seeking:

Penny Rudkin, of the Maritime Library, Southampton, suggested you may be able to help with a vessel's movements dated October 1989. The purpose is to track the prior location of a historic car which was landed in Southampton England on the 7th November 1989, by car transporter Nosac Ranger. She left New York to arrive at Antwerp on the 23rd October.

Penny has helped enormously by finding the vessel's movement records between Antwerp and Southampton.

I am interested in the vessel's movement records prior to leaving New York if possible to identify which part of the USA the car may have been loaded.

I appreciate this is not a high priority but it is part of a historical research project for the car. She was built in the UK in 1938 but has been off the radar for 50 years up until 1989.

I do hope it is possible that you can help or direct me to such an agency keeping this information.

please. Regards Steve Butler
