Fifty-first Series, to exchange such bonds on a one-for-one basis for Consolidated Bonds, Series Fifty E or Consolidated Bonds, Series Fifty-one E bonds, as appropriate, with the new bonds to have a basic interest rate approximating current market interest rates at the time of the exchange, with essentially the same sinking fund schedule and maturity dates as the bonds being exchanged, and with incremental interest, to accrue only through the first call date for each of such Series sufficient to provide a yield on the Series Fifty E Bonds of 11% and on the Series Fifty-one E Bonds of 12%. Since Consolidated Bonds, Fiftieth Series, Due 2017, and Consolidated Bonds, Fifty-first Series, Due 2019, provide call protection to holders until December 1, 1992, and June 1, 1994, respectively, and Federal income tax laws presently preclude the advance refunding of bonds issued for the purposes of these bonds, the program would provide a method for reducing existing debt service costs.

The Executive Director would be authorized to conduct the program, including the preparation and revision of request materials in the name of and on behalf of the Port Authority for purposes of requesting offers from bondholders to exchange bonds. In the discretion of the Executive Director upon the conclusion of the offer period, such offers would be presented to the Committee on Finance; provided that no offers with respect to a Series would be so presented if the total of such offers, if accepted, would result in less than \$10 million of Bonds of such Series being exchanged. Pursuant to the Board's authorization in connection with the sale of each of the Series Fifty E and Series Fifty-one E Bonds, by the Committee on Finance, the Committee would accept or reject, in whole or in part, any such offers so presented.

Staff has had extensive discussions with E.F. Hutton & Company Inc., which has developed and administered, as dealer/manager, an exchange program for another governmental authority, and has provided the structure for the Port Authority's program. Therefore, it is recommended that E.F. Hutton & Company Inc., be appointed to act as Dealer/Manager for the program, in which capacity, among other responsibilities, it would identify the holders of the bonds to be exchanged and coordinate the public solicitation, including direct mailings and published advertisements. During the public solicitation period, the Dealer/Manager would serve as a source of information about the offer to exchange and would coordinate with brokers, dealers, commercial banks or trust companies (collectively "dealers") representing the holders of the bonds to

be exchanged. The Dealer/Manager would be compensated on the basis of \$3.75 for each \$1,000 in principal amount of Consolidated Bonds, Fiftieth Series and Fifty-first Series accepted for exchange by the Committee on Finance and for expenses as may be incurred with the Port Authority's written approval. Additionally the Port Authority would pay to any dealer (including the Dealer/Manager) depositing bonds which are accepted for exchange by the Committee, an amount not to exceed \$10.00 for each \$1,000 in principal amount of such bonds.

Additionally, a qualified banking institution would be required to serve as an Exchange Agent for the receipt of all bondholder transmittal letters and deposit of the bonds offered for exchange. The Exchange Agent would advise the Dealer/Manager and the Port Authority of the daily status of bondholder offers and would be responsible for disposition of deposited bonds in accordance with the instructions of the bondholder or the Port Authority, as appropriate, and, in the event of acceptance of bondholder offers, for delivery of the new bonds. The Chase Manhattan Bank, N.A., is the registrar and paying agent for Consolidated Bonds, Fiftieth Series and Fifty-first Series, and its appointment as the Exchange Agent would facilitate administration of the exchange. Therefore, it is also recommended that The Chase Manhattan Bank, N.A., be appointed as Exchange Agent, with compensation for such services not in excess of the standard rates generally prevailing in the market.

On February 10, 1987, public hearings relating to the Series Fifty E and Series Fifty-one E Bonds, were conducted by the Assistant Treasurer of the Port Authority at the offices of the Port Authority at One World Trade Center and at the offices of the Port Authority at the Journal Square Transportation Center. These hearings were held in accordance with the public approval provisions of Section 147(f) of the Internal Revenue Code of 1986, as amended, and the regulations with respect thereto, in connection with private activity bonds, upon public notice published on January 26, 1987, in The New York Times, a newspaper of general circulation in the New York portion of the Port District, and in The Star Ledger, a newspaper of general circulation in the New Jersey portion of the Port District. In pertinent part, such notices contained the following description of the Series Fifty E and Series Fifty-one E Bonds: "Consolidated Bonds of The Port Authority of New York and New Jersey to be denominated as Series Fifty E and Series Fifty-one E. The said obligations of the Port Authority would be issued for purposes of the refunding, directly, by offers to exchange, by request for tenders or otherwise, of Port Authority Consolidated Bonds, Fiftieth Series, Due 2017, and Port Authority Consolidated Bonds, Fifty-first Series, Due 2019, respectively, which were issued in connection with the Port Authority's plan of financing for various capital and other expenditures at the following facilities of the Port Authority located in the Port of New York District, to wit, with respect to Consolidated Bonds, Fiftieth Series, LaGuardia Airport, John F. Kennedy International Airport, Newark International Airport, Hudson Tubes portion of the Port Authority Trans-Hudson System, Lincoln Tunnel, George Washington Bridge, Bayonne Bridge, Outerbridge Crossing, Port Authority Bus Terminal, Port Authority Bus Programs, Elizabeth-Port Authority Marine Terminal, and Bathgate Industrial Park, an industrial park in The Bronx, N.Y.; with respect to Consolidated Bonds, Fifty-first Series, at LaGuardia Airport, John F. Kennedy International Airport, Newark International Airport, Hudson Tubes portion of the Port Authority Trans-Hudson System, Holland Tunnel, George Washington Bridge, Brooklyn-Port Authority Marine Terminal. The initial owner, operator or manager of these facilities is the Port Authority. Each of Consolidated Bonds, Series Fifty E and Series Fifty-one E would be in principal amount of up to \$100,000,000."

The Board would establish Consolidated Bonds, Series Fifty E, Due 2017, and Consolidated Bonds, Series Fifty-one E, Due 2019, and authorize the issuance of up

to \$100,000,000 in aggregate principal amount of each such Series of Bonds. The Committee on Finance would be authorized to sell and to deliver all or any part of each such Series of Bonds at such time or times on or before December 1, 1992, in the case of Series Fifty E, and on or before June 1, 1994, in the case of Series Fifty-one E, as it deems propitious, in one or more installments or lots, at public or private sale including the exchange of such bonds for all or a portion of Consolidated Bonds, Fiftieth Series, Due 2017, and Consolidated Bonds, Fifty-first Series, Due 2019, respectively, with such Series of Bonds bearing interest at a rate or rates, including fixed, variable or incremental interest rates or a combination thereof or without a stated rate of interest, to be fixed by the Committee, but in any event not in excess of 15% per annum.

The proceeds of each of Consolidated Bonds, Series Fifty E, and Consolidated Bonds, Series Fifty-one E, would be used for the purpose of refunding, directly, by offers to exchange, or otherwise, all or any part of Consolidated Bonds, Fiftieth Series, Due 2017, and Consolidated Bonds, Fifty-first Series, Due 2019, respectively, outstanding at the time of the sale of any installment of each such Series of Bonds.

The Board would authorize the Committee on Finance to designate and appoint one or more Paying Agents, a Registrar and a Trustee in connection with each such Series of Bonds, as appropriate.

The Board would also provide that no part of the proceeds of each of such Series of Bonds shall be invested directly or indirectly in such a manner as to cause the interest on each such Series of Bonds to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, and the regulations with respect thereto.

The Board would also provide that certification on behalf of the Authority, as to the Authority's intentions with respect to the application and investment of such proceeds and as to such other related matters as may be authorized by the Committee on Finance may be made by the Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee on Finance; Executive Director, Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Deputy Comptroller; Assistant Comptroller; Treasurer or Assistant Treasurer of the Authority, and that any such action taken in connection therewith would be ratified; and that any action which may be necessary or desirable in connection with said Bonds to assure that such Bonds are in conformity with the provisions of Section 103 and Sections 147 through 150, inclusive, of the Internal Revenue Code of 1986, as amended, and the regulations with respect thereto, and to assure that the interest on said Bonds is not subject to Federal income taxes, may be taken by the Committee on Finance, the Chairman of the Authority, the Chairman of the Committee on Finance, the Executive Director, Assistant Executive Director, Chief Financial Officer, Deputy Chief Financial Officer or Treasurer of the Authority and that any such actions taken in connection therewith would be ratified.

The Series Fifty E and Series Fifty-one E Bonds would be dated as of their date, respectively, mature December 1, 2017 and June 1, 2019, respectively, and bear interest at a rate or rates including fixed, variable or incremental rates or a combination thereof or be issued without a stated rate of interest, to be fixed by the Committee on Finance not in excess of 15% per annum, and shall be sold at a price resulting in a true interest cost to the Authority for each such Series of Bonds not in excess of 15% per annum. A sinking fund would be established for each Series of Bonds to meet the requirements of a schedule of mandatory periodic retirement commencing in 1997 for

each such Series of Bonds, respectively, to completely retire each Series at or prior to its respective maturity, for which purpose the Bonds would be callable for redemption prior to maturity at 100%. The Bonds of each Series would also be subject to redemption, at the option of the Authority, in whole or in part, commencing in 1997, respectively, for each such Series of Bonds, at prices beginning at 102% and descending to 100%.

Each such Series of Bonds would be issued in registered form, registered as to both principal and interest, in denominations of \$5,000 or integral multiples of \$5,000.

The Committee on Finance of the Authority would be authorized (i) prior to the issuance of any installment of the Bonds of each Series, to change the date at which any of the Bonds of that installment would mature; provided, that said date or dates would not be later than December 1, 2017 with respect to the Series Fifty E Bonds and June 1, 2019 with respect to the Series Fifty-one E Bonds; (ii) prior to the issuance of any installment of the Bonds of each Series, to adjust or change the respective dates in connection with the redemption, retirement, call and sinking fund provisions of such installment; (iii) prior to the issuance of any installment of the Bonds of each Series, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption for the bonds of each Series to retire such entire installment at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to such installment; (iv) prior to the issuance of any installment of the Bonds of each Series, to reduce the percentages of face value relating to the optional call provisions for such installment; (v) prior to the issuance of the first installment of the Bonds of each Series, to provide for the Bonds of each Series to be issued on original issue as book-entry only securities taking account of the changes and adjustments authorized in the resolution establishing each Series of Bonds with respect to the issuance of the bonds of each Series as book-entry only securities; (vi) prior to the issuance of the first installment of the Bonds of each Series, to provide for the Bonds of each Series to be separately registrable as to principal and interest (including any authorized incremental interest) to any one or more holders of the bonds or certificates (if any) with respect to the payment of interest thereon; (vii) prior to the issuance of any installment of the Bonds of each Series, consistent with the foregoing, to change or adjust the provisions of the bonds of such installment thereof to permit the issuance of such bonds or installments with a fixed, variable or incremental interest rate or rates or a combination thereof or without stated rate of interest; and (viii) prior to the issuance of the first installment of the Bonds of each Series, if it is desirable in connection with the use of the proceeds of the Bonds of each Series for the refunding of a Series of the Authority's obligations to renumber each such Series for purposes of identification, to renumber each such Series; (ix) prior to the issuance of the first installment of the Bonds of each Series, if a prior series of Consolidated Bonds has been renumbered or the resolutions in connection therewith have been rescinded and cancelled, and if it is desirable to accomplish the capital program of the Authority utilizing a continuous numbered sequence of Consolidated Bonds, to renumber each such Series; and (x) to take such other action as in the opinion of the Committee will best serve the public interest.

Consolidated Bonds, Series Fifty E—Establishment

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, heretofore and on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority") adopted a resolution (hereinafter called the "Consolidated Bond Resolution") providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time, in conformity with said Consolidated Bond Resolution for the purposes therein set forth, and which Consolidated Bond Resolution constitutes a contract with the holders of the Consolidated Bonds so issued; and

WHEREAS, said Consolidated Bond Resolution provides that such Consolidated Bonds shall be issued in such series as the Authority may determine, and that the characteristics of the bonds of such series shall be determined by the Authority by and in the resolution establishing such series, and that the resolution establishing any series may contain other terms and provisions not inconsistent with the Consolidated Bond Resolution; and

WHEREAS, the Authority has heretofore established various series of said Consolidated Bonds and has now determined that it is necessary, advisable and in the public interest to establish another series of said Consolidated Bonds, without prejudice to its right hereafter to establish other and additional series of such Consolidated Bonds;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions.

SECTION 2. There is hereby established a series of said Consolidated Bonds to be known as "Series Fifty E, Due 2017," to be issued in conformity with said Consolidated Bond Resolution and for any one or more of the purposes specified therein as may be provided in the resolution authorizing the issuance of such series. This resolution shall constitute a contract with the holders of said bonds of Series Fifty E, Due 2017, which said bonds are hereinafter called "bonds of this Series," and with each such holder.

SECTION 3. Bonds of this Series shall be issued in one or more installments or lots as the Authority may hereafter determine.

Each installment of the bonds of this Series shall be dated as of the date of original issuance of such installment to the initial purchaser thereof, shall mature on December 1, 2017, and, except as provided below, shall bear a stated rate or rates of interest, including fixed, variable or incremental rates for the term of the bonds or any portion thereof, or a combination thereof, from their date of issuance, not exceeding fifteen per centum (15%) per annum, payable on interest payment dates of June 1 and December 1, as may be determined by the Committee on Finance of the Authority. If the bonds of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on the interest payment date next succeeding their date of issuance, and thereafter on each succeeding interest payment date until maturity or prior redemption. The Committee on Finance is hereby authorized to fix and determine any other date as that upon which interest shall commence and said interest rate or rates including fixed, variable or incremental rates or a combination thereof, if any, or to determine that said bonds of this Series shall not bear a stated rate of interest.

Both principal of and interest on the bonds of this Series shall be payable in lawful money of the United States of America. Principal of the bonds of this Series and interest on the coupon bonds of this Series, if any, shall be payable upon presentation and surrender of the registered bonds of this Series by the registered holders thereof and upon the coupon bonds of this Series, if any, upon presentation and surrender of such bonds or the coupons appertaining thereto, as the case may be, at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered bonds of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder. If on original issue the bonds of this Series are to be issued as book-entry only securities, subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method for the payment of both or either of the

principal of and interest on the bonds of this Series to the registered holder thereof; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system, then the foregoing payment provisions of this paragraph shall apply to the bonds of this Series.

Bonds of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the first installment of the bonds of this Series, there shall be in effect a provision of the Internal Revenue Code of 1986, as amended, or successor law (hereinafter called the "Code"), or the regulations with respect thereto, which does not provide that, for the interest on the bonds of this Series to be considered exempt from Federal income taxes under Section 103 of the Code or successor provisions of law, such bonds of this Series must be issued in registered form, then the bonds of this Series may also be issued in the form of coupon bonds payable to bearer, in which event the Committee on Finance is hereby authorized to adopt an appropriate form of coupon bond issuable only in the denomination of \$5,000. If on original issue the bonds of this Series are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an appropriate form of bond or other evidence of indebtedness; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system then the provisions of Section 9 of this resolution shall apply to the bonds of this Series.

Registered bonds of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 4. The Authority will keep or cause to be kept at the offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of bonds of this Series. Each registered bond of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmatured coupons thereto attached, may be exchanged for a registered bond or bonds, registered as designated in such request, of the same aggregate principal amount and series as the surrendered bond or bonds, of any of the authorized denominations. A registered bond or bonds of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered bond or bonds, registered as designated in such request, of any other authorized denominations, or in the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds with appropriate coupons attached, or a combination of such coupon and registered bonds, in each case of the same aggregate principal amount as the surrendered bond or bonds.

All requests for the registration, transfer, exchange and delivery of bonds as above provided shall be filed with the Registrar of the Authority; all bonds to be surrendered pursuant to such request shall be surrendered to the Registrar; and all bonds delivered in exchange as aforesaid shall be delivered by the Registrar. All bonds of this Series surrendered to the Registrar in exchange for other bonds or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of bonds of this Series except in the denomination of \$5,000 in the case of coupon bonds (if any) or in the denominations of \$5,000 or integral multiples of \$5,000 in the case of registered bonds or to authorize the issuance of coupon bonds of this Series if at any time there shall be in effect a provision of the Code or the regulations promulgated thereunder which provides that for the interest on the bonds of this Series to be considered exempt from Federal income taxes under Section 103 of the Code or successor provisions of law such bonds of this Series must be issued in registered form.

SECTION 5. Except as provided in Section 6 of this resolution, bonds of this Series shall be redeemable at the option of the Authority, in whole or in part, on interest payment dates, at or subsequent to June 1, 1997, and prior to maturity, as follows:

(Board - 2/12/87)

At one hundred two per centum (102%) of their face value, plus accrued interest to the date fixed for redemption, at June 1, 1997, and thereafter and at or prior to June 1, 1999; at one hundred one per centum (101%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to June 1, 2002; and at one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to June 1, 2017.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any bonds of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the City of New York, State of New York, and also in a daily newspaper of general circulation in one or more of the following cities: the City of Boston, Commonwealth of Massachusetts; the City of Philadelphia, Commonwealth of Pennsylvania; the City of Chicago, State of Illinois; and the City of San Francisco, State of California. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption, to the registered holders of the bonds of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If on original issue the bonds of this Series are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method by which the Authority shall give notice of intention to redeem any bonds of this Series; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system, then the foregoing notice provisions of this paragraph shall apply to the bonds of this Series.

Before the date fixed for redemption specified in the Authority's notice of intention to redeem, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding bonds which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption and the premium (if any), such principal amount and premium (if any), to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the bonds so called for redemption and to be paid to them respectively upon presentation and surrender of the said bonds with accrued interest included in such redemption price to be paid to the registered holders in accordance with the provisions of this resolution and in the case of coupon bonds (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such bonds. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided or as provided by the Committee on Finance, the bonds so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such bonds on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the bonds so called from and after the date fixed for their redemption, and such bonds and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered bonds of denominations greater than \$5,000, if less than all of the bonds of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing provisions of this Section 5 shall be deemed to refer to such \$5,000 unit of face value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by any bond are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said bond shall forthwith present said bond to the Registrar who shall issue a new bond or bonds

of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 4 of this resolution, including a new bond or bonds with the aggregate principal amount of the \$5,000 unit or units of face value called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such bonds of a denomination greater than \$5,000 shall fail to present such bond to the Registrar for the issuance of new bonds of smaller denominations in exchange therefor, as aforesaid, such bonds shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such bond shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 6. The Authority shall establish and maintain a separate sinking fund for the retirement of bonds of this Series which shall be known as the "Consolidated Bonds, Series Fifty E, Due 2017, Sinking Fund." The amount required to be paid into said Sinking Fund for each year shall be the difference at October 15 of such year between the schedule amount of principal for such year and the schedule amount of principal for the next preceding year as set forth in this Section 6, determined in the manner provided in the next succeeding paragraph. Except as provided in the third paragraph of this Section 6, payments into said Sinking Fund shall be made in bonds of this Series purchased or redeemed by the Authority at or prior to October 15 of the year on account of which the payment is made. Such payments may be made at any time or times during such year at or prior to October 15 or at any time or times during any prior year. Bonds of this Series so purchased may be purchased at such prices as the Authority may deem reasonable and proper and, in the discretion of the Authority, at public or private sale, with or without advertisement and with or without notice to any person other than the seller, and bonds theretofore issued and negotiated and then held by the Authority may be purchased for such purpose as well as bonds held by others. To be eligible for payment into said Sinking Fund each such bond shall have theretofore actually been issued and negotiated by the Authority and shall either be in registered form or in coupon form (if any) with all interest coupons attached maturing on and subsequent to December 1 of the year on account of which it is paid into said Sinking Fund. Bonds paid into said Sinking Fund shall be received therein at a value equal to the principal amount of such bonds. Upon payment into said Sinking Fund of said bonds of this Series so purchased or redeemed, said bonds shall be forthwith cancelled. All bonds of this Series which shall have been redeemed at prices established by Section 5 hereof shall be deemed to have been paid into said Sinking Fund and cancelled within the requirements of the preceding sentence whether or not said bonds shall have been presented for payment upon such redemption.

The schedule amount of bonds of this Series for each year shall be determined by multiplying the aggregate principal amount of all bonds of this Series theretofore issued (whether or not any of such bonds shall have theretofore been retired) by the cumulative percentage of total principal amount specified opposite such year in the schedule of mandatory periodic retirement hereafter set forth in this Section 6; if the amount so determined shall not be a multiple of \$5,000, then the schedule amount for such year shall be the next higher multiple of \$5,000.

If at the close of October 15 of any year (except the year of maturity) set forth in said schedule of mandatory periodic retirement, the Authority shall not have made payment into said Sinking Fund on account of such year of an amount at least equal to the payment required to be made therein on account of such year, then the Authority shall, on October 16 of such year, pay into said Sinking Fund an amount in cash equal to the deficiency, and such amounts shall be applied to the redemption of bonds of this Series at December 1, 1997, and at December 1 of each year thereafter, in the manner and upon the notice set forth in Section 5 of this resolution, but, notwithstanding the redemption price set forth in Section 5, at the price of one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, at December 1, 1997, and thereafter and at or prior to December 1, 2016.

The following schedule of mandatory periodic retirement is provided for bonds of this Series:

<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>	<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>
1997	1.5	2008	41.0
1998	3.5	2009	47.0
1999	6.0	2010	53.0
2000	8.5	2011	59.0
2001	10.0	2012	65.0
2002	14.0	2013	72.0
2003	17.0	2014	79.0
2004	21.0	2015	86.0
2005	25.0	2016	93.0
2006	30.0	2017	100.0
2007	35.0		

Nothing herein contained shall be construed in any way to prevent the Authority from retiring bonds of this Series more rapidly than is shown in the foregoing schedule of mandatory periodic retirement.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however*, that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. The Authority shall appoint a bank or trust company as Trustee for and in connection with the bonds of this Series. The Trustee is hereby authorized to (i) institute any action or proceeding on behalf of the holders of the bonds of this Series against the Authority or others, or (ii) intervene in any pending action or proceeding, or (iii) take any other action which it shall in its sole discretion determine to be necessary or advisable in order to protect the rights of the holders of bonds of this Series. The rights of the Trustee in this respect and in all other respects shall be in addition to and not in substitution of any and all rights which would otherwise inure to the holder or holders of bonds of this Series. It is understood that the Trustee in its sole discretion may, but shall be under no obligation to, review the activities or operations of the Authority or any of the contracts or agreements of the Authority or exercise any of the rights or powers vested in it by this Section 8 whether on the Trustee's initiative or at the request or direction of any of the holders of bonds of this Series.

The Trustee (which shall include any successor Trustee) appointed under the provisions of this Section shall be a bank or trust company organized under the laws of the State of New York or the State of New Jersey or a national banking association doing business and having its principal office in the Port of New York District and having a total capital (including capital stock, surplus, undivided profits and capital notes, if any) aggregating at least \$25,000,000, which is willing and able to accept the office on reasonable and customary terms and is authorized by law to perform all the duties imposed upon it by this resolution.

The Trustee shall not be liable for any action taken or suffered upon any notice, resolution, request, consent, order, certificate, report, opinion, bond, or other paper or document believed by it to be genuine, and to have been signed or presented by the proper party or parties. The Trustee may consult with counsel, who may or may not be counsel to the Authority, and the opinion of such counsel shall be full and complete authorization and protection in respect of any action taken or suffered by it under this resolution in good faith and in accordance therewith. The Trustee shall not be liable in connection with the performance or nonperformance of its duties except for its own willful misconduct, negligence or bad faith.

If the Trustee shall deem it necessary or desirable that a matter be proved or established prior to taking or suffering any action under this resolution, such matter (unless other evidence in respect thereof be specifically prescribed) may be deemed to be conclusively proved and established by a certificate of an authorized officer of the Authority (who shall be any officer authorized pursuant to Section 9 hereof to execute bonds of this Series), and such certificate shall be full warrant for any action taken or suffered in good faith under the provisions of this resolution upon the faith thereof; but in its discretion the Trustee may in lieu thereof accept other evidence of such fact or matter or may require such further or additional evidence as to it may seem reasonable.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a statement of an authorized officer showing for the preceding calendar year (i) net revenues, (ii) the aggregate interest paid on bonds of the Authority, and (iii) the payments of principal on bonds of the Authority.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a copy of its annual report for such year, and its financial statement for such year accompanied by an opinion signed by an independent public accountant or firm of public accountants of recognized standing selected by the Authority and satisfactory to the Trustee.

The Authority shall file with the Trustee a copy of any Official Statement hereafter issued by the Authority in connection with the issuance of bonds by the Authority.

The Authority shall file with the Trustee a copy of the minutes of every meeting of the Authority and of the Port Authority Trans-Hudson Corporation at the time said minutes are transmitted to the Governor of New York and the Governor of New Jersey.

The Authority shall not be required to file with the Trustee (except when requested to do so by the Trustee) and the Trustee shall not be required to review any document, instrument, report or paper other than those which the Authority is expressly required hereunder to file with the Trustee. The Trustee shall not be bound to make any investigation into the facts or matters stated in any document, instrument, report or paper supplied to it, but the Trustee in its sole discretion may make such further inquiry or investigation into such facts or matters as the Trustee may deem advisable, and, if the Trustee shall determine to make such further inquiry or investigation, the Trustee is authorized to examine such books and records of and properties owned or operated by the Authority as the Trustee may deem advisable, personally or by agent or attorney.

The Authority hereby agrees (i) to pay to the Trustee from time to time reasonable compensation for all services rendered by it hereunder, (ii) to reimburse the Trustee upon its request for all reasonable expenses, disbursements and advances incurred or made by the Trustee in connection with the exercise or performance of any of its powers or duties hereunder (including the reasonable compensation and the expenses and disbursements of its agents and counsel), and (iii) to indemnify the Trustee for, and hold it harmless against, any loss, liability or expense incurred without willful misconduct, negligence or bad faith on its part, arising out of or in connection with the exercise or performance of the Trustee's powers and duties hereunder, including the costs and expenses of defending itself against any claim or liability in connection with such exercise or performance.

The Trustee may become the owner or holder of any bonds of the Authority with the same rights as it would have were it not a Trustee. To the extent permitted by law, the Trustee may act as depository for the Authority, act as Paying Agent and Registrar of bonds of the Authority, act itself and permit any of its officers or directors to act in any other capacity with respect to the Authority, the bonds of the Authority and the holders of bonds of the Authority as it or its officers or directors would be able to act were it not a Trustee.

The Trustee may at any time resign and be discharged of the duties and obligations created by this resolution by giving not less than sixty (60) days' written notice to the Authority and publishing notice thereof, specifying the date when such resignation shall take effect, once in each week for two (2) successive calendar weeks in a newspaper of general circulation in the City of New York, State of New York, and such resignation shall take effect upon the date specified in such notice unless previously a successor shall have been appointed by the Authority in which event such resignation shall take effect immediately on the appointment of such successor.

The Trustee may be removed at any time by an instrument or concurrent instruments in writing, filed with the Trustee, and signed and acknowledged by the holders of a majority in principal amount of the bonds of this Series then outstanding or by their attorneys duly authorized, excluding any bonds held by or for the account of the Authority.

In case at any time the Trustee shall resign or shall be removed or shall become incapable of acting, or shall be adjudged a bankrupt or insolvent, or if a receiver, liquidator or conservator of the Trustee, or of its property, shall be appointed, or if any public officer shall take charge or control of the Trustee, or of its property or affairs, a successor may be appointed by the holders of a majority in principal amount of the bonds of this Series then outstanding, excluding any bonds held by or for the account of the Authority, by an instrument or concurrent instruments in writing signed and acknowledged by such bondholders or by their attorneys duly authorized and delivered to such successor Trustee, notification thereof being given to the Authority and the predecessor Trustee; *provided*, nevertheless, the Authority shall forthwith appoint a Trustee to fill such vacancy until a successor Trustee shall be appointed by the holders of bonds of this Series as authorized in this Section. The Authority shall publish notice of any such appointment made by it once in each week for two (2) consecutive calendar weeks, in a newspaper of general circulation in the City of New York, State of New York, the first publication to be made within twenty (20) days after such appointment. Any successor Trustee appointed by the Authority shall, immediately and without further act, be superseded by a Trustee appointed by the holders of bonds of this Series.

Any company into which any Trustee may be merged or converted or with which it may be consolidated or any company resulting from any merger, conversion or consolidation to which it shall be a party or any company to which any Trustee may sell or transfer all or substantially all of its corporate trust business; *provided*, such company shall be a bank or trust company located in the Port of New York District and shall be authorized by law to perform all the duties imposed upon it by this resolution, shall be the successor to such Trustee without the execution or filing of any paper or the performance of any further act.

The failure of the Authority to take any action required by this Section shall not invalidate any bond or bonds issued pursuant to this resolution or hereafter issued by the Authority, or affect any other actions of the Authority. The Authority shall in no way be restricted by this Section from entering any defense to an action or proceeding instituted by the Trustee or by the holder or holders of bonds of this Series.

SECTION 9. Each bond of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief

Financial Officer; Deputy Chief Financial Officer; Comptroller; Deputy Comptroller; Assistant Comptroller; Treasurer or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each bond of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such bond shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No bond of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such bond shall be conclusive evidence that such bond has been authenticated and delivered hereunder. Such certificate of authentication on any such bond shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such bonds issued hereunder. Bonds of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered bonds of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED BOND)

**THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED BOND
SERIES FIFTY E, DUE 2017**

No. C(50E)-
Maturity Date: December 1, 2017 Interest Rate:% Per Annum Dated: .. 19 CUSIP

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of December, 2017, upon presentation and surrender of this bond, the principal amount shown below:

together with interest thereon at the rate of per centum (%) per annum from , payable semi-annually commencing on , and thereafter on each succeeding December 1 and June 1 until maturity or prior redemption. The principal of this bond shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the office of , Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this bond shall be payable when due, in lawful money of the United States of America; to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This bond is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolutions of February 12, 1987, establishing the Series of which this bond forms a part and authorizing the issuance of this bond, constitute a contract between the Authority and the registered holder of this bond, which is subject to modification as therein provided.

The Authority has appointed a Trustee for and in connection with the bonds of this Series as provided by the resolution establishing the Series of which this bond forms a part.

This bond is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this bond or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this bond forms a part. The bonds of this Series are issuable only in the form of registered bonds without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this bond or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this bond forms a part for an equal aggregate principal amount of registered bonds of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This bond may be redeemed at December 1 of any year prior to maturity beginning with 1997 to satisfy the requirements of the schedule of mandatory periodic retirement provided for bonds of this Series in and pursuant to said resolutions of the Authority at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption at December 1, 1997, and thereafter and at or prior to December 1, 2016.

This bond may at the option of the Authority be redeemed for any other purpose at any interest payment date at or subsequent to June 1, 1997, as follows:

At one hundred two per centum (102%) of its face value, plus accrued interest to the date fixed for redemption, at June 1, 1997, and thereafter and at or prior to June 1, 1999; at one hundred one per centum (101%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to June 1, 2002; and at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to June 1, 2017.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance of the Authority shall fix and determine.

If this bond shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the City of New York, State of New York, and also in a daily newspaper of general circulation in one or more of the following cities: the City of Boston, Commonwealth of Massachusetts; the City of Philadelphia, Commonwealth of Pennsylvania; the City of Chicago, State of Illinois; and the City of San Francisco, State of California. Such notice shall be published at least twice prior to the date fixed for redemption—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this bond at his last known address as appearing on the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If this bond shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this bond, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this bond from and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the foregoing resolutions but shall rely solely upon the funds so deposited.

If this bond is of a denomination greater than \$5,000, and if less than all of the bonds of the Series of which this bond forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this bond shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing redemption provisions shall be deemed to refer to each such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this bond are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this bond shall forthwith present this bond to the Registrar who will issue new bonds of

smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this bond forms a part, including a new bond or bonds with the aggregate principal amount of the \$5,000 unit or units called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this bond to the Registrar for the issuance of new bonds of smaller denominations in exchange or substitution therefor as aforesaid, this bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

This bond is entitled to the benefit of the sinking fund established for this Series by the resolutions of the Authority hereinabove referred to.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this bond, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this bond, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this bond to be dated as of the _____ day of _____, 19__.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

In the presence of: (Witness)

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within bond in every particular, with such signature appropriately guaranteed.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the bonds of this Series shall cease to be such official before the bonds shall have been actually issued, the bonds may nevertheless be issued as though the person who signed such bonds of this Series had not ceased to be such official of the Authority; and the Authority may, by issuing bonds bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the bonds and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 10. The Committee on Finance of the Authority is hereby authorized (i) prior to the issuance of any installment of the bonds of this Series, to change the date at which any of the bonds of that installment shall mature; provided, that said date or dates shall not be later than December 1, 2017; (ii) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates in connection with the redemption, retirement, call and sinking fund provisions of such installment; (iii) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption for the bonds of this Series to retire such entire installment at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to such installment; (iv) prior to the issuance of any installment of the bonds of this Series, to reduce the percentages of face value relating to the optional call provisions for such installment; (v) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be issued on original issue as book-entry only securities taking account of the changes and adjustments authorized in this resolution with respect to the issuance of the bonds of this Series as book-entry only securities; (vi) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be separately registrable as to principal and interest (including any authorized incremental interest) to any one or more holders of the bonds or certificates (if any) with respect to the payment of interest thereon; (vii) prior to the issuance of any installment of the bonds of this Series, consistent with the foregoing, to change or adjust the provisions of the bonds of such installment thereof to permit the issuance of such bonds or installment with a fixed, variable or incremental interest rate or rates or a combination thereof; (viii) prior to the issuance of

the first installment of the bonds of this Series, if it is desirable in connection with the use of the proceeds of the bonds of this Series for the refunding of a series of the Authority's obligations to renumber this Series for purposes of identification, to renumber this Series; (ix) prior to the issuance of the first installment of the bonds of this Series, if a prior series of Consolidated Bonds has been renumbered or the resolutions in connection therewith have been rescinded and cancelled, and if it is desirable to accomplish the capital program of the Authority utilizing a continuous numbered sequence of Consolidated Bonds, to renumber this Series; and (x) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 11. In case any bond or coupon (if any) pertaining to such a bond shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new bond or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated bond or coupon or in lieu of or in substitution for such destroyed or lost bond or coupon; or if such bond or coupon shall have matured, instead of issuing a substitute bond or coupon the Authority may pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute bond or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such bond or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute bond or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute bond or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new bond or coupon so issued in substitution. Any bond or coupon (if any) issued under the provisions of this section in lieu of any bond or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the bond or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

Consolidated Bonds, Series Fifty E—Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority"), adopted a resolution providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time in conformity with said resolution for the purposes therein set forth, which said resolution (hereinafter called the "Consolidated Bond Resolution") constitutes a contract with the holders of the bonds so issued; and

WHEREAS, on the 12th day of February, 1987, the Authority adopted a resolution establishing a series of said Consolidated Bonds to be known as "Series Fifty E, Due 2017" (hereinafter called "bonds of this Series"), which said resolution by its terms constitutes a contract with the holders of the bonds of this Series; and

WHEREAS, the Authority has now determined that it is necessary, advisable and in the public interest to authorize the issuance of One Hundred Million Dollars (\$100,000,000) in principal amount of bonds of this Series for the purposes hereinafter set forth:

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplementary thereto.

SECTION 2. The issuance of up to One Hundred Million Dollars (\$100,000,000) in principal amount of Consolidated Bonds of the Authority of Series Fifty E, Due 2017, is hereby authorized. Said bonds shall be issued in one or more installments or lots pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution and the aforesaid resolution establishing Series Fifty E, Due 2017.

SECTION 3. Unless otherwise determined by the Committee on Finance in connection with the issuance of the bonds of this Series as book-entry only securities (which said Committee is hereby authorized to fix and determine such other system or method), the bonds of this Series shall be numbered upward from C(50E)-1, or they may bear such other numbers as the Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Deputy Comptroller; Assistant Comptroller; Treasurer or Assistant Treasurer of the Authority may deem appropriate.

SECTION 4. The proceeds of the bonds of this Series shall be used for the purpose of refunding, directly, by offers to exchange, or otherwise, all or any part of Consolidated Bonds, Fiftieth Series, Due 2017.

SECTION 5. The provisions of this resolution shall constitute a contract with the holders of the bonds issued pursuant to this resolution, and with each such holder.

Consolidated Bonds, Series Fifty E—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of One Hundred Million Dollars (\$100,000,000) in principal amount of Consolidated Bonds, constituting Series Fifty E, Due 2017 (hereinafter called the "bonds of this Series"), at a price which will result in a true interest cost to the Authority not in excess of fifteen per centum (15%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale including the exchange of Consolidated Bonds, Series Fifty E, Due 2017, for all or a portion of the bonds constituting Consolidated Bonds, Fiftieth Series, Due 2017, with or without advertisement, in one or more installments or in one or more lots, at one or more times on or before December 1, 1992, and to apply the proceeds, if any, of such sale or sales as provided in the resolution authorizing the issuance of said bonds of this Series.

SECTION 2. The Committee shall have power, in connection with the bonds of this Series, to fix the time or times of sale on or before December 1, 1992, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, including offers for the exchange of Consolidated Bonds, Series Fifty E, Due 2017, for all or a portion of the bonds constituting Consolidated Bonds, Fiftieth Series, Due 2017, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have power in the name of and on behalf of the Authority, in connection with the bonds of this Series, to enter into any appropriate contracts or agreements concerning any sales or exchanges; to fix the time or times and determine the terms and conditions of delivery of said bonds of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar and a Trustee, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with said bonds of this Series; to enter into appropriate contracts or agreements in connection with the issuance of the bonds of this Series as book-entry only securities; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the bonds of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the bonds offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the underwriter or underwriters purchasing the bonds in offering the bonds of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the bonds of any installment of the bonds of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such bonds of this Series to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, and the regulations with respect thereto.

SECTION 6. The Committee; Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; or Treasurer of the Authority is hereby authorized, in connection with the bonds of this Series, to take any action which may be necessary or desirable to assure that the bonds of this Series are in conformity with the provisions of Section 103 and Sections 147 through 150, inclusive, of the Internal Revenue Code of 1986, as amended, and the regulations

with respect thereto, and that the interest on such bonds of this Series is not subject to Federal income taxes, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Deputy Comptroller; Assistant Comptroller; Treasurer or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of bonds of this Series for the purposes for which such bonds of this Series are issued, as to the status of the projects for which the proceeds of the bonds of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee and any such action taken in connection therewith are hereby ratified.

Consolidated Bonds, Series Fifty-one E—Establishment

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, heretofore and on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority") adopted a resolution (hereinafter called the "Consolidated Bond Resolution") providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time, in conformity with said Consolidated Bond Resolution for the purposes therein set forth, and which Consolidated Bond Resolution constitutes a contract with the holders of the Consolidated Bonds so issued; and

WHEREAS, said Consolidated Bond Resolution provides that such Consolidated Bonds shall be issued in such series as the Authority may determine, and that the characteristics of the bonds of such series shall be determined by the Authority by and in the resolution establishing such series, and that the resolution establishing any series may contain other terms and provisions not inconsistent with the Consolidated Bond Resolution; and

WHEREAS, the Authority has heretofore established various series of said Consolidated Bonds and has now determined that it is necessary, advisable and in the public interest to establish another series of said Consolidated Bonds, without prejudice to its right hereafter to establish other and additional series of such Consolidated Bonds;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions.

SECTION 2. There is hereby established a series of said Consolidated Bonds to be known as "Series Fifty-one E, Due 2019," to be issued in conformity with said Consolidated Bond Resolution and for any one or more of the purposes specified therein as may be provided in the resolution authorizing the issuance of such series. This resolution shall constitute a contract with the holders of said bonds of Series Fifty-one E, Due 2019, which said bonds are hereinafter called "bonds of this Series," and with each such holder.

SECTION 3. Bonds of this Series shall be issued in one or more installments or lots as the Authority may hereafter determine.

Each installment of the bonds of this Series shall be dated as of the date of original issuance of such installment to the initial purchaser thereof, shall mature on June 1, 2019, and, except as provided below, shall bear a stated rate or rates of interest, including fixed, variable or incremental rates for the term of the bonds or any portion thereof, or a combination thereof, from their date of issuance, not exceeding fifteen per centum (15%) per annum, payable on interest payment dates of June 1 and December 1, as may be determined by the Committee on Finance of the Authority. If the bonds of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on the interest payment date next succeeding their date of issuance, and thereafter on each succeeding interest payment date until maturity or prior redemption. The Committee on Finance is hereby authorized to fix and determine any other date as that upon which interest shall commence and said interest rate or rates including fixed, variable or incremental rates or a combination thereof, if any, or to determine that said bonds of this Series shall not bear a stated rate of interest.

Both principal of and interest on the bonds of this Series shall be payable in lawful money of the United States of America. Principal of the bonds of this Series and interest on the coupon bonds of this Series, if any, shall be payable upon presentation and surrender of the registered bonds of this Series by the registered holders thereof and upon the coupon bonds of this Series, if any, upon presentation and surrender of such bonds or the coupons appertaining thereto, as the case may be, at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered bonds of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder. If on original issue the bonds of this Series are to be issued as book-entry only securities, subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method for the payment of both or either of the

principal of and interest on the bonds of this Series to the registered holder thereof; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system, then the foregoing payment provisions of this paragraph shall apply to the bonds of this Series.

Bonds of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the first installment of the bonds of this Series, there shall be in effect a provision of the Internal Revenue Code of 1986, as amended, or successor law (hereinafter called the "Code"), or the regulations with respect thereto, which does not provide that, for the interest on the bonds of this Series to be considered exempt from Federal income taxes under Section 103 of the Code or successor provisions of law, such bonds of this Series must be issued in registered form, then the bonds of this Series may also be issued in the form of coupon bonds payable to bearer, in which event the Committee on Finance is hereby authorized to adopt an appropriate form of coupon bond issuable only in the denomination of \$5,000. If on original issue the bonds of this Series are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an appropriate form of bond or other evidence of indebtedness; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system then the provisions of Section 9 of this resolution shall apply to the bonds of this Series.

Registered bonds of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 4. The Authority will keep or cause to be kept at the offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of bonds of this Series. Each registered bond of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmatured coupons thereto attached, may be exchanged for a registered bond or bonds, registered as designated in such request, of the same aggregate principal amount and series as the surrendered bond or bonds, of any of the authorized denominations. A registered bond or bonds of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered bond or bonds, registered as designated in such request, of any other authorized denominations, or in the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds with appropriate coupons attached, or a combination of such coupon and registered bonds, in each case of the same aggregate principal amount as the surrendered bond or bonds.

All requests for the registration, transfer, exchange and delivery of bonds as above provided shall be filed with the Registrar of the Authority; all bonds to be surrendered pursuant to such request shall be surrendered to the Registrar; and all bonds delivered in exchange as aforesaid shall be delivered by the Registrar. All bonds of this Series surrendered to the Registrar in exchange for other bonds or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of bonds of this Series except in the denomination of \$5,000 in the case of coupon bonds (if any) or in the denominations of \$5,000 or integral multiples of \$5,000 in the case of registered bonds or to authorize the issuance of coupon bonds of this Series if at any time there shall be in effect a provision of the Code or the regulations promulgated thereunder which provides that for the interest on the bonds of this Series to be considered exempt from Federal income taxes under Section 103 of the Code or successor provisions of law such bonds of this Series must be issued in registered form.

SECTION 5. Except as provided in Section 6 of this resolution, bonds of this Series shall be redeemable at the option of the Authority, in whole or in part, on interest payment dates, at or subsequent to June 1, 1997, and prior to maturity, as follows:

At one hundred two per centum (102%) of their face value, plus accrued interest to the date fixed for redemption, at June 1, 1997, and thereafter and at or prior to June 1, 1999; at one hundred one per centum (101%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to June 1, 2002; and at one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to December 1, 2018.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any bonds of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the City of New York, State of New York, and also in a daily newspaper of general circulation in one or more of the following cities: the City of Boston, Commonwealth of Massachusetts; the City of Philadelphia, Commonwealth of Pennsylvania; the City of Chicago, State of Illinois; and the City of San Francisco, State of California. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption, to the registered holders of the bonds of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If on original issue the bonds of this Series are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method by which the Authority shall give notice of intention to redeem any bonds of this Series; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system, then the foregoing notice provisions of this paragraph shall apply to the bonds of this Series.

Before the date fixed for redemption specified in the Authority's notice of intention to redeem, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding bonds which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption and the premium (if any), such principal amount and premium (if any), to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the bonds so called for redemption and to be paid to them respectively upon presentation and surrender of the said bonds with accrued interest included in such redemption price to be paid to the registered holders in accordance with the provisions of this resolution and in the case of coupon bonds (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such bonds. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided or as provided by the Committee on Finance, the bonds so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such bonds on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the bonds so called from and after the date fixed for their redemption, and such bonds and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered bonds of denominations greater than \$5,000, if less than all of the bonds of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing provisions of this Section 5 shall be deemed to refer to such \$5,000 unit of face value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by any bond are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said bond shall forthwith present said bond to the Registrar who shall issue a new bond or bonds

of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 4 of this resolution, including a new bond or bonds with the aggregate principal amount of the \$5,000 unit or units of face value called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such bonds of a denomination greater than \$5,000 shall fail to present such bond to the Registrar for the issuance of new bonds of smaller denominations in exchange therefor, as aforesaid, such bonds shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such bond shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 6. The Authority shall establish and maintain a separate sinking fund for the retirement of bonds of this Series which shall be known as the "Consolidated Bonds, Series Fifty-one E, Due 2019, Sinking Fund." The amount required to be paid into said Sinking Fund for each year shall be the difference at October 15 of such year between the schedule amount of principal for such year and the schedule amount of principal for the next preceding year as set forth in this Section 6, determined in the manner provided in the next succeeding paragraph. Except as provided in the third paragraph of this Section 6, payments into said Sinking Fund shall be made in bonds of this Series purchased or redeemed by the Authority at or prior to October 15 of the year on account of which the payment is made. Such payments may be made at any time or times during such year at or prior to October 15 or at any time or times during any prior year. Bonds of this Series so purchased may be purchased at such prices as the Authority may deem reasonable and proper and, in the discretion of the Authority, at public or private sale, with or without advertisement and with or without notice to any person other than the seller, and bonds theretofore issued and negotiated and then held by the Authority may be purchased for such purpose as well as bonds held by others. To be eligible for payment into said Sinking Fund each such bond shall have theretofore actually been issued and negotiated by the Authority and shall either be in registered form or in coupon form (if any) with all interest coupons attached maturing on and subsequent to December 1 of the year on account of which it is paid into said Sinking Fund. Bonds paid into said Sinking Fund shall be received therein at a value equal to the principal amount of such bonds. Upon payment into said Sinking Fund of said bonds of this Series so purchased or redeemed, said bonds shall be forthwith cancelled. All bonds of this Series which shall have been redeemed at prices established by Section 5 hereof shall be deemed to have been paid into said Sinking Fund and cancelled within the requirements of the preceding sentence whether or not said bonds shall have been presented for payment upon such redemption.

The schedule amount of bonds of this Series for each year shall be determined by multiplying the aggregate principal amount of all bonds of this Series theretofore issued (whether or not any of such bonds shall have theretofore been retired) by the cumulative percentage of total principal amount specified opposite such year in the schedule of mandatory periodic retirement hereafter set forth in this Section 6; if the amount so determined shall not be a multiple of \$5,000, then the schedule amount for such year shall be the next higher multiple of \$5,000.

If at the close of October 15 of any year (except the year of maturity) set forth in said schedule of mandatory periodic retirement, the Authority shall not have made payment into said Sinking Fund on account of such year of an amount at least equal to the payment required to be made therein on account of such year, then the Authority shall, on October 16 of such year, pay into said Sinking Fund an amount in cash equal to the deficiency, and such amounts shall be applied to the redemption of bonds of this Series at December 1, 1997, and at December 1 of each year thereafter, in the manner and upon the notice set forth in Section 5 of this resolution, but, notwithstanding the redemption price set forth in Section 5, at the price of one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, at December 1, 1997, and thereafter and at or prior to December 1, 2018.

The following schedule of mandatory periodic retirement is provided for bonds of this Series:

<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>	<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>
1997	1.0	2009	35.0
1998	2.0	2010	41.0
1999	3.5	2011	47.0
2000	5.0	2012	53.0
2001	7.0	2013	59.0
2002	9.0	2014	65.0
2003	11.0	2015	72.0
2004	14.0	2016	79.0
2005	17.0	2017	86.0
2006	21.0	2018	93.0
2007	25.0	2019	100.0
2008	30.0		

Nothing herein contained shall be construed in any way to prevent the Authority from retiring bonds of this Series more rapidly than is shown in the foregoing schedule of mandatory periodic retirement.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however,* that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain

such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. The Authority shall appoint a bank or trust company as Trustee for and in connection with the bonds of this Series. The Trustee is hereby authorized to (i) institute any action or proceeding on behalf of the holders of the bonds of this Series against the Authority or others, or (ii) intervene in any pending action or proceeding, or (iii) take any other action which it shall in its sole discretion determine to be necessary or advisable in order to protect the rights of the holders of bonds of this Series. The rights of the Trustee in this respect and in all other respects shall be in addition to and not in substitution of any and all rights which would otherwise inure to the holder or holders of bonds of this Series. It is understood that the Trustee in its sole discretion may, but shall be under no obligation to, review the activities or operations of the Authority or any of the contracts or agreements of the Authority or exercise any of the rights or powers vested in it by this Section 8 whether on the Trustee's initiative or at the request or direction of any of the holders of bonds of this Series.

The Trustee (which shall include any successor Trustee) appointed under the provisions of this Section shall be a bank or trust company organized under the laws of the State of New York or the State of New Jersey or a national banking association doing business and having its principal office in the Port of New York District and having a total capital (including capital stock, surplus, undivided profits and capital notes, if any) aggregating at least \$25,000,000, which is willing and able to accept the office on reasonable and customary terms and is authorized by law to perform all the duties imposed upon it by this resolution.

The Trustee shall not be liable for any action taken or suffered upon any notice, resolution, request, consent, order, certificate, report, opinion, bond, or other paper or document believed by it to be genuine, and to have been signed or presented by the proper party or parties. The Trustee may consult with counsel, who may or may not be counsel to the Authority, and the opinion of such counsel shall be full and complete authorization and protection in respect of any action taken or suffered by it under this resolution in good faith and in accordance therewith. The Trustee shall not be liable in connection with the performance or nonperformance of its duties except for its own willful misconduct, negligence or bad faith.

If the Trustee shall deem it necessary or desirable that a matter be proved or established prior to taking or suffering any action under this resolution, such matter (unless other evidence in respect thereof be specifically prescribed) may be deemed to be conclusively proved and established by a certificate of an authorized officer of the Authority (who shall be any officer authorized pursuant to Section 9 hereof to execute bonds of this Series), and such certificate shall be full warrant for any action taken or suffered in good faith under the provisions of this resolution upon the faith thereof; but in its discretion the Trustee may in lieu thereof accept other evidence of such fact or matter or may require such further or additional evidence as to it may seem reasonable.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a statement of an authorized officer showing for the preceding calendar year (i) net revenues, (ii) the aggregate interest paid on bonds of the Authority, and (iii) the payments of principal on bonds of the Authority.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a copy of its annual report for such year, and its financial statement for such year accompanied by an opinion signed by an independent public accountant or firm of public accountants of recognized standing selected by the Authority and satisfactory to the Trustee.

The Authority shall file with the Trustee a copy of any Official Statement hereafter issued by the Authority in connection with the issuance of bonds by the Authority.

The Authority shall file with the Trustee a copy of the minutes of every meeting of the Authority and of the Port Authority Trans-Hudson Corporation at the time said minutes are transmitted to the Governor of New York and the Governor of New Jersey.

The Authority shall not be required to file with the Trustee (except when requested to do so by the Trustee) and the Trustee shall not be required to review any document, instrument, report or paper other than those which the Authority is expressly required hereunder to file with the Trustee. The Trustee shall not be bound to make any

investigation into the facts or matters stated in any document, instrument, report or paper supplied to it, but the Trustee in its sole discretion may make such further inquiry or investigation into such facts or matters as the Trustee may deem advisable, and, if the Trustee shall determine to make such further inquiry or investigation, the Trustee is authorized to examine such books and records of and properties owned or operated by the Authority as the Trustee may deem advisable, personally or by agent or attorney.

The Authority hereby agrees (i) to pay to the Trustee from time to time reasonable compensation for all services rendered by it hereunder, (ii) to reimburse the Trustee upon its request for all reasonable expenses, disbursements and advances incurred or made by the Trustee in connection with the exercise or performance of any of its powers or duties hereunder (including the reasonable compensation and the expenses and disbursements of its agents and counsel), and (iii) to indemnify the Trustee for, and hold it harmless against, any loss, liability or expense incurred without willful misconduct, negligence or bad faith on its part, arising out of or in connection with the exercise or performance of the Trustee's powers and duties hereunder, including the costs and expenses of defending itself against any claim or liability in connection with such exercise or performance.

The Trustee may become the owner or holder of any bonds of the Authority with the same rights as it would have were it not a Trustee. To the extent permitted by law, the Trustee may act as depositary for the Authority, act as Paying Agent and Registrar of bonds of the Authority, act itself and permit any of its officers or directors to act in any other capacity with respect to the Authority, the bonds of the Authority and the holders of bonds of the Authority as it or its officers or directors would be able to act were it not a Trustee.

The Trustee may at any time resign and be discharged of the duties and obligations created by this resolution by giving not less than sixty (60) days' written notice to the Authority and publishing notice thereof, specifying the date when such resignation shall take effect, once in each week for two (2) successive calendar weeks in a newspaper of general circulation in the City of New York, State of New York, and such resignation shall take effect upon the date specified in such notice unless previously a successor shall have been appointed by the Authority in which event such resignation shall take effect immediately on the appointment of such successor.

The Trustee may be removed at any time by an instrument or concurrent instruments in writing, filed with the Trustee, and signed and acknowledged by the holders of a majority in principal amount of the bonds of this Series then outstanding or by their attorneys duly authorized, excluding any bonds held by or for the account of the Authority.

In case at any time the Trustee shall resign or shall be removed or shall become incapable of acting, or shall be adjudged a bankrupt or insolvent, or if a receiver, liquidator or conservator of the Trustee, or of its property, shall be appointed, or if any public officer shall take charge or control of the Trustee, or of its property or affairs, a successor may be appointed by the holders of a majority in principal amount of the bonds of this Series then outstanding, excluding any bonds held by or for the account of the Authority, by an instrument or concurrent instruments in writing signed and acknowledged by such bondholders or by their attorneys duly authorized and delivered to such successor Trustee, notification thereof being given to the Authority and the predecessor Trustee; *provided*, nevertheless, the Authority shall forthwith appoint a Trustee to fill such vacancy until a successor Trustee shall be appointed by the holders of bonds of this Series as authorized in this Section. The Authority shall publish notice of any such appointment made by it once in each week for two (2) consecutive calendar weeks, in a newspaper of general circulation in the City of New York, State of New York, the first publication to be made within twenty (20) days after such appointment. Any successor Trustee appointed by the Authority shall, immediately and without further act, be superseded by a Trustee appointed by the holders of bonds of this Series.

Any company into which any Trustee may be merged or converted or with which it may be consolidated or any company resulting from any merger, conversion or consolidation to which it shall be a party or any company to which any Trustee may sell or transfer all or substantially all of its corporate trust business; *provided*, such company shall be a bank or trust company located in the Port of New York District and shall be authorized by law to perform all the duties imposed upon it by this resolution, shall be the successor to such Trustee without the execution or filing of any paper or the performance of any further act.

The failure of the Authority to take any action required by this Section shall not invalidate any bond or bonds issued pursuant to this resolution or hereafter issued by the Authority, or affect any other actions of the Authority. The Authority shall in no way be restricted by this Section from entering any defense to an action or proceeding instituted by the Trustee or by the holder or holders of bonds of this Series.

SECTION 9. Each bond of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Deputy Comptroller; Assistant Comptroller; Treasurer or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each bond of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such bond shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No bond of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such bond shall be conclusive evidence that such bond has been authenticated and delivered hereunder. Such certificate of authentication on any such bond shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such bonds issued hereunder. Bonds of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered bonds of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED BOND)

**THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED BOND
SERIES FIFTY-ONE E, DUE 2019**

No. C(51E)-

Maturity Date: June 1, 2019 Interest Rate:% Per Annum Dated: . . . 19 . . . CUSIP

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of June, 2019, upon presentation and surrender of this bond, the principal amount shown below:

together with interest thereon at the rate of per centum (%) per annum from , payable semi-annually commencing on , and thereafter on each succeeding June 1 and December 1 until maturity or prior redemption. The principal of this bond shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the office of , Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this bond shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This bond is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolutions of February 12, 1987, establishing the Series of which this bond forms a part and authorizing the issuance of this bond, constitute a contract between the Authority and the registered holder of this bond, which is subject to modification as therein provided.

The Authority has appointed a Trustee for and in connection with the bonds of this Series as provided by the resolution establishing the Series of which this bond forms a part.

This bond is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this bond or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this bond forms a part. The bonds of this Series are issuable only in the form of registered bonds without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this bond or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this bond forms a part for an equal aggregate principal amount of registered bonds of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This bond may be redeemed at December 1 of any year prior to maturity beginning with 1997 to satisfy the requirements of the schedule of mandatory periodic retirement provided for bonds of this Series in and pursuant to said resolutions of the Authority at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption at December 1, 1997, and thereafter and at or prior to December 1, 2018.

This bond may at the option of the Authority be redeemed for any other purpose at any interest payment date at or subsequent to June 1, 1997, as follows:

At one hundred two per centum (102%) of its face value, plus accrued interest to the date fixed for redemption, at June 1, 1997, and thereafter and at or prior to June 1, 1999; at one hundred one per centum (101%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to June 1, 2002; and at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to December 1, 2018.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance of the Authority shall fix and determine.

If this bond shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the City of New York, State of New York, and also in a daily newspaper of general circulation in one or more of the following cities: the City of Boston, Commonwealth of Massachusetts; the City of Philadelphia, Commonwealth of Pennsylvania; the City of Chicago, State of Illinois; and the City of San Francisco, State of California. Such notice shall be published at least twice prior to the date fixed for redemption—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this bond at his last known address as appearing on the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If this bond shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this bond, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this bond from and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the foregoing resolutions but shall rely solely upon the funds so deposited.

If this bond is of a denomination greater than \$5,000, and if less than all of the bonds of the Series of which this bond forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this bond shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing redemption provisions shall be deemed to refer to each such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this bond are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this bond shall forthwith present this bond to the Registrar who will issue new bonds of

smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this bond forms a part, including a new bond or bonds with the aggregate principal amount of the \$5,000 unit or units called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this bond to the Registrar for the issuance of new bonds of smaller denominations in exchange or substitution therefor as aforesaid, this bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

This bond is entitled to the benefit of the sinking fund established for this Series by the resolutions of the Authority hereinabove referred to.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this bond, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this bond, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this bond to be dated as of the _____ day of _____, 19 _____.

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within bond in every particular, with such signature appropriately guaranteed.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the bonds of this Series shall cease to be such official before the bonds shall have been actually issued, the bonds may nevertheless be issued as though the person who signed such bonds of this Series had not ceased to be such official of the Authority; and the Authority may, by issuing bonds bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the bonds and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 10. The Committee on Finance of the Authority is hereby authorized (i) prior to the issuance of any installment of the bonds of this Series, to change the date at which any of the bonds of that installment shall mature; provided, that said date or dates shall not be later than June 1, 2019; (ii) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates in connection with the redemption, retirement, call and sinking fund provisions of such installment; (iii) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption for the bonds of this Series to retire such entire installment at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to such installment; (iv) prior to the issuance of any installment of the bonds of this Series, to reduce the percentages of face value relating to the optional call provisions for such installment; (v) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be issued on original issue as book-entry only securities taking account of the changes and adjustments authorized in this resolution with respect to the issuance of the bonds of this Series as book-entry only securities; (vi) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be separately registrable as to principal and interest (including any authorized incremental interest) to any one or more holders of the bonds or certificates (if any) with respect to the payment of interest thereon; (vii) prior to the issuance of any installment of the bonds of this Series, consistent with the foregoing, to change or adjust the provisions of the bonds of such installment thereof to permit the issuance of such bonds or installment with a fixed, variable or incremental interest rate or rates or a combination thereof; (viii) prior to the issuance of

the first installment of the bonds of this Series, if it is desirable in connection with the use of the proceeds of the bonds of this Series for the refunding of a series of the Authority's obligations to renumber this Series for purposes of identification, to renumber this Series; (ix) prior to the issuance of the first installment of the bonds of this Series, if a prior series of Consolidated Bonds has been renumbered or the resolutions in connection therewith have been rescinded and cancelled, and if it is desirable to accomplish the capital program of the Authority utilizing a continuous numbered sequence of Consolidated Bonds, to renumber this Series; and (x) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 11. In case any bond or coupon (if any) pertaining to such a bond shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new bond or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated bond or coupon or in lieu of or in substitution for such destroyed or lost bond or coupon; or if such bond or coupon shall have matured, instead of issuing a substitute bond or coupon the Authority may pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute bond or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such bond or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute bond or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute bond or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new bond or coupon so issued in substitution. Any bond or coupon (if any) issued under the provisions of this section in lieu of any bond or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the bond or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

Consolidated Bonds, Series Fifty-one E—Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority"), adopted a resolution providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time in conformity with said resolution for the purposes therein set forth, which said resolution (hereinafter called the "Consolidated Bond Resolution") constitutes a contract with the holders of the bonds so issued; and

WHEREAS, on the 12th day of February, 1987, the Authority adopted a resolution establishing a series of said Consolidated Bonds to be known as "Series Fifty-one E, Due 2019" (hereinafter called "bonds of this Series"), which said resolution by its terms constitutes a contract with the holders of the bonds of this Series; and

WHEREAS, the Authority has now determined that it is necessary, advisable and in the public interest to authorize the issuance of One Hundred Million Dollars (\$100,000,000) in principal amount of bonds of this Series for the purposes hereinafter set forth;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplementary thereto.

SECTION 2. The issuance of up to One Hundred Million Dollars (\$100,000,000) in principal amount of Consolidated Bonds of the Authority of Series Fifty-one E, Due 2019, is hereby authorized. Said bonds shall be issued in one or more installments or lots pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution and the aforesaid resolution establishing Series Fifty-one E, Due 2019.

SECTION 3. Unless otherwise determined by the Committee on Finance in connection with the issuance of the bonds of this Series as book-entry only securities (which said Committee is hereby authorized to fix and determine such other system or method), the bonds of this Series shall be numbered upward from C(51E)-1, or they may bear such other numbers as the Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Deputy Comptroller; Assistant Comptroller; Treasurer or Assistant Treasurer of the Authority may deem appropriate.

SECTION 4. The proceeds of the bonds of this Series shall be used for the purpose of refunding, directly, by offers to exchange, or otherwise, all or any part of Consolidated Bonds, Fifty-first Series, Due 2019.

SECTION 5. The provisions of this resolution shall constitute a contract with the holders of the bonds issued pursuant to this resolution, and with each such holder.

Consolidated Bonds, Series Fifty-one E—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of One Hundred Million Dollars (\$100,000,000) in principal amount of Consolidated Bonds, constituting Series Fifty-one E, Due 2019 (hereinafter called the "bonds of this Series"), at a price which will result in a true interest cost to the Authority not in excess of fifteen per centum (15%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale including the exchange of Consolidated Bonds, Series Fifty-one E, Due 2019, for all or a portion of the bonds constituting Consolidated Bonds, Fifty-first Series, Due 2019, with or without advertisement, in one or more installments or in one or more lots, at one or more times on or before June 1, 1994, and to apply the proceeds, if any, of such sale or sales as provided in the resolution authorizing the issuance of said bonds of this Series.

SECTION 2. The Committee shall have power, in connection with the bonds of this Series, to fix the time or times of sale on or before June 1, 1994, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, including offers for the exchange of Consolidated Bonds, Series Fifty-one E, Due 2019, for all or a portion of the bonds constituting Consolidated Bonds, Fifty-first Series, Due 2019, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have power in the name of and on behalf of the Authority, in connection with the bonds of this Series, to enter into any appropriate contracts or agreements concerning any sales or exchanges; to fix the time or times and determine the terms and conditions of delivery of said bonds of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar and a Trustee, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with said bonds of this Series; to enter into appropriate contracts or agreements in connection with the issuance of the bonds of this Series as book-entry only securities; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the bonds of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the bonds offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the underwriter or underwriters purchasing the bonds in offering the bonds of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the bonds of any installment of the bonds of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such bonds of this Series to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, and the regulations with respect thereto.

SECTION 6. The Committee; Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; or Treasurer of the Authority is hereby authorized, in connection with the bonds of this Series, to take any action which may be necessary or desirable to assure that the bonds of this Series are in conformity with the provisions of Section 103 and Sections 147 through 150, inclusive, of the Internal Revenue Code of 1986, as amended, and the regulations with respect thereto, and that the interest on such bonds of this Series is not subject to Federal income taxes, and

any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Deputy Comptroller; Assistant Comptroller; Treasurer or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of bonds of this Series for the purposes for which such bonds of this Series are issued, as to the status of the projects for which the proceeds of the bonds of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee and any such action taken in connection therewith are hereby ratified.

**Consolidated Bonds, Series Fifty E - Supplemental Coupon Exchange Program -
Consolidated Bonds, Fiftieth Series - Appointment of Dealer/Manager**

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to conduct a program, taking such actions as are deemed necessary or desirable in connection herewith, including the issuance of materials in the name of and on behalf of The Port Authority of New York and New Jersey for purposes of requesting offers from holders of The Port Authority of New York and New Jersey, Consolidated Bonds, Fiftieth Series, Due 2017, to exchange such bonds for a like principal amount of The Port Authority of New York and New Jersey, Consolidated Bonds, Series Fifty E, Due 2017, to be issued and sold by the Committee on Finance in connection with such exchange and to present such offers to the Committee on Finance; provided, however, that no such offers shall be so presented if the total of such offers would result in less than \$10 million of Consolidated Bonds, Fiftieth Series being exchanged; and it is further

RESOLVED, that E.F. Hutton & Company Inc., be and it hereby is designated and appointed as Dealer/Manager for and in connection with the Authority's request for offers from the holders of Consolidated Bonds, Fiftieth Series, Due 2017, to exchange such bonds as aforesaid; and it is further

RESOLVED, that the Executive Director, Assistant Executive Director, Chief Financial Officer, Deputy Chief Financial Officer, Comptroller, Assistant Comptroller, Treasurer or Assistant Treasurer of the Authority is hereby authorized to enter into and execute an agreement on behalf of The Port Authority of New York and New Jersey with such Dealer/Manager providing, among other items, for compensation to E.F. Hutton & Company Inc., on the basis of \$3.75 for each \$1,000 in principal amount of Consolidated Bonds, Fiftieth Series accepted for exchange by the Committee on Finance and for expenses as may be incurred with the Authority's written approval, and to any dealer (including E.F. Hutton & Company Inc.) depositing bonds which are accepted for exchange by the Committee on Finance, an amount not to exceed \$10.00 for each \$1,000 in principal amount of such bonds so accepted for exchange by the Committee; and it is further

RESOLVED, that the Executive Director, Assistant Executive Director, Chief Financial Officer, Deputy Chief Financial Officer, Treasurer or Assistant Treasurer of the Authority, or any one of them, is hereby authorized to arrange for the preparation of such materials as may be necessary or desirable in connection with the request for offers from bondholders in the name and on behalf of The Port Authority of New York and New Jersey, describing the Authority's request for offers to exchange Consolidated Bonds, Fiftieth Series, Due 2017, for Consolidated Bonds, Series Fifty E, Due 2017, and the Authority and its financial condition, and making representations on behalf of the Authority; provided, however, that such materials shall not be issued on behalf of the Authority without the express consent of the Executive Director, Assistant Executive Director, Chief Financial Officer, Deputy Chief Financial Officer, Treasurer or Assistant Treasurer of the Authority, or any one of them. Subject to the foregoing, the Authority hereby approves the use of any such materials in connection with the

Dealer/Manager's solicitation of such offers from the holders of Consolidated Bonds, Fiftieth Series, Due 2017, to exchange bonds as aforesaid; and it is further

RESOLVED, that the form of such agreements and materials shall be subject to the approval of General Counsel or his authorized representative.

**Consolidated Bonds, Series Fifty E - Supplemental Coupon Exchange Program -
Consolidated Bonds, Fiftieth Series - Appointment of Exchange Agent**

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that The Chase Manhattan Bank, N.A., New York, New York, be and it hereby is designated and appointed as Exchange Agent for and in connection with request of the Authority to the holders of The Port Authority of New York and New Jersey, Consolidated Bonds, Fiftieth Series, Due 2017 for offers to exchange such bonds for The Port Authority of New York and New Jersey Consolidated Bonds, Series Fifty E, Due 2017; and it is further

RESOLVED, that the Executive Director, Assistant Executive Director, Chief Financial Officer, Deputy Chief Financial Officer, Treasurer or Assistant Treasurer of the Authority is hereby authorized to enter into and execute an agreement on behalf of the Authority with such Exchange Agent pursuant to which the Exchange Agent would act, and providing for compensation for such Exchange Agent not in excess of the standard rates generally prevailing in the market.

**Consolidated Bonds, Series Fifty-one E - Supplemental Coupon Exchange Program -
Consolidated Bonds, Fifty-first Series - Appointment of Dealer/Manager**

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to conduct a program, taking such actions as are deemed necessary or desirable in connection therewith including the issuance of materials in the name of and on behalf of The Port Authority of New York and New Jersey for purposes of requesting offers from holders of The Port Authority of New York and New Jersey, Consolidated Bonds, Fifty-first Series, Due 2019, to exchange such bonds for a like principal amount of The Port Authority of New York and New Jersey, Consolidated Bonds, Series Fifty-one E, Due 2019, to be issued and sold by the Committee on Finance in connection with such exchange and to present such offers to the Committee on Finance; provided, however, that no such offers shall so presented if the total of such offers would result in less than \$10 million of Consolidated Bonds, Fifty-first Series being exchanged; and it is further

RESOLVED, that E.F. Hutton & Company Inc., be and it hereby is designated and appointed as Dealer/Manager for and in connection with the Authority's request for offers from the holders of Consolidated Bonds, Fifty-first Series, Due 2019, to exchange such bonds as aforesaid; and it is further

RESOLVED, that the Executive Director, Assistant Executive Director, Chief Financial Officer, Deputy Chief Financial Officer, Comptroller, Assistant Comptroller, Treasurer or Assistant Treasurer of the Authority is hereby authorized to enter into and execute an agreement on behalf of The Port Authority of New York and New Jersey with such Dealer/Manager providing, among other items, for compensation to E.F. Hutton & Company Inc., on the basis of \$3.75 for each \$1,000 in principal amount of Consolidated Bonds, Fifty-first Series accepted for exchange by the Committee on Finance and for expenses as may be incurred with the Authority's written approval, and to any dealer (including E.F. Hutton & Company Inc.) depositing bonds which are accepted for exchange by the Committee on Finance, an amount not to exceed \$10.00 for each \$1,000 in principal amount of such bonds so accepted for exchange by the Committee; and it is further

RESOLVED, that the Executive Director, Assistant Executive Director, Chief Financial Officer, Deputy Chief Financial Officer, Treasurer or Assistant Treasurer of the Authority, or any one of them, is hereby authorized to arrange for the preparation of such materials as may be necessary or desirable in connection with the request for offers from bondholders in the name and on behalf of The Port Authority of New York and New Jersey, describing the Authority's request for offers to exchange Consolidated Bonds, Fifty-first Series, Due 2019, for Consolidated Bonds, Series Fifty-one E, Due 2019, and the Authority and its financial condition, and making representations on behalf of the Authority; provided, however, that such materials shall not be issued on behalf of the Authority without the express consent of the Executive Director, Assistant Executive Director, Chief Financial Officer, Deputy Chief Financial Officer, Treasurer or Assistant Treasurer of the Authority, or any one of them. Subject to the foregoing, the Authority hereby approves the use of any such materials in

connection with the Dealer/Manager's solicitation of such offers from the holders of Consolidated Bonds, Fifty-first Series, Due 2019, to exchange bonds as aforesaid; and it is further

RESOLVED, that the form of such agreements and materials shall be subject to the approval of General Counsel or his authorized representative.

**Consolidated Bonds, Series Fifty-one E - Supplemental Coupon Exchange Program -
Consolidated Bonds, Fifty-first Series - Appointment of Exchange Agent**

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that The Chase Manhattan Bank, N.A., New York, New York, be and it hereby is designated and appointed as Exchange Agent for and in connection with request of the Authority to the holders of The Port Authority of New York and New Jersey, Consolidated Bonds, Fifty-first Series, Due 2019 for offers to exchange such bonds for The Port Authority of New York and New Jersey Consolidated Bonds, Series Fifty-one E, Due 2019; and it is further

RESOLVED, that the Executive Director, Assistant Executive Director, Chief Financial Officer, Deputy Chief Financial Officer, Treasurer or Assistant Treasurer of the Authority is hereby authorized to enter into and execute an agreement on behalf of the Authority with such Exchange Agent pursuant to which the Exchange Agent would act, and providing for compensation for such Exchange Agent not in excess of the standard rates generally prevailing in the market.

Whereupon, the meeting was adjourned.

 David Z. Plavin, Deputy Chief Financial Officer
 Joseph L. Vanacore, Assistant Executive Director/Capital Programs
 Barry Weintrob, Chief Financial Officer and Director, Finance Department
 Kristina E. Weisenstein, Administrative Assistant

The meeting was called to order by the Chairman.

The Secretary reported that the meeting was duly called in accordance with the By-Laws.

(Board - 2/25/87)

Holland Tunnel - Acquisition of Real Property - Service Roadways and Improvements of Operations and Maintenance Facilities

The need for improved facilities at the Holland Tunnel has increased with the passage of time and growing traffic demands. Newport City Development Company, with Jersey City support and exercising its power of eminent domain, has been able to obtain Federal grants to acquire almost all of the private property interests around the Holland Tunnel as part of its approximately 270 acre development.

The Port Authority has conducted extensive discussions with Newport City during the past three years concerning the Port Authority's need to acquire certain real property interests in the vicinity of the Holland Tunnel to provide for toll plaza expansion, a right-of-way for service roads and additional off-street facilities required for the operation and maintenance of the tunnel. With the potential of traffic generation and traffic interference as the neighboring Newport development progresses, the Port Authority's acquisition of these property interests is a key to any future development of a comprehensive plan to centralize and improve traffic management capabilities and maintenance in the Holland Tunnel.

While staff's discussions with Newport City Development Corporation are ongoing, staff has been unable to reach an agreement with them with regard to the Port Authority's property requirements. Further delay in resolving these property issues can only adversely impact the efficient operation of the tunnel and future development of centralized facilities to maximize traffic management capabilities.

By resolution adopted at its meeting on December 11, 1986, the Board authorized the Executive Director to acquire from Newport City Development Company, by voluntary acquisition or condemnation, those property interests required for the Holland Tunnel's New Jersey plaza redevelopment. Staff recommends that the Board grant similar authorization for the acquisition of property interests required for necessary service roadways and future facility improvements.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that it be and is hereby found and determined that it is necessary for public use for Holland Tunnel purposes to acquire fee title to the real property described generally on a Drawing Numbered HTP-33, dated February 25, 1987, more particularly described as follows:

PARCEL 3

BEGINNING at a point formed by the intersection of the northerly line of Thirteenth Street (60 feet wide) with the easterly line of Provost Street (60 feet wide) and running the following four (4) courses and distances:

1. Northerly along the easterly line of Provost St. 25.00 feet to the southwesterly corner of a parcel of land conveyed to the State of New Jersey by deed from The Morris and Essex Railroad Company et al., dated March 14, 1929 and recorded in the Office of the Hudson County Register on April 8, 1929 in Deed Book 1711 at page 68; thence
2. Easterly along the southerly line of said parcel of land of The State of New Jersey 100.00 feet to a point in the westerly line of lands conveyed to the Port of New York Authority by deed from Raymond J. Otis, as Trustee in Bankruptcy of American Packing Corporation, dated January 20, 1954 and recorded in the Office of the Hudson County Register on January 29, 1954 in Deed Book 2577 at page 542; thence
3. Southerly along said westerly line of said lands of The Port of New York Authority 25.00 feet to a point in the northerly line of Thirteenth Street; thence
4. Westerly along the northerly line of Thirteenth Street 100.00 feet to the point and place of beginning.

BEING shown and designated as Lot 17 in Block 155 on the Tax Assessment Map of the City of Jersey City.

PARCEL 4

BEGINNING at a point formed by the intersection of the southerly line of Thirteenth Street (60 feet wide) with the easterly line of Provost Street (81 feet wide) and running the following four (4) courses and distances:

1. Easterly along the southerly line of Thirteenth Street 409.00 feet to a point; thence
2. Southerly parallel with the easterly line of Provost Street 192.00 feet to a point in the easterly prolongation of the northerly line of an 8-foot wide strip of land heretofore acquired on January 17, 1925 by the New Jersey Interstate Bridge and Tunnel Commission in condemnation proceedings instituted against Jarvis Realty Company, Inc. et al., in the New Jersey Supreme Court, Docket 4, Page 701; thence
3. Westerly parallel with the southerly line of Thirteenth Street and along said northerly line and its easterly prolongation 409.00 feet to a point in the easterly line of Provost Street; thence
4. Northerly along the easterly line of Provost Street 192.00 feet to the point and place of beginning.

BEING shown and designated as Lot A2 in Block 154 on the Tax Assessment Map of the City of Jersey City.

PARCEL 5

BEGINNING at a point which is the northwesterly corner of a parcel of land conveyed to the State of New Jersey by deed from The Morris and Essex Railroad Company dated July 1, 1922 and recorded in the Office of the Hudson County Register on February 26, 1923 in Deed Book 1465 at page 542, said point being further described as being the intersection of the first and second courses of said parcel of land and running the following nine (9) courses and distances:

1. Southeasterly, along the northerly line of said parcel of lands of the State of New Jersey, which line makes an interior angle of $103^{\circ}-24'-36''$ with the course numbered nine (9) hereinafter described in this description, 100.09 feet to a point; thence
2. Southeasterly, still along the northerly line of said lands of the State of New Jersey, which line makes an interior angle of $186^{\circ}-17'-51''$ with the preceding course, 83.54 feet to a point; thence
3. Northwesterly, along a line which makes an interior angle of $48^{\circ}-40'-26''$ with the preceding course, 301.27 feet to a point formed by the intersection of the third and fourth courses of a certain permanent subsurface easement designated Parcel No. 5 in a deed to the State of New Jersey from the Morris and Essex Railroad Company, dated January 6, 1926 and recorded in the Office of the Hudson County Register on March 29, 1926 in Deed Book 1604 at page 36; thence
4. Northwesterly, along a line which makes an interior angle of $152^{\circ}-55'-57''$ with the preceding course, 324.15 feet to a point formed by the intersection of the eleventh and twelfth courses of a certain parcel of land designated as Parcel 2 in a deed to The Port of New York Authority from the Erie-Lackawanna Railroad Company, dated September 8, 1964 and recorded in the Office of the Hudson County Register on September 23, 1964 in Deed Book 2957 at page 615; thence the following four (4) courses and distances along the northeasterly line of said Parcel 2
5. Southeasterly, along the arc of a circle concave to the northeast, having a radius of 992.66 feet, a central angle of $4^{\circ}-48'-06''$ and an arc length of 83.19 feet, the chord to said curve making an interior angle of $12^{\circ}-16'-$

(Board - 2/25/87)

26" with the preceding course, a distance of 83.17 feet to a point; thence

6. Southeasterly, along the arc of a circle concave to the northeast, having a radius of 1319.42 feet, a central angle of $3^{\circ}-36'-40''$ and an arc length of 83.16 feet, the chord to said curve making an interior angle of $176^{\circ}-13'-47''$ with the chord of the preceding course numbered five (5), a distance of 83.14 feet to a point; thence

7. Southeasterly, along a line which makes an interior angle of $177^{\circ}-06'-48''$ with the chord of the preceding course numbered six (6) a distance of 33.15 feet to a point; thence

8. Southeasterly, along a line which makes an interior angle of $177^{\circ}-18'-49''$ with the preceding course, 73.71 feet to a point; thence

9. Southerly, along the easterly side of the aforesaid Parcel 2 and its southerly prolongation, which line makes an interior angle of $225^{\circ}-45'-19''$ with the preceding course 236.59 feet to the point and place of beginning.

BEING shown and designated as Part of Lot All in Block 19 on the Tax Assessment Map of the City of Jersey City;

and it is further

RESOLVED, that the Executive Director, be and he is hereby authorized to acquire said property interests by voluntary acquisition, subject to the approval of the Committee on Construction as to the negotiated consideration, or by condemnation pursuant to Chapter 47 of the Laws of New York, 1931, and Chapter 4 of the Laws of New Jersey, 1931; and it is further

(Board - 2/25/87)

RESOLVED, that any condemnation action hereby authorized and all steps pertaining thereto shall be conducted under the supervision and direction of General Counsel, and he shall be and is hereby empowered to take all necessary steps for and incur all expenses necessary or incidental to the conduct of such proceedings.

Whereupon, the meeting was adjourned.

 Joseph L. Vanacore, Assistant Executive Director/Capital Programs
 Kristina E. Weisenstein, Administrative Assistant

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of February 12, 1987. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on March 12, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on March 12, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on March 12, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on March 12, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 3/12/87)

1987 Budget - January 1 through April 30, 1987

The Board, at its meeting on December 11, 1986, acted to confirm the authority of the Executive Director to continue to make payments for expenses and to undertake contractual commitments through March 31, 1987, in accordance with the By-Laws, for continuing operations and professional services, all as contemplated in the proposed 1987 Budget presented to the Commissioners on October 29, 1986. The Board also acted to authorize the Executive Director to implement the annual salary range adjustment, including minor revisions in benefit programs; to approve and authorize the appropriation for the purpose of capital expenditures to be made in 1987 of funds paid into and available in the Consolidated Bond Reserve Fund; and to continue the Port Authority's practice of annually setting aside amounts towards covering self-insured contingent losses.

The Board took these actions when it became apparent that review of the 1987 Budget would not be complete before the December 1986 meeting, a situation which continues until now. It is therefore appropriate to confirm the authority of the Executive Director to continue to make payments for expenses and to undertake contractual commitments, in accordance with the By-Laws, for continuing operations and professional services, all as contemplated in the proposed 1987 Budget presented to the Commissioners on October 29, 1986. It is expected that such payments will not exceed \$200 million per month through April 30, 1987.

The 1987 Budget is a financial planning tool which outlines the estimated expenditures for programs already authorized or to be considered by the Commissioners.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that it is hereby confirmed that the Executive Director is authorized through April 30, 1987, to make expenditures at a rate not to exceed \$200 million per month, including but not limited to personnel, materials, utilities, cleaning services and insurance, and to undertake contractual commitments, in accordance with the By-Laws, all as contemplated in the proposed 1987 Budget for The Port Authority of New York and New Jersey (including the anticipated expenditures of subsidiary corporations) presented to the Commissioners on October 29, 1986.

(Board - 3/12/87)

Bathgate Industrial Park - Lease Amendment to Lease Agreement with Protocom Devices, Inc.

It was recommended that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into an agreement amending its lease with Protocom Devices, Inc. for its premises at the Bathgate Industrial Park substantially in accordance with the following terms and conditions. The Port Authority will provide up to \$1 million to Protocom. These funds would be provided in an amount not to exceed 20% of the total order amount of executed contracts between Protocom and its customers. The Port Authority will reserve the right to provide funds at its discretion but funds will not be provided against contracts that are less than \$500,000. The funds provided to Protocom will be secured by the contract payments due over the term of the contract. The monies provided by the Port Authority will be repaid as additional rental over varying terms depending upon the payment term of the specific contracts. Monies so provided will be repaid at the Citibank prime rate (as adjusted monthly) plus 200 basis points. Protocom is in a highly competitive business and it is anticipated that these funds will provide Protocom with the resources to compete for additional business and create more jobs for residents of the region and the South Bronx.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize the Executive Director, on behalf of the Port Authority, to enter into the amendment to the lease agreement with Protocom Devices, Inc. described above; the form of the lease amendment to be subject to the approval of General Counsel or his designated representative.

(Board - 3/12/87)

The World Trade Center - Contract WTC-115.221 - Asbestos Abatement - Tenth and Eleventh Floors - One World Trade Center - Authorization to Award

In line with the Port Authority's overall Asbestos Abatement Program, Contract WTC-115.221 is the first in a series of contracts for removal of asbestos from 30 floors of the first zone of One World Trade Center in accordance with present EPA and OSHA standards.

This contract provides for the demolition of the entire tenth and eleventh floors, removal of all asbestos-fireproofing materials and the furnishing and application of new non-asbestos spray-on fireproofing, all at One World Trade Center. In addition based on the contractor's performance, staff may negotiate to increase the contractor's scope of work to include the removal of asbestos from up to four additional floors at the World Trade Center.

Proposals were solicited on Contract WTC-115.221 from ten pre-qualified contractors and the following proposals were received:

Strategic Organizational Systems Environmental Engineering Division, Inc. San Francisco, California with offices in New York	\$1,717,390
Benjamin Kurzban & Son Control, Inc. Brooklyn, New York	1,972,600
Hesco Environmental Safety Company Secaucus, New Jersey	2,577,000
HRF Surface Cleaning South Hackensack, New Jersey	2,750,000
National Surface Cleaning, Inc., New York, New York	2,783,000
National Environmental Engineering Michigan City, Indiana	3,778,000

In addition, another proposal was received from Brand Asbestos Control Company, Inc. which was deemed non-responsive.

Strategic Organizational Systems Environmental Engineering Division, Inc. submitted the lowest proposal and the Director of World Trade and Economic Development has determined that Strategic Organizational Systems Environmental Engineering Division, Inc., is qualified to perform the work.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract WTC-115.221, Asbestos Abatement, Tenth and Eleventh Floors, One World Trade Center to Strategic Organizational Systems Environmental Engineering Division, Inc., at its proposal price of \$1,717,390 and to order extra work up to the amount of \$345,000; and it is further

(Board - 3/12/87)

RESOLVED, that the Executive Director is authorized to negotiate with the contractor on Contract WTC-115.221 and enter into either a supplemental agreement to the contract which increases the scope of work to include the removal of asbestos from up to four additional floors at the World Trade Center, or a new contract for the removal of asbestos from up to four additional floors at the World Trade Center; and it is further

RESOLVED, that the foregoing supplemental agreement or new contract is subject to the approval of General Counsel or his authorized representative.

(Board - 3/12/87)

The World Trade Institute - Various Authorizations in Connection with the 1987 Activities

As the educational arm of the World Trade Center, the World Trade Institute has become a leading purveyor of training and information on international business for the world trade community. Through its approximately 600 seminars, courses and various training and technical assistance programs, the Institute served about 7,500 people in 1986.

The Institute relies on a cadre of outside speakers, chairpersons and contract personnel to provide the technical assistance necessary to present its programs on international taxation, finance, law, marketing, physical distribution and other subject. In 1986 the Institute used approximately 225 individuals for these services at an expenditure of just over \$400,000.

The majority of the outside specialists for Institute programs receive no fees and are reimbursed only for expenses. However, the Institute enters into a limited number of contracts that call for fee payments over \$10,000 per year (see attached).

The participation of all these outside specialists, projected at \$425,000 in 1987, is critical to the successful operation of the Institute, to ensure its high reputation with the business community, as well as to the production of Institute revenues in excess of \$3.5 million from this activity.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into agreements with outside speakers, chairpersons, and other technical specialists for the purpose of presenting World Trade Institute seminars at an estimated cost for 1987 of approximately \$425,000, the form of the agreements to be subject to the approval of General Counsel or his authorized representative.

(Board - 3/12/87)

Investment Management Agreement with Payden and Rygel

It was reported to the Board that investment of the Authority's operating, capital and reserve monies is currently handled on the basis of individual transactions executed by the Treasurer and Assistant Treasurer assisted by appropriate staff. In order to improve assessment of internal investment performance by providing comparative measures, staff has been investigating the possibility of having an outside investment management firm make investment decisions within appropriate parameters with respect to a portion of these monies.

This would be accomplished by providing for the firm of Payden and Rygel to actively manage up to \$50 million in cash or equivalent securities of funds held in the Consolidated Bond Reserve Fund for a six-month period (with an option for the Authority to extend the agreement for an additional six months) and for an equivalent amount to be managed by Treasury staff using the same investment parameters. These investment parameters would be consistent with the Authority's agreements with the holders of Consolidated Bonds and the Authority's existing investment policies.

All securities purchased by Payden and Rygel would be held in the depository currently designated by and in the name of The Port Authority of New York and New Jersey for the custody of securities purchased by the Authority.

Payden and Rygel's fee for the six-month term of the agreement would be at the annual rate of one-tenth of one percent of the weighted daily value of the amount under investment, calculated monthly. This amount would approximate \$25,000. If the Authority exercises its option to extend the agreement for an additional six months, the firm would receive for that six-month period its standard fee, which is at an annual rate of two-tenths of one percent of the weighted daily value of the amount under investment.

Payden and Rygel was established in August 1983 as an investment counseling firm, incorporated in March 1984, and is located in Los Angeles, California. Joan Payden and Sandra Rygel, the principals of the firm, previously had 38 years combined experience in investment management with the firm of Scudder, Stevens & Clark. With a staff of twenty, the firm currently manages \$4 billion in assets. The firm has been certified by the Port Authority's Office of Minority Business Development as a women's business enterprise.

It was therefore recommended that the Board authorize the Executive Director to enter into an agreement with the firm of Payden and Rygel to actively manage up to \$50 million in cash or equivalent securities of funds held in the Consolidated Bond Reserve Fund for a six-month period (with an option for the Authority to extend the agreement for an additional six months) at fees as described in this report.

(Board - 3/12/87)

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to enter into an agreement with the firm of Payden and Rygel to actively manage up to \$50 million in cash or equivalent securities of funds held in the Consolidated Bond Reserve Fund for a six-month period with an option for the Authority to extend the agreement for an additional six months, Payden and Rygel's fee for the first six-month period to be at the annual rate of one-tenth of one percent of the weighted daily value of the amount under investment, calculated monthly, and for the second six-month period to be at the annual rate of two-tenths of one percent of the weighted daily value of the amount under investment, calculated monthly; and it is further

RESOLVED, that the form of the agreement shall be subject to the approval of General Counsel or his authorized representative.

(Board - 3/12/87)

Retention of Financial Management Advisor

It was recommended that the Board authorize the Executive Director to enter into an agreement with Mr. Edward M. Kresky, a recognized expert in municipal finance, effective February 1, 1987, to act as an advisor to the Port Authority with respect to organization and financial management activities for a period not to exceed eighteen months, at a cost not to exceed \$30,000, including out-of-pocket expenses. Mr. Kresky has previously served as a financial advisor to the Port Authority. Mr. Kresky would continue to advise on matters relating to the Port Authority's capital plan, organizational structure and the utilization of innovative financing techniques.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized to enter into an agreement with Mr. Edward M. Kresky, effective February 1, 1987, to provide for him to act as an advisor to the Port Authority on organization and financial matters for a period not to exceed eighteen months at a cost not to exceed \$30,000, including out-of-pocket expenses; and it is further

RESOLVED, that the form of the agreement be subject to approval of General Counsel or his authorized representative.

(Board - 3/12/87)

La Guardia Airport - Tele-Trip Company, Inc. - Business Service Center

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into a permit with Tele-Trip Company, Inc. covering the operation of a Business Service Center at LaGuardia Airport substantially in accordance with the following terms and conditions. The permit would be for a one-year period with Tele-Trip paying varying percentage fees on its gross receipts averaging 10%. Tele-Trip would amortize its estimated \$90,000 capital investment to establish the Center over a five-year period with the Port Authority to reimburse Tele-Trip for its unamortized capital investment up to a maximum amount of \$72,000 in the event the Port Authority does not renew the permit after the first or any subsequent year or if the permit is revoked by the Port Authority without cause.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into a permit with Tele-Trip Company, Inc. at LaGuardia Airport on the above terms and conditions; the form of the permit to be subject to the approval of General Counsel or his designated representative.

(Board - 3/12/87)

La Guardia Airport - East End Roadway Modifications - Phase II - Contract LGA-110.055 - Award and Increase in Project Authorization

It was reported that at its meeting on June 10, 1982, the Board authorized a two-phase project for the realignment of the east end roadways at LaGuardia Airport at a total estimated project cost of \$20,924,200. Phase I was completed in November 1984. The start of Phase II of the project was delayed to allow for the design of a third terminal at the east end. The construction of a third terminal was not contemplated at the time of the original authorization and was necessitated by a projection of increased passenger demand by the year 2000. Consequently, the east end roadway complex had to be extensively redesigned to accommodate the increased traffic. Phase II roadway construction is scheduled to commence April 1987 and to be completed May 1989.

Contract LGA-110.055 provides for the construction of a new roadway complex east of the Central Terminal Area to improve traffic flow at LaGuardia Airport. Construction of parking lots, entrance and exit toll booths, facilities for taxis and the installation of new signage are included in Contract LGA-110.055.

Maintenance of the new signage is to be performed pursuant to a separate agreement, Contract LGA-110.055A, by the manufacturer. The duration of the maintenance agreement is five years and includes a price escalation clause.

The construction contract includes a provision for the excavation of unsuitable material and backfill to be done on a net cost basis presently estimated at roughly \$10,000. Contract LGA-110.055 requires a good faith effort for Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

A portion of the construction contract is eligible for Federal funds under the Airport Improvement Program.

The contract was publicly advertised and the following bids were received on February 24, 1987:

	Construction Contract - Lump Sum	Maintenance Agreement - Total Price	Combined Bid Amount
Grace Contracting Corp. Whitestone, New York	\$11,742,000	\$158,408	\$11,900,408
Edenwald Contracting Co., Inc. Whitestone, New York	12,383,000	159,138	12,542,138
Willetts Point Contracting Corp. Flushing, New York	12,476,000	158,408	12,634,408

(Board - 3/12/87)

Grace Contracting Corp. submitted the lowest combined bid for the construction contract and maintenance agreement and the Chief Engineer has determined that they are qualified to perform the contract.

The following resolution was unanimously adopted:

RESOLVED, that an increase in the estimated total project cost is authorized for the project for the realignment of the east end roadway complex at LaGuardia Airport from \$20,924,000 to \$23,024,000, including payments to contractors, extra work, and engineering, administrative and financial expenses; and it is further

RESOLVED, that the Board authorize the Executive Director to award Contract LGA-110.055, LaGuardia Airport, East End Roadway Modifications, Phase II, a construction contract, and LGA-110,055A, Agreement to Perform Maintenance of the LaGuardia Airport Variable Message Sign System, a maintenance contract, to Grace Contracting Corp., the bidder submitting the lowest combined bid, in the amount of \$11,742,000 for the construction and in the amount of \$158,408 for the maintenance and to order extra work up to the amount of \$1,174,200 under the construction contract and \$30,000 for the maintenance contract, and to order net cost work under the construction contract and to provide for escalation under the maintenance contract.

(Board - 3/12/87)

La Guardia Airport - Butler Aviation-LaGuardia, Inc. - Revised Authorization to Amend Fixed Base Operator Agreement

It was recommended that the Board amend its resolution of October 16, 1986 to authorize an additional total of \$110,000 in monthly credits to Butler Aviation-LaGuardia, Inc. for Butler's increased cost of operating a transportation service for general aviation customers from the Marine Air Terminal to Butler's remote aircraft parking areas at LaGuardia Airport, such credits to be applicable from August 20, 1986 through February 28, 1987.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the resolution of the Board of Commissioners adopted at its meeting on October 16, 1986 authorizing monthly credits to Butler Aviation-LaGuardia, Inc. at LaGuardia Airport is hereby amended in accordance with the foregoing.

(Board - 3/12/87)

La Guardia Airport - Pan Am Shuttle, Inc. - Revised Authorization to Enter into Passenger Terminal Airport Lease

It was recommended that the Board amend its resolution of August 14, 1986 authorizing the Executive Director, for and on behalf of the Port Authority, to enter into a specified Passenger Terminal Airport lease at LaGuardia Airport. As amended, the Executive Director would be authorized to enter into a lease with Pan Am Shuttle, Inc. and to make payments to Pan Am of up to \$15 million for its construction of the Passenger Terminal Facility with Pan Am paying a monthly facility rental based upon a factor of .01136597 for each dollar so paid by the Port Authority; the amount to be reimbursed to Pan Am for its unamortized investment cost in excess of Port Authority payments would be adjusted to an amount not to exceed \$6 million to be paid only if the Port Authority terminates or refuses to extend the term of the lease without cause; there would be a decrease of approximately \$4,800 per month in rental and \$2,250 per month in rental credit; and there would be an increase to an amount not to exceed \$2.3 million to reimburse Pan Am for its actual construction cost of the common taxiway.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the resolution of the Board of Commissioners adopted at its meeting on August 14, 1986 authorizing the Executive Director to enter into a Passenger Terminal Airport lease with Pan Am Shuttle, Inc. at LaGuardia Airport is hereby amended in accordance with the foregoing.

(Board - 3/12/87)

**Kennedy International Airport - International Arrivals Building Interim Improvement Program -
Authorization to Award Supplemental Agreement No. 3 to Contract JFK-110.060A
International Arrivals Lobby Escalator Contracts**

On January 9, 1986 the Board authorized a project for an interline baggage conveyor system at the International Arrivals Building (IAB) at Kennedy International Airport at an expenditure not to exceed \$7 million. On April 10, 1986 the Board authorized an amendment to the interline baggage conveyor system project to include other elements of a program of interim improvements to the IAB with total expenditures not to exceed \$24 million. Also, the Board authorized the award of Contract JFK-110.060A for building alternations in connection with the installation of the conveyor system and Supplemental Agreement No. 1 thereto for the rehabilitation and reconfiguration of the West Immigration and Naturalization areas to W.J. Barney Corporation, in amounts not to exceed \$3 million and \$3.4 million respectively. On August 14, 1986 the Board authorized Supplemental Agreement No. 2 with W.J. Barney Corporation for construction of certain retail sales space at the IAB at a cost not to exceed \$275,000.

The Interim Improvement Program for the IAB is intended to provide a measure of relief to the overburdened facility, particularly as related to the arrivals function. Within a few short months from authorization of the program, substantial beneficial results were evidenced in that interline passengers were served in their own exclusive area, congestion due to conflicting baggage movement was virtually eliminated in the Customs Hall, and many new amenities were in operation, including upgraded Customs counters and a baggage sorting area. Additionally, work on the West Immigration and Naturalization area is progressing toward full functional use by spring 1987.

The bulk of the alteration work has been performed under Contract JFK-110.060A and subsequent supplemental agreements by the W.J. Barney Corporation on a net cost basis. In order to assure beneficial use of the upgraded areas at the earliest time, portions of the field work must progress while design is being finalized. W.J. Barney has demonstrated that it has the resources, management skills and technical competence to meet the tight time constraints in a cost-effective manner. It is believed that by authorizing the continuation of their services for a significant portion of the remaining work under the program, the interests of the public and the Port Authority will be best served. Utilization of W.J. Barney Corporation will minimize additional mobilization cost, take advantage of Barney's familiarity with the work site and operational constraints, and avoid coordination problems.

The proposed work under Supplemental Agreement No. 3 falls within the scope of the program for interim improvements at the IAB authorized by the Board, and includes:

- Reconfiguration and reconstruction of East Immigration and Naturalization area
- Rehabilitation of IAB Lobby area
- Third floor corridor improvements
- Other associated alterations at the IAB
- At the option of the Port Authority, furnishing and installing of escalators for lobby area and associated alterations; however, this work may be performed under a separate bid contract.

(Board - 3/12/87)

All expenditures for work under Supplemental Agreement No. 3 to Contract JFK-110.060A would not exceed \$8 million. A portion of the work will be performed at night in order to minimize interfering with ongoing operations.

Under Contract JFK-110.060A and Supplemental Agreements Nos. 1 and 2, compensation is computed at the net cost of the work, plus 3.75%, plus an additional 20% if the work is performed by a subcontractor, and Contract JFK-110.060A requires that the contractor use every good faith effort to meet a goal of Minority Business Enterprise participation of 20% for firms owned and controlled by minorities and 2% for firms owned and controlled by women. These provisions will be incorporated into Supplemental Agreement No. 3.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized: (1) to negotiate and enter into Supplemental Agreement No. 3 with W.J. Barney Corporation under Contract JFK-110.060A, International Arrivals Building, Interline Baggage Conveyor System, Miscellaneous Building Alterations, at a total expenditure not to exceed \$8 million, the work to include the reconfiguration and reconstruction of the East Immigration and Naturalization area, the rehabilitation of the IAB lobby area, third floor corridor improvements, other associated alterations to facilities at the IAB and at the option of the Port Authority, furnishing and installing of escalators for lobby area and associated alterations; and (2) in the event the escalator work is not ordered under Supplemental Agreement No. 3, to either authorize the award of: (a) a contract for the furnishing and installation of escalators for the IAB lobby; and (b) a contract for five years of maintenance of the escalators, to the contractor who (after solicitation of bids from a list of qualified contractors approved by the Chief Engineer) submits the lowest combined bid on both contracts, who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the contracts and whose bid price the Executive Director deems reasonable, and to order extra work up to 10% of the price for furnishing and installation of escalators and to order extra work up to 10% of the price for five years of maintenance and to provide for escalation of the price for maintenance; or to reject all bids; and it is further

RESOLVED, that the form of the Supplemental Agreement and contracts be subject to the approval of General Counsel or his authorized representative.

(Board - 3/12/87)

Kennedy International Airport - General Cleaning - Emergency Contract

It was recommended that the Board authorize the Executive Director to release Hispanic Maintenance Service, Inc. from its obligations to perform general cleaning services in the International Arrivals Building and other buildings at Kennedy International Airport under Port Authority Contract PSE-438 and to extend an emergency contract that he previously awarded covering such services to Triple A Maintenance, Inc., Secaucus, New Jersey, the lowest bidder, in response to the Port Authority's non-public solicitation of bids, at their bid price of \$3,509,870 on an annual basis for an initial term of six months with Port Authority options to further extend the contract thereafter on a monthly basis for a period not to exceed six months at no increase in contract price; and authorize the Director of Aviation to further extend the emergency contract in accordance with its terms and to order extra work thereunder in an amount equivalent to approximately 10% of the estimated total contract price.

The current contractor, Hispanic Maintenance Service, Inc. was awarded a two-year contract at its low bid price of \$5,257,978. Hispanic has advised that due to unanticipated increases in the costs of supervision, salaries and supplies, along with unprecedented increases in liability insurance rates, they would be unable to continue performing under the contract and that continued operation would result in bankruptcy. Staff has reviewed Hispanic's records and has concluded that they support their claims of financial distress. Rather than risk the business failure of this minority contractor, staff has agreed to release Hispanic from its obligations.

Whereupon, the following resolution was unanimously adopted.

RESOLVED, that the Executive Director is hereby authorized to release Hispanic Maintenance Service, Inc. from its obligations to perform cleaning services under Contract PSE-438 and is further authorized to extend for six months an emergency contract previously awarded to provide general cleaning services in the International Arrivals Building and other buildings at Kennedy International Airport to Triple A Maintenance, Inc. the form of the agreement to be subject in each instance to the approval of the General Counsel or his designated representative; and it is further

RESOLVED, that the Director of Aviation is hereby authorized to further extend the emergency contract for a period not to exceed six months on the same terms and to order extra work thereunder in an amount equivalent to approximately 10% of the estimated total contract price.

(Board - 3/12/87)

George Washington Bridge - Fort Lee Traffic Intersection Improvements

The 1985 "George Washington Bridge - Borough of Fort Lee Traffic Study" funded by the Port Authority and conducted by the URS Company, Inc., highlighted the importance of Lemoine Avenue for traffic flow to the George Washington Bridge. The New Jersey Department of Transportation (NJDEP) has been advancing a highway improvement program on Routes 5, 9W and 67, in the Borough of Fort Lee, involving modifications at nine street intersections. Since Lemoine Avenue is a major access route to the George Washington Bridge, the work at six of its intersections and particularly at Bridge Plaza South and Bridge Plaza North will facilitate traffic flow to the Upper Level plaza.

The New Jersey Governor's office has requested that the Port Authority provide an amount not to exceed \$2.03 million for six intersection improvements on Lemoine Avenue, in the vicinity of the George Washington Bridge, from funds made available for projects in the State of New Jersey pursuant to the Governors' Bi-State Agreement of 1983. NJDOT will be responsible for obtaining any additional funds for the six intersections and for funding the three remaining intersections.

Upon approval of this item by the Board, the contract will be advertised for bids by the NJDOT. The improvements at the nine intersections are expected to be completed by November 1990.

NJDOT's overall program involves cutback of curbs and widening of portions of Lemoine Avenue and Central Boulevard and the intersecting streets, as well as the installation of new traffic control signals and signs and repairs to the Lemoine Avenue bridge structures spanning the New Jersey approaches to the George Washington Bridge. The \$2.03 million includes an allowance of 10% of the construction cost for testing and engineering supervision of the construction. NJDOT will be responsible for all operations and maintenance at the intersections. All work which will impact on George Washington Bridge traffic will be performed during off-peak hours.

The work at the intersection of Bridge Place South and Lemoine Avenue will involve two parcels of property owned by the Port Authority. At its meeting on March 10, 1983, the Board found and determined that these two parcels, which total approximately 1,900 square feet, as shown on Maps GWBP-S54-NJ and GWBP-S56-NJ, are no longer required for operations at the George Washington Bridge and declared them surplus. Since the State of New Jersey at that time asked the Port Authority to sell to the State all or a portion of both parcels upon completion of a definitive engineering study of the intersection improvement, the Board authorized the Executive Director to negotiate a sale of all or portions of the two parcels. Since staff estimates the appraised value of the two parcels would not exceed \$30,000 and because the proposed improvement would facilitate traffic flow on the approaches to the George Washington Bridge, staff recommends that fee title to these two parcels be conveyed to the State for highway purposes for a nominal consideration.

(Board - 3/12/87)

Funds made available for projects in the State of New Jersey pursuant to the Governors' Bi-State Agreement of 1983 were initially \$137.5 million. As of November 1986, the Board has authorized \$89.4 million for regional infrastructure and transportation projects. With up to \$750,000 anticipated to be authorized by the Board for a study in connection with the Hudson Walkway project, up to \$2.03 million for the Fort Lee traffic intersection improvements, and \$10 million for planning studies for the Kearny Connection, Reverse Kearny Connection and Penn Station-Newark improvements, \$35.32 million remains available for other projects in the State of New Jersey.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to: (1) enter into an agreement with the New Jersey Department of Transportation (NJDOT) providing for the reconstruction of six intersections on Route 67, Lemoine Avenue, in the Borough of Fort Lee, New Jersey; (2) provide to NJDOT from funds made available for projects in the State of New Jersey pursuant to the Governors' Bi-State Agreement of 1983 an amount not to exceed \$2.03 million for the work described above, including the costs for testing and engineering supervision of the construction; and (3) convey fee title to two parcels of Port Authority surplus property at the intersection of Bridge Plaza South and Lemoine Avenue, as shown on Maps GWBP-S54-NJ and GWBP-S56-NJ, to the State of New Jersey for highway purposes for a nominal consideration; and it is further

RESOLVED, that all documents required to consummate the aforesaid transactions be subject to the approval of General Counsel or his authorized representative.

(Board - 3/12/87)

George Washington Bridge - Rehabilitation of Expansion Joints - Contract GWB-110.088 - Project Authorization and Contract Awards

Contract GWB-110.088, George Washington Bridge, Rehabilitation of Expansion Joints, provides for the rehabilitation of the expansion joints of the upper level main span of the George Washington Bridge, including replacement of the existing welded-design finger joint gratings with new flame cut finger joint gratings and replacement of deteriorated seat angles which support the gratings, which is required because of the general deterioration of the existing expansion joints.

Bids were solicited from five contractors known to have the required qualifications to perform Contract GWB-110.088, and on February 24, 1987 the following bids were received:

	Estimated Total Amount
USX Corporation Iselin, New Jersey	\$3,383,300
Karl Koch Erecting Co., Inc. Carteret, New Jersey	3,680,000
Industrial Engineering Works Trenton, New Jersey	6,118,000

The Chief Engineer has determined that USX Corporation is qualified to perform the work.

The following resolution was unanimously adopted:

RESOLVED, that a project at the George Washington Bridge for the rehabilitation of the upper level main span expansion joints at an expenditure presently estimated at \$7,046,000 including payments to contractors, an allowance for extra work, and engineering, administrative and financing expenses is authorized; and it is further

RESOLVED, that the Executive Director is authorized to award Contract GWB-110.088, George Washington Bridge, Rehabilitation of Expansion Joints, to USX Corporation, at its bid price in the estimated amount of \$3,383,300 and to order extra work up to the amount of \$339,000.

(Board - 3/12/87)

Elizabeth-Port Authority Marine Terminal - Berths 52, 54, 56 and 58 - Rehabilitation - Contract EP-110.041 - Award

Contract EP-110.041 requires the contractor to repair and replace broken and missing piles, make timber and concrete repairs to the wharf structure and replace the fender system, at Berths 52, 54, 56 and 58 at the Elizabeth-Port Authority Marine Terminal. In addition, the contract provides for the replacement of missing or damaged bar reinforcement, including drilling and grouting, to be performed on a net cost basis presently estimated at roughly \$5,000.

The contract was publicly advertised and on January 8, 1987 the following bids were received:

	Classified Work	Unclassified Work	Estimated Total Amount
Marine Services Co. Newark, New Jersey	\$ 331,000	\$540,000	\$ 871,000
Linde-Griffith Construction Co. Newark, New Jersey	556,295	368,704	924,999
Simpson & Brown, Inc. Cranford, New Jersey	808,050	275,000	1,083,050
Gates Construction Corporation Little Ferry, New Jersey	623,450	515,550	1,139,000
J.E. Brenneman Company Philadelphia, Pennsylvania	881,575	405,000	1,286,575
Pressure Concrete & Grouting Co., Inc. South Orange, New Jersey	896,925	509,515	1,406,440
Atlantic Sea-Con, Ltd. Gloucester, Massachusetts	1,040,499	408,501	1,449,000
Spearin, Preston & Burrows, Inc. New York, New York	730,840	894,880	1,625,720

The Chief Engineer found the low bidder, Marine Services Co., not qualified to perform the work and recommends that Contract EP-110.041 be awarded to Linde-Griffith Construction Co., the second lowest bidder, which the Chief Engineer finds qualified to perform such contract.

(Board - 3/12/87)

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract EP-110,041 to Linde-Griffith Construction Co. in the estimated total amount of \$924,999 and to order extra work up to the amount of \$95,000.

(Board - 3/12/87)

Purchase of On-Line Inventory Management System and Associated Hardware

Since the initial implementation of the batch inventory control system in 1969, changing organizational requirements have necessitated numerous modifications to the original software. As a result, there has been a deterioration of both the reliability and timeliness of the information provided, resulting in unacceptable levels of stockouts throughout the system. An extensive review of the Port Authority's inventory management requirements indicated that an efficient on-line computerized inventory management system would increase productivity.

A Request for Proposal (RFP) for an on-line inventory management software system was prepared and publicly advertised, and six proposals were received. Only two of the proposals, by American Software, Inc. (ASI) and Tres Systems, Inc., were identified as meeting the RFP requirements. The other four proposals were deemed non-responsive. After extensive review of the ASI and Tres proposals, an interdepartmental evaluation committee unanimously recommended the proposal submitted by ASI as offering the best value based upon the evaluation criteria and staff subsequently entered into contract negotiations.

In addition, a contract was negotiated with ITT Courier for the purchase of computer terminals, associated hardware, and maintenance of the equipment for a period of one year.

ASI will provide services necessary to convert existing data to a format compatible with the new system, extensive system testing, thorough training for the users, and project management support through completion of the implementation of the system. In addition, ASI will provide maintenance of the system for five years including new releases, correction of any software problem that arises, and a 24-hour hotline for problem analysis in response to Port Authority inquiries. The contract with ASI will provide for installation and implementation of the software system over a period of ten months at a total estimated expenditure of \$632,000 and for maintenance of software for a period of five years at an estimated expenditure of \$110,000.

ITT Courier will provide computer terminal hardware, related equipment, and maintenance for a one-year period at a total estimated expenditure of \$120,000.

The more efficient management of stockroom inventories achieved through the use of the ASI system will:

(a) Recapture time lost on the job (estimated \$96,000) when facility maintenance personnel cannot obtain necessary materials from their on-site stockroom and leave the facility to purchase the material from local vendors;

(b) avoid the premium incurred on local purchases in (a) above (estimated \$105,000):
and

(c) reduce annual inventory carrying costs (estimated \$112,000).

(Board - 3/12/87)

In sum, these three items result in a first year savings estimated at \$313,000, which will escalate each year. The operating savings associated with these improvements will pay off the cost of the on-line inventory management software system in approximately 3½ years.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to: (a) enter into a contract with American Software Inc., (ASI) of Atlanta, Georgia, to install and implement over a period of ten months an on-line inventory management software system at a total estimated expenditure of \$632,000, and to maintain the software for a period of five years at an estimated expenditure of \$110,000; and (b) enter into a contract with ITT Courier Terminal Systems, Division of ITT Systems, Inc., of New York, New York, for the purchase and maintenance for one year of computer terminal hardware and related equipment to be used in connection with the computerized inventory management software system at a total estimated expenditure of \$120,000; and it is further

RESOLVED, that the Director, General Services, is authorized to order extra work under the ASI contract up to the amount of \$74,000; and it is further

RESOLVED, that the form of the contracts be subject to the approval of General Counsel or his authorized representative.

(Board - 3/12/87)

Hudson River Walkway - Exchange Place to Liberty State Park

The Hudson River Walkway ("the walkway") has been proposed as a continuous public access system along the eighteen miles of New Jersey shore on the Hudson River from the George Washington Bridge to Bayonne. Governor Kean, in his 1987 State of the State message, indicated that construction of the segment of walkway ("the segment") between PATH's soon-to-be remodeled Exchange Place Station and Liberty State Park in Jersey City is a priority of his administration.

The State of New Jersey has made an initial request to the Port Authority for \$750,000 to pay for the design, engineering, environmental analysis and preparation of permits for this segment. Included in the \$750,000 is a \$42,000 fee to be paid to the Trust for Public Land ("the Trust"), a non-profit group that makes advance acquisitions of land for public use. The Trust funds may also be used to pay for acquisition of easements, if required, legal fees, if any, and analysis for this segment's management and maintenance.

The New Jersey Department of Environmental Protection (NJDEP) will be responsible for the design and construction of the walkway, as well as for obtaining any additional funds required to complete the tasks, including funds for real estate acquisition, additional planning and construction.

It is anticipated that the design for this segment of the walkway will be more problematic and costly than that for the remainder, because this segment will span the Morris Basin Canal and a major consideration will be to retain the basin's function as a marina.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to transfer up to \$750,000 to the State of New Jersey from the funds made available for New Jersey projects pursuant to the Governors' Agreement of June 1983 for uses in connection with the construction of the Exchange Place to Liberty State Park segment of the Hudson River Walkway to be agreed to by the Port Authority and the State of New Jersey, acting through the Commissioner of the New Jersey Department of Environmental Protection (NJDEP) and, in connection therewith; and it is further

RESOLVED, that the Executive Director, is authorized to enter into an agreement with NJDEP, which agreement would contain provisions, among others, whereby NJDEP would agree to spend the monies for the design, engineering, environmental analysis and preparation of permits and permit applications in connection with the construction of said walkway segment with the further provisions that: (a) NJDEP may assign up to \$42,000 of the total amount to the Trust for Public Land; and (b) the Port Authority will not be responsible for any property acquisition, construction or maintenance connected with the Exchange Place to Liberty State Park segment of the Hudson River walkway or the operation thereof; and it is further

RESOLVED, that the form of agreement be subject to the approval of General Counsel or his authorized representative.

(Board - 3/12/87)

New Jersey Transit - Kearny Connection and Reverse Kearny Connection Studies; and Penn Station, Newark Improvements

The New Jersey Governor's office has requested that the Port Authority provide payment of up to \$10 million to New Jersey Transit (NJT) from funds made available for projects in the State of New Jersey pursuant to the Governors' Bi-state Agreement of 1983. The payment would be used in connection with three New Jersey Transit public transportation projects, as follows:

– Up to \$4 million to reimburse New Jersey Transit for certain improvements in Penn Station Newark including door replacement, air conditioning, elevator access for the handicapped, roofing replacement, painting, and rehabilitation of parking areas used by PATH riders. These improvements form a part of an overall \$14.3 million capital improvement program to a facility which serves as a major terminal in the PATH system;

– Up to \$3.5 million to help defray the cost of conceptual planning and engineering studies for the "Kearny Connection." This connection would allow passengers on the Morris and Essex rail lines to connect with the Northeast Corridor in Kearny, providing them a one-seat ride into Penn Station New York. This project should ease demand at the Port Authority Bus Terminal and divert motorists from the Lincoln and Holland Tunnels.

– Up to \$2.5 million for advancing detailed operational planning and final engineering studies for the "Reverse Kearny Connection," which will allow some trains on the Northeast Corridor, North Jersey Coast and Raritan Valley lines to terminate at the Hoboken Terminal instead of Newark Penn Station. This project is important to the Port Authority since it will divert passengers from the Newark-World Trade Center PATH line, forestalling additional investment in PATH cars, for that service beyond those currently proposed, and will feed additional commuters to the proposed Hoboken-Lower Manhattan Ferry service.

The agreement between NJT and the Port Authority will provide that NJT will be completely responsible for all aspects of the studies and the capital improvements at Penn Station, Newark and for any additional funds required for completion of all work. The agreement will further provide that the Port Authority will not have any responsibility for the improvements contracted by NJT at Penn Station, Newark.

Funds made available for projects in the State of New Jersey pursuant to the Governors' Agreement of 1983 were initially \$137.5 million. As of November 1986, the Board had authorized \$89.4 million for regional infrastructure and transportation projects. With up to \$750,000 anticipated to be authorized for a study of the Hudson Walkway project, \$2.03 million for the Fort Lee traffic intersection improvements, and up to \$10 million for the "Kearny Connection" and "Reverse Kearny Connection" studies and Penn Station, Newark improvements, \$35.32 million remains available for other projects in the State of New Jersey.

(Board - 3/12/87)

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into an agreement with New Jersey Transit (NJT) providing for payment to NJT, and to pay NJT in accordance with the agreement, up to \$10 million from funds made available for projects in the State of New Jersey pursuant to the Governors' Bi-state Agreement of 1983, allocated as follows: Up to \$4 million in reimbursement for certain improvement work, to be described in the agreement with NJT at Penn Station, Newark; up to \$3.5 million in reimbursement for conceptual planning and engineering studies of a proposed "Kearny Connection"; and up to \$2.5 million to allow NJT to advance the design and engineering studies for the "Reverse Kearny Connection"; and it is further

RESOLVED, that the form of such agreement be subject to the approval of General Counsel or his authorized representative.

(Board - 3/12/87)

Toll Increase for Vehicular Crossings

As a result of rising operating and maintenance costs accompanied by major capital requirements of the Port Authority's Interstate Transportation Network of ground and mass transportation facilities, and after having made substantial efforts both to reduce expenditures at Port Authority facilities and to maximize revenues from its non-bridge and tunnel operations, it has become necessary for the Port Authority, as a self-supporting government agency, to readjust the rates of toll charged for use of its bridges and tunnels. This adjustment is required to sustain the agency's ability to maintain and finance its facilities, especially its Interstate Transportation Network, and to retain its sound financial standing.

Since World War II, the Port Authority has completed substantial capital construction programs that have served the economic requirements of the Bi-State port region. Through the application of prudent financial tests, as provided for in bond indentures and policies adopted by the Board, the Port Authority has carried out these public programs with the support of pooled revenues from all Port Authority facilities. These have formed the credit base for more than \$5 billion in debt sold to finance the Authority's facilities during this period. However, it has become increasingly clear that the Port Authority's continued capacity to carry out major capital programs has, in recent years, been shrinking substantially, primarily because of sharply increased operating and maintenance costs.

Expenses have increased despite an intensive staff program to reduce operating costs to the lowest possible levels consistent with acceptable standards of service. Viewed from the perspective of rising costs on the Port Authority's Interstate Transportation Network, the revenues derived from the 1984 bridge and tunnel toll increase – the second in the Authority's history – have been eroded. The annual revenue increase of about \$45 million from the 1984 toll adjustment has been more than offset by the increase in annual operating and maintenance expenses. This erosion does not even reflect the cost of carrying capital expenditures required over this period.

In addition to jeopardizing the Port Authority's ability to continue capital construction programs in connection with all of its facilities, the trend of increasing operating expenses will endanger the Authority's ability to meet its obligations, unless it is able to obtain compensating revenue increases.

Compounding the problem is the fact that an expanding, increasingly vigorous regional economy is spurring growth in travel across the Port Authority's Interstate Transportation Network as well as throughout the New Jersey/New York metropolitan area. The growth so far has resulted in greater congestion at both the Authority's vehicular facilities and on PATH, and calls for major capital and operating solutions to serve the economic needs of the region.

Furthermore, the Port Authority's Interstate Transportation Network is an aging system with most of its major facilities constructed more than 50 years ago. At a time when many of the system's facilities are being pressed to their capacity limits during expanding peak commuting hours, those same facilities are also facing the essential need for major rehabilitation and improvements to continue safe, reliable operations. Thus, the Port Authority must simultaneously respond to the dual pressures of maintaining an aged system while providing sufficient capacity to meet current and forecasted demands.

(Board - 3/12/87)

In recognition of the scope and complexity of this problem the Port Authority undertook to develop specific proposals to accommodate current demand and future growth.

A report entitled "Capital Needs & Planning for Port Authority Interstate Crosswater Facilities" was submitted to the Board by the Executive Director on November 24, 1986. This report focuses on the recent growth in usage of the Interstate Transportation Network of cross-water facilities, actions taken, current plans for expansion, the magnitude of the need for rehabilitation and modernization and the inability of the network to provide sufficient revenues to cover the cost of required capital improvements to the network.

The report concludes that a projected \$1.5 billion will have to be expended over the next five years for capital improvements to continue a safe, reliable operation of the Interstate Transportation Network while also adding capacity. The Port Authority's plans to add capacity include the PATH system capacity improvements program, the proposed implementation of a ferry service from New Jersey to Lower Manhattan and detailed planning for a possible expansion at the Staten Island bridges. Substantial additional revenues are required to support the funding of these and other capital expenditures.

The report further concludes that the Interstate Transportation Network cannot generate the required additional revenues under its current fare and toll structure. In fact, the network is generating insufficient revenues to cover its operating expenses and the gap between operating expenses and revenues is projected to widen significantly in the future. The Port Authority must act to provide sufficient revenues to its facilities so that the network can continue to serve the public fully.

As a result of the stated financial pressures, a proposal that the PATH fare be increased from its current \$.75 to \$1.00 in 1987 is also being proposed and is currently before the PATH Board of Directors. It should be noted, however, that even with the pending PATH fare increase, there would still be a need for an upward adjustment in the Authority's bridge and tunnel toll structure. Thus, in 1987, even assuming a \$1.00 PATH fare, the projected rate of return on the Authority's investment in its network facilities would still be a negative one. In fact, even under the modified toll schedule here recommended, including the PATH fare increase currently under consideration, the projected rate of return on the Authority's integrated network of ground and mass transportation facilities in 1987 is still expected to be well within the zone of reasonableness.

The Triborough Bridge and Tunnel Authority automobile round-trip toll on its major bridge and tunnel facilities, i.e. the Triborough, Bronx Whitestone, Throgs Neck and Verrazano Narrows Bridges, and the Queens Midtown and Brooklyn Battery Tunnels, is presently \$4.00. Thus, a \$3.00 round trip automobile toll on the Port Authority's vehicular crossings would still be below the rate at other vehicular crossings in the area.

(Board - 3/12/87)

In light of the stated needs, it was recommended that, pursuant to the policy adopted by the Board at its June 9, 1977 meeting, the Executive Director be authorized to make arrangements for public hearings on proposed increases in the rates of toll charged for use of the Port Authority's vehicular crossings. The notice of hearings is to set forth the proposed changes in the rates of toll, a comparison of existing and proposed toll schedules, and an estimate of the increase in revenues under the proposed change. The results of the hearings are to be reported by the Executive Director to the Board of Commissioners. It is proposed to hold public hearings on the recommended toll adjustments at convenient times and locations in New York City and New Jersey.

Under the proposed schedule, effective April 12, 1987, passenger automobile tolls would be increased from \$2.00 to \$3.00, bus tolls from \$2.00 to \$3.00 and truck tolls from \$1.50 per axle to \$3.00 per axle. In addition, the price of the Commuter Discount Ticket Book of 20 tickets would be increased from \$20.00 to \$40.00, reflecting a \$1.00 discount from the proposed \$3.00 cash auto toll. There would be no increase in the price of reduced-rate carpool ticket books (\$30.00 for 60 tickets) and toll scrip would continue to be available at a 10% discount from the cash toll. A copy of the proposed toll schedule is attached.

The restructured toll schedule will include appropriate authorization for: setting toll rates and fees for vehicles that exceed established size limitations and/or require special handling; setting terms and conditions for any ticket distribution channels; setting criteria on vehicular size limitations; and setting criteria with respect to hazardous material transportation regulations.

The proposed adjustments in the passenger automobile, bus and truck tolls are estimated to produce an increase in revenue of approximately \$108 million in 1987 or \$146 million on an annualized basis. The increased revenues are to be used for the operation, maintenance and improvement of the Port Authority's cross-water Interstate Transportation Network and other authorized Port Authority purposes.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby directed to make arrangements for public hearings on proposed increases in the rates of tolls charged for use of the Port Authority's vehicular crossings, and to report to the Board on the results of the hearings; and it is further

RESOLVED, that the Executive Director is hereby authorized to implement the proposed toll adjustments, as set forth below, effective April 12, 1987 at 3:00 a.m., unless otherwise directed by the Board following receipt of a report from the Executive Director on the public hearings; and it is further

RESOLVED, that the resolution of the Board of Commissioners establishing tolls for use of vehicular crossings, adopted on November 10, 1983, be and the same is hereby amended, effective April 12, 1987 unless the Board directs otherwise following receipt of a report from the Executive Director on the public hearings, to read as follows:

RESOLVED, that for the purpose of establishing, levying and collecting tolls for the use of vehicular crossings, vehicles shall be classified as follows:

Class 1: Shall include the following vehicles having two axles and single rear wheels, unless they form parts of combinations included in Class 7: passenger automobiles, hearses, ambulances, vans, commercial limousines, taxicabs, trucks, and recreational vehicles.

Class 2: Shall include vehicles, other than omnibuses, with two axles and dual rear wheels, unless such vehicles form parts of combinations included in Classes 3, 4, 5 and 6.

Class 3: Shall include all vehicles with three axles, other than recreational vehicles with single rear wheels and omnibuses, unless they form parts of combinations included in Classes 4, 5, 6 and 7.

Class 3 shall also include combinations consisting of trucks or tractors and semi-trailers, the combinations having three axles.

Class 4: Shall include all vehicles with four axles, other than recreational vehicles with single rear wheels and omnibuses, unless they form parts of combinations included in Classes 5, 6 and 7.

Class 4 shall also include all combinations consisting of trucks or tractors and trailers or semi-trailers, the combinations having four axles.

Class 5: Shall include all vehicles with five axles, other than recreational vehicles with single rear wheels and omnibuses, unless they form parts of combinations included in Classes 6 and 7.

Class 5 shall also include all combinations consisting of trucks or tractors and trailers or semi-trailers, the combinations having five axles.

Class 6: Shall include all vehicles with six axles other than recreational vehicles with single rear wheels and omnibuses.

Class 6 shall also include all combinations consisting of trucks or tractors and trailers or semi-trailers, the combinations having six axles.

(Board - 3/12/87)

Class 7: Shall include recreational vehicles having three or more axles with single rear wheels; and Class 1 or Class 11 vehicles in combinations with trailers or semi-trailers.

Class 8: Shall include omnibuses having two axles.

Class 9: Shall include omnibuses having three or more axles.

Class 11: Shall include motorcycles, with or without side cars, unless such motorcycles form parts or combinations included in Class 7; and it is further

RESOLVED, that the following tolls shall be charged per eastbound trip for the use of vehicular crossings, no tolls to be collected for westbound passage:

(a) Vehicles included in Class 1	\$ 3.00 each
(b) Vehicles included in Class 2	\$ 6.00 each
(c) Vehicles included in Class 3	\$ 9.00 each
(d) Combinations of vehicles included in Class 3	\$ 9.00 per combination
(e) Vehicles included in Class 4	\$12.00 each
(f) Combinations of vehicles included in Class 4	\$12.00 per combination
(g) Vehicles included in Class 5	\$15.00 each
(h) Combinations of vehicles included in Class 5	\$15.00 per combination
(i) Vehicles included in Class 6	\$18.00 each
(j) Combinations of vehicles included in Class 6	\$18.00 per combination
(k) Vehicles included in Class 7	\$ 1.50 per axle
(l) Combinations of vehicles included in Class 7	\$ 4.50 per three axle combination - (\$6.00 per four axle combination, etc.)
(m) Vehicles included in Class 8	\$ 3.00 each
(n) Vehicles included in Class 9	\$ 3.00 each
(o) Vehicles included in Class 11	\$ 2.00 each
(p) Combinations of vehicles with more than 6 axles	\$ 3.00 per axle;

(Board - 3/12/87)

and it is further

RESOLVED, that the price of a 20 ticket Commuter Discount Ticket Book will be \$40.00 effective 3:00 a.m. of April 12, 1987. The price of a 20 ticket Commuter Discount Ticket Book will remain at the present price of \$20.00 through 3:00 a.m. of April 12, 1987. Any \$20.00 book sold through that time will be valid until the expiration date noted on the book.

Rates, terms and conditions for Carpool Ticket Books will remain the same. Toll Scrip will continue to be available at a 10% discount; and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to review and set periodically the toll rates in either the eastbound or westbound directions for "specials" and the fees for special inspections and/or escort services; "specials" are any vehicles, animals, or combinations of vehicles that:

(1) exceed established limitations for length, width, height or weight at Port Authority bridges and tunnels; and/or

(2) require special handling, inspections and/or escorts due to either their unique construction and/or design, type of cargo, speed maneuverability or other unusual operating characteristics or features, such as, but not limited to: operating characteristics or features associated with certain types of construction equipment, tracked vehicles, articulated vehicles, floats, animals ridden, led or herded, animal drawn vehicles, and it is further

RESOLVED, that the Executive Director be and he hereby is authorized to review and set the terms and conditions for the distribution of any and all scrip and tickets; and it is further

RESOLVED, that the Executive Director shall have the authority to modify the operating criteria for the Port Authority's Tunnel and Bridge facilities in relation to:

(1) vehicular length, width, height and weight; and

(2) the modification of the hazardous material transportation regulations; and it is further

RESOLVED, that all other terms and conditions set forth in the resolution of the Board of Commissioners establishing tolls for the use of vehicular crossings, adopted on November 10, 1983 are to remain unchanged.

CURRENT AND PROPOSED
SCHEDULE OF TOLL RATES
AT SIX VEHICULAR CROSSINGS

<u>Class</u>	<u>Vehicle Type</u>	<u>Current</u>	<u>Proposed</u>
1	Passenger Auto/Van/Pick-up	\$ 2.00	\$ 3.00
2	2 Axle Truck	3.00	6.00

The meeting was called to order by the Chairman.

(Board - 4/9/87)

Election of Officers

Chairman Philip D. Kaltenbacher announced that in accordance with the requirements of the By-Laws the annual election of officers was in order and requested Commissioner Ronan to take the chair as Acting Chairman.

The Chairman requested Commissioner Van Fossan, Chairman of the Nominating Committee, to submit the report of that Committee. Commissioner Van Fossan submitted the following report:

"On behalf of the Nominating Committee, I desire to report that at its meeting held earlier today, in accordance with the provisions of the By-Laws, the Committee, by unanimous action, submits the nominations for election to the office of Chairman of The Port Authority of New York and New Jersey of Commissioner Philip D. Kaltenbacher, and for the office of Vice-Chairman of The Port Authority of New York and New Jersey of Commissioner Robert F. Wagner.

"By unanimous action, the Committee also submits the nominations of Stephen Berger as Executive Director and of Patrick J. Falvey as General Counsel.

"By unanimous action, the Committee also submits the nominations of Barry Weintrob as Director of Finance, Francis A. Gorman as Comptroller, Doris E. Landre as Secretary, John E. Hauptert as Treasurer and Donald R. Lee as Director of the Audit Department."

Commissioner Hutchison thereupon moved the adoption of the report of the Nominating Committee. The motion was seconded by Commissioner Hellmuth and carried.

On motion of Commissioner Hutchison seconded by Commissioner Hellmuth it was voted that nominations be closed and that the Secretary be directed to cast one ballot for the election of Commissioner Philip D. Kaltenbacher as Chairman, Commissioner Robert F. Wagner as Vice-Chairman, Stephen Berger as Executive Director, Patrick J. Falvey as General Counsel, Barry Weintrob as Director of Finance, Francis A. Gorman as Comptroller, Doris E. Landre as Secretary, John E. Hauptert as Treasurer and Donald R. Lee as Director of the Audit Department.

The Secretary reported that the ballot had been cast, whereupon Commissioner Ronan announced the election of the following: Philip D. Kaltenbacher as Chairman, Robert F. Wagner as Vice-Chairman, Stephen Berger as Executive Director, Patrick J. Falvey as General Counsel, Barry Weintrob as Director of Finance, Francis A. Gorman as Comptroller, Doris E. Landre as Secretary, John E. Hauptert as Treasurer and Donald R. Lee as Director of the Audit Department.

Action on Minutes

The Secretary submitted for approval Minutes of the meetings of February 25 and March 12, 1987. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on April 9, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on April 9, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on April 9, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on April 9, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 4/9/87)

Report of Audit Committee

Commissioner John G. McGoldrick, Chairman of the Audit Committee, presented the report of the Audit Committee. The report which follows was ordered spread upon these Minutes of the Board.

"Our By-Laws provide that the Audit Committee shall report from time to time to the Board on the results of its supervisory, auditing and other activities.

"Under the By-Laws, the Committee has general supervision over the books and accounts of the Authority and the auditing process. In that connection, we deal mainly with the Chief Financial Officer, the Financial Department and the external independent accounting firms. We also monitor all matters within the sphere of responsibility of our own Audit Department.

"The By-Laws also provide that the Committee 'shall keep informed regarding the management of the Port Authority'--a mandate which extends the scope of the Committee's responsibilities beyond what might be considered the typical audit committee role.

"During the fiscal year ended December 31, 1986, the Audit Committee held nine meetings.

"There are several special reports which the Committee has reviewed and which we are continuing to monitor. These include:

- a report by Touche Ross & Co. with respect to the Authority's construction, management and supervision practices; and
- a report by Arthur Young & Company on the EDP audit function of the Authority.

"We also continue to focus on the progress of the automation of our lease negotiation, revenue billing and collection system.

"The Committee is concerned with our own Audit Department's internal auditing functions and with its external audits of financial and operating records of firms doing business with the Authority. We review the Audit Department's annual audit plan, which is developed after taking into consideration those areas with the greatest exposure to financial loss, sensitivity, major changes in operations and programs and the dates and results of previous audits.

"We review the quarterly reports of audits performed--during 1986 the Department issued 426 reports--focusing on the scope of the review and results of individual audits, and as appropriate requesting further information and follow-up reports on the results of ongoing investigations.

"We also are concerned with the implementation of Audit Department recommendations: Have they been adopted? If not, why not? If not yet, when?

"As a regular matter, the Committee reviews the Accounts Receivable Quarterly Report, support for civic and community projects, and legal fees paid to outside counsel.

(Board - 4/9/87)

"The Committee has a special interest in the Authority's minority business development programs. We focus on the implementation of the Board's policy, how it is monitored, and the timeliness and substance of the affirmative action annual report.

"We are concerned with the monitoring of our employees' financial disclosure forms and the timeliness of the filings. We actually review the forms which are filed by members of senior management.

"We have, on occasion, deemed it appropriate to visit especially sensitive areas of operations, including a check of security at the computer center, a visit to the cashier's office to review the handling of cash, and a session in the Secretary's office reviewing the security arrangements for important documents.

"During the past year we have reviewed various Port Authority policies, focusing on the adequacy of controls and the consistency of implementation. These include:

- procedures for securing business trip and hotel reservations for Authority employees
- policies concerning reimbursable business expenses and cash advances for business purposes
- use of Authority vehicles by employees, including compliance with the authorization procedure
- the function of the Authority's Ethics Board, and procedures for monitoring potential conflicts of interest
- the monitoring of the home use of computers
- the policy with respect to giving or accepting gifts or gratuities

"Our dealings with the outside independent auditors include a review of the proposed scope of their audits, consideration of the recommendations contained in their management letters, and discussions with respect to auditing treatment, including a review and analysis of the draft financial statements.

"In addition, we meet privately--that is, without staff present--with the outside auditors as a routine matter. We believe it important that this line of communications be established and be part of the regular functioning of the Committee.

"It is the responsibility of the Audit Committee to make recommendations to the entire Board with respect to the independent auditing firms to be retained for the Authority and for the Fund for Regional Development. The recommendations are based upon an evaluation of the ability of the accounting firm to provide the scope and level of services in the responsive manner necessary for our purposes. It was in that context that the Committee recommended and the Board retained Touche Ross & Co. for the Authority's fiscal year ended December 31, 1986, and the Committee recommended and the Board retained Mitchell/Titus & Co. to audit the books and accounts of the Fund for Regional Development for the 1986 fiscal year--the first fiscal year of the Fund for which independent auditors were retained.

(Board - 4/9//87)

"I know I speak also for the other members of the Audit Committee--Commissioners Henderson, Hutchison and Ronan--when I say that we appreciate the cooperation and responsiveness of those with whom we deal, and that we believe there is a general awareness within the Authority of the responsibility of each individual to maintain the highest level of honesty, ethical conduct and public trust, and a general commitment to conducting the business of the Authority solely in the public interest."

(Board - 4/9/87)

Report of Independent Auditors

The Board received a report of Touche Ross & Co., Independent Auditors, as presented by Mr. Jeffrey R. Breen. The report which follows was ordered spread upon these Minutes of the Board.

"We have completed our examination of the consolidated financial statements of The Port Authority of New York and New Jersey, and its subsidiary, Port Authority Trans-Hudson Corporation, for the year ended December 31, 1986. Our opinion dated February 27, 1987, appears on page 35 of the Port Authority's 1986 Annual Report. Our examination was conducted in accordance with generally accepted auditing standards. Our opinion states that the Port Authority's financial statements are fairly presented in conformity with generally accepted accounting principles applied on a consistent basis. Our opinion also states that Schedules A, B, and C are fairly presented in conformity with the requirements of law and the Port Authority's bond resolutions which have been applied on a basis consistent with that of the preceding year.

"Concurrently with our examination of the annual financial statements, we also performed a study of the Port Authority's system of internal accounting control. Our opinion dated November 26, 1986, on the adequacy of the Port Authority's system of internal accounting control, appears on page 34 of the Annual Report.

"We also issued net revenue reports in accordance with the lease agreements between the Port Authority and the City of New York and the Port Authority and the City of Newark.

OTHER MATTERS:

"During the year, we had unrestricted access to the Audit Committee and had several opportunities to meet alone with the Audit Committee to discuss our audit plan, comments and recommendations on internal control and the financial statements.

"We received the complete cooperation of Port Authority management and employees. There were no restrictions placed on our approach or the scope of our examination. We were given access to all individuals, records, documents and other supporting data which we requested and our inquiries were satisfactorily answered.

"We appreciate the opportunity to appear before you and would be pleased to answer any questions you may have pertaining to the financial statements, our approach to the 1986 audit and the reports which we issued."

Recision and Cancellation of Resolutions Authorizing Consolidated Bonds, Fifty-eighth Series, Due 2022, and Consolidated Notes, Series KK, Series LL, and Series MM

The Board, at its meeting on February 13, 1986, in connection with the Authority's plan of financing, in addition to other actions, established and authorized the issuance and sale of Consolidated Bonds, Fifty-seventh Series, Due 2021, and Consolidated Bonds, Fifty-eighth Series, Due 2022, and amended prior authorizations with respect to Consolidated Bonds, Fifty-sixth Series, to provide for the issuance and sale of such Series at any time on or before June 30, 1987. Thereafter, on August 14, 1986, \$100,000,000 in principal amount of Consolidated Bonds, Fifty-sixth Series, Due 2021, was issued and sold for purposes of capital expenditures in connection with various facilities of the Authority and, on November 13, 1986, \$100,000,000 in principal amount of Consolidated Bonds, Fifty-seventh Series, Due 2021, was issued and sold for purposes of refunding certain outstanding Port Authority Commercial Paper Notes.

At its meeting on October 11, 1984, the Board established Consolidated Notes, Series JJ, Series KK, Series LL, and Series MM, and in each case authorized the issuance and sale of each such Series on or before October 15, 1986. On December 13, 1984, \$5,000,000 in principal amount of Consolidated Notes, Series JJ, due December 17, 1985, was issued and sold for purposes of capital expenditures in connection with various facilities of the Authority. Thereafter, authorizations with respect to the remaining Series of Notes were amended on July 11, 1985, and on February 13, 1986, permitting the issuance and sale of such Series at any time on or before June 30, 1987.

Planning for future capital expenditures indicates that in place of the presently authorized Consolidated Bonds, Fifty-eighth Series, Due 2022, and Consolidated Notes, Series KK, Series LL, and Series MM, actions with respect to a plan of financing, consisting in part of a combination of Consolidated Bonds and Consolidated Notes and the Port Authority Operating Equipment--Lease Financing Program (which is to be supplemented and amended) are to be considered today by the Board in connection with the anticipated requirements associated with the Authority's capital plan. Additional actions with respect to other obligations included in the plan of financing are to be recommended in the future.

Therefore, it is recommended that the Board rescind and cancel the resolutions establishing Consolidated Bonds, Fifty-eighth Series, Due 2022, and authorizing the issuance and sale thereof, and establishing and authorizing the issuance and sale of Consolidated Notes, Series KK, Series LL, and Series MM, prior to the actions recommended at today's meeting, in part, in connection with the Authority's plan of financing.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the resolutions of the Authority adopted February 13, 1986, entitled "Consolidated Bonds, Fifty-eighth Series - Establishment," "Consolidated Bonds, Fifty-eighth Series - Authorization of Issuance" and

"Consolidated Bonds, Fifty-eighth Series - Authorization of Sale" (appearing, respectively, at pages 122 et seq., pages 135-136 and pages 137-138 of the Official Minutes of that date), be and they hereby are rescinded and cancelled in their entirety; and it is further

RESOLVED, that the resolutions of the Authority adopted October 11, 1984 (as amended), entitled "Consolidated Notes, Series KK - Establishment and Authorization of Issuance" and "Consolidated Notes, Series KK - Authorization of Sale" (appearing, respectively, at pages 467 et seq. and pages 475-476 of the Official Minutes of that date), "Consolidated Notes, Series LL - Establishment and Authorization of Issuance" and "Consolidated Notes, Series LL - Authorization of Sale" (appearing, respectively, at pages 477 et seq. and page 485 of the Official Minutes of that date) and "Consolidated Notes, Series MM - Establishment and Authorization of Issuance" and "Consolidated Notes, Series MM - Authorization of Sale" (appearing, respectively, at pages 486 et seq. and page 494 of the Official Minutes of that date), as all such resolutions of October 11, 1984, have been amended, be and they hereby are rescinded and cancelled in their entirety.

Report on Public Hearing - Port Authority Plan of Financing

Capital expenditures of \$1.5 billion are anticipated during the next two years in connection with the Authority's five year capital program. In view of this level of anticipated expenditures and the continuing volatility of interest rates and the financial markets, prudent financial planning makes it desirable for the Authority to have a plan of financing which will provide the flexibility to enable the Authority to finance capital and other expenditures in connection with its facilities and to refund outstanding obligations, as appropriate, through a combination of long-, intermediate- and short-term obligations so that necessary funds may be obtained expeditiously and at the most favorable interest cost to the Authority.

Today's recommended actions with respect to a portion of the plan of financing would include the establishment, authorization of issuance and authorization of sale of eight series of Consolidated Bonds, six series of Consolidated Notes and an increase in the amount of lease-financing transactions to be outstanding under the Port Authority Operating Equipment--Lease Financing Program ("Lease Financing Program"), together with an extension of the period during which lease-financing transactions may be entered into through June 30, 1990.

Public Hearing

On April 7, 1987, public hearings in connection with the issuance and sale of bonds, notes and other obligations of the Authority as provided by Section 147(f) of the Internal Revenue Code of 1986, as amended, and the applicable regulations with respect thereto, were conducted by the Assistant Treasurer of the Authority at the offices of the Authority located at One World Trade Center and at the Journal Square Transportation Center, pursuant to public notice published on March 23, 1987, in The New York Times, a newspaper of general circulation in the New York portion of the Port District, and in The Star Ledger, a newspaper of general circulation in the New Jersey portion of the Port District. In pertinent part, the notice contained the following description of the Authority's plan of financing and the Authority's facilities and projects: "Consolidated Bonds of The Port Authority of New York and New Jersey, to be denominated as the Fifty-eighth Series, Fifty-ninth Series, Sixtieth Series, Sixty-first Series, Sixty-second Series, Sixty-third Series, Sixty-fourth Series and Sixty-fifth Series; Consolidated Notes of The Port Authority of New York and New Jersey, to be denominated as Series KK, Series LL, Series MM, Series NN, Series OO, and Series PP; special obligations under a supplemented and amended Commercial Paper Program of The Port Authority of New York and New Jersey; obligations under a supplemented and amended Port Authority Operating Equipment -- Lease Financing Program; and a series of special limited obligation variable rate demand bonds of The Port Authority of New York and New Jersey; all to be issued and sold in connection with a plan of financing, which also includes the present Port Authority Commercial Paper Program and the present Port Authority Operating Equipment--Lease Financing Program, each until amended and supplemented, Consolidated Bonds, Series Fifty E and Series Fifty-one E of The Port Authority of

New York and New Jersey, Port Authority Limited Obligation Variable Rate Demand Bonds, Series 1986, Due 2016, and The Port Authority of New York and New Jersey, Bank Loan of 1986, various capital and other expenditures at certain of the facilities of the Port Authority located in the Port of New York District, to wit, the Holland Tunnel, Lincoln Tunnel, George Washington Bridge, Bayonne Bridge, Goethals Bridge, Outerbridge Crossing, Port Authority Bus Terminal, Port Authority Bus Programs, Hudson Tubes portion of the Port Authority Trans-Hudson System, New York Union Motor Truck Terminal, LaGuardia Airport, John F. Kennedy International Airport, Newark International Airport, Teterboro Airport, Port Authority-West 30th Street Heliport, Port Authority-Downtown Manhattan Heliport, Oak Point Rail Freight Link, a rail freight improvement project in The Bronx, N.Y., Port Newark, Hoboken-Port Authority Marine Terminal, Brooklyn-Port Authority Marine Terminal, Erie Basin-Port Authority Marine Terminal, Elizabeth-Port Authority Marine Terminal, Columbia Street Marine Terminal, Howland Hook Marine Terminal, Greenville Yard-Port Authority Marine Terminal, New York City Passenger Ship Terminal, Pre-development Site Acquisition Program, a facility for acquisition of real property in the New Jersey and New York portions of the Port of New York District, World Trade Center, a facility of commerce in Manhattan, N.Y., Newark Legal and Communications Center, a legal and communications center in Newark, N.J., Bathgate Industrial Park, an industrial park in The Bronx, N.Y., Port Authority Industrial Park at Elizabeth, an industrial park in Elizabeth, N.J., Port Authority Industrial Park at Yonkers, an industrial park in Yonkers, N.Y., and Teleport, a satellite communications center at the Staten Island Industrial Park, Staten Island, N.Y.; and a foreign trade zone/distribution center project or facility in the Howland Hook Marine Terminal area of Staten Island, N.Y., a bank for regional development project or facility in the New Jersey and New York portions of the Port of New York District, a resource recovery project or facility in Essex County, N.J., an industrial park project or facility in Newark, N.J., an imported automobile marine terminal project or facility in Bayonne and Jersey City, N.J., an advanced technology and communications center project or facility in Brooklyn, N.Y., a project or facility for the improvement of the ConRail Northern Branch rail freight line from North Bergen Yard to Marion Junction in New Jersey, a waterfront development project or facility to be located in each of Hunters Point, Queens, N.Y., and Hoboken, N.J., a project or facility with respect to additional development of the Greenville freight yard site in Jersey City, N.J., and a project or facility for the provision of trans-Hudson ferry transportation services, to be authorized by the Port Authority. The initial owner, operator or manager of these facilities is or will be the Port Authority. The major projects presently authorized or which may be authorized by the Port Authority to be undertaken at these facilities include LaGuardia Airport, general runway and roadway modification, paving, additional passenger terminal facilities; John F. Kennedy International Airport, general runway, taxiway and roadway modification, paving, modification to the International Arrivals Building, multi-tenant air cargo buildings, central terminal area roadway construction, passenger distribution system, construction of additional terminal facilities and related improvements; Newark International Airport, general runway and roadway modification, paving, construction of additional parking facilities, maintenance building, completion of Terminal C, central terminal area passenger distribution system; a Bi-State Port Development Program in New York and New Jersey,

including certain dredging, and a homeport project in the vicinity of the pier area if Stapleton, Staten Island, N.Y.; Howland Hook Marine Terminal project; Port Newark, channel dredging, berth deepening, building construction, terminal improvements; Elizabeth-Port Authority Marine Terminal, channel dredging, berth deepening, building construction, paving; Erie Basin-Port Authority Marine Terminal, fishport project; Brooklyn-Port Authority Marine Terminal, Red Hook Container Terminal expansion, distribution buildings; Oak Point Rail Freight Link project; miscellaneous capital improvements at the World Trade Center, including continued installation of a sprinkler system; Bathgate Industrial Park project; Industrial Park at Elizabeth project; Industrial Park at Yonkers project; Newark Industrial Park project; Port Authority Bus Terminal, extension, improvement, modernization; Teleport project; Port Authority Bus Programs project; capital improvements related to safety, maintenance, rehabilitation or improvement at the Hudson Tubes portion of the Port Authority Trans-Hudson System, the George Washington Bridge, Lincoln Tunnel, Holland Tunnel, Goethals Bridge, Bayonne Bridge, Outerbridge Crossing; Howland Hook project; Bank for Regional Development project; Pre-development Site Acquisition Program project; Newark Legal and Communications Center project; Essex County resource recovery project; ConRail Northern Branch rail freight line improvement project; Hunters Point waterfront development project; Hoboken waterfront development project; imported automobile marine terminal project in Bayonne and Jersey City, N.J.; Greenville Yard-Port Authority Marine Terminal project; Trans-Hudson ferry transportation services project; park/ride lots project; Center for Advanced Technology and Telecommunications project; and other miscellaneous capital improvements and replacements and operating equipment lease financing in connection with the facilities of the Port Authority. The said obligations of the Port Authority would be issued, in addition to or in substitution for, as appropriate, the other obligations also included in the Port Authority's plan of financing, for purposes of capital or other expenditures with respect to the facilities and projects noted above, or for the refunding of outstanding obligations issued for such purposes, or both, and in the maximum aggregate principal amounts noted below; each of said Series of Consolidated Bonds, Fifty-eighth Series, Fifty-ninth Series, Sixtieth Series, Sixty-first Series, Sixty-second Series, Sixty-third Series, Sixty-fourth Series and Sixty-fifth Series, would be in principal amount of up to \$200,000,000, provided, however, that the total aggregate principal amount of all said Series of Bonds sold would not exceed \$1,000,000,000; each of said Series of Consolidated Notes Series KK, Series LL, Series MM, Series NN, Series OO and Series PP would be in principal amount of up to \$100,000,000, provided, however, that the total aggregate principal amount of all said Series of Notes sold would not exceed \$300,000,000; the special obligations under a supplemented and amended Port Authority Commercial Paper Program would be in the total aggregate principal amount of up to \$300,000,000 outstanding at any one time; a series of special limited obligation variable rate demand bonds of the Port Authority would be in the total aggregate principal amount of up to \$200,000,000; and obligations under a supplemented and amended Port Authority Operating Equipment--Lease Financing Program would be in the total aggregate principal amount of up to \$50,000,000 outstanding at any one time."

Plan of Financing

The Board would establish Consolidated Bonds, Fifty-eighth Series, Due 2022, Consolidated Bonds, Fifty-ninth Series, Due 2022, Consolidated Bonds, Sixtieth Series, Due 2022, Consolidated Bonds, Sixty-first Series, Due 2022, Consolidated Bonds, Sixty-second Series, Due 2023, Consolidated Bonds, Sixty-third Series, Due 2023, Consolidated Bonds, Sixty-fourth Series, Due 2023, and Consolidated Bonds, Sixty-fifth Series, Due 2023, and would authorize the issuance of up to \$200 million in aggregate principal amount of each such Series of Bonds; provided, however, that the total aggregate principal amount sold of such Series of Bonds would not exceed \$1 billion. The Board would establish Consolidated Notes, Series KK, Series LL, Series MM, Series NN, Series OO, and Series PP, and would authorize the issuance of up to \$100 million in aggregate principal amount of each such Series of Notes; provided, however, that the total aggregate principal amount sold of such Series of Notes would not exceed \$300 million.

The Committee on Finance would be authorized to sell and to deliver all or any part of each such Series of Bonds and Notes at such time or times on or before December 31, 1988, as it deems propitious, in one or more installments or lots, at public or private sale, bearing interest at a stated rate or rates of interest, including fixed, variable or incremental rates for the term of such Series or any portion thereof, or a combination thereof or without a stated rate of interest for each such Series, to be fixed by the Committee, but in any event not in excess of 12% per annum.

The Port Authority Operating Equipment--Lease Financing Program would be amended and supplemented to provide for an increase in the aggregate principal amount of lease-financing transactions to be outstanding under the Lease Financing Program at any one time from up to \$25 million to up to \$50 million and to extend the period during which lease-financing transactions may be entered into from June 30, 1988, until June 30, 1990. Pursuant to existing authorizations, the Authority, as of June 15, 1985, entered into an arrangement, which has subsequently been amended and supplemented pursuant to such authorizations, with the initial lessor-investor, Bank America NT&SA (for whom Wellfleet Capital Company was substituted) and BankAmerica Trust Company of New York, to effectuate lease-financing transactions.

The proceeds of each such Series of Bonds and each such Series of Notes would be authorized, subject to allocation and restriction by the Committee on Finance:

(a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; provided, however, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, the Committee on Finance may authorize all or any

portion of the unspent proceeds of each such Series of Bonds or Series of Notes to be used for any purpose for which at the time of issuance thereof the Authority is authorized by law to issue its obligations, including capital expenditures in connection with the facilities of the Authority certified or to be certified after issuance of each such Series of Bonds or Series of Notes; (b) for the purpose of refunding, directly by offers to exchange, or otherwise, at or before maturity, all or any part of any issue of Consolidated Bonds or Consolidated Notes issued and outstanding at the time of the sale of any installment of each such Series of Bonds, or each such Series of Notes; and (c) for the purpose of refunding in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

The Board would authorize the Committee on Finance to designate and to appoint one or more Paying Agents and a Registrar in connection with each such Series of Bonds and Series of Notes, as appropriate, and to appoint a Trustee in connection with each of such Series of Bonds.

The Board would provide that no part of the proceeds of each of such Series of Bonds and Series of Notes and the obligations under the Lease Financing Program shall be invested directly or indirectly in such a manner as to cause the interest on each of such Series of Bonds and Series of Notes and the obligations under the Lease Financing Program to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto.

Certification on behalf of the Authority as to the need for the issuance of each of such Series of Bonds and Series of Notes and the obligations under the Lease Financing Program, as to the status of the projects for which such proceeds are to be used, as to the Authority's intentions with respect to the application and investment of such proceeds and as to such other related matters as may be authorized by the Committee on Finance may be made by the Chairman of the Authority, Vice Chairman of the Authority, Chairman of the Committee on Finance, Executive Director, Assistant Executive Director, Chief Financial Officer, Deputy Chief Financial Officer, Comptroller, Assistant Comptroller, Treasurer, or Assistant Treasurer of the Authority and any such action taken in connection therewith would be ratified; and any action which may be necessary or desirable to assure that such Series of Bonds and Series of Notes and the obligations under the Lease Financing Program are in conformity with the provisions of Section 103 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, and to assure that the interest on said Series of Bonds and Series of Notes and obligations under the Lease Financing Program is not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Internal Revenue Code of 1986, as amended, or successor provisions of law, or regulations related thereto, may be taken by the Committee on Finance, Chairman of the Authority, Vice Chairman of the Authority, Chairman of the

Committee on Finance, Executive Director, Assistant Executive Director, Chief Financial Officer, Deputy Chief financial Officer, or Treasurer of the Authority and any such actions taken in connection therewith would be ratified.

The Bonds of the Fifty-eighth Series, Fifty-ninth Series, Sixtieth Series, Sixty-first Series, Sixty-second Series, Sixty-third Series, Sixty-fourth Series and Sixty-fifth Series would be dated as of June 1, 1987, September 1, 1987, October 1, 1987, December 1, 1987, March 1, 1988, June 1, 1988, September 1, 1988 and December 1, 1988, respectively, mature June 1, 2022, September 1, 2022, October 1, 2022, December 1, 2022, March 1, 2023, June 1, 2023, September 1, 2023, and December 1, 2023, respectively, and bear a stated rate or rates of interest, including fixed, variable or incremental rates for the term of each of such Series of Bonds or any portion thereof, or a combination thereof, or not bear a stated rate of interest, to be fixed and determined by the Committee on Finance not in excess of 12% per annum, and shall be sold at a price resulting in a true interest cost to the Authority for each such Series of Bonds not in excess of 12% per annum. A sinking fund would be established for each Series of Bonds to meet the requirements of a schedule of mandatory periodic retirement commencing in the 15th year after issuance for each such Series of Bonds, in amounts sufficient to completely retire each Series at or prior to its respective maturity, for which purpose the Bonds would be callable for redemption prior to maturity at 100%. The Bonds of each Series would also be subject to redemption, at the option of the Authority, in whole or in part, commencing in the 7th year after issuance at prices beginning at 102% and descending to 100%.

The Notes of Series KK, Series LL, Series MM, Series NN, Series OO, and Series PP would be dated as of May 1, 1987, June 1, 1987, October 1, 1987, February 1, 1988, April 1, 1988, and September 1, 1988, respectively, mature May 1, 1990, June 1, 1990, October 1, 1990, February 1, 1991, April 1, 1991, and September 1, 1991, respectively, bear a stated rate or rates of interest, including fixed, variable or incremental rates, for the term of such Notes or any portion thereof, or a combination thereof, or not bear a stated rate of interest, to be fixed and determined by the Committee on Finance not in excess of 12% per annum, and shall be sold at a price resulting in a true interest cost to the Authority for each such Series of Notes not in excess of 12% per annum. Each such Series of Notes would be subject to redemption, at the option of the Authority, commencing in the first year after issuance.

Each such Series of Bonds and Series of Notes would be issued in registered form, registered as to both principal and interest and not as to either alone, as appropriate, and would be issued in denominations of \$5,000 or integral multiples of \$5,000.

As in the past, the Committee on Finance of the Authority would be authorized to take, and to delegate authority for, certain actions with respect to the terms of each such Series of Bonds and Series of Notes to effectuate the sale thereof on the most favorable terms to the Authority.

Consolidated Bonds, Fifty-eighth Series—Establishment

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, heretofore and on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority") adopted a resolution (hereinafter called the "Consolidated Bond Resolution") providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time, in conformity with said Consolidated Bond Resolution for the purposes therein set forth, and which Consolidated Bond Resolution constitutes a contract with the holders of the Consolidated Bonds so issued; and

WHEREAS, said Consolidated Bond Resolution provides that such Consolidated Bonds shall be issued in such series as the Authority may determine, and that the characteristics of the bonds of such series shall be determined by the Authority by and in the resolution establishing such series, and that the resolution establishing any series may contain other terms and provisions not inconsistent with the Consolidated Bond Resolution; and

WHEREAS, the Authority has heretofore established various series of said Consolidated Bonds and has now determined that it is necessary, advisable and in the public interest to establish another series of said Consolidated Bonds, without prejudice to its right hereafter to establish other and additional series of such Consolidated Bonds:

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions.

SECTION 2. There is hereby established a series of said Consolidated Bonds to be known as "Consolidated Bonds, Fifty-eighth Series, Due 2022," to be issued in conformity with said Consolidated Bond Resolution and for any one or more of the purposes specified therein as may be provided in the resolution authorizing the issuance of such series. This resolution shall constitute a contract with the holders of said bonds of Consolidated Bonds, Fifty-eighth Series, Due 2022, which said bonds are hereinafter called "bonds of this Series," and with each such holder.

SECTION 3. Bonds of this Series shall be issued in one or more installments or lots as the Authority may hereafter determine.

The bonds of this Series shall be dated as of June 1, 1987, shall mature on June 1, 2022, and shall bear a stated rate or rates of interest, including fixed, variable or incremental rates for the term of the bonds or any portion thereof, or a combination thereof, from the semi-annual interest payment date next preceding their date of issuance, or if such date of issuance shall be an interest payment date, from such date of issuance, not exceeding twelve per centum (12%) per annum as may be determined by the Committee on Finance of the Authority. The Committee on Finance is hereby authorized to fix and determine any other date as that upon which interest shall commence and said interest rate or rates, or to determine that said bonds of this Series shall not bear a stated rate of interest. If the bonds of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on December 1, 1987, and thereafter on each succeeding June 1 and December 1 until maturity or prior redemption.

Both principal of and interest on the bonds of this Series shall be payable in lawful money of the United States of America. Principal of the bonds of this Series shall be payable upon presentation and surrender thereof by the registered holders, or in the case of coupon bonds of this Series, if any, upon presentation and surrender thereof, at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered bonds of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder and interest on the coupon bonds of this Series, if any, shall be payable upon presentation and surrender of the coupons appertaining thereto at such office or offices of such Paying Agent or Paying Agents. If on original issuance the bonds of this Series are to be issued as book-entry only securities, subject to a book-entry

system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method for the payment of both or either of the principal of and interest on the bonds of this Series to the registered holder thereof; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system, then the foregoing payment provisions of this paragraph shall apply to the bonds of this Series.

Bonds of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the first installment of the bonds of this Series, there shall be in effect a provision of the Internal Revenue Code of 1986, as amended (hereinafter called the "Code"), or successor provisions of law, or the regulations with respect thereto, which does not provide that, for the interest on the bonds of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such bonds of this Series must be issued in registered form, then the bonds of this Series may also be issued in the form of coupon bonds payable to bearer, in which event the Committee on Finance is hereby authorized to adopt an appropriate form of coupon bond issuable only in the denomination of \$5,000. If on original issuance the bonds of this Series are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an appropriate form of bond or other evidence of indebtedness; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system then the provisions of Section 9 of this resolution shall apply to the bonds of this Series.

Registered bonds of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 4. The Authority will keep or cause to be kept at the offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of bonds of this Series. Each registered bond of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unexpired coupons thereto attached, may be exchanged for a registered bond or bonds, registered as designated in such request, of the same aggregate principal amount and series as the surrendered bond or bonds, of any of the authorized denominations. A registered bond or bonds of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered bond or bonds, registered as designated in such request, of any other authorized denominations, or in the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds with appropriate coupons attached, or a combination of such coupon and registered bonds, in each case of the same aggregate principal amount as the surrendered bond or bonds.

All requests for the registration, transfer, exchange and delivery of bonds as above provided shall be filed with the Registrar of the Authority; all bonds to be surrendered pursuant to such request shall be surrendered to the Registrar; and all bonds delivered in exchange as aforesaid shall be delivered by the Registrar. All bonds of this Series surrendered to the Registrar in exchange for other bonds or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of bonds of this Series except in the denomination of \$5,000 in the case of coupon bonds (if any) or in the denominations of \$5,000 or integral multiples of \$5,000 in the case of registered bonds or to authorize the issuance of coupon bonds of this Series if at any time there shall be in effect a provision of the Code or the applicable regulations related thereto which provides that for the interest on the bonds of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such bonds of this Series must be issued in registered form.

SECTION 5. Except as provided in Section 6 of this resolution, bonds of this Series shall be redeemable at the option of the Authority, in whole or in part, on interest payment dates, at or subsequent to June 1, 1994, and prior to maturity, as follows:

At one hundred two per centum (102%) of their face value, plus accrued interest to the date fixed for redemption, at June 1, 1994, and thereafter and at or prior to June 1, 1996; at one hundred one per centum (101%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to June 1, 1999; and at one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to December 1, 2021.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any bonds of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption, to the registered holders of the bonds of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however,* that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If on original issuance the bonds of this Series are to be issued only in registered form or are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method by which the Authority shall give notice of intention to redeem any bonds of this Series.

Before the date fixed for redemption specified in the Authority's notice of intention to redeem, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding bonds which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption and the premium (if any), such principal amount and premium (if any), to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the bonds so called for redemption and to be paid to them respectively upon presentation and surrender of the said bonds with accrued interest included in such redemption price to be paid to the registered holders in accordance with the provisions of this resolution and in the case of coupon bonds (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such bonds. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided or as provided by the Committee on Finance, the bonds so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such bonds on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the bonds so called from and after the date fixed for their redemption, and such bonds and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered bonds of denominations greater than \$5,000, if less than all of the bonds of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing provisions of this Section 5 shall be deemed to refer to such \$5,000 unit of face value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by any bond are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said bond shall forthwith present said bond to the Registrar who shall issue a new bond or bonds of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 4 of this resolution, including a new bond or bonds with the aggregate principal amount of the \$5,000

unit or units of face value called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such bond of a denomination greater than \$5,000 shall fail to present such bond to the Registrar for the issuance of new bonds of smaller denominations in exchange therefor, as aforesaid, such bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such bond shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 6. The Authority shall establish and maintain a separate sinking fund for the retirement of bonds of this Series which shall be known as the "Consolidated Bonds, Fifty-eighth Series, Due 2022, Sinking Fund." The amount required to be paid into said Sinking Fund for each year shall be the difference at October 15 of such year between the schedule amount of principal for such year and the schedule amount of principal for the next preceding year as set forth in this Section 6, determined in the manner provided in the next succeeding paragraph. Except as provided in the third paragraph of this Section 6, payments into said Sinking Fund shall be made in bonds of this Series purchased or redeemed by the Authority at or prior to October 15 of the year on account of which the payment is made. Such payments may be made at any time or times during such year at or prior to October 15 or at any time or times during any prior year. Bonds of this Series so purchased may be purchased at such prices as the Authority may deem reasonable and proper and, in the discretion of the Authority, at public or private sale, with or without advertisement and with or without notice to any person other than the seller, and bonds theretofore issued and negotiated and then held by the Authority may be purchased for such purpose as well as bonds held by others. To be eligible for payment into said Sinking Fund each such bond shall have theretofore actually been issued and negotiated by the Authority and shall either be in registered form or in coupon form (if any) with all interest coupons attached maturing on and subsequent to December 1 of the year on account of which it is paid into said Sinking Fund. Bonds paid into said Sinking Fund shall be received therein at a value equal to the principal amount of such bonds. Upon payment into said Sinking Fund of said bonds of this Series so purchased or redeemed, said bonds shall be forthwith cancelled. All bonds of this Series which shall have been redeemed at prices established by Section 5 hereof shall be deemed to have been paid into said Sinking Fund and cancelled within the requirements of the preceding sentence whether or not said bonds shall have been presented for payment upon such redemption.

The schedule amount of bonds of this Series for each year shall be determined by multiplying the aggregate principal amount of all bonds of this Series theretofore issued (whether or not any of such bonds shall have theretofore been retired) by the cumulative percentage of total principal amount specified opposite such year in the schedule of mandatory periodic retirement hereafter set forth in this Section 6; if the amount so determined shall not be a multiple of \$5,000, then the schedule amount for such year shall be the next higher multiple of \$5,000.

If at the close of October 15 of any year (except the year of maturity) set forth in said schedule of mandatory periodic retirement, the Authority shall not have made payment into said Sinking Fund on account of such year of an amount at least equal to the payment required to be made therein on account of such year, then the Authority shall, on October 16 of such year, pay into said Sinking Fund an amount in cash equal to the deficiency, and such amounts shall be applied to the redemption of bonds of this Series at December 1, 2002, and at December 1 of each year thereafter, in the manner and upon the notice set forth in Section 5 of this resolution, but, notwithstanding the redemption price set forth in Section 5, at the price of one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, at December 1, 2002, and thereafter and at or prior to December 1, 2021.

The following schedule of mandatory periodic retirement is provided for bonds of this Series:

<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>	<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>
2002	2.1	2013	38.9
2003	4.4	2014	43.9
2004	6.8	2015	49.3
2005	9.4	2016	55.1
2006	12.2	2017	61.4
2007	15.2	2018	68.1
2008	18.5	2019	75.3
2009	22.0	2020	83.1
2010	25.8	2021	91.4
2011	29.8	2022	100.0
2012	34.2		

Nothing herein contained shall be construed in any way to prevent the Authority from retiring bonds of this Series more rapidly than is shown in the foregoing schedule of mandatory periodic retirement.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however*, that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain

such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. The Authority shall appoint a bank or trust company as Trustee for and in connection with the bonds of this Series. The Trustee is hereby authorized to (i) institute any action or proceeding on behalf of the holders of the bonds of this Series against the Authority or others, or (ii) intervene in any pending action or proceeding, or (iii) take any other action which it shall in its sole discretion determine to be necessary or advisable in order to protect the rights of the holders of bonds of this Series. The rights of the Trustee in this respect and in all other respects shall be in addition to and not in substitution of any and all rights which would otherwise inure to the holder or holders of bonds of this Series. It is understood that the Trustee in its sole discretion may, but shall be under no obligation to, review the activities or operations of the Authority or any of the contracts or agreements of the Authority or exercise any of the rights or powers vested in it by this Section 8 whether on the Trustee's initiative or at the request or direction of any of the holders of bonds of this Series.

The Trustee (which shall include any successor Trustee) appointed under the provisions of this Section shall be a bank or trust company organized under the laws of the State of New York or the State of New Jersey or a national banking association doing business and having its principal office in the Port of New York District and having a total capital (including capital stock, surplus, undivided profits and capital notes, if any) aggregating at least \$25,000,000, which is willing and able to accept the office on reasonable and customary terms and is authorized by law to perform all the duties imposed upon it by this resolution.

The Trustee shall not be liable for any action taken or suffered upon any notice, resolution, request, consent, order, certificate, report, opinion, bond, or other paper or document believed by it to be genuine, and to have been signed or presented by the proper party or parties. The Trustee may consult with counsel, who may or may not be counsel to the Authority, and the opinion of such counsel shall be full and complete authorization and protection in respect of any action taken or suffered by it under this resolution in good faith and in accordance therewith. The Trustee shall not be liable in connection with the performance or nonperformance of its duties except for its own willful misconduct, negligence or bad faith.

If the Trustee shall deem it necessary or desirable that a matter be proved or established prior to taking or suffering any action under this resolution, such matter (unless other evidence in respect thereof be specifically prescribed) may be deemed to be conclusively proved and established by a certificate of an authorized officer of the Authority (who shall be any officer authorized pursuant to Section 9 hereof to execute bonds of this Series), and such certificate shall be full warrant for any action taken or suffered in good faith under the provisions of this resolution upon the faith thereof; but in its discretion the Trustee may in lieu thereof accept other evidence of such fact or matter or may require such further or additional evidence as to it may seem reasonable.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a statement of an authorized officer showing for the preceding calendar year (i) net revenues, (ii) the aggregate interest paid on bonds of the Authority, and (iii) the payments of principal on bonds of the Authority.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a copy of its annual report for such year, and its financial statement for such year accompanied by an opinion signed by an independent public accountant or firm of public accountants of recognized standing selected by the Authority and satisfactory to the Trustee.

The Authority shall file with the Trustee a copy of any Official Statement hereafter issued by the Authority in connection with the issuance of bonds by the Authority.

The Authority shall file with the Trustee a copy of the minutes of every meeting of the Authority and of the Port Authority Trans-Hudson Corporation at the time said minutes are transmitted to the Governor of New York and the Governor of New Jersey.

The Authority shall not be required to file with the Trustee (except when requested to do so by the Trustee) and the Trustee shall not be required to review any document, instrument, report or paper other than those which the Authority is expressly required hereunder to file with the Trustee. The Trustee shall not be bound to make any investigation into the facts or matters stated in any document, instrument, report or paper supplied to it, but the

Trustee in its sole discretion may make such further inquiry or investigation into such facts or matters as the Trustee may deem advisable, and, if the Trustee shall determine to make such further inquiry or investigation, the Trustee is authorized to examine such books and records of and properties owned or operated by the Authority as the Trustee may deem advisable, personally or by agent or attorney.

The Authority hereby agrees (i) to pay to the Trustee from time to time reasonable compensation for all services rendered by it hereunder, (ii) to reimburse the Trustee upon its request for all reasonable expenses, disbursements and advances incurred or made by the Trustee in connection with the exercise or performance of any of its powers or duties hereunder (including the reasonable compensation and the expenses and disbursements of its agents and counsel), and (iii) to indemnify the Trustee for, and hold it harmless against, any loss, liability or expense incurred without willful misconduct, negligence or bad faith on its part, arising out of or in connection with the exercise or performance of the Trustee's powers and duties hereunder, including the costs and expenses of defending itself against any claim or liability in connection with such exercise or performance.

The Trustee may become the owner or holder of any bonds of the Authority with the same rights as it would have were it not a Trustee. To the extent permitted by law, the Trustee may act as depository for the Authority, act as Paying Agent and Registrar of bonds of the Authority, act itself and permit any of its officers or directors to act in any other capacity with respect to the Authority, the bonds of the Authority and the holders of bonds of the Authority as it or its officers or directors would be able to act were it not a Trustee.

The Trustee may at any time resign and be discharged of the duties and obligations created by this resolution by giving not less than sixty (60) days' written notice to the Authority and publishing notice thereof, specifying the date when such resignation shall take effect, once in each week for two (2) successive calendar weeks in a newspaper of general circulation in the City of New York, State of New York, and such resignation shall take effect upon the date specified in such notice unless previously a successor shall have been appointed by the Authority in which event such resignation shall take effect immediately on the appointment of such successor.

The Trustee may be removed at any time by an instrument or concurrent instruments in writing, filed with the Trustee, and signed and acknowledged by the holders of a majority in principal amount of the bonds of this Series then outstanding or by their attorneys duly authorized, excluding any bonds held by or for the account of the Authority.

In case at any time the Trustee shall resign or shall be removed or shall become incapable of acting, or shall be adjudged a bankrupt or insolvent, or if a receiver, liquidator or conservator of the Trustee, or of its property, shall be appointed, or if any public officer shall take charge or control of the Trustee, or of its property or affairs, a successor may be appointed by the holders of a majority in principal amount of the bonds of this Series then outstanding, excluding any bonds held by or for the account of the Authority, by an instrument or concurrent instruments in writing signed and acknowledged by such bondholders or by their attorneys duly authorized and delivered to such successor Trustee, notification thereof being given to the Authority and the predecessor Trustee; *provided*, nevertheless, the Authority shall forthwith appoint a Trustee to fill such vacancy until a successor Trustee shall be appointed by the holders of bonds of this Series as authorized in this Section. The Authority shall publish notice of any such appointment made by it once in each week for two (2) consecutive calendar weeks, in a newspaper of general circulation in the City of New York, State of New York, the first publication to be made within twenty (20) days after such appointment. Any successor Trustee appointed by the Authority shall, immediately and without further act, be superseded by a Trustee appointed by the holders of bonds of this Series.

Any company into which any Trustee may be merged or converted or with which it may be consolidated or any company resulting from any merger, conversion or consolidation to which it shall be a party or any company to which any Trustee may sell or transfer all or substantially all of its corporate trust business; *provided*, such company shall be a bank or trust company located in the Port of New York District and shall be authorized by law to perform all the duties imposed upon it by this resolution, shall be the successor to such Trustee without the execution or filing of any paper or the performance of any further act.

The failure of the Authority to take any action required by this Section shall not invalidate any bond or bonds issued pursuant to this resolution or hereafter issued by the Authority, or affect any other actions of the Authority. The Authority shall in no way be restricted by this Section from entering any defense to an action or proceeding instituted by the Trustee or by the holder or holders of bonds of this Series.

SECTION 9. Each bond of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each bond of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such bond shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No bond of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such bond shall be conclusive evidence that such bond has been authenticated and delivered hereunder. Such certificate of authentication on any such bond shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such bonds issued hereunder. Bonds of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered bonds of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED BOND)

**THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED BOND
FIFTY-EIGHTH SERIES, DUE 2022**

No. C(58)-. . . .

Maturity Date: June 1, 2022 Interest Rate:% Per Annum Dated: June 1, 1987 CUSIP

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of June, 2022, upon presentation and surrender of this bond, the principal amount shown below:

together with interest thereon at the rate of per centum (%) per annum from , payable semi-annually commencing on December 1, 1987, and thereafter on each succeeding June 1 and December 1 until maturity or prior redemption. The principal of this bond shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the office of , Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this bond shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This bond is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolutions of April 9, 1987, establishing the Series of which this bond forms a part and authorizing the issuance of this bond, constitute a contract between the Authority and the registered holder of this bond, which is subject to modification as therein provided.

The Authority has appointed a Trustee for and in connection with the bonds of this Series as provided by the resolution establishing the Series of which this bond forms a part.

This bond is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this bond or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this bond forms a part. The bonds of this Series are issuable only in the form of registered bonds without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this bond or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this bond forms a part for an equal aggregate principal amount of registered bonds of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This bond may be redeemed at December 1 of any year prior to maturity beginning with 2002 to satisfy the requirements of the schedule of mandatory periodic retirement provided for bonds of this Series in and pursuant to said resolutions of the Authority at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption at December 1, 2002, and thereafter and at or prior to December 1, 2021.

This bond may at the option of the Authority be redeemed for any other purpose at any interest payment date at or subsequent to June 1, 1994, as follows:

At one hundred two per centum (102%) of its face value, plus accrued interest to the date fixed for redemption, at June 1, 1994, and thereafter and at or prior to June 1, 1996; at one hundred one per centum (101%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to June 1, 1999; and at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to December 1, 2021.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance of the Authority shall fix and determine.

If this bond shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this bond at his last known address as appearing on the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If this bond shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this bond, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this bond from and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the foregoing resolutions but shall rely solely upon the funds so deposited.

If this bond is of a denomination greater than \$5,000, and if less than all of the bonds of the Series of which this bond forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this bond shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing redemption provisions shall be deemed to refer to each such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this bond are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this bond shall forthwith present this bond to the Registrar who will issue new bonds of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this bond forms a part, including a new bond or bonds

with the aggregate principal amount of the \$5,000 unit or units called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this bond to the Registrar for the issuance of new bonds of smaller denominations in exchange or substitution therefor as aforesaid, this bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

This bond is entitled to the benefit of the sinking fund established for this Series by the resolutions of the Authority hereinabove referred to.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this bond, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this bond, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this bond to be dated as of the first day of June, 1987.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

.....
Authorized Officer

(END OF FORM OF REGISTERED BOND)

The certificate of authentication attached to each of the bonds of this Series which are executed by a facsimile signature on behalf of the Authority shall be in substantially the following form, the blank spaces being appropriately filled in:

(Signature of Registered Holder)

In the presence of: (Witness)

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within bond in every particular, with such signature appropriately guaranteed.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the bonds of this Series shall cease to be such official before such bonds shall have been actually issued, such bonds may nevertheless be issued as though the person who signed such bonds had not ceased to be such official of the Authority; and the Authority may, by issuing bonds bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the bonds and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 10. The Committee on Finance of the Authority is hereby authorized (i) prior to the issuance of the first installment of the bonds of this Series, to change the date as of which the bonds of this Series shall be dated to any date on or before December 31, 1988, and, if the date as of which the bonds of this Series shall be dated is so changed and the bonds bear a stated rate or rates of interest, the Committee shall change by the same number of days the respective dates on which interest on the bonds of this Series shall be payable; (ii) prior to the issuance of any installment of the bonds of this Series, to change the date at which any of the bonds of that installment shall mature; provided, that said date or dates shall not be more than thirty-five (35) years from the date as of which the bonds of this Series are dated; (iii) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates in connection with the redemption, retirement, call and sinking fund provisions as to such installment; (iv) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption for the bonds of this Series to retire such entire installment at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to such installment; (v) prior to the issuance of any installment of the bonds of this Series, to reduce the percentages of face value relating to the optional call provisions for such installment; (vi) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be issued on original issuance as book-entry only securities taking account of the changes and adjustments authorized in this resolution with respect to the issuance of the bonds of this Series as book-entry only securities; (vii) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be separately registrable

as to principal and interest (including any authorized incremental interest) to any one or more holders of the bonds or certificates (if any) with respect to the payment of interest thereon; (viii) prior to the issuance of the first installment of the bonds of this Series if it is desirable in connection with the use of the proceeds of the bonds of this Series for the refunding of a series of the Authority's obligations to renumber this Series for purposes of identification, to renumber this Series; (ix) prior to the issuance of the first installment of the bonds of this Series, if a prior series of Consolidated Bonds has been renumbered or the resolutions in connection therewith have been rescinded and cancelled, and if it is desirable to accomplish the capital program of the Authority utilizing a continuous numbered sequence of Consolidated Bonds, to renumber this Series; and (x) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 11. In case any bond or coupon (if any) pertaining to such a bond shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new bond or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated bond or coupon or in lieu of or in substitution for such destroyed or lost bond or coupon; or if such bond or coupon shall have matured, instead of issuing a substitute bond or coupon the Authority may pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute bond or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such bond or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute bond or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute bond or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new bond or coupon so issued in substitution. Any bond or coupon (if any) issued under the provisions of this section in lieu of any bond or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the bond or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

Consolidated Bonds, Fifty-eighth Series—Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority"), adopted a resolution providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time in conformity with said resolution for the purposes therein set forth, which said resolution (hereinafter called the "Consolidated Bond Resolution") constitutes a contract with the holders of the bonds so issued; and

WHEREAS, on the 9th day of April, 1987, the Authority adopted a resolution establishing a series of said Consolidated Bonds to be known as "Fifty-eighth Series, Due 2022" (hereinafter called "bonds of this Series"), which said resolution by its terms constitutes a contract with the holders of the bonds of this Series; and

WHEREAS, the Authority has now determined that it is necessary, advisable and in the public interest to authorize the issuance of Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series for the purposes hereinafter set forth:

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplementary thereto.

SECTION 2. The issuance of up to Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series is hereby authorized. Said bonds shall be issued in one or more installments or lots pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution and the aforesaid resolution establishing the bonds of this Series.

SECTION 3. Unless otherwise determined by the Committee on Finance in connection with the issuance of the bonds of this Series as book-entry only securities (which said Committee is hereby authorized to fix and determine such other system or method), the bonds of this Series shall be numbered upward from C(58)-1, or they may bear such other numbers as the Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority may deem appropriate.

SECTION 4. The proceeds of the bonds of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however*, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, the Committee on Finance may authorize all or any portion of the unspent proceeds of the bonds of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the bonds of this Series; (b) for the purpose of refunding, directly, by offers to exchange, or otherwise, at or before maturity, all or any part of any issue of Consolidated Bonds or Consolidated Notes issued and outstanding at the time of the sale of any installment of the bonds of this Series; and (c) for the purpose of refunding in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

SECTION 5. In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the bonds of this Series to purposes in connection with some but not all of the purposes authorized in Section 4 hereof, the Committee is hereby authorized, prior to the sale of bonds of any installment of this Series from time to time, to make such allocation by resolution. The adoption by said Committee of such a resolution prior to any such sale shall be sufficient to restrict the application of the proceeds of any bonds of such installment of this Series included in said sale to the purposes specified by the Committee in said resolution.

SECTION 6. The provisions of this resolution shall constitute a contract with the holders of the bonds issued pursuant to this resolution, and with each such holder.

Consolidated Bonds, Fifty-eighth Series—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of Two Hundred Million Dollars (\$200,000,000) in principal amount of Consolidated Bonds, Fifty-eighth Series, Due 2022 (hereinafter called the "bonds of this Series"), at a price which will result in a true interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more installments or in one or more lots, at one or more times on or before December 31, 1988, and to apply the proceeds of such sale or sales as provided in the resolution authorizing the issuance of said bonds of this Series; *provided, however*, that the total aggregate principal amount of Consolidated Bonds, Fifty-eighth Series, Due 2022, Consolidated Bonds, Fifty-ninth Series, Due 2022, Consolidated Bonds, Sixtieth Series, Due 2022, Consolidated Bonds, Sixty-first Series, Due 2022, Consolidated Bonds, Sixty-second Series, Due 2023, Consolidated Bonds, Sixty-third Series, Due 2023, Consolidated Bonds, Sixty-fourth Series, Due 2023, and Consolidated Bonds, Sixty-fifth Series, Due 2023, sold by the Committee shall not exceed One Billion Dollars (\$1,000,000,000).

SECTION 2. The Committee shall have power, in connection with the bonds of this Series, to fix the time or times of sale on or before December 31, 1988, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have power in the name of and on behalf of the Authority, in connection with the bonds of this Series, to enter into any appropriate contracts or agreements concerning any sales or exchanges; to fix the time or times and determine the terms and conditions of delivery of the bonds of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar and a Trustee, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with the bonds of this Series; to enter into appropriate contracts or agreements in connection with the issuance of the bonds of this Series as book-entry only securities; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the bonds of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the bonds offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the underwriter or underwriters purchasing the bonds in offering the bonds of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the bonds of any installment of the bonds of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such bonds of this Series to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto.

SECTION 6. The Committee; Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial

Officer; or Treasurer of the Authority is hereby authorized, in connection with the bonds of this Series, to take any action which may be necessary or desirable to assure that the bonds of this Series are in conformity with the provisions of Section 103 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, and that the interest on such bonds of this Series is not includible for Federal tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, or regulations with respect thereto, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of bonds of this Series for the purposes for which such bonds of this Series are issued, as to the status of the projects for which the proceeds of the bonds of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee and any such actions taken in connection therewith are hereby ratified.

Consolidated Bonds, Fifty-ninth Series—Establishment

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, heretofore and on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority") adopted a resolution (hereinafter called the "Consolidated Bond Resolution") providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time, in conformity with said Consolidated Bond Resolution for the purposes therein set forth, and which Consolidated Bond Resolution constitutes a contract with the holders of the Consolidated Bonds so issued; and

WHEREAS, said Consolidated Bond Resolution provides that such Consolidated Bonds shall be issued in such series as the Authority may determine, and that the characteristics of the bonds of such series shall be determined by the Authority by and in the resolution establishing such series, and that the resolution establishing any series may contain other terms and provisions not inconsistent with the Consolidated Bond Resolution; and

WHEREAS, the Authority has heretofore established various series of said Consolidated Bonds and has now determined that it is necessary, advisable and in the public interest to establish another series of said Consolidated Bonds, without prejudice to its right hereafter to establish other and additional series of such Consolidated Bonds;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions.

SECTION 2. There is hereby established a series of said Consolidated Bonds to be known as "Consolidated Bonds, Fifty-ninth Series, Due 2022," to be issued in conformity with said Consolidated Bond Resolution and for any one or more of the purposes specified therein as may be provided in the resolution authorizing the issuance of such series. This resolution shall constitute a contract with the holders of said bonds of Consolidated Bonds, Fifty-ninth Series, Due 2022, which said bonds are hereinafter called "bonds of this Series," and with each such holder.

SECTION 3. Bonds of this Series shall be issued in one or more installments or lots as the Authority may hereafter determine.

The bonds of this Series shall be dated as of September 1, 1987, shall mature on September 1, 2022, and shall bear a stated rate or rates of interest, including fixed, variable or incremental rates for the term of the bonds or any portion thereof, or a combination thereof, from the semi-annual interest payment date next preceding their date of issuance, or if such date of issuance shall be an interest payment date, from such date of issuance, not exceeding twelve per centum (12%) per annum as may be determined by the Committee on Finance of the Authority. The Committee on Finance is hereby authorized to fix and determine any other date as that upon which interest shall commence and said interest rate or rates, or to determine that said bonds of this Series shall not bear a stated rate of interest. If the bonds of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on March 1, 1988, and thereafter on each succeeding September 1 and March 1 until maturity or prior redemption.

Both principal of and interest on the bonds of this Series shall be payable in lawful money of the United States of America. Principal of the bonds of this Series shall be payable upon presentation and surrender thereof by the registered holders, or in the case of coupon bonds of this Series, if any, upon presentation and surrender thereof, at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered bonds of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder and interest on the coupon bonds of this Series, if any, shall be payable upon presentation and surrender of the coupons appertaining thereto at such office or offices of such Paying Agent or Paying Agents. If on original issuance the bonds of this Series are to be issued as book-entry only securities, subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an

alternate method for the payment of both or either of the principal of and interest on the bonds of this Series to the registered holder thereof; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system, then the foregoing payment provisions of this paragraph shall apply to the bonds of this Series.

Bonds of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the first installment of the bonds of this Series, there shall be in effect a provision of the Internal Revenue Code of 1986, as amended (hereinafter called the "Code"), or successor provisions of law, or the regulations with respect thereto, which does not provide that, for the interest on the bonds of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such bonds of this Series must be issued in registered form, then the bonds of this Series may also be issued in the form of coupon bonds payable to bearer, in which event the Committee on Finance is hereby authorized to adopt an appropriate form of coupon bond issuable only in the denomination of \$5,000. If on original issuance the bonds of this Series are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an appropriate form of bond or other evidence of indebtedness; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system then the provisions of Section 9 of this resolution shall apply to the bonds of this Series.

Registered bonds of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 4. The Authority will keep or cause to be kept at the offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of bonds of this Series. Each registered bond of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmaturing coupons thereto attached, may be exchanged for a registered bond or bonds, registered as designated in such request, of the same aggregate principal amount and series as the surrendered bond or bonds, of any of the authorized denominations. A registered bond or bonds of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered bond or bonds, registered as designated in such request, of any other authorized denominations, or in the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds with appropriate coupons attached, or a combination of such coupon and registered bonds, in each case of the same aggregate principal amount as the surrendered bond or bonds.

All requests for the registration, transfer, exchange and delivery of bonds as above provided shall be filed with the Registrar of the Authority; all bonds to be surrendered pursuant to such request shall be surrendered to the Registrar; and all bonds delivered in exchange as aforesaid shall be delivered by the Registrar. All bonds of this Series surrendered to the Registrar in exchange for other bonds or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of bonds of this Series except in the denomination of \$5,000 in the case of coupon bonds (if any) or in the denominations of \$5,000 or integral multiples of \$5,000 in the case of registered bonds or to authorize the issuance of coupon bonds of this Series if at any time there shall be in effect a provision of the Code or the applicable regulations related thereto which provides that for the interest on the bonds of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such bonds of this Series must be issued in registered form.

SECTION 5. Except as provided in Section 6 of this resolution, bonds of this Series shall be redeemable at the option of the Authority, in whole or in part, on interest payment dates, at or subsequent to September 1, 1994, and prior to maturity, as follows:

At one hundred two per centum (102%) of their face value, plus accrued interest to the date fixed for redemption, at September 1, 1994, and thereafter and at or prior to September 1, 1996; at one hundred one per centum (101%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to September 1, 1999; and at one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to March 1, 2022.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any bonds of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption, to the registered holders of the bonds of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If on original issuance the bonds of this Series are to be issued only in registered form or are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method by which the Authority shall give notice of intention to redeem any bonds of this Series.

Before the date fixed for redemption specified in the Authority's notice of intention to redeem, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding bonds which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption and the premium (if any), such principal amount and premium (if any), to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the bonds so called for redemption and to be paid to them respectively upon presentation and surrender of the said bonds with accrued interest included in such redemption price to be paid to the registered holders in accordance with the provisions of this resolution and in the case of coupon bonds (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such bonds. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided or as provided by the Committee on Finance, the bonds so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such bonds on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the bonds so called from and after the date fixed for their redemption, and such bonds and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered bonds of denominations greater than \$5,000, if less than all of the bonds of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing provisions of this Section 5 shall be deemed to refer to such \$5,000 unit of face value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by any bond are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said bond shall forthwith present said bond to the Registrar who shall issue a new bond or bonds of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 4 of this resolution, including a new bond or bonds with the aggregate principal amount of the \$5,000

unit or units of face value called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such bond of a denomination greater than \$5,000 shall fail to present such bond to the Registrar for the issuance of new bonds of smaller denominations in exchange therefor, as aforesaid, such bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such bond shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 6. The Authority shall establish and maintain a separate sinking fund for the retirement of bonds of this Series which shall be known as the "Consolidated Bonds, Fifty-ninth Series, Due 2022, Sinking Fund." The amount required to be paid into said Sinking Fund for each year shall be the difference at July 15 of such year between the schedule amount of principal for such year and the schedule amount of principal for the next preceding year as set forth in this Section 6, determined in the manner provided in the next succeeding paragraph. Except as provided in the third paragraph of this Section 6, payments into said Sinking Fund shall be made in bonds of this Series purchased or redeemed by the Authority at or prior to July 15 of the year on account of which the payment is made. Such payments may be made at any time or times during such year at or prior to July 15 or at any time or times during any prior year. Bonds of this Series so purchased may be purchased at such prices as the Authority may deem reasonable and proper and, in the discretion of the Authority, at public or private sale, with or without advertisement and with or without notice to any person other than the seller, and bonds theretofore issued and negotiated and then held by the Authority may be purchased for such purpose as well as bonds held by others. To be eligible for payment into said Sinking Fund each such bond shall have theretofore actually been issued and negotiated by the Authority and shall either be in registered form or in coupon form (if any) with all interest coupons attached maturing on and subsequent to September 1 of the year on account of which it is paid into said Sinking Fund. Bonds paid into said Sinking Fund shall be received therein at a value equal to the principal amount of such bonds. Upon payment into said Sinking Fund of said bonds of this Series so purchased or redeemed, said bonds shall be forthwith cancelled. All bonds of this Series which shall have been redeemed at prices established by Section 5 hereof shall be deemed to have been paid into said Sinking Fund and cancelled within the requirements of the preceding sentence whether or not said bonds shall have been presented for payment upon such redemption.

The schedule amount of bonds of this Series for each year shall be determined by multiplying the aggregate principal amount of all bonds of this Series theretofore issued (whether or not any of such bonds shall have theretofore been retired) by the cumulative percentage of total principal amount specified opposite such year in the schedule of mandatory periodic retirement hereafter set forth in this Section 6; if the amount so determined shall not be a multiple of \$5,000, then the schedule amount for such year shall be the next higher multiple of \$5,000.

If at the close of July 15 of any year (except the year of maturity) set forth in said schedule of mandatory periodic retirement, the Authority shall not have made payment into said Sinking Fund on account of such year of an amount at least equal to the payment required to be made therein on account of such year, then the Authority shall, on July 16 of such year, pay into said Sinking Fund an amount in cash equal to the deficiency, and such amounts shall be applied to the redemption of bonds of this Series at September 1, 2002, and at September 1 of each year thereafter, in the manner and upon the notice set forth in Section 5 of this resolution, but, notwithstanding the redemption price set forth in Section 5, at the price of one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, at September 1, 2002, and thereafter and at or prior to September 1, 2021.

The following schedule of mandatory periodic retirement is provided for bonds of this Series:

<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>	<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>
2002	2.1	2013	38.9
2003	4.4	2014	43.9
2004	6.8	2015	49.3
2005	9.4	2016	55.1
2006	12.2	2017	61.4
2007	15.2	2018	68.1
2008	18.5	2019	75.3
2009	22.0	2020	83.1
2010	25.8	2021	91.4
2011	29.8	2022	100.0
2012	34.2		

Nothing herein contained shall be construed in any way to prevent the Authority from retiring bonds of this Series more rapidly than is shown in the foregoing schedule of mandatory periodic retirement.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however*, that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. The Authority shall appoint a bank or trust company as Trustee for and in connection with the bonds of this Series. The Trustee is hereby authorized to (i) institute any action or proceeding on behalf of the holders of the bonds of this Series against the Authority or others, or (ii) intervene in any pending action or proceeding, or (iii) take any other action which it shall in its sole discretion determine to be necessary or advisable in order to protect the rights of the holders of bonds of this Series. The rights of the Trustee in this respect and in all other respects shall be in addition to and not in substitution of any and all rights which would otherwise inure to the holder or holders of bonds of this Series. It is understood that the Trustee in its sole discretion may, but shall be under no obligation to, review the activities or operations of the Authority or any of the contracts or agreements of the Authority or exercise any of the rights or powers vested in it by this Section 8 whether on the Trustee's initiative or at the request or direction of any of the holders of bonds of this Series.

The Trustee (which shall include any successor Trustee) appointed under the provisions of this Section shall be a bank or trust company organized under the laws of the State of New York or the State of New Jersey or a national banking association doing business and having its principal office in the Port of New York District and having a total capital (including capital stock, surplus, undivided profits and capital notes, if any) aggregating at least \$25,000,000, which is willing and able to accept the office on reasonable and customary terms and is authorized by law to perform all the duties imposed upon it by this resolution.

The Trustee shall not be liable for any action taken or suffered upon any notice, resolution, request, consent, order, certificate, report, opinion, bond, or other paper or document believed by it to be genuine, and to have been signed or presented by the proper party or parties. The Trustee may consult with counsel, who may or may not be counsel to the Authority, and the opinion of such counsel shall be full and complete authorization and protection in respect of any action taken or suffered by it under this resolution in good faith and in accordance therewith. The Trustee shall not be liable in connection with the performance or nonperformance of its duties except for its own willful misconduct, negligence or bad faith.

If the Trustee shall deem it necessary or desirable that a matter be proved or established prior to taking or suffering any action under this resolution, such matter (unless other evidence in respect thereof be specifically prescribed) may be deemed to be conclusively proved and established by a certificate of an authorized officer of the Authority (who shall be any officer authorized pursuant to Section 9 hereof to execute bonds of this Series), and such certificate shall be full warrant for any action taken or suffered in good faith under the provisions of this resolution upon the faith thereof; but in its discretion the Trustee may in lieu thereof accept other evidence of such fact or matter or may require such further or additional evidence as to it may seem reasonable.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a statement of an authorized officer showing for the preceding calendar year (i) net revenues, (ii) the aggregate interest paid on bonds of the Authority, and (iii) the payments of principal on bonds of the Authority.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a copy of its annual report for such year, and its financial statement for such year accompanied by an opinion signed by an independent public accountant or firm of public accountants of recognized standing selected by the Authority and satisfactory to the Trustee.

The Authority shall file with the Trustee a copy of any Official Statement hereafter issued by the Authority in connection with the issuance of bonds by the Authority.

The Authority shall file with the Trustee a copy of the minutes of every meeting of the Authority and of the Port Authority Trans-Hudson Corporation at the time said minutes are transmitted to the Governor of New York and the Governor of New Jersey.

The Authority shall not be required to file with the Trustee (except when requested to do so by the Trustee) and the Trustee shall not be required to review any document, instrument, report or paper other than those which the Authority is expressly required hereunder to file with the Trustee. The Trustee shall not be bound to make any investigation into the facts or matters stated in any document, instrument, report or paper supplied to it, but the Trustee in its sole discretion may make such further inquiry or investigation into such facts or matters as the Trustee may deem advisable, and, if the Trustee shall determine to make such further inquiry or investigation, the Trustee is authorized to examine such books and records of and properties owned or operated by the Authority as the Trustee may deem advisable, personally or by agent or attorney.

The Authority hereby agrees (i) to pay to the Trustee from time to time reasonable compensation for all services rendered by it hereunder, (ii) to reimburse the Trustee upon its request for all reasonable expenses, disbursements and advances incurred or made by the Trustee in connection with the exercise or performance of any of its powers or duties hereunder (including the reasonable compensation and the expenses and disbursements of its agents and counsel), and (iii) to indemnify the Trustee for, and hold it harmless against, any loss, liability or expense incurred without willful misconduct, negligence or bad faith on its part, arising out of or in connection with the exercise or performance of the Trustee's powers and duties hereunder, including the costs and expenses of defending itself against any claim or liability in connection with such exercise or performance.

The Trustee may become the owner or holder of any bonds of the Authority with the same rights as it would have were it not a Trustee. To the extent permitted by law, the Trustee may act as depository for the Authority, act as Paying Agent and Registrar of bonds of the Authority, act itself and permit any of its officers or directors to act in any other capacity with respect to the Authority, the bonds of the Authority and the holders of bonds of the Authority as it or its officers or directors would be able to act were it not a Trustee.

The Trustee may at any time resign and be discharged of the duties and obligations created by this resolution by giving not less than sixty (60) days' written notice to the Authority and publishing notice thereof, specifying the date when such resignation shall take effect, once in each week for two (2) successive calendar weeks in a newspaper of general circulation in the City of New York, State of New York, and such resignation shall take effect upon the date specified in such notice unless previously a successor shall have been appointed by the Authority in which event such resignation shall take effect immediately on the appointment of such successor.

The Trustee may be removed at any time by an instrument or concurrent instruments in writing, filed with the Trustee, and signed and acknowledged by the holders of a majority in principal amount of the bonds of this Series then outstanding or by their attorneys duly authorized, excluding any bonds held by or for the account of the Authority.

In case at any time the Trustee shall resign or shall be removed or shall become incapable of acting, or shall be adjudged a bankrupt or insolvent, or if a receiver, liquidator or conservator of the Trustee, or of its property, shall be appointed, or if any public officer shall take charge or control of the Trustee, or of its property or affairs, a successor may be appointed by the holders of a majority in principal amount of the bonds of this Series then outstanding, excluding any bonds held by or for the account of the Authority, by an instrument or concurrent instruments in writing signed and acknowledged by such bondholders or by their attorneys duly authorized and delivered to such successor Trustee, notification thereof being given to the Authority and the predecessor Trustee; *provided*, nevertheless, the Authority shall forthwith appoint a Trustee to fill such vacancy until a successor Trustee shall be appointed by the holders of bonds of this Series as authorized in this Section. The Authority shall publish notice of any such appointment made by it once in each week for two (2) consecutive calendar weeks, in a newspaper of general circulation in the City of New York, State of New York, the first publication to be made within twenty (20) days after such appointment. Any successor Trustee appointed by the Authority shall, immediately and without further act, be superseded by a Trustee appointed by the holders of bonds of this Series.

Any company into which any Trustee may be merged or converted or with which it may be consolidated or any company resulting from any merger, conversion or consolidation to which it shall be a party or any company to which any Trustee may sell or transfer all or substantially all of its corporate trust business; *provided*, such company shall be a bank or trust company located in the Port of New York District and shall be authorized by law to perform all the duties imposed upon it by this resolution, shall be the successor to such Trustee without the execution or filing of any paper or the performance of any further act.

The failure of the Authority to take any action required by this Section shall not invalidate any bond or bonds issued pursuant to this resolution or hereafter issued by the Authority, or affect any other actions of the Authority. The Authority shall in no way be restricted by this Section from entering any defense to an action or proceeding instituted by the Trustee or by the holder or holders of bonds of this Series.

SECTION 9. Each bond of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the

Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each bond of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such bond shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No bond of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such bond shall be conclusive evidence that such bond has been authenticated and delivered hereunder. Such certificate of authentication on any such bond shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such bonds issued hereunder. Bonds of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered bonds of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED BOND)

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED BOND
FIFTY-NINTH SERIES, DUE 2022

No. C(59)-

Maturity Date: September 1, 2022 Interest Rate: . . . % Per Annum Dated: September 1, 1987 CUSIP . . .

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of September, 2022, upon presentation and surrender of this bond, the principal amount shown below:

together with interest thereon at the rate of _____ per centum (_____ %) per annum from _____, payable semi-annually commencing on March 1, 1988, and thereafter on each succeeding September 1 and March 1 until maturity or prior redemption. The principal of this bond shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the office of _____, Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this bond shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This bond is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolutions of April 9, 1987, establishing the Series of which this bond forms a part and authorizing the issuance of this bond, constitute a contract between the Authority and the registered holder of this bond, which is subject to modification as therein provided.

The Authority has appointed a Trustee for and in connection with the bonds of this Series as provided by the resolution establishing the Series of which this bond forms a part.

This bond is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this bond or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this bond forms a part. The bonds of this Series are issuable only in the form of registered bonds without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this bond or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this bond forms a part for an equal aggregate principal amount of registered bonds of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This bond may be redeemed at September 1 of any year prior to maturity beginning with 2002 to satisfy the requirements of the schedule of mandatory periodic retirement provided for bonds of this Series in and pursuant to said resolutions of the Authority at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption at September 1, 2002, and thereafter and at or prior to September 1, 2021.

This bond may at the option of the Authority be redeemed for any other purpose at any interest payment date at or subsequent to September 1, 1994, as follows:

At one hundred two per centum (102%) of its face value, plus accrued interest to the date fixed for redemption, at September 1, 1994, and thereafter and at or prior to September 1, 1996; at one hundred one per centum (101%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to September 1, 1999; and at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to March 1, 2022.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance of the Authority shall fix and determine.

If this bond shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this bond at his last known address as appearing on the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If this bond shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this bond, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this bond from and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the foregoing resolutions but shall rely solely upon the funds so deposited.

If this bond is of a denomination greater than \$5,000, and if less than all of the bonds of the Series of which this bond forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this bond shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing redemption provisions shall be deemed to refer to each such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this bond are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this bond shall forthwith present this bond to the Registrar who will issue new bonds of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this bond forms a part, including a new bond or bonds

with the aggregate principal amount of the \$5,000 unit or units called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this bond to the Registrar for the issuance of new bonds of smaller denominations in exchange or substitution therefor as aforesaid, this bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

This bond is entitled to the benefit of the sinking fund established for this Series by the resolutions of the Authority hereinabove referred to.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this bond, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this bond, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this bond to be dated as of the first day of September, 1987.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within bond in every particular, with such signature appropriately guaranteed.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the bonds of this Series shall cease to be such official before such bonds shall have been actually issued, such bonds may nevertheless be issued as though the person who signed such bonds had not ceased to be such official of the Authority; and the Authority may, by issuing bonds bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the bonds and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 10. The Committee on Finance of the Authority is hereby authorized (i) prior to the issuance of the first installment of the bonds of this Series, to change the date as of which the bonds of this Series shall be dated to any date on or before December 31, 1988, and, if the date as of which the bonds of this Series shall be dated is so changed and the bonds bear a stated rate or rates of interest, the Committee shall change by the same number of days the respective dates on which interest on the bonds of this Series shall be payable; (ii) prior to the issuance of any installment of the bonds of this Series, to change the date at which any of the bonds of that installment shall mature; provided, that said date or dates shall not be more than thirty-five (35) years from the date as of which the bonds of this Series are dated; (iii) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates in connection with the redemption, retirement, call and sinking fund provisions as to such installment; (iv) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption for the bonds of this Series to retire such entire installment at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to such installment; (v) prior to the issuance of any installment of the bonds of this Series, to reduce the percentages of face value relating to the optional call provisions for such installment; (vi) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be issued on original issuance as book-entry only securities taking account of the changes and adjustments authorized in this resolution with respect to the issuance of the bonds of this Series as book-entry only securities; (vii) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be separately registrable

as to principal and interest (including any authorized incremental interest) to any one or more holders of the bonds or certificates (if any) with respect to the payment of interest thereon; (viii) prior to the issuance of the first installment of the bonds of this Series if it is desirable in connection with the use of the proceeds of the bonds of this Series for the refunding of a series of the Authority's obligations to renumber this Series for purposes of identification, to renumber this Series; (ix) prior to the issuance of the first installment of the bonds of this Series, if a prior series of Consolidated Bonds has been renumbered or the resolutions in connection therewith have been rescinded and cancelled, and if it is desirable to accomplish the capital program of the Authority utilizing a continuous numbered sequence of Consolidated Bonds, to renumber this Series; and (x) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 11. In case any bond or coupon (if any) pertaining to such a bond shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new bond or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated bond or coupon or in lieu of or in substitution for such destroyed or lost bond or coupon; or if such bond or coupon shall have matured, instead of issuing a substitute bond or coupon the Authority may pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute bond or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such bond or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute bond or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute bond or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new bond or coupon so issued in substitution. Any bond or coupon (if any) issued under the provisions of this section in lieu of any bond or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the bond or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

Consolidated Bonds, Fifty-ninth Series—Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority"), adopted a resolution providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time in conformity with said resolution for the purposes therein set forth, which said resolution (hereinafter called the "Consolidated Bond Resolution") constitutes a contract with the holders of the bonds so issued; and

WHEREAS, on the 9th day of April, 1987, the Authority adopted a resolution establishing a series of said Consolidated Bonds to be known as "Fifty-ninth Series, Due 2022" (hereinafter called "bonds of this Series"), which said resolution by its terms constitutes a contract with the holders of the bonds of this Series; and

WHEREAS, the Authority has now determined that it is necessary, advisable and in the public interest to authorize the issuance of Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series for the purposes hereinafter set forth:

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplementary thereto.

SECTION 2. The issuance of up to Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series is hereby authorized. Said bonds shall be issued in one or more installments or lots pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution and the aforesaid resolution establishing the bonds of this Series.

SECTION 3. Unless otherwise determined by the Committee on Finance in connection with the issuance of the bonds of this Series as book-entry only securities (which said Committee is hereby authorized to fix and determine such other system or method), the bonds of this Series shall be numbered upward from C(59)-1, or they may bear such other numbers as the Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority may deem appropriate.

SECTION 4. The proceeds of the bonds of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however*, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, the Committee on Finance may authorize all or any portion of the unspent proceeds of the bonds of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the bonds of this Series; (b) for the purpose of refunding, directly, by offers to exchange, or otherwise, at or before maturity, all or any part of any issue of Consolidated Bonds or Consolidated Notes issued and outstanding at the time of the sale of any installment of the bonds of this Series; and (c) for the purpose of refunding in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

SECTION 5. In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the bonds of this Series to purposes in connection with some but not all of the purposes authorized in Section 4 hereof, the Committee is hereby authorized, prior to the sale of bonds of any installment of this Series from time to time, to make such allocation by resolution. The adoption by said Committee of such a resolution prior to any such sale shall be sufficient to restrict the application of the proceeds of any bonds of such installment of this Series included in said sale to the purposes specified by the Committee in said resolution.

SECTION 6. The provisions of this resolution shall constitute a contract with the holders of the bonds issued pursuant to this resolution, and with each such holder.

Consolidated Bonds, Fifty-ninth Series—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of Two Hundred Million Dollars (\$200,000,000) in principal amount of Consolidated Bonds, Fifty-ninth Series, Due 2022 (hereinafter called the "bonds of this Series"), at a price which will result in a true interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more installments or in one or more lots, at one or more times on or before December 31, 1988, and to apply the proceeds of such sale or sales as provided in the resolution authorizing the issuance of said bonds of this Series; *provided, however*, that the total aggregate principal amount of Consolidated Bonds, Fifty-eighth Series, Due 2022, Consolidated Bonds, Fifty-ninth Series, Due 2022, Consolidated Bonds, Sixtieth Series, Due 2022, Consolidated Bonds, Sixty-first Series, Due 2022, Consolidated Bonds, Sixty-second Series, Due 2023, Consolidated Bonds, Sixty-third Series, Due 2023, Consolidated Bonds, Sixty-fourth Series, Due 2023, and Consolidated Bonds, Sixty-fifth Series, Due 2023, sold by the Committee shall not exceed One Billion Dollars (\$1,000,000,000).

SECTION 2. The Committee shall have power, in connection with the bonds of this Series, to fix the time or times of sale on or before December 31, 1988, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have power in the name of and on behalf of the Authority, in connection with the bonds of this Series, to enter into any appropriate contracts or agreements concerning any sales or exchanges; to fix the time or times and determine the terms and conditions of delivery of the bonds of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar and a Trustee, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with the bonds of this Series; to enter into appropriate contracts or agreements in connection with the issuance of the bonds of this Series as book-entry only securities; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the bonds of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the bonds offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the underwriter or underwriters purchasing the bonds in offering the bonds of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the bonds of any installment of the bonds of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such bonds of this Series to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto.

SECTION 6. The Committee; Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial

Officer; or Treasurer of the Authority is hereby authorized, in connection with the bonds of this Series, to take any action which may be necessary or desirable to assure that the bonds of this Series are in conformity with the provisions of Section 103 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, and that the interest on such bonds of this Series is not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, or regulations with respect thereto, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of bonds of this Series for the purposes for which such bonds of this Series are issued, as to the status of the projects for which the proceeds of the bonds of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee and any such actions taken in connection therewith are hereby ratified.

Consolidated Bonds, Sixtieth Series—Establishment

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, heretofore and on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority") adopted a resolution (hereinafter called the "Consolidated Bond Resolution") providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time, in conformity with said Consolidated Bond Resolution for the purposes therein set forth, and which Consolidated Bond Resolution constitutes a contract with the holders of the Consolidated Bonds so issued; and

WHEREAS, said Consolidated Bond Resolution provides that such Consolidated Bonds shall be issued in such series as the Authority may determine, and that the characteristics of the bonds of such series shall be determined by the Authority by and in the resolution establishing such series, and that the resolution establishing any series may contain other terms and provisions not inconsistent with the Consolidated Bond Resolution; and

WHEREAS, the Authority has heretofore established various series of said Consolidated Bonds and has now determined that it is necessary, advisable and in the public interest to establish another series of said Consolidated Bonds, without prejudice to its right hereafter to establish other and additional series of such Consolidated Bonds;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions.

SECTION 2. There is hereby established a series of said Consolidated Bonds to be known as "Consolidated Bonds, Sixtieth Series, Due 2022," to be issued in conformity with said Consolidated Bond Resolution and for any one or more of the purposes specified therein as may be provided in the resolution authorizing the issuance of such series. This resolution shall constitute a contract with the holders of said bonds of Consolidated Bonds, Sixtieth Series, Due 2022, which said bonds are hereinafter called "bonds of this Series," and with each such holder.

SECTION 3. Bonds of this Series shall be issued in one or more installments or lots as the Authority may hereafter determine.

The bonds of this Series shall be dated as of October 1, 1987, shall mature on October 1, 2022, and shall bear a stated rate or rates of interest, including fixed, variable or incremental rates for the term of the bonds or any portion thereof, or a combination thereof, from the semi-annual interest payment date next preceding their date of issuance, or if such date of issuance shall be an interest payment date, from such date of issuance, not exceeding twelve per centum (12%) per annum as may be determined by the Committee on Finance of the Authority. The Committee on Finance is hereby authorized to fix and determine any other date as that upon which interest shall commence and said interest rate or rates, or to determine that said bonds of this Series shall not bear a stated rate of interest. If the bonds of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on April 1, 1988, and thereafter on each succeeding October 1 and April 1 until maturity or prior redemption.

Both principal of and interest on the bonds of this Series shall be payable in lawful money of the United States of America. Principal of the bonds of this Series shall be payable upon presentation and surrender thereof by the registered holders, or in the case of coupon bonds of this Series, if any, upon presentation and surrender thereof, at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered bonds of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder and interest on the coupon bonds of this Series, if any, shall be payable upon presentation and surrender of the coupons appertaining thereto at such office or offices of such Paying Agent or Paying Agents. If on original issuance the bonds of this Series are to be issued as book-entry only securities, subject to a book-entry

system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method for the payment of both or either of the principal of and interest on the bonds of this Series to the registered holder thereof; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system, then the foregoing payment provisions of this paragraph shall apply to the bonds of this Series.

Bonds of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the first installment of the bonds of this Series, there shall be in effect a provision of the Internal Revenue Code of 1986, as amended (hereinafter called the "Code"), or successor provisions of law, or the regulations with respect thereto, which does not provide that, for the interest on the bonds of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such bonds of this Series must be issued in registered form, then the bonds of this Series may also be issued in the form of coupon bonds payable to bearer, in which event the Committee on Finance is hereby authorized to adopt an appropriate form of coupon bond issuable only in the denomination of \$5,000. If on original issuance the bonds of this Series are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an appropriate form of bond or other evidence of indebtedness; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system then the provisions of Section 9 of this resolution shall apply to the bonds of this Series.

Registered bonds of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 4. The Authority will keep or cause to be kept at the offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of bonds of this Series. Each registered bond of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmatured coupons thereto attached, may be exchanged for a registered bond or bonds, registered as designated in such request, of the same aggregate principal amount and series as the surrendered bond or bonds, of any of the authorized denominations. A registered bond or bonds of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered bond or bonds, registered as designated in such request, of any other authorized denominations, or in the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds with appropriate coupons attached, or a combination of such coupon and registered bonds, in each case of the same aggregate principal amount as the surrendered bond or bonds.

All requests for the registration, transfer, exchange and delivery of bonds as above provided shall be filed with the Registrar of the Authority; all bonds to be surrendered pursuant to such request shall be surrendered to the Registrar; and all bonds delivered in exchange as aforesaid shall be delivered by the Registrar. All bonds of this Series surrendered to the Registrar in exchange for other bonds or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of bonds of this Series except in the denomination of \$5,000 in the case of coupon bonds (if any) or in the denominations of \$5,000 or integral multiples of \$5,000 in the case of registered bonds or to authorize the issuance of coupon bonds of this Series if at any time there shall be in effect a provision of the Code or the applicable regulations related thereto which provides that for the interest on the bonds of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such bonds of this Series must be issued in registered form.

SECTION 5. Except as provided in Section 6 of this resolution, bonds of this Series shall be redeemable at the option of the Authority, in whole or in part, on interest payment dates, at or subsequent to October 1, 1994, and prior to maturity, as follows:

At one hundred two per centum (102%) of their face value, plus accrued interest to the date fixed for redemption, at October 1, 1994, and thereafter and at or prior to October 1, 1996; at one hundred one per centum (101%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to October 1, 1999; and at one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to April 1, 2022.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any bonds of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption, to the registered holders of the bonds of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however,* that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If on original issuance the bonds of this Series are to be issued only in registered form or are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method by which the Authority shall give notice of intention to redeem any bonds of this Series.

Before the date fixed for redemption specified in the Authority's notice of intention to redeem, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding bonds which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption and the premium (if any), such principal amount and premium (if any), to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the bonds so called for redemption and to be paid to them respectively upon presentation and surrender of the said bonds with accrued interest included in such redemption price to be paid to the registered holders in accordance with the provisions of this resolution and in the case of coupon bonds (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such bonds. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided or as provided by the Committee on Finance, the bonds so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such bonds on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the bonds so called from and after the date fixed for their redemption, and such bonds and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered bonds of denominations greater than \$5,000, if less than all of the bonds of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing provisions of this Section 5 shall be deemed to refer to such \$5,000 unit of face value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by any bond are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said bond shall forthwith present said bond to the Registrar who shall issue a new bond or bonds of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 4 of this resolution, including a new bond or bonds with the aggregate principal amount of the \$5,000

unit or units of face value called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such bond of a denomination greater than \$5,000 shall fail to present such bond to the Registrar for the issuance of new bonds of smaller denominations in exchange therefor, as aforesaid, such bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such bond shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 6. The Authority shall establish and maintain a separate sinking fund for the retirement of bonds of this Series which shall be known as the "Consolidated Bonds, Sixtieth Series, Due 2022, Sinking Fund." The amount required to be paid into said Sinking Fund for each year shall be the difference at August 15 of such year between the schedule amount of principal for such year and the schedule amount of principal for the next preceding year as set forth in this Section 6, determined in the manner provided in the next succeeding paragraph. Except as provided in the third paragraph of this Section 6, payments into said Sinking Fund shall be made in bonds of this Series purchased or redeemed by the Authority at or prior to August 15 of the year on account of which the payment is made. Such payments may be made at any time or times during such year at or prior to August 15 or at any time or times during any prior year. Bonds of this Series so purchased may be purchased at such prices as the Authority may deem reasonable and proper and, in the discretion of the Authority, at public or private sale, with or without advertisement and with or without notice to any person other than the seller, and bonds theretofore issued and negotiated and then held by the Authority may be purchased for such purpose as well as bonds held by others. To be eligible for payment into said Sinking Fund each such bond shall have theretofore actually been issued and negotiated by the Authority and shall either be in registered form or in coupon form (if any) with all interest coupons attached maturing on and subsequent to October 1 of the year on account of which it is paid into said Sinking Fund. Bonds paid into said Sinking Fund shall be received therein at a value equal to the principal amount of such bonds. Upon payment into said Sinking Fund of said bonds of this Series so purchased or redeemed, said bonds shall be forthwith cancelled. All bonds of this Series which shall have been redeemed at prices established by Section 5 hereof shall be deemed to have been paid into said Sinking Fund and cancelled within the requirements of the preceding sentence whether or not said bonds shall have been presented for payment upon such redemption.

The schedule amount of bonds of this Series for each year shall be determined by multiplying the aggregate principal amount of all bonds of this Series theretofore issued (whether or not any of such bonds shall have theretofore been retired) by the cumulative percentage of total principal amount specified opposite such year in the schedule of mandatory periodic retirement hereafter set forth in this Section 6; if the amount so determined shall not be a multiple of \$5,000, then the schedule amount for such year shall be the next higher multiple of \$5,000.

If at the close of August 15 of any year (except the year of maturity) set forth in said schedule of mandatory periodic retirement, the Authority shall not have made payment into said Sinking Fund on account of such year of an amount at least equal to the payment required to be made therein on account of such year, then the Authority shall, on August 16 of such year, pay into said Sinking Fund an amount in cash equal to the deficiency, and such amounts shall be applied to the redemption of bonds of this Series at October 1, 2002, and at October 1 of each year thereafter, in the manner and upon the notice set forth in Section 5 of this resolution, but, notwithstanding the redemption price set forth in Section 5, at the price of one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, at October 1, 2002, and thereafter and at or prior to October 1, 2021.

The following schedule of mandatory periodic retirement is provided for bonds of this Series:

<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>	<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>
2002	2.1	2013	38.9
2003	4.4	2014	43.9
2004	6.8	2015	49.3
2005	9.4	2016	55.1
2006	12.2	2017	61.4
2007	15.2	2018	68.1
2008	18.5	2019	75.3
2009	22.0	2020	83.1
2010	25.8	2021	91.4
2011	29.8	2022	100.0
2012	34.2		

Nothing herein contained shall be construed in any way to prevent the Authority from retiring bonds of this Series more rapidly than is shown in the foregoing schedule of mandatory periodic retirement.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however*, that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. The Authority shall appoint a bank or trust company as Trustee for and in connection with the bonds of this Series. The Trustee is hereby authorized to (i) institute any action or proceeding on behalf of the holders of the bonds of this Series against the Authority or others, or (ii) intervene in any pending action or proceeding, or (iii) take any other action which it shall in its sole discretion determine to be necessary or advisable in order to protect the rights of the holders of bonds of this Series. The rights of the Trustee in this respect and in all other respects shall be in addition to and not in substitution of any and all rights which would otherwise inure to the holder or holders of bonds of this Series. It is understood that the Trustee in its sole discretion may, but shall be under no obligation to, review the activities or operations of the Authority or any of the contracts or agreements of the Authority or exercise any of the rights or powers vested in it by this Section 8 whether on the Trustee's initiative or at the request or direction of any of the holders of bonds of this Series.

The Trustee (which shall include any successor Trustee) appointed under the provisions of this Section shall be a bank or trust company organized under the laws of the State of New York or the State of New Jersey or a national banking association doing business and having its principal office in the Port of New York District and having a total capital (including capital stock, surplus, undivided profits and capital notes, if any) aggregating at least \$25,000,000, which is willing and able to accept the office on reasonable and customary terms and is authorized by law to perform all the duties imposed upon it by this resolution.

The Trustee shall not be liable for any action taken or suffered upon any notice, resolution, request, consent, order, certificate, report, opinion, bond, or other paper or document believed by it to be genuine, and to have been signed or presented by the proper party or parties. The Trustee may consult with counsel, who may or may not be counsel to the Authority, and the opinion of such counsel shall be full and complete authorization and protection in respect of any action taken or suffered by it under this resolution in good faith and in accordance therewith. The Trustee shall not be liable in connection with the performance or nonperformance of its duties except for its own willful misconduct, negligence or bad faith.

If the Trustee shall deem it necessary or desirable that a matter be proved or established prior to taking or suffering any action under this resolution, such matter (unless other evidence in respect thereof be specifically prescribed) may be deemed to be conclusively proved and established by a certificate of an authorized officer of the Authority (who shall be any officer authorized pursuant to Section 9 hereof to execute bonds of this Series), and such certificate shall be full warrant for any action taken or suffered in good faith under the provisions of this resolution upon the faith thereof; but in its discretion the Trustee may in lieu thereof accept other evidence of such fact or matter or may require such further or additional evidence as to it may seem reasonable.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a statement of an authorized officer showing for the preceding calendar year (i) net revenues, (ii) the aggregate interest paid on bonds of the Authority, and (iii) the payments of principal on bonds of the Authority.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a copy of its annual report for such year, and its financial statement for such year accompanied by an opinion signed by an independent public accountant or firm of public accountants of recognized standing selected by the Authority and satisfactory to the Trustee.

The Authority shall file with the Trustee a copy of any Official Statement hereafter issued by the Authority in connection with the issuance of bonds by the Authority.

The Authority shall file with the Trustee a copy of the minutes of every meeting of the Authority and of the Port Authority Trans-Hudson Corporation at the time said minutes are transmitted to the Governor of New York and the Governor of New Jersey.

The Authority shall not be required to file with the Trustee (except when requested to do so by the Trustee) and the Trustee shall not be required to review any document, instrument, report or paper other than those which the Authority is expressly required hereunder to file with the Trustee. The Trustee shall not be bound to make any investigation into the facts or matters stated in any document, instrument, report or paper supplied to it, but the Trustee in its sole discretion may make such further inquiry or investigation into such facts or matters as the Trustee may deem advisable, and, if the Trustee shall determine to make such further inquiry or investigation, the Trustee is authorized to examine such books and records of and properties owned or operated by the Authority as the Trustee may deem advisable, personally or by agent or attorney.

The Authority hereby agrees (i) to pay to the Trustee from time to time reasonable compensation for all services rendered by it hereunder, (ii) to reimburse the Trustee upon its request for all reasonable expenses, disbursements and advances incurred or made by the Trustee in connection with the exercise or performance of any of its powers or duties hereunder (including the reasonable compensation and the expenses and disbursements of its agents and counsel), and (iii) to indemnify the Trustee for, and hold it harmless against, any loss, liability or expense incurred without willful misconduct, negligence or bad faith on its part, arising out of or in connection with the exercise or performance of the Trustee's powers and duties hereunder, including the costs and expenses of defending itself against any claim or liability in connection with such exercise or performance.

The Trustee may become the owner or holder of any bonds of the Authority with the same rights as it would have were it not a Trustee. To the extent permitted by law, the Trustee may act as depository for the Authority, act as Paying Agent and Registrar of bonds of the Authority, act itself and permit any of its officers or directors to act in any other capacity with respect to the Authority, the bonds of the Authority and the holders of bonds of the Authority as it or its officers or directors would be able to act were it not a Trustee.

The Trustee may at any time resign and be discharged of the duties and obligations created by this resolution by giving not less than sixty (60) days' written notice to the Authority and publishing notice thereof, specifying the date when such resignation shall take effect, once in each week for two (2) successive calendar weeks in a newspaper of general circulation in the City of New York, State of New York, and such resignation shall take effect upon the date specified in such notice unless previously a successor shall have been appointed by the Authority in which event such resignation shall take effect immediately on the appointment of such successor.

The Trustee may be removed at any time by an instrument or concurrent instruments in writing, filed with the Trustee, and signed and acknowledged by the holders of a majority in principal amount of the bonds of this Series then outstanding or by their attorneys duly authorized, excluding any bonds held by or for the account of the Authority.

In case at any time the Trustee shall resign or shall be removed or shall become incapable of acting, or shall be adjudged a bankrupt or insolvent, or if a receiver, liquidator or conservator of the Trustee, or of its property, shall be appointed, or if any public officer shall take charge or control of the Trustee, or of its property or affairs, a successor may be appointed by the holders of a majority in principal amount of the bonds of this Series then outstanding, excluding any bonds held by or for the account of the Authority, by an instrument or concurrent instruments in writing signed and acknowledged by such bondholders or by their attorneys duly authorized and delivered to such successor Trustee, notification thereof being given to the Authority and the predecessor Trustee; *provided*, nevertheless, the Authority shall forthwith appoint a Trustee to fill such vacancy until a successor Trustee shall be appointed by the holders of bonds of this Series as authorized in this Section. The Authority shall publish notice of any such appointment made by it once in each week for two (2) consecutive calendar weeks, in a newspaper of general circulation in the City of New York, State of New York, the first publication to be made within twenty (20) days after such appointment. Any successor Trustee appointed by the Authority shall, immediately and without further act, be superseded by a Trustee appointed by the holders of bonds of this Series.

Any company into which any Trustee may be merged or converted or with which it may be consolidated or any company resulting from any merger, conversion or consolidation to which it shall be a party or any company to which any Trustee may sell or transfer all or substantially all of its corporate trust business; *provided*, such company shall be a bank or trust company located in the Port of New York District and shall be authorized by law to perform all the duties imposed upon it by this resolution, shall be the successor to such Trustee without the execution or filing of any paper or the performance of any further act.

The failure of the Authority to take any action required by this Section shall not invalidate any bond or bonds issued pursuant to this resolution or hereafter issued by the Authority, or affect any other actions of the Authority. The Authority shall in no way be restricted by this Section from entering any defense to an action or proceeding instituted by the Trustee or by the holder or holders of bonds of this Series.

SECTION 9. Each bond of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief

Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each bond of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such bond shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No bond of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such bond shall be conclusive evidence that such bond has been authenticated and delivered hereunder. Such certificate of authentication on any such bond shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such bonds issued hereunder. Bonds of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered bonds of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED BOND)

**THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED BOND
SIXTIETH SERIES, DUE 2022**

No. C(60)-

Maturity Date: October 1, 2022 Interest Rate:% Per Annum Dated: October 1, 1987 CUSIP

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of October, 2022, upon presentation and surrender of this bond, the principal amount shown below:

together with interest thereon at the rate of _____ per centum (_____ %) per annum from _____, payable semi-annually commencing on April 1, 1988, and thereafter on each succeeding October 1 and April 1 until maturity or prior redemption. The principal of this bond shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the office of _____, Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this bond shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This bond is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolutions of April 9, 1987, establishing the Series of which this bond forms a part and authorizing the issuance of this bond, constitute a contract between the Authority and the registered holder of this bond, which is subject to modification as therein provided.

The Authority has appointed a Trustee for and in connection with the bonds of this Series as provided by the resolution establishing the Series of which this bond forms a part.

This bond is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this bond or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this bond forms a part. The bonds of this Series are issuable only in the form of registered bonds without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this bond or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this bond forms a part for an equal aggregate principal amount of registered bonds of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This bond may be redeemed at October 1 of any year prior to maturity beginning with 2002 to satisfy the requirements of the schedule of mandatory periodic retirement provided for bonds of this Series in and pursuant to said resolutions of the Authority at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption at October 1, 2002, and thereafter and at or prior to October 1, 2021.

This bond may at the option of the Authority be redeemed for any other purpose at any interest payment date at or subsequent to October 1, 1994, as follows:

At one hundred two per centum (102%) of its face value, plus accrued interest to the date fixed for redemption, at October 1, 1994, and thereafter and at or prior to October 1, 1996; at one hundred one per centum (101%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to October 1, 1999; and at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to April 1, 2022.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance of the Authority shall fix and determine.

If this bond shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this bond at his last known address as appearing on the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If this bond shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this bond, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this bond from and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the foregoing resolutions but shall rely solely upon the funds so deposited.

If this bond is of a denomination greater than \$5,000, and if less than all of the bonds of the Series of which this bond forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this bond shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing redemption provisions shall be deemed to refer to each such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this bond are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this bond shall forthwith present this bond to the Registrar who will issue new bonds of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this bond forms a part, including a new bond or bonds

with the aggregate principal amount of the \$5,000 unit or units called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this bond to the Registrar for the issuance of new bonds of smaller denominations in exchange or substitution therefor as aforesaid, this bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

This bond is entitled to the benefit of the sinking fund established for this Series by the resolutions of the Authority hereinabove referred to.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this bond, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this bond, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this bond to be dated as of the first day of October, 1987.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

.....

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within bond in every particular, with such signature appropriately guaranteed.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the bonds of this Series shall cease to be such official before such bonds shall have been actually issued, such bonds may nevertheless be issued as though the person who signed such bonds had not ceased to be such official of the Authority; and the Authority may, by issuing bonds bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the bonds and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 10. The Committee on Finance of the Authority is hereby authorized (i) prior to the issuance of the first installment of the bonds of this Series, to change the date as of which the bonds of this Series shall be dated to any date on or before December 31, 1988, and, if the date as of which the bonds of this Series shall be dated is so changed and the bonds bear a stated rate or rates of interest, the Committee shall change by the same number of days the respective dates on which interest on the bonds of this Series shall be payable; (ii) prior to the issuance of any installment of the bonds of this Series, to change the date at which any of the bonds of that installment shall mature; provided, that said date or dates shall not be more than thirty-five (35) years from the date as of which the bonds of this Series are dated; (iii) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates in connection with the redemption, retirement, call and sinking fund provisions as to such installment; (iv) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption for the bonds of this Series to retire such entire installment at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to such installment; (v) prior to the issuance of any installment of the bonds of this Series, to reduce the percentages of face value relating to the optional call provisions for such installment; (vi) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be issued on original issuance as book-entry only securities taking account of the changes and adjustments authorized in this resolution with respect to the issuance of the bonds of this Series as book-entry only securities; (vii) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be separately registrable

as to principal and interest (including any authorized incremental interest) to any one or more holders of the bonds or certificates (if any) with respect to the payment of interest thereon; (viii) prior to the issuance of the first installment of the bonds of this Series if it is desirable in connection with the use of the proceeds of the bonds of this Series for the refunding of a series of the Authority's obligations to renumber this Series for purposes of identification, to renumber this Series; (ix) prior to the issuance of the first installment of the bonds of this Series, if a prior series of Consolidated Bonds has been renumbered or the resolutions in connection therewith have been rescinded and cancelled, and if it is desirable to accomplish the capital program of the Authority utilizing a continuous numbered sequence of Consolidated Bonds, to renumber this Series; and (x) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 11. In case any bond or coupon (if any) pertaining to such a bond shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new bond or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated bond or coupon or in lieu of or in substitution for such destroyed or lost bond or coupon; or if such bond or coupon shall have matured, instead of issuing a substitute bond or coupon the Authority may pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute bond or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such bond or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute bond or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute bond or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new bond or coupon so issued in substitution. Any bond or coupon (if any) issued under the provisions of this section in lieu of any bond or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the bond or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

Consolidated Bonds, Sixtieth Series—Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority"), adopted a resolution providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time in conformity with said resolution for the purposes therein set forth, which said resolution (hereinafter called the "Consolidated Bond Resolution") constitutes a contract with the holders of the bonds so issued; and

WHEREAS, on the 9th day of April, 1987, the Authority adopted a resolution establishing a series of said Consolidated Bonds to be known as "Sixtieth Series, Due 2022" (hereinafter called "bonds of this Series"), which said resolution by its terms constitutes a contract with the holders of the bonds of this Series; and

WHEREAS, the Authority has now determined that it is necessary, advisable and in the public interest to authorize the issuance of Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series for the purposes hereinafter set forth:

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplementary thereto.

SECTION 2. The issuance of up to Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series is hereby authorized. Said bonds shall be issued in one or more installments or lots pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution and the aforesaid resolution establishing the bonds of this Series.

SECTION 3. Unless otherwise determined by the Committee on Finance in connection with the issuance of the bonds of this Series as book-entry only securities (which said Committee is hereby authorized to fix and determine such other system or method), the bonds of this Series shall be numbered upward from C(60)-1, or they may bear such other numbers as the Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority may deem appropriate.

SECTION 4. The proceeds of the bonds of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however*, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, the Committee on Finance may authorize all or any portion of the unspent proceeds of the bonds of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the bonds of this Series; (b) for the purpose of refunding, directly, by offers to exchange, or otherwise, at or before maturity, all or any part of any issue of Consolidated Bonds or Consolidated Notes issued and outstanding at the time of the sale of any installment of the bonds of this Series; and (c) for the purpose of refunding in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

SECTION 5. In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the bonds of this Series to purposes in connection with some but not all of the purposes authorized in Section 4 hereof, the Committee is hereby authorized, prior to the sale of bonds of any installment of this Series from time to time, to make such allocation by resolution. The adoption by said Committee of such a resolution prior to any such sale shall be sufficient to restrict the application of the proceeds of any bonds of such installment of this Series included in said sale to the purposes specified by the Committee in said resolution.

SECTION 6. The provisions of this resolution shall constitute a contract with the holders of the bonds issued pursuant to this resolution, and with each such holder.

Consolidated Bonds, Sixtieth Series—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of Two Hundred Million Dollars (\$200,000,000) in principal amount of Consolidated Bonds, Sixtieth Series, Due 2022 (hereinafter called the "bonds of this Series"), at a price which will result in a true interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more installments or in one or more lots, at one or more times on or before December 31, 1988, and to apply the proceeds of such sale or sales as provided in the resolution authorizing the issuance of said bonds of this Series; *provided, however*, that the total aggregate principal amount of Consolidated Bonds, Fifty-eighth Series, Due 2022, Consolidated Bonds, Fifty-ninth Series, Due 2022, Consolidated Bonds, Sixtieth Series, Due 2022, Consolidated Bonds, Sixty-first Series, Due 2022, Consolidated Bonds, Sixty-second Series, Due 2023, Consolidated Bonds, Sixty-third Series, Due 2023, Consolidated Bonds, Sixty-fourth Series, Due 2023, and Consolidated Bonds, Sixty-fifth Series, Due 2023, sold by the Committee shall not exceed One Billion Dollars (\$1,000,000,000).

SECTION 2. The Committee shall have power, in connection with the bonds of this Series, to fix the time or times of sale on or before December 31, 1988, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have power in the name of and on behalf of the Authority, in connection with the bonds of this Series, to enter into any appropriate contracts or agreements concerning any sales or exchanges; to fix the time or times and determine the terms and conditions of delivery of the bonds of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar and a Trustee, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with the bonds of this Series; to enter into appropriate contracts or agreements in connection with the issuance of the bonds of this Series as book-entry only securities; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the bonds of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the bonds offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the underwriter or underwriters purchasing the bonds in offering the bonds of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the bonds of any installment of the bonds of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such bonds of this Series to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto.

SECTION 6. The Committee; Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial

Officer; or Treasurer of the Authority is hereby authorized, in connection with the bonds of this Series, to take any action which may be necessary or desirable to assure that the bonds of this Series are in conformity with the provisions of Section 103 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, and that the interest on such bonds of this Series is not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, or regulations with respect thereto, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of bonds of this Series for the purposes for which such bonds of this Series are issued, as to the status of the projects for which the proceeds of the bonds of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee and any such actions taken in connection therewith are hereby ratified.

Consolidated Bonds, Sixty-first Series—Establishment

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, heretofore and on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority") adopted a resolution (hereinafter called the "Consolidated Bond Resolution") providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time, in conformity with said Consolidated Bond Resolution for the purposes therein set forth, and which Consolidated Bond Resolution constitutes a contract with the holders of the Consolidated Bonds so issued; and

WHEREAS, said Consolidated Bond Resolution provides that such Consolidated Bonds shall be issued in such series as the Authority may determine, and that the characteristics of the bonds of such series shall be determined by the Authority by and in the resolution establishing such series, and that the resolution establishing any series may contain other terms and provisions not inconsistent with the Consolidated Bond Resolution; and

WHEREAS, the Authority has heretofore established various series of said Consolidated Bonds and has now determined that it is necessary, advisable and in the public interest to establish another series of said Consolidated Bonds, without prejudice to its right hereafter to establish other and additional series of such Consolidated Bonds;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions.

SECTION 2. There is hereby established a series of said Consolidated Bonds to be known as "Consolidated Bonds, Sixty-first Series, Due 2022," to be issued in conformity with said Consolidated Bond Resolution and for any one or more of the purposes specified therein as may be provided in the resolution authorizing the issuance of such series. This resolution shall constitute a contract with the holders of said bonds of Consolidated Bonds, Sixty-first Series, Due 2022, which said bonds are hereinafter called "bonds of this Series," and with each such holder.

SECTION 3. Bonds of this Series shall be issued in one or more installments or lots as the Authority may hereafter determine.

The bonds of this Series shall be dated as of December 1, 1987, shall mature on December 1, 2022, and shall bear a stated rate or rates of interest, including fixed, variable or incremental rates for the term of the bonds or any portion thereof, or a combination thereof, from the semi-annual interest payment date next preceding their date of issuance, or if such date of issuance shall be an interest payment date, from such date of issuance, not exceeding twelve per centum (12%) per annum as may be determined by the Committee on Finance of the Authority. The Committee on Finance is hereby authorized to fix and determine any other date as that upon which interest shall commence and said interest rate or rates, or to determine that said bonds of this Series shall not bear a stated rate of interest. If the bonds of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on June 1, 1988, and thereafter on each succeeding December 1 and June 1 until maturity or prior redemption.

Both principal of and interest on the bonds of this Series shall be payable in lawful money of the United States of America. Principal of the bonds of this Series shall be payable upon presentation and surrender thereof by the registered holders, or in the case of coupon bonds of this Series, if any, upon presentation and surrender thereof, at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered bonds of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder and interest on the coupon bonds of this Series, if any, shall be payable upon presentation and surrender of the coupons appertaining thereto at such office or offices of such Paying Agent or Paying Agents. If on original issuance the bonds of this Series are to be issued as book-entry only securities, subject to a book-entry

system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method for the payment of both or either of the principal of and interest on the bonds of this Series to the registered holder thereof; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system, then the foregoing payment provisions of this paragraph shall apply to the bonds of this Series.

Bonds of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the first installment of the bonds of this Series, there shall be in effect a provision of the Internal Revenue Code of 1986, as amended (hereinafter called the "Code"), or successor provisions of law, or the regulations with respect thereto, which does not provide that, for the interest on the bonds of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such bonds of this Series must be issued in registered form, then the bonds of this Series may also be issued in the form of coupon bonds payable to bearer, in which event the Committee on Finance is hereby authorized to adopt an appropriate form of coupon bond issuable only in the denomination of \$5,000. If on original issuance the bonds of this Series are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an appropriate form of bond or other evidence of indebtedness; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system then the provisions of Section 9 of this resolution shall apply to the bonds of this Series.

Registered bonds of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 4. The Authority will keep or cause to be kept at the offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of bonds of this Series. Each registered bond of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmatured coupons thereto attached, may be exchanged for a registered bond or bonds, registered as designated in such request, of the same aggregate principal amount and series as the surrendered bond or bonds, of any of the authorized denominations. A registered bond or bonds of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered bond or bonds, registered as designated in such request, of any other authorized denominations, or in the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds with appropriate coupons attached, or a combination of such coupon and registered bonds, in each case of the same aggregate principal amount as the surrendered bond or bonds.

All requests for the registration, transfer, exchange and delivery of bonds as above provided shall be filed with the Registrar of the Authority; all bonds to be surrendered pursuant to such request shall be surrendered to the Registrar; and all bonds delivered in exchange as aforesaid shall be delivered by the Registrar. All bonds of this Series surrendered to the Registrar in exchange for other bonds or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series; including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of bonds of this Series except in the denomination of \$5,000 in the case of coupon bonds (if any) or in the denominations of \$5,000 or integral multiples of \$5,000 in the case of registered bonds or to authorize the issuance of coupon bonds of this Series if at any time there shall be in effect a provision of the Code or the applicable regulations related thereto which provides that for the interest on the bonds of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such bonds of this Series must be issued in registered form.

SECTION 5. Except as provided in Section 6 of this resolution, bonds of this Series shall be redeemable at the option of the Authority, in whole or in part, on interest payment dates, at or subsequent to December 1, 1994, and prior to maturity, as follows:

At one hundred two per centum (102%) of their face value, plus accrued interest to the date fixed for redemption, at December 1, 1994, and thereafter and at or prior to December 1, 1996; at one hundred one per centum (101%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to December 1, 1999; and at one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to June 1, 2022.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any bonds of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption, to the registered holders of the bonds of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If on original issuance the bonds of this Series are to be issued only in registered form or are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method by which the Authority shall give notice of intention to redeem any bonds of this Series.

Before the date fixed for redemption specified in the Authority's notice of intention to redeem, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding bonds which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption and the premium (if any), such principal amount and premium (if any), to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the bonds so called for redemption and to be paid to them respectively upon presentation and surrender of the said bonds with accrued interest included in such redemption price to be paid to the registered holders in accordance with the provisions of this resolution and in the case of coupon bonds (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unexpired coupons (if any) pertaining to such bonds. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided or as provided by the Committee on Finance, the bonds so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such bonds on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the bonds so called from and after the date fixed for their redemption, and such bonds and the unexpired coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered bonds of denominations greater than \$5,000, if less than all of the bonds of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing provisions of this Section 5 shall be deemed to refer to such \$5,000 unit of face value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by any bond are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said bond shall forthwith present said bond to the Registrar who shall issue a new bond or bonds of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 4 of this resolution, including a new bond or bonds with the aggregate principal amount of the \$5,000

unit or units of face value called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such bond of a denomination greater than \$5,000 shall fail to present such bond to the Registrar for the issuance of new bonds of smaller denominations in exchange therefor, as aforesaid, such bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such bond shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 6. The Authority shall establish and maintain a separate sinking fund for the retirement of bonds of this Series which shall be known as the "Consolidated Bonds, Sixty-first Series, Due 2022, Sinking Fund." The amount required to be paid into said Sinking Fund for each year shall be the difference at October 15 of such year between the schedule amount of principal for such year and the schedule amount of principal for the next preceding year as set forth in this Section 6, determined in the manner provided in the next succeeding paragraph. Except as provided in the third paragraph of this Section 6, payments into said Sinking Fund shall be made in bonds of this Series purchased or redeemed by the Authority at or prior to October 15 of the year on account of which the payment is made. Such payments may be made at any time or times during such year at or prior to October 15 or at any time or times during any prior year. Bonds of this Series so purchased may be purchased at such prices as the Authority may deem reasonable and proper and, in the discretion of the Authority, at public or private sale, with or without advertisement and with or without notice to any person other than the seller, and bonds theretofore issued and negotiated and then held by the Authority may be purchased for such purpose as well as bonds held by others. To be eligible for payment into said Sinking Fund each such bond shall have theretofore actually been issued and negotiated by the Authority and shall either be in registered form or in coupon form (if any) with all interest coupons attached maturing on and subsequent to December 1 of the year on account of which it is paid into said Sinking Fund. Bonds paid into said Sinking Fund shall be received therein at a value equal to the principal amount of such bonds. Upon payment into said Sinking Fund of said bonds of this Series so purchased or redeemed, said bonds shall be forthwith cancelled. All bonds of this Series which shall have been redeemed at prices established by Section 5 hereof shall be deemed to have been paid into said Sinking Fund and cancelled within the requirements of the preceding sentence whether or not said bonds shall have been presented for payment upon such redemption.

The schedule amount of bonds of this Series for each year shall be determined by multiplying the aggregate principal amount of all bonds of this Series theretofore issued (whether or not any of such bonds shall have theretofore been retired) by the cumulative percentage of total principal amount specified opposite such year in the schedule of mandatory periodic retirement hereafter set forth in this Section 6; if the amount so determined shall not be a multiple of \$5,000, then the schedule amount for such year shall be the next higher multiple of \$5,000.

If at the close of October 15 of any year (except the year of maturity) set forth in said schedule of mandatory periodic retirement, the Authority shall not have made payment into said Sinking Fund on account of such year of an amount at least equal to the payment required to be made therein on account of such year, then the Authority shall, on October 16 of such year, pay into said Sinking Fund an amount in cash equal to the deficiency, and such amounts shall be applied to the redemption of bonds of this Series at December 1, 2002, and at December 1 of each year thereafter, in the manner and upon the notice set forth in Section 5 of this resolution, but, notwithstanding the redemption price set forth in Section 5, at the price of one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, at December 1, 2002, and thereafter and at or prior to December 1, 2021.

The following schedule of mandatory periodic retirement is provided for bonds of this Series:

<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>	<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>
2002	2.1	2013	38.9
2003	4.4	2014	43.9
2004	6.8	2015	49.3
2005	9.4	2016	55.1
2006	12.2	2017	61.4
2007	15.2	2018	68.1
2008	18.5	2019	75.3
2009	22.0	2020	83.1
2010	25.8	2021	91.4
2011	29.8	2022	100.0
2012	34.2		

Nothing herein contained shall be construed in any way to prevent the Authority from retiring bonds of this Series more rapidly than is shown in the foregoing schedule of mandatory periodic retirement.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however*, that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. The Authority shall appoint a bank or trust company as Trustee for and in connection with the bonds of this Series. The Trustee is hereby authorized to (i) institute any action or proceeding on behalf of the holders of the bonds of this Series against the Authority or others, or (ii) intervene in any pending action or proceeding, or (iii) take any other action which it shall in its sole discretion determine to be necessary or advisable in order to protect the rights of the holders of bonds of this Series. The rights of the Trustee in this respect and in all other respects shall be in addition to and not in substitution of any and all rights which would otherwise inure to the holder or holders of bonds of this Series. It is understood that the Trustee in its sole discretion may, but shall be under no obligation to, review the activities or operations of the Authority or any of the contracts or agreements of the Authority or exercise any of the rights or powers vested in it by this Section 8 whether on the Trustee's initiative or at the request or direction of any of the holders of bonds of this Series.

The Trustee (which shall include any successor Trustee) appointed under the provisions of this Section shall be a bank or trust company organized under the laws of the State of New York or the State of New Jersey or a national banking association doing business and having its principal office in the Port of New York District and having a total capital (including capital stock, surplus, undivided profits and capital notes, if any) aggregating at least \$25,000,000, which is willing and able to accept the office on reasonable and customary terms and is authorized by law to perform all the duties imposed upon it by this resolution.

The Trustee shall not be liable for any action taken or suffered upon any notice, resolution, request, consent, order, certificate, report, opinion, bond, or other paper or document believed by it to be genuine, and to have been signed or presented by the proper party or parties. The Trustee may consult with counsel, who may or may not be counsel to the Authority, and the opinion of such counsel shall be full and complete authorization and protection in respect of any action taken or suffered by it under this resolution in good faith and in accordance therewith. The Trustee shall not be liable in connection with the performance or nonperformance of its duties except for its own willful misconduct, negligence or bad faith.

If the Trustee shall deem it necessary or desirable that a matter be proved or established prior to taking or suffering any action under this resolution, such matter (unless other evidence in respect thereof be specifically prescribed) may be deemed to be conclusively proved and established by a certificate of an authorized officer of the Authority (who shall be any officer authorized pursuant to Section 9 hereof to execute bonds of this Series), and such certificate shall be full warrant for any action taken or suffered in good faith under the provisions of this resolution upon the faith thereof; but in its discretion the Trustee may in lieu thereof accept other evidence of such fact or matter or may require such further or additional evidence as to it may seem reasonable.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a statement of an authorized officer showing for the preceding calendar year (i) net revenues, (ii) the aggregate interest paid on bonds of the Authority, and (iii) the payments of principal on bonds of the Authority.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a copy of its annual report for such year, and its financial statement for such year accompanied by an opinion signed by an independent public accountant or firm of public accountants of recognized standing selected by the Authority and satisfactory to the Trustee.

The Authority shall file with the Trustee a copy of any Official Statement hereafter issued by the Authority in connection with the issuance of bonds by the Authority.

The Authority shall file with the Trustee a copy of the minutes of every meeting of the Authority and of the Port Authority Trans-Hudson Corporation at the time said minutes are transmitted to the Governor of New York and the Governor of New Jersey.

The Authority shall not be required to file with the Trustee (except when requested to do so by the Trustee) and the Trustee shall not be required to review any document, instrument, report or paper other than those which the Authority is expressly required hereunder to file with the Trustee. The Trustee shall not be bound to make any investigation into the facts or matters stated in any document, instrument, report or paper supplied to it, but the Trustee in its sole discretion may make such further inquiry or investigation into such facts or matters as the Trustee may deem advisable, and, if the Trustee shall determine to make such further inquiry or investigation, the Trustee is authorized to examine such books and records of and properties owned or operated by the Authority as the Trustee may deem advisable, personally or by agent or attorney.

The Authority hereby agrees (i) to pay to the Trustee from time to time reasonable compensation for all services rendered by it hereunder, (ii) to reimburse the Trustee upon its request for all reasonable expenses, disbursements and advances incurred or made by the Trustee in connection with the exercise or performance of any of its powers or duties hereunder (including the reasonable compensation and the expenses and disbursements of its agents and counsel), and (iii) to indemnify the Trustee for, and hold it harmless against, any loss, liability or expense incurred without willful misconduct, negligence or bad faith on its part, arising out of or in connection with the exercise or performance of the Trustee's powers and duties hereunder, including the costs and expenses of defending itself against any claim or liability in connection with such exercise or performance.

The Trustee may become the owner or holder of any bonds of the Authority with the same rights as it would have were it not a Trustee. To the extent permitted by law, the Trustee may act as depositary for the Authority, act as Paying Agent and Registrar of bonds of the Authority, act itself and permit any of its officers or directors to act in any other capacity with respect to the Authority, the bonds of the Authority and the holders of bonds of the Authority as it or its officers or directors would be able to act were it not a Trustee.

The Trustee may at any time resign and be discharged of the duties and obligations created by this resolution by giving not less than sixty (60) days' written notice to the Authority and publishing notice thereof, specifying the date when such resignation shall take effect, once in each week for two (2) successive calendar weeks in a newspaper of general circulation in the City of New York, State of New York, and such resignation shall take effect upon the date specified in such notice unless previously a successor shall have been appointed by the Authority in which event such resignation shall take effect immediately on the appointment of such successor.

The Trustee may be removed at any time by an instrument or concurrent instruments in writing, filed with the Trustee, and signed and acknowledged by the holders of a majority in principal amount of the bonds of this Series then outstanding or by their attorneys duly authorized, excluding any bonds held by or for the account of the Authority.

In case at any time the Trustee shall resign or shall be removed or shall become incapable of acting, or shall be adjudged a bankrupt or insolvent, or if a receiver, liquidator or conservator of the Trustee, or of its property, shall be appointed, or if any public officer shall take charge or control of the Trustee, or of its property or affairs, a successor may be appointed by the holders of a majority in principal amount of the bonds of this Series then outstanding, excluding any bonds held by or for the account of the Authority, by an instrument or concurrent instruments in writing signed and acknowledged by such bondholders or by their attorneys duly authorized and delivered to such successor Trustee, notification thereof being given to the Authority and the predecessor Trustee; *provided*, nevertheless, the Authority shall forthwith appoint a Trustee to fill such vacancy until a successor Trustee shall be appointed by the holders of bonds of this Series as authorized in this Section. The Authority shall publish notice of any such appointment made by it once in each week for two (2) consecutive calendar weeks, in a newspaper of general circulation in the City of New York, State of New York, the first publication to be made within twenty (20) days after such appointment. Any successor Trustee appointed by the Authority shall, immediately and without further act, be superseded by a Trustee appointed by the holders of bonds of this Series.

Any company into which any Trustee may be merged or converted or with which it may be consolidated or any company resulting from any merger, conversion or consolidation to which it shall be a party or any company to which any Trustee may sell or transfer all or substantially all of its corporate trust business; *provided*, such company shall be a bank or trust company located in the Port of New York District and shall be authorized by law to perform all the duties imposed upon it by this resolution, shall be the successor to such Trustee without the execution or filing of any paper or the performance of any further act.

The failure of the Authority to take any action required by this Section shall not invalidate any bond or bonds issued pursuant to this resolution or hereafter issued by the Authority, or affect any other actions of the Authority. The Authority shall in no way be restricted by this Section from entering any defense to an action or proceeding instituted by the Trustee or by the holder or holders of bonds of this Series.

SECTION 9. Each bond of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the

Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each bond of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such bond shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No bond of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such bond shall be conclusive evidence that such bond has been authenticated and delivered hereunder. Such certificate of authentication on any such bond shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such bonds issued hereunder. Bonds of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered bonds of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED BOND)

**THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED BOND
SIXTY-FIRST SERIES, DUE 2022**

No. C(61)-

Maturity Date: December 1, 2022 Interest Rate: . . .% Per Annum Dated: December 1, 1987 CUSIP . . .

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of December, 2022, upon presentation and surrender of this bond, the principal amount shown below:

together with interest thereon at the rate of per centum (%) per annum from , payable semi-annually commencing on June 1, 1988, and thereafter on each succeeding December 1 and June 1 until maturity or prior redemption. The principal of this bond shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the office of , Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this bond shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This bond is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolutions of April 9, 1987, establishing the Series of which this bond forms a part and authorizing the issuance of this bond, constitute a contract between the Authority and the registered holder of this bond, which is subject to modification as therein provided.

The Authority has appointed a Trustee for and in connection with the bonds of this Series as provided by the resolution establishing the Series of which this bond forms a part.

This bond is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this bond or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this bond forms a part. The bonds of this Series are issuable only in the form of registered bonds without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this bond or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this bond forms a part for an equal aggregate principal amount of registered bonds of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This bond may be redeemed at December 1 of any year prior to maturity beginning with 2002 to satisfy the requirements of the schedule of mandatory periodic retirement provided for bonds of this Series in and pursuant to said resolutions of the Authority at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption at December 1, 2002, and thereafter and at or prior to December 1, 2021.

This bond may at the option of the Authority be redeemed for any other purpose at any interest payment date at or subsequent to December 1, 1994, as follows:

At one hundred two per centum (102%) of its face value, plus accrued interest to the date fixed for redemption, at December 1, 1994, and thereafter and at or prior to December 1, 1996; at one hundred one per centum (101%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to December 1, 1999; and at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to June 1, 2022.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance of the Authority shall fix and determine.

If this bond shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this bond at his last known address as appearing on the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If this bond shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this bond, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this bond from and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the foregoing resolutions but shall rely solely upon the funds so deposited.

If this bond is of a denomination greater than \$5,000, and if less than all of the bonds of the Series of which this bond forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this bond shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing redemption provisions shall be deemed to refer to each such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this bond are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this bond shall forthwith present this bond to the Registrar who will issue new bonds of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this bond forms a part, including a new bond or bonds

with the aggregate principal amount of the \$5,000 unit or units called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this bond to the Registrar for the issuance of new bonds of smaller denominations in exchange or substitution therefor as aforesaid, this bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

This bond is entitled to the benefit of the sinking fund established for this Series by the resolutions of the Authority hereinabove referred to.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this bond, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this bond, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this bond to be dated as of the first day of December, 1987.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

.....
Authorized Officer

(END OF FORM OF REGISTERED BOND)

The certificate of authentication attached to each of the bonds of this Series which are executed by a facsimile signature on behalf of the Authority shall be in substantially the following form, the blank spaces being appropriately filled in:

(FORM OF CERTIFICATE OF AUTHENTICATION)

This bond is one of the bonds issued under the provisions of the within-named resolution and the Consolidated Bond Resolution.

Date of Authentication:

REGISTRAR
as Registrar of the Authority

By

In the presence of: (Witness)

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within bond in every particular, with such signature appropriately guaranteed.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the bonds of this Series shall cease to be such official before such bonds shall have been actually issued, such bonds may nevertheless be issued as though the person who signed such bonds had not ceased to be such official of the Authority; and the Authority may, by issuing bonds bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the bonds and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 10. The Committee on Finance of the Authority is hereby authorized (i) prior to the issuance of the first installment of the bonds of this Series, to change the date as of which the bonds of this Series shall be dated to any date on or before December 31, 1988, and, if the date as of which the bonds of this Series shall be dated is so changed and the bonds bear a stated rate or rates of interest, the Committee shall change by the same number of days the respective dates on which interest on the bonds of this Series shall be payable; (ii) prior to the issuance of any installment of the bonds of this Series, to change the date at which any of the bonds of that installment shall mature; provided, that said date or dates shall not be more than thirty-five (35) years from the date as of which the bonds of this Series are dated; (iii) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates in connection with the redemption, retirement, call and sinking fund provisions as to such installment; (iv) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption for the bonds of this Series to retire such entire installment at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to such installment; (v) prior to the issuance of any installment of the bonds of this Series, to reduce the percentages of face value relating to the optional call provisions for such installment; (vi) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be issued on original issuance as book-entry only securities taking account of the changes and adjustments authorized in this resolution with respect to the issuance of the bonds of this Series as book-entry only securities; (vii) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be separately registrable

as to principal and interest (including any authorized incremental interest) to any one or more holders of the bonds or certificates (if any) with respect to the payment of interest thereon; (viii) prior to the issuance of the first installment of the bonds of this Series if it is desirable in connection with the use of the proceeds of the bonds of this Series for the refunding of a series of the Authority's obligations to renumber this Series for purposes of identification, to renumber this Series; (ix) prior to the issuance of the first installment of the bonds of this Series, if a prior series of Consolidated Bonds has been renumbered or the resolutions in connection therewith have been rescinded and cancelled, and if it is desirable to accomplish the capital program of the Authority utilizing a continuous numbered sequence of Consolidated Bonds, to renumber this Series; and (x) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 11. In case any bond or coupon (if any) pertaining to such a bond shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new bond or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated bond or coupon or in lieu of or in substitution for such destroyed or lost bond or coupon; or if such bond or coupon shall have matured, instead of issuing a substitute bond or coupon the Authority may pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute bond or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such bond or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute bond or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute bond or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new bond or coupon so issued in substitution. Any bond or coupon (if any) issued under the provisions of this section in lieu of any bond or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the bond or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

Consolidated Bonds, Sixty-first Series—Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority"), adopted a resolution providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time in conformity with said resolution for the purposes therein set forth, which said resolution (hereinafter called the "Consolidated Bond Resolution") constitutes a contract with the holders of the bonds so issued; and

WHEREAS, on the 9th day of April, 1987, the Authority adopted a resolution establishing a series of said Consolidated Bonds to be known as "Sixty-first Series, Due 2022" (hereinafter called "bonds of this Series"), which said resolution by its terms constitutes a contract with the holders of the bonds of this Series; and

WHEREAS, the Authority has now determined that it is necessary, advisable and in the public interest to authorize the issuance of Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series for the purposes hereinafter set forth;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplementary thereto.

SECTION 2. The issuance of up to Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series is hereby authorized. Said bonds shall be issued in one or more installments or lots pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution and the aforesaid resolution establishing the bonds of this Series.

SECTION 3. Unless otherwise determined by the Committee on Finance in connection with the issuance of the bonds of this Series as book-entry only securities (which said Committee is hereby authorized to fix and determine such other system or method), the bonds of this Series shall be numbered upward from C(61)-1, or they may bear such other numbers as the Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority may deem appropriate.

SECTION 4. The proceeds of the bonds of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however*, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, the Committee on Finance may authorize all or any portion of the unspent proceeds of the bonds of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the bonds of this Series; (b) for the purpose of refunding, directly, by offers to exchange, or otherwise, at or before maturity, all or any part of any issue of Consolidated Bonds or Consolidated Notes issued and outstanding at the time of the sale of any installment of the bonds of this Series; and (c) for the purpose of refunding in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

SECTION 5. In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the bonds of this Series to purposes in connection with some but not all of the purposes authorized in Section 4 hereof, the Committee is hereby authorized, prior to the sale of bonds of any installment of this Series from time to time, to make such allocation by resolution. The adoption by said Committee of such a resolution prior to any such sale shall be sufficient to restrict the application of the proceeds of any bonds of such installment of this Series included in said sale to the purposes specified by the Committee in said resolution.

SECTION 6. The provisions of this resolution shall constitute a contract with the holders of the bonds issued pursuant to this resolution, and with each such holder.

Consolidated Bonds, Sixty-first Series—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of Two Hundred Million Dollars (\$200,000,000) in principal amount of Consolidated Bonds, Sixty-first Series, Due 2022 (hereinafter called the "bonds of this Series"), at a price which will result in a true interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more installments or in one or more lots, at one or more times on or before December 31, 1988, and to apply the proceeds of such sale or sales as provided in the resolution authorizing the issuance of said bonds of this Series; *provided, however*, that the total aggregate principal amount of Consolidated Bonds, Fifty-eighth Series, Due 2022, Consolidated Bonds, Fifty-ninth Series, Due 2022, Consolidated Bonds, Sixtieth Series, Due 2022, Consolidated Bonds, Sixty-first Series, Due 2022, Consolidated Bonds, Sixty-second Series, Due 2023, Consolidated Bonds, Sixty-third Series, Due 2023, Consolidated Bonds, Sixty-fourth Series, Due 2023, and Consolidated Bonds, Sixty-fifth Series, Due 2023, sold by the Committee shall not exceed One Billion Dollars (\$1,000,000,000).

SECTION 2. The Committee shall have power, in connection with the bonds of this Series, to fix the time or times of sale on or before December 31, 1988, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have power in the name of and on behalf of the Authority, in connection with the bonds of this Series, to enter into any appropriate contracts or agreements concerning any sales or exchanges; to fix the time or times and determine the terms and conditions of delivery of the bonds of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar and a Trustee, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with the bonds of this Series; to enter into appropriate contracts or agreements in connection with the issuance of the bonds of this Series as book-entry only securities; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the bonds of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the bonds offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the underwriter or underwriters purchasing the bonds in offering the bonds of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the bonds of any installment of the bonds of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such bonds of this Series to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto.

SECTION 6. The Committee; Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial

Officer; or Treasurer of the Authority is hereby authorized, in connection with the bonds of this Series, to take any action which may be necessary or desirable to assure that the bonds of this Series are in conformity with the provisions of Section 103 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, and that the interest on such bonds of this Series is not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, or regulations with respect thereto, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of bonds of this Series for the purposes for which such bonds of this Series are issued, as to the status of the projects for which the proceeds of the bonds of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee and any such actions taken in connection therewith are hereby ratified.

Consolidated Bonds, Sixty-second Series—Establishment

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, heretofore and on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority") adopted a resolution (hereinafter called the "Consolidated Bond Resolution") providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time, in conformity with said Consolidated Bond Resolution for the purposes therein set forth, and which Consolidated Bond Resolution constitutes a contract with the holders of the Consolidated Bonds so issued; and

WHEREAS, said Consolidated Bond Resolution provides that such Consolidated Bonds shall be issued in such series as the Authority may determine, and that the characteristics of the bonds of such series shall be determined by the Authority by and in the resolution establishing such series, and that the resolution establishing any series may contain other terms and provisions not inconsistent with the Consolidated Bond Resolution; and

WHEREAS, the Authority has heretofore established various series of said Consolidated Bonds and has now determined that it is necessary, advisable and in the public interest to establish another series of said Consolidated Bonds, without prejudice to its right hereafter to establish other and additional series of such Consolidated Bonds;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions.

SECTION 2. There is hereby established a series of said Consolidated Bonds to be known as "Consolidated Bonds, Sixty-second Series, Due 2023," to be issued in conformity with said Consolidated Bond Resolution and for any one or more of the purposes specified therein as may be provided in the resolution authorizing the issuance of such series. This resolution shall constitute a contract with the holders of said bonds of Consolidated Bonds, Sixty-second Series, Due 2023, which said bonds are hereinafter called "bonds of this Series," and with each such holder.

SECTION 3. Bonds of this Series shall be issued in one or more installments or lots as the Authority may hereafter determine.

The bonds of this Series shall be dated as of March 1, 1988, shall mature on March 1, 2023, and shall bear a stated rate or rates of interest, including fixed, variable or incremental rates for the term of the bonds or any portion thereof, or a combination thereof, from the semi-annual interest payment date next preceding their date of issuance, or if such date of issuance shall be an interest payment date, from such date of issuance, not exceeding twelve per centum (12%) per annum as may be determined by the Committee on Finance of the Authority. The Committee on Finance is hereby authorized to fix and determine any other date as that upon which interest shall commence and said interest rate or rates, or to determine that said bonds of this Series shall not bear a stated rate of interest. If the bonds of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on September 1, 1988, and thereafter on each succeeding March 1 and September 1 until maturity or prior redemption.

Both principal of and interest on the bonds of this Series shall be payable in lawful money of the United States of America. Principal of the bonds of this Series shall be payable upon presentation and surrender thereof by the registered holders, or in the case of coupon bonds of this Series, if any, upon presentation and surrender thereof, at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered bonds of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder and interest on the coupon bonds of this Series, if any, shall be payable upon presentation and surrender of the coupons appertaining thereto at such office or offices of such Paying Agent or Paying Agents. If on original issuance the bonds of this Series are to be issued as book-entry only securities, subject to a book-entry

system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method for the payment of both or either of the principal of and interest on the bonds of this Series to the registered holder thereof; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system, then the foregoing payment provisions of this paragraph shall apply to the bonds of this Series.

Bonds of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the first installment of the bonds of this Series, there shall be in effect a provision of the Internal Revenue Code of 1986, as amended (hereinafter called the "Code"), or successor provisions of law, or the regulations with respect thereto, which does not provide that, for the interest on the bonds of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such bonds of this Series must be issued in registered form, then the bonds of this Series may also be issued in the form of coupon bonds payable to bearer, in which event the Committee on Finance is hereby authorized to adopt an appropriate form of coupon bond issuable only in the denomination of \$5,000. If on original issuance the bonds of this Series are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an appropriate form of bond or other evidence of indebtedness; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system then the provisions of Section 9 of this resolution shall apply to the bonds of this Series.

Registered bonds of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 4. The Authority will keep or cause to be kept at the offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of bonds of this Series. Each registered bond of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmaturing coupons thereto attached, may be exchanged for a registered bond or bonds, registered as designated in such request, of the same aggregate principal amount and series as the surrendered bond or bonds, of any of the authorized denominations. A registered bond or bonds of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered bond or bonds, registered as designated in such request, of any other authorized denominations, or in the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds with appropriate coupons attached, or a combination of such coupon and registered bonds, in each case of the same aggregate principal amount as the surrendered bond or bonds.

All requests for the registration, transfer, exchange and delivery of bonds as above provided shall be filed with the Registrar of the Authority; all bonds to be surrendered pursuant to such request shall be surrendered to the Registrar; and all bonds delivered in exchange as aforesaid shall be delivered by the Registrar. All bonds of this Series surrendered to the Registrar in exchange for other bonds or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of bonds of this Series except in the denomination of \$5,000 in the case of coupon bonds (if any) or in the denominations of \$5,000 or integral multiples of \$5,000 in the case of registered bonds or to authorize the issuance of coupon bonds of this Series if at any time there shall be in effect a provision of the Code or the applicable regulations related thereto which provides that for the interest on the bonds of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such bonds of this Series must be issued in registered form.

SECTION 5. Except as provided in Section 6 of this resolution, bonds of this Series shall be redeemable at the option of the Authority, in whole or in part, on interest payment dates, at or subsequent to March 1, 1995, and prior to maturity, as follows:

At one hundred two per centum (102%) of their face value, plus accrued interest to the date fixed for redemption, at March 1, 1995, and thereafter and at or prior to March 1, 1997; at one hundred one per centum (101%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to March 1, 2000; and at one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to September 1, 2022.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any bonds of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption, to the registered holders of the bonds of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however,* that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If on original issuance the bonds of this Series are to be issued only in registered form or are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method by which the Authority shall give notice of intention to redeem any bonds of this Series.

Before the date fixed for redemption specified in the Authority's notice of intention to redeem, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding bonds which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption and the premium (if any), such principal amount and premium (if any), to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the bonds so called for redemption and to be paid to them respectively upon presentation and surrender of the said bonds with accrued interest included in such redemption price to be paid to the registered holders in accordance with the provisions of this resolution and in the case of coupon bonds (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such bonds. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided or as provided by the Committee on Finance, the bonds so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such bonds on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the bonds so called from and after the date fixed for their redemption, and such bonds and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered bonds of denominations greater than \$5,000, if less than all of the bonds of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing provisions of this Section 5 shall be deemed to refer to such \$5,000 unit of face value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by any bond are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said bond shall forthwith present said bond to the Registrar who shall issue a new bond or bonds of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 4 of this resolution, including a new bond or bonds with the aggregate principal amount of the \$5,000

unit or units of face value called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such bond of a denomination greater than \$5,000 shall fail to present such bond to the Registrar for the issuance of new bonds of smaller denominations in exchange therefor, as aforesaid, such bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such bond shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 6. The Authority shall establish and maintain a separate sinking fund for the retirement of bonds of this Series which shall be known as the "Consolidated Bonds, Sixty-second Series, Due 2023, Sinking Fund." The amount required to be paid into said Sinking Fund for each year shall be the difference at July 15 of such year between the schedule amount of principal for such year and the schedule amount of principal for the next preceding year as set forth in this Section 6, determined in the manner provided in the next succeeding paragraph. Except as provided in the third paragraph of this Section 6, payments into said Sinking Fund shall be made in bonds of this Series purchased or redeemed by the Authority at or prior to July 15 of the year on account of which the payment is made. Such payments may be made at any time or times during such year at or prior to July 15 or at any time or times during any prior year. Bonds of this Series so purchased may be purchased at such prices as the Authority may deem reasonable and proper and, in the discretion of the Authority, at public or private sale, with or without advertisement and with or without notice to any person other than the seller, and bonds theretofore issued and negotiated and then held by the Authority may be purchased for such purpose as well as bonds held by others. To be eligible for payment into said Sinking Fund each such bond shall have theretofore actually been issued and negotiated by the Authority and shall either be in registered form or in coupon form (if any) with all interest coupons attached maturing on and subsequent to September 1 of the year on account of which it is paid into said Sinking Fund. Bonds paid into said Sinking Fund shall be received therein at a value equal to the principal amount of such bonds. Upon payment into said Sinking Fund of said bonds of this Series so purchased or redeemed, said bonds shall be forthwith cancelled. All bonds of this Series which shall have been redeemed at prices established by Section 5 hereof shall be deemed to have been paid into said Sinking Fund and cancelled within the requirements of the preceding sentence whether or not said bonds shall have been presented for payment upon such redemption.

The schedule amount of bonds of this Series for each year shall be determined by multiplying the aggregate principal amount of all bonds of this Series theretofore issued (whether or not any of such bonds shall have theretofore been retired) by the cumulative percentage of total principal amount specified opposite such year in the schedule of mandatory periodic retirement hereafter set forth in this Section 6; if the amount so determined shall not be a multiple of \$5,000, then the schedule amount for such year shall be the next higher multiple of \$5,000.

If at the close of July 15 of any year (except the year of maturity) set forth in said schedule of mandatory periodic retirement, the Authority shall not have made payment into said Sinking Fund on account of such year of an amount at least equal to the payment required to be made therein on account of such year, then the Authority shall, on July 16 of such year, pay into said Sinking Fund an amount in cash equal to the deficiency, and such amounts shall be applied to the redemption of bonds of this Series at September 1, 2003, and at September 1 of each year thereafter, in the manner and upon the notice set forth in Section 5 of this resolution, but, notwithstanding the redemption price set forth in Section 5, at the price of one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, at September 1, 2003, and thereafter and at or prior to September 1, 2022.

The following schedule of mandatory periodic retirement is provided for bonds of this Series:

<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>	<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>
2003	2.1	2014	38.9
2004	4.4	2015	43.9
2005	6.8	2016	49.3
2006	9.4	2017	55.1
2007	12.2	2018	61.4
2008	15.2	2019	68.1
2009	18.5	2020	75.3
2010	22.0	2021	83.1
2011	25.8	2022	91.4
2012	29.8	2023	100.0
2013	34.2		

Nothing herein contained shall be construed in any way to prevent the Authority from retiring bonds of this Series more rapidly than is shown in the foregoing schedule of mandatory periodic retirement.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however*, that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. The Authority shall appoint a bank or trust company as Trustee for and in connection with the bonds of this Series. The Trustee is hereby authorized to (i) institute any action or proceeding on behalf of the holders of the bonds of this Series against the Authority or others, or (ii) intervene in any pending action or proceeding, or (iii) take any other action which it shall in its sole discretion determine to be necessary or advisable in order to protect the rights of the holders of bonds of this Series. The rights of the Trustee in this respect and in all other respects shall be in addition to and not in substitution of any and all rights which would otherwise inure to the holder or holders of bonds of this Series. It is understood that the Trustee in its sole discretion may, but shall be under no obligation to, review the activities or operations of the Authority or any of the contracts or agreements of the Authority or exercise any of the rights or powers vested in it by this Section 8 whether on the Trustee's initiative or at the request or direction of any of the holders of bonds of this Series.

The Trustee (which shall include any successor Trustee) appointed under the provisions of this Section shall be a bank or trust company organized under the laws of the State of New York or the State of New Jersey or a national banking association doing business and having its principal office in the Port of New York District and having a total capital (including capital stock, surplus, undivided profits and capital notes, if any) aggregating at least \$25,000,000, which is willing and able to accept the office on reasonable and customary terms and is authorized by law to perform all the duties imposed upon it by this resolution.

The Trustee shall not be liable for any action taken or suffered upon any notice, resolution, request, consent, order, certificate, report, opinion, bond, or other paper or document believed by it to be genuine, and to have been signed or presented by the proper party or parties. The Trustee may consult with counsel, who may or may not be counsel to the Authority, and the opinion of such counsel shall be full and complete authorization and protection in respect of any action taken or suffered by it under this resolution in good faith and in accordance therewith. The Trustee shall not be liable in connection with the performance or nonperformance of its duties except for its own willful misconduct, negligence or bad faith.

If the Trustee shall deem it necessary or desirable that a matter be proved or established prior to taking or suffering any action under this resolution, such matter (unless other evidence in respect thereof be specifically prescribed) may be deemed to be conclusively proved and established by a certificate of an authorized officer of the Authority (who shall be any officer authorized pursuant to Section 9 hereof to execute bonds of this Series), and such certificate shall be full warrant for any action taken or suffered in good faith under the provisions of this resolution upon the faith thereof; but in its discretion the Trustee may in lieu thereof accept other evidence of such fact or matter or may require such further or additional evidence as to it may seem reasonable.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a statement of an authorized officer showing for the preceding calendar year (i) net revenues, (ii) the aggregate interest paid on bonds of the Authority, and (iii) the payments of principal on bonds of the Authority.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a copy of its annual report for such year, and its financial statement for such year accompanied by an opinion signed by an independent public accountant or firm of public accountants of recognized standing selected by the Authority and satisfactory to the Trustee.

The Authority shall file with the Trustee a copy of any Official Statement hereafter issued by the Authority in connection with the issuance of bonds by the Authority.

The Authority shall file with the Trustee a copy of the minutes of every meeting of the Authority and of the Port Authority Trans-Hudson Corporation at the time said minutes are transmitted to the Governor of New York and the Governor of New Jersey.

The Authority shall not be required to file with the Trustee (except when requested to do so by the Trustee) and the Trustee shall not be required to review any document, instrument, report or paper other than those which the Authority is expressly required hereunder to file with the Trustee. The Trustee shall not be bound to make any investigation into the facts or matters stated in any document, instrument, report or paper supplied to it, but the Trustee in its sole discretion may make such further inquiry or investigation into such facts or matters as the Trustee may deem advisable, and, if the Trustee shall determine to make such further inquiry or investigation, the Trustee is authorized to examine such books and records of and properties owned or operated by the Authority as the Trustee may deem advisable, personally or by agent or attorney.

The Authority hereby agrees (i) to pay to the Trustee from time to time reasonable compensation for all services rendered by it hereunder, (ii) to reimburse the Trustee upon its request for all reasonable expenses, disbursements and advances incurred or made by the Trustee in connection with the exercise or performance of any of its powers or duties hereunder (including the reasonable compensation and the expenses and disbursements of its agents and counsel), and (iii) to indemnify the Trustee for, and hold it harmless against, any loss, liability or expense incurred without willful misconduct, negligence or bad faith on its part, arising out of or in connection with the exercise or performance of the Trustee's powers and duties hereunder, including the costs and expenses of defending itself against any claim or liability in connection with such exercise or performance.

The Trustee may become the owner or holder of any bonds of the Authority with the same rights as it would have were it not a Trustee. To the extent permitted by law, the Trustee may act as depository for the Authority, act as Paying Agent and Registrar of bonds of the Authority, act itself and permit any of its officers or directors to act in any other capacity with respect to the Authority, the bonds of the Authority and the holders of bonds of the Authority as it or its officers or directors would be able to act were it not a Trustee.

The Trustee may at any time resign and be discharged of the duties and obligations created by this resolution by giving not less than sixty (60) days' written notice to the Authority and publishing notice thereof, specifying the date when such resignation shall take effect, once in each week for two (2) successive calendar weeks in a newspaper of general circulation in the City of New York, State of New York, and such resignation shall take effect upon the date specified in such notice unless previously a successor shall have been appointed by the Authority in which event such resignation shall take effect immediately on the appointment of such successor.

The Trustee may be removed at any time by an instrument or concurrent instruments in writing, filed with the Trustee, and signed and acknowledged by the holders of a majority in principal amount of the bonds of this Series then outstanding or by their attorneys duly authorized, excluding any bonds held by or for the account of the Authority.

In case at any time the Trustee shall resign or shall be removed or shall become incapable of acting, or shall be adjudged a bankrupt or insolvent, or if a receiver, liquidator or conservator of the Trustee, or of its property, shall be appointed, or if any public officer shall take charge or control of the Trustee, or of its property or affairs, a successor may be appointed by the holders of a majority in principal amount of the bonds of this Series then outstanding, excluding any bonds held by or for the account of the Authority, by an instrument or concurrent instruments in writing signed and acknowledged by such bondholders or by their attorneys duly authorized and delivered to such successor Trustee, notification thereof being given to the Authority and the predecessor Trustee; *provided*, nevertheless, the Authority shall forthwith appoint a Trustee to fill such vacancy until a successor Trustee shall be appointed by the holders of bonds of this Series as authorized in this Section. The Authority shall publish notice of any such appointment made by it once in each week for two (2) consecutive calendar weeks, in a newspaper of general circulation in the City of New York, State of New York, the first publication to be made within twenty (20) days after such appointment. Any successor Trustee appointed by the Authority shall, immediately and without further act, be superseded by a Trustee appointed by the holders of bonds of this Series.

Any company into which any Trustee may be merged or converted or with which it may be consolidated or any company resulting from any merger, conversion or consolidation to which it shall be a party or any company to which any Trustee may sell or transfer all or substantially all of its corporate trust business; *provided*, such company shall be a bank or trust company located in the Port of New York District and shall be authorized by law to perform all the duties imposed upon it by this resolution, shall be the successor to such Trustee without the execution or filing of any paper or the performance of any further act.

The failure of the Authority to take any action required by this Section shall not invalidate any bond or bonds issued pursuant to this resolution or hereafter issued by the Authority, or affect any other actions of the Authority. The Authority shall in no way be restricted by this Section from entering any defense to an action or proceeding instituted by the Trustee or by the holder or holders of bonds of this Series.

SECTION 9. Each bond of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the

Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each bond of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such bond shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No bond of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such bond shall be conclusive evidence that such bond has been authenticated and delivered hereunder. Such certificate of authentication on any such bond shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such bonds issued hereunder. Bonds of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered bonds of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED BOND)

**THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED BOND
SIXTY-SECOND SERIES, DUE 2023**

No. C(62)-
Maturity Date: March 1, 2023 Interest Rate:% Per Annum Dated: March 1, 1988 CUSIP

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of March, 2023, upon presentation and surrender of this bond, the principal amount shown below:

together with interest thereon at the rate of per centum (%) per annum from , payable semi-annually commencing on September 1, 1988, and thereafter on each succeeding March 1 and September 1 until maturity or prior redemption. The principal of this bond shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the office of , Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this bond shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This bond is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolutions of April 9, 1987, establishing the Series of which this bond forms a part and authorizing the issuance of this bond, constitute a contract between the Authority and the registered holder of this bond, which is subject to modification as therein provided.

The Authority has appointed a Trustee for and in connection with the bonds of this Series as provided by the resolution establishing the Series of which this bond forms a part.

This bond is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this bond or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this bond forms a part. The bonds of this Series are issuable only in the form of registered bonds without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this bond or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this bond forms a part for an equal aggregate principal amount of registered bonds of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This bond may be redeemed at September 1 of any year prior to maturity beginning with 2003 to satisfy the requirements of the schedule of mandatory periodic retirement provided for bonds of this Series in and pursuant to said resolutions of the Authority at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption at September 1, 2003, and thereafter and at or prior to September 1, 2022.

This bond may at the option of the Authority be redeemed for any other purpose at any interest payment date at or subsequent to March 1, 1995, as follows:

At one hundred two per centum (102%) of its face value, plus accrued interest to the date fixed for redemption, at March 1, 1995, and thereafter and at or prior to March 1, 1997; at one hundred one per centum (101%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to March 1, 2000; and at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to September 1, 2022.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance of the Authority shall fix and determine.

If this bond shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this bond at his last known address as appearing on the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If this bond shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this bond, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this bond from and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the foregoing resolutions but shall rely solely upon the funds so deposited.

If this bond is of a denomination greater than \$5,000, and if less than all of the bonds of the Series of which this bond forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this bond shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing redemption provisions shall be deemed to refer to each such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this bond are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this bond shall forthwith present this bond to the Registrar who will issue new bonds of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this bond forms a part, including a new bond or bonds

with the aggregate principal amount of the \$5,000 unit or units called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this bond to the Registrar for the issuance of new bonds of smaller denominations in exchange or substitution therefor as aforesaid, this bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

This bond is entitled to the benefit of the sinking fund established for this Series by the resolutions of the Authority hereinabove referred to.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this bond, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this bond, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this bond to be dated as of the first day of March, 1988.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

.....
Authorized Officer

(END OF FORM OF REGISTERED BOND)

The certificate of authentication attached to each of the bonds of this Series which are executed by a facsimile signature on behalf of the Authority shall be in substantially the following form, the blank spaces being appropriately filled in:

(FORM OF CERTIFICATE OF AUTHENTICATION)

This bond is one of the bonds issued under the provisions of the within-named resolution and the Consolidated Bond Resolution.

Date of Authentication:

REGISTRAR

..... (Signature of Registered Holder)

In the presence of: (Witness)

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within bond in every particular, with such signature appropriately guaranteed.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the bonds of this Series shall cease to be such official before such bonds shall have been actually issued, such bonds may nevertheless be issued as though the person who signed such bonds had not ceased to be such official of the Authority; and the Authority may, by issuing bonds bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the bonds and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 10. The Committee on Finance of the Authority is hereby authorized (i) prior to the issuance of the first installment of the bonds of this Series, to change the date as of which the bonds of this Series shall be dated to any date on or before December 31, 1988, and, if the date as of which the bonds of this Series shall be dated is so changed and the bonds bear a stated rate or rates of interest, the Committee shall change by the same number of days the respective dates on which interest on the bonds of this Series shall be payable; (ii) prior to the issuance of any installment of the bonds of this Series, to change the date at which any of the bonds of that installment shall mature; provided, that said date or dates shall not be more than thirty-five (35) years from the date as of which the bonds of this Series are dated; (iii) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates in connection with the redemption, retirement, call and sinking fund provisions as to such installment; (iv) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption for the bonds of this Series to retire such entire installment at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to such installment; (v) prior to the issuance of any installment of the bonds of this Series, to reduce the percentages of face value relating to the optional call provisions for such installment; (vi) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be issued on original issuance as book-entry only securities taking account of the changes and adjustments authorized in this resolution with respect to the issuance of the bonds of this Series as book-entry only securities; (vii) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be separately registrable

as to principal and interest (including any authorized incremental interest) to any one or more holders of the bonds or certificates (if any) with respect to the payment of interest thereon; (viii) prior to the issuance of the first installment of the bonds of this Series if it is desirable in connection with the use of the proceeds of the bonds of this Series for the refunding of a series of the Authority's obligations to renumber this Series for purposes of identification, to renumber this Series; (ix) prior to the issuance of the first installment of the bonds of this Series, if a prior series of Consolidated Bonds has been renumbered or the resolutions in connection therewith have been rescinded and cancelled, and if it is desirable to accomplish the capital program of the Authority utilizing a continuous numbered sequence of Consolidated Bonds, to renumber this Series; and (x) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 11. In case any bond or coupon (if any) pertaining to such a bond shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new bond or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated bond or coupon or in lieu of or in substitution for such destroyed or lost bond or coupon; or if such bond or coupon shall have matured, instead of issuing a substitute bond or coupon the Authority may pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute bond or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such bond or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute bond or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute bond or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new bond or coupon so issued in substitution. Any bond or coupon (if any) issued under the provisions of this section in lieu of any bond or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the bond or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

Consolidated Bonds, Sixty-second Series—Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority"), adopted a resolution providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time in conformity with said resolution for the purposes therein set forth, which said resolution (hereinafter called the "Consolidated Bond Resolution") constitutes a contract with the holders of the bonds so issued; and

WHEREAS, on the 9th day of April, 1987, the Authority adopted a resolution establishing a series of said Consolidated Bonds to be known as "Sixty-second Series, Due 2023" (hereinafter called "bonds of this Series"), which said resolution by its terms constitutes a contract with the holders of the bonds of this Series; and

WHEREAS, the Authority has now determined that it is necessary, advisable and in the public interest to authorize the issuance of Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series for the purposes hereinafter set forth:

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplementary thereto.

SECTION 2. The issuance of up to Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series is hereby authorized. Said bonds shall be issued in one or more installments or lots pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution and the aforesaid resolution establishing the bonds of this Series.

SECTION 3. Unless otherwise determined by the Committee on Finance in connection with the issuance of the bonds of this Series as book-entry only securities (which said Committee is hereby authorized to fix and determine such other system or method), the bonds of this Series shall be numbered upward from C(62)-1, or they may bear such other numbers as the Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority may deem appropriate.

SECTION 4. The proceeds of the bonds of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however*, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, the Committee on Finance may authorize all or any portion of the unspent proceeds of the bonds of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the bonds of this Series; (b) for the purpose of refunding, directly, by offers to exchange, or otherwise, at or before maturity, all or any part of any issue of Consolidated Bonds or Consolidated Notes issued and outstanding at the time of the sale of any installment of the bonds of this Series; and (c) for the purpose of refunding in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

SECTION 5. In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the bonds of this Series to purposes in connection with some but not all of the purposes authorized in Section 4 hereof, the Committee is hereby authorized, prior to the sale of bonds of any installment of this Series from time to time, to make such allocation by resolution. The adoption by said Committee of such a resolution prior to any such sale shall be sufficient to restrict the application of the proceeds of any bonds of such installment of this Series included in said sale to the purposes specified by the Committee in said resolution.

SECTION 6. The provisions of this resolution shall constitute a contract with the holders of the bonds issued pursuant to this resolution, and with each such holder.

Consolidated Bonds, Sixty-second Series—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of Two Hundred Million Dollars (\$200,000,000) in principal amount of Consolidated Bonds, Sixty-second Series, Due 2023 (hereinafter called the "bonds of this Series"), at a price which will result in a true interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more installments or in one or more lots, at one or more times on or before December 31, 1988, and to apply the proceeds of such sale or sales as provided in the resolution authorizing the issuance of said bonds of this Series; *provided, however*, that the total aggregate principal amount of Consolidated Bonds, Fifty-eighth Series, Due 2022, Consolidated Bonds, Fifty-ninth Series, Due 2022, Consolidated Bonds, Sixtieth Series, Due 2022, Consolidated Bonds, Sixty-first Series, Due 2022, Consolidated Bonds, Sixty-second Series, Due 2023, Consolidated Bonds, Sixty-third Series, Due 2023, Consolidated Bonds, Sixty-fourth Series, Due 2023, and Consolidated Bonds, Sixty-fifth Series, Due 2023, sold by the Committee shall not exceed One Billion Dollars (\$1,000,000,000).

SECTION 2. The Committee shall have power, in connection with the bonds of this Series, to fix the time or times of sale on or before December 31, 1988, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have power in the name of and on behalf of the Authority, in connection with the bonds of this Series, to enter into any appropriate contracts or agreements concerning any sales or exchanges; to fix the time or times and determine the terms and conditions of delivery of the bonds of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar and a Trustee, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with the bonds of this Series; to enter into appropriate contracts or agreements in connection with the issuance of the bonds of this Series as book-entry only securities; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the bonds of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the bonds offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the underwriter or underwriters purchasing the bonds in offering the bonds of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the bonds of any installment of the bonds of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such bonds of this Series to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto.

SECTION 6. The Committee; Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial

Officer; or Treasurer of the Authority is hereby authorized, in connection with the bonds of this Series, to take any action which may be necessary or desirable to assure that the bonds of this Series are in conformity with the provisions of Section 103 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, and that the interest on such bonds of this Series is not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, or regulations with respect thereto, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of bonds of this Series for the purposes for which such bonds of this Series are issued, as to the status of the projects for which the proceeds of the bonds of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee and any such actions taken in connection therewith are hereby ratified.

Consolidated Bonds, Sixty-third Series—Establishment

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, heretofore and on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority") adopted a resolution (hereinafter called the "Consolidated Bond Resolution") providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time, in conformity with said Consolidated Bond Resolution for the purposes therein set forth, and which Consolidated Bond Resolution constitutes a contract with the holders of the Consolidated Bonds so issued; and

WHEREAS, said Consolidated Bond Resolution provides that such Consolidated Bonds shall be issued in such series as the Authority may determine, and that the characteristics of the bonds of such series shall be determined by the Authority by and in the resolution establishing such series, and that the resolution establishing any series may contain other terms and provisions not inconsistent with the Consolidated Bond Resolution; and

WHEREAS, the Authority has heretofore established various series of said Consolidated Bonds and has now determined that it is necessary, advisable and in the public interest to establish another series of said Consolidated Bonds, without prejudice to its right hereafter to establish other and additional series of such Consolidated Bonds:

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions.

SECTION 2. There is hereby established a series of said Consolidated Bonds to be known as "Consolidated Bonds, Sixty-third Series, Due 2023," to be issued in conformity with said Consolidated Bond Resolution and for any one or more of the purposes specified therein as may be provided in the resolution authorizing the issuance of such series. This resolution shall constitute a contract with the holders of said bonds of Consolidated Bonds, Sixty-third Series, Due 2023, which said bonds are hereinafter called "bonds of this Series," and with each such holder.

SECTION 3. Bonds of this Series shall be issued in one or more installments or lots as the Authority may hereafter determine.

The bonds of this Series shall be dated as of June 1, 1988, shall mature on June 1, 2023, and shall bear a stated rate or rates of interest, including fixed, variable or incremental rates for the term of the bonds or any portion thereof, or a combination thereof, from the semi-annual interest payment date next preceding their date of issuance, or if such date of issuance shall be an interest payment date, from such date of issuance, not exceeding twelve per centum (12%) per annum as may be determined by the Committee on Finance of the Authority. The Committee on Finance is hereby authorized to fix and determine any other date as that upon which interest shall commence and said interest rate or rates, or to determine that said bonds of this Series shall not bear a stated rate of interest. If the bonds of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on December 1, 1988, and thereafter on each succeeding June 1 and December 1 until maturity or prior redemption.

Both principal of and interest on the bonds of this Series shall be payable in lawful money of the United States of America. Principal of the bonds of this Series shall be payable upon presentation and surrender thereof by the registered holders, or in the case of coupon bonds of this Series, if any, upon presentation and surrender thereof, at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered bonds of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder and interest on the coupon bonds of this Series, if any, shall be payable upon presentation and surrender of the coupons appertaining thereto at such office or offices of such Paying Agent or Paying Agents. If on original issuance the bonds of this Series are to be issued as book-entry only securities, subject to a book-entry

system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method for the payment of both or either of the principal of and interest on the bonds of this Series to the registered holder thereof; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system, then the foregoing payment provisions of this paragraph shall apply to the bonds of this Series.

Bonds of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the first installment of the bonds of this Series, there shall be in effect a provision of the Internal Revenue Code of 1986, as amended (hereinafter called the "Code"), or successor provisions of law, or the regulations with respect thereto, which does not provide that, for the interest on the bonds of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such bonds of this Series must be issued in registered form, then the bonds of this Series may also be issued in the form of coupon bonds payable to bearer, in which event the Committee on Finance is hereby authorized to adopt an appropriate form of coupon bond issuable only in the denomination of \$5,000. If on original issuance the bonds of this Series are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an appropriate form of bond or other evidence of indebtedness; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system then the provisions of Section 9 of this resolution shall apply to the bonds of this Series.

Registered bonds of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 4. The Authority will keep or cause to be kept at the offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of bonds of this Series. Each registered bond of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmatured coupons thereto attached, may be exchanged for a registered bond or bonds, registered as designated in such request, of the same aggregate principal amount and series as the surrendered bond or bonds, of any of the authorized denominations. A registered bond or bonds of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered bond or bonds, registered as designated in such request, of any other authorized denominations, or in the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds with appropriate coupons attached, or a combination of such coupon and registered bonds, in each case of the same aggregate principal amount as the surrendered bond or bonds.

All requests for the registration, transfer, exchange and delivery of bonds as above provided shall be filed with the Registrar of the Authority; all bonds to be surrendered pursuant to such request shall be surrendered to the Registrar; and all bonds delivered in exchange as aforesaid shall be delivered by the Registrar. All bonds of this Series surrendered to the Registrar in exchange for other bonds or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of bonds of this Series except in the denomination of \$5,000 in the case of coupon bonds (if any) or in the denominations of \$5,000 or integral multiples of \$5,000 in the case of registered bonds or to authorize the issuance of coupon bonds of this Series if at any time there shall be in effect a provision of the Code or the applicable regulations related thereto which provides that for the interest on the bonds of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such bonds of this Series must be issued in registered form.

SECTION 5. Except as provided in Section 6 of this resolution, bonds of this Series shall be redeemable at the option of the Authority, in whole or in part, on interest payment dates, at or subsequent to June 1, 1995, and prior to maturity, as follows:

At one hundred two per centum (102%) of their face value, plus accrued interest to the date fixed for redemption, at June 1, 1995, and thereafter and at or prior to June 1, 1997; at one hundred one per centum (101%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to June 1, 2000; and at one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to December 1, 2022.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any bonds of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption, to the registered holders of the bonds of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however,* that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If on original issuance the bonds of this Series are to be issued only in registered form or are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method by which the Authority shall give notice of intention to redeem any bonds of this Series.

Before the date fixed for redemption specified in the Authority's notice of intention to redeem, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding bonds which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption and the premium (if any), such principal amount and premium (if any), to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the bonds so called for redemption and to be paid to them respectively upon presentation and surrender of the said bonds with accrued interest included in such redemption price to be paid to the registered holders in accordance with the provisions of this resolution and in the case of coupon bonds (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such bonds. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided or as provided by the Committee on Finance, the bonds so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such bonds on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the bonds so called from and after the date fixed for their redemption, and such bonds and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered bonds of denominations greater than \$5,000, if less than all of the bonds of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing provisions of this Section 5 shall be deemed to refer to such \$5,000 unit of face value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by any bond are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said bond shall forthwith present said bond to the Registrar who shall issue a new bond or bonds of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 4 of this resolution, including a new bond or bonds with the aggregate principal amount of the \$5,000

unit or units of face value called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such bond of a denomination greater than \$5,000 shall fail to present such bond to the Registrar for the issuance of new bonds of smaller denominations in exchange therefor, as aforesaid, such bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such bond shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 6. The Authority shall establish and maintain a separate sinking fund for the retirement of bonds of this Series which shall be known as the "Consolidated Bonds, Sixty-third Series, Due 2023, Sinking Fund." The amount required to be paid into said Sinking Fund for each year shall be the difference at October 15 of such year between the schedule amount of principal for such year and the schedule amount of principal for the next preceding year as set forth in this Section 6, determined in the manner provided in the next succeeding paragraph. Except as provided in the third paragraph of this Section 6, payments into said Sinking Fund shall be made in bonds of this Series purchased or redeemed by the Authority at or prior to October 15 of the year on account of which the payment is made. Such payments may be made at any time or times during such year at or prior to October 15 or at any time or times during any prior year. Bonds of this Series so purchased may be purchased at such prices as the Authority may deem reasonable and proper and, in the discretion of the Authority, at public or private sale, with or without advertisement and with or without notice to any person other than the seller, and bonds theretofore issued and negotiated and then held by the Authority may be purchased for such purpose as well as bonds held by others. To be eligible for payment into said Sinking Fund each such bond shall have theretofore actually been issued and negotiated by the Authority and shall either be in registered form or in coupon form (if any) with all interest coupons attached maturing on and subsequent to December 1 of the year on account of which it is paid into said Sinking Fund. Bonds paid into said Sinking Fund shall be received therein at a value equal to the principal amount of such bonds. Upon payment into said Sinking Fund of said bonds of this Series so purchased or redeemed, said bonds shall be forthwith cancelled. All bonds of this Series which shall have been redeemed at prices established by Section 5 hereof shall be deemed to have been paid into said Sinking Fund and cancelled within the requirements of the preceding sentence whether or not said bonds shall have been presented for payment upon such redemption.

The schedule amount of bonds of this Series for each year shall be determined by multiplying the aggregate principal amount of all bonds of this Series theretofore issued (whether or not any of such bonds shall have theretofore been retired) by the cumulative percentage of total principal amount specified opposite such year in the schedule of mandatory periodic retirement hereafter set forth in this Section 6: if the amount so determined shall not be a multiple of \$5,000, then the schedule amount for such year shall be the next higher multiple of \$5,000.

If at the close of October 15 of any year (except the year of maturity) set forth in said schedule of mandatory periodic retirement, the Authority shall not have made payment into said Sinking Fund on account of such year of an amount at least equal to the payment required to be made therein on account of such year, then the Authority shall, on October 16 of such year, pay into said Sinking Fund an amount in cash equal to the deficiency, and such amounts shall be applied to the redemption of bonds of this Series at December 1, 2003, and at December 1 of each year thereafter, in the manner and upon the notice set forth in Section 5 of this resolution, but, notwithstanding the redemption price set forth in Section 5, at the price of one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, at December 1, 2003, and thereafter and at or prior to December 1, 2022.

The following schedule of mandatory periodic retirement is provided for bonds of this Series:

<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>	<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>
2003	2.1	2014	38.9
2004	4.4	2015	43.9
2005	6.8	2016	49.3
2006	9.4	2017	55.1
2007	12.2	2018	61.4
2008	15.2	2019	68.1
2009	18.5	2020	75.3
2010	22.0	2021	83.1
2011	25.8	2022	91.4
2012	29.8	2023	100.0
2013	34.2		

Nothing herein contained shall be construed in any way to prevent the Authority from retiring bonds of this Series more rapidly than is shown in the foregoing schedule of mandatory periodic retirement.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however*, that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. The Authority shall appoint a bank or trust company as Trustee for and in connection with the bonds of this Series. The Trustee is hereby authorized to (i) institute any action or proceeding on behalf of the holders of the bonds of this Series against the Authority or others, or (ii) intervene in any pending action or proceeding, or (iii) take any other action which it shall in its sole discretion determine to be necessary or advisable in order to protect the rights of the holders of bonds of this Series. The rights of the Trustee in this respect and in all other respects shall be in addition to and not in substitution of any and all rights which would otherwise inure to the holder or holders of bonds of this Series. It is understood that the Trustee in its sole discretion may, but shall be under no obligation to, review the activities or operations of the Authority or any of the contracts or agreements of the Authority or exercise any of the rights or powers vested in it by this Section 8 whether on the Trustee's initiative or at the request or direction of any of the holders of bonds of this Series.

The Trustee (which shall include any successor Trustee) appointed under the provisions of this Section shall be a bank or trust company organized under the laws of the State of New York or the State of New Jersey or a national banking association doing business and having its principal office in the Port of New York District and having a total capital (including capital stock, surplus, undivided profits and capital notes, if any) aggregating at least \$25,000,000, which is willing and able to accept the office on reasonable and customary terms and is authorized by law to perform all the duties imposed upon it by this resolution.

The Trustee shall not be liable for any action taken or suffered upon any notice, resolution, request, consent, order, certificate, report, opinion, bond, or other paper or document believed by it to be genuine, and to have been signed or presented by the proper party or parties. The Trustee may consult with counsel, who may or may not be counsel to the Authority, and the opinion of such counsel shall be full and complete authorization and protection in respect of any action taken or suffered by it under this resolution in good faith and in accordance therewith. The Trustee shall not be liable in connection with the performance or nonperformance of its duties except for its own willful misconduct, negligence or bad faith.

If the Trustee shall deem it necessary or desirable that a matter be proved or established prior to taking or suffering any action under this resolution, such matter (unless other evidence in respect thereof be specifically prescribed) may be deemed to be conclusively proved and established by a certificate of an authorized officer of the Authority (who shall be any officer authorized pursuant to Section 9 hereof to execute bonds of this Series), and such certificate shall be full warrant for any action taken or suffered in good faith under the provisions of this resolution upon the faith thereof; but in its discretion the Trustee may in lieu thereof accept other evidence of such fact or matter or may require such further or additional evidence as to it may seem reasonable.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a statement of an authorized officer showing for the preceding calendar year (i) net revenues, (ii) the aggregate interest paid on bonds of the Authority, and (iii) the payments of principal on bonds of the Authority.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a copy of its annual report for such year, and its financial statement for such year accompanied by an opinion signed by an independent public accountant or firm of public accountants of recognized standing selected by the Authority and satisfactory to the Trustee.

The Authority shall file with the Trustee a copy of any Official Statement hereafter issued by the Authority in connection with the issuance of bonds by the Authority.

The Authority shall file with the Trustee a copy of the minutes of every meeting of the Authority and of the Port Authority Trans-Hudson Corporation at the time said minutes are transmitted to the Governor of New York, and the Governor of New Jersey.

The Authority shall not be required to file with the Trustee (except when requested to do so by the Trustee) and the Trustee shall not be required to review any document, instrument, report or paper other than those which the Authority is expressly required hereunder to file with the Trustee. The Trustee shall not be bound to make any investigation into the facts or matters stated in any document, instrument, report or paper supplied to it, but the Trustee in its sole discretion may make such further inquiry or investigation into such facts or matters as the Trustee may deem advisable, and, if the Trustee shall determine to make such further inquiry or investigation, the Trustee is authorized to examine such books and records of and properties owned or operated by the Authority as the Trustee may deem advisable, personally or by agent or attorney.

The Authority hereby agrees (i) to pay to the Trustee from time to time reasonable compensation for all services rendered by it hereunder, (ii) to reimburse the Trustee upon its request for all reasonable expenses, disbursements and advances incurred or made by the Trustee in connection with the exercise or performance of any of its powers or duties hereunder (including the reasonable compensation and the expenses and disbursements of its agents and counsel), and (iii) to indemnify the Trustee for, and hold it harmless against, any loss, liability or expense incurred without willful misconduct, negligence or bad faith on its part, arising out of or in connection with the exercise or performance of the Trustee's powers and duties hereunder, including the costs and expenses of defending itself against any claim or liability in connection with such exercise or performance.

The Trustee may become the owner or holder of any bonds of the Authority with the same rights as it would have were it not a Trustee. To the extent permitted by law, the Trustee may act as depository for the Authority, act as Paying Agent and Registrar of bonds of the Authority, act itself and permit any of its officers or directors to act in any other capacity with respect to the Authority, the bonds of the Authority and the holders of bonds of the Authority as it or its officers or directors would be able to act were it not a Trustee.

The Trustee may at any time resign and be discharged of the duties and obligations created by this resolution by giving not less than sixty (60) days' written notice to the Authority and publishing notice thereof, specifying the date when such resignation shall take effect, once in each week for two (2) successive calendar weeks in a newspaper of general circulation in the City of New York, State of New York, and such resignation shall take effect upon the date specified in such notice unless previously a successor shall have been appointed by the Authority in which event such resignation shall take effect immediately on the appointment of such successor.

The Trustee may be removed at any time by an instrument or concurrent instruments in writing, filed with the Trustee, and signed and acknowledged by the holders of a majority in principal amount of the bonds of this Series then outstanding or by their attorneys duly authorized, excluding any bonds held by or for the account of the Authority.

In case at any time the Trustee shall resign or shall be removed or shall become incapable of acting, or shall be adjudged a bankrupt or insolvent, or if a receiver, liquidator or conservator of the Trustee, or of its property, shall be appointed, or if any public officer shall take charge or control of the Trustee, or of its property or affairs, a successor may be appointed by the holders of a majority in principal amount of the bonds of this Series then outstanding, excluding any bonds held by or for the account of the Authority, by an instrument or concurrent instruments in writing signed and acknowledged by such bondholders or by their attorneys duly authorized and delivered to such successor Trustee, notification thereof being given to the Authority and the predecessor Trustee; *provided*, nevertheless, the Authority shall forthwith appoint a Trustee to fill such vacancy until a successor Trustee shall be appointed by the holders of bonds of this Series as authorized in this Section. The Authority shall publish notice of any such appointment made by it once in each week for two (2) consecutive calendar weeks, in a newspaper of general circulation in the City of New York, State of New York, the first publication to be made within twenty (20) days after such appointment. Any successor Trustee appointed by the Authority shall, immediately and without further act, be superseded by a Trustee appointed by the holders of bonds of this Series.

Any company into which any Trustee may be merged or converted or with which it may be consolidated or any company resulting from any merger, conversion or consolidation to which it shall be a party or any company to which any Trustee may sell or transfer all or substantially all of its corporate trust business; *provided*, such company shall be a bank or trust company located in the Port of New York District and shall be authorized by law to perform all the duties imposed upon it by this resolution, shall be the successor to such Trustee without the execution or filing of any paper or the performance of any further act.

The failure of the Authority to take any action required by this Section shall not invalidate any bond or bonds issued pursuant to this resolution or hereafter issued by the Authority, or affect any other actions of the Authority. The Authority shall in no way be restricted by this Section from entering any defense to an action or proceeding instituted by the Trustee or by the holder or holders of bonds of this Series.

SECTION 9. Each bond of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the

Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each bond of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such bond shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No bond of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such bond shall be conclusive evidence that such bond has been authenticated and delivered hereunder. Such certificate of authentication on any such bond shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such bonds issued hereunder. Bonds of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered bonds of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED BOND)

**THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED BOND
SIXTY-THIRD SERIES, DUE 2023**

No. C(63)-
Maturity Date: June 1, 2023 Interest Rate:% Per Annum Dated: June 1, 1988 CUSIP

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of June, 2023, upon presentation and surrender of this bond, the principal amount shown below:

together with interest thereon at the rate of per centum (%) per annum from , payable semi-annually commencing on December 1, 1988, and thereafter on each succeeding June 1 and December 1 until maturity or prior redemption. The principal of this bond shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the office of , Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this bond shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This bond is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolutions of April 9, 1987, establishing the Series of which this bond forms a part and authorizing the issuance of this bond, constitute a contract between the Authority and the registered holder of this bond, which is subject to modification as therein provided.

The Authority has appointed a Trustee for and in connection with the bonds of this Series as provided by the resolution establishing the Series of which this bond forms a part.

This bond is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this bond or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this bond forms a part. The bonds of this Series are issuable only in the form of registered bonds without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this bond or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this bond forms a part for an equal aggregate principal amount of registered bonds of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This bond may be redeemed at December 1 of any year prior to maturity beginning with 2003 to satisfy the requirements of the schedule of mandatory periodic retirement provided for bonds of this Series in and pursuant to said resolutions of the Authority at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption at December 1, 2003, and thereafter and at or prior to December 1, 2022.

This bond may at the option of the Authority be redeemed for any other purpose at any interest payment date at or subsequent to June 1, 1995, as follows:

At one hundred two per centum (102%) of its face value, plus accrued interest to the date fixed for redemption, at June 1, 1995, and thereafter and at or prior to June 1, 1997; at one hundred one per centum (101%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to June 1, 2000; and at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to December 1, 2022.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance of the Authority shall fix and determine.

If this bond shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this bond at his last known address as appearing on the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If this bond shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this bond, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this bond from and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the foregoing resolutions but shall rely solely upon the funds so deposited.

If this bond is of a denomination greater than \$5,000, and if less than all of the bonds of the Series of which this bond forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this bond shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing redemption provisions shall be deemed to refer to each such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this bond are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this bond shall forthwith present this bond to the Registrar who will issue new bonds of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this bond forms a part, including a new bond or bonds

with the aggregate principal amount of the \$5,000 unit or units called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this bond to the Registrar for the issuance of new bonds of smaller denominations in exchange or substitution therefor as aforesaid, this bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

This bond is entitled to the benefit of the sinking fund established for this Series by the resolutions of the Authority hereinabove referred to.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this bond, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this bond, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this bond to be dated as of the first day of June, 1988.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

.....
Authorized Officer

(END OF FORM OF REGISTERED BOND)

(Signature of Registered Holder)

In the presence of: (Witness)

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within bond in every particular, with such signature appropriately guaranteed.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the bonds of this Series shall cease to be such official before such bonds shall have been actually issued, such bonds may nevertheless be issued as though the person who signed such bonds had not ceased to be such official of the Authority; and the Authority may, by issuing bonds bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the bonds and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 10. The Committee on Finance of the Authority is hereby authorized (i) prior to the issuance of the first installment of the bonds of this Series, to change the date as of which the bonds of this Series shall be dated to any date on or before December 31, 1988, and, if the date as of which the bonds of this Series shall be dated is so changed and the bonds bear a stated rate or rates of interest, the Committee shall change by the same number of days the respective dates on which interest on the bonds of this Series shall be payable; (ii) prior to the issuance of any installment of the bonds of this Series, to change the date at which any of the bonds of that installment shall mature; provided, that said date or dates shall not be more than thirty-five (35) years from the date as of which the bonds of this Series are dated; (iii) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates in connection with the redemption, retirement, call and sinking fund provisions as to such installment; (iv) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption for the bonds of this Series to retire such entire installment at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to such installment; (v) prior to the issuance of any installment of the bonds of this Series, to reduce the percentages of face value relating to the optional call provisions for such installment; (vi) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be issued on original issuance as book-entry only securities taking account of the changes and adjustments authorized in this resolution with respect to the issuance of the bonds of this Series as book-entry only securities; (vii) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be separately registrable

as to principal and interest (including any authorized incremental interest) to any one or more holders of the bonds or certificates (if any) with respect to the payment of interest thereon; (viii) prior to the issuance of the first installment of the bonds of this Series if it is desirable in connection with the use of the proceeds of the bonds of this Series for the refunding of a series of the Authority's obligations to renumber this Series for purposes of identification, to renumber this Series; (ix) prior to the issuance of the first installment of the bonds of this Series, if a prior series of Consolidated Bonds has been renumbered or the resolutions in connection therewith have been rescinded and cancelled, and if it is desirable to accomplish the capital program of the Authority utilizing a continuous numbered sequence of Consolidated Bonds, to renumber this Series; and (x) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 11. In case any bond or coupon (if any) pertaining to such a bond shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new bond or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated bond or coupon or in lieu of or in substitution for such destroyed or lost bond or coupon; or if such bond or coupon shall have matured, instead of issuing a substitute bond or coupon the Authority may pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute bond or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such bond or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute bond or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute bond or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new bond or coupon so issued in substitution. Any bond or coupon (if any) issued under the provisions of this section in lieu of any bond or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the bond or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

Consolidated Bonds, Sixty-third Series—Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority"), adopted a resolution providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time in conformity with said resolution for the purposes therein set forth, which said resolution (hereinafter called the "Consolidated Bond Resolution") constitutes a contract with the holders of the bonds so issued; and

WHEREAS, on the 9th day of April, 1987, the Authority adopted a resolution establishing a series of said Consolidated Bonds to be known as "Sixty-third Series, Due 2023" (hereinafter called "bonds of this Series"), which said resolution by its terms constitutes a contract with the holders of the bonds of this Series; and

WHEREAS, the Authority has now determined that it is necessary, advisable and in the public interest to authorize the issuance of Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series for the purposes hereinafter set forth;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplementary thereto.

SECTION 2. The issuance of up to Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series is hereby authorized. Said bonds shall be issued in one or more installments or lots pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution and the aforesaid resolution establishing the bonds of this Series.

SECTION 3. Unless otherwise determined by the Committee on Finance in connection with the issuance of the bonds of this Series as book-entry only securities (which said Committee is hereby authorized to fix and determine such other system or method), the bonds of this Series shall be numbered upward from C(63)-1, or they may bear such other numbers as the Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority may deem appropriate.

SECTION 4. The proceeds of the bonds of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however*, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, the Committee on Finance may authorize all or any portion of the unspent proceeds of the bonds of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the bonds of this Series; (b) for the purpose of refunding, directly, by offers to exchange, or otherwise, at or before maturity, all or any part of any issue of Consolidated Bonds or Consolidated Notes issued and outstanding at the time of the sale of any installment of the bonds of this Series; and (c) for the purpose of refunding in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

SECTION 5. In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the bonds of this Series to purposes in connection with some but not all of the purposes authorized in Section 4 hereof, the Committee is hereby authorized, prior to the sale of bonds of any installment of this Series from time to time, to make such allocation by resolution. The adoption by said Committee of such a resolution prior to any such sale shall be sufficient to restrict the application of the proceeds of any bonds of such installment of this Series included in said sale to the purposes specified by the Committee in said resolution.

SECTION 6. The provisions of this resolution shall constitute a contract with the holders of the bonds issued pursuant to this resolution, and with each such holder.

Consolidated Bonds, Sixty-third Series—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of Two Hundred Million Dollars (\$200,000,000) in principal amount of Consolidated Bonds, Sixty-third Series, Due 2023 (hereinafter called the "bonds of this Series"), at a price which will result in a true interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more installments or in one or more lots, at one or more times on or before December 31, 1988, and to apply the proceeds of such sale or sales as provided in the resolution authorizing the issuance of said bonds of this Series; *provided, however*, that the total aggregate principal amount of Consolidated Bonds, Fifty-eighth Series, Due 2022, Consolidated Bonds, Fifty-ninth Series, Due 2022, Consolidated Bonds, Sixtieth Series, Due 2022, Consolidated Bonds, Sixty-first Series, Due 2022, Consolidated Bonds, Sixty-second Series, Due 2023, Consolidated Bonds, Sixty-third Series, Due 2023, Consolidated Bonds, Sixty-fourth Series, Due 2023, and Consolidated Bonds, Sixty-fifth Series, Due 2023, sold by the Committee shall not exceed One Billion Dollars (\$1,000,000,000).

SECTION 2. The Committee shall have power, in connection with the bonds of this Series, to fix the time or times of sale on or before December 31, 1988, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have power in the name of and on behalf of the Authority, in connection with the bonds of this Series, to enter into any appropriate contracts or agreements concerning any sales or exchanges; to fix the time or times and determine the terms and conditions of delivery of the bonds of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar and a Trustee, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with the bonds of this Series; to enter into appropriate contracts or agreements in connection with the issuance of the bonds of this Series as book-entry only securities; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the bonds of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the bonds offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the underwriter or underwriters purchasing the bonds in offering the bonds of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the bonds of any installment of the bonds of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such bonds of this Series to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto.

SECTION 6. The Committee; Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial

Officer; or Treasurer of the Authority is hereby authorized, in connection with the bonds of this Series, to take any action which may be necessary or desirable to assure that the bonds of this Series are in conformity with the provisions of Section 103 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, and that the interest on such bonds of this Series is not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, or regulations with respect thereto, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of bonds of this Series for the purposes for which such bonds of this Series are issued, as to the status of the projects for which the proceeds of the bonds of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee and any such actions taken in connection therewith are hereby ratified.

Consolidated Bonds, Sixty-fourth Series—Establishment

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, heretofore and on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority") adopted a resolution (hereinafter called the "Consolidated Bond Resolution") providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time, in conformity with said Consolidated Bond Resolution for the purposes therein set forth, and which Consolidated Bond Resolution constitutes a contract with the holders of the Consolidated Bonds so issued; and

WHEREAS, said Consolidated Bond Resolution provides that such Consolidated Bonds shall be issued in such series as the Authority may determine, and that the characteristics of the bonds of such series shall be determined by the Authority by and in the resolution establishing such series, and that the resolution establishing any series may contain other terms and provisions not inconsistent with the Consolidated Bond Resolution; and

WHEREAS, the Authority has heretofore established various series of said Consolidated Bonds and has now determined that it is necessary, advisable and in the public interest to establish another series of said Consolidated Bonds, without prejudice to its right hereafter to establish other and additional series of such Consolidated Bonds;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions.

SECTION 2. There is hereby established a series of said Consolidated Bonds to be known as "Consolidated Bonds, Sixty-fourth Series, Due 2023," to be issued in conformity with said Consolidated Bond Resolution and for any one or more of the purposes specified therein as may be provided in the resolution authorizing the issuance of such series. This resolution shall constitute a contract with the holders of said bonds of Consolidated Bonds, Sixty-fourth Series, Due 2023, which said bonds are hereinafter called "bonds of this Series," and with each such holder.

SECTION 3. Bonds of this Series shall be issued in one or more installments or lots as the Authority may hereafter determine.

The bonds of this Series shall be dated as of September 1, 1988, shall mature on September 1, 2023, and shall bear a stated rate or rates of interest, including fixed, variable or incremental rates for the term of the bonds or any portion thereof, or a combination thereof, from the semi-annual interest payment date next preceding their date of issuance, or if such date of issuance shall be an interest payment date, from such date of issuance, not exceeding twelve per centum (12%) per annum as may be determined by the Committee on Finance of the Authority. The Committee on Finance is hereby authorized to fix and determine any other date as that upon which interest shall commence and said interest rate or rates, or to determine that said bonds of this Series shall not bear a stated rate of interest. If the bonds of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on March 1, 1989, and thereafter on each succeeding September 1 and March 1 until maturity or prior redemption.

Both principal of and interest on the bonds of this Series shall be payable in lawful money of the United States of America. Principal of the bonds of this Series shall be payable upon presentation and surrender thereof by the registered holders, or in the case of coupon bonds of this Series, if any, upon presentation and surrender thereof, at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered bonds of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder and interest on the coupon bonds of this Series, if any, shall be payable upon presentation and surrender of the coupons appertaining thereto at such office or offices of such Paying Agent or Paying Agents. If on original issuance the bonds of this Series are to be issued as book-entry only securities, subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method for the payment of both or either of the principal of and interest on the bonds of this Series to

the registered holder thereof; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system, then the foregoing payment provisions of this paragraph shall apply to the bonds of this Series.

Bonds of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the first installment of the bonds of this Series, there shall be in effect a provision of the Internal Revenue Code of 1986, as amended (hereinafter called the "Code"), or successor provisions of law, or the regulations with respect thereto, which does not provide that, for the interest on the bonds of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such bonds of this Series must be issued in registered form, then the bonds of this Series may also be issued in the form of coupon bonds payable to bearer, in which event the Committee on Finance is hereby authorized to adopt an appropriate form of coupon bond issuable only in the denomination of \$5,000. If on original issuance the bonds of this Series are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an appropriate form of bond or other evidence of indebtedness; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system then the provisions of Section 9 of this resolution shall apply to the bonds of this Series.

Registered bonds of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 4. The Authority will keep or cause to be kept at the offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of bonds of this Series. Each registered bond of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmatured coupons thereto attached, may be exchanged for a registered bond or bonds, registered as designated in such request, of the same aggregate principal amount and series as the surrendered bond or bonds, of any of the authorized denominations. A registered bond or bonds of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered bond or bonds, registered as designated in such request, of any other authorized denominations, or in the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds with appropriate coupons attached, or a combination of such coupon and registered bonds, in each case of the same aggregate principal amount as the surrendered bond or bonds.

All requests for the registration, transfer, exchange and delivery of bonds as above provided shall be filed with the Registrar of the Authority; all bonds to be surrendered pursuant to such request shall be surrendered to the Registrar; and all bonds delivered in exchange as aforesaid shall be delivered by the Registrar. All bonds of this Series surrendered to the Registrar in exchange for other bonds or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of bonds of this Series except in the denomination of \$5,000 in the case of coupon bonds (if any) or in the denominations of \$5,000 or integral multiples of \$5,000 in the case of registered bonds or to authorize the issuance of coupon bonds of this Series if at any time there shall be in effect a provision of the Code or the applicable regulations related thereto which provides that for the interest on the bonds of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such bonds of this Series must be issued in registered form.

SECTION 5. Except as provided in Section 6 of this resolution, bonds of this Series shall be redeemable at the option of the Authority, in whole or in part, on interest payment dates, at or subsequent to September 1, 1995, and prior to maturity, as follows:

At one hundred two per centum (102%) of their face value, plus accrued interest to the date fixed for redemption, at September 1, 1995, and thereafter and at or prior to September 1, 1997; at one hundred one per centum (101%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to September 1, 2000; and at one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to March 1, 2023.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any bonds of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption, to the registered holders of the bonds of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however,* that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If on original issuance the bonds of this Series are to be issued only in registered form or are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method by which the Authority shall give notice of intention to redeem any bonds of this Series.

Before the date fixed for redemption specified in the Authority's notice of intention to redeem, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding bonds which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption and the premium (if any), such principal amount and premium (if any), to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the bonds so called for redemption and to be paid to them respectively upon presentation and surrender of the said bonds with accrued interest included in such redemption price to be paid to the registered holders in accordance with the provisions of this resolution and in the case of coupon bonds (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such bonds. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided or as provided by the Committee on Finance, the bonds so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such bonds on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the bonds so called from and after the date fixed for their redemption, and such bonds and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered bonds of denominations greater than \$5,000, if less than all of the bonds of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing provisions of this Section 5 shall be deemed to refer to such \$5,000 unit of face value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by any bond are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said bond shall forthwith present said bond to the Registrar who shall issue a new bond or bonds of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 4 of this resolution, including a new bond or bonds with the aggregate principal amount of the \$5,000 unit or units of face value called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such bond of a denomination greater than \$5,000 shall fail to present such bond to the Registrar for the issuance of new bonds of smaller denominations

in exchange therefor, as aforesaid, such bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such bond shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 6. The Authority shall establish and maintain a separate sinking fund for the retirement of bonds of this Series which shall be known as the "Consolidated Bonds, Sixty-fourth Series, Due 2023, Sinking Fund." The amount required to be paid into said Sinking Fund for each year shall be the difference at July 15 of such year between the schedule amount of principal for such year and the schedule amount of principal for the next preceding year as set forth in this Section 6, determined in the manner provided in the next succeeding paragraph. Except as provided in the third paragraph of this Section 6, payments into said Sinking Fund shall be made in bonds of this Series purchased or redeemed by the Authority at or prior to July 15 of the year on account of which the payment is made. Such payments may be made at any time or times during such year at or prior to July 15 or at any time or times during any prior year. Bonds of this Series so purchased may be purchased at such prices as the Authority may deem reasonable and proper and, in the discretion of the Authority, at public or private sale, with or without advertisement and with or without notice to any person other than the seller, and bonds theretofore issued and negotiated and then held by the Authority may be purchased for such purpose as well as bonds held by others. To be eligible for payment into said Sinking Fund each such bond shall have theretofore actually been issued and negotiated by the Authority and shall either be in registered form or in coupon form (if any) with all interest coupons attached maturing on and subsequent to September 1 of the year on account of which it is paid into said Sinking Fund. Bonds paid into said Sinking Fund shall be received therein at a value equal to the principal amount of such bonds. Upon payment into said Sinking Fund of said bonds of this Series so purchased or redeemed, said bonds shall be forthwith cancelled. All bonds of this Series which shall have been redeemed at prices established by Section 5 hereof shall be deemed to have been paid into said Sinking Fund and cancelled within the requirements of the preceding sentence whether or not said bonds shall have been presented for payment upon such redemption.

The schedule amount of bonds of this Series for each year shall be determined by multiplying the aggregate principal amount of all bonds of this Series theretofore issued (whether or not any of such bonds shall have theretofore been retired) by the cumulative percentage of total principal amount specified opposite such year in the schedule of mandatory periodic retirement hereafter set forth in this Section 6; if the amount so determined shall not be a multiple of \$5,000, then the schedule amount for such year shall be the next higher multiple of \$5,000.

If at the close of July 15 of any year (except the year of maturity) set forth in said schedule of mandatory periodic retirement, the Authority shall not have made payment into said Sinking Fund on account of such year of an amount at least equal to the payment required to be made therein on account of such year, then the Authority shall, on July 16 of such year, pay into said Sinking Fund an amount in cash equal to the deficiency, and such amounts shall be applied to the redemption of bonds of this Series at September 1, 2003, and at September 1 of each year thereafter, in the manner and upon the notice set forth in Section 5 of this resolution, but, notwithstanding the redemption price set forth in Section 5, at the price of one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, at September 1, 2003, and thereafter and at or prior to September 1, 2022.

The following schedule of mandatory periodic retirement is provided for bonds of this Series:

<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>	<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>
2003	2.1	2014	38.9
2004	4.4	2015	43.9
2005	6.8	2016	49.3
2006	9.4	2017	55.1
2007	12.2	2018	61.4
2008	15.2	2019	68.1
2009	18.5	2020	75.3
2010	22.0	2021	83.1
2011	25.8	2022	91.4
2012	29.8	2023	100.0
2013	34.2		

Nothing herein contained shall be construed in any way to prevent the Authority from retiring bonds of this Series more rapidly than is shown in the foregoing schedule of mandatory periodic retirement.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however*, that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain

such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. The Authority shall appoint a bank or trust company as Trustee for and in connection with the bonds of this Series. The Trustee is hereby authorized to (i) institute any action or proceeding on behalf of the holders of the bonds of this Series against the Authority or others, or (ii) intervene in any pending action or proceeding, or (iii) take any other action which it shall in its sole discretion determine to be necessary or advisable in order to protect the rights of the holders of bonds of this Series. The rights of the Trustee in this respect and in all other respects shall be in addition to and not in substitution of any and all rights which would otherwise inure to the holder or holders of bonds of this Series. It is understood that the Trustee in its sole discretion may, but shall be under no obligation to, review the activities or operations of the Authority or any of the contracts or agreements of the Authority or exercise any of the rights or powers vested in it by this Section 8 whether on the Trustee's initiative or at the request or direction of any of the holders of bonds of this Series.

The Trustee (which shall include any successor Trustee) appointed under the provisions of this Section shall be a bank or trust company organized under the laws of the State of New York or the State of New Jersey or a national banking association doing business and having its principal office in the Port of New York District and having a total capital (including capital stock, surplus, undivided profits and capital notes, if any) aggregating at least \$25,000,000, which is willing and able to accept the office on reasonable and customary terms and is authorized by law to perform all the duties imposed upon it by this resolution.

The Trustee shall not be liable for any action taken or suffered upon any notice, resolution, request, consent, order, certificate, report, opinion, bond, or other paper or document believed by it to be genuine, and to have been signed or presented by the proper party or parties. The Trustee may consult with counsel, who may or may not be counsel to the Authority, and the opinion of such counsel shall be full and complete authorization and protection in respect of any action taken or suffered by it under this resolution in good faith and in accordance therewith. The Trustee shall not be liable in connection with the performance or nonperformance of its duties except for its own willful misconduct, negligence or bad faith.

If the Trustee shall deem it necessary or desirable that a matter be proved or established prior to taking or suffering any action under this resolution, such matter (unless other evidence in respect thereof be specifically prescribed) may be deemed to be conclusively proved and established by a certificate of an authorized officer of the Authority (who shall be any officer authorized pursuant to Section 9 hereof to execute bonds of this Series), and such certificate shall be full warrant for any action taken or suffered in good faith under the provisions of this resolution upon the faith thereof; but in its discretion the Trustee may in lieu thereof accept other evidence of such fact or matter or may require such further or additional evidence as to it may seem reasonable.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a statement of an authorized officer showing for the preceding calendar year (i) net revenues, (ii) the aggregate interest paid on bonds of the Authority, and (iii) the payments of principal on bonds of the Authority.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a copy of its annual report for such year, and its financial statement for such year accompanied by an opinion signed by an independent public accountant or firm of public accountants of recognized standing selected by the Authority and satisfactory to the Trustee.

The Authority shall file with the Trustee a copy of any Official Statement hereafter issued by the Authority in connection with the issuance of bonds by the Authority.

The Authority shall file with the Trustee a copy of the minutes of every meeting of the Authority and of the Port Authority Trans-Hudson Corporation at the time said minutes are transmitted to the Governor of New York and the Governor of New Jersey.

The Authority shall not be required to file with the Trustee (except when requested to do so by the Trustee) and the Trustee shall not be required to review any document, instrument, report or paper other than those which the Authority is expressly required hereunder to file with the Trustee. The Trustee shall not be bound to make any investigation into the facts or matters stated in any document, instrument, report or paper supplied to it, but the

Trustee in its sole discretion may make such further inquiry or investigation into such facts or matters as the Trustee may deem advisable, and, if the Trustee shall determine to make such further inquiry or investigation, the Trustee is authorized to examine such books and records of and properties owned or operated by the Authority as the Trustee may deem advisable, personally or by agent or attorney.

The Authority hereby agrees (i) to pay to the Trustee from time to time reasonable compensation for all services rendered by it hereunder, (ii) to reimburse the Trustee upon its request for all reasonable expenses, disbursements and advances incurred or made by the Trustee in connection with the exercise or performance of any of its powers or duties hereunder (including the reasonable compensation and the expenses and disbursements of its agents and counsel), and (iii) to indemnify the Trustee for, and hold it harmless against, any loss, liability or expense incurred without willful misconduct, negligence or bad faith on its part, arising out of or in connection with the exercise or performance of the Trustee's powers and duties hereunder, including the costs and expenses of defending itself against any claim or liability in connection with such exercise or performance.

The Trustee may become the owner or holder of any bonds of the Authority with the same rights as it would have were it not a Trustee. To the extent permitted by law, the Trustee may act as depository for the Authority, act as Paying Agent and Registrar of bonds of the Authority, act itself and permit any of its officers or directors to act in any other capacity with respect to the Authority, the bonds of the Authority and the holders of bonds of the Authority as it or its officers or directors would be able to act were it not a Trustee.

The Trustee may at any time resign and be discharged of the duties and obligations created by this resolution by giving not less than sixty (60) days' written notice to the Authority and publishing notice thereof, specifying the date when such resignation shall take effect, once in each week for two (2) successive calendar weeks in a newspaper of general circulation in the City of New York, State of New York, and such resignation shall take effect upon the date specified in such notice unless previously a successor shall have been appointed by the Authority in which event such resignation shall take effect immediately on the appointment of such successor.

The Trustee may be removed at any time by an instrument or concurrent instruments in writing, filed with the Trustee, and signed and acknowledged by the holders of a majority in principal amount of the bonds of this Series then outstanding or by their attorneys duly authorized, excluding any bonds held by or for the account of the Authority.

In case at any time the Trustee shall resign or shall be removed or shall become incapable of acting, or shall be adjudged a bankrupt or insolvent, or if a receiver, liquidator or conservator of the Trustee, or of its property, shall be appointed, or if any public officer shall take charge or control of the Trustee, or of its property or affairs, a successor may be appointed by the holders of a majority in principal amount of the bonds of this Series then outstanding, excluding any bonds held by or for the account of the Authority, by an instrument or concurrent instruments in writing signed and acknowledged by such bondholders or by their attorneys duly authorized and delivered to such successor Trustee, notification thereof being given to the Authority and the predecessor Trustee; *provided*, nevertheless, the Authority shall forthwith appoint a Trustee to fill such vacancy until a successor Trustee shall be appointed by the holders of bonds of this Series as authorized in this Section. The Authority shall publish notice of any such appointment made by it once in each week for two (2) consecutive calendar weeks, in a newspaper of general circulation in the City of New York, State of New York, the first publication to be made within twenty (20) days after such appointment. Any successor Trustee appointed by the Authority shall, immediately and without further act, be superseded by a Trustee appointed by the holders of bonds of this Series.

Any company into which any Trustee may be merged or converted or with which it may be consolidated or any company resulting from any merger, conversion or consolidation to which it shall be a party or any company to which any Trustee may sell or transfer all or substantially all of its corporate trust business; *provided*, such company shall be a bank or trust company located in the Port of New York District and shall be authorized by law to perform all the duties imposed upon it by this resolution, shall be the successor to such Trustee without the execution or filing of any paper or the performance of any further act.

The failure of the Authority to take any action required by this Section shall not invalidate any bond or bonds issued pursuant to this resolution or hereafter issued by the Authority, or affect any other actions of the Authority. The Authority shall in no way be restricted by this Section from entering any defense to an action or proceeding instituted by the Trustee or by the holder or holders of bonds of this Series.

SECTION 9. Each bond of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each bond of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such bond shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No bond of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such bond shall be conclusive evidence that such bond has been authenticated and delivered hereunder. Such certificate of authentication on any such bond shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such bonds issued hereunder. Bonds of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered bonds of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED BOND)

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED BOND
SIXTY-FOURTH SERIES, DUE 2023

No. C(64)-. . . .
Maturity Date: September 1, 2023 Interest Rate: % Per Annum Dated: September 1, 1988 CUSIP

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of September, 2023, upon presentation and surrender of this bond, the principal amount shown below:

together with interest thereon at the rate of _____ per centum (_____ %) per annum from _____, payable semi-annually commencing on March 1, 1989, and thereafter on each succeeding September 1 and March 1 until maturity or prior redemption. The principal of this bond shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the office of _____, Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this bond shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This bond is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolutions of April 9, 1987, establishing the Series of which this bond forms a part and authorizing the issuance of this bond, constitute a contract between the Authority and the registered holder of this bond, which is subject to modification as therein provided.

The Authority has appointed a Trustee for and in connection with the bonds of this Series as provided by the resolution establishing the Series of which this bond forms a part.

This bond is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this bond or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this bond forms a part. The bonds of this Series are issuable only in the form of registered bonds without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this bond or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this bond forms a part for an equal aggregate principal amount of registered bonds of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This bond may be redeemed at September 1 of any year prior to maturity beginning with 2003 to satisfy the requirements of the schedule of mandatory periodic retirement provided for bonds of this Series in and pursuant to said resolutions of the Authority at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption at September 1, 2003, and thereafter and at or prior to September 1, 2022.

This bond may at the option of the Authority be redeemed for any other purpose at any interest payment date at or subsequent to September 1, 1995, as follows:

At one hundred two per centum (102%) of its face value, plus accrued interest to the date fixed for redemption, at September 1, 1995, and thereafter and at or prior to September 1, 1997; at one hundred one per centum (101%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to September 1, 2000; and at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to March 1, 2023.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance of the Authority shall fix and determine.

If this bond shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this bond at his last known address as appearing on the Registry Books of the Authority: *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If this bond shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this bond, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this bond from and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the foregoing resolutions but shall rely solely upon the funds so deposited.

If this bond is of a denomination greater than \$5,000, and if less than all of the bonds of the Series of which this bond forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this bond shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing redemption provisions shall be deemed to refer to each such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this bond are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this bond shall forthwith present this bond to the Registrar who will issue new bonds of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this bond forms a part, including a new bond or bonds with the aggregate principal amount of the \$5,000 unit or units called for redemption; and such new bond or bonds

shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this bond to the Registrar for the issuance of new bonds of smaller denominations in exchange or substitution therefor as aforesaid, this bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

This bond is entitled to the benefit of the sinking fund established for this Series by the resolutions of the Authority hereinabove referred to.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this bond, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this bond, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this bond to be dated as of the first day of September, 1988.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

.....
Authorized Officer

(END OF FORM OF REGISTERED BOND)

The certificate of authentication attached to each of the bonds of this Series which are executed by a facsimile signature on behalf of the Authority shall be in substantially the following form, the blank spaces being appropriately filled in:

In the presence of: (Witness)

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within bond in every particular, with such signature appropriately guaranteed.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the bonds of this Series shall cease to be such official before such bonds shall have been actually issued, such bonds may nevertheless be issued as though the person who signed such bonds had not ceased to be such official of the Authority; and the Authority may, by issuing bonds bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the bonds and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 10. The Committee on Finance of the Authority is hereby authorized (i) prior to the issuance of the first installment of the bonds of this Series, to change the date as of which the bonds of this Series shall be dated to any date on or before December 31, 1988, and, if the date as of which the bonds of this Series shall be dated is so changed and the bonds bear a stated rate or rates of interest, the Committee shall change by the same number of days the respective dates on which interest on the bonds of this Series shall be payable; (ii) prior to the issuance of any installment of the bonds of this Series, to change the date at which any of the bonds of that installment shall mature; provided, that said date or dates shall not be more than thirty-five (35) years from the date as of which the bonds of this Series are dated; (iii) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates in connection with the redemption, retirement, call and sinking fund provisions as to such installment; (iv) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption for the bonds of this Series to retire such entire installment at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to such installment; (v) prior to the issuance of any installment of the bonds of this Series, to reduce the percentages of face value relating to the optional call provisions for such installment; (vi) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be issued on original issuance as book-entry only securities taking account of the changes and adjustments authorized in this resolution with respect to the issuance of the bonds of this Series as book-entry only securities; (vii) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be separately registrable

as to principal and interest (including any authorized incremental interest) to any one or more holders of the bonds or certificates (if any) with respect to the payment of interest thereon; (viii) prior to the issuance of the first installment of the bonds of this Series if it is desirable in connection with the use of the proceeds of the bonds of this Series for the refunding of a series of the Authority's obligations to renumber this Series for purposes of identification, to renumber this Series; (ix) prior to the issuance of the first installment of the bonds of this Series, if a prior series of Consolidated Bonds has been renumbered or the resolutions in connection therewith have been rescinded and cancelled, and if it is desirable to accomplish the capital program of the Authority utilizing a continuous numbered sequence of Consolidated Bonds, to renumber this Series; and (x) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 11. In case any bond or coupon (if any) pertaining to such a bond shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new bond or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated bond or coupon or in lieu of or in substitution for such destroyed or lost bond or coupon; or if such bond or coupon shall have matured, instead of issuing a substitute bond or coupon the Authority may pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute bond or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such bond or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute bond or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute bond or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new bond or coupon so issued in substitution. Any bond or coupon (if any) issued under the provisions of this section in lieu of any bond or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the bond or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

Consolidated Bonds, Sixty-fourth Series—Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority"), adopted a resolution providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time in conformity with said resolution for the purposes therein set forth, which said resolution (hereinafter called the "Consolidated Bond Resolution") constitutes a contract with the holders of the bonds so issued; and

WHEREAS, on the 9th day of April, 1987, the Authority adopted a resolution establishing a series of said Consolidated Bonds to be known as "Sixty-fourth Series, Due 2023" (hereinafter called "bonds of this Series"), which said resolution by its terms constitutes a contract with the holders of the bonds of this Series; and

WHEREAS, the Authority has now determined that it is necessary, advisable and in the public interest to authorize the issuance of Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series for the purposes hereinafter set forth;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplementary thereto.

SECTION 2. The issuance of up to Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series is hereby authorized. Said bonds shall be issued in one or more installments or lots pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution and the aforesaid resolution establishing the bonds of this Series.

SECTION 3. Unless otherwise determined by the Committee on Finance in connection with the issuance of the bonds of this Series as book-entry only securities (which said Committee is hereby authorized to fix and determine such other system or method), the bonds of this Series shall be numbered upward from C(64)-1, or they may bear such other numbers as the Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority may deem appropriate.

SECTION 4. The proceeds of the bonds of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however*, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, the Committee on Finance may authorize all or any portion of the unspent proceeds of the bonds of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the bonds of this Series; (b) for the purpose of refunding, directly, by offers to exchange, or otherwise, at or before maturity, all or any part of any issue of Consolidated Bonds or Consolidated Notes issued and outstanding at the time of the sale of any installment of the bonds of this Series; and (c) for the purpose of refunding in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

SECTION 5. In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the bonds of this Series to purposes in connection with some but not all of the purposes authorized in Section 4 hereof, the Committee is hereby authorized, prior to the sale of bonds of any installment of this Series from time to time, to make such allocation by resolution. The adoption by said Committee of such a resolution prior to any such sale shall be sufficient to restrict the application of the proceeds of any bonds of such installment of this Series included in said sale to the purposes specified by the Committee in said resolution.

SECTION 6. The provisions of this resolution shall constitute a contract with the holders of the bonds issued pursuant to this resolution, and with each such holder.

Consolidated Bonds, Sixty-fourth Series—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of Two Hundred Million Dollars (\$200,000,000) in principal amount of Consolidated Bonds, Sixty-fourth Series, Due 2023 (hereinafter called the "bonds of this Series"), at a price which will result in a true interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more installments or in one or more lots, at one or more times on or before December 31, 1988, and to apply the proceeds of such sale or sales as provided in the resolution authorizing the issuance of said bonds of this Series; *provided, however*, that the total aggregate principal amount of Consolidated Bonds, Fifty-eighth Series, Due 2022, Consolidated Bonds, Fifty-ninth Series, Due 2022, Consolidated Bonds, Sixtieth Series, Due 2022, Consolidated Bonds, Sixty-first Series, Due 2022, Consolidated Bonds, Sixty-second Series, Due 2023, Consolidated Bonds, Sixty-third Series, Due 2023, Consolidated Bonds, Sixty-fourth Series, Due 2023, and Consolidated Bonds, Sixty-fifth Series, Due 2023, sold by the Committee shall not exceed One Billion Dollars (\$1,000,000,000).

SECTION 2. The Committee shall have power, in connection with the bonds of this Series, to fix the time or times of sale on or before December 31, 1988, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have power in the name of and on behalf of the Authority, in connection with the bonds of this Series, to enter into any appropriate contracts or agreements concerning any sales or exchanges; to fix the time or times and determine the terms and conditions of delivery of the bonds of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar and a Trustee, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with the bonds of this Series; to enter into appropriate contracts or agreements in connection with the issuance of the bonds of this Series as book-entry only securities; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the bonds of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the bonds offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the underwriter or underwriters purchasing the bonds in offering the bonds of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the bonds of any installment of the bonds of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such bonds of this Series to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto.

SECTION 6. The Committee; Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial

Officer; or Treasurer of the Authority is hereby authorized, in connection with the bonds of this Series, to take any action which may be necessary or desirable to assure that the bonds of this Series are in conformity with the provisions of Section 103 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, and that the interest on such bonds of this Series is not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, or regulations with respect thereto, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of bonds of this Series for the purposes for which such bonds of this Series are issued, as to the status of the projects for which the proceeds of the bonds of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee and any such actions taken in connection therewith are hereby ratified.

Consolidated Bonds, Sixty-fifth Series—Establishment

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, heretofore and on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority") adopted a resolution (hereinafter called the "Consolidated Bond Resolution") providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time, in conformity with said Consolidated Bond Resolution for the purposes therein set forth, and which Consolidated Bond Resolution constitutes a contract with the holders of the Consolidated Bonds so issued; and

WHEREAS, said Consolidated Bond Resolution provides that such Consolidated Bonds shall be issued in such series as the Authority may determine, and that the characteristics of the bonds of such series shall be determined by the Authority by and in the resolution establishing such series, and that the resolution establishing any series may contain other terms and provisions not inconsistent with the Consolidated Bond Resolution; and

WHEREAS, the Authority has heretofore established various series of said Consolidated Bonds and has now determined that it is necessary, advisable and in the public interest to establish another series of said Consolidated Bonds, without prejudice to its right hereafter to establish other and additional series of such Consolidated Bonds;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions.

SECTION 2. There is hereby established a series of said Consolidated Bonds to be known as "Consolidated Bonds, Sixty-fifth Series, Due 2023," to be issued in conformity with said Consolidated Bond Resolution and for any one or more of the purposes specified therein as may be provided in the resolution authorizing the issuance of such series. This resolution shall constitute a contract with the holders of said bonds of Consolidated Bonds, Sixty-fifth Series, Due 2023, which said bonds are hereinafter called "bonds of this Series," and with each such holder.

SECTION 3. Bonds of this Series shall be issued in one or more installments or lots as the Authority may hereafter determine.

The bonds of this Series shall be dated as of December 1, 1988, shall mature on December 1, 2023, and shall bear a stated rate or rates of interest, including fixed, variable or incremental rates for the term of the bonds or any portion thereof, or a combination thereof, from the semi-annual interest payment date next preceding their date of issuance, or if such date of issuance shall be an interest payment date, from such date of issuance, not exceeding twelve per centum (12%) per annum as may be determined by the Committee on Finance of the Authority. The Committee on Finance is hereby authorized to fix and determine any other date as that upon which interest shall commence and said interest rate or rates, or to determine that said bonds of this Series shall not bear a stated rate of interest. If the bonds of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on June 1, 1989, and thereafter on each succeeding December 1 and June 1 until maturity or prior redemption.

Both principal of and interest on the bonds of this Series shall be payable in lawful money of the United States of America. Principal of the bonds of this Series shall be payable upon presentation and surrender thereof by the registered holders, or in the case of coupon bonds of this Series, if any, upon presentation and surrender thereof, at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered bonds of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder and interest on the coupon bonds of this Series, if any, shall be payable upon presentation and surrender of the coupons appertaining thereto at such office or offices of such Paying Agent or Paying Agents. If on original issuance the bonds of this Series are to be issued as book-entry only securities, subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an

alternate method for the payment of both or either of the principal of and interest on the bonds of this Series to the registered holder thereof; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system, then the foregoing payment provisions of this paragraph shall apply to the bonds of this Series.

Bonds of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the first installment of the bonds of this Series, there shall be in effect a provision of the Internal Revenue Code of 1986, as amended (hereinafter called the "Code"), or successor provisions of law, or the regulations with respect thereto, which does not provide that, for the interest on the bonds of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such bonds of this Series must be issued in registered form, then the bonds of this Series may also be issued in the form of coupon bonds payable to bearer, in which event the Committee on Finance is hereby authorized to adopt an appropriate form of coupon bond issuable only in the denomination of \$5,000. If on original issuance the bonds of this Series are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an appropriate form of bond or other evidence of indebtedness; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system then the provisions of Section 9 of this resolution shall apply to the bonds of this Series.

Registered bonds of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 4. The Authority will keep or cause to be kept at the offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of bonds of this Series. Each registered bond of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmatured coupons thereto attached, may be exchanged for a registered bond or bonds, registered as designated in such request, of the same aggregate principal amount and series as the surrendered bond or bonds, of any of the authorized denominations. A registered bond or bonds of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered bond or bonds, registered as designated in such request, of any other authorized denominations, or in the event that the bonds of this Series may be issued in coupon form, a coupon bond or bonds with appropriate coupons attached, or a combination of such coupon and registered bonds, in each case of the same aggregate principal amount as the surrendered bond or bonds.

All requests for the registration, transfer, exchange and delivery of bonds as above provided shall be filed with the Registrar of the Authority; all bonds to be surrendered pursuant to such request shall be surrendered to the Registrar; and all bonds delivered in exchange as aforesaid shall be delivered by the Registrar. All bonds of this Series surrendered to the Registrar in exchange for other bonds or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of bonds of this Series except in the denomination of \$5,000 in the case of coupon bonds (if any) or in the denominations of \$5,000 or integral multiples of \$5,000 in the case of registered bonds or to authorize the issuance of coupon bonds of this Series if at any time there shall be in effect a provision of the Code or the applicable regulations related thereto which provides that for the interest on the bonds of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such bonds of this Series must be issued in registered form.

SECTION 5. Except as provided in Section 6 of this resolution, bonds of this Series shall be redeemable at the option of the Authority, in whole or in part, on interest payment dates, at or subsequent to December 1, 1995, and prior to maturity, as follows:

At one hundred two per centum (102%) of their face value, plus accrued interest to the date fixed for redemption, at December 1, 1995, and thereafter and at or prior to December 1, 1997; at one hundred one per centum (101%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to December 1, 2000; and at one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to June 1, 2023.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any bonds of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption, to the registered holders of the bonds of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however,* that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If on original issuance the bonds of this Series are to be issued only in registered form or are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method by which the Authority shall give notice of intention to redeem any bonds of this Series.

Before the date fixed for redemption specified in the Authority's notice of intention to redeem, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding bonds which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption and the premium (if any), such principal amount and premium (if any), to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the bonds so called for redemption and to be paid to them respectively upon presentation and surrender of the said bonds with accrued interest included in such redemption price to be paid to the registered holders in accordance with the provisions of this resolution and in the case of coupon bonds (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such bonds. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided or as provided by the Committee on Finance, the bonds so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such bonds on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the bonds so called from and after the date fixed for their redemption, and such bonds and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered bonds of denominations greater than \$5,000, if less than all of the bonds of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing provisions of this Section 5 shall be deemed to refer to such \$5,000 unit of face value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by any bond are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said bond shall forthwith present said bond to the Registrar who shall issue a new bond or bonds of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 4 of this resolution, including a new bond or bonds with the aggregate principal amount of the \$5,000 unit or units of face value called for redemption; and such new bond or bonds shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such bond of a denomination greater than \$5,000 shall fail to present such bond to the Registrar for the issuance of new bonds of smaller denominations

in exchange therefor, as aforesaid, such bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such bond shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 6. The Authority shall establish and maintain a separate sinking fund for the retirement of bonds of this Series which shall be known as the "Consolidated Bonds, Sixty-fifth Series, Due 2023, Sinking Fund." The amount required to be paid into said Sinking Fund for each year shall be the difference at October 15 of such year between the schedule amount of principal for such year and the schedule amount of principal for the next preceding year as set forth in this Section 6, determined in the manner provided in the next succeeding paragraph. Except as provided in the third paragraph of this Section 6, payments into said Sinking Fund shall be made in bonds of this Series purchased or redeemed by the Authority at or prior to October 15 of the year on account of which the payment is made. Such payments may be made at any time or times during such year at or prior to October 15 or at any time or times during any prior year. Bonds of this Series so purchased may be purchased at such prices as the Authority may deem reasonable and proper and, in the discretion of the Authority, at public or private sale, with or without advertisement and with or without notice to any person other than the seller, and bonds theretofore issued and negotiated and then held by the Authority may be purchased for such purpose as well as bonds held by others. To be eligible for payment into said Sinking Fund each such bond shall have theretofore actually been issued and negotiated by the Authority and shall either be in registered form or in coupon form (if any) with all interest coupons attached maturing on and subsequent to December 1 of the year on account of which it is paid into said Sinking Fund. Bonds paid into said Sinking Fund shall be received therein at a value equal to the principal amount of such bonds. Upon payment into said Sinking Fund of said bonds of this Series so purchased or redeemed, said bonds shall be forthwith cancelled. All bonds of this Series which shall have been redeemed at prices established by Section 5 hereof shall be deemed to have been paid into said Sinking Fund and cancelled within the requirements of the preceding sentence whether or not said bonds shall have been presented for payment upon such redemption.

The schedule amount of bonds of this Series for each year shall be determined by multiplying the aggregate principal amount of all bonds of this Series theretofore issued (whether or not any of such bonds shall have theretofore been retired) by the cumulative percentage of total principal amount specified opposite such year in the schedule of mandatory periodic retirement hereafter set forth in this Section 6; if the amount so determined shall not be a multiple of \$5,000, then the schedule amount for such year shall be the next higher multiple of \$5,000.

If at the close of October 15 of any year (except the year of maturity) set forth in said schedule of mandatory periodic retirement, the Authority shall not have made payment into said Sinking Fund on account of such year of an amount at least equal to the payment required to be made therein on account of such year, then the Authority shall, on October 16 of such year, pay into said Sinking Fund an amount in cash equal to the deficiency, and such amounts shall be applied to the redemption of bonds of this Series at December 1, 2003, and at December 1 of each year thereafter, in the manner and upon the notice set forth in Section 5 of this resolution, but, notwithstanding the redemption price set forth in Section 5, at the price of one hundred per centum (100%) of their face value, plus accrued interest to the date fixed for redemption, at December 1, 2003, and thereafter and at or prior to December 1, 2022.

The following schedule of mandatory periodic retirement is provided for bonds of this Series:

<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>	<u>Year</u>	<u>Cumulative Percentage of Total Principal Amount</u>
2003	2.1	2014	38.9
2004	4.4	2015	43.9
2005	6.8	2016	49.3
2006	9.4	2017	55.1
2007	12.2	2018	61.4
2008	15.2	2019	68.1
2009	18.5	2020	75.3
2010	22.0	2021	83.1
2011	25.8	2022	91.4
2012	29.8	2023	100.0
2013	34.2		

Nothing herein contained shall be construed in any way to prevent the Authority from retiring bonds of this Series more rapidly than is shown in the foregoing schedule of mandatory periodic retirement.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however*, that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. The Authority shall appoint a bank or trust company as Trustee for and in connection with the bonds of this Series. The Trustee is hereby authorized to (i) institute any action or proceeding on behalf of the holders of the bonds of this Series against the Authority or others, or (ii) intervene in any pending action or proceeding, or (iii) take any other action which it shall in its sole discretion determine to be necessary or advisable in order to protect the rights of the holders of bonds of this Series. The rights of the Trustee in this respect and in all other respects shall be in addition to and not in substitution of any and all rights which would otherwise inure to the holder or holders of bonds of this Series. It is understood that the Trustee in its sole discretion may, but shall be under no obligation to, review the activities or operations of the Authority or any of the contracts or agreements of the Authority or exercise any of the rights or powers vested in it by this Section 8 whether on the Trustee's initiative or at the request or direction of any of the holders of bonds of this Series.

The Trustee (which shall include any successor Trustee) appointed under the provisions of this Section shall be a bank or trust company organized under the laws of the State of New York or the State of New Jersey or a national banking association doing business and having its principal office in the Port of New York District and having a total capital (including capital stock, surplus, undivided profits and capital notes, if any) aggregating at least \$25,000,000, which is willing and able to accept the office on reasonable and customary terms and is authorized by law to perform all the duties imposed upon it by this resolution.

The Trustee shall not be liable for any action taken or suffered upon any notice, resolution, request, consent, order, certificate, report, opinion, bond, or other paper or document believed by it to be genuine, and to have been signed or presented by the proper party or parties. The Trustee may consult with counsel, who may or may not be counsel to the Authority, and the opinion of such counsel shall be full and complete authorization and protection in respect of any action taken or suffered by it under this resolution in good faith and in accordance therewith. The Trustee shall not be liable in connection with the performance or nonperformance of its duties except for its own willful misconduct, negligence or bad faith.

If the Trustee shall deem it necessary or desirable that a matter be proved or established prior to taking or suffering any action under this resolution, such matter (unless other evidence in respect thereof be specifically prescribed) may be deemed to be conclusively proved and established by a certificate of an authorized officer of the Authority (who shall be any officer authorized pursuant to Section 9 hereof to execute bonds of this Series), and such certificate shall be full warrant for any action taken or suffered in good faith under the provisions of this resolution upon the faith thereof; but in its discretion the Trustee may in lieu thereof accept other evidence of such fact or matter or may require such further or additional evidence as to it may seem reasonable.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a statement of an authorized officer showing for the preceding calendar year (i) net revenues, (ii) the aggregate interest paid on bonds of the Authority, and (iii) the payments of principal on bonds of the Authority.

The Authority shall annually, within one hundred twenty (120) days after the close of each calendar year, file with the Trustee a copy of its annual report for such year, and its financial statement for such year accompanied by an opinion signed by an independent public accountant or firm of public accountants of recognized standing selected by the Authority and satisfactory to the Trustee.

The Authority shall file with the Trustee a copy of any Official Statement hereafter issued by the Authority in connection with the issuance of bonds by the Authority.

The Authority shall file with the Trustee a copy of the minutes of every meeting of the Authority and of the Port Authority Trans-Hudson Corporation at the time said minutes are transmitted to the Governor of New York and the Governor of New Jersey.

The Authority shall not be required to file with the Trustee (except when requested to do so by the Trustee) and the Trustee shall not be required to review any document, instrument, report or paper other than those which the Authority is expressly required hereunder to file with the Trustee. The Trustee shall not be bound to make any investigation into the facts or matters stated in any document, instrument, report or paper supplied to it, but the Trustee in its sole discretion may make such further inquiry or investigation into such facts or matters as the Trustee may deem advisable, and, if the Trustee shall determine to make such further inquiry or investigation, the Trustee is authorized to examine such books and records of and properties owned or operated by the Authority as the Trustee may deem advisable, personally or by agent or attorney.

The Authority hereby agrees (i) to pay to the Trustee from time to time reasonable compensation for all services rendered by it hereunder, (ii) to reimburse the Trustee upon its request for all reasonable expenses, disbursements and advances incurred or made by the Trustee in connection with the exercise or performance of any of its powers or duties hereunder (including the reasonable compensation and the expenses and disbursements of its agents and counsel), and (iii) to indemnify the Trustee for, and hold it harmless against, any loss, liability or expense incurred without willful misconduct, negligence or bad faith on its part, arising out of or in connection with the exercise or performance of the Trustee's powers and duties hereunder, including the costs and expenses of defending itself against any claim or liability in connection with such exercise or performance.

The Trustee may become the owner or holder of any bonds of the Authority with the same rights as it would have were it not a Trustee. To the extent permitted by law, the Trustee may act as depository for the Authority, act as Paying Agent and Registrar of bonds of the Authority, act itself and permit any of its officers or directors to act in any other capacity with respect to the Authority, the bonds of the Authority and the holders of bonds of the Authority as it or its officers or directors would be able to act were it not a Trustee.

The Trustee may at any time resign and be discharged of the duties and obligations created by this resolution by giving not less than sixty (60) days' written notice to the Authority and publishing notice thereof, specifying the date when such resignation shall take effect, once in each week for two (2) successive calendar weeks in a newspaper of general circulation in the City of New York, State of New York, and such resignation shall take effect upon the date specified in such notice unless previously a successor shall have been appointed by the Authority in which event such resignation shall take effect immediately on the appointment of such successor.

The Trustee may be removed at any time by an instrument or concurrent instruments in writing, filed with the Trustee, and signed and acknowledged by the holders of a majority in principal amount of the bonds of this Series then outstanding or by their attorneys duly authorized, excluding any bonds held by or for the account of the Authority.

In case at any time the Trustee shall resign or shall be removed or shall become incapable of acting, or shall be adjudged a bankrupt or insolvent, or if a receiver, liquidator or conservator of the Trustee, or of its property, shall be appointed, or if any public officer shall take charge or control of the Trustee, or of its property or affairs, a successor may be appointed by the holders of a majority in principal amount of the bonds of this Series then outstanding, excluding any bonds held by or for the account of the Authority, by an instrument or concurrent instruments in writing signed and acknowledged by such bondholders or by their attorneys duly authorized and delivered to such successor Trustee, notification thereof being given to the Authority and the predecessor Trustee; *provided*, nevertheless, the Authority shall forthwith appoint a Trustee to fill such vacancy until a successor Trustee shall be appointed by the holders of bonds of this Series as authorized in this Section. The Authority shall publish notice of any such appointment made by it once in each week for two (2) consecutive calendar weeks, in a newspaper of general circulation in the City of New York, State of New York, the first publication to be made within twenty (20) days after such appointment. Any successor Trustee appointed by the Authority shall, immediately and without further act, be superseded by a Trustee appointed by the holders of bonds of this Series.

Any company into which any Trustee may be merged or converted or with which it may be consolidated or any company resulting from any merger, conversion or consolidation to which it shall be a party or any company to which any Trustee may sell or transfer all or substantially all of its corporate trust business; *provided*, such company shall be a bank or trust company located in the Port of New York District and shall be authorized by law to perform all the duties imposed upon it by this resolution, shall be the successor to such Trustee without the execution or filing of any paper or the performance of any further act.

The failure of the Authority to take any action required by this Section shall not invalidate any bond or bonds issued pursuant to this resolution or hereafter issued by the Authority, or affect any other actions of the Authority. The Authority shall in no way be restricted by this Section from entering any defense to an action or proceeding instituted by the Trustee or by the holder or holders of bonds of this Series.

SECTION 9. Each bond of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief

Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each bond of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such bond shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No bond of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such bond shall be conclusive evidence that such bond has been authenticated and delivered hereunder. Such certificate of authentication on any such bond shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such bonds issued hereunder. Bonds of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered bonds of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED BOND)

**THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED BOND
SIXTY-FIFTH SERIES, DUE 2023**

No. C(65)-

Maturity Date: December 1, 2023 Interest Rate:% Per Annum Dated: December 1, 1988 CUSIP

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of December, 2023, upon presentation and surrender of this bond, the principal amount shown below:

together with interest thereon at the rate of per centum (%) per annum from , payable semi-annually commencing on June 1, 1989, and thereafter on each succeeding December 1 and June 1 until maturity or prior redemption. The principal of this bond shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the office of , Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this bond shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This bond is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolutions of April 9, 1987, establishing the Series of which this bond forms a part and authorizing the issuance of this bond, constitute a contract between the Authority and the registered holder of this bond, which is subject to modification as therein provided.

The Authority has appointed a Trustee for and in connection with the bonds of this Series as provided by the resolution establishing the Series of which this bond forms a part.

This bond is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this bond or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this bond forms a part. The bonds of this Series are issuable only in the form of registered bonds without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this bond or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this bond forms a part for an equal aggregate principal amount of registered bonds of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of bonds of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This bond may be redeemed at December 1 of any year prior to maturity beginning with 2003 to satisfy the requirements of the schedule of mandatory periodic retirement provided for bonds of this Series in and pursuant to said resolutions of the Authority at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption at December 1, 2003, and thereafter and at or prior to December 1, 2022.

This bond may at the option of the Authority be redeemed for any other purpose at any interest payment date at or subsequent to December 1, 1995, as follows:

At one hundred two per centum (102%) of its face value, plus accrued interest to the date fixed for redemption, at December 1, 1995, and thereafter and at or prior to December 1, 1997; at one hundred one per centum (101%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to December 1, 2000; and at one hundred per centum (100%) of its face value, plus accrued interest to the date fixed for redemption, thereafter and at or prior to June 1, 2023.

If less than all the bonds of this Series then outstanding are to be called for redemption, the bonds so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance of the Authority shall fix and determine.

If this bond shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this bond at his last known address as appearing on the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said bonds. If this bond shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this bond, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this bond from and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the foregoing resolutions but shall rely solely upon the funds so deposited.

If this bond is of a denomination greater than \$5,000, and if less than all of the bonds of the Series of which this bond forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this bond shall be treated as though it were a separate bond of the denomination of \$5,000, and the word "bond" as used in the foregoing redemption provisions shall be deemed to refer to each such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this bond are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this bond shall forthwith present this bond to the Registrar who will issue new bonds of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this bond forms a part, including a new bond or bonds with the aggregate principal amount of the \$5,000 unit or units called for redemption; and such new bond or bonds

shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this bond to the Registrar for the issuance of new bonds of smaller denominations in exchange or substitution therefor as aforesaid, this bond shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this bond represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this bond shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption and premium, if any) represented by such \$5,000 unit or units; but to that extent shall rely solely upon the funds so deposited.

This bond is entitled to the benefit of the sinking fund established for this Series by the resolutions of the Authority hereinabove referred to.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this bond, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this bond, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this bond to be dated as of the first day of December, 1988.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

.....
Authorized Officer

(END OF FORM OF REGISTERED BOND)

The certificate of authentication attached to each of the bonds of this Series which are executed by a facsimile signature on behalf of the Authority shall be in substantially the following form, the blank spaces being appropriately filled in:

(Witness)

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within bond in every particular, with such signature appropriately guaranteed.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the bonds of this Series shall cease to be such official before such bonds shall have been actually issued, such bonds may nevertheless be issued as though the person who signed such bonds had not ceased to be such official of the Authority; and the Authority may, by issuing bonds bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the bonds and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 10. The Committee on Finance of the Authority is hereby authorized (i) prior to the issuance of the first installment of the bonds of this Series, to change the date as of which the bonds of this Series shall be dated to any date on or before December 31, 1988, and, if the date as of which the bonds of this Series shall be dated is so changed and the bonds bear a stated rate or rates of interest, the Committee shall change by the same number of days the respective dates on which interest on the bonds of this Series shall be payable; (ii) prior to the issuance of any installment of the bonds of this Series, to change the date at which any of the bonds of that installment shall mature; *provided*, that said date or dates shall not be more than thirty-five (35) years from the date as of which the bonds of this Series are dated; (iii) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates in connection with the redemption, retirement, call and sinking fund provisions as to such installment; (iv) prior to the issuance of any installment of the bonds of this Series, to adjust or change the respective dates and cumulative percentages of total principal amount provided in the schedule of mandatory sinking fund redemption for the bonds of this Series to retire such entire installment at or prior to maturity or to rescind in its entirety the establishment of the mandatory sinking fund redemption schedule and provisions as to such installment; (v) prior to the issuance of any installment of the bonds of this Series, to reduce the percentages of face value relating to the optional call provisions for such installment; (vi) prior to the issuance of the first installment of the bonds of this Series, to provide for the bonds of this Series to be issued on original issuance as book-entry only securities taking account of the changes and adjustments authorized in this resolution with respect to the issuance of the bonds of this Series as book-entry only securities; (vii) prior to the issuance

of the first installment of the bonds of this Series, to provide for the bonds of this Series to be separately registrable as to principal and interest (including any authorized incremental interest) to any one or more holders of the bonds or certificates (if any) with respect to the payment of interest thereon; (viii) prior to the issuance of the first installment of the bonds of this Series if it is desirable in connection with the use of the proceeds of the bonds of this Series for the refunding of a series of the Authority's obligations to renumber this Series for purposes of identification, to renumber this Series; (ix) prior to the issuance of the first installment of the bonds of this Series, if a prior series of Consolidated Bonds has been renumbered or the resolutions in connection therewith have been rescinded and cancelled, and if it is desirable to accomplish the capital program of the Authority utilizing a continuous numbered sequence of Consolidated Bonds, to renumber this Series; and (x) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 11. In case any bond or coupon (if any) pertaining to such a bond shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new bond or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated bond or coupon or in lieu of or in substitution for such destroyed or lost bond or coupon; or if such bond or coupon shall have matured, instead of issuing a substitute bond or coupon the Authority may pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute bond or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such bond or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute bond or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute bond or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new bond or coupon so issued in substitution. Any bond or coupon (if any) issued under the provisions of this section in lieu of any bond or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the bond or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

Consolidated Bonds, Sixty-fifth Series—Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, on the 9th day of October, 1952, The Port Authority of New York and New Jersey (formerly known as The Port of New York Authority and hereinafter called the "Authority"), adopted a resolution providing for the issuance of certain direct and general obligations of the Authority (hereinafter called "Consolidated Bonds"), from time to time in conformity with said resolution for the purposes therein set forth, which said resolution (hereinafter called the "Consolidated Bond Resolution") constitutes a contract with the holders of the bonds so issued; and

WHEREAS, on the 9th day of April, 1987, the Authority adopted a resolution establishing a series of said Consolidated Bonds to be known as "Sixty-fifth Series, Due 2023" (hereinafter called "bonds of this Series"), which said resolution by its terms constitutes a contract with the holders of the bonds of this Series; and

WHEREAS, the Authority has now determined that it is necessary, advisable and in the public interest to authorize the issuance of Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series for the purposes hereinafter set forth;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplementary thereto.

SECTION 2. The issuance of up to Two Hundred Million Dollars (\$200,000,000) in principal amount of bonds of this Series is hereby authorized. Said bonds shall be issued in one or more installments or lots pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution and the aforesaid resolution establishing the bonds of this Series.

SECTION 3. Unless otherwise determined by the Committee on Finance in connection with the issuance of the bonds of this Series as book-entry only securities (which said Committee is hereby authorized to fix and determine such other system or method), the bonds of this Series shall be numbered upward from C(65)-1, or they may bear such other numbers as the Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority may deem appropriate.

SECTION 4. The proceeds of the bonds of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however*, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, the Committee on Finance may authorize all or any portion of the unspent proceeds of the bonds of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the bonds of this Series; (b) for the purpose of refunding, directly, by offers to exchange, or otherwise, at or before maturity, all or any part of any issue of Consolidated Bonds or Consolidated Notes issued and outstanding at the time of the sale of any installment of the bonds of this Series; and (c) for the purpose of refunding in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

SECTION 5. In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the bonds of this Series to purposes in connection with some but not all of the purposes authorized in Section 4 hereof, the Committee is hereby authorized, prior to the sale of bonds of any installment of this Series from time to time, to make such allocation by resolution. The adoption by said Committee of such a resolution prior to any such sale shall be sufficient to restrict the application of the proceeds of any bonds of such installment of this Series included in said sale to the purposes specified by the Committee in said resolution.

SECTION 6. The provisions of this resolution shall constitute a contract with the holders of the bonds issued pursuant to this resolution, and with each such holder.

Consolidated Bonds, Sixty-fifth Series—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of Two Hundred Million Dollars (\$200,000,000) in principal amount of Consolidated Bonds, Sixty-fifth Series, Due 2023 (hereinafter called the "bonds of this Series"), at a price which will result in a true interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more installments or in one or more lots, at one or more times on or before December 31, 1988, and to apply the proceeds of such sale or sales as provided in the resolution authorizing the issuance of said bonds of this Series; *provided, however*, that the total aggregate principal amount of Consolidated Bonds, Fifty-eighth Series, Due 2022, Consolidated Bonds, Fifty-ninth Series, Due 2022, Consolidated Bonds, Sixtieth Series, Due 2022, Consolidated Bonds, Sixty-first Series, Due 2022, Consolidated Bonds, Sixty-second Series, Due 2023, Consolidated Bonds, Sixty-third Series, Due 2023, Consolidated Bonds, Sixty-fourth Series, Due 2023, and Consolidated Bonds, Sixty-fifth Series, Due 2023, sold by the Committee shall not exceed One Billion Dollars (\$1,000,000,000).

SECTION 2. The Committee shall have power, in connection with the bonds of this Series, to fix the time or times of sale on or before December 31, 1988, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have power in the name of and on behalf of the Authority, in connection with the bonds of this Series, to enter into any appropriate contracts or agreements concerning any sales or exchanges; to fix the time or times and determine the terms and conditions of delivery of the bonds of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar and a Trustee, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with the bonds of this Series; to enter into appropriate contracts or agreements in connection with the issuance of the bonds of this Series as book-entry only securities; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the bonds of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the bonds offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the underwriter or underwriters purchasing the bonds in offering the bonds of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the bonds of any installment of the bonds of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such bonds of this Series to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto.

SECTION 6. The Committee; Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial

Officer; or Treasurer of the Authority is hereby authorized, in connection with the bonds of this Series, to take any action which may be necessary or desirable to assure that the bonds of this Series are in conformity with the provisions of Section 103 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, and that the interest on such bonds of this Series is not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, or regulations with respect thereto, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of bonds of this Series for the purposes for which such bonds of this Series are issued, as to the status of the projects for which the proceeds of the bonds of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee and any such actions taken in connection therewith are hereby ratified.

Consolidated Notes, Series KK—Establishment and Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, The Port Authority of New York and New Jersey (hereinafter called the "Authority") hereby finds and determines that it is necessary to provide capital funds for the purposes hereinafter set forth; and

WHEREAS, under present circumstances it is desirable and in the public interest to provide said required capital funds in part by the issuance of short-term notes in conformity with the Consolidated Bond Resolution adopted October 9, 1952;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplemental thereto.

SECTION 2. There is hereby established a series of negotiable notes of the Authority to be known as "Consolidated Notes, Series KK" (hereinafter called the "notes of this Series") and the issuance of up to One Hundred Million Dollars (\$100,000,000) in principal amount of such Series KK Notes is hereby authorized. Said notes of this Series shall be established and issued pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution.

The notes of this Series shall be issued in one or more lots as the Authority may hereafter determine, shall be dated as of May 1, 1987, and mature on May 1, 1990, shall be of the denominations of \$5,000 or integral multiples of \$5,000, and shall bear a stated rate or rates of interest, including fixed, variable or incremental rates for the term of the notes or any portion thereof, or a combination thereof, from such date as may be determined by the Committee on Finance of the Authority, not in excess of twelve per centum (12%) per annum as may be determined by the Committee on Finance. The Committee on Finance is hereby authorized to fix and determine such date upon which interest shall commence and said interest rate or rates including fixed, variable or incremental rates or a combination thereof, if any, or to determine that the notes of this Series shall not bear a stated rate of interest. If the notes of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on November 1, 1987, and thereafter on each succeeding May 1 and November 1 until maturity or prior redemption.

Unless otherwise determined by the Committee on Finance in connection with the issuance of the notes of this Series as book-entry only securities (which said Committee is hereby authorized to fix and determine such other system or method), the notes of this Series shall be numbered upward from C(KK)-1, or they may bear such other numbers as the Chairman of the Authority; the Vice Chairman of the Authority; the Chairman of the Committee on Finance; the Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority may deem appropriate.

Both principal of and interest on the notes of this Series shall be payable in lawful money of the United States of America. Principal of the notes of this Series shall be payable upon presentation and surrender thereof by the registered holders, or in the case of coupon notes of this Series, if any, upon presentation and surrender thereof, at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered notes of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder and interest on the coupon notes of this Series, if any, shall be payable upon presentation and surrender of the coupons appertaining thereto at such office or offices of such Paying Agent or Paying Agents. If on original issuance the notes of this Series are to be issued as book-entry only securities, subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate

method for the payment of both or either of the principal of and interest on the notes of this Series to the registered holder thereof; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system, then the foregoing payment provisions of this paragraph shall apply to the notes of this Series.

SECTION 3. The proceeds of the notes of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however*, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1986, as amended, (hereinafter called the "Code"), or successor provisions of law, and the applicable regulations related thereto, the Committee on Finance may authorize all or any portion of the unspent proceeds of the notes of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the notes of this Series; (b) for the purpose of refunding, directly, by offers to exchange, or otherwise, at or before maturity, all or any part of any issue of Consolidated Bonds or Consolidated Notes issued and outstanding at the time of the sale of any of the notes of this Series; and (c) for the purpose of refunding in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

SECTION 4. Notes of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the notes of this Series, there shall be in effect a provision of the Code, or the regulations with respect thereto, which does not provide that, for the interest on the notes of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such notes of this Series must be issued in registered form, then the notes of this Series may also be issued in the form of coupon notes payable to bearer, in which event the Committee on Finance is hereby authorized to adopt an appropriate form of coupon note issuable only in the denomination of \$5,000. If on original issuance the notes of this Series are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an appropriate form of note or other evidence of indebtedness; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system then the provisions of Section 8 of this resolution shall apply to the notes of this Series.

Registered notes of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 5. The Authority will keep or cause to be kept at the office or offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of notes of this Series. Each registered note of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the notes of this Series may be issued in coupon form, a coupon note or notes of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmatured coupons thereto attached, may be exchanged for a registered note or notes, registered as designated in such request, of the same aggregate principal amount and series as the surrendered note or notes, of any of the authorized denominations. A registered note or notes of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered note or notes, registered as designated in such request, of any other authorized denominations, or in the event that the notes of this Series may be issued in coupon form, a coupon note or notes with appropriate coupons attached, or a combination of such coupon and registered notes, in each case of the same aggregate principal amount as the surrendered note or notes.

All requests for the registration, transfer, exchange and delivery of notes as above provided shall be filed with the Registrar of the Authority; all notes to be surrendered pursuant to such request shall be surrendered to the Registrar; and all notes delivered in exchange as aforesaid shall be delivered by the Registrar. All notes of this Series surrendered to the Registrar in exchange for other notes or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of notes of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of notes of this Series except in the denomination of \$5,000 in the case of coupon notes (if any) or in denominations of \$5,000 or integral multiples of \$5,000 in the case of registered notes or to authorize the issuance of coupon notes of this Series if at any time there shall be in effect a provision of the Code or the regulations with respect thereto which provides that for the interest on the notes of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such notes of this Series must be issued in registered form.

SECTION 6. Notes of this Series shall be redeemable in whole or in part, at the option of the Authority, prior to maturity at one hundred per centum (100%) of their face value on any interest payment date at or subsequent to May 1, 1988. If less than all of the notes of this Series then outstanding are to be called for redemption, the notes so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may fix and determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any notes of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption to the registered holders of notes of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said notes. If on original issuance the notes of this Series are to be issued only in registered form or are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method by which the Authority shall give notice of intention to redeem any notes of this Series.

Before the date fixed for redemption specified in the Authority's notice of intention to redeem, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding notes which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption, such principal amount to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the notes so called for redemption and to be paid to them respectively upon presentation and surrender of the said notes with accrued interest included in such redemption price to be paid to the registered holder in accordance with the provisions of this resolution and in the case of coupon notes (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such notes. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided or as provided by the Committee on Finance, the notes so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such notes on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the notes so called from and after the date fixed for their redemption, and such notes and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered notes of denominations greater than \$5,000, if less than all of the notes of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate note of the denomination of \$5,000, and the word "note" as used in the foregoing provisions of this Section 6 shall be deemed to refer to such \$5,000 unit of face value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented

by any note are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said note shall forthwith present said note to the Registrar who shall issue a new note or notes of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 5 of this resolution, including a new note or notes with the aggregate principal amount of the \$5,000 unit or units of face value called for redemption; and such new note or notes shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such note of a denomination greater than \$5,000 shall fail to present such note to the Registrar for the issuance of new notes of smaller denominations in exchange therefor, as aforesaid, such note shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such note represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such note shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however*, that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. Each note of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each note of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such note shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No note of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such note shall be conclusive evidence that such note has been authenticated and delivered hereunder. Such certificate of authentication on any such note shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such notes issued hereunder. Notes of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered notes of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED NOTE)

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED NOTE
SERIES KK

No. C(KK)-

Maturity Date: May 1, 1990 Interest Rate:% Per Annum Dated: May 1, 1987 CUSIP

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of May, 1990, upon presentation and surrender of this note, the principal amount shown below:

together with interest thereon at the rate of _____ per centum (%) per annum from _____ payable semi-annually commencing on November 1, 1987, and thereafter on each succeeding May 1 and November 1 until maturity or prior redemption. The principal of this note shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the _____ office of _____, Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this note shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This note is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolution of April 9, 1987, establishing the Series of which this note forms a part and authorizing the issuance of this note, constitute a contract between the Authority and the registered holder of this note, which is subject to modification as therein provided.

This note is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this note or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this note forms a part and authorizing the issuance of the notes of this Series. The notes of this Series are issuable only in the form of registered notes without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this note or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this note forms a part for an equal aggregate principal amount of registered notes of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of the notes of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This note may be redeemed, at the option of the Authority, prior to maturity at one hundred per centum (100%) of its face value on any interest payment date at or subsequent to May 1, 1988. If less than all of the notes of this Series then outstanding are to be called for redemption, the notes so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may fix and determine.

If this note shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption,—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this note at his last known address as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said notes. If this note shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this note, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this note from and after the date fixed for redemption and this note shall not be entitled to the benefit or security of the foregoing resolutions, but shall rely solely upon the funds so deposited.

If this note is of a denomination greater than \$5,000, and if less than all of the notes of the Series of which this note forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this note shall be treated as though it were a separate note of the denomination of \$5,000, and the word "note" as used in the foregoing redemption provisions shall be deemed to refer to each such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this note are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this note shall forthwith present this note to the registrar who will issue new notes of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this note forms a part, including a new note or notes with the aggregate principal amount corresponding to the aggregate principal amount and number or numbers of the \$5,000 unit or units called for redemption; and such new note or notes shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this note to the Registrar for the issuance of new notes of smaller denominations in exchange or substitution therefor as aforesaid, this note shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this note represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this note shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this note, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this note, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this note to be dated as of the first day of May, 1987.

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within note in every particular, with such signature appropriately guaranteed.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the notes of this Series shall cease to be such official before such notes shall have been actually issued, such notes may nevertheless be issued as though the person who signed such notes had not ceased to be such official of the Authority; and the Authority may, by issuing notes bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the notes and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 9. The Committee on Finance of the Authority is hereby authorized prior to the issuance of any of the notes of this Series (i) to change the date as of which the notes of this Series shall be dated to any date on or before December 31, 1988; (ii) to change the date stated in this resolution at which any of the notes of this Series shall mature and be retired; provided, that said date or dates shall not be more than three (3) years from the date as of which notes of this Series are dated; (iii) to adjust or change the provisions contained in this resolution relating to the payment of interest and to the redemption, retirement, and call of the notes of this Series; provided, that the Committee may not change the redemption, retirement and call provisions of the notes of this Series to impose a call premium; (iv) to provide for the notes of this Series to be issued on original issuance as book-entry only securities taking account of the changes and adjustments authorized in this resolution with respect to the issuance of the notes of this Series as book-entry only securities; (v) to provide for the notes of this Series to be separately registrable as to principal and interest (including any authorized incremental interest) to any one or more holders of the notes or certificates (if any) with respect to the payment of interest thereon; and (vi) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 10. In case any note or any coupon (if any) pertaining to such a note shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new note or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated note or coupon or in lieu of or in substitution for such destroyed or lost note or coupon; or if such note or coupon shall have matured, instead of issuing a substitute note or coupon the Authority may pay the same without surrender thereof.

In case of destruction or loss, the applicant for a substitute note or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such note or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute note or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute note or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new note or coupon so issued in substitution. Any note or coupon (if any) issued under the provisions of this section in lieu of any note or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the note or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

SECTION 11. In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the notes of this Series to purposes in connection with some but not all of the purposes authorized in Section 3 hereof, the Committee is hereby authorized, prior to the sale of said notes of this Series from time to time, to make such allocation by resolution. The adoption by said Committee of such a resolution prior to any such sale shall be sufficient to restrict the application of the proceeds of any notes of this Series included in said sale to the purposes specified by the Committee in said resolution.

SECTION 12. The provisions of this resolution shall constitute a contract with the holders of the notes issued pursuant to this resolution, and with each such holder.

Consolidated Notes, Series KK—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of One Hundred Million Dollars (\$100,000,000) in principal amount of Consolidated Notes, Series KK (hereinafter called the "notes of this Series"), at a price which will result in a true interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more lots, at one or more times on or before December 31, 1988, and to apply the proceeds of such sale or sales as provided in the resolution establishing and authorizing the issuance of said notes of this Series; *provided, however*, that the total aggregate principal amount of Consolidated Notes, Series KK, Consolidated Notes, Series LL, Consolidated Notes, Series MM, Consolidated Notes, Series NN, Consolidated Notes, Series OO, and Consolidated Notes, Series PP, sold by the Committee shall not exceed Three Hundred Million Dollars (\$300,000,000).

SECTION 2. The Committee shall have power, in connection with the notes of this Series, to fix the time or times of sale on or before December 31, 1988, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have the power in the name of and on behalf of the Authority, in connection with the notes of this Series, to enter into any appropriate contracts or agreements concerning any sales or exchanges; to fix the time or times and determine the terms and conditions of delivery of the notes of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with the notes of this Series; to enter into appropriate contracts or agreements in connection with the issuance of the notes of this Series as book-entry only securities; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the notes of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the notes offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the underwriter or underwriters purchasing the notes in offering the notes of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the notes of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such notes of this Series to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto.

SECTION 6. The Committee; Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; or Treasurer of the Authority is hereby authorized, in connection with the notes of this Series, to take any action which may be necessary or desirable to assure that the notes of this Series are in conformity with the provisions of Section 103, of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, and that the interest on such notes of this Series is not includible

for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, or regulations with respect thereto, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of the notes of this Series for the purposes for which the notes of this Series are issued, as to the status of the projects for which the proceeds of the notes of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee and any such actions taken in connection therewith are hereby ratified.

Consolidated Notes, Series LL—Establishment and Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, The Port Authority of New York and New Jersey (hereinafter called the "Authority") hereby finds and determines that it is necessary to provide capital funds for the purposes hereinafter set forth; and

WHEREAS, under present circumstances it is desirable and in the public interest to provide said required capital funds in part by the issuance of short-term notes in conformity with the Consolidated Bond Resolution adopted October 9, 1952;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplemental thereto.

SECTION 2. There is hereby established a series of negotiable notes of the Authority to be known as "Consolidated Notes, Series LL" (hereinafter called the "notes of this Series") and the issuance of up to One Hundred Million Dollars (\$100,000,000) in principal amount of such Series LL Notes is hereby authorized. Said notes of this Series shall be established and issued pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution.

The notes of this Series shall be issued in one or more lots as the Authority may hereafter determine, shall be dated as of June 1, 1987, and mature on June 1, 1990, shall be of the denominations of \$5,000 or integral multiples of \$5,000, and shall bear a stated rate or rates of interest, including fixed, variable or incremental rates for the term of the notes or any portion thereof, or a combination thereof, from such date as may be determined by the Committee on Finance of the Authority, not in excess of twelve per centum (12%) per annum as may be determined by the Committee on Finance. The Committee on Finance is hereby authorized to fix and determine such date upon which interest shall commence and said interest rate or rates including fixed, variable or incremental rates or a combination thereof, if any, or to determine that the notes of this Series shall not bear a stated rate of interest. If the notes of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on December 1, 1987, and thereafter on each succeeding June 1 and December 1 until maturity or prior redemption.

Unless otherwise determined by the Committee on Finance in connection with the issuance of the notes of this Series as book-entry only securities (which said Committee is hereby authorized to fix and determine such other system or method), the notes of this Series shall be numbered upward from C(LL)-1, or they may bear such other numbers as the Chairman of the Authority; the Vice Chairman of the Authority; the Chairman of the Committee on Finance; the Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority may deem appropriate.

Both principal of and interest on the notes of this Series shall be payable in lawful money of the United States of America. Principal of the notes of this Series shall be payable upon presentation and surrender thereof by the registered holders, or in the case of coupon notes of this Series, if any, upon presentation and surrender thereof, at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered notes of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder and interest on the coupon notes of this Series, if any, shall be payable upon presentation and surrender of the coupons appertaining thereto at such office or offices of such Paying Agent or Paying Agents. If on original issuance the notes of this Series are to be issued as book-entry only securities, subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate

method for the payment of both or either of the principal of and interest on the notes of this Series to the registered holder thereof; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system, then the foregoing payment provisions of this paragraph shall apply to the notes of this Series.

SECTION 3. The proceeds of the notes of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however*, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1986, as amended, (hereinafter called the "Code"), or successor provisions of law, and the applicable regulations related thereto, the Committee on Finance may authorize all or any portion of the unspent proceeds of the notes of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the notes of this Series; (b) for the purpose of refunding, directly, by offers to exchange, or otherwise, at or before maturity, all or any part of any issue of Consolidated Bonds or Consolidated Notes issued and outstanding at the time of the sale of any of the notes of this Series; and (c) for the purpose of refunding in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

SECTION 4. Notes of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the notes of this Series, there shall be in effect a provision of the Code, or the regulations with respect thereto, which does not provide that, for the interest on the notes of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such notes of this Series must be issued in registered form, then the notes of this Series may also be issued in the form of coupon notes payable to bearer, in which event the Committee on Finance is hereby authorized to adopt an appropriate form of coupon note issuable only in the denomination of \$5,000. If on original issuance the notes of this Series are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an appropriate form of note or other evidence of indebtedness; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system then the provisions of Section 8 of this resolution shall apply to the notes of this Series.

Registered notes of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 5. The Authority will keep or cause to be kept at the office or offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of notes of this Series. Each registered note of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the notes of this Series may be issued in coupon form, a coupon note or notes of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmatured coupons thereto attached, may be exchanged for a registered note or notes, registered as designated in such request, of the same aggregate principal amount and series as the surrendered note or notes, of any of the authorized denominations. A registered note or notes of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered note or notes, registered as designated in such request, of any other authorized denominations, or in the event that the notes of this Series may be issued in coupon form, a coupon note or notes with appropriate coupons attached, or a combination of such coupon and registered notes, in each case of the same aggregate principal amount as the surrendered note or notes.

All requests for the registration, transfer, exchange and delivery of notes as above provided shall be filed with the Registrar of the Authority; all notes to be surrendered pursuant to such request shall be surrendered to the Registrar; and all notes delivered in exchange as aforesaid shall be delivered by the Registrar. All notes of this Series surrendered to the Registrar in exchange for other notes or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of notes of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of notes of this Series except in the denomination of \$5,000 in the case of coupon notes (if any) or in denominations of \$5,000 or integral multiples of \$5,000 in the case of registered notes or to authorize the issuance of coupon notes of this Series if at any time there shall be in effect a provision of the Code or the regulations with respect thereto which provides that for the interest on the notes of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such notes of this Series must be issued in registered form.

SECTION 6. Notes of this Series shall be redeemable in whole or in part, at the option of the Authority, prior to maturity at one hundred per centum (100%) of their face value on any interest payment date at or subsequent to June 1, 1988. If less than all of the notes of this Series then outstanding are to be called for redemption, the notes so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may fix and determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any notes of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption to the registered holders of notes of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said notes. If on original issuance the notes of this Series are to be issued only in registered form or are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method by which the Authority shall give notice of intention to redeem any notes of this Series.

Before the date fixed for redemption specified in the Authority's notice of intention to redeem, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding notes which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption, such principal amount to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the notes so called for redemption and to be paid to them respectively upon presentation and surrender of the said notes with accrued interest included in such redemption price to be paid to the registered holder in accordance with the provisions of this resolution and in the case of coupon notes (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such notes. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided or as provided by the Committee on Finance, the notes so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such notes on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the notes so called from and after the date fixed for their redemption, and such notes and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered notes of denominations greater than \$5,000, if less than all of the notes of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate note of the denomination of \$5,000, and the word "note" as used in the foregoing provisions of this Section 6 shall be deemed to refer to such \$5,000 unit of face value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented

by any note are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said note shall forthwith present said note to the Registrar who shall issue a new note or notes of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 5 of this resolution, including a new note or notes with the aggregate principal amount of the \$5,000 unit or units of face value called for redemption; and such new note or notes shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such note of a denomination greater than \$5,000 shall fail to present such note to the Registrar for the issuance of new notes of smaller denominations in exchange therefor, as aforesaid, such note shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such note represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such note shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however*, that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. Each note of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each note of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such note shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No note of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such note shall be conclusive evidence that such note has been authenticated and delivered hereunder. Such certificate of authentication on any such note shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such notes issued hereunder. Notes of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered notes of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED NOTE)

**THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED NOTE
SERIES LL**

No. C(LL)-
Maturity Date: June 1, 1990 Interest Rate:% Per Annum Dated: June 1, 1987 CUSIP

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of June, 1990, upon presentation and surrender of this note, the principal amount shown below:

together with interest thereon at the rate of _____ per centum (_____ %) per annum from _____ payable semi-annually commencing on December 1, 1987, and thereafter on each succeeding June 1 and December 1 until maturity or prior redemption. The principal of this note shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the _____ office of _____, Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this note shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This note is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolution of April 9, 1987, establishing the Series of which this note forms a part and authorizing the issuance of this note, constitute a contract between the Authority and the registered holder of this note, which is subject to modification as therein provided.

This note is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this note or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this note forms a part and authorizing the issuance of the notes of this Series. The notes of this Series are issuable only in the form of registered notes without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this note or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this note forms a part for an equal aggregate principal amount of registered notes of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of the notes of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This note may be redeemed, at the option of the Authority, prior to maturity at one hundred per centum (100%) of its face value on any interest payment date at or subsequent to June 1, 1988. If less than all of the notes of this Series then outstanding are to be called for redemption, the notes so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may fix and determine.

If this note shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption,—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this note at his last known address as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said notes. If this note shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this note, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this note from and after the date fixed for redemption and this note shall not be entitled to the benefit or security of the foregoing resolutions, but shall rely solely upon the funds so deposited.

If this note is of a denomination greater than \$5,000, and if less than all of the notes of the Series of which this note forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this note shall be treated as though it were a separate note of the denomination of \$5,000, and the word "note" as used in the foregoing redemption provisions shall be deemed to refer to each such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this note are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this note shall forthwith present this note to the registrar who will issue new notes of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this note forms a part, including a new note or notes with the aggregate principal amount corresponding to the aggregate principal amount and number or numbers of the \$5,000 unit or units called for redemption; and such new note or notes shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this note to the Registrar for the issuance of new notes of smaller denominations in exchange or substitution therefor as aforesaid, this note shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this note represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this note shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this note, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this note, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this note to be dated as of the first day of June, 1987.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

.....
Authorized Officer

(END OF FORM OF REGISTERED NOTE)

The certificate of authentication attached to each of the notes of this Series which are executed by a facsimile signature on behalf of the Authority shall be in substantially the following form, the blank spaces being appropriately filled in:

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within note in every particular, with such signature appropriately guaranteed.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the notes of this Series shall cease to be such official before such notes shall have been actually issued, such notes may nevertheless be issued as though the person who signed such notes had not ceased to be such official of the Authority; and the Authority may, by issuing notes bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the notes and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 9. The Committee on Finance of the Authority is hereby authorized prior to the issuance of any of the notes of this Series (i) to change the date as of which the notes of this Series shall be dated to any date on or before December 31, 1988; (ii) to change the date stated in this resolution at which any of the notes of this Series shall mature and be retired; provided, that said date or dates shall not be more than three (3) years from the date as of which notes of this Series are dated; (iii) to adjust or change the provisions contained in this resolution relating to the payment of interest and to the redemption, retirement, and call of the notes of this Series; provided, that the Committee may not change the redemption, retirement and call provisions of the notes of this Series to impose a call premium; (iv) to provide for the notes of this Series to be issued on original issuance as book-entry only securities taking account of the changes and adjustments authorized in this resolution with respect to the issuance of the notes of this Series as book-entry only securities; (v) to provide for the notes of this Series to be separately registrable as to principal and interest (including any authorized incremental interest) to any one or more holders of the notes or certificates (if any) with respect to the payment of interest thereon; and (vi) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 10. In case any note or any coupon (if any) pertaining to such a note shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new note or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated note or coupon or in lieu of or in substitution for such destroyed or lost note or coupon; or if such note or coupon shall have matured, instead of issuing a substitute note or coupon the Authority may pay the same without surrender thereof.

In case of destruction or loss, the applicant for a substitute note or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such note or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute note or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute note or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new note or coupon so issued in substitution. Any note or coupon (if any) issued under the provisions of this section in lieu of any note or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the note or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

SECTION 11. In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the notes of this Series to purposes in connection with some but not all of the purposes authorized in Section 3 hereof, the Committee is hereby authorized, prior to the sale of said notes of this Series from time to time, to make such allocation by resolution. The adoption by said Committee of such a resolution prior to any such sale shall be sufficient to restrict the application of the proceeds of any notes of this Series included in said sale to the purposes specified by the Committee in said resolution.

SECTION 12. The provisions of this resolution shall constitute a contract with the holders of the notes issued pursuant to this resolution, and with each such holder.

Consolidated Notes, Series LL—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of One Hundred Million Dollars (\$100,000,000) in principal amount of Consolidated Notes, Series LL (hereinafter called the "notes of this Series"), at a price which will result in a true interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more lots, at one or more times on or before December 31, 1988, and to apply the proceeds of such sale or sales as provided in the resolution establishing and authorizing the issuance of said notes of this Series; *provided, however*, that the total aggregate principal amount of Consolidated Notes, Series KK, Consolidated Notes, Series LL, Consolidated Notes, Series MM, Consolidated Notes, Series NN, Consolidated Notes, Series OO, and Consolidated Notes, Series PP, sold by the Committee shall not exceed Three Hundred Million Dollars (\$300,000,000).

SECTION 2. The Committee shall have power, in connection with the notes of this Series, to fix the time or times of sale on or before December 31, 1988, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have the power in the name of and on behalf of the Authority, in connection with the notes of this Series, to enter into any appropriate contracts or agreements concerning any sales or exchanges; to fix the time or times and determine the terms and conditions of delivery of the notes of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with the notes of this Series; to enter into appropriate contracts or agreements in connection with the issuance of the notes of this Series as book-entry only securities; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the notes of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the notes offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the underwriter or underwriters purchasing the notes in offering the notes of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the notes of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such notes of this Series to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto.

SECTION 6. The Committee; Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; or Treasurer of the Authority is hereby authorized, in connection with the notes of this Series, to take any action which may be necessary or desirable to assure that the notes of this Series are in conformity with the provisions of Section 103, of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, and that the interest on such notes of this Series is not includible

for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, or regulations with respect thereto, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of the notes of this Series for the purposes for which the notes of this Series are issued, as to the status of the projects for which the proceeds of the notes of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee and any such actions taken in connection therewith are hereby ratified.

Consolidated Notes, Series MM—Establishment and Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, The Port Authority of New York and New Jersey (hereinafter called the "Authority") hereby finds and determines that it is necessary to provide capital funds for the purposes hereinafter set forth; and

WHEREAS, under present circumstances it is desirable and in the public interest to provide said required capital funds in part by the issuance of short-term notes in conformity with the Consolidated Bond Resolution adopted October 9, 1952;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplemental thereto.

SECTION 2. There is hereby established a series of negotiable notes of the Authority to be known as "Consolidated Notes, Series MM" (hereinafter called the "notes of this Series") and the issuance of up to One Hundred Million Dollars (\$100,000,000) in principal amount of such Series MM Notes is hereby authorized. Said notes of this Series shall be established and issued pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution.

The notes of this Series shall be issued in one or more lots as the Authority may hereafter determine, shall be dated as of October 1, 1987, and mature on October 1, 1990, shall be of the denominations of \$5,000 or integral multiples of \$5,000, and shall bear a stated rate or rates of interest, including fixed, variable or incremental rates for the term of the notes or any portion thereof, or a combination thereof, from such date as may be determined by the Committee on Finance of the Authority, not in excess of twelve per centum (12%) per annum as may be determined by the Committee on Finance. The Committee on Finance is hereby authorized to fix and determine such date upon which interest shall commence and said interest rate or rates including fixed, variable or incremental rates or a combination thereof, if any, or to determine that the notes of this Series shall not bear a stated rate of interest. If the notes of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on April 1, 1988, and thereafter on each succeeding October 1 and April 1 until maturity or prior redemption.

Unless otherwise determined by the Committee on Finance in connection with the issuance of the notes of this Series as book-entry only securities (which said Committee is hereby authorized to fix and determine such other system or method), the notes of this Series shall be numbered upward from C(MM)-1, or they may bear such other numbers as the Chairman of the Authority; the Vice Chairman of the Authority; the Chairman of the Committee on Finance; the Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority may deem appropriate.

Both principal of and interest on the notes of this Series shall be payable in lawful money of the United States of America. Principal of the notes of this Series shall be payable upon presentation and surrender thereof by the registered holders, or in the case of coupon notes of this Series, if any, upon presentation and surrender thereof, at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered notes of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder and interest on the coupon notes of this Series, if any, shall be payable upon presentation and surrender of the coupons appertaining thereto at such office or offices of such Paying Agent or Paying Agents. If on original issuance the notes of this Series are to be issued as book-entry only securities, subject to a book-entry system for

determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method for the payment of both or either of the principal of and interest on the notes of this Series to the registered holder thereof; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system, then the foregoing payment provisions of this paragraph shall apply to the notes of this Series.

SECTION 3. The proceeds of the notes of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however*, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1986, as amended, (hereinafter called the "Code"), or successor provisions of law, and the applicable regulations related thereto, the Committee on Finance may authorize all or any portion of the unspent proceeds of the notes of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the notes of this Series; (b) for the purpose of refunding, directly, by offers to exchange, or otherwise, at or before maturity, all or any part of any issue of Consolidated Bonds or Consolidated Notes issued and outstanding at the time of the sale of any of the notes of this Series; and (c) for the purpose of refunding in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

SECTION 4. Notes of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the notes of this Series, there shall be in effect a provision of the Code, or the regulations with respect thereto, which does not provide that, for the interest on the notes of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such notes of this Series must be issued in registered form, then the notes of this Series may also be issued in the form of coupon notes payable to bearer, in which event the Committee on Finance is hereby authorized to adopt an appropriate form of coupon note issuable only in the denomination of \$5,000. If on original issuance the notes of this Series are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an appropriate form of note or other evidence of indebtedness; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system then the provisions of Section 8 of this resolution shall apply to the notes of this Series.

Registered notes of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 5. The Authority will keep or cause to be kept at the office or offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of notes of this Series. Each registered note of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the notes of this Series may be issued in coupon form, a coupon note or notes of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmatured coupons thereto attached, may be exchanged for a registered note or notes, registered as designated in such request, of the same aggregate principal amount and series as the surrendered note or notes, of any of the authorized denominations. A registered note or notes of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered note or notes, registered as designated in such request, of any other authorized denominations, or in the event that the notes of this Series may be issued in coupon form, a coupon note or notes with appropriate coupons attached, or a combination of such coupon and registered notes, in each case of the same aggregate principal amount as the surrendered note or notes.

All requests for the registration, transfer, exchange and delivery of notes as above provided shall be filed with the Registrar of the Authority; all notes to be surrendered pursuant to such request shall be surrendered to the

Registrar; and all notes delivered in exchange as aforesaid shall be delivered by the Registrar. All notes of this Series surrendered to the Registrar in exchange for other notes or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of notes of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of notes of this Series except in the denomination of \$5,000 in the case of coupon notes (if any) or in denominations of \$5,000 or integral multiples of \$5,000 in the case of registered notes or to authorize the issuance of coupon notes of this Series if at any time there shall be in effect a provision of the Code or the regulations with respect thereto which provides that for the interest on the notes of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such notes of this Series must be issued in registered form.

SECTION 6. Notes of this Series shall be redeemable in whole or in part, at the option of the Authority, prior to maturity at one hundred per centum (100%) of their face value on any interest payment date at or subsequent to October 1, 1988. If less than all of the notes of this Series then outstanding are to be called for redemption, the notes so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may fix and determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any notes of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption to the registered holders of notes of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said notes. If on original issuance the notes of this Series are to be issued only in registered form or are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method by which the Authority shall give notice of intention to redeem any notes of this Series.

Before the date fixed for redemption specified in the Authority's notice of intention to redeem, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding notes which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption, such principal amount to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the notes so called for redemption and to be paid to them respectively upon presentation and surrender of the said notes with accrued interest included in such redemption price to be paid to the registered holder in accordance with the provisions of this resolution and in the case of coupon notes (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such notes. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided or as provided by the Committee on Finance, the notes so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such notes on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the notes so called from and after the date fixed for their redemption, and such notes and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered notes of denominations greater than \$5,000, if less than all of the notes of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000

unit of face value shall be treated as though it were a separate note of the denomination of \$5,000, and the word "note" as used in the foregoing provisions of this Section 6 shall be deemed to refer to such \$5,000 unit of face value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by any note are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said note shall forthwith present said note to the Registrar who shall issue a new note or notes of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 5 of this resolution, including a new note or notes with the aggregate principal amount of the \$5,000 unit or units of face value called for redemption; and such new note or notes shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such note of a denomination greater than \$5,000 shall fail to present such note to the Registrar for the issuance of new notes of smaller denominations in exchange therefor, as aforesaid, such note shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such note represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such note shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however*, that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. Each note of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each note of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such note shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No note of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such note shall be conclusive evidence that such note has been authenticated and delivered hereunder. Such certificate of authentication on any such note shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such notes issued hereunder. Notes of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered notes of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED NOTE)

**THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED NOTE
SERIES MM**

No. C(MM)-

Maturity Date: October 1, 1990 Interest Rate:% Per Annum Dated: October 1, 1987 CUSIP

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of October, 1990, upon presentation and surrender of this note, the principal amount shown below:

together with interest thereon at the rate of _____ per centum (%) per annum from _____, payable semi-annually commencing on April 1, 1988, and thereafter on each succeeding October 1 and April 1 until maturity or prior redemption. The principal of this note shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the office of _____, Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this note shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This note is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolution of April 9, 1987, establishing the Series of which this note forms a part and authorizing the issuance of this note, constitute a contract between the Authority and the registered holder of this note, which is subject to modification as therein provided.

This note is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this note or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this note forms a part and authorizing the issuance of the notes of this Series. The notes of this Series are issuable only in the form of registered notes without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this note or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this note forms a part for an equal aggregate principal amount of registered notes of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of the notes of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This note may be redeemed, at the option of the Authority, prior to maturity at one hundred per centum (100%) of its face value on any interest payment date at or subsequent to October 1, 1988. If less than all of the notes of this Series then outstanding are to be called for redemption, the notes so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may fix and determine.

If this note shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption,—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this note at his last known address as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said notes. If this note shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this note, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this note from and after the date fixed for redemption and this note shall not be entitled to the benefit or security of the foregoing resolutions, but shall rely solely upon the funds so deposited.

If this note is of a denomination greater than \$5,000, and if less than all of the notes of the Series of which this note forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this note shall be treated as though it were a separate note of the denomination of \$5,000, and the word "note" as used in the foregoing redemption provisions shall be deemed to refer to each such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this note are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this note shall forthwith present this note to the registrar who will issue new notes of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this note forms a part, including a new note or notes with the aggregate principal amount corresponding to the aggregate principal amount and number or numbers of the \$5,000 unit or units called for redemption; and such new note or notes shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this note to the Registrar for the issuance of new notes of smaller denominations in exchange or substitution therefor as aforesaid, this note shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this note represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this note shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this note, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this note, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this note to be dated as of the first day of October, 1987.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

.....
Authorized Officer

(END OF FORM OF REGISTERED NOTE)

The certificate of authentication attached to each of the notes of this Series which are executed by a facsimile signature on behalf of the Authority shall be in substantially the following form, the blank spaces being appropriately filled in:

(FORM OF CERTIFICATE OF AUTHENTICATION)

This note is one of the notes issued under the provisions of the within-named resolution and the Consolidated Bond Resolution.

Date of Authentication:

REGISTRAR
as Registrar of the Authority

By
Authorized Officer

(END OF FORM OF CERTIFICATE OF AUTHENTICATION)

Each registered note of this Series shall have provisions for assignment endorsed thereon, in substantially the following form:

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within note in every particular, with such signature appropriately guaranteed.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the notes of this Series shall cease to be such official before such notes shall have been actually issued, such notes may nevertheless be issued as though the person who signed such notes had not ceased to be such official of the Authority; and the Authority may, by issuing notes bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the notes and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 9. The Committee on Finance of the Authority is hereby authorized prior to the issuance of any of the notes of this Series (i) to change the date as of which the notes of this Series shall be dated to any date on or before December 31, 1988; (ii) to change the date stated in this resolution at which any of the notes of this Series shall mature and be retired; provided, that said date or dates shall not be more than three (3) years from the date as of which notes of this Series are dated; (iii) to adjust or change the provisions contained in this resolution relating to the payment of interest and to the redemption, retirement, and call of the notes of this Series; provided, that the Committee may not change the redemption, retirement and call provisions of the notes of this Series to impose a call premium; (iv) to provide for the notes of this Series to be issued on original issuance as book-entry only securities taking account of the changes and adjustments authorized in this resolution with respect to the issuance of the notes of this Series as book-entry only securities; (v) to provide for the notes of this Series to be separately registrable as to principal and interest (including any authorized incremental interest) to any one or more holders of the notes or certificates (if any) with respect to the payment of interest thereon; and (vi) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 10. In case any note or any coupon (if any) pertaining to such a note shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new note or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated note or coupon or in lieu of or in substitution for such destroyed or lost note or coupon; or if such note or coupon shall have matured, instead of issuing a substitute note or coupon the Authority may pay the same without surrender thereof.

In case of destruction or loss, the applicant for a substitute note or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such note or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute note or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute note or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new note or coupon so issued in substitution. Any note or coupon (if any) issued under the provisions of this section in lieu of any note or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the note or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

SECTION 11. In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the notes of this Series to purposes in connection with some but not all of the purposes authorized in Section 3 hereof, the Committee is hereby authorized, prior to the sale of said notes of this Series from time to time, to make such allocation by resolution. The adoption by said Committee of such a resolution prior to any such sale shall be sufficient to restrict the application of the proceeds of any notes of this Series included in said sale to the purposes specified by the Committee in said resolution.

SECTION 12. The provisions of this resolution shall constitute a contract with the holders of the notes issued pursuant to this resolution, and with each such holder.

Consolidated Notes, Series MM—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of One Hundred Million Dollars (\$100,000,000) in principal amount of Consolidated Notes, Series MM (hereinafter called the "notes of this Series"), at a price which will result in a true interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more lots, at one or more times on or before December 31, 1988, and to apply the proceeds of such sale or sales as provided in the resolution establishing and authorizing the issuance of said notes of this Series; *provided, however*, that the total aggregate principal amount of Consolidated Notes, Series KK, Consolidated Notes, Series LL, Consolidated Notes, Series MM, Consolidated Notes, Series NN, Consolidated Notes, Series OO, and Consolidated Notes, Series PP, sold by the Committee shall not exceed Three Hundred Million Dollars (\$300,000,000).

SECTION 2. The Committee shall have power, in connection with the notes of this Series, to fix the time or times of sale on or before December 31, 1988, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have the power in the name of and on behalf of the Authority, in connection with the notes of this Series, to enter into any appropriate contracts or agreements concerning any sales or exchanges; to fix the time or times and determine the terms and conditions of delivery of the notes of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with the notes of this Series; to enter into appropriate contracts or agreements in connection with the issuance of the notes of this Series as book-entry only securities; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the notes of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the notes offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the underwriter or underwriters purchasing the notes in offering the notes of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the notes of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such notes of this Series to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto.

SECTION 6. The Committee; Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; or Treasurer of the Authority is hereby authorized, in connection with the notes of this Series, to take any action which may be necessary or desirable to assure that the notes of this Series are in conformity with the provisions of Section 103, of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, and that the interest on such notes of this Series is not includible

for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, or regulations with respect thereto, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of the notes of this Series for the purposes for which the notes of this Series are issued, as to the status of the projects for which the proceeds of the notes of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee and any such actions taken in connection therewith are hereby ratified.

Consolidated Notes, Series NN—Establishment and Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, The Port Authority of New York and New Jersey (hereinafter called the "Authority") hereby finds and determines that it is necessary to provide capital funds for the purposes hereinafter set forth; and

WHEREAS, under present circumstances it is desirable and in the public interest to provide said required capital funds in part by the issuance of short-term notes in conformity with the Consolidated Bond Resolution adopted October 9, 1952;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplemental thereto.

SECTION 2. There is hereby established a series of negotiable notes of the Authority to be known as "Consolidated Notes, Series NN" (hereinafter called the "notes of this Series") and the issuance of up to One Hundred Million Dollars (\$100,000,000) in principal amount of such Series NN Notes is hereby authorized. Said notes of this Series shall be established and issued pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution.

The notes of this Series shall be issued in one or more lots as the Authority may hereafter determine, shall be dated as of February 1, 1988, and mature on February 1, 1991, shall be of the denominations of \$5,000 or integral multiples of \$5,000, and shall bear a stated rate or rates of interest, including fixed, variable or incremental rates for the term of the notes or any portion thereof, or a combination thereof, from such date as may be determined by the Committee on Finance of the Authority, not in excess of twelve per centum (12%) per annum as may be determined by the Committee on Finance. The Committee on Finance is hereby authorized to fix and determine such date upon which interest shall commence and said interest rate or rates including fixed, variable or incremental rates or a combination thereof, if any, or to determine that the notes of this Series shall not bear a stated rate of interest. If the notes of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on August 1, 1988, and thereafter on each succeeding February 1 and August 1 until maturity or prior redemption.

Unless otherwise determined by the Committee on Finance in connection with the issuance of the notes of this Series as book-entry only securities (which said Committee is hereby authorized to fix and determine such other system or method), the notes of this Series shall be numbered upward from C(NN)-1, or they may bear such other numbers as the Chairman of the Authority; the Vice Chairman of the Authority; the Chairman of the Committee on Finance; the Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority may deem appropriate.

Both principal of and interest on the notes of this Series shall be payable in lawful money of the United States of America. Principal of the notes of this Series shall be payable upon presentation and surrender thereof by the registered holders, or in the case of coupon notes of this Series, if any, upon presentation and surrender thereof, at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered notes of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder and interest on the coupon notes of this Series, if any, shall be payable upon presentation and surrender of the coupons appertaining thereto at such office or offices of such Paying Agent or Paying Agents. If on original issuance the notes of this Series are to be issued as book-entry only securities, subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate

method for the payment of both or either of the principal of and interest on the notes of this Series to the registered holder thereof; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system, then the foregoing payment provisions of this paragraph shall apply to the notes of this Series.

SECTION 3. The proceeds of the notes of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however*, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1986, as amended, (hereinafter called the "Code"), or successor provisions of law, and the applicable regulations related thereto, the Committee on Finance may authorize all or any portion of the unspent proceeds of the notes of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the notes of this Series; (b) for the purpose of refunding; directly, by offers to exchange, or otherwise, at or before maturity, all or any part of any issue of Consolidated Bonds or Consolidated Notes issued and outstanding at the time of the sale of any of the notes of this Series; and (c) for the purpose of refunding in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

SECTION 4. Notes of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the notes of this Series, there shall be in effect a provision of the Code, or the regulations with respect thereto, which does not provide that, for the interest on the notes of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such notes of this Series must be issued in registered form, then the notes of this Series may also be issued in the form of coupon notes payable to bearer, in which event the Committee on Finance is hereby authorized to adopt an appropriate form of coupon note issuable only in the denomination of \$5,000. If on original issuance the notes of this Series are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an appropriate form of note or other evidence of indebtedness; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system then the provisions of Section 8 of this resolution shall apply to the notes of this Series.

Registered notes of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 5. The Authority will keep or cause to be kept at the office or offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of notes of this Series. Each registered note of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the notes of this Series may be issued in coupon form, a coupon note or notes of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmatured coupons thereto attached, may be exchanged for a registered note or notes, registered as designated in such request, of the same aggregate principal amount and series as the surrendered note or notes, of any of the authorized denominations. A registered note or notes of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered note or notes, registered as designated in such request, of any other authorized denominations, or in the event that the notes of this Series may be issued in coupon form, a coupon note or notes with appropriate coupons attached, or a combination of such coupon and registered notes, in each case of the same aggregate principal amount as the surrendered note or notes.

All requests for the registration, transfer, exchange and delivery of notes as above provided shall be filed with the Registrar of the Authority; all notes to be surrendered pursuant to such request shall be surrendered to the Registrar; and all notes delivered in exchange as aforesaid shall be delivered by the Registrar. All notes of this Series surrendered to the Registrar in exchange for other notes or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of notes of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of notes of this Series except in the denomination of \$5,000 in the case of coupon notes (if any) or in denominations of \$5,000 or integral multiples of \$5,000 in the case of registered notes or to authorize the issuance of coupon notes of this Series if at any time there shall be in effect a provision of the Code or the regulations with respect thereto which provides that for the interest on the notes of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such notes of this Series must be issued in registered form.

SECTION 6. Notes of this Series shall be redeemable in whole or in part, at the option of the Authority, prior to maturity at one hundred per centum (100%) of their face value on any interest payment date at or subsequent to February 1, 1989. If less than all of the notes of this Series then outstanding are to be called for redemption, the notes so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may fix and determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any notes of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption to the registered holders of notes of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said notes. If on original issuance the notes of this Series are to be issued only in registered form or are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method by which the Authority shall give notice of intention to redeem any notes of this Series.

Before the date fixed for redemption specified in the Authority's notice of intention to redeem, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding notes which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption, such principal amount to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the notes so called for redemption and to be paid to them respectively upon presentation and surrender of the said notes with accrued interest included in such redemption price to be paid to the registered holder in accordance with the provisions of this resolution and in the case of coupon notes (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such notes. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided or as provided by the Committee on Finance, the notes so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such notes on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the notes so called from and after the date fixed for their redemption, and such notes and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered notes of denominations greater than \$5,000, if less than all of the notes of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate note of the denomination of \$5,000, and the word "note" as used in the foregoing provisions of this Section 6 shall be deemed to refer to such \$5,000 unit of face

value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by any note are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said note shall forthwith present said note to the Registrar who shall issue a new note or notes of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 5 of this resolution, including a new note or notes with the aggregate principal amount of the \$5,000 unit or units of face value called for redemption; and such new note or notes shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such note of a denomination greater than \$5,000 shall fail to present such note to the Registrar for the issuance of new notes of smaller denominations in exchange therefor, as aforesaid, such note shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such note represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such note shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however*, that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. Each note of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each note of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such note shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No note of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such note shall be conclusive evidence that such note has been authenticated and delivered hereunder. Such certificate of authentication on any such note shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such notes issued hereunder. Notes of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered notes of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED NOTE)

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY

CONSOLIDATED NOTE

SERIES NN

No. C(NN)-

Maturity Date: February 1, 1991 Interest Rate:% Per Annum Dated: February 1, 1988 CUSIP

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of February, 1991, upon presentation and surrender of this note, the principal amount shown below:

together with interest thereon at the rate of _____ per centum (_____ %) per annum from _____ payable semi-annually commencing on August 1, 1988, and thereafter on each succeeding February 1 and August 1 until maturity or prior redemption. The principal of this note shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the _____ office of _____, Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this note shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This note is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolution of April 9, 1987, establishing the Series of which this note forms a part and authorizing the issuance of this note, constitute a contract between the Authority and the registered holder of this note, which is subject to modification as therein provided.

This note is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this note or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this note forms a part and authorizing the issuance of the notes of this Series. The notes of this Series are issuable only in the form of registered notes without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this note or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this note forms a part for an equal aggregate principal amount of registered notes of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of the notes of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This note may be redeemed, at the option of the Authority, prior to maturity at one hundred per centum (100%) of its face value on any interest payment date at or subsequent to February 1, 1989. If less than all of the notes of this Series then outstanding are to be called for redemption, the notes so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may fix and determine.

If this note shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption,—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this note at his last known address as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said notes. If this note shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this note, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this note from and after the date fixed for redemption and this note shall not be entitled to the benefit or security of the foregoing resolutions, but shall rely solely upon the funds so deposited.

If this note is of a denomination greater than \$5,000, and if less than all of the notes of the Series of which this note forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this note shall be treated as though it were a separate note of the denomination of \$5,000, and the word "note" as used in the foregoing redemption provisions shall be deemed to refer to each such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this note are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this note shall forthwith present this note to the registrar who will issue new notes of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this note forms a part, including a new note or notes with the aggregate principal amount corresponding to the aggregate principal amount and number or numbers of the \$5,000 unit or units called for redemption; and such new note or notes shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this note to the Registrar for the issuance of new notes of smaller denominations in exchange or substitution therefor as aforesaid, this note shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this note represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this note shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this note, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this note, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this note to be dated as of the first day of February, 1988.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

.....
Authorized Officer

(END OF FORM OF REGISTERED NOTE)

The certificate of authentication attached to each of the notes of this Series which are executed by a facsimile signature on behalf of the Authority shall be in substantially the following form, the blank spaces being appropriately filled in:

(FORM OF CERTIFICATE OF AUTHENTICATION)

This note is one of the notes issued under the provisions of the within-named resolution and the Consolidated Bond Resolution.

Date of Authentication:

REGISTRAR

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within note in every particular, with such signature appropriately guaranteed.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the notes of this Series shall cease to be such official before such notes shall have been actually issued, such notes may nevertheless be issued as though the person who signed such notes had not ceased to be such official of the Authority; and the Authority may, by issuing notes bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the notes and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 9. The Committee on Finance of the Authority is hereby authorized prior to the issuance of any of the notes of this Series (i) to change the date as of which the notes of this Series shall be dated to any date on or before December 31, 1988; (ii) to change the date stated in this resolution at which any of the notes of this Series shall mature and be retired; provided, that said date or dates shall not be more than three (3) years from the date as of which notes of this Series are dated; (iii) to adjust or change the provisions contained in this resolution relating to the payment of interest and to the redemption, retirement, and call of the notes of this Series; provided, that the Committee may not change the redemption, retirement and call provisions of the notes of this Series to impose a call premium; (iv) to provide for the notes of this Series to be issued on original issuance as book-entry only securities taking account of the changes and adjustments authorized in this resolution with respect to the issuance of the notes of this Series as book-entry only securities; (v) to provide for the notes of this Series to be separately registrable as to principal and interest (including any authorized incremental interest) to any one or more holders of the notes or certificates (if any) with respect to the payment of interest thereon; and (vi) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 10. In case any note or any coupon (if any) pertaining to such a note shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new note or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated note or coupon or in lieu of or in substitution for such destroyed or lost note or coupon; or if such note or coupon shall have

matured, instead of issuing a substitute note or coupon the Authority may pay the same without surrender thereof. In case of destruction or loss, the applicant for a substitute note or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such note or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute note or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute note or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new note or coupon so issued in substitution. Any note or coupon (if any) issued under the provisions of this section in lieu of any note or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the note or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

SECTION 11. In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the notes of this Series to purposes in connection with some but not all of the purposes authorized in Section 3 hereof, the Committee is hereby authorized, prior to the sale of said notes of this Series from time to time, to make such allocation by resolution. The adoption by said Committee of such a resolution prior to any such sale shall be sufficient to restrict the application of the proceeds of any notes of this Series included in said sale to the purposes specified by the Committee in said resolution.

SECTION 12. The provisions of this resolution shall constitute a contract with the holders of the notes issued pursuant to this resolution, and with each such holder.

Consolidated Notes, Series NN—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of One Hundred Million Dollars (\$100,000,000) in principal amount of Consolidated Notes, Series NN (hereinafter called the "notes of this Series"), at a price which will result in a true interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more lots, at one or more times on or before December 31, 1988, and to apply the proceeds of such sale or sales as provided in the resolution establishing and authorizing the issuance of said notes of this Series; *provided, however*, that the total aggregate principal amount of Consolidated Notes, Series KK, Consolidated Notes, Series LL, Consolidated Notes, Series MM, Consolidated Notes, Series NN, Consolidated Notes, Series OO, and Consolidated Notes, Series PP, sold by the Committee shall not exceed Three Hundred Million Dollars (\$300,000,000).

SECTION 2. The Committee shall have power, in connection with the notes of this Series, to fix the time or times of sale on or before December 31, 1988, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have the power in the name of and on behalf of the Authority, in connection with the notes of this Series, to enter into any appropriate contracts or agreements concerning any sales or exchanges; to fix the time or times and determine the terms and conditions of delivery of the notes of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with the notes of this Series; to enter into appropriate contracts or agreements in connection with the issuance of the notes of this Series as book-entry only securities; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the notes of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the notes offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the underwriter or underwriters purchasing the notes in offering the notes of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the notes of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such notes of this Series to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto.

SECTION 6. The Committee; Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; or Treasurer of the Authority is hereby authorized, in connection with the notes of this Series, to take any action which may be necessary or desirable to assure that the notes of this Series are in conformity with the provisions of Section 103, of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, and that the interest on such notes of this Series is not includible

for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, or regulations with respect thereto, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of the notes of this Series for the purposes for which the notes of this Series are issued, as to the status of the projects for which the proceeds of the notes of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee and any such actions taken in connection therewith are hereby ratified.

Consolidated Notes, Series OO—Establishment and Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, The Port Authority of New York and New Jersey (hereinafter called the "Authority") hereby finds and determines that it is necessary to provide capital funds for the purposes hereinafter set forth; and

WHEREAS, under present circumstances it is desirable and in the public interest to provide said required capital funds in part by the issuance of short-term notes in conformity with the Consolidated Bond Resolution adopted October 9, 1952;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions; *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplemental thereto.

SECTION 2. There is hereby established a series of negotiable notes of the Authority to be known as "Consolidated Notes, Series OO" (hereinafter called the "notes of this Series") and the issuance of up to One Hundred Million Dollars (\$100,000,000) in principal amount of such Series OO Notes is hereby authorized. Said notes of this Series shall be established and issued pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution.

The notes of this Series shall be issued in one or more lots as the Authority may hereafter determine, shall be dated as of April 1, 1988, and mature on April 1, 1991, shall be of the denominations of \$5,000 or integral multiples of \$5,000, and shall bear a stated rate or rates of interest, including fixed, variable or incremental rates for the term of the notes or any portion thereof, or a combination thereof, from such date as may be determined by the Committee on Finance of the Authority, not in excess of twelve per centum (12%) per annum as may be determined by the Committee on Finance. The Committee on Finance is hereby authorized to fix and determine such date upon which interest shall commence and said interest rate or rates including fixed, variable or incremental rates or a combination thereof, if any, or to determine that the notes of this Series shall not bear a stated rate of interest. If the notes of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on October 1, 1988, and thereafter on each succeeding April 1 and October 1 until maturity or prior redemption.

Unless otherwise determined by the Committee on Finance in connection with the issuance of the notes of this Series as book-entry only securities (which said Committee is hereby authorized to fix and determine such other system or method), the notes of this Series shall be numbered upward from C(OO)-1, or they may bear such other numbers as the Chairman of the Authority; the Vice Chairman of the Authority; the Chairman of the Committee on Finance; the Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority may deem appropriate.

Both principal of and interest on the notes of this Series shall be payable in lawful money of the United States of America. Principal of the notes of this Series shall be payable upon presentation and surrender thereof by the registered holders, or in the case of coupon notes of this Series, if any, upon presentation and surrender thereof, at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered notes of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder and interest on the coupon notes of this Series, if any, shall be payable upon presentation and surrender of the coupons appertaining thereto at such office or offices of such Paying Agent or Paying Agents. If on original issuance the notes of this Series are to be issued as book-entry only securities, subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate

method for the payment of both or either of the principal of and interest on the notes of this Series to the registered holder thereof; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system, then the foregoing payment provisions of this paragraph shall apply to the notes of this Series.

SECTION 3. The proceeds of the notes of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however*, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1986, as amended, (hereinafter called the "Code"), or successor provisions of law, and the applicable regulations related thereto, the Committee on Finance may authorize all or any portion of the unspent proceeds of the notes of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the notes of this Series; (b) for the purpose of refunding, directly, by offers to exchange, or otherwise, at or before maturity, all or any part of any issue of Consolidated Bonds or Consolidated Notes issued and outstanding at the time of the sale of any of the notes of this Series; and (c) for the purpose of refunding in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

SECTION 4. Notes of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the notes of this Series, there shall be in effect a provision of the Code, or the regulations with respect thereto, which does not provide that, for the interest on the notes of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such notes of this Series must be issued in registered form, then the notes of this Series may also be issued in the form of coupon notes payable to bearer, in which event the Committee on Finance is hereby authorized to adopt an appropriate form of coupon note issuable only in the denomination of \$5,000. If on original issuance the notes of this Series are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an appropriate form of note or other evidence of indebtedness; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system then the provisions of Section 8 of this resolution shall apply to the notes of this Series.

Registered notes of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 5. The Authority will keep or cause to be kept at the office or offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of notes of this Series. Each registered note of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the notes of this Series may be issued in coupon form, a coupon note or notes of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmaturing coupons thereto attached, may be exchanged for a registered note or notes, registered as designated in such request, of the same aggregate principal amount and series as the surrendered note or notes, of any of the authorized denominations. A registered note or notes of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered note or notes, registered as designated in such request, of any other authorized denominations, or in the event that the notes of this Series may be issued in coupon form, a coupon note or notes with appropriate coupons attached, or a combination of such coupon and registered notes, in each case of the same aggregate principal amount as the surrendered note or notes.

All requests for the registration, transfer, exchange and delivery of notes as above provided shall be filed with the Registrar of the Authority; all notes to be surrendered pursuant to such request shall be surrendered to the Registrar; and all notes delivered in exchange as aforesaid shall be delivered by the Registrar. All notes of this Series surrendered to the Registrar in exchange for other notes or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of notes of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of notes of this Series except in the denomination of \$5,000 in the case of coupon notes (if any) or in denominations of \$5,000 or integral multiples of \$5,000 in the case of registered notes or to authorize the issuance of coupon notes of this Series if at any time there shall be in effect a provision of the Code or the regulations with respect thereto which provides that for the interest on the notes of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such notes of this Series must be issued in registered form.

SECTION 6. Notes of this Series shall be redeemable in whole or in part, at the option of the Authority, prior to maturity at one hundred per centum (100%) of their face value on any interest payment date at or subsequent to April 1, 1989. If less than all of the notes of this Series then outstanding are to be called for redemption, the notes so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may fix and determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any notes of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption to the registered holders of notes of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said notes. If on original issuance the notes of this Series are to be issued only in registered form or are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method by which the Authority shall give notice of intention to redeem any notes of this Series.

Before the date fixed for redemption specified in the Authority's notice of intention to redeem, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding notes which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption, such principal amount to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the notes so called for redemption and to be paid to them respectively upon presentation and surrender of the said notes with accrued interest included in such redemption price to be paid to the registered holder in accordance with the provisions of this resolution and in the case of coupon notes (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such notes. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided or as provided by the Committee on Finance, the notes so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such notes on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the notes so called from and after the date fixed for their redemption, and such notes and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered notes of denominations greater than \$5,000, if less than all of the notes of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate note of the denomination of \$5,000, and the word "note" as used in the foregoing provisions of this Section 6 shall be deemed to refer to such \$5,000 unit of face value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented

by any note are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said note shall forthwith present said note to the Registrar who shall issue a new note or notes of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 5 of this resolution, including a new note or notes with the aggregate principal amount of the \$5,000 unit or units of face value called for redemption; and such new note or notes shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such note of a denomination greater than \$5,000 shall fail to present such note to the Registrar for the issuance of new notes of smaller denominations in exchange therefor, as aforesaid, such note shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such note represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such note shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however*, that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. Each note of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority at the time of its execution: *provided*, that each note of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such note shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No note of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such note shall be conclusive evidence that such note has been authenticated and delivered hereunder. Such certificate of authentication on any such note shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such notes issued hereunder. Notes of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered notes of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED NOTE)

**THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED NOTE
SERIES OO**

No. C(OO)-
Maturity Date: April 1, 1991 Interest Rate:% Per Annum Dated: April 1, 1988 CUSIP

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of April, 1991, upon presentation and surrender of this note, the principal amount shown below:

together with interest thereon at the rate of _____ per centum (%) per annum from _____, payable semi-annually commencing on October 1, 1988, and thereafter on each succeeding April 1 and October 1 until maturity or prior redemption. The principal of this note shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the _____ office of _____, Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this note shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This note is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolution of April 9, 1987, establishing the Series of which this note forms a part and authorizing the issuance of this note, constitute a contract between the Authority and the registered holder of this note, which is subject to modification as therein provided.

This note is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this note or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this note forms a part and authorizing the issuance of the notes of this Series. The notes of this Series are issuable only in the form of registered notes without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this note or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this note forms a part for an equal aggregate principal amount of registered notes of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of the notes of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This note may be redeemed, at the option of the Authority, prior to maturity at one hundred per centum (100%) of its face value on any interest payment date at or subsequent to April 1, 1989. If less than all of the notes of this Series then outstanding are to be called for redemption, the notes so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may fix and determine.

If this note shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption,—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this note at his last known address as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said notes. If this note shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this note, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this note from and after the date fixed for redemption and this note shall not be entitled to the benefit or security of the foregoing resolutions, but shall rely solely upon the funds so deposited.

If this note is of a denomination greater than \$5,000, and if less than all of the notes of the Series of which this note forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this note shall be treated as though it were a separate note of the denomination of \$5,000, and the word "note" as used in the foregoing redemption provisions shall be deemed to refer to each such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this note are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this note shall forthwith present this note to the registrar who will issue new notes of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this note forms a part, including a new note or notes with the aggregate principal amount corresponding to the aggregate principal amount and number or numbers of the \$5,000 unit or units called for redemption; and such new note or notes shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this note to the Registrar for the issuance of new notes of smaller denominations in exchange or substitution therefor as aforesaid, this note shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this note represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this note shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this note, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this note, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this note to be dated as of the first day of April, 1988.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

.....
Authorized Officer

(END OF FORM OF REGISTERED NOTE)

The certificate of authentication attached to each of the notes of this Series which are executed by a facsimile signature on behalf of the Authority shall be in substantially the following form, the blank spaces being appropriately filled in:

(FORM OF CERTIFICATE OF AUTHENTICATION)

This note is one of the notes issued under the provisions of the within-named resolution and the Consolidated Bond Resolution.

Date of Authentication:

REGISTRAR
as Registrar of the Authority

By

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within note in every particular, with such signature appropriately guaranteed.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the notes of this Series shall cease to be such official before such notes shall have been actually issued, such notes may nevertheless be issued as though the person who signed such notes had not ceased to be such official of the Authority; and the Authority may, by issuing notes bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the notes and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 9. The Committee on Finance of the Authority is hereby authorized prior to the issuance of any of the notes of this Series (i) to change the date as of which the notes of this Series shall be dated to any date on or before December 31, 1988; (ii) to change the date stated in this resolution at which any of the notes of this Series shall mature and be retired; *provided*, that said date or dates shall not be more than three (3) years from the date as of which notes of this Series are dated; (iii) to adjust or change the provisions contained in this resolution relating to the payment of interest and to the redemption, retirement, and call of the notes of this Series; *provided*, that the Committee may not change the redemption, retirement and call provisions of the notes of this Series to impose a call premium; (iv) to provide for the notes of this Series to be issued on original issuance as book-entry only securities taking account of the changes and adjustments authorized in this resolution with respect to the issuance of the notes of this Series as book-entry only securities; (v) to provide for the notes of this Series to be separately registrable as to principal and interest (including any authorized incremental interest) to any one or more holders of the notes or certificates (if any) with respect to the payment of interest thereon; and (vi) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 10. In case any note or any coupon (if any) pertaining to such a note shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new note or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated note or coupon or in lieu of or in substitution for such destroyed or lost note or coupon; or if such note or coupon shall have matured, instead of issuing a substitute note or coupon the Authority may pay the same without surrender thereof.

In case of destruction or loss, the applicant for a substitute note or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such note or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute note or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute note or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new note or coupon so issued in substitution. Any note or coupon (if any) issued under the provisions of this section in lieu of any note or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the note or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

SECTION 11. In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the notes of this Series to purposes in connection with some but not all of the purposes authorized in Section 3 hereof, the Committee is hereby authorized, prior to the sale of said notes of this Series from time to time, to make such allocation by resolution. The adoption by said Committee of such a resolution prior to any such sale shall be sufficient to restrict the application of the proceeds of any notes of this Series included in said sale to the purposes specified by the Committee in said resolution.

SECTION 12. The provisions of this resolution shall constitute a contract with the holders of the notes issued pursuant to this resolution, and with each such holder.

Consolidated Notes, Series OO—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of One Hundred Million Dollars (\$100,000,000) in principal amount of Consolidated Notes, Series OO (hereinafter called the "notes of this Series"), at a price which will result in a true interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more lots, at one or more times on or before December 31, 1988, and to apply the proceeds of such sale or sales as provided in the resolution establishing and authorizing the issuance of said notes of this Series; *provided, however*, that the total aggregate principal amount of Consolidated Notes, Series KK, Consolidated Notes, Series LL, Consolidated Notes, Series MM, Consolidated Notes, Series NN, Consolidated Notes, Series OO, and Consolidated Notes, Series PP, sold by the Committee shall not exceed Three Hundred Million Dollars (\$300,000,000).

SECTION 2. The Committee shall have power, in connection with the notes of this Series, to fix the time or times of sale on or before December 31, 1988, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have the power in the name of and on behalf of the Authority, in connection with the notes of this Series, to enter into any appropriate contracts or agreements concerning any sales or exchanges; to fix the time or times and determine the terms and conditions of delivery of the notes of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with the notes of this Series; to enter into appropriate contracts or agreements in connection with the issuance of the notes of this Series as book-entry only securities; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the notes of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the notes offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the underwriter or underwriters purchasing the notes in offering the notes of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the notes of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such notes of this Series to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto.

SECTION 6. The Committee; Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; or Treasurer of the Authority is hereby authorized, in connection with the notes of this Series, to take any action which may be necessary or desirable to assure that the notes of this Series are in conformity with the provisions of Section 103, of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, and that the interest on such notes of this Series is not includible

for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, or regulations with respect thereto, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of the notes of this Series for the purposes for which the notes of this Series are issued, as to the status of the projects for which the proceeds of the notes of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee and any such actions taken in connection therewith are hereby ratified.

Consolidated Notes, Series PP—Establishment and Authorization of Issuance

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, The Port Authority of New York and New Jersey (hereinafter called the "Authority") hereby finds and determines that it is necessary to provide capital funds for the purposes hereinafter set forth: and

WHEREAS, under present circumstances it is desirable and in the public interest to provide said required capital funds in part by the issuance of short-term notes in conformity with the Consolidated Bond Resolution adopted October 9, 1952;

NOW, THEREFORE, be it resolved by The Port Authority of New York and New Jersey:

SECTION 1. As used in this resolution, any words or phrases specially defined in the aforesaid Consolidated Bond Resolution shall be read and construed in accordance with such special definitions: *provided, however*, that the term "facility" herein shall not include any railroad car owned, leased or operated pursuant to Chapter 638 of the Laws of New York of 1959 and Chapter 25 of the Laws of New Jersey of 1959 or any acts amendatory or supplemental thereto.

SECTION 2. There is hereby established a series of negotiable notes of the Authority to be known as "Consolidated Notes, Series PP" (hereinafter called the "notes of this Series") and the issuance of up to One Hundred Million Dollars (\$100,000,000) in principal amount of such Series PP Notes is hereby authorized. Said notes of this Series shall be established and issued pursuant to and shall conform in all respects to the aforesaid Consolidated Bond Resolution.

The notes of this Series shall be issued in one or more lots as the Authority may hereafter determine, shall be dated as of September 1, 1988, and mature on September 1, 1991, shall be of the denominations of \$5,000 or integral multiples of \$5,000, and shall bear a stated rate or rates of interest, including fixed, variable or incremental rates for the term of the notes or any portion thereof, or a combination thereof, from such date as may be determined by the Committee on Finance of the Authority, not in excess of twelve per centum (12%) per annum as may be determined by the Committee on Finance. The Committee on Finance is hereby authorized to fix and determine such date upon which interest shall commence and said interest rate or rates including fixed, variable or incremental rates or a combination thereof, if any, or to determine that the notes of this Series shall not bear a stated rate of interest. If the notes of this Series shall bear a stated rate or rates of interest, interest shall be payable semi-annually commencing on March 1, 1989, and thereafter on each succeeding September 1 and March 1 until maturity or prior redemption.

Unless otherwise determined by the Committee on Finance in connection with the issuance of the notes of this Series as book-entry only securities (which said Committee is hereby authorized to fix and determine such other system or method), the notes of this Series shall be numbered upward from C(PP)-1, or they may bear such other numbers as the Chairman of the Authority; the Vice Chairman of the Authority; the Chairman of the Committee on Finance; the Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority may deem appropriate.

Both principal of and interest on the notes of this Series shall be payable in lawful money of the United States of America. Principal of the notes of this Series shall be payable upon presentation and surrender thereof by the registered holders, or in the case of coupon notes of this Series, if any, upon presentation and surrender thereof, at the office or offices, designated by the Authority, of the Paying Agent or Paying Agents appointed for the purpose by the Authority, in a county which is in whole or in part in the Port of New York District. Interest on the registered notes of this Series shall be payable when due to the registered holder thereof by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder and interest on the coupon notes of this Series, if any, shall be payable upon presentation and surrender of the coupons appertaining thereto at such office or offices of such Paying Agent or Paying Agents. If on original issuance the notes of this Series are to be issued as book-entry only securities, subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate

method for the payment of both or either of the principal of and interest on the notes of this Series to the registered holder thereof; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system, then the foregoing payment provisions of this paragraph shall apply to the notes of this Series.

SECTION 3. The proceeds of the notes of this Series shall be used (a) for purposes of capital expenditures in connection with any one or more of the facilities of the Authority and for purposes incidental thereto; *provided, however*, that subject to agreements with the holders of obligations of the Authority and consistent with applicable provisions of Section 103 of the Internal Revenue Code of 1986, as amended, (hereinafter called the "Code"), or successor provisions of law, and the applicable regulations related thereto, the Committee on Finance may authorize all or any portion of the unspent proceeds of the notes of this Series to be used for any purpose for which at the time of issuance thereof the Authority was authorized by law to issue its obligations, including capital expenditures in connection with facilities of the Authority certified or to be certified after issuance of the notes of this Series; (b) for the purpose of refunding, directly, by offers to exchange, or otherwise, at or before maturity, all or any part of any issue of Consolidated Bonds or Consolidated Notes issued and outstanding at the time of the sale of any of the notes of this Series; and (c) for the purpose of refunding in accordance with applicable law, regulations and contractual provisions, any of the special obligations under the Port Authority Commercial Paper Program.

SECTION 4. Notes of this Series shall be issued only in registered form without coupons, registered as to both principal and interest and not as to either alone; *provided, however*, if at any time prior to issuance of the notes of this Series, there shall be in effect a provision of the Code, or the regulations with respect thereto, which does not provide that, for the interest on the notes of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such notes of this Series must be issued in registered form, then the notes of this Series may also be issued in the form of coupon notes payable to bearer, in which event the Committee on Finance is hereby authorized to adopt an appropriate form of coupon note issuable only in the denomination of \$5,000. If on original issuance the notes of this Series are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an appropriate form of note or other evidence of indebtedness; *provided, however*, in the event that such book-entry system or any successor book-entry system is discontinued without replacement with a similar system then the provisions of Section 8 of this resolution shall apply to the notes of this Series.

Registered notes of this Series shall be issued in the denominations of \$5,000 or integral multiples of \$5,000.

SECTION 5. The Authority will keep or cause to be kept at the office or offices, designated by the Authority, of its Registrar appointed for that purpose, in a county which is in whole or in part in the Port of New York District, proper and sufficient books for the registration of notes of this Series. Each registered note of this Series shall be transferable only upon such books by the registered holder thereof in person or by such registered holder's attorney duly authorized in accordance with the provisions of this resolution.

In the event that the notes of this Series may be issued in coupon form, a coupon note or notes of this Series (if any), upon the written request of the bearer or bearers thereof and upon the surrender thereof with all unmatured coupons thereto attached, may be exchanged for a registered note or notes, registered as designated in such request, of the same aggregate principal amount and series as the surrendered note or notes, of any of the authorized denominations. A registered note or notes of this Series, upon the written request of the registered holder or holders thereof and upon surrender thereof, may be exchanged for a registered note or notes, registered as designated in such request, of any other authorized denominations, or in the event that the notes of this Series may be issued in coupon form, a coupon note or notes with appropriate coupons attached, or a combination of such coupon and registered notes, in each case of the same aggregate principal amount as the surrendered note or notes.

All requests for the registration, transfer, exchange and delivery of notes as above provided shall be filed with the Registrar of the Authority; all notes to be surrendered pursuant to such request shall be surrendered to the Registrar; and all notes delivered in exchange as aforesaid shall be delivered by the Registrar. All notes of this Series surrendered to the Registrar in exchange for other notes or for transfer as above provided shall be cancelled by the Registrar upon such surrender.

The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of notes of this Series, including such fees as may be imposed by the Registrar for such services performed by the Registrar as provided in this resolution.

Nothing contained in this resolution shall be deemed to authorize the execution and delivery of notes of this Series except in the denomination of \$5,000 in the case of coupon notes (if any) or in denominations of \$5,000 or integral multiples of \$5,000 in the case of registered notes or to authorize the issuance of coupon notes of this Series if at any time there shall be in effect a provision of the Code or the regulations with respect thereto which provides that for the interest on the notes of this Series to be considered not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, such notes of this Series must be issued in registered form.

SECTION 6. Notes of this Series shall be redeemable in whole or in part, at the option of the Authority, prior to maturity at one hundred per centum (100%) of their face value on any interest payment date at or subsequent to September 1, 1989. If less than all of the notes of this Series then outstanding are to be called for redemption, the notes so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may fix and determine (which said Committee is hereby authorized to fix and determine such other system or method).

Notice of intention to redeem any notes of this Series shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption, the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed by the Authority or the Registrar, as the Authority may elect, not less than thirty (30) nor more than forty-five (45) days prior to the date fixed for redemption to the registered holders of notes of this Series to be called for redemption, at their last known addresses as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said notes. If on original issuance the notes of this Series are to be issued only in registered form or are to be issued as book-entry only securities subject to a book-entry system for determining interests therein, the Committee on Finance is hereby authorized to fix and determine an alternate method by which the Authority shall give notice of intention to redeem any notes of this Series.

Before the date fixed for redemption specified in the Authority's notice of intention to redeem, the Authority will pay or cause to be paid to the Paying Agent (or Paying Agents) an amount in cash in the aggregate sufficient to redeem all of the outstanding notes which are to be redeemed, at the respective redemption prices thereof, which, in each case, shall include the accrued interest to the date fixed for redemption, such principal amount to be held by the Paying Agent (or Paying Agents) in trust for the account of the holders of the notes so called for redemption and to be paid to them respectively upon presentation and surrender of the said notes with accrued interest included in such redemption price to be paid to the registered holder in accordance with the provisions of this resolution and in the case of coupon notes (if any), such accrued interest to be paid to the holders only upon presentation and surrender of all unmatured coupons (if any) pertaining to such notes. On and after the date fixed for redemption, the notice of intention to redeem having been completed as above provided or as provided by the Committee on Finance, the notes so called shall become due and payable at the office of the Paying Agent (or Paying Agents) designated by the Authority, and if funds sufficient for payment of the redemption price shall have been deposited with the Paying Agent (or Paying Agents) in trust as aforesaid and if such funds shall be available for redemption of such notes on the date fixed for redemption, then and in any such event, interest shall cease to accrue on the notes so called from and after the date fixed for their redemption, and such notes and the unmatured coupons (if any) pertaining thereto shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution, but shall rely solely upon the funds so deposited.

In the case of registered notes of denominations greater than \$5,000, if less than all of the notes of this Series then outstanding are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 unit of face value shall be treated as though it were a separate note of the denomination of \$5,000, and the word "note" as used in the foregoing provisions of this Section 6 shall be deemed to refer to such \$5,000 unit of face

value. If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by any note are to be called for redemption, then upon notice of intention to redeem said \$5,000 unit or units, the holder of said note shall forthwith present said note to the Registrar who shall issue a new note or notes of smaller authorized denominations but of the same aggregate principal amount in exchange therefor, pursuant to Section 5 of this resolution, including a new note or notes with the aggregate principal amount of the \$5,000 unit or units of face value called for redemption; and such new note or notes shall be deemed to be duly called for redemption without further notice to the holder thereof. If the holder of such note of a denomination greater than \$5,000 shall fail to present such note to the Registrar for the issuance of new notes of smaller denominations in exchange therefor, as aforesaid, such note shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents, as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of such note represented by such \$5,000 unit or units of face value on and after the date fixed for redemption, and such note shall not be entitled to the benefit or security of this resolution or the Consolidated Bond Resolution to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption) represented by such \$5,000 unit or units of face value, but to that extent shall rely solely upon the funds so deposited.

SECTION 7. The Authority shall not apply any moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for the payment of bonds secured by a pledge of the General Reserve Fund in whole or in part, the payment of debt service upon bonds so secured, the purchase for retirement of bonds so secured or the redemption of bonds so secured, or for the payment of expenses incurred for the establishment, acquisition, construction or effectuation, or for the operation, maintenance, repair or administration of any facility financed or refinanced in whole or in part by bonds secured by a pledge of the General Reserve Fund in whole or in part, or otherwise for the fulfillment of any undertakings which the Authority has assumed or may or shall hereafter assume to or for the benefit of the holders of bonds secured by a pledge of the General Reserve Fund in whole or in part; *provided, however*, that nothing herein contained shall be construed to permit the application by the Authority of moneys in the Consolidated Bond Reserve Fund or in any special reserve fund established for the benefit of the bonds of any prior issue of bonds except for purposes and upon conditions which in the case of the Consolidated Bond Reserve Fund are authorized by the Consolidated Bond Resolution or in the case of said special reserve funds are authorized by the respective resolutions establishing such prior issues of bonds.

Consolidated Bonds proposed to be issued for purposes in connection with an additional facility or a group of additional facilities in connection with which the Authority has not theretofore issued bonds which have been secured by a pledge of the General Reserve Fund in whole or in part, may be issued, and bonds other than Consolidated Bonds proposed to be issued for purposes in connection with such an additional facility or group of additional facilities may be secured by a pledge of the General Reserve Fund in whole or in part, in each case if and only if the Authority shall certify at the time of issuance (as defined in Section 3 of the Consolidated Bond Resolution) its opinion that the issuance of such Consolidated Bonds or that such pledge of the General Reserve Fund as security for such bonds other than Consolidated Bonds will not, during the ensuing ten (10) years or during the longest term of any of such bonds proposed to be issued (whether or not Consolidated Bonds), whichever shall be longer, in the light of its estimated expenditures in connection with such additional facility or such group of additional facilities, materially impair the sound credit standing of the Authority or the investment status of Consolidated Bonds or the ability of the Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds; and the Authority may apply moneys in the General Reserve Fund for purposes in connection with those of its bonds and only those of its bonds which it has theretofore secured by a pledge of the General Reserve Fund in whole or in part. Expenditures in connection with an additional facility or group of additional facilities shall mean the amount of the excess, if any, of the sum of all items of expense to be considered in determining the net revenues of the additional facility or group of additional facilities plus the debt service upon the bonds proposed to be issued and upon any additional bonds which in the Authority's opinion would be required to be issued to place and maintain such facility or group of facilities upon a sound operating basis, over and above the sum of all items of revenue and income to be considered in determining such net revenues.

SECTION 8. Each note of this Series shall have the official seal of the Authority, or a facsimile thereof, affixed thereto or printed or impressed thereon, and shall be signed by any one of the following persons, to wit:—The person holding the office or exercising the duties of Chairman; Vice Chairman; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Secretary; Assistant Secretary; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority at the time of its execution; *provided*, that each note of this Series may be executed by the facsimile signature of any of the foregoing persons and, in such event, such note shall have endorsed thereon a certificate of authentication substantially in the form hereinafter set forth, manually executed by the Registrar of the Authority. No note of this Series bearing a facsimile signature of any of the foregoing persons shall be entitled to any benefit under this resolution or the Consolidated Bond Resolution or be valid or obligatory for any purpose unless and until such certificate of authentication shall have been manually executed by the Registrar of the Authority, as aforesaid, and such manually executed certificate upon such note shall be conclusive evidence that such note has been authenticated and delivered hereunder. Such certificate of authentication on any such note shall be deemed to have been executed by the Registrar of the Authority, as aforesaid, if signed by an authorized officer thereof, but it shall not be necessary that the same officer sign the certificate of authentication on all of such notes issued hereunder. Notes of this Series in coupon form (if any) shall have coupons for interest attached, bearing facsimile signatures of the Chairman and Secretary of the Authority.

The registered notes of this Series shall be in substantially the following form, the blank spaces being appropriately filled in, and, as applicable, taking account of the changes and adjustments authorized in this resolution:

(FORM OF REGISTERED NOTE)

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
CONSOLIDATED NOTE
SERIES PP

No. C(PP)-

Maturity Date: September 1, 1991 Interest Rate: ...% Per Annum Dated: September 1, 1988 CUSIP ..

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY (formerly known as The Port of New York Authority and hereinafter called the Authority), a body corporate and politic, created by the Compact of April 30, 1921, between the State of New York and the State of New Jersey, to which the consent of the Congress of the United States was given by Public Resolution No. 17, 67th Congress, First Session, acknowledges itself indebted and for value received hereby promises to pay to the registered holder hereof, on the first day of September, 1991, upon presentation and surrender of this note, the principal amount shown below:

together with interest thereon at the rate of per centum (%) per annum from
payable semi-annually commencing on March 1, 1989, and thereafter on each succeeding September 1 and March 1 until maturity or prior redemption. The principal of this note shall be payable in lawful money of the United States of America, at maturity or prior redemption upon presentation and surrender by the registered holder hereof at the office of Paying Agent of the Authority, or the office or offices designated by the Authority of such other Paying Agent or Paying Agents appointed for the purpose by the Authority in a county which is in whole or in part in the Port of New York District. Semi-annual interest on this note shall be payable when due, in lawful money of the United States of America, to said registered holder by check or draft drawn on the Paying Agent or Paying Agents appointed for the purpose by the Authority and mailed to said registered holder.

This note is issued pursuant to and in full conformity with the Compact between the States of New York and New Jersey creating the Authority and the various statutes of said two States amendatory thereof and supplemental thereto, for purposes provided in said Compact and statutes, and is a direct and general obligation of the Authority for the prompt payment of the principal of and interest on which the full faith and credit of the Authority are irrevocably pledged. The provisions of the resolution of October 9, 1952, establishing an issue of Consolidated Bonds, and of the resolution of April 9, 1987, establishing the Series of which this note forms a part and authorizing the issuance of this note, constitute a contract between the Authority and the registered holder of this note, which is subject to modification as therein provided.

This note is registered as to principal and interest (but not as to either alone) and is transferable only upon the books kept by the Registrar of the Authority by the registered holder of this note or attorney duly authorized, all in accordance with the provisions of the resolution establishing the Series of which this note forms a part and authorizing the issuance of the notes of this Series. The notes of this Series are issuable only in the form of registered notes without coupons in the denominations of \$5,000 or integral multiples of \$5,000. The registered holder of this note or attorney duly authorized may upon application to the Registrar of the Authority exchange the same in accordance with the provisions of the resolution establishing the Series of which this note forms a part for an equal aggregate principal amount of registered notes of any other authorized denominations. The Authority shall bear the cost incurred by the Authority in connection with the registration, authentication (if any), transfer, cancellation, exchange and delivery of the notes of this Series including such fees as may be imposed by the Registrar for such services performed by the Registrar.

This note may be redeemed, at the option of the Authority, prior to maturity at one hundred per centum (100%) of its face value on any interest payment date at or subsequent to September 1, 1989. If less than all of the notes of this Series then outstanding are to be called for redemption, the notes so to be called shall be determined by lot by the Authority or the Registrar as the Authority may elect or by such other system or method as the Committee on Finance may fix and determine.

If this note shall be called for redemption, notice shall be given by the Authority by publication in a daily newspaper of general circulation in the Port of New York District. Such notice shall be published at least twice prior to the date fixed for redemption,—the first publication to be not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption; and the second publication to be not less than ten (10) nor more than twenty (20) days before the date fixed for redemption. A copy of such notice shall also be mailed, not less than thirty (30) nor more than forty-five (45) days before the date fixed for redemption, to the registered holder of this note at his last known address as appearing upon the Registry Books of the Authority; *provided, however*, that failure to give such notice by mailing, or any defect therein, shall not affect the validity of any action with respect to the redemption of said notes. If this note shall be called for redemption, and if funds sufficient for the redemption price shall be deposited with the Paying Agent or Paying Agents of the Authority in trust for the account of the registered holder of this note, and if such funds shall be available for its redemption on the date fixed for redemption, interest shall cease to accrue on this note from and after the date fixed for redemption and this note shall not be entitled to the benefit or security of the foregoing resolutions, but shall rely solely upon the funds so deposited.

If this note is of a denomination greater than \$5,000, and if less than all of the notes of the Series of which this note forms a part are to be called for redemption, then for all purposes in connection with redemption, each \$5,000 of face value of this note shall be treated as though it were a separate note of the denomination of \$5,000, and the word "note" as used in the foregoing redemption provisions shall be deemed to refer to each such \$5,000 unit of face value.

If it is determined as above provided that one or more but not all of the \$5,000 units of face value represented by this note are to be called for redemption, then upon notice of intention to redeem such \$5,000 unit or units the registered holder of this note shall forthwith present this note to the registrar who will issue new notes of smaller denominations but of the same aggregate principal amount in exchange or substitution therefor, as provided in the resolution establishing the Series of which this note forms a part, including a new note or notes with the aggregate principal amount corresponding to the aggregate principal amount and number or numbers of the \$5,000 unit or units called for redemption; and such new note or notes shall be deemed to be duly called for redemption without further notice to the registered holder. If the registered holder shall fail to present this note to the Registrar for the issuance of new notes of smaller denominations in exchange or substitution therefor as aforesaid, this note shall nevertheless become due and payable on the date fixed for redemption to the extent of the \$5,000 unit or units of face value called for redemption (and to that extent only); and (funds sufficient for the payment of the redemption price having been deposited with the Paying Agent or Paying Agents as aforesaid, and being available as aforesaid on the date fixed for redemption) interest shall cease to accrue on the portion of the principal amount of this note represented by such \$5,000 unit or units of face value on and after the date fixed for redemption and this note shall not be entitled to the benefit or security of the aforesaid resolutions to the extent of the portion of its principal amount (and accrued interest thereon to the date fixed for redemption) represented by such \$5,000 unit or units, but to that extent shall rely solely upon the funds so deposited.

IT IS HEREBY CERTIFIED, RECITED AND DECLARED that all acts, conditions and things required to exist, happen or be performed, precedent to and in the issuance of this note, exist, have happened and have been performed in due time, form and manner as required by the Constitutions and statutes of the States of New York and New Jersey, the Compact creating the Authority and the aforesaid resolutions of the Authority, and that the amount of this note, together with all other indebtedness of the Authority, does not exceed any limit prescribed by said Constitutions, statutes, Compact or the Consolidated Bond Resolution.

IN WITNESS WHEREOF, The Port Authority of New York and New Jersey has caused its name to be signed hereto by its duly authorized officer, by manual or facsimile signature, and its official seal, or facsimile thereof, to be hereto affixed or printed or impressed hereon, and this note to be dated as of the first day of September, 1988.

THE PORT AUTHORITY
OF NEW YORK AND NEW JERSEY

.....
Authorized Officer

(END OF FORM OF REGISTERED NOTE)

The certificate of authentication attached to each of the notes of this Series which are executed by a facsimile signature on behalf of the Authority shall be in substantially the following form, the blank spaces being appropriately filled in:

(FORM OF CERTIFICATE OF AUTHENTICATION)

This note is one of the notes issued under the provisions of the within-named resolution and the Consolidated Bond Resolution.

Date of Authentication:

REGISTRAR
as Registrar of the Authority

NOTICE: The signature to this assignment must correspond with the name as it appears on the face of the within note in every particular, with such signature appropriately guaranteed.

(END OF FORM OF PROVISIONS FOR ASSIGNMENT)

In case any official of the Authority who shall have signed or whose facsimile signature shall appear on any of the notes of this Series shall cease to be such official before such notes shall have been actually issued, such notes may nevertheless be issued as though the person who signed such notes had not ceased to be such official of the Authority; and the Authority may, by issuing notes bearing coupons (if any) so executed, adopt and use the facsimile signature of any person appearing on the coupons (if any), notwithstanding the fact that such person may have ceased, at the time when the notes and coupons (if any) shall have been issued, to hold the office appearing after such person's facsimile signature on such coupons (if any).

SECTION 9. The Committee on Finance of the Authority is hereby authorized prior to the issuance of any of the notes of this Series (i) to change the date as of which the notes of this Series shall be dated to any date on or before December 31, 1988; (ii) to change the date stated in this resolution at which any of the notes of this Series shall mature and be retired; provided, that said date or dates shall not be more than three (3) years from the date as of which notes of this Series are dated; (iii) to adjust or change the provisions contained in this resolution relating to the payment of interest and to the redemption, retirement, and call of the notes of this Series; provided, that the Committee may not change the redemption, retirement and call provisions of the notes of this Series to impose a call premium; (iv) to provide for the notes of this Series to be issued on original issuance as book-entry only securities taking account of the changes and adjustments authorized in this resolution with respect to the issuance of the notes of this Series as book-entry only securities; (v) to provide for the notes of this Series to be separately registrable as to principal and interest (including any authorized incremental interest) to any one or more holders of the notes or certificates (if any) with respect to the payment of interest thereon; and (vi) to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 10. In case any note or any coupon (if any) pertaining to such a note shall at any time become mutilated or be lost or destroyed, the Authority, in its discretion, may execute and deliver a new note or coupon of like tenor and amount in exchange or substitution for and upon cancellation of said mutilated note or coupon or in lieu of or in substitution for such destroyed or lost note or coupon; or if such note or coupon shall have matured, instead of issuing a substitute note or coupon the Authority may pay the same without surrender thereof.

In case of destruction or loss, the applicant for a substitute note or coupon shall furnish to the Authority evidence satisfactory to the Authority of the destruction or loss of such note or coupon and of the ownership thereof and also such security and indemnity as may be required by the Authority. The Authority may execute and deliver any such substitute note or coupon or make any such payment; or any Paying Agent may make any such payment upon the written request or authorization of the Authority. Upon the issuance of any substitute note or coupon, the Authority, at its option, may require the payment of a sum sufficient to reimburse it for any stamp tax or other governmental charge or other reasonable expense connected therewith and also a further sum not exceeding the cost of preparation of each new note or coupon so issued in substitution. Any note or coupon (if any) issued under the provisions of this section in lieu of any note or coupon alleged to have been destroyed or lost shall constitute an original contractual obligation on the part of the Authority, whether or not the note or coupon so alleged to have been destroyed or lost be at any time enforceable by anyone, and shall be equally and proportionately entitled to the security of this resolution and of the Consolidated Bond Resolution with all other bonds, notes and coupons (if any) issued hereunder or thereunder.

SECTION 11. In the event the Committee on Finance determines that the needs of the Authority for capital funds or the public interest require allocation of the proceeds of any of the notes of this Series to purposes in connection with some but not all of the purposes authorized in Section 3 hereof, the Committee is hereby authorized, prior to the sale of said notes of this Series from time to time, to make such allocation by resolution. The adoption by said Committee of such a resolution prior to any such sale shall be sufficient to restrict the application of the proceeds of any notes of this Series included in said sale to the purposes specified by the Committee in said resolution.

SECTION 12. The provisions of this resolution shall constitute a contract with the holders of the notes issued pursuant to this resolution, and with each such holder.

Consolidated Notes, Series PP—Authorization of Sale

Pursuant to the foregoing report, the following resolution was unanimously adopted:

SECTION 1. The Committee on Finance of the Authority (hereinafter called the "Committee") is hereby authorized to sell all or any part of One Hundred Million Dollars (\$100,000,000) in principal amount of Consolidated Notes, Series PP (hereinafter called the "notes of this Series"), at a price which will result in a true interest cost to the Authority not in excess of twelve per centum (12%) per annum to maturity, and to do so in the name of and on behalf of the Authority, at public or private sale, with or without advertisement, in one or more lots, at one or more times on or before December 31, 1988, and to apply the proceeds of such sale or sales as provided in the resolution establishing and authorizing the issuance of said notes of this Series; *provided, however*, that the total aggregate principal amount of Consolidated Notes, Series KK, Consolidated Notes, Series LL, Consolidated Notes, Series MM, Consolidated Notes, Series NN, Consolidated Notes, Series OO, and Consolidated Notes, Series PP, sold by the Committee shall not exceed Three Hundred Million Dollars (\$300,000,000).

SECTION 2. The Committee shall have power, in connection with the notes of this Series, to fix the time or times of sale on or before December 31, 1988, to determine the terms and conditions upon which sales shall be made and to accept or reject offers in connection with such sales, and to do so in the name of and on behalf of the Authority.

SECTION 3. The Committee shall have the power in the name of and on behalf of the Authority, in connection with the notes of this Series, to enter into any appropriate contracts or agreements concerning any sales or exchanges; to fix the time or times and determine the terms and conditions of delivery of the notes of this Series; to appoint and to enter into appropriate contracts or agreements with one or more Paying Agents and a Registrar, and to designate the office or offices of any such Paying Agent or Paying Agents at which payments shall be made and the office or offices of any such Registrar at which the books for registration shall be kept; to enter into any appropriate contracts or agreements providing insurance in connection with the notes of this Series; to enter into appropriate contracts or agreements in connection with the issuance of the notes of this Series as book-entry only securities; to make any selection, designation, determination or estimate and to take or withhold any action and to formulate and express any opinions and to exercise any discretion or judgment which may be or is required to be made, taken, withheld, formulated, expressed or exercised by the Authority as a condition precedent to the issuance of the notes of this Series or for the purpose of determining whether all conditions precedent to their issuance exist, the Authority hereby adopting all such selections, designations, determinations, actions, withholdings of action, estimates and exercises of judgment and discretion, whether pursuant to Section 3 of the Consolidated Bond Resolution of October 9, 1952, or otherwise, as its own; and to authorize any of the foregoing and generally to take such other action as in the opinion of the Committee will best serve the public interest.

SECTION 4. The Committee shall have power to authorize one or more official statements in the name of and on behalf of the Authority (describing the Authority, its financial condition and the notes offered for sale, and making representations on behalf of the Authority). The Authority hereby authorizes the underwriter or underwriters purchasing the notes in offering the notes of this Series for resale to use such official statement or statements and representations as those of the Authority.

SECTION 5. No part of the proceeds of the notes of this Series shall be invested directly or indirectly in such a manner as to cause the interest on such notes of this Series to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto.

SECTION 6. The Committee; Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; or Treasurer of the Authority is hereby authorized, in connection with the notes of this Series, to take any action which may be necessary or desirable to assure that the notes of this Series are in conformity with the provisions of Section 103, of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto, and that the interest on such notes of this Series is not includible

for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, or regulations with respect thereto, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the issuance of the notes of this Series for the purposes for which the notes of this Series are issued, as to the status of the projects for which the proceeds of the notes of this Series would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee and any such actions taken in connection therewith are hereby ratified.

Port Authority Operating Equipment -- Lease Financing Program - Amendment

Pursuant to the foregoing report, the following resolution was unanimously adopted:

WHEREAS, The Port Authority of New York and New Jersey (hereinafter referred to as the "Authority") has been authorized and empowered to issue bonds, notes, securities or other obligations or evidences of indebtedness to provide funds for the financing of capital or other expenditures in connection with its facilities; and

WHEREAS, on April 11, 1985, the Authority, inter alia, authorized the Executive Director to enter into lease-financing transactions (hereinafter referred to as the "Port Authority Operating Equipment -- Lease Financing Program" or the "Lease Financing Program") no earlier than May 1, 1985, and no later than June 30, 1988, to facilitate the purchase of portions of the Authority's operating equipment in an aggregate principal amount of lease-financing transactions not to exceed \$10 million at any one time; and

WHEREAS, on July 11, 1985, the Authority clarified the list of facilities of the Authority for which operating equipment could be purchased under the Lease Financing Program; and

WHEREAS, on April 10, 1986, the Authority, inter alia, authorized an increase in the aggregate principal amount of lease-financing transactions to be outstanding under the Lease Financing Program at any one time from up to \$10 million to up to \$25 million; and

WHEREAS, the Authority has determined to further increase the aggregate principal amount of lease-financing transactions to be outstanding at any one time under the Lease Financing Program from up to \$25 million to up to \$50 million and to extend the period during which lease-financing transactions may be entered into to June 30, 1990;

NOW, THEREFORE, after due consideration had, it is

RESOLVED, that the resolution of April 11, 1985 (appearing at pages 150 et seq. of the Official Minutes of that date) entitled "Port Authority Operating Equipment -- Lease Financing Program," as heretofore amended by resolutions of the Authority adopted July 11, 1985 (appearing at pages 297 et seq. of the Official Minutes of that date), entitled inter alia, "Report on Public Hearing - Lease Financing Program - Amendments," and April 10, 1986 (appearing at pages 213 et seq. of the Official Minutes of that date) entitled "Port Authority Operating Equipment -- Lease Financing Program - Amendment," is hereby further amended and supplemented to read as follows:

RESOLVED, that the Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; or Treasurer of the Authority is hereby authorized on behalf of the Authority to enter into lease-financing transactions on and prior to June 30, 1990, to facilitate the purchase of

portions of the Authority's operating equipment including, but not limited to: automotive vehicles, telephone, radio and computer equipment, and office furnishings, all of which vehicles, equipment and furnishings may be purchased for use by the Authority or others at any of its facilities (including facilities of the Authority certified or to be certified after the date hereof); in an aggregate principal amount not to exceed \$50 million of lease-financing transactions at any one time outstanding; with interest payable under the Lease Financing Program by the Authority to the lessor-investor or investors at a rate of interest not to exceed 60% of Bank of America's variable reference rate of interest, publicly announced as such, for the agreement with the proposed initial lessor-investor, and in the case of lessor-investors other than the initial lessor-investor or in the event of a significant change in market conditions as determined by the Executive Director (which in each case said Executive Director is hereby authorized to fix and determine), at a rate of interest to be fixed and determined by the Executive Director not to exceed 85% of Bank of America's variable reference rate, publicly announced as such; with the term of each letting of equipment not to exceed the useful life of the equipment included in such letting; and with the rental obligation for each letting of equipment to be divided into components of principal and interest and to be an operating expense of the Authority, payable in the same manner and out of the same revenues as all other such expenses of the Authority; and it is further

RESOLVED, that the Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; or Treasurer of the Authority is hereby authorized on behalf of the Authority to enter into agreements with BankAmerica Trust Company of New York, or other financial services entities, and with the initial lessor-investor or other lessor-investors, to effectuate the purchases and lease-financings (and to take such other action as may be necessary or desirable in connection with such purchases and lease-financings) of the above described operating equipment; to provide for a placement fee of up to 1% of the principal amount of equipment financed by the Lease Financing Program to Wellfleet Capital Company, or other financial services entities, to be paid as funds are periodically received from the lessor-investor or investors; and to provide for the payment by the Authority of an annual administrative fee to BankAmerica Trust Company of New York, or other financial services entities, not in excess of a total amount of \$5,000 per year during the term of the Lease Financing Program; with the continuing agreement with BankAmerica Trust Company of New York or any supplement thereto not to provide for any other payments, by the Authority of legal, financial or administrative charges of BankAmerica Trust Company of New York in connection with the establishment of the Lease Financing Program with the initial lessor-investor in excess of the \$20,000 payment previously made; and it is further

RESOLVED, that no part of the payments by the lessor-investor or investors to the Authority shall be invested directly or indirectly in such a manner as to cause the interest payable by the Authority to the lessor-investor or investors under the Lease Financing Program to be subject to Federal income taxes under Section 148 of the Internal Revenue Code of 1986, as amended, or successor provisions of law, and the applicable regulations related thereto; and it is further

RESOLVED, that the Committee on Finance; Chairman of the Authority; Vice-Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; or Treasurer of the Authority is hereby authorized, in connection with the Lease Financing Program, to take any action which may be necessary or desirable to assure that the lease-financing transactions included in the Lease Financing Program are in conformity with the provisions of Section 103 of the Internal Revenue Code of 1986, as amended (hereafter referred to as the "Code"), or successor or prior provisions of law to the extent applicable, and the applicable regulations related thereto, and that the interest payable by the Authority under the Lease Financing Program to the lessor-investor or investors is not includible for Federal income tax purposes in the gross income of the recipients thereof under Section 103(a) of the Code, or successor provisions of law, or regulations with respect thereto, and any such actions taken in connection therewith are hereby ratified. The Chairman of the Authority; Vice Chairman of the Authority; Chairman of the Committee on Finance; Executive Director; Assistant Executive Director; Chief Financial Officer; Deputy Chief Financial Officer; Comptroller; Assistant Comptroller; Treasurer; or Assistant Treasurer of the Authority is hereby authorized to certify on behalf of the Authority as to the need for the lease-financing transactions included in the Lease Financing Program for the purposes for which such lease-financing transactions included in the Lease Financing Program are entered into, as to the status of any projects for which the proceeds of the lease-financing transactions included in the Lease Financing Program would be used, as to the Authority's intentions with respect to the application and investment of said proceeds, and as to such other related matters as may be authorized by the Committee on Finance and any such actions taken in connection therewith are hereby ratified; and it is further

RESOLVED, that the form of the agreements hereby authorized be subject to the approval of General Counsel or his designated representative.

(Board - 4/9/87)

Port Authority Bus Terminal - Chase Manhattan Bank (National Association) - New Lease

It was recommended that the Board authorize the Executive Director to enter into a lease with Chase Manhattan Bank (National Association) at the Port Authority Bus Terminal for a branch bank containing automatic teller machines and a fully staffed office available to assist customers in opening accounts, making loan applications and other banking related services. The term of the lease is for approximately ten years, expiring on the day preceding the tenth anniversary of the date payment of rental commences. The tenant will have the right to terminate the lease at any time after the second anniversary of the date payment of rental commences under certain conditions. Rental is expected to commence no later than 180 days after the premises are delivered to the tenant. The lease provides for a rental at the annual rate of \$175,000 for the first five years and \$200,000 for the balance of the term. The tenant will pay for chilled water at the rate of \$3.17 per square foot, subject to escalation in accordance with the Consumer Price Index. The space will be delivered in its "as is" condition and the tenant will be responsible at its sole cost, for all necessary construction to prepare the premises for its operations. It is expected that this service will benefit both the terminal's commuting population and the business community in the area.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized to enter into a lease with Chase Manhattan Bank (National Association) at the Port Authority Bus Terminal substantially in accordance with the terms and conditions set forth above, the form of the agreement to be subject to the approval of the General Counsel or his designated representative.

(Board - 4/9/87)

Retention of Independent Auditors for 1987

Under the By-Laws, the Audit Committee has the responsibility to recommend retention of independent accountants for designation by the Board to audit the books and accounts of the Port Authority. The Audit Committee monitors the independent auditing function and decides annually the question of which firm to recommend to the Board for retention by the Port Authority and for what period of time in light of then current circumstances.

Consistent with that policy and after a full review and discussion of the policy and the performance of Touche Ross & Co., the Audit Committee recommended that the Board retain Touche Ross & Co. to audit the accounts and financial statements of the Port Authority for the year ending December 31, 1987.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that Touche Ross & Co. be and it hereby is designated as independent auditors to audit the accounts and financial statements of the Port Authority for the year ending December 31, 1987; and it is further

RESOLVED, that, in accordance with the By-Laws of the Port Authority, the matter of arranging for such auditing by the above designated auditors and for monitoring the auditors' performance be and it hereby is referred to the Audit Committee.

(Board - 4/9/87)

Teleport - Teleport Communications - Reimbursement Agreement

The Board is requested to ratify the Executive Director's payment to Teleport Communications of the sum of \$640,480, to reimburse Teleport Communications for costs incurred by it for certain work performed for the Port Authority's account and to authorize the Director, World Trade and Economic Development to enter into an agreement to reimburse Teleport Communications for the cost of performing certain additional work to be performed for the Port Authority at an estimated cost of approximately \$400,000.

The lease agreement between the Port Authority and Teleport Communications obligates the Port Authority to construct a Shield Wall and related infield infrastructure as well as to construct the Telecenter Building. In order to expedite the completion of this work, staff agreed to permit the tenant to undertake portions of this work. The tenant has already performed substantial work and has been reimbursed the sum of \$640,480.

The tenant is to be reimbursed for all costs incurred in the performance of the balance of the work which remains to be performed, at an estimated cost of approximately \$400,000. The work involved includes electrical installations to provide an uninterruptible power system, a generator, temporary electric meters, conduits, cables and feeders, underfloor cable ducts, temporary electrical facilities for certain customers of the tenant, re-design of the Shield Wall, installation of stairways and roadway paving.

Approximately one-half of this \$1 million reimbursement is recoverable as Telecenter Building rent, and based on current estimates the other half is recoverable through a combination of earth station rentals and 5% of Teleport Communications gross revenues.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board ratify the Executive Director's payment to Teleport Communications of the sum of \$640,480 to reimburse Teleport Communications for the cost of certain work performed by Teleport Communications for the account of the Port Authority and authorize the Director, World Trade and Economic Development to enter into an agreement to reimburse Teleport Communications for the cost of certain additional work to be performed for the Port Authority at an estimated cost of approximately \$400,000, the form of the agreement to be subject to the approval of General Counsel or his designated representative.

(Board - 4/9/87)

**Newark International Airport - Central Terminal Area
Additional Automobile Parking Exit Facilities Project
Authorization**

Significant increases in passenger volumes at Newark International Airport over the past years have resulted in a growing demand for airport parking space. In particular, the increase in Central Terminal Area (CTA) parking at Newark International Airport has led to parking lot saturation during peak periods and resultant increases in demand on the existing parking exit toll lanes. This excessive exit demand has been experienced on numerous occasions and has resulted in inordinate delays to patrons. Worsening of the situation is expected as a result of increased operations in Terminal B and the pending commencement of full passenger operations in Terminal C.

To minimize traffic congestion at the Central Tolls Plaza and increase operational effectiveness, staff recommends the construction of six additional and modification of two existing toll lanes within the CTA and the purchase and installation of associated equipment. The six additional toll lanes, together with the recently instituted manual precashiering process, is expected to significantly reduce parking lot congestion.

A publicly advertised contract or contracts will be utilized for the construction and for the purchase and installation of associated equipment.

The following resolution was unanimously adopted:

RESOLVED, that a project is authorized for the construction and modification of parking lot exiting facilities which will result in six additional toll lanes within the Central Terminal Area at Newark International Airport, at a total project cost presently estimated at approximately \$2.7 million including payments to contractors, an allowance for extra work, and engineering, administrative and financing expenses; and it is further

RESOLVED, that the Executive Director is authorized, either to award a publicly advertised contract or contracts on the basis of bids received for the construction of said facilities and for the purchase and installation of equipment to, in the case of each contract, the lowest bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable, and to order extra work up to the amount of 10% of the amount of each bid accepted, or to reject all bids, the form of the contract or contracts to be subject to the approval of General Counsel or his authorized representative.

(Board - 4/9/87)

**La Guardia Airport - Host Services of New York, Inc. and
United Air Lines, Inc. - Amendment to Leases**

It is recommended that the Board amend its previous resolutions authorizing the Executive Director to enter into agreements with Host Services of New York, Inc. and United Air Lines, Inc. at LaGuardia Airport covering among other things the performance by Host and United of certain construction work for the Port Authority's account.

At its meeting on February 14, 1985, the Board authorized an agreement with Host extending Host's lease of certain eating facilities at LaGuardia and also authorized Host to perform certain asbestos removal and ramp work for the Port Authority at an estimated cost of \$700,000. In a related action, on January 9, 1986, the Board authorized an agreement with United Air Lines, Inc. covering among other things the performance by United of certain work for Host with the Port Authority to reimburse United in an amount not to exceed \$575,000 for this work. Host would repay the Port Authority the amount paid to United.

The estimated cost of the asbestos removal work to be performed by Host has increased substantially due to the adoption of new Port Authority standards covering such work in response to new governmental regulations and guidelines. In addition staff now recommends that Host be authorized to perform interior finishing work in the West End Mall concession area for the Port Authority. The cost of the work to be performed by United has also increased over the estimated cost at the time of the Board's previous authorization. The amount that Host is to be reimbursed for all of the work it will perform for the Port Authority will be increased to an amount not to exceed \$3.1 million. The amount United is to be paid for its work will be increased to an amount not to exceed \$630,000.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board amend its previous resolutions authorizing the Executive Director to enter into agreements with Host Services of New York, Inc. and United Air Lines, Inc. at LaGuardia Airport substantially in accordance with the terms set forth above, the form of the agreements to be subject to the approval of General Counsel or his designated representative.

(Board - 4/9/87)

**Newark International Airport - Taxiway Additions and
Modifications - Project Authorization**

As a result of an evaluation conducted by staff, along with the Federal Aviation Administration and various airline representatives, a need was identified to improve the runway/taxiway system at Newark International Airport. Aircraft movements have grown from approximately 197,000 in 1980 to approximately 400,000 in 1986 and are estimated to reach close to 420,000 by the late 1990s. Because of current and anticipated increases in movements and because of the transfer of most passenger flights to the Central Terminal Area (CTA), it was concluded that a taxiway construction project was necessary to provide improved runway exiting capability, departure queuing flexibility, and taxiway access to the CTA.

The taxiway additions and modifications project anticipates the construction of Taxiway "X" from Taxiway "V" to Runway 22R departure end, the extension of Taxiway "Y" from Taxiway "R" to Runway 22R and the extension of Taxiway "K" west to Taxiway "M". The project will also provide enhanced exit connections from Runway 4R-22L at Taxiway "K", and from Runway 11-29 to Taxiways "R", "S", and "P".

The construction of Taxiway "X" will permit increased flexibility of aircraft movements as well as additional departure queuing capacity to accommodate anticipated and current higher volumes of traffic. The enhanced exit connections will allow aircraft to exit at higher speeds, thus reducing runway occupancy time. The extension of Taxiway "K" will provide a direct connection to the peripheral taxiway system serving the CTA.

This project is eligible for an estimated \$8.7 million dollars in Federal funding.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that a taxiway construction project is authorized at Newark International Airport at an estimated total project cost of approximately \$13.7 million including payments to contractors, an allowance for extra work and administration, engineering and financing expenses; and it is further

RESOLVED, that the Executive Director is authorized to either award a publicly advertised contract or contracts on the basis of bids received for the construction of said facilities to, in the case of each contract, the lowest qualified bidder who, in his opinion, is qualified by reason of responsibility, experience and capacity to perform the work and whose bid price the Executive Director deems reasonable, and to order extra work up to the amount of 10% of the amount of each bid accepted, or to reject all bids, the form of the contract or contracts to be subject to the approval of General Counsel or his authorized representative.

(Board - 4/9/87)

**Newark International Airport - People Express Airlines, Inc. -
Terminal C**

Under the terms of Lease ANA-170 with People Express Airlines, Inc., the carrier is constructing the finishes and other improvements of approximately two thirds of Terminal C. The Port Authority is providing the cost of the finishes and improvements, including the cost of architectural and engineering services, up to a maximum of \$175 million. The Lease was recently amended to include as part of the construction work loading bridges and personal property items involving heating and power at the gate positions estimated to cost \$8.85 million. The cost of construction of the annex to the North Terminal of approximately \$3.85 million was also included in the cost of the construction work under the Terminal C lease and subject to its \$175 million limitation. In addition, certain repair work to the Terminal C roof was included in the construction, at a cost not to exceed \$2.5 million with said cost to be borne by the Port Authority.

People Express Airlines, Inc. has been acquired by Texas Air Corporation. Under the terms of Lease ANA-170 with People Express Airlines, Inc., the fixed term of the Terminal C lease changed to a month to month status because of the occurrence of certain triggering events. Port Authority staff are renegotiating the terms of the Lease with Continental Airlines, Inc., the subsidiary of Texas Air Corporation designated by it.

Meanwhile construction of Terminal C is proceeding and to date the Port Authority has paid or committed approximately \$139 million of construction payments. It is currently anticipated that total construction payments will reach the authorized maximum of \$175 million by the end of June 1987.

Construction is expected to be completed by the end of this year. Total cost of construction is currently estimated to be about \$250 million, including the items recently included as part of the construction work. Authorization is now being requested to increase the maximum amount of the funds that may be provided by the Port Authority for the construction from \$175 million to \$225 million. The additional \$50 million would only be used to construct general purpose airline facilities that could be utilized by any potential airline tenant. It is expected that Lease ANA-170 would be amended to change the \$175 million maximum to \$225 million with repayment under the existing rental formula.

Authorization is also being requested for the Port Authority to assume agreements People Express Airlines, Inc. has with certain contractors and consultants and to enter into additional agreements as may be necessary in order to complete construction of Terminal C, in the event that Lease ANA-170 is terminated or staff determines that People Express Airlines, Inc. is unable or unwilling to complete construction.

By letter dated February 26, 1987, the Executive Director advised People Express Airlines, Inc. that until May 1, 1987, that Port Authority will not exercise its remedies, including its right to terminate the Lease by notice issued and effective before May 1, 1987, based on the failure to pay rent before May 1, 1987, and/or the failure to complete the construction on or before May 1, 1987.

(Board - 4/9/87)

In view of the ongoing negotiations with Continental Airlines, Inc., the Executive Director, by letter dated March 31, 1987, advised People Express Airlines that the Port Authority will not exercise the above stated remedies before July 1, 1987.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director, for and on behalf of the Port Authority, be and he hereby is authorized to: (a) authorize an increase in the maximum amount of the funds that may be provided by the Port Authority for the construction of Terminal C at Newark International Airport as specified above from \$175 million to \$225 million; and (b) enter into agreements directly with certain contractors and consultants currently under agreement with People Express Airlines, Inc., and others as may be required to complete construction of Terminal C; the form of said authorization and agreements to be subject to the approval of General Counsel or his designated representative.

(Board - 4/9//87)

**Kennedy International and La Guardia Airports - Extension of
Ground Transportation Contracts - AYB-306 and AG-862 for
Intra-Airport Bus Services - Hudson General Corporation**

It was recommended that the Board authorize the Executive Director, for and on behalf of the Port Authority, to enter into agreements extending the terms of Port Authority Contracts AYB-306 and AG-862 with Hudson General Corporation for two additional years and a further option period of up to twelve months, exercisable at the discretion of the Executive Director, covering intra-airport ground transportation services at Kennedy International and LaGuardia Airports. The estimated total annual cost of the contracts during the extension and option years is \$3,767,000, \$3,871,000 and \$4,078,000, respectively. It was further recommended that the Board authorize the Director of Aviation, at his discretion, to order additional services by the contractor during the extension at additional payments of not more than 15% of the total estimated contract price.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director is hereby authorized, for and on behalf of the Port Authority, to enter into agreements with Hudson General Corporation at Kennedy International and LaGuardia Airports in accordance with the foregoing; and it is further

RESOLVED, that the Director of Aviation is hereby authorized, for and on behalf of the Port Authority, to order additional services by the contractor during the extension at additional payments of not more than 15% of the aforesaid total estimated contract price; and it is further

RESOLVED, that the form of the foregoing agreements be subject to approval of General Counsel or his designated representative.

(Board - 4/9/87)

**Fishport - Handling Hall and Auction Rules and Regulations
and Schedule of Rates and Charges**

It was recommended that the Board adopt the attached Handling Hall and Auction Rules and Regulations governing the conduct and operation of a fresh fish display auction at the Port Authority Fishport at Erie Basin and the attached Schedule of Rates and Charges for services provided at the Fishport, and that the Board authorize the Executive Director to amend such Rules and Regulations and Rates and Charges from time to time, to select and then authorize buyers of fish at auction by entering into a Permit Agreement with each, and to enter into appropriate banking arrangements with Citibank, N.A., required for the operation of the auction. The fresh fish display auction will be conducted by the Port Authority in the Handling Hall currently under construction in Building 300 which is expected to open in September 1987. Buyers of fish must be Permittees who would either be selected by a procedure to be adopted by the Executive Director, or be Fishport tenants in good standing. Under said Rules and Regulations the Port Authority will be making payment to sellers and receiving payment from buyers, which payment obligation will be backed by security from each buyer of a type and form satisfactory to and in favor of the Port Authority. Buyers' checks will be deposited in the Port Authority's main account at Citibank, N.A., while Port Authority checks issued to sellers will be drawn on the Fishport Auction sub-account or related account. Establishing a Fishport account on a zero balance basis to be a sub-account or related account to the Port Authority's main account at Citibank, N.A., and to be funded by such account was found, after extensive discussion of various alternatives, to be the most cost effective means of processing auction sales while providing for same-day payment for sellers of fish at the auction.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the attached Handling Hall and Auction Rules and Regulations governing the conduct and operation of a fresh fish display auction at the Port Authority Fishport at Erie Basin and the attached Schedule of Rates and Charges for services provided at the Fishport be and the same hereby are adopted; and it is further

RESOLVED, that the Board authorize the Executive Director, on behalf of the Port Authority, to amend such Rules and Regulations and Rates and Charges from time to time, to select and then authorize buyers of fish at auction by entering into a Permit Agreement with each, and to enter into appropriate banking arrangements with Citibank, N.A. required for the operation of the auction, the form of such amendments and Permit Agreements to be subject to the approval of General Counsel or his designated representative.

RULES AND REGULATIONS OF THE PORT AUTHORITY HANDLING HALL
AND AUCTION AT THE PORT AUTHORITY FISHPORT

I. INTRODUCTION

The Port Authority of New York and New Jersey ("the Port Authority"), a body corporate and politic created by Compact between the States of New York and New Jersey with the consent of the Congress of the United States of America, having an office and place of business at One World Trade Center, New York, New York 10048, by its officers, employees, representatives and contractors will operate a fish handling hall ("the Hall") to include a display-type fish auction ("the auction") in a portion thereof, the Hall to be located at the Port Authority Fishport ("the Fishport"), a fish landing, processing and distribution center at Erie Basin in the County of Kings, City and State of New York. The Port Authority will provide equipment and personnel for the culling, weighing, boxing, temporary storage and sale of fish, and will conduct auctions of fish at which such persons who have applied for and been accepted by the Port Authority as Permittees may bid. The Port Authority has promulgated and adopted these Rules and Regulations ("the Rules") to govern the conduct and operation of the Hall and auction and of all persons doing business thereat.

II. PERMITTEE

2.1 Permittees. All references to a "Permittee" in the Rules shall refer to a person to which permission has been granted by the Port Authority by written agreement ("the Permit") executed by both the Permittee and the Port Authority to exercise buying privileges at the auction. Sellers of fish may also apply for a Permit to exercise buying privileges at the auction.

2.2 Privileges. Subject to the provisions of the Permit and the Rules, the privileges of a Permittee shall include admission to the display floor and auction room in the Hall and the privilege to bid at the auctions conducted thereat.

2.3 Eligibility. Subject to the provisions of Section 2.5 of the Rules, Permits will be issued to dealers and wholesale purchasers of fresh fish including purchasers for commercial use who are of good credit and business standing and character as determined by the Port Authority, and who desire, expect and intend to purchase fish at the auction.

2.4. Application Procedure. Any persons interested in becoming a Permittee must complete a Fishport Permit Application Form which may be obtained by mail or in person from the Fisheries Manager, Port Department, Port Authority of New York and New Jersey, One World Trade Center, New York, New York 10048. The Port Authority shall issue as many Permits as it deems advisable for the efficient operation of the Hall and the auction thereat. All applications must be properly completed and submitted to the Port Authority as provided on the Fishport Permit Application Form. If there are more eligible applicants than available Permits the Port Authority may select from among those eligible applicants those to whom it will issue a Permit. Eligible applicants who are not offered a Permit will be placed on a waiting list in such order as may be established by the Port Authority, based on such criteria it deems appropriate, and will be notified by the Port Authority if a Permit becomes available at the address set forth in the Fishport Permit Application Form, as such may be changed by written notice to the Port Authority from the applicant. Permits shall be issued for a fixed period, subject to revocation or termination as provided therein, and the receipt of a Permit for any period does not imply or represent that such Permit will be renewed or extended, but criteria for renewal or extension may be established by the Port Authority. A Permit shall not be deemed issued to an applicant until executed by such applicant and the Port Authority and delivered to such applicant. Each tenant of the Port Authority occupying premises at the Fishport for the processing of fish who is in good standing will be offered a Permit for its execution after submitting an application therefor, and the Port Authority may extend similar treatment to such subtenants thereof as it deems appropriate.

2.5. Level of Permittee Activity. In addition to all other rights of revocation and termination set forth in the Permit, the Port Authority shall have the right to revoke on three (3) days' notice the Permit of any Permittee (including Fishport tenants, or if applicable, subtenants) who does not

purchase fish at the Fishport auction at least five (5) days out of every twenty (20) days on which auctions are conducted.

2.6. Permit Fees. Each Permittee (other than a Fishport tenant, or, if applicable, subtenant shall pay to the Port Authority a basic annual fee for the privilege set forth in the Permit in an amount established by the Port Authority from time to time. For the first year of the Hall's operation, the basic annual fee shall be One Thousand Dollars and No Cents (\$1,000.00). In addition to the basic annual fee, all Permittees shall pay to the Port Authority an auction purchase fee, and such other fees and charges as may be established by the Port Authority from time to time, by published Schedule, or otherwise. All fees so established shall be posted in the Manager's office.

2.7. Telephone Installation. Permittees may, at their sole cost and expense, install telephone equipment at their auction post. All maintenance and other costs and expenses in connection with such equipment shall be the responsibility of the Permittee. The nature, time and manner of performance of all installation and maintenance work shall be subject to the prior written approval of the Port Authority, which approval may require the submission by the Permittee of an alteration application. The Port Authority reserves the right to perform or arrange for the performance of such work, at the Permittee's expense, and the right to require a fee from installers of such equipment.

2.8. Representatives. Each representative of each Permittee who is to have access to the Hall is subject to the prior and continuing approval of the Port Authority. No Permittee shall have more than two (2) representatives in the Hall at any one time. Only one (1) representative of each Permittee may occupy a seat in the auction room at any one time. Each Permittee shall designate its representatives on the Permit and shall supply such background information regarding such persons as may be requested by the Port Authority. Permittees shall give the Port Authority prior written notice before changing their designated representatives, and all such changes shall be subject to Port Authority approval. All representatives shall be issued representatives' photo I.D. cards, which they shall carry with them at all times while in the Hall and elsewhere at the Fishport. Such cards shall be not be transferable and shall be used only to admit the person

designated thereon. Representatives shall show their cards and other requested documentation to Port Authority personnel in order to obtain access to the Hall and the auction room. The Port Authority retains at all times the right to deny access to the Hall and the auction room or remove therefrom all unauthorized personnel.

III. PRE-AUCTION PROCEDURES

3.1 Types of Fish Accepted. The Port Authority will accept for sale at the auction such species of fresh fish and shellfish it may deem acceptable and will post a list of such species in the Hall. The Port Authority reserves the right to refuse to permit the sale of any fish at the auction if in its opinion the proposed sale would violate the Rules. All fish delivered to the Hall by vessel or truck must comply with all federal, state and local laws and regulations, which are applicable, including, without limitations, all laws and regulations relating to size and species of fish. All sellers of fish shall procure all licenses and pay all fees required by such laws or regulations in connection therewith. The foregoing shall not be construed as a submission by the Port Authority to the application to itself of such requirements, but, no immunity or exemption of the Port Authority from any of the foregoing requirements shall excuse compliance or be grounds for noncompliance on the part of any seller.

3.2 Fish by Species. All fish delivered to the Hall by vessel or truck must be separated by species. Port Authority specifications for boxing of fish may be obtained from the Manager's office.

3.3 Gutted and Gilled Fish. All cod, haddock, pollock, cusk, hake, and halibut delivered to the Hall must be gutted. All cod, haddock, and pollock delivered to the Hall during the period from March 1 through December 1 of each year must be gilled.

3.4 Hailing by Vessels. All Masters of vessels must hail the Manager's office at least twelve (12) hours in advance of arrival. On hailing, the vessel's Master must identify himself, the name of the vessel, and the vessel's owner and provide the following information: (i) the estimated time of arrival of the vessel at the Fishport; (ii) the estimated amount, in pounds, of each species of fish to be unloaded from the

vessel; (iii) the amount of fish, if any, boxed-on-board; (iv) the minimum acceptable bid for each species, if any, and (v) such other information as the Port Authority may request. Hailing shall be accomplished by radio or other communication acceptable to the Port Authority to the Manager's office.

3.5 Notification by Trucked-in Sellers. All owners wishing to deliver fish to the Hall by truck for sale at the auction must designate a representative who will be authorized to sell the product on behalf of the owner, and must supply such information regarding their designated representative as the Port Authority shall request. Only such designated representative will be permitted to arrange for the sale of fish trucked to the Hall. The owner of fish to be delivered to the Hall by truck for sale at the auction should notify the Manager at least twelve (12) hours before the truck arrives at the Fishport, identifying himself, the trucking company delivering the fish, the license plate and registration numbers of the truck, the name and other requested information regarding his designated representative if not previously provided, and must provide the following additional information: (i) the estimated time of arrival of the truck at the Fishport; (ii) the estimated amount, in pounds, of each species of fish to be delivered for sale and the port of origin of the fish; (iii) the minimum acceptable bid for each species, if any, and iv such other information as the Port Authority may request. Fish delivered by truck may not be accepted for sale at the auction if the procedures set forth herein have not been complied with, unless any such procedures are specifically waived for a particular sale by the Manager.

3.6 Berthing of Vessel. Vessels will be permitted to berth only at such times, and for such duration and in such order as directed by the Manager. All berthing will be performed solely at the risk of the vessel owner.

3.7 Check-In of Vessels. Upon arrival at the Fishport the Master of a vessel shall check in at the Manager's office where he will complete a hail sheet/berth application certifying (a) the accuracy of the information hailed-in by the Master as provided in Section 3.4 as such information may be amended, if necessary, and (b) such other information the Port Authority may request.

3.8 Check-in of Trucks. When a truck delivering fish to be sold at the auction arrives at the Fishport, the seller's designated representative shall check in at the Manager's office, where he will complete a hail sheet certifying (a) the accuracy of the information hailed-in by the owner as provided in Section 3.5 as such information may be amended, if necessary, and (b) such other information the Port Authority may request.

3.9 Responsibility for Hail-sheet. It is the responsibility of the person completing the hail sheet to assure that the information thereon is complete and accurate. The Port Authority assumes no responsibility for incomplete or inaccurate information.

3.10 Numbering of Hail-sheet. The Port Authority will number each hail sheet in sequence at the time the person completing it checks in at the Manager's office. Product will be handled in this order except that in times of great demand for offloading services the Manager may give priority to vessel-landed fish.

3.11 Seller Codes. After the hail sheet is completed a seller code will be assigned to the product. This code will apply to all product on the vessel or truck that will be going into the auction. The codes will be posted in the sorting area along with information from the hail sheet.

3.12 Unloading of Vessels. If a vessel is equipped with a hoist such hoist may be used by the vessel's crew to unload the vessel; otherwise a Port Authority hoist will be used. The Port Authority's hoist will be operated by its employees or contractors, but the Master must arrange for the delivery of the vessel's catch to the Port Authority hoist. Unloading activities may be slowed or stopped from time to time at the discretion of the Manager.

3.13 Unloading of Trucks. It is the responsibility of the truck operator to move fish to the truck's tailgate for unloading by the Port Authority.

3.14 Culling. Unboxed fish brought to the Fishport by vessel will be culled, weighed and boxed by the Port Authority in accordance with a schedule of species, sizes and quality, to be established from time to time by the Port Authority, which schedule will be displayed at the Manager's office. As a

shipment of fish is culled the Port Authority will record the amount in pounds of each species of fish in such shipment on a Hall Layout/Lot Sheet, and will also assign the shipment a place on the display floor of the Hall ("the display floor"). The Master of the vessel must be present at the culling and weighing or the Port Authority will not perform same, unless the Master's presence at that particular culling and weighing has been specifically waived by the Manager for that particular sale. After the fish are culled and weighed the Master must review the information recorded on the Hall Layout/Lot Sheet, may add or amend any minimum acceptable bid which the Seller wishes to have programmed into the auction clock, and must execute the Hall Layout/Lot Sheet confirming the data and instructions recorded thereon.

The Port Authority reserves the right to reject all fish or shipments of fish which it deems to be unacceptable for sale without liability to the Master of the vessel, the owner of the fish, or any other person.

3.15 Labeling Vessel-landed Fish. When fish brought to the Fishport by vessel is boxed by the Port Authority, each box will be labeled with: seller code/lot number/box number and species/species size or count/weight; such label may also provide the home port of the vessel and the length of trip. It is the responsibility of Master to determine that the labels, as completed, are accurate, and to approve same by execution of the Hall Layout/Lot Sheet.

3.16 Trucked-in Fish. Fish trucked-in will not be re-culled, weighed or boxed by the Port Authority. Fish trucked-in may not be accepted for sale at the auction unless they are packed and delivered in boxes meeting Port Authority standards. The Port Authority reserves the right to spot-check box weights and cull at any time and if it finds improper weights or inconsistent quality to reject the shipment without liability to the owner of the fish, his designated representative or any other person. The Seller's designated representative must be present at such spot check. As a shipment of fish is received, or after the spot-check, if any, the Port Authority will record the amount in pounds of each species of fish in such shipment on a Hall Layout/Lot Sheet, and will also assign the shipment a place on the display floor. The Seller's designated representative must review the information recorded on the Hall Layout/Lot Sheet, may add or amend any minimum acceptable bid which the seller wishes

to have programmed into the auction clock, if any, and must execute the Hall Layout/Lot Sheet confirming the data and instructions recorded thereon.

3.17 Movement of Fish on the Display Floor. Fish shall not be moved onto the display floor less than one hour prior to each auction without the approval of the Manager. The Manager shall determine the order and method of movement of fish on and off the display floor.

3.18 Display of Fish. After culling, an entire seller code of vessel-landed fish will be displayed together on the display floor. An entire seller code of trucked-in fish will be displayed together at a separate area of the display floor reserved therefor and will be clearly identified as such.

3.19 Inspection of Fish. Inspection of fish will be permitted during the display period preceding each auction or at such other time as may be determined by the Manager.

3.20 Information Board. The Port Authority will display in the auction room such items of the information provided by the Master of a vessel or in the case of trucked-in fish by the seller's representative as it deems appropriate regarding the fish to be offered for sale at the auction. The Port Authority assumes no responsibility for the accuracy of any such information.

IV. THE AUCTION

4.1 Time of Auction. Auctions will be conducted Monday through Friday at 12:00 noon, or on such other days or at such other times as may be announced from time to time by the Manager. There will be no auctions on such holidays or other days as may be designated by the Manager.

4.2 Start of Auction and Conditions of Sale. The start of the auction shall be announced by a loud warning signal followed by a start signal. The Auctioneer shall thereupon describe the order of the sale for the day. The conditions of the auction shall include the following:

(a) that the highest bidder will be determined by the action of the auction clock;

(b) that the Rules and, to the extent not inconsistent with the Rules, Title 11, Section 2-328 of the New York Uniform Commercial Code, shall govern the auction;

(c) that in the event of any inconsistency between the Rules and the provisions of any municipal law, rule or regulation the provisions of the Rules shall govern.

(d) that sales, use tax and customs charge requirements will apply;

(e) that all fish are sold without any representations or warranties by the Port Authority, including, but not limited to, warranties, express or implied, as to title, quality, legality, merchantability or fitness for purpose, and any oral or written representations to the contrary by any Port Authority representatives shall be without effect;

(f) that by bidding at the auction, each Permittee certifies that: (a) the price of his bid has been arrived at independently without collusion, consultation, communication or agreement for the purpose of restricting competition, as to any matter relating to such prices with any seller or any other Permittee; (b) the prices quoted in his bid have not been and will not be knowingly disclosed, directly or indirectly, by the Permittee prior to the actual bid to any seller or any other Permittee; and (c) no attempt has been made and none will be made by the Permittee to induce any other Permittee to submit or not to submit a bid for the purpose of restricting competition; and

(g) such other conditions as may from time to time be established by the Port Authority or announced by the auctioneer.

4.3 First Sale. After announcing the order of the sale and making other announcements, if any, the Auctioneer shall proceed to the first lot to be sold, describe the product and announce the start of bidding for that lot by starting the auction clock.

4.4 Bidding. After a lot is announced, the auction clock will be set at a price determined by the Auctioneer and will be allowed to run down. As the bidder activates his key pad to stop the auction clock, he will indicate the number of boxes in the lot that he wishes to purchase, from "one" to "all". No

minimum bid is required unless otherwise announced by the Auctioneer. Bids shall be entered on a price per pound basis. The auction clock price will then be adjusted upward to the originally set price and the process will be repeated until the entire lot is sold or withdrawn as provided in the Rules. No bid, once transmitted to the auction clock, may be retracted by the bidder for any reason whatsoever. No absentee or telephonic bids shall be permitted.

4.5 Minimum Acceptable Bid. A minimum acceptable bid for a lot may be indicated by the seller and programmed into the auction clock prior to the bidding on that lot in accordance with the Rules or at such other times as the Port Authority may accept same. The minimum acceptable bid for the lot must be stated on a price per pound basis.

In the event that the clock reaches a minimum acceptable bid without a sale having been made, it shall be reset. If no sale is made on the second setting, the lot shall be withdrawn. The clock shall continue to be reset so long as a sale is made on the previous setting and fish from that lot remain unsold.

4.6 Further Sales. After the entire lot is sold, the Auctioneer shall offer the balance of the lots from the same seller code. When all of the lots from such seller code have been sold, the Auctioneer shall proceed to the next numbered seller code displayed on the display floor and repeat the process.

4.7 Labeling of Boxes. At the close of the sale of each lot the Port Authority shall label the number of boxes in that lot purchased by a buyer with that buyer's label. The buyer labels will be affixed by lot box number. The buyer may not choose from the lot; the boxes will be assigned consecutively by the Port Authority by number to the buyer based on the order and quantity of purchase.

4.8 Withdrawal Procedure. In the event that an entire lot is not sold after two consecutive clock settings, the unsold portion of that lot shall be withdrawn from the auction. Floor personnel shall mark the unsold lot as having been withdrawn from the sale. At the election of the seller and subject to Section 7.2 the withdrawn lot may be placed in storage until the next auction, provided, however, that no lot may be offered for sale

at auction more than twice unless expressly permitted by the Manager. If an unsold lot is not placed in storage for the next auction the seller must remove such unsold lot from the Hall in accordance with the removal procedures described in Section 4.14.

4.9 Sale is Final. Upon the sale signal of the clock, and subject only to the buyer not exceeding his purchase limit described in Section 5.5, the buyer shall be deemed to have purchased the number of boxes indicated by his bid for that lot at the clock's registered price. In the event that the Port Authority determines that the buyer has exceeded his purchase limit, then no sale shall have occurred and the Port Authority shall so advise the seller. The opportunity of the buyer to inspect the fish prior to the auction as described in Section 3.19 shall conclusively be deemed adequate opportunity to determine any defects. Nothing contained herein shall be deemed a waiver by a seller of any claims or causes of action that such seller may have against a buyer.

4.10 Additional Security Deposits at Check-in. When the buyer's representatives check into the auction, they shall present their credentials to the Manager, along with any acceptable security deposit to be added to the buyer's established security as provided in Section 5.4. The purchase limit of each buyer will be computed at that time. Copies of this information will be given to the buyers and to auction personnel. It is the responsibility of each buyer to continuously calculate his current purchase limit as purchases are made.

4.11 Payment Amounts for Buyers. At the conclusion of the day's auction (or, in the event of very large volumes of sales as determined by the Manager, during intermissions) a transaction summary will be delivered to the buyer. The transaction summary shall set forth (i) the gross purchase amount equal to the accepted bid price multiplied by the gross number of pounds of fish purchased, (ii) the applicable fees and charges due the Port Authority at the then current rates as set forth in the Schedule and (iii) the applicable sales or use tax and customs charge. The buyer will then make payment to the Port Authority as provided in Section 5.1.

4.12 Payment of Seller. At the conclusion of the day's auction, the Master of each vessel or, in the case of trucked-in fish, the seller or the seller's designated representative, shall

receive a transaction summary and shall take such transaction summary to the Manager's office. The transaction summary shall set forth (i) the gross sale amount equal to the accepted bid price multiplied by the gross number of pounds of fish sold and (ii) the applicable fees and charges due the Port Authority at the then current rates as set forth in the Schedule. The Port Authority shall thereafter issue a check payable to the order of the seller in the amount of the aforesaid gross sale amount less such fees and charges as set forth in the transaction summary, and less any other monies due and owing to the Port Authority by the seller. Appropriate arrangements may be made with a local bank or banks for the cashing of such checks.

4.13 Sold Product Removal. No portion of a lot which has been sold shall, under any circumstances, be removed from the display floor by a buyer. After a lot has been labeled by the Port Authority in accordance with the labeling procedure described in Section 4.7 and after the buyer has presented a check to the Port Authority in accordance with the provisions of Section 5.1, the Port Authority shall move the buyer's purchase to the tailgate of the buyer's truck. Each buyer shall be responsible for placing the fish purchased by it on the proper truck. Any purchased fish remaining on the loading dock more than a reasonable time after the completion of the auction, as determined by the Manager, may be placed in storage by the Port Authority at the expense of the seller as provided in Section 7.2. Port Authority movement of sold fish shall be after the day's auction has ended, provided, however, that in the event that due to a large volume of sales more space is required than is available in the Hall, the Port Authority may move purchases during the auction at intermissions to be designated by the Manager in order to allow for additional lots to be displayed.

Buyers must not under any circumstances whatsoever separate or divide purchases at the Handling Hall or re-sell such purchases at the Handling Hall.

4.14 Unsold Product Removal. Fish withdrawn from the auction pursuant to Section 4.8 or unsold for any other reason and not placed in storage for the next auction must be removed promptly from the Hall by the seller, in which event the seller shall pay to the Port Authority, in addition to all other

applicable fees, a withdrawal fee at the current rate as set forth in the Schedule. The Port Authority will move such unsold fish to the truck loading dock or to the vessel berthing area, whichever is applicable. Any unsold fish remaining on the truck loading dock or at the vessel berthing area more than a reasonable time (as determined by the Manager) after the completion of the auction may be placed in storage by the Port Authority in accordance with Section 7.2. All fish placed in storage pursuant to this Section shall be subject to storage fees at the then current rate as set forth in the Schedule.

4.15 Title. Title to and risk of loss of the fish shall pass to the buyer at the time of sale. Prior thereto title to and risk of loss of the fish shall be on the seller.

V. PAYMENT BY BUYERS, SECURITY AND PURCHASE LIMIT

5.1 Payment by Buyer. Promptly after receipt of a transaction summary as provided in Section 4.12 the buyer shall deliver its check to the Manager's office payable to "The Port Authority of New York and New Jersey" in a sum equal to the total of the amounts set forth in the transaction summary plus any other monies due and owing to the Port Authority, which payment shall not exceed the buyer's purchase limit.

5.2 Security for Payment. As security for checks delivered to the Port Authority representing payment for purchases made at the auction and fees and charges in connection therewith, each buyer shall deposit with the Port Authority, or shall establish in favor of the Port Authority, security in the minimum sum of One Hundred Thousand Dollars and No Cents (\$100,000.00). The type and form of such security shall be as provided in the Permit and shall be subject to all the provisions thereof, including, but not limited to, the right of the Port Authority to draw on all or a portion of such security.

5.3 Security for Payment by Fishport Tenants or Subtenants. The provisions of Section 5.2 shall apply to Permittees who are also tenants, or if applicable, subtenants of the Port Authority in good standing who occupy premises at the Fishport for the processing of fish, except that there shall be no minimum security required of such Permittees who may each deposit or establish security in a sum determined in their discretion, which sum shall, however, determine their purchase limit in accordance with Section 5.5.

5.4 Additional Security for Payment. In addition to the security to be deposited with the Port Authority in accordance with Sections 5.2 and 5.3, each buyer upon checking into the auction may deposit with the Port Authority additional security in favor of the Port Authority of a type and form provided in the Permit.

5.5 Purchase Limit. A buyer may purchase fish at the auction in an amount not to exceed its "purchase limit" which shall be a sum equal to ninety percent (90%) of the following: the sum of (i) the security deposited with, or in favor of the Port Authority, as provided in Section 5.2 or 5.3, whichever is applicable, and (ii) any additional deposits accepted by the Port Authority as provided in Section 5.4, less the sum of (i) any uncollected checks issued to the Port Authority by a buyer as payment for a purchase, and (ii) any and all other amounts due the Port Authority from such buyer.

5.6 Prohibited Purchases. All buyers are strictly prohibited from bidding for fish in excess of their purchase limit.

VI. SANCTIONS

Permittees, sellers, or any other persons in default under the Rules or, in the case of Permittees, under any terms or conditions of their Permits, may have their respective privileges at the Hall or other Fishport facilities suspended or revoked at the discretion of the Port Authority.

VII. MISCELLANEOUS

7.1 Boxes. The Port Authority shall sell fish handling boxes to sellers and buyers at the then current rate as set forth in the Schedule.

7.2 Storage. Fish withdrawn from auction by the seller for the first time may be placed in storage by the seller until the next auction without incurring storage fees. Any fish arriving on the display floor prior to the permitted time therefor or, if sold, remaining at the Hall more than a reasonable time after the conclusion of an auction (both as determined by the Manager) shall be deemed to have been placed in storage by the seller. Storage fees shall thereupon

automatically commence on account of such fish at the then current rates as set forth in the Schedule. The Port Authority will issue a receipt to the seller of any fish to be stored hereunder, which receipt shall contain such terms and conditions as the Port Authority may deem appropriate and which terms and conditions shall be deemed agreed to by the seller by its delivery of such fish to the display floor, including, but not limited to, terms which may limit any liability of the Port Authority in connection with storage to a specified amount. The Port Authority shall be deemed to have been granted a possessory lien and security interest having the attributes of, and to secure such obligations of the seller of the fish as are described in Article 7, Section 7-209 of the New York Uniform Commercial Code, and such lien shall further secure any and all other present or future obligations of the seller to the Port Authority. If fish placed in storage are not offered for sale by the seller at the first auction following the commencement of the storage period and are not removed from the Hall, or if any fish remain at the Hall in violation of the Rules, the Port Authority may, without prior notice, sell such fish at the next auction (regardless of how many times the fish have previously been at auction), or elsewhere, the proceeds of such sale to be applied first to the expenses of the Port Authority in connection with the removal, storage and sale including, but not limited to, a removal fee at the then current rate as provided in the Schedule, second to any other obligations of the seller to the Port Authority, with any balance remaining to be paid or credited to the seller. If the expenses of such removal, storage and sale shall exceed the proceeds of sale, the seller shall pay such excess to the Port Authority upon demand. If it is unable to sell the fish at such auction, the Port Authority may in its discretion continue to store or discard the fish (at the seller's expense) or attempt again to sell them at the next auction.

7.3 Additional Handling Hall Services. The Port Authority may, in the discretion of the Manager, provide fish handling services at the Handling Hall for product not to be sold at auction, such services to be provided at the then current fees and charges as set forth in the Schedule.

7.4 Sellers. Sellers and their representatives may be barred from access to any portions of the Fishport, including,

but not limited to, the Handling Hall, for failure to observe the Rules.

7.5 Visitors. Visitors shall not be admitted to the Hall without the prior written consent of the Port Authority and in accordance with the terms of such consent.

7.6 Manager's Discretion. The Rules contemplate that the Manager shall retain discretion in order to direct the daily operations of the Hall. In addition to the discretion granted elsewhere in the Rules, the Manager is vested with authority to close the Hall, alter the timing of the auctions or otherwise cancel or suspend operations for causes deemed by him to be appropriate.

7.7 Release and Indemnity of Port Authority. Each Permittee and seller by its participation in the auction shall be deemed to have agreed that the Port Authority, its Commissioners, officers, employees and representatives, shall not be held liable, and each Permittee and seller waives and releases any claim or cause of action against the Port Authority, its Commissioners, officers, employees, agents, representatives and contractors, now or hereafter arising as a direct or indirect result of the Port Authority's operation of the auction, Hall or Fishport. Each Permittee and seller shall indemnify and hold harmless the Port Authority, its Commissioners, officers, employees, agents, representatives and contractors from and against all claims and demands, just or unjust, of third persons arising or alleged to arise out of the operation of the auction, the Hall or the Fishport by the Port Authority and for all expenses incurred by it and by them in the defense, settlement or satisfaction thereof, including without limitation thereto, claims and demands for death, for personal injury or for property damage, direct or consequential, whether they arise from the acts or omissions of a Permittee or seller or their designated representatives, of the Port Authority, or of third persons, or from acts of God or otherwise, excepting only claims and demands which result solely from affirmative wilful acts done by the Port Authority, its Commissioners, officers, employees, agents, representatives and contractors with respect to the operation of the auction, the Hall or the Fishport.

7.8 Definitions. The following terms, when used in these Rules, shall have the respective meanings below:

(a) "Fishport" shall mean the real property, land, land under water, buildings, structures, fixtures, improvements and other property located in the Borough of Brooklyn, in the County of Kings, in the City and State of New York, transferred to the Port Authority under the provisions of the following:

(i) a deed from Beard's Erie Basin, Inc. dated December 15, 1958, recorded in the Office of the City Register, Kings County, on December 16, 1958 in Liber 8686 of Conveyances on pages 311 et seq.;

(ii) a deed from The United States of America, acting by and through the Administrator of General Services, dated August 31, 1959, recorded in the Office of the City Register, Kings County, on September 2, 1959 in Liber 8756 of Conveyances on pages 260 et seq.;

(iii) a deed from Piers 45 and 46 Brooklyn Corp., formerly known as Piers 45 and 46 Realty Corp. dated May 22, 1961 and recorded in the Office of the City Register, Kings County, on May 23, 1961, in Liber 8923 of Conveyances, on pages 525 et seq.;

(iv) a deed from Conover Street Realty Corporation, dated June 29, 1961, and recorded in the Office of the City Register, Kings County, on July 5, 1961 in Liber 8924 of Conveyances, on pages 407 et seq.;

and such additional property contiguous or adjacent thereto as the Port Authority may have heretofore or may hereafter acquire for marine terminal purposes, and additional buildings, structures, fixtures, improvements and other property which may have been heretofore or may hereafter be installed or constructed for marine terminal purposes on any property or properties heretofore mentioned, but not including real property the title to which was acquired by the Port Authority by virtue of resolutions of its Board of Commissioners accepting the offers of the State of New York contained in Chapter 410 of the Laws of 1944 and in Chapter 899 of the Laws of 1945, of the State of New York.

(b) "Manager" shall mean the person from time to time designated by the Port Authority to exercise the powers and functions vested in the said Manager by the Rules, or his or her duly designated representative.

(c) "Person" shall mean not only a natural person, corporation or other legal entity, but also two or more natural persons, corporations or other legal entities acting jointly as a firm, partnership, unincorporated association, consortium, joint venture or otherwise. The obligations of any two or more persons, corporations, firms or other legal entities acting jointly shall be deemed to be the joint and several obligation of each participant therein.

(d) "Seller" or "owner" shall mean a person who brings or causes to be brought fish owned by such person to the Fishport for purposes of selling such fish at auction.

(e) "Master" shall mean the person having command of a vessel, its crew and cargo and shall be deemed to have the authority under the Rules to act as agent for the owner or operator of such vessel, including, but not limited to, the authority to sell and store fish brought to the Fishport auction, to receive payment therefor and to pay fees in connection therewith.

(f) "Buyer" shall mean a Permittee issued a Permit by the Port Authority granting it the privilege to purchase fish at the auction.

(g) "Lot" shall mean all fish from one shipment code of the same species and of comparable size and quality.

(h) "Auctioneer" shall mean such employee or contractor of the Port Authority designated by the Port Authority to conduct the auction.

(i) "Fishport tenant" shall mean an occupant of premises at the Fishport pursuant to a written agreement with the Port Authority.

(j) "Auction clock" shall mean such electronic device as may be used by the Port Authority to facilitate the conduct of the auction.

(k) "Schedule" shall mean the Port Authority Schedule of Rates and Charges applicable at the Fishport, as amended or supplemented from time to time.

(1) "Product" or "catch" shall mean fish.

7.9 Amendments. The Rules (including any fees, rates or charges included or incorporated by reference herein) may be amended or supplemented by the Port Authority from time to time at any time with or without prior notice to Permittees, sellers, their designated representatives, or any other persons.

7.10 Other Rules and Regulations. The Rules are in addition to FMC SCHEDULE NO. PA-9 naming Rules and Regulations applying at Port Authority Marine Terminals and Rates and Charges applicable for the use of Public Areas at Port Authority Marine Terminals, including all revisions thereto, which Schedule remains in full force and effect.

7.11 Severability. Wherever possible each provision of the Rules shall be interpreted in such manner as to be effective and valid under applicable law, but if any provision of the Rules shall be prohibited by, unenforceable or invalid under applicable law, such provision shall be ineffective to the extent of such prohibition, unenforceability or invalidity, without invalidating the remainder of such provision or the remaining provisions of the Rules.

7.12 Headings. The Section headings in the Rules are inserted only as a matter of convenience and for reference, and they in no way define or limit or describe the scope or intent of any provision hereof.

7.13 Assignment. No Permittee or seller shall assign or transfer any privileges it may have in connection with its activities at the Fishport, whether such privileges are by virtue of a Permit or otherwise.

7.14 Non-liability of Individuals. Neither the Commissioners of the Port Authority nor any of them, nor any officer, agent or employee thereof, shall be charged personally by a Permittee or seller or any other person subject to the Rules with any liability, or held liable to them, in connection with or under any term or provision of the Rules.

7.15 Posting. Copies of the Rules and Schedule shall be available to buyers and sellers or their designated representatives at the Manager's office.

THE FISHPORT - DEFINITIONS	
<p><u>THE FISHPORT:</u> Definition of</p> <p>The Fishport is such pier(s), wharves, or other locations designated from time to time by the Port Authority for the purpose of handling commercial fishing vessels.</p>	
<p><u>FISHING VESSEL:</u> Definition of</p> <p>A commercial fishing vessel is a vessel actively engaged in a commercial fishing operation and holds a valid federal or state fishing vessel license where applicable.</p>	
<p><u>FISH:</u> Definition of</p> <p>All species of finfish and shellfish taken from marine or inland waters.</p>	
<p><u>BERTHING NOTIFICATION:</u> Definition of</p> <p>All fishing vessels wishing to berth and/or discharge fish must notify the Fishport Manager prior to arrival.</p>	
<p><u>FISHPORT MANAGER:</u> Definition of</p> <p>The Fishport Manager shall mean the person or persons, from time to time, designated by the Manager, New York Marine Terminals, to exercise the powers and functions of the Fishport Manager as set forth in the schedule of Fishport Rates and Charges, or his successor in office or duties, acting either personally or through his duly authorized representative.</p>

WHARFAGE CHARGES & RULES

Wharfage:

A charge shall be assessed against all fish passing or conveyed over, onto, or under wharves or between vessels. Wharfage is solely the charge for the use of the wharf and does not include other services. Wharfage charge shall be \$.01 per pound of fish and/or shellfish.

AUCTION AND HANDLING HALL CHARGES

1. Sellers Fee - An auction charge which includes wharfage shall be assessed against fish and/or shellfish sold at auction. Charges shall be equal to 1.6% of the gross value of the fish and/or shellfish.
2. Buyer's Fee - An auction charge shall be assessed against fish purchased at the auction. Charges shall be equal to 1.6% of the value of the fish and/or shellfish purchased. Buyers pay, in addition, the cost of the box.
3. Storage Fee - A fee may be assessed for fish and/or shellfish stored at the handling hall. This fee shall be equal to \$.03 per pound per day of fish and/or shellfish.
4. Withdrawal Fee - A fee shall be assessed against fish which has been withdrawn from sale and which has been thereafter sold or intended to be sold through negotiation rather than at the next auction. The charge shall be equal to \$.03 per pound of fish and/or shellfish and the cost of the box. In addition, a wharfage charge shall be assessed against fish landed by vessels.
5. Removal Fee - A charge shall be assessed against fish which has been placed for sale at subsequent auctions but has not been sold and has not been removed by seller. The charge shall be equal to \$.03 per pound of fish and/or shellfish and the cost of the box. In addition a wharfage charge shall be assessed against fish landed by vessels.
6. Services and rates, not specifically provided in the schedule of charges, shall be the subject of special arrangements with the Port Authority.

Effective:

OTHER CHARGES

Discharging of Fish

For all vessels requiring discharging only services, and not selling product at the auction, the discharge services and charges will be at the discretion of the Manager.

Any other costs associated with the handling of fish at The Fishport will be agreed upon prior to discharge.

The Port Authority may provide additional services at rates to be specified by the Fishport Manager.

LUMPERS: Furnishing of

The Port Authority will furnish lumpers at the vessel's request to unload all species of fish or shellfish. Charges for this service are available from the Fishport Manager upon request.

ICE TO VESSELS: Furnishing of

The Port Authority shall furnish all ice for vessels docked at the Fishport. The charge per ton of ice will be available from the Fishport Manager upon request by the vessel. The icing of vessels shall be done at hours set by the Port Authority upon prior notification by the vessel operator.

FUEL FOR VESSELS: Furnishing of

The Port Authority shall furnish all fuel for vessels docked at the Fishport. The charge per gallon of fuel will be available from the Fishport Manager upon request. The fueling of vessels shall be done at hours set by the Fishport Manager upon prior notification by the vessel.

BOXES: Furnishing of

The Port Authority shall sell fish handling boxes at charges to be specified by the Fishport Manager.

1987 Budget

It was reported that copies of the Budget for the year 1987 have been in the hands of all the Commissioners for their review, having first been presented to the Commissioners on October 29, 1986. The 1987 Budget is a product of the Port Authority's internal planning process and represents the estimated expenditures necessary to achieve the organization's objectives. These objectives are: to strengthen the Port Authority's capacity; to strengthen the competitive position of the Port of New York-New Jersey region; to provide a level of service that is responsive to current and projected changes in demand; and to expand the range of economic opportunities available to businesses in and residents of the region. The Budget is a financial planning tool which outlines the estimated expenditures for programs already authorized or to be considered by the Commissioners. Approval of these recommendations will enable the Port Authority to accomplish its mission.

The 1987 Budget for The Port Authority of New York and New Jersey, including the anticipated expenditures of subsidiary corporations, totals \$2.1 billion. It consists of approximately \$761 million in capital program expenditures and \$1.1 billion of operating expenses (including \$50 million, in addition to amounts previously authorized, related to retention, subject to approval by the Chairman of the Committee on Operations in accordance with selection guidelines filed with the Committee, of professional, technical or advisory services), \$190 million of debt service charged to operations and reserves, \$53 million of expenditures for the Fund for Regional Development and \$64 million of other expenditures, mostly related to future years (all exclusive of certain amounts which are reimbursable under the New York State Commuter Railroad Car Program).

The 1987 capital expenditures are for projects related to the Port Authority's Aviation, Interstate Transportation Network, Port, Economic Development and World Trade facilities and include a provision of \$10 million for emergency repairs. The Budget also includes \$75 million for expenditures on projects identified by the States of New York and New Jersey from funds made available for regional economic development pursuant to the Governors' agreement of 1983, and an allowance of \$50 million for projects in development. Expenditures for construction contracts included in the 1987 Budget are shown in Exhibit A-2.

In 1987, Aviation's activities will be devoted to improving the capacity of the regional system of airports to meet current and future growth in passenger and air cargo traffic, and ensure the competitive position of the region's airports. Major investments in 1987 include the completion of Terminal C and expansion of parking lots at Newark International Airport, as well as on-airport improvements at LaGuardia Airport. At Kennedy International Airport, expenditures are related to the Nassau Expressway, additional air cargo facilities and implementation of a computerized air cargo inventory and clearance system. The Budget also provides for project development related to the major redevelopment of central terminal facilities and on-airport circulation systems at Kennedy International Airport (JFK 2000), and the substantial upgrading of ground access and circulation systems and parking at Newark International Airport (NIA 2000).

For Interstate Transportation Network facilities, the 1987 Budget provides for continued rehabilitation and modernization of the PATH system and tunnel and bridge facilities to increase their capacity, safety, security and structural integrity and to develop new interstate capacity by advancing a project to provide ferry service from Hoboken to lower Manhattan. PATH's plans provide for rehabilitation and the purchase of cars, station improvements and continuation of safety upgrading. The Budget also provides for the purchase of buses for use in the States of New York and New Jersey under the Port Authority Bus Programs.

(Board - 4/9/87)

The Port Authority's marine terminal facilities will be modernized and expanded to provide capacity and to improve the competitive position of the port. Deepening of the Kill Van Kull and Newark Bay channels will be started, property will be acquired and construction of distribution buildings will be begun in Elizabeth, a new automobile import distribution facility will be developed in Bayonne and Jersey City, and the Fishport project in Brooklyn will be substantially completed.

Consistent with applicable legislation, the 1987 Budget provides for the Port Authority to expand business and employment opportunities in the region's inner cities. Provision is made for the expansion or acquisition of industrial parks in Yonkers, the Bronx and Newark and the Resource Recovery Facility in Essex County, New Jersey. Expenditures to substantially complete the Teleport on Staten Island and the Newark Legal and Communications Center, as well as advancing the Hoboken Waterfront Redevelopment Projects, are included in the Budget.

A provision of \$400,000 is also included to reimburse the States of New York and New Jersey for expenses incurred by each State, including staff costs in reviewing the Port Authority's annual Budget and any amendments thereto.

The Board, at its meeting on December 11, 1986, acted to confirm the authority of the Executive Director to continue to make payments for expenses and to undertake contractual commitments through March 31, 1987, in accordance with the By-Laws, for continuing operations and professional services, all as contemplated in the proposed 1987 Budget presented to the Commissioners on October 29, 1986. The Board also acted to authorize the Executive Director to implement the annual salary range adjustment, including minor revisions in benefit programs to approve and authorize the appropriation for the purpose of capital expenditures to be made in 1987 of funds paid into and available in the Consolidated Bond Reserve Fund; and to continue the Port Authority's practice of annually setting aside amounts towards covering self-insured contingent losses. On March 12, 1987, the Board again acted to confirm the authority of the Executive Director to continue to make payments for expenses and to undertake contractual commitments through April 30, 1987.

It was therefore recommended that the 1987 Budget be approved. The Executive Director's authority, pending final adoption and approval of the annual Budget, to make operating expenditures and undertake contractual commitments for continuing operations and professional services would also be confirmed.

Whereupon, the following resolution was unanimously adopted: Commissioner Schulman stating that, "As I have previously stated, I dissent from so much of the proposed Budget approval which would provide for Port Authority operation of a significant deficit Trans-Hudson ferry passenger service, which I regard as financially imprudent, considering the surrounding facts and circumstances, particularly the history of a most substantial continuing operating deficit for PATH passenger service":

RESOLVED, that the following Budget for The Port Authority of New York and New Jersey be and the same hereby is approved and adopted for the year 1987, including authority for the Executive Director to retain, in accordance with appropriate procedures, professional, technical or advisory services, which is hereby recognized:

THE PORT AUTHORITY OF NEW YORK AND NEW JERSEY
Including Subsidiary Post Authority Trans-Hudson Corporation

(Board - 4/9/87)

RESOLVED, that, based upon a requisition of the Governor of the State of New York or the Governor of the State of New Jersey, or the duly authorized designee of each, the Port Authority shall pay to the State of New York or the State of New Jersey, or both, upon receipt of an appropriate expenditure plan from said State, an amount not in excess of \$200,000 to each said State to reimburse said State or States for expenses incurred by said State or States, including staff costs, in reviewing the 1987 annual Budget of the Port Authority and any amendments thereto.

Whereupon, the meeting was adjourned.

 Martin E. Robins, Director of Planning and Development
 Victor T. Strom, Director of Public Safety
 Joseph L. Vanacore, Assistant Executive Director/Capital Programs
 Kristina E. Weisenstein, Administrative Assistant to the Executive Director

The meeting was called to order by the Chairman.

Action on Minutes

The Secretary submitted for approval Minutes of the meeting of April 9, 1987. She reported that copies of these Minutes were sent to all the Commissioners and to the Governors of New York and New Jersey and that the time for action by the Governors of New York and New Jersey had expired.

Whereupon, the Board unanimously approved the Minutes.

Report of Committee on Construction

The Committee on Construction submitted a report, for information, of action taken at its meeting on May 14, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Finance

The Committee on Finance submitted a report, for information, of action taken at its meeting on May 14, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Operations

The Committee on Operations submitted a report, for information, of action taken at its meeting on May 14, 1987, in addition to matters filed with the Committee pursuant to Board action or separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

Report of Committee on Port Planning

The Committee on Port Planning submitted a report, for information, of action taken at its meeting on May 14, 1987, in addition to the matters separately reported to the Board of Commissioners at this meeting of the Board, and the report was received.

(Board - 5/14/87)

**Multi-Facility (New York) - Asbestos Removal Via Work Order -
Contract EXD-100.367**

Contract EXD-100.367, a call-in asbestos removal contract, was prepared to enable staff to expeditiously handle the removal of relatively small quantities of asbestos from Port Authority and PATH facilities in New York. The contractor is required to remove and dispose of, away from Port Authority and PATH facilities in New York, asbestos and asbestos-contaminated materials for a one-year period, in accordance with work orders issued by the Engineer. The contract also includes a provision to extend the term for an additional one-year period under the same terms and conditions.

The contractor may be called upon to remove asbestos prior to the performance of non-asbestos work by other contractors performing other contracts.

Staff does not at present anticipate ordering more than \$500,000 of work per year under this contract. In addition, it is not presently anticipated that the contractor's compensation under any one work order will exceed \$50,000.

The contractor will be compensated in an amount equal to the net cost of the work order plus: an amount equal to 21% of the portion of the net cost of the work order that does not exceed \$15,000, plus 20% of the portion of the net cost of the work order that exceeds \$15,000 but does not exceed \$35,000, plus an amount equal to 18% of the portion of the net cost of the work order that exceeds \$35,000.

The contract was publicly advertised and bidders were requested, solely for the purpose of comparison of proposals, to calculate a weighted average fee based upon varied amounts of work ordered.

The following bids were received on February 26, 1987:

	Weighted Average Fee
Mario and DiBono Fireproofing Corp. New Hyde Park, New York	11%
Rainbow Construction Company, Inc. Oakhurst, New Jersey	14%
Owners Realty Management and Construction, Inc. College Point, New York	20.28%
Jack's Insulation Contracting Corp. Astoria, New York	27.42%
Strategic Organizational Systems Environmental Engineer Div., Inc. San Francisco, California	29.29%
Brand Asbestos Control Co., Inc. Park Ridge, Illinois	30.29%

(Board - 5/14/87)

Because of the sensitive nature of this work, the potential risk to public safety and the potential liability to the Port Authority if the work were improperly performed, the qualifications and experience of the contractor performing this work is of the utmost importance. The Chief Engineer deemed the first and second lowest bidders not qualified to perform the work due to their lack of experience in performing asbestos abatement work. Owners Realty Management and Construction, inc., the lowest qualified bidder, is an experienced asbestos abatement contractor and the Chief Engineer deemed it qualified to perform the contract.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to award Contract EXD-100.367, Multi-Facility (New York) - Asbestos Removal via Work Order, to Owners Realty Management and Construction, Inc., the lowest qualified bidder, at its bid price in the weighted average fee of 20.28%, plus the actual net cost of the labor, materials, equipment and related expenses required to perform the work; and it is further

RESOLVED, that the Chief Engineer is authorized to exercise the option to extend the term of Contract EXD-100.367 for an additional one-year period under the same terms and conditions; and it is further

RESOLVED, that the form of such exercise of option is subject to the approval of General Counsel or his authorized representative.

(Board - 5/14/87)

**Bayonne Bridge - New Jersey Route 169 - Section 2D-1E -
Authorization for Port Authority Participation**

The New Jersey Department of Transportation ("NJDOT") has been advancing a comprehensive highway improvement program in the Bayonne-Jersey City corridor. An element of this program is the extension of New Jersey Route 169 from its present terminus in a southerly direction to the Bayonne Bridge. Said extension will enhance the movement of approximately two-thirds of the "thru traffic" to the Bayonne Bridge, a Port Authority facility.

At its meeting on September 12, 1985, the Board authorized, inter alia, the Acting Executive Director to enter into an agreement with NJDOT to provide up to \$27.0 million from the funds made available for New Jersey projects pursuant to the Governor's Agreement of June 1983 for the design and construction of the portion of Route 169 between the Bayonne Bridge and Station 76+00, a distance of 1.3 miles.

Section 2D-1E of Route 169 is adjacent to the portion previously funded by the Board. Construction of this section includes the grading, drainage and roadway paving work from the vicinity of 14th Street to 30th Street in Bayonne. The State of New Jersey has requested that the Port Authority provide an amount not to exceed \$19.6 million for completion of Section 2D-1E. This amount is to be allocated in the following manner: \$5.5 million reimbursement to NJDOT for construction costs previously expended on this section, \$12.3 million for new construction on this section and an estimate of \$1.8 million reimbursement to NJDOT for its engineering costs in supervising the construction.

The following resolution was unanimously adopted:

RESOLVED, that the Executive Director is authorized to enter into an agreement with the New Jersey Department of Transportation ("NJDOT") to provide the funding for the construction of Section 2D-1E of New Jersey Route 169 in Bayonne, New Jersey including the costs for engineering supervision of the construction; and it is further

RESOLVED, that the Executive Director is authorized to transfer to the State of New Jersey, acting through the NJDOT, an amount not to exceed \$19.6 million from the funds made available for New Jersey projects pursuant to the Governor's Agreement of June 1983; and it is further

RESOLVED, that the form of agreement be subject to the approval of General Counsel or his authorized representative.

(Board - 5/14/87)

**Air Cargo Fast Flow - Increase in Project Authorization -
Contract with Arthur Andersen & Co. - Adjustment of
Contract Prices and Increase. in Authorization of
Contingency Funds**

At its meeting on February 13, 1986, the Board authorized the Air Cargo Fast Flow (ACFF) design, development, implementation and corresponding expenses at an estimated project cost of \$16.5 million and two years of operations and maintenance and expenses at an estimated cost of \$6 million. The Board also authorized the Executive Director to enter into an agreement with Arthur Andersen & Co. for system design, development and implementation, and for two years of operations and maintenance and expenses, with provision for contingency funds not to exceed 10% of the contract price. Additional project funds were authorized for the Executive Director to enter into agreement(s) with vendor(s) for data processing and communication equipment and services as required for implementation of the system.

The contract entered into with Arthur Andersen was at a negotiated amount not to exceed \$10.8 million and included detailed system design (Phase I); development and implementation (Phase II); and system operation and maintenance for the first two years (Phase III) to be performed at up to the following amounts:

Detailed System Design:	\$2.4 million (Phase I)
Development and Implementation:	\$4.1 million (Phase II)
System Operation and Maintenance (for 2 years):	\$3.0 million (Phase III)
Expenses (space rental, communication lines, etc.):	\$1.3 million
Total	\$10.8 million

Upon completion of the functional design task of the project, which involved a detailed analysis of ACFF user requirements, it was determined that additional and enhanced system capabilities would be required to successfully implement ACFF and in turn would substantially increase the scope of work for Phases I and II of the contract. Accordingly, under Phase I, contingency funds were allocated to provide for the design of new and more complex functions required by users to complete import transactions and changes to comply with new U.S. Customs requirements. An adjustment in the contract price for Phase II is now required to compensate Arthur Andersen for anticipated increased staff time and expense to develop and implement the expanded Phase I design.

Additional contingency funds are required to design and implement new functions to ensure compatibility with ongoing efforts by U.S. Customs to automate customs procedures. Contingency funds are also required to develop additional communication and scheduling services which staff believes will enhance the marketability of ACFF to the user community.

(Board - 5/14/87)

To date, contingency funds allocated under Phase I amount to \$1,080,300 which is within the 10% allowance under the existing contract. An adjustment in the contract price of Phase II is now required in order to allow for complete development and implementation of the Phase I design effort because of an anticipated increase in staff time and expenses associated with the enhanced system. For the development and implementation of the work for Phase II, staff and Arthur Andersen & Co. have agreed, subject to Board approval, on a negotiated additional amount of \$2.5 million, including expenses, which staff deems fair and reasonable. Additional contingency funds of \$1.5 million will be required for anticipated additional functionality necessary to ensure that ACFF is compatible with the evolving implementation of the U.S. Customs Automated Commercial System (ACS). The additional \$1.4 million in project funds is for increases in engineering, administrative and financing expenses associated with the extended time frame for development required to complete ACFF and ensure its compatibility with the National Customs System.

Staff currently anticipates the ACFF system will begin phased implementation starting in the last quarter of 1987 through the first quarter of 1988. ACFF is developing concurrently with U.S. Customs' ACS, which includes the Automated Broker Interface and the Automated Manifest System. As ACS develops based on technical and regulatory concerns, ACFF will need to remain compatible and evolve in conjunction with the National Customs System which may require additional changes to the functional design.

The following resolution was unanimously adopted:

RESOLVED, that the Board authorize: (1) an increase in the total project cost for design, development, implementation and related expenses for the Air Cargo Fast Flow System (ACFF) from \$16.5 million to an estimated \$21.9 million; and (2) an adjustment in the contract price between the Port Authority and Arthur Andersen & Co. for: (a) development and implementation of ACFF from \$4.1 million to \$6.3 million; (b) an increase in reimbursable expenses from up to \$1.3 million to up to \$1.6 million; and (c) an increase in the authorization for contingency funds from 10% of the original contract price or \$1.1 million, to \$2.6 million.

(Board - 5/14/87)

**Kennedy International Airport - Nassau Expressway - Amended
Authorization**

At its meeting on June 12, 1986, the Board authorized an increase in the project authorization for Port Authority participation (to the extent eligible under applicable legislation) in the financing of roadway connections at Kennedy International Airport with the Nassau Expressway and Southern Parkway to an expenditure presently estimated at \$38 million, including payments to the State of New York for the Port Authority's financial participation in the State's Nassau Expressway Project. Additionally, the Executive Director was authorized to enter into agreements with the State of New York and the City of New York including, among other things, the acquisition and conveyance of property interests in certain roadway areas and the amendment of the Kennedy International Airport Air Terminal premises.

The work for which the Board authorized an increase in the financial participation by the Port Authority includes important elements of the capital program for Kennedy International Airport, recently presented to the Governors of New York and New Jersey.

Additionally, the NYSDOT wishes that the Port Authority transfer to a designated account, pursuant to the already authorized cost-sharing agreement, the Port Authority's participatory share of sums of money needed for the contracts New York State anticipates advertising on an expedited schedule.

Subsequently, in accordance with the Agreement with the City of New York with respect to Municipal Air Terminals, the Port Authority would immediately convey such property interests to the City without consideration and such property in accordance with the provisions of the Municipal Air Terminal Agreement shall become part of the demised premises.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Executive Director be and he hereby is authorized: (1) pursuant to cost-sharing agreements, to deposit with the New York State Department of Transportation the Port Authority's estimated financial share of Nassau Expressway work at Kennedy International Airport, when the Port Authority acquires from New York State for statutory Air Terminal purposes the lands, or rights, or easements or interests therein where such work will be performed; and (2) at the time of such acquisition from New York State, at his discretion, to designate certain areas in which the above mentioned lands, or rights, or easements or interests therein are acquired, as Air Terminal Highways; and it is further

RESOLVED, that the form of all documents necessary to implement the foregoing be subject to approval of General Counsel or his designated representative.

(Board - 5/14/87)

**All Airports - School Soundproofing Programs 1983-1985 -
Increased Project Authorization and Award of Contract
MF110.002 to Soundproof Four New York City Public
Schools**

The Board at its meetings on April 12, 1984, July 12, 1984 and March 14, 1985 authorized annual school soundproofing programs estimated at \$2.5 million for 1983, \$2,650,000 for 1984 and \$4.4 million for 1985. The 1986 program authorized by the Board at its meeting on February 13, 1986 in the amount of \$6 million is presently in design.

The estimates used for the various yearly program authorizations were very preliminary because of the lack of definitive data at the time. Following each authorization, the Port Authority executed agreements with the school governing bodies. Except for the Board of Education of the City of New York, the school governing bodies then retained architectural consultants to analyze the soundproofing requirements and prepare definitive designs and estimates, and then awarded construction contracts for the work. The Port Authority retained the consultant for the New York City schools, and Contract MF110.002 will provide for performance of the work. In most cases, the extent of required work was greater than originally expected. Also, delays by the respective governing bodies in progressing the projects resulted in cost increases because of inflation. These anticipated cost increases were reported to the Board at its meeting on February 13, 1986, when authorization for the 1986 program was received.

Of the thirteen schools covered by the 1983, 1984 and 1985 programs, the work at eight schools is virtually complete, and at the remaining five schools the construction will start this summer. The completed soundproofing work resulted in a significant reduction in aircraft noise intrusion levels, creating a better teaching environment in the classrooms. The programs continue to be received very favorably by local elected and school officials.

All of the work is being Federally funded under the Airport Improvement Program which allows funding at an 80% rate. The cost increases will cause more than 20% participation by the Port Authority because Federal grants were based on the original lower estimates. Increased Port Authority participation will be offset, in part, by amendments which will increase the original grants by a maximum of 10%.

The scope of Contract MF110.002 consists generally of replacing exterior windows and doors with acoustically designed units and providing additional mechanical ventilation where required.

Bids were solicited by public advertisement and the following bid was received on May 12, 1987:

Iannelli Construction Co.	
Brooklyn, New York	\$2,112,260

The low bid was submitted by Iannelli Construction Co., which was recommended as qualified by the Chief Engineer. The contract includes a provision that the bidder use every good faith effort to meet a goal of Minority Business Enterprise participation of 10% for firms owned and controlled by minorities and 1% for firms owned and controlled by women.

(Board - 5/14/87)

The following resolution was unanimously adopted:

RESOLVED, that the Board authorizes:

A. increases in the authorization for the following school soundproofing programs:

1. 1983 Program from \$2,500,000 to \$2,765,000
2. 1984 Program from \$2,650,000 to \$2,915,000
3. 1985 Program from \$4,400,000 to \$4,625,000

B. the Executive Director to award Contract MF110.002, Noise Reduction Project, Public Schools 120, 104, 143 and 181, Borough of Queens, New York City, to Iannelli Construction Co. the low bidder, at its total price in the amount of \$2,112,260 and to order extra work up to \$210,000.

(Board - 5/14/87)

All Airports - Consolidated Ground Transportation Counter Program

The consolidated ground transportation counter program was developed to provide the public with an efficient, organized and unbiased means to obtain ground transportation information and make reservations with participating transportation companies. The program was initially tested in 1982 at LaGuardia Airport's Eastern Shuttle Terminal and has since been expanded to twelve locations at the Port Authority's three major airports. Four additional counters are currently under construction and over the next year, staff will be negotiating with unit terminal airlines to install an additional three counters.

The counters at the three airports are staffed by approximately 162 agents from the Council for Airport Opportunity (CAO), a local agency with offices in Queens, New York and Newark, New Jersey, which promotes minority and local employment opportunities in the New York/New Jersey metropolitan area.

The current project authorization for the consolidated counter program expires May 28, 1987. Approximately \$2,320,000 will be required for support services to operate the counters for an additional one-year period, including expenses for Port Authority supervision, maintenance, computer hardware and services and the construction of three new consolidated ground transportation counters.

The agreement currently in effect with the CAO expires July 9, 1987. The proposed new CAO contract would commence July 10, 1987 and terminate May 28, 1988, and shall provide for administrative, training, supervisory and staffing services to support nineteen consolidated counters at the three airports. The cost to the Port Authority for the CAO contract will be:

Kennedy International Airport	\$1,107,000
LaGuardia Airport	1,417,000
Newark International Airport	<u>1,040,000</u>
CAO Staffing	3,564,000
Contingency for additional CAO staffing (15%)	535,000
Subtotal	\$4,099,000
Computer System Costs	867,000
Counter Installation & Supplies	685,000
Port Authority Staff Costs	768,000
Subtotal	\$2,320,000
Total Project Expenditure	\$6,419,000

The following resolution was unanimously adopted:

RESOLVED, that an increase in project authorization for the operation of consolidated ground transportation counters at Kennedy International, Newark International and LaGuardia Airports for a one-year period commencing May 29, 1987 at an estimated amount of \$6,419,000, which includes payments to the Council for Airport Opportunity, payments to contractors and funding for administrative, general and financing expenses and the procurement of additional ground transportation counters and communications equipment is authorized; and it is further

(Board - 5/14/87)

RESOLVED, that the Executive Director is authorized to enter into an agreement with the Council for Airport Opportunity commencing July 10, 1987 and terminating May 28, 1988 for administrative, training, supervisory and staffing services for the operation of consolidated ground transportation counters at Kennedy International, Newark International and LaGuardia Airports in the amount of \$3,564,000 and to order additional staffing of counters up to an amount equal to 15% of the aforementioned \$3,564,000; and it is further

RESOLVED, that the form of the foregoing agreement is subject to the approval of General Counsel or his authorized representative.

(Board - 5/14/87)

Port Authority Heliports: Revision to the Schedule of Charges and Delegation of Authority to the Executive Director to Increase the Schedule of Charges; and Downtown Manhattan Heliport - Request for an Increase in Project Authorization and Construction Costs

The Port Authority began operating the Downtown Manhattan Heliport in 1960 on a pier that was built in the late 1800's. It was badly deteriorated by the fall of 1983 and had to be closed. The Port Authority entered into an agreement with Battery Park City Authority to immediately relocate the heliport to the southern tip of their premises, with a license that was to expire April 1, 1986, which was the date the site was needed for development of Battery Park City, but Battery Park has permitted the Port Authority to continue occupancy on a month-to-month basis. This necessitated an expedited design and construction schedule so that relocation of the heliport could be completed by that date.

The Board, at its meeting on October 13, 1983, authorized the Executive Director to enter into an agreement of lease with the City of New York covering the Downtown Manhattan Heliport (consisting of approximately 7.5 acres of land under water, including the Pier 6 Heliport). In addition, the Board authorized construction of a permanent air terminal by the Port Authority for use as a public heliport for a 20-year term. The construction included the demolition of the then existing Pier 6 and reconstruction of the pier including new piling, fencing, paving, lighting, a new terminal building with office areas and related facilities, for a total project authorization of \$5.9 million. Subsequently, the Board, at its meeting on December 12, 1985, increased the project authorization to \$9.1 million from such \$5.9 million to provide for an upgrading of the design of the terminal building, increase the number of helicopter parking positions and provide for increased administrative, general and financial expenses.

The Schedule of Charges for Heliports was last revised on May 1, 1985. It is proposed the charges be increased effective July 1, 1987 to make them comparable with those of the other commercial heliports in Manhattan. The Aviation Department periodically reviews the Port Authority Heliports' Schedule of Charges, and, based upon market conditions, utilization of the heliports, and the recovery of the Port Authority's investment and costs of operation of the heliports, determines if revisions should be made to the Schedule of Charges. To facilitate making such revisions, staff recommends that the Board authorize the Executive Director to increase the Port Authority Heliports' Schedule of Charges from time to time as he deems appropriate based upon the foregoing.

The expedited Downtown Manhattan Heliport reconstruction program was organized into four contracts: (1) Pier Demolition, DMH-110.003, (2) Pier Reconstruction, DMH-110.004, (3) Helicopter Parking Barge and Seaplane Docking Float, DMH-110.005, and (4) Terminal Building, DMH-110.006.

The proposed \$4.0 million increase in the project authorization is due to the following: (a) receipt of higher bids than anticipated for two of the four contracts (Helicopter Parking Barge - DMH-110.005 and Terminal Building - DMH-110.006) exceeding the estimated amounts by \$1.1 million; (b) additional work being required as the project was

(Board - 5/14/87)

refined from its broad concept to actual design increasing the project costs by an additional \$1.7 million. Included in such amount of \$1.7 million is the requested increase in the contingency allowance for Contract DMH-110.004 of \$200,000 required in connection with bringing utility services to the terminal building and making modifications to the pier construction to provide for necessary electrical systems; a requested contingency allowance for Contract DMH-110.005 of \$200,000 required in connection with the seating and stabilizing of the supporting barge ballast; and the requested \$500,000 for Supplemental Agreement No. 1 to Contract DMH-110.006 providing for interior tenant finishes and additional exterior security lighting and fencing; and (c) increases in related engineering, administrative and financial costs accounting for the remaining \$1.2 million.

The aforementioned increases are partially offset by an additional \$0.5 million in receipt of Federal funds under the Airport Improvement Program, bringing the total Federal assistance for this project to an estimated \$6 million.

The requested increases do not include claims submitted in connection with Contracts DMH-110.005 and DMH-110.006 that are currently being reviewed by staff and which, based on their resolution, may require further Board action. J.E. Brenneman Co. has submitted a claim under Contract DMH-110.004 in the amount of \$2.5 million, alleging additional costs and damages arising out of, among other things, delays relating to project developments affecting pier construction. The other claim, submitted by Bristol Construction, is in the amount of \$250,000 and arises out of a claim by Bristol's steel fabricator alleging extra expenses incurred under Contract DMH-110.006.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that the Board authorize:

1. That the Schedule of Charges for the use of the Port Authority West 30th Street Heliport, adopted by the Committee on Operations, at its meeting on April 4, 1954, as amended, and the Schedule of Charges for the use of the Port Authority Downtown Manhattan Heliport, adopted by the Committee on Operations, at its meeting on December 8, 1960, as amended, and the Schedule of Charges for the use of the World Trade Center-Battery Park City Heliport, adopted by the Committee on Operations at its meeting on October 13, 1983, as amended, be amended effective July 1, 1987, as follows:

a. By amending subparagraph 1 of the Section entitled "Take-Off Charges" to read as follows:

"(1)(A) For each take-off of a helicopter having a maximum gross weight up to 4,000 pounds - \$25.00;

(B) For each take-off of a helicopter exceeding 4,000 pounds but not exceeding 6,000 pounds maximum gross weight - \$32.00;

(C) For each take-off of a helicopter exceeding 6,000 pounds but not exceeding 8,000 pounds maximum gross weight - \$37.00;

(Board - 5/14/87)

(D) For each take-off of a helicopter exceeding 8,000 pounds but not exceeding 10,000 pounds maximum gross weight - \$45.00;

(E) For each take-off of a helicopter exceeding 10,000 pounds but not exceeding 12,000 pounds maximum gross weight - \$50.00;

(F) For each take-off of a helicopter exceeding 12,000 pounds but not exceeding 16,000 pounds maximum gross weight - \$55.00;

(G) For each take-off of a helicopter exceeding 16,000 pounds maximum gross weight - \$60.00; and

b. By amending the charges as set forth in subparagraph 2 of the Section entitled "Helicopter Parking Charges" to read as follows:

	"Next Hour	Each Additional Hour
Up to 8,000 pounds	\$15.00	\$10.00
8,001 to 16,000 pounds	\$40.00	\$25.00
Over 16,000 pounds	\$45.00	\$35.00"

2. the Executive Director to increase the Port Authority Heliports' Schedule of Charges from time to time as he deems appropriate, based on market conditions, utilization of the heliports and contribution to the recovery of the Port Authority's investment and cost of operation of the heliports;

3. an increase in the project authorization for the construction of the Downtown Manhattan Heliport from \$9.1 million to an expenditure presently estimated at \$13.1 million, including payments to contractors, a contingency allowance and administrative, general and financing expenses, such amount of \$13.1 million including the amounts specified in paragraphs 4, 5 and 6 below;

4. an increase of \$200,000 in the contingency allowance for Contract DMH-110.004 - Downtown Heliport - Pier Reconstruction;

5. a \$200,000 contingency allowance for Contract DMH-110.005 - Downtown Manhattan Heliport - Barge Installation, which amount of \$200,000 is to be in addition to the total amount previously authorized by the Board to be expended for such Contract DMH-110.005; and

6. the Executive Director to enter into Supplemental Agreement No. 1 to Contract DMH-110.006 - Downtown Manhattan Heliport - Terminal Building, providing for the construction of interior tenant finishes and additional exterior security lighting and fencing in the estimated amount of \$500,000, the form of such Supplemental Agreement No. 1. to be subject to the approval of General Counsel or his authorized representative.

(Board - 5/14/87)

Essex County Resource Recovery Facility - Authority To Amend Port Authority/REF-FUEL Agreements, The Port Authority/County of Essex County Service Contract and Other Related Agreements

At its meeting on April 11, 1985, the Board, among other things, authorized the Executive Director to enter into various agreements with American REF-FUEL Company of Essex County (REF-FUEL), a general partnership of subsidiary corporations formed by Browning-Ferris Industries, Inc. and Air Products and Chemicals, Inc., including a Service Agreement for the design, construction, start-up, and acceptance testing and operation of a mass burn Resource Recovery Facility located in the City of Newark, County of Essex, and a Conditional Sale Agreement under which the Port Authority is to provide advances to REF-FUEL to finance a portion of the construction costs related to the Facility. The Board also authorized the Executive Director to enter into agreement(s) with the County of Essex to effectuate the Resource Recovery project. Additionally, the Board authorized an increase in the total costs related to the Essex County Resource Recovery Facility to approximately \$343 million, with an increase in Port Authority expenditures or monies provided for financing in connection therewith to an amount not to exceed \$236 million, including approximately \$23 million in connection with certain contingencies for up to one year of construction delays and authorization to provide an amount estimated at \$61 million in 1985 dollars for capital costs resulting from the occurrence of unforeseen and other similar circumstances. The above authorizations were subject to the ability of the Port Authority to make necessary certifications, including those necessary prior to the issuance of Port Authority Consolidated Bonds.

The agreements with REF-FUEL and the County of Essex were executed by the parties in early 1986. However, due to delays caused by regulatory procedures and other factors, it has been agreed to amend certain provisions in the agreements with REF-FUEL and the County to reflect the following major changes:

1. The agreements with REF-FUEL currently provide that REF-FUEL is to provide equity capital in an amount equal to at least 25% of specified elements of the cost of construction. This 25% provision was based on, among other factors, an anticipated value of Federal income tax benefits that would accrue to REF-FUEL from participating in the Resource Recovery project, including the value to REF-FUEL of accelerated cost recovery deductions and investment tax credits. REF-FUEL has asserted that the Tax Reform Act of 1986 (the Act) has a material adverse effect on the value of such accelerated cost recovery deductions and investment tax credits. Section 2.02 (23) of the Service Agreement, which Section is a condition precedent in the Service Agreement, provides that no change shall have occurred, after the execution of the Service Agreement and before the start of construction, in the Federal income tax laws applicable to REF-FUEL, its partners, parents, the grandparents or the Facility (i) having a material adverse effect on the value of the accelerated cost recovery deductions or the investment tax credits associated with the Facility or (ii) with respect to the deductibility of interest on indebtedness issued pursuant to or permitted by the Conditional Sale Agreement. In order to obtain REF-FUEL's consent to waive such conditions precedent the Port Authority has agreed to reduce REF-FUEL's provision of equity capital from 25% to 20%. This will not require any further amendments to the Project Authorization.

(Board - 5/14/87)

2. The Service Agreement provides that the Scheduled Acceptance Date of the Facility is set at 36 months from the start of construction, as extended for unforeseen circumstances, certain strikes and extra work. REF-FUEL has agreed to set the Scheduled Acceptance Date at 33 months in lieu of 36 months from the start of construction.
3. The Port Authority, under the Service Agreement, is required to pay REF-FUEL, as part of a Service Fee, an annual Base Operating Charge (BOC) for operating and maintaining the Facility. Such Service Fee also includes amounts for debt service on advances (and other permitted borrowings by REF-FUEL under the Conditional Sale Agreement) under the Conditional Sale Agreement and pass-through costs. In negotiations with REF-FUEL, it was agreed to increase the BOC to compensate REF-FUEL for increases in costs resulting from delays in construction, exchange rate impacts, and increases in insurance premiums. Accordingly, the BOC will be increased by \$2,380,000 to \$12,502,225, exclusive of escalation commencing January 1985.
4. A condition precedent to the Service Agreement provides that to the extent REF-FUEL receives certain proceeds of a \$40 million grant, made available to the project through the County of Essex for purposes of constructing the Facility, REF-FUEL and the Port Authority are to agree on the tax effect of such receipt of proceeds on REF-FUEL's anticipated accelerated cost recovery deductions and investment tax credits associated with the Facility as well as the impact on REF-FUEL's taxable income under the Internal Revenue Code of 1954, as amended or successor law. Further, the Port Authority and REF-FUEL are to agree as to the method by which REF-FUEL is to be reimbursed for the diminution of such value and increased tax payable. In order to satisfy such conditions precedent, the Port Authority has agreed to compensate REF-FUEL for loss of tax benefits by including new components in the Service Fee paid to REF-FUEL.
5. The Port Authority has agreed to obtain certain property rights associated with permanent access for the facility by July 1, 1988, or one year after the start of construction, whichever is later. Additionally, the Port Authority has agreed to make available to REF-FUEL construction utilities as of the start of construction and permanent utilities within 600 days after the start of construction. Parties from whom real estate interests have to be obtained include the New Jersey Turnpike Authority, ConRail, Public Service Electric & Gas Company, the State of New Jersey and possibly others. In the event the Port Authority fails to meet such obligations by such times, REF-FUEL will have certain rights against the Port Authority under the Service Agreement, including specific performance and monetary damages.

(Board - 5/14/87)

The changes discussed above will result in amending the various agreements with REF-FUEL, the agreement with the County of Essex as well as other related agreements. The amendments to the Service Agreement or the County Service Contract will not be deemed effective until the necessary and appropriate action by REF-FUEL or the County of Essex has been taken. The amendments to the County Service Contract will result in increasing the tipping fee to be paid by the haulers of waste originating in Essex County.

It is recommended that the Committee on Construction be authorized to authorize the Executive Director to further amend or enter into such agreements with REF-FUEL, the County of Essex or such other necessary and appropriate parties as is necessary to effectuate the start of construction of the Essex County Resource Recovery Facility provided, however, that such amendments and/or agreements do not materially change the economic basis of the agreements with REF-FUEL and the County of Essex.

Whereupon, the following resolution was unanimously adopted:

RESOLVED, that subject to the ability of the Port Authority to make necessary certifications, including those necessary prior to the issuance of Port Authority Consolidated Bonds, the Board authorize: (a) the Executive Director to amend, as required, the various Port Authority agreements with American REF-FUEL Company of Essex County, the agreement with the County of Essex and other related agreements in connection with the Essex County Resource Recovery Facility, to reflect the following: (1) the reduction from 25% to 20% in the equity capital to be provided by REF-FUEL for specified elements of the cost of construction; (2) setting the Scheduled Acceptance Date at 33 months in lieu of 36 months from the start of construction; (3) increasing the annual Base Operating Charge paid to REF-FUEL under the Service Agreement by \$2,380,000, exclusive of escalation commencing from January, 1985; (4) providing for new components of the Service Fee paid to REF-FUEL under the Service Agreement; and (5) obligating the Port Authority, under the Service Agreement, to obtain certain property rights associated with permanent access to the Essex County Resource Recovery Facility and to provide for construction and permanent utilities, by dates certain; and (b) the Committee on Construction to authorize the Executive Director to further amend or enter into such agreements with REF-FUEL, the County or such other necessary and appropriate parties as is necessary to effectuate the start of construction of the Essex County Resource Recovery Facility, provided, however, that such amendments and/or agreements do not materially change the economic basis of the agreements with REF-FUEL and the County of Essex, such authorization to further amend or enter into agreements being in addition to that previously authorized by the Board or any Committee of the Board of Commissioners to the Executive Director in connection with the Essex County Resource Recovery Facility; and it is further

RESOLVED, that the form of such amendments and/or agreements be subject to the approval of General Counsel or his authorized representative.

(Board - 5/14/87)

Newark South Ward Industrial Park - Amendment to Municipal Agreement Authorization and Facility Certification

On November 13, 1986, the Newark South Ward Industrial Park Project (the Facility) was authorized and the industrial development master plan was amended to include a site owned by the City of Newark (the City) in the South Ward of Newark, New Jersey. As a result of continuing negotiations with the City and the Newark Economic Development Corporation, it has been agreed that the City would convey marketable title to the site for the Facility to the Port Authority for an amount equal to the January 1, 1986 assessed value of existing City-owned land and improvements (which is approximately \$571,000 rather than the \$1 consideration previously contemplated) and would be paid from project net revenues. Project net revenues would be shared equally by the City and the Port Authority, after payment to the City for the assessed value of City-owned land within the Project Site is made, and after the approximately \$5 million allocated for the Facility from the funds made available for regional development projects in the State of New Jersey pursuant to the Governors' Bi-State Agreement of 1983 is replenished. For the purpose of the above-mentioned calculations, project net revenues are those amounts remaining from annual gross operating revenues once operating and maintenance related expenses, payments in-lieu-of taxes, administrative costs, Port Authority annual imputed debt service, and any accumulated shortfalls which have imputed debt service, and any accumulated shortfalls which have been carried forward from prior years, have been accounted for.

Therefore, the November 13, 1986 authorization to enter into the Municipal Agreement for the Facility is to be amended to include a provision for such payment to the City from project net revenues. Capital funds for the project will be required in mid-1987.

The Newark South Ward Industrial Park will be an additional facility of the Port Authority, and therefore, at the time of issuance of the first Consolidated Bonds or Consolidated Notes for purposes which include capital expenditures in connection with the Facility, the Port Authority is required by covenants with holders of its Consolidated Bonds (including Consolidated Notes) to make a certification relating to the financial effect upon the Port Authority of the effectuation of the Facility as an additional facility of the Port Authority. Thus, certification is necessary if any portion of the proceeds of such Consolidated Bonds (or Consolidated Notes), the issuance of which in connection with this Facility is expected in the near future, is to be used for purposes of capital expenditures in connection with the Facility.

The Committee on Finance would be authorized to reaffirm the certification at the time of issuance of such Consolidated Bonds or Consolidated Notes for purposes which include capital expenditures in connection with the Facility. In default of said reaffirmation by the Committee on Finance of said certification, said certification shall not apply to the issuance of such Consolidated Bonds (or Consolidated Notes) and the proceeds thereof shall be used for the stated purposes of such bonds (or notes) other than the Facility, until such time as the Facility may be certified.

(Board - 5/14/87)

The Acting Chief Financial Officer has reviewed the projected overall financial standing and condition of the Port Authority and the economics of the Facility on the basis of the issuance of Consolidated Bonds (including Consolidated Notes) to provide for the total capital expenditures of or related to the Facility.

The Acting Chief Financial Officer has also reviewed with the Commissioners his formal opinion to them consistent with Section 7 of the resolutions establishing outstanding series of Consolidated Bonds (or Consolidated Notes) that, subject to his further opinion, at the time of issuance of the first Consolidated Bonds or Consolidated Notes for purposes which include capital expenditures for the Facility, the application of any portion of the proceeds of such Consolidated Bonds or Consolidated Notes in connection with the Facility will not, during the periods 1987 through 2022, reflecting the traditional 35-year term of Consolidated Bonds, and 1987 through 1997, the immediately ensuing ten-year period associated with Consolidated Bonds (including Consolidated Notes) with a maturity of less than ten years, in the light of the Port Authority's estimated expenditures in connection with the Facility and the total anticipated revenues and expenses of the Port Authority during those periods, materially impair the sound credit standing of the Port Authority of the investment status of Consolidated Bonds (including Consolidated Notes) or the ability of the Port Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds (including Consolidated Notes).

In reaching this conclusion, the Acting Chief Financial Officer considered the covenant with holders of Consolidated Bonds (including Consolidated Notes) to establish changes in connection with the Port Authority's facilities to the end that at least sufficient net revenues may be produced therefrom to provide for the debt service on all Consolidated Bonds (including Consolidated Notes), including those issued for purposes of capital expenditures in connection with the Facility. This conclusion was also based, in part, upon the judgment of the Acting Chief Financial Officer that the Port Authority's ability to continue to honor this covenant will necessitate increases from time to time in the Port Authority's tolls, fares, fees, rentals and other charges, or reductions in services and associated expenditures.

Whereupon, pursuant to the foregoing report, the following resolution was unanimously adopted:

RESOLVED, that the November 13, 1986 authorization providing for the Executive Director to enter into an agreement or agreements with the City of Newark and the Newark Economic Development Corporation for the development of the Newark South Ward Industrial Park (the Facility) be and it hereby is amended to include, in addition to the provisions previously authorized, provisions for the payment to the City of Newark in consideration for its conveyance to the Port Authority of City-owned land within the project site of an amount from project net revenues equal to the January 1, 1986 assessed value of existing City-owned land and improvements, which is approximately \$571,000; and it is further

(Board - 5/14/87)

RESOLVED, that, in the opinion of the Port Authority at the time of issuance of the first Consolidated Bonds or Consolidated Notes for purposes which include capital expenditures in connection with the Facility, the issuance of such Consolidated Bonds or Consolidated Notes will not, during the periods 1987 through 2022 and 1987 through 1997, in the light of the Port Authority's estimated expenditures in connection with the Facility and the total anticipated revenues and expenses of the Port Authority during those periods, materially impair the sound credit standing of the Port Authority or the investment status of Consolidated Bonds (including Consolidated Notes) or the ability of the Port Authority to fulfill its commitments, whether statutory or contractual or reasonably incidental thereto, including its undertakings to the holders of Consolidated Bonds (including Consolidated Notes); and it is further

RESOLVED, that the Committee on Finance be and it hereby is authorized to reaffirm said certification on behalf of the Port Authority at the time of issuance of the first Consolidated Bonds or Consolidated Notes for purposes which include capital expenditures in connection with the Facility, provided that there is no substantial adverse change in the economic basis for said certification; and it is further

RESOLVED, that, in default of a reaffirmation of said certification by the Committee on Finance, said certification shall not apply to the issuance of such Consolidated Bonds or Consolidated Notes and the proceeds thereof shall be used for the stated purposes of such bonds or notes other than the Facility, until such time as the Facility may be certified.
